Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to development in areas at risk of flooding (Policy P4)

The Environment Agency classifies the site at Garlicks Arch (A43) as being in a higher risk than the Councils’ own assessment. The plan does not take adequate account of the flood risk as required by National Planning Policy, especially as this area has flooded many times in recent years

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the 2016 draft local plan for the following reasons:

I moved into this area over 30 years ago because I wanted and chose to live in a proper village, with a thriving and sharing community and as I enjoy walking and spending time in nature, I chose this area for its green spaces and woodland.

Since I have lived in the area, the traffic and congestion has increased, the school places have decreased, properties have been built in any spaces that can be found, there is a lack of parking, waiting time to see the local Doctor has increased, and pollution has increased.

The limited consultation period was shocking. Do you really think ‘we’ the public, tax-payers realise what you are doing? Transparency is honesty …and we deserve that.

With all the plans to build and therefore inviting more people to live ‘cheek by jowl’ in the local Green Belt, in massive developments, do you really think this will not impact our existing over-stretched infrastructure? Do you think that your new plans will be enough? They are not enough now, so, how do you think you can compensate and provide enough for everyone?

I object to the local plan as the development proposed is not sustainable (Policy S1)

The numbers of proposed housing will damage local communities especially Ripley, Send and Clandon. People drive cars as the bus service is limited and Clandon is the only village with a railway station. Where is the important infrastructure in the plan – perhaps building in urban areas would be more beneficial as they already have better infrastructure?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Borough Wide Strategy (Policy S2)

There is too much development in Wisley (A35) Ripley/Send (A43) and Clandon (A25). The plan is unbalanced with over 5,000 houses proposed between M25 and Burpham, which will merge all the villages and their identities. Is this fair and reasonable?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am sure you have received many e-mails expressing opposition to the above proposed development based on many different reasons. Some simply based on objection to building on Greenbelt land, perhaps some simply saying little more than “not in my back yard”. I can understand those sentiments but I also understand the need for new housing and that building on Greenbelt land might ultimately prove necessary in some locations where exceptional circumstances prevail. However, I do not believe that there are any exceptional circumstances in this case that would justify building on this particular area of Greenbelt land and there are very real and serious reasons why the area is not suitable for a major development, regardless of whether it is Greenbelt or not.

Firstly the local infrastructure is just not suitable to support the comings and goings of 1100 more households and in addition to that the movements of the many people needing to access the proposed secondary school. Glaziers Lane and Westwood Lane (note that the clue is in the names – Lane not Road) are unable to support the amount of traffic that the new development would generate. Both have significant restrictions in the form of the railway bridges and were never intended to handle the levels of traffic that would be generated. The junctions of both Lanes with the A323 Guildford Road would also be choke points and are far from the safest road junctions in the area. I believe an increase in accident rates at those junctions would be inevitable. Also the local roads leading to the Lanes are already easily congested so it is extremely likely that traffic chaos would extend well beyond Normandy and Flexford, especially at peak times. This is already demonstrated when there is any kind of restriction on the A31. It only takes a relatively small number of vehicles to divert through Normandy and Flexford from the A31 for Glaziers Lane and Flexford Lane to become gridlocked.

Another issue of major concern is the sewer system and drainage. It is already known that the sewer system can barely cope now. Some residents already experience sewage back flow at times. If a new development of 1100 homes plus a school is linked in the existing system it is difficult to see how it could cope. Improvements would have to be made to the system extending way beyond the boundaries of Normandy and Flexford. Is that actually practicable? I don’t think so. The whole area has a very high water table and during the winter especially localised flooding is common. My property, [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998.], and the neighbouring properties which back on to the proposed development site suffer from significant amounts of laying water in the winter time, a situation that prevails for weeks at a time, not just a few occasional days. Other areas, including the train station car park suffer similar problems. If the fields between Glaziers and Westwood Lanes are built over, given the poor drainage available, the run off from that area could cause even bigger problems. Worse flooding could be the result and, I believe, even subsidence. We already see noticeable surface movement here when the ground becomes waterlogged in the winter.

I do not believe that these issues have even been considered by GBC when proposing this development and would need thorough investigation before any significant development could take place.

The effect on local wildlife cannot be ignored. I believe it would be devastating and unjustifiable. I am sure that there are many others better informed on this than I am and will provide greater detail but I understand that this site is only about 800m from the Thames Basin Heath Special Protection Area and so is within the 400m – 5km zone of protection.

It seems to me that this proposal is being put forward by Taylor Wimpey purely in the interest of financial gain and without any thought for the existing community and the problems it would cause. GBC have included this proposed large development in the plan along with some other larger sites as it is easier and more convenient for the Council to administer a small number of large sites and developers than a higher number of smaller sites. and developers. That is actually by the Council’s own admission. In doing so the Council simply has not properly considered the impact of these sites on the local communities and completely ignored other suitable sites such as the one off the Epsom Road at West Horsley. The promise to provide a new school to justify site A46 will be seen by many, including me, as a rather cynical attempt to push through permission to build on Greenbelt land that would otherwise remain protected and beyond a developer’s grasp. From information that I have received, and I believe it has been drawn to your attention in more detail by others as well, all of the schools in the surrounding area are significantly under subscribed at the moment (including schools in neighbouring
boroughs that are willing to accept pupils from surrounding boroughs), with even more school places still to be added. It is, therefore, difficult to see how the provision of another completely new school in Normandy/Flexford is required. Even if such a school was required the Normandy/Flexford site would not be suitable. That in addition to another 1100 homes would have a devastating effect on the area and its residents. In fact both kings Manor and Ash Grange schools have the ability and willingness to expand should there be a demand for more school places in the area. Surely that option would be far more cost effective than building and then having to equip and provide staff for a completely new school in such close proximity. It seems to me the provision of a school on site A46 simply cannot be justified.

I wish to register my strong opposition to the GBC plan and in particular the proposed A46 Normandy/Flexford site. We all appreciate the need to provide more housing and I’m sure most of the residents of Normandy and Flexford are happy to accept a small amount of properly considered, sustainable development in the area but something on the scale that has been proposed simply isn’t sustainable or acceptable. If the development went ahead not only the existing residents would suffer. The new residents would also suffer exactly the same problems.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I have viewed the new proposals under the GBC local plan 2016 and I am writing to object to the removal of Chilworth Village from the Green Belt.

Although I appreciate the council is under pressure to find new land to accommodate further housing I believe there is plenty of brown field sites still available to develop.

The loss of green belt status will make a materialistic difference to the Village of Chilworth which has successfully accommodated new developments at Haywards Corner and Titan Sheds.

I'm am particularly concerned about the potential to develop the fields at the end of Manor Lane. This site lacks adequate access and parking.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I understand that the Wisley Airfield site is still considered a strategic part of the GBC local plan and thus under threat of development. There is an undeniable need for more housing in this country. There may be areas in the country where new towns could be created and develop with the areas around them. Within Surrey this is a much more difficult proposition with the crowded and developed nature of the county. I particularly object to the idea that GBC can offload the difficulties of integrating a new small town, by building it adjacent to another borough that will receive all the problems of several thousand new inhabitants and their cars.

I regularly use the small narrow roads around the Wisley Airfield area. I also use Cobham town centre and Cobham station car park. If Wisley is developed Cobham will become the natural focal point for shopping and commuting to the significant detriment of residents. GBC will have achieved development goals with no impact to GBC residents as the impact has been offloaded on the geographically nearest town. With a crowded area it does seem more sensible to have many small areas of development dotted around where a few extra houses do not stress local amenities.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I feel very strongly Chilworth should remain in the green belt. This status being lost would increase development in the village. During school drop off/pick up time the village is flooded with traffic, cars parked excessively along the roads and Tillingbourne school area is especially bad. Any future building development would hamper this even more with most houses having at least two vehicles as public transport in these rural parts is poor.

In addition to this, the main exit from Chilworth at Rices corner is grid locked morning and evening, many accidents have also happened here over the last few years.

I feel very strongly Chilworth should remain in the green belt.

Answer (if comment is on questions 1-7 of the questionnaire): ()
As a Guildford resident for a long time I have seen all the changes some good some bad but the supposed number of house's being planned is to high, while I agree there is a case for more housing but not the numbers suggested. Traffic is at a standstill most days, hospital is not coping with the numbers now so more residents will not help. This is the second attempt to expand Guildford and not taken in to account residents point of view, all the objections still stand from the previous plan.

I am writing to say that I strongly object to the Green Belt status of our area mainly south of the A246 being changed and brought within a newly identified "village boundary"

The purpose of the Green Belt was to protect our beautiful village and its surroundings. We have a responsibility to keep our rural areas open for future generations who are bound to suffer from these proposed changes. Once these appalling changes are put into place, there will be no going back.

We have a duty to protect our very precious village lay out and its countryside.

I am writing to you to express my strong objection to the fact that the development of Wisley Airfield with 2000 houses under 2 miles from the Horsleys has been included again in the plan.

The A3 road has more traffic than it can cope with already. Our smaller lanes will become congested.

Our local hospitals are already fully stretched.
There will be a need for more doctors, therefore we would need more surgeries.

We have no more space to accommodate at least 2000 more cars in our village.

There would be a desperate need for more schools, but, bearing in mind the congested roads, how would we get to them?

Please do not agree to the plans that will eventually spoil the lives of the present residents, who are justly proud of the village that exist today.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Policy A35 proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt.

I have major concerns about this proposed development and have objected to prior planning applications at this location. In addition to the issues raised above relating to Junction 10 of the M25 and the lack of parking at both Horsley and Effingham Junction stations, I consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country.

I strongly OBJECT to Policy A35.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I strongly OBJECT to this proposed policy for the reasons detailed in this letter.

a) The proposed development represents a fundamental breach of Metropolitan Green Belt rules:

The site forms part of the Metropolitan Green Belt. Under the NPPF, development on such Green Belt land is only permitted under 'very special circumstances'. GBC's Planning Officer, in assessing a previous planning application from the developer of this site, rejected their application, arguing that: *It has not been demonstrated that the benefits of the proposal amount to very special circumstances* such as to clearly outweigh the harm to the Green Belt and the other harm identified.

Ministerial guidance has repeatedly confirmed that unfulfilled housing need does not qualify as a very special circumstance. Whilst the developers' previous planning application was judged and rejected based upon the 2003 GBC Local Plan, the proposal to include this site within the 2016 Proposed Submission Local Plan does not fundamentally change the argument against it. Any removal of this site from the Green Belt can only be made based upon 'exceptional circumstances', which cannot be justified on the basis of unfulfilled housing need. If this was the case, then the entire Metropolitan Green Belt would already have become filled with housing.

Removal of this site from the Green Belt is totally against its rules, regulations and underlying spirit. The site location at the edge of the M25 circle represents a 'first line of defence' against metropolitan encroachment into the Surrey countryside. If this site is developed then it becomes only a question of time before Guildford itself is absorbed into the sprawling London conurbation.

Accordingly, I OBJECT to Policy A35 as a fundamental breach of the Metropolitan Green Belt rules.

b) This site does not meet acceptable levels of sustainability:

Sustainability Appraisal is a core concept of planning policy, yet this site is rated very poorly in terms of its sustainability.

The sustainability appraisal undertaken by GBC's consultant, AECOM, is presented in the Local Plan Evidence Base report 'Sustainability Appraisal (SA) of the Guildford Borough Local Plan' issued in June 2016. In their report AECOM have graded all Local Plan policy sites according to 21 different criteria using the conventional 'traffic light' system. Red colouring signifies poor sustainability. Of the six larger sites included in their evaluation, (those with proposed housing numbers of 1000 homes or greater), AECOM rates Site A35 as the very worst of all in terms of its sustainability. No less than 8 out of the 21 criteria are graded as 'Red' by AECOM for this site, more than any other large site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Detailed reasons why this site has such poor sustainability include the following:

- There is currently no infrastructure whatsoever at this site, meaning that all water, electricity, gas and phone services will need to be newly established;
- New large-scale sewage disposal will be needed, a fact recognised by Thames Water, indicating it may take 3+ years to provide adequate sewage handling facilities for this site;
- There are presently no schools, medical services or shops within walking distance of this site;
- There is presently no local employment at this site and little after the development is completed;
- There will be a significant destruction of agricultural land arising from this development; There will be significant environmental damage from this development;
- There is no public transport currently serving this location;
- The nearest train stations are Horsley and Effingham Junction, both around 3 miles away and so too far to walk. Neither station currently has significant parking capacity available.
- Travel from this site will be primarily dependent upon motor vehicles. Any new site so dependent upon motor vehicles for transport cannot be considered as being 'sustainable';
- New access roads will be needed and significant changes proposed to the surrounding road network, leading to further pressure on over-crowded rural roads and increase in the traffic congestion in nearby settlements;

Whilst some of these issues may be mitigated, e.g. by building new schools, medical facilities, etc, others such as the environmental issues and infrastructure impact may not. This proposal, fundamentally, represents an attempt to create a large-scale new settlement in a poorly-sited green field location. However, as the GBC's own consultant has demonstrated, this site does not reach acceptable minimum levels of sustainability.

Accordingly, I OBJECT to Policy A35 on grounds of its unacceptable sustainability.

c) The site will have a severe impact on local traffic & infrastructure:

The proposed development will have a severe adverse impact on road traffic in the surrounding area. This includes East Horsley where high volumes of additional traffic are likely from the residents of this new settlement accessing East Horsley's two stations, shops and nearby schools. Most of the rural roads in this area are narrow winding 'lanes' - a term used in a recent local public meeting by John Furey, senior SCC councillor for Infrastructure to describe East Horsley's through roads. Many of these 'lanes' are without pavements for large stretches, whilst the principal through-roads of Ockham Road South and Forest Road pass along unlit residential areas so narrow that two buses cannot cross in many sections of these 'lanes'.

The road closures and junction changes being proposed to accompany this development will only serve to increase traffic volumes through the village centres of East Horsley, Cobham and Ripley, and around the station at Effingham Junction, all of which already suffer from traffic congestion at peak hours. The further increase in traffic congestion at the A3-M25 intersection would only exacerbate an existing problem for the highways authority - we understand Highways England have repeatedly expressed serious concerns about this development.

Neither Horsley nor Effingham Junction railway stations currently have any significant spare parking capacity. The suggestion of the developer that large numbers of cyclists from Site A35 will cycle 6 or 7 miles each day along busy roads in order to travel there and back to these stations lacks credibility. Other village facilities in East Horsley, such as the medical centre, are also likely to suffer adversely from a substantial increase in users as a result of this proposed development.
Accordingly, I OBJECT to Policy A35 on grounds of its severe impact on local infrastructure.

d) There are damaging health & safety implications arising from development at this site:

The site is located close to the junction of the M25 and A3, one of the busiest road junctions in the country. The Nitrous Oxide (NOx) emissions recorded around this area are extremely high and will affect residents living at the proposed site. The proposal to build new primary and secondary schools at this location is also contrary to government policy prohibiting the building of schools on sites in areas where there is high NOx.

In rejecting the previous planning application by the developers, the GBC Planning Officer cited the "failure to provide adequate information on NOx emissions and nitrogen deposition and to provide any information on acid deposition" as one of the grounds for this rejection.

Accordingly, I OBJECT to Policy A35 on grounds of its adverse health & safety implications.

e) The environmental impact on protected wildlife will be substantial:

GBC's Land Availability Assessment which supports Policy A35 states that the site lies within the 400m-5km 'Zone of Influence' of the Thames Basin Heaths Special Protection Area (SPA). This is not correct. The site is immediately adjacent to Ockham & Wisley Commons, an area designated as a Site of Special Scientific Importance (SSSI), which forms one part of the Thames Basin Heaths SPA and much of the site lies within the 400m Exclusion Zone where new building is effectively prohibited.

The SPA was set up to provide protection for rare and threatened birdlife in certain lowland heath locations, the provisions of which were agreed by GBC in its 'Thames Basin Heaths SPA Avoidance Strategy'.

This strategy establishes zones to protect the SPA from the impact of new development, particularly from the damage caused by pets (dogs, cats, etc) of local residents to the habitats of threatened ground-nesting birds. Land within 400m of the SPA is designated as an 'Exclusion Zone' where "there will be a presumption against additional new dwellings". Since the Wisley Airfield site is immediately adjacent to Ockham Common for a significant length, much of this site falls within 400m of the SPA Exclusion Zone.

The remaining portion of this site falls within the 400m -5km 'Zone of Influence' set out under the SPA policy, which requires developers to contribute a new SANG ('Site of Alternative Natural Greenspace') to mitigate for potential damage caused to the SPA from new development -the size of the SANG is a function of the scale of the development. In their previous planning application the developers proposed that the land within the 400m Exclusion Zone would provide their SANG contribution. If accepted as a SANG, this would only encourage the 5000+ residents of the new settlement to allow their pets access into this space, therefore defeating the objective of the SANG mitigation.

Even with the 400m Exclusion Zone in effect, the positioning of such a large site immediately adjacent to such an important protected space will inevitably have a major detrimental impact on the wildlife within it.

Accordingly, I OBJECT to Policy A35 on grounds of its material adverse environmental impact.

f) The development is totally out of keeping with local character, context & distinctiveness:
It is a key element of planning policy that new developments should be in keeping with the established pattern of development in the area. In the 2016 Proposed Submission Local Plan, GBC's very first housing policy, Policy H1, requires that development should: "make the most efficient use of land whilst responding to local character, context and distinctiveness." However, Policy A35 fails to do this.

With its proposal to build some 2,100 homes on and around the site of the former Wisley Airfield, Policy A35 will create a new settlement larger than any other in Guildford Borough, outside Guildford itself. The nearby historic village of Ockham has merely 159 dwellings. It will be completely swamped by a development on such a scale.

Moreover, the design and density of the proposed development will be completely out of context with its surrounding area. Due to the restrictions of the SPA Exclusion Zone, the need for SANG provision and the land needed for the waste facility, the actual land area to be used for housing development under Policy A35 is estimated to be around 43 hectares. Therefore, with 2,100 homes proposed for this site, the overall housing density of the settlement area may be calculated at around 49 dwellings per hectare (‘dph’).

East Horsley, just three miles from this site, is the largest settlement in Guildford borough outside of Guildford town, with some 1,760 homes. East Horsley presently has an overall housing density of 8.1 dph within its settlement area. Therefore, the proposed development under Policy A35 is six times as dense as the nearest settlement of a comparable size. The proposed development under Policy A35 therefore utterly fails to respond to local context and as such is in breach of GBC’s own Housing Policy H1.

The density of 49 dph proposed under Policy A35 is effectively an urban density appropriate for a metropolitan location. It is to be achieved in part by building apartment blocks of five stories in height, according to the designs previously presented by the developer. For a setting within the middle of rural Surrey this is completely out of character.

Other settlements close to this site are small rural villages such as Ockham, West Horsley and Ripley. These villages have grown up organically over a thousand years. They contain many historic, listed or otherwise protected buildings as well as a range of residential housing, predominantly detached two storey houses or bungalows. They are all picturesque villages with charm and character. Visitors come to the area to enjoy some of the prettiest villages and countryside in southern England, all within easy access of London. The character of this whole area would be irreparably destroyed if this development goes ahead.

Accordingly, I OBJECT to Policy A35 on the grounds that it is out of keeping with local character, context and distinctiveness, and therefore breaches the NPPF and emerging GBC Policy H1.

Concluding remarks

I Have major concerns about Policy A35. I consider this proposed policy to be a severe contravention of Metropolitan Green Belt rules. It will result in a new settlement of very low sustainability, it will have a major adverse impact on the infrastructure and environment across a widespread area and it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country.

Accordingly, I strongly OBJECT to Policy A35.

In the light of the recent referendum outcome, which will result in the UK leaving the EU, it is inevitable that the population and economic projections for Guildford Borough will need to be reduced.

I presume that GBC will in due course be making such reductions to its proposed housing projections to reflect these changed circumstances. In our opinion, the proposed development at former Wisley Airfield ought to be the very first site in the Borough that GBC should remove from its draft Local Plan as a result of the UK now proceeding to leave the EU.

The LAA identifies six sites in West Horsley for potential development, the four largest having allocation policies within the Proposed Submission Local Plan. The total housing number arising from these six sites is 405 homes in total. For a village which had 1,124 dwellings at the 2011 Census, this represents a proportional increase of 36% over the plan period, an enormously high proportion by any standards.

The four policy sites are all located within the Green Belt. One is a partly brownfield development but the other three sites are all open fields used for agriculture and all lie within the current Green Belt at the edge of the Settlement Area. The reasons presented by the consultants, Pegasus, in the Green Belt & Countryside Study to justify these settlement boundary movements appear to me highly questionable and in no way to meet the requirements of the NPPF that such boundary movements are only to be made in 'exceptional circumstances'. These movements clearly represent a deliberate pushing back of settlement boundaries in order to provide more greenfield sites for housing development. As such, I consider these proposed movements in settlement boundaries to be invalid.

These proposals are also contrary to the principles of the Metropolitan Green belt. West Horsley represents one of the first 'lines of defence' against London urban encroachment outside of the M25 circle. Yet these policies will eliminate a significant part of this defence as they seek to expand the boundaries of this village and fill-in every bit of green space within this rural setting.

It is also totally contrary to the opening statement of Local Plan Policy P2 that "We will continue to protect the Metropolitan Green Belt". It seems that in West and East Horsley at least the draft Local Plan is doing exactly the opposite.

Given the scale of the development proposed in West Horsley, the inevitable destruction of its village character and the impact on infrastructure across West and East Horsley, I OBJECT to the site allocation policies A37, A38, A40 and A41.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Under this policy, areas within 500 meters of a "public transport interchange" play a key role.

Proposals for new office and research and development floorspace are to be directed to firstly Guildford town centre and then to areas within 500 meters of a public transport interchange ("PTI").

East Horsley has two railway stations, Horsley Station and Effingham Junction Station, but currently the draft Local Plan only proposes that Horsley Station should have PTI status.
The explanation given at 4.4.17 for Effingham Junction Station ("EJS") not enjoying this status is that either it is located within the Green Belt, or it is within an AONB or it is isolated away from the village or centre. It is not clear which of these applies to this particular station, but we believe strongly that none apply and that there is a strong case for EJS deserving PTI status in the same way as Horsley Station.

I will deal firstly with the three alternative reasons given for EJS not supposedly qualifying as a PTI.

Firstly there is the Green Belt aspect. This is not logical since if location within the Green Belt were determinative, this would mean that Horsley Station would also fail to gain PTI status.

Also the draft Local Plan proposes elsewhere at Policy P2 that the whole of East Horsley, including both Horsley Station and EJS, should be inset from the Green Belt. It will be seen elsewhere in these comments that I object strongly to this proposal, but the point remains that if location within the Green Belt were a valid reason for not being given PTI status, the Local Plan itself makes it clear that under Policy P2 this will not apply in the case of both Horsley Station and EJS.

Secondly EJS is not located in an AONB. EJS is within the envelope of the village settlement and will remain as such under the draft Local Plan.

Thirdly EJS is not "isolated" or "away from the village centre."

Effingham Junction (the area immediately south and west of EJS, served by respectively Forest Road south of the railway bridge and Old Lane) may not have the extensive shopping parades enjoyed by East Horsley's two other centres (Station Parade and Bishopsmead Parade) but it is a thriving community with a significant population and also a significant number of active and successful employment floorspaces and sites.

These include in Forest Road a general store (Forest Road General Store), a car sales and car repair business (PJB Car Sales/The Body Shop), a dental health centre and chiropractic clinic (Mortiboys) and on Horsley Road, Cedar Garden Centre, Royce Turf and Irrigation and at the Newmarsh Farm site, a number of businesses including Richmonds Horse Transport, Braye Hydraulic Repairs and TIS Surfacing Ltd.

It is therefore vital that the Local Plan's economy policies affecting the area protect these spaces and sites and create conditions for their sustainable growth and hence job creation.

Since all or most of these businesses are located within 500 meters of EJS, Policy E2 would be an invaluable driver for such growth which could play a major role in ensuring that Effingham Junction maintained and enhanced its position as East Horsley's "third centre" for homes and jobs. On the other hand, to exclude EJS from PTIstatus could very well stifle its sustainable development and condemn it to a future as a dormitory "backwater" of East Horsley.

It is also counter-intuitive in the extreme to refuse EJS "PTI" status. This is for the simple reason that EJS is clearly a "public transport interchange" as that term would be normally understood. This is for the following reasons:

• as the name "Effingham Junction" indicates, EJS is at an important junction and The railway line from Guildford splits here into two lines which take different routes into London, so many London-bound passengers will change trains here;

EJS serves not only the Effingham Junction area, but also the many residents of Effingham and Little Bookham for whom EJS is far closer than Bookham Station;
- EJS also serves the many residents of the Cobham area for whom EJS is far closer than Cobham and Stoke d'Abernon station EJS also serves the residents of Ockham and Ripley;

- EJS also serves the considerable numbers who visit local leisure activity sites, including three paintball sites and two clay pigeon shooting sites, for whom EJS is the only viable public transport hub; and

- EJS will be the nearest railway station to the land at the former Wisley Airfield site which is proposed for the building of 2000 homes under Policy A35 of the draft Local Plan and if, despite the objections of many including East Horsley Parish Council, this proceeds, then significant numbers of residents will be taking one form of travel to EJS and then interchanging onto the railway.

I accordingly OBJECT to Policy El insofar as it fails to confer "public transport interchange " status on Effingham Junction Station.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I support the general principle that developers should be required to contribute part of their development profit towards the cost of social housing in the borough. However, this 'one-size-fits-all' policy is seriously flawed and likely to prove highly inefficient, if not unworkable, in the longer term.

In this policy GBC have taken no regard whatsoever of the differences in affordable housing need across the borough. This has significant consequences in East Horsley, which is the area with the lowest demand for affordable housing in the borough. Moreover, East Horsley is not classified as a 'rural area' under the 1997 Housing Order and therefore is not exempt from the new 'right to acquire or enfranchise' entitlement - a factor which is likely to see affordable houses in the parish being bought up as soon as possible and thereafter lost to the affordable sector.

