Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure
enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCl).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I am simply amazed that Three Farm Meadows has been left in the Local Plan following the unanimous vote against Wisley Property Investments back in April of this year. It all stinks of foul play and I would be interested to see what the reasons are as the reasons given for the planning refusal are not able to be fixed.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The number of new houses proposed arises from a Strategic Housing Market Assessment (SHMA) generated by a consultant's mathematical model which is not revealed in the plan, nor apparently has it been revealed to Guildford Borough Council (GBC). The Office of National Statistics has acknowledged a mistake in the numbers used by the SHMA and have updated their predictions, yet these revised figures are not reflected in the GBC Local Plan. The original unsubstantiated SHMA target housing number has been further increased by GBC to give a population increase which is almost 70% higher than the official national estimates for population growth in the Borough. The scale of this increase has alarming results e.g. an increase of up to 35% in existing West Horsley households – greater than any other single area in the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the development of over 2,000 houses at Ockham (former Wisley Airfield)

The impact on the Horsley villages of such a huge mixed housing, retail, commercial, traveller and schools development, under 2 miles away, would be enormous. The plan also includes extensive and inappropriate developments at Burnt Common (400 houses & commercial developments) and Gosden Hill Farm, Burpham (2000 houses & mixed use developments).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
5. Any public transport providers such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will, therefore, be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The associated traffic increase from the RHS has not been taken into account. The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”. Opportunity (3) should be common to all sites and is not unique to this site.
12. I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negating the setting of these buildings and the wider Ockham Conservation Area.
13. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
14. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).
15. I object to the removal of additional 3.1 ha from the green belt without any justification.
16. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
17. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
18. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
19. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
20. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
21. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
22. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
23. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
24. I object to the extension of the plan period by 1 year as it has not been identified as a major change.
25. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
26. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
27. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
28. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
29. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
30. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

31. I object to the housing number and particularly the fact that the Council have not, as required, used any constraints such as the green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

32. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2709  Respondent: 11000385 / Sheila Robins  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO the late inclusion of site A43 Garlicks Arch. This has been slipped in at the very last moment without proper consultation. The added 400 houses will cause overcrowding of our schools and doctors surgery. Our Villages Medical Centre is already over subscribed and difficult to get doctors appointments. Another 800 minimum people would completely swamp this facility. The 7000 sq mtrs of industrial area would also increase the amount of Commercial Vehicles in the area using the local roads. We hardly need industrial buildings, as past developments have stood empty for years.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT TO site A43A the on and off ramp at Clandon/Burnt Common. This will cause complete chaos in the area, as all roads leading to the junction are country roads leading from Clandon, Ripley and Send. At present it only takes an incident at Wisley/Junction 10 of the M25 and our villages are swamped with traffic. This junction will make the whole situation worse as the local roads are so narrow and are unable to be widened to suit increased traffic flow. The Send Road only leads to similar narrow roads in Old Woking and Hoebridge areas, which are also unable to be widened.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO the disproportionate amount of development on the A3 between Burpham and the M25 at Wisley. With 2000 houses at Wisley Airfield, 2200 homes at Gosden Hill Farm and 400 houses at Garlick’s Farm Send. This will make an urban sprawl in this part of Surrey and will completely change the environment for all the residents and who live here as well as increased air pollution from all the additional vehicles. There is a lack of evidence for the alleged housing need numbers.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO the disproportionate amount of development on the A3 between Burpham and the M25 at Wisley. With 2000 houses at Wisley Airfield, 2200 homes at Gosden Hill Farm and 400 houses at Garlick’s Farm Send. This will make an urban sprawl in this part of Surrey and will completely change the environment for all the residents and who live here as well as increased air pollution from all the additional vehicles. There is a lack of evidence for the alleged housing need numbers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the 2016 Draft Local Plan due to the lack of essential infrastructure.

In particular I feel that the proposed housing developments at Wisley and Gosden Hill, Merrow should not go ahead until the present traffic problems around the area, particularly on the A3, have been addressed.

If a tunnel is an option then the plans for this must be made before any developments in the area take place.

The proposed housing development would be totally out of character with the general character of the area and ruin it forever which is entirely unacceptable and unnecessary.

As previously mentioned the area could not sustain the proposed amount of new homes due to the lack of services, but equally as important the lack of drainage which is a real problem in the area at present (with flooding occurring in both summer and winter, often severe), not to mention the added need for more school places at the local school which is always at full capacity. The increased need for parking spaces would also make using the villages and parking for the Raleigh school incredibly difficult. The doctor’s surgery would also be impacted negatively, it is already difficult enough to get an appointment and sometimes impossible to park at the surgery due to large volumes of traffic.

To summarise, the area simply cannot cope with the amount of new homes provided with lack of services, parking spaces, insufficient school places, the extra burden on the doctors surgery and local hospital, inadequate drainage and is totally at odds with the character of the area in general. These are all very serious considerations which will severely impact the Horsleys but above all the Green Belt simply has to be protected.

I seriously question why the proposed sites are being considered when there is an existing and highly sustainable local town, namely Guilford, where there is a fully workable and tested infrastructure, undeveloped brown sites, the space to do so and it is NOT the Green Belt.

I trust my comments will be taken seriously and the due amount of consideration is used when making this crucial decision.

POLICIES I1, I2 & I3

These three policies cover Infrastructure & Delivery, Supporting the Department of Transport’s ‘Road Investment Strategy’ and Sustainable Transport. Whilst we support the general policy statements as presented in each case, it is the detailed infrastructure proposals for Guildford Borough which give us cause for concern.

I believe there are serious deficiencies and shortcomings in the infrastructure of Guildford Borough as it is today and that the aggressive housing policy as proposed by GBC in the Proposed Submission Local Plan will exacerbate this problem.

Do you consider this section of the document; complies with the Duty to Cooperate? ()  is Sound? ()  is Legally Compliant? ()

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P2: Green Belt

Local Plan Policy P2 states that: We will continue to protect the Metropolitan Green Belt. I fully and un-equivocally support this policy.

Unfortunately, despite such brave words, GBC appears to be in breach of this policy itself through the housing policies that it has set out in the Local Plan. The analysis included in the Appendix shows that around 65% of the developments proposed in the Proposed Submission Local Plan are to be built on land currently within the Metropolitan Green Belt. We consider this outcome to be outrageous.

Under NPPF rules, GBC is permitted to make allowance for factors which may constrain the delivery of new housing, such as the need to protect the Metropolitan Green Belt or the restrictions required to protect the Surrey Hills Area of Outstanding Natural Beauty (‘AONB’) which is offered protection under the NPPF comparable to that of a national park. Although these areas make up a large proportion of the land area of Guildford Borough, GBC makes no attempt to reduce its housing delivery in order to take account of such constraints. I find this approach inexplicable.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ()  is Sound? ()  is Legally Compliant? ()

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy S2: Borough Wide Strategy

This policy sets out the objective of adding 13,860 new homes to Guildford Borough over the 2013-2033 period of the Proposed Submission Local Plan, equating to an annual build of 693 new homes per annum.

The enormous scale of this building programme, which represents a net increase of 25% in the housing stock of Guildford Borough, a remarkable rate of increase for a borough in the English Home Counties. It is even more remarkable when the official statisticians at the Office of National Statistics (“ONS”) are projecting a population increase of some 15% for Guildford Borough over this same period.

Some explanation for this mismatch may partly be found in the conclusion of the West Surrey Strategic Housing Market Assessment, (“SHMA”), which looks at how the annual housing target of 693 homes is comprised. It estimates that 517 homes per annum arise from ‘the demographic starting point’ – effectively what the official statisticians at the ONS and the Department of Communities and Local Government (“DCLG”) are predicting Guildford will require based upon their population and household forecasts. To this is added in the SHMA another 120 homes per annum in order to ‘support economic growth’, a further 31 homes per annum to ‘improve affordability’ and 25 homes due to ‘student growth’, all of which totals up to 693 homes per annum target.

Economic growth is already factored into the statistics produced by ONS and DCLG, so what GBC are proposing actually comes on top of the official household growth forecasts for the borough. Moreover, the GBC Affordable Housing Policy H2 is proposing that all development sites (other than the very smallest) will be required to have 40% of their homes offered as affordable housing, so why another 31 homes per annum is needed as affordable housing on top of this 40% ratio is quite incomprehensible.

Furthermore, DCLG research has concluded that there is on average a 97% correlation between population growth and household formation. Therefore, if GBC’s target of a 25% increase in housing stock were actually realised, the outcome will be that Guildford Borough would see its population rise by around 25% over this period. This means that the resultant population growth for Guildford Borough would be at a level 67% higher than the official forecasts.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am concerned that there is a lack of transparency in how the consultants have reached the housing need figures.

With the United Kingdom is now exiting the EU and this will have the effect of reducing immigration figures.

There seems to be a lack of insight into changing retail usage and the fall in the need for retail floor space that could be freed up for residential homes, government planning policy recognises this and has made change of use easier. This would reduce the need for building on greenbelt and make town centres more vibrant with a higher number of residents using the facilities available.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
However I OBJECT strongly to the scale of extra housing proposed in the Draft Plan because it is based on some fundamentally flawed criteria.

1. I OBJECT to the basis on which the housing requirements have been calculated. A consultancy, GL Hearn, produced the SHMA but have not disclosed to the Council or to anyone else details of the mathematical model on which their calculations have been made. This is not the right way to manage such a critical input to the local plan and as a consequence your predictions lack credibility.

2. I OBJECT to the final target housing number (based on a mathematical model which has not been disclosed) which is almost 70% higher than the official national estimates for population growth in the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the proposed new settlement boundary in East and West Horsley. In particular I object to the proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Kingston Avenue up to a tree line running along the Parish Boundary at the western edge of Kingston Meadows. The result is to take all of Kingston Meadows out of the Green Belt and make it more vulnerable to future development. Kingston Meadows is the main public recreational space of East Horsley, comprising various sports facilities and playing fields.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposal that Station Parade in East Horsley be designated as a Rural District Centre for reasons which are obscure but it is patently unsuitable for the type and scale of developments that designation allows.

The retail environment at Station Parade consists of 25 premises including a library, post office, chemist, 5 restaurant/cafes, butcher, baker and 2 mini supermarkets. The largest of these is approximately 170-200 sq. m. There is no room for expansion of retail premises nor for the provision of extra parking places.

Comment ID: PSLPP16/13891  Respondent: 11001249 / Lesley Milton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
1. I OBJECT strongly to the proposal to remove the Horsleys (and other villages in the Borough) from the **Green Belt**. In paras 79 and 80 of the NPPF (National Planning Policy Framework - Mar 12) the Government places great importance on the Green Belts and in Para 83 states that once established they should only be altered in “exceptional circumstances” through the preparation or review of the Local Plan.

65% of new houses in the Borough are to be built on land that is currently in the Green Belt.

The Green Belt around the Horsleys serves all 5 of the purposes set out in para 80.

Para 84 states that inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.

The draft plan does not identify the “exceptional circumstances” required to remove the Horsleys (and other villages) from the Green Belt nor the “very special circumstances” required to build on Green Belt land.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents are well aware of how much standing water there is in their gardens after rain. Building on such land will only exacerbate the problem. Other areas of the Horsleys are also flooded when it rains because the drains are inadequate. Substantially more houses will exacerbate the problem but no attention has been paid to drainage in the local plan.

- Schools and medical facilities

Local schools and medical facilities are already at capacity.

No extra school places are planned in the Horsleys and the school places proposed at Wisley Airfield will not be planned until many years into the project. 2600 new houses could easily mean 2600 children looking for school place!

I trust the Council will review its Local Plan basing it on a model for projected population growth which is available for inspection and with more attention paid to the infrastructure constraints and to the use of brown field sites rather than destroy our precious Green Belt

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** PSLPP16/13886  **Respondent:** 11001249 / Lesley Milton  **Agent:**

---

I OBJECT to the fact that this inflated final target housing number results in

- up to a 35% increase in the number of households in West Horsley.
- up to a 90% increase in housing stock taking into account the two Horsley villages, Ockham and the proposed development at Wisley airfield

The impact on the Horsley villages of such a huge mixed development would be enormous and the infrastructure cannot sustain this – see below.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** SQLP16/1624  **Respondent:** 11001249 / Lesley Milton  **Agent:**
It is proposed to upgrade the current A3 junction at Burntcommon to a full 4-way junction. SCC traffic modelling anticipates increased use of Guileshall Lane, Hungry Hill Lane and Tithebarns Lane (all not suitable for increased traffic volume) for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond.

The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”.

A local plan when proposing new housing on a substantial scale must surely plan for the implications of increased traffic both on the major roads such as the A3 and the minor village roads. The current draft local plan has not given such issues enough consideration.

Answer (if comment is on questions 1-7 of the questionnaire): ()

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

6] I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7] I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8] I object to the fact that air quality concerns have all but been ignored. Air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 houses

I object to the draft Local Plan for 10 fundamental reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban sprawl stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Employment land – POLICY E1, E2

Contrary to national trends, too much potential development land within the town centre is being allocated for retail or commercial development rather than housing. High added value businesses are welcome in the borough, but much of the employment land is designated for retail or low added value employment floorspace, which only exacerbates current issues such as lack of low cost housing and heavy traffic. Sites such as the Burnt Common Triangle, currently in the Green Belt, are inappropriate for heavy industry,

Answer (if comment is on questions 1-7 of the questionnaire): ()
**Use of land – density POLICY H13.**

The paragraphs relating to density in Policy H1 have been deleted. To ensure developments make optimal use of space there must be a policy to cover minimum and maximum densities. Without a policy to cover density, there is a risk that developers will use land inefficiently, putting additional pressure on the countryside and un-developed land. This deletion is inappropriate.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**AONB – POLICY P1 and POLICY E5**

The policy relating to AONB weakens the protections offered, and (unlike previously) does not have restrictions on non-major development. This is a move in the wrong direction. Previously all proposals were considered against the 5 key tests – now development in the AONB seems to be more acceptable. This is *weaker*, not stronger, and is contrary to huge responses from the public in previous consultations and the weight of protection given to AONB in the NPPF.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Green Belt – POLICY P2 , POLICY P3, POLICY E5 and sites**

Exceptional circumstances must be demonstrated in order to develop Greenbelt yet despite the weight of public opinion against weakening of this policy, 70% of new housing development will be in the countryside, of which, 58% will be in Greenbelt. By definition, this is not an exception and no attempt is made to demonstrate exceptional circumstances, in line with the requirements of the NPPF. Insetting villages is of concern since restrictions within the settlement boundary raises concerns over loss of character.
The Rural Economic Strategy covered in 4.51a, promoting affordable homes everywhere in the countryside including the AONB as a main aim, is a mechanism for promoting overdevelopment in our countryside. It has not been subject to full public consultation and is based on data, which is not up-to-date.

Three major strategic sites – Blackwell Farm, the former Wisley Airfield [Three Farms Meadows] and Gosden Hill Farm – are in the Green Belt. Previous consultations show that, in line with the NPPF, the public would prefer to use brownfield land in the urban area first.

**Housing number – POLICY S2**

The housing target proposed, of 12,426 is based on assumptions that have not been made public and includes flaws that have not been corrected in the modified SHMA (verified by professional analyst Neil MacDonald of NMSS who concluded that an annual housing figure of 400 per year would meet Guildford's overall need). The phased approach (more homes built towards the end of the plan period) is appropriate in order to permit necessary infrastructure but open-ended targets where an unknown figure is held back until after the plan period is not a reduction but a postponement and does not allow for optimal planning or transparency.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Send village being removed from the Green Belt. The green belt was intended to be permanent, and there are no special circumstances to justify abandoning it. Send's Green Belt provides an essential buffer stopping Woking and Guildford becoming one conurbation. Local councillors and central government gave a clear election promise to protect the Green Belt and this reneges on it. Developers will be quick to take advantage and there will be nothing to stop them. It is not needed - redevelop in existing urban areas and 'build up' instead.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I OBJECT to building 400 houses and 7000 sq meters of industrial space at Garlick's Arch, opposite Send Marsh Road. This will create unsustainable amounts of traffic on the already extremely busy Send Marsh Road and Portsmouth Road. The queue of traffic is often down as far as the Saddlers Arms pub. It will become impossible to get onto Portsmouth Road with any additional houses or industrial space.

Some of the new development is intended to be "affordable" housing. Surely it makes more sense to build these closer to the areas, and public services, where jobs are based, i.e. Guildford itself, to prevent increased volumes of commuters down the A3? Why doesn't Guildford Borough Council consider building 'upwards', on existing or redeveloped sites, instead of destroying woodland in the Green Belt?
In addition, building on this site increases the risk of flood, in an area already prone to flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to a new interchange with the A3 at Burnt Common because Send would have to take traffic from the proposed 2000 new houses at Wisley Airfield, 2000 houses at Gosden Hill, Burpham and 1850 at Blackwell Farm. Much of this traffic to and from the A3, M25, Woking and Guildford would go through Send. Send Road, which is already overloaded, would become gridlocked. Noise and pollution levels, already at excessive levels, would worsen.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is already a strain on public services and infrastructure in Send/Ripley. It can be difficult to get a GP/NHS dentist appointment, and the roads are typically poor condition and heavily congested. As a commuter the Send Marsh Rd/Portsmouth Rd junction already gets particularly congested, as does the Send Marsh Rd/A247 junction. The A3 to M25 Wisley interchange is a nightmare, and would not be able to deal with additional traffic (plans suggest some widening of this junction but nothing has been planned yet?). With further developments I would likely have to move elsewhere as my commute would be unbearable.

Answer (if comment is on questions 1-7 of the questionnaire): ()
No case has been made for “Exceptional circumstances” for building on the greenbelt, even though Guildford Borough council have rejected plans for the Wisley Airfield, this has been included again.

I object to the continued proposed ‘insetting’ of East & West Horsley and other villages from the Green Belt and the expansion of the settlement boundaries.

I object to the statement in P2 (4.3.13) that these villages are ‘now inset from the Green Belt’ when this is only a proposal. I also object that this section does not take into account an assessment of there Green Belt benefits.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/4556  Respondent: 11002881 / Sheila Proctor  Agent: 
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We strongly support the need for improvement in the infrastructure of East and West Horsley. However, the GBPSLP is focused on the Infrastructure required to support potential future development. This ignores the fact that the current infrastructure is not functioning in an acceptable manner.

The Infrastructure in the Horsleys is not only failing to meet the current needs of users but some aspects, such as roads, have no obvious possibility for improvement. The boundaries of the B2039, which runs through East Horsley, are such that widening is not possible. The number, vehicle size and speed of the current traffic using this road is already far greater than the original design could have envisaged. The inability of the roads, drainage, schools and medical facilities to adequately support the existing homes within East and West Horsley is evident, and has been acknowledged at Borough and County level. We do not believe that Community Infrastructure Levy is intended or designed to deal with these existing constraints. **We therefore object** to the development proposals in the Horsleys on the grounds that infrastructure constraints have not been applied, and no data has been produced to demonstrate how the existing issues can be dealt with.

In addition, the impact of the proposed 2,000 houses at Ockham on the site of the former Wisley airfield would have a dramatic affect on the roads, station parking and rail transport overloading for residents of East and West Horsley. It would also create a settlement of questionable sustainability besides removing an environmentally sensitive and strategically placed tract of land from the Green Belt. **We therefore object** to the identification of this as a strategic development site and request its removal from the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We previously commented on your designation of East Horsley as a Rural District Centre in the draft Local Plan. We note that the designation has now changed to a District Centre and we repeat our objection to this on the grounds that the designation completely misreads the situation. The direction of main town centre uses towards the village, as a District Centre, would not only be inappropriate and unsustainable, but would be physically impossible to introduce. It should also be noted that there is already insufficient parking in the village for those using the local amenities, and there is no available space to alleviate this. The error in designating East Horsley as a District Centre is compounded by the fact that Cobham, which is in close proximity but outside the GBC boundary, is in reality the District Centre for the Horsleys and vicinity. The reason for this is the much more extensive range of services available, including two large supermarkets and branches of 4 different banks, compared to the Horsleys where there is no large supermarket and only one bank.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6354  Respondent: 11002881 / Sheila Proctor  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Similarly, the proposal to change the boundaries of the current settlements of East and West Horsley does not appear to have been tested on the ground and appears solely aimed at releasing land for development. The arguments for changing specific boundaries are in some cases contradictory, and in some cases fail to meet the test of identifying more sustainable boundaries than those currently defined. I therefore object to the proposal to change the boundaries of the settlements.

In addition I would observe that the existing infrastructure in the East and West Horsley area - in particular the roads and drainage - are not functioning in an acceptable manner at the present (viz. crowded, potholed and flooded under even mild rain conditions) and the prospect of the addition of the potential number of houses in the villages and the proximate addition of 2,000 at Ockham, 400 at Burnt Common and 2,000 at Gosden Hill Farm needs to be severely tested by the application of infrastructure constraints and I object to the strategic site proposals indicated and to the larger land areas within the villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6352  Respondent: 11002881 / Sheila Proctor  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
I object to the proposal to inset the villages of East and West Horsley from the Green Belt. Nowhere in your documents do you produce evidence to support the existence of exceptional circumstances which would support this being carried out. All the objective evidence seems to derive from the need to release land for building development, and the study carried out by your consultant is inconclusive, subjective, and fails to take adequate note of the fact that the original aims of the Green Belt are still met in the cases of villages like East and West Horsley. The report of the study by your consultant bears the hallmarks of a desktop study and the result is a shallow analysis of the current situation which lacks conviction.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

This policy states that Guildford Borough Council (GBC) will continue to protect the Green Belt and we fully support that aim.

In the villages of East and West Horsley the original objectives of the Green Belt continue to be fully met and we disagree with the analysis in the Green Belt and Countryside Study (GBCS) documentation produced by consultants on behalf of GBC which fails to acknowledge the open nature of the villages, the large areas of woodland and open space which are integral to the appearance of the area and the low density of housing in the settlement areas.

We object strongly to the proposal to remove the villages from their current status by insetting them from the Green Belt and we do not believe that GBC have demonstrated the exceptional circumstances which are necessary to support such a proposal. The only circumstances that they present are those for increased development, in particular housing, which is unacceptable as a basis even if the proposed development was based on accurate and supportable evidence. As outlined above, this is not the case as the OAN and the SHMA are flawed.

There is also a proposal to change the settlement boundaries for the villages which appears to arise from the GBCS. The reason for changing the boundaries appears to be solely in order to include additional area inside the village boundaries in order to make land available for development. In many of the cases the proposed extended boundary lines are less recognisable in logic and certainly less defensible than the existing ones. We object to these proposals to change the settlement boundaries for East and West Horsley and in addition object to the newly designated "identified boundary for the Village" proposed to the south of the A246 in the area of Chalk Lane, The Warren, Rowbarns Way and Green Dene.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

We consider that the Housing Targets on which the policy is based are derived from an Objectively Assessed Housing Need (OAN) and a Strategic Housing Market Assessment (SHMA) which are flawed. The modelling to produce the original number has not been demonstrated to adequately represent either the historic immigration figures nor the projected figures issued by the Office of National Statistics (ONS). The further increases made to the demographic starting point are in some cases inappropriate and in some case erroneous. Given that the proposed developmental needs in the borough are based on what we consider to be inaccurate data we object to Policy S2.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day. This would just provide an alternative route for people

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

1. I object to the proposal in the local plan on the grounds that the site is not large enough for the proposed use.
2. I object to the proposal in the local plan on the grounds that it would cause adverse impact on street parking.
3. I object to the proposal in the local plan on the grounds that Send Hill is a single track country road and too narrow to provide sufficient access to the site or accommodate the potential new levels of traffic the proposed development would bring.
4. I object to the proposal in the local plan on the grounds that Send is in green belt. The proposed inset is inappropriate due to its permanent green belt status.
5. I object to the proposal in the local plan on the grounds that Send Hill is a narrow road result in loss of a turning and passing point for vehicles.
6. I object to the proposal in the local plan on the grounds that it would impact the nature reserve nearby. The proposed site is a quality green belt amenity area within countryside and would be spoilt by development.
7. I object to the proposal in the local plan on the grounds that the existing road and parking infrastructure is already inadequate or under pressure and could worsen with the planned development, reducing quality of life.
8. I object to the proposal in the local plan on the grounds that too many houses are proposed to Send/ Send Marsh are and the impact on traffic congestion and local services would be unacceptable.
9. I object to the proposal in the local plan on the grounds that the proposed number of houses potentially could result in 92 extra cars in Send Hill which is already suffering from congestion particularly at school run time.
10. I object to the proposal in the local plan on the grounds that this would cause loss of village identity, be detrimental to the community and increased flood risk.
11. I object to the proposal in the local plan on the grounds that a Wasteland Solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area. Further development would disturb water table and increase risk of flooding to my property.
12. I object to the proposal in the local plan on the grounds that the proposed development site (A44) was used as GBC registered landfill site, not a quarry as listed as reference LLA 2081 in the local plan.
13. I object to the proposal in the local plan on the grounds that the 1963-8 Ordnance Survey maps of proposed site mark it as “refuse and slag heap”. It is therefore unsuitable for such a development on health reasons.
14. I object to the proposal in the local plan on the grounds that the 1971 Ordnance Survey maps of proposed site mark it as “refuse tip” prior to when proper licensing/registration was required. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.
15. GBC has installed gas monitoring wells on site since July 2000. One well recording methane gas discharge.
16. I object to the proposal in the local plan on the grounds that a Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies the proposed site as GBC recorded landfill site Ref GU/12 with type of waste identified as “unrestricted”. This causes me concern as to what it does contain and dangers if disturbed.
17. I object to the proposal in the local plan on the grounds that both the Envirosearch Report RS1100201_1_1 dated 17th February 2004 and historical map data and information from GBC has identified site as landfill and has
“areas of potentially contaminative industrial activities”. Development of this site would be a health hazard. The recent news reports of a child dying from seepage of contaminated ground following flooding prove that developing any such sites is a danger to health. The Daily Mail has also recently had an article on how the dangers of living near landfill site raises cancer concerns. The paper referenced a study published by the International Journal of Epidemiology which tracked 242,000 people living near landfill sites in Italy.

19. I object to the proposal in the local plan on the grounds that both the Envirosearch Report RS1100201_1_1 dated 17th February 2004 identifies “potential risk from landfill gas migrations” which I believe is a health hazard.

20. I object to the proposal in the local plan on the grounds that both Envirosearch Report RS1100201_1_1 dated 17th February 2004 concludes “potentially contaminative industrial sites identified from analysis” of Ordnance survey maps.

21. I object to the proposal in the local plan on the grounds that the Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005 identifies proposed site as a local authorised landfill site as licences under Part II of Environmental protection Act 1990. The proposed site is not a quarry as specified in the GBC Local Plan. And is therefore not suitable for the proposed usage.

22. I object to the proposal in the local plan on the grounds that the Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005 identifies proposed site as potentially contaminative industrial land. With usage of “Heap and unknown constituents”. This causes me concern as to what it does contain and dangers if disturbed.

23. I object to the proposal in the local plan on the grounds that the Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005 identifies changes to proposed site could cause potential ground water vulnerability to my property.

24. I object to the proposal in the local plan on the grounds that the Traveller Accommodation Assessment research, purported to have been undertaken in June-July 2012 by Mill Field Services, cannot be so. The Sittingbourne based market research company was dissolved in January 2011 according the government companies’ site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13906  Respondent: 11002945 / David Guthrie  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that infrastructure requirements have not been properly considered and are inadequate to deal with proposed housing levels. Roads, doctors and schools will be unable to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13899  Respondent: 11002945 / David Guthrie  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford while providing a life enriching environment for my family.

2. I object to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances. If we start making exceptions the boundaries to stop this happening in the future are removed. The Green Belt is meant to be permanent and not continually eroded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/13902  Respondent: 11002945 / David Guthrie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13907  Respondent: 11002945 / David Guthrie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.”1 Standing at the head of the draft plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to all the proposed sites in Send because they were not included in the previous consultation in 2014. Unlike the rest of the borough Send has not been properly consulted and all its sites have been changed substantially.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to all the proposed sites in Send because they were not included in the previous consultation in 2014. Unlike the rest of the borough Send has not been properly consulted and all its sites have been changed substantially.

I am shocked to hear that there is another push to build more housing in the Horsley's.

If I recall correctly, that idea was rejected. The Horsley area simply does not have the infrastructure to support an enlarged local population. Water, Sewage, Education, Transport would all need to be enlarged to make a plan such as the proposed one work.

so you would have to perform extensive road works and renovations, increase the parking capacity of the train station to cater for the new residents that will work in London or Guildford, build at least 1 new primary and secondary school to ensure that the children of the parents get their right to education.

also, the Horsley's are beautiful. and building here will take away that beauty.

instead of building horizontally, you build vertically? several blocks of nice flats would probably suffice, if not then build away from the Horsley's. the residents of this area have told you once and I'm fairly certain that we will tell you again

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed development at Garlick’s Arch, Burnt Common, Policy A43

This is partly ancient woodland, and the proposal to develop it with a mix of industrial warehousing and residential
properties would undoubtedly lead to the loss or damage to these ancient trees, plus the resultant run off of rainwater would
increase the likelihood of flooding to properties including my own further downstream, it would appear that no
consultation with the environment agency who recently invested in flood defences along our stretch of the East Clandon
Stream has taken place.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposed 4 way interchange from the A3 at Burnt Common. Policy A43

The proposal that an interchange at this part of the A3 shows no thought what so ever, how is it considered prudent to take traffic from a fast moving 3 lane “A” road and push them onto roads that are little more than country lanes, at a recent meeting GBC officers when asked about the creation of bottle necks at local points of congestion answered that they would have to “consult with other local authorities”, proving the point that no thought had been given to their plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to your Policy A43,

Again you have ignored all previous objections and offered no alternative plans to alleviate the concerns of local residents.

No demand for Travelling Showpeople has ever been shown or proven to exist.

The government is at this time reviewing in a White Paper its housing policy to protect “Aged or Veteran Trees and Ancient Woodland” yet you are proposing to build over them!

The land is in a flood zone 2 category area and any development will undoubtedly increase runoff into the East Clandon Stream which has in the past flooded local properties and is at this time being re surveyed by the Environment Agency.

This proposed development will also increase pressures on local roads, Schools and Medical facilities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to your Policy A58,

I am unable to understand your desire to build Industrial and warehousing units on Green Belt land whilst empty units exist in both Guildford and at Slyfield.

The congestion that a development on this scale will create in this area is unimaginable, not only the employees on such a site having to drive to work as inadequate public transport exists, but the mayhem that will be created by large commercial vehicles trying to navigate the local “Country Roads” to gain access to the site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I would like to register my strong objections to the 2016 Draft Local Plan.

The NPPF prevents the merging of settlements without any exceptions. There are no exceptional circumstances. Why has this been proposed?

I object to the proposed development of land at Garlick’s Arch Burnt Common. Policy A43/A43a. There are ancient woodlands at Garlick’s Arch and this area should be conserved, there are trees dating back to the 16th century which could be felled or damaged. Also adding 400 homes and 7000 sq m of various types of employment space as well as new 4 way junction for the A3 would cause significant stress on local services and roads, which are already unable to cope. This site presents a significant change from the Regulation 18 consultation in 2014. Where is the infrastructure??

I object to the disproportionate amount of development in one area of the borough

Why has industrial and warehouse space been proposed? There is room at Slyfield and this site should be fully developed to prevent proliferation of industrial areas in the Surrey Countryside. The logical thing would be keep them all on one site. The proposed industrial development of 7000 sq m is simply not required since the latest Employment Land Need Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. A new 4-way interchange onto the A3 at Burnt Common to serve this development would be disastrous for Send, Ripley 7 Clandon. Send Road (A247, would be gridlocked all day. Send would be the through route to Woking for traffic leaving the M25 & A3. Send cannot cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object to Policy A43 –Land at Garlick’s Arch, Send Marsh

Travelling Show People plots in this location? There is no demand. The number of homes is too great and will cause over-development of our village. Our wonderful, beautiful ancient woodland that existed at the time of Elizabeth I cannot not be chopped down. The government is at this moment reviewing the protection of ancient woodland and greenbelt. Send and Send Marsh are already subject to flooding frequently and is currently a flood zone 2 allocation. Lead shot has accumulated over fifty years so parts of the area is contaminated. Send and Ripley and local areas are already too congested with traffic this proposed development will just exacerbate the problem. The traffic noise is already at an unbearable level.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:
• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling, walking and horse riders. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them) And to horse riders who use the local narrow lanes to access bridle paths in the area.
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.
Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to you to object to the Local Plan for development in and around Send, Send Marsh, and Ripley.

I object to the development at Garlick's Arch for 400 houses and 7000 square metres of industrial space. The infrastructure of Send Marsh and Send cannot cope with such a surge in the local population, most notably, the strain on The Villages surgery, and also the two schools - in Send and Ripley First School. The roads would also be unable to cope with the additional traffic from both the additional houses and the proposed industrial site, as traffic in the area from the M25 and A3 already leads to severe congestion throughout the day (e.g. the rush hour commuter route of traffic cutting through Send to and from Woking via the A3; also, the mid afternoon school run for Send's two schools). It is also the case that the industrial site is not required, as the Employment Land Needs Assessment 2015 (ELNA) shows an 80% reduction in required employment floor space from the previous draft plan.

I object to the 4-way A3 junction at Burnt Common, on the same grounds as above; that is, that Send simply cannot cope with the additional traffic it would bring. Not only would there be increased risk of gridlock, but also of accidents. Of course, the danger to both drivers and pedestrians is of the highest priority, but also, an accident on the narrow road in Send would lead to miles of gridlock.

I object to the proposed 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm, as these will also add to the already severe traffic congestion in the area, with traffic heading through Send and Send Marsh via the A3, often so as to access the M25 via Junction 10.

I object to Send being removed from the Green Belt (Policy P2). The National Planning Policy Framework (Point 80) states that one of the reasons for the Green Belt land is 'to prevent neighbouring towns merging into one another'. Send and Send Marsh clearly fulfil this role, as they prevent the merging of Guildford and Woking into one large urban sprawl.

I object to the proposal to build 45 houses at Clockbam Nursery, on Tannery Lane. This area floods regularly. Furthermore, there is only a very narrow, single track, winding road, where vehicles often have to reverse in order to let oncoming traffic pass. There is simply not the infrastructure to accommodate any more houses on this site. Moreover, just as Send and Send Marsh act as a buffer between Guildford and Woking, so this particular area acts as a buffer between Send and Send Marsh.

I object to Policy A44 . 1.9 ha, which is the proposed development of 40 houses and 2 traveller's pitches at Send Hill. The road already experiences heavy traffic, and could not cope with the additional amount of traffic expected. I also object on the grounds of the feared impact of the nearby nature reserve. I also object to the proposal in the local plan on the grounds...
that the Envirossearch Report RS1100201_1_1 (dated 17th February 2004) identified that there is "potential risk from landfill gas migrations", which presents a health hazard.

I object to the Local Plan on the grounds of Guildford Borough Council (GBC) having greatly increased the number of proposed houses since April 2016. This significant change in the proposal therefore requires another full consultation under Regulation 18, and not of Regulation 19 which GBC are trying to utilise in order to rush the process through.

This is a beautiful area of Surrey, which is preserved as part of the Green Belt. Even without this consideration, I trust that you will see that Local Plan, with its potential for severe and dangerous strain on local services and infrastructure, is wholly impractical, and will destroy the area and the quality of life of its residents. It is with great concern that I demand that the proposed developments be abandoned.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to you to protest about the plans for building on Green Belt sites in and around Send and Send Marsh.

I object to Send being removed from the Green Belt (Policy P2). The National Planning Policy Framework (point 80) states that one of the purposes of Green Belt land is ‘to prevent neighbouring towns merging into one another’. Send village and its surrounding Green Belt land acts as the necessary buffer between Guildford and Woking.

I object to the building of 45 houses at Clockbarn Nursery. Planning permission has already been given for 64 houses in Tannery Lane, an area already unsuited to further development, due to both its frequent flooding and the narrow and winding lane. The lane simply cannot take the traffic an additional 45 houses would bring.

I object to the proposals for the development of 40 houses and 2 traveller's pitches at Send Hill (Policy A44.1.9 ha). The single track road would not be able to take the additional traffic, leading to potential gridlock. Send already suffers near gridlock in the mornings and especially in the evenings as vehicles travel through the village from the A3 to Woking and vice versa. This is also the case during the morning and afternoon school runs, with two schools in Send. This also raises the concern of safety for pupils and parents at these times.

I object to the proposed new interchange onto the A3 at Burnt Common for the same reasons as above; namely due to Send and Send Marsh not being able to cope with the additional traffic.

I object to the development at Garlick's Arch for 400 houses and 7000 square metres of industrial space. This area is prone to flooding. It also has ancient woodland, just the kind of specific area the Green Belt was established to protect. The industrial space is also unnecessary, based on the current Employment Land Needs Assessment 2015 (ELNA). This shows a reduction of 80% in required employment floor space from the previous draft plan.

I also understand that Slyfield actually has a large area which would be much more suited.
I object to the Plan due to the fact that the infrastructure of Send and Send Marsh simply cannot cope with the increased traffic and also the strain on local services such as the schools and the surgery. I urge you to abandon the Plan forthwith.

Answer (if comment is on questions 1-7 of the questionnaire): ()

DRAINS, WATER SUPPLY, FLOOD RISK, CONGESTION

Our drains, our water supply, our medical facilities, car parks and our roads just cannot cope with the proposed number of new homes. Building this number of homes will lead to flood risk here and downstream (along the Wey and Thames). The planned development on Green Belt is therefore unsustainable.

As a commuter I know that the car parks at both Effingham Junction and Horsley stations are full every working day. Believe you me I have seen the congestion that exists. Additional houses mean more cars which just won’t be able to be accommodated at either station. It can be estimated that even if 25% of these new households use the stations to commute to London then we are talking about accommodating 675 extra cars at either Horsley or Effingham station. Does Guildford Council have an answer to car parking on this scale? Of course not.

As an East Horsley resident I am opposed to the removal of the Horsleys from the Green Belt along with consideration of Three Farms Meadows (the former Wisley Airfield) for a new town of 2,100 homes for the following reasons:

1. West Horsley. The number of new homes will swamp the village and change its nature irrevocably. I am not opposed to the development of the Bell and Colville site for housing but am opposed to including any of the green belt land behind that site for potential development.

1. East Horsley. The open land around Horsley Towers should remain within the Green Belt. Horsley Towers is of immense historical interest and to build on its surrounding green fields would wreck the prospect of this attractive site. The same argument applies to the possible development of the Thatchers Hotel site. I am not opposed to the development of the former BT brownfield site opposite Bishopsmead Parade in East Horsley, for housing.

1. Land at the Great Ridings Wood end of Norrells Drive, East This large field is adjacent to the above Wood which was donated to and is managed by the Woodland Trust. The field preserves the Wood from suburban encroachment and should be retained as such.

1. Points (a), (b) and (c) above should be retained as such in accordance with National Planning Policy Framework paragraph 83 which states that ‘Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.’ The draft Local Plan mentions “exceptional circumstances” in paragraph 4.123, but presents no evidence that such exceptional circumstances exist. Moreover ministerial guidance has been published that makes it clear that unmet housing need should not normally be taken as such exceptional circumstances. Therefore the existing Green Belt should remain as currently defined.
1. Former Wisley Airfield. This is a large area of Metropolitan green Belt and is valuable farmland – and precious for agricultural use. It provides protected open space near the M25 and is a barrier to outward development from London. Creating a town – almost the size of the Horsleys combined – would cause irrevocable harm to the Green Belt as well as overwhelming local roads and facilities. The A3/M25 junction area is already overwhelmed with traffic for much of the day and has the highest pollution levels outside London.

In conclusion, I ask GBC to revise the housing number, and to amend the Local Plan to utilise brownfield/previously used land rather than green field sites – of which there are significant amounts of the former within the Borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident of East Horsley I wish to register strong objections to the Local Plan on a number of counts.

GREEN BELT

Without doubt our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city’s playground. It is for us to conserve and protect it. There are 5 legal purposes for Green Belt, and it meets them all:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns
- To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

NO EXCEPTIONAL CIRCUMSTANCES

The local plan proposes ~ 9,000 new homes to be built on Green Belt land (compared with ~ 50,000 current homes in Guildford, so approx. equal to 18% of the existing homes in the borough)

The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is NOT an exceptional circumstance in law.

In addition the existence of the Green Belt/AONB is a reason for NOT meeting objectively assessed housing need (i.e. such protected land is a legal constraint against any such development). No exceptional circumstances have been disclosed. So the Green Belt boundaries should NOT be changed. To remove most of the Borough’s Villages from the Green Belt would change the nature of this area of countryside forever and would eventually merge historic and separate villages. It would be an environmental outrage.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: PSLPP16/16408  Respondent: 11004129 / Alastair Reid  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

HOUSING NUMBERS

The housing numbers proposed are for an additional 593 new homes in West and East Horsley within 5 years of adopting the plan. Indeed the proposed increase for West Horsley is an additional 35% of the existing households – the highest in the Borough.

This number is additional to the 2100 new homes planned for Wisley Airfield. This number is far too high for the existing infrastructure to handle and would ruin the nature of the Horsleys.

BROWNFIELD AVAILABLE

There is brownfield land available in the town centre which is being earmarked for commercial development rather than for housing. This is enough to meet our real needs for affordable local homes. There are enough vacant commercial sites to cope with genuine business need, and we have enough retail capacity already, so urban brownfield/derelict land should be used for housing not the Green Belt around our villages. I understand that Surrey University is sitting on permission for 1,500+ accommodation units on its own brownfield campus. If the University fulfilled its obligations much Town Centre affordable accommodation would be available for rental/purchase.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Guildford Proposed Submission Local Plan Consultation

Thank you for inviting the National Farmers Union to comment on the submission draft of the Local Plan. The NFU is an industry representative organisation, which aims to safeguard the farming and growing business interests of our members and to promote conditions for the wider industry to retain a secure and competitive foothold in the UK economy. We represent some 55,000 farm businesses in England and Wales involving an estimated 155,000 farmers, managers and partners in the business, the large majority of commercial farm businesses in England. Our views are generated through consultation with a democratically elected membership structure, representing all sectors of the industry.

The Need for Rural Worker’s Dwellings

The need for new dwellings for agricultural workers (and for employers, farm managers, partners and directors) arises from a number of different circumstances, notably:

- *Succession planning* – where there is only one dwelling on a farm holding, transferring the management of the business from one generation to the next can be difficult.

- *Expansion and change* – where farming practices change and particularly in the case of expansion there may be a need for an additional dwelling.

- *A completely new enterprise* – where there is a new enterprise a dwelling may be justified.

In all of these circumstances there are legitimate reasons why a farm worker is required to live “in sight and sound” of the farm unit. Examples include for the betterment of animal welfare such as managing problem or diseased stock, responding to freezing temperatures or adverse weather and increasingly to manage site security issues.

Without the availability of a farm worker in sight and sound of a new or existing farm unit, the viability of the business can be called into question. It is therefore essential that there is a route through the planning system to enable such developments to take place.

We are extremely concerned that the Plan does not offer any feasible option for the development of privately owned rural workers accommodation.

This is an issue of substantial concern for the farming sector and we request that an appropriate additional or amended policy is included before the Plan is submitted for examination.

As you are aware NPPF 55 states “Local planning authorities should avoid new isolated homes in the countryside unless there are special circumstances such as: the essential need for a rural worker to live permanently at or near their place of work in the countryside”.

Without accommodating the requirements for rural workers dwellings, we highlight the risk that the Plan may not “enable the delivery of sustainable development” in accordance with the NPPF, which according to Paragraph 182 would be grounds to reject the Plan on the basis that it is not sound.

We also consider that in not providing a means by which rural workers dwellings can be built, the Plan may not have considered all of the objective development requirements within the Borough. As such there may be grounds for the inspector to find that the Plan has not have been “positively prepared”.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H1: Homes for all

Rural workers’ housing appears not to have been considered within the strategic housing market assessment and does not fall into any of the categories within Policy H1 such as “housing for older people”, “specialist housing”, “travellers” or “students”. In this context it appears that the accommodation needs of farm businesses have not been taken into account within the Plan?

We recognise that there might be a feasible option for farms to apply as a “self-build and custom housebuilding project” however this would be subject to compliance with Policies P1, P2 and/or P3, such as:

- **Policy P1 Surrey Hills AONB** – specifies the requirement to comply with NPPF116 “Planning permission should be refused for major developments in these designated areas except in exceptional circumstances”. However it is far from clear to what degree would an application for an essential rural workers dwelling fall within this restriction?

- **Policy P2 Green Belt** – “Buildings for agriculture and forestry” are obviously exceptions to green belt policy under NPPF89, however would a rural workers dwelling fit within this definition of agriculture and forestry?

- **Policy P3 Countryside** – States that “development will only be permitted provided it requires a countryside location or where a rural location can be justified. This seemingly should enable an essential rural dwelling application; however there is no mention of the types of development that will be permitted under this policy.

Whilst there may potentially be a “route through” these various policies, from our perspective it is relatively unclear what the expected outcomes might be where a farm business legitimately requires additional residential accommodation to support their enterprise? We suggest that greater clarity is needed within the Plan to enable the development of essential rural workers dwellings as and when they become a necessity for those relevant businesses.

Our recommendation would be either that an SPD is provided which explains how farms can progress applications for rural workers dwellings, or that the aforementioned Policies H1, H2, P1, P2, P3 are amended to include specific mention of NPPF55 “the essential need for a rural worker to live permanently at or near their place of work in the countryside”.

Finally, we are extremely pleased to see the very clear support for rural growth and expansion that will be delivered through Policy E5: Rural Economy. We congratulate the evident integrated working that has taken place with the Enterprise M3 LEP Rural Action Group. However we are nonetheless concerned that such an aspiration to unlock rural economic growth may be constrained by uncertainty surrounding on farm residential development.

We trust that this comment can be taken into consideration and that the consultation draft can be amended prior to submission. In any case I would be very grateful if you could provide some feedback on my response in order that I might understand your thinking on this issue.

POLICY H3: Rural exception homes

In our reading Policy H3 does not meet the requirements of NPPF 55 as it restricts the development of rural exception homes to “Small affordable housing developments”.

As you are aware NPPF (page 50 Annex 2) provides a definition of Affordable Housing, which for the purposes of clarity is quoted as:

“Social rented, affordable rented and intermediate housing, provided to eligible households whose needs are not met by the market. Eligibility is determined with regard to local incomes and local house prices. Affordable housing should include provisions to remain at an affordable price for future eligible households or for the subsidy to be recycled for alternative affordable housing provision.

Affordable rented housing is let by local authorities or private registered providers of social housing to households who are eligible for social rented housing. Affordable Rent is subject to rent controls that require a rent of no more than 80% of the local market rent (including service charges, where applicable).

Homes that do not meet the above definition of affordable housing, such as “low cost market” housing, may not be considered as affordable housing for planning purposes.”

In nearly every case, the applicant and owner of a rural workers’ dwelling would be a commercial farm business. It would be unlikely and indeed undesirable for a farm business to be considered eligible to be a registered provider of social housing (i.e. as defined in s112 of the Housing and Regeneration Act 2008) and as such any application for a rural exception site is likely to fail if it involves a private commercial farm business.

This precludes the use of Policy H3 within a commercial farming context.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to remove East Horsley and West Horsley from the Green Belt. Specifically, 173 houses planned at the following locations:

- Thatcher’s Hotel, Guildford Road (48)
- Land near Horsley railway station, Ockham Road North (over the railway from the Village Hall) (100),
- Countryside Depot and Telephone Exchange, St Martin’s Close (15)
- Land at Fangate Manor, St Martin’s Close (10).

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green belt across the Borough. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
2. I object to the disproportionate local allocation of housing in East Horsley.
3. I object to the threat the Local Plan poses to the historic rural village of East Horsley and the blight on properties there. The plan calls for an additional village of 173 residences in the immediate area, (with narrow lanes, little or no streetlights and many listed houses).
4. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking.
   2. The increased volume of car traffic on the roads.
   3. The congestion this traffic will cause on the narrow rural roads in East Horsley and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the limitations of pedestrian footpaths (and the space to provide them).
   5. The lack of suitable public transport. The Horsley rail station will struggle to cope with the proposed increase in passenger traffic and car parking is already at capacity.
5. I object to the fact that insufficient consideration has been given to the environmental and ecological value of these sites.
   1. Pollution: The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment.
   2. Flooding: The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents are well aware of how much standing water there is in their gardens after rain. Building on such land will only exacerbate the problem.
   3. Schools: Local schools are already at capacity – where will newcomers go to school? No extra places are planned in the Horsleys, and any school places proposed as part of Wisley Airfield will not appear until many years into the project.
   4. Medical facilities: Similar situation to the schools.
6. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the individual East & West Horsley Parish Plans. The top two responses as to why local residents enjoy life in East Horsley are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I trust that these objections will be fully considered and that the proposed plans for an additional 173 residences in East Horsley is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Representations to Oppose The Guildford Borough Local Plan for Horsley

I write to oppose the proposed plan to (i) remove West Horsley, East Horsley and other villages from the green belt, (ii) develop extra homes in Ockham, Burnt Common and Gosden Hill Farm, and (iii) enlarge the two village Settlement Areas (hereafter referred to as The Guildford Plan.)

My wife and I live in Weston Lea and will be directly affected by The Guildford Plan. Our home, our views and our social lives will be greatly impacted by the imposition of The Guildford Plan and, in our view with no beneficial consequence to the residents of Horsley.

The Green Belt status is imposed for the purpose of controlling urban growth and in order to maintain agriculture, forestry and outdoor leisure. Its purpose is to prevent unnecessary urban sprawl and can and will be resisted vigorously.

The objectives of The Guildford Plan is clearly based on economical gain for the council and will bring no benefit to residents and visitors to this part if Surrey. The construction of extra homes will impose on the countryside views that West and East Horsley have to offer. It will increase traffic flow and population and diminish the exquisite characteristic of each part of the village.

I am sure you are aware of the consideration you must pay to the National Planning Policy Framework which states that The Green Belt ensures; access to the countryside, outdoor sport and recreation, retention of landscapes, improvement of damaged land, nature conservation and retention of agriculture. It is design to prevent; the sprawl of built up areas and the merging of neighbouring towns. It is also designed to safeguard the countryside from encroachment and preserve the setting and character of the town.

The proposals thus far have indicated a clear desire for financial gain alone. The economical cost of The Guildford Plan must also be considered. These will include; the unsustainable burden on the drainage system, the road networks, medical services, schools, parking and public transport. There is no proposal to support and expand these areas and if there are, no doubt the cost of such things will be borne out in our council tax charges. In my view, these areas are already overwhelmed by the over populated schools and medical facilities.

From my perspective, my view of the countryside and forestry will be removed and replaced with a development site resulting in the brick work of the newly constructed homes. The impact on my light will not be known until planning permission is applied for by which time, we as the residents will have already lost this beautiful Green Belt Land.

Horsley was not given so much Green Belt status for it to be removed by a council suffering financial difficulties at a time of economic downturn. Finances and the increasing of profit is clearly outweighed by the need to preserve and protect nature and character and thus the proposed changes should be refused.

I hope that my representations are considered favourably and a response is provided as soon as possible.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Attached documents:**
I am categorically against any development of homes on Wisley airfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

The area is already hopelessly overstretched with high levels of traffic, the current infrastructure and all of the important local amenities all being insufficient to support the additional numbers of people that would potentially occupy any new homes in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I firmly object to the New Local Plan 2016.

I live in East Horsley and I am absolutely against all measures to reduce the green belt in this area most particularly by removing any part of East Horsley village (and other neighbouring villages) from this green belt. A massive increase in the housing stock of the Horsleys of 593 new houses represents something like a 35% increase. Nowhere can I see ANY justification for this requirement other than a badly worked consultant's report which is based upon some wildly inaccurate forecasts.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I understand that there are "brown field" sites involved in this plan but if the plan is approved it is almost certain that with the difficulties of getting full approval for these sites it is most probable that there would be enormous pressure on developing green field sites first. This is a really alarming consideration given that the Wisley development is projected to be over 2000 houses and there would be enormous pressure to develop this site very early on in the future

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Policy A42. Clockbarn Nursery, Tannery Lane, Send. Allocated for 60 houses in place of the previous 45 houses. Apart from being lined both sides with green fields for much of its length, Tannery Lane is a narrow route turning off from the middle of Send and where it turns off there is existing development either side adding to the traffic turning into it will cause further delays through the middle of the village and require a significant amount of infrastructure work.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Policy A43. Garlick's Arch, Kiln Lane, Send Marsh - still allocated for 400 houses; addition of 6 Travelling Showpeople plots. We understand that these additions will involve parking for large vehicles and storage space, just adding a little more to an already very, very large development which will ride roughshod through ancient woodland and cause major jams on surrounding roads, especially in conjunction with the following point.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Policy A 58. 9.26 hectares at Burnt Common, for an initial minimum of 7,000m2 of industrial space. This is by far the biggest potential problem with the latest round of changes. GBC have changed two little letters here - 'maximum' becomes 'minimum' and the possibility is thus opened up of a huge new development on Green Belt land, in a location where there is actually, according to recent research, reduced demand for industrial space. Such industrial development will cause very heavy additional traffic on the surrounding roads, where there are already long queues in the rush hour. I'm genuinely baffled by what passes through the heads of GBC on this issue: they must have cars, they must sometimes sit for long periods as we do in jams going up the hill past the university on the A3 or indeed on the A3 northbound past the Potter's Lane and Ripley turn-offs; or find their routes to school or work are solid due to the smallest roadworks; and yet they're quite happy to say they're addressing the problem of accommodation for people working in schools and hospitals in Guildford not by providing houses in the immediate vicinity of the town but by building a mini-commuter belt in Wisley, Horsley, Send etc... from which people will need to climb into their cars by the thousand and head off into the complete gridlock the Plan will have created. Except of course that most of the new housing won't be affordable, as above, so most of the cars may be heading the other way, into London.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The plan as it relates to Send is flawed on three levels:

- the calculation of housing requirement for the Borough as a whole is extremely spurious, based on wrong assumptions about industrial demand, classification of university students and the indiscriminate imposition of national-level requirements on individual regions

- the share of the burden of development to be placed on Send and its environs has been from the first draft suggestive of a very poor attitude to complying with the demands of government. Rather than 'how can we spread this requirement fairly across the Borough', the Council appear to be asking 'which few parishes can we sacrifice in the interests of keeping the others relatively happy'. More important in my view, the Council's disregard for the Green Belt has been shocking: the Act requires 'exceptional circumstances' for areas to be removed from the Belt, while the current justifications for development are the most unexceptional imaginable - ongoing pressure of population and increasing demand for housing. This is exactly what previous governments committed not to doing.

In spite of this, we see the Plan focusing on new build in areas such as Send, Ripley and Wisley where it's easy and cheap to carve up the countryside, rather than making a serious attempt to use the Borough's extensive brownfield capacity to cover a high proportion of the development. The official line seems to be to talk about affordable housing and insinuate that those objecting are NIMBYs: but given the choice of sites (highly unpopular but the most profitable for development) and the decision to make a minimum of only 40 percent of houses built on land freed up for development 'affordable' (equivalent to perhaps 25 percent of the land thus freed up) - leaving developers rubbing their hands over the other 75 percent, it's hard to keep faith in the Council's having any other motive than greed.

If you want to free up land for affordable housing, why not use *all* that land for affordable housing, and make sure the developers get a decent price for their work? Then we'd be talking about 25 percent of the current land grab and you might get a less furious response from residents ['though it should still be brownfield]. The fact that the Council is far more worried about the developers' feelings than those of the local residents, speaks volumes.

- most specifically, the effect on Send of the proposed developments will be to cripple the already creaking road system, massively overload schools and medical facilities, undermine the environment and - in short - ruin the village. It's far from perfect at the moment but I can say hand on heart that it's quite a nice place to live. It seems likely to be a truly grim place to live if the Plan goes through.

It's the third of these I want to focus on for the remainder of this email, and as instructed I shall focus on changes made since the previous draft - but please note none of the objections raised previously have been addressed and you should still give these full consideration.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

1. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

2. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

3. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

4. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
unsustainability, the inappropriateness of an urban style development in this rural area, the major impact on local villages. These are all still relevant objections.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Infrastructure**

The infrastructure of the Horsleys is already overloaded. Local Schools are full, the medical centre is stretched, drainage is inadequate. Traffic and parking are already an issue and at high levels. There is little scope for improvement currently and the scale of development proposed is completely out of all proportion to the facilities available and the ability to increase those facilities. I note that in the proposal for 2000 houses on Wisley airfield they identify Horsley station as a transport link. Anyone who has bothered to visit Horsley will know that the station car park is already at near capacity. There is no provision in the Local Plan to improve this infrastructure in proportion to the proposed building.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Proposal to inset East Horsley from the Green Belt Policy**

I OBJECT to the proposal that East Horsley should be inset from the Green Belt, instead of being ‘washed over’ as it is today. East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Moreover, being ‘washed over’ by the Green Belt has not been a serious constraint on development within the village. Woodlands and large residential gardens make a vital contribution towards biodiversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the greenbelt. Removal of the Horsleys from the Green Belt would require exceptional circumstances and these have not been demonstrated. There is no consideration in the plan of the effect of such insetting upon the villages and this is required by the National Planning Policy Framework.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Changes to the Settlement Boundaries

I OBJECT to the proposed Settlement Boundary changes in East Horsley. GBC are proposing to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area, as set out in the Proposals Map. The changes to the settlement boundaries in the Horsleys appear to have been done purely on the basis of including additional Greenfield sites which can then be built on. I can see no reasons given for the proposed changes and therefore the boundaries should remain as they are.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Housing Needs Numbers

I OBJECT to the housing needs numbers included in the local plan as far too high.

An annual build of 693 new homes per annum represents a net increase of 25% in the housing stock of Guildford Borough, a remarkable rate of increase for a borough in the English Home Counties. It is even more remarkable when the official statisticians at the Office of National Statistics are projecting a population increase of some 15% for Guildford Borough over this same period. In particular over 23% of this new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys, totally out of proportion to the population living there.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

Five-year Supply of Housing Land
The 2017 Addendum to the LAA sets out the five year housing requirements 2019 - 2024 and the identified supply. Applying the 20% buffer as a consequence of persistent under-delivery, there is a shortfall over the five year period of some 881 units. Planning for a shortfall in the five year housing land supply at the outset of the Plan period, cannot be considered to be effective and the Plan is therefore currently considered unsound in this respect.

Where there is scope to increase the quantum of development on previously developed land this should be considered and an adjustment made to the proposed allocation sites accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am writing to object to the proposals for development in Send and Ripley. I am a Send resident. My family arrived in Send in 1968 and I lived here until my marriage 13 years later in 1981, returning to Send in 1995 after my parents’ deaths. During my time elsewhere I kept close contact with Send where I continued to worship at St Mary’s Church and help at the Church Youth Group.

I object to the persistent changes in Guildford Borough Council’s proposals, involving widely fluctuating numbers, sudden additions to the plans, and inadequate consulting processes. I object because the GBC needs to work out a properly considered plan. I object because I do not believe evidence exists for the GBC’s proposals.
I object to the proposal to remove Send from the Green Belt, ie insetting, specifically to land behind Heath Drive and Send Road as well as land near Send Hill and St Bede’s Junior School’s current location. This is on the grounds that our village, as well as Ripley village, is in danger of becoming part of a larger conglomeration, as land is gradually turned to housing estates and put to industrial use. Once these initial proposals are improved there will be no stopping developers taking yet more land for their lucrative businesses.

I also object because the local wildlife is also being threatened by all the proposed developments. Foxes, badgers, deer, owls, bats are just some of the local fauna at risk of being driven from their homes and breeding sites.

I further object on the grounds that the Wey Navigation is a beautiful part of our county and views from the water and towpath are going to be compromised. This is a loss to local residents as well as those who visit Send, many arriving by boat or on foot along the towpath.

I particularly object to the land behind St Bede’s School and near Send Hill being removed from Green Belt status when it was stated at the time of permission being granted for the relocation of the school that this land would return to Green field when the current school was demolished.

I object to the fact that Send Lakes will lose their SNCI status. These are at present well tended and a joy for many people locally. I object because the area surrounding the lakes is rich in wildlife, both flora and fauna and removing the special status could easily lead to lack of maintenance, also increasing the risk of flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal A42 concerning Clockbarn Nursery in Tannery Lane. This is on the grounds that this is a lane, narrow in many places and not suitable for accommodating more traffic which will arise with the construction of 45 more houses. I object because the junction with Send Road is also already very difficult to navigate and I foresee potential accidents as well as congestion. I object because the construction of a marina has been granted permission already which will again increase traffic along Tannery lane. I object because there is also a flooding risk along the lane which has not been resolved. I object because of the fauna (many bats nest here) and flora which will be compromised

Attached documents:

Comment ID: PSLPS16/5261  Respondent: 11006241 / Sally Harrison  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to proposal A43 concerning housing development at Garlick’s Arch. I object because the development means the loss of ancient woodland, rare in this area, which is home to local fauna, notably hares in this instance, and which is full of bluebells in spring. I object because I believe the woodland helps to keep noise from the A3 at bay, protecting Send Marsh residents in particular. I object because the villages of Send, and indirectly Ripley, are ill equipped to accommodate such a large development. I object because there is a very poor bus Public Transport network linking the villages to Guildford, Woking and towns further afield, and it will additionally mean more environmental damage with everyone relying on their private vehicle because of the lack of buses. I object because for Send this means an increase of 25% in the number of residents and it is not fair that one small village should be swamped by this development. I object because the villages do not have the required infrastructure: overstretched medical facilities, a lack of Junior/Primary School spaces, insufficient shops, as well as a paucity of Secondary education places in this area, meaning children being transported at cost by numerous coaches morning and evening to ensure they arrive at their place of education. I object because the Portsmouth Road will become even more of a nightmare owing to congestion from traffic. I object because a much smaller housing development was rejected a few years ago and the same reasons for the application being turned down then still exist (the refusal stated that the application represented inappropriate development in the Green Belt and also was unacceptable for various reasons because the site was within the 400m to 5km zone of the Thames basin heaths Special Protection Area - has the TBHSPA moved?), so I fail to understand this more recent, unexpected, proposal.

I object to this proposal A43 in addition on the grounds that an industrial site is totally out of keeping with the locality and totally undesirable adjacent to a housing development. The proposed four way junction on the A3 here is, I understand, being facilitated by the permission granted to the landowner for the housing development. I object that this payback is disproportionate. I object because it suggests that financial greed is an overriding factor in considering this development, not a well considered plan to provide accommodation for a needy population.

I object to proposal A43, i.e. the north and south bound slip roads onto the A3 which were considered inappropriate when the road was constructed. I object because the local residents will suffer undesirably from the increase in traffic and noise. I object because some of the adjacent land is currently farmed and increased pollution will be unacceptable. I object because it will bring yet more traffic from outside the village through Send, especially large vehicles, and there is already an issue at peak travelling times along the A247 including Send Road, Send Barnes Lane and Broadmead, not to mention the road through West Clandon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposal A42 regarding the development on Send Hill, west of wind’s Ridge, of a small estate and the
 provision of two travellers pitches. I object on the grounds that Send Hill is not suitable for an increase in traffic, especially
 at the Potters Lane end. The road is far too narrow. I object to the construction of housing as this is also a beautiful part of
 the village with much wildlife living there. It is a place where many people walk. I object because this site is landfill and
 there is a possible problem with gas escape and contamination.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3949  Respondent: 11006241 / Sally Harrison  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

My first objection is to Policy A42 where the number of houses proposed has increased from 45 to 60 ie an increase of
33% which is enormous.

Tannery Lane is a problem for traffic as it is, as a result of inadequate parking in Send, making the junction with Send Road
difficult to navigate at most times of the day. The lane is also very narrow. As with many residential developments,
inadequate parking provision for residents and their visitors will lead to them parking on Tannery Lane, aggravating the
situation. Increased housing will bring even more people in cars onto the A 247 which is congested at peak times and busy
during the rest of the day as it is a cut through to Woking from the A3, and furthermore regularly used as a training route
for HGVs. Together with the proposals for a new junction with the A3 at Burnt Common, which will bring yet more traffic
through the village, this is going to be a serious problem.

This development will also impact negatively on views from the Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
My second objection is to Policy A43 where 6 Travelling Showpeople Plots are now proposed. I have already objected to the number of proposed new homes and these objections stand. Now I would like to know: What evidence and which “exceptional circumstances” are being used as justification for this new requirement? The proposal to remove an ancient woodland with its wildlife population and replace it with residential development and Travelling Showpeople Plots is ignominious. The development here will create one vast housing estate in combination with the Send Marsh (Wimpey) estate on the other side of the road and more or less join up Send and Ripley.

I see no way in which Send and Ripley can accommodate such an increase in demand for medical facilities, schools and shops. I am sure you can also see that there will be another inevitable increase in the traffic using the local roads which are already busy and congested for a large part of each day. Here I will point out the speeds of the vehicles travelling along Send Barnes Lane in the vicinity of Send Primary School. There is a real danger to the school children at the start and end of the school day. The attempt to reduce speed by moving the speed restriction sign has not been very effective.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

My third objection is to Policy A58. This development was removed from the 2014 draft because of objections which are still relevant. The proposed site is vast at 10 hectares and to be on Green Belt land. I understand that the demand for such industrial and warehouse development has decreased. So why is an increase apposite here? Also it is not satisfactory to use the word minimum instead of maximum as this opens the way for yet further development. Would it not make more sense to use sites already designated for such purpose such as at Slyfield?

Yet again the impact of increased traffic, and in this case heavy traffic, is a major concern for the area.

Finally I object to taking Send Business Park out of the Green Belt. **Policy 2 paragraph 4.3.15.** The current development should never have taken place. It is in an area of beautiful countryside right next to the charming Wey Navigation. The tow path is regularly used by walkers and the water used by boats and canoeists. It will spoil this area for everyone's leisure use completely.

I am repeating myself but it also creates more problems for Tannery Lane which is totally unsuitable for larger vehicles in both directions.

I appeal to you to consider these objections seriously, to draw up a plan which is fair to all residents in Surrey, and in particular a plan which respects our natural environment and does not encroach on Green Belt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I am writing to object to several changes on the new local plan which affect the area where I live.

It is clear that all previous objections to proposed local plans have been ignored.

I am particularly concerned about the increase in proposed residential development in a village where there is already inadequate provision in the form of medical facilities, schooling, and shops.

In your documents you refer to protecting the environment but by removing Send from the Greenbelt you are not doing this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
With regard to your resubmission of Guildfords Local Housing plan in respect of the areas of East Horsley, West Horsley, Ockham and Wisley, we feel that you as a borough council are tying to push your points with little regard for the environment, on ecological and humanitarian levels.

Whilst we appreciate that new housing needs to be addressed we feel that there are better sites to build on than large tracts of green belt.

So far there has been no indication of increasing the necessities of living in the areas mentioned above, i.e. more or larger schools; more or larger doctors. How will the communities cope with the increase in cars. At the moment East and West Horsley are being used as cut throughs when the A3 and M25 are blocked, cars leaving the A3 at Pains Hill to get to Guildford, HGVs and coaches leaving at junction 9 or 10 on the M25 and travelling up and down Ockham Road North and South to bypass the traffic jams and added to this, you wish to inflict more misery to the current occupants of East and West Horsely by increasing the amount of cars in the area.

The Guildford Council always inform us that they do not have the resources for repairing the roads, how is increasing the amount of cars using the roads going to help this. East Lane and the Street has not been repaired for several years. All we get is the odd pot hole filled in when it reaches a depth of six inches and becomes dangerous but the general road service of both these roads is breaking up.

The council states that the train service will be used. With Southern cutting 341 trains, how long will it be before that situation affects South West Trains and the roads become more congested?

All of this pays a big part in the health of the current occupants with pollution reaching levels that our government are trying to reduce.

Since the last major floods, drainage has been improved, but Ripley Lane still floods on a regular basis. With the addition of more houses many of the underground streams will have their flow compromised and more flooding will be the result. Would you wish Surrey to become another Somerset?

We have been informed that the council has plenty of brownfield sites that could be regenerated but the council seems determined to ignore these.

Every time the people of Guildford and surrounding areas show their objection for building on Green Belt land the more determined the council appears to ignore their wishes.

In conclusion we strongly object to the Local Plan in that it does not give enough thought to the current residents standard of living, inflicting hardships that when moving into the area they never thought they would have to endure.

I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick's Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan's proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch is protected from development as it is classified as Green Belt. There are no exceptional circumstances which allow for its removal from the Green Belt (Policy P2).

Central Government state clearly that housing need is not an exceptional circumstance.
The site is wholly inappropriate because:

- There is no sustainable transport infrastructure
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Local Plan as the development proposed is not sustainable (Policy S1)

The proposed number of 13,860 new houses in the area of Ripley, Send and Glandon is not sustainable. This development will ruin the local community and surrounding area, as there are no railway services, for Wisley Airfield (A35) and Garlick's Arch (A43) and the bus services are inadequate, it will bring more cars to the area as most households have more than one vehicle.

The Plan has nothing to improve the infrastructure for Garlick's Arch.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Comments on Proposed Submission Local Plan: Strategy and Sites 2016

Policy A36, A37, A38, A39, A40, A41: Site Policy – developments in Horsleys

I OBJECT to this policy.

The above sites are within the designated Green Belt area.

Per NPPF, “inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances”. The proposed developments are inappropriate by their scale and nature, especially within Green Belt. It will make the Horsleys a town, not a village, so perhaps, the Council should think of consulting the residents on a proposal to change the status first.

There is nothing in the above policy proposals to demonstrate the required “exceptional circumstances”.

The proposed increase in the housing stock is considerably above of the current level of 15% population increase. Our infrastructure and local facilities and amenities are already under a lot of strain, our roads are not able to cope with any further increase in traffic - all of which need a considerable investment even without the proposed developments. If the Council struggles to find the funds now, what state of these would be following a dramatic jump in the population resulting from the proposed developments?

The proposed developments will make an irreversible footprint on the environment, forever destroying the natural beauty that is so much cherished and enjoyed by everybody who lives or visits our area.

While I appreciate the need for new dwellings, available brownfields should be allocated to meet this need in the first instance. The proposed plan however has not demonstrated sufficient consideration of the available brownfield sites potential.

I am very concerned that the local authorities, having already held a consultation in 2014 resulting in a high number of registered objections, still continue with the outlined proposals in what appears to be a single-minded and dictatorial style of approach. I strongly object to all proposed developments in policies A36-A41 and hope that my voice will be heard.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6878  Respondent: 11007201 / Valery Smirnov  Agent:  
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to this policy.

This area provides farmland and should be designated for agricultural use. It sets a natural border to an outward development from London from M25. Creating a town with about 2,100 homes (almost the size of the Horsleys itself!) would increase the density of population to the unsustainable level. Our roads and facilities are very limited even at present, and the expansion of the population to such an extent would not only require a full review and redesign of the local infrastructure, but it would also bring about a considerable destruction of the surrounding woodland and areas widely regarded as Outstanding Natural Beauty.

This development appears to be gigantic in size and disproportionate in scale and surely is at the extreme scale of developers’ opportunism, hand-in-hand with the local authorities who, instead of protecting the local interests seem to be only too happy to let it go without giving unduly consideration to the harm it would do to the existing residents in all shape or form – be these humans or flora and fauna.

Finally, I should like to point out that the site is located in the heart of Surrey Green Belt. The development will irrevocably disfigure the faces of the surrounding villages, including the Horsleys.

I, alongside with my fellow residents, believe that there is no case and no place for this development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14980  Respondent: 11007201 / Valery Smirnov  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy.

I particularly protest at the “insetting” of 14 villages from the Green Belt and at “infilling” 12 Green Belt villages. It is disturbing to learn of the proposed extension to the settlement boundaries in many villages which will inevitably lead to numerous overdeveloped areas and a total extinction of the rural feel and the surrounding countryside.

Having reviewed the above policy, I note that the NPPF’s other 4 tests of Green Belt status including the prevention of urban sprawl have been ignored. The policy also states that “the general extent of the Green Belt has been retained”, which is a misrepresentation.

Policy P2 seeks to justify excessive development on the Green Belt designated land without demonstrating exceptional circumstances required for alterations of the existing Green Belts boundaries.

I object to this policy on moral and national grounds. Our surrounding nature and villages are the assets that should be protected not only for the sake of our own, but also for generations to come. It will be impossible to undo the damage inflicted once Green Belt boundaries are removed, opening up the area to developments that are for over-ambitious and distractive to the local nature and culture.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
• It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 - 2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).
The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)
I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/15352  Respondent: 11007393 / James Culmer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk
of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.
The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students IRE accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university’s ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15309 Respondent: 11007393 / James Culmer Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.
Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The
fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.
There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Comment ID: PSLPP16/15270  Respondent: 11007393 / James Culmer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. The road (A247) through West Clandon is particularly hazardous as, in a number of places, two large vehicles are unable to pass in opposite directions without mounting the pavement. Further vehicle movements will result in even more acute congestion, greater pollution and an increased risk of fatal accidents. Residents and the environment will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 houses being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is not justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

Page 109 of 2855
The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighbouring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.
The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.

6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2522  Respondent: 11007425 / Kate McIver  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan's proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

I object to the employment strategy and impact at Garlick's Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick's Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

There is already far too much traffic in our villages and this plan will further create more congestion in Ripley, Send and Glandon. The existing roads are in poor quality and in particular the rural roads are extremely narrow and in some areas there is no provision for footpaths or cycle lanes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10447  Respondent: 11007425 / Kate McIver  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the lack of proper infrastructure planning for sites (Policy I1)

The Plan does not identify suitable infrastructure improvements to provide the huge scale of development, especially at Garlick's Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, medical services and schools are already nearing full capacity.

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to poor air quality concerns (Policy I3)

Due to the increased number of cars the area will be subjected to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Glandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43) there are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID:  PSLPP16/10444  Respondent: 11007425 / Kate McIver  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to development in areas which are at risk of flooding (Policy P4)

The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick's Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council's own assessment. This area has flooded on numerous occasions in recent years and therefore the Council's assessment is not sufficient to be included in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPP16/10440  Respondent: 11007425 / Kate McIver  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Local Plan as the development proposed is not sustainable (Policy S1)

The proposed number of 13,860 new houses in the area of Ripley, Send and Glandon is not sustainable. This development will ruin the local community and surrounding area, as there are no railway services, for Wisley Airfield (A35) and Garlick's Arch (A43) and the bus services are inadequate, it will bring more cars to the area as most households have more than one vehicle.

The Plan has nothing to improve the infrastructure for Garlick's Arch.

The development should be relocated to urban areas where there is sustainable transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPA16/1658  Respondent: 11007713 / Grahame Crispin  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the validity of Guildford Borough Council’s evidence base used to demonstrate a need for the above Policies being objected to (namely P2, A42, A43, A43a, A44).

Required Employment space versus 2015 ELNA & 2013 ELNA has been overstated.

Housing needs (2015 SHMA) have been overstated by including, for example, foreign students.

The number of houses that is suggested as being required has been exaggerated by GBC; a more realistic lower requirement could be satisfied by the re-use of brown-field sites, and Green Belt land does not need to be encroached into.

At the time it was voted upon (24/5/16), Guildford Borough Council’s Local Plan did not take account of Guildford Borough Council’s Transport Assessment (not available until weeks afterwards on 6/6/16).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A42 (45 houses at Clockbarn Nursery Tannery Lane Send).

Tannery Lane is too narrow to support the additional traffic that would be generated by any development that this policy provides for, the junction with Send Road will become significantly more hazardous than it already is, and the network of lanes around Papercourt and towards Ripley will become more of a cut through and dangerous.

Development of the site would destroy a valuable Green Space habitat, and destroy the buffer between Send Village and the Tannery Lane Industrial area.

The site must NOT be developed and the Policy must be abandoned

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43 (400 houses & 7000 sq metres of industrial space at Garlick’s Arch).
The site includes ancient woodland which must NOT be encroached upon by any extent.
Additional traffic and noise will severely and adversely destroy the Green buffer between the A3 and Send.
Adoption of this policy and will set a precedent for further development along the A3 corridor between M25 and Guildford.
All traffic into and out of this site will route through Send’s already busy roads, and industrial area will generate unacceptable levels of heavy vehicle traffic.
Send must NOT become a Local Rural Centre.
The site must NOT be developed and the Policy must be abandoned

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Adopting this policy will generate unacceptable additional local traffic and heavy vehicles through Send and its already poor road network, by attracting traffic to/from Woking and surrounding areas from other routes.
The existing A3 restricted entry/exit junctions at Ockham, Burnt Common and Burpham are perfectly adequate for the current local communities, and the restrictions are extremely beneficial in minimising traffic for the villages.
If the policy were adopted, the provision of additional slip roads would also spawn demand for further as-yet unplanned development which would further increase unacceptable traffic pressure through Send and its environs; Send will become gridlocked, and noise and pollution levels become unacceptable.
Send must NOT become a Local Rural Centre.
The additional slip-roads must NOT be developed and the Policy must be abandoned.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Guildford Borough Council not having followed correct process in relation to the above Policies being objected to (namely P2, A42, A43, A43a, A44).