Under Policy H2, 40% of all but the smallest development sites in East Horsley will be required to have affordable housing built upon them, irrespective of whether there is actually demand for more social housing in that area. Moreover, the affordable housing targets proposed in the Proposed Submission Local Plan indicate that the biggest component of affordable housing (40%) should be built as 1-bed dwellings despite the fact that GBC's own studies show that the strongest affordable demand in the borough is actually for larger 3-bed dwellings.

As a result of this flawed affordable housing policy, a significant volume of social housing is likely to be built in places where it is not needed and offered to tenants who do not want to live there nor have jobs near that location. Policy H2 thereby fails the test of sustainability and should be radically revised. If not, the outcome will be serious inefficiency in the provision of social housing in the borough. In an area such as East Horsley this is likely to be manifested in a rapid buying-up of properties for quick re-sale at a generous profit, at which point these homes also become lost to the affordable sector.

I accordingly OBJECT to Policy H2.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

These three policies cover Infrastructure & Delivery. Whilst we support the general policy statements as presented, it is the detailed infrastructure proposals for Guildford Borough which give me cause for concern.

I believe there are serious deficiencies and shortcomings in the infrastructure of Guildford Borough as it is today and that the aggressive housing policy as proposed by GBC in the Proposed Submission Local Plan will exacerbate this problem.

I would make the following comments specifically about infrastructure in East Horsley today:

- Roads across the parish are in poor condition with many potholes. Many roads are unable to sustain their current levels of traffic, particularly the increasing levels of HGV traffic;

- The principal through roads traversing East Horsley are narrow and winding, have a series of pinch points, have sections without any pavements and are generally bad. As a senior councillor remarked at a recent public meeting in the village hall: "East Horsley has lanes, not roads." East Horsley's 'lanes' are totally unsuitable for high volumes of traffic, in particular for the volume of HGV's now using them;

- Many of the drains are blocked or otherwise in poor condition giving rise to frequent surface water flooding when it rains;

- The pavements are in poor condition as well as being narrow, they are often uneven and/or cracked making it difficult, for example, for people with pushchairs or prams or in wheelchairs;

- There are insufficient school spaces for the number of local children needing them, with the result that children are often allocated to schools a significant distance away such as Darking or Woking; and

- The Medical Centre in East Horsley is already at capacity in terms of its number of beds.

Furthermore, I would observe that the traffic at the A3/M25 Interchange (Junction 10 of the M25) is already at a point where significant delays and congestion occur every morning. My personal experience is that this congestion has worsened significantly over the past few years. Whilst the plan references improvement to this junction, these may ease the current issues, but adding the housing proposed for the Horsleys, Wisley Airfield, Ripley and Send will likely result in no improvement, but rather worsening of an already unacceptable situation.
In respect of East Horsley, there are only two specific proposals in Appendix C:

LRN 25 - East Horsley and West Horsley traffic management and environmental improvement scheme. It is not clear what is proposed here, and its timing and funding have to be considered uncertain. It is stated that funding will, at least in part, come from developer contribution. However, it is not at all clear what development is likely to give rise to such a contribution, but it certainly implies that funding could only come if there were a development; and

HSC 5 - Expansion of East Horsley Medical Centre to provide additional capacity and services for future population in years 5 - 15 of the plan.

There are no proposals in respect of all the existing problems with for example roads, pavements, drainage, and schools. Furthermore, it is inevitable that the proposed developments in East Horsley itself and nearby, particularly in West Horsley and the proposals for Wisley, will put further strain on the existing infrastructure. There are no proposals at all to cater for this.

Although an expansion of the Medical centre is proposed in the Infrastructure Schedule, this is not until years 5 - 15 of the Plan. Given that it is already at capacity, EHPC believes that this needs to be done earlier.

Local primary schooling is also a very pertinent issue. There are 11 housing development sites identified in the LAA for East and West Horsley, which taken together would result in the building of 593 new houses in the two parishes that are today served by a single primary school - The Raleigh, in West Horsley. Planning guidance suggest that this number of new homes will require the provision of around 150 additional primary school places to accommodate such an increase in population. Today there is no spare capacity at The Raleigh, yet no proposals are made in the Proposed Submission Local Plan to provide for any more schooling in the Horsley's.

I believe that the failure to address the inadequacies of the existing infrastructure to meet the needs of what is there already is a serious deficiency in the Proposed Submission Local Plan.

I accordingly OBJECT to the infrastructure proposals on these grounds. I further OBJECT to the proposals for infrastructure in that they do not meet the stated objective of providing infrastructure to support the proposed developments.

POLICY 14 Green and blue infrastructure Isupport this policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Surrey Hills AONB is one of the great treasures of Guildford Borough and we believe that protecting this area should be given the highest priority.

I therefore support Policy P1.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Local Plan Policy P2 states that: *We will continue to protect the Metropolitan Green Belt.* I fully and unconditionally support this policy.

Unfortunately, despite such brave words, GBC appears to be in breach of this policy itself through the housing policies that it has set out in the Local Plan. Around 65% of the developments proposed in the Proposed Submission Local Plan are to be built on land currently within the Metropolitan Green Belt. I consider this outcome to be outrageous.

There are also a number of further issues relating to the detailed implementation of this policy which are set out further below:

1. a) Paragraph 4.3.13: *Proposal to inset East Horsley from the Green Belt*

Policy P2 proposes that East Horsley should be inset from the Green Belt, instead of being 'washed over' as it is today.

East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Moreover, being 'washed over' by the Green Belt has not been a serious constraint on development within the village. For example, GBC's planning records indicate that no less than 149 net new homes were added to the village housing stock through in-filling and brownfield developments between 2000 and 2015.

Today East Horsley is a picturesque and flourishing rural community, which has and continues to experience steady incremental growth as a result of being 'washed over' by the Green Belt. As the saying goes: "If it ain't broke, don't fix it". This applies to East Horsley in the matter of insetting.

I therefore OBJECT to the proposal to inset East Horsley from the Green Belt and requests that this proposal be dropped from the Local Plan.
1. b) Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley

GBC are proposing to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area, as set out in the Proposals Map, with the justifications seemingly provided in the Green Belt & Countryside Study prepared by the consultants, Pegasus.

We object to two specific boundary changes, which have been proposed, as follows:

1. There is a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Ockham Road North up to the eastern boundary of Lollesworth W. This proposal removes over 5 hectares of agricultural fields from the Green Belt. The present boundary line is clearly defined by a deep and well-maintained drainage ditch which is classified by the Environment Agency as a 'main river line' and therefore represents a highly defensible Green Belt boundary.

Moving this boundary west to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in 'exceptional circumstances'. We do not believe this proposal can be considered as an exceptional circumstance. Clearly the only justification for this change is to bring a large agricultural field within the settlement area in order to provide more housing land. However, under NPPF rules this is not a sufficient justification for changing a Green Belt boundary. As such, I believe it is an invalid proposal.

I accordingly OBJECT to this proposed boundary change.

1. There is also a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Kingston Avenue up to a tree line running along the Parish Boundary at the western edge of Kingston. The result is to take all of Kingston Meadows out of the Green Belt.

Kingston Meadows is the main public recreational space of East Horsley, comprising various sports facilities and playing fields. The present settlement boundary is clearly defined by a deep and well-maintained drainage ditch running along its eastern side. It therefore represents a very defensible Green Belt boundary. Moving this boundary westwards to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in 'exceptional circumstances'. I do not believe that this can be considered as an exceptional circumstance. As such, we believe this is an invalid proposal.

I accordingly OBJECT to this proposed boundary change.
In the Green Belt & Countryside Study and its accompanying Topic Paper, GBC justifies the need to make changes in settlement boundaries in order to meet unfulfilled housing need in the Borough. However, Green Belt rules make it clear that unfulfilled housing need is not normally considered to be 'an exceptional circumstance'. If it were the entire Green Belt would already be covered in tarmac.

The NPPF is clear that every movement in settlement boundaries must be justified by 'exceptional circumstances'. GBC have offered only a generic justification in their Topic Paper of meeting unfulfilled housing need, but a case by case justification has not been provided. As such, I believe the settlement boundary changes referred to above (and many others) are invalid without such detailed justification.

1. c) Paragraph 3.17: Proposal to remove Wisley Airfield from the Green Belt I OBJECT to the proposal to remove Wisley Airfield from the Green Belt.

The only justification for this proposed change is unfulfilled housing need which is not considered an exceptional circumstance. The proposed Wisley development is discussed further below in the Site Allocation section.

d) POLICY P2: Limited In-filling

A new planning designation has been introduced called 'the identified boundary of the village'. For East Horsley this covers a number of roads south of the A246. It is a sizeable area, covering 45 hectares, the equivalent of 23% of the present Settlement Area of the village. Within this area, Policy P2 sets out proposals that would allow 'limited in-filling' within this boundary.

I find it hard to reconcile the opening statement of Policy P2 that "We will continue to protect the Metropolitan Green Belt" with this sizeable reduction in effective Green Belt status. In my opinion, this policy represents a de facto extension of the Settlement Boundary and a substantial reduction in the operational effectiveness of the Green Belt, whose effectiveness is significantly weakened where this new planning designation applies.

I accordingly OBJECT to the proposal to designate roads south of the A246 as being within the 'identified boundary of the village' and to allow limited infilling within this area.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have carefully considered the Proposed Submission Local Plan which Guildford Borough Council ("GBC") has now published for public consultation. My comments are set out in this letter.

I have strong concerns about the Proposed Submission Local Plan and the evidence and assumptions which support it. In particular, I do not agree with the scale of the house building programme which is being proposed by GBC. The target outlined represents a 25% increase in the housing stock of the borough, whilst we note that the Office of National Statistics ("ONS") projects a population increase of some 15% for Guildford Borough over this same period.

I also note that the Proposed Submission Local Plan includes the statement "We will continue to protect the Metropolitan Green Belt". I fully support this policy. However, unfortunately GBC appears to be in breach of this same policy through the housing policies it has set out in the Proposed Submission Local Plan, whereby some 65% of developments will be made on land that is currently Green Belt.

I is also concerned that the infrastructure proposals are inadequate even to meet the needs of what is there at the moment, let alone the proposed developments in the Local Plan.

I therefore OBJECT to the Proposed Submission Local Plan.

Detailed comments on the six different policy areas which form the basis of the Proposed Submission Local Plan are now set out below, followed by my comments on specific site allocation policies

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
This policy sets out the objective of adding 13,860 new homes to Guildford Borough over the 2013-2033 period of the Proposed Submission Local Plan, equating to an annual build of 693 new homes per annum.

I have serious concerns about the enormous scale of this building programme, which represents a net increase of 25% in the housing stock of Guildford Borough, a remarkable rate of increase for a borough in the English Home Counties. It is even more remarkable when the official statisticians at the Office of National Statistics ("ONS") are projecting a population increase of some 15% for Guildford Borough over this same period.

I accordingly OBJECT to the borough housing targets set out in Policy S2.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3175  Respondent: 15323041 / Jane Doherty  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not share the same vision for the future of Guildford Borough as GBC, although I recognise that an enormous volume of work has gone into the preparation of the Proposed Submission Local Plan, which is now out for public consultation.

However, after more than 20,000 responses were submitted in 2014 in connection with the previous draft Local Plan, most of them opposed to its proposals, GBC has made relatively few changes from the earlier version and none of any materiality.

At the heart of the problem is GBC's desire to pursue a 'Forced Growth' policy which results in highly aggressive and unjustified targets being set for housing development in the Borough. These excessive targets - the proposed 25% increase in housing stock in particular - create a tremendous strain on both land and infrastructure in an already over-crowded and over-stretched part of the country.

These targets will also have a material adverse impact on the Metropolitan Green Belt across this area, despite all the political promises made to the contrary. The irony of Policy P2 which states that "We will continue to protect the Metropolitan Green Belt" does not fool anybody.

Accordingly I OBJECT to the Proposed Submission Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/955  Respondent: 15323841 / Claire Parker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

10. I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/954  Respondent: 15323841 / Claire Parker  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

9. I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1456  Respondent: 15323841 / Claire Parker  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
6. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1455  Respondent: 15323841 / Claire Parker  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

5. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLP16/3177  Respondent: 15323841 / Claire Parker  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
8. I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

The Garlick’s Arch (A43) proposal would double the built area in the locality, and would irrevocably damage the character of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

12. I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

3. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

The plan will cause more congestion in Ripley, Send and Clandon. There is too much congestion already!

The rural roads in this area are narrow, in poor condition and have no footpaths. The number of houses proposed will mean dangerous and unsustainable traffic.
13. I object to the lack of proper infrastructure planning for sites (Policy I1)

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

14. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:

**Comment ID:** PSLPP16/3178  **Respondent:** 15323841 / Claire Parker  **Agent:**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/3174  **Respondent:** 15323841 / Claire Parker  **Agent:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. I object to development in areas which are at risk of flooding (Policy P4)

The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3171  Respondent: 15323841 / Claire Parker  Agent:

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016).

I object on these grounds.

1. I object to the Local Plan as the development proposed is not sustainable (Policy S1)

The new housing proposed is not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick’s Arch.

The development should be in urban areas where there is sustainable transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3176  Respondent: 15323841 / Claire Parker  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7. I object to the Borough Wide Strategy (Policy S2)

GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there’s too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11% of the existing housing.

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

TO: LOCAL PLAN CONSULTATION, GUILDFORD BOROUGH COUNCIL

I OBJECT to Send Village being removed from the Green Belt. The Green Belt was intended to be permanent and there are no special circumstances abandoning it. Local councillors and central government gave a clear election promise to protect the green belt and this reneges on this.

I OBJECT to building 45 houses at Clockbarn Nursery because of inadequate access and traffic volume. The junction with Send road is already dangerous for vehicles trying to join the main road. Planning permission has previously been given for 64 apartments at the Tannery and for building the Marina both of which will generate additional heavy traffic.

I OBJECT to building 400 houses and 7000 sqm of Industrial space at Garlicks Arch opposite Send marsh Road. The site floods and is covered by ancient woodland. The industrial space is not needed but if it were it should be at Slyfield. Slyfield also has many vacant industrial units.

I OBJECT to the development of 40 houses and 2 travellers pitches at Send Hill. It is an inappropriate location as a narrow width single access country road. Any development there would spoil a high amenity area set in beautiful countryside. For more detailed lines of rejection please contact Send Hill resident [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998.]
I OBJECT to a new interchange with A3 at Burnt Common as Send would have to take traffic from the proposed 2000 new houses at Wisley airfield, 2000 houses at Gosden Hill, Burpham and 1850 at Blackwell Farm. Send Road which is already overloaded would become gridlocked with noise and pollution levels that is already excessive.

I request that my list of objections and comments are shown to the Planning Inspector and would like to receive confirmation that this communication has been received.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Re: Objections to GBC Submission Local Plan (June 2016)

We STRONGLY OBJECT to the removal of Send, Ripley and Clandon plus sites at Wisley Airfield and Garlick's Arch. There are NO EXCEPTIONAL CIRCUMSTANCES for Garlick's Arch to be removed (Policy 2) when there is an existing brown field site at Burnt Common.

The disproportionate number of new houses (13,860) is totally unsustainable, local villages will be irreparably damaged and do not require these houses. All local schools and and medical services are almost at capacity. There are inadequate bus services and the nearest main line stations are Guildford or Woking so the majority of journeys will be made by car.

Local village roads all ready suffer with too much traffic and are narrow, in poor condition and without footpaths, with 5,000 more houses this uns sustainable and potentially dangerous.

Insufficient account has been given to to the flood risk (Policy P4) at the site of Garlick's Arch which was classified by the Environment Agency as higher than the council assessment. There have been several floods in recent years and destruction of ancient woodland and wildlife habitats at this site is unacceptable.

WE STRONGLY OBJECT to this huge number of houses which is totally unbalanced and could see the small villages merged to become an urban sprawl and a catastrophic destruction of the character of the area.

In conclusion:- WE STRONGLY OBJECT TO

Lack of infrastructure i.e. local services, utilities, sewerage, doctor and schools (both almost at capacity)
Traffic congestion with greater levels of air pollution
Flooding risk
Medical/police emergency services capabilities
Destruction of green fields, wildlife habitats, ancient woodland and character of areas
Catastrophic destruction and merging of small villages

Please carefully and fully take into consideration these objections and accordingly amend the local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I am writing to object to the above plan for the Send and Ripley areas.

I object to Send village being removed from the Green Belt. It is a green and pleasant area, at the moment. I moved here from London to raise a family, away from excessive car fumes, tarmac and concrete, and am dismayed that there are plans to make this a similar environment, that I, and others, have strived to move away from. I therefore object to any plans that will remove, our ever disappearing countryside.

I object to the building of houses at Clockbarn Nursery, for the same reasons as above, and additionally for the extra strain this would mean on local roads.

I object to the building of houses and industrial space at Garlick's Arch. Again, for the same reasons as stated in my first paragraph. This development would be detrimental to the woodland and green fields it would involve.

I object to the development at Send hill. This is now a pleasant area, since being transformed from a previous landfill site, and feel it should be left in its current appearance.

I object to a new interchange at the A3 at Burnt Common, as this would funnel even more traffic into this area, resulting in more pollution and vehicles using Send road.

Finally, can you confirm to me that you have received these objections, and that comments have been shown to the planning officer.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We strongly object to the planned removal of Green Belt status for the village of Ripley and Send to accommodate
extensive development of the immediate area. I refer to the Garlic Arch proposed development. This will put
an intolerable strain on local traffic congestion and services. This development plus some other smaller ones would have
the effect of more than doubling the current population of 1500. It could easily increase the number of cars using local
roads by 1000. An increase in population would put an intolerable strain on already stretched services.

The other concern we have is that by removal of the Green Belt status it will have the effect of pushing Ripley nearer to
Guildford making Ripley a suburb of Guildford and loose it village status and uniqueness which makes it one of Surrey's
much loved villages for inhabitants and visitors alike.

Please, Please reconsider this plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1460  Respondent: 15324289 / Derek Lambert  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
With reference to the proposed possible development at the above location I would like to object to this on the following points,

1. The number of properties proposed are far in excess for the size of the village which would increase it by 100%. The additional traveller pitches proposed are not necessary as we already have a number of pitches in the bounds of Normandy

2. The development is on green belt land which this Government said they would always protect the green Belt, what has happened to this promise?

3. It is unnecessary to have a new secondary school in this area when the 2 local secondary schools are not fully subscribed. We do not require another village green as we have one already which is more central in the village I feel these two points have been put forward as sweeteners for the Guildford Borough Council.

4. Westwood lane is not a main road and often has heavy traffic during peak times as a through route to the hogs back A31 or the A3, and with the possibility of 600-800 additional vehicles emerging onto Westwood lane trying to get to either of those two main roads would be over and above what the road can cope with. Whichever way the traffic travels there is a rail bridge which is only one way, and we have already had a fatality there where a vehicle hit the bridge and caught fire. Or if they try to merge onto the A323, the site lines are very restricted especially if you are turning right to Guildford.

5. The station car park is not capable of taking more cars and there is no room for increasing the size, which would mean that there would be cars parking in the surrounding roads. Glaziers lane is a lorry route and therefore additional cars parked in the road would also be a problem

6. This development would disrupt the infrastructure of the village and the destruction of our rural environment.

I would ask the planning committee to think hard about this development. And I wish to strongly object to the proposal.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This is to let you know that I support this policy of retaining this land for allotment use.

I was recently (about a month ago) allocated a plot on the Aldershot Road allotment site, after having been on the waiting list for a while. It really is a wonderful place. As soon as we walk through the gates, all the stresses of everyday life are forgotten. My whole family has gotten involved in the allotment, my husband doing a lot of the heavy digging required to get the plot ready to cultivate things and our two little boys (5 and 2 years old) "help" too, using their own little gardening tools and they love to pick raspberries and gooseberries (the only things other than weeds we inherited when taking over the plot). Having an allotment is a great opportunity to spend quality time together as a family outdoors, we have been spending a lot of time at weekends on the site since we got it, staying the whole day and bringing our own picnic lunch. Tristan, our older boy, has really enjoyed sowing vegetable seeds and planting seedlings the last few weekends and wants to go there every day to check if any new shoots have appeared! In the longer term I believe having an allotment will be a positive thing in terms of a more active lifestyle and spending more time outside and growing some of our own fruit and vegetables.

As I mentioned above, the Aldershot Road site really is a lovely place, set on a hill away from traffic noise. While we were on the waiting list for this site, we were offered a plot on a few other sites, none of which had the same look or feel. It is also a very friendly site. Since joining, we have been made to feel very welcome and everyone is very friendly, stopping for a chat, giving advice and encouragement. The site also runs a plot for a local school and helps novice gardeners with their plots.

I should also add that retaining the lower vehicular access is very important to the site as this is really the only safe access point for vehicles (needed for delivering things to the plots and, more importantly, for ambulance access in case of emergencies). I believe there may be some tentative plans for an alternative, whereby a new access point at the top of the site would replace the current main access. However, to do this I understand that a new road will be needed through the site, which would involve the loss of all the outer plots (including our own). For obvious reasons we are strongly opposed to this idea.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/1468  Respondent: 15324673 / Michael Brooke  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

   • I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

      1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
      2. The increased volume of cars. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads - there are already significant congestion issues on Old Lane and Effingham Common Road during peak hours - there is no capacity for this level of increase especially when also considering wide vehicles including increased bus and HGV movements.

      1. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as Local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
      2. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity with dangerous parking on the verge of Effingham Common Road already a regular occurrence. Any assertion that residents will use other stations in the area is pure fantasy.

   • I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

   • I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. As a father of two young children, this is clearly of much concern. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

   • I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee - I objected to that planning application on the very same basis that I am objecting to its inclusion.

Answer (if comment is on questions 1-7 of the questionnaire): ()
in the local plan.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 5th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I object to the building of 400 houses and 7000 sq metres of industrial space at Garlicks Arch. It was a very late addition to the Local Plan and a big surprise. In addition to being in the Green Belt the area has flooded in the past and is covered by ancient woodland. The roads in the area of Send and Ripley are already very busy and vary from slow to gridlock at peak times. Adding a large number of homes and businesses will aggravate this situation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
It will result in Send, a small village, becoming overdeveloped.

Too many new houses for the current infrastructure to cope with.

The local roads in Send and Ripley are extremely busy with commuter traffic everyday and wouldn't be able to cope with all the extra cars etc.

The area is subject to flooding so not suitable for further development.

An area of ancient woodland, part of the Green Belt, would be destroyed for an unnecessary development.

Very few travelling shows come to this area so I can't see a need to accommodate them.

I object to the Guildford Local Plan 2016 for the following reasons West Horsley should remain in the Green Belt.

An increase of 35% of housing would have a big impact on our village.

Our local State schools are already full and children would have to travel further to school which would then see an increase in traffic.

Parking at the station is at a premium during the week

Most families now own two cars so with an increase of 35% housing we would see an increase of 70% in traffic. Our roads and pavements are already in a poor state.

Our roads would be gridlocked.

Thames Water have advised that the current waste water network in the area is unlikely to be able to support demand anticipated and would need upgrading.

The proposed increase would be totally out of character with our village which has many old buildings and a mix of different housing styles.

We live in an area of Outstanding Natural Beauty and it should be preserved for future generations to enjoy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object to the contents of the Guildford local plan for the following reasons: We already have a crowded village with many facilities under heavy strain:

The Raleigh school is already full with no room for expansion and other schools are full to capacity.

Car parks at the station and in the village are heavily used
Thames water have advised that the current waste water network in the area is unlikely to be able to support demand anticipated and would need upgrading.

East and West Horsley will be swamped with extra cars and people using shops, station, village halls sports and other facilities.

Medical facilities would be put under strain.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to these development plans. The proposed 400 houses, 7000 m² industrial development, slip roads and junction from the A3 is very much over what the small villages of Send and Ripley can handle. This is lovely countryside in a green belt area, the developments and junction would route heavy traffic from the A3 and M25 through to Woking; the area would become a traffic jam, completely spoiling it. The village medical centre and school would also be overwhelmed. The proposed developments have also not previously been subjected to public consultation. Surely Guildford Borough Council need to follow the correct process here and conduct a full consultation under Regulation 18. The process appears invalid.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident, I write to strongly object to the proposed developments of East and West Horsley in the Draft Local Plan. The numbers of new homes is out of proportion and is based on out of date population data as the basis for the plan.

The council cannot keep the local roads in good order as it is, how will it cope with the extra traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to proposed developments of East and West Horsley in Guildford Borough Council’s Draft Local Plan. The numbers of new homes is out of proportion and is based on out of date population data as the basis for the plan.

The infra-structure is not in place; there are no more secondary school places, the current train station car park is full by 08.30hrs and the morning commuter trains are crammed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings.

I wish to object to the part of the draught Local Plan. My objections are given below:

- I object to the Local Plan in so far it includes a proposed large development of housing for Wisley. Such a development will have a huge and unacceptable impact on the other local villages of Ripley, Send and the Horsleys, all of which also have new housing developments in substantial numbers included in the Plan. The proposed building in the local plan of the development on Wisley Airfield will change and spoil the whole character of the area.
- I also object to the removal of the former Wisley Airfield land from the Green Belt in order to facilitate the development of numerous dwellings. The point of the Green Belt is to protect the countryside for the future.
- The proposals for the housing development at Wisley Airfield, plus other proposed housing developments in Ripley, Send and the Horsleys are likely to result in 4,000-5,000 additional cars moving in and out of these areas on a daily basis. This increase in the volume of traffic will result in traffic congestion problems on all the local rural narrow roads. Also, local amenities are not sufficient to cope with this influx of people and transport.
- I also object to the local plan’s proposed housing developments in The Horsleys, Send and Ripley which are all building over fields and woodland which will be lost for ever.

I hope you will take note of my objections and particularly the former Wisley Airfield is removed from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to new sites (Garlicks Arch) being introduced as an after thought when it was not even considered in the previous plan. A slip road on the A3 at Burnt Common has been added to the Draft Local Plan without Highways England consent.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners’ views, or the costs involved in improving the infrastructure, currently out side their financial capability.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

I OBJECT

EVIDENCE.

GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment 2015 (ELNA) which shows an 80% reduction in employment space from the previous ELNA carried out by GBC in 2013. This means that industrial space at Burnt Common is no longer needed. Housing numbers from the Strategic Housing Market Assessment 2015 (SHMA) are highly questionable. The number of foreign students has been wrongly used to inflate the need. The required 13,860 houses in the local plan is exaggerated. If the population is to grow by some 20,000 in the plan period, we actually need 8,000 homes (based on an average of 2.5 persons per home).

The Green Belt does not need to be built over. 50% of new homes needed could be built on brownfield sites. GBC’s Transport Assessment was not even available to councillors for the vote taken on 24 May, being published on 6 June. Infrastructure overload has received scant attention.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT

Policy A35 p124 and 203

Land at the previous Wisley Airfield like Gosden Hill is close to Send and Ripley and will cause significant traffic flows on the A3 and M25 as well as the effect on local amenities. This would also be catastrophic as regards local hospitals, schools, traffic and the environment.

Overall the increase in the population of Send as already envisaged by developments in the area will impose an intolerable burden in the infrastructure such as Schools, the Villages Medical Centre, Roads, local Hospitals, parking for local shops, sewerage and internet provision (which is barely adequate at present). I see nothing in the Local Plan concerning such issues and until these issues are addressed satisfactorily in detail any further development should be rejected. There would seem to be a hidden agenda and vested interests by some members of the committee being brought to bear on the overall policies being put forward by the planning committee to the detriment of the Send area and its environs which seems to have been singled for intensive development and this is totally unacceptable.

Policy A42

Clockbarn Nursery, Tannery Lane, Send

This will cause unacceptable traffic levels in Tannery Lane. To the east of the exit the road is narrow (single track in places) with several blind bends exiting into Newark Lane which itself feeds a very narrow and congested junction on to the B2055 in Ripley High Street whilst to the west it feeds onto the A247 a junction with restricted sight lines due to parked cars during the day. It will also add to the additional traffic generated by the proposed marina which is also accessed via Tannery Lane

POLICY A 43

. 30 ha LAND AT GARLICK'S ARCH, Burnt Common, designated for 400 houses and 7,000 sq m of industrial and warehousing. There is no need for any more houses on top of the 13,860 already proposed for the borough. This site is NEW and was not included in the Regulation 18 draft and has NOT been consulted upon previously. It is Green Belt permanently protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances. The site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The proposed industrial development of 7000 sq m is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield.

I OBJECT

**Policy A43A**

A new 4-way interchange onto the A3 at Burnt Common would be disastrous for Send. Send Road (A247) would be gridlocked all day. Send would be the through route to Woking for traffic leaving the M25 and A3, the proposed 2,000 houses at Wisley and the 2,000 houses at Burpham. However a 4 way interchange might alleviate the traffic through Ripley which already approaches levels when it was a trunk road (A3) before the Ripley bypass was built. However if the developments in the draft plan were to go ahead any such gain would be negated and the A247 through Send grid locked with risk to children attending the new Send Schools. Further as shown the off slip road to the southbound A3 would increase the traffic at the junction with the A247, already a the scene of many accidents.

I OBJECT

**POLICY A44**

1.9 ha LAND WEST OF WINDS RIDGE AND SEND HILL designated for 40 homes and 2 Travellers Pitches. This site is NEW and was NOT included in the regulation 18 draft and has NOT been consulted upon previously. Originally in the 1990s GBC purchased this site with the express propose to prevent travellers access and to the triangle to the east end of this site. No account or reason has been given by GBC for this change in policy.

Development for housing is inappropriate due to its permanent Green Belt status and high quality Green Belt amenity within an area of beautiful countryside which would be spoilt by any development. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is inappropriate due to the narrow width single track country road at one end providing insufficient access to the site whereas the other end
already carries a heavy volume of traffic at school opening and closing times and would put children at risk. There is already gridlock at Send Traffic lights at these times and along the A247. NOT taken into consideration are the proposals to the building of a new school to replace St.Bedes. As these stand at present access to the new building would appear to be via the A247 only which might alleviate the traffic at the bottom of Send Hill but it is inconceivable that this will remain so because the School traffic on the A247 at school times with parents from both Schools picking up and setting down will cause gridlock on this road which will extend from about 3 pm into the evening rush hour. It is thus likely that the entrance to the school off Send Hill will be reinstated.

POLICY P2.

SEND SHOULD NOT BE REMOVED FROM THE GREEN BELT. Send provides a buffer between Woking and Guildford.

The particularly vulnerable areas of land being taken out of the Green Belt include

1. The land behind the school including playing fields and woodland.
2. The land to the right of Cartridge by the River Wey Navigation up to the new boundary fence with Vision Engineering.
3. Land to the left of Cartridge going up to the old depot on the Wey Navigation.
4. Land west of Winds Ridge. This will now protrude into the surrounding countryside like a carbuncle whereas before there was a clean straight line behind the Send Hill properties (formed by a footpath) a much more natural boundary.

GBC HAVE NOT FOLLOWED CORRECT PROCESS.

GBC have been guilty of very underhand sleight of hand procedures in drafting this new plan

Since 2014 GBC has changed every major site in Send proposed for development and now just added a major new road junction. The southbound off slip road from the A3 at this junction will increase traffic turning right onto the A247 which is already a site of many minor (so far minor!) accidents. The 2014 proposal for 430 houses went down in April 2016 to 185 and has just gone up again to 485. These significant changes require another full consultation under Regulation 18, not the short cut of Regulation 19 which GBC are trying to get away with. This invalidates the whole process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Belt, Policy 2 at paragraph 4.3.15

Send Business Park now taken out of the Green Belt altogether

I object to the proposal to inset Send Business Park from the Green Belt because:

1) It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation

2) There is highly restricted vehicular access along Tannery Lane in both directions: more traffic in Tannery Lane will have a knock on effect on the traffic in Newark Lane in particular at the junction with the B2215 in Ripley High Street

3) Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate.

But, instead of making any real attempt to mitigate and amend the plan, GBC has made it worse In a normal planning process a local planning authority listens carefully to the objections and alters its proposals to take account of those objections. GBChas not listened at all. The Send area has been targeted disproportionately. Major sites in the village have changed three times. First, Burnt Common, then Garlick Arch and now both of them. GBC appear to have a predetermined agenda to build on the Green Belt and without any reasonable constraints to take account of inadequate infrastructure roads, schools, medical facilities as required by law. The traffic and pollution implications of the current proposals are completely unacceptable

Clockburn Nursery, Tannery Lane,

Policy A42 60 homes in place of 45 homes previously

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

1) The increase to 60 homes in place of 45 homes is 33% more and excessive
2) It ignores all the hundreds of previous objections made by local people
3) It will worsen access and traffic problems in Tannery Lane and at the A247 junction
4) It will make erosion of the Green Belt in our village worse
5) It will make surface water flooding, which is already bad, even worse
6) It will impact open countryside views from the River Wey Navigation

Land at Garlicks Arch, Send Marsh, Policy A43.

400 homes and 6 Travelling Show people plots

I object to the Policy A43 change at Garlicks Arch because:

1) It ignores all the thousands of previous objections made by local people
2) There is no proven demand for Travelling Show people plots in this location
3) It is beautiful permanent Green Belt and no exceptional circumstances exist
4) It will cause over-development of our village and the number of homes is excessive
5) It is ancient woodland that existed at the time of Elizabeth 1

6) It will join up Ripley and Send and defeat the key purpose of Green Belt

7) It is subject to frequent flooding and is currently a flood zone 2 allocation

8) It is contaminated by lead shot accumulated over fifty years

9) It will generate excessive traffic that will block up the local roads of Send and Ripley where parking is almost impossible at many times of the day

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Burnt Common, London Road, Policy A58.

Now a new allocation for a minimum of 7,000 sq m of industrial or warehousing

I object to Policy A 58 at Burnt Common because:

1) It was deleted from the 2014 draft because of all the objections made previously. The word minimum is a change from the previous maximum in the 2016 plan and since that time there has been a decline in demand for industrial land

2) There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt

3) The impact on small surrounding roads will create more traffic

4) It will join up existing villages and defeat the purpose of the Green

Comment ID: PSLPP16/3265  Respondent: 15326401 / Claire Haslam  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners’ views, or the costs involved in improving the infrastructure, currently outside their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/983  Respondent: 15326465 / James Parker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

10. I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/982  Respondent: 15326465 / James Parker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
9. I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1492   Respondent: 15326465 / James Parker   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

6. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1491   Respondent: 15326465 / James Parker   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

5. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3257  Respondent: 15326465 / James Parker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

8. I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

The Garlick’s Arch (A43) proposal would double the built area in the locality, and would irrevocably damage the character of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3260  Respondent: 15326465 / James Parker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
12. I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3254  Respondent: 15326465 / James Parker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

The plan will cause more congestion in Ripley, Send and Clandon. There is too much congestion already!

The rural roads in this area are narrow, in poor condition and have no footpaths. The number of houses proposed will mean dangerous and unsustainable traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3261  Respondent: 15326465 / James Parker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
13. I object to the lack of proper infrastructure planning for sites (Policy I1)

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3262  Respondent: 15326465 / James Parker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

14. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3259  Respondent: 15326465 / James Parker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
11. I object to poor air quality concerns (Policy I3)

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

2. I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

4. I object to development in areas which are at risk of flooding (Policy P4)

The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016).

I object on these grounds.

1. **I object to the Local Plan as the development proposed is not sustainable** (Policy S1)

The new housing proposed is not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick’s Arch.

The development should be in urban areas where there is sustainable transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
7. I object to the Borough Wide Strategy (Policy S2)

GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there’s too much development in the north east of the borough (Wisley [A35], Ripley/ Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11% of the existing housing.

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
General Policies relating to Send Parish. Sites (A42, A43, A43a, A44)

1. **Send Removal from Green Belt**: I **OBJECT** to removal of Send from the Green Belt as this will remove part of the necessary buffer between Guildford and Woking, increasing the risk that a large conurbation will form. There are no exceptional circumstances that justify the removal.

2. **Building on Current Green Belt land**: I **OBJECT** to the proposed development sites current Green Belt sites at Clockbarn Nurseries, Garlick’s Arch, and Send Hill since there are no special or exceptional circumstances which justify removal of their Green Belt status.

3. **Due process**: I **OBJECT** to the proposed development sites at Clockbarn Nurseries, Garlick’s Arch, and Send Hill since they were not included in the previous Draft Local Plan consultation exercise in 2014. Send sites were all substantially changed without the proper two-stage process of consultation being followed, unlike the rest of the Guildford Borough.

4. **Traffic levels and associated environmental issues**: I **OBJECT** to the proposed Burnt Common interchange that will increase both traffic movement levels through the Parish and the level of traffic related pollutants over wide areas in the Parish.

5. **Housing Numbers**: I **OBJECT** to development of sites at Clockbarn Nurseries, Garlick’s Arch, and Send Hill since the number of houses proposed (485 + 2 traveller pitches) will increase the number of houses in Send by 25% which is incompatible with maintaining Send’s current rural nature.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

**b. Garlic’s Arch and Burnt Common Interchange (site nos. A43 and A43a)**

1. **Outside current development boundary**: I **OBJECT** since this development lies outside the existing housing outline of the village, and should therefore be deleted to avoid both loss of green belt land and creeping development between Send, Woking, and Guildford.

2. **Traffic Infrastructure Capacity**: I **OBJECT** to the proposed new interchange onto the A3 at Burnt Common since this would generate significant new traffic movements that surrounding roads cannot accommodate.

3. **Traffic Infrastructure Evidence**: I **further OBJECT** to the proposed new interchange onto the A3 at Burnt Common since associated transport evidence is incomplete and does not justify additional A3 access at this location.

4. **General Infrastructure**: I **OBJECT** to development at Garlick’s Arch for 400 houses as there is insufficient infrastructure to support the development, including utilities, social amenities, schooling, public transport, and medical facilities.

5. **Industrial use**: I **OBJECT** to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is not a sustainable development. It is removed from the major population centres in Guildford and Woking necessitating a large increase in public transport services and/or major additional traffic movements for staff travel and business logistics. If there is a need for 7,000 sq m of industrial space within the Borough it should be located at Slyfield where there is a 40ha site available and where it would be largely welcomed.
6. **Flooding**: I OBJECT to development at Garlick’s Arch. This area is classified by the Environment Agency as being in a higher flood risk area than the Council’s own assessment and has flooded many times in recent years. Therefore the Council’s own assessment is invalid and the site must not be developed.

7. **Environment**: I OBJECT to the destruction of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

3. Specific Sites

1. **Send Hill (site no. A44)**

2. **Site Access**: I OBJECT since this development will increase traffic along Send Hill. This is a very narrow road (or lane) that, for one third of its length, permits only single file traffic. Any increase in traffic volumes must increase the risk of accidents. I have already witnessed several occasions where two cars only just missed hitting each other (i.e. coming head to head). I personally avoid using this road due to the perceived risk of a serious accident. In addition the junction between Send Hill and Potters Lane is hazardous, due to poor sight lines, with numerous accidents observed.

3. **Flooding**: I OBJECT since part of the site comprises a bowl formation that has flooded most winters for many years. This, together with a large pond on adjacent land, indicates a high water table in this area. Any disturbance to the site would possibly alter the water table thus causing flooding to adjacent properties.

4. **Site Contamination**: I OBJECT since Guildford Borough Council used the site as a refuse tip/landfill site for many years. The site is therefore unsuitable for development on health grounds.

5. **Site Over development**: I OBJECT since the site is too small for the proposed uses.

6. **Outside current development boundary**: I OBJECT since this development lies outside the existing housing outline of the village, and should therefore be refused to avoid both loss of green belt land and creeping development between Send, Woking, and Guildford.

7. **Increased demand on village services**: I OBJECT since this proposed development will add additional houses to the existing village stock, thereby increasing demands on existing village services, e.g. schools and health services. These are already recognised as being oversubscribed. Any development, which further increases demand, must be deferred until after additional investment by the Borough/County has increased their capacities.

8. **Loss of amenity**: I OBJECT since the site has been used as a public open space for many, many years. It is understood the timescale is such as to confer the formal status and protection of Public Open Space status to the site, which then prohibits development

9. **Loss of amenity**: I OBJECT since the site is part of the rural nature of this part of Send. Adding houses, and associated access/service roads, will detract from this setting, be visible for long distances, and will adversely alter the character of the area. In particular scenic views to and from the River Way and St Mary’s Church will be adversely impacted.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Garlic’s Arch (site no. A43)

- **General Infrastructure**: I OBJECT to development at Garlick’s Arch because there is insufficient local infrastructure to support the development, including utilities, social amenities, schooling, public transport, and medical facilities.
- **Scale of development**: I OBJECT to inclusion of sites for travelling/show people pitches because the site is less than 500 houses and a need has not been established, in contravention of Local Plan Policy H1.
- **Outside current development boundary**: I OBJECT since this development lies outside the existing housing outline of the village. It represents ribbon development, loss of green belt land, and creeping development between Send, Woking, and Guildford.
- **Use of Green Belt land**: I OBJECT because there are no special or exceptional circumstances identified which justify its removal from the Green Belt
- **Traffic Infrastructure Capacity**: I OBJECT to the proposed development because this would generate significant new traffic movements that surrounding roads cannot accommodate.
- **Flooding**: I OBJECT to development at Garlick’s Arch because the area is classified by the Environment Agency as being in a higher flood risk area (zone 2) than the Council’s own assessment and has flooded many times in recent years. Therefore the Council’s own assessment is invalid and the site must not be developed.
- **Environment**: I OBJECT to the destruction of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to object to Guildford Borough’s Draft Local Plan as detailed below. Please show my comments to the Planning Inspector who will decide about the Local Plan. Please also acknowledge receipt of this letter.

1. General Evidence and Policies

• **Housing Requirement**: **I OBJECT** to the figure of 654 houses required each year between 2015 and 2034 as being too high. Guildford Borough Council will not publish details regarding how this figure was derived. It therefore remains impossible to support the sudden increase in housing numbers from previous annual figures of 322.

• **Inset Green Belt land**: **I OBJECT** to the proposed inset of Send Business Park from the Green Belt (Green Belt Policy 2 at Paragraph 4.3.15) because

  This is acknowledged by river users as being part of one of the very few quiet stretches along the Wey Navigation. It must be protected from further development.

  The site contains an Area of High Archaeological Potential (AHAP – reference 2003 Guildford Local Plan) which requires significant protection to be continued.

  There are no special or exceptional circumstances identified which justify removal of the Green Belt status.

  Developments in the area will harm the open aspect of the area and views associated with the Wey.

  Access to the site is along very narrow roads which can neither safely support existing traffic nor the additional traffic to be expected both during site development and subsequent use.

• **Process**: **I OBJECT** to the failure of Guildford Borough Council to allocate housing development proposals evenly among its constituent parts, instead focusing disproportionate development within Send Parish.

• **Process**: **I OBJECT** to the failure of Guildford Borough Council to recognise and act on the large number of objections relating to proposals for Send and made during the 2016 consultation activity.

2. General Policies relating to Send Parish. Sites (A42, A43, A58)
• **Traffic levels and associated environmental issues.** I **OBJECT** to the proposed significant developments in Send because these will increase both traffic movement levels throughout the Parish and the level of traffic related pollutants over wide areas in and surrounding the Parish.

• **Housing Numbers:** I **OBJECT** to the scale of development within Send because the increased number of houses proposed (500 + 2 traveller pitches + 8 Traveller/Showman Pitches/Plots) will grow the number of houses in Send by 25%. This is incompatible with maintaining Send’s current rural nature and cannot be supported by existing infrastructure, including education and medical facilities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Ripley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ) , is Sound? ( ) , is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to register the strongest possible objections to the Draft Local Plan for Ripley and the surrounding area. In particular I raise the following points:

1. From the documents I have read on your web site the proposed developments are likely to at least treble the number of houses in the area. This is completely disproportionate and will have a hugely negative impact on the area as a whole.

2. The roads in the area at peak times are unable to cope with the current volume of traffic. This includes the main roads (M25 and A3) as well as the minor roads, many of which are little better than lanes. Most houses now boast at least two cars, and given no train station exists in Ripley and public transport is poor at best, people will be forced to take to the roads for shopping, commuting etc. Not only will this result in gridlock in the immediate area, but the areas around local stations will become impossible for residents living nearby as people park to facilitate travelling to and from work.

3. The impact on the environment in terms of pollution from the increased number of vehicles will be extremely detrimental to the health of all, but in particular the young and elderly.

4. Increased traffic will increase the number of accidents in the area, with the greatest impact likely to be on pedestrians and cyclists. Many roads and lanes have no pedestrian walkways, and the increase in cycling in the area (partly due to the growth of the hobby in general but in particular due to the attraction of the Olympic/Prudential Surrey 100 route) will endanger the lives of those most vulnerable to road traffic accidents.

5. The local infrastructure will simply be unable to cope with the increased number of people living in the area, not just in terms of roads but also local public transport, GP surgeries, A&E departments, schools etc to name but a few. In general this has already happened in much of the south east but the extreme increase in housing the Local Plan proposes in such a small area means that local services will not be able to cope effectively.

6. The lack of protection for the greenbelt is a concern. While many people enjoy living in an area with views of green fields and woodlands, the green belt has much more important roles. It is the natural habitat for a huge number of native species, many of which are already in danger and struggle to exist alongside man. In addition, the greenbelt represents the lungs around London and major built up areas such as Guildford. It helps to cleanse the air and keep the ecosystem in balance. The longer term effects of upsetting that balance are already apparent in Global Warming/Climate Change, and
huge local projects such as that proposed will only increase environmental problems and ensure we continue down the same slippery slope.

I have no problem with increasing housing locally per se, but it needs to be done in a much more controlled way ensuring everything affected by that increase moves forward coherently. The Draft Local Plan is not coherent and in my view represents a knee jerk reaction to the requirement of central government to increase housing. The knock on effects of that increased housing have not been addressed, but most certainly should be.

Thank you for taking the time to read this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East has taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners’ views, or the costs involved in improving the infrastructure, currently out side their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/987  Respondent: 15326817 / Peter Jennings-Giles  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send Marsh/ Burnt Common

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I moved to Send Marsh 25 years ago with my wife and young family attracted by it’s rural qualities and subsequently we enjoyed the fact that it (and other local villages) benefited from protection from major redevelopment by being protected from major development by virtue of protection of the green belt. I understood that due to legislation passed shortly after WW2 that the green belt boundaries would remain intact in perpetuity.

I OBJECT to the removal of 15 villages, including Ripley and Send, from the green belt. This will lead to wholesale, and often inappropriate developments.

I OBJECT to the fact that GBC have not followed the correct process for Send and Ripley developments. Any significant changes to the 2014 proposals, such as the proposal development of Garlicks Arch, should have required another full consultation, which did not happen. This invalidates the whole process.

I OBJECT to the fact that the first notification I received of the proposed changes to include development of Garlicks Arch was as in early June via a leaflet distributed by a concerned neighbour and not via Guildford Borough Council.
I OBJECT to the fact that GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment which shows that industrial space at Burnt Common IS NO LONGER NEEDED.

I OBJECT to Policy A43.30 the proposed development of Garlicks Arch designated for 400 houses and an industrial estate. This is a new site not included in the Regulation 18 draft and has NOT been consulted on previously. It is not only permanently protected green belt but also a site of ancient woodland with some trees planted in the 16th century.

I OBJECT to policy A43.30 the development of new four way interchange onto the A3 which would mean that narrow Send Road (A247) would be the main route for traffic leaving the M25 and A3. It is already crowded and vulnerable to traffic jams. Further traffic from this development would result in permanent gridlock. It simply would not work.

I OBJECT to policy A44 which would see 40 homes and two travellers' pitches on land west of Winds Ridge and Send Hill. This was again a NEW site NOT included in 18 draft and therefore has NOT been consulted on previously. Once again this is Green Belt land partly containing unsafe landfill. Access is by a narrow lane which could never take the volume of traffic that would ensue from traveller's pitches.

I OBJECT to the fact that the Local Plan takes no account of schools, doctors surgeries and roads that are already operating at full capacity. Another 4000 houses in this area with a conservative estimate of a further 8000 cars would be catastrophic.

Please take into consideration the genuine concerns and objections of people living in these areas who would be seriously detrimentally affected by these proposals and reconsider your proposals.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I was born and brought up in Guildford and am still a regular visitor to the Borough, not only to visit many friends, but also to enjoy walking in the countryside and through the historic villages which are the Borough’s heritage.

I would like to raise objections to the Borough Councils proposed Local Plan.

I object to the fact that the majority of housing is proposed to be built on Green Belt land, rather than on available brown field sites, and I specially object to the proposed removal of the former Wisley Airfield site from the Green Belt when no exceptional circumstances have been given for doing so.

I strongly object to the continued inclusion of the Wisley Airfield site in the plan when after over a year of consideration, the Council Planning Committee unanimously rejected the developer’s planning application, after the Council’s Planning Officers expressed grave concerns about the proposed development.

The proposed 2,000+ houses proposed for this site would totally swamp the local historic Ockham village with its many listed houses, whilst losing valuable green land.

The roads in the area are extremely narrow, unlit and with no pavements and totally unsuitable to cope with increased traffic. The suggestion that this development would encourage a move to cycling and walking is not realistic due to the isolation of the site – it would without doubt bring about a large increase in private car usage in the area. Car ownership figures would suggest that a 2,000+ housing development could generate 3,000 - 4,000 extra cars (as well as heavy lorries and vans which would service such an estate) adding to an already overcrowded A3 and M25, and creating even higher levels of pollution, which already breach EU limits around the M25 junction. Furthermore, there is little public transport in the area and certainly neither of the local railway stations at Effingham and Horsley could cope with a large increase in passenger numbers or demand for parking.

A look at the map clearly shows why the Green Belt was created – the urban sprawl from London has already reached as far as Cobham, and the Wisley Airfield site is crucial in protecting the Borough from its further advance.

I trust that you will seriously consider removing the Wisley Airfield site from the Local Plan – not only for the many practical concerns raised, but because it risks destroying the very countryside and rural village life which are the very things which make the Borough such a desirable place to live.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to register my feedback on the Guildford Local Plan. I support the Guildford Residents Association (GRA)
response and oppose Guildford expanding by a quarter.

Whilst I accept that there is a need in the UK to build more housing, I feel that the proposals outlined in the Local Plan for
Guildford are excessively large - simply put, the volume of building outlined is too large for the town's infrastructure.

The infrastructure in Guildford is not ready to support such a large-scale development - before adding even one quarter of
the number of properties proposed in the Plan Guildford needs:

- vastly increased capacity on the trains to London for everyone who has to commute to London to work (there are not
  enough jobs in Guildford to support the current population, let alone a massively expanded one);

- a remedy to the issues caused by the A3 (splitting the town in half, with commensurate social effects, causing gridlock in
  the town at rush hour and whenever there is frequently an accident);

- increased crossing points over the river, railway and A3 to make transport easier and unite the town (ideally the A3 and
  the railway should run below ground);

- integrated rail and bus services - there is currently not one single bus running from the mainline station, the main entry
  point for visitors and commuters;

- bus passes which enable local residents to use buses cost effectively, and encourage people not to drive into the centre of
  Guildford;

- proper cycle lanes to and from the station and other key destinations to encourage people out of the cars and reduce the
  volume of traffic on the roads.

I see no progress on any of these items - they should be the number one priority of the council. Any approval of new
housing schemes should be dependent on these issues being addressed. No properly thought through infrastructure -
no houses! The proposed infrastructure additions in the plan - adding stations at Park Barn and Merrow - will exacerbate
the problems experienced by the rest of the existing infrastructure.