The significant changes to the GBC Local Plan in relation to Send from 2014 until now July 2016 mean that a full consultation must be undertaken under Regulation 18, and not the ‘short-cut’ Regulation 19 process currently being attempted by GBC.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3840  Respondent: 11008001 / Steven Crooke  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of
Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

I object as Guildford BC has failed to provide sound evidence in terms of the Employment Land Needs Assessment 2015 (ELNA) This showed that the industrial space at Burn Common is no longer needed. That 13860 new houses are required is also an exaggerated figure. The Green Belt does not need to be built on and 50% of new homes needed could be built instead on brownfield sites. GBC’s Transport Assessment was not available to councillors for he vote on 24th May whilst infrastructure overload has received little attention.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)
I object in that Guildford BC has not followed the correct process having changed every major site in Send proposed for development since 2014, now adding in a major new road junction. The proposal for new houses has changed having done down in April 2016 to 185 and now being increased to 485. Significant changes require another full consultation under Regulation 18.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the Policy A42 change at Clockbarn in Tannery Lane because this increase from 45 to 60 homes is far too much and ignores the hundreds of prior objections made by local people against this planned development. It will lead to further traffic problems already experienced at the Tannery Lane and A247 junction and will make surface water flooding even worse. Importantly it will erode the Green Belt in our village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the Policy A43 change at Garlick's Arch as it again completely ignores the thousands of previous objections made by local people. I feel very strongly that this will cause over-development of our village with an excessive number of houses which will destroy ancient woodland, which is permanent Green Belt land where no "exceptional circumstances" exist. As well, it will generate excessive traffic which existing local roads in Send and Ripley will not be able to cope with. We already have frequent traffic chaos from traffic using the village as a cut through from the A3. The proposed development will also join up Ripley and Send and defeat the key purpose of Green Belt. I also object to the siting of Travelling showpeople on this site when there has been no proven demand at this location.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy A58 at Burnt Common because it had been deleted from the 2014 draft plan because of all the objections previously made. In particular I object to the word "minimum" changing from the previous word "maximum" particularly since then there has been a decline in the demand for industrial land. There is no proven need for local industrial or warehouse development on Green belt land when both Slyfield and Guildford have empty sites and industrial units. The impact that such a development would have on the village is substantial and would create traffic gridlock, as well as joining up the existing villages and defeating the purpose of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

The scale and pace of the proposed development in the draft Local Plan will forever change the rural nature of Send. The lack of infrastructure within Send/ Send Marsh/ Burnt Common and proximity to sensitive areas of nature means Send is not suitable for the changes proposed in the draft Local Plan.

As a mother of three children I choose to live in Send as I felt it would provide my children with a great place in which to grow up, however these proposals threaten to destroy all that is good about the village. It will lose its identity as a rural village and simply become a congested suburb. Already the roads are busy and with the scale of development proposed I feel there is not the infrastructure to cope with more traffic and more housing.

Already the doctor’s surgery is very busy and it is difficult to get an appointment and the schools are over-subscribed. I want to feel safe crossing roads with my children without the worry of further traffic speeding along the local roads.

This local plan is what the developers want and is certainly not what local residents such as myself want for Send. I very much hope that you will take these concerns into consideration.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

---

1. I OBJECT to Gosden Hill development being in the Local Plan The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.
Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1833  Respondent: 11008225 / Russell Pascoe  Agent: 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)
It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

1. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

1. I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

1. I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/3964  Respondent: 11008225 / Russell Pascoe  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
1. I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/3966  Respondent: 11008225 / Russell Pascoe  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3975  Respondent: 11008225 / Russell Pascoe  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3972  Respondent: 11008225 / Russell Pascoe  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.
Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLP16/3969  Respondent: 11008225 / Russell Pascoe  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **I OBJECT**, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

1. **I OBJECT** to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Comment ID: PSLPP16/3970  Respondent: 11008225 / Russell Pascoe  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3971  Respondent: 11008225 / Russell Pascoe  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Comment ID: PSLPP16/3957  Respondent: 11008225 / Russell Pascoe  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

bjections to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

---
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Borough Wide Strategy (Policy S2)

a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

b. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

c. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any commonsense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposal to inset Send Business Park from the Green Belt because:

- It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
- There is highly restricted vehicular access along Tannery Lane in both directions
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/2438  Respondent: 11008417 / Sara Thorne  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

I am writing to raise my OBJECTIONS to the Guildford Draft Local Plan.

I OBJECT to Send Village being removed from the Green Belt. There is no requirement or justification for this. The Green Belt, as required by the National Planning Policy Framework, was intended to be permanent and there are no special circumstances (and none provided) to justify abandoning it. The plan will irreparably damage the nature and character of Send Village and Send Marsh - this is very much "the thin end of the wedge" and in removing Send's Green Belt the plan is essentially removing Send as a Green Belt buffer between Guildford and Woking. Roads that are already congested will become more congested still and more dangerous, local services already strained will break and the character of the place where we (not the planners, not the developers) live will be fundamentally altered with no reasonable cause.

I OBJECT to the consequences of the draft plan insofar as they affect Send which are plain to see. Any problem within wide radius (traffic accidents, roadworks, flooding for example) lead to the main road quickly becoming gridlocked in either or both directions. The new houses, industrial development and A3 interchange will make this a permanent state of affairs. These are roads that people live on and alongside pavements where children walk to school - the effect of these proposals will be to create these as commercial thoroughfares inappropriate for the community.

I OBJECT to building 45 houses at Clockbarn Nursery. Tannery Lane is far too twisted and narrow to take any more traffic - with the already-increasing amount of traffic along Tannery Lane and Send Road, the junction between these two roads is already very dangerous. With the prospect of more to come from already-approved planning permissions. Tannery Lane
cannot take any more volume. I OBJECT to building 400 houses and 7,000 sq meters in industrial space at Garlick's Arch. There is no justification for this - it is an inappropriate location with the single access provides insufficient access. The site floods and is covered by ancient woodland - there are existing brownfields sites (e.g. Slyfield) more appropriate for any such development if indeed it is needed. The local infrastructure cannot take the additional strain on services and the roads cannot take the increased commercial traffic that would result. The fact that that this proposal was only included at the last minute - effectively removing Send from the Green Belt altogether - smacks at best of ill-planning and "making it up as we go along" and at worst of something more sinister.

I OBJECT to the new interchange with the A3 at Burnt Common. As a consequence, Send would have to take traffic from the proposed new housing developments in the locality, much to this traffic to and from the A3, M25, Woking and Guildford. As noted above, the Send Road - often gridlocked already- will be permanently overloaded and there will be an inevitable over-spill into Send Marsh and Potters Lane which will be in danger of becoming rat-runs and busy alternatives. These are roads that people live on and along which children walk and cycle to school. The proposals will make for a dangerous cocktail for no good reason.

I OBJECT to the development of 40 houses and 2 travellers' pitches at Send Hill. There is no justification for all the additional housing that is being proposed and as far as I am aware no explanation has been provided. Again this is an inappropriate location because of the narrow width single access providing insufficient access. Any development would spoil this area set in beautiful countryside and furthermore the subsoil of the proposed site contains documents unsafe landfill waste registered with you, Guildford Borough Council.

I OBJECT because Guildford Borough Council have not followed the correct process. Since 2014 the Council has changes every major site in Send proposed for development and now not only increased again the proposal for new houses to 485 but also added a la-e and character-changing road junction. Surely there should be another full consultation under Regulation 187. Indeed, the major proposed development at Garlick's Arch (Policy A 43) is new and has not been consulted upon previously. It gives little confidence that due process is being followed as the ramifications of this proposal for the community of Send cannot be under-estimated.

I OBJECT to the draft local plan for the reasons given above. The disregard for the Green Belt, for the local community and for the consequences to these of the draft plan make it inappropriate and illconceived.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I strongly support the policy to retain this allotment space. Allotments are essential community havens that promote mental and physical wellbeing as well as presenting a far nicer environment for the community. Losing this space will be another step in a move toward an unhealthy and insular community that doesn't enjoy fresh air, or interactions with their neighbours. Indeed many take a lot of enjoyment in sharing the produce their allotments produce with their friends and neighbours or indeed the elderly or those in need.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object. I regularly use this car park for short visits to Guildford high street. The development of 60 homes (presumably flats) is a large number for such a small site and as a result the statement "Retain as much public car parking as possible" in no way guarantees a meaningful area of parking will actually be retained.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object. As a local resident I object on the grounds that 400 homes & substantial industrial building will put significant strain on the local infrastructure particularly the already busy roads and in terms of the homes strain on the doctor surgery & local schools with no outlined plan to mitigate the risk. The requirements to pay "significant regard to the ancient woodland within the site" does not guarantee all said woodland will be protected and preserved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I have attended a presentation at East Horsley Village hall and discussed the impact of the local plan with several of your officers who were there. The only amendments to the rejected Wisley airfield project was a slight expansion of the area with no increase in additional housing To which I strongly object.

The other development issues in the local plan are still the same as before. You want to cram houses into some fields (533 I counted) in East and West Horsley, plus 2200 at Wisley and Ripley is under siege as well. I have protested in the past, but as this is a theoretical amendment, I am objecting again. Sites 38, 39, 40, and 41 are unsuitable. The village is small and the roads are narrow. The required lorry and construction traffic will jam the entire area for years and once it is completed will overwhelm the local facilities. You cannot get a doctor’s appointment for several days at the moment and another 1500 residents certainly won’t help and that’s without the Wisley Development. Local schools are already under pressure and Secondary schools particularly. There is no provision for road improvement in Horsley.

The Ockham Road North development by the railway bridge will put hundreds more cars a day onto a difficult road, with narrow pavements, single file in places and significantly increase the risk of a pedestrian being struck by a passing car or lorry wing mirror. The road also floods easily and regardless of flood risk controls in building, the water will continue to fall and has to go somewhere. You can’t just keep adding to a 1930’s infrastructure. The whole thing needs to be re thought if you are doing something like this. I did note that none of the Council representatives live in the area!!!

The other 2 proposals in West Horsley are also overkill. You may have noticed that there is a stop and go bit of road where it is too narrow for cars to pass and only one lane can go at a time. East Street is certainly not suitable for an increase in traffic of this magnitude.

The final proposal in Ockham Road North is at least a bit further out, but still adds a significant volume of traffic to an already over busy road. I have live there for 27 years and the traffic increase is amazing in that time. It frequently takes several minutes to get out of my driveway and of course there is the mother’s jam at Raleigh and Glenesk schools.

In addition I have repeated the very well thought out objection to the Wisley Airfield below and there is nothing significant in the new plan which changes that situation

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to OBJECT to Amended planning application 15/P/00012 for the following reasons:

**Sustainability:** The site is remote and occupants will rely on the use of the private motor car adding to traffic congestion on both the Strategic Route Network (the A3 and the M25) and local roads which are already running over capacity.

- The application relies on people switching to walking, cycling and public transport. This is unrealistic as it is two miles to the nearest railway station and at least half the route has no footpath. Roads are narrow and unlit.
- There is no spare parking capacity at either of the local stations.
- Sites of this size are required to provide outdoor open space. The applicant has “double counted” the outdoor space with that required for SANGS.
- The loss of high quality agricultural land is in contravention of policy.

**Air quality:** The air quality figures are based on an unreliable transport assessment.

- The applicant has not used the DEFRA modelling statistics as required and rather appears used numbers from an unrecognised (and unreliable source).
- Poor air quality is exacerbated in the area by temperature inversions which trap the air. Young and old are extremely susceptible to poor air quality.
- Air quality is not improving as fast as expected, partly due to the excessive emissions (VW et al).
- The impact of poor air quality on RHS Gardens at Wisley and the Thames Basin Heath Special Protection Area (SPA) is already in excess of legal limits.

**Transport:** The transport assessment makes a number of erroneous assumptions and is not credible.

- It is completely unrealistic to assume that there will be a decrease in vehicle movements.
- There is no impact on traffic for the recently added secondary school, nor from the fact that prior to the school being built the children will have to be transported to the nearest available school in Leatherhead – adding to congestion.
- There appears to be no impact shown for the 270 daily bus movements or for the waste lorries or HGV deliveries to the site.
- The TRICS data used for comparison is not a relevant measure: site not comparable with a site in Guildford, nor a site 400m from the centre of Redhill, nor one on the edge of Staines.
- The traffic counts bear no relation whatsoever with counts submitted to Guildford or to Woking borough councils in support of other large development projects.
- The modelling in the Transport Assessment at 7 junctions close to the site bear no relationship to the daily experience of residents, evidencing flawed modelling.
- The number of daily trips is understated in the region of 1000 vehicle movements.
- Additional traffic will have a negative impact and cause irreparable damage to historic houses and other buildings in Ockham/ Ripley/Downside and further afield.
- If allowed, the impact of the additional traffic may prohibit other developments further south on the A3 or indeed those needed by the RHS.

**Appropriate development:** The site is in the Green Belt in a rural location, hemmed in by the A3 to the west, the TBHSPA and the M25 to the north and the Conservation area of Ockham Village to the south.

- Green Belt boundaries can only be changed in the local plan process and in exceptional circumstances which have not been demonstrated.
- The site is not big enough to provide satisfactory living standards even for “affordable housing”.
- Four and five storey buildings are not appropriate in the rural environment nor on an elevated site.
• Residents will be crammed in with little outdoor space, a noisy location, with very poor air quality. The density of housing proposed is similar to that in Islington.

• The site is clearly visible from the Surrey Hills AONB and as a result it will have a negative impact on views to and from the AONB.

**Thames Basin Heath SPA/SSSI/SNCI**: The impact of 2,068 houses on the environmentally sensitive TBHSPA cannot be mitigated. Damage will occur to the habitats of the protected and endangered rare species (including skylarks, nightjars and many others on the RSPB red list) in contravention of the EU Birds Directives and Habitats Regulations

• The siting of the proposed Suitable Alternative Natural Green Space (SANG) adjacent to the SPA will only increase visitor numbers causing further damage

• Part of the SANG is in a designated flood plain

• Para 119 of the NPPF “presumption in favour of sustainable development” does not apply where development requires assessment under the Birds or Habitat Directives

• It is impossible to state without doubt that the mitigation proposed will prevent damage to the SPA particularly in the light of inadequate traffic/air quality reports.

• There are likely to be over 700 dogs and 700 cats living on the proposed development. These will be a constant threat to ground nesting birds on the SPA and cannot be mitigated by one warden working a normal working day.

**Impact on the local area**: The additional 5,000 residents is the equivalent of almost doubling the population of East and West Horsley combined. This increase in local population will impact:

• Light pollution, noise, traffic and infrastructure which has been gravely underestimated and proposed mitigation measures are totally inadequate

• The cumulative development in the borough and in the neighbouring boroughs of Woking, Waverley and Elmbridge per the objections from both Elmbridge Borough Council and Woking B C

• The water table and flooding in the area. It appears that no impact assessment has been done relating to the loss of agricultural land which currently soaks up a significant volume of rainwater.

• Listed buildings adjacent to it such as Yarne, Bridge End House and Upton Farm

• Via closure of a number of local roads coupled with an increase in traffic will affect a large number of road users from Cranleigh to Cobham and everywhere in between

**Inaccuracy of the documentation**: There are factual errors in the documentation

• Highways England have recommended that the proposal cannot be determined due to the applicants failure to provide traffic data in the format required

• There are a number of misrepresentations in the paperwork e.g. nine stations within 5 miles – this is however “as the crow” flies – only Horsley and Effingham Junction are within 5 miles by usable road from the middle of the development

• The applicant’s description of the site as brownfield is a gross over-simplification. 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remaining runway, a habitat for rare flora and fauna, (14ha) has never had buildings. The remainder of the site (55%) is high quality agricultural land.

**Other**: This site is not deliverable within 5 years due to problems with sewerage and water capacity, outlined by Thames Water & the OCK DVOR air traffic control beacon which limits development until 2022

• No very special or exceptional circumstances exist - Alternative sites exist

• The proposal includes the site SCC safeguarded for waste under the Surrey Waste Plan

• The site is not listed for development under the existing 2003 Local Plan

• There is not enough land to provide a sustainable community based on GBC’s own parameters

• There is no update at all to the Heritage study despite the significant Bronze Age haul found in Ockham village in May 2013 and the likelihood of further remains on the site.

I trust the Council will find this useful, in their deliberations
Population growth

I have major concerns in relation to the assumed population growth and by extension the 13,860 new homes this suggests are required. Firstly, the numbers are based on pre-Brexit projections for economic and population growth. There is a strong likelihood that these numbers should now be revised downwards.

It is utterly irrational to embark on a radical transformation of the borough without a clear Housing Target. The actual figure of 13,860 new homes is unsubstantiated and has not been scrutinised by Councillors despite repeated requests for debate. Equally unsound is the fact that the assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. The fact that this contractor is used by a number of local authorities should not be used as confirmation of the veracity of the figures, and the complete lack of transparency concerning these projections is quite frankly shameful. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. Yet we are prepared to change forever the face of our county on this basis? I therefore object to the Local Plan based on

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Specific Sites in Local Plan

As an East Horsley resident:-

- I am not opposed to development of Site A36 and Site A37. I believe these are supportable development sites.
- I am opposed to development of Site A39 as the site is currently in the Green Belt and in a flood zone area.

I am opposed to development of Site A38, A40 and A41 as all three currently sit in the Green Belt and will completely swamp West Horsley village.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am strongly opposed to development of Site A35, former Wisley airfield. This site is a large area of current Green Belt which provides protected open space near the M25 and is a barrier to outward development from London. Creating this new settlement would cause irrevocable harm to the Green Belt and environment. It would also overwhelm local roads (from a traffic perspective) and local facilities/services (shops, health centre, railway services, schools). I am appalled at the inclusion of this site within the Local Plan as it was subject to a recent planning application (15/P/00012) which was unanimously rejected by the Planning Committee.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
**Designation of East Horsley as a District Shopping Centre**

The Local Plan designates East Horsley as a “District Shopping Centre”. This is extraordinary given that East Horsley houses a small collection of shops (convenience store, hairdresser, butcher, bank, pharmacy) typical of a medium sized village centre. The facilities are not in any way those of a main town centre, or urban area, from the perspective of either retail (there is no supermarket), leisure, office or arts/culture facilities. I object strongly to East Horsley being designated as a District Shopping Centre – it should be classified as a Local Centre.

Furthermore the local facilities and infrastructure would be completely overwhelmed by the scale of the proposed developments in East Horsley, West Horsley and the former Wisley airfield site. In particular the road infrastructure, East Horsley shops, health services, schooling and train transport – many of these are already stretched and in some cases inadequate for the current residential community. I see no suitable sustainable proposals on supporting infrastructure investment outlined in the Local Plan to justify the proposed level of development and therefore object to these proposed developments.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I wish to register objections to the Local Plan on a number of counts.

**Green Belt**

The National Planning Policy Framework states that the Government attaches great importance to the Green Belts; the fundamental aim of which is to prevent urban sprawl by keeping land permanently open. I strongly object to the changes to the Green Belt which are proposed and specifically to the exclusion from the Green Belt of the former Wisley airfield site and ‘insetting’ of East Horsley, West Horsley and Effingham villages.

I find the arguments proposed in 4.3.12, 4.3.14 & 4.3.16 of the Local Plan to be fundamentally unsound. I cannot see any justification for the former Wisley airfield site to be excluded from the Green Belt and I consider the ‘insetting’ of East Horsley, West Horsley and Effingham villages to be unacceptable. I consider both these proposals to be against the National Planning Policy Framework which states “once established Green Belt boundaries should only be altered in exceptional circumstances”. The status quo for the former Wisley airfield site and for these villages is that they currently are in the Green Belt. Ministerial Guidance on the Green Belt makes it clear that legally unmet housing need alone is unlikely to qualify as “exceptional circumstances”. I firmly believe the former Wisley airfield site and East Horsley, West Horsley and Effingham villages should continue to lie within the existing Green Belt.

</tr>
<tr>
<td>The Local Plan amendments clarify definitions which in my view confirm that Station Parade, East Horsley should not be designated as a “District Centre”. Neither should this be designated as a “Strategic Employment Centre. East Horsley is a small collection of shops (convenience store, hairdresser, butcher, bank, pharmacy) typical of a medium sized village centre and should more appropriately be designated a “rural local centre”. The facilities are not in any way those of a main town centre, or urban area, from the perspective of either retail (there is no supermarket), employment, leisure, office or arts/culture facilities.</td>
</tr>
<tr>
<td>These local facilities and infrastructure would be completely overwhelmed by the scale of the proposed developments in East Horsley, West Horsley and in particular, Wisley Airfield/Ockham. The road infrastructure, East Horsley shops, health services, schooling and train transport are already stretched and in some cases already inadequate for the current residential community.</td>

I wholeheartedly disagree with the statement “The Metropolitan Green Belt will continue to be protected, as shown designated on the proposals”. Given the changes to the Green Belt which are proposed, I cannot see how Guildford Borough Council can claim to be championing the Green Belt in any way, much to my dismay. I firmly believe East Horsley, West Horsley and Wisley Airfield should continue to lie within the existing Green Belt.

The NPPF states that the Government attaches great importance to the Green Belts; the fundamental aim of which is to prevent urban sprawl by keeping land permanently open - "once established Green Belt boundaries should only be altered in exceptional circumstances". The status quo for West Horsley and East Horsley is that they are currently in the Green Belt. Ministerial Guidance on the Green Belt makes it clear that legally unmet housing need alone does not qualify as “exceptional circumstances”.

I object to the creation of a new settlement at Wisley Airfield as outlined in the Spatial Vision and its inclusion as a “strategic development site” in 4.1.9. The NPPF states that sustainable development means achieving growth while “ensuring that better lives for ourselves don’t mean worse lives for future generations”. The area around Ockham is beautiful countryside and important farmland. To develop this area would be absolute desecration and destruction of the NPPF principles, resulting in the loss forever of this rural landscape and more importantly the wildlife and plant habitats. It is not a sustainable location given the lack of amenities and transport – Ockham is a small settlement with no infrastructure. I do accept the need for further housing but it MUST be development of brownfield sites within developed areas. (We do not have an infinite number of natural habitats left in the overdeveloped South East to destroy with impunity!

Policy P2 of the Local Plan clearly states “We will continue to be protected the Metropolitan Green Belt, as shown designated on the proposals Policies Map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.” The Local Plan’s proposal to include the Former Wisley Airfield as a potential development site is completely contrary to this statement and I object strongly to such a large scale expansion into the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I refer to the submission we made last Nov – a copy of which is attached for ease of reference. We have had no response to the points raised and having looked at the latest draft local Plan issued for consultation we can see no evidence that there has been any coherent integrated plan for traffic in the area in conjunction with Surrey County Council and in particular proposals to ease both traffic flow and traffic impact on residents of Compton. Without such plans we consider it inappropriate to proceed with large scale additional housing development in the area.

*******************************************************************************NOV 2015
We have registered on the MasterPLan consultation website but the questionnaire isn’t really designed to record our the feedback on specific aspects of traffic and infrastructure, so please accept this as our contribution to the public consultation process.

We have looked at the Guildford Town Centre Masterplan and welcome the general aims of enhancing the provision of commercial and residential accommodation to meet future changing needs, to substantially improve the linkage and use of the area between the town centre, the station and the river and to overcome the traffic problems. It is a much needed plan to ensure the ongoing success of this wonderful town.

Our one major concern is that all the extensive studies to alleviate the very difficult traffic problems, concentrate on the impact within the town and there is no assessment of, or weighting to, the consequential impact of each option in the surrounding area. We may be mistaken but we cannot find how these proposals fit within a plan for the wider area that addresses both traffic flow and traffic impact on residents and users of that area – as you have rightly done for the Guildford centre.

If the current preferred options for the Guildford Masterplan are adopted, through traffic will have to find alternative routes. For east/west traffic we believe this will mean yet further traffic flows along the B3000 which is the principal east/west route south of Guildford for vehicles with end destinations in Godalming, Guildford and areas to the east or west of Guildford. This is a truly frightful prospect for the village of Compton.

Compton is part of your Borough and is also your responsibility. It is far smaller than Guildford but is another precious asset of the Borough with its many listed buildings, historic church, Loseley Park, Watts Gallery and its setting in the beautiful Surrey Hills. Yet it feels that the huge damage to the village caused by the massive increase in traffic in the last 30 years is never addressed by local or county government – we suspect it just ends up on the “too difficult” pile.

The statistics are well known and recorded through the two VAS speed alert units. In the region of 6 million vehicle movements a year – one every 2.4 secs during rush hour – through a rural village! The 30 mph speed restriction is almost universally ignored except when the weight of traffic forces it or we are doing a community staffed Speedwatch session. Top speeds through the village are consistently recorded at over 50 mph.

The sum total of government help for the village over 30 years has been the laying of quiet road surface in part of the village which was then ripped up a few years later and the absurd installation of rumble bars right outside cottages in New Pond Road which had to be removed at considerable expense. The parish paid for the vehicle activated speed warning signs and data collection box.

Population levels in SE of England are estimated to increase and levels of traffic are not going to reduce. Basing a Guildford solution on an assumption that changes in modes of travel will result in a major traffic flow reduction feels illusory. In deciding on the Guildford Masterplan please do so together with a coherent integrated plan for traffic in a much wider area in conjunction with Surrey County Council. If the best long term solution is a major infrastructure project for this area of the SE, please do not discard it on the grounds of cost- rather why not present it to the new National Infrastructure Commission? Andrew Adonis has a proven track record in delivering long term education and transport projects where he can see the benefits and there must be a great case for helping Guildford and area to further build on its success as a key town in the south east whilst easing the traffic impact on villages.

It would be appreciated if you could acknowledge receipt of our consultation response.

Answer (if comment is on questions 1-7 of the questionnaire): ()

In the earlier drafts of the Plan, no options were presented on this proposal and you appear to have ignored the huge number of objections made on this matter at the earlier stages of this consultation. The character of the East and West Horsley villages as it exists today is a direct consequence of the protection afforded by their Green Belt status for more than 50 years. Generations of central government and local authority officials and politicians have respected this highly successful post-war planning policy mechanism. Its existence has not prevented organic development of the villages over the years, but has enabled this development to take place in a controlled way. It is surely not beyond the imagination of your Council to make proposals for continued organic development of the villages by appropriate provisions and shaping of policies within the Green Belt rules.

I object to the introduction of a new planning designation that would allow "limited infilling" within an extensive area to the south of the A246 in East Horsley. This might have been acceptable in the context of a more imaginative approach to planning (see comment above) but if you are determined to remove the Green Belt status of the village, then it makes no sense to pick away at the edges.

In the context of the above, you will not be surprised to hear that I also object to the Sites Policies set out in the Local Plan, more particularly in respect of the numbers of houses envisaged for building on each site. If the Green Belt designation of the two villages is to be removed, then all the sites listed for the two villages will have an inappropriately high density of housing, not consistent with the existing character of the villages. To take one example, the proposal to put 48 houses on the Thatcher's hotel site is far too high a density, being more than twice that of adjoining housing. Furthermore, this site is currently occupied by a busy hotel that brings many visitors to the village. This is our only hotel in East Horsley. How can it be consistent with your Economic policy to remove our one and only healthy hotel business? I object to the inclusion of the Thatcher's Hotel site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4479  Respondent: 11009281 / David Foot  Agent:
I also object to the proposal to build houses on the former Wisley Airfield. When this site was the subject of a planning application, it was refused by your Councillors without reservations. Well done! So why has it been restored as a candidate building site in the local Plan? My objection to building at Wisley is for both environmental and infrastructure reasons which were well articulated at the GBC planning hearing, and which have not been subsequently addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Finally, I object to the Plan because of its potential effect on our infrastructure in East and West Horsley. There are several aspects to this-schools, medical facilities, car parking, drainage, access to transport facilities, all are stretched at the moment. I will focus on just one aspect-roads in East Horsley. I live close to the Ockham Road South. This is already far too narrow to allow two lorries to pass without mounting the pavement. Frequently I am forced to drive on the pavement when builders' lorries and pick-ups come in the opposite direction. It is just not good enough to say that this is the responsibility of Surrey County Council. Does Guildford Borough Council not subscribe to a joined-up planning policy? By ignoring the limitations of the existing infrastructure supporting the Village, the Borough Council is planning a serious deterioration of the Quality of life here.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I entirely reject the proposal to take the villages of East and West Horsley out of the Metropolitan Green Belt. Your proposed Local Plan claims to protect the Green Belt—not just some of it.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have commented before on the Council's proposal to take the village of East Horsley out of the Green Belt (what you call insetting) and the very ambiguous statement that the Green Belt is being protected in the proposed Plan. That is clearly not happening, and a more plausible and honest statement of Green Belt policy needs to be stated in your Plan if is still your intention to remove the Green Belt status of this village in the face of many objections. Along with this, you are proposing to increase the area to be "inset" beyond the boundaries of the existing settlement area in order to maximise the area available for building on the fringes of the village. However I wish to comment more specifically on what appears to be a new proposal in your targeted consultation. This is to extend the settlement boundary in East Horsley to the south of the A246. While I am pleased to see this area is not threatened by Green Belt removal, the proposal you are making is difficult to comprehend on the maps - the various Appendix H maps for East Horsley South - and is largely unexplained in the text. It seems to have been 'bounced in' to the Plan at the very last minute. One of the main components of this potentially increased settlement area is Chalk Lane and its environs. The Lane is a scenic and archaeological feature of the village, being an old drove road probably dating from pre-historic times. The proposal to include this sensitive area within the new settlement area boundary will put at risk the unique character of the area. It is very likely to promote unsympathetic mulling and extensions to properties, and new and larger accesses that destroy the chalk banks and degrade the whole character of this part of the village. I therefore strongly object to the movement of the Settlement Area Boundary south of the A246 which is proposed under the various East Horsley South maps in Appendix H which you are proposing as part of Policy P2.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
On a more positive note I applaud the Council's proposal to remove site A36 as a potential building site. Plainly the existing hotel on this site is potentially viable - particularly with the arrival of the Grange Park opera - and the advantages of retaining it comprehensively outweigh the very arguable merits of building houses.

I object to the proposal to build 400 houses together with 7000 sq metres of industrial buildings at Garlick’s Arch. Many of us in Send live on a flood plain with an archaic drainage system and we do not wish to have this exasperated; Garlick’s Arch is also subject to flooding and is on a higher level. I feel strongly that this is not the area for industrial buildings – this is a village.

Answer (if comment is on questions 1-7 of the questionnaire): ()
CLOCKBARN NURSERY POLICY A42

60 homes in this area would be completely inappropriate with the existing access for Tannery Lane. This is an area of Send where congestion is already at a peak and your proposal would mean an addition of another say, 150 cars. We do not have the infrastructure for the addition of all these homes and cars. I object to this proposal.

The idea of increasing the number of houses proposed on this site is ridiculous. As someone who has lived near by for many years and [unreadable word] the traffic problem in Tannery Lane where in places the road is only wide enough to take one car. I think the community who vote [unreadable words] are without any common sense.

West Horsley sites:

With respect to the four sites located in West Horsley:

(i) Policy A37 – Land at and to the rear of Bell & Colvill, Epsom Road, WH (40 homes / 1.4 hectare / 28.6 dwellings per hectare)
(ii) Policy A38 - Land to the west of West Horsley (Manor Farm, between East Lane and Long Reach) (135 homes / 8.4 hectare / 16.1 dwellings per hectare).

(iii) Policy A40 - Land to the north of West Horsley (Waterloo Farm at rear of Ockham Road North) (120 homes / 8 hectare / 15 dwellings per hectare).

(iv) Policy A41 - Land to the south of West Horsley (on East Lane) (90 homes / 4.8 hectare / 18.8 per hectare).

Whilst I am not opposed to new housing in West Horsley per se; the scale of this proposed development in West Horsley is excessive and as set out above not reflecting need in any way. In particular I am most strongly opposed to site A41. This site is critical to West Horsley’s semi-rural identity and character and it is vitally important that this open green aspect is maintained through what is, in so many ways, the centre of the village. Adoption of A41 would enable this open space to become the only development of any significant depth along the whole of the southern side of the East lane / The Street corridor and would severely compromise this ‘green gap’ between the northern and southern parts of West Horsley.

This is contrary to at least two of the five essential purposes of Green Belt as defined at NPPF paragraph 80 (namely to check unrestricted sprawl and to assist in safeguarding the countryside from encroachment – functions which this part of the Green Belt, including this site, is recognised as performing at paragraph 8.2 of the Guildford Green Belt and Countryside Study).

This site had not previously been include as a potential development site within previous draft versions of the emerging Local Plan and assessment of this site, in background studies forming the evidence base for this Site Allocation, is based on incorrect information.

Two key incorrect bases are:

1. In the Guildford Borough Land Availability Assessment (LAA) 2016 – Page 388 in respect of site reference 2063 (‘the site of East Lane’) it states under ‘summary of land designations’ – “Green Belt adjoining settlement boundary”. This is incorrect. Unlike any of the other three sites proposed in West Horsley, this site currently has no boundary that adjoins the village Settlement boundary as defined in the GBC Local Plan 2003.

2. Also, The Guildford Borough Green Belt and Countryside Study produced by Pegasus Planning Group, Volume III – Appendix VI – Sustainability Walking Distance Plans for Land Surrounding the Villages refers to the above site, plus the field beyond that the Council now propose removing from the Green Belt (together with a section of Lollesworth Wood) as site D. All assumed walking paths to (i) Nearest Local Centre, (ii) Healthcare Facility and (iii) Railway Station are presuming that access could have been gained to Lollesworth Lane via the undesignated (save that it has been proposed to be removed from the Green Belt) field to the south and fronting Lollesworth Lane. This field is currently used for grazing sheep and is owned by Mr & Mrs. Richard Wills of Lollesworth Farm and they have advised me and others that they would not permit such access route across their field, therefore the assumption used by Pegasus Planning Group is incorrect and may well have a material effect on their conclusions.

Furthermore, any development on A41 would not be consistent with the distinctive settlement pattern of the village and the important relationship between the built environment and the surrounding landscape (i.e. development on one side of the route only). In my opinion, it will harm important views of the village from surrounding landscape (from Lollesworth Lane) and from within the village of local landmarks (of Lollesworth Wood), contrary to Policy D4 of the Proposed Local Plan.

Allocation of the site will not “promote sustainable patterns of development” and the wildlife / environmental amenity loss of this site is likely to result in a significant detriment to the village’s character. Furthermore it will cause harm to the biodiversity and natural environment of the adjoining Lollesworth Wood SNCI. Indeed, this is contrary to Sustainability Objective 1 of the Sustainability Appraisal framework set out at Table 4.1 of the Guildford Borough Local Plan Sustainability Appraisal.

Policy I4: Green and blue infrastructure; states that “Permission will not be granted for proposals that are likely to materially harm the nature conservation interests of local sites unless clear justification is provided that the need for
development clearly outweighs the impact on biodiversity.” Local Sites are earlier defined in the policy as including Sites of Nature Conservation Importance (SNCI).

Furthermore, there is no reason at all for the amendment to the Greenbelt behind the field beyond site A41 other than to prepare for a potential second phase development in the next Local Plan and surely it cannot be considered to be justified by “exceptional circumstances” when no alternative use is currently proposed and its current and historic use is as pasture?

I strongly object to the alteration of the Greenbelt around A41 and the field beyond and to the inclusion of A41 in the Local Plan.

Across any of the adopted sites in West Horsley, careful consideration must be given to the proposed density of any future developments. The current proposed density is not appropriate for such rural and semi-rural village location and are out of character for the village as it currently largely comprises low density housing, with a considerable mix of ages and housing styles.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infrastructure:

West Horsley does not have any of the infrastructure to support the development proposed. The village is small with few local facilities. There is currently just one shop at the southern end of the village, where local car parking is very limited. Most people in West Horsley already have to travel, largely by car, to East Horsley for their day to day shopping, banking and health needs. The existing car parking facilities in East Horsley are already at capacity and any increase in the local population will add to the already existing problems. Any new development would not “support the continued viability” of the existing village infrastructure, as has been noted by the GBC in the past. Key infrastructure issues include:

- Education that is already under strain;
- The East Horsley Medical Centre is already at capacity and serves both East and West Horsley and some other surrounding villages such as Clandon;
- The utilities infrastructure cannot be further stretched and water pressure is very poor across much of the village already;
- The existing road system is only appropriate for a semi-rural village, many of the roads are little more than lanes and pavements are often only on one side of a carriageway.

Any development will need immediate and considerable investment in infrastructure to support any increase in the village size.

In summary, whilst I accept that some housing development is required across the borough and West Horsley should take its fair share; at present the Local Plan proposes excessive development within West Horsley (in proportion much greater than other locations across the borough) the requirements for which have not been proven in any way. In addition the
current proposals do not support sustainable development of the village and the amendment to the Greenbelt runs contrary to National Planning Policy.

As a result I am strongly opposed to the current Local Plan proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Greenbelt:

My first objection to the Local Plan relates to the protection of the Greenbelt. I am absolutely opposed to the removal of some of the village from the Greenbelt through the extension of the settlement boundaries and the insetting. No Exceptional Circumstances or other relevant justification has been demonstrated to justify the new Greenbelt boundary in West Horsley. National planning policy requires that Green Belt boundaries are only amended in exceptional circumstances and that this must be undertaken as part of the Local Plan process. As such the proposal and Policy P2 is not in line with National Planning Guidelines. It is clear to me that it cannot be considered exceptional in order to facilitate the development put forward when a) The Guildford Borough Economic Strategy 2013-2031 makes no case for locating large numbers of homes in West Horsley (or neighbouring villages) (indeed the new economic development sites are located on the other side of the borough to West Horsley) and b) when the current proposals have given insufficient consideration of the use of brownfield sites within the borough (located much nearer centres of employment and supporting infrastructure). This is a key flaw in the Guildford Borough Submission Local Plan 2016 – proposing extensive development in locations remote from areas of employment and supporting infrastructure. The new housing should largely be allocated much nearer and around Guildford’s town and urban areas.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
With respect to the housing need, I do not consider that the case regarding the need for the proposed number of houses in Guildford borough overall has been proven, indeed the target house building programme proposed represents a 25% increase in the housing stock of the borough, whilst we have been advised that the Office of national Statistics (ONS) projects a population increase of some 15% for the borough of Guildford over the same period. With respect to West Horsley specifically the number of new houses needed has not been proven and the Local Plan number for West Horsley is simply excessive. The scale of proposed development (in proportion far greater than other villages within the borough) does not reflect the need and fails to respect the local character and existing building density of the village. I am therefore strongly opposed to the current site allocation and housing densities proposed for all four sites in West Horsley.

Furthermore, in my opinion, the Proposed Submission Local Plan’s proposal to make provision for 62% of this total dwelling requirement on land that is currently Green Belt is not justified. The disproportionate burden of meeting what GBC has chosen to define as its development needs is also proposed to fall on the more rural east of the borough. Within this eastern area, West Horsley is then allocated to bear an excessive proportion of this proposed development, despite the numerous countervailing reasons put forward in previous consultation rounds by many local residents (e.g. narrow roads; areas of flood risk; access to both senior and junior school places; medical facilities, parking availability at the station, etc.) If adopted, the draft plan will put an unsustainable pressure on all local resources and infrastructure.

As I set out earlier on, the Guildford Borough Economic Strategy 2013 – 2031 made no such case for locating large numbers of residential units within West Horsley. I am strongly opposed to the borough housing targets set out in Policy S2.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed development at Garlicks Arch. There is no justification in destroying fields and woodland, there is absolutely no justification for adding traffic to an already overburdened road system. You may consider that the Ripley By Pass was constructed to alleviate the traffic in the area. What possible motive is there to completely negate the purpose of the by pass. Every morning the main A3 is blocked from the M25 back to Burpham. Great idea to put 400 houses to add even more traffic that tries to cut through our villages.

The council is elected to represent the views of its residents, not to empire build.

Ref Proposed overdevelopment in Send and surrounds

1. I object to the removal of Send from the Green Belt, it is a village and should not be part of an urban sprawl of Guildford and Woking. The Green Belt was promised as a permanent buffer and both councillors and government have promised to maintain it. Therefore it is the elected councils duty to comply with the promises made to the electorate.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy 2 at paragraph 4.3.15

This is a nonsense proposal and not thought out. What was once a business relying on canal transportation should not be considered to be an industrial area and should remain in the green belt.

I have lived in this area for 20+ years and witnessed the gradual insertion of new housing on every available site. If your plan is to be swallowed up by London and become one vast urban sprawl then this will be the result.

Perhaps you should listen and take heed of the residents in this area that pay your wages and not treat us with an arrogance and dismissiveness that is appalling.

Answer (if comment is on questions 1-7 of the questionnaire): ()

A3 Corridor Development

- There is a disproportionate number of new homes and associated development on Gosden Hill Farm, which will significantly and adversely change the appearance and nature of Burpham the area, and the north eastern side of Guildford in its entirety
- The combined developments of Wisley and Gosden Hill Farm represent too large a proportion of the overall Guildford plan developments, bearing in mind that of the proposed 13,860 homes approx. 5,000 homes will be on this side of Guildford (incl about 1,000 homes in Send, Horsley, Burnt Common and Ripley in smaller individual developments)
- There has been no clear justification for the number of 13,860 new homes to be built in Guildford, plus the consequent need of more employment space. How was this figure obtained? Just telling us that independent consultants were employed is not sufficient.

The proposed designation of the employment site on Gosden Hill Farm as a Strategic Employment Site lacks any definitive justification, and will lead to increasing commercial development in future years, and thence to increased stress on the local infrastructure. It will further deteriorate the attraction of the local area to the disadvantage of existing Burpham and Clandon residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Transport

• It is unreasonable to seek approval of a local Plan without clarity on the essential issue of transport and roads infrastructure. The Plan indicates that road improvements will happen, but as some sort of evolving feast as directed by SCC and Highways England. This essential ingredient must be clearly defined for a Plan to be considered properly.

• In particular, the Gosden Hill development and it’s interaction with the A3 is too vague and not realistic. The suggestion of on & off slips to the A3 southbound only is ridiculous, and the alternative proposal by Highways England of a possible multi-direction interchange cannot be left to their discretion and to whether or not some funds can be found (because of course they will not). An integrated A3 multi-direction interchange plan must be part of the developers plan.

• The existing Clay Lane northbound access is just not sufficient, bearing in mind the extra traffic that will be generated by the various proposed housing and commercial developments to the north of the town, as well as Slyfield and Gosden Hill. It should also have some consideration of whether access/egress to Gosden Hill could be via the proposed improved interchange at Burnt Common, avoiding the otherwise inevitable increased congestion in Burpham.

• The potential traffic solution of tunnel must also be integrated with the Burpham development plan, as the Burnt Common to A320 section of the A3 must be the likely start point for such a development.

There are frequent references to the Sustainable Movement Corridor, but no definitive route is proposed. There is 1 small part shown in Appendix C, but no indication of how this will be achieved from Gosden Hill/Burpham to the Town Centre. For instance, presumably Park & Ride buses will just follow the existing London Road into Guildford, adding to the existing congestion.

Other items

Housing and Employment Need - there seems to be an acceptance by GBC of national policy that population growth should be encouraged and accommodated even in areas such as ours, whereas part of their role is to ensure a comfortable and well-ordered environment for existing Guildford residents. This national “obligation” should be challenged, to re-direct population growth and associated industry and commerce to other areas of the UK with less dense populations, thereby encouraging the spread of economic wealth to areas where it is needed.

It should also have some consideration of whether access/egress to Gosden Hill could be via the proposed improved interchange at Burnt Common, avoiding the otherwise inevitable increased congestion in Burpham.
- The current daily gridlock of the Burpham A3 exit slip and London Road seems to have been ignored, as is the gridlock caused every Sunday by the Aldi supermarket launching that week’s new special offers – great for their business but a nightmare for local residents trying to drive in Burpham.
The proposed changes to the Burpham A3 slip to become 2-way and part of the Sustainable Movement Corridor is farcical! There is no suggestion of any attempt to relieve the current traffic volumes causing the congestion mentioned above (and consequent air pollution), but rather it will be even more congested due to:
- the thousands per day of Gosden Hill traffic movements coming through London Road Burpham to reach Sainsbury/Aldi and the Northbound A3 access
- the significant extra traffic movements from the all areas this side of Guildford (incl Slyfield, Merrow, Godalming, Cranleigh and Dorking areas) which will come to Burpham to access the A3 Southbound via London Road (to avoid having to crawl through the Boxgrove/Woking Road/Parkway/Ladymead routes to get to the existing A3 Southbound access)
- the potential massive traffic congestion and pollution in the event of an accident on the A3 southbound, or the new Gosden Hill roundabout or within Burpham itself – there seems to be no contingency for this whatsoever

I support the Council’s enthusiasm for an A3 tunnel, but this potential traffic solution must also be integrated with the Burpham development plan, as the Burnt Common to A320 section of the A3 must be the likely start point for such a development. This cannot be left to just evolve

Attached documents:
I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3459  Respondent: 11010401 / J M Bates  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to
consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as III as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as III as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:
2010 – 2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.
There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size. Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.
I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctorscope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

---

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and...
general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable
forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students are accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/7585  Respondent: 11010401 / J M Bates  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2
I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford’s relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”
The wording of the policy is too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer-led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be "closely related" Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances." The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/7571  Respondent: 11010401 / J M Bates  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause
greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.
Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3
I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from
the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/7542  Respondent: 11010401 / J M Bates  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be
taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF's most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/7545  Respondent: 11010401 / J M Bates  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”.

Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible
change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

5. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

6. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

7. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

8. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

9. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

10. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

11. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

12. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

13. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SLP16/1147   Respondent: 11010401 / J M Bates   Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.
Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding
19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site...
will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4562  Respondent: 11010401 / J M Bates  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have attended a presentation at East Horsley Village hall and discussed the impact of the local plan with several of your officers who were there. The only amendments to the rejected Wisley airfield project was a slight expansion of the area with no increase in additional housing – wow. There is an arrogance in this that, despite huge objections and a rejection of the plans by the Planning Office, that they believe they can find a way to push it through. In essence, we don’t give a damn about the local residents. We are the power and you will do what we say.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPS16/235  **Respondent:** 11010497 / John Ackerman  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I write to **OBJECT** to *Amended planning application 15/P/00012* for the following reasons:

**Sustainability:** The site is remote and occupants will rely on the use of the private motor car adding to traffic congestion on both the Strategic Route Network (the A3 and the M25) and local roads which are already running over capacity.

- The application relies on people switching to walking, cycling and public transport. This is unrealistic as it is two miles to the nearest railway station and at least half the route has no footpath. Roads are narrow and unlit.
- There is no spare parking capacity at either of the local stations.
- Sites of this size are required to provide outdoor open space. The applicant has “double counted” the outdoor space with that required for SANGS
- The loss of high quality agricultural land is in contravention of policy.

**Air quality:** The air quality figures are based on an unreliable transport assessment.

- The applicant has not used the DEFRA modelling statistics as required and rather appears used numbers from an unrecognised (and unreliable source)
- Poor air quality is exacerbated in the area by temperature inversions which trap the air. Young and old are extremely susceptible to poor air quality.
- Air quality is not improving as fast as expected, partly due to the excessive emissions (VW et al)
- The impact of poor air quality on RHS Gardens at Wisley and the Thames Basin Heath Special Protection Area (SPA) is already in excess of legal limits.

**Transport:** The transport assessment makes a number of erroneous assumptions and is not credible.

- It is completely unrealistic to assume that there will be a decrease in vehicle movements.
- There is no impact on traffic for the recently added secondary school, nor from the fact that prior to the school being built the children will have to be transported to the nearest available school in Leatherhead – adding to congestion.
- There appears to be no impact shown for the 270 daily bus movements or for the waste lorries or HGV deliveries to the site.
- The TRICS data used for comparison is not a relevant measure: site not comparable with a site in Guildford, nor a site 400m from the centre of Redhill, nor one on the edge of Staines.
- The traffic counts bear no relation whatsoever with counts submitted to Guildford or to Woking borough councils in support of other large development projects.
- The modelling in the Transport Assessment at 7 junctions close to the site bear no relationship to the daily experience of residents, evidencing flawed modelling.
- The number of daily trips is understated in the region of 1000 vehicle movements.
- Additional traffic will have a negative impact and cause irreparable damage to historic houses and other buildings in Ockham/ Ripley/Downside and further afield.
- If allowed, the impact of the additional traffic may prohibit other developments further south on the A3 or indeed those needed by the RHS

**Appropriate development:** The site is in the Green Belt in a rural location, hemmed in by the A3 to the west, the TBHSPA and the M25 to the north and the Conservation area of Ockham Village to the south.

- Green Belt boundaries can only be changed in the local plan process and in exceptional circumstances which have not been demonstrated
- The site is not big enough to provide satisfactory living standards even for “affordable housing”.
- Four and five storey buildings are not appropriate in the rural environment nor on an elevated site.
- Residents will be crammed in with little outdoor space, a noisy location, with very poor air quality. The density of housing proposed is similar to that in Islington.
- The site is clearly visible from the Surrey Hills AONB and as a result it will have a negative impact on views to and from the AONB.
Thames Basin Heath SPA/SSSI/SNCI: The impact of 2,068 houses on the environmentally sensitive TBHSPA cannot be mitigated. Damage will occur to the habitats of the protected and endangered rare species (including skylarks, nightjars and many others on the RSPB red list) in contravention of the EU Birds Directives and Habitats Regulations

- The siting of the proposed Suitable Alternative Natural Green Space (SANG) adjacent to the SPA will only increase visitor numbers causing further damage
- Part of the SANG is in a designated flood plain
- Para 119 of the NPPF “presumption in favour of sustainable development” does not apply where development requires assessment under the Birds or Habitat Directives
- It is impossible to state without doubt that the mitigation proposed will prevent damage to the SPA particularly in the light of inadequate traffic/air quality reports.
- There are likely to be over 700 dogs and 700 cats living on the proposed development. These will be a constant threat to ground nesting birds on the SPA and cannot be mitigated by one warden working a normal working day.

Impact on the local area: The additional 5,000 residents is the equivalent of almost doubling the population of East and West Horsley combined. This increase in local population will impact:

- Light pollution, noise, traffic and infrastructure which has been gravely underestimated and proposed mitigation measures are totally inadequate
- The cumulative development in the borough and in the neighbouring boroughs of Woking, Waverley and Elmbridge per the objections from both Elmbridge Borough Council and Woking B C
- The water table and flooding in the area. It appears that no impact assessment has been done relating to the loss of agricultural land which currently soak up a significant volume of rainwater.
- Listed buildings adjacent to it such as Yarne, Bridge End House and Upton Farm
- Via closure of a number of local roads coupled with an increase in traffic will affect a large number of road users from Cranleigh to Cobham and everywhere in between

Inaccuracy of the documentation: There are factual errors in the documentation

- Highways England have recommended that the proposal cannot be determined due to the applicants failure to provide traffic data in the format required
- There are a number of misrepresentations in the paperwork e.g. nine stations within 5 miles – this is however “as the crow” flies – only Horsley and Effingham Junction are within 5 miles by usable road from the middle of the development
- The applicant’s description of the site as brownfield is a gross over-simplification. 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remaining runway, a habitat for rare flora and fauna, (14ha) has never had buildings. The remainder of the site (55%) is high quality agricultural land.

Other: This site is not deliverable within 5 years due to problems with sewerage and water capacity, outlined by Thames Water & the OCK DVOR air traffic control beacon which limits development until 2022

- No very special or exceptional circumstances exist - Alternative sites exist
- The proposal includes the site SCC safeguarded for waste under the Surrey Waste Plan
- The site is not listed for development under the existing 2003 Local Plan
- There is not enough land to provide a sustainable community based on GBC’s own parameters
- There is no update at all to the Heritage study despite the significant Bronze Age haul found in Ockham village in May 2013 and the likelihood of further remains on the site.

I trust the Council will find this useful, in their deliberations

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPP16/498  Respondent: 11010497 / John Ackerman  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The other development issues in the local plan are still the same as before. You want to cram houses into some fields (533 I counted) in East and West Horsley, plus 2200 at Wisley and Ripley is under siege as well. I have protested in the past, but as this is a theoretical amendment, I am protesting again. Sites 38, 39, 40, and 41 are unsuitable. The village is small and the roads are narrow. The required lorry and construction traffic will jam the entire area for years and once it is completed will overwhelm the local facilities. You cannot get a doctor’s appointment for several days at the moment and another 1500 residents certainly wont help and that’s without the Wisley Development. Local schools are already under pressure and Secondary schools particularly. There is no provision for road improvement in Horsley.

The Ockham Road North development by the railway bridge will put hundreds more cars a day onto a difficult road, with narrow pavements, single file in places and significantly increase the risk of a pedestrian being struck by a passing car or lorry wing mirror. The road also floods easily and regardless of flood risk controls in building, the water will continue to fall and has to go somewhere. You cant just keep adding to a 1930’s infrastructure. The whole thing needs to be re thought if you are doing something like this. I did note that none of the Council representatives lived in the area!!!

The other 2 proposals in West Horsley are also overkill. You may have noticed that there is a stop and go bit of road where it is too narrow for cars to pass and only one lane can go at a time. East Street is certainly not suitable for an increase in traffic of this magnitude.

The final proposal in Ockham Road North is at least a bit further out, but still adds a significant volume of traffic to an already over busy road. I have live there for 27 years and the traffic increase is amazing in that time. It frequently takes several minutes to get out of my driveway and of course there is the mother’s jam at Raleigh and Glensk schools.

In addition I have repeated the very well thought out objection to the Wisley Airfield below and there is nothing significant in the new plan which changes that situation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3634  Respondent: 11010945 / Stephen Gill  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I continue to object to the inclusion of policy A35, Three Farms Meadows (formerly, the Former Wisley Airfield), in the proposed Submission Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the draft Plan because of the constraints applicable to this area of Green Belt and nature conservation protected land, and its physical location. I object to its continued inclusion in the Plan.

2. This is Green Belt, high quality, farmland, a nature conservation area in and of itself, and immediately adjacent to an SSSI and SPA. Conservation area Ockham Village, including many listed buildings, borders this area of land.

3. It is surrounded by narrow, winding, weight-restricted, country lanes unsuited to any increase in traffic – let alone the approximately 5000 cars likely to result from a housing development of 2100 houses, or the heavy construction vehicles likely to be needed - over many years – for its construction.

4. The transport evidence base including the SHAR 2016 Highways assessment report has been criticised by Mouchel for using out of date modelling software and is therefore unreliable, thus making all transport predictions unreliable and unrealistic.

5. The statement that sustainable methods of travel such as cycling and walking would be used for access to and from the site are totally unrealistic. The roads in the vicinity are already dangerous for walkers & cyclists and will be made even more so with the increased traffic that will come from the site.

6. Almost all residents will have to travel from the site to work. People will not walk/cycle on narrow unlit local roads on a regular basis – they will travel by car. This additional vehicular traffic will both make the roads more dangerous for other users and add to the congestion.

7. It has no infrastructure at all - it is Green Belt, high quality, farmland, and therefore has no gas, water, electricity or sewage connections, and no buildings at all. It is also prone to flooding in parts, making drainage from 2100 houses on concreted over land a particular challenge but one which appears not to have been properly considered.

8. It is remote from railway stations and there is currently no public transport that serves the area, and nor is the area suitable for public transport. These are narrow, winding, weight-restricted country lanes.

9. The facilities at the closest railway station are already at capacity, are as the rains during peak hours. The increased demand from the site cannot be absorbed.

10. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs.

11. The site is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The associated traffic increase from the RHS traffic together with the increased traffic form regular events at the RHS have not been taken into account in traffic assessments.

12. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

13. Local schools, surgeries and railway stations/trains are already full, and there are no obvious local employment opportunities for 2,100 households (assuming 2 adults per dwelling, that equates to 4,200 jobs).

14. It is not clear who would want to live in this new dormitory town, remote from employment, entertainment and any form of infrastructure, where the householders would be entirely dependent on their cars.

15. Housing need - and the figures relied upon by the Council – is anything but transparent, despite requests for information about the basis for the Council’s/its agent’s calculations. Housing “need” is a very different thing from the “demand” for housing in Guildford. Despite this, I understand that adjoining boroughs have made very different (and much lower) assessments of their “housing need”. Guildford need to review their methods of assessment for housing need and bring them in line with other neighbouring councils.

16. I understand that Surrey University has planning permission to build, on its own campus, sufficient accommodation for all of its students, but has failed to implement that permission. It should be made to do this, freeing up housing stock in Guildford town centre which by default has all the necessary infrastructure and support for additional housing.

17. Guildford town centre – Walnut Tree Close, for example – already has significant areas of former built/industrial development, again with pre-existing infrastructure in place. Sustainable housing development should clearly be concentrated here.

18. I object to the quantity of space allocated for retail in Guildford town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies in administration.

19. I object to the fact that the Council has still failed to remove the Three Farms Meadows (site A35) from the Plan despite receiving 1000s of objections to its inclusion - from residents and from statutory consultees.
20. There appears to be no clear justification for the removal of one (other) strategic site from the Plan. Why hasn’t Three Farms Meadows (site A35) been removed? What is the justification for the removal of the other site? Three Farms Meadows (site A35) should now be removed from the Plan.

21. I understand that the Council considers that there should be consultation only on the changes it proposes should be made from the previous version Plan. I object to this. Many people will therefore be discouraged from participating in this consultation, and will not appreciate quite how much has changed from the previous version Plan. Moreover, the complexity and length of reports/documents, many of which are not available in hard copy, further discourages debate and participation in it.

22. I object to the timing of this consultation – yet again in the context of the local plan/proposals in relation to Three Farms Meadows, time limits for submission of comments/objections expire during the school summer holidays – once again limiting debate.

23. I object to the fact that there has been no clear explanation from the Council as to why it thinks it is appropriate to have a (limited) regulation 19 consultation. I believe the proposed changes to the Plan are major.

24. I object to the proposed increase in the size of site A35 (Three Farms Meadows) as this now abuts additional heritage assets, including Upton Farm and Bridge End House, further adversely impacting the setting of these buildings and the wider Ockham Conservation Area.

25. I object to the fact that the proposed increase in site area, being on the south side of site A35 (Three Farms Meadows) and facing (therefore) the Surrey Hills AONB, will increase the negative impact of the views from the AONB.

26. I object to the proposed change of site boundaries to site A35 (Three Farms Meadows). Nor are these identified correctly on the plan (Appendix H p16).

27. I object to the proposed removal of an additional 3.1 ha from the Green Belt that the proposed change of site boundaries to site A35 (Three Farms Meadows) would entail.

28. I object to the change in Green Belt boundary to the eastern end of site A35 (Three Farms Meadows), as this now encloses an area of high archaeological impact.

29. I object to the inclusion in the Plan of site A35 (Three Farms Meadows) as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

30. I object to the extension of the Plan period by 1 year – this is a major change and as such this current review should be of the whole Plan and not just the changes.

31. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

32. I object to the idea – mooted by the Council at one point of this process – that loss of Green Belt land in one part of Guildford Borough could be “compensated” by the re-designation of other land, in another part of the Borough, as Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2) Similarly, it makes no sense to remove the Wisley site from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. No exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) It also appears that a disproportionate percentage of the development is being targeted at our bucolic corner of the borough, notwithstanding the Greenbelt and infrastructure issues.

4) The proposed development of the site would pose a threat to the historic rural village of Ockham and create a blight on properties there. There would be knock-on negative effects on the small hamlet surrounding Ockham Mill, where I live.

5) There would be very negative effects on transport, local roads and road I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest. I already have difficulty exiting Mill Lane in the morning en route to Horsley. Adding more traffic to the Ripley exit roundabout will make it impossible for me to exit.
6. The lack of suitable public transport. The local rail station of Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. I use the Horsley station parking lot and it’s completely full every day—where are the additional cars supposed to go?

6) Insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

7) I live downstream from the site in a flood-prone location and there has not been adequate attention paid to the increased flooding risks created by the development.

8) Air quality concerns have not been taken seriously -air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted Additional traffic will exacerbate this situation, impacting the health of all current and future residents. I worry about the health of my children.

9) I don't understand why the site has been included after the related planning application has already been unanimously rejected by GBC’s Planning. It makes me wonder whether the developer has exercised undue influence on the process, and I have to question the motivation behind the decision to retain this site in the plan.

I ask that the Council reconsider and now, once and for all, remove this site from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Wisley Airfield site

I live in an historic building not far from the site that includes the former Wisley airfield and strongly object to the inclusion of the site in the draft Local Plan:

1. It makes no sense that a majority of the new housing is proposed to be built within the Green. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. I don't understand how councillors can now ignore election manifesto promises.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

45 houses at Clockbarn Nursery

I object to this development.

Tannery Lane is again a narrow rural lane that will suffer from the building of a Marina and 64 apartments which I believe have already been approved. So additional houses would be most unsuitable.

Send Road is far too busy as it is with frequent traffic jams that grid lock the whole village. It would be totally wrong to have any more traffic entering Send Road from any further Tannery Lane development. The junction onto Send Road from Tannery Lane is already a dangerous crossroad which cannot be improved without demolishing extremely old cottages on the left or a garage on the right. The other end of Tannery Lane is a single track that runs towards Ripley and Pyrford which could certainly take no more traffic.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. **40 houses and 2 travellers’ pitches at Send Hill**

I object to this development.

This is definitely not suitable land to build houses on as it is a landfill site. When I first moved into the village I was a builder and I used this site to dump all my building waste, everything went in it, including I believe blue asbestos. It would be wrong to expect people to live on this site either in houses or in travellers’ caravans. I would make it my business to explain to any perspective buyers just what their houses were built on. It would be my moral duty!

Send Hill is a narrow country lane which already suffers from severe congestion when the school traffic is at its busiest. Speeding cars also using it as a route off the A3 from Potters Lane. Also the main drains could not take the extra capacity.

I have lived in the village of Send for over 40 years so I know the area extremely well.

I object strongly to the following proposals in the village of Send listed in the Local Plan:

1. **Removing Send from the Green Belt**

I object to Send losing its Green Belt status

I do not understand how you have the right to change the Green Belt. It was meant to be a permanent feature designed to stop towns and villages merging into one huge conurbation. Also its purpose was to encourage the use of derelict and other urban land. I don’t believe that there is an urgent need to change the status when there are still brown field sites in the borough. Is this a government ruling of a financially driven move that will allow property developers to make a lot of money? We have already lost the only piece of woodland in the village when permission was recently granted to build on the land behind Vision Engineering.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed industrial site at Garlick’s Arch. There is no need for such a site. The Employment Land Needs Assessment 2015 shows a reduction in required employment floor space from the previous draft plan. If the Council truly believes there is a need for such a large amount of industrial space it should be located at the current Slyfield site.

I object to the development of the 400 houses at Garlick’s Arch. It was included in the Local Plan at the last possible moment, with no prior local consultation. It is not required in terms of housing need either for the village or the borough. Also the site is liable to severe flooding and the woodland is a particularly sensitive area that must not be disrupted in any way.

I object to the fact that this site was not included in the Regulation 18 draft and has not been consulted upon previously. Full consultation must take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed interchange onto the A3 at Burnt Common. The interchange will cause the A247 to become a through-road between Woking and the M25. Send is building a new primary school on that particular stretch of the A247. Creating the new interchange, together with the additional school traffic, will cause immediate and virtually permanent gridlock on the A247. Village life will be severely disrupted.

I object to the fact that this site was not included in the Regulation 18 draft and has not been consulted upon previously. Full consultation is required.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the development of 40 houses at Send Hill. It consists of particularly high quality Green Belt within an area of particularly beautiful countryside which would be destroyed by this development. The subsoil of the existing site contains documented unsafe landfill waste which is currently vented. The proposal for 2 travelers’ pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

I object to the fact that this site was not included in the Regulation 18 draft and has not been consulted upon previously. Full consultation is required.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the removal of Send from Green Belt status and to the proposals to build on the Green Belt fields at Gosden Hill, Garlick’s Arch, Send Hill and Clockbarn Nurseries, particularly Sites A25, A35, A42, A44 and A43. NPPF states that the Green Belt should only be altered in “exceptional circumstances.” There simply are no eligible exceptional circumstances expressed in the Local Plan or supporting documents. The Council must identify the urban brownfield areas around the Guildford area in order to protect the countryside and limit the impact that any plans have on local road traffic.

I object to the figures given in the West Surrey Strategic Housing Market Assessment that are the basis for the Draft Local Plan. No evidence has been given to substantiate the projected housing numbers, which in my view is far in excess of reality.

Housing numbers should be based on post-Brexit projections. The figures for economic and population growth, including migration now need to be revised downwards.

I object to the fact that no consideration has been made to the impact on local infrastructure. How can the current infrastructure possibly be adequate enough to deal with proposed new housing levels. Roads, doctors and schools will be unable to cope.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Overall, I object to the approach that the Council is taking to the consultation. During the re-drafting of the 2014 draft Local Plan, instead of finding a sensible alternative the Council has changed all the major sites in Send and added a large road junction. It is beyond belief that the Council suggest that they have listened to us, the residents, yet have actually increased the planned housing levels in the village. These changes are significant so require another full consultation under Regulation 18, not the short-cut of Regulation 19 which the Council is using.

I have read through the above document and wish to express my concern that my village of West Horsley will be changed out of all recognition if these proposals go ahead. No exceptional circumstances have been made to justify removing the village from the Green Belt. (Policy 2)

I object to the development of 385 homes on the 4 proposed sites which are at a much higher density than currently exist in the village. Little firm policies with respect to infrastructure and essential facilities are given. The current facilities would not support such a large increase in housing with its associated population and needs.

West Horsley struggles with inadequate medical, schooling and retail facilities with poorly maintained rural lanes.

Public transport is currently inadequate with no link to train times to enable residents to travel to work in a more environmentally friendly way. The proposal to increase the population of West Horsley with so many new homes will only exacerbate the currently woeful situation of crammed car parks and clogged lanes.

The fact that several village shops have been allowed by Guildford Borough Council to be developed into flats and small bungalows demolished to make way for 4 and 5 bedroom homes, gives little confidence that the proposals for preserving the historic environment, protecting the countryside and creating sustainable facilities will be honoured.

The Guildford Plan policies are totally inappropriate for this rural village and I urge you to reconsider this proposed submission.

| I object to the latest version of the local plan because of the inclusion of several developments which were not on the previous versions and which were inserted only 2 weeks prior to the publication of the so-called 'Final Version'. In particular, I object to the proposed development at Garlicks Arch associated with a new junction on the A3. These developments were not available for consultation and have been put in at the last minute. 

- I object to the stated need which requires building 13,860 houses in the Guildford area. This figure has never been fully explained and was based on pre-Brexit calculations. 

- I object to the unreasonable and unfair allocation of these houses, most of which are proposed to be built on Green Belt land around and in the villages which surround Guildford. This would lead to a vast conurbation in South West Surrey, the equivalent of the area around Croydon. Guildford would cease to be an attractive place to live and work leading to the detriment of its reputation. At the last election, the Conservative Government made a manifesto pledge to protect the Green Belt. Why can this pledge be easily broken when the 7 day NHS is sacrosanct? 

- I object to the removal of the villages from the Green Belt. Green Belt land is not just to make the villages pretty. It provides agricultural land, water catchment and flood control (Guildford is an area which floods easily), a carbon sink for air pollution, and benefits to public health and well being. It is vital to the rural economy and to the life of the villages. 

- I strongly object to the Garlick's Arch proposal. This is an area of ancient woodland and permanent Green Belt. There is no reason to develop this land when there are suitable development sites close by at Slyfield. The need for industrial use is unclear. Send is surrounded by office blocks, not all of them filled. There are a lot of sites where the businesses have closed in Guildford town centre. Why can these not be used instead? 

- The road infrastructure, the water system and drainage are at full capacity. In particular, traffic in Send Barns Lane is at a standstill at busy periods of the day. The surrounding roads are narrow and not suitable to the
volume of traffic which currently uses them as a cut through. The A25 through West Clandon is extremely narrow in places and lorries and cars cannot pass each other without mounting the pavement.

- I object to the new junction on the A3 which will disgorge even more traffic on to the roads making the traffic problem unacceptable.
- I object to the failure to explain where children from these new houses will go to school. St. Bedes is being redeveloped on the Send School site and it was stated clearly in the planning process that there would be no increase in the number of places for children at the new school!
- I object to the proposed development of traveller's sites and houses at the top of Send Hill. This is an area of land which was previously landfill (not quarry as laid down in the local plan) and has been recognised as a health hazard from contaminated industrial waste with unacceptable methane levels.
- I also object to this development which is sited on a very narrow road which meets Potters Lane at a blind corner where there are already several accidents each year.
- I object to the development of the Clockbarn Nurseries in Tannery Lane. Tannery Lane is an extremely winding and narrow road completely unsuited to heavy traffic. Traffic from Tannery Lane has to exit either on to Polesden Lane which is also very narrow or on to Send Road where there is already considerable congestion and the junction is very dangerous.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2316  Respondent: 11011713 / Mary Warren  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A42. Tannery Lane is an extremely winding and narrow road with little scope for increased traffic. The addition of a further 15 houses to the already planned 45 to make a total of 60 new houses will overload the access road considerably and lead to traffic jams and an increased number of accidents, some of which could be fatal. The junction of Tannery Lane with Send Road (A247) is particularly dangerous despite the new double yellow lines and is already the site of accidents. This situation will only worsen if the local plan is carried out.

As with Garlick's Arch, flooding is already a known problem along Tannery Lane and development of the size suggested will intensify this.

Once again, Guildford Borough Council are paying no attention to the Green Belt which will be further eroded by this development with loss of the openness required to protect the countryside.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43  I object to the development of Garlick's Arch. This is supposed to be an area of permanent Green Belt with ancient woodland from Elizabethan days and, so far, no exceptional circumstances have been put forward to explain why the land should be used for development. The addition of 8 Travelling Showpeople plots is unnecessary. This is the entire complement of this type of plot required of Guildford Borough Council. Why are all to be at Garlick's Arch when it is an area of outstanding beauty?

In addition, this area is prone to flood with a flood zone allocation 2. If developed, this flooding will be intensified to the detriment of the surrounding countryside.

I am still unclear where all the children from this development will go to school. Send School has no capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A58. I object to the increased development of Burntcommon which is now expected to provide a **minimum** of 7000sq.m of employment floorspace and not a maximum. There are empty sites and industrial units at Slyfield and in Guildford which could be used before taking away Green Belt land. Send, Ripley and West Clandon will become a vast semi-industrialised suburb of Guildford similar to the urban sprawl of Croydon.

Already the roads around Burntcommon are inadequate for the amount of heavy traffic which uses them. The A247 through Send and West Clandon is narrow and in places cannot accommodate 2 lorries side by side, leading to holdups with diesel fumes being pumped into the air while the lorries wait. Extra heavy goods vehicle would make the situation intolerable for the ordinary motorist and for the residents of both villages.

The road passes 2 schools which are situated on the road with the playgrounds not far removed from the traffic. In light of the current evidence of the damage done to children's lungs by exposure to diesel fumes, it seems rather self-defeating to increase the traffic on these roads.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

---

Policy A58. I object to the increased development of Burntcommon which is now expected to provide a **minimum** of 7000sq.m of employment floorspace and not a maximum. There are empty sites and industrial units at Slyfield and in Guildford which could be used before taking away Green Belt land. Send, Ripley and West Clandon will become a vast semi-industrialised suburb of Guildford similar to the urban sprawl of Croydon.

Already the roads around Burntcommon are inadequate for the amount of heavy traffic which uses them. The A247 through Send and West Clandon is narrow and in places cannot accommodate 2 lorries side by side, leading to holdups with diesel fumes being pumped into the air while the lorries wait. Extra heavy goods vehicle would make the situation intolerable for the ordinary motorist and for the residents of both villages.

The road passes 2 schools which are situated on the road with the playgrounds not far removed from the traffic. In light of the current evidence of the damage done to children's lungs by exposure to diesel fumes, it seems rather self-defeating to increase the traffic on these roads.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Policy 2 Paragraph 4.3.15 Removal of Send Business Park from the Green Belt. As already stated in the above objection, Tannery Lane is a narrow winding road completely unsuited to large HGVs. Already they cause considerable traffic problems and any increase in their number along this road will bring traffic to a standstill both in Tannery Lane and at its junction with the A247. The other exit from Tannery Lane is equally difficult and again unsuited to heavy traffic.

In conclusion, Send residents objected strongly to the previous version of the local plan. Despite this, the load on Send has increased. One has to wonder why Guildford Borough Council should single Send out for such over development when there are vacant brown field sites in Guildford and at Slyfield. No changes are proposed to the roads, schools, medical facilities or other essential infrastructure and the result will mean that Send becomes an overdeveloped suburb of Guildford with congested roads and traffic at a standstill pumping fumes into the air and damaging children's lungs. Is this really what they want?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Key Evidence document ‘Guildford Borough Economic Strategy 2013-2031 makes no case for locating large numbers of homes in West and East Horsley or neighbouring villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is no evidence that there are exceptional circumstances for encroaching on our green belt and this plan is not wanted by the vast majority of people who live in this area. This plan will irreparably damage the rural and quiet nature of our village life.

I am totally opposed to the village's removal from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries. No exceptional circumstances or other justification is made for the new Green Belt boundaries that will result from the proposed insetting of the two parts of the village from the Metropolitan Green Belt. West Horsley's defined Settlement Area boundaries (ref 2003 Local Plan) DO NOT need to be extended.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2 states that provision will be made for 13,800 new homes over the Plan Period 2013 to 2033. The number of homes is too high and unsustainable in Guildford’s villages.

The need for so many houses to be built in West Horsley over the first 5 years of the Plan period 2018 to 2033 is totally unproven.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Development of this part of Send will result in even more traffic flow on the already heavily congested A247. Furthermore, I do not think that a quiet country road, such as Tannery Lane, should be subjected to levels of traffic that it was never designed to cope with. I also note that the 60 homes are proposed on this development, representing a 33% increase on the previous number put forward. Aside from the traffic problems already outlined, this represents far too high a number.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Given that there are still empty industrial sites in Slyfield and Guildford, I do not think that this site should be developed – particularly when it is in the middle of the Green Belt. This development would also have a huge impact on the smaller and already overly congested roads in the Send and Ripley area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposal to take Send Business Park out of the Green Belt because it is located in an area of beauty next to the Wey Navigation. This development would result in more vehicles using Tannery Lane, making it even more difficult to negotiate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/4175  Respondent: 11011777 / Sally Norton  Agent: 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A46.  

This land is located with land parcel H12 as identified in GBCS Vol IV. The land is DEFRA agricultural land Grade 3A and has been farmed traditionally for pasture (sheep and cattle) and for grain (wheat and barley) in perpetuity. The land contains many stands of scheduled Ancient Woodland. The land contributes to the ‘openness’ of the Green Belt between the settlements of Flexford and Normandy and should remain ‘washed over’ by the Green Belt.

Legal Precedent

I object to the removal of the land allocated to Policy A46 by removal from the Green Belt by “inset” under NPPF para 83 and 84.

The “exceptional circumstances” required to redraw the Green Belt boundary for the land in Policy A46, appear nowhere in the Local Plan of so how can I judge this proposal?

In the Gallagher Homes Ltd v Solihull Borough Council [2014] EWHC 1283 (Admin), Hickinbottom J decision in particular lays out:

“Exceptional circumstances are required for any revision of the boundary, whether the proposal is to extend or diminish the Green Belt. That is the ratio of Carpets of Worth.

Whilst each case is fact-sensitive and the question of whether circumstances are exceptional for these purposes requires an exercise of planning judgment, what is capable of amounting to exceptional circumstances is a matter of law, and a planner may err in law if he fails to adopt a lawful approach to exceptional circumstances. Once a Green Belt has been established and approved, it requires more than general planning concepts to justify an alteration.”

Without the “exceptional circumstances” included in the proposals for this Policy it appears unsound.
I object to the use of a 2010 survey of parishes that was not represented to parish councils as to be part of the Local Plan evidence base in an attempt to present the two settlements as one in the Settlement Profile document. It is recognised in the Settlement Hierarchy that Flexford and Normandy are separate settlements, neither rank highly based on their individual sets of community facilities and services (Normandy 13, Flexford 27 sustainability ranking in Settlement Hierarchy report).

There is no traditional community centre. The ward contains five hamlets in a dispersed area. It is disingenuous to represent Flexford and Normandy as a combined community.

The incorrect assessment in the Settlement Profile document has been pointed out under Regulation 18 consultation but the council continues to include this flawed document as evidence.

It should be discounted and removed from the evidence base.

Use of educational provision as “exceptional circumstances”

I object to the proposed site of Normandy/Flexford (Policy A46) for a new Secondary School; this should be rejected as the need for such a school in the location has not been proven. GBC in the Infrastructure Delivery Plan, May 2016 indicate that SED 3, IDP p87, a 7-form entry (7FE) secondary school at the Normandy / Flexford strategic development site, requires only 1 FE to serve the development site itself, the remaining capacity would serve the wider area, including Blackwell Farm site (Policy A26). However, given that the proposed Blackwell Farm development is for 1,800 dwellings, on a pro-rated basis of children of secondary school age within the arising population, this would only require a maximum of 2FE. Together, the Blackwell Farm site and the Normandy/Flexford site require only an estimated 3 FE provision. The proposed school is excessive in size, being more than twice as large (7FE) as the estimated need (3FE), and as other information provided here indicates, this is well within the funding and expansion capabilities of existing schools in the western wards of Guildford borough and the western side of the town. Every neighbouring secondary school is currently undersubscribed, Kings Manor in particular with 57% of its school places currently unoccupied.

SCC Education Officers need to demonstrate a clear need for such a school at this, given the current under-subscription of all the neighbouring secondary schools in the western wards of Guildford borough. There are currently 736 vacancies at the nearest secondary schools serving the western wards - not accounting for the 480 extra at the new Technical College to open in 2018 - a combined capacity of 1,216. In addition to those, SCC has already approved expansions at the County School, Guildford and St Peters.

Adding forms of entry to several existing schools will see the costs absorbed after the initial capital cost needed to create a few extra rooms and they still only require one headteacher, one set of staff etc. The Head Teacher and Chairman of Governors at Ash Manor School have offered to cooperate with a programme to expand that school, as had the Principal at Kings; if it needs expansion in the future there is space and a willingness to do so.

Contribution to the Purposes of the Green Belt

I object to the overriding of the contribution the land proposed for Policy A46 makes to the 5 purposes of the Green Belt in response to a developer-led proposal for large-scale house building in the Green Belt in Policy A46.

Guildford Borough Council recognises the contribution the land surrounding and within the settlements of Normandy and Flexford makes to the five purposes of the Green Belt in identifying land parcels H10, H12, H13, H14, H15, H16, J16 and J17 of particular sensitivity in its reevaluation of the land parcels in the Green Belt & Countryside Study, Vol 2 Addendum, Appendix 1 and 2, reinforcing the evaluation in GBCS Vol 1. The evaluation of the ‘land parcel’ is laid out in the tables in GBCS Vol 4. The ‘land parcel’ that contains the land proposed for Policy A46 is H12, evaluated against 4 purposes of the Green belt it performs as follows:

- Checks sprawl of Normandy and Flexford
- Prevents Flexford and Normandy from merging
- Assists in safeguarding the countryside from encroachment
All of this is then ignored in the rush by GBC to appease Taylor Wimpey in order to affirm another strategic housing site and hold its hands up as if to say “not us Guv, its wos the developer that done it”.