And I have not mentioned the issues around unjustified Green Belt development - squandering our greenfield sites in a
single Plan, robbing future generations and destroying one of the main things that makes Guildford unique and attracts
people to live here in the first place.
I expect our councillors to defend Guildford against these plans and to fight for improvements which will benefit existing and future residents, and make our town a UK leader, not a concrete backwater.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We would like to object in the strongest possible terms to the various proposed developments in and around the areas of Send and Ripley.

Whilst we are all aware that new homes are needed, the scale and the questionable way in which these developments have been introduced into the planning timetable leads us to believe that the prime concern of the Council is not the welfare of existing residents.

Too much unbalanced development shouts off the list of proposals. If all of these developments were give the green light, the strain on road congestion, schooling and doctors' surgeries would be overwhelming.

The Green Belt is there for a very important purpose. It is not there for Local Authorities to abuse by taking chunks out of it to meet spurious building targets.

All of the proposals the Council have listed are contentious but for our part the A43 Garlicks Arch development is a classic example of the Council’s doubtful conduct by dangling an additional slip-road off the A3 in the hope that will appease the residents.

It will not.

1. The University strongly objects to the elements contained within Policy H1 which require that 60% of FTE students be accommodated on Guildford Borough Council, the University and others can work together outside the Local Plan to encourage new entrants to join the rental sector in Guildford through non-affiliated Purpose Built Student Accommodation ("PBSA") and more Private Rental Sector (PRS) housing. As a benchmark the University simply points out that it already provides more accommodation than do 95% of Universities across the nation, it plans to deliver 1,150 new units over the next three years and that it expects to deliver more in future as funds/circumstances permit to support new demand. The PBSA sector in Guildford, on the other hand, is virtually non-existent (c160 units at date). The clause is regarded as divisive, discriminatory, impractical and dangerous.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The University and Its Town

The relationship between the University of Surrey and Guildford Borough Council goes back to the early 1960s when the Borough supported its own development by attracting the University of Surrey to relocate to the town.

Today the University and the companies on its Research Park bring £1.7bn of gross added value to the UK each year and directly or indirectly support 17,312 UK jobs, 10,644 of them in Guildford. The University is ranked 4th in the country in the Guardian 2016 and 2017 league Tables and was awarded the University of the Year Status by The Times/The Sunday Times in 2016. The wholly-owned Surrey Sports Park attracts international teams and high-profile events and is appreciated by local residents who pay well in excess of 3/4 million visits to the park each year.

The University, the Research Park companies, the Royal Surrey County Hospital and Guildford Business Park are located in an area of roughly a square mile to the west of Guildford Town Centre. This square mile covers less than 1% of Guildford Borough but generates around 45% of the Gross Value Added of the Borough. The experience of the many staff working in the square mile and the University students is affected by housing and infrastructure deficits and the University's plans and this response reflect that context.

The underpinning need for the local Plan is clear:

• Population growth in this area is rapid and this will continue
• The UK is already in housing crisis, with the younger and future generations particularly badly affected
• The housing crisis is particularly serious in the South East and in this Borough
• The economy must be allowed to grow to deal with the country's debt burden and population growth
• To enable economic and housing growth, infrastructure deficits must be tackled
• Guildford is an integral part of the dynamic fast growth area of London and the South.

It cannot distance itself from that growth and cannot avoid dealing with the consequences of it.

The University is, of course, acutely aware both of the social costs of growth, and of the infrastructural deficits that our town has to contend with. Investments by the University in student accommodation over the past ten years are approaching £130m (including £85m in new accommodation); a further sum of around £75m is due to be spent delivering 1,150 new units over the next three years and further accommodation will be built to support new demand as funds permit.

The University is also all too familiar with local infrastructural deficits and has itself had to contend with well-documented traffic and parking issues and restrictions. The University's own investment in transport infrastructure and on public transport subsidies has cost many millions over the past ten years, not least for the new Egerton Road Junction. It has always been known that this junction was just part of a more comprehensive solution which would need to include access to the West through a road across Blackwell Farm to the A31. That new road infrastructure would benefit the University, the Research Park, the Hospital and Guildford town itself, and the development of Blackwell Farm provides an excellent opportunity to deliver and fund those essential improvements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Local Plan marks a defining point for Guildford and its future. The University's involvement with this plan is three fold:

• As civic partner, the University benefits from and contributes to the health and prosperity of the town

• As a major employer the University and its staff are materially affected by the existing housing and infrastructure deficits

• As a land owner the University is planning to develop Blackwell Farm to support housing, infrastructure and employment

The University has submitted a formal and comprehensive response to the consultation through its planning advisors Terence O'Rourke. This letter seeks to reinforce the most material points of that submission. These are - the University is supportive of the Local Plan process and is generally supportive of the draft. A summary of the main comments is attached as an appendix to this letter.

The future development of the town and the University are closely linked and it is clear that their synergetic relationship can create even greater vitality and prosperity for the region. The University is committed to building on this relationship as the economy of the UK moves further towards the opportunities of science and innovation. For such an innovation-based future the Borough will require access to young talent, a sense of vibrancy that is attractive to young people, housing
capacity, employment land for the technology, engineering and science sectors, and the infrastructure to help to support these aspects of economic development.

As Vice-Chancellor of the University of Surrey I should like to reiterate the importance of the Local Plan to the future of the Borough and the University and would urge the Council to adopt this plan after careful redrafting of Policy H1.

The relationship between the University of Surrey and Guildford Borough Council goes back to the early 1960s when the Borough supported its own development by attracting the University of Surrey to relocate to the town.

The underpinning need for the Local Plan is clear:

- Population growth in this area is rapid and this will continue
- The UK is already in housing crisis, with the younger and future generations particularly badly affected
- The housing crisis is particularly serious in the South East and in this Borough
- The economy must be allowed to grow to deal with the country's debt burden and population growth
- To enable economic and housing growth, infrastructure deficits must be tackled
- Guildford is an integral part of the dynamic fast growth area of London and the South It cannot distance itself from that growth and cannot avoid dealing with the consequences of it.

The University is, of course, acutely aware both of the social costs of growth, and of the infrastructural deficits that our town has to contend with. Investments by the University in student accommodation over the past ten years are approaching £130m (including £85m in new accommodation); a further sum of around £75m is due to be spent delivering 1,150 new units over the next three years and further accommodation will be built to support new demand as funds permit.

The University is also all too familiar with local infrastructural deficits and has itself had to contend with well-documented traffic and parking issues and restrictions. The University's own investment in transport infrastructure and on public transport subsidies has cost many millions over the past ten years, not least for the new Egerton Road Junction. It has always been known that this junction was just part of a more comprehensive solution which would need to include access to the West through a road across Blackwell Farm to the A31. That new road infrastructure would benefit the University, the Research Park, the Hospital and Guildford town itself, and the development of Blackwell Farm provides an excellent opportunity to deliver and fund those essential improvements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

| Comment ID: | SQLP16/1315 | Respondent: | 15327073 / University of Surrey (G Q Max Lu) | Agent: | Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents |
Local Plan Document & Consultation

The Local Plan marks a defining point for Guildford and its future. The University's involvement with this plan is three fold:

- As civic partner, the University benefits from and contributes to the health and prosperity of the town
- As a major employer the University and its staff are materially affected by the existing housing and infrastructure deficits
- As a land owner the University is planning to develop Blackwell Farm to support housing, infrastructure and employment

The University has submitted a formal and comprehensive response to the consultation through its planning advisors Terence O'Rourke. This letter seeks to reinforce the most material points of that submission. These are:

1. The University is supportive of the Local Plan process and is generally supportive of the draft A summary of the main comments is attached as an appendix to this letter

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East has taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners’ views, or the costs involved in improving the infrastructure, currently out side their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
As resident home owners living in West Horsley we have reviewed the contents of the Guildford Borough Proposed Submission Local Plan: strategy and sites document and wish to register our objections with regards to: Green Belt and the Countryside (Policy P2) and Surrey Hills Area of Outstanding Natural Beauty (AONB) (Policy PI):

**OBJECTIONS/CONCERNS:**

1. We object to the village's removal from the Green Belt by insetting and extending the 2003 Local Plan settlements Area As such the Green Belt & Countryside Study is flawed.
2. We feel that West Hosley's defined Settlement Area boundaries (ref 2003 Local Plan) DO NOT need to be
3. In the Key Evidence document "Guildford Borough Economic Strategy 2013 2031" makes no case for locating large numbers of homes in West and East Horsley or neighbouring villages, therefore, why are changes been considered?
4. 13,800 new homes over the Plan Period 2013 to 2033 is too high and unsustainable in Guildford's villages. 
5. The current village size of East and West Horsley is not adequate to support an increase in homes. The development of 385 homes on the 4 proposed sites are at much higher densities than currently exist in the village settlement and will be totally out of character with the existing mix of different housing styles, historic buildings and layout of the village and, therefore, we feel this is inappropriate development within the Green Belt. The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014, identified a limited need...
for some 20 affordable homes for local people who want to remain in the village, ie for young people and for elderly people who wish to downsize to a smaller home.

6. Access to essential facilities, such as road and transport infrastructure, parking, medical facilities, schools, waste water infrastructure, sewage infrastructure would be greatly impacted if development of the size currently proposed is granted.

On top of the Local Plan proposals there are other planning applications that require consideration/objection eg. Land adjacent Cranmore Lane, including Goodhart-Rende! Community Hall and the development of Bell & Covill which all impact on the village settlement area.

Please give due consideration of our objections/concerns when reaching a decision.

The roads in Surrey are already gridlocked with traffic.

The schools in Guildford are close to bursting.

The hospital will have to service yet more patients when it is already struggling to cope with the patients they currently have.

Doctors surgeries are already over stretched.

Local resources can barely cope with the current population.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am objecting to the proposed Blackwell Farm Estate Planning on several grounds. Besides the obvious ones of blighting the exceptionally beautiful countryside where Blackwell Farm is situated, it is also on a flood plane that becomes obvious after periods of heavy rain. The rain goes down the slopes of the Hogs Back and ends up on the fields in front of Blackwell House. Completely unsuitable for construction.

Guildford has very high employment so the Government and Council would be better of investing money in the areas where employment was low and growth needed. Guildford has become very much a town where the University is taking over from the residence and the town itself in its attempts for ever further expansion and the vast profit this will give them. The wishes of its residence are of no importance to them. It is only about their profits.

The Council recived over 20,000 objections from the residence of Guildford, nearly one-third of the residence of Guildford. Just how many objections does it take for the Council to bother to listen to its residence? It is clear that the influence of the University over-rides the wishes and common sense of its residence.

However, the most serious problem is the roadways. Farnham Road and the Hogs back is at a standstill every morning and most evenings. The traffic down to the A31 is always extremely heavy. The thought of many hundreds, or thousands more vehicles on the Farnham Road is obsured. The road into Guildford is just one lane in each direction and more vehicles would not be pratical. With Guildford town centre reducing its access at Bridge Street, Walnut Tree Close possibly restricting access, everything would result in gridlock. Any access into the Blackwell Farm Estate should be taken from the A31 near the hospital roundabout and at Wood Street. The Hogs Back and Farnham Road cannot take even more vehicles.

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. Sites in East and West Horsley

I OBJECT in particular to including Sites A36-41 (East and West Horsley). This is a back-door way to create a mega-village – essentially, a soulless new dormitory town.

Whatever their merits as development sites, the 6 Horsley sites should not be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley.

Building 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the borough. It will destroy the rural character of these communities.

Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town. If the Council have justifiable reasons to transform a particular community so radically, the plan should present a case rather than putting forward site proposals as a fait accompli.

These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. For instance:

- Thames Water have advised the Council that the current wastewater network will not cope and that the foul drainage system all the way to the treatment works North of Ripley will need to be upgraded.
- Guildford Council’s Education Review says “expansion options may need to be considered for primary” education in the Horsley area within the first 5 years of the plan, but Surrey County Council have no plans to do so. The Raleigh School is already full. The private Glenesk and Cranmore schools are also at or near to full capacity. The suggestion that schools in Ripley can be used contradicts the plan’s stated intention to reduce traffic on the A3 and strategic aim that primary schools should be within walking distance.
- The plan’s Infrastructure Schedule (Appendix C) imagines an “East Horsley and West Horsley traffic management and environmental improvement scheme between 2019 and 2023 by Surrey CC” but gives no details. This scheme is just wishful thinking. The proposed housing can only harm the local environment, not “improve” it.

The density of new housing on the 6 Horsley sites is inappropriate, being greater than anywhere in the locality at present.

Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries for which the plan presents no arguments. Contrary to NPPF paragraph 79, this will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

Collectively, these 6 sites militate against NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been a success story in the Horsleys, with the creation of an amenity wood and community garden, the purchase of adjacent fields (on the eastern side of Ockham Road North) by local residents in order to preserve their open aspect, well-maintained pitches for local football and cricket clubs, public tennis courts, open space for a high-quality campsite (at Waterloo Farm) used by many foreign tourists and the approval of plans for a “Theatre in the Woods” – making West Horsley the only village in Surrey with an opera house. The open nature of West Horsley determined that a long portion of the 2012 Olympic cycle races passed through the village. This route has since been adopted by cyclists as a permanent asset, including the annual Prudential cycle race. These and future examples of “positive planning” depend on
protecting the Green Belt to maintain the openness and attractiveness of the local landscape and avoiding the urbanisation and traffic congestion that Sites A36-41 will bring.

By surrounding Waterloo Farm campsite with 120 new houses, Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable. This may accord with developers’ plans, since the site would then be vulnerable to infilling with yet more housing.

Site A40 is subject to an unacceptable flood risk from a combination of a high groundwater table and the lack of surface water run-off. This is flat, clay land on the downhill side of the Horsleys where floodwater from new development will accumulate and back up onto existing properties nearby. I can provide photographs proving how badly these fields already flood at present. These problems will only get worse with the increase in extreme weather events associated with climate change. The “appropriate mitigation” suggested in Policy A40 exists only as an abstract notion. It should not overrule the need for Green Belt “exceptional circumstances”.

Policy A40 underestimates the problems of safe access and egress. Firstly, Ockham Road North was closed for several weeks in 2014 because of flooding, and still floods regularly. Secondly, access problems are not confined to flooding and are not addressed by the proposal to extend the existing 30mph zone past the site entrance. Repeated attempts made by Ockham Road North residents to extend this zone have been turned down by the local authorities, Highways England and Surrey Police, even though data collected in 2015 show that traffic has doubled over the last 15 years and that the average speed in the 40mph section of this road is 52mph, with maximum recorded speeds of over 80mph. No traffic calming measures have so far been achieved. Additional housing will add to several hazards along this stretch of road, including:

- Its use by pedestrians, especially children (using the Raleigh and Glenesk schools and catching school buses to Guildford and Howard of Effingham), pensioners living in the string of bungalows at the northern end of the road, and visitors from the Waterloo campsite who are unfamiliar with the area.
- The existence of a narrow footpath on only one side of the road in any one spot. The layout means that walking half a mile between Green Land and East Lane requires crossing the road twice.
- The road’s increasing use by recreational cyclists (see above).
- Its winding nature, poor sight lines (especially when interrupted by summer vegetation) and dangerous, concealed driveways. Most of these were built in the 1930s. Some have been widened but many are too narrow for modern traffic. Since a deep ditch runs along most of the road, vehicles have to swing out dangerously when entering or leaving.
- The prospect of additional traffic, including 19,000 HGV movements (90 a day over a long period) if Surrey County Council approves the Drift Golf Course’s planning application to re-landscape its site using bulk waste transported from London.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
SITES1. Green Belt sites

I OBJECT to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses.” This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. This amounts to a war of attrition by the Council in conjunction with developers, since many busy residents are sick and tired of repeating the same comments to deaf ears. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. Some residents have concluded that commenting is a waste of time.

All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. Three Farms Meadow site

I OBJECT to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY D4 - Development in urban areas and inset villages

I OBJECT. This does not address any of the obvious practical issues already touched on above:

- The plan envisages that 40% of homes built will be “affordable”, but this does not provide any accommodation for low-paid workers, for example, those on the minimum wage, who cannot afford to buy so-called “affordable” homes or pay an “affordable” rent. There is a need for some expansion in social housing, especially in urban areas, where there is a greater concentration of low-paid workers such as those employed in the retail, warehousing and distribution sectors (all of which this plan aspires to expand).
- The number of homes planned in the urban area is too low. There is a glaring need for regeneration in many urban areas, but this is ignored in favour building homes on green-field sites instead. This will not address urban housing needs. It is also unsustainable, since building outside the town does disproportionate harm to road traffic, air quality and overstretched infrastructure.
- The plan envisages a large expansion of the traditional “bricks and mortar” retail sector, but this is a sector in rapid and continuous decline.
- All the stated policy aims for “inset” villages will be negated by the excessive weight of new housing development proposed which would radically change their character forever. Against this disruptive background, it is barely relevant to talk about preserving views!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

POLICY E1 - Meeting employment needs

I OBJECT because:

- The evidence base is unreliable;
- There is unclear differentiation between B class uses;
- Only high value-added business uses, contributing to a modern “knowledge economy”, are desirable, not low-grade, low-employment warehousing which is also land hungry;
- Industrial and commercial businesses must be concentrated in the urban area or existing business parks (e.g. Slyfield) not in the rural environment which the infrastructure is unable to support;
- The rural environment must support micro- or high-tech businesses, agricultural industries, and tourism, and these sectors must not be damaged by general industrial development which is inappropriate.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E2 - Location for new employment floor space

I OBJECT. It would be more sensible to confine all new office and research and development (use Class B1a and B1b) floor space to Guildford town centre. I oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Page 1596 of 2804
POLICY E4 - Surrey Research Park

I OBJECT. The Council are required by the NPPF to facilitate commercial science and technology clusters. But, as with Policies H1 and E2 above, this policy seems to be dictated more by the ambitions of Surrey University than the public interest. In an extremely tangled sentence, it says that the Research Park will be “protected for business use… in any science… that is complementary to the activities of the University of Surrey.”

This fails to distinguish adequately between the University’s public role as a state-funded, academic institution and its private, financial interest in profit-making business spin-offs. It ignores enterprises that might be commercial rivals of the University. And it fails to consider the public harm done by turning the Research Park into a larger Business Park, such as the loss of Green Belt social and environmental capital.

B1b should be the primary use class for the Research Park and applications for B1a should be resisted given the danger of diluting the core purpose and reputation of the park. The inclusion of B1c uses is inappropriate and unnecessary.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E5 - Rural economy

I OBJECT. Use of rural areas for town centre uses without applying the sequential approach is against the principles of localism that require local people to be consulted and heeded, not ignored. Villages need protecting in terms of both design and scale.

Most of the economic activities listed in 4.4.44 depend on maintaining the rural character of our villages which would be endangered by the wholesale “insetting”, boundary expansion and house building proposed in other parts of the plan. This applies also to new and projected enterprises in the Green Belt (e.g. Grange Park Opera’s Theatre in the Woods in West Horsley, which requires a protected, rustic setting to be a success, not housing estates and congested roads). Policy E5 is incompatible with the high housing numbers proposed.

Previous commitments to improved high-speed broadband and mobile phone coverage have now been diluted, despite general support. This disregards the responses from the 2014 public consultation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E8 - District centres

I OBJECT to the proposal that sites “on the edge” of District Centres should be considered for retail developments. This is another Trojan horse policy, allowing retail hubs to be vastly expanded in order to smooth the way for vast new housing estates outside in the countryside (e.g. to meet the “everyday shopping and service needs” of the roughly 1,500 people living in the 600 new homes planned for the Horsleys).

This is a case of back-to-front priorities. Expanded local retail hubs are being proposed in order to justify more housebuilding in the villages, and in a forlorn attempt to mitigate the serious traffic and infrastructure problems this will bring. The Council have no business preparing the way for new supermarkets in the Green Belt. Rural retail capacity should be left to local demand.

The policy proposes not a single measure to support existing rural shops and services that are the lifeblood of village communities, e.g. using business rates and other levers at the Council’s disposal.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E9

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E9 - Local centres

I OBJECT (for the reasons given under Policy E8 above) to the proposal for retail development adjacent to the 6 rural centres, and sites on the edge of designated centres. This is creeping urbanisation, damaging to the Green Belt and to Guildford town revival as a thriving urban hub. It will contribute to local urban decay and depopulation, just as expansion of the suburbs did to mid-20th century London.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H1 – Homes for all

I OBJECT. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set any rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to de-humanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and underused surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Overprovision is inappropriate given other constraints.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H2 – Affordable homes

I OBJECT. “Affordable” homes, under national definitions, means homes that are sold or rented at 80% of market value. Even if 70% of these are rented as proposed, the level of market prices in the South-East means (even post-Brexit) that these homes will remain well beyond most people’s means and that starter homes will not become available for local people.
In addition, the viability clause (4.2.40) means that in practice the policy could be unenforceable. Private financial viability has no place in a public policy and should be removed. It is a get-out-of-jail-free card for developers that will sacrifice countryside for no local benefit.

I question the assumptions that seem to underlie this policy: that people have a right (rather than a legitimate aspiration) to own a home; that they should be encouraged to live locally (contradicting the Government’s policy of encouraging labour mobility and development in poorer regions, where homes are cheaper anyway); that increasing local house-building will reduce overcrowding and congestion (rather than simply suck more people into the borough); and that it will stem the rise in house prices (even though 13,860 new homes will be a drop in the ocean, given that prices are determined by an infinite demand-pull from London, whose population is increasing by 100,000 a year, and by the currently low cost of capital for overseas and other buyers). The weak mechanisms proposed in the plan might influence the market in a more remote part of the UK, but not here.

This policy’s version of “affordability” is just a smokescreen for pushing through more development generally.

Building more homes in Guildford cannot increase real affordability given the overhang of the London market.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H3 – Rural Exception Homes

I OBJECT. This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix”, this can include “market” housing – i.e. normal commercial development which in Guildford usually means large executive homes. This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3321  Respondent: 15327905 / Julia Cook  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
POLICY I1 - Infrastructure and delivery

I OBJECT. Most of the borough’s infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. Yet this plan’s commitment to building housing estates across the Guildford countryside will mean either major infrastructure investment that no-one is prepared to pay for or else a catastrophic and simultaneous collapse in transport, educational, medical, energy, water and communications services.

The plan targets greenfield sites – requiring heavy infrastructure investment – in order to generate CIL income necessary to meet an infrastructure shortfall that is already serious. This is not sensible. The current draft CIL scale also encourages development on greenfield sites rather than brownfield.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing infrastructure needs in this area is inadequate, identifying only the tip of an iceberg of existing congestion. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that involve demolishing property and road-widening in residential areas to solve the resultant congestion. The A3 improvements are not guaranteed to take place but they are being used to justify removing large areas from the Green Belt before detailed traffic assessments have taken place. These detailed investigations are being deferred until the planning application stage and will be left to developers to prepare. If a site then proves to be unsustainable its Green Belt protection will have been lost for no reason and unsuitable development will take place by a more insidious process.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritising greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognising this as a key issue, the plan is based on a wing and a prayer.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY I2 - Supporting the Department of Transport’s “Road Investment Strategy”

I OBJECT. This policy is too vague and optimistic. Decisions by Highways England on improving the strategic road network (the M25 and A3) are still years off. The Council have suggested a very expensive tunnel under Guildford, but this is no more than a dream. Even if Highways England accepted this (which is highly unlikely in the post-Brexit public spending climate) it would not be built until the end of the plan period at the earliest. Other, less expensive A3 improvements, and changes to the Junction 10/Heathrow stretch of the M25, will also take years to agree and complete.

The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is foolhardy. Surrey is the most congested county in England, with 683 people per square kilometre, compared with an English average of 413. This policy will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone). This is a major development constraint that should have been applied to the OAN before this consultation, and not left up in the air.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY I3 - Sustainable transport for new developments

I OBJECT. This is another vaguely aspirational policy, based on wishful thinking and not grounded in the practical realities of daily life. It consists of a standard, box-ticking list of local government measures unrelated to the specifics of the plan. Like infrastructure, transport appears to be an afterthought; the policy fails in its essential job of guiding planning decisions, since it assumes development of any kind can be supported by sustainable transport.

The sustainability of the dormitory settlements which the Council want built across the countryside depends on a general “modal shift” from private car use to walking, cycling and public transport. This is unrealistic. The proposed sites are often miles away from the nearest railway station. Bus services even in the largest villages are almost non-existent – just one bus to and from Guildford each day in the Horsleys and none at weekends. Since bus services depend on profitability, they cannot be expanded and the Council are not proposing to subsidise new ones. Rural buses are too slow anyway for busy people. Most rural roads in the borough are narrow, winding, hilly, potholed, muddy and unlit. Many flood badly and have no footpaths.

The desired modal shift would require a comprehensive co-ordination of bus and train timetables with services every few minutes, seven days a week, to stops within walking distance of every home in the borough. This kind of integrated public transport system has been achieved in Switzerland, for instance, but only at huge public cost and thanks to a political consensus supporting state ownership of trains, buses and the post office, which delivers rural passengers as well as mail. There is absolutely no chance of this in the UK.

The vast majority of the borough’s residents are not, in practice, able to cycle. This includes children, the elderly, commuters who have to look smart, the infirm, the unfit and people carrying goods or shopping of any kind. Dependence
on walking and cycling discriminates against these groups, which include some of the most vulnerable members of the community. It is socially unjust.

One in two working people in Guildford commute for up to 3 hours a day. They will not leave their cars for even part of their journey if it means longer travel times.

Park-and-rides are a welcome part of the transport mix but are too slow for commuters and others on a tight schedule. Well-off pensioners seem to be the main beneficiaries. For an adult couple going shopping it is still cheaper to park in town.

Forget about water buses. The Wey is too narrow and, with a river speed limit of 4mph, boats are too slow for anything but recreation. Except on the tideway, not even the Thames has such services.

The addition of two new stations appears attractive but will slow down train journeys, which are already slower than at any time since the 1930s. Knock-on effects on localities where the new stations are built have not been worked out or presented.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P1 – Surrey Hills Area of Outstanding Natural Beauty

I OBJECT. This policy weakens existing protection when it should strengthen it. It is dependent on the Surrey Hills Management Plan. The latter welcomes housing development. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3309  Respondent: 15327905 / Julia Cook  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY P2 – Green Belt

I OBJECT. This policy states, “the general extent of the Green Belt has been retained.” This is a lie.

The policy wording is tepid in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. It is an inalienable public good. Once gone it is gone forever. It is not the Council’s to give away.

Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

- Agricultural production
- Rural leisure and tourism amenities
- Water catchment
- Flood control
- Biodiversity
- Natural heritage
- A carbon sink for air pollution
- Room for public facilities such as parks and burial grounds
- Profitable film locations (e.g. Shere)
- Future economic potential such as mineral extraction (even fracking)
- Natural beauty, landmarks, open space, rural views and sight lines
- Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)

As a matter of law, morality and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations.

It is disreputable to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.

I am not opposed to appropriate development in the Green Belt and recently supported a major planning application in my own village. But I fail to see why a system of fair burden-sharing of new development cannot be applied to the borough’s existing settlements in proportion to their size. This alternative would minimise the strain on infrastructure and maximise the chances of retaining the character of each settlement through gradual growth. It is reasonable to ask urban Guildford, with x times the population of semi-rural East Horsley for instance, to accommodate x times the number of new homes over the plan period. Parish councils could be asked, and will no doubt be willing, to propose where their quota of houses should go. Most rural residents are reasonable people who, if not alienated by top-down planners, will support realistic numbers of new houses in their neighbourhoods. Unfortunately, this democratic, bottom-up approach has not been attempted.

Instead, while developers flip and land-bank urban sites as a financial speculation, this plan will dump most new development on greenfield sites where building costs are lower, covering the Green Belt with dozens of housing estates that few residents want. 8,086 new houses are planned for the Green Belt but only 1,135 for Guildford urban area. This is disruptive, socially inequitable and unnecessary. It will not only destroy countryside but will also delay and disincentivise much-needed urban regeneration. The remarkable revival and repopulation of central London shows that building dormitory satellite settlements is an out-of-date approach to planning.

I particularly protest at the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. I am deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all
too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development.

I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors. To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need (especially post-Brexit) and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy P4 – Flood risk and water source protection zones

I OBJECT. Urban development on existing hardstanding would not create additional flood risk, especially where there is scope for improved flood resistance measures to be included in the design. Sites such as the Arriva bus depot, on the River Wey bank, are potential high-value brownfield sites that would not be available for housing if this policy is implemented. It is not the footprint of existing buildings that should limit future development, but the extent of existing hardstanding. Tarmac and concrete do not act as functional floodplain, and some land with hard standing close to the river, within the town centre and within easy walking distance of the railway station, provides an excellent opportunity for real urban regeneration that could protect the surrounding countryside.

Policy P5 – Flood risk and water source protection zones

I OBJECT. Urban development on existing hardstanding would not create additional flood risk, especially where there is scope for improved flood resistance measures to be included in the design. Sites such as the Arriva bus depot, on the River Wey bank, are potential high-value brownfield sites that would not be available for housing if this policy is implemented. It is not the footprint of existing buildings that should limit future development, but the extent of existing hardstanding. Tarmac and concrete do not act as functional floodplain, and some land with hard standing close to the river, within the town centre and within easy walking distance of the railway station, provides an excellent opportunity for real urban regeneration that could protect the surrounding countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY P5 - Thames Basin Heath Special Protection Areas

I OBJECT. This policy is weak. The mitigation (cash compensation) offered for development in the special protection area is so small as to be meaningless.

SANG (Suitable Alternative Natural Greenspace) is not beneficial since the sites identified or targeted are already green space. This is just using agricultural or wooded land as recreation land in order to justify building on other green spaces nearby. There is no actual increase in open space or environmental protection; instead, it is a ploy designed to permit building on otherwise protected areas. SANG – in part used to prevent dogs and cats attacking nesting birds – must also ensure that it is not using land which is adjacent to the Special Protection Areas.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S1 – Presumption in favour of sustainable development

I OBJECT. The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” Standing at the head of the draft plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The promise “to secure development that secures the economic, social and environmental conditions in the area” omits to recognise that economic growth, social justice and environmental protection often conflict. It does not say how each element is to be weighted or conflicts resolved. As a practical guide to the tough choices Councillors will face, it is useless. Under this policy, any development will qualify as “sustainable”, thereby failing to apply the NPPF’s most important guideline.

The most gaping hole in Policy S1 is the Green Belt. As an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity, the Green Belt is a living example of sustainable development in practice. It is the envy of the world. Policy S1 should commit to uphold Green Belt boundaries and protections, setting at least one clear boundary to planning decisions. The plan’s contempt for Green Belt constraints is amply demonstrated in later policies.

The commitment to approve planning applications “wherever possible” and “without delay” reveals this draft plan’s pro-development bias. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17. In my view Policy S1 is a non-policy.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S2 –Borough Wide Strategy

I OBJECT. I have 5 objections to the proposal to build 13,860 new homes:

1. The number is based on pre-Brexit projections for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

2. The number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half the people who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent districts of Rushmoor and Mole Valley, minutes from Guildford town, are outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere. Unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and is part of a far wider and more complex housing market.

3. These concerns have been raised since 2014 but the Council have failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so the housing numbers derived from it are unreliable. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county (none in Mole Valley, for instance). This highly lopsided distribution is unexplained.

4. The figure of 13,860 new homes is unsubstantiated. It has not been scrutinised by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by commercial sub-contractor used in preparing the SHMA. The Council say we should trust the contractors’ model because it is used by a large number of other local authorities. Wide usage, however, does not confer objectivity. Guildford’s OAN would fail the basic transparency test even if the methodology used were a universally admired ‘gold standard’. But it is not: it belongs to consultants whose website openly proclaim their pro-development agenda, provoking reasonable suspicion that the figures are inflated. External experts and members of the public have provided detailed critiques of the model. Its most fatal flaw, however, is that it has not been disclosed – not even to the authors of the plan, who have taken it on trust. This is irrational and unsound.

5. The status of the 13,860 figure is ambiguous. The plan fails to set a Housing Target of new homes to be built, or explain how this relates to the “Objectively Assessed Number” (OAN) for housing need. Elsewhere, the Council have said that the two are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted, but in the same breath say that infrastructure or other constraints may in due course affect deliverability. Despite the NPPF, the plan fails to address these constraints. In any case, the number of homes proposed, plus existing planning permission, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a Housing Target that takes normal constraints and adjustments credibly into account, and which leaves the Council to set one at any level without further consultation. Even if the OAN were not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.
It is irrational to embark on a radical transformation of the borough without a clear Housing Target. Most of Guildford borough is theoretically protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the existing number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford Borough Council’s Proposed Submission Local Plan: strategy and sites

My wife and I and our two children have lived in East Horsley since 2001 and we object to the proposals in the new Guildford local plan for the following reasons:

-We do not want the Horsleys to be removed from the Green Belt. The Green Belt protects our living environment and there is no justification to remove it;

-We do not want the Horsley settlement boundaries to be extended. We want to retain the existing village atmosphere and lifestyle;

-We do not want the development of over 2000 houses on the former Wisley airfield. The impact on our village would be enormous and make life intolerable; and,

-The local infrastructure is overloaded. It is difficult to get a medical appointment and to find a parking space in the village centre. The local schools are over-subscribed and the roads congested. The Local Plan would considerably worsen matters.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East has taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners’ views, or the costs involved in improving the infrastructure, currently out side their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
My objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield now known as Three Farm Meadows - Allocation A35 - the phased development of a new settlement of up to 2100 dwellings.

I very strongly object to the draft local plan for many reasons - and I wonder if any of the Councillors have really considered this proposal, and many others in the neighbourhood - over 600 houses in Horsleys, 400 in Burnt Common, 2000 houses on Gosden Hill Farm (Burpham) plus a number of smaller sites in nearby villages. These add up to in excess of 5000 new dwellings in this neighbourhood.

As far as I am aware no Councillor or Planning Officer has ever been to or considered the enormous effect that this would have, not only on the residents in these areas but many other people from far and wide. I wonder if the Councillors or Planning Officers even know where these places are and, possibly as they do not live near the area affected, they feel that they are correct in putting these plans forward (NIM BY/SM).

If these building projects were carried out then there would be total traffic gridlock not only in the local area but on the M25 and A3 and, of course on every one of the smaller roads in Surrey and the surrounding Counties.

Amongst my other objections to the draft local plan, where no consideration has been given, are:

- There are not sufficient Transport links (railways, buses or roads)
- There are not sufficient Schools/Academies to educate possibly up to 10,000 children in the area. There are insufficient shopping and parking facilities
- The roads in the area cannot take any increase in traffic as this contribute to grave danger to all users (car drivers, pedestrians and cyclists, etc)
- The air pollution is already at a high level and any increase caused would be well in excess of the legal level.
- I was under the impression that the Councillors had previously stated in their Manifesto that "the Green belt is safe" it now appears that these words were totally meaningless and untrustworthy.
- Councillors and planning officials have no right nor lawful reason to turn prime Greenfield land into an enormous urban sprawl/slum stretching from Greater London to Guildford and probably further out.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: PSLPA16/1006    Respondent: 15328257 / Annabel Purcell    Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send Marsh/Burnt Common

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I write to object to Send Village being removed from the Green Belt. The Green Belt was intended to be permanent, as required by the National Planning Framework, and there are no special circumstances to justify abandoning it. Send's Green Belt provides an essential buffer stopping Woking and Guildford becoming one conurbation. Local council lots and central government gave a clear election promise to protect the Green Belt and this reneges on it. Developers will be quick to take advantage and here will be nothing to stop them.

I object to building 45 houses at Clockbarn Nursery because of inadequate access and traffic volume. Tannery Lane is far too narrow and twisty to take any more traffic. The junction with Send Road is already very hazardous for vehicles trying to join the main road. The lane cannot take any more, the already very dangerous junction will be become much worse.

I object to building 400 houses and 7000sq metres of industrial space at Garlick's Arch, opposite Send Marsh Road. The site floods and is covered in ancient woodland. The industrial space is not needed but if it were should be at Slyfield. Guildford's housing requirements have been shown to be grossly exaggerated and they have refused to disclose their calculations. With proper use of brownfield sites this Green Belt site is not needed.

I object to the development of 40 houses and 2 traveller's pitches at Send Hill. It is an inappropriate location because the narrow width single access country road provides insufficient access. The subsoil of the proposed site contains documents unsafe landfill waste registered at GBC. Any development there would spoil a high amenity area set in beautiful countryside.

I object to a new interchange with the A3 at Burnt Common because Send would have to take traffic from the proposed 2000 new houses at Wisley Airfield, 2000 houses at Gosden Hill, Burpham and 1850 at Blackwell Farm. Much of this traffic to and from the A3, M25, Woking and Guildford would go through Send. Send Road, which is already overloaded would become gridlocked. Noise and pollution levels, which are already excessive at the back of our property would worsen. This must be avoided.

I also hereby request that my comments are shown to the Planning Inspector that will make the ultimate decision noting my objection.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We have recently moved to Horsley from neighbouring Effingham and we are frankly shocked to see the proposals for housing throughout the whole of our area.

Whilst we understand that there is a need for housing this plan seems excessive and will effectively destroy these old villages just creating an urban sprawl.

There also seems no forethought regarding infrastructure. At the moment there is only 1 doctors surgery which supports both the Horsleys and Effingham, (always very busy and difficult now to get an appointment) and only 1 secondary school which again supports over 2000 pupils and despite its good reputation is way too large to give proper pastoral care to
individual pupils. All these extra homes puts increased pressure on services already full to capacity. The council can't seem to cope with what we already live with. The roads are in a poor state and verges and common land are not properly or regularly maintained.

We are totally against removing green belt.

Page 1616 of 2804
I am writing to object to the removal of green belt protection for Chilworth and other villages. Chilworth has already had more than its fair share of new houses built in recent years, many on business promises bought by developers. The roads here are already overloaded especially at peak times the only people to benefit by more houses are the landowners and developers local people will suffer longer delays on the roads, longer doctors waiting times etc the list goes on. This green belt removal to enable the proposed development to get the green light at Ham hatch Woodyard farm.

Why is it the same villages that have to be built over, its time the more efficient villages live Blockheath who have not had any new houses built for years bare some of the brunt we in Chilworth, Shalford, Peasmarsh etc have to put up with it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1527  Respondent: 15328705 / Robin Jones  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

I object to the Normandy/Flexford housing development plan put forward by Taylor/Wimpy. They are a national housing development company with one business objective -to build houses. They have no interest in Normandy as a village. They have no interest in our rural character, they only want to build houses in any location which is commercially viable -and that is how they see Normandy.

I am saddened that GBC have been lured into serious consideration of the plan. Surely, the important debate in council must relate to the size and type of selective developments which would naturally fit into the existing village landscape and so contribute to the overall housing numbers required in West Surrey.

Please, please GBC -think again. Consider what is best for the village of Normandy and not the thought that a single large plan in one area by one developer will save a lot of council time and investment. Please consider what is right -not what is easy.

May I add one final thought for consideration. A 4000 house development is already under way in the Aldershot area. There will obviously be developments in Guildford and Waverley. If we add up all the new housing numbers which have been quoted do they not already far exceed the number requested by government. I have a belief that they do which points to one simple fact - 1100 new houses are not needed in Normandy so let us leave the village and its surrounding landscape as a natural "green belt" buffer zone between the invading urban sprawl to east and west.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

The revised local plan shows a practical evaluation of the needs for building development in the Guildford area and the best possible areas for such development. The exclusion of sites A46 and A47 in the village of Normandy has my full support. The infrastructure of Normandy, with its C and D roads is at capacity. Major investment in bridge changes; road widening and new pavements; new roundabouts and traffic lights; improved waste and surface water disposal; a new sewage disposal system; better street lighting and a larger doctor's surgery must all be dealt with, in part or in total before any new developments could be considered. When these important investments have been made I would support, as would many villagers, small developments in selected areas, but we could never support the mass development of a large housing complex on green belt land which would destroy forever a beautiful part of rural England.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

In West Horsley, the facilities that are available i.e limited public transport, schooling and as I understand, no shops available (from September 2016) would not be able to sustain the number of houses that are proposed. Furthermore, it seems that there are no plans available as yet for the infrastructure- drainage is inadequate now on the roads in the village.

In East Horsley, again there is inadequate parking now for the use of the shops and station, and the extra houses in both villages, will make it impossible to make appointments at an already very busy Medical Centre.

Finally, how will our sewage and waste water system cope?

None of the points seem to have been considered or explained.

I therefore strongly object to this present plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
We have the following objections to Current Local Plan as detailed below and wish our views are taken note of. It is relevant that these views are shared by the majority of Send residents and we have not attempted to modify the comments already made by others, as we concur with these views entirely:

1. **WE OBJECT to Send Village being removed from the Green Belt.** The Green Belt was intended to be permanent, as required by the National Planning Policy Framework and there are no special circumstances to justify abandoning it. Sends Green Belt provides an essential buffer stopping Woking and Guildford becoming one conurbation. Local councillors and central government gave a clear election promise to protect the Green Belt and this reneges on it. Developers will be quick to take advantage and there will be nothing to stop them.

2. **WE OBJECT to building 45 houses at Clockbarn Nursery** because of inadequate access and traffic volume. Tannery Lane is far too narrow and twisty to take any more traffic. The junction with Send Road is already very hazardous for vehicles trying to join the main road. Planning permission has previously been given for 64 apartments at the Tannery and for building the Marina, both of which will generate additional heavy traffic. The lane cannot take any more. The junction is too dangerous already and will be made much worse.

3. **WE OBJECT to building 400 houses and 7000 sq metres of industrial space at Garlick's Arch, opposite Send Marsh Road.** The site floods and is covered by ancient woodland. The industrial space is not needed but if it were it should be at Slyfield. Guildford's housing requirements have been shown to be grossly exaggerated and they have refused to disclose their calculations. With proper use of Brownfield sites this Green Belt site is not needed.

4. **WE OBJECT to the development of 40 houses and 2 traveller’s pitches at Send Hill.** It is an inappropriate location because the narrow Width single access country road provides insufficient access. The subsoil of the proposed site contains documented unsafe landfill waste registered at GBC. Any development there would spoil a high amenity area set in beautiful countryside and furthermore, any visit to Send Hill by GBC during the times that children are collected from school by their parents will reveal that traffic chaos is already well developed.

5. **We OBJECT to a new interchange with the A3 at Burnt Common** because Send would have to take traffic from the proposed 2000 new houses at Wisley Airfield, 2000 houses at Gosden Hill, Burpham and 1850 at Blackwell Farm?. Much of this traffic to and fro the A3, M25, Woking and Guildford would go through Send. Send Road, which is already overloaded, would become gridlocked. Noise and pollution levels, already at excessive levels, would worsen. This must be avoided.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object to any building on Green Belt Land as this was, initially, created to prevent this type of gross urbanization.

I object to the proposed building on Gosden Hill Farm where the Green Belt was designated to protect West Clandon.

I object to Brown Field Land being used for unnecessary retail expansion when there are empty shops in the High Street.

For future generations, it is essential to keep these open green spaces with less, rather than more pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

I object to the proposed building on Green Belt Land as this was created to prevent the spread of housing that linked up the small rural communities turning them into an urban sprawl.

I object to the proposed building on Gosden Hill Farm where the Green Belt was designated to protect West Clandon as above.

I object to Brown Field Land being used for unnecessary retail expansion when there are empty shops in the High Street.

I object to the scale of the proposed building in the borough as the infrastructure will not support this level of development.

I object to any reduction in Green Belt land which is vital for children to have an understanding of nature and how this affects mankind.

For future generations, it is essential to keep these open green spaces with less, rather than more pollution.
I object to Policy 43. Land at Garlicks Arch.

There is no proven need for additional 400 new houses on top of the 13,860 already proposed by the borough.

The Surgery at send cannot cope, the local schools cannot cope. The entire plan is ill conceived.

Summary.

Your plans have blighted my family home for years, the plan originally put a development at the back of my house, and now your new plans have changed it to the development at the front of my family home. Therefore having a huge detrimental effect on the value, and destroying our views of the farmland at the front. Therefore your poorly thought through local plan have provided uncertainty and anxiety to myself and my family.

As no speed restrictions, speed camera or traffic calming measures on the blind corner heading towards send over the A3 is a accident waiting to happen. As it is we can only turn left when leaving our home and even then it is very dangerous.

You have not addressed the infrastructure requirements such as schools, health centres and hospital capacity, in these proposals, for new homes.

Therefore this plan needs to be thought through and new alternative proposals need to be looked at.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the creation of the new north and southbound slip roads to and from the A3.

I live on Clandon Road, and worked in and around Ripley since the late 80’s. The major bottle neck is Send Village, which this plan will on exacerbate.

The danger is the off slip going North at Burnt Common that again this will exacerbate with more people using it.

I went to the Public Consultation on Tuesday 21 June 2016, at East Horsley Village Hall between 12noon and 8pm. I met a gentleman called Martin from Highways

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I am not often motivated to write, but I have seldom viewed such poorly thought through local plan.

I object to the erosion of the Green Belt.

Why bother to spend all the money and time constructing the Green Belt in the first place, if you can just remove what you wish to at will.

It is very sad and ill conceived that the Borough wishes to remove any Surrey Villages from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the Limited Consultation Period.

I find it disingenuous to the last minute inclusion of new sites i.e. Garlick’s Arch with less than two weeks notice, just because it would appear that the developer has offered a new on and off slip to the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43, Land at Garlicks Arch.

• There is no proven need for additional 400 new houses on top of the 13,860 already proposed by the borough.
• The Health Surgery at send cannot cope, the local schools cannot cope.. The entire plan is ill conceived.
• It continues to ignore tens of thousands of previous objections.
• There is no proven demand for Travelling Show people plots in this location.
• There are no “exceptional circumstances” exist for removing this site from the greenbelt.
• The land is subject to frequent flooding and is currently flood Zone 2 allocation.
• It will join the villages of Send and Ripley and defeat one of the intended purposes of the greenbelt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to SHMA figure of 693 homes per annum. The methodology determining the GBC SHMA figure seems to be cloaked in secrecy in spite of many requests from residents in the borough to examine the evidence base. We certainly know that the figure of 693 pa is artificially inflated due to the inclusion of many numbers of Surrey University and Law College students, many of whom are foreign students with absolutely no intention of remaining in the UK let alone within our borough. The inaccuracy of the SHMA assessment is a major concern as there is no transparency allowing for any investigation of modelling used. This is not democratic and indeed is
one of the most heatedly discussed aspects of this Local Plan. More importantly, GBC have an absolute ability to massively reduce any SHMA figure by implementing the NPPF guidelines regarding protection of our Greenbelt, AONB and Thames Basin Heath SPA. GBC have conspicuously refused to address this issue, whereas many other Borough Councils have utilised these planning constraints to significantly reduce their own SHMA. Why is GBC failing to protect our Greenbelt, wildlife and beautiful landscape? In addition to this, surely we must reconsider all housing needs assessment given the recent BREXIT referendum, the current instability of the UK politically and the absolute certainty that mass net migration from Europe into the South East of England will no longer be such a huge issue, with the resulting decrease in demand for additional housing in the South East.

Why is GBC failing to protect our Greenbelt, wildlife and beautiful landscape? In addition to this, surely we must reconsider all housing needs assessment given the recent BREXIT referendum, the current instability of the UK politically and the absolute certainty that mass net migration from Europe into the South East of England will no longer be such a huge issue, with the resulting decrease in demand for additional housing in the South East.

Answer (if comment is on questions 1-7 of the questionnaire): ()
RE: OBJECTION to Guildford Borough Council 2016 Revised Draft Local Plan

I am writing to object to the revised draft 2016 Local Plan for the reasons listed below:

1. I OBJECT to Policy A43 Garlick's Arch as this was a late substitution for an alternative site known as Land at Burnt Common (also included in the 2014 Draft Local Plan). There was no consultation on this substitution, following an emergency meeting of the Executive on 11th May 2016. This does not comply with Regulation 18 of the Planning and Compulsory Purchase Act 2004 relating to the Statement of Community Involvement, as there has not been any community information or consultation regarding Garlick's Arch site. In addition, this site substitution also remained as the same policy number ie A43, which has led to further confusion within the local community. The original Policy A43 site of brownfield land at Burnt Common is already designated as industrial and indeed the owners of this site have already spent at least two years developing planning proposals with GBC to include 100 homes in addition to a fully developed industrial site, with ample space to accommodate at least an additional 7000 sq m. The Garlick's Arch site however is not suitable for development given that it is designated as Green Belt (policy P2). The Local Plan clearly states a preference for best utilising previously developed land. Why then has a brownfield site been removed and replaced with a Greenbelt site?

| 1. I OBJECT to Policy A43a provision of northbound and southbound on/off ramps to/from A3 at Burnt Common. Again there has been no Regulation 18 consultation on this policy site. The whole area surrounding the new A3 access will be a traffic congestion hotspot, with no possibility of relief or mitigation due to the narrow roads leading to Burnt Common from Clandon, Horsleys, Send, Ripley and Woking. These narrow roads cannot be improved, many are small country lanes, and most are already massively congested at peak times. In addition, the A3 itself is always hugely congested in both directions, from M25 J10 to beyond the A3/A31 junction south of Guildford. Highways England already refer to this stretch of the A3 as being at peak capacity, without the addition of thousands of extra cars, as a result of any or all of the strategic sites in the Local Plan being developed. The addition of an additional two way ramp at Burnt Common will not improve this situation and will most likely cause even further backlog on the small local road network. |

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. I OBJECT to the traffic congestion caused by the ribbon of development along the A3, specifically from Policy A35 Wisley Airfield, Policy A43 Garlick's Arch, Policy A25 Gosden Hill and Policy A26 Blackwell Farm (policy I2). Highways England do not have any provision to even examine the A3 until at least 2020, therefore it is entirely possible that GBC will undertake massive housing construction before any road infrastructure has even been discussed, let alone planned and built. This is completely unacceptable for the many thousands of existing residents who will be impacted.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to all insetting of villages from the Greenbelt. It is my fundamental belief that the Metropolitan Greenbelt serves a highly significant role in the preservation of open space and should be rigorously protected for future generations. In particular I refer to my objection of the insetting of the beautiful rural villages of Ripley, West Horsley, East Horsley, Send Marsh/Burnt Common, Chilworth, Shalford, Albury, Shere and Peaslake. It is indefensible that these areas of great beauty in the Surrey Hills should lose their Greenbelt status and there is no clear demonstration of exceptional circumstance to allow this to happen. As a resident of Guildford borough for over 45 years, I can attest to the huge numbers of visitors who regularly walk, ramble and cycle in the countryside of our borough. Many of these visitors are from London and the suburbs and who need fresh air and unrestricted countryside views as an antidote to urban living. Ripley is on the Olympic cycle route and the hugely popular Ride London route. There are thousands of cyclists utilising our country lanes every weekend, enjoying the wonderful countryside. Surely Londoners deserve an escape route too, just an hour away from the confines of the metropolis?

1. I OBJECT to Policy P4 development in areas at risk from flooding. As a resident of Kiln Lane, on the edge of site A43 Garlick's Arch, I can categorically confirm that this site floods EVERY YEAR and not just during the winter months. The stream that runs through the middle of this site into the River Wey is categorised as Flood Zone 3 according to the Environment Agency flood map website. The soil is very heavy clay (Kiln Lane historically housed a brick kilns manufacturing business from locally sourced clay) which further adds to the flooding problems and the land remains water-logged for many weeks following any significant rainfall. GBC have assessed the site as predominantly zone 1, which is clearly inaccurate and therefore the SFRA cannot be deemed useable or fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I OBJECT to the disproportionate amount of development in one area of the borough (Policy S2). The strategic sites of A43 Garlick's Arch, site A25 Gosden Hill and site A35 Wisley Airfield are all within a 5 mile distance and represent over 35% of all housing allocated in the borough, essentially creating coalescence of all local villages. The individual identities of each village will be lost. We are NOT urban villages but are rural villages with thriving engaged local communities, each with their own individual character and historical identity. I also believe that Ripley has already grown significantly over the past 5 years, with an approximate 8% increase in housing. However, all these have been small developments of generally less than 10 units and as such, have been able to successfully merge and be absorbed into the existing community. This will not be the case with the huge numbers of homes proposed on the 3 strategic sites mentioned.