Contribution to ‘openness’ of the Green Belt

I object to the rejection by GBC that the land proposed for Policy A46 fails to contribute to the “openness” of the Green Belt.

In the case of Normandy and Flexford, there have been two planning appeals concerning Gypsy pitches (Palm House Nurseries and Green Lane East) where the inspector agreed that land near Flexford and land to the west of Glaziers Lane exhibited ‘openness’. The inspector found in favour of the appellant on other grounds but the opinion on ‘openness’ in those judgements is evidence that the land around Normandy and Flexford is considered by the Planning Inspectorate to exhibit ‘openness’. A third more recent decision at appeal for housing development at North Wyke Farm found that the land contributed to the ‘openness’ of the Green Belt.

• Palm House Nurseries GBC 09/P/01851, Application 12 November 2009 Appeal Ref: APP/Y3615/A/10/2131590 Decision 24 Feb 2011
• Green Lane East GBC 10/P/00507, Application 8 March 2010 Appeal Ref: APP/Y3615/A/10/2140630 Decision 14 June 2011
• North Wyke Farm GBC 14/P/00779, Application 17 April 2014 Appeal Ref: APP/Y3615/W/15/3002308 Decision date: 14 July 2015

I believe this indicates that PINS inspectors recognise the “openness” of the land around the two settlements of Normandy and Flexford and their contribution to the “openness” of the Green Belt.

Impact on Surrey Hills AONB

I believe both settlements should remain ‘washed over’ by the Green Belt as stated in NPPF para.86 “If it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt”.

The land designated as AGLV and identified as 12-1 in the Map AONB Boundary Review - Recommended Areas for Consideration and pp28-29 AONB Area of Search Evaluation - Natural Beauty Evaluation, Oct 2013 report to be added to the Surrey Hills AONB, reinforces the proximity of valued landscape as it will add the north slopes of the Hogs Back overlooking Flexford settlement to the very boundary of Flexford settlement at Flexford Road.

Further, the land allocated in Policy A46 contains unrestricted view of the Hogs Back, part of the Surrey Hills AONB. Recent case law establishes that views out from open land to an AONB are as important as views into land overlooked by an AONB. Surrey Hills Management Board (of which GBC is a member) has submitted proposals to Natural England for land currently with local designation Area of Great Landscape Value on the north slopes of the Hogs Back above Wanborough and stretching down to Flexford Road at the southern boundary of Flexford settlement to be subsumed into the AONB and is currently awaiting agreement for inclusion.

The future potential presence of in excess of 1,000 houses visible at the periphery of the AONB with associated urbanising infrastructure (e.g. roads, perpetual street lighting, general light pollution, loss of ancient hedges and trees etc.) would do great harm to the views into the AONB from the land between Normandy and Flexford and from the Surrey Hills AONB. There will be significant light pollution in winter months.

Thames Basin Heaths SPA

I object to the assertion in Policy P5 that the creation of SANG will protect the rare ground-nesting bird species on this SSSI and Natura 2000 site from major disturbance and predation introduced by the building of 1,100 dwellings that give
rise to hundreds of adults and children, vehicles, dogs and cats within 1 kilometre of this internationally important wildlife habitat.

The 2012/13 visitor survey report commissioned by Natural England on behalf of the Thames Basin Heaths Joint Strategic Partnership Board showed not a static or falling number but a 10% increase in visitor numbers since 2005:

- 66% cited dog walking as the main activity
- 80% of interviewed groups had dogs
- 67% of interviewed groups had dogs which were seen off lead
- 39% specifically visited the SPA site was because it was ‘close to home’
- the average distance travelled was just over 2.5 kilometres (80% by car)

Only 1% of visitors accessed the TBHSPA from the Normandy/Flexford direction, so the additional disturbance caused by the building and then occupation of 1,100 homes by 2,000-3,000 residents and 1,250 additional vehicles will be significant. Importantly, the prevalence of dog walking in the visitor survey suggests that the currently available SANG in the borough is ineffective in attracting those wishing to exercise dogs away from the TBHSPA.

Simply claiming that the 2012 visitor study data indicates success of the avoidance strategy in drawing people away from the SPA is no evidence at all. Where is data based on measurement of visitor numbers to the available SANG within Guildford borough? Where is the evidence that SAMM programmes have any impact on the behaviour of residents that are dog owners? Without it, a planning inspector has no means of finding the proposal of large-scale housebuilding at these sites sound. Natural England have admitted that no survey evidence exists of the effectiveness of SANG or SAMM programmes in directing dog-walkers away from TBHSPA in Guildford borough or any of the surrounding local authorities.

Creating 1,100 homes on Green Belt land between the settlements of Normandy & Flexford implies, on average, 340 dogs and nearly 290 cats (based on a survey of households carried out by a veterinary team at Bristol University in 2010 “Number and ownership profiles of cats and dogs in the UK” published in the Journal of The British Veterinary Association indicates 31% households own dogs and 26% households own cats); all housing to be located within 1 kilometre of the SSSI, for a dog owner, a 2-minute drive or 10 minute walk away. The survey showed dogs were more likely to be owned by rural households.

The proposed SANG schedule in the Infrastructure Delivery Plan, May 2016 (IDP, SANG 13 p84) gives indication of neither the physical size nor location of bespoke SANG for Policy A46 (LAA Site 368); it is estimated that this proposed open space will be unable to cater adequately for 340 additional dogs plus their accompanying owners and there will be significant ‘leakage’ onto the TBHSPA.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A47 – Land west of The Paddocks, Normandy
I object to Policy A47
I object to the proposal that the land that contains the majority of an SNCI should be proposed for housing development.

In the section headed “Conserving and enhancing the natural environment” (section 11), it is stated inter alia that planning policy should protect and enhance valued landscapes and minimize impacts on biodiversity providing net gains in biodiversity wherever possible to halt the overall decline in biodiversity, by promoting “the preservation, restoration and re-creation of priority habitats, ecological networks and the protection and recovery of priority species populations……”.

The National Planning Policy Framework (NPPF) states that “The purpose of planning is to help to achieve sustainable development” and it describes three “dimensions” relevant to this aim: economic, social and environmental. The explanation for how the environmental aspect plays a role includes the statement “…..helping to improve biodiversity, use natural resources prudently…..” This is a quote from point 7 of the section dealing with achieving sustainable development, in the NPPF.

Guildford Borough Council (GBC) interprets the NPPF through their 'Policy I4' which emphasises the commitment to biodiversity stating: "The Council will conserve and enhance biodiversity and will seek opportunities for habitat restoration and creation, particularly within and adjacent to Biodiversity Opportunity Areas (BOAs)”. Proposals for development must demonstrate how they will deliver appropriate net gains in biodiversity. Where proposals fall within or adjacent to a BOA, biodiversity measures should support that BOA’s objectives. The Supplementary Planning Document (SPD) will set out guidance on how this can be achieved. European sites designated as Special Protection Areas (SPAs) and Special Areas of Conservation (SACs), National Sites of Special Scientific Interest (SSSIs), local SNCIs and Local Nature Reserves are all shown on the Policies Map or as subsequently updated. Policy I4 goes on to say that "Permission will not be granted for proposals that are likely to materially harm the nature conservation interests of local sites unless clear justification is provided that the need for development clearly outweighs the impact on biodiversity.”

The majority of the site covered by this part of the development is designated as an SNCI and lies within an area identified as a ‘Water Vole Alert Area’ as identified by the National Water Vole Database and Mapping Project in 2012.

It is shocking that an SNCI should be considered a suitable site for development, particularly given the statements in the NPPF (Para 109) and Policy I4. I find it a telling insight into the very low value that GBC places on biodiversity and wildlife.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A49: Land rear of Palm House Nurseries, Normandy
I object to Policy A49
I object to the “insetting” of the land proposed for Policy A49. Proposing to ‘inset’ this site GBC will create an ‘island’ urban site would be created, removing the ‘openness’ of this Green Belt land confirmed in the judgement of the Planning Inspectorate and similarly judged in the evidence of the GBGS Vol.4. I propose this land should continue to be “washed over”.

Legal Precedent
I object to the removal of the land allocated to Policy A49 by removal from the Green Belt by “inset” under NPPF para 83 and 84. I believe that current case law militates against the removal of land by the re-drawing of Green Belt boundaries without the express presentation in the written Local Plan of the “exceptional circumstances” proposed to redraw the Green Belt boundary for the land in Policy A46. I draw attention to the following cases
• Gallagher Homes Ltd v Solihull Borough Council [2014] EWHC 1283 (Admin), Hickinbottom J
• IM Properties Development Ltd v Lichfield DC [2014] EWHC 2440 (Admin), Patterson J
• Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council [2015] EWHC 1078 (Admin), Jay J
In the Solihull BC decision in particular
“Exceptional circumstances are required for any revision of the boundary, whether the proposal is to extend or diminish the Green Belt. That is the ratio of Carpets of Worth.

Whilst each case is fact-sensitive and the question of whether circumstances are exceptional for these purposes requires an exercise of planning judgment, what is capable of amounting to exceptional circumstances is a matter of law, and a plan-maker may err in law if he fails to adopt a lawful approach to exceptional circumstances. Once a Green Belt has been established and approved, it requires more than general planning concepts to justify an alteration.”
I contend that no “exceptional circumstances “ for such re-drawing of boundaries have been offered by GBC in the context of the Local Plan process, so how can residents judge the veracity of this proposal?

Contribution to ‘openness’ of the Green Belt
There is no legal definition of ‘openness’ but it is specifically expressed in NPPF para. 79 that appears as the first paragraph in “Section 9 Protecting Green Belt Land”; ‘openness’ is matter of opinion and that opinion is often expressed in the decisions of Planning Inspectors when assessing a planning appeal.

In the case of Palm House Nurseries the inspector agreed in 2011 that land to the west of Glaziers Lane exhibited ‘openness’. The inspector found in favour of the appellant on other grounds but the opinion on ‘openness’ in those judgements is evidence that this land around Palm House Nurseries is considered by the Planning Inspectorate to exhibit ‘openness’.

In the Green Belt & Countryside Study Vol 4, Land parcel H10 that contains the Palm House Nursery site was judged the fulfil three essential purposes of the Green Belt
• Checks sprawl of Normandy
• Prevents Normandy, Wood Street Village and Flexford from merging
• Assists in safeguarding the countryside from encroachment

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy A50 Whittles Drive, Guildford Road, Normandy
I object to Policy A50
I object to the “insetting” of the land proposed for Policy A50. By proposing to ‘inset’ this site an ‘island’ urban site would be created, removing the ‘openness’ of this Green Belt land confirmed in the judgement of the Planning Inspectorate and similarly judged in the evidence of the GBCS Vol.4. I propose this land should continue to be “washed over”.

Legal Precedent
I object to the removal of the land allocated to Policy A50 by removal from the Green Belt by “inset” under NPPF para 83 and 84. I believe that current case law militates against the removal of land by the re-drawing of Green Belt boundaries without the express presentation in the written Local Plan of the “exceptional circumstances” proposed to redraw the Green Belt boundary for the land in Policy A46. I draw attention to the following cases

• Gallagher Homes Ltd v Solihull Borough Council [2014] EWHC 1283 (Admin), Hickinbottom J
• IM Properties Development Ltd v Lichfield DC [2014] EWHC 2440 (Admin), Patterson J
• Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council [2015] EWHC 1078 (Admin), Jay J

In the Solihull BC decision in particular “Exceptional circumstances are required for any revision of the boundary, whether the proposal is to extend or diminish the Green Belt. That is the ratio of Carpets of Worth. Whilst each case is fact-sensitive and the question of whether circumstances are exceptional for these purposes requires an exercise of planning judgment, what is capable of amounting to exceptional circumstances is a matter of law, and a plan-maker may err in law if he fails to adopt a lawful approach to exceptional circumstances. Once a Green Belt has been established and approved, it requires more than general planning concepts to justify an alteration.”

I contend that no “exceptional circumstances “ for such re-drawing of boundaries have been offered by GBC in the context of the Local Plan process, so how can residents judge the veracity of this proposal?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P5 Thames Basin Heaths SPA

I object to Policy P5 Thames Basin Heaths SPA

I believe that the Plan is unsound as the Habitats Regulations Assessment prepared for GBC does not take sufficient account of the impact seven proposed major housing developments within 5 km will have upon the Thames Basin Heaths Special Protection Area (TBH SPA) which is a European Site (as defined under the Habitats Directive and Conservation of Habitats and Species Regulations 2010 [as amended]).

Thames Basin Heaths Special Protection Area is a statutory site designated for its rare and vulnerable birds, specifically nightjar, Dartford warbler and woodlark under the EU Birds Directive.

This site also forms part of the Thursley, Ash, Pirbright and Chobham Special Area of Conservation (SAC), a statutory site designated for its North Atlantic wet heaths, European dry heaths and peat bogs.

SANG (Suitable Alternative Natural Greenspace) is not additional; the sites identified or targeted are already green space. To create SANG will use existing Grade 2 and 3a agricultural or wooded land as recreation land in order to justify building on other green spaces. There is no actual increase in environmental protection; it is a policy designed to permit building on otherwise protected areas. SANG, in part used to prevent dogs and cats attacking nesting birds, must ensure that it is not using land which is adjacent to the special protection areas.

A Natural England survey in 2005 showed that more than 83% of visitors to the SPA arrived by car and that 70% of those had come from within 5km of its access point. A very large proportion of the TBH SPA visitors are dog walkers, many of whom visit a particular site on a regular basis. A follow-up survey in 2012 found that there was a 10% increase in visitors to the SPA since 2005. Habitats Regulations Assessment [HRA]

I object to the HRA and its Appendixes A, B and C I object to the omission of 2012/13 Natural England survey of visitor numbers to the TBHSPA report from the HRA. The HRA fails to list the 2012 Natural England Survey of Visitors to the TBHSPA as material evidence (Natural England Commissioned Report NECR136 Results of the 2012/13 visitor survey on the Thames Basin Heaths Special Protection Area (SPA), First Published 13 February 2014; Natural England Project Manager - Patrick McKernan, Natural England, Guildbourne House, Chatsworth Road, Worthing, West Sussex, BN11 1LD

Contractor - Footprint Ecology, Forest Office, Cold Harbour, Bere Road, Cold Harbour, Wareham, BH20 7PA).

The 2012 NE visitor survey reports a 10% increase in visitor numbers. This is neither considred nor critically appraised as a contribution to the analysis of success or failure of the TBHSPA Avoidance Strategy 2009-2014 and the implications for Policy P2, P5, E8 and E9. The HRA fails to assess whether SANG and SAMM current policies and programmes are effective, either independently or in combination, in attracting visitors, cross-country cyclists and dog-walkers away from TBHSPA. On enquiry, Natural England admitted they have no such survey evidence for TBHSPA SANG or SAMM programmes.

The HRA fails to assess in detail, with associated numerical calculations and a described methodology that can be independently verified, the cumulative potential impact on disturbance and predation rates within TBHSPA by the introduction of domestic pets (dogs and cats) from new dwellings; the introduction of over 8,000 dwellings within the 400m-5km mitigation zone will give rise to over 19,000 human inhabitants (ONS 2.4 people per household).
A survey of households carried out by a veterinary team at Bristol University in 2010 “Number and ownership profiles of cats and dogs in the UK” published in the Journal of The British Veterinary Association (Veterinary Record 2010;166:163-168 doi:10.1136/vr.b4712 Authors: J. K. Murray, BScEcon, MSc, PhD1, W. J. Browne, BSc, MSc, PhD1, M. A. Roberts, BVM&S, MRCVS2, A. Whitmarsh1 and T. J. Gruffydd-Jones, B VetMed, PhD, MRCVS1) indicates 31% households own dogs and 26% households own cats. Dogs were more likely to be owned by rural households.

Applying this analysis for all new housing at the listed strategic housing sites in the draft Local Plan within the 400m-5km mitigation zone of TBHSPA (in total 8,000+ new homes), the cumulative impact of dog ownership (up to an estimated 2,500 new dogs and 2,000 new cats within 5 km of TBHSPA) with associated dog-walker incursions on the rare bird species habitat of the TBHSPA will be a devastating increase.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the large proposed development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send and Ripley. A35

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more vehicle movements.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough. The Garlick’s Arch site is attractive open countryside and part of the permanent Green Belt which is protected under the National Planning Policy Framework. It also represents unrestricted sprawl. The site has a particular conservation sensitivity since it is covered in ancient woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600. The site is also subject to flooding.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.
I object to the proposed new interchange onto the A3 at Burnt Common. It would result in the A247 (Send Road) being gridlocked all day. There are no proposals to improve or widen this road. Send will be the through route to Woking for traffic leaving the M25 at Junction 10, the new development of 2,000 houses at Wisley and also the new development of 2,000 houses at Burpham. I further object to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/M25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that infrastructure requirements have not been properly considered and are inadequate to deal with proposed housing levels. Roads, doctors and schools will be unable to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6894  Respondent: 11011969 / Diana Gibson  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3
I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/6890  **Respondent:** 11011969 / Diana Gibson  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

I wish to raise the following objections to the draft local plan:

I object to the removal of Send and Ripley from the Green Belt because the villages and their countryside provides a necessary buffer between Woking and Guildford. One of the purposes of the Green Belt is the prevention of merging of towns and settlements thereby creating unrestricted sprawl. If these villages were removed from the Green Belt in time there would be continuous development between Woking and Guildford. 70% of the sites put forward in the Local Plan are in the Green Belt which flies in the face of current government planning policy. The National Planning Policy Framework (NPPF), National Planning Policy Guidance and case law make it clear that Green Belt is an absolute constraint on housing supply. Exceptional circumstances need to be shown to adjust boundaries. They have not been shown by Guildford Borough Council. I object to Policy P2 green belt which states that “the general extent of the Green Belt has been retained.” This is completely false.

I object to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of Send and Ripley from the Green Belt.
I object to the exaggerated “housing need” figure of 13,860 which is far too high and results in the completely unnecessary development of the Green Belt. The way students, economic need and affordability are calculated inflates the housing need. I object to all proposals to build on the Green Belt at Send, Ripley and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to all the proposed sites in Send because they were not included in the previous consultation in 2014. There is certainly no local need in Send to expand the village by over 25% which it would with the proposal to build an additional 485 houses in the village. Unlike the rest of the borough Send has not been properly consulted and all its sites have been changed substantially from the previous draft local plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the plan to build a town on the site of the former Wisley Airfield, one of the green belt areas on which a large scale development is proposed. This would lead to a great increase in traffic close to the busy A3 road and a very real threat to the beautiful and renowned RHS Garden at Wisley because of higher levels of pollution. The wildlife habitat of the former airfield would also be destroyed and lost for ever.

The infrastructure in the Horsleys is already overloaded. Local schools are full, medical facilities are stretched and our narrow roads cannot cope with the increased amount of traffic. If we take into account all the new properties proposed our roads will simply not be able to manage the extra volume of traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Furthermore these two villages are typical of the beautiful and picturesque countryside of Surrey where many roads are narrow, with little or no pavement. Walking along these is already unsafe, with cars and lorries dangerously close to pedestrians, whether these are families with young children or elderly people using walking aids. The increase in traffic caused by building on the site near Horsley station at one end of the village and on the site of Thatchers Hotel at the other end will greatly exacerbate this danger.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to Guildford Borough Council’s drastic plan to remove both East and West Horsley from the Green Belt and the “exceptional circumstances” required before taking this action have not been demonstrated.

I strongly object to the extension of the boundaries of the Settlement areas of the Horsleys. No sound reasons have been given for the proposed changes, which seem to be aimed solely at increasing the land available within the settlements for future additional development.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The proposed development at Gosden Hill Farm is clearly unsustainable. It does not promote a positive improvement in the quality of the natural environment, or an enhancement of the natural and local environment by protecting and enhancing valued landscape.

There will be an unavoidable loss of bio-diversity with no recognition of the wider benefits of a sustainable ecosystem and does not provide net gains in biodiversity. This development will create a significant loss or deterioration of irreplaceable habitats.
This is evidenced in the massive loss of biodiversity associated with previous developments in the locality, (Weylea, Weybrook, etc.).

This proposal does not establish coherent ecological networks that are resilient to current and future pressures. There is no plan for the creation, protection, enhancement and management of adequate networks of biodiversity and green infrastructure. Nor does this aim to conserve and enhance biodiversity by locating to an alternative site with less harmful impacts.

NPF118. NPPF114. NPPF9.

1. The plan does not empower local people to shape their surroundings and there is little regard for local or regional issues such as excessive traffic, congested traffic and the associated loss of amenity. The planned schools, railway station, park and ride and retail centre will clearly draw large volumes of motor vehicles through the village of Burpham, which is already well above capacity to a point of daily gridlock.

There will be no improvement in the conditions in which people live, work and take leisure. The massive increase in traffic with the associated air pollution will cause a catastrophic reduction in air quality. Indeed, there is clearly overwhelming local opposition to the Gosden Hill Farm development in particular, and the Guildford Draft Local Plan in general.

1. The plan does not protect or recognising the intrinsic character and beauty of the countryside or support existing communities. Gosden Hill Farm is the last of many working farms left in the village of Burpham. Its loss will impact gravely on the nature and community of the village. This plan will remove land from the rural economy and does not pay regard to future agricultural need for productive farmland. NPPF 17.

There has been no taking into account the economic and other benefits of this agricultural land, and no assessment of future needs. NPPF112.

1. This plan will encourage the unrestricted sprawl of large built-up areas. It will effectively merge villages and destroy the intrinsic identity of communities. It will remove any safeguards protecting the countryside from encroachment. NPPF 80.

1. There has been no Strategic Flood Risk Assessment or assessments of the physical constraints on land use. NPPF35

1. This plan does not encourage the effective use of land by reusing land that has been previously developed and has lesser environmental value. Recent developments within Guildford town centre have replaced land originally used for housing with retail, business and car-parking usage. There has been no genuine assessment of all available brownfield land within the borough. The Gosden Hill Farm site uses virgin quality farmland.

1. There is no plan for reducing pollution or minimising its effects including the cumulative effects on health, the natural environment and general amenity on the local and natural environment. The large increase in vehicle traffic, including delivery lorries, and congested traffic, caused by this plan will cause a dramatic increase in both air and noise pollution. The School, housing and retail centre will also generate vast amounts of light pollution. NPPF110, NPPF120.

1. There has been no genuine assessment of infrastructure needs nor forecast for future demands. There is no proposal for a decentralised energy supply or promotion of energy from renewable and low carbon sources. NPPF96.

1. This Plan does not take any account of longer term climate change, including factors such as flood risk, water supply and changes to biodiversity and landscape. There has been no management of risks through suitable adaptation measures, with no planning of green infrastructure.

There is no plan for a transition to a low carbon future in a changing climate. All routes are essentially for motor vehicles. There is no genuine plan for alternative transport systems (e.g. trams etc.) to link with the town centre. NPPF 99.

Essentially the Guildford Draft Local Plan does not provide a considered proposal for sustainable development.
The Gosden Hill development is ill conceived and its location has been chosen for reasons of ownership rather than suitability. Burpham and Merrow have already had considerable development during the late twentieth century, losing many of their traditional farms to housing and retail. This area has already had considerable development and the proposal will cause an unbalanced expansion of Guildford causing an excessive load on the local infrastructure.

This plan will destroy the identity of Burpham village, other existing villages, and their communities by their merging into a suburban sprawl.

The Bio diversity of Burpham is already in sharp decline and has had no proper assessment. This proposal to develop its last working farm will destroy much that remains with no effective mitigation proposals.

There is no proposal to mitigate increased air, water, noise and light pollution from motor vehicles, commercial development and domestic dwellings. Neither are there proposals to mitigate any impact on wildlife from vehicles and their associated infrastructure.

The infrastructure has not been considered holistically. The dramatic increase in road networks will not solve the traffic management problems, but rather add to them.

There are no pragmatic proposals to provide energy (e.g. solar/wind farms) for this development nor to effectively deal with the extra generation of waste including water and refuse.

The basis on which this plan is conceived is far from robust. No genuine assessment can be achieved from these nonspecific proposals. There has been little accurate assessment of current bio diversity, air quality, water pollution, drinking water availability, waste disposal capacity, energy needs and energy generation capacity.

For these reasons the Draft Local Plan should be re-considered. New sites explored and alternative solutions sought.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
1. Since the release of the Draft Local Plan there have been substantive changes to borough infrastructure, particularly in relation to Burpham, where traffic volume, flows and future predictions have not been assessed.
2. There has been no accurate assessment of pollution levels, particularly in relation to traffic. Since the release of the Draft Local Plan, Burpham has especially seen a massive increase in HGV use, traffic volume and congestion. There has been no corresponding assessment of the impact of the Gosden Hill Farm development upon this activity and no assessment of present and future pollution levels, particularly in reference to WHO guidelines.
3. There has still been no meaningful assessment of current bio-diversity within the borough nor has there been any assessment of the impact of housing and infrastructure development upon this.
4. There has been no accurate feasibility study for the proposed Sustainable Movement Corridor (Burpham). Recent developments have ignored government guidelines and there is insufficient space for this proposal. This project could not be completed without massive use of compulsory purchase powers. (Which Surrey County Council have categorically stated that they would not use).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp17q/266  Respondent: 11012129 / William Lawrence  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Generally, this plan is still fundamentally unsound, unsustainable, and contains either data that is erroneous and misleading or simply missing. It does not provide a considered proposal for sustainable development.

The Gosden Hill development specifically, is ill conceived and its location has been chosen for reasons of ownership rather than suitability. It is a ill informed ‘knee-jerk’ solution with no serious consideration of alternatives.

The basis on which this plan is conceived is far from robust. No genuine assessment can be achieved from these nonspecific proposals. There has been little accurate assessment any of the relevant criteria; traffic, utilities, pollution and the environment.

This revised Draft Local Plan should be totally rejected. Its unimaginative solutions are unworkable and not fit for the twenty first century. New holistic solutions need to be addressed, accurate assessments made new and innovative options explored.

We object to Guildford Borough Council's draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:

- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- increase tailbacks on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

| Comment ID: PSLPS16/6643 | Respondent: 11012161 / Wendy Gathercole | Agent: |
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.
• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of
the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of
which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties
there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and
many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five
storeys high and a population density higher than most London boroughs.
• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The
development is too isolated, and even within the development itself too spread out to anticipate a
reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an
estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas,
exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths
and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A
further planning application at RHS Wisley (with a significant increase in visitor traffic) and a
proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3
junction as well as local roads. No development can proceed without significant infrastructure
enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due
to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with
the proposed increase in passenger traffic and car parking is already at capacity
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the
site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest
(SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the
borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will
exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the
acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced
through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1)
access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish
to see both the historic features of the village maintained and the village’s green spaces, including the FWA/
TFM, protected.
• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) -
where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL)
planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning
Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows),
Allocation A35, is removed from the Local Plan with immediate effect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

Answer (if comment is on questions 1-7 of the questionnaire): ()

Loss of agricultural land

1. The proposals, in particular in relation to Blackwell Farms would remove a large proportion of the working agricultural land that is proximate to Guildford. This is important both for the food it produces but also for its importance in providing an educational gateway for children living in the town to ensure they understand how their food is produced.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Pressure on services

1. Hospitals – The current services at the Royal Surrey appear over-stretched. Significantly increasing the size of population served will further worsen both services and access. Even at this point in time getting a car parking space at the hospital is very difficult during visiting hours.

2. Schools – The current school system in Guildford is materially over-stretched, hence the requirements over the past few years to expand school sites. It is not clear within the proposals that there is sufficient consideration being given to secondary school places in particular. Even with the revised changes the reality is that the schools proposed are not in the right place for demand and lack a clear strategic direction. The Council’s policy in this areas has been flawed over the past few years and the revised plan risks creating a significant continuation of the provision of lower quality schooling for many parts of Guildford with the consequence that demand is not, and will not, be evenly spread – a situation which materially increases traffic volumes and reduces community sentiment.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infrastructure.

1. Roads – The overall road network within Guildford is already hugely challenged. In particular the A3, which will be a major feeder road for the expansion in the West of Guildford will be unable to cope at peak periods. Guildford already can’t cope when there is a problem on the A3, adding thousands of additional cars to this route will make it materially worse. It is also likely that the A31 will also be overburdened. The evidence for this over-burden is clear. Already in the period since the prior town plan there have been a number of fatalities and serious injuries caused by traffic volumes in the town centre. Increasing road usage will exacerbate this situation. Finally, the road network that the Blackwell Farm Site will be dependent on also feeds the hospital, a part of the road network just off the A3 and suffering from existing capacity problems at peak periods. This is also the same network that feeds the hospital. At peak periods the additional traffic will literally put people’s lives at risk. Even excepting this the evidence provided by the plan suggests that in the evening rush hour (with all the change being considered) traffic volumes will actually slow.

2. Rail – Guildford is hugely dependent upon the rail network, in particular for travel to / from London. Even at weekends the current rail provision is such that it can be difficult to get a seat. On weekdays, particularly between 7 and 9 am and between 5 and 8pm it can literally be impossible to get a seat. While further increases in capacity and frequency are to be welcomed, the reality of these changes is that they are required now with the current volume of passengers – I travel regularly on these trains and passengers fainting as a consequence of the conditions is a relatively frequent occurrence. Adding thousands of new homes, and at least hundreds of new commuters without the development of a substantially new rail network – including new terminus or significant expansion at Waterloo (one of the major constraints to rail volume) will leave Guildford woefully under-served by its rail connections. It is also apparent that some proposals exist to increase population along the train route between Portsmouth and London – it is not clear that the impact of all of these changes at the same time have been considered on the capacity changes.

3. Town centre access – As discussed the current draft local plan, with its anticipated reduction in car-parking and traffic volumes is completely incompatible with the proposals in the local plan.

Loss of recreational opportunities

1. Removing such a large area of local open space, with its associated footpaths and bridleways will reduce the opportunities for people to access the surrounding countryside.

Impact on Wildlife

1. The development will have a material impact on local wildlife. This will include the implications for rare plant and bird species as well as deer, who currently regularly access this area of west Guildford through the area around Surrey University.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Loss of locally and nationally important views

1. The chalk ridge of the Hogsback provides important views of the local area – and in particular the Surrey Hills Area of National Beauty. The reason for this designation was its local importance. Including a significant swathe of this in the local plan for development would dramatically impact these views and the views of Guildford cathedral.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Green belt expansion

1. The proposed area for the expansion in West Guildford is green belt. The underlying thesis behind a green belt designation is that it should be preserved for the future. Re-classifying sites as green belt in order to compensate with the removal of green belt status elsewhere is at least inappropriate and disingenuous. More realistically it is bordering on fraudulent – the designation of the site as green belt is understood by the general population (or even the man on the Clapham omnibus in legal parlance) to be a long-term designation not given or removed lightly. This proposal treats the designation with disdain and when the wider population understand what has been done there will be general shock and resulting contempt for the town planners and councillors. This proposal is completely inappropriate and particularly for sites such as Blackwell farm which are sites of exceptional beauty and home to varied wildlife – it is simply not possible to lift and drop this flora and fauna into a new area without significant damage being done to it. The fact that the university is supportive of expansion, thereby making this site easier to develop, does not mean that the simplicity of approach should over-rule the impact of the development on this special area.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the draft local plan. I object on the basis of:

1. The entirety of the plan – the proposed scale of expansion it contains, the continued absence of supporting infrastructure and the complete incompatibility of the approach with Guildford’s current and traditional state;
2. In particular the proposed expansion on the West of Guildford, including the Blackwell Farm Site and other associated development such as the cathedral.

I also note that it is appalling that what appear from the information provided to have been only very minor changes to the prior plan have been made yet you insist on requiring fresh objections – the reality is that the plan recently proposed is not materially changed from that provided in 2014 and consequently all or almost all objections to that plan should remain.

The core reasons for my objections are set out below (for the avoidance of doubt all of these apply to the West of Guildford expansion as well as some applying to the overall plan) as follows:

Scale of expansion.

1. The proposed scale of expansion is incompatible with Guildford as a town and will dramatically change its character and the demands placed upon it;
2. The scale of expansion in absolute terms is too significant for a relatively modest town and is well beyond that which is required. The evidentiary support provided does not justify the scale of development proposed.
3. The relative scale of expansion vs. that proposed by other areas such as Woking – if the demand for such expansion is there then it should be met on a balanced basis across the region; and

4. The incompatibility of this plan with the town centre and the proposed plan. The town centre plan suggests that there will be less access to the town centre with less parking and a lower capacity for traffic. Implementing this local plan at the same time as the changes contained within the town centre plan is a recipe for complete chaos. While the revised plan refers to changes in the mix of transport, and hopefully there will be some, this will undoubtedly be insufficient to reduce overall traffic volumes in what is already an over-stretched town. Supply side changes are not going to be sufficient to cope with the level of increased demand proposed by the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Inadequate and mis-focused consultation.

1. While extensive efforts have been made to communicate the content of the town centre plan to residents the same is not true for the local plan. Indeed the current proposals as set out online provide a picture of a well-developed plan with exceptional support and significant changes from the prior plan. This is simply not the case. The detailed information underlying the projected demand for population growth has been requested repeatedly and Guildford Council has a legal right to access it yet this has not been provided. This proposal is not materially changed from the prior proposal, instead this is an exercise which combines good soundbites with a gradual effort to wear down the local population – having conveniently sidelined the plan’s changes over the recent local election period. This is not appropriate and in reality is an exercise in undermining local democracy. The plan is not appropriate and has only changed at the margins.

2. In addition the form and content of the document makes it virtually impenetrable for an ordinary person to access it. Producing a complex document, a summary of changes which relies on extensive reference to varied supporting documentation and with a range of meaningless soundbites and terms which only town planners are able to interpret does not create an accessible plan. Indeed both my wife and I have numerous post-graduate qualifications, and my wife even has a Geography degree yet the summary provided by you left us struggling to understand the changes and meaning of the document. The approach taken makes it very difficult for even the well-educated to read, interpret and assess the proposals in a sensible timeframe.

3. In short the consultation process has provided over-complex information on the local plan and is an attempt to grind objections down. It remains wholly inappropriate and should be completely re-thought from the ground up, rather than subject to variation at the margins – as has been the case. If this was activity undertaken by a bank then there would be calls for a public investigation and potential action for mis-selling – I fail to see why failing to consult properly in the public sector over a matter of this importance should be treated any differently.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am writing to object to the proposed Guildford Local Plan. This follows my prior letters – which do not appear to have been adequately addressed.

The points below are of general applicability to the plan AND I also specifically reiterate them in relation to the proposed development of the Blackwell Farm area [a26 and 4.1.9]:

1. The development does not address the needs of Guildford, it is excessively heavy and will largely be targeted at encouraging new residents to move to Guildford rather than addressing the housing needs of existing residents
2. The infrastructure within Guildford will not be able to cope [2.14a]:
3. The plan will materially increase the population, rail access to London and the A3 already cannot cope and will be subject to significant further increases in stress as a consequence
4. The Blackwell Farm site will increase traffic at an existing pinch point near the hospital, an unworkable situation AND potentially life threatening if it slows emergency access. I understand the existing traffic levels in this area are already in excess of requirements by local planning inspectors, a matter which will significantly worsen
5. The proposed additional rail stations do not address the major constraint on rail – access to London and indeed the development will make this worse by encouraging Guildford Town Centre station as a hub.
6. The plan does not make adequate provision for already over-burdened schools, doctors and the hospital to cope with the additional population
7. The consequence of the above is that the town will see increased pollution, both in the town centre, as population increases generally, and specifically around the hospital and Blackwell Farm from a combination of increased traffic on the A3, access to the Hospitals, university, sports park and business park. This may well reduce health around Guildford and will likely reduce the health benefits young people see associated with use of the sports park – which directly neighbours both the farm site and the A3. It will also have knock on implications for Compton, which will see traffic and pollution both from traffic on the A3 and from vehicles using it as a shortcut [a26 key considerations 7]
8. The area around Blackwell Farm and across to Compton on the south side of the downs provides much needed greenbelt, and has significant natural resources / wildlife. The development would irreparably damage the greenbelt around Guildford generally and specifically remove this rare and treasured resource from Blackwell Farm. Additionally it does not specifically set out the rationale / costs and benefits of alternative options for development [P1 para 4.3.8 and S2 para 4.1.9]

Many thanks – for the avoidance of doubt I find it ridiculous that I am being asked to comment for the third time on what is at its core the same plan – I would be surprised if the Council’s decision to continually reissue a relatively unamended plan were not subject to judicial review given it is clearly a tactic to wear down individual respondents.
I write to detail my objections to the Guildford Borough Council (GBC) Local Plan 2016.

My comments are frequently linked to my own locality, since I clearly have most experience there. However, it seems that GBC wishes to pursue a policy of forced growth across the whole borough, without the support of the residents, based on the ineffective experiences of objecting to the GBC Local Plan 2014.

Whilst I am a resident of West Horsley, my property shares borders with East Horsley, and my comments often therefore refer to both villages, since proposals to both are pertinent.

**Unbalanced Development**

Having reviewed the areas for proposed development I object to the unbalanced distribution of the sites across the borough. The sites seem to be focused on the north eastern side of Guildford, swamping existing rural villages and destroying large areas of countryside without planning for the necessary infrastructure that everyday life requires. In particular, an increase of 35% housing in West Horsley is excessive.

**Loss of Green Belt**

I wholeheartedly object to the use of current Green Belt land for development via the plan. The establishment of Green Belt was for the protection of the countryside for future generations. There has been no exceptional circumstance established for the removal of, or alteration to, boundaries of East or West Horsley from the Green Belt.

In addition GBC claims in its own publication "About Guildford" Summer 2016 (pg4) that following feedback the total number of development sites on green belt has been reduced. This is most certainly not the case in East and West Horsley.

**Traffic and road network**

The roads in and around East & West Horsley are in poor condition and very narrow in places, and unable to support the current level of traffic using them. They are certainly not capable of increased usage and I object to any development that generates additional traffic. This is supported by the recent incident of a lorry getting stuck under the railway bridge at Horsley station, where Ockham Road North and South meet. The incident caused disruption to the rail system and roads for multiple days. It would be dangerous and foolhardy to develop the area A39, noted on Map Horsleys (East Horsley) page 348 of the plan, creating additional traffic on such constricted roads.
In addition my journey to work at The Royal Surrey County Hospital using the A3 is frequently hampered by slow or stopped traffic, particularly around the Burpham area. I object to excessive development within the Borough when the main roads are unable to support the existing level of traffic.

Parking

There is insufficient parking at the West Horsley parade of shops, West Horsley Village Hall, East Horsley Village Hall, Horsley station and Station Parade in East Horsley. I object to the excessive local development proposed in the local plan, both around East and West Horsley villages and the Wisley Airfield site which would compound the matter due to increased numbers of car users.

Flooding

I object to development that increases waste water in East and West Horsley. The water drainage systems in the area are unable to cope with the current level of waste water. The local roads are often flooded in winter, and increasingly at other times of the year also. My daughters walk along Ockham Road North to access the station for their journey to school. During periods of wet weather I am often forced to drive them in the car, as the road is so flooded it becomes impassable on foot. Development that increases both traffic and waste water in this area (such as site A39, pg348) would have an extremely detrimental effect.

In addition my back garden, which borders the proposed site A39 pg348, is often flooded in winter, and with a recent period of wet weather even in June. The winter streams are not able to cope with the current amount of water from the field and I object to any development of this site that will increase run off.

Schools

The Raleigh School is already at capacity, and unable to accommodate more children. This is also the case for the Howard of Effingham. I object to development in East and West Horsley and Wisley Airfield that will create additional schooling requirements.

Medical facilities

The current medical facilities at Kingston Avenue in East Horsley are at capacity and difficult to access. I object to any development that increases demand on these services.

In conclusion, the GBC Local Plan 2016, does not provide the community with a plan that fits with the needs of its residents, and should be dismissed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I request that my comments are shown to the local planning inspector on the below sites and issues:

I OBJECT to Send Village being removed from the green belt. I purchased my house on the basis of the green belt areas and the permanency of this. There are no circumstances in which this should be abandoned. Send's green belt is an essential buffer between Woking and Guildford.

I OBJECT. To the 45 houses at Clockbarn Nursery, due to inadequate access and traffic volume.

I OBJECT to building 400 houses and industrial space at Garlick's Arch. The site floods and is covered by ancient woodland. There are brown field sites that need development instead, and industrial space in this location is not appropriate.

I OBJECT to the Send Hill site of 40 houses and 2 travellers' pitches. Is it totally in appropriate due to the narrow width single access country road with insufficient access. Any development would spoil the high amenity area set in countryside. I also object as this site was not included within the first consultation and therefore should not be included in this second follow up, without starting the process from the start. This update consultation should be the first but refined, and should not include fresh sites.

I OBJECT to a new interchange with the A3 at burnt common. Send would then become a main road for access to the a3 over and above what is in place already. I live on Send Barns Lane so suffer the road as is, any further congestion be and pollution would hugely impact on our lives and house value. Together with the new sites a proposed at Wiseley Airfield, Gosden Hill and Blackwell Farm would be excessive.

Answer (if comment is on questions 1-7 of the questionnaire): ()

> I OBJECT to Send Village being removed from the green belt. I purchased my house on the basis of the green belt areas and the permanency of this. There are no circumstances in which this should be abandoned. I regularly walk with my children round the local countryside, along footpaths and through fields. We all enjoy the scenery, the wildlife and the tranquility it provides. We moved here because we wanted to live in a village setting with countryside. Planning such vast building works would ruin the landscape, destroy habitats and tarnish the very essence of what makes Send a lovely place to live. Send's green belt is an essential buffer between Woking and Guildford.

> I OBJECT to the 45 houses at Clockbarn Nursery, due to inadequate access and traffic volume. This is right opposite a very popular and well used play park; added traffic in an already busy location with poor visibility would pose a serious threat to pedestrians - especially children around the park and shops who would find it difficult to cross Send Road safely.

> I OBJECT to building 400 houses at Garlick's Arch. The site floods and is covered by ancient woodland. There are brown field sites that need development instead, and industrial space in this location is not appropriate. The number of houses proposed would flood the existing, already overstretched services. The Villages Medical Centre is already very busy and the local primary school is just recovering from a period of huge change and has finally received a positive Ofsted inspection. As a primary teacher myself, I would be concerned about the demands such an increase in intake would place on this school.

> I OBJECT to the Send Hill site of 40 houses and 2 travellers' pitches. Is it totally inappropriate due to the narrow width single access country road with insufficient access. Any development would spoil the high amenity area set in countryside. I also object as this site was not included within the first consultation and therefore should not be included in this second follow up, without starting the process from the start. This update consultation should be the first but refined, and should not include fresh sites. The presence of travellers sites would significantly impact the value of surrounding housing - Send Hill homes are premium and this would be negatively affected by travellers' pitches so close by.

> I OBJECT to a new interchange with the A3 at Burnt Common. Send would then become a main road for access to the a3 over and above what is in place already. I live on Send Barns Lane so suffer the road as is, any further congestion and pollution would hugely impact on our lives and house value. Currently, large loads travelling on the road cause the whole house to shake. I regularly walk my two children to and from the park and school - the pavements are very narrow in places and the traffic often includes large lorries, heavy loads and at times, traffic travelling at speed, despite the 30mph limit. It is not safe and further traffic would increase the danger to pedestrians. Together with the new sites proposed at Wiseley Airfield, Gosden Hill and Blackwell Farm, this would be excessive.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1943  Respondent: 11013889 / Richard Curtis  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
Date: June 2016

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor...
stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am writing in response to the proposals set out for West Horsley in the 2016 Guildford Draft Local Plan. My concerns focus upon the strains that would be imposed upon an already creaking infrastructure in this area, and the erosion of the Green Belt.

The detailed arguments relating to the impact upon the various elements of the infrastructure have been well rehearsed elsewhere. Suffice it to say that transport (road, rail and parking), medical, educational and shopping facilities are already under considerable strain. The increased volumes of traffic that would arise from the proposals have the potential to generate considerable hazards to local schools, pedestrians and junctions. The Raleigh School is oversubscribed and the Medical Centre is inundated. The addition of a significant number of new dwellings to the area would be unsustainable.

As I understand it the Green Belt may only be challenged in exceptional circumstances. No-one would view building on the Green Belt in West Horsley an exceptional circumstance when there are viable options for additional housing throughout the borough.

The scale of the proposed developments in the Horsleys would have a detrimental impact on the rural characteristics that define life in this Surrey village. Any development needs to be proportionate in scale and not be at the expense of the quality of life of those of us already resident here.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - East Horsley
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have a number of concerns about the draft local plan which has been put out for consultation by the Guildford Council and in particular, I object to the number of houses which are planned both in terms of the actual number and the fact that 65% of these are to be built on land which is currently in the Green Belt.

I understand that the Housing and Planning Act states that a site, once identified in the Local Plan, is assumed to have permission to go ahead in principle, thus stopping normal planning restrictions at a later date.

The current proposals include at least 148 houses in East Horsley and 385 in West Horsley. Both villages will be taken out of the Green belt leaving both vulnerable to future development. This is in addition to the proposed 2068 houses on Wisley Airfield, 400 homes at Burnt Common and 2000 houses at Gosden Hill Farm.

These proposals, if accepted, will cause huge pressure on road, parking, trains, education and medical facilities. Royal Surrey Hospital is already at breaking point. Primary and Secondary Schools are over-subscribed. Where will the children from these new houses go to school and on to university? I am a commuter and with the additional two coaches it is now possible to ensure a seat at Horsley – those at Oxshott are not so lucky, but returning in the evening it is often impossible to get on the train at Waterloo at 7.00 pm and I have to wait for another train. This is not to sit down – merely to get on the train without fainting. Our medical centre is one of the best in the area but appointments are not easy to book. The proposed local plan will put an incalculable burden on these facilities. The Royal Surrey Hospital is similarly stretched to its limits. How will these new residents be treated?

If one considers that each home will have at least one car and most will have two or more, there will be approximately 5,000 additional cars in the vicinity of the Horsleys alone. How will the new commuters get to the station and park? The car parks are already full and there is no more parking land available.

The roads in and out of East and West Horsley are not able to cater for increased flow of traffic. The village life we have come to know would be totally removed by the imposition of a one way system which would be the only way to deal with this additional traffic burden.

The Government is already concerned about pollution, yet I do not see how the increase in volume of traffic can do anything other than pollute the environment.

Flooding is an additional problem. The site behind Ockham Road North is already a flood risk area and standing water collects after any heavy rain. Building will only exacerbate this problem.

**The overall loss of green belt land is one of my greatest concerns.** Once the land is built upon it can never be reclaimed. Our countryside will disappear. **The Local Plan must take account of these issues and reject further development of the Horsley’s.**

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/747  Respondent: 11014369 / Geraldine Wright  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I have been offered the opportunity to comment on the Guildford Borough Proposed Local Plan and to the continued inclusion in the plan of the Former Wisley Airfield.

I have many objections to the draft Local Plan which can be summed up as follows:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is considerable brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. There were a number of Election manifesto promises to the electorate which have been ignored in this regard.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No
development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. Commuter trains are already at bursting point. The recent addition of two coaches (from 8 to 10) have done little to ease the congestion and it is often impossible to board the Horsley train at Waterloo. Passengers are regularly helped off the train en route because of overcrowding on the inward journey. Even allowing for a small proportion of occupants of the proposed development being commuters would put an impossible burden on the existing services.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two

10) responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces.

Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

11) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
1. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

2. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

3. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

4. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations. There should be a clear statement as to how this has been allowed to happen.

5. I object to the extension of the plan period by 1 year as it has not been identified as a major change

6. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

7. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes. What is being done in this regard?

8. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

9. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact

10. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

11. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building. All the arguments with regard to conservation in the area apply.

12. I object to the fact that the changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”

13. There is insufficient employment opportunities on the proposed site. All residents will therefore need to travel to work by public or private means.

14. Additional visitors to the RHS Wisley have not been included.

15. Local roads are at capacity and increased public transport would have to negotiate over already overcrowded SRN. They would be unable to offer a reliable service

16. The site is further from the railway station than any other proposed site. This station has insufficient trains to deal with increased passengers and a very small car park which is already filled to capacity. There is no scope to increase the size of the car park.

17. I object to the application of new housing on the old Wisley Airfield on the ground that it is the least sustainable strategic site in either version primarily due to its physical location

18. Its location to the M25 at J10 and the A3 means overloading one of the most congested junctions in SE England.

19. Additional bus services would compromise the safety of those cycling and walking in the area.

20. Reliance on Woking Station is unsustainable. Woking is already at capacity in terms of the station itself and nearby parking.

21. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

22. I believe that opportunity (3) should be common to all sites and is not unique to this site. I object that insufficient consideration has been given to this.

23. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB. What has been done in this regard?

24. I object to the removal of additional 3.1 ha from the green belt without any justification.

25. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3

26. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

27. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

28. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

29. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
| 30. | I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS. No reasonable explanation has been given for this. |
| 31. | I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification. |
| 32. | 29. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels. |
| 33. | I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration. |

I therefore consider that this plan is unsound and not fit for purpose and must be rejected.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In the wider picture I object for similar reasons to those above to your unsustainable plans for Ockham, Wisley, Ripley. There is simply NO EVIDENCE to support the need for housing on this gargantuan scale, and this proposed gargantuan scale of population growth simply cannot be supported by our local roads, schools and other infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object vehemently to the Guildford Borough Proposed Submission Local Plan: Strategies and Sites June 2016. Your proposed submission local plan is so offensive that it is hard to know where to begin my objections.

I object to your proposal to remove the Horsleys from the Green Belt. The Green belt has prevented planners and developers from "concreting over" the South East for 5 decades. Your ignorance, arrogance and short-termism in wishing to remove this precious protection is breath-taking. How can you live with yourselves and the prospect of being the destructive group who initiated the despoliation of the beautiful county of Surrey? Vandalism on this scale is not just
justified by current housing needs. I note that you are not prepared to reveal the mathematical models used to support the SHMA underlying this plan. You seem to have singled out West Horsley for 35% population growth - more than anywhere else in the Borough, for no sensible or stated reason. Nor have you shown any other "exceptional circumstances" required to diminish the Green Belt and remove West Horsley from it. You have also extended the boundaries of the Settlement areas of the Horsleys for no apparent good reason.

When these precious green spaces are gone, they are gone forever. Don't have this environmental devastation on your consciences. Your proposals are ill-conceived, unsympathetic to the character of this part of Surrey, and completely unsustainable. Please re-consider them radically and urgently. I vehemently object to them all.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2 Sites in East and West Horsley (sites A36-41)

I object.

The council leaders representing Ash and Tongham (where the Green Belt is actually being extended) are pushing a disproportionate allocation to this area which will create a mega-village and ruin what is currently two lovely villages.

The number of homes in West Horsley, a rural village will increase by 35% which is also I understand 35% of new homes in the plan with urban Guildford taking only 11%.

The infrastructure and schools, doctors, shops can't take the strain of this together with the c. 2,000 houses planned at Wisley airport.

It would damage local tourism.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Sites

1. Green Belt sites

I object.

The policy identifies the principle of development and identifies sites within the Green Belt which is against the will of the people who live there and ignores the 20,000 objections to the previous consultation.

It has no regard for infrastructure and other constraints and doesn't make use of brownfield sites in urban areas that are alternatives.

The Green Belt should be retained in its entirety and short term housing goals shouldn't allow planners to be able to override the long term future of the Green Belt for future generations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Three Farms Meadow site (site A35)

I object.

The re-inclusion of this site is very disappointing following the public outcry for its previous inclusion and the rejection of a recent planning application.

It should be removed as it is in the Green Belt, less than 15% is brownfield and the former runway has never had buildings on it. The former runway is a Special Protected Area.

The infrastructure can't cope with the increased traffic and pressure on services it will create.

The cost of improving the infrastructure will mean alternative sites will be more viable if included in the assessment.

It is also disproportional to build 2000 homes in a village of 159. It will also have adverse effects on the Horsleys and put pressure on the Horsley station.

Please reconsider and make the appropriate changes in the plan.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2461  Respondent: 11014881 / Linda Peters-Smith  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy D2 - Sustainable Design, Construction and Energy

I object.

Building in the Green Belt will lead to increased traffic congestion and pollution.

The infrastructure can't cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Policy P2 - Green Belt**

I object and disagree.

We should not allow the relatively short term 15 year plan spoil the legacy of future generations.

Once gone the Green Belt is gone forever.

The general extent of the Green Belt has not been retained which is stated in the policy.

The policy omits any assessment of the value of the Green Belt. The policy severely understates the loss of Green Belt land.

The required housing allocation should be spread across the borough and not burdened in one part on Green Belt land which will put strain on infrastructure and change the character of these settlements.
Developers will want greenfield sites as building costs will be lower. 8086 houses are proposed for Green Belt compared to 1135 for the Guildford urban area which is inequitable, will destroy the Green Belt and disincentives Urban regeneration.

The policy makes all villages in the green belt vulnerable to large blocks of new development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the draft local plan and have listed my objections below:

Policy S1 - Presumption in favour of sustainable development

I object.

The plan has no regard for the Green Belt.

The plan has a development bias committing to approve applications wherever possible and without delay.

The Green Belt was set up to protect green areas in perpetuity and Policy S1 should commit to uphold its boundaries and protections.

No definition is given of 'sustainable development' - should meet needs of present without compromising the ability of future generations to meet their needs.

</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2 - Borough Wide Strategy

I object to the proposal to build 13,860 new homes. If a lower number were proposed it would remove the need to build on the Green Belt.

The plan fails to set a housing target of new homes or explain how this relates to housing need. It exceeds the 13,860 total.

The assumptions and calculations are hidden and are using a model belonging to consultants that are openly pro development.

The projections for economic and population growth should be revised downwards especially in view of Brexit.

The West Surrey Housing Market Area is too small and adjacent districts of Rushmoor and Mole Valley are outside the area.

The area is artificial and the absence of a suitable alternative doesn't make 'West Surrey' reliable. There is a highly lopsided distribution of proposed developments in Surrey.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposed building of 533 new houses in East and West Horsley (an increase of 35%). This amount of housing will completely change the rural character of the villages. The high density proposed would not reflect the existing character of the area and would create suburban housing estates in this rural setting. There is no justification for developing Green Belt land, except in very special circumstances. No ‘special circumstances’ have been put forward by the Council. We need to protect the Green Belt and stop our countryside from being destroyed. This is particularly true of the proposed development at Sites A41, A39, A38 and A40.

It will also place huge pressures on: local schools, doctors surgery, drainage infrastructure, road network, parking at local shops and rail stations. The Council has not considered the infrastructure needed to service this level of development, despite the fact that the National Planning Policy Framework states that new residential development must respect the character and density of housing in the area and be limited in quantity by the availability of infrastructure and local facilities.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Plot A40

I particularly object to developing the land, currently part of the curtilage of Waterloo Farm. The site is rural in character and enhances the setting of the historic farmhouse. This would be unacceptable backland development. The site is regularly waterlogged and floods (as does our back garden and the campsite). Houses on this site would further exacerbate drainage problems in this area. The main sewer which crosses the site would also constrain development. The settlement boundary along the rear boundaries of properties on Nightingale Crescent should be retained.

The amount of development proposed for East and West Horsley is out of proportion with the rest of the Borough. It is unbalanced and unfair to propose such a high level of housing in one small village.

Answer (if comment is on questions 1-7 of the questionnaire): ()
In fact the case for building houses in the South of England at all has not been made – the UK birth rate is less than 2 children per family - the perceived demand for housing is artificially fuelled by people living longer and by the high level of immigration into the country. The first of these two points means that you should be building retirement homes not housing estates and the effects form the second issue needs to be re-visited following the country’s decision to leave the European Union and the general position that the UK should strengthen its immigration measures from both the EU and other nations outside the EU.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The environmental impact of the vast number of new residents commuting in and out of the area would put a massive additional burden on the existing road networks and transport infrastructure that is already buckling under the weight of lack of investment or maintenance by Guildford County Council – Have you tried driving down ‘Long Reach’, ‘Ripley Lane’, ‘The Street’, ‘East lane’?

New residents on the proposed scale would put an unsustainable strain on the local schools – I remember what a struggle I had getting my son into the local Primary School and there are annual arguments over catchment areas between the local villages just to get children into the geographically nearest Secondary Schools. The proposals do not address these problems adequately they would just make them worse and mean parents would have to drive their children to schools many miles away putting further strain on the inadequately maintained road system and further increase pollution of the local environment.

The increase in housing will also strain the services infrastructure, local sewage and drainage requirements are overloaded as can be seen after a heavy downpour water floods over Ripley Lane and The Street between the Railway Bridge and Long Reach due to many natural springs in the area. Localised flooding will of course be compounded by the proposed new homes the plans take no account of this.

It should also be noted that during the building of these new houses what is left of the local roads will quite literally be destroyed, a year ago heavy construction lorries were employed at Jury Farm for a couple of months in Ripley Lane and the Road was structurally damaged as a consequence and has still not been satisfactorily repaired. Building in the local area on the scale proposed will never be made good by the construction companies lining up to build on nice Green Field Sites. It will be the local Tax payer that picks up the bill and endures the years of misery during and following the extensive construction.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I should also like to state that the extent and number of new houses proposed in the Horsley’s, Ripley, Send and Wisley areas is totally out of proportion to any local requirement, I believe the mathematical model used to develop the Strategic Housing Market Assessment is flawed, there is no industry or business case for increased housing on this scale (a 35% increase in West Horsley). If new housing is required it would be better to site it close to where that need really is.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: SQLP16/1824  Respondent: 11015329 / Nick Riederer  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I urge the Council to-

1. Think again on a local scale and consider what is actually needed by the people living in the borough and not some artificially inflated requirement that will only benefit building developers in the short term.
2. Go back to Central Government and seriously question the whole premise of this notional housing requirement. Can we really need over 4000 houses in the local area when it will only compound the pressure on local facilities and have a major negative impact on the local environment, adversely affecting the quality of life of all those currently living in the Guildford environs.

I believe that there is plenty of room for new housing and properties that could be refurbished in other parts of the country, without the impact to sensitive environmental and designated Green Belt or conservation areas where effort should be put to regenerate both jobs and industry supported by investment in affordable housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
7. I object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

   1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
   2. It is further from railway stations than any other identified strategic site.
   3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (M25, J10)
   4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
   5. The local road infrastructure has had little to no investment in recent years and any increase in traffic will further degrade/destroy the road surfaces and appalling levels of subsidence.
   6. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
   7. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally impractical and unsafe.
   8. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers are likely to increase significantly year on year.
   9. The associated traffic increase from the RHS has not been taken into account.
   10. The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
   11. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
   12. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
   13. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
   14. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
   15. Opportunity (3) should be common to all sites and is not unique to this site
   16. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
   17. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
   18. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
   19. I object to the removal of additional 3.1 ha from the green belt without any justification
20. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
21. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
22. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
23. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
24. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
25. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
26. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
27. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
28. I object to the extension of the plan period by 1 year as it has not been identified as a major change.
29. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
30. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
31. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
32. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
33. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
34. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
35. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
36. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
37. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
38. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

5. I object to the fact that Guildford Borough Council is choosing not to constrain its overall housing growth, as many other Councils have done to protect Green Belt. The objectively assessed housing target, though reduced since 2016 to 12,466 homes, will by 2034 (the end of the Plan Period) mean that Guildford has grown by nearly 25%. This is nearly double the Office for National Statistics prediction for the growth of Guildford and therefore quite unnecessary.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/2079  Respondent: 11015329 / Nick Riederer  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. I object that nothing has been put forward since last year’s Consultation to improve the sustainability of the West Horsley development sites and thus meet National policy requirements. Every home on the West Horsley sites will need a minimum of one car to enable residents to get to shops, medical centre, library and Horsley Station, regardless of how much pressure is applied to adopt cycling and walking as the preferred means of travel a realistic estimate of 3 cars per home should be considered a minimum given the rural location and age demographics.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/2078  Respondent: 11015329 / Nick Riederer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Firstly I object to the fact that no changes have been proposed since the 2016 consultation to the insetting of West Horsley and East Horsley from the green belt despite numerous objections at the time.
2. I object to the very large number of new dwellings proposed on Green Belt. Whilst the reduction in the number of new homes proposed in the Green Belt after the 2016 Consultation, is welcomed (90 in West Horsley, 1100 in Normandy and Flexford) I believe that the case for building on Green Belt land at all is not proven and should be rejected in entirety.
3. I object to the revised proposal that the eastern side of the West Horsley Borough is now scheduled to take an even greater proportion of new homes in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/4545  Respondent: 11015425 / David Jenne  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

West and East Horsley is also a green belt area and the Surrey Hills an Area of Outstanding Natural Beauty (AONB) and as such must be protected. As a residents of West Horsley I totally oppose the village’s removal from the Green Belt or the change in its status. The Green Belt and Countryside Study is flawed with no sound case whatsoever for justifying changes to the Green Belt boundaries laid down many years ago by national legislation. The evidence document ‘Guildford Borough Economic Strategy 2013-2014’ makes no case for siting large numbers of additional homes in West and East Horsley or neighbouring villages.

In summary I am totally opposed to the proposal of hundreds of homes on Green Belt areas in West and East Horsley and indeed the villages around including Ockham and Wisley which is a planned population growth well in excess of the Government 2014 forecasts. This would be totally out of character with the existing mix of different housing styles and layout in the village and would be unsustainable in terms of infrastructure, such as drainage, road capacity, schools, shops, parking and public transport and the supposed need for so many houses over the Plan period is not proven. Indeed, West Horsley’s own Parish Council through a 2014 Housing Survey is able to confirm a limited need for up to 20 affordable homes for local people who want to remain in the village, i.e. for young people and for elderly people wishing to downsize to smaller homes.

The additional plan to build over 2000 homes in Ockham on the former Wisley Airfield, less than 2 miles away puts an utterly unsustainable strain on the infrastructure of West and East Horsley and all the surrounding small villages, not to mention a detrimental effect on the day-to-day village life for current residents. The Plan also infringes my understanding of Government policy to protect the Green Belt and I attach a letter from Brandon Lewis MP dated, 17th February 2014 regarding Ministerial Guidance on the Green Belt. Finally, these plans are being considered before other Brownfield sites are prioritised, which are stated to be more sustainable in order to avoid the irreparable damage to the Green Belt.
The Plan is ill judged, unnecessary and unproved and will damage a Green Belt area of outstanding natural beauty and affect the lives of current residents who are already having to tolerate poor roads, lack of state school provision, congestion and poor local and council services, and poor infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/60  Respondent: 11015425 / David Jenne  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley South

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In the policy statement our village is wrongly classified as two villages, West Horsley South and West Horsley North. West Horsley’s Defined Settlement Area boundaries DO NOT need to be extended and no exceptional circumstances or justification for insetting these areas from the Green Belt have been presented. Expansion of both West and East Horsley is unsustainable with limited bus services on week days only through West Horsley it clearly means an unmanageable amount of additional cars on the road. The roads within the village are so bad that I consider them to be the worst I have driven on in the United Kingdom and are in need or urgent repair. My own and my daughter cars have been damaged by dangerous potholes and the roads will simply not be able to cope with the increased traffic that will come with the building of so many houses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/172  Respondent: 11015425 / David Jenne  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to strongly object to the proposed building of hundreds of houses in multiple estates around the villages of West and East Horsley. The proposed developments will put enormous strain on the infrastructure and the day-to-day life of the village.

The village does not have enough state school places locally for children at primary and secondary schools, with The Raleigh School in West Horsley and The Howard of Effingham School in Effingham are already well over-subscribed meaning many local children have to travel many miles to other schools outside the local area. I live in the same road as the Raleigh School and during the morning and afternoon school run it is almost impossible to gain access in, or out of Northcote Crescent because of dangerously cars park along the length of Northcote Road and Northcote Crescent. It is also
incredibly dangerous for pedestrians at those times, most of whom are small children. In addition private schools, Cranmore and Glenesk are well supported by children from West and East Horsley but also by families who travel to them every day from many miles away bringing in even more traffic to the village and the main A246 road.

The villages have small parades of shops in both West and East Horsley which are already too busy at most times during the week for parking and more houses are obviously going to make an already difficult situation impossible. West Horsley has no Post Office or Bank so residents have to go into East Horsley. Horsley station which is a main commuter line to London Waterloo is already severely busy 7 days a week with inadequate parking availability, particularly on Monday to Friday. With more residents it is impossible to see how additional parking facilities will be made available in the villages or at the station as there is no space to do so, which in turn will likely mean increased parking charges, which are already inexcusably high at the station.

The local Medical Centre in Kingston Avenue serves West and East Horsley and many villages further beyond the boundaries is already extremely busy. I regularly encounter difficulties getting appointments which is no doubt shared by other village residents and more houses are going to make this service unable to cope. The planned additional houses will also no doubt put strain on the Royal Surrey Hospital.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/910  Respondent: 11015489 / Lorraine Pipe  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/1852  Respondent: 11015489 / Lorraine Pipe  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

As a local resident in Ockham, I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to submit my objection to the proposed Local Plan for West Horsley as yet again the wishes of the residents appear to be ignored again with the extension of the settlement area boundaries.

The green belt is precious and the Horsleys should NOT be removed from this protection against inappropriate development. There are no exceptional circumstances or justification with the proposed insetting of the two parts of the village. The boundaries of West Horsley do NOT need to be extended.

The roads, drainage, schools, parking and medical facilities are already under pressure and any additional large development would put further pressure on these facilities.

In particular the enormous proposed development at Wisley airfield would totally change the villages and put roads, schools etc under impossible strain.

The green belt is precious and should be protected.

There is plenty of brown field development potential to use first without destroying the green belt and the villages

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to building 45 houses at Clockbarn Nursery. Tannery Lane is a narrow, winding road. The junction with Send Road is already hazardous for vehicles emerging to join the main road. There will already be an increase in traffic on Tannery Lane, as planning permission has previously been granted for 64 apartments to be built at the Tannery and for a Marina to be built. This little lane will not support more traffic! It would result in the junction with the main road becoming absolutely treacherous.

I request that my comments above are shown to the Planning Inspector who is responsible for deciding on the implementation of the Local Plan in respect of Send Village.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to building 400 houses and 700 square metres of industrial space at Garlick’s Arch. This land, opposite Send Marsh Road has the distinguished heritage of being ancient woodland. It is inappropriate to consider building on such land, not only because of its provenance, but also because it tends to flood. Industrial buildings, even if they are genuinely required, would be better sited at the existing Slyfield industrial estate. Guildford’s housing needs have been markedly over-estimated: no calculations as to how the supposed number of new houses required have been made available for scrutiny. This serves to further undermine Guildford Council’s position.

If new houses really did need to be built, a far more sensible approach would be to utilise brownfield sites. Once green fields and woodland have been submerged in concrete they are lost and gone forever. Not just for our generation. Not just for the time being. For generations to come. What an appalling legacy.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to a new interchange with the A3 at Burnt Common. Why? Because Send Road is already very busy, with high noise and pollution levels. Much of the traffic travelling between the A3, M25, Woking and Guildford generated by the proposed 1850 new houses at Blackwell Farm, 2000 houses at Gosden Hill, Burpham and 2000 at Wisley Airfield would go through Send. This would overload an already busy, noisy and polluted road, resulting in Send becoming gridlocked. This cannot be permitted to happen.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Local Plan Consultation

I am writing to OBJECT to the local plan in respect of Send Village. In particular:

I OBJECT to Send Village being removed from the Green Belt. The purpose of Send’s Green Belt is to prevent Woking and Guildford become one sprawling conurbation, to provide ‘breathing space’ between these two very different towns. This Green Belt was intended to be permanent, as stipulated in the National Planning Policy Framework. There are no special circumstances that permit any deviation from the original intention. In addition, local councillors and central government gave a clear election promise to protect the Green Belt. Any honourable individual worthy of public office would not break such a promise, particularly when viable alternative solutions exist.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I continue to object to the 2017 New Local Plan. Whilst the plan is extensive and covers the whole borough, I will confine my comments to those specifically relating to Gosden Hill Farm (Policy A25).

My objections are:

1. The proposed new junction off the A3 is inadequate and will have a devastating effect on traffic flows in the area:

During peak periods traffic already tails back on to the A3 even with a lengthy slip road up to the first roundabout at the junction with Great Oaks Park. The plans do not appear to allow for even a similar length slip road, let alone sufficient for the extra volumes of traffic which must be associated with the Gosden Hill development and other developments proposed in the area such as the Slyfield Area Regeneration Project (SARP). There will therefore be increased traffic queues tailing back onto the A3 which will lead to additional levels of congestion, accidents and injury on this major trunk road. The positioning of the junction nearer to the bend in the A3 will also reduce the sightlines ahead of the junction further increasing the road hazard.

1. All of the northbound traffic coming from the new development at Gosden Hill will be forced to drive into Burpham before taking the existing junction northbound. Southbound traffic for SARP will also take this new junction with consequent traffic gridlock right through the centre of Burpham.

2. Any new road infrastructure must come before the development starts. With Highways England considering its wider plans for the A3 through Guildford over the next three years it seems short sighted to include a new exit off the A3 which may have to be substantially reconfigured when Highways England's plans become clearer. Indeed, plans to install a new junction with the B2215 and A247 or a new tunnel might be prejudiced by the new Gosden Hill junction. Any development should therefore be subject to Highways England's strategic development plan.

3. The plans for a park and ride facility as part of the Gosden Hill Facility appear to have been watered down to that required by 'projected demand'. Projected by who? Demand will be created by good supply and will reduce the numbers automatically using their cars. The policy also has an apparent conflict as there is no land allocated to park and ride (deleted in first section) yet there is a requirement in the next section to provide Park and Ride, albeit in the vague terms described above.

4. We are already seeing an increase in static vehicles on the London Road with the attendant nitrogen dioxide and particulates pollution. Studies have shown the dangers to public health associated with these harmful pollutants so it is hard to understand why planning policy should include proposals which will increase their levels. Reference is made to the developer contributing to the Sustainable Movement Corridor along the A3 100 yet the plans to improve movements along the route are unclear. There is no space to widen the road to accommodate an extra lane for buses, taxis or cyclists so what is being proposed? It seems that the Eastern section of the Corridor is more aspirational than a plan (GBC update June 2016) and needs to be worked up properly for public consultation before the Local Plan is submitted for approval. The implementation timescale in Appendix C should also precede any development at Gosden Hill.

The opportunities listed include the potential to provide a through route within the site to divert the B2234 to form a more direct link to the A3. This would appear to conflict with the protection of green spaces designated by the Burpham Neighbourhood Plan and should therefore be deleted rather than usurp the authority vested in the Neighbourhood Forum.

I note that secondary educational need will now only be assessed when the planning application is 'determined', rather than when it is 'made'. I may be being pedantic, but it does seem that the need for secondary education should be established as part of the application itself. Otherwise a planning application could provide for no educational facility and be approved at which point the Council starts to think about educational provision, only to find there is no land left locally on which to build new facilities.

Hence, I believe that the wording should be changed back to 'made'. As requested by the latest consultation, I have restricted my comments above to the highlighted changes in the updated Local Plan. In no way should they be taken to mean that I agree with the appropriation of Green Belt land for development. I am implacably opposed to the development of the Green Belt and am far from convinced about the need for additional housing at the levels discussed in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the inclusion of this site because it is NEW and was not included in the regulation 18 draft and has NOT been consulted upon previously.

I object because its development for housing is inappropriate owing to its permanent Green Belt status. The Green Belt was originally proposed in 1935 to ensure space between villages and not turn into an urban sprawl. No one has the right to take this away from us – once its gone its gone for ever which will have a huge impact for our future generations.

I object on Health and Safety grounds since the subsoil of the existing landfill site contains documented unsafe landfill waste which is currently vented and monitored. Any disturbance of this waste for housing development gives rise to environmental risks (methane gas, asbestos etc). When purchasing our home in 2010 our Environmental Survey reported issues with regards to the landfill site – we experienced lengthy delays whilst consulting with Guildford Borough Council over this matter.

I object to the siting of the development because the narrow width single track country road (with no pavement) provides insufficient access, particularly with the expected increase in traffic. The road already gets blocked due to the school at the end of the road twice a day.

I object to the adverse impact on the tranquillity of the recently enlarged cemetery.

I object to the loss of wildlife habitat as the site is home to many species of bird, reptile and insect.

I object to the adverse impact on the character of the village as a desirable, pleasant place to live. The proposal to build over 400 houses will have a huge impact on the local schools, doctors and transport.

I wish my objections to be brought to the attention of the Government’s Planning Inspector.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

I object to the use of Green Belt land - this was proposed in 1935 and should not be taken away for future generations.

Despite repeated election promises to protect the Green Belt. Any new housing should be built on brown fill sites so that local facilities can cope with smaller increases. Regarding Policy A44 - Send Hill is a very narrow road with no pavements - any increase in traffic would make this very unsafe for the children attending the school at the end of the road. Also on Policy A44 - the land west of Winds Ridge and Send Hill is unsafe to build on due to landfill waste giving rise to environmental risks (methane gas, asbestos etc)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A58 – Land at Burnt Common

I object to the above policy because there is no need to build industrial developments in the middle of Green Belt when there are plenty of empty sites at Slyfield and other Guildford locations.

The extra traffic will cause gridlock to an already busy road system.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the SHMA figure set at 693 houses in the borough per annum (appendix D). This figure is unacceptably high. With almost 14,000 houses planned over a 15-yr period from 2016-2031, the number of houses is flawed. Furthermore, the model used to determine this need has so far not been shared and has been declared flawed by various sources. The population growth is not sustainable and cannot be allowed to go ahead. In Horsley, this equates to a 35% increase in housing, which is higher than in any other proposed area, and on greenbelt, disregarding planning policy advice which clearly states that greenbelt should be a constraint to development. For the reasons above, Horsley cannot sustain this level of development and the number of houses proposed MUST be revised.

Finally, the local plan is proposing 9,000 new houses on greenbelt. The NPPF requests that any change in greenbelt boundaries must demonstrate exceptional circumstances. It is not enough in the eyes of the law to state housing need as an exceptional need. As no exceptional circumstances have been stated, greenbelt boundaries should not be changed in defining the local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the SHMA figure set at 693 houses in the borough per annum (appendix D). This figure is unacceptably high. With almost 14,000 houses planned over a 15-yr period from 2016-2031, the number of houses is flawed. Furthermore, the model used to determine this need has so far not been shared and has been declared flawed by various sources. The population growth is not sustainable and cannot be allowed to go ahead. In Horsley, this equates to a 35% increase in housing, which is higher than in any other proposed area, and on greenbelt, disregarding planning policy advice which clearly states that greenbelt should be a constraint to development. For the reasons above, Horsley cannot sustain this level of development and the number of houses proposed MUST be revised.
Our villages are already at capacity and cannot support any further pressure on local roads and additional congestion from proposed development. There simply is not the infrastructure in place to accommodate the local plan as it stands and as a local resident I object to the congestion that development will cause our village (policy I 1).

In the Horsleys the roads are narrow, were not intended for modern-day wider vehicles and at capacity. Pavements are lacking and in some places roads have already become extremely dangerous. Increased numbers of cyclists and through-traffic increase the danger and additional traffic numbers would make the situation critical. The roads are littered with potholes and in a constant state of repair. Key roads currently in use which eliminate pressure of Ockham Rd will either be made one way or blocked completely, making traffic congestion on main roads untenable. 5,000+ new houses in the 5 miles between the M25 and Burpham and the increased traffic would only incur additional congestion in the Horsleys and to other areas with planned development. In addition, major roads in the area such as the M25 and A3 would have to be rerouted to accommodate major proposed development such as Wisley airfield. This in turn would impact upon pollution levels around this area, which are already above accepted EU levels.

I object to the policy to remove the Horsleys from the greenbelt. The greenbelt is extremely precious and an essential part of our environment. We have a duty to protect the greenbelt and it is unthinkable to remove our village as proposed. It is part of the character of our village and it protects cities from unrestricted urban sprawl. One of the legal purposes for green belt is to check the unrestricted sprawl of large built up areas – without green belt Horsleys would very soon merge into Clandon and ultimately Guildford. 70% of planned development is on greenbelt and ALL of the development in Horsley on greenbelt.

This policy is flawed and should have been amended. The last consultation revealed 1,322 people against this policy. The only people for green belt development are land developers and local councillors – those set to gain from the development.

I object to the local plan as the proposed development is not sustainable (Policy S1). The proposed number of houses will damage our villages, East and West Horsley in particular, and other local communities including Ockham, Ripley, Send and Clandon. The proposed development of Wisley Airfield is particularly flawed and without the necessary infrastructure in place will put unnecessary pressure on already busy roads and infrastructures in the Horsleys. A greater proportion of the proposed development – in line with need and not inflated – should be in urban areas where there is adequate and sustainable transport. The distance from Wisley to Horsley rail station would mean additional and untenable pressure on already congested roads. The 35% increase in housing planned in West Horsley is a prime example of unsustainable housing. The number and density of the proposed development far outweighs current housing and also levels proposed in other parts of the borough. Importantly, it is against policies within the National Planning Policy Framework. The number of houses MUST be balanced and revised in order to be sustainable in our villages. At present all of the development is on the green belt which is not a balanced and sustainable plan.

It seems totally wrong to embark on what is proposed before the existing transport problems have been resolved. The Council should sort what we have now before being faced with even more problems due to the implementation of further development. And where should such developments be:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Wood Street Village
My name is [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]. I wish to strongly oppose the revised Local Plan because rather than addressing the many issues we have, it exacerbates them.

First and foremost the base infrastructure we have now is totally inappropriate, that's before we have potentially an additional 1200 houses (2400 cars?) built local to the village. Every day between 7.45 am and 9 am there is a stationary queue of traffic out the front of our house, heading towards Guildford, it is practically impossible to get out of the drive. We are nearly 200 metres from Rydes Hill roundabout. The queue goes right back beyond Oak Hill. Each additional car/lorry is a problem...2400 would be a disaster.

Each year we have to have tankers parked alongside Broad Street Common draining out/relieving the sewage system which cannot cope whenever we have a prolonged spell of rainfall, we have had raw sewage on our back garden in the past......another 1200 houses to be fed into that system??

I also believe it is totally wrong that we are not shown the methodology for determining the number of houses required to be built each year, it is too important a decision to just have to accept as "an act of faith". We must be shown, in an informed way, how this number is arrived at.