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I OBJECT to the way in which this consultation process has been processed by GBC. Many residents remain unaware that such significant proposals are afoot, which will have a 15 year affect on people's lives. If you are not a regular reader of the Surrey Advertiser, you would probably not know anything about the Local Plan. Indeed, the majority of information provided to residents of the borough has been provided by either parish councils or concerned local residents groups such as Wisley Action Group. Save Send Action Group. Ripley Action Group. CPRE and other bodies. This is not acceptable in a democratic society, particularly in view of the fact that the Conservative borough councillors had an election promise to protect the Greenbelt which they fundamentally appear to be totally disregarding. In essence, residents are trusting GBC to uphold their election promises, without being given the information regarding the revised Local Plan. I do not accept that local plan documents held in a small handful of local libraries constitutes appropriate consultation. I have attended many local meetings in Clandon, Send, Merrow and Ripley (all of which have been organised by local bodies, NOT GBC) held to discuss the proposals in the 2016 Local Plan. I can honestly say that there is whole hearted disapproval from every aspect of each community.

I object to school children having to spend 30-45 mins in a traffic jam before arriving at school.

I object to more houses in Send because of the lack of infrastructure. There are already local children who cannot get places in the village schools.

I object to the stress this extra housing would put on our excellent village medical centre. It is already a lottery as to whether an appointment can be made when needed.

I request confirmation that this protest has been received, registered and read by the planning inspector. I would also like a reply to my two questions. I have sent my objections to Sir Paul Beresford MP.

I object to the fact that GBC has made considerable changes to their April 2016 proposals without full consultation.

Questions:
1) As there is a freedom of information act I request that the minutes of the planning meeting is published in the Surrey Advertiser. I also request that the planning officers and councillors publish the way they have voted. The electorate have a right to know which of their councillors do not care about the lives of the people in their borough.

Will this be done? If not why not?

2) When the village of Shalford was disrupted by the improvements to the A3 compensation was paid to the residents. How much has been put aside for the compensation to the residents of Send Marsh and Burnt Common who will have their quality of life reduced by the increase in noise and pollution?

I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East has taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners’ views, or the costs involved in improving the infrastructure, currently out side their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more that double the figure used in previous plans. It also fails to take into account the new situation due to Brexit, a factor which makes the local draft now appear hopelessly out of date.

Objections to the continued inclusion in the Guildford Borough Council Proposed Local Plan (June 2016) of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation the phased development of a new settlement of up to 2100 dwellings

I object to the inclusion of FWA/TFM in the draft Local Plan for the following key reasons:

1. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt FWA/TFM is prime green belt, and was given to the country for an airfield as part of the war effort, based on the promise that the land would be returned to the community after the need for an airfield had passed. This promise has been broken, and no effort has been made to see whether there is a moral or equitable duty to return this land to the existing community.

2. I object to the disproportionate allocation of housing in this particular part of the Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

3. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties The plan calls for a village of 159 residences (with narrow lanes, no street lights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

4. I object to the detrimental impact on transport, local roads and road I specifically object to:
   a) The assertion that the development will result in a meaningful shift to cycling and The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b) The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c) The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d) The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   e) The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   f) The lack of suitable public transport The local rail stations of Effingham Junction and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

5. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCl).

6. I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation. In particular, two schools should not be planned in the FWA/TFM area which is known to have poor air quality, which will only be exacerbated by the planned development.
7. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

8. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Authority. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 9th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Those reasons remain valid, and there are no adequate ways to overcome them.

9. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/5164  Respondent: 15330017 / Honor Grear  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   ◦ The associated traffic increase from the RHS has not been taken into account.
   ◦ The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
16. I object to the removal of additional 3.1 ha from the green belt without any justification
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.
26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose. Indeed, in ordinary words and common language, I believe that this draft local plan, and these revisions, in totality, but in particular relating to Three Farm Meadows are “bonkers”!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Submission Local Plan: Strategy and Sites (June 2016) and to the continued inclusion on the plan of the former Wisley Airfield, now known as Three Farm Meadows (TFM) - Allocation A35 or the phased development of a new settlement of 2,068 dwellings.

Although I live outside the borough I use the borough for visiting friends who do live there. I object to the Local Plan for the following key reasons:

1. I object to the threat the local plan poses to the historic rural village of Ockham and the blight on properties there.

1. I object to the detrimental impact the proposed development of over 2,000 dwellings will have on a village with 159-residences. In particular this development and the associated increase in traffic will have a very detrimental impact on the environment, road safety and congestion.

1. I object to a plan which proposes that over 70% of new houses are built on land designated as Green Belt land in contrast to election manifesto promises made to the electorate.

I trust that these objections to the Local Plan will be fully considered and that the plans for development on the former Wisley Airfield (TFM) allocation A35 are now removed from the local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1546  Respondent: 15330945 / Richard Hart  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As I live close to the Gosden Hill Farm proposals, I am very concerned about the increased traffic movement through Burpham, especially the large Park and Ride area at the proposed new roundabout with only access off and onto the A3 south carriageway. Surely this junction should now be a 4 way route to the South as well as a route North to take vehicles away from Guildford’s Ladymead road and London Road Burpham.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/3400  Respondent: 15330945 / Richard Hart  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
The proposals to site a new railway station in Merrow will also increase the traffic through the existing congested New Inn Lane and know doubt increase traffic flow down Merrow Lane from the new Gosden Hill estate.

All of these points are the reasons why I object to the current Local Plan and I hope that a review of the proposals will be made.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the 2016 Draft Local Plan, as at last I have been able to view some of the vital elements of the proposals in the document. The main points that I am concerned over is the mass of housing that is proposed in the Green Belts north of Guildford. Each time I read in the local paper on the possible new areas of housing, it states an ever increasing number of new developments allocated in green areas and do not seem to state any proposals south of Guildford. What happened to the original Council concept that you should first build on Brown Field sites and nearer the town centre if possible. All of this development will bring increased pollution not to mention traffic congestion on our local roads especially the A3. No sensible timing has been stated to the building of any new improvements to this busy trunk road prior to the building of the new roads and houses near-by. What about the upgrading of utility services to serve the new housing, which will no doubt take months to sort out and may effect any major A3 road improvements that are proposed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
REMOVAL OF AREAS FROM THE GREEN BELT

The Green Belt was granted to areas to prevent urban sprawl, prevent widespread development, further air pollution and flooding whilst providing areas of relaxation for those who live in the cities. The proposed Local Plan allows for large numbers of new homes and other facilities to be developed in Green Belt areas. The National Planning Policy Framework states that such a development requires exceptional circumstances but the Local Plan does not disclose such needs.

Erosion of the Green Belt as set out in the Local Plan will lead to further urbanisation in the future thus adding even further to the development already proposed.

No changes to the Green Belt should be made unless there are exceptional circumstances.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

SCALE OF DEVELOPMENT

The Local Plan housing numbers are too high. Combining East and West Horsley together with the new town at the former Wisley Airfield and those at Ripley would completely urbanise the area between the A3 and the A246. In addition, the Local Plan seems to have made no allowance for the infrastructure required to support this massive development.

At present our drains and water supply are challenged at various times during the year, further development would cause failures within both systems. The volume of traffic using the local roads has increased substantially in the past decade, further urbanisation and its consequent increase in vehicle movements on the local roads, A3 and M25 intersections would create further congestion and a substantial increase in air pollution levels to an already highly polluted area.

The nearest station, Horsley, which most commuters would drive to as there is little other public transport, would be unable to cope with the increase in commuters at peak times. Even now it is now difficult on occasions to find parking at either Horsley or Effingham stations.

The existing local medical facilities will be unable to cope with the proposed increase in population. The Royal Surrey Hospital would not have the capacity to cope with the increase in patient numbers created by the proposed Local Plan development.

AVAILABLE DEVELOPMENT SITES

The Local Plan does not take in to account the existing sites still undeveloped within Surrey. There are Brownfield sites available, which have not been developed and would provide enough land to meet the need for affordable local housing. Many commercial sites are unused and should be developed before any planned use of Green Belt land.

I ask Guildford Borough Council to reject the existing plan and review use of Brownfield sites and existing permissions for development rather than the development of precious Green Field sites, which have been nationally recognised as protecting the quality of both our urban and natural environment.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners’ views, or the costs involved in improving the infrastructure, currently out side their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the Doomsday Book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever they want.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.
Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/1557  Respondent: 15340929 / Claire Smylie  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to make the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which is protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)
It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy II)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1558   Respondent: 15340929 / Claire Smylie   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/3441   Respondent: 15340929 / Claire Smylie   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3).

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3435  Respondent: 15340929 / Claire Smylie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3437  Respondent: 15340929 / Claire Smylie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3439  Respondent: 15340929 / Claire Smylie  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the
flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3425  Respondent: 15340929 / Claire Smylie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3428  Respondent: 15340929 / Claire Smylie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
I OBJECT to the Borough Wide Strategy (Policy S2)

1. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

2. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

3. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any commonsense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4708  Respondent: 15340929 / Claire Smylie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular pastime, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to...
considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Chilworth

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to object to the proposal in the Guildford Local Plan 2016 to remove Green Belt protection from Chilworth:

1) Chilworth has already had many new houses built in recent years. Further expansion risks destroying the rural nature of the village, which Green belt protection helps to maintain.

2) Expansion at the edges of the village will gradually remove the buffer between Chilworth and the neighbouring villages of Shalford and Albury, resulting in an eventual conurbation with Guildford.

3) The existing traffic levels along New Road are excessive, resulting in high levels of air and noise pollution to those houses along the road. Further development will exacerbate this to unacceptable levels.

I believe that only by retaining Green Belt protection for Chilworth and its surrounding villages can these problems be controlled.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1040  Respondent: 15341153 / Peter Singer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object most strongly to the Horsley villages being taken out of the Green Belt. Many promises have been made to preserve the Green Belt and it should be. It is a rural area and the character of the villages should be maintained.

The Horsley villages have already, during the last few years, had considerable infilling and large areas of new houses built resulting in considerable congestion on the narrow roads, particularly at peak times. It is already almost impossible to park to shop in the village, and the overflow car park is constantly full.

The station car park is also nearly full now, and with the additional houses planned commuters would not be able to park there.

The filter roads off the A3 already have huge tailbacks at peak times, and the pollution levels at the M25 Junction 10 at Wisley are already well above recommended safety levels.

The proposed number of houses to be built would mean a huge strain on the infrastructure, and cause a different way of life for the residents who do not want this. The further possibility of development at Wisley airfield is a complete horror as it would ruin the areas of outstanding natural beauty all around it.

Please reconsider the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
6) I object to all other sites in the Local Plan: Blackwell Farm, 3 Farms meadows, Garlick’s Arch, West Horsley and Hogs Back. All are out of proportion to the local area.

7) Roads, schools, doctors etc will not be able to cope.

8) The consequent increase in traffic, which already is very heavy, with dangerous lorries driving over the speed limit.

The 4 policies (A42/A43/A43a and A44) are totally unacceptable for the village and there are far more suitable places for development, especially within Guildford and therefore I suggest GBC considers alternative sites. Send cannot cope with the level of development proposed and any development will have a detrimental effect on the local community and environment.

Please can I request that my comments are shown to the Planning Inspector who will decide on the proposed developments in Send and the surrounding area.

I object to Policy A42, 45 houses proposed to be built in Clockbarn Nursery, Tannery Lane. Tannery Lane is a country, single access and the staggered cross roads- junction with Send Road is already dangerous, especially during peak times. This will just add to the growing congestion in Send. Planning permission has previously been given for 64 apartments at the Tannery and for building the marina, both of which will generate additional traffic (large vehicles for boats etc) The lane cannot cope with any more traffic.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43/A43a - I strongly object to a new interchange with the A3 at Burnt Common as this would generate a huge volume of traffic through the village. It is already congested during rush hours especially with the school on Send Barnes Road. When the northbound lanes of the A3 are congested both in the morning and evening rush hours (which is most weekdays) Send Village is totally congested and then many local drivers speed down country lanes (Potters Lane) to avoid Send Road/Send Barnes Road and drive dangerously. Additional traffic will only exaggerate the situation.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Additional housing at Garlick's Arch will exasperate and add to the local chaos on the roads and the already stretched amenities. I therefore strongly object to building 400 Houses and 7000 sq metres of industrial space at Garlick's Arch. The site floods and is covered by ancient woodland. The industrial is not needed as there are many offices and warehouses sitting idle in the local area. Fill these sites first before developing more empty units. Any new industrial units should be built at Slyfield where there is already an established site and the roads can cope with the traffic. Guildford's housing requirements have been shown to be grossly exaggerated and they have refused to disclose their calculations. With proper use of brownfield sites this Green Belt site is not needed.

In addition to the other proposals, I object to Policy A42, 45 houses proposed to be built in Clockbarn Nursery, Tannery Lane. Tannery Lane is a country, single access and the staggered cross roads- junction with Send Road is already dangerous, especially due peak times. This will just add to the growing congestion in Send. Planning permission has previously been given for 64 apartments at the Tannery and for building the marina, both of which will generate additional traffic (large vehicles for boats etc) The lane cannot cope with any more traffic.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A44- I strongly object to the development of 40 houses and 2 travellers' pitches at Send Hill.

The narrow country lane (Send Hill) would not cope with any additional traffic. It is narrow and already busy with traffic to the cemetery (which has recently been extended). The junction at the bottom of Send Hill with Potters Lane is very dangerous due to speeding traffic off of the A3. Any more traffic would make it even more hazardous. It is an inappropriate location for 40 houses because the road is narrow and single access. Also the soil of the proposed site contains documented unsafe landfill waste registered at GBC. The land is totally unsuitable for dwellings and traveller pitches. I believe the unsafe landfill will be harmful to health of any home owners. Any development there would spoil a high amenity area set in beautiful countryside. The area is used for recreational activities such as walking and would be greatly missed by locals.

Send will not be able to cope with the proposed developments. St Bedes C/E School will shortly be demolished. Currently a new school is being built in the grounds of Send First School. The new infant/middle school when complete will not be able to cope with a large influx of children. There does not seem to be any long term planning in line with GBC proposals.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to Send Village being removed from the Green Belt. The Green Belt was intended to be permanent, as required by the national Planning Policy Framework, and there are no special circumstances to justify abandoning it. Send's Green Belt provides an essential buffer stopping Woking and Guildford becoming one conurbation. Local councillors and central government gave a clear election promise to protect the Green Belt and this reneges on it. Developers will be quick to take advantage and there will be nothing to stop them. There is plenty of brownfield land still available for developing in the Surrey area.
Policy A42 - change to the Clockbarn in Tannery Lane the increase of the number of houses to 60 is totally excessive and will cause chaos in Send which is already at capacity during rush hours. It will impact on the village setting, drainage and local amenities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

there is no proven need to supply pit he's for travelling show people. This is a green belt area which separates two villages. Building on flooded areas, contaminated by lead is not an ideal place for building. As a home owner, I would not wish to purchase a dwelling on such land as it would pose an insurance problem. Again, Send and Ripley cannot operate an excessive new dwellings. The roads and entities would suffer.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This proposal was deleted from the 2014 draft. There has been a decline for industrial land especially after Brexit. Slyfield is an adequate industrial site for the area. There are plenty of unused office buildings in Guildford. Why wreck the greenbelt to add to the glut. The impact of additional traffic and especially large lorries will cause considerable traffic jams in Send and of course the A3 which already cannot cope in the rush hours. The impact on the narrow lanes such as Vicarage Lane, Potter's Lane and Send Hill will be hire delusional for local residents.

Policy 2 paragraph 4.3.15-this proposal would spoil the countryside and the beauty of the Wey Navigation. Large lorries and a high volume of traffic will find it difficult using the small narrow lanes in the area and of course, cause gridlock in Send. Sadly St Bedes School was closed this year and moved to Send First School on the main road through Send. More industrial lorries and traffic will heighten the likelihood of accidents outside the school plus congestion. There is no room for extra traffic and bad planning.

Being a resident of Send Hill I feel it my duty to object to your current plans to this area. I object to the proposal in the local plans on the grounds that Send Hill is a single track country road and therefore would be far too narrow to accommodate the additional traffic your proposed plans would bring, it would also make parking for visitors very restricted and dangerous for children or in my case grandchildren. I also object to the blatant disregard for the respect of green belt policy that needs to be addressed or we will lose the beauty of OUR countryside not only in Send but in other areas that are close to us. I would like to request confirmation of these objections.

We object to Send Village being removed from the Green Belt because:-

- The village provides breathing places for people and for nature.
- We will lose more than just a view, we will lose a space to run or play and an escape from the city.
- We will lose valuable farmland which provides local produce and therefore reduces food miles.
- We lose land that has its own identity and plays its own role in England’s heritage.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Dear Mr. Taylor, I find it depressing having to write to you to ask that you reconsider the plans to build more houses and to take away our "Green Belt status. You must surely recognise the damage that this ill conceived plan will do to our envirnoment. The Roads in East Horsley are evidence of a deteriorating situation which does not want any extra traffic. Whoever visited the area to sample traffic before proposing the extra houses must have seen the dangers of heavy lorry traffic,cyclists,schools and elderly people trying to cope with roads without markings or "cats eyes" ,regular flooding and poor lighting. The impact of more houses would be creating an atmosphere for oldes people of not being able to "go out" and restricting their movements and a dependency on others for their basic needs. Parking is already at a premium, Doctors Surgeries, Schools and Transport are already struggling and when the cyclists are using the roads one might as well stay in doors.

My wife and family moved here 40 years ago to get relief from an area (Laleham) where similar problems were starting to show. Look at it now. It has completely lost it village status and has become attached to Staines which is pure suburbia. Do you know this area?

I suggest you and your colleagues reconsider the proposed development before it gets out of hand.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/1057  Respondent: 15341953 / Betty Bannister  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
My arguments against this work are as follows.

Firstly the one junior school we have is full to capacity. Doctors Surgeries are full with waiting time for appointments. Our roads are too narrow to take anymore lorries or cars, its not safe to walk to the village anymore. Roads flood every year and building more houses on green belt will make it far worse, the rain water has nowhere to drain away from the roads.

Already there are dangerous pools of water which accumulate and more building will exasperate this situation. Our village is too small to accommodate all the additional planned houses.

Please think again.

You say that 40% will be affordable houses, nowhere are we told how much these houses will be. You should state a level at which these affordable houses will be sold.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. I OBJECT to building 400 houses and 7000 sq metres of Industrial space at Garlick's Arch, Opposite Send Marsh Road. This is an area of Ancient woodland and very prone to flooding indeed recently over half a million pounds was spent downstream of this location to prevent flooding to houses in Maples Road and surrounding area's. The Industrial space is not needed but could however already be accommodated at Slyfield Park in nearby Guildford. Guildford Boroughs housing requirements have been shown to be grossly over exaggerated, and they refuse to disclose what formula they use to arrive at their calculated requirements. Proper use of Brownfield sites within the Borough should eliminate the need to encroach on such a Green Belts area!

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. I OBJECT to a new interchange with the A3 at Burnt Common, because Send would have to try and then cope with traffic from the proposed 2000 new houses at Wisley Airfield, 2000 houses at Gosden Hill, Burpham and 1830 at Blackwell Farm. Traffic on this section of the A3 is already at a standstill during rush hour periods, and all such additional traffic would then flow through send road which is already overloaded. This must be avoided.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to Send Village being removed from the Green Belt.

The green Belt was intended to be permanent, per the National Planning Policy Framework and I believe there are no special circumstances to justify abandoning it. Send's Green Belt is an essential buffer between Guildford & Woking stopping it becoming one Urban Mass! Central Government & Local Councillors made a clear election promise to protect the Green Belt and this Plan renegades on the promise given to the electorate. Developers would be quick to seize upon such an opportunity and there would be no policy in place to stop them.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. GBC HAVE NOT FOLLOWED CORRECT PROCESS WITH THIS LATEST PLAN.

Since 2014 GBC has changed every major site in Send proposed for development, (now standing at some 485 houses and a massive new road junction). These very significant changes should require another full consultation under regulation 18, not a shortcut of Regulation 19 which GBC are attempting to get away with. This undoubtedly invalidates the whole Local Plan Process!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A42 change at Clockbarn in Tannery Lane because: It ignores all previous objections by residents, and is a 33% increase in homes over and above the original ill conceived plan. Which would exacerbate existing traffic and flooding issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1551  Respondent: 15341985 / William Walker  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43 change at Garlick's Arch because:
It ignores the thousands of previous objections made by local people. It will cause extensive over development of our village and the number of homes is excessive. It will generate more traffic which will not only block up the local roads of Send and Ripley, but also the major A3 trunk road into Guildford which already struggles to cope with current traffic levels during rush hour periods.
It is also a flood zone 2 allocated area, and subject to frequent flooding. There is also no proven demand for Travelling Show-people plots in this location.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 at Burnt Common because:

It was deleted from the 2014 draft because of previous objections. There is no proven reason to have more industrial and Warehouse development in the middle of the Green Belt, when Slyfield and Guildford still have empty sites and industrial units. This amounts to a huge over allocation of industrial land, in the middle of the Green Belt, given the current decline in demand for such industrial premises within the Guildford area.

</table>
I strongly object to the development of Normandy/Flexford and the potential development of 1,100 homes.

My thoughts are as follows:

I have lived in Normandy for all my life (now I'm 25 years old) I have up till now been living with my parents. But I am now moving out and will be buying a house within the lovely quiet countryside village of Normandy. I have always aspired to buy my first home here.

BUT now I have seen Guildford Borough's plans and I am deeply saddened and worried. Makes me want to move out of the village to be honest! As if building on the green belt is not bad enough they are proposing to completely change and definitely ruin our village! We don't want the extra housing or infrastructure here. We live in a small countryside village and that's why everyone moved here. People compliment the area saying 'it's so quiet round here' or say 'the countryside is lovely' not 'glad we got that housing estate to meet the councils targets'. Maybe Guildford Borough Council can give people all their money back on their properties in Normandy? Because most of the properties round Normandy were sold to people under the description of 'set in a small countryside village' and now they want to change that?!

From growing up and spending quite a few weekends of my life on the land they propose to build on I can confirm a lot of wildlife/beautiful scenery would be lost. And how exactly would the Grade 2 listed Queen Ann house be suited to be directly opposite 1,100 houses? Also Parwood Equestrian Centre? Next to a housing estate? Makes me laugh in a way as the proposal is so out of place. The council are acting with no due care and attention. I feel Normandy is an easy target for them as quite a few elderly people live there and they are bound to not be able to kick up as bigger fuss as say a proposal in Tongham where younger couples live and where there is a higher concentration of people.

Normandy's green belt should be protected, and if anything the site should be turned into a nature reserve!

I am really angry at Guildford Borough council to be honest. They spend all this money putting up signs in the village about the Surrey hills and say how it's an area of natural beauty then they want to create a concrete jungle not even a mile down the road! I think I could come up with about 10 better sites for this development and I'm not even employed by them.

- Flexford was once called Flaxford, itself a corruption of "flax vard", meaning flax meadows by a stream. Through the proposed development you would completely remove what the area once stood for. Do you really propose to remove the meadows from Flexford?

- I am personally unable to see a demand for a secondary school, a lot of the children around the area go to Ash Manor which is a mile or so down the road or travel into town on the train or get the school bus which comes around the houses. Maybe we should expand the existing schools to cope with the extra demand? You do not live in the countryside and expect to have a Secondary School next door to you. Furthermore Ash Manor and Guildford County are UNDER SUBSCRIBED!

- The development is just too close to an Area of Natural Beauty. You should not build right up to the edges of this area just because you can.

- The development really does not fit in with the local area. One property that comes to mind is the listed Queen Ann House on the same road you propose this development. To me this would ruin the history behind this wonderful property.

- You just can't double the size of a small village such as Normandy, it's not morally right or fair on the people who current live in the village. Even if you drastically reduce the number of homes you are still doubling the size of this small community.

- Building on the land would mean getting rid of a lot of precious rare wildlife and ancient woodland and this in itself would be horrible to see.

- You would be essentially de valuing a lot of the properties that are nearby the proposed development. No one wants their back garden backing onto a housing estate.
- You would be "Turning Rural pasture into a urban ghetto"

- People moved to Normandy to live in a quiet countryside village, not the concrete jungle the council propose. You can not change the entire characteristics of a small village just to meet government demands.

- I know for a fact every single resident when asked about the development and if they would favour it on the basis it would bring a pub or shop, would certainly say they would rather not have a shop or pub if it means saying goodbye to the greenbelt. To base a supporting argument on the fact it will bring more facilities is rubbish to me. Like most normal people I travel to a supermarket in the car each week or take a short bus ride to a shop down the road. Most people in Normandy are over 65 so this is free for them!

- We already have a pub but it's disused and currently empty - through not enough customers. It is not right to increase the population in the village just to bring in the facilities.

- This proposal is no different to Wisley Airfield proposal that was denied.

- I feel the council should not be wasting precious time on a proposal like this.

- A secondary school in Normandy would to me be extremely out of place, its not suited to a countryside location.

- Traffic is already bad enough on the Aldershot Road - It is an absolute nightmare every evening/ morning especially by where you propose the development. The traffic will often queue all the way to Ash Station from Wyke Church. There is also no way to relieve this with a new road structure.

- I also note the proposal has an affordable housing element. Normandy is not about affordable housing, you aspire to live here. Put it this way I'm 25 and personally feel the housing on offer to young people in Guildford is adequate. Affordable housing in Normandy is like building flats on the Wentworth Estate.

- Normandy is a quiet country village and you should not be allowed to change that. It's been like that for thousands of years. I know the population is growing but we simply can NOT ruin Villages like Normandy for future generations.