Finally, I totally agree for the need to additional housing, particularly for the younger generations who cannot afford to live in their home town...outrageous. However, at the same time we do not need a huge increase in retail/commercial outlets. The planning objective in the town should be to give all those brownfield opportunities to dwellings for people to live in. To assist in providing additional homes the University of Surrey should be made to fulfil its commitment to develop campus accommodation, releasing current town centre and suburban properties, used for students, for local purchase.

I am very happy for someone to come and view the traffic situation (chronic queuing) along Broad Street from our house during normal term time...as many days as you need.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Removal of sites A46 & A47 & 10,000 additional homes within 10 mile radius of Normandy

a. General Points:
1. It is my understanding GBC Planning should be directed primarily towards the community it serves. Therefore any planning proposal should be initially filtered against whether or not there is benefit to the affected community & residents.
2. Dissolving or removing Green Belt status from any such area where previously it was believed to be justified – is not a benefit, and should be resisted. Moving “goalposts” around is unfair play.
3. Current Proposals are contrary to the GBC proud boast of “SURREY HILL’S OUTSTANDING BEAUTY”

CONGESTION

Congestion is already dreadful on this section of the A323 during peak hours, and these developments will undoubtedly result in gridlock, as (1,100 + 50 as part of 10,000) homes with the demographic of mainly young working couples with 2 children with each household having mostly 2 vehicles with adults needing cars for school run and work commute. This will give rise to approximately 21,000 additional cars (twice a day) somehow trying to thread their way into the Guildford/Aldershot directions of the A323. Resultant queues will become legendary, and stationary car fumes/pollution will affect the whole neighbourhood adversely.

“Policy G5 (8) Traffic, Parking and Design: The visual impact of traffic and associated access and parking is minimised, especially in sensitive locations”

c. NOISE

The noise of so many stationary vehicles with engines running (and often car audio systems blaring) will also impact each of the homes on the Guildford Road. Even without this development, I am unable to sit in my front garden, or to open any of the windows facing south towards the road.

d. GREEN BELT

Such developments represent a clear violation of the Green Belt Policy which is/was in operation in this area to protect our neighbourhood and to preserve its rural aspect.

“Brown Field” sites should be targeted instead.

e. SAFETY

Increased danger to children, as there will be several hundred more, all requiring access of one sort or another to the already busy A323 Guildford Road. There are currently no traffic lights or safe island crossings on my part of the Guildford Road, and so the incidence of fatalities will increase. Even if these were to be put in place, then the additional congestion would be UNTHINKABLE – making the whole scheme UNWORKABLE!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. There is inadequate schooling already and these additional dwellings would put further pressure on those in existence.

1. Medical facilities - hospitals, surgeries - cannot cope already so they will not cope with these additional residents and workers.

1. There are no pavements throughout the village of Ockham and much of the surrounding villages (e.g. Ripley, East Horsley) to accommodate safely these extra people proposed on the plan.

1. Railway station facilities for parking at Effingham Junction and East Horsley cannot cope with current demands so they will not cope with these additional numbers of cars.

1. The plan destroys the tranquil environment that we residents have had to pay very dearly to be able to enjoy so the plan is unacceptable on noise pollution levels too.

1. Our democratic right to express our feelings against this plan was put to the test and carried forward at a Council meeting, only to be overturned by Guildford Council - that is NOT democracy!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We have lived in Ockham for 35 years, adjacent to the farming land that was known as the Wisley Airfield and which now forms Policy A35 - Three Farm Meadows. We object, once again, to the inclusion of this land in the draft Local Plan on the basis of the following points:-

- Its proximity to already congested roads - A3 and M25 Junction 10 - and the current huge traffic flowing on nearby roads

- Your suggestions of public transport in the area will meet with this existing congestion and even add to it!

- Wisley RHS Gardens already attract massive visitor numbers using cars and coaches and its current extension programme is destined to attract many thousands more. This will intensify congestion

- New residents to Three Farm Meadows will have to add to road congestion to access essential employment as little is available in the local area or in the proposed development

- Your proposal to include Upton Farm in the site will negatively effect its beautiful, historic location. The same applies to the extension of the area you propose as it will negatively impact the Surrey Hills AONB

- The boundaries on the plan are incorrectly identified

- Your plan should not simply LIMIT development in FLOOD ZONES 2 & 3. You should EXCLUDE development there
• You have ignored thousands of democratic objections to the Plan and wasted tax-payers/residents’ money

• Major adjustments have been made to the Plan so that it does not conform to a Regulation 19 Consultation

• The vast housing number you agree to and we object to drives a proverbial steamroller across key restraints of green-belt, air quality, AONB and other key policies that we residents abide by

• The area around the Plan is already affected adversely by inadequate schooling, train station car parking and medical centre facilities. You plan would dramatically worsen these.

• Policy S2 refers to the Housing Target table amounting to 12,426 but your calculations are wrong as the actual sum is 9,810!

• Finally, your Plan will ruin the existing ambience and quality of life that residents have paid dearly to enjoy and uphold against the odds of your political ambitions. You will ruin many lives, compensate nobody and overturn our democratic rights, all of which you should be ashamed of if not sacked for!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
• I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
• Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
• Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It would destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **I object to Send Village being removed from the Green Belt;** this reneges on the promise from local councillors and central government to protect the Green Belt once it is gone developers will have carte blanche to build whatever and wherever they please.

1. **I object to building 45 houses at Clockbarn Nursery;** Tannery Lane is far too narrow to be able to support any further increase in traffic. Planning permission has already been granted for the old factory to be turned into flats and the marina development has also recently been approved. I regularly walk my dog down Tannery Lane and the road is a death trap at certain times of day it is too dangerous for pedestrian access. It is only a matter of time before someone is killed or seriously injured on this road; the increased traffic generated by building 45 extra houses will only exacerbate this.

1. **I object to building 400 houses and 7000 sq metres of industrial space at Garlick’s Arch;** following discussions relating from the previously submitted local plan, Send Parish Council outlined proposals for houses and industrial units to be built on the strip of land alongside the old A3, a perfect solution to both the housing and employment needs in Send, why has the council now totally disregarded this proposal. The increase in traffic will only increase noise and air pollution. I live in the centre of Send and work at Wisley Garden, I have already had to change my working hours to starting at 07:30 as my 4 mile commute was previously taking over 25 minutes because the existing traffic congestion especially at peak times is so bad. Though sadly it seems that traffic congestion even during the middle of the day in Send is ever increasing.

1. **I object to the development of 40 houses and 2 travellers’ pitches at Send Hill;** to build on this area of green belt is totally unsuitable due to the location. Send Hill is a narrow road and the increase in traffic will only make it more dangerous, with the access at Potters Lane it is single track only. The proposed site is an old land fill site which makes it unsuitable to build on. The site is also well away from the centre of the village and there are no public transport links to the shops or the medical centre. To put traveller’s sites in Send Hill would not be integrating them into the village life but further increase their sense of isolation. The site is also a haven for wildlife, being populated by deer, bats, badgers, foxes etc.

1. **I object to a new interchange with the A3 at Burnt Common;** this seems a total and unnecessary waste of time and money and will only facilitate further traffic to pass through the village. We do not need it.

Thank you for taking the time to read my objections, in principle I am not opposed to new housing projects being built in Send, but these should be on current brownfield sites and on infill areas. The Parish Council should be responsible for
granting permission to agree these smaller developments that will be more in keeping with the overall growth of the village and its facilities at a manageable level.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO the lack of immediate provision of local schools.

There is no question that the South East is overcrowded. Whilst I appreciate that this is somewhat inevitable, and refrain from pressing the blame on any one group, it is a fact. It is also a fact that, however honourable this strategy to increase housing at such a rapid rate, local schools will simply not be able to cope.

In following this strategy, you risk condemning a whole generation of local to children to inadequate education. I understand that the Local Council enjoys a Conservative majority in this Borough. As a member of the Conservative Party, I feel absolutely ashamed that you would turn your back on a central principle of the party: equal opportunity. The lack of schooling in the area will cripple the chances of the younger generation of locals.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I find myself compelled to write again to voice my opposition to the latest version of the local plan.

The specific concerns I highlight as a local resident are about the Send/Send Marsh area but nor do I support the scale of building identified elsewhere in the Local Plan as I don't accept that the only response to perceived pressure on housing is to simply keep building more homes (eg penalties could be imposed where properties are left empty for substantial periods). Accordingly, I think local governments should be pushing back to central government to the extent that quotas are imposed on local governments.
In particular, I fundamentally oppose the sacrifice of green belt land on principle. The green belt was set up by an earlier generation of politicians who understood that, without specific action, the ongoing growth of London would result in one massive suburban sprawl that would eventually destroy the character of the already overcrowded South East. As such, they clearly demonstrated a better strategic perspective than today's politicians who appear to be governed by expediency and short-termism. To sacrifice green belt because of pressure on housing is akin to taking down sea defences in case they get damaged by waves! My specific objections are as follows:

With respect to Send, Ripley & Clandon, I oppose to taking the villages out of the green belt and believe that to do so would just open the way to both Guildford and Woking becoming one unified suburban sprawl.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the sheer scale of development proposed as it is obvious that the current infrastructure would not be able to I regularly use the A3 and A247 and these roads already get jammed at peak times or when there is a traffic hold up.

To permit the scale of building proposed will fundamentally alter the nature of the

Village facilities will be stretched beyond breaking point including schools and medical

The plans are clearly against the wishes of the majority of the residents.

Elected to represent the views of local people, who are clearly against the scale of the proposed building plans, the council should be pushing back against the diktats of central government.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO the inevitable congestion on local roads as a result of this housing strategy.

Anybody who lives around Guildford would vouch for the fact that the A3 comes to a standstill several times a week, particularly around the Guildford area. To put it simply, this proposed housing strategy will cause absolutely chaos on the roads, and it is not only an ill-advised strategy as a result, but to ignore this fact would show the Local Council to be extremely naive to the problems we face in the South East.

My objections to the Draft Local Plan are as follows:

1) I OBJECT TO all erosion of the Green Belt.

A brief read of the Green Belt section on the government website highlights several crucial points and indicators for local authorities which have been established over many years, to safeguard rural areas from urban sprawl. I draw your attention to several areas in said literature:

- the government stance outlines that Green Belt's should only be encroached upon in "very special circumstances"
-such special circumstance "will not exist unless the potential harm to the Green Belt by reason of inappropriateness, and any other harm, is clearly outweighed by other considerations"

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

-exceptions include "LIMITED infilling in villages..."

Whilst these are only a few of the points I could have selected from the government's website, they act to completely invalidate the thinking behind the 2016 Draft Local Plan. It is not only completely laughable that "exceptional circumstances" should be claimed with regards to this area, but more importantly, even if such circumstances did exist, the government website clearly states that such circumstances allow for LIMITED infilling of villages. The housing proposed in the local area is by no means "limited" and will cause complete overcrowding of the area and a wholly inadequate provision of local services.

In proposing this plan, the local authority has shown a complete lack of understanding not only of the purpose of the Green Belt, but of the terms on which it was created.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO the last minute inclusion of new sites with less than two weeks notice.

The UK today is considered to be one of the world's leading democracies, and is, relatively speaking, a country of transparency and good faith. It is not good faith, however, to include elements of this local plan in this manner. I would kindly request that you familiarize yourselves with the British Constitution, and with the idea that democratically elected officials are elected on the basis of manifestos. Their election by the people is a mandate to carry out the policies within their manifesto, NOT to abuse this trust and attempt to sneak through policy "through the back door".

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In writing this email I intend to outline my objections to the 2016 Draft Local Plan. Before raising my specific objections, I wish to express my disappointment at the Local Council's stance with regards to this matter.

The role of Local Councils is to serve and represent the local area, in the interests of its inhabitants. With a greater understanding of the local area than Central Government, a Local Council is in a unique position to protect those inhabitants from policies which are not only against the interests of those inhabitants, but are also inadequately thought through, where local context may be overlooked, perhaps not in bad faith, but overlooked nonetheless, by centralized bureaucracy. Regrettably, the 2016 Draft Local Plan appears to fall in this bracket.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Clockburn Nursery (Policy A42):

The scale of the proposed development is excessive even at the previously agreed level of 45. The proposed increase to 60 would make this development even more out of keeping with the village character.

This development will create additional congestion in Send and the A247/Tannery Lane exit is not suitable for additional traffic volumes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Garlick’s Arch (Policy A43):

This potential ribbon development along the A3 will, as above, clog up already busy local roads, which are already struggling to cope with ever increasing traffic volumes.

There is widespread opposition to the excessive scale of the development proposed, which will blur the distinct village characters of Ripley and Send by making the whole area just one large dormitory.

I object to the provision of traveller plots, [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature].

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Land at Burnt Common, London Road (policy A58):

This potential ribbon development along the A3 will clog up already busy local roads and I thought had previously been rejected as a site for development. I am unsure why it is now being reconsidered.

I can only assume reference to “minimum” development is an error? Surely any planning proposal should cap development by quoting a maximum!

I am unconvinced that we need additional commercial space over and above that which would be available through the the better utilisation and managing of existing brown field sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

On principle, I reject the building on any greenbelt land. The laudable purpose of establishing the green belt was to stop the relentless sprawl of urbanisation and ribbon development and provide some secure green spaces for the enjoyment of both local residents and city dwellers. To concede this just because there is pressure on building land is like taking down flood defences in case they get damaged in future floods! It negates the vision and those who had the good sense to see the future threat to our countryside.

As such, I strongly object to the erosion of green belt land at Send by taking out of the Green Belt Send Business Park (Policy 2 at paragraph 4.3.15), developing Land at Burnt Common (Policy A58), building on Garlick’s Arch (policy A43) and building at Clockburn Nursery, Tannery Lane (Policy A42).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Send Business Park (Policy 2 at paragraph 4.3.15):

To develop this site further would be to the detriment of what is a pleasant and predominantly rural stretch of the River Wey navigation.

I often cycle use Tannery Lane as part of a recreational route I use and appreciate, therefore, just how unsuitable Tannery Lane is for Commercial Traffic being a narrow country lane with poor access at both ends.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Dear Sir/Madam,

Proposal to remove the Horsleys from the Green Belt - The "exceptional circumstances" required before taking this action have not been demonstrated.

Extension of the boundaries of the Settlement areas of the Horsleys - No sound reasons have been given for the proposed changes, which seem to be aimed solely at increasing the land available within the settlements for future additional development.

Infrastructure already overloaded - The local Schools are full. Medical facilities stretched. Drainage is inadequate, roads & car parks are overloaded with little or no scope for improvements.

Station Parade is designated a "District Centre" - This "classification" results from a complete misreading of the nature of the facilities in the village centre & would inappropriately target the area for future urban developments.

Development of over 2,000 house village at Ockham (former Wisley Airfield) - The impact on the Horsley villages of such a huge mixed housing, retail, commercial, traveller & schools development, under 2 miles away, would be enormous. The plan also includes extensive developments at Burnt Common (400 houses & commercial developments) & Gosden Hill Farm, Burpham (2000 houses & mixed use developments).

Major doubt concerning housing numbers - The inflated number of new houses proposed arises from a Strategic Housing Market Assessment (SHMA) that was generated by a consultant's mathematical model which is not revealed in the plan. Nor, apparently, to Guildford Borough Council (GBC). This SHMA target housing number is then further increased by GBC to give a population increase which is almost 70% higher than the official national estimates for population growth in
the Borough. The scale of this increase has alarming results e.g. an increase of up to 35% in existing West Horsley households - greater than any other single area in the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

17.1 OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/670   Respondent: 11023585 / Jean Walker   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

18.1 OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability and
- flaws in the method for estimating the number of homes needed to support job growth.
• It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

<tr>
<td><strong>Answer (if comment is on questions 1-7 of the questionnaire): ( )</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1. I OBJECT to Gosden Hill development being in the Local Plan The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham. No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF. The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond. Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel. The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPS16/1062  **Respondent:** 11023585 / Jean Walker  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

15.1 OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

16.1 OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

5.1 OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/2047  Respondent: 11023585 / Jean Walker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Answer (if comment is on questions 1-7 of the questionnaire): ()

7.1 OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:

Comment ID: PSLPP16/2055  Respondent: 11023585 / Jean Walker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains Travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2053  Respondent: 11023585 / Jean Walker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3 – Rural Exception Homes

I OBJECT. This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Answer (if comment is on questions 1-7 of the questionnaire): ( )

9.I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

10.I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

11.1 OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
12. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

3. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

4.1 OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1.1 OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2.1 OBJECT to the Borough Wide Strategy (Policy S2)

a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

b. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

c. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For
instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/4566  Respondent: 11023585 / Jean Walker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river
flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.
25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4568  Respondent: 11023585 / Jean Walker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to express my strongest objection to the proposed development plan in Normandy Flexoford (A46) area.

Normandy is a small village with only about 1300 houses, an additional 1100 houses will in effect double the village size which will impose enormous stress to an already very fragile infrastructure. The Wanborough railway bridge is in a very poor heath due to the existing heavy lorry traffic. It had to undertake a major emergency repair work only just over 1 year ago. We can not imagine how it can cope with double or triple the traffic if this new development were to go ahead.

The evidence to support an additional secondary school is not convincing at all. According to villagers’ own research, there are plenty spaces in schools around west of Guildford. It seems the sole purpose of this new school is to serve the A46 new development site requirements, which can not be used to justify the development proposal.

We have seen a clear statement from the Government stating that releasing land from Greenbelt for development can only be approved for exceptional circumstance. GBC’s proposal does not have any evidence to demonstrate it. There are many wild life in the village, their habitat areas have been reduced by 32 acres in the past few years. Reduced land further will impose major threats to the deer and many birds in this village.

For the above reasons, I object to the draft plan drawn up by GBC.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Normandy and Flexford
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly support the withdrawal of Policies A46 and A47, the former being the so-called ‘strategic site’ that would have added 1100 extra houses to the village that would have irretrievably destroyed the character of Normandy and Flexford and would have imposed an impossible burden on the local transport and other infrastructure. This area contributes significantly to the ‘openness’ of the Green Belt in this area, as well as being high grade agricultural land, and therefore should be fully protected for the future.

I object to the ‘insetting’ of the settlements at Flexford, Normandy, and Walden Cottages, as well as the Traveller site at Palm House Nurseries (Policy/Site A49) and the Travelling Show-people site at Whittles Drive (Policy/Site A50) as this would mean is that they were no longer part of the Green Belt and could in future be developed subject only to normal planning regulations. Both sites are rated “High Sensitivity” in the Sustainability Appraisal 2017 (Table 10.1).

In summary, the removal of sites from the Green Belt should only be done for exceptional circumstances, so I am pleased to see that the Guildford Borough Council has recognised this specifically with regard to the proposals for policies A46 & A47.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following reasons:
1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is
allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I hope that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

The New Local Plan

Objections to proposals Ref. 36, 37, 38, 39, 40, & 41

Nicholas Proctor of 12 Holmwood Close, East Horsley, Surrey KT24 6SS

I am extremely concerned about the extent of the proposals in your Local Plan as they affect our villages and the apparent attack on the Green Belt. My main objection is that your Plan will irrevocably change the character of the Horsley villages. I have lived in East Horsley for all my life and it is very understandable why it is such a sort after place to live. People are prepared to pay a premium for houses in this quiet rural setting. Other specific objections are as follows:

The dramatic rise in both houses and population of the villages by approximately 20% will overload an already stressed infrastructure. There is always a waiting period of about two weeks to get a doctor’s appointment. The local schools are oversubscribed. The Raleigh currently has about 30% of its students coming in from Effingham and Bookham. The Local Plan makes no provision in the Horsleys, as I could read, for the buildings that would be required to deliver services to new residents e.g. doctors surgery, schools, etc. The train service up to London is already over stretched in the rush hours. Often people further up the line have to wait for a later train because the carriages are completely full with people standing. This general overcrowding of the area on, roads, trains, etc. has a damaging effect on people’s wellbeing and general happiness. Although these are difficult to measure they are vitally important to the quality of people’s lives.

The effect so many more people from outside the village will have on the culture of the village. The Horsleys will become a small town. The development plans go against the protection of The Green Belt that was designed to protect rural villages and stop urban sprawl. It is extremely important for Surrey to retain its villages to make it an attractive area for people to live and visit. It is part of what makes South East England a jewel in the crown of this country.

There has been a significant rise in the volume of traffic over the last ten years or so. Very little has been done to address this issue and another 1000 cars (assuming about 2 cars per new dwelling) will be horrendous. It will also mean more potential for accidents. Many of the residents are elderly and find it difficult coping with so much traffic.

The expansion of the village has already meant that the local wildlife has suffered a loss of habitat. There are more dead animals on the roadside than there ever used to be. As a village gets more like a town there is more night time traffic which is more hazardous for the animals. This is currently before adding another 1000 or so vehicles.

If more housing is required it would seem more sensible to me to locate additional dwellings in and around the towns where those people are likely to work. This has the benefit of using existing brown field sites and cutting commuting traffic and so pollution.

Overall I believe this Local Plan is fundamentally flawed as far as the Horsleys are concerned. It might seem an easy option to build in the countryside at first but the effect on this area of outstanding natural beauty would irreparably destroy the area for the residents and the people that visit the villages.

Thank you for taking on board my objections.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
As a resident of West Horsley, I would like to record my objection to the current version of the Local Plan, as outlined on your website.

My specific concern is the number of new houses that are proposed in or around the villages of East and West Horsley resulting in an increase of up to 35% in West Horsley households. This concern stems from the following observations:

- Where is the proven demand for houses in the village, from people who need to work here?
- If none, where then would the people living in these houses work? If not locally then each household would need one or more cars to transport the occupants to work.
- Queues on the A3 northbound in the morning, from Ripley to the M25, are already severe at rush hour.
- Similarly, queues southbound on the A3 towards Guildford, and on the slip roads into the town, are also high.
- Emissions and pollution from vehicles using these stretches of road will not be reduced if more people try and use it.
- There is less than adequate existing drainage in East Lane, Ripley Lane and The Street, all of which flood when there is exceptional or heavy rainfall. Building additional houses can only reduce the capacity of the ground to absorb rainfall.
- The existing schools and medical facilities are already stretched: we experience lengthy delays in getting a routine doctor's appointment at the Medical Centre.

I have no objection to selective development on underutilised sites but value the Green Belt in which I live and would like to see it remain as such.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

• The increase to 60 homes in place of 45 homes is 33% more and too much
• It ignores all the hundreds of previous objections made by local people
• It will worsen access and traffic problems in Tannery Lane and at the A247 junction
• It will make erosion of the Green Belt in our village worse
• It will make surface water flooding, which is already bad, even worse
• It will impact open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/2167  Respondent: 11024225 / Julian Harnor  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth I
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2172  Respondent: 11024225 / Julian Harnor  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A 58 at Burnt Common because:

- It was deleted from the 2014 draft because of all the objections made previously
- The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land
- There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a hugeover allocation of 10 hectares at Send in the Green Belt
- The impact on small surrounding roads will create traffic gridlock
- It will join up existing villages and defeat the purpose of the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/656  Respondent: 11024225 / Julian Harnor  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal to inset Send Business Park from the Green Belt because:

It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
There is highly restricted vehicular access along Tannery Lane in both directions
Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID:  PSLPA16/2788  Respondent:  11024257  /  Jenny Richardson  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the Strategic Housing Market Assessment (SHMA) figure of 693 houses per annum in the borough being too high (Appendix D).

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability and flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.
- The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.
- The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5768  Respondent: 11024257 / Jenny Richardson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site.

Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community
Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport.

With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4) It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send.

Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard.

There has again been no Section 18 consultation on this.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
### Comment ID: PSLPP16/11671  Respondent: 11024257 / Jenny Richardson  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** (

I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2) Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

**Answer (if comment is on questions 1-7 of the questionnaire):** (

I OBJECT to the loss of rural employment (Policy E5) Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability.

Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF. The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.
The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day. Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development. The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London. The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3. Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

**Comment ID:** PSLPP16/11674  **Respondent:** 11024257 / Jenny Richardson  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1) Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.
I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces. Many of the affected villages, such as West Clandon, already suffer from traffic congestion.

Further development around these villages will only result in more traffic and more parking problems. With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians. The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

10. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.
Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to poor air quality concerns (Policy P3)
Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2).

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11666  Respondent: 11024257 / Jenny Richardson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon.

The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I OBJECT to the Borough Wide Strategy (Policy S2)

a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

b. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

c. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.
The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2039  Respondent: 11024289 / Robert Manley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to voice my objections to the building of an unacceptably large number of new homes which Guildford Borough Council's draft local plan proposes to sanction in the parishes of East and West Horsley.

In 2014 a previous draft plan proposed to remove the green belt status which the two villages enjoy.

It was abolished after central government intervened to make it clear that green belt status could only be taken away from a village if "exceptional circumstances" could be established to justify doing so. To my knowledge no "exceptional circumstances" have ever been established and yet the new plan again attempts to remove the Horsleys' green belt status and facilitate the building of almost 600 properties in the villages immediately, followed by an unspecified and unlimited number of additional houses or flats thereafter.

600 is a very large number of extra properties for the two villages and, if built, would put great pressure on the limited amenities we currently enjoy (doctors and dentists surgeries, school places and the provision for care for the elderly etc.) That situation would be further exacerbated by the 2000 houses proposed for Wisley airfield just a couple of miles distant.

The villages lack the infrastructure to cater for so many new residents. Yet if more roads are built or widened and fields concreted over, the rural character of our community will be lost. In effect the plan's proposals put the cart before the horse by first removing the green belt status and then cramming in sufficient development to justify having removed it.

Finally, I seriously doubt that Guildford Borough Council can point to where, over the whole of Surrey, the new residents would find enough jobs to meet their needs. And even if they could all find work in London travelling there is very expensive. There is therefore a real danger that many new residents will discover that there is no work for them locally but that anything they can find in London does not pay enough to meet cost of travel to get to it. They would be marooned.

I believe that the local plan arises from a requirement placed on local authorities by central government to get more homes built to meet a national shortage. The objective is right but in my submission it is a mistake to build so many homes in areas such as the Horsleys which lack both infrastructure and employment. To do so would prove highly detrimental both to the new residents the existing community.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to the proposal to build a large amount of houses on site A43 due to the land being Green Belt and also the affect it would have on the already overstretched infrastructure.

Also I object to a new junction with the A3 because it would create a new through route to Woking through Send, which is already very congested at certain times.

Also These major changes to the original plan need a full consultation.

Please make my comment available to the inspector

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the land around St Bedes school being taken out of green belt land as this would mean an opportunity for developers to move in.

The land should be returned to land for everyone to use.

I would like my comments to be seen by the planning inspector.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1385  Respondent: 11024385 / Alison and Peter Parrott  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to a42 on the grounds that the amount of houses was already to much for the area and it has been increased. the roads and access is simply not good enough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to a43 because this is a massive over development of send and the green belt. Also the gap between Ripley and Send would be closed defeating the object of green belt land

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to a58 because the industrial sites that are available in the Guilford area are not being used. Also the extra traffic would cause major problems around Send

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the policy of inserting send business park from green belt because the access is very restricted in Tannery lane and an increase of development would only increase traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/975  Respondent: 11024641 / Penny Caswell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to removal of Send from the green belt, I feel there are enough empty buildings in Guildford & Woking town, that have been empty for many years, if you really need more houses please use your existing buildings and leave our lovely green countryside.

I object to the proposed interchange onto the a3 at burnt common this would be a nightmare with traffic being gridlock on the A247 where we will have 2 schools and there is no safe crossing by this school for our children, who a lot do walk to school.

I strongly object to more houses being built as we do not have the infrastructure for our schools, already they is not enough secondary school places for the children in the village with the house we already have???? where will they go????????

I object to all proposed sites in send as they were not included in the previous 2014 consultation. Green belt is meant to be permanent & not continually eroded

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I wish to object to the local plan.

I support the valid reasons given to you by the Guildford Residents Associations. Primarily it should not be considered without the infrastructure to support it

It appears that this is not being considered in conjunction with a plan for the centre of Guildford. This cannot be right.

Guildford is becoming a nightmare.

I hope common sense will prevail.

Please register my objections.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/878  Respondent: 11024673 / Margaret Nicol  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object to the proposals contained in the "final" local plan for Guildford Borough. In view of flawed new evidence Guildford's proposal for more than 12,426 homes (plus a buffer of 1,155 homes) is excessive and will result in needless loss of Green Belt and increased congestion.

I feel it is important to sort out the infrastructure first, then consider housing expansion. The infrastructure cannot cope with the existing population so it does not seem possible that it could cope with expansion of 20-25%.

Roads are already congested and frequently grid-locked. Expansion of the housing stock will not sort out the problem. I moved to Guildford in 1951 when it was a delightful market town. There have been too many changes which have sadly damaged it. Careful thought needs to be given before any further expansion is made.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the detrimental impact on transport, local roads and road safety. The proposed development of 2,068 homes would result in an estimated 4,000 additional vehicles. This will hugely increase congestion, particularly at peak times, on the narrow rural roads in Ripley, Ockham and the Horsley, and will only be exacerbated by the increase in wide vehicles including increased bus and HGV traffic.

This fundamentally contradicts the plan’s assertion that the development will encourage more cyclists and pedestrians. One heavy rainfall is all it takes to cause drainage to overflow and local roads to flood. These roads were built for minimum traffic and most don’t have pavements are badly lit and there is certainly no room for expansion to include any purpose built cycle lanes or designated cycle routes.

The A3 and the M25 are hugely congested at rush hour in the very area the plan proposes to build this substantial number of dwellings. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

The problem is further exacerbated by the lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

I trust that these objections will be fully considered.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking without substantial investment in cycle lanes and pathways as well as pavements. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional vehicles. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV traffic. This fundamentally contradicts the plan’s assertion that the development will encourage more cyclists and pedestrians. The danger this traffic will be to local cyclists and pedestrians is obvious to all who live in the area, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them). The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25.

Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

I object to the disproportionate allocation of housing in this particular part of the borough. Over 23% of the plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys. These are small villages with distinct character and do not have the infrastructure to support the massive increase in dwellings.

I also object to the Local Plans proposal for 400 dwellings in West Horsley.

There is still a flagrant disregard of Green Belt land that was introduced to stop urban sprawl. The reduction in the number of homes proposed in the Green Belt initially is a good thing but it does not go far enough.
There appears to be no change to Guildford’s projected housing growth of almost 25% by 2035. The Office of National Statistics is almost 50% less for the same period, yet figures based on this huge discrepancy surely cannot be justified for development of this size.

I object to no changes being proposed since the 2016 Consultation to insetting West and East Horsley from the Green Belt. There is need for new dwellings but on a much more considered approach that is in line with the Parish Council’s development plans and sympathetic to the current infrastructure and feel of the villages.

Nothing has been proposed since last year’s Consultation to improve the sustainability of the West Horsley development sites and thus meet National policy requirements.

The existing infrastructure is stretched under current demand for its services. The local primary and secondary schools have had plans for necessary rejected, the run off for sewage and drainage is low meaning localised flooding occurs in extended rainy periods and sewage pipes get blocked.

Local train station carparks are full at peak times and buses and other large vehicles travelling east through the village stop the traffic due to lack of room for cars to pass the same stretch of road.

</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

The proposal is based on flawed details particularly regarding transport to train stations and the small roads, ill suited to a development of this size. Clandon has an A road through it, Ockham is adjacent to two huge roads that are already severely congested with smaller artery roads of very poor quality and poorly lit. Of all the proposals for a large development it is the least sustainable strategic site identified by the Council because of the constraints on the site and the physical location.

It is also further away from rail stations than any other considered site and uses ‘as the crow flies’ distances rather than distance by road. It is also important to point out that whenever a bus goes through Horsley towards Horsley Towers that any cars passing on the other carriage way often either have to stop or mount the pavement to allow space to pass, severely impacting local safety to residents and drivers.

There is not enough employment opportunities on the site meaning the majority of those working will have to drive to reach their destination or to the local stations. The M25 at this junction is one of the busiest in the country and the A3 is also severely congested at this point during rush hour. A development so close to this area will only exacerbate what is already a severe traffic problem.

There seems to be a disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels. Studies from bodies such as the World Health Organisation clearly outline issues in children’s development in particular in areas of poor air pollution.
There are also numerous inaccuracies. For example in S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound and its assumptions flawed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to lodge my strongest opposition to the totally disproportionate and wholly unjustified Guildford Borough Council's plans to dramatically increase the population size of West Horsley village.

To increase a village population by in excess of 30% without any thought to the infrastructure and the additional strain placed on already strained local services, roads, schools/education, transport, drainage is outrageous!

The impact of 450+ new homes and circa 900 additional cars that will be aded to the village roads, will seriously change the character of the village and will put lives at risk, whether this is local children who cycle or walk to School or the many hundreds of cyclists who use these Country roads as part of their regular road training route.

Numerous surveys conducted by parish council and local groups show a need and tolerance for no more than 50 - 100 new homes. Such numbers could be accommodated in around and within existing housing areas and if planned and executed sensitively, will have hopefully minimal impact on the character and practical functioning of the village.

Please reconsider your proposal for 450+ new homes in West Horsley and take a more measured approach in line with feedback expressed by the existing residents.

The people of West Horsley are not being unreasonable. We understand that some increase in housing stock is needed, as current residents wish to stay on in the village and new and young people wish to join our community. However, to increase the population of West Horsley by the numbers of people and cars you propose would destroy the character and effective functioning of the village for both existing and future residents.

The state of the existing roads is testament to the fact that insufficient funds have been made available for many years on repairing potholes and or sorting out the continual flooding and surface water drainage issues. Increasing the housing by the ridiculous numbers proposed will see an already creaking infrastructure crumble and fall apart completely!

I sincerely hope that you will reconsider your proposals as they stand and that we can arrive at numbers which the West Horsley residents can embrace as a positive outcome for an organically evolving village.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Whilst I appreciate some small developments are required, I would like to object to extent of the development proposals on the following grounds:

With respect to all sites in the village of Send and close proximity (A25, A35, A42, A43, A43a, A44) Send village is already undergoing considerable change, with the redevelopment of Vision Engineering’s site. Surely this large development should be completed to allow the impact on the village be assessed before other large developments are approved? In addition, developers are routinely purchasing single properties and replacing them with multiple dwellings.

The layout of Send village does not allow for the existing arterial roads to be widened to allow, in a lot of cases, for roads to be comfortable 2-way roads. A lot of the roads are not full width, often requiring vehicles to take it in turns in passing. Increasing traffic exacerbates this issue potentially making drivers to take unnecessary risks. Currently, a number of the roads are often used by large vehicles that are not suitable for the narrower roads causing unnecessary risks to all other road users. Except for the through road through the Send village and Send Marsh, the majority of roads are not lit and do not have pavements discouraging residents to walk short distances rather than use a car adding to the congestion.

I object to Send village being removed from the Green Belt. The green belt is to provide a buffer between Send village becoming joined to Guildford and Woking. Send Village would be at risk in losing its village identity.

I object to the Local Plan due to the village would be impacted on for years to come if planning permission was granted. Local existing neighbours would also be disturbed for years during the construction. Local amenities would also be put under unnecessary demand and pressure as outlined below:

Community facilities

- These developments will put additional pressures on existing facilities including the education facilities and medical facilities which are already stretched.
- Groups and clubs held for all ages will be stretched, and in some cases may not be suitable to accommodate the additional demand.
- The children’s recreation facilities are located directly next to Send Road. Any increase in the traffic on this road will directly increase the pollution exposure to those using the recreation facilities.
Utilities

- Additional demands on the currently stretched telecommunications, resulting at times, in intermittent internet services.
- Additional demands on existing utilities such as water, gas, electricity, sewage which may also lead to intermittent services.

Traffic

- Damage only collisions have been observed with vehicles using Tannery Lane cross roads junction and the signalised cross road with Send Marsh Road. The developments in the area will further increase the risk of additional collisions.
- During the rush hours, traffic is already heavily congested throughout village especially at the junctions and on the approaches to the roundabouts at either end of the village.
- Additional pressures on the already over stretched local transport network especially the A247 increasing the pollution, congestion.
- Additional pressures on parking in the village and surrounding area
- The only public transport (buses) serving for the residents of Send has experienced cuts in the last bus review. The bus service does not run at sensible frequencies and at times to allow commuting and linking in with adjacent public transport facilities such as the train stations in Guildford and Woking. Surely by reviewing and improving this service would increase patronage to make the service self-funded and reduce traffic on the already heavily congested local roads.
- Link roads surrounding the village such as Send Hill, Potters Lane, Tannery Lane, Wharf Lane, and Papercourt Lane are not wide enough to accommodate two-way traffic flow safely and are often used by large agricultural equipment accessing adjacent land. This is further exacerbated in residential areas where additional vehicles may be parked on the road side or undertaking unexpected manoeuvres accessing properties.
- Congestion and narrow lanes with increased traffic flows may unnecessarily delay already over stretched emergency services.
- Limited footway facilities for non-motorised users to access the development sites and community facilities increasing the risk of collisions
- Limited cycle facilities to access adjacent towns and community facilities forcing cyclists to share narrow road space with motor vehicles. Often causing risk to both parties with drivers trying to pass cyclists on blind corners.
- Any incidents on the surrounding A3, especially the northbound forces an increased traffic flow through the village. Especially when closures are implemented, something that is happening with increased frequency. This brings the entire village to grid lock.
- The increased traffic flow on Send Road would be likely to necessitate the roads parking restrictions increasing. This would directly affect existing local resident and businesses.
- The A3 section between Burnt Common and M25 already has a bad safety record and is subject to regular highly disruptive congestion. The increased traffic volumes, particularly using the A3 is likely to increase the use of the Potters Lane junction with the A3. This is likely to directly affect the safety of this section and risk increasing disruption through increased incidents.

Retail

- Insufficient retail facilities are provided for the village. Increasing the number of dwellings further will put further demand on them. Residents currently are required to either travel to a supermarket in adjacent towns or rely on deliveries.

Environment

- Flooding is a regular occurrence in the area especially recently during the winter months in 2013. Draining flood water is limited in already saturated areas. Building on these areas increases further flooding through restricting permeable surfaces to drain excessive rainwater.
- Increased pollution through additional traffic and construction

Crime and Public Safety:
• The village already suffers from regular targeting by travelling criminality. Growth of the village will only serve to make it an increased target for such.
• The growth both in residential and commercial will put more strain on existing emergency services. The associated increased congestion would only serve to make their response targets harder to achieve and as such putting residents and public safety at direct risk.
• No reference appears to be made to any consultation with any services around counteract these risk.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

A35 Land at former Wisley airefield, Ockham

• The local adjoining roads do not have sufficient capacity (especially at rush hour) to take additional traffic that would be generated by this development.
• Public transport is not sufficient meeting demand of potential additional passengers to encourage vehicles to be left at home to undertake local journeys.
A42 Clockbarn Nursery, Tannery Lane, Send

- The access to the site is not adequate for regular traffic and the potential volumes during construction and after construction.
- Tannery Lane is unlit and is far too narrow and bendy for 2-way traffic without footpaths, especially with the other planning permission granted for 64 apartments and a Marina further along Tannery Lane.
- The junctions joining adjacent roads are also not sufficient to take additional traffic regularly.
- The local adjoining roads do not have sufficient capacity (especially at rush hour) to take additional traffic that would be generated by this development.
- The risk of the land flooding putting housing in this area at risk and displacing the risk to adjacent existing housing unnecessarily.
- Public transport is not sufficient meeting demand of potential additional passengers to encourage vehicles to be left at home to undertake local journeys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
A43 Land at Garlick’s Arch, Send

- The land is floodplain for Clandon Stream, putting housing in this area at risk of flooding as well as housing further up and down stream due to no replacement floodplain being provided.
- Area of ancient woodland and associated wildlife will be impacted on by the developments.
- The local adjoining roads do not have sufficient capacity (especially at rush hour) to take additional traffic that would be generated by this development.
- The proposed industrial usage is not required. There are currently empty units next to the existing industrial area and the nearby Slyfield industrial estate.
- Public transport is not sufficient meeting demand of potential additional passengers to encourage vehicles to be left at home to undertake local journeys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/7346  Respondent: 11027137 / I Pennells  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

A43a Land for new slip roads to / from A3

- The local adjoining roads do not have sufficient capacity (especially at rush hour) to take additional traffic.
- The A3 is already stationary especially northbound during the morning rush hour. Providing another northbound slip road would attract additional traffic to the area attempting to join the A3 without success. Currently vehicles are often observed exiting the A3 at Burnt Common and queuing through Ripley before re-joining the A3 ahead of the queue.
- Burnt Common roundabout is already a bottle neck for traffic especially in the morning rush hour, often taking 10-15 minutes in the morning to cross the roundabout from Send village. Additional traffic would exacerbate this delay further increasing pollution and traffic noise.
- This section of the A3 has been highlighted as an area of high collision rates without creating a further risk of additional slip roads in close proximity to the slip roads accessing Burpham and Ripley Services.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7347  Respondent: 11027137 / I Pennells  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44
A44 Land west of Winds Ridge, Send Hill, Send

- Send Hill is unlit and is too narrow and bendy for 2-way traffic without footpaths.
- The local adjoining roads do not have sufficient capacity (especially at rush hour) to take additional traffic that would be generated by this development.
- The approach to Potters Lane is not wide enough, bendy, and is on a gradient causing problems vehicles to pass safely without reversing around bends at times blind to other approaching vehicles.
- The school bus for George Abbott School operates along the road and is often observed struggling to pass vehicles parked on the road. This would be worse if this development was given the go-ahead.
- The land is currently regularly used local amenity where a number of footpaths meet, making it a desirable walking route.
- The subsoil of the proposed site contains documented unsafe landfill waste registered at GBC.
- This site is regularly monitored by permanent monitoring equipment. Surely by disturbing this site puts local residents health at risk by the unknown materials located in this landfill. Methane gas is one of the elements monitored regularly.
- To provide the proposed housing quantities the provision would not be in keeping with the surrounding area.
- The access to the site is not adequate for regular traffic and the potential volumes during construction and after construction.
- Such a high number of housing in an area with poor public transport and non-motorised user facilities increases the risk of vehicles accessing these properties being displaced parking on an already narrow Send Hill. This is issue would be further exacerbated at school times when school traffic parks solidly half way up Send Hill.
- Development in this location would impact on the local remaining countryside including nature reserve and waterway.
- Public transport is not sufficient meeting demand of potential additional passengers to encourage vehicles to be left at home to undertake local journeys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I was born in Guildford, as were my parents and all four Grandparents.
I am appalled at the new local plan and wish to object to it in the strongest possible terms.
The amount of proposed Greenbelt land to be given up for development is scandalous and clearly against the wishes of the vast majority who live and work in the Borough.
I strongly urge the council to reconsider this part of the plan and to prioritise Brown field land for both residential and commercial development.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to register my sincere objection to proposed building on Greenbelt land within the Borough.

It is supposed to be protected as a matter of National and Local policy and at a time of perceived pressure to build new homes, its purpose of preventing urban sprawl is more important than ever.

Furthermore, it seems that Brownfield sites within the Borough are sufficient to provide all reasonable housing needs.

Attached documents:

Comment ID: PSLPA16/2155  Respondent: 11027265 / Jonathan Ingram  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the proposals in the Draft Local Plan for the following reasons:

I live in East Horsley and find the roads to be very dangerous with even the current amount of traffic let alone if we get more traffic due to the increased population in Horsley and the surrounding areas. I notice there is a development proposal at the Thatchers Hotel on the Guildford Road East Horsley. This area of road is particularly dangerous as it has a blind corner and a sharp bend and many people having to turn right out of Ockham Road South onto it, all within the space of about 50 metres.

I object to all the proposals at the sites in West Horsley and East Horsley for the reasons of the local transport infrastructure simply not being able to cope with the huge demand the increased numbers of population will place upon them. In particular the stretch of the A3 from the M25 junction at Ockham past Wisley, past Burpham and all the way along to Guildford experiences many collisions. A new junction will increase numbers of traffic on this dangerous road.

In addition as a daily commuter into London from Horsley station I do not see how this small village station can cope with the increased demand from literally potentially thousands of extra commuters every morning and every evening travelling to and from the proposed sites in The Horsleys and at Wisley Airfield Ockham. The new Guildford Local Plan states expressly that regarding Effingham Junction station it is “not considered sequentially preferable or sustainable to direct office development to these locations”. See extract below. If it is not considered an adequate station where will the commuters residing at and office workers working in Wisley Airfield Ockham get the train to and from? Surely not Horsley as this will be having to cope with extra commuters from the 535 proposed new homes in the Horsleys.

4.4.17 For the purposes of the sequential assessment the train stations at Clandon, Chilworth, Gomshall, Shalford and Effingham Junction, will not be considered to be transport interchanges because of their locations within the Green Belt, AONB or the isolated nature of the station away from the village or centre. We do not consider that it is sequentially preferable or sustainable to direct office development to these locations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2866  Respondent: 11027457 / Nigel Austin  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt, which needs to be regrown on protected brownfield land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsley's (of which 65% is allocated to FWA/TFM, an area that at present has only 3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road infrastructure. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

1. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see
both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd.'s (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the local Plan with immediate effect.

Having lived in Normandy since 1957, moving here with my husband and bringing up our two children in the village I am outraged that the beautiful fields between Westwood lane and Glaziers lane are proposed to be built on.

I don’t think you have considered the impact on the local area. I live on Westwood lane and know how busy the road is today the thought of 1000+ houses and a school built and more traffic to the village. That is without traffic from the expanding neighbouring villages. It would be impossible for those who live in the village. The road has a narrow railway bridge that could not be widened without the removal of nearby properties. Glaziers lane is much the same. I have enjoyed living in this rural village for nearly 60 years.

Has anyone considered the flood risks to the area and building on all this beautiful Green belt land. I and my family have enjoyed living in the village of Normandy this unjustified development of housing and large school would threaten the wildlife and landscape. This would be detrimental to my health and wellbeing.

Comments specific to Horsley Villages area

As a resident of the Horsley Villages (I specifically use this description since, despite the language and descriptions used in the Plan, it is very difficult to overstate how closely East and West Horsley are connected and interdependent on each other, a point which is not fully recognised in the documentation) my comments largely relate to the policies in the plan which would affect this area.

I am aware that there is a general pressure for new housing stock to meet many different needs and supporting facilities. National planning guidance advises that villages should only be included in the green belt if the open character of the village makes a contribution to the openness of the green belt. West Horsley clearly has a different character to East Horsley and it should continue to be ‘washed over’ by the Greenbelt. With regard to East Horsley I appreciate that the ‘open character’ is less obvious, however whilst removing the green belt wash over for East Horsley within the existing settlement boundary might be one way of contributing to the additional housing required I think the addition of several areas specifically for development (by way of an amended settlement boundary and specific designation of these areas for development) will so radically change the nature of the village that this cannot be what is envisaged by a simple removal from the green belt wash over. Also I cannot accept that all of sites identified for development in East and West Horsley need to be included in the plan. Whilst it is true that the plan is intended to cover a long timeframe, and not all development would take place at one time, GBC will be making decisions which in the longer run would irrevocably change the character of the Horsley area if the plan were to be implemented as it is currently drafted.

The inclusion of all the areas identified would also put intolerable pressure on existing local facilities. I am sure GBC will be getting plenty of feedback from other Horsley residents, which I would also echo, to say that the primary school, health and parking facilities within the East and West Horsley area are already operating at capacity. There is no mention of including additional primary schools or health centres in the potential usage of these sites – the addition of the proposed housing density across all these sites with no such additional provision of school places or health care is bordering on the irresponsible and dangerous, and would indicate that GBC whilst obsessed with planning for housing has not rationally considered its other duties to the residents of the borough.

I quote from my previous letter in the consultation period

“At present the descriptions of the possibly uses for the areas in West Horsley only relate to housing and do not include uses for public facilities such as schools and health resources, surely this cannot be right? The consultation document at a general level indicates that appropriate resources would be approved in planning terms in the future, but I feel if an area of land were to be approved for use in a public way such as this, then it should be being brought forward for consultation now. In the Horsley area it is clear new health facilities and a new primary school facility at the very least would be needed if all the areas were adopted.”

As I say, no attempt has been made to address these points in the published draft plan and I feel GBC has failed in its duty to East and West Horsley residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Wisley Airfield

The inclusion of the Wisley Airfield site for development in the final draft plan does not seem to have had any impact on the number of areas included in East and West Horsley. I cannot follow this reasoning; clearly the Wisley Airfield development would have a significant impact on East and West Horsley, even given the provision of an additional doctors surgery and primary school at the Wisley site. There would in particular be increased traffic on the local roads. I cannot believe that the GBC has looked at the width of the Ockham Road North and South and considered the issues of increased construction traffic if all sites are developed and the general increased car usage going forward; the new denizens of Wisley will not stay in the new development for all their shopping, work transport and leisure needs and account must be taken of the additional impact on East and West Horsley. I do not think the new draft plan as it stands reflects this and so is defective. If the number of sites for development in Horsley had been reduced in consideration of the Wisley site being included it would have shown GBC applying some type of rational balance.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Insetting of East and West Horsley

I made the point in my original letter that the ‘insetting’ of certain villages, instead of them being ‘washed over’ by the Green Belt, and changes to the Settlement Boundaries of certain villages, were major and important changes that could significantly impact the future of the villages concerned and I still believe that there was not sufficient prominence given to this issue in the Issues and Options document and so the consultation process was therefore flawed and so the present new Proposed Submission Local Plan cannot be relied upon as a result.

The traffic situation in Send is already ridiculously high and as a result I object to the proposal for a new interchange with the A3 at burnt common. The village simply cannot handle an increased level of traffic which such proposal would bring. The whole village would become gridlocked and impossible for those families living here.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Following the recent plans I am writing to object to a number of the proposals listed.

I deeply object to the proposal for the Send Green Belt to be removed. As far as I was aware central government and local councillors gave clear election promise that this land would be protected. Loss of this land will mean developers will be quick to take advantage and this is something that certainly needs to be avoided. This belt provides a buffer between Woking and Guildford which prevents it from becoming one conurbation.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have 4 key reasons for objecting to these plans:

I OBJECT TO THE LACK OF SOUND EVIDENCE BEHIND THE LOCAL PLAN

- I OBJECT to the proposal to build 4,485 new homes as planned in the policies listed above. Housing numbers from the Strategic Housing Market Assessment 2015 (SHMA) are highly dubious. These include an inflated number of foreign students and an unsubstantiated demand for new homes within the local area. This is even before the EU referendum result, which will inevitably impact on demand for housing in the area.
- I OBJECT to the lack of transparency in justifying the requirement for both new homes and the industrial developments. There has been no public scrutiny of the SHMA and even local councillors and Parish Councillors have not been able to review the numbers. In fact, the SHMA model has been calculated by a contractor on
behalf of GBC and that the resultant commercial sensitivity of this data prohibits wider review. This lack of transparency builds mistrust in the basis for the GBC numbers and suggests that they may be based on unrealistic data.

- **I OBJECT** to the inflated demand for housing in Send and Ripley. The total of 13,860 houses in the local plan is exaggerated. Even with a population growth of 20,000 in the plan period, based on a supposition of 2.5 people per home, the number should be no more than 8000. This suggests that GBC are intending that the Borough will be building homes to meet the need of other areas, such as Woking. Rather than destroying the Greenbelt, other brownfield sites should be sought in urban areas, even if they are outside the Borough. If not, Send and Ripley will become a conurbation of Woking and Guildford.

**I OBJECT** to the Guildford draft plan and its impact on the villages of Send and Ripley. In particular I object to plans a25, A35, A42, A43, A43a, and A44. There are many reasons for objecting to each plan individually, but in fact they should be considered as one entity since they will have a detrimental effect on the villages in their entirety.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

**I OBJECT TO THE IMPACT ON THE INFRASTRUCTURE AROUND THE VILLAGES**

- **I OBJECT** to the impact of the Local plan on the local infrastructure. The roads around Send and Ripley are already congested and cannot cope with the current needs. The Local Plan does not incorporate a detailed transport infrastructure strategy that would demonstrate how the road network would support the additional pressure on the roads and other amenities if the proposed development went ahead. The plans to improve the A3 are years off (2025 – 30) and, even if they were implemented, would be preceded by years of gridlock on the
local roads. Plans to improve local roads (ref LRN20, specifically Send Road and Send Barns Lane) through an investment of £1.5m will be woefully inadequate to cope with the increased traffic.

Additionally, increased traffic through the villages will increase the hazards along the main roads, particularly pedestrians, especially children (using the Send School or catching buses to Guildford schools) and the increasing number of cyclists. This will be exacerbated by HGVs accessing the planned industrial units at Garlick’s Arch.

- **I OBJECT** to Policy A43a (Land for North facing slip roads to/from A3 at send Marsh/Burnt Common) This would necessitate a 4-way junction at Burnt Common and would inevitably increase the amount of traffic using the local roads in Send. This junction would worsen the problem of drivers using Send as a cut through from Guildford to Woking on local roads that are just not intended for this purpose. As a resident, I am amazed that there hasn’t yet been a serious accident as drivers use Potters Lane for just this purpose with little regard for the 30mph speed limit.

- **I OBJECT** to the proposed development of Gosden Hill Farm (Policy A25) and its inevitable impact on the roads around Send. Despite assurances of an additional railway station, commuters will utilise the opportunity to leave the A3 at the existing Burnt Common roundabout and travel on the faster Woking to Waterloo line, rather than use the slower Guildford line.

- **I OBJECT** to the proposed developments opposite Winds Ridge (policy A44) and Clockbarn Nursery (policy A42) due to the impact that the additional traffic will have on small local roads. The first of these will increase the traffic leaving Send Hill onto Potters Lane at what is already a dangerous junction on very narrow lanes. Meanwhile, Send Road is already frequently blocked by HGVs trying to turn into Tannery Lane; this can only be made worse by additional traffic using the same road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT TO THE IMPACT ON THE GREENBELT STATUS OF THE VILLAGES

- **I OBJECT** to GBC’s plan to remove Send and Ripley from the Greenbelt. The precious Greenbelt is not just a ‘nice to have’, but is an inalienable public good including space for rural leisure and tourism activities, flood control and benefits to public health. Once the greenbelt is built on, it will never be reinstated. The Local Plan seems to be prepared to ‘ride rough shod’ over the Greenbelt, even to the extent of losing ancient woodland at Garlick’s Arch.

- **I OBJECT** to GBC’s plans to allow ‘insetting’ the villages from the Greenbelt and infilling within village boundaries. This will erode the pockets of Greenfield sites around Send and Ripley and will result in an urban sprawl, effectively linking Woking and Guildford. I understand, and support, the appropriate use of brown field sites to build additional housing as required for the local population. However, the Local Plan appears to be taking the easy and cheaper option, of eroding Greenbelt, rather than actively searching for opportunities within urban Guildford where the infrastructure is already in place to support the resultant increase in population.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT TO THE FACT THAT GBC HAVE NOT FOLLOWED THE CORRECT PROCESS

• I OBJECT to GBC adding Garlick’s Arch to the plan at only 13 days before the 24th May discussion of the Local Plan by GBC. The fact that this was ‘last minute’ was admitted by Mr Spooner at the Send Parish Council Meeting on June 14th. This site presents a significant change to the regulation 18 consultation in 2014, and therefore should have been fully debated, rather than accepted through a shortcut of Regulation 19. The fact that GBC have been ‘gifted’ the land to build the slip road to the A3 (policy A43a) in return for the inclusion Garlick’s Arch leads to cynicism and doubt that due process is being followed.

• I OBJECT to the disregard that GBC have shown to the concerns of local residents through previous ‘consultation’ processes which suggests that this one will be no different. Since 2014 GBC have changed every major site in Send proposed for development and now want to add a massive new road junction. The 2014 proposal for 430 houses went down in April 2016 to 185 and has now gone up to 485. This is in spite of a huge amount of effort by local residents to give the requested feedback to the previous plan. Naturally people are tired of repeating the same objections on seemingly deaf ears, but GBC should not conclude that the proposals have public support.

Overall, I OBJECT to the Local Plan. I would like these comments to be seen and considered by a planning inspector.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I have been a resident in Send for over 20 years and have seen how strongly local people feel about the proposed changes to our village. This included raising a large proportion of the objections to the previous plan as well as electing two Borough Councillors who primary objective is to save Send’s Greenbelt status. However, it appears that none of these objections have been taken into account at all. If anything Send seems to have been unfairly penalised for this activity with the inclusion of even more development in the latest version of the plan, making things even worse for our village.

Overall the proposed changes will have a huge detrimental effect, with particular impact on traffic and other facilities, in addition to the removal of the irreplaceable Greenbelt protection that parts of our village enjoy. I have detailed my objections to specific policies below, but having drawn a - somewhat rudimentary- map of all the proposed development the impact of the changes can be seen in their entirety (See attachment) This map does not illustrate the additional impact on traffic and other infrastructure from other proposed developments such as Gosden Hill, which will compound the issues with local roads and other facilities which are struggling to cope with the local population as it is. In addition, there appears to have been minimal effort to development existing brownfield sites in and around Guildford. This is evidenced by recent redevelopment of land such as the old Fire station and the Waitrose in the centre of Town. Both these sites, and many others, could have been used for residential development instead of more retail space, with far less impact on the local infrastructure and none of the Greenbelt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Clockbarn Nursery, Tannery Lane, Policy A42

Now 60 homes in place of 45 homes previously

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The increase to 60 homes in place of 45 homes is 33% more and too much]
- It will worsen access and traffic problems in Tannery Lane and at the A247 junction
- It will make erosion of the Green Belt in our village worse
- It will make surface water flooding, which is already bad, even worse
- It will impact open countryside views from the River Wey Navigation

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Garlick’s Arch, Send Marsh, Policy A43.

Now 400 homes and 6 Travelling Showpeople plots

I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth I
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Burnt Common, London Road, Policy A58.

Now a new allocation for a minimum of 7,000 sq m of industrial or warehousing

I object to Policy A 58 at Burnt Common because:

- It was deleted from the 2014 draft because of all the objections made previously
- The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land.
- There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt
- The impact on small surrounding roads will create traffic gridlock
- It will join up existing villages and defeat the purpose of the Green Belt

Green Belt, Policy 2 at paragraph 4.3.15

Send Business Park now taken out of the Green Belt altogether

I object to the proposal to inset Send Business Park from the Green Belt because:

• With the new Marina planned on the Wey navigation, removal of this area will facilitate the total erosion of the greenbelt in this area through the infill of further buildings in the future.
• It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
• There is highly restricted vehicular access along Tannery Lane in both directions as well as limited access to the already busy Send Road.
• Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The housing numbers proposed are for nearly 14,000 homes over 15 years from 2016 to 2031. This number is too high. The model used to calculate the number has not been seen or the assumptions tested by the council or any of its officers. It has been, on numerous occasions shown to be flawed by various 3rd parties. This housing target will result in the borough's permanent resident population increasing at 4.5 times the rate of population increase during the period 2001 to 2011. This population growth, by definition, is excessive and unsustainable for a gap town with many environmental, physical and infrastructure constraints.

Over 70% of the proposed housing is planned for land currently in the Green Belt. Housing need is not a reason in law for protected green belt land being used. It is perverse for so much housing to be planned for the green belt. Clearly, the green belt has not been used as a constraint as clearly set out in Government advice, planning policy guidance, the NPPF, case law, election manifestos and Ministerial letters to MPs.

For the West Horsley this is reflected in a 35% increase in the number of houses within 3-5 years of a plan being adopted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2148  Respondent: 11028737 / Sue Kershaw  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the expansion of commercial land in the urban area losing the potential for further housing. Policy E7: Guildford Town Centre

There is no reliable evidence provided that the retail core of the Town Centre can support expansion of 45,000 sq m of additional retail space at North Street.

Online retail is set to account for 21.5% of total retail sales by 2018 from 12.7% in 2013, the highest online retail share in the world according to the Centre for Retail Research. March 2016, on line sales rose 12.3%, and it was the third consecutive month in which more than 20% of all non-food shopping took place online, (British Retail Consortium and accounting firm KPMG) With such a high retailers will need just 70 high street stores to create a national presence compared to 250 in the mid 2000's. An expansion on such a scale is negligent when the Council claims to be in such desperate need for housing.

Retail is a declining industry and should not be invested in by the Borough at the expense of housing in the most sustainable urban location, near employment and transport hubs.

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy 11)

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages. There is too much traffic in our villages already and this plan will cause more congestion in West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon, with no plan to improve that. The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses in such a small area means dangerous and unsustainable traffic.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy 12)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Under the current economic climate post Brexit, it is unlikely any additional funding will be made available for new capital

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to poor air quality concerns (Policy 13)

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health. It has been shown that Wisley already has NOX levels above the EU legal limits and by law a school cannot be located in this area as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

2. I object to not protecting the Green Belt (Policy P2)

Our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city's playground. It is for us to conserve and protect it. There are 5 legal purposes for Green Belt, and it meets them all:

• To check the unrestricted sprawl of large built up areas
• To prevent neighbouring towns merging into one another
• To assist in safeguarding the countryside from encroachment
• To preserve the setting and special character of historic towns

To assist in urban regeneration by encouraging the recycling of derelict and other urban land. This policy is flawed and should have been amended. In the last consultation just six individuals, out of the c. 7,000 of those who took part in the consultation, supported the policy. Another 20 comments of support were from organisations such as: the University of Surrey, local councils (including Guildford), consultants (e.g. Savills) or landowners. But of the 1,371 who commented on the green belt policy 1,332 (97%) were against.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

8. NO EXCEPTIONAL CIRCUMSTANCES

The local plan proposes nearly 9000 new homes to be built on Green Belt land (compared with ~ 50,000 current homes in Guildford, so approx. equal to 18% of the existing homes in the borough) - a huge proportion. The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is NOT an exceptional circumstance in law. No exceptional circumstances have been disclosed. So the Green Belt boundaries should NOT be changed through the plan making process.

9. BROWNFIELD AVAILABLE

There is brownfield land available in the town centre which is being earmarked for commercial development rather than for housing. This is enough to meet our real needs for affordable local homes. There are enough vacant commercial sites to cope with genuine business need, and we've enough retail capacity already, so urban brownfield/derelict land should be used for housing.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

10. DRAINS, WATER SUPPLY, FLOOD RISK, CONGESTION

Our drains, our water supply, our medical facilities and our roads cannot cope with the proposed number of new homes. Building this number of homes will lead to flood risk here and downstream (along the Wey and Thames). The planned development on Green Belt is therefore unsustainable.

In conclusion, I must ask you to revise the housing number, and to amend the Local Plan to utilise brownfield land rather than green field sites.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

I wish to register objections to the Local Plan on a number of counts.

1. I object to the Local Plan as the development proposed is not sustainable (Policy 51)

13,860 new houses proposed is not sustainable - it will damage local communities by over development, especially West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon. The local communities don't need these houses. Wisley Airfield (A35) and Garlick's Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car.

The development should be in urban areas where there is sustainable transport. West Horsley for example will see the number of housing increased by 35% within 3-5 years of the plan being adopted. The number and density of housing is not in keeping with the local area and is therefore against policies within the NPPF.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

In view of the continuing proposal for a huge programme of house building under the Local Plan, I wish to protest for the following reasons:

1. Details

As far as I can ascertain, no new Assessment of Need has been published, so those wishing to object must do so without full information. This is unsatisfactory and unjust.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

6. Wisley

The proposal to build over 2,000 houses on the Wisley Airfield is most alarming:
• it almost equals the total number of dwelling in the villages of East and West Horsley combined, and dwarfs the neighbouring villages of Ockham and Wisley. It would change the nature of this area irrevocably, and not for the better!
• It would take many years for such a huge and sudden increase in population to be integrated into the Horsleys, Ockham and Wisley.
• It would put unsustainable pressure on the existing roads, schools and medical services.

The development needs to include a doctors' surgery; children's play facilities; secondary, as well as primary school spaces; and a railway station.

I do not object to appropriate housing development on the proposed brown-field sites, such as those opposite Bell and Colvill [West Horsley] and the BT land opposite Bishopsmead Parade [East Horsley].

The land abutting Great Ridings Wood in Norrels Drive, East Horsley is valuable in protecting the Woodland Trust land from being encroached upon, and vehicular access along Norrels Drive is restricted.

I therefore appeal to the Council

• to reconsider the plan;
• to reduce the number of homes proposed,
• to protect our green field sites, and to amend the Plan in favour of brown-field or re-development sites

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
5. Infrastructure

The existing infrastructure, particularly roads, water and drainage, are already under considerable strain. Roads and homes are increasingly subject to flooding.

The M25 junction with the A3, and surrounding roads are known traffic black spots and high pollution areas. These systems cannot sustain the impact of such a large increase in population - indeed it could be catastrophic

2 Green Belt

It is absolutely wrong in my opinion to encroach on London's irreplaceable 'Green belt'. Apart from its amenity value, it plays an incalculable role in maintaining the environment, particularly good air quality and water management. Furthermore, it is not we, but future generations who will bear the burden of its abandonment to the developers, namely:

• the inevitable 'urban sprawl'
• the loss of the County's historic character
• the degradation of villages and smaller towns.

Answer (if comment is on questions 1-7 of the questionnaire): ()
4 Alternative sites

There are 'brown field' areas in Guildford, on which commercial development is planned; yet there are numbers of vacant commercial and retail sites. Why not reallocated them to housing?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3 Size of increase

The huge number of houses proposed is wildly disproportionate in relation to:
• the existing size of Guildford
• its housing stock
• its transport systems
• its overcrowded schools

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the Guildford Plan.

On the grounds that despite repeated request from various bodies there has been a total lack of transparency over how the number of required houses has been derived. This is now further compounded by Brexit, as a significant portion of the housing requirement evolved around migration to the Guildford area which with Brexit is now a flawed assumption.
In addition no account has been taken as to the infrastructure requirement to satisfy a growth in housing, Guildford is already grid locked for a significant proportion of the working day. In addition to which services such as water and sewage are already stretched to capacity.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Green Belt should not be built upon its the very reason that people want to live in or around Guildford as not only does in provide AONB but it provides for the separation between town and village thereby giving Guildford the identity that it has. Remove that and its just another clone town with all the innate problems that this brings. Loose the identity and you will erode the desire to live in Guildford.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan talks about the need for retail development, when this is clearly a reducing need. The plan needs to focus on urban building as opposed to retail allowing the "lungs" of Guildford to remain.

Has their been any analysis from a pollution perspective?, answer no.

This must be undertaken to understand the implications on our health.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have lived on the Hog's Back since 1936 in three different properties. My father used to farm Blackwell Farm and other local farms. I strongly object to the proposals for the development of Blackwell Farm, the construction of houses and the attendant creation of major road junctions, widening of the bridge over the A3, alterations to the alignment of the A31. Not only will all this create complete traffic chaos in the area but will also destroy an existing area of Green Belt and AONB.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2537  Respondent: 11029409 / John Lay  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC's Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:
I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

I object to the Guildford Local Plan for the following reasons:

... 

10.) The poor air quality pollution concerns (Policy I3)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The plan to build 2,000 homes on the old Wisley Airfield is also, in our opinion far too large to be sustainable & should be greatly reduced.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Re; GBC Draft Local Plan 2016

We wish to add our support to the East Horsley Parish Council letter dated 13.06.2016 which identifies the areas of concern within your proposals.

We do not intend to repeat the points as listed, but do want to record our particular concern regarding the extent of the proposed development in and around the villages of East & West Horsley.

The local facilities serving our villages are insufficient now, without adding to the situation with more housing.

We appreciate development is necessary, but the proposed level appears to be excessive, given the size of the villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I see from the revised "Local Plan (2015-2034) that the settlement boundaries of the Horsleys are still to be extended & removed from the "Green Belt". This is an absolute disgrace, the "Green Belt" is supposed to be the "Lungs of London"....with more vehicles & more pollution we need the Green Belt more than ever. Doesn't this Council listen to the people it's suppose to represent? It also appears to support the development of the former Wisley Airfield adding an additional 2000 houses to the area & causing more pollution... Do you want to remembered as the Councillors who destroyed "Our Green & Pleasant Land" FOREVER! You won't be able to reverse it the future.......**

Answer (if comment is on questions 1-7 of the questionnaire): ()
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to register by objection to the following aspects of the GBC Local Plan. In general my concern is that the plan threatens to destroy the identity of both Send and Ripley villages, part of the development will be on Green Belt land and it will make the already highly congested roads in the area even worse.

Specifically I object to the following:

1. The number of homes (693pa) that the Plan intends to deliver.
2. The enclosure of protected Green Belt land within the proposed village boundaries (for which there will be a presumption for development in the future).
3. The Garlick’s Arch (Policy A43) proposal to build 400 houses and 7,000sq metres of light/general industrial/storage distribution space on the Green Belt.
4. The creation of new north and southbound slip roads to and from the A3 to the A247 Clandon Road (policy A43A) at Burnt Common.
5. The wholesale destruction of the Green Belt in this area (including the planned development of 2,000 homes at Gosden Hill Farm, Merrow – Policy A25) in clear contravention of the central government’s stated commitment for Green Belt protection.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A42 change at Clockburn in Tannery Lane because not only does the increase in houses from 45 to 60 ignore all the previous objections to the development, but the increase on houses of over 30% will make access and traffic problems in Tannery Lane and the A247 junction even worse. It also increases the erosion of Green Belt in our village and will make surface water flooding even worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A43 change at Garlick’s Arch because once again it aignores the huge number of previous objections made by local people. It will effectively join up the villages of Ripley and Send and defeat the key purpose of Green Belt. Also, there is no proven demand for Travelling Showpeople plots in this location; it will generate further traffic on the already congested roads of Ripley and Send; and it worsens the already considerable risk of flooding in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3588  Respondent: 11031713 / Stephen Barter  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy A 58 at Burnt Common because it was deleted from the 2014 draft due to all the objections made previously. Furthermore, the word “minimum” referring to the 7000sq m of industrial and warehousing is a change from the previous “maximum” in the 2016 plan despite the fact that since that plan there has been a decline in the demand for industrial land. Also, with empty sites and units at Slyfield and Guildford, what reason can there be to put another development in the middle of Green Belt? Once again, such a development will further exacerbate the traffic congestion problems in the Ripley and Send areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

1. The Street in Tongham
2. A331/A323 intersection
3. A31/White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road

- **4.3.29 Amend to:** “Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development.”

- **4.3.30 Amend to:** “We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green.”

- **Policy P3 Amend to:** (1) (c) should be amended to read “does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

4.3.29 Amend to: “Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development.”

4.3.30 Amend to: “We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green.”

Policy P3 Amend to: (1) (c) should be amended to read “does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.”

Attached documents:
I am writing to object to the 2016 Draft Local Plan, mainly because of the disproportionate impact some of these proposals will have on the residents of Burpham.

The proposed development at Gosden Hill Farm will generate a lot of additional traffic through Burpham and the proposed new 4 way junction at Burnt common will not alleviate Burpham’s traffic problems as has been claimed. There is no provision for specific infrastructure improvements to either the A3 or local roads, where there is already an acknowledged deficit. The “Highways England” review of the A3 should be completed first. As everyone seems to agree that a “tunnel” would be a good idea, the proposed route of this should be taken into account before any houses are built at Gosden Hill.

The plan, if put into practice will merge all the villages along the A3 from the Hog’s back to the M25. This will result in a significant loss of Green Belt land and generate even more traffic in Burpham (and the A3/M25 junction) which already suffer from severe delays at peak times.

Has any thought been given to the existing water/drain infrastructure, which is in a precarious state? If Gosden Hill goes ahead, where will waste and foul water go, as the present sewage system cannot cope now? The proposed new housing site allocations at Wisley, Slyfield, The Horsleys, Gosden Hill, Garlick’s Arch and Send will generate 6,000 homes, over 40% of the total number proposed. As these are all within a few miles of Burpham, this is disproportionate and unacceptable to the residents of Burpham.

There is a lack of evidence for the alleged housing need numbers – 693 a year, more than double the previous figure of 322. Also, in light or the recent “Brexit” vote I think this definitely needs to be looked at again.

I also think that the local plan consultation period has been

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the 2016 Draft Local Plan by Guildford Borough Council (GBC) for the following reasons:

1. **Not protecting the Green Belt**

I object to the proposal to remove (“in-set”) Ripley, Send and Clandon from the Green Belt. Erosion of the Green Belt is wholly contrary to the Government’s manifesto policy and to the Council’s planning policy. The 2015 Government’s manifesto included a commitment to "prioritise brownfield development” and to protect greenfield land around towns and cities. The manifesto commitment stated that “We will ensure that local people have more control over planning and protect the Green Belt. We will encourage more neighbourhood planning and protect the Green Belt. Neighbourhood planning gives more power to local people, allowing them to play a much stronger role in shaping their areas”. The policy commitment to protect the Green Belt should be upheld. Not to do so would be a betrayal of the commitments made by the Government and to democracy.

The Green Belt must be protected against the many forms of development, otherwise more farmland and woods will be consumed by urban sprawl, especially around large cities. With the increasing global pressures from climate change and population growth, our farmland and woodlands will become more valuable in future, not less. GBC’s proposal for more
development in the Green Belt assume that this land is only valuable if built on, an assumption that is fundamentally flawed. The Green Belt is needed now more than ever.

1. **Disproportionate size of sites in relation to rural locations**

I object to the allocation of land to the strategic sites of Garlicks Arch (Ripley/Send border), Gosden Hill (Clandon) and Wisley Airfield. The proposed development of these sites will have a disproportionate impact on the surrounding local villages. They will have a permanent and negative impact on each of these communities.

1. **Unbalanced allocation of development in one area of the Borough**

Between the M25 and Burpham, a distance of only about 5 miles it is proposed that over 6,500 houses are built. This represents over 40% of the housing proposed in the Local Plan. I object to this area being hit so hard by the allocation of development, which is disproportionate to the rest of the Borough.

1. **Gerrymandering**

The concentration of Green Belt development is not only disproportionate to the rest of the Borough but has been disproportionately applied to Wards that are not lead by a Conservative borough councilor. For example, the Ward of Lovelace (Liberal Democrat) accounts for 15% of the Borough’s population but has been allocated 35% of the proposed house building. The Ward of Send (Guildford Greenbelt Group) has also been given a disproportionate amount of house building. The coincidence of this is statistically significant and demonstrates at best a form of punishment to Wards who did not elect a Conservative borough councilor and at worst a form of gerrymandering.

1. **I Object to the site A45 The Talbot**

This is an unreasonable overdevelopment in a conservation area. Ripley has already been impacted by at least 7 new housing developments in the past 3 years, without any improvements in roads, bus services, schools are medical centres.

1. **I Object to the site A57 The Paddocks**

Site A57 was part of planning application 14/P/00867 in May 2014 which itself was a blatant re-hash of planning application 09/P/01554. The caravan site had already been established at the time of the application, suggesting that a retroactive application was being sought. The unauthorised development of the site runs wholly contrary to the Council’s planning policies. The Council should attach high priority to its planning enforcement role and should not stand idly by where there are flagrant breaches of planning rules, particularly on a prominent site like this in a Green Belt / Conservation area.

Planning application 09/P/01554 was refused permission by GBC, and the appeal was rejected by the High Court in April 2013. Although the site’s continued occupation has been judged completely illegal, no enforcement action has yet been taken by GBC. GBC should take immediate action on the enforcement notices against illegal occupation. The Council is accountable for protecting the interests of the community and should not run away from its responsibilities.

1. **I Object to the site A43 Garlick’s Arch**
Garlick’s Arch is a 100 acre site of Green Belt and ancient woodland which should be protected.

1. **Congestion on the A3 and M25 trunk roads**

I object to the development of the strategic sites due to the A3 and M25 already being at capacity during peak hours. Highways England has no plans to look at improving the A3 before 2020. It is therefore not sustainable to identify sites for further development which will worsen the congestion on these motorways and trunk roads.

1. **Congestion on the local village roads and lanes**

Our villages are already suffering from severe congestion for much of the day. For example the Newark Lane and Rose Lane junction in the center of Ripley, which at peak hours, is regularly gridlocked due to the volume of traffic, made worse when Ripley High Street (B2215) is used as a detour/slip road when the A3 is jammed. I object to further development which will cause even greater congestion in and around our villages.

1. **Unsuitability of our local roads for heavy vehicles and more traffic**

Many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. For example, part of Newark Lane which was resurfaced for the 2014 Olympics cycle route and has been used subsequently for other cycling events, has had to have regular “fixes” to crumbling road surfaces and recurring potholes due to traffic volumes far in excess of the road surface quality used. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

1. **Poor air quality concerns**

Further congestion, particularly in built up residential areas will only lead to greater levels of air pollution. I object to further development, which will result a fall in the air quality.

1. **Lack of proper infrastructure planning for sites**

I object to the lack of planning and implementation of infrastructure. For example at Garlick’s Arch. Without improvements to the infrastructure prior to development, the existing residents’ quality of life will significantly deteriorate in many ways. Local services such as medical centers and schools, which are already overstretched, will not cope.

1. **Sites being planned in unsustainable locations**

Many of the strategic sites e.g. Wisley Airfield and Garlick’s Arch, are in unsustainable locations. They do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. I object on the grounds that these sites are not sustainable.

1. **Parking issues in local villages caused by larger population**
Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems, to which I object.

1. **Local healthcare facilities will be overwhelmed**

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. I object to the further stress it will put upon existing overstretched health services.

1. **Local schooling facilities will be overwhelmed**

Without proper planning and a commitment to fund new schooling, existing schools will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. I object to the further stress it will put upon existing overstretched schools.

1. **No protection of the environment and heritage assets**

I object to the lack of protection of the environment and heritage assets.

1. **I object to the lack of any evidence for the alleged housing need numbers**

Nowhere in the Plan document can I find an explanation for why new houses need to be built other than the obvious that there are too many people. But this is addressing the problem in the wrong way. The problem of overpopulation is due primarily to the massive influx of immigrants. Successive Governments have failed either to listen or act on public opinion on immigration into the UK. Some in the last government have at last acknowledged that they failed spectacularly to control the numbers of people entering the UK from Eastern Europe and elsewhere resulting in serious problems of overcapacity. It is sheer madness and foolishness to try and resolve the problem of overpopulation by creating even more problems building more houses and destroying the green belt to achieve this.