- The proposed development would seriously harm the openness of the Greenbelt in the Area.

- In my eyes you need to develop out the towns or develop existing Brownfield sites. You just can't put such a huge development on a tiny historic village such as Normandy/ Flexford. We should preserve our history.

I do hope you re consider this planned development and take my thoughts into consideration. I don't want to raise my future children in what the council propose and pray for them to be able to experience what has made Normandy so special to me.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/947  Respondent: 15342305 / Redmond Neale  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I would like to object the changes to policy P2 for the following reasons:

- I object to the changes to Policy P2 because they have not addressed many of the 32,000 comments made to the 2016 plan.

- I object to the new para (1) “The Metropolitan Green Belt will continue to be protected as shown designated on the Policies Map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.” The words “as shown designated on the Policies Map” should be deleted. The Policies Map has effectively ignored huge areas of Green Belt protection and the new para (1) is therefore a sham.

- I object to the proposed change that Normandy settlement, Flexford settlement and Walden Cottages should be inset from the Green Belt due to the fact that:

  - There is evidence in past planning appeals APP/Y3615/W/15/3002308, APP/Y3615/A/10/2140630 and APP/Y3615/A/10/2131590 that the land here contributes to the “openness” of the Green Belt

  - There is evidence in the Sustainability Appraisal para 10.4.7 that the agricultural land between the settlements is of BMV quality, exhibits ‘openness’ and contributes to the rural economy

  - The land in and around the settlements of Normandy and Flexford contributes to views into and from the Surrey Hills AONB (Hog’s Back)

Policy P2 fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it needs to be permanently protected. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land.

• Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital.

• It is incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of land that may be removed from the Green Belt.

I object to the statement in the submission Local Plan under Green Belt Policy P2 (4.3.13) which claims that Normandy, Flexford and a further list of 12 villages are “now inset from the Green Belt”. This statement is untrue as GBC is proposing to “inset” these villages. No decision has been made by an Inspector, therefore the villages remain in the Green Belt.

• I object to the changed “insetting” of 15 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages.

• I am concerned that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. This is completely unplanned and unmeasured development outside the OAN.

Many Guildford villages are elongated in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high

0 The "objectively assessed need" figure of 693 homes a year is too high.

0 A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.

0 The current SHMA inflates the proposed housing figure due to
failure to correct for errors in the historical data for international migration flows,
issues with the way it considers students and affordability and
Flaws in the method for estimating the number of homes needed to support job growth.
It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2885  Respondent: 15342401 / M.J. Harris  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going
back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, 82215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham's sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around
14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England's requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an "aspiration" in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (BB).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site.

There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy 03).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that, with this site being added at the 11th hour, no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. **I OBJECT** to the inclusion of the land for new on/off ramps at Burnt Common. The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic.

The route fromondon/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. **I OBJECT** to the damage to the historic environment as a result of the scale of the proposed development.

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick's Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I OBJECT to the sustainable employment policy

If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick's Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**I OBJECT to the loss of rural employment**

Policy ES supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Policy E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor "attractions" and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/"Disneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many "leisure and visitor attractions" already. The case for creating more is not made and no examples are given. Instead, the plan's explicit priorities should be:

1. To protect the borough's prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

1. To help make Guildford's river landscape less off-putting and support town-break packages for high-value To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

1. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An "English town break" (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.
1. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT (POLICY H1 Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan peri It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council's timidity is a case of "regulatory capture" by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog's Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6 - Rural Exception Homes

I OBJECT this is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the "mix" this can include "market" housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.
With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists pass through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT to the lack of proper infrastructure planning for sites

Policy 11 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents' in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital. Where is this assessed and remedied?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I OBJECT to poor air quality concerns

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages, as mere housing need does not constitute a 'special circumstance' for the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC's Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

I OBJECT to development in areas which are at risk of flooding

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding.

Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.
The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hillare are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The borough wide strategy is poorly consi It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The Housing number is based on pre-Brexit data for economic and population growth, including migrati These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the "West Surrey" tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, "West Surrey" is much too small. Half of Guildford borough's residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside "West Surrey". Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justificati on to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make "West Surrey" reliable. The area is artificial, and so therefore are the housing numbers.
derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour's "need". Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey's 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

3. I OBJECT to a new interchange with the A3 at Burnt Common, because Send would have to try and then cope with traffic from the proposed 2000 new houses at Wisley Airfield, 2000 houses at Gosden Hill, Burpham and 1830 at Blackwell Farm. Traffic on this section of the A3 is already at a standstill during rush hour periods, and all such additional traffic would then flow through Send Road which is already overloaded. This must be avoided.

I OBJECT to building 45 houses at Clockbarn Nursery, due to inadequate access and traffic volumes. The junction with Send Road is already very hazardous for vehicles trying to join the main road. Planning permission has already been given for 64 apartments further along along Tannery lane which will generate additional heavy traffic. This now additional housing would compound an already dangerous situation.

5. I OBJECT to the development of 40 houses and 2 travelers pitches at Send Hill. It is an inappropriate location, which would be serviced by a narrow single access Country road. Subsoil at the proposed site contains unsafe landfill waste as registered with GBC.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I OBJECT to Send Village being removed from the Green Belt.

The green Belt was intended to be permanent, per the National Planning Policy Framework and I believe there are no special circumstances to justify abandoning it. Send's Green Belt is an essential buffer between Guildford & Woking stopping it becoming one Urban Mass! Central Government & Local Councillors made a clear election promise to protect the Green Belt and this Plan renegades on the promise given to the electorate. Developers would be quick to seize upon such an opportunity and there would be no policy in place to stop them.

Answer (if comment is on questions 1-7 of the questionnaire): ()

6. GBC HAVE NOT FOLLOWED CORRECT PROCESS WITH THIS LATEST PLAN.

Since 2014 GBC has changed every major site in Send proposed for development, (now standing at some 485 houses and a massive new road junction). These very significant changes should require another full consultation under regulation 18, not a shortcut of Regulation 19 which GBC are attempting to get away with. This undoubtedly invalidates the whole Local Plan Process!

I OBJECT to building 45 houses at Clockbarn Nursery owing to inadequate access and traffic volume. Tannery Lane is far too narrow to take any more traffic. The junction with Send Road is already very hazardous for vehicles trying to join the main road. Planning permission has previously been given for 64 apartments at the Tannery and for building the Marina, both of which will generate additional heavy traffic. The junction is too dangerous already and will make it much worse.

The plan appears to be ill-though through and wholly irresponsible as it would have the following impact on the local community:

- Threat to area of natural wildlife and beauty
  - Ongoing threat of total erosion of the Green Belt and the wildlife it encompasses
  - Destruction of a tranquil, peaceful environment
- Disruption during the construction phase
  - Noise from building work
  - Roadworks causing intolerable traffic congestion
  - The construction of trenches along Tannery Lane for additional drainage, electrical services and supply of mains gas (there is no supply of mains gas along Tannery Lane and beyond - residents are instead reliant on oil or LPG).
- Concerns of additional traffic, which would cause gridlock as the narrow lanes are ill-equipped to
  - Tannery Lane - when driving, care is required with pedestrians, where there is no Turning out of Tannery Lane into Send Road can be extremely hazardous as large vans tend to park close to the junction obstructing the view of traffic to the right and left. The junction would benefit from a mini roundabout. This situation is bad enough with existing traffic - it would become intolerable with extra traffic generated.
  - Papercourt Lane would become a rat-run - narrow passing points on blind bends - cars frequently have to pull over or reverse into passing points to allow traffic to pass through. My car was recently damaged by a large SUV which was struggling to get past it.
  - Newark Lane access into Ripley Village is narrow and barely copes with current traffic levels. The road was built in an era where vehicles were much narrower - today wide 4 wheel drive vehicles struggle to get past. There is no opportunity to increase the road width due to the proximity of legacy housing to the narrow pavements. Newark Lane towards Pyrford is narrow and twisty - even now extreme care has to be taken with cyclists and turning right into Warren Lane is currently very hazardous due to a blind bend, on a steep hill. Additional traffic levels would make driving along Newark Lane intolerable.
  - Send Road - even with existing traffic levels extreme traffic congestion was recently encountered towards Old Woking when temporary traffic lights were installed. With higher traffic volumes this gridlock would become intolerable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to building 400 houses and 7000 sq metres of Industrial space at Garlick's Arch, opposite Send Marsh Road. The site floods and is covered by ancient woodland. The industrial space is not needed but if it were it should be at Slyfield. Guildford's housing requirements have been shown to be grossly exaggerated and they have refused to disclose their calculations. There is already great pressure on local school and medical provision and this can only worsen. With proper use of brownfield sites this Green Belt is not needed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Inadequate notification and planning for Developments 43 and 43a

The developments on Land a Garlick’s Arch were not included in the Draft Local Plan 2014, and it is only in the Draft Local Plan 2016 that I first learnt of them. Therefore, I object because it is unfair to make such a major change to the Plan with so little prior notification, and allow such a short consultation period of only 6 weeks.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3612  Respondent: 15342657 / Ann Cameron  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Transport

Your Transport 2016 report states “Existing road and parking infrastructure is already inadequate or under pressure and would worsen with the planned development, reducing quality of life, particularly in... Send, particularly Potters Lane, ...”. Therefore, I object because all the proposed developments in Send (A42, A43, A44, and particularly A43a) with have an signifcant negative effect on the transport infrastructure, which your consultants say is already inadequate.

Sustainability

I object to all the proposed housing developments in Send (A42, A43, A44) because they will all promote the opposite of “encouraging sustainable forms of transport”, “conserving landscape character”, and “providing housing to meet local needs”, and most of the other Sustainability criteria. I object because, obviously as a resident ,I can see for myself that local amenities at present are either inadequate or under strain, and therefore will not meet the required Sustainability criteria with the influx of another thousand or so people. The Sustainability report 2016 seems just to pay vague lip-service to GBC plans, rather than being properly fact-based, truthful, and pragmatic on these matters.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I refer to the above Plan and the proposal to build approximately 2,000 houses on the site of the former Wisley Airfield.

I wish to strongly object to this proposal on the basis of creating the equivalent of a new town on Green Belt land. Government Policy states that the use of Green Belt land can only be used in exceptional circumstances and this certainly has not been demonstrated.

If considered, this proposal would have a major impact on the villages of West and East Horsley. This forced growth policy would put an enormous strain on existing infrastructure in an already over-crowded area. Our roads, or lanes, are worn out, the existing sewers and drainage systems have difficulty coping. Our schools are overcrowded, our Doctor's surgeries struggle to cope and our few shops have limited parking. The nearest stations would be Horsley and Effingham Junction and they are both well served and their car parks are full.

It must remain a Policy to preserve the natural beauty of our area and to build houses and create a new town in such a rural area would be negligent, and therefore to this end I must strongly object.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to policy A42

Tannery Lane is a narrow country lane which already suffers from too much traffic using it. To build 45 new homes on the Clockbarn Nursery site would cause even more traffic congestion in the area.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A43

The land at Garlicks Arch is covered in ancient woodland with some of the trees dating back as far as the sixteen century.

The wildlife and fauna is prolific in this area and it is a major part of the green belt which must be protected.

This area also allows for natural drainage of surface water.

The National Planning Policy Framework prevents the merging of settlements and if this development was allowed then it would contravene that policy.

The infrastructure is not in place to accept such an increase in traffic.

The local area is already at breaking point at peak periods and this development would virtually bring the area to a standstill at peak times.

The doctors surgery could not take all of the predicted numbers of new people moving into the area.

The local schools would be in the same position as the doctors surgery, with more people than it could cope with.

Guildford Council have just refused planning permission for nine dwellings on Oldlands Field Yard, planning application number 16/P/00783, which is part of the Garlick's Arch site. All of the reasons for refusal given by the council for this development must surely then apply to the whole of the Garlick's Arch area.

I object to policy A43a

We do not need an on/off ramp at Burnt Common. This will not alleviate the traffic in the local area. In fact quite the opposite it will increase the traffic problems in the area.

A south bound slip road onto the A3 at the Ripley roundabout could ease the traffic situation. The area for this slip road was made available when the Ripley by pass was originally built but the slip road was never put in.

I object to policy A44

The land to the west of Winds Ridge is a disused land fill site. It was filled with unsafe waste which was noted by Guildford Borough Council. Apart from the fact that the ground is full of unsafe waste and should not be disturbed, Send Hill is a narrow country road and does not provide suitable access. Further development around Send Hill would add to the traffic problem that already exists in the area.

I am writing regarding the revised local plan you have recently published which, despite its volume (no doubt designed to befuddle those who elect you), appears to wholly ignore earlier feedback and to contain fatal flaws.

Firstly, as regards likely population demands, your projections (such as they are) need to be re-visited in the light of Brexit. Your proposal for up to 533 new homes in the Horsleys with possibly another 2,000 on the Wisley site (under two miles away) would represent a disgraceful urbanisation of what is still a predominantly countryside area, with little thought given to the infrastructure consequences and certainly no guarantees that these will all be addressed in advance of any building.

Your papers also contain comments on the type of housing that you would wish to see in the Horsleys. Here again your approach is flawed as 533 new homes of the type you describe would be wholly out of keeping with the village. It is an observable fact that many Horsley houses are large and on large plots and that is why people have bought them. Furthermore, you reflect this fact in the heavy Council tax bills we pay from which Horsley residents derive few benefits.

You need a major re-think and a concentration on the more than adequate brownfield sites in the Borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Stated Government policy is that areas should only be taken out of the Green Belt in exceptional circumstances and you have not demonstrated that those circumstances apply in the case of the Horsleys. It is accepted that on your planning watch you have permitted some infill development in the main East Horsley village, but south of the A246 there have been no extra dwellings in decades. Indeed, you have previously advised us that the Warren and Rowbams Way are in an Area of Outstanding Natural Beauty - i.e. the Surrey Hills. In the circumstances, how can you possibly permit a re-designation from AONB status to a planning free-for-all; that would be an act of quite inexcusable planning vandalism?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- As residents of East Horsley we know how difficult it is to get an appointment at the Medical Centre without a few days wait and even longer if wanting to see a specific doctor. With the current shortage of general practitioners how guaranteed is it that additional doctors will be found to staff the medical centre?

We both have to travel to London currently for medical reasons and know how difficult it is to get a parking space after 10.30am. How will the car park cope with the extra commuter cars from the proposed developments? How do you plan to enlarge Horsley Station car park? We do not have the problem of worrying about local schools but one of our sons has that problem and has no option but to send his children to private school because of the over-subscribing of places.

- The roads around the area are in an appalling state numerous pot holes. Drainage is poor in many places. A couple of years back we had such flooded roads that it was impossible to get to Cobham whichever route was taken due to flooding. Wear and tear on the road will increase and certainly with huge haulage vehicles backwards and forwards in the development stages residents lives can only get worse and accidents will occur. The narrow roads in the area are

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The narrow roads in the area are already congested and the large number of cyclists together with haulage vehicles should be a cause for concern.

- Station parade has been designated a "District Centre" - when did this come about and what does it mean for future development?

- The development of 2,000 houses at Ockham (Wisley Airfield) would have an enormous impact on the facilities available in Schools, medical centre, parking all will be affected. The total number of houses which GBC proposes to be allowed in their plan is far greater than those that should be needed according to official national estimates for population growth in the Borough. How did GBC arrive at a figure that is 70% higher than the official national estimate?

Overall the proposed plan is over-ambitious and badly thought through and does not take into account the unique area in which we live. We accept that more houses need to be built to cater for the demand but a very large housing estate will only badly affect the environment and facilities of which there are problems already with the current number of residents. The planners need to rethink this before they destroy this lovely area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I write to voice our objections to the development plan for the Horsleys. The plan to develop a massive 593 new houses in the area over the next 5 years seems to be out of proportion with the national estimate for population growth. It will have a detrimental affect on schools and medical facilities and will massively change the feel of the green belt area.

I also object to the proposal to build 40 new houses and travellers pitches on Send Hill (A44). This is a small lane with lovely views. The walk to the Church is enjoyed by many residents and it would be totally out of keeping in this environment.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have lived in Send for over 50 years and always enjoyed it's peaceful, semi-rural setting with the green belt acting as a buffer zone between the towns of Woking and Guildford.

I therefore strongly object to the destruction of the green belt which undermines the Governments commitment for its protection! The sheer number of houses including the industrial units would urbanise and change this area completely!

I urge you to reconsider the plan which would in turn destroy our village and the surrounding countryside and keep send and send marsh in the green belt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A42 - Clockbarn Nursery, Tannery Lane

I object to the development plan under policy A42. This area, especially the road infrastructure, cannot cope with the further development. The lane and junction with Send Road is simply too small and the added traffic volume will only serve to further congest the area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43 & A43a - Land at Garlick's Arch, Send Marsh/Burnt Common and Ripley

I object to the housing and industrial developments proposed under policies A43 and A43a. The existing road infrastructure, local medical centre, school and shops would be completely overwhelmed. The new slip roads and junction would funnel traffic to Woking, it would become a complete bottleneck - thereby raising a completely new problem. The lovely countryside feel of the area would be lost. Please consider developing brownfield sites as part of industrial development.

I am also questioning the process under which Guildford Borough Council are consulting. These are new developments and therefore should be subject to a full consultation under Regulation 18. Consulting via Regulation 19 in this manner feel like a cheat.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2 - Removal of Send from the Green Belt

I object to removal of areas of Send village from the green belt. This is all we have as protection against becoming part of Woking and Guildford. It is a lovely haven between the two. If this is removed, the areas will simply merge over time, again spoiling the area. My partner and I will be forced to consider moving away; we chose to live here due to it being away from these urban areas.

<td></td>
</tr>
<tr>
<td><strong>Wisley Airfield</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>I object to the development of 2000 extra houses being built. The local roads and public transport at peak times are already at capacity. The A3 being the closest main road in and out of London is already regularly congested, if not at a standstill in both directions during rush hours, as is the A25 that connects the area with Guildford. The winding country back roads are also certainly not made for large numbers of cars. Adding more traffic to the area will not only make this undoubtedly worse, but will also increase pollution and disrupt more wildlife around the greenbelt area.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>The trains are also at peak time capacity. The car park at Effingham Junction (the closest station to the suggested site for building) is already full daily, with commuters parking dangerously and most probably illegally on nearby roads. The trains themselves are full already. The villages are not places that attract many work opportunities (nor should they become so), so residents of the proposed establishments would need to travel to work in some capacity.</td>

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infrastructure

Increasing the the population of the local area by up 35% would require more schools, medical centres and drainage to name a few. Nothing about these developments have been mentioned in the plans. The schools are already full and the medical facilities are stretched with the current population,

To summarise my objections, I have serious worries for the following with the proposed building plans:

- Detrimental effects on already full public transportation, roads, and local car parks
- Detrimental effects on wildlife
- Detrimental effects on the village community

Air pollution becoming worse in the local area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Extension of the boundaries of the settlement areas of the Horsleys & proposed removal of the Horsleys from the Green Belt

I object to the proposed changes. The Greenbelt sites are essential for keeping the air around London clean, acting as a home and refuge for wildlife. The pollution levels in Greater London already far exceed the targets for clean air each year. Removing the surrounding greenbelt sites will only make this worse and the air more heavily polluted. It will also turn our village into essentially just another extension of Great London. To stress the point again, this would have a devastating impact on our air, wildlife, and also the village community here

Answer (if comment is on questions 1-7 of the questionnaire): ()

Apparantly the villages around Guildford are to be removed from green belt status allowing for the possibility of new housing to be built around them. Apart from the desecration of the beautiful countryside that Surrey is famous for, the road system around here of narrow lanes (incidently still full of potholes) simply cannot cope with the increase in traffic that further large scale development will bring. Developers are allowed to build, take their large profits and leave the Council to sort out the resulting infrastructure mess - which the Council never does.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Regarding the Aldershot Road Allotments I became aware of these allotments since early childhood in the 1940's, both my father and great uncle had plots on this site since early 1930's. The plot on which I currently work was taken over by myself in 1980 on the demise of my father, who won several "The Sturgess" cup for the best allotment in the "Stoke and District Allotment Society as it was in those days.

I believe that these allotments must be retained for the enjoyment of like gardeners both for recreation an maintaining good health, giving a healthy body and mind, by exercise and healthy eating fresh produce, not forgetting growing some floral decoration for the home, and friendships gained.

Having a double heart by-pass and valve replacement a short while ago the exercise and being out in the fresh air, considerably helped regaining my fitness over a period of some months. More recently I conracted Pneumonia and was hospitalised for 7-8 days in working the plot helped with my now full recovery, and at 80+ this was not an easy task.

Further regarding the lower access gates these are wholly necessary for ease of access,[ bearing in mind the access need for the local schools activities in being made aware of the relative need for growing food and where it comes from etc] deliveries of "fertiliser products" and other needs. The slope between the upper gate and the lower gate, whilst it appears safe in the summer months, is totally different in the winter, since it becomes slippery and extremely dangerous, both on foot and vehicular.
When the area of ground, probably Plot was taken, early 1960's by Puttocks Garage, it was agreed a certain number of spaces were to be allocated to allotment holders in recognition of this, under the then new retaining wall. Prior to that, I well remember farmer 'Baldrey' having the area.

I was born in Hillcrest Road and lived until marriage in Guildford, I spent my early working life, in and around Wood Street [Drummond Bros] and nearby Normandy [Vokes Ltd], although now living in Fleet have a high interest in these allotments.

I object to the building of 400 houses and an Industrial space at Garlick Arch.

This site in particular is covered with woodland and pasture and certainly never intended for building purposes.

The site floods dreadfully, water coming off the A 3 into the stream which then floods the fields.

We have photographic proof of this as it is Cobham Sporting Gun Club site and has been for the best part of 30 years and floods often.

The Industrial proposal should be sited at Slyfield which would be ideal to extend and keep in one place.

Answer (if comment is on questions 1-7 of the questionnaire): ()

5 I object to a new interchange with the A3 at Burnt Common very strongly.

The traffic now if there is a problem on the M25 or A3 is horrendous through the villages of Ripley, Send Marsh and Send and we become grid locked with traffic

finding alternative routes out of the congestion.

The roads are not capable of taking on all the extra volume of large lorries which is what would happen.

We had to have an Air Ambulance land on Send Marsh Green last week for an accident and part opf our road was closed diverting bus and large vehicles around the Green

causing havoc, we cannot support all this extra traffic, its spoiling our lovely English Villages here in Surrey.

Lets not ruin our lovely countryside when there are a lot of Brown Sites to consider first... WE DONT WANT TO BE JOINED TO GUILDFORD , WOKING etc.

What consideration has been taken for Drs, Schools, Colleges, Transport Leisure etc.?

All these things require a car, bus, train, coach which again add to the volume of traffic at rush hours.

4 I object to the development of 40 houses and 2 pitches on Send Hill called the Paddocks.

Again access to this site is very narrow especially from the Cemetery down to Potters Lane where that junction is often a cause for concern the way the traffic speeds along Potters Lane and again an inappropriate place for houses and travellers site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The Raleigh school is the only state primary school that serves both East and West Horsley and it is full and over subscribed every year. So, where are the increasing number of young children going to attend school or do you expect the school to absorb the extra pupils in much larger class sizes or portocabins?

I serve on the committee of the Kingston Avenue Medical Centre Patient Participation Group which is the only NHS GP surgery that serves both villages. It is currently working above capacity, is finding it difficult to recruit and retain Doctors, and could not absorb the population increase from the proposed developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

There are also other facilities and services that just could not cope with the increase in population and traffic. Horsley railway station car park and bicycle bay is full every week day and there is limited parking for the village shops, library, bank, and restaurants. Traffic congestion, parking queues, and frustrated drivers will be the inevitable result with all the attendant safety concerns. There is also a capacity problem with the village waste water system which periodically overflows flooding local roads. Thames Water has already advised you that the system will be unable to support the additional demand, but no mention in the plan for upgrading it.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have lived in West Horsley for 30 years and strongly object to the proposals put forward in the latest Guildford local plan
to strip the Horsleys of green belt status and to build 533 high density dwellings. If these proposals go through you will be
responsible for significantly and irrevocably destroying the character and appeal of one of Surreys most beautiful villages
and declaring open season for further development . The Horsleys were granted Green Belt status to prevent precisely what
you are proposing, to ensure that land is not over developed and that green open spaces are provided for people to enjoy.
Whilst I understand the need to build more homes we should not be doing it at the expense of villages which add so much
to the character, appeal and beauty of the county. The Borough is proud to boast that one of the things which make
Guildford great is that 89% of the Borough is Green Belt, so why are you proposing to reduce it ? Your proposal in fact
does not provide a solid case for removing our green belt status and increasing the West Horsley housing stock by a
staggering 35%, greater than any other single area in the Borough. There is certainly no mention of this in the 'Guildford
Borough Economic Strategy 2013 - 2031' document, so what has changed ? I also have not seen proposals to address the
drastic effect that the addition of 533 houses will have on local roads, infrastructure, and services, and your proposal to
build an additional 2500 homes in the immediate vicinity will make this even worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the erosion of the green belt within the above plan. The Green Belt Act was brought in to ensure
that no further undeveloped land was built on around large suburban areas. This was to ensure that local residents continued
to have the opportunity to enjoy the countryside, by car, bicycle, horse or walking. Also to see and observe nature. I am
dismayed that the Guildford 2016 Plan proposes reducing the areas for countryside recreation and farming. With the
increased population in the area consideration should be given to increasing the green belt so that the density of people to
green belt is brought back to what it was when the green belt was first proposed. Again we need more farmland to feed the
population not less. Erosion of green belt also means more flooding as there is less land to adsorb the run off water.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick's Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

   The "objectively assessed need" figure of 693 homes a year is too high.

   A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.

   The current SHMA inflates the proposed housing figure due to

   failure to correct for errors in the historical data for international migration flows,

   issues with the way it considers students and affordability and flaws in the method for estimating the number of homes needed to support job growth.

   It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.
The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Respondent: 15345281 / Alexandra Murphy  
Agent: 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site.