GBC should not punish local residents for the errors of central government. Its residents will applaud GBC for standing up to central government and the constituents will have the confidence to re-elect GBC in the future if they properly support their constituents.

1. **I object to the limited consultation period**

The Council, having sneaked this proposal in at the last minute without any consultation whatsoever with the community, has only allotted six weeks to register objections to a document over 1,800 pages, this is half the usual time. The document is far too long and complex for most people to understand, and as such I consider it more than as a PR exercise and not fit for purpose.

Lord (Paul) Bew, the crossbench peer who chairs the Committee on Standards in Public Life, stated that public office holders must be seen "to be demonstrating the seven principle of public life - selflessness, accountability, objectivity, integrity, honesty and leadership". I hope that GBC will listen to all the comments by the community they serve, including the local parish councils and local councilors and demonstrate that they are truly serving their community with these principles and protect the green belt.

I object to the 2017 Revised Local Plan by Guildford Borough Council (GBC) for the following reasons:

Housing at Site A43 Garlicks Arch would be on Greenbelt Land.

The potential increase from 400 houses at site A43 Garlicks Arch is extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of 6 Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural environment within the Greenbelt and there is no identified need within the Local Plan documentation.

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan and so is out of scale with the proposed development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

The potential for a substantial increase in industrial floorspace from 7,000 sqm to an unspecified amount at the site A58 Burnt Common does not provide local residents with enough information for a full and proper consultation given the ambiguity and lack of detail within the document.

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, tucked away in policy 4.4.23a and does not allow for full and proper consultation.

### Comment ID: PSLPS16/6976  Respondent: 11032097 / Sue King  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

---

Page 438 of 2855
• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposals for Wisley airfield falls exactly into this category...GBC are trying to justify the development under unfulfilled housing need (which has been exaggerated at best) and in any case unfulfilled housing need is not sufficient argument to build on green belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The affordable homes policy is laudable but GBC are planning on building them in the area of least demand where transport links are not good and there are limited jobs. In fact the demand in the village is for affordable three bed homes, contrary to what BC have outlined. The plans fail the test of sustainability on many counts, including this one.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposal not to grant Effingham junction PTI status is baffling since the very arguments used to further Horsley stations claim are used against Effingham Junction. EJ plans just as an important role and is far more accessible than Horsley and should have PTI status.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to express my total dissatisfaction with the proposed local plan. On many fronts it is in breach of regulations and facts have been misrepresented by GBC.

Here are my main objections. I am not able to express them in legal terms but these are the feelings of 90% or greater of the two villages of East and West Horsley. The Surrey Hills AONB is one of the great treasures of Guildford Borough and I strongly believe that protecting this area should be given the highest priority.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The opening statement of Policy P2 that “We will continue to protect the Metropolitan Green Belt” is blatantly disregarded all the way through this local plan. GBC appears to be in breach of this policy through the housing policies it has set out in the Proposed Submission Local Plan, whereby some 65% of developments will be made on land that is currently Green Belt. It is not a Government directive to build on greenbelt land as GBC present it and would have us believe. In fact Government guidelines say that greenbelt land should only be built on in. The local plan does not make nearly enough argument for ANY of the proposed greenbelt land developments to be considered ‘exceptional circumstances’. You have a duty to protect the greenbelt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

The schools are oversubscribed and full, particularly the Raleigh, (including the Howard, the only viable option for local secondary schooling in the state sector). There are no plans to increase secondary school provision! Where are all the children from the new houses going to attend school? All the other services are stretched to the max including doctors surgeries, dentist (only one NHS) in the two villages!!!, not to mention the busy east Horsley station parade.

Drainage is already an increasing problem and each year the flooding gets worse in certain areas..some of which are right by the proposed developments. The developments would only exacerbate this situation. II

[The proposed boundary changes would devastate the only open green communal area in East Horsley, Kingston meadows and other boundary changes are ridiculous in that they ignore natural boundaries which exist and are currently used (such as a deep drainage ditch) and would seek to move these to further the machinations of the developers. The arguments for the boundary changes are therefore invalid.

By changing the boundary to include area past the A246..and infilling in the spaces, you are threatening the green belt in the same way as new developments and I view this with the same scepticism and unless the boundary changes can be lawfully justified, they are invalid too.

Green Belt rules make it clear that unfulfilled housing need is not normally considered to be ‘an exceptional circumstance’. If it were the entire Green Belt would already be covered in tarmac. Also, every movement in settlement boundaries must be justified by ‘exceptional circumstances. Therefore most of these proposals should be thrown out because they could only be considered under exceptional circumstances and these do not exist and the proposals cannot be justified.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
In all, the draft plan is flawed in the extreme and GBC’s insistence on forcing developments where there is no proven need and riding roughshod over laws put in place to protect our valuable green spaces must be prevented at all costs. This plan must be rejected apart from the areas which I have identified.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

West Horsley is being considered as two separate plots and therefore the allocation of housing is increased due to this. I feel baffled as to why West Horsley is split into North and South since it has only one small section of shops near Bell and Colville. The village should be considered as one entity. When viewed as such, it is clear that the proposed density of housing is an extraordinarily high percentage, once again far outstripping identified need, none of which warrants building on green belt land, or reclassifying green belt land because there are no exceptional circumstances.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The need for housing projected over the next few years is far lower than GBC are supposedly making provision for. What you are prosing in effect a 35% increase in housing in two small villages which barely have the facilities and infrastructure to cope with the population as it stands. This is unprecedented and far beyond anything proposed elsewhere in the borough. It is completely unreasonable especially since predicted growth in the area is much nearer 15%.

GBC has voluntarily chosen to pursue a policy of aggressive civic and economic expansion which underpins all of the housing policies in the Local Plan. GBC’s target of a 25% increase in housing stock is entirely down to a political choice made by GBC and well in excess of the official statisticians’ forecasts. Why are GBC pursuing this aggressive house building project when there is no proof of demand?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to express my opposition to the Guildford Local Plan for the following reasons:

- The character off the area will be adversely impacted through noise and pollution
- There are not enough essential amenities available for such a population influx, in particular the availability of accessible school places would be impacted
- The Green Belt Boundaries were created to protect the characteristics of this area of outstanding natural beauty and moving them is immoral
- Local wildlife will be adversely affected
- The roads and streets will become much more hazardous places as many use them inappropriately, contravening the speed limit.
- The increased volume of traffic will lead to more road traffic accidents and the potential of children being killed road traffic accidents are the most significant cause of unintentional injury for young people.
- Healthcare services will be adversely affected by increased numbers it is already very challenging to secure an appointment with a GP

It is my sincere belief that the plans as they stand will reduce the quality of life of residents currently living in and around the Horsley's.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to comment on this local plan in respect of West Horsley.

I wrote to you on 21st September 2014 but regretfully never received any response from you so I am repeating much of what I wrote then.

As I do not know where precisely where Cranmore Lane turns into Little Cranmore Lane I shall just refer to both as Cranmore Lane in the following.

I should be grateful if you would consider an additional alternative development site on land to the east of Overbrook and west of Cranmore Lane. I have spoken to the owner of adjacent Barcombe Farm who would be happy to include his fields between Barcombe Farmhouse and Cranmore Lane within a development area. These areas are shown on the attached plan being land parcels Nos 154 and 136 totalling some 6.769 acres. These should have been identified for possible development in your original study.

This site has the benefit of being in the centre of the village (ie West Horsley South) and would round off the village settlement boundary by the recognisable and defensible boundary of Cranmore Lane.

The land involved is very poor quality agricultural land and not being part of a larger holding is uneconomic to farm, and is completely surrounded by other residential housing.

Whilst your study states that this parcel of land has limited access at present a new access to this site would have to be negotiated but there are several possibilities including the demolition of one or two existing houses to make way for such access. An access up the driveway to Barcombe Farm from The Street is also perfectly possible.

This site would NOT be a visual intrusion on the village as it is tucked away behind the Overbrook estate and Fulkes Cottages and bounded by woodland to the East and the South, and cannot be seen from higher ground or other roads.

I am confident that the selection of this site would find more favour within the village than those proposed given that some more development in the village is said to be necessary. Furthermore it could be at a density more appropriate to the village situation rather than the extremely high densities proposed.

Regarding the remainder of the plan I would like to see in it proposals to deal with future medical facilities which are at present overstretched, Increased parking at Horsley Rail Station which is at present full on most weekdays, increased capacity of local schools in order to deal with the proposed increase in population.

I view the plan as being produced at a very high level with less than sufficient consideration to the actualities that exist in a lot of the various locations in the Borough.

I hope I will receive a response from you this time and would be happy to enter into further discussions regarding the inclusion of this suggested site into the final Borough Plan.

I object to a new interchange with the A 3 at Burnt common. Traffic from the proposed 2000 houses at Wisley Airfield would then have to come through Send, along with traffic from all the other proposed sites in the surrounding area. Send Road is already overloaded and gridlocked during rush hour. Noise and pollution levels would reach excessive levels. Please can these comments be passed to the Planning Inspector for review and confirm that you have received this communication.

I object to the development of 40 houses and 2 travellers pitches at Send Hill. The location is inappropriate because the only access is a narrow width single access country road. The road is too narrow to provide sufficient access to the site or accommodate increased levels of traffic. Send Hill already suffers from severe congestion, especially at school run time and would not cope with an increase in traffic volume. The development would spoil a high amenity area set in beautiful countryside and again erode the Green Belt. There would be significant impact on the nature reserve nearby.

The proposed development site A44 is registed by GBC as a landfill site not a quarry as listed as ref LLA 2081. As a landfill site it is not suitable for housing development for health reasons, any disturbance of the site would create a possible health hazard as material of the landfill is not known. Monitoring wells on site record methane gas discharge occurring.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Proposed Local Plan for a number of reasons listed below.

I object to Send Village being removed from the Green Belt. Councillors and central government gave an election promise to protect the Green Belt and this reneges on it. The Green Belt in Send helps Send to maintain its village identity and prevents Woking and Guildford merging into one big urban conurbation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the Proposed Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3
junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the disproportionate amount of development in one area of the Borough.
I wholeheartedly object to the proposals as a whole, due to the massively destructive impact it will have on the village of Ripley, and the neighbouring village of Send, as well as nearby areas such as Wisley, Clandon and Burpham. This impact would be felt not just with the implementation of these ill-thought-out plans, but for all future generations in the area.

I object to the limited consultation period.

I object to the last minute inclusion of new sites with less than two weeks’ notice.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following reasons:
1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the

Attached documents:
Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,068+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCl).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
As a resident of Burnt Common, Send I object to the proposed developments at:

A42 Clockbarn Nursery, Tannery Lane
A43 Garlicks Arch

(And the outline planning application 16/P/00783. For 9 houses on the site of MG Garage/DAG Scaffolding.
Which if granted could be a Trojan horse access for the much larger development, Garlick’s Arch.)
A43a New Slip Roads to/from A3 at Send Marsh/Burnt Common
A44 Winds Ridge and Send Hill

I object on the grounds of building on ‘Green Belt’ land, which are the lungs of London. And are meant to prevent Urban spread in the countryside and the linking of settlements.

I see no exceptional circumstances to take Send and Ripley out of the Green Belt. Especially as Villages to the East of the A3 maintain this status.

The increase in traffic flow. Our roads already strain to cope with existing levels of traffic. Especially all the approach roads to the A3, and in particular the A247 to and from the Burnt Common roundabout. Which passes a school, a Doctors surgery and goes straight through the centre of Send.

The increased pressure on local facilities, Doctors, Schools etc. that 485+ homes would bring. Send does not need, nor do we want a 25% increase in population.

Warehousing and Industrial units are included in Policy A43. I question why was the Cassidy Slyfield Ltd. North Slyfield site, allocated in 2014 By Guildford Council for Industrial and Warehouse use, withdrawn from the Local Plan recently. Surely expanding an existing Brown field industrial area is better than creating a new one on Green Belt Land!

I see these developments solely as commercial gain for the developers and of no benefit to the existing residents of Send, Ripley and the surrounding area. In fact the level of development proposed will be detrimental to those of us living here.

Please take into account my objections when making your decision.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object Policy A42 Clockbarn Nursery. Tannery Lane. 45 Houses.

As Planning permission has already been granted for development of a marina and 64 apartments (Despite strong local objection) in this narrow lane. Further development will only increase traffic in this narrow lane to an already dangerous junction with the A247.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object Policy A43 Garlick’s Arch. Send Marsh/Burnt Common/Ripley

To the building of 400 houses on this site, Because it was not include in the regulation 18 draft and has not been previously consulted upon.

It is on Green belt, permanently protected by NPPF to prevent the merging of settlements. There are no exceptional circumstances to take this site out of the Green Belt.

The site is covered in Ancient Woodlands, containing trees that have stood since the 16th Century, this area must be conserved for future generations.

I object Policy A43 cont… to the Warehousing and Industrial units which are included in the Policy.

Employment Lands Needs Assessment (ELNA) 2015 shows an 80% reduction from the previous ELNA carried out by GBC in 2013 for employment space.

If Industrial and Warehousing units are required, I question why the Cassidy Slyfield Ltd. North Slyfield site, allocated in 2014 By Guildford Council for Industrial and Warehouse use, was withdrawn from the Local Plan recently.

Surely expanding an existing Brown field industrial area is better than creating a new one on Green Belt Land!

Also heavy traffic would be attracted to Garlick’s Arch site from the M25 and A3, a lot of it also using the A247, which is not suited to this traffic!

I object because GBC’s Transport Assessment was not available to Councillors for the vote taken on 24th May for these proposals. It was published on 6th June! Infrastructure requirements must be assessed before major proposals are voted on.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object Policy A43a, the North facing slip road to from A3 at Send Marsh/Burnt Common

On the grounds of the increase in traffic flow. Our roads already strain to cope with existing levels of traffic. Especially all the approach roads to the A3, and in particular the A247 to and from the Burnt Common roundabout. Which passes a school, a Doctors surgery and goes straight through the centre of Send, linking Guildford and Woking. The A247 is 2 way road and not suitable for the high levels and heavy traffic this will create.

I object because GBC’s Transport Assessment was not available to Councillors for the vote taken on 24th May for these proposals. It was published on 6th June! Infrastructure requirements must be assessed before major proposals can be voted on.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object Policy A44. Winds Ridge and Send Hill

I object to this development because it was not include in the regulation 18 draft and has not been previously consulted upon.

It is on Green belt, permanently protected by NPPF to prevent the merging of settlements. There are no exceptional circumstances for taking this site out of the Green Belt.

The site contains documented unsafe landfill waste which is currently vented.

The site is also in a single track lane which is unsuitable for larger vehicle access, which the two traveller pitches would require.

The Lane is also the site of the Cemetery, a peaceful place to reflect and remember those who have gone before us.

I object because GBC have not followed correct process. Since 2014 GBC has made changes on every major proposed development in Send and have now added a major road junction. Policy A43a.

The 2014 proposal for 430 house in Send was reduced to 185 in April 2016. In May 2016 policy A43 was added with 400 houses and Industrial units. These significant changes require full consultation under Regulation 18. Regulation 19, which GBC are using is not appropriate in this instance.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp173/52  Respondent: 11032705 / Mike Tarrant  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send Marsh/ Burnt Common

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object to Policy A42: Clockbarn Nursery. Tannery Lane.

I object to Policy A43: Garlick’s Arch. Send Marsh/Burnt Common/Ripley.

Because, the 2014 proposal for 430 house in Send was reduced to 185 in April 2016. In May 2016 policy A43 was added with 400 houses and Industrial units. At June 2017 we have 500 houses and 10 Traveller/Show people plots.

I object to these latest changes because of the increased pressure on local facilities, Doctors, Schools etc. that 500+ homes would bring to Send.

500 new homes would generate circa half a class for Send school, which has no capacity for these extra pupils.
Send does not need, nor do we want a 25% increase in population.

I object because GBC have exaggerated the need for the 12,426 houses currently in the local plan. A population increase of 20,000 in the plan period would require just 8,000 homes based on 2.5 soles per habitat.

I object to Policy 2 paragraph 4.3.15 Send Business Park, Tannery Lane, removal from Green Belt

Because, these buildings are traditional non-conformers, adjacent to the National Trust owned Wey Navigation Canal/River. An area of outstanding countryside and natural habitat for birds and wild life. The night time Owl spotting is marvellous.

Further development will only increase traffic in this narrow lane, single track in parts, to an already dangerous junction with the A247.

I see these developments solely as commercial gain for the developers and of no benefit to the existing residents of Send, Ripley and the surrounding area. In fact the level of development Proposed will be detrimental to those of us living here.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/439  Respondent: 11032705 / Mike Tarrant  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A42: Clockbarn Nursery. Tannery Lane.

Because, an increase of 15 houses, making 60 in total is over the top. Development is not required or wanted.

As Planning permission has already been granted for development of a marina and 64 apartments (Despite strong local objection) in this narrow lane, single track in parts. Further development will only increase traffic to an already dangerous junction with the A247.

Because, It will impact on the views from the River Wey.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/440  Respondent: 11032705 / Mike Tarrant  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43: Garlick’s Arch. Send Marsh/Burnt Common/Ripley.

Because, the addition of self-build and custom plots. Development is not required or wanted.

I object to the addition of 8 Travelling/Show people pitches. Because, the Local Plan H1 states that Traveller or Travelling Show people accommodation should be provided on developments of 500 homes or more. This development is for 400 homes, so does not meet the required criteria.

Because, this site is on Green belt, permanently protected by NPPF to prevent the merging of settlements ie Ripley/Send Marsh/Send. There are no exceptional circumstances to take this site out of the Green Belt.

The site is covered in Ancient Woodlands, containing trees that have stood since the 16th Century, this area must be conserved for future generations.

I object because, this site is subject to flooding and has a flood zone 2 allocation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/441  Respondent: 11032705 / Mike Tarrant  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object Policy A58: Burnt Common. Warehousing and Industrial units.

Because, of the change of wording from up to 7,000sq m. to minimum of 7,000sq m. The use of the word ‘minimum’ opens up the site for unlimited development. Which is not required. Employment Lands Needs Assessment (ELNA) 2015 shows an 80% reduction from the previous ELNA carried out by GBC in 2013 for employment space.

Because, heavy traffic would be attracted from the M25, A3 and the A247, which is not suitable for commercial traffic!

I object because Industrial and Warehousing sites and units are still empty at Slyfield and Guildford. So surely expanding existing Brown field industrial areas is better than creating a new one on Green Belt Land!

I question why the Cassidy Slyfield Ltd. North Slyfield site, allocated in 2014 By Guildford Council for Industrial and Warehouse use, was withdrawn from the Local Plan?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:

Comment ID: pslp172/4433  Respondent: 11032801 / Louise Springfield  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4434  Respondent: 11032801 / Louise Springfield  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

| Comment ID: PSLPS16/7246  Respondent: 11033057 / Jo Komisarczuk  Agent: |
| Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35 |

I Object to the proposed sites at Wisley Airfield (A35) and Garlicks Arch (A43) are unsustainable locations they cannot be reached by public transport, train stations and bus routes, and will force all occupants of the proposed properties to be dependent on cars. As the local roads around these sites are lanes which are already at or above capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

| Comment ID: PSLPS16/7247  Respondent: 11033057 / Jo Komisarczuk  Agent: |
| Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43 |

I Object to the proposed sites at Wisley Airfield (A35) and Garlicks Arch (A43) are unsustainable locations they cannot be reached by public transport, train stations and bus routes, and will force all occupants of the proposed properties to be dependent on cars. As the local roads around these sites are lanes which are already at or above capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I Object that the plan for Garlicks Arch (A43) was added in the late evening of the day of the Council executive meeting, just a week before the full council passed the draft local plan for public consultation.

I Object that there are no provisions for any infrastructure around Garlicks Arch (A43), there are already issues with getting existing children into primary and secondary education around these villages. The Drs requires at least a two week wait for an appointment, the mobile library no longer serves the local area and the lanes are constantly full of fast moving traffic. This is totally unsustainable.

I Object to the inclusion of the land for new on off ramps at Garlics Arch (A43a) This is just not sustainable nor has it been thought through. It will draw huge numbers of cars into the area which is already at traffic capacity, causing a huge detrimental effect to the villages in the area. Once the vehicles are heading to or from the site, they are immediately in local minor roads, which are not designed for the traffic load which will occur, even if none of the new housing and warehousing were built this plan would be unsustainable. With the new housing figures there will be huge extra numbers of cars trying to gain access, via West Clandon, where two lorries cannot pass at some point, through Burnt Common and Send where the traffic is residential all through the villages of Send and Old Woking, and the roundabout at Send, Old Woking, cannot possibly deal with such new traffic flows. This has not been thought through at all, it will bring the entire area from the M25 to the A3 and all the surrounding villages to complete Grid Lock, which will have huge impact to the health of those living in these areas.

I Object to the damage of the Historic Environment and woodland at Garlicks Arch (A43) building will double the building on the area and the ancient woodland including over 80 mature trees and associated plants and animals will be lost forever.

I Object to the proposed Infrastructure Schedule C, which takes no account of the proposed use of the land at Garlicks Arch and is therefore not fit for purpose.

I object to the lack of infrastructure planning for the sites Policy I1, which does not take account of Garlicks Arch at all, and for other sites it just appears to use existing infrastructure, when in these villages all services are at capacity currently.

I Object to the poor air quality which will inevitable result from such huge development in such a small area, this can only led to greater pollution not just for the construction of the homes but also for their use, and that of associated vehicles which can only harm the existing residents and also the health of the new residents too. The area is already polluted by the A3 and the M25, increasing the land use for housing to such an extent can only add to this already difficult situation for those living here.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I Object to the inclusion of land at Garlicks Arch, Burnt Common, Send Marsh. This land is protected from development as Green Belt; the Government has stated that Housing cannot be a reason for losing Green Belt. Therefore there are no extenuating circumstances, for doing this on such a site, which is a mixture of farm land, and ancient Woodland and is a haven for local wildlife, from deer through to bats with all steps in between. I note that no wildlife plan has been included with this plan. The site floods, has no infrastructure and there are no plans for schools, Drs or other planning to support such a site.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the local plan to the number of houses required to be built because it is not sustainable, there is no road infrastructure to accommodate such huge numbers of homes and people, nor are there the schools, doctors, dentists and hospital places to sustain such a huge increase in population.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the Policy E2 at Garlicks Arch (A43) 7,000 sq. m of warehousing and storage use Class B1c, B2 and B8) floor space will be directed to the Industrial Strategic Employment Sites. This could be put either at Slyfield or just to the South in Burnt Common where there is an existing brown field site which can easily accommodate the requirement, and was removed from the plan with less than two weeks notice. How can it be beneficial to take land out of production and lose ancient woodland and leave an existing brownfield site giving no benefit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that Guildford Borough Council members stood for the green belt and people voted them back in, now their true colours are shown, and they want to inset so much Green belt, while not giving consideration for brown field sites and population density in existing urban areas. Even The MP for Mole Valley says that this plan is not fit for purpose.

I Object to the huge impact on the local Trunk Roads A3 and M25, huge improvements need to be made to these routes prior to any housing being added to the area. The A3 to Guildford is a large car park at peak hours. The expected time for improvements to the A3 Guildford is 2020 at the very earliest and now we have Brexit to add to the thoughts of this plan, there is no way that the timetable for such infrastructures’ to be updated prior to this date. Therefore this is another reason the plan should not stand.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the offsetting of any of the greenbelt, Policy P2. Once it is gone it is gone for good, there is no route back. This is why the act was passed originally to protect the villages and green spaces of England, if this plan goes ahead, Guildford will be joined to everywhere from the hogs back to the M25. The entire length of the A3 will become a corridor of unwanted houses instead of the green fields which are currently present. This proposal to concrete over farmland which only developers can ever benefit from comes at a time when the UN predicts the loss of farmland to climate change is not acceptable. Also the plans for Garlicks Arch have been added with less than two weeks notice, but the existing brown field site just to the south of Burnt Common, which has been removed.

I object to develop to the building on land which is susceptible to flooding (Policy P4). The plan does not take notice of the National Planning Policy. Garlicks Arch is constantly flooding and is according to the Environment Agency to be at a higher risk of flooding than Guildford Borough Council’s estimate. This land floods regularly and the Councils estimate is not up to the standard required for this plan.

I strongly object to: The plan A58, land at Burnt Common, London Road was I believe removed from the previous version of the plan, which they claimed at the time was why they could now add A43 Land at Garlick’s Arch. So why is it back, bigger and worse for anyone living in the area?

I strongly object to the use of Green Belt for anything as it is a way to stop villages merging and also being the lungs for London and our area. These were the stated purposes when the Green Belt was set up, so what exactly has changed?

I strongly object to A43 Garlick’s Arch, this new plan is against our wishes, with thousands of objections already made by local people. There is no infrastructure to support any such building, as these quiet country roads and lanes are already overloaded and often jammed, particularly during rush hour and at the school times. This is a beautiful, green permeant Green Belt area for which no exceptional circumstances have been given for removing it from the green belt, which are required by the National Planning Policy. The proposed development of this land will join the villages of Ripley, Send, West Clandon and the hamlet of Burnt Common into one large conurbation, which when included with other proposed plans within the local plan, will extend as far as Guildford Borough goes towards Leatherhead, including East Clandon and the Horsleys as well as Wisley and Ockham; basically into one large mass of housing. The number of homes required in A43 is totally excessive and unnecessary, and we can all be assured that these will not be homes for local young people but large four plus bedroom, mini mansions especially as the council has given the builders permission to pay their way out of building affordable homes in policy 4.2.23. The land at A43 Garlick’s Arch is frequently flooded, and is currently a flood zone 2 allocation, it is across Burnt Common Lane from me, so I know how often is floods, and that the water has even got into the gas mains on several occasions in the last decade. The land included an ancient woodland area, which can never be replaced; why remove this and all the creatures that live within it? The history around it, this area was very popular with the Tudors, and their history is part of our villages. Why are travelling show-people plots suddenly needed in this part of Guildford, there has never been a request for such before. It also is inconsistent with A50 Whittles Drive Normandy, which has approximately 14 sites that more than covers the need, therefore what reason is there to build even more in A43 Garlick’s Arch?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3848  Respondent: 11033057 / Jo Komisarczuk  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

A58 land at Burnt Common, London Road. I can think of no sensible reason to build warehouses in the middle of the greenbelt, and to change the word maximum to minimum, since the plan in 2016 is ridiculous. This change of wording has come with the removal from the Garlick’s Arch back to the original placement in A58. It is well known that there is a reduction in warehouse use currently nationally and that there are empty sites and warehouses that have already been built in Slyfield and Guildford, so why suddenly build even more that are not needed? There is no reason to take Green belt land for such a project especially as there are clearly no exceptional circumstances to require such a change in use. Building on this section of Green Belt will also cause even more congestion on the roads and lanes in the area, which were never built to be more than country roads and lanes, and no prevision has been made for improvement in infrastructure. There is a note that a waste management facility could be added at A58, but this addition will not allow for any discussion. Such sites are highly contentious and the Council has a duty of transparency, which is being completely ignored at best by the addition of a waste management facility.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy 2 paragraph 4.3.15 states that Send Business Park will be taken out of the Green Belt. Why? There is restricted access by road to the site in both directions, it is next to the beautiful Wey Navigation and it detracts from the openness of the green belt.

I also object to the hiding of development by deferment A24, A25, A26, A43 within this version of the plan. These are concealed planned development and are designed to have two effects, to hide the true number of proposed properties being built with around 1100 hidden on A24, A25 and A26. Also, this looks to me to be an excuse to build on A43 Garlick’s Arch where developments are not needed. This is in my view dishonest. The proposed increase from 400 to 650 houses on this site is totally unacceptable and should not be allowed, especially as the plan in 2016 which was added into the plan during the meeting gave reasons that removing A58 Burnt Common started that “the site A43 location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm.... (site allocation A25) [than the Burnt Common site did”.

Now that A58 has been added back into the plan, and the separation issue is clearly being ignored as both sites which are almost contiguous are now in the plan, it would appear that Guildford Borough Council are not following their own guidelines and objectives. Also as A58 is now back in the plan then the required floor space is allocated surely and there is no reason to build on Garlick’s Arch.

Guildford Borough Council claim to be building on Brownfield sites in preference to Green Belt, if this was truly the case why is Site A4 removed from the plan? This removed housing from the plan in favour of retail, which means Green Belt land will be used to allow retail development, this policy is totally unacceptable. Site A34 is also being removed from the plan, another Brownfield Site which should be contributing to housing.

I completely object to the council giving developers an “out” on affordable housing Policy 4.2.23 by allowing a payment in lieu to enable the same amount of affordable housing as would have been developed on site. Where in this plan is this affordable housing actually going to be built?

After living in Horsley for 29 years I am strongly opposed to the changes that are proposed in the local plan for both East and West Horsley and the surrounding villages. I work in gardening and agriculture and am especially opposed to the changes the plans have on the land.

I strongly object to the proposed changes the plan would have on the Horsley and surrounding villages. These will uncharacteristically change the villages with a significant amount of history and heritage to make them resemble towns.

I hope these objections are listened to and that the Guildford Borough local plan is reconsidered to make better use of brownfield sites to protect the green belt, specifically in the Horsley’s and surrounding villages. I would like my 2 children and their families to be able to grow up and enjoy the beautiful village environment I was lucky enough to have in my childhood.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I specifically object to the Green Belt changes – Policy P2

There does not appear to have been any consideration to the value of the local Green Belt as a public and private asset. This is not just potential building land with additional restrictions it provides habitat for wildlife, the preservation of trees, much needed green space and areas of no pollution for our families to enjoy. There has been no consideration to the harm to public health on the removal of this land. I have seen this area flood multiple times and the development on the green belt will increase this frequency.

I have also been informed that the plan has allowed ruling Councillors to argue that there is an acceptable percentage of Green Belt that should be sacrificed to development, when no such rule exists in the NPPF. I was also informed that the plan ignores most of the NPPF 17 stipulations.

The plan has proposed a disproportionate amount of development to green belt land and very little in urban areas where a significant amount of the population want to live. 35% of the development being proposed for the Horsley's is also excessively high for one area to support without causing significant change.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/7289  Respondent: 11033249 / Evelyn Scholfield  Agent:  

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to register my objections to the local plan in respect of matters affecting the Horsleys and surroundings.

The proposed increase in homes of 77% in the surrounding area will have an adverse affect in several ways:

TRAFFIC: Inevitably an increase in the amount of traffic, which uses narrow roads not intended for such volumes

PARKING: Parking at the shops and station is already overloaded, with no facility to increase.

MEDICAL AND SCHOOLS: Already full to capacity and no means of increasing.

INSETTING: Removal of the Horsleys from the Greenbelt protection will leave us vulnerable to further development on additional sites.

RURAL DISTRICT CENTRE: This seems to be based on designating Budgens as a large supermarket. Not so. It is a convenience store which allows it to open all day Sunday.
I have live in East Horsley for 34 years. We moved here because of its semi-rural location, which seems to now be under threat. Building on Green belt land, if allowed, will result in one great conurbation from London to Guildford.

I object most strongly to the local plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to express in the strongest possible terms my objection to the 2016 Plan. In particular I am concerned about the following, none of which appear to have been addressed by any revisions to the 2014 Draft Plan:

Schools:
Local schools are already at capacity and I am aware of several friends who have been unable to secure places at the schools closest and most convenient to them. Where will the additional children go to school? I object to the potential lack of school places.

Doctor’s Surgery:
It already takes between 7 and 14 days to obtain an appointment at the Horsley Medical Centre. With no additional medical facilities planned, this will create completely unsustainable pressure on already stretched facilities which I object to.

Local Road Network:
It seems that the Plan is proposing a strategic site at Wisley Airfield without even knowing what improvements to the local road infrastructure will be required. If that is the case for Wisley Airfield, then it is almost inevitably true for the proposed developments in East and West Horsley as well. I object to this. The local roads and parking at facilities such as Horsley station are already under significant pressure. The roads are already ridiculously busy and parking to visit the local shops already very difficult.

Traffic and Parking:
Assuming that every new house has at least 2 cars, this means potentially 6,000 more cars within a three mile radius of the villages. I object to thousands more cars and lorries on our local roads. The impact on local roads will be tremendous. Parking at Horsley & Effingham junction stations (which are already full), at the shops, at the medical centre and at the village hall will all be affected.

Transport:
Misery for commuters with full trains and nowhere to park. I object to fuller trains especially at commuter times.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Pollution:
The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment – already a cause for concern in several areas in the Borough. I object to higher levels of pollution in our villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Loss of Greenbelt Land:

I STRONGLY OBJECT TO BUILDING ON GREENBELT LAND. It is of paramount importance that we continue to protect our green belt and open spaces, especially when there are brown field sites available in the UK for development.

Creeping development has led to almost continuous housing from Central London to Effingham. Is this to carry on to Guildford and beyond? (1,700 houses are planned for the Guildford end of the Hogs Back and 1,000 new houses on greenfield sites in Normandy.) If we continue to build on our countryside it won’t be many decades before we have none left.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Flooding:

The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents (myself and my neighbours included, who live the other side of the railway tracks) are well aware of how much standing water there is in their/our gardens after rain. Building on such land will only exacerbate the problem. We already know what happens to local roads when it rains – the drains can’t cope. I object to more building causing flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I have objected to the scheme throughout the planning process.

1. I do not agree that the plan proposed actually meets the needs of the population needing housing and without sight of the study upon which the Council believe they need to do this it is difficult to make specific comment. The failure by the Council to release the report is a grave act against democracy.

2. Building a lot of houses with gardens is the most extravagant use of valuable land. There should be greater consideration to using land already in use to create viable accommodation and work by the use of apartments for single and double occupancy of which there is very little in the area. These facilitate the young getting on to the housing ladder and the old opening up the market of family properties.

3. The area is already over capacity with road congestion causing regular grid lock and pressure on schools and health care is at a premium level. Encouraging more people to the area is not practical.

4. Using valuable and viable farming land for houses is quite ridiculous. The Council should be looking to see how to assist the environment by reducing food miles and therefore keeping good farming land for the purpose it is intended for. This becomes more apparent following the EU Referendum result as it seems likely that even more of our food will now be brought in from the American and African countries thus increasing food miles and pollution.

5. We have seen in recent years the effect of war and how Great Britain had to struggle to survive. Every inch of land that could be cultivated was cultivated otherwise the nation would have starved. We are now living in very volatile times, war is not quite the ridiculous idea it may have once seemed and to give up food growing land to tarmac and bricks and mortar is short sighted.

6. Guildford is already at risk of flooding. Where will the water go with even more building around the town. The loss of trees to take up water, the loss of land to absorb water means the heavy rainfall we now experience is more likely to create flash floods.

5. I object to pushing farmers out of work and losing employment opportunities for those wishing to work on the land.

6. If the objections are not taken on board and the scheme goes ahead then the Council need to scrutinise to the enth degree of detail the builders financial position. This is an areas already severely hit by the EU Referendum and to start a scheme that the builder cannot then complete due to lack of finance would make the Council look very silly indeed.

I hope that the Council will reconsider all schemes for building more houses in this area and stand up to those in central government making such demands of the South East.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
In overall terms, Send residents are overwhelmingly opposed to the destruction of the Green Belt and the increase in traffic, pollution and lack of suitable infrastructure implicit in building significant numbers of new homes in Send. The continual eroding of the democratic process in Surrey, whereby local objections are not given due consideration by local planners has got to be reversed. Please listen to what local people are saying - it is incumbent on you that you do so!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/996  Respondent: 11033825 / Peter Heath  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send Marsh/ Burnt Common

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Send Village being removed from the Green Belt. The Green Belt was land put aside by our ancestors in perpetuity for the best of reasons – biodiversity, as a bulwark against urban sprawl (in providing an essential Green Space in stopping Woking and Guildford becoming one conurbation), wild life corridors and human appreciation of nature, to name but a few. Apart from anything else, Local Councillors and Central Government have given clear election promises to protect the Green Belt, as required by the National Planning Policy Framework – there are no “special circumstances” to justify abandoning it.

2. I object to building 400 houses and 7,000 sq. metres of Industrial Space at Garlick’s Arch, opposite Send Marsh Road. I object because this land is designated as Green Belt (see 1. above). It is also known that drainage in this area is bad, noise from the A3 will blight properties, traffic and population density will be considerably increased without any proposed improvement in infrastructure. If Industrial Space is required, it should be sited at Slyfield or the original proposed area of Ewbank’s Auction House at Burnt Common.

3. I object to building 45 houses at Clockbarn Nursery because it is Green Belt land (see 1. above) and there is not sufficient access for the resulting increased traffic volume. Previously approved Planning Permissions for apartments and Marina near the Tannery will of themselves generate increased traffic volumes - the narrow lanes could not take all this increased traffic and will make the junction with Send Road all the more dangerous.

4. I object to the development of 40 houses and 2 travellers’ pitches at Send Hill, again, because it is Green Belt land and has inadequate vehicular access potential. It is said the subsoil of the site includes unsafe landfill waste which is registered in documents in the possession of Guildford Borough Council.

5. I object to a new interchange with the A3 at Burnt Common because increased traffic from proposed sites at Wisley Airfield, Gosden Hill, Burpham and Blackwell Farm (approaching 6,000 houses in total) that needed to reach Woking and its railway connection with London, would have to go through Send. Send Road is already overloaded with traffic – its roundabout connection at Broadmead with Old Woking is always a stress point now – this extra traffic will swamp it! Noise and pollution levels, already dangerously high, will become toxic!

6. I request that my objections as detailed in items 1 to 5 above are shown to the Planning Inspector who will decide on each of the planning sites concerned.

7. Please confirm that you have received this letter.

In overall terms, Send residents are overwhelmingly opposed to the destruction of the Green Belt and the increase in traffic, pollution and lack of suitable infrastructure implicit in building significant numbers of new homes in Send. The continual eroding of the democratic process in Surrey, whereby local objections are not given due consideration by local planners has got to be reversed. Please listen to what local people are saying – it is incumbent on you that you do so!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I write to object to the Proposed Submission Local Plan: Strategies and Sites June 2016 (the Local Plan).

I also write to fully support the written submission by West Horsley Parish Council written on this topic.

I also write to complain that this plan, which has been touted as written after listening the last consultation does not appear to have addressed any of the concerns raised by residents in the area I live.

I also wish to point out that, as I understand it, all previous correspondence is classed as "null and void", and that this is entirely disrespectful to the citizens of the borough who took time and effort to previously address the issued in the previous local plans. It is clear and apparent that the process is made as difficult, arduous and repetitive, to break down local opposition, whilst developers simply see this process as a step to doing business.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object - Again a wishy washy set of statements that any housing developer will say they comply with I pull our some statistics to prove compliance, but, will simply build a development designed to maximize returns. Furthermore, how will this be enforced??

I note that Policy D1 outlined in the Draft Local Plan states that new developments (in excess of 25 houses) must:

- provide a harmonious, integrated mix of uses, where appropriate, that fosters a sense of community and contributes to inclusive communities that provide the facilities and services needed by them
- provide places for communities to meet and interact, such as play and recreation and other public spaces

I cannot see how the proposed developments in West Horsley can meet these criteria. I also find it completely unacceptable that the Draft Local Plan lacks any reference to provision of additional services and addresses issues outlined above. How can we use this as a basis for future planning without considering these important issues, this therefore suggests the Draft Local Plan is not fit for purpose.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
I object on the basis that it is contradictory - This policy is a pile of nonsense. The Local Plan is suggesting building on green belt land, in areas where there is already unsustainable demand for local services and poor access. Furthermore, the 35% increase in houses will lead to extra pollution, and we have a policy written here saying we should have low carbon development and decentralized energy networks ....

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Homes for all - I object - There is no need to meet an accommodation need specified in a document (the SHMA) which is neither transparent or reflective of current needs (especially considering the impact of the historic BREXIT vote in the recent referendum). I also understand that the basis behind the calculations, despite requests from some council members has not been shared.

I understand that an independent planning consultant has prepared a report which casts grave doubt on the assumptions in the SHMA and this is referenced in the West Horsley Parish Council response.

The Draft Local Plan is written in such a way to say "the population will grow [which I dispute the volume], and we should therefore provide houses for these people". We live in a free market country, and live by the premise of supply and demand. There is not a requirement to simply "supply all" without consideration of how this is completely detrimental to all current residents.

Why should existing residents be impacted by provision of huge increases in housing being built for those who do not currently live in the Borough?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Affordable Homes - I object - I see no reason to set arbitrary targets of 40% affordable homes (and what is the definition of affordable), and the fact that 70% must be rented for the parish of West Horsley specifically. Also, what is the basis of the calculation of the number of affordable homes based on a SHMA which is neither transparent or appropriate to current needs?

Furthermore, market forces given the prosperity of the local areas and proximity to London mean this policy is simply not relevant or applicable.

I must ask where are these people supposed to work? My understanding is that affordable homes are provided for those individuals in the local community whose jobs are critical to the local infrastructure, but, may not earn sufficient money to be able to afford to live in the local community.

There can be no basis for over 200 Affordable Homes within the community in which we live, we are a small village within limited local services. This therefore assumes that people will be commuting to work in other communities. I reference in this letter the lack of public transport and the impact on the local road network in the area, hence, I am left somewhat at a loss to establish how such a large number of houses can be justified for the community of West Horsley, and East Horsley.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object - I have absolutely no faith that the council will enforce this, especially having seen similar situations, for example in the Salisbury area, where friends describe children being number 400 or so in the waiting list for swimming lessons having moved into new housing estates. I also note the word "should". There is no evidence that infrastructure will be enhanced, and in fact there is no opportunity for such growth in West and East Horsley. Hence, new housing will not be supported by new infrastructure, and hence existing residents will be made to suffer by increasing numbers of users of an already strained set of local services.

Furthermore, West Horsley's two main access points are "single file only" sandwiched between houses, hence, increased traffic will cause traffic nightmare which cannot be resolved through a CIL levy.

Only recently we have seen plots of land developed where old houses have been torn down, and new residences constructed. I am in favour of replacing dilapidated homes, but, must point out that the construction of these projects has damaged the road surfaces in the immediate vicinity. Hence, if one house construction can cause such damage to the road surfaces, imagine what 400 houses can do... Please see the image here.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object - This policy is totally contravened by the suggestion to build thousands of homes on greenbelt land.

Policies A36, A37, A38, A39, A40 and A41- I object to all:

- I can categorically say based on the results of a survey of local West Horsley residents that these developments are not wanted by the existing residents
- There is absolutely no justification for this number of houses to meet the needs of the local. It is clear these sites (with the exception of A36 and A37) are located to maximize profits for landowners and developers targeting commuters to London, not for the benefits of current residents of the Guildford Borough.
19th August 2014, during an interview on the Radio 4 Today Programme, Jeff Fairburn, the Group Chief Executive of Persimmon Homes outlined that building on Green Belt land is significantly profitable for his company, more profitable than building on Brownfield land. This will be the case for all house builders.

Hence, the Draft Local Plan is allowing development in Green Belt areas, solely at the expense of local residents, generating substantial profits for house builders, without investment in the local community.

Furthermore, I note all but two sites within West and East Horsley has been located within approximately 1 mile of the railway station, effectively positioned in "prime commuting area", clearly demonstrating that the location of proposed housing has identified to maximize profits, at the expense of the local communities in which we live.

I note that there is community levy applied to new homes, but, would be very surprised if the small amount of £300 per square meter in the villages is sufficient to provide appropriate infrastructure.

Furthermore, land, when released from the Green Belt increases in value exponentially, generating windfall profits for Again, inconvenience on the local residents, windfall profits for a small number of individuals, or even corporations, who may not even be resident in the UK.

- The density the housing far exceeds that currently in place in the village settlement. The proposed density of the housing developments is completely out of character with the village of West Just looking at the style of development being built in other locations in high density configurations shows that this will not be in keeping with the community which has existed here for many years, therefore changing the character and sustainability of the location forever.
- The Raleigh School, which is oversubscribed each over 400 new houses are listed in the Draft Local Plan which will be within close proximity to the school, therefore increasing further the shortage of schooling, and also "gazumping" those who have lived in the village before them.
- The local medical facilities, which are also extremely busy.
- The local shopping facilities - there are very limited numbers of shops in West Horsley, and the nearby facilities in East Horsley are extremely busy, again with very limited congestion will become unsustainable.
- All but Site A36 are located the Local Plans designated "Surface Water Hotspot" area, why build on areas of where surface water already builds up, recent newspaper headlines can surely demonstrate this is a bad idea.
- West Horsley is treated with disdain by Guildford Borough Council, why is this one small parish subject to a 35% increase in the number of dwellings whereas Guildford (11%) and Ash / Tongham (16%) are much less affected? Could this be because that's where the majority of local councilors live?
- The density proposed will require houses completely out of character with the local environment.
- The local pavements in the area are already riddled with potholes and narrow passageways, hence, not appropriate for further expansion.
- The existing roads (specifically East Lane) already has such a high number of dangerous potholes, and these do not get how can it be considered safe to increase the number of houses, and hence increasing the volume of traffic on the roads during construction and occupation when the existing roads are not fit for purpose.
- The local roads and specifically I would like to draw your attention that the majority of this housing would be required to transition a section of road which is not wide enough for two lanes of marked traffic to pass to travel from West Horsley to Guildford - this seems ridiculous to place hundreds of additional new homes in an area where the roads cannot cope already (the potholes in the Village are already beyond a joke).
- Public Transport - There is very limited public transport in the area beyond the already crowded trains to London and consistently full parking at Horsley.
- The local services - for example the local sewerage system is already stretched and East Lane (behind the Manor Farm proposed development) has been subject to significant disruption due to overloading and the natural high water.

Therefore, existing facilities are already full to bursting, the roads to Guildford are unable to cope with the increased traffic, and the trains (and parking) are already full, the impact upon the existing community will be detrimental. The development in West Horsley can therefore not be considered as sustainable.

I consider the attack on the community of West Horsley to be unwarranted. No other community in the borough of Guildford has the targeted number of homes.

In the event that growth in the borough is required this should be considered fairly across the borough.
The spatial vision of the Local Plan states:

This is achieved by maintaining the extent and function of the Green Belt in such a way as to protect the existing character of the borough through maintaining the clear distinction between urban and rural areas and safeguarding the natural, built and historic environment. All new development will be of exemplary design and bring with it the necessary infrastructure and services required to enable future and existing communities to live sustainable lives....

and over 750 dwellings as extensions to existing villages. These dwellings will offer a variety of housing choice in villages and help contribute to supporting local services and the important role they play in village life.

This statement is breached fundamentally by the presumption to end the Green Belt Protection for West and East Horsley. Furthermore, none of the housing plans are accompanied by plans for the necessary infrastructure to support the housing programs. Any sensible person will tell you its necessary to have infrastructure in place before you build houses where people live, otherwise this places an unfair burden on existing residents.

Furthermore, how is it fair on the existing community of West and East Horsley that 2/3 of the 750 village dwellings are focused in this one area?

To summarise, the Draft Local Plan violates enshrined national law regarding the Green Belt, places unsustainable strains on the local services, changes forever the nature, spirit and feel of the community, generates profits for corporations, a small number of individuals, these funds may not be kept in the UK, and almost certainly will not be reinvested in the local community. Furthermore, the significant majority of housing is for those individuals who do not currently live in the Borough. There are no positives to take from this plan for the local residents of West Horsley, only inconvenience and imposition of irrevocable change.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object on the basis of how this is being applied - The policy states "We will continue to protect the Metropolitan Green Belt", but, based on the proposals of housing locations, this policy is not being followed. Furthermore, it has been clearly stated that building on the Greenbelt may only be allowed in exceptional circumstances, and none of the elements in this plan, including meeting the arbitrary "needs outlined in the SHMA" are appropriate to be called "exceptional".

I fundamentally object to building on Green Belt land. Building on Greenbelt land can only be allowed in "exceptional circumstances", and the local plan does not come close to justifying exceptional circumstances. A broad brush statement in section 4.3.16 of the Local Plan saying "We consider that exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development" is not justification for building the green belt, and certainly not in West Horsley. Green Belts are established in law and well ingrained into the society in which we live.
Section 9, Point 89 of the Government's National Planning Policy Framework outlines these "exceptional circumstances", and none of these apply to the extensive plans for new homes outlined in the Draft Local Plan. I also note that the Government is committed to safeguarding the Greenbelt.

The Local Plan places the majority of new home construction on Green Belt land in the next five years, and for the duration of the plan, how can this be possible? Brownfield sites should be the focus for growth. This is especially true when the economic growth areas of the borough are not in the areas where building is planned on Green Belt land.

Furthermore, once a Green Belt is infringed, this removes significant requirements for planning consent going forward, creating yet more disturbance and pain for residents in the future.

The same reasons outlined for removal of the Green Belt also apply to insetting of the Green Belt. There are no exceptional circumstances to inset the Green Belt in West Horsley. I understand the Parish Council has performed an analysis of housing demand within the Village and this is limited to a small number of homes, (~30) which can be accommodated without decimating the village through building hundreds of homes through insetting the Green Belt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object - How can it be sensible to protect areas further from London i.e. Ash and Tongham (the direction from which urban sprawl comes) over the villages closer to the M25 with commuting access to London. This is clearly politically biased (I understand a number of senior council members past and present live in Ash and Tongham) and focused on maximizing profits for housing developers.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the exaggerated "housing need" figure of 13,860 which is far too high and results in the completely unnecessary development of the Green Belt. The way student's economic need and affordability are calculated inflates the housing need. I believe that the SHMA of 2015 is highly questionable as the number of foreign students has been wrongly used to inflate the housing need. The figure of 13,860 houses is excessive, as a population increase would only need about 8000 homes at an average of 2.5 persons per house. About half of these houses could be built on brownfield sites.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site A43a - I object to the proposed new interchange onto the A3 at Burnt Common because if would be disastrous for Send and the A2.47 Send Road / Broadmead to Old Woking a would be gridlocked all day. There are schools, shops and a bus route along this already congested village road. In the other direction the A2.47 towards Newlands Corner - the section between the Onslow Arms and Glandon Park is very narrow with bends and there is only just room for cars to pass each other but lorries and buses have to mount the footway.

Site A43a I object to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/M25. This interchange will cause dangerous queueing on the A3 in both directions.

I object to all the proposed sites in Send because they were not included in the previous consultation in Unlike the rest of the borough, Send has not been properly consulted and all its sites have been changed substantially.

I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads, including the A247 which are all already at 100% capacity. GBC has completely failed to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and Green Belt. GBC have also failed to include the Town Centre Masterplan 2015 within the Local Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Local Plan proposes an increase of 500 homes in Send, that is nearly 30%. (40 at Send Hill, 60 at Tannery Lane and 400 at Garlicks Arch).

In addition, within a few kilometres there are proposals for another 4500 homes (2000 at Wisley and 1500 at Gosden Hill Farm).

Add to this the proposal to build 10 hectares of industrial/warehousing at Burnt Common.

Add to this the proposal to build north and southbound interchanges onto the A3 trunk road at Burnt Common.

This is not sustainable for such a location as Send and Ripley as there is not the capacity to upgrade the infrastructure to accommodate such increases.

Existing residents, roads and facilities will overwhelmed.

The consultation of Guildford's Local Plan in 2016 produced over 33,000 comments and one third of these came from Send.

Send appears to have been allocated additional development in this latest submission despite a reduction of the overall housing numbers in the borough, plus an increase of industrial/warehousing development.

Guildford Borough Council have requested a consultation and comments from local residents. They must take on board the comments and modify the submission accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A42. Clockbarn Nursery, Tannery Lane, Send.

Increase from 45 homes (previously) to 60 homes.

This is a 33% increase in a small location, which is excessive and ignores hundreds of previous objections by local people.

It will make worse the traffic problems in the narrow and winding Tannery Lane. There has already been a successful application for 64 houses at the Marina further down Tannery Lane and another application is pending to build houses on the garage site on the corner.

The junction with Tannery Lane and the A247 Send Road is notoriously difficult to negotiate. The bad surface water flooding in the Lane will become worse.

It will adversely affect the open countryside views from the River Wey Navigation.

I object to Policy 2 at paragraph 4.3.15.

Send Business Park now taken out of the Green Belt altogether.

It is an old non-conforming user in an area of outstanding countryside adjacent to the Wey navigation.

There is highly restricted vehicular access along this narrow winding lane.

This location is totally unsuitable for further expansion/development and it will detract from the openness of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)
   North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of “through” traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)
   There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that. The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to not protecting the Green Belt (Policy P2)
   I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; composes with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- The proposal to remove Horsley from the Green Belt cannot be justified. No exceptional circumstances or justification has been made. The Green Belt and Countryside Study is flawed.

- The proposal to extend the boundaries of the settlement areas has not been properly thought through. It appears that the reason behind this is solely to increase the amount of land available for development. The residents of West Horsley are totally opposed to the village’s removal by insetting and extending the 2003 Local Plan Settlement Area.

  The boundaries do not need to be extended.

  - West Horsley Parish is one of a rich and varied mix of well-established low density housing settlements with many historical buildings. Positioned on the North side of the North Downs, partly in the Surry Hills AONB, it attracts walkers and cyclists all year round.

The Key Evidence Document GB Economic Strategy 2013-2031 makes no case for locating large numbers of homes in either East or West Horsley or neighbouring villages.

- The scale of the increase in housing is disproportionate to the village. It would mean an increase of 35% of households within the village, greater than any other single area in the borough. Can Guildford Borough Council (GBC) tell us why we have singled out for this massive increase. 385 new houses could not be accommodated without extensive investment in roads, schools and medical facilities. Our local school is already full and oversubscribed. Drainage is inadequate and we suffer from flooding after each period of heavy rainfall. It would also alter the very heart of our village. With only one small shop, no Post Office, limited bus service, it is clearly unsustainable for the proposed high volumes of new housing. The development of these homes would be of a much higher density than already exists and would be totally out of character with the existing mix of homes.

- Thames Water has advised GBC that the areas waste water network is unlikely to be able to support the demand anticipated from all the proposed developments.

- The inflated number of houses arises from a Strategic Housing Market Assessment (SHMA) that was generated from a theoretical model which has not been revealed to the public or indeed to GBC. The SHMA target housing numbers is then further increased by GBC to give a population increase which is almost 70% higher than the official national estimates for population growth in the Borough. The need for so many houses to be built in West Horsley is totally unproven.

- The West Horsley Parish Council and Surrey Community Action Housing Survey identified the need for some 20 houses for local people who wished to remain in the village.

- I am also very concerned about the proposals to build a new town at Ockham, (Wisley Air Field), the extensive developments at Burnt Common and Gosden Hill Farm. The impact on our village of such huge developments under 2 miles away would be enormous.

I have lived in West Horsley for 30 years. I have enjoyed the semi-rural atmosphere and the strong community spirit that ties the residents together. There has been some new housing and other developments within the village during this time,
but it has been with due regard to the environment and the protection of wildlife habitats and done in a sympathetic way as to maintain the character and minimise the impact on the very fabric of our way of life.

I urge GBC to reconsider these drastic proposals and listen to the concerns of the people of West Horsley.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to say that I OBJECT VERY STRONGLY to POLICY A46. I see no exceptional circumstances for releasing this site from the Green Belt. I am also concerned that Normandy will become simply a suburb of Guildford and it will lose all identity as a village. There is only a need for a secondary school in this location if a large number of houses are built, so it cannot be justified as a separate entity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I also STRONGLY OBJECT to A27, A28, and A29. I can only imagine the impact this will have on local traffic. The roads are already far too busy, and the existing infrastructure is already under pressure. Also, there are already flooding problems in parts of Ash.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp173/127  Respondent: 11034337 / Judith Hill  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Any increase in traffic along the A323 is totally unacceptable. Any plans that are eventually implemented must have access elsewhere as this road is already up to capacity, especially if there are problems on the A3. This area is still rural and inhabitants need to be able to walk safely along footpaths and cross the road.  
2. I have no objection to the rerouting of the road over the railway line provided there is a footbridge at Ash station and there is no other building in the area. With more local traffic the problems will just be rerouted. Why not reroute the road to accommodate a bridge over the existing road?  
3. The addition of office accommodation near Ash station might be handy for commuters but it would just add to the traffic chaos. Presumably this would again hit the A323, or Ash Hill, which is always busy in the rush hour.  
4. Drainage continues to be an issue in the area, with flooding in parts.  
5. This is all Green Belt land.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to STRONGLY OBJECT to proposals made in the Guildford Borough Proposed Submission Local Plan.

Removal of Horsley from the Green Belt.

The Planning Policy Framework states that land should only be taken out of the Green Belt in exceptional Circumstances. The prime reason for the Green Belt being the protection of the countryside from urban sprawl. With continuing pressure for development this remains even more important today. There is also a requirement to safeguard the countryside from encroachment. Horsley is a village set in attractive countryside. The Green Belt designation is required to maintain the character of the village and the area, not just for the residents but also for the many visitors walkers, cyclists, golfers from London and the rest of the UK and abroad who come here to enjoy the countryside and stay at the campsite and local hotels.

The allocation of over 533 houses in The Horsleys is excessive and disproportionate and will detrimentally affect the character and appearance of the villages. This is not just the housing estates themselves but the cars (at least an extra 1000), congestion generated, the pressure on the existing local infrastructure: primary and secondary schools, doctors, sewerage, surface water, parking at the shops and stations. The Horsleys will become a congested urban area.

The loss of Green Belt protection, by ‘insetting’ would mean a presumption in favour of development. This would lead to pressure to develop every small parcel of open land in the area. No provision has been made to protect existing open areas
such as Nightingale Crescent, Kingston Meadows, play area adjacent to West Horsley village hall, land adjacent to West Horsley Motors on The Street and Weston Lee playing fields, to name a few, should they be removed from the Green Belt.

There is no justification for altering the development boundary – the villages need to continue to grow slowly and incrementally so that it does not put adverse pressure on services and the local infrastructure.

Brownfield sites must be developed before any Greenfield sites are considered.

**Infrastructure**

The NPF requires that new residential development must respect the character and density of housing in the area and be limited in quantity by the availability of infrastructure and local facilities.

The proposed amount of development is not sustainable

- There is no extra capacity at the local primary or secondary schools.
- The doctors surgery can not cope with current demand
- Existing flooding problems will be exaccerbated
- Foul water sewers regularly overflow
- Parking at the station and local shops is at capacity
- Mobile phone reception and broadband connections are poor
- An extra 1000 cars will lead to huge amounts of extra traffic on narrow country roads.
- The proposed densities will be out of character with the area

Guildford Borough Council is proposing a large percentage increase in the housing stock in Horsley with NO consideration whatsoever on the affect on the local infrastructure.

**Proposed Development Site A41**

The proposed development of this site would be seriously detrimental to the character and rural appearance of West Horsley. This land is open countryside and adjoins a group of old buildings, some of which are listed, along the historic bridleway of Lolesworth Lane. It is important that the setting of this group of buildings is maintained so that social history of West Horsley is not adversely affected. Development here would set a seriously undesirable precedent, whether it is for houses or a school.

**Proposed Development Site A40**

Of particular concern is the triangle of land to the south west of Waterloo Farm, which backs on to the campsite and the rear gardens of properties in Nightingale Crescent. This site was originally a paddock, but has now been absorbed into the grounds of Waterloo Farm, an old farmhouse, which although not listed is over 150 years old. The proposed development would seriously affect the character and setting of this historic building and would create a piece of suburban back land development.

This site is restricted by a main sewer running along the western boundary (along the fence adjacent to the campsite). Other sewers from Nightingale Crescent, cross the site and feed into this main sewer. The existing main sewer can not always cope. We have lived at 36 Nightingale Crescent for 16 years and the sewer which runs through no 38 has backed up twice causing raw sewage to flood into our rear garden.
Nightingale Crescent slopes down to this site and surface water sewers also cross the site and drain into the lake in the camp site. Our garden together with the proposed housing site and the campsite are often waterlogged and regularly flood. Please see attached photos.

Housing development will further increase these problems by generating additional surface water run off.

One of the reasons for refusing outline planning permission for the erection of three detached dwellings (access only to be considered). R14/P/00012 on 27 Feb 2014 was:

The proposed development of three dwellings has the potential to increase the risk of flooding in an area with a high risk of surface water flooding. No information has been submitted to demonstrate how the development would successfully mitigate against flooding. This is contrary to policy and G1(6) of the Guildford Borough Local Plan 2003 (as saved by CLG Direction on 24/09/07) and guidance contained in the National Planning Policy Framework.

Given that development would be constrained, its inclusion for a small number of houses would not outweigh the value it has in maintaining the rural character and setting of Waterloo Farm.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Flooding at Waterloo Farm June 2016.jpg (532 KB)  
Flooding at Waterloo Farm January 2015.jpg (649 KB)
In response to the Guildford Borough Proposed Submission Local Plan: strategy and sites: June 2016 (The Guildford Plan) published by the Guildford Council on 6th June 2016 I strongly object to developing new sites and building new housing in West Horsley and East Horsley villages including all the sites proposed in the local plan:

• A37 by the Epsom Road;
• A38 Land along East Lane from Northcote Road to Long Reach;
• A39 Land in East Horsley by the Horsley rail station;
• A40 Land at rear of Ockham Road North;
• A41 Land along Lollesworth Lane in between East Lane and railway

To begin with it is extremely disappointing that the Guildford Council has completely ignored objections previously received from residents of the villages in response to the last local plan consultation ending in September 2014 and published Proposed Submission Local plan with intention of building 385 new homes in West Horsley, an increase of 35% on the current number of homes with just a slight change in the identification of specific sites for this proposed development.

Once again as resident of the village I strongly object to this proposal.

The main reason against development of these sites is that the proposed strategies will remove the villages of East Horsley and West Horsley from the Green Belt, which is against the fundamental concept of the Green Belt as it is supposed to be the policy that immutably keeps the areas designated as the Green Belt out of projected development to retain these areas as undeveloped to surround neighboring areas.

The requirement for increase in housing is not and cannot be considered the reason for removing the villages from the Green Belt as in order to do so the potential to build in the areas which are not classed as the Green Belt has to be completely exploited which is clearly not the case in the Guildford Borough. In the Policy P2 of the Guildford Plan there is absolutely no justification for changing Green Belt boundaries that have been set up by the national legislation. According to planning and Greenbelt policy, Green Belt land can only be built in in exceptional circumstances, there are absolutely no "exceptional circumstances" outlined in the local plan to justify this encroachment in whatever form onto Green Belt land. Hence, I object to this policy statement.

The area near East Horsley and West Horsley villages is classed as Area of Outstanding Natural Beauty and attracts many visitors from London to spend time in the picturesque countryside of Surrey Hills which villages of East and West Horsley are part of. The village of West Horsley has low density housing set up with a considerable number of traditional English cottages, which contribute to the countryside character of the area. New housing in the village, especially at the density proposed will completely destroy the character of the village and will make it look like a suburban area of London or Guildford. This is particularly the case if building affordable homes in the village of West Horsley is considered as these type of housing is always high density and makes a drastic change to the outlook and demographics of the area. It is completely wrong to change the outlook of the village just because more housing has been identified as needed based upon a floored and intransparent SHMA which is then being imposed upon the villages by Guildford council. The effect will be to make the Horsleys a small town rather than a village. The concept of limited infilling that the Guildford Borough Proposed Submission Local Plan is discussing in Section 4.3.24 - 4.3.27 of Policy P2 Green Belt is absolutely ridiculous as building of additional 385 homes in West Horsley and 100 homes in East Horsley can not be considered as limited infilling (It is 35% increase on the current number of homes!!!).
Building new houses in the villages of West Horsley and East Horsley is against Protecting Policy P1 of The Guildford Plan as the areas of Surrey Hills and nearby villages have to be preserved as areas of outstanding natural beauty. This proposal is also against National Planning Policy Framework which clearly states that "inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances".

There are no special circumstances that justify such massive development in the Green Belt areas as development on brown sites in Guildford borough has not been done to full potential. It is inappropriate that 64.6% of all proposed new homes are to be built in the Green Belt. There is absolutely no justification for this.

The discussion of Policies P1 (Surrey Hills Area of Outstanding Natural Beauty) and P2 (Green Belt) is self contradictory in the Guildford Borough Proposed Submission Local Plan document as it talks of necessity to preserve such areas and at the same time very badly justifies exceptions and limitations to the rules which is unacceptable.

The next argument against development of new homes in the villages is due to limitations of current infrastructure. The village cannot be expanded with any new housing developments as the infrastructure in the village is already exploited to its full potential.

- The schools are oversubscribed in The Raleigh school has been full every year for a number of consecutive years. There are not enough secondary schools apart from Howard of Effingham School (which has limited capacity) within the area.
- The doctors surgery is operating at its full capacity and it is often difficult to get an appointment already with the current population in the villages.
- West Horsley village mainly depends on the infrastructure of East Horsley as it does not have its own post office, has only one shop and therefore additional housing proposed for West Horsley village will not be sustainable.
- New housing will create an immense burden on the drainage system in the villages and roads network, which in some places is not wide enough for cars to pass each other.

Current wastewater system will not be able to support these proposed developments. The proposed developments are all located within the “surface water hotspots” as identified within the Local Plan itself.

Public transport in the village is non-existent. There is only one bus which runs only on weekdays and on a very limited schedule and cannot be considered as a means of transport to rely on to get to work either in Leatherhead or Guildford.

The car park at the train station is full during the day and will not be able to accommodate more cars. The roads (Ockham Road, East Lane and The Street) will become busy traffic roads instead of semi-busy village roads in case new housing is built in the area.

Based on the above it is clear that this does not comply with Policy S1: Presumption in favour of sustainable development. In order to keep the area sustainable there should on the contrary be no additional housing development in the area as local services and infrastructure are already at breaking point.

The National Planning Policy Framework (NPPF) requires that new residential development MUST respect the character and density of housing in the area and be limited in quantity by the availability of infrastructure and local facilities. Although Guildford Borough proposed Local Plan talks about sustainable development there is no consideration for development of infrastructure in the villages of East and West Horsley.

It is clear that potential new residents of West Horsley and East Horsley villages will have to be employed either in London or Guildford town. The fact that there is no public transport system in place to support alternative commuting options is discussed above. Furthermore economic development of Guildford Borough for the foreseeable future does not require additional housing to be built in West or East Horsley. None of the strategic employment sites mentioned in Policy E1 (office B1a and Research & Development B1b Strategic Employment Sites, Guildford Town Centre employment core, Surrey Research Park, Guildford Business Park, London Square, Cross Lane, 57 and Liongate Ladymead) are near the Horsleys hence it would make much more economic sense to find solution for building new houses close to new economic development sites and not in the Green Belt area.

It is clear that one of the main incentives for building new housing in the villages is opportunity of selling new houses at premium as the villages are within commuting distance to central London. Hence with regard to "fairness", how is it
possible to support this plan, which prioritizes profits for housing developers, and landowners (who most likely either do not live in the area, or will move away from the building based on their windfall profits), and imposes costs (financial and lifestyle) on those who live in the community? The balance of houses have been identified as for 40% of the developments to be “affordable homes”, there is absolutely no reason to suggest that the residents of the Horsley's have a need for over 200 affordable homes. Surely it makes more sense for houses to be built in areas which are sustainable, in areas with appropriate infrastructure, and close to the local area in which people who buy the houses work?

Having discussed above the arguments why additional housing will become an unsustainable burden for the existing infrastructure and unfairness of development on the Green Belt which is both unbalanced and unsustainable I would like to reiterate my main objection that there is no justification for removal of the villages of West and East Horsley from the Green Belt. I strongly oppose the removal of the villages from the Green Belt also because it sets up a vicious precedent to exploit the opportunity and destroy the area of outstanding natural beauty in the future beyond the timescale discussed in the current local plan.

The suggestion in the local plan to create new areas of the Green Belt between Ash Green village and the Ash & Tongham urban area to compensate for the removal of the villages of West and East Horsley is not enough. There is no need to destroy certain areas of the Green Belt to create others

Why should Guildford Council enforce the construction of new homes, in areas which are unsustainable, where infrastructure is insufficient, in areas where the local community objects, changing the face and demographics of villages in order to generate profits for house builders, and enable the council to declare it can meet an unjustified housing demand?

I once again would like to reiterate that I strongly object building of new houses in the areas discussed in the Guildford Borough Proposed Submission Local Plan: strategy and sites: June 2016 in the villages of East and West Horsley particularly as I am against removal of the villages from the Green Belt. I trust that my opinion and my comments will be considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPA16/1436  **Respondent:** 11034817 / Nick Pycraft  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

I am writing to you to protest about the plans for building on Green Belt sites in and around Send and Send Marsh.

I object to Send being removed from the Green Belt (Policy P2). The National Planning Policy Framework (point 80) states that one of the purposes of Green Belt land is ‘to prevent neighbouring towns merging into one another’. Send village and its surrounding Green Belt land acts as the necessary buffer between Guildford and Woking.

I object to the building of 45 houses at Clockbarn Nursery. Planning permission has already been given for 64 houses in Tannery Lane, an area already unsuited to further development, due to both its frequent flooding and the narrow and winding lane. The lane simply cannot take the traffic an additional 45 houses would bring.

I object to the proposals for the development of 40 houses and 2 traveller's pitches at Send Hill (Policy A44 . 1.9 ha). The single track road would not be able to take the additional traffic, leading to potential gridlock. Send already suffers near
gridlock in the mornings and especially in the evenings as vehicles travel through the village from the A3 to Woking and vice versa. This is also the case during the morning and afternoon school runs, with two schools in Send. This also raises the concern of safety for pupils and parents at these times.

I object to the proposed new interchange onto the A3 at Burnt Common for the same reasons as above; namely due to Send and Send Marsh not being able to cope with the additional traffic.

I object to the development at Garlick's Arch for 400 houses and 7000 square metres of industrial space. This area is prone to flooding. It also has ancient woodland, just the kind of specific area the Green Belt was established to protect. The industrial space is also unnecessary, based on the current Employment Land Needs Assessment 2015 (ELNA). This shows a reduction of 80% in required employment floor space from the previous draft plan.

I also understand that Slyfield actually has a large area which would be much more suited.

I object to the Plan due to the fact that the infrastructure of Send and Send Marsh simply cannot cope with the increased traffic and also the strain on local services such as the schools and the surgery. I urge you to abandon the Plan forthwith.

Pressure on services

I work with parents in the antenatal and postnatal period and repeatedly see how overstretched the Maternity Services are in Guildford. I have also seen first-hand how long waiting lists are for hospital services such as the paediatric dietician. I do not believe that the Royal Surrey has the capacity to meet demand from the planned increase in housing and population, and certainly not within Maternity and Paediatric Services. Current and future residents will suffer from a lower quality of care and longer waiting times as a result of the planned expansion.

Schools are also already under pressure from an increase in the birth rate and have already been expanded (sometimes inappropriately I feel) to help cope with this. Despite the new schools planned, I worry that there will not be the capacity to absorb the number of children living in Guildford in the future with the proposed developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Transport

The transport infrastructure in Guildford is already stretched to its limits at peak times - the A3 and A31 in the area of Onslow Village, the hospital and the cathedral, in particular. The road network is simply at or beyond capacity and adding further traffic to the area would cause misery for commuters, local residents and emergency services alike. I actually find it incredible that anyone could have proposed the scale of development they have for the west of Guildford in light of its impact on the road network as must surely have been highlighted by any traffic assessments.

Locally to us, the infant school in Onslow Village is already subject to considerable road noise and pollution, which would worsen if the A3 was widened, which surely it would have to be to cope with any future expansion, let alone the amount proposed. Only a major project such as the A3 Guildford bypass tunnel project would be likely to have a significant impact. Additionally, the proposed junction for the Blackwell Farm development at the top of the Farnham Road is likely to make the roads busier and more dangerous in Onslow Village as vehicles seek to find alternative, clearer routes, magnifying the current issues that occur whenever there are problems on the A3 or A31.

Train transport is similarly at its limits in Guildford with commuter trains between Guildford and London some of the most overcrowded in the country – my husband is forced to stand or sit on the floor during his daily commute despite several trains an hour and an expensive season ticket. Any increase in capacity as a result of electrification of tracks or increased numbers of trains is needed just to deal with current problems. I am baffled as to how adding extra stations at ‘East’ and ‘West’ Guildford is supposed to help as surely the majority of those commuters would just be using the trains from there as a shuttle to the mainline station?

I do not believe that the proposed mitigating interventions do more than tinker at the edges, even if they were only to tackle the current issues, and are woefully inadequate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Environment

I do not believe that the majority of residents would support expansion into (and the continuing shift of the boundaries of) the Green Belt, particularly not on this scale. The development seems to be 50-70% within the green belt - how can such an encroachment be morally acceptable to the council? This expansion will impact local wildlife, spoil views from the Hog’s Back and parts of the Downs, and have potentially dire effects on surface water flooding in Guildford due to loss of natural capacity for soak-away at a time when it is widely thought that our climate is becoming more unpredictable and extreme. Additionally, the new road for Blackwell Farm cuts through ancient woodland and the Surrey Hills AONB. The countryside surrounding Guildford is something we should be protecting for our children.

I also feel strongly that the council have been dishonest to repeatedly commit to protecting the Green Belt, or to promise countryside areas to the people of Guildford, and to then shift the boundaries or locations to suit its own aims; this has undermined my trust in the council, and in politics, generally. I fear even more for the protection of our countryside with the recent decision to leave the European Union.

There will also be impacts on visual amenity with the views from the Hog’s Back and North Downs blighted by huge numbers of buildings.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to object to the local plan on the basis that, despite the minor changes made, it still commits Guildford to development that I feel is inappropriate for the town and area, in scale and nature. I continue to object in particular to the planned large-scale expansion into the Green Belt at the Blackwell Farm site. Many of my points remain the same as I have not seen much in the amended plan to change my views.

Scale

The scale of development proposed in Guildford still seems completely out of proportion to the town. The proposed developments significantly increase the footprint of the town and encroach considerably into the countryside that helps make our town so special, materially changing Guildford for the worse for local people. It still makes no sense to me why our borough is proposing greater per annum building targets than areas such as Woking and Weybridge. I also believe that Housing ‘need’ continues to be subjective whatever ‘assessment’ you do – people ‘wanting’ to live somewhere is not the same as needing to, and building lots of housing attracts people, making the assessment a self-fulfilling prophecy. Furthermore, the recent decision to leave the EU and reduce immigration as a consequence, coupled with the projected reduction in economic growth reinforces the view that the population projections on which your assessments were based overstate the required level of development and need to be urgently reassessed.

Inappropriately overburdening some areas

Despite it stating in the local plan document that, ‘We have sought to select sites carefully and in a way which does not overburden any single area of our borough and ensure that the right infrastructure is in place’, this is clearly not true in the case of the Manor/Blackwell Farm development, which would be hugely overburdening the west of Guildford. This is especially true in light of the additional proposed development at the cathedral site.

Character

I believe that the large scale developments planned will materially damage the character of Guildford and make it a less desirable area to live in – after all the unique urban/rural character of Guildford is surely what drives the demand to live here – certainly it was for us. The approval of this scale of development would be enough to prompt us to consider moving elsewhere.

Plan

Finally, I want to draw attention to how inaccessible I found the consultation documents and the ‘presentation’ video on your website – I am educated to post-degree level and still struggled to follow what you were talking about at times. In addition, the sheer volume of paperwork that we have had to wade through to prepare an objection must be hugely off-putting to many people. I can’t help feeling that the council will be forcing the plan through and claiming reduced objections when this is not because less people object but rather as a result of people getting ‘objection-fatigue’ or being put off by the way the volume of information is being presented, where even the maps are very difficult to interpret, particularly on a computer screen where you are forced to zoom in and out repeatedly.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
I am writing to object to Guildford Borough Council’s changes to the draft Local Plan and in particular to object to the inclusion of Blackwell Farm (site/policy A26 para 4.1.9).

I do not believe that Blackwell Farm is a suitable site for all the reasons that I have listed in detail on the previous two consultations (!) but in reference to the latest document in particular…

- I do not believe that the result of the EU referendum, and resultant reduction in likely population increases, has been taken into account when projecting housing ‘need’.
- The inclusion of Blackwell Farm disregards independent expert advice on the landscape value of the area as a potential Area of Outstanding Natural Beauty (p1 para 4.3.8) and builds on a very significant amount of the valued Green Belt. It ignores government policy on protection of these areas (NPPF, para 115+116) and fails to include cost and scope of development elsewhere (s2, para 4.1.9).
- I live in Onslow Village and we already suffer on a daily basis from the area being used as a rat-run for vehicles trying to avoid the traffic on the A3 and A31 with severe issues on the A3 in particular a very regular problem. If this development goes ahead, this will inevitably worsen and other villages such as Compton and Puttenham will be drawn in too. Congestion in our area is already awful during peak times – this too will worsen, particularly as the intended development includes yet more office space close to an existing busy business park (E4 (2)). Indeed, expert traffic studies, which the council has access to, question the viability of the development at all (2.14a). Access to the Royal Surrey A and E is already very challenging and an increase in traffic will put lives at risk.
- Pollution is also a big issue – the levels in our area already consistently exceed safe EU limits on pollution – the building work, the finished housing development and the resultant traffic increases will all further worsen pollution locally, affecting our health and that of the other families in our areas and neighbouring areas and villages (A26 key considerations (7)).

Please reconsider the use of Blackwell Farm on this scale – it is not appropriate and will have a hugely negative impact on our town and countryside.

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Development of Wisley Airfield on the basis of:

Volume of houses and their occupants - This is a whole new town

According to the Census of 2011, both Horsleys have a combined population of 5,118. 2,000 new houses would have a population, given some single person accommodation and some families of at least 5,000 people. This would swamp the surrounding villages, their roads, health services and schools.

Transport. Our local roads are already overcrowded. The M25 is regularly gridlocked and access to the A3 on a ‘consented direct access’ can only increase the congestion. If each household has just one extra car, this will be an additional 2,000 cars. It is more likely that each family will have more than one car especially since the nearest railway station is only reachable by bicycle or bus rather than on foot.

Increased Air Pollution. Resulting from more vehicles in the long term and many HGVs during construction of the site.

If you require further proof, take the A429 past Jennett’s Park in Bracknell, 1500 houses planned. First opened in 2009/2010, still looks like a raw building site. We do not need 2,000 new houses at Wisley Airfield.

WRONG PROJECT IN THE WRONG PLACE.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposals for over 2000 houses at Wisley.

The existing levels of pollution and traffic congestion will not be solved by adding 2,000 homes and association development to this area. It is too too large for the area given its proximity to already congested roads and too large to be accommodated within the Community. There will be a total gridlock of traffic. Furthermore 2,000 houses will never be absorbed into the existing small villages in this area.

Several applications for this development have been turned down but the GBC Executive refuses to listen to any objection and seems determined to go ahead with this development, even after all the Councillors rejected the last application. The site was returned to the Draft Local Plan within days of this decision. Five storey flats would be an eyesore from all points of the Downs. The site is very visible as it is on a dome of land. At present, the airstrip, which should have been removed after its war-time requisitioning, is not visible among the green fields.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is brown field land available in the Guildford town centre which is being earmarked for commercial development rather than housing. This is more than enough to meet the housing needs by using this area. This is despite the evidence that shopping trends are moving online and retail is a declining industry. There is no reliable evidence that Town Centre can support expansion of 45,000 sq m of additional retail space in North Street. As shopping trends change to move online, retail is declining. The space should be used for housing and the money should be used to improve transport and other infrastructure

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

the policy says that provision will be made for 13,860 new homes. However, I believe the need for this number is based on flawed assumptions and assessment of future needs in housing. The number of new houses proposed have been generated from a Strategic Housing Market Assessment mathematical model, which was not revealed in the plan. This housing target has then been increased further by Guildford Borough Council to give a population increase almost 70% higher than the official national estimates for population growth in the Borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy 11 states infrastructure will be secured by planning obligation, planning condition, or from other infrastructure funding, including the Community infrastructure Levy.

However, there is a completely inadequate plan for addressing the infrastructure issues I have highlighted above. Roads around Ockham Road North and East and West Horsley are already busy and narrow and could not accommodate further traffic without, in addition to pollution issues, impact on vehicle and pedestrian safety. Relevant proposed road improvements focus on the A3 and £1 million for ‘East Horsley and West Horsley traffic management and environmental improvement scheme between 2019 and 2023’. With the number of houses proposed above but additionally the developments in Wisley and Clandon, this is clearly completely inadequate and too late.

As a health professional, the proposed expansion of Horsley Health Centre in 5-15 years is not acceptable. The number of GPs are reducing with retirements and there is no identified funding for such expansion. What provision will be made at the outset of building developments?

There are no proposals for how increased pressure on mains water, waste water, education and potential flooding will be met in the Horsley area.

In summary, I object to the plan for the reasons set out above, in particular to the proposed developments in East and West Horsley but also noting the extensive development nearby in Wisley and Clandon which doesn’t adequately consider infrastructure issues. I must ask you to amend the Local Plan to utilise brownfield land rather than green field sites.

Finally, I also note that the plan is very similar to that proposed in 2014 and ignores most of the comments received from the consultation at that time, most of which objections to the proposals. I trust the Council will listen this time.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Neither the policy nor the supporting Green Belt papers give any coherent justification for the proposed changes to the Green Belt. Indeed, policy H2 refers frequently to the quality of the countryside within the Borough. There are five legal purposes for Green Belt and our Green Belt meets them all. There are no exceptional circumstances that justify building the majority of the proposed new houses on Green Belt land or for insetting villages from the Green Belt. Green Belt preserves air quality and prevents flooding. The legal purposes for the Green Belt include:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns
- To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is not an exceptional circumstance in law. The Plan has failed to disclose any exceptional circumstances to support such a change in boundaries and Green Belt boundaries should not be changed through the planning process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy S1 Presumption in favour of sustainable development objection

The Local Plan doesn’t demonstrate that this policy is met. The 385 + houses proposed in West Horsley accounts for an increase of 35% on the current number of homes in this area alone. In addition, 100 homes are proposed on a site in East Horsley near to the Station, adjacent to the West Horsley parish boundary. This is not in keeping with the number and density of housing in the local area. This equates conservatively to 1,000 additional people with no consideration of infrastructure and consequent environmental impact. The local schools are already full. Medical facilities are stretched, drainage inadequate, road infrastructure is narrow and poor, and parking difficult. Building this number of homes will lead to flood risk here and further downstream.

The developments should be in urban areas where there is sustainable transport and where the infrastructure issues highlighted above can be addressed. The already stretched train system in Horsley is not set up to cope with the additional commuters and car parking is already fully used.

In addition, developments at Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so every adult will have a car, putting additional pressure on the rail system.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I writing to object to the 2016 Regulation 19 Draft Local Plan. I find the plan has not addressed my concerns regarding infrastructure capacity such as traffic on the A247 and pressure on the Villages medical centre. I re-send with this letter my original objection to the 2014 consultation.

I object to building 485 homes in Send Parish and the scale of development proposed for Send. I object to sites A42, A44 and A43 and building 400 houses at Garlicks Arch.

The population will increase by more than 25% leading to congestion on roads and pressure on the medical centre.

I object to A43a and building a new on/off slip road to the A3 at Burnt Common as it will increase traffic and air pollution along on main A247.

I object to removing the Send Lakes from SNCl status. Bats, Herons, Kingfishers and Hedgehogs are all part of the wildlife that can been seen in and around the lakes. The local plan should encourage through policies preserving SNCl status as a part of the local plan’s environmental sustainability. It should not be removing it.

I object to removing Send from the Green Belt. Keeping Send in the Green Belt is an important buffer between Woking and Guildford to preventing the two settlements merging.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Green Belt Policy P2 at paragraph 43.15 to inset Send Business park from the Green Belt. This will increase traffic and pollution on the A247.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/5113   Respondent: 11035873 / Alison Johnson   Agent:
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

**Comment ID:** SQLP16/623  **Respondent:** 11035937 / Giles Reid  **Agent:**

**Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

*The number of houses planned has risen to 693 houses per year over the next 20 years (compared with 652 per year in the 2014 Draft) and is more than double the 322 houses per year that was approved in the 2003 Local Plan.*

- 65% of new houses in the Borough are to be built on land that is currently in the Green Belt.
- Section 150 of the Housing and Planning Act 2016 states that a site, once identified in a Local Plan, is assumed to have permission to go ahead in principle, which means normal planning restrictions may be difficult to impose later.
- Little notice has been taken of the comments received after the last round of consultation.

**Traffic and parking:** Assuming that every new house has at least 2 cars, this means potentially 6,000 more cars within a three mile radius of the villages. The impact on local roads will be tremendous. Parking at Horsley & Effingham junction stations (which are already full), at the shops, at the medical centre and at the village hall will all be affected.
Local Road Network: In respect of the proposals for development at Wisley Airfield and for an upgrade the current A3 junction at Burntcommon to a full 4-way junction, SCC traffic modelling anticipates increased use of Guilleshall Lane, Hungry Hill Lane and Tithebarns Lane for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond. The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”. It appears that the Plan is proposing a strategic site at Wisley Airfield without even knowing what improvements to the local road infrastructure will be required. If that is the case for Wisley Airfield, then it is almost inevitably true for the proposed developments in East and West Horsley as well.

Pollution: The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment – already a cause for concern in several areas in the Borough.

Flooding: The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents are well aware of how much standing water there is in their gardens after rain. Building on such land will only exacerbate the problem. We already know what happens to local roads when it rains – the drains can’t cope.

Schools: Local schools are already at capacity – where will newcomers go to school? No extra places are planned in the Horsleys, and the school places proposed at Wisley Airfield will not planned until many years into the project.

Medical facilities: Similar situation to the schools.

Loss of Green Belt land: Sadiq Khan, new Mayor of London, has instructed London planners not to approve development on Green Belt Land within the M25. If we continue to build on our countryside it won’t be many decades before we have none left. Creeping development has led to almost continuous housing from Central London to Effingham. Is this to carry on to Guildford and beyond? (1,700 houses are planned for the Guildford end of the Hogs Back and 1,000 new houses on greenfield sites in Normandy.)

Transport: Misery for commuters, nowhere to park and full trains at commuting times

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not believe that Guildford Borough Council are taking into account the green belt when establishing housing targets. Guildford is a highly sought after area in a large part due to the mix of housing and green belt. The Council (and in particular the Councillors that have been elected by the electorate) has a moral duty to maintain the green belt to avoid establishing a precedent that destroys Guildford for future generations. The Council must not remove areas from the Green Belt, and I cannot see that this is direction being provided by central government to local government so the onus is on my local Councillors. I have lived in East Horsley all my life, and I am delighted to bring up my children in East Horsley. I fear gravely that the actions of the Council in regard to development will lead to making areas such as Horsley not as attractive for them to live and bring up their children. I believe that East Horsley must not be inset from the Green Belt. I
strongly object to the movement of the settlement boundary proposed under Amendment 4 in Appendix H map of East Horsley (South), proposed as part of Policy P2.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Having read the revisions to the local plan I am writing to strongly object to the local plan as it currently stands. Whilst I recognise that there are improvements such as stopping the development of the Thatcher’s site, I am fundamentally opposed to any development of the green belt in the borough of Guildford or any proposal to inset East Horsley from the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Having read the revisions to the local plan I am writing to strongly object to the local plan as it currently stands. I believe that East Horsley must not be inset from the Green Belt. I
strongly object to the movement of the settlement boundary proposed under Amendment 4 in Appendix H map of East Horsley (South), proposed as part of Policy P2.

I understand the housing pressures and the need for the Council to provide affordable housing and lower cost housing, but I think Guildford borough has a unique challenge. Given the desirability of the area, the development of areas such as East Horsley will lead to additional supply but this won’t be affordable housing for most. Guildford is an expensive area and this challenge remains. I believe that Guildford needs to revise the number of dwellings proposed at Wisley airfield. The infrastructure (doctors; trains; parking; roads) cannot cope and no adequate solutions are proposed.

The Council (and in particular the Councillors that have been elected by the electorate) has a moral duty to maintain the green belt to avoid establishing a precedent that destroys Guildford for future generations. The Council must not remove areas from the Green Belt, and I cannot see that this is direction being provided by central government to local government so the onus is on my local Councillors. I have lived in East Horsley all my life, and I am delighted to bring up my children in East Horsley. I fear gravely that the actions of the Council in regard to development will lead to making areas such as Horsley not as attractive for them to live and bring up their children. I believe that East Horsley must not be inset from the Green Belt. I strongly object to the movement of the settlement boundary proposed under Amendment 4 in Appendix H map of East Horsley (South), proposed as part of Policy P2.

I understand the housing pressures and the need for the Council to provide affordable housing and lower cost housing, but I think Guildford borough has a unique challenge. Given the desirability of the area, the development of areas such as East Horsley will lead to additional supply but this won’t be affordable housing for most. Guildford is an expensive area and this challenge remains. I believe that Guildford needs to revise the number of dwellings proposed at Wisley airfield. The infrastructure (doctors; trains; parking; roads) cannot cope and no adequate solutions are proposed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car traffic proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  3. The congestion of this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will...
exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We are calling on the Council to respect the nature and character of our villages and impose a maximum development target of 20% housing every four years (of the total number of houses envisioned in the Local Plan).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

A lot of work has gone into the Local Plan. It is obvious for anyone who has read through the Local Plan that the Guildford Borough Council’s civil servants have done an excellent job with the brief that were given. Unfortunately the brief does not address the borough’s needs adequately.

The situation we find ourselves in and in need to remediate is the result of the short-sighted 13 years of Conservative leadership of the GBC. We are in need of housing, both social as well as for the professionals in low to average income jobs that support Guildford’s borough; nurses, police officers, retail workers, bus drivers and a raft of other professionals.
struggle to find affordable accommodation within Guildford. This results in most of them living outside Guildford and commuting into town, resulting in part in the traffic gridlock most of us experience on a daily basis trying to traverse the city centre. The policies put forward by the GBC do not address the needs of our Borough.

We are calling on the Council to evaluate high-rise, high-density buildings within the centre of Guildford before allowing development in the villages and in the Green Belt. Woking is a good example where multi-story buildings blend in to the city’s life and provide a young and vibrant population.

We are calling on the Council to provide innovative housing accommodation for our young professionals such as purpose-built Multiple Occupancy Houses. Where the Local Plan identifies such accommodation may be created, we ask the council to use the Council’s building company to provide such accommodation for our residents.

We are calling on the Council to provide social housing that addresses our current needs instead of mandating a 40% quota of affordable housing which may well not suffice. The “affordable” housing proposed by the Local Plan is not affordable for most of our residents.

We are calling on the Council to provide accommodation suitable for our ageing population also and include policies that protect the existing bungalows used by our older residents.

We are calling on the Council to ensure decent living standards for everyone by mandating that the 12 Building for Life principles apply to every housing development and only by exception allow developments not to meet these standards.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

No development can be sustainable without the right infrastructure supporting it. In this we support the Council in ensuring that infrastructure is created alongside or before any development. We are also calling for innovative approaches to providing the required infrastructure such as working with existing GP services to expand current premises or create additional GP branches to support the increased development.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

I am putting all the comments here as they apply to a number of sections and the method of providing feedback is slightly ludicrous and geared towards making it difficult to provide comments.

Overall a good starter plan but it doesn't go far enough or is sound enough. Unfortunately the plan does not address the borough’s needs.

We are in need of housing both social as well as for the professionals in low to average income jobs that support Guildford Borough’s. Nurses, police offices, retail workers, bus drivers and a raft of other professionals struggle to find affordable accommodation within Guildford. This results in most of them leaving outside Guildford and commuting into town resulting in part to the traffic gridlock most of us experience on a daily basis trying to traverse the city centre. The policies put forward by the GBC do not address the needs of our Borough.

You need evaluate high-rise, high-density buildings within the centre of Guildford before allowing development in the villages and in the Green Belt. Woking is a good example where multi-story buildings blend in to the city’s life and provide a young and vibrant population. such an approach would make the town more vibrant and provide the much needed accommodation.

You should use the council-owned building company to provide innovative housing accommodation your young professionals such as Multiple Occupancy Houses.

You need to ensure that social housing is provided that addresses our current needs instead of mandating a 40% quota of affordable housing. The “affordable” housing proposed by the Local Plan is not affordable for most of our residents and is a ridiculous measure to use.

You need to consider the aging population and provide accommodation suitable for our aging population and include policies that protect the existing bungalows used by our older residents.

You should mandate that the 12 Building for Life principles apply to every housing development and only by exception allow developments to not meet these standards.

We need to respect the nature and character of our villages and impose a maximum development target of 20% housing every four years (of the total number of houses envisioned in the Local Plan).

We need to increase the land allocated for offices and manufacturing. We envision Guildford Borough to be a city in its own right and go beyond the commuter town envisaged by the current Executive Committee.

I strongly support the protection of all Areas of Outstanding Natural Beauty and I am glad this is in the plan.

The infrastructure model needs improvement. You need to put forward a travelling and commuting scheme that encourages and promotes the use of public transport over car usage. more areas to be pedestrianised and for more cycling lanes.

I support to plan to redevelop the bus station and make it a station our residents can be proud of.

The development of of River Wey should be included to the Local Plan and ensure a holistic development for our riverfront and town centre.
More innovative approaches should be undertaken to providing the required infrastructure such as working with existing GP services to expand current premises or create additional GP branches to support the increased development.

Finally, I ask you to be transparent and provide a full and detailed analysis of our development SHMA targets. The development of the GBC is integral to this Borough’s future and our residents will support such development where transparency exists and all other options have been considered and exhausted. Currently this is not the case. be transparent in everything

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- In terms of policy D1 The monitoring indicators of the same policy do not state what level success looks like. Very vague. 100% should be built for the quality mark.
- Policy D1 Design places, point 2 “should” go back to “must”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/2174  Respondent: 11036129 / George Dokimakis  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy D2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy D2 point 9 commendable increase. New developments should also include charging points for electric vehicles. we should be planning for the future.

4.5.16a about sustainable development should say appropriate to the development instead of proportionate

4.5.30 retails buildings should not be exempt from the carbon reduction. All measures apply equally across the board. No distinctions should be made between housing and retail.

4.5.37a should be removed
4.5.30a allows for a way out of meeting carbon emission needs. It should be removed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- Policy D4 About Character and Design of new developments, Building for life should be made mandatory

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/2166  Respondent: 11036129 / George Dokimakis  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- Social housing needs to be mandated as part of the H1 policy. Social Housing should not segregated from other developments. Mixed development has numerous benefits and should be supported by GBC.
- Affordable housing includes social housing but makes no distinction of percentages. 40% affordable housing is mandated and at least 20% of it should be social housing as a minimum.
- Great about student accommodation. The key thing is that student accommodation needs to be expanded beyond the University of Surrey to include other academic institutions such as Merrist-Wood College, ACM, Drama School and the University of Law.
- Overall the Local Plan should be considering house density, not number of houses. Look at how many people live there, not how many houses we build.
- All houses built should be of a good standard. The Local Plan should mandate Build for Life standard for all houses.
- All measures for carbon reduction must apply equally across the board. No distinctions should be made between housing and retail.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The infrastructure cannot cope with the existing population, never mind one expanded by 20-25%.

Roads are already congested and frequently grid-locked during commute and school times. The merest accident on the A3 grid-locks the town centre due to traffic avoidance.

Sort out the infrastructure first, then consider housing expansion.

I OBJECT to Guildford Borough Council’s draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

- Destroy views from the Hog’s Back ridge - a nationally designated Area of Outstanding Natural Beauty
- Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- Increase tailbacks on the A31 and traffic congestion
- Result in rat-running through local roads
- Add to Guildford’s pollution

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6698  Respondent: 11036289 / Osman Abdullah  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A26 Blackwell Farm. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints. Blackwell Farm is located entirely within the green belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Blackwell Farm performs all five functions of green belt, and fulfils purposes 1, 3 and 5 very strongly. Purpose 1 - “checking the unrestricted sprawl of large built-up areas”. There is huge pressure to develop on the western edge of Guildford; the University of Surrey has stated publicly that its key objective is to develop the whole of its landholdings, stretching west to Flexford Farm. This, combined with the indefensible boundary being proposed (a hedgerow rather than the existing belt of ancient woodland), will put more of the green belt and the Surrey Hills Area of Outstanding Natural Beauty (AONB) at risk of future development. Purpose 3 “assists in safeguarding the countryside from encroachment” - the proposed movement of the green belt boundary on the west of Guildford to allow for development of the University in 2004 resulted in the encroachment on countryside and the loss of working farmland (including some Grade 2) at Manor Farm. The proposed future change in the boundary would result in further encroachment and the loss of farmland including further Grade 2. The proposed road development with access road from the A31 would also effectively cut off farm access to the south of the development area leading to further urban influence on this countryside. The University’s stated key objective is to develop land, which includes Chalkpit and Wildfield farms leading to the risk of further boundary change and further encroachment in future years. Purpose 5 - “assists in urban regeneration by encouraging the recycling of derelict and other urban land” Whilst all green belt assists towards this purpose, the ownership of this land by the University of Surrey with its extensive landholdings within the urban boundary (including land it leases to the Hospital and Holiday Inn, the Surrey Research Park, Hazel Farm as well as two large campuses) means that the location of Blackwell Farm within the green belt plays an even greater and direct role in encouraging the more efficient usage of urban land. Stopping development on Blackwell Farm would result in the University of Surrey investing in, and regenerating, land in its ownership and delivering its commitments following the 2003 boundary review (including 270 homes for key workers, 3,125 student residences and releasing further accommodation at Hazel Farm). The University has
17 hectares of surface car parking that could be built over with offices and flats. This is a more sustainable option than building over open farmland (largely grade 2 and 3a) within the green belt. The Blackwell Farm development would result in harm to the Surrey Hills Area of Outstanding Natural Beauty (AONB), harm to an Area of Great Landscape Value (AGLV), and harm to the setting to the AONB. (Blackwell Farm forms the views into and out of the Hogs Back ridge). The NPPF is clear that AONBs should be afforded the highest level of protection in relation to landscape and scenic beauty. All development proposals within and adjacent to the AONB must conserve or enhance its special qualities. The NPPF also makes it clear that applications for major development in the AONB will be refused unless exceptional circumstances are demonstrated and the development is proven to be in the public’s interest. Guildford Borough Council has not shown that the proposed housing development or the extension of the Research Park, or the proposed link road from the A31 to Gill Avenue, is in the wider public interest. Indeed, the increased traffic through the already congested Egerton Road/Gill Avenue junction, which would result from the development, would impede emergency vehicles travelling to the Hospital and this would be very much against public interest. GBC’s Policy P1 states that, “The Surrey Hills Area of Outstanding Natural Beauty (AONB) will be conserved and enhanced to maximise its special landscape qualities and protect it from inappropriate development. All proposals will be considered against whether they conserve and/or enhance the setting and views of the AONB”. I question how the proposal to carve a new two-lane carriageway through the AONB fits this policy, or meets para 115 of the NPPF? Finally, nearly the whole site has been identified as a “candidate area” for AONB status in the Landscape Evaluation Study commissioned by Compton, Worplesdon and Wanborough parish councils. Therefore, the entire site should be treated as though it is within the AONB during this local planning process. The access to the proposed Blackwell Farm site will put additional peak hour pressure on two of Guildford’s worst congestion “hot spots”: the A31 (Hog’s Back) and the Tesco Roundabout on Gill Avenue. GBC’s proposal to create a new major route into Guildford from the west at, or close to, the Down Place private driveway, and to make this the main access to the planned Blackwell Farm development, does not appear to have been thought through. There are queues stretching back from the Farnham Road Bridge as far as the Down Place driveway entrance most weekday mornings and any traffic generated by the new development would not be able to clear the junction. In order to accommodate the volume of traffic using the new junction (generated by residents of the new housing estate, employees at the Surrey Research Park, Hospital and University, and visitors to the new school/supermarket), there would almost certainly need to be a roundabout (rather than the proposed traffic-light controlled junction) and GBC has ruled out a roundabout on grounds of landscape impact and traffic. The secondary access to the site at Gill Avenue also presents problems, and as GBC states in its Transport Assessment (14.9.5), changes planned for the Tesco roundabout will not mitigate against the increased level of traffic through the junction as a result of the Blackwell Farm development, and in turn will impact on the Egerton Road/Gill Avenue junction, which serves the Royal Surrey County Hospital. I question whether it is responsible to allow a development that would impede emergency access to an A&E department and a major incident unit. The traffic impact resulting from the development of Blackwell Farm on the strategic road network would not appear to be properly assessed but it would be alleviated in part (but not completely) by widening the A3. However, timing and funding for this work is unclear so there would be many years of traffic chaos before any widening took place (if indeed it does). More significantly, the widening of the A3 would create noise and environmental impact on the neighbouring residential areas of Onslow Village and Beechcroft Drive and a six-lane highway would cause greater severance between Guildford and Blackwell Farm and areas to the west. The NPPF states in Section 6 para 47 that local authorities should “identify a supply of specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15”. In a footnote to this, it further adds, “To be considered developable, sites should be in a suitable location for housing development and there should be a reasonable prospect that the site is available and could be viably developed at the point envisaged.” I consider that the proposed access arrangements to Blackwell Farm are wholly inadequate for a development of this scale and thus the site cannot be “viably developed”.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of land from Greenbelt for the provision of two traveler pitches on Puttenham Heath Road to 'enable delivery'. The area warrants Green belt status and should remain in Green Belt. Removal is a big step towards the eventual development of permanent accommodation, which would result in loss of the two pitches.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy D1 Making better places  I object to the absence of any reference to vernacular or historic design guidelines, even in Conservation Areas. Most of the borough, especially the rural areas, has vernacular design guidelines that are available to give suggestions as to appropriate design. These should have mandatory planning force. The monitoring of this policy is inappropriate. Why should this policy result in a reduction of the number of appeals for poor design? Should it not result in better-designed buildings?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy D2 Sustainable design, construction and energy  Sustainability should be an overarching ambition, conditioning the whole local plan and running through it, as claimed in the NPPF, “like a golden thread”. It should be set out clearly in Policy S1, not buried away as a minor detail in Policy D2. This policy amounts to “greenwashing”, expounding aspirational environmental targets while ignoring the plan to build dormitory towns across the Green Belt that are environmentally and socially unsustainable. These settlements will bring vastly increased car use and will lead to unacceptable traffic congestion, overstretched social infrastructure, and more greenhouse gas emissions, noise and light
pollution. This policy should not be just about saving energy but about preserving the borough’s stock of natural capital, especially the countryside, from attempts to rig the housing market. This policy’s emphasis on Combined Cooling Heating and Power and communal heating networks is difficult to understand, since no such networks are available locally.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy D3 Historic Environment This policy clashes with the strongly pro-development agenda of the rest of the plan and fails to address the contradiction. History is unamenable to improvement, so the policy should commit the Council firmly to protecting and preserving our heritage assets from development. Instead, the specific policy pledge to “support development” that might “enhance” heritage assets leaves wide scope for abuse in the form of destructive commercialisation and financial leveraging of relevant sites. This policy is based on the false premise that Guildford’s heritage is inherently in decay. This is a developer’s charter – a short step away from the idea that the historic environment needs to pay its way to be preserved. The Council’s reviews of Guildford Museum and the Electric Theatre support this interpretation. Whatever the “reasoned justification”, the actual policy wording in the blue box leaves too many loopholes. Development close to historical assets is harmful and should be expressly prohibited. This policy fails to meet the requirements of NPPF paragraphs 126 and 131-133.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy D4 Development in urban areas and inset villages This policy that does not address the opportunity for building in the urban area The plan envisages that 40% of homes built will be “affordable”, but this does not provide any accommodation for low-paid workers, for example, those on the minimum wage, who cannot afford to buy so-called “affordable” homes or pay an “affordable” rent. There is a need for some expansion in social housing, especially in urban areas, where there is a greater concentration of low-paid workers such as those employed in the retail, warehousing and distribution sectors (all of which this plan aspires to expand). The number of homes planned in the urban area is much too
low. There is a glaring need for regeneration in many urban areas, particularly Guildford Town Centre but this is ignored in favour of building homes on green-field sites instead. This will not address urban housing needs. It is also unsustainable, since building outside the town does disproportionate harm to road traffic, air quality and overstretched infrastructure. The plan envisages a large expansion of the retail sector, but this is hard to justify because the sector is in rapid and continuous decline. THE BROWNFIELD OPPORTUNITY Yes, we need a new Local Plan for our borough in order to provide a development strategy within which we can accommodate our local housing, economic and environmental needs. But first we must make good use of our urban brownfield before we consider building in the Green Belt or countryside. Paragraph 80 of the NPPF clearly states that Green Belt serves a key purpose, “to assist in urban regeneration, by encouraging the recycling of derelict land and other urban land”. In order to comply with central planning policy we need a brownfield strategy that states clearly. “We are committed to a brownfield first initiative whereby all applications on previously developed land are given fast track priority and every facility to promote development for residential purposes and employment purposes in order to satisfy the needs of local people. In parallel a low CIL incentive should be given for all residential development on brownfield land.In response to the detailed objections received in the Regulation 18 process of the 2014 Local Plan and also in accordance with government policy a Guildford brownfield land register should be urgently compiled showing address, ownership, occupier, current use and detailed planning brief.Perhaps someone could be appointed at GBC with a clear briefing to deliver brownfield targets of housing and employment spaceGBC needs to accelerate the residential redevelopment at Woodbridge Meadows, Walnut Tree Close and the Station within the next 5 yearsGBC needs to examine the residential development opportunity of the 25.7 acres of car parks in GBC ownershipI do not consider that the target of 1,172 homes in the town centre takes account of the need and demand for housing or the opportunities that brownfield sites present for increasing the residential development in the core of the town which will in itself help to sustain the retail core by increased economic impact. The Town Centre policy needs to maximise the potential for residential development on brownfield and include an as an absolute minimum the 2,551 units proposed in by Allies and Morrison for the town centre included in the masterplan 2015 which has recently been adopted by GBC. The reality is that the Town Centre has the capacity for significantly more homes. See details on GGG website - Guildford Greenbelt Group

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy E1 sustainable employment I note that there is a significant reduction of between 71% and 79% in the previous job target and resultant 79% reduction in employment space in response to the many objections lodged in 2014 against an unsubstantiated agenda for economic expansion in the last draft and based on new findings by Aecom in the latest ELNA 2015.I have concern as to the ill-informed clustering of all B classes in terms of the clarity of market evidence required to inform effective planning and a failure to provide a clear understanding of business needs required under Section 160 of the NPPF. I also note the dramatic reduction in assessed demand by two Employment Land Needs Assessment Reports carried out under the same terms of reference within a period of 2 years which calls into question the general reliability of the process of collection and interpretation of data in the overall forward planning process by GBC. I am concerned however that the research undertaken by Aecom is generally superficial and lacks sufficient detail and analysis between B1a, B1b, B1c, B2 and B8 use classes and that no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of office, research and development, light industrial, general industrial and warehousing and distribution floor space. No proper analysis has been made of data held by GBC in respect of different B classes in terms of planning applications granted or evidence gathered by the economic development function at GBC and...
no robust assessment of local market demand apart from fairly brief references to freely available market research undertaken by commercial estate agents such as Lambert Smith Hampton covering a much wider area. GBC appear to fail to appreciate the fundamental rationale of the Use Classes Order as a planning tool in terms of useful property market research or forward planning. What we are left with is a fairly clumsy and poorly informed plan which clusters B classes without any appreciation of widely different employment impact and economic sustainability. E.g. B1 generates at least 5 times as much employment as B8. The lack of appreciation as to the opportunity for widely different uses being generated within B class clusters defeats the whole point of proper planning of employment uses and can significantly endanger previously good planning put forward in the previous 2003 plan. E.g. the creation of a research and development park linked to the University but now has the threat of being downgraded into a general business park (see below). Little regard has been given in the plan to the economic reality of falling demand for B2 industrial space which is clustered with other B classes almost randomly throughout the plan. Little regard is given to the opportunity of B1b space as an opportunity for research and development which needs to be nurtured and preserved without the detrimental and confused clustering with other B classes both in terms of planning and promotion of a research hub. I note that the past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 derived from VOA analysis and that the calculated annual floor space demand is 0.7% over the plan period up to 2033. I support the concept of seeking increased investment in our local knowledge-based, high technology economy. This will provide well paid, creative jobs and generate the funding necessary to pay for the infrastructure and environment this sort of industry requires. We need to distinguish between wanting to increase the added value of the economy and physical expansion, especially given the scarcity of land in Guildford. Guildford is not the place for large space hungry businesses. So I should target high added value small and medium sized enterprises rather than the headquarters of larger corporations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy E2 location for new employment floor space I object to the policy of expanding the Research Park onto Blackwell Farm and I do not believe there are exceptional circumstances to justify incursion into this permanent and high quality area of Green Belt. The Surrey Research Park currently extends to 65,000 sq m. There is already granted consent to expand to a further 9,000 sq m (14%) The past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 based on ELNA 2015 derived from VOA analysis. The ELNA 2015 calculated annual floor space demand is 0.7%. The data point for our analysis is today in 2016 so we have 17 years to go to the end of the plan period. The necessary growth in floor space over the plan period is therefore 17 years x 0.7% = 11.9%. There is currently 14% expansion space already available. The proposal by GBC to expand the 65,000 sq m by 9,000 sq m (existing allocation) with an additional 35,000 sq m amounts to an increase of 67% of the Research Park which is not required. The Research Park is currently developed at a density of 25% plot ratio. The majority of existing buildings are 2 stories giving a developed floor space plot ratio of 12.5%. The existing Research Park has the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing densities of existing academic buildings on the university campus which are three to four times higher. Together with the existing expansion of 14% through existing consents and the opportunity to increase its density the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university. A preferred location for increased B1a and B1b space would be in the Town Centre close to housing and a convenient transport hub.
I object to Policy E3 maintaining employment capacity I object to the ill-informed policy of resisting change of use from B1a to residential because it flies in the face of positive property market solutions for the regeneration of brownfield land. It is also contrary to current government policy which has recently been reaffirmed and permits a change of use from B1a (offices) to C3 (residential). I believe that the existing government policy which has recently been made permanent of allowing change of use from B1a to C3 is sound. Many office buildings reaching an age of more than 30/50 years become redundant in terms of energy compliance making them illegal to occupy for employment purposes and the cost of refurbishment makes them redundant and uneconomic. The reality of market demand is that the gross development value of refurbished residential space is in excess of the gross development value of refurbished old office space in many locations (this gross development value assessment is supported by the analysis by property consultants GVA in the supporting evidence within the Allies and Morrison Masterplan for Guildford dated 2015). To resist change from B1a to C3 is contrary to the concept of brownfield first for residential development schemes. To resist change from B1a to C3 in Strategic or Significant Employment Sites is contrary to the concept of integrated mixed use communities whereby the journey to work is minimised. London has led the way with significant residential schemes being created from redundant office stock. A good example is the South Bank in London adjacent to Waterloo Station where in 2005 the Shell Centre has been converted into flats. Another early example is the 2000 scheme at Metro Central Heights at Elephant and Castle where the old Alexander Fleming House was converted to 435 flats by St George. GBC needs to adopt more modern trends and policies.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to policy E4 Surrey research Park. I support the maintenance of research, development and design activities, in any science, including social science, that is complementary to the activities of the University of Surrey at the Surrey Research Park. I object however to the completely unnecessary expansion of the Research Park into a larger Business Park. I believe that the planning policy going forward for the Surrey Research Park should be to maintain and enhance the integrity of its research base allowing for the economic value add to the local economy of knowledge and technology transfer from the University. I believe that B1b (should be the primary use class for the Research Park and that applications for B1a should be resisted due to the danger of dilution of the core purpose and reputation of the park. I object to the inclusion of B1c uses which is inappropriate and unnecessary. Research parks based on the early UK technology transfer exemplars of the Cambridge and Oxford need careful monitoring, nurturing and protection to ensure the integrity and quality of the park is maintained and the park continues to be a destination for innovation and enterprise. There is a danger for research parks to be overwhelmed by short sighted development opportunities being taken by park managers provided by standard office activities and administrative functions which in time turn them into standard business parks which can be found anywhere in the country. Their relative low density and attractiveness make them targets for “any other” office user Research parks that lose their way stop being the location of choice for new innovative enterprises. I hope the Surrey Research Park in Guildford remains focussed on a broad spectrum of scientific research including computer science, bio-chemistry, design, space-science, eco-science, health science, software development, laser technology, media-science, artificial intelligence, robotics and super-manufacturing. Monitoring indicators should include new start-ups and new patents created. Facilities should be provided whereby new small businesses can secure premises under subsidised licence fee arrangements with no onerous rent or lease commitments. Support the idea of a variety of sizes of unit including some small units (between 15 – 80 sq m) bearing in mind one workstation is 10 sq m. Consideration should be given to the concept of shared “enterprise hubs” where individuals can take pay as you go workstations in shared spaces similar to touch down business centres similar to the “enterprise village” concept object to the policy of any new extension of the research park more than the existing 14% already provided for within the park or within the footprint of the park. The Surrey Research Park currently extends to 65,000 sq m. There is already granted consent to expand to a further 9,000 sq m (14%). This space has been available for 10 years and is still to find a taker. The trend of expansion of Office/R & D is 0.43% pa over the period from 2004 to 2012 based on ELNA 2015 derived from VOA analysis. The ELNA 2015 calculated annual floor space demand is 0.7%. The data point for our analysis is today in 2016 so we have 17 years to go to the end of the plan period. The necessary growth in floor space over the plan period is therefore 17 years x 0.7 = 12% which is less than the current expansion space of 14%. The research park is developed at a plot ratio of 25%. This could be increased to 50% within the same footprint of the existing park without damage to its amenity. The actual current land use for development in the park is in fact only 12.5% because most buildings are 2-storey.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy E5 Rural Economy. In my opinion this policy should only apply to small-scale development in rural areas which means development of less than 100 sq m (gross) which is in keeping with and the permanence and amenity of the green belt. Use of rural areas for town centre uses without applying the sequential approach is against the principles of localism that require local people to be consulted and heeded, not ignored. Villages need protecting in terms of both design and scale and character. Previous commitments to improved high-speed broadband and mobile phone coverage have now been diluted, despite general support. This disregards the responses from the 2014 public consultation.
The consultation process was not well publicized; many Parish Councils had no idea of this. The emphasis on voluntary efforts and greater community efforts is far removed from reality for this 'solution' was presented for almost every aspect of rural life from managing crime to looking after elderly to education and more besides. Villages by nature are usually small and the percentage of the population who are able to do voluntary work is smaller still. The solution is therefore unworkable. The results of the consultation were not publicized but were instead collated and summarized and bore no resemblance to the submissions I had sight of.

Comment ID: PSLP16/14143  Respondent: 11036289 / Osman Abdullah  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy E6 the leisure and visitor experience. I believe that the importance of a visitor attraction hub could be much better articulated. Guildford has great potential to become a “must see” destination for tourists and visitors. Surrounded by the natural beauty of the Surrey Hills, it is already distinguished as an historic county town. The historic part of the town should be exploited to the full creating a real sense of vibrancy and atmosphere. This should be linked to the attractions of the Museum, the Castle, the Wey and the historic High Street including its views of the Hogs Back.

The economic impact would create big advantages for both the leisure and the niche speciality retail sectors in the town. Given the local and wider catchment of the town Guildford should strive for high quality definition making it a great centre for people to live in and visit. Guildford the historic “Gateway to the Surrey Hills” has far more potential than Guildford just any other stereotypical centre found anywhere around London. Re-branding walks, such as a new “Pilgrims Trail” similar to the Patriots trail in Boston USA with marked yellow footsteps leading from the station to the River and up through the historic heart of the town. There is a need to make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms. There is a need to help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to RHS Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently bypass Guildford to go to Bath, Oxford or Cambridge instead. THE TOWN CENTRE OPPORTUNITY I do not consider that the target of 1,172 homes in the town centre takes account of the need and demand for housing or the opportunities that brownfield sites present for increasing the residential development in the core of the town which will in itself help to sustain the retail core by increased economic impact. What the town centre needs in terms of urban regeneration and to attain a thriving night time economy is more residential development. The Town Centre policy needs to maximise the potential for residential development on brownfield and include as an absolute minimum the 2,551 units proposed in by Allies and Morrison for the town centre included in the masterplan 2015. The reality is that the Town Centre and other areas of brownfield in the borough has the capacity to provide significantly more than this.

<td>I object to policy H1 Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set any rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions. The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated. I support higher density development but not high-rise development (i.e., over 10 floors) in the urban area close to transport hubs to facilitate modal shift e.g., 20 minutes’ walk of Guildford railway station. Student accommodation should provide for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g., Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g., by building on its extensive and underused surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back. Surrey University has 17 ha of car parks that could provide all the student accommodation required above it, with parking beneath. Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Overprovision is inappropriate given other constraints.</td>

| I object to policy H2 Affordable homes. “Affordable” homes, under national definitions, means homes that are sold or rented at 80% of market value. Even if 70% of these are rented as proposed, the level of market prices in the South-East means (even post-Brexit) that these homes will remain well beyond most people’s means and that starter homes will not become available for local people. In addition, the viability clause (4.2.40) means that in practice the policy could be unenforceable. Private financial viability has no place in a public policy and should be removed. It is a get-out-of-jail-free card for developers that will sacrifice countryside for no local benefit. I question the assumptions that seem to underlie this policy: that people have a right (rather than a legitimate aspiration) to own a home; that they should be encouraged to live locally in enormous debt (contradicting the Government’s policy of encouraging labour mobility and development in poorer regions, where homes are cheaper); that increasing local house-building will reduce overcrowding and congestion (rather than simply suck more people into the borough); and that it will stem the rise in house prices (even though 13,860 new homes will be a drop in the ocean, given that prices are determined by an infinite demand-pull from London, whose population is increasing by 100,000 a year, and by the currently low cost of capital for overseas and other buyers). The weak mechanisms proposed in the plan might influence the market in a more remote part of the UK, but not here. This
policy’s version of “affordability” is just a smokescreen for pushing through more development generally. Building more homes in Guildford cannot increase real affordability given the overhang of the London market.

I object to policy H3 Rural Exception Homes This is a type of Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix”, this can include “market” housing – i.e. normal commercial development which in Guildford usually means expensive executive homes. This policy means building anywhere, and ignoring all historic planning restrictions. The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

I object to policy H1 Infrastructure and delivery Most of the borough’s infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. Yet this plan’s commitment to building housing estates across the Guildford countryside will mean either major infrastructure investment that no-one is prepared to pay for or else a catastrophic and simultaneous collapse in transport, educational, medical, energy, water and communications services. The plan targets greenfield sites – requiring heavy infrastructure investment – in order to generate CIL income necessary to meet an infrastructure shortfall that is already serious. The current draft CIL scale also encourages development on greenfield sites rather than brownfield and will reduce or negate developer's obligation to sell a percentage of homes at 20% below market value. The policy wording says nothing about roads and traffic. The Council’s methodology for assessing infrastructure needs in this area is inadequate, identifying only the tip of an iceberg of existing congestion. Compton Village is already close to tipping point, yet it will see a significant increase in traffic volume, will be completely
congested and yet no plans exist to mitigate the problem. The schemes referred to in this policy barely solve existing congestion and are inadequate when development takes place. The full impact on local road networks has not been fully considered. Some proposed development locations would require highway schemes that involve demolishing property and road-widening in residential areas to solve the resultant congestion. The A3 improvements are not guaranteed to take place but they are being used to justify removing large areas from the Green Belt before detailed traffic assessments have taken place. These detailed investigations are being deferred until the planning application stage and will be left to developers to prepare. If a site then proves to be unsustainable its Green Belt protection will have been lost for no reason and unsuitable development will take place by a more insidious process. Compton Village will actually incur increased traffic flow as a consequence of A3 widening according to the study, yet as was pointed out above, no solutions are in place to improve the situation. Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritising greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognising this as a key issue, the plan makes too many assumptions, not least being the verbal promise that development will not take place without infrastructure preceeding it. It is not clear how this will happen and is not in the Plan, as it should be, if it is achievable. The highways network is under stress at peak times in many parts of the borough. Queuing is the daily experience of drivers going to and from work. The local plan recognises the problems in para 2.14. Much of the road network is single-carriageway, and junctions act as constraints. The key evidence on future traffic conditions is provided in the Strategic Highway Assessment Report (SHAR) which summarises the results of the tests carried out by Surrey County Council at the request of GBC. Five scenarios were examined using SCC’s strategic traffic model. Scenario 1 contains all developments and planning permissions from 2009 to date. As such it corresponds to today’s circumstances, and describes the current unsatisfactory traffic conditions in peak periods. Scenario 5 represents the position at the end of the plan period, including all development and highways schemes in the local plan. The results of the analysis show that there will be widespread congestion in the morning peak hour across the network. The key strategic routes, the A3 through Guildford NE bound, and the M25 between Junctions 10 and 11, are shown to be at or over capacity. The summary network statistics presented in the SHAR, while useful, require some interpretation because the analysis of vehicle-hours is derived from link speeds only, and does not reflect junction delays and queues. The tables that show the ratio of flow to capacity and level of service are especially helpful to gaining an understanding of the conditions on the network in the forecast. Where the forecast traffic volume is above or close to capacity, flow becomes unstable and there is congestion. The SHA results provide evidence that, in 2031, congestion will be worse than it is today on much of the network. It is the case that the traffic modelling does not take into account the potential for increased use of other modes, but the trip rates used for developments already have built in the typical level of use of other modes, and services will be required to meet that need. It is also the case that the model does not allow for park and ride, which would improve matters in the town centre, as discussed below. In order to gain an insight into conditions across the network, it is necessary to combine information from several tables in the SHAR. Table 4.5 shows that the M25 and A3 will be at capacity in Scenario 5. The other roads that will have poor levels of service include those in Table 4.5 but also those in 4.12 (except the A3) and those in Tables 4.3 and 4.4 with levels of service E and F that will not be given some relief by improvement of the A3 in Scenario 5. Paras 4.10.3, 4 and 5 point out that there will be increased congestion. Given that the starting point is unsatisfactory, there can be no expectation that the schemes in the Infrastructure Development Plan will provide an overall improvement. There will be some local benefits, such as the Ash rail bridge for example, but in general conditions will be as bad and in many places, such as Compton Village, worse. So the statement in the SHAR para 4.2.5 that ‘the combined mitigation as reflected in Scenario 5...indicates that at the strategic level it accommodates the additional PSLP demand’ needs qualifying – ‘at the cost of a lot of queuing’ and makes no mention of the impact this will have on pollution, which is already a known problem at the A3 end of Compton. The cumulative effect of the additional traffic generated by the developments in the local plan will be to increase congestion, even with the proposed highway schemes in place. More detailed analysis of the junctions and queuing is required. So we question the conclusion that the developments would have “an acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPFF” (para 3 of the Transport Topic Paper shows the phasing of housing development and transport infrastructure. The major scheme being considered for the A3 between the A31 and the A320 is scheduled for delivery in the period 2023/24 to 2027/28). The strategic developments at Blackwell Farm and Gosden Hill Farm are shown as being phased in from 2021/22 onwards. The Garlick’s Arch development is shown as starting in 2019/20. Therefore, there will be a period in which the existing A3 has to cope with the additional demand arising from those developments before extra capacity is provided. The following comments regarding the strategic sites are taken from the SHAR: Blackwell Farm – there will be congestion at the A31 junction, and the problems at the Tesco junction, and the Egerton road / Gill Avenue junction (para 4.9.5). Traffic is likely to access the Surrey research park and
the RSCH through the development (para 4.7.3) Gosden Hill Farm – there will be an increase in traffic through Burpham. There will be pressure on the A3100/B2234 roundabout (paras 4.7.6, 4.7.7 and 4.7.8). Wisley – traffic will increase on minor roads to gain access to the A3 (N and S bound) and other routes (para 4.7.11). The development will add more traffic to the A3. The Burnt Common slips help alleviate the traffic through Ripley according to the model, but queuing on the A3 could mean this does not happen (para 4.7.14). Normandy/Flexford – the report has little to say about the impact of this large development. The increase in flow on Westwood Road is noted (para 4.5.7). Tables 4.10 and 4.11 show junction delay reducing at the Westwood Land, B3000 junction, but an increasing at the Puttenham Hill/Millbrook junction. Ash – development in Ash is not specifically addressed, but there are major increases in traffic on a number of roads. The new rail bridge will bring relief (but traffic will move to the next junction). Slyfield – there are no remark relating to SARP, and as there are no additional trips shown in and out of the Slyfield residential zone in Tables 3.3 and 3.4, it is possible that this development has been omitted. There is a significant increase in trips to and from the Slyfield industrial zone, which will impact on the A320 and Clay Lane. Town Centre – the report has very little to say about the town centre. It is evident that the model is forecasting severe congestion on the approaches to the town centre, such as the A281, the A31 Farnham Road, and Woodbridge Road for example. No mitigation measures are planned. And in the Transport Strategy, GBC states that the intention is to adopt Allies & Morrison’s Scenario 2 which would have the effect of significantly reducing the capacity of the town centre road system. The implications have not been examined, but traffic using the A281 from Waverley, for example, would be affected.

The B3000 will be severely affected by development schemes and will not benefit from road improvements. It is essential that the impact of all change to road networks are looked at in conjunction with one another for any survey to be meaningful. The local plan does not state an objective for congestion. The two strategic objectives that are included for infrastructure refer to supporting sustainable development and delivering a balanced system. However, in para 2.15 there is an aspiration expressed about opportunities ‘to improve the performance of the road networks through transport infrastructure and service improvements’, which taken with the previous paragraph includes reducing congestion. The evidence so far shows that this will not happen. The mitigation proposed is not sufficient to overcome the problems that will be caused by the level of growth in the local plan. Congestion will worsen. The network will lack resilience and be vulnerable to disruption due to incidents. Minor roads will have to cope with a lot more traffic, for which they are unsuitable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy i2 Supporting the Department of Transport’s “Road Investment Strategy” This policy is too vague and unrealistically optimistic. Decisions by Highways England on improving the strategic road network (the M25 and A3) are still years off. The Council have suggested a very expensive tunnel under Guildford, but there is no evidence to show that this is a realistic option. Even if Highways England accepted this (which is highly unlikely in the post-Brexit public spending climate) it would not be built until the end of the plan period at the earliest. Other, less expensive A3 improvements, and changes to the Junction 10/Heathrow stretch of the M25, will also take years to agree and complete. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is foolhardy. Surrey is the most congested county in England, with 683 people per square kilometre, compared with an English average of 413. This policy will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new...
homes at Wisley Airfield alone). This is a major development constraint that should have been applied to the OAN to constrain the housing target.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy I3 Sustainable transport for new developments This is another aspirational policy, not grounded in the practical realities of daily life. It consists of a standard, box-ticking list of local government measures unrelated to the specifics of the plan. Like infrastructure, transport appears to be an afterthought; the policy fails in its essential job of guiding planning decisions, since it assumes development of any kind can be supported by sustainable transport. The sustainability of the dormitory settlements which the Council want built across the countryside depends on a general “modal shift” from private car use to walking, cycling and public transport. This is unrealistic. The proposed sites are often miles away from the nearest railway station. Bus services even in the largest villages are almost non-existent – just one bus to and from Guildford each day in the Horsleys and none at weekends. Since bus services depend on profitability, they cannot be expanded and the Council are not proposing to subsidise new ones. Rural buses are too slow anyway for busy people. Most rural roads in the borough are narrow, winding, hilly, potholed, muddy and unlit. Many flood badly and have no footpaths. The desired modal shift would require a comprehensive co-ordination of bus and train timetables with services every few minutes, seven days a week, to stops within walking distance of every home in the borough. This kind of integrated public transport system has been achieved in Switzerland, for instance, but only at huge public cost and thanks to a political consensus supporting state ownership of trains, buses and the post office, which delivers rural passengers as well as mail. There is absolutely no chance of this in the UK. The vast majority of the borough’s residents are not, in practice, able to cycle. This includes children, the elderly, commuters who have to look smart, the infirm, the unfit and people carrying goods or shopping of any kind. Dependence on walking and cycling discriminates against these groups, which include some of the most vulnerable members of the community. It is socially unjust. One in two working people in Guildford commute for up to 3 hours a day. They will not leave their cars for even part of their journey if it means longer travel times. Park-and-rides are a welcome part of the transport mix but are too slow for commuters and others on a tight schedule. For an adult couple going shopping it is still cheaper to park in town. I like the idea of water buses but have concerns over the reality. The Wey is narrow and, with a river speed limit of 4mph, boats are too slow for anything but recreation. Except on the tideway, not even the Thames has such services. The addition of two new stations appears attractive but will slow down train journeys, which are already slower than at any time since the 1930s. Knock-on effects on localities where the new stations are built have not been worked out or presented. ie. Cost of housing will increase.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4
I object to policy I4 green and blue infrastructure. This policy is a box-ticking exercise with no teeth to it. It sits oddly with the plan’s onslaught on the Green Belt. The plan to build on large areas of countryside and to inset villages will cancel out any benefits from extending the principle of enhancing biodiversity beyond Biodiversity Opportunity Areas. There is no mention of the value of wildlife gardening to biodiversity or the important role that larger gardens play in a village setting.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/14113  Respondent: 11036289 / Osman Abdullah  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P1

I object to policy P1 Surrey Hills Area of Outstanding National Beauty. This policy weakens existing protection when it should strengthen it. It is dependent on the Surrey Hills Management Plan. The latter welcomes housing development. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated. Much of my concern stems from the loose wording of the Policy, which in some places renders the policy ineffective, for example: “All proposals will be considered against whether they…” “All development proposals within and adjacent to the AONB will be expected to conserve or enhance its special qualities” Terms such as “considered” and “expected” are not strong enough in prohibiting development proposals that do not conserve and enhance the AONB, and it is likely that developers will be able to use this loose wording to their advantage. Of particular concern is the paragraph 3, which begins: “Whilst the AONB designation does not preclude specific types of development in the Surrey Hills and proposals will be assessed on their individual merits…” This whole opening clause is unnecessary and almost invites development proposals. I believe that it should be deleted, and the sentence should therefore begin: “There is a presumption against major development in the AONB in accordance with NPPF.” In addition to the weakness of the language, I am also concerned that the AONB criteria listed in the policy are not the most important ones in determining whether a planning application should be approved. Aside from the one outlined in the first bullet point (which relates to the AONB setting) none of these criteria is concerned with the key characteristics of AONB, ie landscape character, scenic beauty, important views, tranquility etc. Whether or not a development supports the rural economy or provides public access are of far less national importance than preserving the quality of the landscape itself. I believe that the AONB Policy in the Draft Plan 2014 provided greater protection to the AONB, and would like to see the following sentences reinserted: “The national significance the AONB will be afforded the highest level of protection and only proposals which can be sensitively amalgamated into the area and which complement and enhance the character of the AONB will be considered” “Proposals within the AGLV which would have a negative impact upon views into and out of the AONB and which do not respect the setting, will not be acceptable” In accordance with the most up to date Minerals and Waste Plan, safeguarding of applicable land within the AONB and/or AGLV may be necessary and deemed appropriate. Finally, I would like to see a clause which gives protection to the candidate areas for AONB status in the forthcoming Surrey Hills AONB Boundary Review. This should include Blackwell Farm which was recently reviewed by an Independent consultant and deemed worthy of inclusion.
as a candidate. I consider that all land that has been assessed as meeting the latest Natural England criteria for AONBs should be subject to the same level of protection as an AONB, not just land that has been designated AGLV.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy P2 green belt This policy states, “the general extent of the Green Belt has been retained.” This is a misleading statement. The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. Once gone it is gone forever. It is not the Council’s to give away. Policy P2 completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world. Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

1. Agricultural production
2. Rural leisure and tourism amenities
3. Water catchment
4. Flood control
5. Biodiversity
6. Natural heritage
7. A carbon sink for air pollution
8. Room for public facilities such as parks and burial grounds
9. Profitable film locations (e.g. Shere)
10. Future economic potential such as mineral extraction (even fracking)

11. Natural beauty, landmarks, open space, rural views and sight lines

12. Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF) As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations. It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. I object to the “insetting” of 14 villages from the Green Belt. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat. I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors. To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead.

Furthermore I object on grounds of the impact this development will have in terms of congestion on our highways, these issues have been highlighted under ‘infrastructure’.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy P3 Countryside (i.e. beyond the Green Belt) This is more protective – as a policy – than the proposals for the AONB and the Green Belt, so is anomalous. I am not in favour of building on this area, since urban, brownfield areas are sufficient to meet all reasonable housing targets. There is no need to build on any green fields if brownfield, previously developed land is used efficiently (without garden-grabbing). This policy refers to the countryside near Ash and Tongham (see paragraph 4.3.28). This area does not justify stronger policy protection than any other part of the borough. The fact that the current and previous Council Leaders represent it should not give it preferential status: “we will seek to limit any development in the countryside unless it can be demonstrated that it is necessary in that location”. Green Belt and AONB areas should by definition have higher levels of protection than non-Green Belt areas. It should also be noted that Ash and Tongham lie beyond Guildford far away from London and therefore make no contribution to controlling
Metropolitan urban sprawl, that is presumably why Ash and Tongham are not in the Green Belt already. This policy, however, attaches higher priority to preventing the “coalescence between the Ash and Tongham urban area and Aldershot” than it does to the primary purpose of the Metropolitan Green Belt, which is to stop London sprawl. I agree to the prevention of coalescence but this should apply to all villages including East and West Horsley and Flexford and Normandy.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy P4 Flood risk and water source protection zones Urban development on existing hardstanding would not create additional flood risk, especially where there is scope for improved flood resistance measures to be included in the design. Sites such as Woodbridge Meadows Industrial Estate and the Arriva bus depot, on the River Wey bank, are potential high-value brownfield sites that would not be available for housing if this policy is implemented. It is not the footprint of existing buildings that should limit future development, but the extent of existing hardstanding. Tarmac and concrete do not act as functional floodplain, and some land with hard standing close to the river, within the town centre and within easy walking distance of the railway station, provides an excellent opportunity for real urban regeneration that could protect the surrounding countryside. I strongly believe that this policy should not be used as a convenient excuse not to build on the extensive area of brownfield sites between the station and Ladymead. Any new development in this area could easily be built on stilts with flood resistant ground floor parking in areas that are identified as high flood risk. This area has been built over successfully over the last 50 years. We do not need to stop now.

I do not support building directly on (as opposed to over) flood plain as the land is effectively a soak away, but intelligent architecture has been dealing with this problem for many decades in other parts of the UK and the globe.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to policy P5 Thames Basin Heath Special Protection Areas. This policy is not robust enough. The mitigation (cash compensation) offered for development in the special protection area is so small as to be meaningless. SANG (Suitable Alternative Natural Greenspace) is not beneficial since the sites identified or targeted are already green space. This is just using agricultural or wooded land as recreation land in order to justify building on other green spaces nearby. There is no actual increase in open space or environmental protection; instead, it is a ploy designed to permit building on otherwise protected areas. SANG – in part used to prevent dogs and cats attacking nesting birds – must also ensure that it is not using land which is adjacent to the Special Protection Areas.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy S1 as stated and the presumption in favour of sustainable development. The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” Policy S1 ought to set a clear framework. No definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts. The promise “to secure development that secures the economic, social and environmental conditions in the area” omits to recognise that economic growth, social justice and environmental protection often conflict. It does not say how each element is to be weighted or conflicts resolved. As a practical guide to the tough choices Councillors will face, it is without value. Under this policy, any development will qualify as “sustainable”, thereby failing to apply the NPPF’s most important guideline. The most gaping hole in Policy S1 is the Green Belt. As an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity, the Green Belt is a living example of sustainable development in practice. It is the envy of the world. Policy S1 should commit to uphold Green Belt boundaries and protections, setting at least one clear boundary to planning decisions. The plan’s contempt for Green Belt constraints is amply demonstrated in later policies. The commitment to approve planning applications “wherever possible” and “without delay” reveals this draft plan’s pro-development bias. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all. This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.3.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to policy S2 the Borough Wide Strategy and the commitment to build 13,860 homes based on the Strategic Housing Market Assessment (SHMA) 2015 prepared by GL Hearn. The OAN “objectively assessed need” figure in the SHMA of 693 homes a year is far too high. I am very surprised and concerned that GBC have adopted the OAN of 13,860 homes as the housing target without any application of constraints as required under the National Planning Policy Framework and the National Planning Policy Guidance. The scale of the housing number proposed, inevitably increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole. Other local planning authorities appear to take a more balanced view in their approach to planning. The Woking Core Strategy 2012 applies a constraint of 50% from the 594 new homes identified in their own SHMA. " Historically GBC have correctly applied constraints on housing numbers to protect the Green Belt. The Surrey Structure Plan 1994 advocated a general slowing down in the rates of development “because of the environmental constraints which exist in the County, including Green Belt”. This slowing down was reflected in the requirement that Guildford Borough should accommodate a net increase of 3,800 dwellings between 1991 and 2006. This was a lower rate of development than in previous years. It is interesting to note that the Structure Plan at that time expected sufficient land to arise within the urban areas to accommodate this requirement. However it would appear that today GBC have effectively ignored the real potential of the urban area to provide for housing. At the same time GBC have adopted a radically different approach to the policy of the Council over the last 20/30 years and are now ignoring government policy in relation to the Green Belt. A detailed and comprehensive professional review of the SHMA dated June 2016 by NMSS an independent expert firm dealing with housing and demographics procured by Guildford Residents Association (GRA) has concluded that the OAN figure should be revised down from 693 homes per annum to 510 homes per annum. The 41 page report by NMSS which can be found on the GRA website entitled “A Review of the West Surrey SHMA as it relates to the Objectively Assessed Housing Needs of Guildford”. It was a real community effort. It was paid for by over separate 20 Guildford Residents Associations and Local Parish Councils none of whom were convinced that the SHMA report procured and presented by GBC was accurate or transparent or accessible in a meaningful way. So they clubbed together and collected contributions from many hundreds of Guildford residents to try to find out the truth of the housing need figure presented in the Local Plan. The NMSS report includes detailed analysis and financial modelling and was prepared by Neil McDonald. He is an independent adviser and commentator on housing demographics. He works with local authorities and others on the estimation of housing need and related issues. He was a civil servant and policy adviser to Ministers for over 30 years, the last 10 advising on housing and planning issues within the Department of Communities and Local Government. His 7 years as a Director at DCLG included a posting as Director, Planning Policy and a period as Chief Executive of the National Housing and Planning Advice Unit. NMSS found that the SHMA used in the Local Plan incorrectly adds extra homes to its basic demographic projection to allow for improving affordability of housing, increased student numbers and economic growth. The report found that none of these additions were justified based on the evidence presented within the SHMA. The report concluded amongst other matters that:

- The affordability of housing in Guildford is no worse than in other Surrey districts and boosting supply beyond the demographic OAN would not result in a noticeable improvement in affordability but simply in more people moving to the area.

- There are reasons for believing that the SHMA’s estimate of the number of homes needed for students may be too high and that an adequate provision for students is already included in the demographic OAN. The report advises that the Council should commission a separate student housing need figure for Guildford given the distorting effect of students on our overall OAN. It envisages that, once this exercise is undertaken, improved accuracy means the overall OAN would be likely to reduce still further.
The SHMA seeks to estimate the number of homes needed to support employment growth using employment rate assumptions that are inconsistent with the employment forecasts. This produces misleading results. An analysis of the Cambridge Econometrics and Oxford Economics forecasts using employment or economic activity rate assumptions consistent with the forecasts suggests that in neither case is there a need to provide more housing than suggested by the demographic analysis. Indeed, in both cases a smaller population growth (and hence fewer homes) could support the jobs growth that is forecast. A further independent report was procured in 2016 by the Campaign for the Protection of Rural England CPRE from Richard Bate of Green Balance, an independent consultancy with expertise in demographic and housing matters to carry out a review of the GL Hearn SHMA. The report by Green Balance runs to 37 pages and its findings are that the OAN for homes in Guildford should be reduced from 693 per annum to 481 because:

1. the vacancy rate figures should be taken from local government annual records rather than from the 2011 Census. This would reduce vacancy rates to 2.9% in Guildford.

2. there should be no increase for affordability above basic demographic change.

3. there should be no increase for Student housing and it was considered unrealistic that the University should be allowed to exert such substantial pressure on the domestic housing market.

4. the use of employment-led forecasts should be abandoned using purely household projections instead which are more reliable as a form of prediction. Two completely independent expert reports are surprisingly consistent in their findings. In broad terms a figure of approximately 500 homes per annum would appear to be a correct estimate of OAN for Guildford. However, this is before constraints are applied to arrive at an acceptable housing target. The SHMA is based on pre-Brexit projections for economic and population growth, including migration. These now need to be revised downwards. It is unacceptable that demographic and economic model assumptions have been withheld by GBC and cannot be checked making the process unaccountable.

The figure of 13,860 new homes is unsubstantiated. It has not been scrutinised by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by commercial sub-contractor used in preparing the SHMA. Both the National Planning Policy Framework and National Planning Policy Guidance provide a clear policy direction that the overall housing target should be reduced by a variety of constraints to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors. I have corrected this omission below. Infrastructure policies should be planned at the same time as Local Plans but in this case they have effectively been left out and are not sufficiently developed. The Framework also makes clear that, once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. Unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development on a site within the Green Belt. THE NEED TO APPLY CONSTRAINTS Ministerial guidance in relation to building on the Green Belt is clear:

1. “the single issue of unmet need - is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development in the Green Belt” - Nick Boles to Sir Paul Beresford MP 7th February 2014.

2. “we were always very clear that we would maintain key protections for the countryside, and, in particular, for the Green Belt. The Framework makes it clear that a Green Belt boundary may be altered only in exceptional circumstances and reiterates the importance and permanence of the Green Belt” – Nick Boles to Sir Michael Pitt, Planning Inspectorate 3rd March 2014.

3. “Planning Guidance, updated in March 2014, also states that unmet housing need is unlikely to outweigh the harm to the Green Belt to constitute the very special circumstances justifying inappropriate development within the Green Belt” – Nick Boles to Sir Paul Beresford MP 18th June 2014.

70% of the sites put forward in the Local Plan are in the Green Belt which flies in the face of current government planning policy. The National Planning Policy Framework (NPPF), National Planning Policy Guidance and case law make it clear that Green Belt is an absolute constraint on housing supply. Exceptional circumstances need to be shown to adjust
boundaries. Other constraints under the NPPF include assessments of sustainability, strategic flood risk assessment, physical constraints on land use and infrastructure constraints (this can include road congestion, schools, drains, power supply and medical requirements). Constraints should be applied to the Objectively Assessed Housing Need (OAN). However this itself is overstated and should be reduced from 693 per annum to 500. In view of the comments above it would appear logical to apply CONTRAINTS in line with government policy to a corrected OAN. of approximately 50% to account for the fact that 89% of the borough is in the permanent Green Belt and development is not supported by adequate major infrastructure. This reduction is in line with the constraints percentage of 50% applied by Woking Borough Council. This would result in a more acceptable and practically achievable HOUSING TARGET of 250 homes per annum which over a 20-year period would be 5,000 homes. All of these homes could be built in the existing urban brownfield areas of the borough and would in part satisfy the 20,000 objections made by residents to the 2014 draft plan and also relieve the additional problems of inadequate infrastructure. It would also mean that there is currently 8.5 years supply of housing (2131/250) which is made up of existing permissions granted (1,518) and completions made (613) during 2013/2015. (Monitoring Report by GBC 2015) The Brexit vote may have strengthened government policy further. Theresa May, the new prime minister, announced on 11 July that she is personally committed to protecting the Green Belt once she takes office. Whilst I have many significant objections to the GBC Local Plan I applaud the policy statement by GBC in their Monitoring Report, “We will continue to monitor the use of previously developed land, and continue to identify as many opportunities as possible for redevelopment of previously developed land.” I believe it will be to the benefit of all residents if GBC can apply themselves vigorously to this endeavour in order to protect the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/1639  Respondent: 11036289 / Osman Abdullah  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

This document omits many important points that are to be addressed at a future stage. The information is, however, very relevant and necessary and without it the document is weak on evidence. The overview given does not assess the capacity of existing supply to accommodate future growth. The paper acknowledges that almost 9% of commercial premises are empty and this somewhat flies in the face of arguments to vastly increase the volume until the reasons are understood. Around 30% of businesses are considering leaving Guildford (congestion being cited as a reason). There are also issues with planning permissions being granted to convert office space to residential, whilst at the same time it is argued that more offices are needed? The contradictions appear to indicate that policies related to this need firming up and that the evidence is incomplete.

I disagree with 40% of land in the town centre being given over to retail as there is no evidence that Guildford will 'buck the national trend' in terms of declining high-street sales, as has been suggested by Cllr Furniss. Guildford urban area ranks no 1 in terms of being the most sustainable location in the borough and, as housing is a priority, there should be more than 1,172 residences in the town centre.

I object to Policy E4 (expansion of the Surrey Research Park into the Blackwell Farm) The existing Research Park has been built at a very low density (25% plot ratio), which is very low for an urban extension. The majority of existing buildings are 2 storeys giving a developed floor space plot ratio of only 12.5%.
The existing Research Park has acres of surface car parking, which provides it with the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing density of the neighbouring academic buildings on the university campus at Manor Park, which is five times higher.

Together with the existing expansion of 14% through existing consents and the opportunity to increase its density, the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university, without utilising additional land.

**Infrastructure**

**I object**

The infrastructure schedule makes reference to 'improvements' without saying what they are. It includes a junction at the Guildford end of the A31, and another junction at Tongham. No evidence or traffic modelling data is available to demonstrate whether these 'improvements' will indeed improve anything at all given the additional traffic that will be generated by the new developments included in the plan. The Highways Assessment indicates that, even with these 'improvements', the level of congestion on the A3, A31, the B3000 and A25 will leave these roads over capacity and congested.

Constraints should be applied to the housing need/number as a full application of the overinflated number will have a severe detrimental impact on our road network. Smaller housing estates may be more difficult financially, but they would have less impact on infrastructure and could be considered where infrastructure already exists. The borough has many acres of surface car parking which, if replaced by multi-storey versions, and combined with current Brownfield sites, would free up enough land to build housing where it is wanted and needed and not on valuable Green Belt. There would be no need to build high-rise style development in Guildford town, which we don't support, but we do believe that buildings of 6-10 storeys (with underground parking) would be in keeping in some urban areas (where they don’t impinge on important vistas). [Some existing buildings already reach 5-7 levels in height].

The traffic maps omit the area south of Guildford borough completely and the lack of detail about impact on the B3000, a strategic route, is highly questionable, particularly as there are no solutions in place to deal with the impact. I am particularly concerned that, after the main highways routes of M25, A25, and the A320, the B3000 will incur the greatest increase in flow as this road is already close to capacity, with tailbacks at peak times. The road is no longer fit for purpose and modelling shows that developments planned, and the introduction of a new westerly route through Blackwell Farm, will severely worsen the situation, whether major work takes place on the A3, or not.

**The Highway Assessment**

**I OBJECT**

The strategic highway assessment requires a great deal more work and hence I OBJECT to the inclusion of this as evidence.

The B3000 runs through Compton, a small village with many listed buildings, most of which are very close to the road. The road already carries in excess of 5 million vehicles a year with average flow rates exceeding most A roads. It is the only settlement area in the borough where pollution levels exceed EU regulations and it is close to capacity now, with tailbacks at peak times, which add to the pollution problem. [see legal section]

The study is highly misleading. It refers to a figure of zero additional traffic from scenario 3, which includes the traffic from the strategic sites, one of which is partly in Compton. The assessment does not make it clear that the modelling is extremely limited and only includes impact on developments within the immediate area. Blackwell Farm is excluded from Area 107 (part of Compton) as false boundaries have been set. I believe that the impact from the strategic sites will be far-reaching and will most certainly impact Compton and beyond. Each village needs to be able to see the impact that development will have.

The Highways Assessment concentrates on peak time traffic only and gives no indication of overall volume increases or traffic type using specific routes outside peak hours. Understanding of the overall increase is important, as there is a bridge
on the B3000 between Artington and Compton, which has a width restriction and may also require a weight restriction as it needs replacing within the next 2 years and no funding has been set aside for this. Instead Network Rail, SCC, GBC and Waverley BC continue to battle over responsibility for, and scope of, the project.

It appears that traffic data has been collected at different times of the year and over varying time scales in order to provide averages. This method of data collection can underestimate measurements by at least 30%.

Furthermore, I have been told that the person responsible for ratifying traffic data at Surrey County Council (SCC) has been off sick for over a year and that, whilst the daily data boxes continue to collect data, that data has not been collected or analysed for 2015. The data put forward for Compton's B3000 was based on a 3-week period in January and, as this was not representative, we understand it was removed. That said, the year-on-year data is for different periods and different times, varying from a few weeks in winter to longer periods over many months. I would like a more robust approach to traffic data collation.

The cumulative effect of the additional traffic generated by the developments in the proposed submission Local Plan will be to increase congestion, even with the proposed highway improvement schemes in place. More detailed analysis of the junctions and queuing is required. We question the conclusion that the developments would have an acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF’. We do not believe that the impact on the B3000 will be acceptable, as it is already operating beyond capacity, and this situation will be made much worse following the mitigation proposed for the A3.

The Highways Assessment is limited to 30 results. Roads have been omitted from the report and it is unclear whether findings for the B3000 (also referred to as The Street B3000) are in fact from the Street or the roundabout from which there is a feeder road to Godalming via Priorsfield Road.

The table comparing scenarios and the impact on traffic is difficult to decipher. Scenario 1 includes current planning permissions plus Waverley's strategic sites. This shows an increase of just 9 vehicles per hour at peak times on the B3000. The next scenario 2 is the same, but includes GBC's strategic sites. Given that there is a strategic site in Compton of 1,800 homes and another of 1,000 at Normandy, the expectation would be for the volume to be not only higher, but considerably higher. The result is however, ZERO. We understand that this is because the impact measured is only from the immediate area and, as Blackwell Farm has been removed from the village for modelling terms, this does not give a realistic result. The omission of the Town Centre Master Plan and its impact on the roads further diminishes the integrity of this Highways Assessment.

Even without the full impact being understood, it is clear from the scale of development on the west of Guildford (1,800 homes at Blackwell Farm, 1,000 homes at Normandy, 1,300 homes at Ash, 3,800 homes in the Aldershot urban area, 1,200 homes at Borden) that the increase in traffic on the B3000 and other main routes would be severe.

The Highways Assessment shows that as a result of the proposals put forward in this draft of the Local Plan the B3000 will suffer the highest increase in flow rates at peak times (after the M25, A320 and A25. It also reveals that traffic flows would increase if the A3 was widened, as the A3 would then attract more traffic via the B3000. Despite this, there are no solutions planned to mitigate the situation and we are therefore strongly objecting to the level of development and in particular strategic development at Blackwell Farm as outlined in the Local Plan.

The proposal to introduce a new route to Guildford town centre from the west via Blackwell Farm has been ill thought out. The volume of traffic that will use this new ‘rat run’ through the new development and the university campus/business park, has been underestimated. There will be problems for traffic wishing to exit the new development in both directions during peak hours - traffic is frequently queueing for miles along the A31, and the Tesco roundabout is one of the worst bottlenecks in Guildford. The knock-on effect on the Egerton Road/Gill Avenue junction would impede emergency vehicles getting to and from the hospital.

The 4-way junction on the A31 has no detail at all and the concern is that permission in principle will be given to the site in the hope that these problems are surmountable. If they are insurmountable, which I believe they are, then enormous amounts of Green Belt land within the setting of the Surrey Hills AONB will have been sacrificed for nothing. The 4-way junction, if it goes ahead, is likely to be huge and, due to its elevated position, will cause significant harm to the AONB in terms of landscape and light pollution.
The Highways Assessment has many limitations, not least being the absence of the Town Centre Master Plan, which includes potential road closure and re-routing. Compton is likely to be very much affected by any reduction in road capacity in the town centre and it is important that we are presented with the whole the picture.

The Assessment acknowledges that not all impacts of proposed Blackwell Farm development have been modelled and that, due to the emphasis on the A31 and the A3, not all roads were included.

The report concludes that the improvements to the A3 are necessary to maintain adequate flow rates on the strategic network. Further work is needed to determine what impact any widening or junction improvements will have on local roads, and what will be done to mitigate against the increased flows through Compton, particularly given that a section of the B3000 though the Village is anticipated to become an Air Quality Management Area. GBC has resisted requests by members of the PC to have the northern end of The Street made an AQMA, but readings of nitrous oxide in this area are well above EU legal limits.

There is little information about the tunnel but the map indicates that one access / egress point will be in Compton near the A3, although no land has been safeguarded for this purpose. This is likely to have the same impact as the improvements to the A3, i.e. increased traffic (and pollution) through Compton.

The Spatial Hierarchy

The spatial hierarchy, which outlines Guildford's preferred strategy, does not match up with the proposed plan. The hierarchy places Brownfield sites (including those on Green Belt) as a priority, but the Plan has 66% of development on Greenbelt and only 34% on Brownfield. The hierarchy lists Guildford town and urban areas as a priority followed by inset villages and identified Green Belt villages. A relatively small percentage of housing is allocated for Guildford town (the most sustainable location) and Green Belt areas, such as Blackwell Farm, with high sensitivity have been classified as within the 'Guildford urban area' when they are in fact in the open countryside. We are told that only 1.6% of the 89% Green Belt has been earmarked for removal and that the 6% removed via insetting doesn't count as these villages are already developed. If this is the case, why list them in 4.1.16 of policy s2 - Spatial Strategy?

4.18 The preferred options cannot accommodate all that Guildford 'needs'. This is untrue. Two specialist consultants have independently critiqued the OAN and both question the level of uplift and the use of ONS data without full correction for changes and anomalies. They refer to 'double accounting' as the uplift is introduced at several stages and the assumptions that result in the final OAN are not explained. See comments on Strategic Housing Market Assessment (SHMA).

Strategic Housing Market Assessment (SHMA)

I Object

The “objectively assessed need” figure of 693 homes a year is too high.

A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the SHMA method should be changed to consider student housing need separately due to the distorting effects of students on the figures.

The current SHMA inflates the proposed housing figure due to:

- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability, and
- flaws in the method for estimating the number of homes needed to support job growth.

It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

Two additional reviews of the SHMA reach similar conclusions, one having been produced by CPRE and the other by Cllr. David Reeve.

The Land Assessment
I object

The exclusion of sites of 5 dwellings or fewer from the list might make administration easier, but the addition of these sites plus windfalls and outstanding (but current) permissions gives rise to a higher number of dwellings than is actually needed. There is therefore no justification for release of all the Green Belt put forward.

The criteria used to include or exclude sites because of this study lack consistency, with many sites excluded as 'unsuitable' with no further explanation offered (many of which were in the urban area of Ash). The assessment lacks objectivity and detail.

Green Belt & Countryside Study

I object

GBC’s Green Belt & Countryside Study does not value appropriately the “fundamental aim” of Metropolitan Green Belt or look strategically at options for developing in major settlement areas beyond the Green Belt. It is pointless for London to apply constraints to protect its Green Belt if areas within it, such as Guildford, choose to ignore this option. It is the same Green Belt and serves the same purposes, all of which are acutely valuable.

The way Green Belt is parcelled up and scored is invalid: serving 2 Green Belt functions well is as legitimate as serving 3 to 5 functions less effectively. The Green Belt sensitivity analysis is not a valid basis for informing decisions. This method also omits purpose one, on the basis that all Green Belt sites encourage regeneration of urban sites. This should not be excluded for it is valid and could even be argued to be particularly valid in areas close to the town. Boundaries used for Blackwell Farm were neither permanent nor defensible.

Proposed removal from the Green Belt of a number of relatively small sites where development of an exceptional nature has taken place, plus adjoining land, has lost sight of the scale at which Green Belt is effective.

Assessment of which villages to take out of the Green Belt does not adequately consider that villages contribute to the openness of the Green Belt, as seen from surrounding AONB.

A key principle of Green Belt is its permanence. The University Consultants stated this 13 years ago when seeking permission to take Manor Farm out of the Green Belt to create Manor Park. They reassured residents that the boundary would not be frequently moved and that Blackwell Farm would be opened up to the public for “informal recreation”. The same Consultant has now repeated this promise in putting forward the University plans to develop on Blackwell Farm, saying that the new boundary would be permanent for at least 25 years!

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Key parts of the evidence are still missing, flawed or based on withheld assumptions. The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach, and the Transport Assessment is too late and incomplete to be relied upon to inform the Plan.

The Plan excludes the Town Centre Master Plan, which plays a pivotal role and fails to address the results of infrastructure difficulties, or use these and Greenbelt to constrain the level of development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan preparation process has had inadequate regard for national policy, which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

The report states that there are no pollution issues in Guildford. This is not true. The A3 end of the B3000 exceeds Eu regulations and this should be flagged in the 2015/16 air quality report which the Council has yet to publish.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object

The plan is not so much positively prepared as avariciously prepared. I do not consider that it is reasonable to take on unmet need from neighbouring authorities, which have given greater protection to their Green Belt if it means our own is compromised on the scale being put forward.

*I believe that constraints should be applied to the housing target, which we understand equates to the objectively assessed need (OAN) as no reasonable constraints have been applied. The constraints that could and should be applied are Greenbelt and considerable infrastructure issues. The solutions suggested to accommodate the inordinate levels of growth are both inadequate and costly and the net result will be serious debt for many years if not generations.*

It was recommended by landscape consultant Alison Farmer Associates that the area known, as Blackwell Farm should be considered in the AONB boundary review, yet it was omitted in Surrey CC’s landscape evaluation. This meant the Parish Councils of Worplesdon, Compton and Wanborough had to fund an independent review to ascertain whether the area was a contender for AONB classification. The survey was carried out by in May 2016 by Land Management Services Ltd, which concluded that most of the 265 hectare farm was of a landscape and scenic quality that merited inclusion within Natural England’s revised Surrey Hills AONB boundary.

It raises serious question about the soundness of the evidence base when Surrey CC says that it only has to account for evidence submitted and not for that omitted? *The area within the proposed development site at Blackwell Farm should now be considered by Surrey Hills as part of the AONB boundary review and land to the west should remain undeveloped, as it is important to the setting of the AONB.*

The plan is not justified. Residents groups have suggested other strategies but these have not been tested or considered against the current trajectory, which has remained largely unchanged since day one.

Many aspects of the Plan were strongly objected to in 2014 and not only have these points been ignored, they have in fact been embellished or made worse. I refer to the points that GBC referred to in their own summary, which stated that most people objected to the scale of development and the harm to the Green Belt. At that time there were 4 strategic sites and now there are 5. At that time approx 50% of development was in Green Belt and now it is 66% with only 34% on previously developed sites. 58% of development is on just 5 sites.

*A more realistic appraisal of the town centre with more multi-storey car park development and less retail would make way for a greater percentage of housing in the town centre, which is after all the most sustainable and sought after area. Additionally, greater pressure must be placed on the University to house more students at Manor Park in order to free up affordable rented accommodation in the town for key workers.*

There is a conflict of interest when the developer (University) drags its feet over the provision of promised student accommodation (thereby putting pressure on the housing market) whilst at the same time seeking permission to build 1,800 new homes to help Guildford’s need? *The University is at least five years behind with programme of building student residences and staff housing. It is widely agreed among residents groups that the University must fulfil all of its current building plans and substantially increase the proportion of students on campus. If the University built the outstanding units, the housing need would reduce substantially yet much of this is omitted from the outstanding permissions list?*

GBC has approached development without applying constraints that are applicable such as Green Belt and infrastructure. It is wholly inappropriate to build a Plan without constraints when there is widespread opposition to this approach. Furthermore, there are serious doubts over the validity of the objectively assessed housing need. Housing need underpins the entire plan, and we are being asked to accept the figure of 693 on trust. Without an understanding of the methodology
behind the OAN, the public cannot 'buy into' this figure, especially as it has been illustrated by two reputable professionals that there have been errors such as 'double accounting', which has resulted in uplift. Both consultants have concluded that a more accurate figure would be around 500 new homes pa and the most recent one, which was done in pre Brexit -June 2016 acknowledges that due to the high number of International students here in Guildford a student SHMA would better inform this plan. Both consultants feel that the current SHMA is flawed and that the OAN of 693 is too high. These reviews will be submitted by CPRE and the GRA and we support the findings of both.

Putting 58% of development on 5 sites, which are within the Green Belt, or largely within the Green Belt, is not consistent with national policy. The definition of 'exceptional' is forming an exception or rare instance; unusual; extraordinary. What possible exceptional circumstances can justify 3 sites of approx 2,000 each and two of 1000 each, on Greenbelt. This makes a mockery of the term ‘exceptional’?

The plan has a maximum number and a hefty buffer. It has underestimated windfalls and overestimated need. It is likely therefore that if one of the major sites fails to come through, the Plan could still succeed in terms of numbers, but would fail in terms of impact on infrastructure and reliance on aspirational, but distant 'yet to be discussed' schemes such as railway stations, making the plan undeliverable. If more people are not given the opportunity to live in Guildford town, the night time economy cannot grow and if the gamble to use 40% of the land for retail fails, shops will close and we will have created a leafy green ghost town, whilst the villages outside the town will have changed beyond all recognition as the impact of urban sprawl takes its toll.

The plan puts many eggs into 5 baskets with 58% of all development on just 5 sites. If these are not deliverable, the plan will fail. This strategy has been roundly criticised by Inspectors in other parts of the country.

Taking on such a high OAN without scrutinising it and then taking land out of Green Belt to fulfil it, and using developer funding to secure infrastructure (which reduces significantly the proportion of affordable housing delivered) is destructive and risky.

It is inconceivable that 5 sites between 1,100 and 2,000+ each can be built on Green Belt land without affecting the purposes of the Green Belt.

AONB should be given the highest protection. Despite being put forward for AONB review Blackwell Farm was omitted and an independent consultant had to be commissioned by local parish councils. The findings showed that the area met Natural England’s latest criteria for AONB and should not therefore be developed but should instead be properly recognised.

The proposal at Blackwell Farm has been reduced from 2100 to 1800 to take account the impact on future AONB or for views in and out of the existing and future AONB from public areas as determined by planning policy. It is feared that if this site were approved and if access could be made possible without causing serious problems to the surrounding road network, that the AONB in this location would undoubtedly be destroyed.

GBC argues that it is necessary to remove more than 1.6% of its 89% Green Belt and to remove more than 6% of its Green Belt from villages (by way of insetting) in order to meet its need, yet at the same time the Council advocates making an additional area Green Belt? The area of land being put forward for inclusion within the Green belt is on the same ridge as two areas of Green Belt it wishes to remove (Normandy & Blackwell Farm). This approach lacks consistency.

Cllrs Paul Spooner and Matt Furniss have stated clearly that there will be no development without supporting infrastructure and that the infrastructure must come before, or alongside, development. It is difficult to see how this will materialise as developers’ CIL contributions (which will fund infrastructure) are paid from profits made from the development. This statement appears to be unenforceable and could offer false reassurance to residents who may support the Plan on this basis.

Developers are being asked to fund large amounts of infrastructure. They will offset this against any agreement for affordable housing and it is highly possible that affordable housing will not be built or that only a small proportion will be built. This was one of the key drivers and is factored into the housing need, yet may not be delivered. Where is the general analysis to see what level of affordable housing might actually be delivered given the level of infrastructure needed to implement this level of development on new sites?
The omission of the Town Centre Master Plan (on the basis that this has different timescales) invalidates two key components of the Plan - the Infrastructure and Highways assessments. The suggested road closures in the town centre and the resulting re-routing of traffic should be factored into the highways assessment, but they are currently omitted. The consequences of this could render the whole Plan undeliverable and I don't believe the Plan can be approved without factoring in the Town Centre Master Plan.

GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA), which CPRE and GRA consider unsound. The methodology for the uplift and assumptions made have not been made available and thus the openness and transparency required for public understanding as outlined in the NPPF has not been adhered to.

I understand that Highways England will not start to consider its intentions as regards the A3 in the vicinity of Guildford until 2018. It is difficult to see how plans can be approved without the inclusion of this information.

Network Rail has not made available for the public consultation any plans for a new railway station at Merrow, nor have we been told where the station car park would be situated nor how the railway bridge between Merrow and Burpham would be re-constructed to take the additional traffic. Likewise, there are no detailed plans for the railway station at Park Barn and Network Rail has not confirmed the status of either. These schemes must have a sounder footing to be included in the Plan if they are to be used to justify large developments nearby.

The access to, and from, Blackwell Farm (via the A31) has not been thought through. There proposed new route will likely be used as a rat run to the A3/Guildford, but this will put pressure on a congestion hot spot, and result in increased traffic at the Compton turn-off and Down Lane (home to Watts Gallery). It is also recognised that congestion at the Tesco roundabout will be made worse and this area is already subject to considerable problems. Additional traffic via the business park from Blackwell Farm will add to congestion at the Egerton roundabout and impede access for emergency services to the hospital.

The proposal at Blackwell Farm has been reduced from 2100 to 1800 to take account of the AONB, but this does not account for views in and out of the AONB from public areas.

The greenbelt sensitivity study is not objective. The reference to Blackwell Farm as 'South West Guildford Urban' is totally misleading as it is unadulterated countryside that fulfills all the purposes of Green Belt. I consider this Study, which was the subject of much criticism in the last plan, to be flawed, yet it remains in this Plan. Why?

The damage caused to the Green Belt by the addition of Blackwell Farm would outweigh benefits gained from development, as there is ample space and lapsed planning permission on the existing Manor Park land for development for student accommodation, which would free up affordable rented accommodation in the town.

The proposal for Garlic Arch was added to the draft Local Plan without any consultation under Regulation 18.

No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Guildford citizens.

No land has been safeguarded for a tunnel, which would show a real intent.

This consultation included 'significant changes' according to GBC, although most residents would strongly dispute this. Some key reports were added and 6 weeks was not long enough to properly digest the information and impart this to residents. Many additional questions had to be asked and many points required clarification, which essentially meant adequate information, was not made available until two thirds of the way through the consultation.

The level of objection at the 2014 consultation was considerable - these objections have NOT been dealt with, but have been carried through to a regulation 19 consultation, undeterred. This is not in the spirit of Localism or the NPPF.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Cooperation is a two-way street. Guildford objected to Waverley's plans for Dunsfold on the grounds of increased traffic and in the same submission referred to positive consideration of unfulfilled OAN. Guildford also refers to its duty to consider Woking's unfulfilled housing. Guildford does not have land to spare to assist Waverley or Woking without taking vast amounts of land out of Green/belt, which is protected by the NPPF. Greed is not 'an exceptional circumstance' and if both Woking and Waverley (and indeed London as it is the Metropolitan Green Belt) prefer to protect their Green Belt then the question must be asked as to why Guildford is happy to relinquish its Green Belt land, especially in the face of strong public opposition.

Many also question the choice of just Woking and Waverley as partners in the SHMA as there are considerable links with Aldershot and Farnborough in Rushmoor, which have very different needs and their inclusion could have provided a better balance.

I object to the inclusion of Blackwell Farm in the plan and would like to attend the examination

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Plan is supposed to be informed by residents and by parish councils and residents' groups and their input used to formulate the Local Plan, not for it simply to be presented to them and objections and subsequent input ignored. Despite a great deal of effort from these groups and many like-minded responses, the Plan has not taken their concerns on board. The Plan has barely changed since day one and residents feel their views have been ignored and that the consultations have not been genuine. To add insult to injury, some of the key points raised have actually been exacerbated or made worse, such as the scale of development and harm to the Green Belt and issues over infrastructure.

The NPPF is open to interpretation, but it is our belief that GBC has chosen to interpret it in a way that lacks objectivity in an effort to appease developers in order to avoid costly court cases at a later stage. GBC has cited cases where development has been granted in an effort to justify this pro-development stance but has failed to balance this against the many sites where development has been refused.

To gain true public reaction, material presented has to be factual and unbiased and written without jargon and acronyms. This has not been the case. A degree of 'double speak' has led to absurdities such as 'affordable housing' which is over £300,000 i.e. ten times the average salary; 'safeguarding' which does not mean protection of land as most people would think, but rather potential future development and 'insetting' which means removal? It is recognised that these terms are not locally derived but all the same they are confusing for most of us.

Some Councillors have shown a lack of knowledge about environmental matters. Cllr. Gunning - webcast 24th May section 7 - 3:39

'About ancient woodlands, of course they are very attractive things, but they are ancient and trees don't last forever, so can we be practical about ancient woodlands and consider their value or their life, I should say, their life'

May 11th - Cllr Ellwood announced that he couldn't understand what all the fuss was about pollution as his Mother had lived (presumably unaffected by it) under the flight path at Heathrow?

Whilst people have been encouraged to take part in consultation, objectors have been subjected to name calling and public humiliation. There are too many examples to list and so I am listing the most recent. http://www.guildford-dragon.com/2016/07/10/letter-not-surprised-mr-patons-comparison/#comment-157440

The Local Plan has divided communities and highlighted weaknesses and alliances, which have resulted in a breakdown of trust between residents and those whose job it is to implement the Plan.

The Plan has been roundly criticized and objected to and yet it is presented to us once again. Many feel the consultations to date have been worthless and feel they have already made their points, which were ignored and will not therefore be making them again as they fail to see the point?

It simply is not possible to address infrastructure shortfalls by building in the hope that developers contributions will cover the costs as the level of development needed negates any benefits gained and in many cases, the situation is made worse.

Central government funding is needed to address current problems so that funding from development can be used to implement additional infrastructure needed to make new sites viable without damaging their surroundings. It must be accepted that geography and lack of previous investment leaves some areas with less opportunity to do this than others.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the lack of any evidence for the alleged housing need numbers

Nowhere in the Plan document can I find an explanation for why new houses need to be built other than the obvious that there are too many people. But this is addressing the problem in the wrong way. The problem of overpopulation is due primarily to the massive influx of immigrants. Successive Governments have failed either to listen or act on public opinion on immigration into the UK. Some in the last government have at last acknowledged that they failed spectacularly to control the numbers of people entering the UK from Eastern Europe and elsewhere resulting in serious problems of overcapacity. It is sheer madness and foolishness to try and resolve the problem of overpopulation by creating even more problems building more houses and destroying the green belt to achieve this.

GBC should not punish local residents for the errors of central government. Its residents will applaud GBC for standing up to central government and the constituents will have the confidence to re-elect GBC in the future if they properly support their constituents.

1. I object to the limited consultation period

The Council, having sneaked this proposal in at the last minute without any consultation whatsoever with the community, has only allotted six weeks to register objections to a document over 1,800 pages, this is half the usual time.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A57
### I Object to the site A57 The Paddocks

Site A57 was part of planning application 14/P/00867 in May 2014 which itself was a blatant re-hash of planning application 09/P/01554. The caravan site had already been established at the time of the application, suggesting that a retroactive application was being sought. The unauthorised development of the site runs wholly contrary to the Council’s planning policies. The Council should attach high priority to its planning enforcement role and should not stand idly by where there are flagrant breaches of planning rules, particularly on a prominent site like this in a Green Belt / Conservation area.

Planning application 09/P/01554 was refused permission by GBC, and the appeal was rejected by the High Court in April 2013. Although the site’s continued occupation has been judged completely illegal, no enforcement action has yet been taken by GBC. GBC should take immediate action on the enforcement notices against illegal occupation. The Council is accountable for protecting the interests of the community and should not run away from its responsibilities.

### What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Comment ID:** PSLPP16/1007  **Respondent:** 11036321 / Vinciane Ollington  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. **Congestion on the A3 and M25 trunk roads**

I object to the development of the strategic sites due to the A3 and M25 already being at capacity during peak hours. Highways England has no plans to look at improving the A3 before 2020. It is therefore not sustainable to identify sites for further development which will worsen the congestion on these motorways and trunk roads.

1. **Congestion on the local village roads and lanes**

Our villages are already suffering from severe congestion for much of the day. For example the Newark Lane and Rose Lane junction in the center of Ripley, which at peak hours, is regularly gridlocked due to the volume of traffic, made worse when Ripley High Street (B2215) is used as a detour/slip road when the A3 is jammed. I object to further development which will cause even greater congestion in and around our villages.

1. **Unsuitability of our local roads for heavy vehicles and more traffic**

Many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. For example, part of Newark Lane which was resurfaced for the 2014 Olympics cycle route and has been used subsequently for other cycling events, has had to have...
regular “fixes” to crumbling road surfaces and recurring potholes due to traffic volumes far in excess of the road surface quality used. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

1. Poor air quality concerns

Further congestion, particularly in built up residential areas will only lead to greater levels of air pollution. I object to further development, which will result a fall in the air quality.

1. Parking issues in local villages caused by larger population

Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems, to which I object.

1. Local healthcare facilities will be overwhelmed

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. I object to the further stress it will put upon existing overstretched health services.

1. Local schooling facilities will be overwhelmed

Without proper planning and a commitment to fund new schooling, existing schools will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. I object to the further stress it will put upon existing overstretched schools.

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Destroying the Green Belt

I object to the proposal to remove (“in-set”) Ripley, Send and Clandon from the Green Belt.

No one in this county, let alone this nation voted for destroying the Green Belt. We already live in one of the most overcrowded parts of the country. Roads are congested, schools are full to capacity and hospital/medical center waiting times are forever deteriorating. Just to drive out of our village in the morning can take up to 15 minutes to cover a few hundred meters. This is stressful and will only get far worse with more houses.

We are filled with despair at loosing what we have worked all our life so hard for. We have worked hard to ensure our family lives in “England’s green and pleasant land” (something that was even shown as a virtue of our nation in the Olympic opening ceremony), away from the suburban sprawl. All this is in jeopardy with this plan.

By building more and more houses, this will not only further congest an already congested road network, but the overcrowding will create further pressure on schools, hospitals, and other services, all of which will require more people to be employed, which will probably result in a further round of house building and so on. What is GBC doing to consider the wellbeing of their constituents? Was not happiness and wellbeing also on our Prime Minister’s agenda?

High volumes of traffic and congestion have negative effects. These include road collisions, the severance of communities, the costs of delays and the unreliability of journey times to people and businesses. Environmental impacts include traffic noise, air pollution and amenity issues. At a global scale, vehicle emissions contribute to climate change. Some parts of the major roads in Surrey operate significantly beyond their capacity, resulting in traffic congestion, and forcing drivers down rural / country lanes to avoid main roads, leading to further congestion and road accidents.

If Surrey has a high quality of life and the borough is ranked as one of the least deprived 10 per cent of boroughs in England and one of the best places to live in the UK (Halifax quality of life survey, the Family Friendly Hotspots report), why is GBC looking to diminish this by proposing these plans?

Central London imposes congestion charges and astronomical parking charges in order to limit traffic and its associated problems in central London so as to afford its residents a better quality of life. Why can this logic not be applied to those living in Guildford Borough/Surrey? Why are GBC proposing the opposite in suggesting more houses be built?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. Disproportionate size of sits in relation to rural locations

I object to the allocation of land to the strategic sites of Garlicks Arch (Ripley/Send border), Gosden Hill (Clandon) and Wisley Airfield. The proposed development of these sites will have a disproportionate impact on the surrounding local villages. They will have a permanent and negative impact on each of these communities.

1. Unbalanced allocation of development in one area of the Borough

Between the M25 and Burpham, a distance of only about 5 miles it is proposed that over 6,500 houses are built. This represents over 40% of the housing proposed in the Local Plan. I object to this area being hit so hard by the allocation of development, which is disproportionate to the rest of the Borough.

1. Gerrymandering

The concentration of Green Belt development is not only disproportionate to the rest of the Borough but has been disproportionately applied to Wards that are not lead by a Conservative borough councilor. For example, the Ward of Lovelace (Liberal Democrat) accounts for 15% of the Borough’s population but has been allocated 35% of the proposed house building. The Ward of Send (Guildford Greenbelt Group) has also been given a disproportionate amount of house building. The coincidence of this is statistically significant and demonstrates at best a form of punishment to Wards who did not elect a Conservative borough councilor and at worst a form of gerrymandering.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the 2017 Revised Local Plan by Guildford Borough Council (GBC) for the following reasons:

Housing at Site A43 Garlicks Arch would be on Greenbelt Land.

The potential increase from 400 houses at site A43 Garlicks Arch is extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of 6 Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural environment within the Greenbelt and there is no identified need within the Local Plan documentation.

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan and so is out of scale with the proposed development.

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I absolutely object to the proposed changes to the intersection with the A3 at Burnt Common. Any encouragement of increasing the traffic off the A3 and through the village of Send would vastly change the village and bring the village to a standstill. This proposed change, which can only be to encourage traffic into Woking, would just create a big bottleneck at the junction at Old Woking as this road is at capacity (both directions) almost all day and particularly in the morning when there are constant queues. School children would be at risk as they go to school and old people particularly as they visit the Doctors surgery which is also on the road. There might be a benefit to have an access at Burnt Common to head north on to the A3, easing some of the traffic in Ripley, but this would only be a minor positive.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed developments at Send Hill. The road is not capable of receiving any more traffic the end towards the Church is very dangerous and is not suitable for the school buses that have to use this currently. I do not like driving this section of the village and only do so in absolute necessity. Any development would increase risk to accidents and possible loss of life. This development will also increase the traffic problems at the traffic lights at Mays corner.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The whole development of the village of Send should be very carefully considered. The infrastructure of the village is at the limits of capacity, the schools are full and Doctors Surgery is full, there is no more room for any more shops and the traffic gets gridlocked as soon as there are any problems, even if these are in Ripley or Old Woking.

I trust that this email will be read by the Planning Officer and my points given due consideration.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the latest proposals for the development of the Send area and the loss of the Green belt around the village of Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3540  Respondent: 11036545 / Peter Bassett  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the removal from the Green Belt of the former Wisley Airfield, referred to as Three Farm Meadows, and I OBJECT to Allocation A35, The development of a new settlement of up to 2,100 dwellings, as a new settlement does not accord with the designation of the site as Green Belt and the Council has failed to provide the exceptional circumstances required by the NPPF necessary to justify removal of the site from the Green Belt. It was accepted by the Leader of the Council at the Advisory Board in April 2016 that the Objectively Assessed Needs (OAN) figure was exceeded. There is no need for the Council to exceed its OAN but the Local Plan proposes to do so by causing harm. The OAN can be satisfied by development of more sustainable sites; there is no need for A35 and so there cannot be any exceptional circumstances justifying it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Sustainability

The Former Wisley Airfield is within the least accessible part of Guildford Borough, remote from rail stations with poor local roads and lengthy bus routes and, given the proximity of the A3, it is implausible that development would prove to be attractive and safe for cyclists. The development is too small to be self-sustaining and yet large enough to cause substantial adverse impact.

Deliverability

The site was subject of a recent planning application for a quantum of development comparable to that in the Proposed Submission Local Plan and with a very similar boundary. The application was recommended for refusal and refused unanimously in April 2016. Despite 15 months of negotiation with the applicant, Wisley Property Investment Ltd (WPIL), additional issues of impact on the Special Protection Area (SPA), impacts on the strategic and local highways network, sustainable transport, affordable housing, air quality and education could not be resolved. The failure of the planning application confirms that there is no reasonable prospect that the project can be delivered.

Soundness

The reasons for refusal of the planning application submitted by WPIL and the failure of the applicant to resolve issues for a proposed development comparable to the Local Plan allocation confirm that the allocation is unsound. The allocation i) does not provide sustainable development ii) is not supported by exceptional circumstances to justify removal of the Green Belt designation and iii) lacks realistic prospects of delivery.

I OBJECT to the removal of East Horsley and West Horsley from the Green Belt. The NPPF requires the provision of exceptional circumstances to justify alteration of the Green Belt Boundary. The Council has failed to provide the necessary justification. Therefore, allocations A36 Hotel at Guildford Road East Horsley, A37 land at the rear of Bell and Colvill Epsom Road West Horsley, A38 land west of West Horsley, A39 land near Horsley railway station Ockham Road North West Horsley, A40 land north West Horsley and A41 land south of West Horsley should be deleted as allocations for residential development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Green Belt

The Green Belt designation of the site prevents the sprawl of the urban areas of Guildford, Woking, Leatherhead and the Metropolitan area. Previously developed parts of the site such as the runway, taxiways and the aircraft hardstanding are all open and, therefore, buildings on these areas will cause considerable harm to openness and the Green Belt. A new settlement would represent inappropriate development in the Green Belt, would cause significant harm to the character of the surrounding area and significant harm to the setting of a Listed Building. Development of this Green Belt site will discourage urban regeneration.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Guildford Borough Proposed Submission Local Plan Strategy and Sites, June 2016, proposed strategy that in excess of 65% of the proposed residential development be built within the Green Belt. The National Planning Policy Framework (NPPF) requires the provision of exceptional circumstances to justify alteration of the Green Belt Boundary. The Council has failed to provide the necessary justification.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the New Local Plan in general since it fails to protect Guildford Borough Council's stated objective on their Website of "protecting the borough's most important countryside, landscapes and heritage". It clearly fails to achieve any of these objectives in the case of Send Village whose History dates back past the Middle Ages and proposes development of 480 houses and 7,000 sq metres of industrial and warehousing space which will destroy Send's living environment; local countryside; areas of natural beauty; and ancient woodlands - let alone a village community which has survived for hundreds of years.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1707  Respondent: 11036705 / Brian Slade  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to POLICY A 43.30 ha LAND AT GARLICK'S ARCH Burnt Common 400 house and 7,000sq metres of industrial and warehousing. There is no need for any more houses or even as many houses as the new Local Plan states are needed (13,860) - neither is there any need for the additional 7,000 sq metres of industrial and warehousing space. If there is a need for more industrial space it could easily be developed on the existing industrial site at Slyfield. A new 4-way A3 interchange to service this development (which for the reasons stated above) would therefore not be needed. In addition there is photographic evidence of flooding on the site. If it were developed it would destroy the village communities of Send, Ripley and West Clandon and their quality of life and health and cause major problems in relation to Road Safety.

I OBJECT to the fact that POLICY A 43.30 ha is a NEW site not included in the Regulation 18 Draft and has NOT been consulted on previously. It is Green Belt land permanently protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances. It is a sensitive conservation site covered in ancient woodland and trees which have been there since the 16th Century and which would then be endangered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1706  Respondent: 11036705 / Brian Slade  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the NEW 4-WAY A3 Junction at Garlicks Arch, Burnt Common which is a NEW Site not included in the Regulation 18 Draft and NOT previously consulted upon. This will cause major increases in traffic volumes which the existing local road infrastructure will be unable to cope; seriously increased pollution affecting the Health and Quality of Life of local residents and wildlife; and the loss of ancient woodland and good quality agricultural land.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1708  Respondent: 11036705 / Brian Slade  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the fact that POLICY A 444.1.9 ha LAND WEST OF WINDS RIDGE AND SEND HILL designated for 40 homes and 2 Travellers Pitches. This site is NEW and was NOT included in the Regulation 18 Draft and has not been consulted upon previously. Development for housing is inappropriate due to its permanent Green Belt status and it is a Green Belt amenity within an area of natural beauty which would be totally spoilt by any development. The site contains documented contaminated land which is vented. Also the site of the proposed Travellers Pitches can only be accessed via a narrow single track country road which makes access very limited and thus unsuitable for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3739  Respondent: 11036705 / Brian Slade  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT that the already overloaded infrastructure and existing transport overload seems to have been completely ignored in the case of Send as has the existing traffic congestion during peak times in Send and in particular the A247 being used by large commercial vehicles for which the road is totally unsuited. This is without the inevitable significant overload which will be caused by the proposed additional housing population and industrial development which is just not sustainable and will cause major inconvenience and significantly increased pollution for the existing population of Send. Additional housing is already being developed in Tannery Lane as well as the Marina being developed using a narrow road with a dangerous junction onto the A247 in the middle of Send Village. Send is already becoming the through route from Woking to the M25 and A3 and will become gridlocked all day - even without the proposed NEW 4-Way A3 Interchange This alone will destroy the village and cause major Health and Safety problems, particularly in relation to the major school development and merger of two schools which fronts onto Send Barns Lane (A247) where parents already cause serious parking congestion and traffic problems with just the one current school without the addition of the new second one.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY P2 REMOVING SEND FROM THE GREEN BELT. Send is an historic settlement dating back many hundreds of years and provides an essential buffer between the large urban conurbations of Woking and Guildford. Send contains areas of Special Scientific Interest as well as areas of natural beauty and ancient woodlands providing much needed habitats for wildlife - an amenity much enjoyed by Send residents as well as other GBC residents such as the Canoe Club. Without the Green Belt permanent protection afforded by the National Planning Policy Framework Developers would run riot - could not be stopped - and very quickly there would be no separation between Woking and Guildford as intended by central government in the NPPF to prevent the merging of settlements.

**Comment ID:** SQLP16/714  **Respondent:** 11036705 / Brian Slade  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Specifically:

I OBJECT to the fact that GBC has made major changes to the Plan which require another full consultation under Regulation 18 - not trying to get out of that full consultation by use of Regulation 19. This not only invalidates the whole process - but makes a mockery of it.

I OBJECT to the lack of Evidence supporting GBC Strategic Housing Market Assessment 2015 which is highly questionable and for which GBC has consistently refused to provide details of its calculations despite several requests to do so. I believe that the requirement for 13,860 new homes in the Borough is exaggerated - and even if the population were to grow by 20,000, based on an average family size of 2.5 persons in each home, the need would only be 8000. It would appear that the number of foreign students has been wrongly used to inflate the population need. The Green Belt
does not need to be built over to meet that need when 50% of the 13,860 new homes stated as needed could be built on existing Brownfield Sites. GBC's Transport Assessment was not even available to Councillors when the vote on the New Local Plan was put to them on 25th May which again questions the objectivity and competence of GBC and its Planners.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Lack of Evidence supporting the need for Industrial Development at Burnt Common since the latest Employment Land Needs Assessment in 2015 shows an 80% reduction in employment space need from the ELNA carried out by GBC in 2013. Bearing in mind the significant amount of vacant premises in the Borough and surrounding area there is no need for new commercial and industrial development and the traffic and pollution problems that will ensue because of it.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 5: The examination

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

GUILDFORD BOROUGH COUNCIL HAVE NOT FOLLOWED CORRECT PROCESS. Since 2014 GBC have changed every major site in Send proposed for development - added a major main road interchange junction and varied their housing requirements from 430 houses in 2014 to 185 in April 2016 now revised upwards in this Draft to 485. These significant changes require another full consultation under Regulation 18.

<tr>
<td>I object to Policy A43 change - Land at Garlick's Arch, Send Marsh because, where despite thousands of objections it is now proposed that 400 homes and 6 Travelling Showpeople Plots are constructed despite there being no proven demand for Showpeople Plots in this area which is permanent Green Belt with no &quot;exceptional circumstances&quot; containing ancient woodland dating back to Elizabeth 1 that GBC are proposing to destroy. It is currently a Flood Zone 2 allocation having frequent flooding and is contaminated land with lead shot following 50 years of shooting activity. The proposed development will generate excessive traffic on roads that already get gridlocked in Send and Ripley at peak times and also join up Ripley and Send which is contrary to the key purpose of the Green Belt.</td>

</table>
I object to Policy A58 change - Land at Burnt Common, London Road which was deleted from the 2014 draft due to all the objections because there is no proven demand now or in the future for additional industrial capacity. It would therefore appear that GBC is presuming that a new A3 junction will be built sometime in the future at Send and justify this excessive industrial development within a Green Belt residential/rural area.

Slyfield and Guildford still have empty sites and industrial units and the 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for the whole of Guildford Borough - not the excessive allocation of 10 hectares in Send alone within the Green Belt which will cause major traffic gridlock in the surrounding roads and join up existing villages - again defeating the Green Belt. It is also noted that the word "maximum" in the 2016 Plan has, very significantly, been changed to "minimum".

Existing roads necessary to service such a development do not have anywhere near the capacity to accommodate such a demand. This is totally unacceptable and smacks of an attempt at sleight of hand and dishonesty by GBC to confuse residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/16177  Respondent: 11036737 / Charley Penny  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- The large developments planned for this area, Garlick’s arch (A43), Wisley Airfield (A35) and Gosden Farm (A25) will put a significant amount of pressure on the local amenities. The transport links are not built for this level of development and with the lack of a railway station and poor bus links it means that a lot of people will have a car. The roads around these areas are small and are already gridlocked at peak times. With these three developments, as well as some of the smaller infilling of houses (including over 500 houses built in the Horsley area), there will be even more gridlock during peak times then there already is.
• The smaller roads of Polesdon Lane, Papercourt Lane and Tannery Lane will simply not be able to cope with the increased amount of traffic. This will put further strain on Ripley High Street, Newark Lane and Send Road which are always very busy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• As stated in Policy P2 the Green Belt was implemented to ‘prevent urban sprawl’ and provide opportunities for people to access the countryside. By removing these local, rural villages from the Green Belt it will lead to urban sprawl and will mean the individual villages will lose their identity. The Green Belt area around Send and Ripley also act as an important buffer between the larger towns of Woking and Guildford.

• There are no exceptional circumstances as to why these villages should be removed from the Green Belt. I know a lot of people live in these villages to be closer to the countryside and they should be safe in the knowledge that the rural area they have chosen to live in is in the Green Belt and protected from large developments. Garlick’s Arch is also home to some areas of ancient woodland which are not protected as part of the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

With 5,000 homes planned to be built in and around the Ripley, Send, Horsley, Clandon and Burpham area, it is completely unsustainable and will damage the local area and its infrastructure.

There are far too many plans for houses to be crammed into an area which can’t take it, rather than using existing brownfield sites closer to existing urban areas and transport links

In conclusion, I object to the new Guildford proposed Local plan because of the enormous pressure it will put on the local resources and amenities, the increased amounts of traffic and the loss of rural identity. I specifically object to the developments at Wisley Airfield (A35), Garlick’s Arch (A43), Gosden Farm (A25) and Tannary Lane (A42) as well as the
other smaller plans in Horsley (A36-A41). I urge the council to take these objections into consideration and reconsider the removal of the Green Belt status.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of Send Business Park from the Green Belt (4.3.15)

There is no need for this area to be removed from the Green Belt and no reason has been given for this, therefore there are ‘no exceptional circumstances’ why this should be removed from the Green Belt. If this was to be removed, as well as the building at site A42 these areas will soon merge, giving the potential for more homes to be built.

Overall I strongly object to the changes that have been made to the proposal especially to Garlick’s Arch and Clockbarn Nurseries, and I think the imbalance towards the Ripley, Send and Wisley area is grossly unfair and will completely ruin the whole reason people move to and live in the area. I hope the council take on board these points and amend the plan accordingly.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the imbalanced allocation of housing sites across the borough

The biased allocation of houses towards this area (over 40% of proposed homes are planned within 3 miles of Send Marsh) is completely unfair. Most of these houses are to be built on Green Belt (as we know it now) and will completely ruin the area. Removing these homes from the Green Belt, even with limited infilling as proposed for Ripley, will only lead to more homes being built and the problem increasing.
People who move to this area in the Green Belt should be safe in the knowledge that building within the Green Belt is limited and is to only be removed under exceptional circumstances, none of which have been proposed. The resources are not made for it, especially the narrow lanes where people cut through to avoid the A3 and to get to Woking.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to POLICIES A36,A37,A38,A39,A40&A41, for reasons below:-

-Proposed amount of new housing far exceeds local need.( e.g see local survey -Surrey Community Action Housing Survey 2014)The need for so many houses to be built in West Horsley over the first 5 years of the plan period is totally unproven.

-There is no local support for them

-The density for new housing on the 6 Horsley sites is inappropriate as it is greater than anywhere in the present locality

-They would transform the 2 rural villages into a large urban development for which there is no justification.

-The collective impact of all sites on the Horsleys should be studied.It is clear that it would have a devastating effect on infrastructure and services and have an adverse impact on well being in the area e.g air quality and noise pollution would worsen.

-The West Horsley defined Settlement Area boundaries(ref2003 Local Plan) DO NOT need to be extended.Too many green fields adjacent to the current housing in the village would be allowed to be developed.Sites allowed on the edge of the settlement boundaries causing extension of the boundaries would cause creeping urbanisation contrary to NPPF 79,where it closes the gaps between Horsleys and neighbouring settlements.Large sites proposed for development such as Wisley Airfield(A35) and A25(Gosden Hill Farm) would also contribute to this to the detriment of the Green Belt.
- The total amount of new building would be out of scale with the planned development in other parts of the borough, especially more urban areas not protected by the Green Belt.

- Building 533 new houses on these sites is excessive, not in proportion to the rest of the borough and will destroy the rural character of these communities. The proposals are unsustainable in terms of schooling, drainage, roads capacity, shops, parking in East Horsley at station and shops and public transport.

- The key evidence document 'Guildford Borough Economic Strategy 2013-2031' makes no case for locating large numbers of new homes in West and East Horsley, or neighbouring villages.

- Site A40 not viable due to high water table and poor drainage leading to winter floods, and there would be many other safety issues that would have to be raised concerning access, traffic, facilities for pedestrians etc.

- Development of these 6 sites in the Horsleys would together harm the access to the amenity of the Green Belt and its recreational value and compliance with NPPF 81. This would be caused by congestion on all surrounding/narrow roads harming safe activity such as cycling. The development would ruin rural settings of nearby woods, open sites, walking and leisure areas.

I OBJECT also to POLICY (Site) A35(formerly WISLEY Airfield-Three Farms Meadow)

I OBJECT to this being in the plan for the following reasons:-

- It should NOT be included at all for all the reasons given by the Guildford Borough Planning committee which unanimously rejected an identical recent planning application for this development on 14 separate grounds (application ref.15/P/00012). It is a scandal that this has been allowed to be inserted into this draft plan just a day before the planning decision was delivered, a fact which the planning committee must have known full well as they delivered their decision!!

This is tantamount to bias towards the developers and is totally unjust, making a mockery of residents' serious concerns and worries in relation to this proposal for development.

The Council planning officers have surely acted irregularly if they have allowed Wisley Investment Properties to present this application out of time.

Grounds for rejecting the application included the following:-

- no "exceptional circumstances" have been shown to give reason to build on this predominantly Green Belt site itself surrounded by Green Belt.
- loss of good quality farmland (55% of the site) contrary to national policy

-too close to Thames Basin Heath Special Protection Area (TBSPA)

-the description given that it is brownfield land is a misrepresentation. Less than 15% of the site constitutes brownfield and it is next to the SPA which has an exclusion area of 400m in respect of housing. The remains of the runway is now a rare flora and fauna habitat and no permanent dwellings have been built on it. The entire plot of land including the former airstrip continues to have Green Belt status.

-proximity to A3/ M25 bottleneck junction (junction 10).

-completely inappropriate location for over 2000 dwellings within the ancient village of Ockham disproportionate to the 159 homes in this village.

  • increased harm to air quality for the site, noise pollution and reduction of light would be to the detriment of the health and wellbeing of residents on and near the site.

-proposed Surrey County Council waste site is ignored in the proposal

-no proper traffic data

-SANG would cause harm to SPA

-extreme housing density with little space between

-damage to neighbouring communities by proposing to create a settlement of 5000 residents equivalent to numbers in both East and West Horsley combined.

-major impact on neighbouring villages, especially the Horsleys

-lack of information about the impact on the local water table and flooding on the site itself and areas of the local river Mole
- No existing public transport and stations too far away

- Ignores the collective impact this site, together with nearby development sites, would have on the area

- Unacceptable conflict of interest arising from the Conservative Party links between the developers and the Council, which has a Conservative party majority

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- All the proposed policies far exceed the local need.
- The proposed density is far higher than any existing locally or in Guildford, it is more reminiscent of London.
- The proposals are tantamount to the formation of a sizeable new town in the Horsleys. There is no justification for this.
- There is no local support for these policies.
- The collective and cumulative impact of these 7 sites has not been properly considered or assessed.
- The proposed developments are completely out of scale with existing and planned building elsewhere in Guildford.
- The sites are unsustainable. The vital improvements in infrastructure are missing (water, sewage, anti-flood provision, traffic management, schools, health, telecommunications)
- The Wisely Airfield site was rejected by the councilors and yet it is included in this proposal. Why? Things have not changed since the refusal and additionally, no account is taken of this proposed site on the Horsleys.
- The changes in the settlement boundaries are far too sweeping and the squaring off or regularizing activities will suck in many adjacent fields. The plan cannot maintain that this means they don’t contribute to the openness of the Green Belt.
- If Wisely Airfield were to be built on, the Green Belt space set between the neighbouring villages will become much smaller and is contrary to the entire raison d’etre of the Green Belt.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Introduction
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to ALL POLICIES involving building in the GREEN BELT

As noted in P2 above, there are no "exceptional circumstances" shown. I object to the identification of these sites without regard to Green Belt, infrastructure or other constraints. The plan says it is not granting planning permission for developing these sites but it DOES identify the principle of development and uses. Why does it do this? In doing so it ignores many thousands of specific comments made to the Council about these individual sites since the consultation in 2013 (Issues and Options) and the plan has hardly changed since the 20,000 objections were received by the Council since the 2014 draft plan.

This amounts to the Council (and through its representatives) ignoring the law regarding Green Belt (as already mentioned above) and thereby ignoring the objections and serious concern expressed by the borough residents on the draft plan proposals put out for consultation to date. It amounts to an attempt to wear down the people through attrition. I personally and many others are sick and tired of having to repeat comments already made. Not only that but I question whether the Council by the way it has run its surveys and engagement of consultants, has been using its funds wisely.

I would ask that all Green Belt Sites should be removed from the plan until "exceptional circumstances" for development are proven as is required in the NPPF. eg. Para 88 says that "very special circumstances will not exist unless the potential harm to the Green Belt ....is clearly outweighed by other considerations". Time and again the Council has failed to provide us with justification for this draft planning on Green Belt sites/land. Short term considerations or housing "need" have been tested in court (Gallagher Homes v Solihull Metropolitan Borough Council 2014).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to each and all policies which propose building in the Green Belt. No 'exceptional circumstances' have been demonstrated. As confirmed by government ministers, 'the building of new houses does not constitute exceptional circumstances'.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to POLICY site A12 (BRIGHT HILL car park)

I object to changing the use of this site and would like the Council to retain it as a car park and not to build houses on it. This is an extremely valuable parking space for people coming to Guildford to shop, attending the nearby Adult Education centre and it acts as overflow parking for those visiting nearby residents whose roads are narrow and have limited car parking e.g. Brodie Road and Cheselden Road. In addition it gives valuable parking for patients who need to visit the Mount Alvernia Hospital on the top of Harvey Road, as there is always a difficulty in parking at this hospital. There is only a small number of spaces in Harvey Road and at the hospital itself.

I would not object to some small amount of landscaping to reinstate trees and vegetation on the edge of the area. This would enhance it.

The space and the views it affords are valuable to the town and offer some respite to the development around it. The views are wonderful from Bright Hill and any building on the site would destroy that amenity which we have enjoyed in Guildford for many years.

It may be classed as temporary but this car park has been there for many years, so I would argue that it could be regarded as being a permanent fixture.

This is an example of the Council having an eye to selling prime land (I would guess for luxury apartments?) in Guildford centre for profit without considering the consequences for borough residents and workers alike. Developing houses or flats on this site would ruin the use of a decent sized and easily accessible open air car park, destroy the views and would ignore the need to restrict development in this old conservation part of the town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to POLICY(site)A25 GOSDEN HILL FARM, Merrow Lane

This is another site proposed for considerable building on the Green Belt. For all the reasons as already mentioned above, this would amount to gross violation of Green Belt land and countryside. Development here would by its very nature irreversibly harm the Green Belt because the site contributes to the purposes of the Green Belt in accordance with the National policy laid down in NPPF, including to prevent urban sprawl.

This site covers a vast area and would affect several of the Green Belt villages in the area. It would increase air pollution, traffic congestion, quality of living and general wellbeing. It would adversely affect not only those in the immediate vicinity but all of Guildford town itself, putting extreme pressure on infrastructure already overwhelmed, and more stress on the everyday public and medical services for the borough. The impact would be felt far and wide.

There is no need for "special circumstances" given for this number of homes. If another school is felt to be required for Guildford then the Council must first consider areas of brownfield rather than sacrifice our Green Belt land.

It is imperative that we retain as much green space, trees, fields and wildlife habitat that we can manage to provide for better air quality, light and reduction of noise for the area. This proposed site would cause harm to all those things to the permanent detriment of the local environment.

This land could also be used for farming and food production which is of national importance.

Once these fields are built on they are gone forever.

For these reasons I OBJECT to this site being included in the plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to POLICY D4(Development in urban areas and inset villages)

There is no commitment to expand social housing or homes for people who can't afford so called "affordable homes".

There is a demand for urban regeneration and protection of the Green Belt, but there is not enough new homes planned in urban areas. There is a pressing need for these but it is ignored favouring instead homes built on green field sites, which will be not be affordable for low paid workers who work in the towns. This policy has been drawn up to help developers where it allows them to build on green fields which is 'easier' and potentially more profitable for them than helping to provide more urban housing.

Any aims for inset villages would be cancelled out by the plan for excessive housing. It is also unsustainable as building outside the town causes increased harm to roads, air quality and overstretched infrastructure.

The plan for more retail buildings would be inappropriate in view of the continual decline in this sector.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/14592  Respondent: 11036801 / Judith Mercer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E1 (Employment)

This fails to focus general business (industrial and commercial) activity in the urban areas or business parks that have the infrastructure already.

It does not make a comparison between this and appropriate rural business.

There is too much proposal for warehousing which already causes congestion for Guildford.

Analysis to support the policy is weak.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The intention to use rural areas for town uses goes against the principles of localism which require local people to be consulted and heeded and therefore not to be ignored.

The policy lists economic activities but they rely on the rural character of the villages to be maintained. This character would, ironically, be destroyed by the proposed "insetting", boundary extension and house building outlined in other parts of the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14601  Respondent: 11036801 / Judith Mercer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Policy E6 (Leisure and Visitor experience)

Why does the GBC feel the need to develop tourism through building of new visitor "attractions"? This way of thinking and planning could actually harm the visitor experience especially in the rural areas of the borough e.g. local residents’ arguments over the proposals for Newlands Corner.

In this policy there is a presumption in favour of development which risks the unnecessary over development/commercialisation of a leisure/tourist area which would in fact be harmful to it. The Green Belt and heritage sites are vulnerable to harm in this way and it should be specified in the plan on what basis they will be protected.

Guildford has many leisure and visitor attractions already and there is no case for creating more.

In this populated area, the lack of development is a positive asset to visitors, not a negative one. The rural setting and natural environment lends itself to walking and cycling activities without interference from the Council and is a valuable form of tourism.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16518  Respondent: 11036801 / Judith Mercer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E8

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This policy will allow development for more retail spaces in rural areas with is consequent housing expansion. This is not wanted or needed and is completely unjustified in the light of the explosion of online retail businesses. Guildford’s position of the primary retail hub would be hurt by this policy. Rural shops would also be hit as they would not be able compete with larger retailers. The whole character of the villages would change and they would be subsumed into the urbanisation and sprawl which is expressly against the provisions of the NPPF.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16519  Respondent: 11036801 / Judith Mercer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E9

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The policy is an extension of E9 and is also an attempt to use an extension of rural local retail development as an excuse for changing the countryside in contravention of the NPPF provisions.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

This policy does not set up any rules or constraints on building. There are no specific guidelines with regard to density and other important issues—no practical framework for planning decisions is provided. This free-for-all position should not be allowed because it cannot be tested objectively.

The residents of the borough need to be able to rely on a structure of a local plan where future planning decisions can be called into question.

I object to the proposal for housing based on out of date projections and on the SHMA which appears to be flawed and which has not been scrutinised properly.

**Comment ID:** PSLPP16/16515  **Respondent:** 11036801 / Judith Mercer  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
The housing mix as proposed was developed before Brexit and gives the impression is that the “evidence” documents have been prepared to set out a position rather than to provide a neutral, objective and balanced judgment upon which to make decisions. The SHMA was not put out for public consultation and was not scrutinized by Councillors. It full of assumptions and is unreliable. It appears that a very large number of planning permissions obtained by the University of Surrey for homes and development have not been used and this proposed policy should not even be considered until this has been resolved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Using the term "affordable"under the national definition, refers to homes that are sold or rented at about 80% of market value. Unfortunately, the market prices of homes in the south east are so high that these homes are likely to remain way beyond the means of most people.

People do not have a right to live in a certain area, but they can have aspiration and wish to live in a particular place.

If more houses are built, even smaller ones they will not be affordable starter homes or homes for many families because they will be too expensive. They will be bought by people coming out of London and it is they that push up the price of the homes due to their demand for houses out in the Green Belt areas and a short commute from their jobs in London.

I object to a policy where the consequence will be that our green countryside will be ruined for the benefit of DEVELOPERS and COMMUTERS under the guise of homes for local people. This is a policy using the misnomer "Affordable" as a ruse for more development which will NOT benefit the local people. It will as a result destroy the Green Belt which gives space and fresh air to this borough, which ironically Londoners want to enjoy!!

The viability clause (4.2.40) means the policy in practice could be unenforceable. It should be removed from this policy as it only benefits the developers not the local area.

This policy will not influence the market prices in the Guildford Borough area because of the continual demand from London. Building more homes will not make them more affordable in the real sense of the word. The policy is wrong about its reasons for more so-called affordable homes and is using this as a pretext to promote more development generally, which in my opinion, we do not need.

Our Green Belt and green fields should not be given up in such a cavalier way. The Council has a responsibility to protect it all on our behalf and proper protections in all areas of this plan should be put in place to achieve that.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Affordable is completely subjective. Houses in Horsley are not very affordable and the result of this policy would not be to promote less advantaged homes, it would simply allow more houses for those who can pay! The whole tone of this policy is designed to suggest that it is reasonable for the Green Belt to be reduced in size to accommodate the need for more affordable housing and growth. Using this policy, market forces (not affordability) will determine the price and level of house building even more that in currently the case.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This is deeply worrying as a policy. This is a policy which seeks to introduce a scheme where housing could be built anywhere, where it might otherwise not be allowed, with no restriction, other than a general link to some connection with the Guildford Housing list. It would allow potential development outside settlements, even in Green Belt with a proposal to extend this to market housing. This is unacceptable.

It must be made clear in the blue box wording that the overriding requirement of the NPPF especially paras 87, 88 and 89 thereof will apply in the administration of this policy.

Please refer to NPPF 54 and the guidance of the National Planning Policy regarding unmet housing need-revised 6 March 2014: "unmet housing need (including traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the 'very special circumstances' justifying inappropriate development on a site within the Green Belt"
This policy should not be included until radically revised. Rural exception cases should be explicitly limited to cases of actual local –NOT Borough need, and be subject to the NPPF constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

My objection is due to the following:-

- Infrastructure is not discussed as being a key issue for the rest of the plan or as a pre condition for development.
- Excessive house building in the countryside will not be supported by any funding or provision for infrastructure
- Large developments on green field sites require heavy infrastructure investment which will be more expensive for the public to fund.
- The plan does not set out provision of adequate infrastructure as a pre condition of sustainable development. It is put in as an afterthought buried in this policy. In all aspects it is giving priority to green field development over urban and brownfield regeneration. This creates a huge burden in terms of providing all the changes needed in
new roads, redesigning traffic, transport and many other services to support the necessary infrastructure. It needs major investment and CIL receipts cannot guarantee this being achieved.

- Draft CIL (Community Infrastructure Levy) scale encourages use of greenfield rather than brownfield land first.
- The Council is not planning the roads before allowing thousands of houses to be built and it lacks common sense: Traffic congestion which exists now is not being dealt with and planned for never mind looking at what happens if vast housing estates are built across the borough.
- Large roads may be in the pipeline but there is no thought for the smaller local roads which have to support the new ones.
- It ignores the vital fact that the GBC is not in control of highways and permission has to be obtained by either Surrey County Council or England Highways.
- It is in short a disastrous policy for the borough and its population.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy II: Infrastructure and delivery.

Development in the Green Belt and wider countryside, should that actually be either necessary or desirable (which it is not) would have to be supported by the current infrastructure. There are no credible infrastructure funding provisions for additional development. The CILS are hardly sufficient as they are vague and lacking in scale and teeth and moreover they arrive after the event. It is necessary to build infrastructure before development takes place not as an afterthought. The whole plan must be underpinned with new or repaired: roads, water and flooding provisions, power, sewage, gas, telecommunications, bridges, schools, railway and bus services health services and so on.

The entire infrastructure is well past breaking point today. New and large developments of thousands of houses in Horsley and all the other villages with all the cumulative traffic and pollution increases would cause complete and utter collapse. In Horsley the lack of footways for example together with poor sightlines and dark and winding roads, will cause walking, motoring and cycling fatalities.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
By the use of loose wording this policy has weakened the protection of the AONB rather than strengthening it! I object to the policy being dependant on the provisions of the Surrey Hills Management Plan, which apparently welcomes housing development and who knows, might agree to all sorts of development, now or in the future.

The policy states“Development proposals will be assessed against the provisions of the current Surrey Hills AONB Management Plan ”. Why?

Any development proposals should be assessed surely against the strict criteria of the National legislation NPPF which sets the policy, and which the AONB Board follows but then sets its own aims which are not properly scrutinised or regulated. The NPPF is the higher authority here and should be referred to within Policy P1, rather than a flimsy nod to Surrey Hills Management.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )

I strongly object to the way this policy has been drawn up as it fails to robustly support the Metropolitan Green Belt, its value and the protection it is afforded by the NPPF and government statements. It makes up 89% of the borough. Support for this should therefore be at the heart of all local planning policy in the Guildford Borough. This policy on the contrary makes no such declaration of support for protecting Guildford Green Belt.

As already argued under Policy S1, the Green Belt is an important legacy to future generations, an asset and valuable amenity for Londoners and the whole country as well as for its current inhabitants.

P2 fails to assess the Green Belts value and treats it simply as potential land to be built on. It is far too precious an asset to be neglected in this way. The restrictions on the building on Green Belt enshrined in National law are there for many reasons. This draft plan risks, through unrestrained development, causing severe damage to the Green Belt and its environment. This involves impact on the following:

- local agricultural production
- rural leisure and tourism
- flood control
- water catchment
- biodiversity
- natural heritage  
- carbon sink and air pollution  
- room for public space amenities e.g. parks, burial grounds  
- rural business  
- natural landmarks and views  
- future economic potential such as mineral mining  
- natural beauty, landmarks, open space rural views etc  
- harm to public health and wellbeing (expressed in NPPF as giving physical and psychological benefit)

P2 seeks to allow excessive levels of development in protected areas ignoring views given in the last consultation and against policy issued in government statements in support of protecting the Green Belt. This precious area and amenity is not for the Council to give away. Councillors are arguing that there is an acceptable % of Green Belt that should be sacrificed to development. There is no such rule or justification for such set down in the NPPF.

It fails to take a fair approach by sharing out the burden of development between settlements according to and in proportion to their size.

Insisting on a disproportionate amount of development (most of it) to be in the Green Belt is counter productive and it would make better sense to develop new homes in the urban areas, including cheaper accommodation, where most people (Young and less well off) want to live and work. These areas could be regenerated in this way and fewer people need to commute, thus saving the environment as well, saving untold damage to the surrounding countryside which the whole nation can continue to enjoy. Once it is lost it is gone forever.

In particular, I strongly OBJECT to the "insetting" of 14 villages from the Green Belt. In their current state these villages continue to contribute significantly to the 'openness' of the Green Belt and their removal from the Green Belt has not been justified under this plan. No exceptional circumstances or other justification has been made to allow new Green Belt boundaries which would result from the proposed insetting. On the contrary, these villages should not be inset, because they represent the contribution to the purposes and aims of the Green Belt as specified in NPPF para. 80. It includes the importance of protecting the openness of the countryside and the settlements within it. Not only should the Local Plan be aiming to protect the very rural nature of these villages (settlements) under these provisions, but also the Green Belt itself.

NPPF para. 83 states that Green Belt boundaries should only be changed in exceptional circumstances, and in further guidance notes that housing need will not be regarded as "exceptional circumstances". Thus for my own village in West Horsley, the plan seeks to simply allow many houses to be built without any justification for them. As anyone who properly looks at the character of all the villages in their rural setting, they offer space air and light and the amenity we cherish for leisure and conservation of our heritage sites and wildlife. If we develop on these green spaces inside the villages they will be lost and so will the openness of the Green Belt area.
The policy ignores most of NPPF17.

The policy is based on a flawed Green Belt and Countryside Study, and it suggests that 2/3 of the borough's rural villages should be 'inset' because they no longer contribute to the purposes of the Green Belt. This is completely ridiculous considering the location of the borough.

Further this study should not be relied on as I understand it was not commissioned correctly and without Councillor authority.

This policy states "the general extent of the Green Belt has been retained". This is not correct.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2 concerns the Green Belt. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence. Primary legislation ensures protection for The Green Belt areas in perpetuity. This proposed policy appears to omit large chunks of the NPPF concerned with the protection of the Green Belt. Policy P2 has no mention of a commitment to uphold Green Belt boundaries and protections, or setting clear tests to scrutinise plans and proposed planning decisions without fear or favour. I include a large number of detailed comments here on the impacts and harms which will flow from the proposed policies:

- Impact on natural landmarks and views
- Impact on rural business
- Curtailment of space for public amenities e.g. Parks, cemeteries, recycling.
- Disregard of impacts to water catchment
- No mention of impact to the natural heritage.
- Protection of Biodiversity, one of the key outputs of the Green Belt, is missing.
- Guildford in general and the Horsley in particular have high levels of traffic pollution exacerbated by the proximity to the A3 and M25 and also by the huge increase of traffic levels on local roads. The Green Belt is a large ‘carbon sink’ which helps to mitigate this pollution.
- The proposed policy would have a devastating effect on air pollution, light pollution and climate change and has been discounted or ignored.
- Flood prevention and control is missing or ignored.

- Local agriculture is clinging onto its fingernails, with the current onslaught of ‘land-banking’ and subsequent rural decline. As the proposed policy is so widely drawn and weak, it will effectively allow any development on Green Belt land which is mainly agricultural. This is completely contrary to the provisions and spirit of the NPPF.

- The Green Belt has been the subject of many assurances of support and protection from government and planning law. The proposals in P2 contain no declarations of such support.

- The 12 Core Planning Principles set out in NPPF paragraph 17 cannot be ignored by policy P2. The proposals to change the Green Belt boundaries are simply an excuse to allow any type of building within the Green Belt. This is in my view illegitimate at best and represents a reversal of the intentions of the law. The Green Belt is not the property of the council to give away and cannot be treated as such. It is not something to be treated as available for building with only a few inconvenient restrictions.

- This proposed policy allows the argument that there is some proportion of the Green Belt which can be sacrificed to development. The NPPF allows no such argument.

- The amount of ‘Insetting’ of most of the villages around Guildford is unjustified and disproportionate. It is an attack on the value of the countryside and its contribution to the openness of the Green Belt. It is also an attack on the nature and conservation of the entire area.

- There is no objectively scrutinized and assessed development plan for Guildford post the referendum on 23rd June 2016.

- It makes no sense to concentrate most of the proposed development on the Green Belt when brown field sites are barely mentioned.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to POLICY P3(Countryside beyond the Green Belt)

This policy wrong as it results in giving more protection as a policy than the proposals for AONB and the Green Belt. I object to the idea of building on any green fields as there is sufficient brownfield (previously developed land) and urban areas to meet all reasonable housing need, e.g. River Wey/Walnut Tree Close area.

This policy (see para.4.3.28) refers to protecting countryside near Ash and Tongham. This area does not justify stronger policy protection than the rest of the borough including Green Belt. It should not be afforded special treatment. The area concerned does not contribute to the prevention of Metropolitan urban sprawl, lying further away from London beyond Guildford, whereas those villages to be 'inset' do contribute to preventing urban sprawl.

Green Belt and AONB areas should as a matter of policy be classed as having higher levels of protection than non-Green Belt areas.
This policy does not make sense as it is proposing a minor extension of the Green Belt in one place (Ash and Tongham) whilst trying to justify its major destruction in other places (the inset villages) which are currently in Green Belt.

I OBJECT to POLICY P4 (Flood risk and Water Protection)

If this policy is implemented it would restrict essential urban redevelopment and use of brownfield and hard standing sites in Guildford and its urban district, thereby putting more emphasis on developing in the countryside. The Council must get its priority right. It must implement policy to run through the whole of the plan to save countryside and Green Belt.

There is no additional flood risk where existing hardstanding is developed in urban areas.

There would be an opportunity to provide improved flood resistance to regenerated areas such as on the River Wey bank where a large amount of brownfield land is available for housing, if this policy was revised.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to POLICY P5(Thames Basin Heath Special Protection Areas)

This policy does not increase environmental protection. It is simply designed to allow building on otherwise protected areas.

The SANG(Suitable Alternative Natural Greenspace) is not beneficial as the sites identified or targeted are already green space. It is using existing agricultural or wooded land as recreation land to justify building on other green spaces nearby! It is non-sensical and obvious that it is a ploy to 'get round' the protections already in place.

The policy should give clear statements of the current protections which SPAs are afforded by the EC Birds and Habitats Directives. This site is also part of the Special Area of Conservation(SAC) (Thursley, Ash Pirbright and Chobham)-a statutory designated site.

SANG should in part protect the nesting of rare species of birds on the SPA by ensuring it doesn't use land adjacent to the SPA areas.

The plan is unsound where the Habitats Regulations Assessment on behalf of Guildford Borough Council(GBC) has failed to study the impact of the 7 proposed developments being less than 5km away from the SPA. Analysis from surveys of visitors to the SPA areas has shown an increase in numbers from within 5km of the SPA. In addition analysis reveals that the effect of dog and cat ownership would indicate a harmful effect on the TBH SPA through development of houses and other buildings also within 5km of the area not just a 400m distance away.

Therefore it would be reasonable to conclude that the SANG should also not be appropriate within that 5km distance from the SPAs thus giving proper protection from visitors and animals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to POLICY S1(Sustainable Development)

This policy has been given no definition, nor does it seek to give reference to its importance in the National Planning Policy Framework 2012 (NPPF). In accordance with Para 14 of the NPPF, sustainable development should be recognised as "a golden thread running through both plan-making and decision-taking" regarding local plans. This policy should give a clear framework. It has not done this and fails to set out clear principles for its application.

There is no mention of the Green Belt, which has been and is extremely important to Guildford and its environs and astonishingly no commitment to protecting it. There is a promise set out in legislation by means of covenant to protect green areas in perpetuity. As a result the law seeks to protect the Green Belt through the core planning principles laid out in the NPPF. Policy S1 fails to refer to most of these. Also it does not set out guidelines for applying sustainable development in practice to local planning decisions which may have long term damaging consequences.

There is no statement confirming how economic, social and environmental impacts should be balanced and differences resolved by the planners, leaving these matters far too open and therefore non-protective and without proper guidelines.

This Policy should commit to uphold the Green Belt boundaries and protections with reference to NPPF.

I object completely to this policy where it commits to approve planning applications "wherever possible" and "without delay" because it shows this draft plan to have a pro-development bias. The lack of guidelines confirming the NPPF presumption in favour of sustainable development makes this policy so vague that it would, in practice, mean virtually no constraints on any development.

This policy shows contempt for the Green Belt, ignoring most of the core principles in support of protecting it set out in paragraph 17 NPPF.

I come to the conclusion that this, as a policy, is useless.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There are more than 100 definitions of sustainable development and possibly many more, yet this proposed policy has no proper definition or tests to describe what it means for Guildford. Sustainable development often has to deal with opposing requirements for example the tensions between economic growth and the environment. S1 has no means of distinguishing between these conflicts or weighting them to allow proper decisions to be made. The wording ‘wherever possible’ and ‘without delay’ is completely biased and will allow virtually all or any development to qualify as ‘sustainable’. This is exactly not what the NPPF para 17 guidelines aims to achieve.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have the following objections to the proposal to build 13,860 new homes:

1. Numbers of homes based on growth and demographic data including migration, are no longer valid in view of Brexit. They should be revised to a lower figure.

2. No justification for the housing figure is given and the Council has failed to reveal the formula for its working this out. The public cannot be expected to be consulted without this information as it is fundamental to the draft plan, and therefore makes a mockery of the exercise!

3. No definite housing target for new homes is given, and the plan fails to make sense of its relation to an "Objectively Assessed Number" for housing need. This is confusing. Moreover the Council contradicts itself by saying it relies on the OAN being the number for houses because it is deliverable whilst saying the infrastructure problems may cause constraints. The plan does not say how many homes the Council want to build and therefore allows this figure to be made up.

4. The Housing Market Area (HMA) has been wrongly used incorporating 2 other boroughs of Woking and Waverley creating an area 'West Surrey' which is artificial and too small and ignores Mole Valley and Rushmoor nearby.
districts. Many people commute to Guildford to shop and study and live outside the Area. The figures are distorted and unreliable by the plan using this HMA. There is no reason why Guildford needs to build twice as many large housing estates as the rest of Surrey put together. It is a completely unbalanced proposal.

5. The very high numbers of homes suggested would change the character of the borough from mainly rural and Green Belt to urban creating a band of development out of London. It would destroy the borough for residents now and for future generations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The idea of a single housing strategy for the complete borough is badly flawed. It is completely wrong to treat very different areas which have different requirements, in an identical way to attempt to justify the numbers of houses proposed by Policy S2. The secret method of counting the numbers of people and houses required, has not been scrutinized by the councillors and therefore must be discounted. There is no justification or explanation of the 13,860 houses required by this proposed policy and the growth and demographic data put forward are invalidated by the events of the referendum and subsequent Brexit. The council uses projected numbers produced by consultants (GL Hearn) who as part of the Capita Group, have a vested interest in building and development (surely a clear conflict of interest). Additionally there is no housing target. A requirement and a target are not the same thing and could thus be manipulated with impunity.

The effect of this proposed policy would be to devastate the villages and the environment around Guildford. According to the council figures, twice as many large housing estates are required in Guildford –more than in all the rest of Surrey put together. There is no justification for this. The character of Guildford would be irrevocably changed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp173/424  Respondent: 11036801 / Judith Mercer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
11. Supplemental-Appendix D Evidence Base

I object to the continued use of poor quality evidence base and lack of sound property market research that relates to the local market in Guildford. The documents providing key evidence are unsound unreliable and inconsistent because:

- key parts of the evidence base are flawed or based on withheld assumptions. The SHMA by GL Hearn has been found to be flawed and based on unverified and unscrutinised methodology. The provider of this assessment (GL Hearn) have not revealed their workings by which they produce the “housing need number” on behalf of the GBC. GBC in turn have failed to request this information from GL Hearn by not enforcing their Contract of Services with the said GL Hearn, which can be found in the GBC (Appendix 1) Standard Terms and Conditions of Provision of Services—which may be seen on the internet. One must conclude therefore that because of the inability of GBC to inform the consultation process of the information required, the SHMA should be disregarded for the purposes of evidence supporting this local plan.

- the latest SHMA 2017 still inflates the housing target figure because it is based on substantial errors in estimates by ONS of student migration flows where it is probable that flows out of Guildford have been under estimated by large amounts. This has been researched by a company SMSS on behalf of the GRA (Guildford Residents Association). It has led to a compelling conclusion that the report by GL Hearn may have overstated the need for homes in the borough by 25%.

- the ELNA has also been criticised for its lack of quality and accuracy. The argument for proposed industrial development at Burnt Common in the Green Belt and expansion in Surrey Research Park into the Green Belt based on “there is the possibility that some pipeline developments may not come forward…” is extremely weak and does not amount to good reason or exceptional circumstances for this extent and density of development. There are unused consents dating back many years which have not been taken up. Why? Because there has not been the demand and it is not proven in this evidence.

- I object to the intrusion into Green Belt for the purpose of local plan process. There are no exceptional circumstances that justify this. The plan would be able to identify and accommodate development needs in Guildford's urban areas and villages if it were based on realistic analysis without impinging on Green Belt. This is what government guidance has said. This is achievable if GBC lowers its housing and development target to realise what is actually needed. Brownfield and previously developed areas have the space to accommodate. If it cannot, it need not plan for so many houses or units. GBC have through this version of draft local plan gone against the NPPF as they are not adhering to the ruling that Local Plans must “plan positively to seek opportunities that meet objectively assessed needs and be flexible enough to adapt to rapid change unless any adverse impact of doing so would significantly outweigh the benefits or specific policies in the NPPF which suggest that development be restricted”.

The manner in which GBC has approached the local planning process has clearly been from a landowner/developer point of view. This is wrong because the local plan is for the local people not for the developers/commuters or short term gain. The plan should provide protection of the borough’s assets for future generations living in the borough, i.e. GreenBelt, AONB etc first and then plan realistically according to need as agreed by local residents, and plan improvements for infrastructure before committing to development. Therefore a more sensible realistic approach is required, whilst showing the NPPF will be adhered to.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
6. Policy A25 Gosden Hill
I object to the above changed policy for development of 1700 homes because:
- There is no proven need for housing on this site because the housing target is incorrect, inflated and ignores constraints.
- Gosden Hill is located entirely in Green Belt land. No exceptional circumstances have been demonstrated for building on this site. The above policy is in breach of NPPF paras 87-89. This site serves all 5 functions of Green Belt (NPPF para 80).
- I object to any form of link road being built. It would cause irreparable harm to the local roads and detrimental impact on already congested area. No common sense is being applied with regard to this policy whatsoever.
- No attempt has been made to evaluate properly the detriment to local and national road structures. Highways England has not approved a new on slip at Burpham and it would be against their requirements.
In view of all the above this policy is misguided and wrong and should be deleted from the local plan 2017.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3222  Respondent: 11036801 / Judith Mercer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( No )

5. Policy A35 (Wisley)
I object to the changed policy A35 Wisley regarding the identified mitigation to address the impacts on Ripley High Street and surrounding rural roads. Traffic will need to pass through Ripley to reach Wisley.
My previous objections therefore still stand for this changed policy concerning the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow alias the former Wisley airfield, Ockham) because:
- following huge public objection, Guildford Planning Committee have unanimously refused a recent planning application for precisely this development on 14 separate grounds. However this site has been reinserted in the draft local plan in a deceitful way showing complete contempt for the borough residents. This was done only 24 hours before the planning decision, therefore showing developers they could try again
- there is no need for housing on this site because it is based on the local plan housing target which is incorrect, and inflated and ignores constraints. The SHMA by GL Hearn has been found to be flawed and based on unverified and unscrutinised methodology. The provider of this assessment (GL Hearn) have not revealed their workings by which they produce the “housing need number” on behalf of the GBC. GBC in turn have failed to request this information from GL Hearn by not enforcing their Contract of Services with the said GL Hearn, which can be found in the GBC (Appendix 1) Standard Terms and Conditions of Provision of Services—which may be seen on the internet. One must conclude therefore that because of the inability of GBC to inform the consultation process of the information required, the entire SHMA should be disregarded for the purposes of evidence supporting this local plan.
- Policy A35 should be deleted from the plan for all the reasons the proposed development was rejected by the Planning Committee, including:-

- all the reasons given in my previous objection to the site proposed in the draft plan 2016
- it is Green Belt location and no “exceptional circumstances” are given
- misrepresentation of the site as brownfield land. Less than 15% is brownfield, it is adjacent to the SPA and therefore within 400m exclusion zone for housing. The remains of the runway are now a habitat for flora and fauna and never had buildings on it
- proximity to TBHSPA (Thames Basin Heath Special Protection Area)
- proximity to A3/M25 bottleneck area
- absence of adequate traffic data
-further harm to air quality both onsite and nearby
-loss of high quality agricultural land (55% of the site) in breach of national policy
-inappropriate location of over 2000 dwellings within the ancient village of Ockham which only has 159 households
-presence of Surrey County Council safeguarded waste site
-cost of infrastructure needed would be detrimental to alternative more favourable sites
-damage to neighbouring communities of creating a settlement of 5000 residents equivalent to East and West Horsley combined with all the pollution that would entail namely light, noise, traffic and competition for local amenities and infrastructure
-impact of potential flooding
-failure to evaluate and therefore take seriously the cumulative impact of this and nearby development sites on the area
-I object to this Policy A35 as it would constitute a breach of NPPF law namely paras. 79-90. In particular all of it would be in breach of preserving the openness of the Green Belt (see case law and Boot v Elmbridge Borough Council February 2017). In view of the above in my opinion this policy should be removed from the local plan 2017.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3218  Respondent: 11036801 / Judith Mercer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A36-A41 East and West Horsley
I object to the changes to Policies A36-A41 (East and West Horsley).
The potential development sites have been reduced by two (A36 and A41) representing 138 dwellings. This leaves 4 sites which still represent 395 new dwellings. I object to all of these 4 sites remaining for the following reasons:

-they collectively represent in absolute terms, overdevelopment in East and West Horsley and in relation to the rest of the borough this is disproportionate. The many objections from residents have not been heeded, and the imbalance has not been corrected.

-no “exceptional circumstances “or any justification has been given in the plan for this unaccountable imbalance where 70% of all new development in the borough is to be on Green Belt sites

-the sites situated on the edge of the existing development in the Horsleys encroach on surrounding open fields and would require the extension of settlement boundaries. The plan does The plan does not give reasons or justification for this and the effect of development of new buildings here would be contrary to NPPF para 79 because it will contribute to urban sprawl by lessening and reducing the value of the Green Belt areas separating the Horsleys from neighbouring settlements.

-I object to any change of the settlement/village boundary reducing Green Belt as it would not only harm the openness and permanence of the Green Belt but would allow further applications for development on green fields. These fields serve the purposes of the Green Belt (para. 79-80), and also represent prime farm land. This would be contrary to a commitment in the local plan to protect Green Belt in the borough.

-the total of the four sites in Horsley breach NPPF 81 which encourages access to Green Belt for use of its amenity and recreation value
- these remaining policies will unnecessarily urbanise and be detrimental to the rural character of the Horsleys with no exceptional circumstances for this having been given in the plan. This justifies the continuing objection from residents. I would urge the plan to adopt the previous positive planning that protects the Green Belt first and foremost.

- although the new plan puts great emphasis on need for adequate facilities and infrastructure to support development, this has not been stated in any new wording related to the Horsleys and therefore has failed to address the local concerns and objections. The plan merely presents the prospect that there will be harm to both villages and resulting in harm to the Green Belt itself.

- the plan to allow the density of new housing as still presented in the amendments is still too great and inappropriate for the locality.

Answer (if comment is on questions 1-7 of the questionnaire): ()

8. Policy A42 Clockbarn Nursery
I object to the changed policy A42 Clockbarn Nursery to 60 homes because
- it has ignored hundreds of objections from local people
- it will erode Green Belt in the village to the overall detriment to the openness of Green Belt in the borough
- the need for these houses has not been proven or verified as the housing target has been found to be incorrect, inflated and ignores constraints
- housing need does not amount to “exceptional circumstances” in accordance with NPPF guidance
- the disregard of constraints of roads and risk of overdevelopment after many objections.
- the draft plan should on the contrary put in place protections for this site, to stop inappropriate development, to preserve the amenity of the surrounding area which involves Green Belt. In view of the above I submit that this policy in its present form continues to be misguided and I object to it being in the local plan 2017.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
I object to Policy A43 Garlicks Arch for 400 homes and 6 travelling show people pitches for the following reasons:

- It ignores all the many previous objections by local people.
- There is no proven demand for the travelling show people plots in this location.
- There is no proven need for the houses on this site because the local plan housing target is incorrect, inflated and ignores constraints.
- I object to Garlicks Arch being removed from the Green Belt. National Planning Policy (NPPF) requires exceptional circumstances for Green Belt boundaries to be altered or for development on Green Belt. None have been demonstrated here justifying the proposed boundary changes. The loss of Green Belt here will result in urban sprawl and neighbouring villages merging into one another. There would be harm to openness and permanence to the Green Belt itself, loss of amenity and encroachment on the countryside, contrary to paras 79-80 NPPF.
- This area is at serious risk of flooding. Why has the Council's own flood risk assessment (SFRA) ignored the risks as set out in the environment agency's flood map? This says the site is in a flood zone 3 from a river, which is highest risk category. Yet the SFRA puts it at zone 2. The commissioned assessment is therefore not fit to be relied on to support this policy in the local plan.
- I object to the potential loss of Ancient woodland on the site. The ancient woodland surrounds the site on 2 sides and runs through the centre of the site which includes over 80 ancient oak trees dating back to the year 1600. The proposed development would have a permanent and detrimental impact on this woodland.
- The plan does not provide an achievable strategy for sustainable infrastructure around this site. Roads are already at capacity. The villages of Send and Ripley are suffering severe congestion now, and there is no plan for this to be improved.
- This site has been added to the plan at the eleventh hour, has not been properly thought out, and no infrastructure, including roads, water sewerage, utilities, etc have been planned. This is incompetent and tantamount to neglect on the part of those drawing up this local plan.
- I object to the loss of rural employment on this site. The Policy A43 as it stands threatens the loss of 4 existing successful rural businesses, which have existed for over 30 years, and another 2 businesses for over 9 years both of which support many jobs. They do not wish to lose their premises. They support many in employment.

This policy (A43) is unplanned, contrary to National Planning Policy as specified above and unrealistic. I object to it being in the draft local plan 2017.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
I object to Policy A58 Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment site for reasons below:
- The previous allocation for B1c, B2 and B8 development was removed from the 2014 draft local plan due to all the objections made previously
- there is no need to build industrial or warehouse development in the middle of Green Belt when Slyfield and Guildford still have empty sites and industrial units
- there is no justification for building anymore industrial development in the borough
- the 2017 Employment Land Needs Assessment (ELNA) shows a reduction in demand to 3.9 hectares for industrial land for the entire borough, not a huge allocation of 9.26 hectares at Send in the Green Belt
- It will be contrary to national policy protecting Green Belt by joining up existing villages
- surrounding roads will be seriously impacted causing severe congestion or gridlock
- I am informed that the Aecom research in the ELNA 2017 is of poor quality and lacks sufficient analysis and does not support industrial development in the Green Belt at Burnt Common.
- The mention of possible inclusion of waste management facility at para 4.4.23a lacks enough detail for proper consultation, is inappropriate and I object to this being included
- There is an over allocation of industrial zoning at Burnt Common at para 4.4.23a which hides the possible development of a waste management facility. This is dishonest and deceitful and does not amount to proper planning or consultation. In view of the above I am of the opinion that Policy A58 is also misguided by substandard reports and wrong analysis. It ignores the constraints posed by the Green Belt. Therefore I object to this amended policy. There is no justification for such a development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

**Policy H1 Homes for all**

I object to changes in Policy H1 Homes for all because it has not addressed many of the 32,000 objections.

I object to the deletion of paragraph on density “New residential development is required….Higher density will be supported in Guildford town centre”. This deletion means that GBC have no intention of building at higher density in existing urban areas which is desperately needed.

I also object to the deletion of paragraph 4.2.8 on density as follows “We have a responsibility to use our natural resources, such as land, wisely……height of existing buildings and structures and materials”.

These deletions result in the plan having no density guidelines in the urban area. This is bad and irresponsible planning practice as it fails to exploit development opportunities that urban areas can afford.

I agree to the plan having some forward thought regarding higher density development for homes (not offices) e.g near the railway station area and Ladymead to help regenerate the town.
I object to changes in relation to student accommodation.

Clearly there should be a more robust policy that the University should accommodate 100% of new first year students and more than 60% of existing students on campus. This would free up many houses in the town for families. Surrey University has failed to use its existing planning permissions (dating from 2004) to accommodate 3000 students, or to improve efficient development of its extensive and under used surface car parks. It has 17 hectares of car park and student flats could be built here on stilts with car spaces underneath. If students were accommodated in this way 2000 homes would be freed up in the town and the Hogs Back would not be needed for housing.

I object to changes in relation to Gypsy, Traveller, Travelling show people pitches and plots. GBC already has a higher proportion of traveller sites than most other boroughs similar to Guildford. The over provision is inappropriate bearing in mind other constraints.

In particular I object to the inclusion of 6 travelling show people pitches at Garlicks Arch where there is no proven need.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H2 Affordable Homes

I object to the changes in Policy H2 which still do not go far enough to address affordable or social housing. Affordable homes if one looks at the Guildford property market, and it's not difficult to see, are going to be too expensive for the average local worker/family to afford. They will never be enough proper starter homes or social housing at low rent (like council housing), unless GBC make a conscious effort to try to include more provision for this in their development planning.

GBC should plan for use of existing GBC land holdings, which are extensive, to provide for LOCAL not-for-profit social housing schemes. This would give those such as nurses and teachers in the borough a chance to get a home they can actually afford. I object to the continued planned agenda of GBC through the use of the local plan, to allow for a preference for building executive homes for commuters and Londoners, instead of homes for low income groups e.g children who have grown up in Guildford and want to rent or buy a shared ownership locally. I object again to the “viability clause” which means the policy is unenforceable. This is unacceptable and shows GBC to be “on the side of the developers”.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1525  Respondent: 11036801 / Judith Mercer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H3
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H3 Rural Exception Homes

I object to the change in Policy H3 Rural Exception Homes.

I object to the deletion of paragraph 4.2.51 "to ensure that housing is secured permanently to meet local affordable housing needs.....in accordance with its published scheme Guildford Home Choice(or equivalent scheme)"

This sadly shows GBCs disregard for local housing need.

Any such policy should be subject to the NPPF constraints for development, particularly related to guidance on unmet housing need.

In conclusion, in view of all of the above, I would ask the Council to reexamine its position regarding the local plan 2017 and to think more deeply about the interests of the borough residents rather than about developers’ ‘pockets.’ I would like all the 32,000 previous objections to be properly addressed.I object strongly to the draft local plan 2017 as it has been presented.Policies conflict and evidence is not trustworthy.The SHMA should be disregarded, as argued in Policy A35 above. I am sad to say the promises of the Council to protect Green Belt in the borough are not in any way born out within Policies through the plan.

The Forward of the local plan 2017 says they will look after special landscapes and adopt a brownfield first strategy, but in the next breath say “in total 1.5% of Green Belt land will be removed and allocated for development.” As already shown above, this figure does not include all insetting of villages in Green Belt, so this is a sham, a pretence to local people that they are preserving Green Belt.It is deceitful.

It has been spelt out by national policy that “unmet housing need( including traveller sites)is unlikely to outweigh the harm to the Green Belt and other harm to constitute the ‘very special circumstances’ justifying inappropriate development on a site within the Green Belt “. GBC has a responsibility to preserve all Green Belt in the borough even the actual 7% it intends to develop(as evidenced in the plan), because this land, Metropolitan Green Belt, represents a national and local asset to be safeguarded in perpetuity.GBC would be able under NPPF guidelines, to more sensibly reduce the housing target as already argued above, to achieve this.

I am appalled by the presentation of the plan where the evidence base has not been scrutinised sufficiently on our behalf so that residents are unable to trust its findings.It is disgraceful that sums of money have had to be raised by residents to obtain expert opinion on the vital matter of population figures and housing need.

For the THIRD time of asking, I would like to see a commitment by GBC to follow national guidance on Green Belt by way of policy throughout the entire plan. It has not done this so far.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/1516  Respondent: 11036801 / Judith Mercer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**Policy P1** (Surrey Hills Area of Outstanding Natural Beauty)

Although the policy wording has been significantly amended, I object to Policy P1. The policy weakens the protections offered and unlike previously does not have restrictions on non-major development. This policy therefore is going in the wrong direction. Previously all proposals were considered against the 5 key tests, but now development in the AONB is being made more acceptable. I object to the weaker not stronger protection. It is also contrary to the huge response from the public and the weight of protection in the NPPF. The government guidance for Planning Practice published 21.1.16, from the Department for Communities and Local government states that “The Framework is clear that great weight should be given to conserving landscape and scenic beauty in these designated areas irrespective of whether the policy in paragraph 116 is applicable.” Para 005refID 8-005-20140306. In other words, that should include any proposals of any kind for development including non major. I would like the Council to make certain it includes wording in Policy P1 which states exactly the words in that guidance.

4. Policy A36-A41 East and West Horsley I object to the changes to Policies A36-A41 (East and West Horsley). The potential development sites have been reduced by two (A36 and A41) representing 138 dwellings. This leaves 4 sites which still represent 395 new dwellings. I object to all of these 4 sites remaining for the following reasons:

- they collectively represent in absolute terms, overdevelopment in East and West Horsley and in relation to the rest of the borough this is disproportionate. The many objections from residents have not been heeded, and the imbalance has not been corrected.
- no “exceptional circumstances “or any justification has been given in the plan for this unaccountable imbalance where 70% of all new development in the borough is to be on Green Belt sites.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** pslp171/1522  **Respondent:** 11036801 / Judith Mercer  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

object to Policy P2 Green Belt because:

- It still completely fails to appreciate and acknowledge the importance and permanence of the Metropolitan Green Belt and the fact it has played a major part in planning in London and the Home Counties for a long time and that it needs to be permanently protected. It was established in 1938 under the London Home Counties (Green Belt) Act and then in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were defined in the 1987 Local Plan. It formed part of a 19-24 km belt around London and had very specific purposes, which are enshrined in the NPPF, and reinforced in the local plan. The aim and five purposes of Green Belt are outlined in NPPF section 9 paras 79&80. The Metropolitan Green Belt is a major model of good planning.
-Policy P2 omits any assessment of the value of the Green Belt. It is not just an empty space but is an inhabited working environment that safeguards a certain stock of natural capital. It is wrong for the Council to argue that the plan would involve the loss of “only” 1.5% of the boroughs Green Belt. This is misleading because really the amount is nearer to 7% when insetting, infilling and settlement boundary extensions/alterations are included. GBC have suggested incorrectly that this is acceptable. It is not, as there is no “acceptable” percentage (mentioned in the NPPF or anywhere else) of Green Belt which may be sold. Any amount of the Green Belt is a precious asset to be protected and kept because once it is gone it is gone forever.

-I object to the statement in the draft Local Plan under Green Belt Policy P2(4.3.13) which claims that Send and a further list of 13 villages are “now inset from the Green Belt. This statement is untrue as GBC is proposing to “inset” these villages. No decision has been made by an inspector so therefore the villages remain in the Green Belt.

-I object to the changed “insetting” of 15 villages (including Ripley) from the Green Belt and at “infilling” 12 of the borough’s Green Belt villages.

-I strongly object to the proposal of settlement boundaries being vastly extended in many of the villages, especially in Send and infilling planned for outside the boundaries of 11 further villages. This is unplanned and unmeasured development outside of the Objectively Assessed Need (OAN).

-the local plan should not claim in the Policy for example, that parts of the villages with ribbon development contribute nothing to the “openness” of the Green Belt. This term is not defined by NPPF or in the draft. The Policy appears to be self-defeating by on the one hand saying that it will look after Green Belt land, whilst on the other fails to acknowledge the 5 tests of Green Belt status correctly. It is effectively using this Policy to allow all villages in Green Belt to be vulnerable to large areas of development which would be harmful to the Green Belt, ignoring its very importance to the residents and the borough as a whole.

-It is very short sighted of GBC to look at a village such as Send and conclude that in its “leggy” appearance that it doesn't contribute to the value of the Green Belt. Of course it does because it acts as a vital buffer between Woking and Guildford. It should not therefore be removed from the Green Belt. The village and countryside behind the A247 should all be protected, otherwise the two large towns will link up causing urban sprawl, which would be exactly against the fundamental aim of the Green Belt (para. 79 NPPF).

All other Green Belt villages in the borough are acting in a similar way and should be protected for the same reason, and for the other reasons set out in para 80 NPPF.

Policy S2 (Planning for the Borough—our spatial development strategy)
I object to this amended policy and the commitment to build 12,426 homes based on the Strategic Housing Market Assessment (SHMA) prepared by GL Hearn because it has not addressed many of the 32,000 objections to the 2016 version of the plan. I am informed and agree with the opinion that the OAN (objectively assessed need) figure of 12,426 is far too high.

I am very concerned that GBC has adopted this figure as its housing target without applying constraints required by the NPPF and National Planning Policy Guidance (NPPG). I am informed that a study of the GL Hearn report by NMSS has revealed that the SHMA was flawed in its calculation as it was based on incorrect population figures from the ONS (Office of National Statistics). It proposes reducing the figure for homes to 400 per annum. I understand this is justified on the basis of the under recording of students leaving Guildford. The analysis of this has been put to the Council by the GGG (Guildford Green Belt Group) which makes it clear the report by GL Hearn should not be relied on.

I therefore object to the target of 580 homes per year because the GBC has based calculations on over estimated population growth for the period 2015-2034. I object that 70% of sites put forward are still in Green Belt contrary to planning policy. Green Belt is an absolute constraint on housing supply. They have not reduced number required by national guidance available including—

- Exceptional or very special circumstances
- Housing need doesn't justify development in Green Belt
- Government paper on planning for housing gives guide

“Need alone is not the only factor to be considered when drawing up a local plan “including” land designated Green Belt and SSSIs”

“The framework makes clear that once established Green Belt boundaries should only be altered in exceptional circumstances” and “should take into account any constraints such as Green Belt, which indicate that development should be restricted and which may restrain the ability of an authority to meet its need.” (P d055 ref ID.3-045-20141006) 14 June 2017.

I object to the fact GBC has not chosen to apply the government guidelines and has not lowered the housing target because of the restraints which can and should be imposed by them. The guide on housing need came in before the above paper, which said that if the Council is unable to build houses without impinging on the Green Belt then it wouldn't need to build so many houses. The policy S2 specifically goes against the rulings and guidance of national policy and the adopted wording of the draft plan in Policy S1.

In view of the above it would be logical to apply constraints in line with government policy to a revised OAN figure of 50% to account for the fact that 89% of the borough is in the permanent Green Belt, and development is not supported by adequate infrastructure. I am informed that this would be in line with the 50% constraints applied by Woking Borough Council. This would result in a much more acceptable and achievable housing target of 200 homes per annum totalling 4000 over 20 years of the plan. Thus all these homes could be built on existing urban brownfield land, where there is also existing suitable infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp17q/290  Respondent: 11036801 / Judith Mercer  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I Object to the above new Local plan and its amendments because the evidence and assessments Guildford Borough Council (GBC) has used are unsound, policies and proposals for development in the borough conflict and do not make sense. Also it does not take account or heed the many (32,000) objections to the previous 2016 draft plan. Much of the proposed sites for development, which are the subject of the majority of objections by residents are within Greenbelt. This is because Guildford and its villages are situated within and constrained by the Surrey Hills and Greenbelt area. The proposals for these sites are ridiculous and unrealistic with regard to sustainability and infrastructure. The size and extent of them would cause harm and destruction and contrary to any benefit to local people. GBC has not taken a balanced approach to housing need between the town and country areas, preferring to focus on and sacrifice Green Belt and countryside instead of proposing more houses in the urban area (towns outside the Green Belt / AONB), which is against government policy. Why is this? Guildford residents including myself have objected to this approach since 2014 and this has been ignored. We are still being ignored. GBC has ignored the National Policy guidelines. Government policy urges development on brownfield sites and the protection of Green Belt and special sites to be paramount. This is laid down in the NPPF (National Planning Policy Framework 2012). There has to be exceptional circumstances for any Green Belt land to be built on or boundaries changed. The fact they have included the ‘Proposed Sites for development’ means that any wording about protecting Green Belt is a sham. They have included policies which have effectively weakened protections of the NPPF, planning 70% new housing in the countryside, 58% in Green Belt and allowing more development in AONB without scrutiny. By definition this is not an exception and there is no attempt to show exceptional circumstances to justify any of either the housing or giving proper weight to protecting Surrey Hills from inappropriate development.

The extent of the housing in Green Belt and the effect of insetting/removal from Green Belt goes contrary to NPPF paras. 87-89. If they are true to their promise (manifesto to be guardians of the Green Belt) GBC should follow the NPPF guidelines. There is unsubstantiated opinion in the plan that there is need for more retail, office and industrial space. The low percentage of residential development in the town centre on the other hand would not work to support the so called demand for office expansion. Are they expecting London and other areas to provide the workforce? This would push up the congestion on our roads and create a demand for more ‘countryside housing’ which the borough does not actually need. The local plan should be planning for the local needs of Guildford not Londoners/commuters to Guildford. The fact is many offices are not being filled and our towns’ shops are constantly changing/leaving. The town needs a proper plan to regenerate the community (not offices/shops) so people can live and work in the town.

**What changes (2016) / further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Policy A26 and paragraph 4.1.9
I object to Guildford Borough Council's changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site which:
• disregards an independent landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England's forthcoming boundary review
• directs more office space to an extended business park (Policy E4), which will increase peak time congestion - particularly around the hospital and A&E - and will also encourage 'rat-running' through residential areas which will also further limit reliable access by public transport
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and questions the viability of the development (2.14a)
• does not appear to address the concerns expressed by Surrey County Council, Environment and Infrastructure Directorate (letter 18 July 2016 to GBC page 9) regarding an appropriate access strategy for the site and the movement of traffic and non-car modes
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for nitrous oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Housing at Site A43 Garlicks Arch would be on Greenbelt Land.

The potential increase from 400 houses at site A43 Garlicks Arch is extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of 6 Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural environment within the Greenbelt and there is no identified need within the Local Plan documentation.

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan and so is out of scale with the proposed development.

The potential for a substantial increase in industrial floorspace from 7,000 sqm to an unspecified amount at the site A58 Burnt Common does not provide local residents with enough information for a full and proper consultation given the ambiguity and lack of detail within the document.

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, tucked away in policy 4.4.23a and does not allow for full and proper consultation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• I oppose unjustified Green Belt development

• Allowing Green Belt development to pay for transport schemes will simply add yet more traffic from more homes, fuelling congestion.

• I do not think the Plan is ready for an inspector.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2
Having reviewed the new evidence, Guildford’s proposal for more than 12,426 homes and a buffer of 1,155 homes, is excessive and will result in needless loss of Green Belt and green character, and increased congestion, that cannot be justified in our heavily constrained borough.

Allocating too much land for development in the 2017 Plan will also result in Guildford being required to provide homes for Woking on our Green Belt which is folly given the constraints in Guildford, a gap town with constricted roads set in the Surrey Hills AONB.

Even taking account of all the proposals in the 2017 Plan, congestion which is already severe is set to get worse over the plan period.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to register my strong objection to the Local Plan. My main objections are that there has been no attempt to justify the level of proposed housing. Our roads are already gridlocked and the transport infrastructure cannot support additional traffic. The existing water and sewage infrastructure will not cope with the proposed level of development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
General observations in objecting to the local plan:

- There is a lack of primary and secondary schooling in West Horley and the surrounding villages. The Raleigh and Howard of Effingham (both state schools) are already oversubscribed with many local children unable to get places. Local private primary and secondary schools are also full (or near to full) capacity. No provision has been made in the local plan for new schooling or increased facilities for existing schools. With the proposed level of housing, the schooling crisis will be more important than ever, but will continue to remain unaddressed.
- Kingston Avenue Medical Centre serves both East and West Horley, as well as the surrounding villages. It is near impossible to get an appointment within a one week timeslot and further development to the area will make this even worse. Again, there is no provision for new medical facilities in the village, despite an additional 385 homes being proposed.
- Horley train station serves both East and West Horley. It is impossible to park on a weekday and there are no other suitable parking areas in the village. The addition of 385 homes in West Horley, as well as 2100 homes on Wisley Airfield, without increasing the size of the station, or improving accessibility is going to cause immense strain.
- Traffic generation from the proposed new housing in West Horley and the new settlement in Ockham is going to have a significant impact on our roads. Being in a rural setting, every household has at least one to two cars, possibly three. The proposed levels of development are going to cause immense strain on the local roads, already in a poor state of disrepair. Many roads are small, winding lanes, unsuitable for heavy traffic or large loads.

There is a known waste water/sewerage problem in the Ockham Road North / Green Lane area. No provisions have been made to improve the waste water infrastructure, which is deplorable, given the proposed increased housing numbers in the area. Thames Water has advised Guildford Borough that the area’s wastewater network is unlikely to be able to support the demand anticipated from all the proposed developments.

Policy i3 Sustainable Transport for new developments - OBJECT:

- The plan states that no provision is being made for improving transport (road, rail, bus etc) in the borough and that the onus will be on developers to propose and secure travel plans for their developments and contribute to transport arrangements. This is totally unrealistic where development and major housebuilding companies are involved and we are going to be left with roads and transport links that cannot cope with the level of use (they are already failing us).

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Policies P1 Surrey Hills Area of Outstanding Natural Beauty (AONB), P2 Green Belt and the Countryside - OBJECT:

- Policy P2 states “We will continue to protect the Metropolitan Green Belt against inappropriate development.” I fully object to this statement and this cannot be further from the truth as thousands of homes have been earmarked for greenbelt land.
- I object to the removal of villages (including my home in West Horsley) from the greenbelt by insetting and extending the 2003 Local Plan Settlement Area boundaries. The greenbelt was established to prevent merging of villages and urban sprawl, and by removing tens of villages across the borough from the greenbelt, you are allowing this sprawl to take place.
- No exceptional circumstances have been provided to confirm the need for building on the greenbelt.
- West Horsley and the surrounding villages of East Horsley and Ockham are ones of a rich and varied mix of well established low housing density settlements with a considerable number of historic buildings. Positioned on the north side of the North Downs, partly in the Surrey Hills AONB, it attracts a considerable number of recreational visitors (walkers and cyclists) through the seasons each year. I object to the significant number of new housing proposed for this area as you will damage the charm and rural setting of these villages beyond repair.
- The Key Evidence document ‘Guildford Borough Economic Strategy 2013-2031 makes no case for locating large numbers of homes in West Horsley and the neighbouring villages.
- There are no real plans for increased employment through the proposed development in West Horsley with proposed economic development sites on the opposite side of the borough to West Horsley, making it unlikely that they will be supporting any new developments here.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Policies S1 Presumption in favour of Sustainable Development, S2 Borough Wide Strategy, H1 Homes for all, H2 Affordable Homes - OBJECT:

- Policy S2 states 13,800 new homes are required over the Plan Period from 2013 to 2033. This number of homes is too high and unsustainable in Guildford’s villages.
- Expansion of West Horsley is unsustainable with only one small shop and no post office, with reliance places on the one post office and doctors surgery in East Horsley. It is unsustainable to suggest to a high level of development in the village.
• The development of 385 homes on the 4 proposed sites in West Horley are at much higher densities than are currently present and will be totally out of character with the existing mix of housing. The proposals for the timing of these homes is unsustainable in terms of schooling, drainage, roads capacity, shops, parking in East Horsley (shops and station), public transport as no provisions have been made to improve these.

• No evidence has been provided to substantiate the proposed numbers of housing desired by the plan, both in West Horsley and the borough as a whole. The West Horsley Parish Council and Surrey Community Action Housing Survey carried out in May 2014, identified a limited need for only 20 affordable homes for local people who want to remain in the village, i.e. for young people and for elderly people who wish downsize to a smaller home. Therefore the proposals of 385 homes in the village are out of touch with the true needs of the village.

Comment ID: PSLPA16/3656  Respondent: 11037313 / Debbie Greener  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Send Village being removed from the Greenbelt on the grounds that Green Belts should be kept open and permanent. We need to preserve the Green Belt for future generations.

To quote the National Planning Policy Framework: "Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider
the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.”

I object to the removal of Send from the Greenbelt on the grounds that once established, Green Belt boundaries should only be altered in exceptional circumstances. There are categorically no proven, justified, or exceptional circumstances to do so.

Also from the National Planning Policy Framework: “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.

I object to the removal of Send from the Greenbelt and the proposed development of over 400 houses and 7000 square metres of industrial space at Garlick's Arch, this is a ridiculous proposal how do you expect the local community to accept this? Where will these people send their children to school, go to the doctors etc etc - the local public services are stretched enough as it is.

I object to building 45 houses at Clockbarn Nursery - Tannery Lane is too small to cope with the extra traffic and the junction with Send Road is already very dangerous and cars have to pull out into the oncoming traffic to get out as it is.

I object to the development of 40 houses and 2 travellers pitches at Send Hill. This is beautiful countryside you would be destroying & the access on a small country road is insufficient to say the least.

I object to a new A3 interchange at Burnt Common. The roads around here are already extremely busy already - especially Send Road. The speed the cars go past the school is far to fast and with the two schools merging into one site this will put a lot of children in grave danger. Crossing will be extremely dangerous and are you willing to put these lives in jeopardy?

- The permanence of the open River Way countryside will be permanently lost. Quite clearly that is counter to the key tenets of the NPPF. There are no exceptional circumstances.
- Yet again you are ignoring the clear concerns of local people. Why?
- Tannery lane is not appropriate for the development you seem determined to allow. Why don’t you come and have a look at the narrow nature of the lane (it is a lane) that is wholly unsuitable for the amount of additional traffic that would be generated.
- There is a 33% increase in homes. Why? This ignores the wishes of local people and exacerbates the above problems.

- It was deleted from the 2014 draft because of all the objections made previously
- The word "minimum" is a change from the previous "maximum" in the 2016 plan and since that time there has been a decline in demand for industrial land
- There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfieldand Guildford still have empty sites and industrial units
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt.
- The impact on small surrounding roads will create traffic gridlock
- It will join up existing villages and defeat the purpose of the Green Belt

There is no explicit statement of energy use objectives of the buildings. One would suggest a bias to encourage local generation, Combined Heat and Power schemes, Solar Power usage would have also featured in the document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Inset villages and Urban areas have been swept up into a single planning statement. This does not reflect the nature of the so called inset villages as rural environments and completely negates the Green Belt nature that existed in these villages beforehand. I cannot therefore see that these areas are being declared as urban areas and that development of that nature will follow.

----

Comment ID: PSLPP16/1876  Respondent: 11037441 / Bryan Joseph  Agent:

My comments relate to Horsley and Effingham Junction Stations.

Effingham Junction station is an interchange as it connects local buses and two train lines. Whilst its usage is lower than that of Horsley, according to the National Passenger Survey numbers and the number of Season Tickets originating at the station, it is well used by the population of Bookham and Effingham and it is within 0.5km of its own parade of shops including a Dental Surgery and a Goods Yard for special purpose railway equipment. It is also used by three local paintball facilities and by staff and others accessing the Drift Golf Club. It does not seem to reflect conjoined thinking if you are planning 2000 homes at Wisley and then not considering its nearest local station as an interchange. If that development should occur then it clearly will be.

Horsley is an interchange and we note the plans for further development at Ockham Road North and also in West Horsley. Some consideration should be given to the needs of the Parish in defining how this interchange is developed in the future.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I note the plans to remove or to use the polite phraseology adopted within the plan to 'inset' a number of villages from within the Green Belt. I can see no justification for this. The Green Belt is designed to protect such rural villages from development or over-development. The rural villages each have their character and have managed their development locally. While I recognise that the Green Belt is a living and Breathing artifact, there is no need for the creation of a 'free for all' with respect to in-fill and multiple fill development that will occur within the settlement areas of the villages once the green belt protection is removed. The nature of the villages, and in particular East Horsley where I live, is rural and
peaceful. Its infrastructure is already strained with its existing population. I do not foresee affordable housing or even housing that takes into account the needs of an aging population or the increasing shift to mobile and other forms of work being served by the removal of the village from the Green Belt. This is especially disturbing with the presumption in favour of development that is mentioned in Section 1 of the plans.

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )  

Answer (if comment is on questions 1-7 of the questionnaire): ()  

As a supplementary to my previous comment, the council says that its policies will be outlined in its forthcoming Green Belt Supplementary Planning Document. No-one can support a plan on the basis of Trust Me - I will write something sensible. Furthermore, having 'inset' the villages from the Green belt the policies will not apply. The situation is perverse.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Vision and ambition

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The comments appear to have been developed without recourse to the local plans in each area. With a single plan being approved, it appears somewhat perverse that it asserts localisation and consultation with local parish councils. Furthermore, as far as I am aware, the plans for the Wisley Airfield have received widespread condemnation and are subject to a rethink. The objections included air quality as well as traffic and failure to cater for adequate infrastructure, including transport and schools. It is, however, presented as a fait accompli herein.

Fourthly, the quantum of additional dwellings proposed for the Horsleys will place an intolerable burden on local amenities – even with the current level of housing we were unable to obtain places in the local schools for our children when we returned from a period working abroad and it is routinely impossible to park at local shops. Only in the last week there was a serious car accident in East Horsley in the narrow road that traffic uses when exiting from the shops, and accessing the village hall, medical centre and playing fields. Frequently the latter area has so many cars parked on pavements etc. that disabled people are unable to pass along pavements with their small vehicles.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Secondly, the proposal to remove the Horsleys from the green belt appears disproportionate to the documented need for additional housing. Whilst, there is clearly some potential for limited development within the two villages, this needs to have the current level of scrutiny of new planning applications, if the essence of the local environments is to be maintained.

Thirdly, removing the green belt will make it too easy for builders to develop relatively low cost agricultural sites rather than more expensive brown fields or more innovative options such as building over the urban sections of the A3 and railways.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Fifthly, we are already subject to a degree of flooding following periods of rain and I am most concerned that further building will create serious flood risk for properties in these villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Finally, I believe that the current “salami slicing” tactics will result in the end of the competitive advantages that Surrey has over the other counties that border London (and indeed the areas around other capital cities across Europe). A more strategic approach is needed that will create the housing needed in much larger developments. Developments that will include new houses, medical and shopping centres and modest office accommodation in the way that was achieved with the Goldsworth Park development outside Woking.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am writing to formally object to the Guildford Local Plan.

Firstly, the basis on which the target number of new houses is unclear. I have seen no evidence that the assumptions in the Strategic Housing Market Assessment (SHMA) have been challenged or validated in any transparent way. Moreover, in our new context of much reduced expectations for growth following the decision to leave the EU the assumptions in the SHMA need to be revisited.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the policies providing for the insetting of certain villages in the borough & in particular to the insetting of Effingham village where I have been a resident for the past 28 years. I believe the relevant policies are P2 (Green Belt-Page 48) & D4 (Development in urban areas & inset villages-Page 106).

The comments that follow are specifically directed at the policy to inset the village of Effingham but could also apply to the other inset villages.

Policy P2 states that “We will continue to protect the Metropolitan Green Belt …………against inappropriate development “.

However, in the introduction (para 4.3.13), it states that 15 villages will be inset. I fail to see how this is protecting the Green Belt.

In para 4.3.16 it states that “exceptional circumstances “ are required to amend Green Belt boundaries. But there is no attempt to demonstrate what these exceptional circumstances are; instead there is a just a statement that GBC consider that they exist.

The inference from para 4.3.12 is that Effingham no longer makes an important contribution to the openness of the Green Belt. But there is no justification of what has changed to demonstrate exceptional circumstances.

In para 4.5.50 (part of reasoned justification of Policy D4) there is a reference to development in villages being very limited & historically development has been focussed in the urban areas of Guildford & Ash & Tongham only. But again there is no explanation of what objective data this is based on. If you look at the Census’ of 2001 & 2011, the growth rate of housing in Effingham (washed over by the Green Belt) is higher than Merrow (part of the urban area of Guildford), which is not washed over by the Green Belt. Furthermore, the rate of increase in housing stock in Effingham during this period is faster than the average for the borough.

The overriding theme running through the report is that there is an unmet housing need & that this cannot be met by building in the urban area of Guildford alone & therefore villages previously washed over by the Green Belt need to be inset.

To determine which villages should be inset, GBC appear to rely on the work undertaken by Pegasus & contained within their Green Belt & Countryside Study. Having reviewed this study, I believe that the methodology adopted is subjective & contains incorrect conclusions. There are many areas of the study that I believe are flawed but I have just focussed on the main areas below.

In stage 1 of the methodology (assessing the openness within each village), Pegasus continue to use the concept of a “perceived village area” to justify the inclusion of housing that is in Mole Valley but in turn have not included open areas such as Rolls Farm thus distorting their analysis. The perceived village area also ignores actual boundary markings along the A246 so it is very subjective. Their housing density analysis is not an objective approach to measuring housing density. They do not use a numerical guide which would be more normal. So, for example, they describe as high density the two storey detached residential development located on Effingham Common Road with medium to large garden plots enclosed by Thornet Wood to the east. The Google earth snapshot of this area clearly shows that this cannot be regarded as high density. Nor are the houses enclosed by Thornet Wood. The actual density of housing in this area identified is 3.5/acre or 8.6/hectare. This simply cannot be regarded as high density.

Of the 14 areas identified on the stage 1 map, Pegasus identifies 3 as high density (but with no numerical justification), 7 as medium (again with no numerical justification), 3 as low & 1 as open farmland. Browns field & KGV playing fields are classed as low density. A detailed analysis of the area covered shows that the Pegasus analysis is wrong. Furthermore, Pegasus concluded that as 3 were high density the whole of the perceived village area exhibited a high density of development. This is an incorrect conclusion & cannot be relied upon.
In their Stage 2 analysis (assessing the locations of potential Green Belt boundaries), Pegasus ignore the NPPF requirement to define boundaries clearly using physical features that are readily recognisable & likely to be permanent. They continue to use treelines, hedgerows & woodlands to derive new boundaries. This simply cannot be regarded as likely to be permanent. Furthermore, some of the features used continue to be in Mole Valley.

In summary, the Pegasus study is flawed. Effingham is an open village with a great deal of open space within the village. To suggest otherwise is a distortion of reality. Furthermore there are strong connections to the Green Belt beyond the village & accordingly the village makes an important contribution to the openness of the Green Belt.

In conclusion, for the reasons stated above, I object to the insetting of the village of Effingham.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Building 2000 homes on the former Wisely Airfield site is the wrong place to build a new town/village. Where are these people expected to work? Most will have to commute which if by car will add further congestion to the already congested A3/M25 and local roads, not to mention an increase in green house gases and pollution — hardly an environmentally friendly option. If they commute by train which station are they supposed to use? Horsley & Effingham Junction station car parks are already over-flowing on week days.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Designating Station Parade in East Horsley as a district centre is a joke. The current shops are only suitable for ad-hoc shopping. Most residents travel to Cobham or Burpham or further for super-market shopping. The car parking in and around station parade is already close to capacity. The Medical Centre is also at capacity with difficulties now in obtaining a timely appointment, and parking is an issue also at the Medical Centre.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the draft local plan for a number of reasons set out below related to the Horsleys

- **Green Belt:** The Plan does not justify the “exceptional circumstances” as required by the NPPF to remove areas of Horsley from the Green Belt by changing settlement boundaries.
- **Infrastructure:** The local infrastructure is already overloaded and no planning thought appears to have been given to the provision of additional roads, schools, medical facilities and drainage/sewerage.
- **District Centre at Station Parade:** This is inappropriate given the nature of the facilities in the village.
- **Ockham Three Farms Meadow:** 2000 isolated houses are proposed there. There are many arguments for objecting to this site being in the Plan at all given that a planning application has already been rejected, however the development will have a considerable negative impact on the Horsleys particularly if the promised infrastructure facilities do not materialise, as is often the case under “viability” pressure from developers.
- **Disproportionate housing development in Horsley:** The planned allocation of housing in the Horsleys is utterly disproportionate to the size of the village – a 35% increase in existing West Horsley households and on Green
Belt land. This compares to 11% increase in Guildford Town where opportunities for brownfield development remain to be explored. A fairer and balanced allocation of new housing is required.

- **Suspect basis to the numbers of houses required**: There remains considerable suspicion that a flawed model has been used for the estimation of numbers. Suspicion sustained by the lack of openness of the model used for the calculations – this model has not even been exposed to the GC councillors. Particularly in the light of Brexit, these numbers require justification and revision.

I OBJECT to the Draft Plan and request that it is radically redrafted to account for existing law, national policies and the wishes of current residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Disproportionate development in the Horsleys

**I object.** The planned allocation of housing in the Horsleys is utterly disproportionate to the size of the village – a 35% increase in West Horsley properties and on Green Belt land. This compares to an 11% increase in Guilford Town where opportunities for brownfield development remain to be explored. A fairer and balanced allocation of new housing is required. These proposals will destroy the rural character of the villages. This is at least unfair and feels persecutory, particularly when the west of the Borough (Ash and Tongham) is allocated so few properties. The cumulative effect of so many houses on the Horsleys must be taken into account. If there are reasons for the current allocation of housing, these should be argued and justified in the Plan rather assumed. The density of new housing on the proposed Horsley sites is inappropriate, and greater than anywhere in the locality.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Three Farms Meadow (Ockham)

I object. 2000 isolated houses are proposed there in another disproportionate development. There are many arguments for objecting to this site being in the Plan at all given that a planning application has already been rejected on 14 separate grounds, however the development will have a considerable negative impact on the Horsleys particularly if the promised infrastructure facilities do not materialise, as is often the case under “viability” pressure from developers. This site should never have made it into the Draft Plan published after the recent planning decision. There seems to have been no consideration of the cumulative impact of this site and the excessive development proposed in the Horsleys and further review is required.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infrastructure (Policy I1)

I object. The Plan is imbalanced. The significant numbers of housing estates, particularly in rural areas are unsupported by a commensurate infrastructure investment. For the Plan to work and to prevent isolated populations overstretching existing strained resources in transport, educational, medical, energy, water, sanitation and communications, there needs to be significant further consideration of the supporting infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
**Sustainability and the Green Belt (Policy P2)**

**I object.** The Green Belt is a highly valued asset and we are the custodians of it for today and future generations in the South East and London. Long-term sustainability is critical to such an asset and the draft Local Plan does nothing to uphold the Green Belt. Rather by stealing from the Green Belt to add settlement areas the Plan undermines Green Belt principles. The Green Belt is a covenant to protect the area in perpetuity not to be eroded for short-term gain.

- The Green Belt should be a cornerstone of local planning policy.
- The Green Belt cannot be replaced – once it is gone it is gone forever.
- It should not be in the gift of the Council to give away this asset that belongs as much to Londoners and the whole nation as to the people who live in it.
- The Plan does not assess the loss associated with taking Green Belt land; its working environment and its natural capital including flood control biodiversity, open space, rural views etc. as well as benefits to health and wellbeing.
- The Green Belt is protected by law and national and local policy. The Plan needs to recognise this.

All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**General objections**

**I object.** Overall the Draft Plan does not appear to be well thought through or reliably evidenced. There is an opportunity for the Plan to lead the way in sustainable policies and brownfield development which it completely fails to do, preferring instead to use green field sites which maximise short term profit for developers at the expense of others.

To be clear I do not object to housing development per se. The rising population must be accommodated. However, **I do object** to Guildford Borough having more development than surrounding boroughs and to disproportionate green field (and Green Belt) development being proposed when options for brownfield development in urban centres with appropriate supporting infrastructure have not be fully explored.

There is a housing need for lower income earners, and social housing for others including vulnerable persons. The Plan does nothing to address this and everything to support the development of larger homes that are unaffordable to these groups: the developer profit motive appears to have disproportionately influenced the Draft Plan. **I object** to this approach which must change.

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Calculating the overall number of houses needed (Policy S2)

I object. The Plan must revise the number of houses required, probably considerably downwards, in the light of the referendum decision to leave the EU. Even if there was no Brexit, the number of houses proposed by the plan fails to take account of the geo-location of Guildford Borough with adjoining population centres and the transport links to them. The number developed does not account for adjacent boroughs such as Rushmoor and Mole Valley, nor the Impact of the London commuter populations. Better market data should be sought to provide a reliable basis to the Plan. The resulting Plan shows lopsided distribution of new housing with adjacent neighbours developing far less and Guildford Borough more. The absence of objective scrutiny on the consultant’s assumptions and projections removes confidence in this Plan as a basis for future housing development in the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I wish to object to the above plan in relation to “The Horsley’s Development Sites”.

My reasons for this are as follows:-

- Whilst some development of new housing, assuming a broad mix of affordable through to upper end, is desirable to meet demand the proposal for up to 593 new dwellings in the Horsley’s is out of balance compared to the existing housing stock.
- No justification of the “exceptional circumstances required” has been established within the local plan to remove the Horsley’s from the Green Belt.
- Development outside the existing settlement boundaries should only be considered once all suitable sites within the current settlement boundaries have been utilised.
- The local plan does not provide an infrastructure proposal to support even a modest increase in housing stock. For instance the Horsley Medical Centre is close to capacity and would not be able to accept registration for new patients on anything like the scale proposed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

'Protects our most important countryside, landscapes and heritage' - How does removing the protection of the green belt and building large number of houses safeguard our countryside and landscapes? If the plan allows the green belt to be eroded, how can it be stopped long term as the precedent is set. The recent proposals for developing Newlands Corner show the Council have a complete lack of understanding of what it means to protect the countryside (and I do not understand how the council could account for the financial figures it gave for its upkeep!). Also, the heritage of our separate villages is to be replaced by conglomerates of housing areas 'wear away our most imyortant countrysidce, landscapes and heritage' is a better description of this plan.

In particular, I object to the removal of West and East Horsley from the green belt, changes to the boundaries and the large number of houses proposed to be built. There are no exceptional circumstances for this change to the green belt. The disproportionate number of houses planned is a huge increase in density for our village and exacerbates the chronic issues of , school places, surgery appointments , drainage and substandard roads. Also, Horsley railway station would have problems dealing with the increased demand and there is not enough parking in the area. Furthermore, the type of housing proposed will not address the true housing needs but will totally change the character of our village. The plan is unsustainable and destabilizing. In view of recent events, I hope the Council will really start to listen and act on views of its residents and perhaps find the true meaning of 'sustainable'.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I **OBJECT** to the New Local Plan which has ignored the issues and concerns raised in my previous objection to the last plan. For example, the housing plans for developing Ockham (Three Farms Meadows) have been proved to be unsuitable for the area and rejected by Guildford Borough Council yet it appears in the New Plan as a strategic site which allows it to be considered for housing development more easily in future.

'Focus on sustainable growth' - there is nothing sustainable in this plan. Land in the green belt is to be lost and the huge number of houses proposed for our area will adversely affect and degrade the environment and lead to more pollution. How can a 35% increase in housing for the Horsleys be considered sustainable? 'Focus on substantial growth to the detriment of the environment' is a better assessment.

Addresses future housing, employment and infrastructure' - There is no guarantee that this plan addresses future housing as it does not provide truly affordable housing. Affordable housing in our area is a mockery as these houses are priced at £750,000 plus, which is well out of the reach of the young and people on medium incomes. The need for Council homes has been ignored. Possible employment opportunities are being reduced in our area such as the local camp site which is likely to be replaced by a housing estate. Plans for infrastructure have been kicked into the long grass and there will be a breakdown in services as the infrastructure is not fit for purpose now. 'Ignore future housing, employment and infrastructure needs' is the plan's proposal for West Horsley.

I object to new sites (Garlicks Arch) being introduced as an afterthought when it was not even considered in the previous plan. A slip road on the A3 at Burnt Common has been added to the Draft Local Plan without Highways England consent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4830  Respondent: 11039681 / Bruce Jeffreson  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43  
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  
Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

1. I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** pslp172/1085  **Respondent:** 11039681 / Bruce Jeffreson  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** pslp172/1084  **Respondent:** 11039681 / Bruce Jeffreson  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A50

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Plan is self-inconsistent in respect of traveller sites.

A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots …” Clearly A50 more than covers the total "need" of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/1086  Respondent: 11039681 / Bruce Jeffreson  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch) GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: pslp171/196  Respondent: 11039681 / Bruce Jeffreson  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the lack of proper infrastructure planning for sites (A43 and A42).

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object removing Send Business Park from the Green Belt (4.3.15).

Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I strongly object to the building of 400 houses and industrial development at Garlicks' Arch. The area is marshy and the woodland is particularly endangered, with very old trees which must be preserved. The traffic, particularly at rush hour times, which is dreadful, will be vastly increased in this area and the infrastructure at present is at bursting point. Our doctors and schools will be unable to accommodate the vast new numbers of residents in this area, if development goes ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3285  Respondent: 11040193 / Jill Stevens  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to a new interchange with the A3 at Burnt Common. This already congested and extremely busy area would be absolutely overloaded with traffic from the proposed building of huge housing numbers locally, and would see Send become extremely busy and gridlocked, with increased noise and pollution levels in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/7250  Respondent: 11040193 / Jill Stevens  Agent:

I strongly object to the proposal to remove Ripley, Send, Wisley and Clandon villages from the Green Belt. The intention was for green belt to be permanent and allow for open space and a natural environment to prevail and not for more houses, which will create the joining of villages into a wider urban existence. Development will become inevitable and our rural villages will disappear for ever. 'Inset' of our villages must not happen, development should be on brownfield sites only.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I strongly object to the new Local Plan for the following reasons:

1/ Adequate infrastructure is not in place to accommodate these developments and no provision has been allowed for such – particularly roads and waste. The local roads cannot handle the current traffic numbers – without significant investment in alternative road systems the local area will become completely clogged with traffic.

[...]

4/ I support a tunnel from Send to Compton that takes the through traffic on the A3 away from our local roads. I also support a four way junction at Send or Potters Lane with a direct route through to Merrow. I also support a four way junction at the A3/A320 in Guildford so that A3 traffic have direct and improved route through to Woking

1. I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The housing numbers proposed are for nearly 14,000 homes over 15 years from 2016 to 2031. This number is too high. The model used to calculate the number has not been seen or the assumptions tested by the council or any of its officers. It has been, on numerous occasions shown to be flawed by various 3rd parties. This housing target will result in the borough’s permanent resident population increasing at **4.5 times the rate of population increase during the period 2001 to 2011.** This population growth, by definition, is excessive and unsustainable for a gap town with many environmental, physical and infrastructure constraints.

Over 70% of the proposed housing is planned for land currently in the Green Belt. Housing need is not a reason in law for protected green belt land being used. It is perverse for so much housing to be planned for the green belt. Clearly, the green belt has not been used as a constraint as clearly set out in Government advice, planning policy guidance, the NPPF, case law, election manifestos and Ministerial letters to MPs.

For West Horsley this is reflected in a 35% increase in the number of houses within 3-5 years of a plan being adopted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I object to the expansion of commercial land in the urban area losing the potential for further housing. Policy E7: Guildford Town Centre

There is no reliable evidence provided that the retail core of the Town Centre can support expansion of 45,000 sq m of additional retail space at North Street.

Online retail is set to account for 21.5% of total retail sales by 2018 from 12.7% in 2013, the highest online retail share in the world according to the Centre for Retail Research. March 2016, online sales rose 12.3%, and it was the third consecutive month in which more than 20% of all non-food shopping took place online, (British Retail Consortium and accounting firm KPMG) With such a high retailers will need just 70 high street stores to create a national presence compared to 250 in the mid 2000’s. An expansion on such a scale is negligent when the Council claims to be in such desperate need for housing.
Retail is a declining industry and should not be invested in by the Borough at the expense of housing in the most sustainable urban location, near employment and transport hubs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II)

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages. There is too much traffic in our villages already and this plan will cause more congestion in West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon, with no plan to improve that. The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses in such a small area means dangerous and unsustainable traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15982  Respondent: 11040481 / D G Spratt  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. DRAINS, WATER SUPPLY, FLOOD RISK, CONGESTION

Our drains, our water supply, our medical facilities and our roads cannot cope with the proposed number of new homes. Building this number of homes will lead to flood risk here and downstream (along the Wey and Thames). The planned development on Green Belt is therefore unsustainable. I must ask you to revise the housing number, and to amend the Local Plan to utilise brownfield land rather than green fields sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Under the current economic climate post Brexit, it is unlikely any additional funding will be made available for new capital projects. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to poor air quality concerns (Policy I3)

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health. It has been shown that Wisley already has NOX levels above the EU legal limits and by law a school cannot be located in this area as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15975  Respondent: 11040481 / D G Spratt  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to not protecting the Green Belt (Policy P2)

Our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city’s playground. It is for us to conserve and protect it. There are 5 legal purposes for Green Belt, and it meets them all:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns
- To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

This policy is flawed and should have been amended. In the last consultation just six individuals, out of the c. 7,000 of those who took part in the consultation, supported the policy. Another 20 comments of support were from organisations such as: the University of Surrey, local councils (including Guildford), consultants (e.g. Savills) or landowners. But of the 1,371 who commented on the green belt policy 1,332 (97%) were against.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. NO EXCEPTIONAL CIRCUMSTANCES

I object to the methodology of drawing up the plan also it appears that they have not taken into account the Surrey County Council highway planners’ views and the real risk of flooding in the area and the costs involved in improving the existing infrastructure. Furthermore, the plan has been formulated without regard to village neighbourhood plans. There should have been extensive consultation before removing the affected villages from the Green Belt, particularly the villages affected neighbour National Trust sites and Areas of Outstanding Natural Beauty such as the Sheepleas and Ranmore Common.

The local plan proposes nearly 9000 new homes to be built on Green Belt land (compared with ~ 5000 current homes in Guildford, so approx. equal to 18% of the existing homes in the borough) – a huge proportion. The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is NOT an exceptional circumstance in law. No exceptional circumstances have been disclosed. So the Green Belt boundaries should NOT be changed through the plan making process.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the Local Plan as the development proposed is not sustainable (Policy S1)

The number of new houses proposed is not sustainable – it will damage local communities by over development, particularly in West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon. It is patently clear that the road and train network will not be able to cope with such an increase in usage and will lead to hazardous conditions for all.

The development should be in urban areas where there is sustainable transport. West Horsley for example will see the number of housing increased by 35% within 3-5 years of the plan being adopted. The number and density of housing is not in keeping with the local area and is therefore against policies within the The National Planning Policy Framework (NPPF).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **BROWNFIELD AVAILABLE**

There is brownfield land available in the town centre which is being earmarked for commercial development rather than for housing. This is enough to meet our real needs for affordable local homes. There are enough vacant commercial sites to cope with genuine business need, and we have enough retail capacity already, so urban brownfield/derelict land should be used for housing.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the extended development in the Green Belt (Policy P2, Site A43) Garlick’s Arch. Because why should you build on this beautiful Green Belt site, which already has sufficient houses in the area, when there are plenty of more appropriate sites around the Guildford area where there would be less overcrowding? We already experience a great deal of traffic at certain times of the day and building here will just add to the congestion. I was at risk of being flooded in 2000 and am concerned that the infrastructure will not support additional building and will increase the threat of flooding again in the area.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch There have been travellers using the fields behind my house over the last 12 months and they have left the fields in a dreadful condition.

[Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]

It will take a great deal of money to restore the land to its former use for agriculture.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to remove East Horsley and West Horsley from the Green Belt. Specifically, 173 houses planned at the following locations:

- Thatcher’s Hotel, Guildford Road (48)
- Land near Horsley railway station, Ockham Road North (over the railway from the Village Hall) (100),
- Countryside Depot and Telephone Exchange, St Martin’s Close (15)
- Land at Fangate Manor, St Martin’s Close (10).

I object to the draft Local Plan for the following key reasons:
1. I object to a plan which proposes that over 70% of new housing be built within the Green belt across the Borough. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.

2. I object to the disproportionate local allocation of housing in East Horsley.

3. I object to the threat the Local Plan poses to the historic rural village of East Horsley and the blight on properties there. The plan calls for an additional village of 173 residences in the immediate area, (with narrow lanes, little or no streetlights and many listed houses).

4. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking.
   2. The increased volume of car traffic on the roads.
   3. The congestion this traffic will cause on the narrow rural roads in East Horsley and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the limitations of pedestrian footpaths (and the space to provide them).
   5. The lack of suitable public transport. The Horsley rail station will struggle to cope with the proposed increase in passenger traffic and car parking is already at capacity.

5. I object to the fact that insufficient consideration has been given to the environmental and ecological value of these sites.
   1. Pollution: The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment.
   2. Flooding: The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents are well aware of how much standing water there is in their gardens after rain. Building on such land will only exacerbate the problem.
   3. Schools: Local schools are already at capacity – where will newcomers go to school? No extra places are planned in the Horsleys, and any school places proposed as part of Wisley Airfield will not appear until many years into the project.
   4. Medical facilities: Similar situation to the schools.

6. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the individual East & West Horsley Parish Plans. The top two responses as to why local residents enjoy life in East Horsley are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I trust that these objections will be fully considered and that the proposed plans for an additional 173 residences in East Horsley is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings.

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
   7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

7. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

8. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

9. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.
After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

With reference to the proposed changes to the Horsley area;

I am very concerned about the extent of the housing proposal in the Horsley area and the removal of the Horsleys from Green Belt land.

Primarily, I am concerned about the network of roads and public facilities, which would come under extreme pressure, should more houses be permitted. The roads are not suitable for heavy vehicles and increased traffic. Most local roads suffer with drainage and pothole issues, without additional vehicles using them.

The local facilities, including the doctor’s surgery, would not cope with more than 500 additional families. (Over 2,500 families if I include the 2,000 houses proposed for the Wisley Airfield) There is already limited availability for appointments, without any proposal for extending the surgery and its car park, to cover the additional people, who would wish to use it.

Parks and carparks are also stretched. The Station Parade is always busy, as is the train station car park. Without additional space for the additional shoppers / commuters, there would be restricted access for current residents to use the facilities.

Finally, I understand that building on Green Belt areas is only to be undertaken in exceptional circumstances, which the plans do not demonstrate. The plans will fundamentally alter the complete dynamic of what is an exceptionally friendly and supportive community and I hope you take these factors into consideration when deciding on the fate of our village.

**Comment ID:** pslp172/4376  **Respondent:** 11041025 / Debra Somner Fraser  **Agent:**
C. Specific Policy Objections:

C.i. Policy 25 Gosden Hill – My Objections

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
C.ii. Policy A43 Garlick’s Arch – My Objections

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches.
2. It ignores all the thousands of previous objections made by local people.
3. There is no proven demand for travelling show people plots in this location.
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
C.iii. Policy A58 Burnt Common – My Objections

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site.
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.
15. I object to the potential impact of para 4.4.23a on Burnt Common with its over allocation of industrial zoning is subterfuge for a waste management facility which is a dishonest and underhand approach to planning and proper consultation.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to cooperate with the wishes of its own electorate.

Despite the thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

**Comment ID:** PSLPS16/3329  **Respondent:** 11041121 / Catherine Dean  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Introduction
I object to each of the proposals to remove sites in this list from the Green Belt on the following grounds:

1. The identification and allocation of sites in this Plan is made without regard to Green Belt, infrastructure or other constraints. The Plan says that “allocating these sites does not grant Planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council has received about individual sites ever since the Issues and Options consultation in 2013. The Plan has hardly changed since the Council received 20,000 objections to its first draft Plan in 2014. The Inspector considering the Plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the BREXIT referendum decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. The Council was entitled to consider constraints before determining the housing number. I believe that as well as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as well as infrastructure (most notably roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

Having properly applied constraints if there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the Plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy A25 Gosden Hill Farm.

1. The Green Belt at this point serves the important function of separating the parish of West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce, defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and the houses along The Street in West Clandon (owned by the same developer as Gosden Hill Farm) will come under enormous pressure. Since the 2014 Draft Plan was withdrawn, the area under consideration has been enlarged in the direction of West Clandon.

1. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a slip road provision at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

1. The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

1. The development will overburden the local road network and increase congestion on the A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A-road. In places it is under 5m wide and too narrow for two lorries to pass causing them to mount the pavement (see also below).

1. I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon—a road which is already under traffic stress (see also below) and which Surrey County Council say cannot be improved.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A26, Blackwells Farm, Hogs Back:

I object to the proposals in Policy A26, Blackwells Farm, Hogs Back, Guildford. The area is of high landscape and environmental value and lies entirely within the Metropolitan Green Belt. This site lies on the edge of the Surrey Hills Area of Outstanding Natural Beauty (AONB), indeed the parcel of land includes part of the AONB as well as part of an Area of Great Landscape Value and an area of Ancient Woodland.

The roads in this locality cannot support the traffic from an additional 1800 homes, plus the commercial, retail and community uses proposed in the policy. The addition of so much traffic associated with this development will in no way “provide relief to the A31/A3 junction, in advance of delivery of the Highways England A3 scheme”. It is not known what
the Highways England scheme might be, whether there is indeed a scheme at all, and when any such scheme might be
delivered. Meanwhile, the existing roads will be overwhelmed by yet more traffic.

The area is on part of the Hogs Back Ridge, topographically higher than the Cathedral. The road junctions at the very least
would require night time street lighting as the traffic densities are already high, and this would destroy the rural aspect of
the locality. The whole site forms the panoramic vista from the top of the Hogs Back – a historical and geological feature
which contributes to Guildford’s special character. This, too, is recognised in the Landscape Character Assessment, which
describes the Hogs Back as the ‘iconic spine to the borough’

I wish to add this further objection to my response of Thursday 14th July 2016 to the Local Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43 and A43a on Garlick’s Arch.

This site had been previously considered and rejected before the previous draft of the Plan. The site was then inserted in
the Draft Plan only hours before its publication without any consultation. I have seen no evidence that exceptional
circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The
Green Belt and Countryside study did not even consider this site. This is a cavalier approach to public engagement by the
Council.

1. The site is not a sustainable site, being far from any infrastructure facilities and transport links. The bus service is
infrequent and future residents will rely almost entirely on cars for journeys. Similarly any employees at the
employment areas will almost undoubtedly arrive and leave by car.

1. The site is susceptible to flooding and development will cause harm to the ancient woodland on and near the site.
See my comment on Policy P4 above.

1. The Green Belt at this point serves the important function of separating West Clandon from Send. Building here
will cause the two to coalesce defeating one of the objectives of the Green Belt.

1. The Council appears to view the development as an enabling site to obtain land and developer funding for slip
roads on/off the A3. This is not an exceptional circumstance to justify taking Green Belt land. The slip road land
if needed could be safeguarded in the Plan and acquired by compulsory purchase when required. Lack of current
funding for the slip road is not a justification for allowing the development of this site. If the slip road is
genuinely needed then government funding will be available for it. (One of the reasons for turning down the so
called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was
that the redevelopment of the school was not essential. As and when it became essential, Government funding
would become available. Accordingly enabling development was not necessary. The same principle applies here.)

1. The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A-road. In places it is too narrow for two lorries to pass causing them to mount the pavement, often at speed. (During the last week of the consultation period of this Plan, a resident of West Clandon had his car written off by a negligent car driver coming the other way and occupying 2/3 of the road at an obvious pinch point which is typically littered with broken wing mirrors.) It has narrow bends with poor sight lines, a primary school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for cyclists and pedestrians.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford. There is vague talk in the plan of link roads between Gosden Hill and Garlick’s Arch, all meeting at an enlarged A3 intersection at Burnt Common. The existing intersection is unlit and is accident prone. Adding two or three slip or feeder roads at this point will add to the confusion and public danger

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets. Taken together with the current Council policy of “sweating assets” I fear this policy leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/7336  Respondent: 11041121 / Catherine Dean  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to this policy on the following grounds:

1. The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt, and the per person infrastructure investment can be reduced, e.g. fewer pavements, sewers, utility ducting per household than in the open countryside. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development. Living in a town with good access to public transport reduces the desire for personal transportation.

2. The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately and is not sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to this policy for the following reasons.

1. I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

1. The site is in any event subject to frequent flooding and contains ancient woodland and is unsuitable for development.

1. I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the loss of rural employment implicit in this draft plan. Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to this policy. The policy should acknowledge that much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly, the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example, the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attraction. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object to this policy on the grounds of its weak and ineffective wording.

- The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be explicit in the statement of policy.
- There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development in, for example the Walnut Tree Close /Woodbridge Meadows area, where very significant numbers of new homes could be provided, and in several of the existing surface car parks which are not included in the Plan. Such town centre sites could meet much of the housing need over the Plan period without harming the countryside.
- There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.
- The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.
- The policy also fails to provide guidance on design requirements, as required by the NPPF.
- The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores, and ignores the trend towards increased on-line shopping from said chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers, making shopping in Guildford a unique rather than repetitive experience. Above all, the retail development proposals must not damage the viability and historic attractiveness of the High Street.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I object** to Policy H1 for the following reasons:

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinized or evaluated. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the Plan period. It fails to set rules on important issues such as constraints and density and is not specific enough to provide a practical framework for planning decisions.

A much higher proportion of Surrey University students should be housed in university accommodation. The University has proved to be recalcitrant in providing accommodation in spite of outstanding Planning permissions. The policy does not do enough to rectify this.

**I object** to the increased numbers of Traveller pitches proposed. See my comment #9 in Policy S2 above.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I object** to this policy on the grounds that it should be more firm and explicit on “unviability” in paragraph 4.2.40. The possibility of avoiding or reducing the affordable housing obligation through use of unviability arguments is likely to inflate land values and lead to appeals. In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

Guildford’s popularity and location in the Green Belt, with the Surrey Hills, close to others towns and within the London Commuter belt mean that demand is virtually unlimited and no amount of affordable housing will meet it. As I understand it, “affordable” homes are defined as those with a value of 80% of the market value. In a high house-price area such as Guildford, that still may not be truly affordable to many. The real need is for social or “council” housing but that will not be provided by current developer-led models.
Paragraph 4.2.3 (in Policy H1) states that the SHMA has calculated that 70% of the affordable homes needed are 1 and 2 bedroom dwellings. In Guildford town centre there are at least 6 sites, covering around 2 hectares (5 acres), that are derelict or used as surface car parks, some for decades, yet the Council appears to have had no success in redeveloping these at all. They have the potential to be used as mixed use town centre projects which could include apartment accommodation of this size. Not all of them are even included in the current Plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Object to this policy for a number of reasons:

1. The wording of the policy is far too wide and ignores all other aspects of planning policy. As drafted the Planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

1. The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. If the proposed housing would meet identified need and adjoins a settlement under this policy wording, permission would have to be granted even in the most sensitive AONB location, regardless of whether more suitable locations were available. The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

1. The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer-led proposals which will be difficult to resist.

1. The policy wording should define “small”, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the Plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

1. The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular, I believe adding the concept of “safe and easy walking distance” extends the potential radius within
which sites will be argued to be “closely related”. Many people would regard a mile or so as an easy walking
distance and school children are expected to walk further than that before being eligible for free school travel.

1. The wording of the policy itself does not require the local connection requirement for tenants to be secured in
perpetuity - only the affordability must be secured in perpetuity. The supporting text includes this point, but it is
not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that
cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including
the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear
market housing cannot be included, and that developments should remain outside the open market in perpetuity.

Comment ID: PSLPP16/7337  Respondent: 11041121 / Catherine Dean  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed
significant Green belt developments. The borough’s infrastructure is already heavily strained. However the Plan’s
determination to build large housing estates across the Guildford countryside significantly increases the need for
infrastructure investment without securing the means for its provision. Placing housing in the established urban areas
would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion -
averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get
worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road
network has not been given sufficient consideration. Some proposed development locations would require highway
schemes that are unlikely ever to happen.

With some 5,000 houses being proposed close to the villages of Ripley, Send and West Clandon, the roads serving the
villages will become even more congested. Cycling has become an ever popular past time, particularly at weekends when
hundreds of cyclists pass through the villages on their way to the Surrey Hills. With no proper cycle lanes on the narrow
local roads surrounding the villages and with greater vehicle traffic being generated from these developments there is a real
danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the
local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result
in the road becoming ever more dangerous for pedestrians. The council has a statutory obligation to protect the public and
the additional traffic flows will bring added accidents, noise, pollution and injury to the public. In the case of West
Clandon, the Street often only has a narrow footpath on one (alternating) side of the road making it very dangerous, especially when vehicles mount the pavements as some have to do in places in order to pass.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this Plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the Plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local Plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This Plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. Implementation is critically dependent on providers outside the Council’s control and Community Infrastructure Levy income. Instead of recognizing this as a key constraint, the Plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as many local doctors’ surgeries will have their services stretched and overwhelmed. Many of these services are already at capacity with waiting times of 2 weeks to see a GP. Any further development without funding will place further stress upon existing health services. There is no provision for increasing the capacity of the Royal Surrey County Hospital, Guildford. Where is this to be assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away, even if they ever happen, and are beyond the command of the Council. The draft Plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network.

Road infrastructure represents a major constraint that should have been applied to the OAN at a much earlier stage in the Plan process and not left as an unresolved difficulty in the draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy as I am concerned it weakens existing protection when it should strengthen it. It is dependent on the Surrey Hills Management Plan, which welcomes housing development. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated. The policy should be tightened up.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/7326  Respondent: 11041121 / Catherine Dean  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy for the following reasons:

1. It does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local Planning policy. The Green Belt is not the Council’s to give away and once it is gone, it is gone forever. Sacrificing areas of the Green Belt to a developer-influenced growth agenda is a betrayal of future generations and does not constitute sustainable development. Green Belt was last taken in the 2003 Plan and now it is again proposed to move the boundaries.

1. The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the Plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

1. Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.
1. The Countryside Study was a simplistic exercise based on the erroneous principle that ranking Green Belt land would identify candidates for development. The Council has not carried out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently Planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

1. I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process, many of these villages do contribute to the openness of the Green Belt (a term which neither the Plan nor the NPPF defines) and there is no need to inset them. I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling, and that infilling is also proposed outside the settlement boundaries of a further 11. In effect, each village will become a nucleus for further development. The NPPF’s other four tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development.

1. To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need and has caused intense opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

1. Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” This is misleading. Since the Second World War, Guildford has been expanding to the north east, starting with the Bushy Hill estate in the 1950’s, then Merrow Park and Weybrook Park were built on around 100 hectares of Green Belt land in the 1980’s, and now 89 hectares of land from the adjacent Gosden Hill Farm is also to be taken out of the Green Belt. This will connect to the proposed Garlick’s Arch development (30 hectares), also in the Green Belt, via several slip roads and feeder roads alongside the six-lane A3 (a further 4.5 hectares). If allowed, these two proposals will more than double the area of Green Belt land hitherto removed to enlarge Guildford’s NE suburbs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/7328  Respondent: 11041121 / Catherine Dean  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to development in areas which are at risk of flooding (Policy P4). National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change. The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy. The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both Plan-making and decision-taking.” The policy calls for “development that secures the economic, social and environmental conditions in the area”.

As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead there is no definition of “sustainable development” and no principles for balancing economic growth, social justice and environmental protection in practice to local Planning decisions are given. However, apparently, all excursions into the Green Belt constitute “sustainable development”. Policy S1 fails to recognize that economic growth, social justice and environmental protection often conflict. It is clear that economic growth has trumped the other considerations in breach of the NPPF’s requirements.

Policy S1 is seriously deficient in omitting any mention of the Green Belt. It should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections as required by the NPPF. This would set one clear boundary to Planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve Planning applications “wherever possible” and “without delay” seems to fly in the face of the NPPF presumption in favour of sustainable development and becomes a presumption in favour of any development at all. It also seems at odds with public statements from the Leader of the Council to the effect that including a site in the Plan does not mean that permission will be given for development.

The policy ignores the 12 Core Planning Principles set out in NPPF paragraph 17.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy S2 on a number of grounds:

1. Almost every element of the Plan is predicated on the OAN adopted as the housing number. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. The algorithm used to calculate this number has been declared commercially sensitive and has not been revealed. I believe this number to have been seriously overstated before the BREXIT referendum but it is utterly without foundation now.

2. The number is based on a Housing Market Area (HMA): “West Surrey” comprised of Guildford, Woking and Waverley. Rushmoor is excluded in spite of it being easily reached from Guildford town centre. “West Surrey” is much too small. Half of Guildford Borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton, Haslemere, Reigate, Redhill and Basingstoke but all lie well outside “West Surrey”. Guildford is in the London commuter belt and part of a far wider and more complex housing market.

3. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The Plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get Planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

4. The OAN/housing number of 13860 is not as fixed as it would appear. The number of homes proposed, plus existing Planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. There are references in the evidence base documents to the possible need to make up shortfalls in Woking’s provision and the “Sustainability Assessment” carried out for the Council came up with a preferred figure of 15860 houses. It is unreasonable to embark on the most extensive transformation of the borough on the basis of an unclear housing target. The scale of the development proposed increases the onus for it to be seen to be sound.

5. The Plan in general and this policy in particular do not address the point that Guildford exists as part of London's commuter belt. In this area the demand for housing is, in practical terms, unlimited. The increase in the supply of housing in Guildford will simply result in a shift of population into the area. “Affordability” is not a fixed sum but is dependent on market prices. The Plan will not reduce prices or increase affordability except at the margins. There is now recognition that in central London, where urban regeneration has transformed many districts and the term “inner city decay” is out-of-date, it is now the outer London suburbs that require regeneration. Over the period of the Local Plan, this process should be factored in to housing needs in areas such as Guildford, and could reduce the rate of outward movement from London.

6. This policy does not take proper account of the constraints to development which exist, principally posed by the Green Belt and by topographic and infrastructure limitations. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). I believe the Council is under a duty to properly consider applying these constraints and that this has not happened. This approach differs from the other boroughs in Surrey. The Plan is based on the assumption that “growth is good”. More consumption, more congestion, more Green Belt being taken - this is not a sustainable strategy.

7. The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon, Ripley and Send in particular. The developments at Garlick’s Arch and Gosden Hill Farm will put severe strain on the road infrastructure in and around West Clandon which will be unable to cope. The proposed A3 slip roads at Burnt Common will make matters much worse. There will be a significant increase in traffic flows along the A247 through West Clandon, funneling into several pinch points which are under 5 metres wide. Here, two lorries cannot pass without one mounting the pavement, along which young children are walking on their way to the village school. The edge of urban Guildford will be moved much closer to West Clandon. Guildford’s edge
will be built on Green Belt land which was zoned to safeguard the countryside from encroachment and check the sprawl of large built up areas.

8. The Plan is out of balance in proposing 65% of housing on the Green Belt and 36% in the three wards of Lovelace, Send and Clandon and Horsley. These are rural areas whose identities will be greatly and detrimentally changed by these proposals.

I object to the proposed increase in the number of Travellers’ pitches. [Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]

[Summary of redacted paragraph: Objection to the proposal for additional traveller pitches, often in the Green Belt. The proposal would increase tension with the non-traveller community and have social, economic and environmental impacts]

The open-ended wording of the numbers to be permitted (at least 73 “or any new target as identified within an updated Traveller Accommodation Assessment”) is dangerous.

**Question 1: Evidence Base. I do not agree** that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

- The evidence base documents take no account of the radically changed environment and outlook following the BREXIT referendum. This is hardly the fault of the Council but is nevertheless a serious flaw and requires a re-evaluation of the strategic context.
- The Transport Assessment was published at the same time as the Plan leaving little time for study and analysis. The projections contained appear to be quite inadequate in that 1) they average congestion over 3-hour time bands, which materially reducing the impact of congestion and 2) they do not model junctions.
- The “Assessment” shows that congestion will worsen significantly over the period of the Plan even if all the proposed and aspirational infrastructure is built.
- The Strategic Housing Market Need (SHMA) attempts to justify an Objective Assessed Need (OAN) based on a very aggressive desire for economic growth in the borough. No case is made that such growth is sustainable. The assumptions and estimates are opaque and have not been adequately scrutinized by Councillors. Consequently people have to take on trust the work of a consultant. In any case, political events have overtaken the SHMA.

The number and complexity of the documents in the evidence base make reading, understanding, analysis and assimilation extremely difficult.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):**

I do not agree that the Plan is sound for the following reasons:

- "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt." Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
- The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
- The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB’s and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
- The draft Plan does not accord with the National Planning Policy Framework (NPPF) policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB’s and road infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified, together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites - which amount to 65% of the proposed housing number.
  - Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the BREXIT referendum.
  - The housing number is at least double the achieved rate of building in the Borough over the last several years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
• Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag behind development and lead to much higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

• The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

I have no evidence on which to base a decision.

RESPONSES TO POLICIES:

It is my understanding that only the text in blue boxes constitutes “policy”. All the remaining text is not. If the accompanying text does not have the force of policy when planning decisions have to be made then a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little and provide little guidance for planning decisions. It is certainly not possible in many cases to read across from the non-policy wording to the policy itself.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A25 Gosden Hill – Objections

- Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of Green Belt.
- If this development proceeds, the narrow strip of Green Belt remaining between Guildford and West Clandon at this point will very likely be proposed for development in the future by the same developer who is promoting Gosden Hill.
- The development will be highly visible from the A3 when approaching Guildford.
- Together with the developments at Garlick’s Arch and Burnt Common there will be an almost uninterrupted ribbon of development along the A3 extending 5 miles north east from the centre of Guildford. Wisley village is 6½ miles and the M25 less than 8 miles from the centre of Guildford as the crow flies. They could all join up.
- The development of this site will cause massive congestion in surrounding roads. It will generate many thousands of vehicle movements onto the A3 which is already at a crawl every day during peak periods.
- The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
- The proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A35 Wisley – Objection

- The Wisley development of a new village / town with at least 2000 houses, 4-entry form secondary school and employment land will generate large amounts of additional traffic onto the A3. If the slip roads at the A3/A247 junction to relieve the impact of this development on Ripley do get built, traffic on the A247 will increase dramatically and unsustainably.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43 Garlick’s Arch – Objections

- The amount of land to be taken out of the Green Belt seems well in excess of the space needed to build 400 homes. What will be the fate of the excess land?
- Garlick’s Arch (A43) is an unsustainable location. The nearest station is about 1.5 miles away and the bus services are infrequent. Residents will be dependent on cars.
- There is no proven demand for travelling show people plots in this location.
- Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways. The development will cause additional traffic on the A3 and the A247 and B2215 in Ripley, Send and West Clandon.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A58 Burnt Common – Objections

- This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
- The Plan calls for a minimum of 7000 sq. m. (0.7 ha, previously in the 2016 Plan a maximum figure) but the proposal is to take 9.26 hectares out of the Green Belt. There is no proper justification given for taking the additional land.
- The evidence base does not support this scale of additional industrial space and the justification for placing it in the Green Belt is not made out. If the quality of some existing industrial provision is not adequate this should cause re-development of it not a large encroachment into the Green Belt.

The 2017 Employment Land Need Assessment shows a demand of 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Burnt Common in the Green Belt.

- The reference to waste management facilities mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and should not be so casually included for this site.
- The proposal for light industry, storage, distribution and waste management activities at Burnt Common will generate large amounts of traffic including heavy vehicles on the A247.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy ID1 Infrastructure – Objections

- Our residents are being asked to accept very large amounts of development with little or no detail being provided on measures which would relieve existing congestion and limit future
- Much is made of the need for new infrastructure to support developments and for this to be in place as needed (listed in Appx. C to the Plan). Even if this happens the Plan admits “we forecast that there will also be an absolute increase in overall traffic volumes”. This will be most acutely felt at junctions but these effects have apparently not been analysed so that we don’t know the location or impact.
- We can be sure however that the cumulative effects of the developments in the north east of Guildford will have a devastating impact on the A247 through our village (and of course on Send). It is hard to see how any of the infrastructure proposals in the Plan (Appx. C) will do anything to mitigate this impact. GBC has little or no control over the plans of Surrey County Council as the local highways authority and it is freely admitted by SCC that they have little money available.
- The Plan now calls for nearly all infrastructure to be funded by developers (see C). We question how realistic it is to expect developers not only to pay for all the infrastructure but also to have it in place in a timely fashion. The Plan says that planning permission will be refused if timely provision of infrastructure cannot be secured. Such refusals will almost certainly be challenged in the courts. Developers’ business models are based on building and selling houses to create the cash required to provide infrastructure. People will be living on the sites well before infrastructure is complete, even assuming there are funds to provide it.
- If development were to be refused the land would still have been removed from the Green Belt and its future rendered uncertain.
- All of these developments will draw very large amounts of additional traffic to the A247 through the village. It would be naïve to think that the employment sites and schools will serve only the developments themselves. Apart from the normal movements of residents to and from the new sites there will be considerable additional traffic on the A247 generated by:
  - children from elsewhere being delivered to Gosden Hill schools and collected
  - the employees of the offices and industrial sites getting to work and returning home
  - the vehicle movements generated by distribution and storage activities
  - traffic from Wisley wishing to travel south and returning
  - traffic from Gosden Hill wishing to travel south and returning
  - traffic from Slyfield wishing to travel south and returning
- private and commercial traffic originating in the south and accessing Gosden Hill, Burnt Common or the A3 and returning (including traffic from Dunsfold)
- SCC’s business plan for Newlands Corner

We point out that although the A247 is classified as an A road, it has none of the characteristics because it:
- is less than 2 vehicles wide in places. Larger vehicles routinely mount the only pavement.
- does not have continuous footpaths
- has several sharp bends
- has a hump-backed bridge over the railway, with poor site lines
- has a dangerous junction to access the station
- has a dangerous and unlit junction with the southbound A3 on-slip road
- has a primary school accessed by narrow pavements
- is largely unlit
- is already very congested at times, more so when delays on the A3 are severe

EXAMPLE OF FREQUENT CONGESTION ON A247

These pictures were all taken on the same morning (attached)

In summary, the A247 is quite unsuited to coping with additional traffic and it is very clear that the developments proposed in the 2017 Local Plan will increase the amount of traffic on this road over and above that in the 2016 draft to which residents strongly objected. There is nothing in the Infrastructure Schedule which addresses this issue. Indeed several of the infrastructure proposals will themselves lead to significant increases in traffic on the A247.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: 📄 lp.jpg (299 KB)
Policy P2 Green Belt - Objection

The Plan states: “4.3.16 National planning policy requires that Green Belt boundaries are only amended in exceptional circumstances and that this must be undertaken as part of the Local Plan process. We consider that exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development.”

- In the introduction to the Policy statement, numerous sites are taken out of the Green Belt including Gosden Hill, Blackwell Farm, Garlick’s Arch, Burnt Common, HM Prison Ripley Road, Send, and a number of villages. The Plan fails to detail the exceptional circumstances that have been identified for each site that is to be taken from the Green Belt.
- It appears therefore that the Plan is based on an assumption that because the housing number cannot be accommodated on brownfield or previously developed land in the Green Belt, it is legitimate to move the boundaries. A blanket change to Green Belt boundaries is being made to facilitate development. That is not in accord with the NPPF or ministerial statements.

Policy P2 Introduction – Objection

- The removal of Green Belt protection from the site of HM Prison, Ripley Road means that it could come forward for housing development. The nearest feasible access to the A3 is at the A247 junction.

Comment ID: pslp17q/259  Respondent: 11041121 / Catherine Dean  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Soundness of the Plan – Objection

In my view the Local Plan is not sound. The NPPF states (para 155) : “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

- The changes in this latest version of the Guildford Local Plan show little or no willingness on the part of Guildford Borough Council (GBC) to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and will bring increasing traffic congestion, pressure on other infrastructure, noise and pollution and a reduction in the quality of life of our residents.
- The Plan does not consider the implications of Surrey County Council’s (SCC) business plan for Newlands Corner to attract 100,000 more visitors a year. A significant proportion of these can be expected to use the A247.
- The Plan does not consider the Waverley Borough Council’s approval for the development of 1,800 homes at Dunsfold. This has the potential to feed traffic, which is trying to avoid congestion around Guildford, onto the A247 to access the A3.

Answer (if comment is on questions 1-7 of the questionnaire): ()

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

There is an abundance of wildlife in this area, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. There are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

No infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope. They are already at capacity, school places hard to come by. (Policy I1)

I object to the huge increase in congestion that will result from the proposed development to the area (Policy I1). The villages are already overwhelmed with traffic on roads that are in poor condition, lacking footpaths, and are too narrow. More homes will increase traffic to the area - it will just not cope.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed development to this site A43 Garlicks Arch. The National Planning Policy promotes sustainable developments, with sustainable transport. Bus services are reduced in the area and there is no train station within reasonable walking distance. It is non-viable for any development on this site to offer a sustainable transport solution. Development on this site is completely inappropriate (Policy I3).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to poor air quality concerns (Policy I3). The following statement is contained within the Plan: "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The immense level of development being proposed, in particular to the north east of the borough, will lead to a considerable increase in congestion. This will be particularly severe in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on the health of local residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the development to areas that are at risk of flooding (Policy P4). The plan does not take into consideration any flood risks as required by the National Planning Policy). Garlicks Arch (A43) is given by the Environment Agency as an area of having a higher risk of flooding than the Council's own evaluation of the area. This area has flooded numerous times in past years and so the Council's evaluation of this area is not adequate for it to be included in the plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

17. I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
18. OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

° The “objectively assessed need” figure of 693 homes a year is too high.

° A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.

° The current SHMA inflates the proposed housing figure due to

° failure to correct for errors in the historical data for international migration flows,

° issues with the way it considers students and affordability and

° flaws in the method for estimating the number of homes needed to support job growth.

° It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

14. I OBJECT to Gosden Hill developement being in the Local Plan The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.
The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

15. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

16. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

8. I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1900  Respondent: 11041281 / Chris Harlow  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
5. I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

6. I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7. OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourism. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in pri An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in
London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

3. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

13. I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decision

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”