There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.
Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick's Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Attached documents:

Comment ID: PSLPP16/3727  Respondent: 15345281 / Alexandra Murphy  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1
If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (BB) at Garlick's Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy ES supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. Tourism and visitors do not depend on new visitor "attractions" and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for over development/"Disneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many "leisure and visitor attractions" already. The case for creating more is not made and no examples are given. Instead, the plan's explicit priorities should be:

1. To protect the borough's prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford's river landscape less off-putting and support town-break packages for high-value tourism. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in pri An "English town break" (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in
London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT (POLICY H1 - Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan peri It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of "regulatory capture" by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY H3 - Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the "mix" this can include "market" housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances ."

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.
I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

   Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

   Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents' in the locality will see their quality of life significantly deteriorate in many ways.
Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

**Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a 'special circumstance' and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl land these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC's Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

**Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding.

Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Local Plan as the development proposed will not be sustainable {Policy s1h

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to
being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to one specific aspect of the consultation process which is fatally flawed. The Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the green belt." This is demonstrably untrue and I believe it is deliberate untruth which compromises the consultation process. Even the council's position in the draft Plan is that exceptional circumstances exist so as to justify taking areas out of the Green Belt - which by definition has a detrimental impact on the Green Belt. This unqualified statement cannot be justified and is simply untrue. By giving this unqualified assurance to residents that there is no detriment to the Green Belt residents may have been reassured and dissuaded from responding to the consultation.

I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (We assume the document was delivered to most houses in the Borough.) I have no doubt that that people will argue before the inspector that the consultation process was flawed and ineffective because of this.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The Housing number is based on pre-Brexit data for economic and population growth, including these, now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the "West Surrey" tri-borough area of Guildford, Woking, and An HMA should be an area within which a majority of people live, work, shop, or study. On any common sense view, "West Surrey" is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East, and Basingstoke to the West, but all lie well outside "West Surrey". Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich, or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make "West Surrey" reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s "need". Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey's 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
As a resident of East Horsley since 1976 I feel I should make my objections known to the proposed building of 533 houses in East and West Horsley. Removing the Horsleys from the Green Belt will be detrimental to the environment, wildlife included and will alter and damage the landscape for no reason after having protected it for over 60 years. It will change forever the ethos of a village life with a community.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to raise my objections to the proposed local plans for housing development at Wisley Airfield and throughout the Horsley villages.

This is based on the following;

Traffic and parking:

Assuming that every new house has at least 2 cars, this means potentially 6,000 more cars within a three mile radius of the villages. The impact on local roads will be tremendous. Parking at Horsley & Effingham junction stations (which are already full), at the shops, at the medical centre and at the village hall will all be affected.

Local Road Network:

In respect of the proposals for development at Wisley Airfield and for an upgrade the current A3 junction at Burntcommon to a full 4-way junction, SCC traffic modelling anticipates increased use of Guileshall Lane, Hungry Hill Lane and Tithebarns Lane for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond. The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”. It appears that the Plan is proposing a strategic site at Wisley Airfield without even knowing what improvements to the local road infrastructure will be required. If that is the case for Wisley Airfield, then it is almost inevitably true for the proposed developments in East and West Horsley as well.

**Loss of Green Belt land:** Sadiq Khan, new Mayor of London, has instructed London planners not to approve development on Green Belt Land within the M25. If we continue to build on our countryside it won’t be many decades before we have none left. Creeping development has led to almost continuous housing from Central London to Effingham. Is this to carry on to Guildford and beyond? (1,700 houses are planned for the Guildford end of the Hogs Back and 1,000 new houses on greenfield sites in Normandy.)

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the moving of the Urban Boundary to encompass the site for the new Burial Ground north of Salt Box road. As far as I understand, it is not necessary to change the Status of the Land from Green Belt to Urban for a Cemetery. It is lawful to place a Cemetery on Green Belt, therefore there is no need to go to the cost of altering the land’s status. If Green Belt status is moved to Urban status, then a change of plan for this ground is easily implemented, even though it is adjacent to a Triple SI site.

If I have misunderstood, please confirm back to me.

Answer (if comment is on questions 1-7 of the questionnaire): ()
We object to Guildford Borough Council's draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:

- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- increase tailbacks on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

I have just received notice of a proposed development of 154 houses by Copperwood Developments on land adjacent to Ash train station. Recently I received notice of a proposed development of 115 houses by Persimmon on land off Foreman Road. These are in addition to 450 houses currently being built behind Ash Manor School off Manor Road.

If these proposals are passed that will be an extra 729 houses in Ash. That means over 2000 extra people including 700 to 800 children not to mention over 1500 extra cars!!
1. Where will the people go for their health care? It already takes over a week to get a routine appointment at Ash Vale Health Centre.
2. Where will all the extra children go to school? Several schools in Ash have been closed over the past years and the land sold, ironically, for housing!!
3. Where will all the extra cars go? Ash is already very busy with traffic, especially at commuter times. With an extra 1500 cars we can expect gridlock!! Car parking at the shopping areas in Ash is also beyond its capability. Further cars will make daytime parking in the village intolerable.

Additionally the two areas proposed are both to the south of the A325 Ash to Guildford Road which has been a natural southern boundary of the village and designated as land bordering the Green Belt. Where will development stop – when it reaches the Hogs Back road??

All this in addition to a proposed development of 1100 house a mile away in Normandy. I sincerely hope that all three proposed developments are turned down otherwise this currently rural area will become yet another urban jungle with an infrastructure that cannot cope.

These three new proposals for Ash & Normandy are ludicrous and must be rejected.

I object to the A43 Garlicks Arch proposal. We bought our house in a Green Belt area because it WAS in a Green Belt area.

I object to the A43 Garlicks Arch proposal as additional housing would mean reliance on our local Surgery which is already pressurised.

I object to the Garlicks Arch proposal also as apart from additional traffic described above, additional housing would apply more pressure to local schools.

The well being of the local Villagers of Send and Ripley must be considered.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the proposal on the following lines :-

The proposed Ramp at Burnt Common on to the A3 would increase the already high density traffic flow along the A247 from Burnt Common roundabout towards West Clandon and would cause more problems from noise and pollution for homes in the vicinity.

At the moment traffic speeds along the A247 making joining it for residents at peak times extremely difficult.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

- Destroy views from the Hog’s Back ridge a nationally designated Area of Outstanding Natural Beauty
- Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- Increase tailbacks on the A31 and traffic congestion
- Result in rat-running through local roads
- Add to Guildford’s pollution

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to Guildford Borough Council’s draft Local Plan Proposals to build 1800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Far, which will:

- Destroy views from the Hog’s Back ridge a nationally designated Area of Outstanding Natural Beauty
- Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- Increase tailbacks on the A31 and traffic congestion
- Result in rat-running through local roads
- Add to Guildford’s pollution

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Traffic in the village is appalling, delays and queuing is every day and when events are held at the local private school in Ockham Road North, East Lane (from which much of the proposed development is targeted) becomes a dangerous car park.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. The plumbing and drainage systems cannot cope with heavy rainfall now. Water bubbles up and road flooding is rampant.

1. The Doctor’s surgery in east Horsley is over-stretched currently and patients have to wait weeks for an appointment. Even the emergency sessions are forced to limit the number of patients they can deal with.

6. The school is always full and there is no room for an extension to the building.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. I may be naive but I am not being disrespectful but I have always understood, and voted accordingly, that the local councillors are there to protect the interests of the ratepayers and if the answer is that this is a Government instruction, surely no Government Minister intends that a council should destroy an entire village to meet a doubtful planning target.

2. On the same theme, this plan will encourage more pollution in this area due to the massive influx of cars. The Government is supposed to be reducing pollution to protect public health.

10. The public is constantly inundated with the needs of OTHER people but what is happening to the needs of the West Horsley population? Do they deserve to have their whole standard of life as they know it destroyed and that of their families.

All these objections also apply to East Horsley and any possible development at the Wisley airport site. The majority of people in this area commute to London. More trains can possibly be laid on but where will the commuters’ cars park? Not in the railway station car parks. They are already full to capacity.

Finally if the plan goes ahead the developers will come, build their houses, walk away with enormous profits and the villagers will have to pick up the pieces.

Please reconsider this plan for all our sakes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to OBJECT in the strongest possible terms to the above plan as it effects the Green Belt villages of East and particularly West Horsley. The proposal that would increase the size of West Horsley by something like a third – adding 385 dwellings – provides more problems than it offers solutions and poses a host of unanswered questions such as:

O The green belt can only be built on in exceptional circumstances and – regardless of the insetting smokescreen – what are the the exceptional circumstances for Guildford Borough Council’s decision to abandon the Belt and change the character of West Horsley for ever? Especially as there are exceptional reasons why the scale of the envisaged changes is completely and utterly unsupportable. Vital infrastructure such as medical services, education and retail outlets are already mostly unavailable for the current rate-paying population of the village. The residents have to share with neighbouring East Horsley for the still inadequate facilities provided there.

O A basic environmental requirement is adequate drainage. Thames water have advised in no uncertain terms that the current wastewater network for West Horsley is unlikely to support the anticipated demand from the number of planned extra dwellings. What is GBC proposing to do about it?

The current plan could increase the village population by something like 1,500 people and the number of cars by an extra 700 – 800. The totally neglected road network in the village is insufficient at present for the volume of traffic because The Street through the centre of the village is a convenient short cut for A246 traffic from the Guildford direction heading for the A3 and the M25. And there is no general public car park in West Horsley. What are the Council’s proposals for coping with this already acute problem?

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I am writing to OBJECT most strongly to the proposal to build 385 houses on West Horsley’s Green Belt. Nobody answers the question of who the dwellings are meant for and why West Horsley – out of all proportion to other areas in and around Guildford - has been selected as the victim to endure years of destruction of agricultural land, major equipment carving up the roads, noise and all to add to the already appalling lack of sufficient infrastructure in the village.

Answer (if comment is on questions 1-7 of the questionnaire): ()

O But the big and unanswered question is who is expected to benefit from this plan? Surely not the suffering ratepayers already living in the village. Nor hardly the unsuspecting newcomers who will have to pay scandalous inflated prices for whatever dwellings eventually emerge (a development in West Horsley’s Weston Lee of “affordable” tiny semidetached bungalows originally for the elderly currently change hands at little short of half a million) I suspect that the only people rubbing their hands with glee will be greedy developers, joyful estate agents and of course the Council planners if they are able to report to Government Ministers that “we have met our new build housing targets – and Oh by the way in the process- despite tremendous opposition- we have been able to completely destroy yet another historic heritage village.”

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the proposed Infrastructure Schedule (Appendix C).

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough, it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the development of the Gosden Hill site as proposed in the Local Plan. The land in Gosden Hill does exactly what the Green Belt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the slip road to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land, all requirements of the NPPF.

The scale of Gosden Hill is out of proportion with West Clandon. It would have four times the amount of housing plus shops, offices, factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is already stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.
If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1753  Respondent: 15348033 / Peter Nicholas  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43).

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan, it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states a preference is for making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced by a greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at such a late stage, no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: PSLPS16/1754  Respondent: 15348033 / Peter Nicholas  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)  

The additional north facing ramps to the A3 at Burnt Common would be very detrimental for local communities as it would draw in a huge amount of through traffic. The route from London/M25 to Woking or would become through Burnt Common and Send. Equally, traffic from the east of Guildford (Merrow etc.) and the A25 would increasingly go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/3787  Respondent: 15348033 / Peter Nicholas  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3).

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1).

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/3785  **Respondent:** 15348033 / Peter Nicholas  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the location for new employment floor space at Garlick’s Arch – Site A43 (Policy E2).

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floor space will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floor space to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT to the loss of rural employment (Policy E5).

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them wants to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism does not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London. Activities most attractive to visitors, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H1.

I OBJECT. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to the dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Surrey University could provide accommodation for a far greater proportion of its students on its campus if it made more efficient use of its existing site, which would free up dwellings in the town for local people.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**Comment ID:** PSLPP16/3792  **Respondent:** 15348033 / Peter Nicholas  **Agent:**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**POLICY H3 – Rural Exception Homes**

I OBJECT. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1).

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.
With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time; particularly at weekends, hundreds of cyclists pass through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments, there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk of injury to the public. In the case of West Clandon, the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1).

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further.

There is no provision for increased capacity of Guildford hospital.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2).

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situation worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to poor air quality concerns (Policy I3).

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on the health of local residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2).

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional
circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

I OBJECT to development in areas which are at risk of flooding (Policy P4).

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well, I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

I wish to object to a number of aspects of the proposed Guildford Borough Local Plan, and set out below my specific comments;

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1).

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities through over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities. In particular the existing road network will not be able to cope with the increased traffic that would be generated by the proposed development.

As a resident of West Clandon, I have particular concern about safety issues in the village. As you are aware, the main road through the village, being an A road already carries a great deal of through traffic and there seems to be no alternative to this. At various points, the road narrows so as to be only just wide enough for two cars to safely pass and not wide enough for a lorry (of which many pass through the village) and a car, let alone two lorries. As a result, lorries frequently mount the pavement. There is generally only a pavement on one side of the road, necessitating pedestrians to cross the road in a number of places. The traffic that would be generated by the proposed developments of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill will create traffic chaos in the village and undermine the safety of pedestrians and cyclists.

The balance of residential development between existing urban areas and Green Belt land is wrong. The policy of further retail development in Guildford centre is clearly misguided as retail sales steadily shift online. The North Street regeneration project has been proposed for many years already and has never happened. Why not? I think it is highly doubtful that the retail development proposed in the Plan can be financed and the project will languish for many more years. Meanwhile, there is demand for housing in the Borough and town centre residential locations are popular with the young and the old alike. If the proposed retail development in Guildford centre were curtailed, a few thousand more dwellings, a significant proportion of the number seen as needed in the Plan, could be built.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
I OBJECT to the Borough Wide Strategy (Policy S2).

1. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

2. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation of Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D).

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability and
- flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the figure of 322 used in previous plans. The SHMA report methodology is, I believe, inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

- Destroy views from the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
- Remove 72 hectares of scenic farmland and additional woodland from the green belt
- Increase tailbacks on the A31 and traffic congestion
- Result in rat running through local roads
- Add to Guildford’s pollution.
I object to removing the Horsleys from the green belt.

I object to the building of 533 new houses in the Horsleys. I also object to development of the Wisley Airfield. The developments would create too much traffic on already congested roads. The medical facilities in the area are already stretched. There would not be enough car parking spaces in the shops or station. Drainage in the area is already inadequate and there will be much higher levels of pollution. The schools in the area are already full, please do not destroy our beautiful countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object removing Send Business Park from the Green Belt (4.3.15).

Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

| I object to the proposal for a Waste Management Facility in Green Belt (A58) |
| The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting. |

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. That has now been removed, thereby accepting that needing to make greater than normal profit is to be an acceptable reason not to deliver affordable homes.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Question 6: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan."

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

Comment ID: pslp172/2968  Respondent: 15348513 / Daniel Marshall  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A39

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

On Policy A39 arbitrary wording has been added to include self-building or custom building plots within the allocation of 100 dwellings in order to make the policy compliant with national legislation as opposed to what is appropriate for the site. The allocation of 100 dwellings on site contravenes Policy ID4 which inter alia states that: "Ensure appropriate density to make the most efficient use of the land whilst responding to local character and context". 100 houses on a 5.7ha site does not respond to local character and context given the nature of the immediately surrounding houses and the general established density of development in the village of East Horsley. The inclusion of self-build or custom build plots will not enable this density to be achieved as these type of developments will require a greater plot size to make them viable. I therefore object to the inclusion of Policy site A39 as a site for 100 homes as this is not a site that is capable of sustaining this number of dwellings if the principles of Policy ID4 are to be observed.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
On infrastructure, the revised plan proposals do not address the additional strain on despite the overwhelming objections on subject in response to the previous consultation.

In particular the wording of Policy ID1 has been amended to give the impression that provision of adequate infrastructure will be enforced. However, this is not within the gift of GBC, but, in the case of the road network, by Surrey Highways and Highways England both of whom will be influenced by budgetary constraints elsewhere within their jurisdiction. Equally traffic Impact assessments will be prepared, and paid for, by applicants and not by GBC and will therefore present a biased outcome in support of any development.

I object to the inclusion of all sites other than brownfield sites on the basis that that GBC will be unable to secure or enforce the provision of the requisite infrastructure provisions either by negotiation with developers or through other government agencies. Any development must be in current urban or brownfield site areas where there is already an appropriate infrastructure provision.

No consideration has been made in the revised proposals for the principle enshrined within the NPPF that exceptional circumstances must be demonstrated in order to develop within the Greenbelt. The proposal to inset the village of East Horsley has not been justified by exceptional circumstances. No account appears to have been made in the revised plan to the overwhelming body of public opinion that objects to the development of the greenbelt and which advocates the development of brownfield sites as priority. I object to the development of new accommodation on Greenbelt and to the proposal to inset the village of East Horsley and others.

I am writing to voice my objections to the draft local plan for the site in Normandy. I am retired and I therefore do not have to travel at peak times but the traffic on our local route and make getting around our local area extremely difficult. Today for example we had rain causing the drain at the top of Wanborough Hill to overflow this had the effect of nose to tail traffic tailing back on Westwood Lane, with the new development in place the numbers of cars on our lanes will be greatly increased.

I further object on the grounds that we do not require another school in this area as we already have schools which are accessible to the pupils in this area with capacity to accept them. If this school is built for the complete school curriculum years these pupils will need to come from outside the Normandy area putting very high stresses on the transport and road system.

I also would draw your attention to the wildlife that is currently residing alongside the occupants of Normandy, doubling the size of our village will lead to the decline of any wildlife in the immediate area. We are also adjacent to the Thames basin and although this is a conservation area this vast influx of people will have a detrimental affect a on the environment.

I object as also there are no provisions to increase the capacity of either our doctors or the local hospital and this will have very serious consequences on our health provision.

Our roads or paths cannot cope now and with no assisted road crossings on any of the raids will result in a tragedy.

The proposed 35% increase in Horsley households as the result of the proposed 533 houses (plus smaller developments) seems completely disproportionate and cannot fail to impact on our already overstretched medical facilities, schools and roads.

Public parking in the small commercial areas for shopping etc. is already very tight and the increase in household numbers would result in extreme under provision.

The impact of the proposed development would have a hugely adverse impact on the quality of the environment in the two villages, radically altering their character. The proposals would effectively turn the two villages into a new town midway between the existing settlements of Guildford and Leatherhead, eroding the open spaces that are such an important feature in the identity of the Horsleys.

The proposals take no account of the inability of local infrastructure to cope with such a large scale of development. Already the roads through the villages carry much more traffic than they were designed for and are bedevilled by inappropriate commuter traffic and lorry use. The local surgery and schools are oversubscribed, and the Horsley station car park has no spare capacity. Parking in East Horsley village is also under pressure.

Attached documents:

---

Comment ID: PSLPS16/1794  Respondent: 15348833 / Barry Winser  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) -

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   a. The assertion that the development will result in a meaningful shift to cycling and the development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

   b. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
e. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

f. The lack of suitable public transport The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

1. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

2. I object to the fact that air quality concerns have not been taken seriously- air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

3. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

4. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning and Environmental Officers.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

4. The existing infrastructure in terms of roads, drainage, schools, and medical services, cannot sustain the additional need arising from such extensive housing. The roads around the village are already very busy and the car park at Horsley station is invariably full during the week. There are known sewage overflow problems in the Ockham Road North and Green lane areas. The Raleigh primary school, serving both East and West Horsley, is full every year, and the Howard of Effingham, the only secondary school with reasonable distance is oversubscribed every year. Kingston Avenue Medical Centre, which serves both Horsley villages, is struggling to cope with existing demand.

I should be grateful if you would take my views into account in this matter.

2. The development of up to 385 homes on the 4 proposed sites in West Horsley (Policy A37, A38, A40, & A41) are at much higher densities than exist in the village settlement and would be totally out of character with the existing mix of different housing styles and layout of the village. The proposed increase of up to 385 homes represents an increase of 35% of the current number of homes which is excessive in the light of the infrastructure capability – see point 4 below.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Nothing has been put forward since last year's Consultation to improve the sustainability of the West Horsley development sites and thus meet national policy requirements. Every home on the West Horsley sites will need a minimum of one car to enable residents to get to shops, the medical centre, library, and Horsley Station, regardless of how much pressure is applied to adopt cycling and walking as the preferred means of travel.

I object to no changes being proposed since the 2016 consultation to removing East & West Horsley from the green belt.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I am writing to express my objections to the 2017 changes to the Local Plan.

The reduction in the number of new homes proposed in the Green Belt does not go far enough in reducing the still substantial number of new homes proposed on green belt land.

The eastern side of the borough is now scheduled to take an even greater proportion of new homes in the Green Belt.

It is unacceptable that Guildford is choosing not to constrain its overall housing growth, as many other Councils have done, to protect Green Belt. The objectively assessed housing target, though reduced since 2016 to 12466 homes, will by 2034 mean that Guildford will have grown by nearly 25%. This is nearly double the ONS’ prediction for the growth of Guildford.
I write to OBJECT to Amended planning application 15/P/00012 for the following reasons:

**Sustainability:** The site is remote and occupants will rely on the use of the private motor car adding to traffic congestion on both the Strategic Route Network (the A3 and the M25) and local roads which are already running over capacity.
- The application relies on people switching to walking, cycling and public transport. This is unrealistic as it is two miles to the nearest railway station and at least half the route has no footpath. Roads are narrow and unlit.
- There is no spare parking capacity at either of the local stations.
- Sites of this size are required to provide outdoor open space. The applicant has “double counted” the outdoor space with that required for SANGS
- The loss of high quality agricultural land is in contravention of policy.

**Air quality:** The air quality figures are based on an unreliable transport assessment.
- The applicant has not used the DEFRA modelling statistics as required and rather appears used numbers from an unrecognised (and unreliable source)
- Poor air quality is exacerbated in the area by temperature inversions which trap the air. Young and old are extremely susceptible to poor air quality.
- Air quality is not improving as fast as expected, partly due to the excessive emissions (VW et al)
- The impact of poor air quality on RHS Gardens at Wisley and the Thames Basin Heath Special Protection Area (SPA) is already in excess of legal limits.

**Transport:** The transport assessment makes a number of erroneous assumptions and is not credible.
- It is completely unrealistic to assume that there will be a decrease in vehicle movements.
- There is no impact on traffic for the recently added secondary school, nor from the fact that prior to the school being built the children will have to be transported to the nearest available school in Leatherhead – adding to congestion.
- There appears to be no impact shown for the 270 daily bus movements or for the waste lorries or HGV deliveries to the site.
- The TRICS data used for comparison is not a relevant measure: site not comparable with a site in Guildford, nor a site 400m from the centre of Redhill, nor one on the edge of Staines.
- The traffic counts bear no relation whatsoever with counts submitted to Guildford or to Woking borough councils in support of other large development projects.
- The modelling in the Transport Assessment at 7 junctions close to the site bear no relationship to the daily experience of residents, evidencing flawed modelling.
- The number of daily trips is understated in the region of 1000 vehicle movements.
- Additional traffic will have a negative impact and cause irreparable damage to historic houses and other buildings in Ockham/ Ripley/Downside and further afield.
- If allowed, the impact of the additional traffic may prohibit other developments further south on the A3 or indeed those needed by the RHS.

**Appropriate development**: The site is in the Green Belt in a rural location, hemmed in by the A3 to the west, the TBHSPA and the M25 to the north and the Conservation area of Ockham Village to the south.
- Green Belt boundaries can only be changed in the local plan process and in exceptional circumstances which have not been demonstrated.
- The site is not big enough to provide satisfactory living standards even for “affordable housing”.
- Four and five storey buildings are not appropriate in the rural environment nor on an elevated site.
- Residents will be crammed in with little outdoor space, a noisy location, with very poor air quality. The density of housing proposed is similar to that in Islington.
- The site is clearly visible from the Surrey Hills AONB and as a result it will have a negative impact on views to and from the AONB.

**Thames Basin Heath SPA/SSSI/SNCI**: The impact of 2,068 houses on the environmentally sensitive TBHSPA cannot be mitigated. Damage will occur to the habitats of the protected and endangered rare species (including skylarks, nightjars and many others on the RSPB red list) in contravention of the EU Birds Directives and Habitats Regulations.
- The siting of the proposed Suitable Alternative Natural Green Space (SANG) adjacent to the SPA will only increase visitor numbers causing further damage.
- Part of the SANG is in a designated flood plain.
- Para 119 of the NPPF “presumption in favour of sustainable development” does not apply where development requires assessment under the Birds or Habitat Directives.
- It is impossible to state without doubt that the mitigation proposed will prevent damage to the SPA particularly in the light of inadequate traffic/air quality reports.
- There are likely to be over 700 dogs and 700 cats living on the proposed development. These will be a constant threat to ground nesting birds on the SPA and cannot be mitigated by one warden working a normal working day.

**Impact on the local area**: The additional 5,000 residents is the equivalent of almost doubling the population of East and West Horsley combined. This increase in local population will impact:
- Light pollution, noise, traffic and infrastructure which has been gravelly underestimated and proposed mitigation measures are totally inadequate.
- The cumulative development in the borough and in the neighbouring boroughs of Woking, Waverley and Elmbridge per the objections from both Elmbridge Borough Council and Woking BC

- The water table and flooding in the area. It appears that no impact assessment has been done relating to the loss of agricultural land which currently soaks up a significant volume of rainwater.

- Listed buildings adjacent to it such as Yarne, Bridge End House and Upton Farm

- Via closure of a number of local roads coupled with an increase in traffic will affect a large number of road users from Cranleigh to Cobham and everywhere in between

**Inaccuracy of the documentation**: There are factual errors in the documentation

- Highways England have recommended that the proposal cannot be determined due to the applicants failure to provide traffic data in the format required

- There are a number of misrepresentations in the paperwork e.g. nine stations within 5 miles – this is however “as the crow” flies – only Horsley and Effingham Junction are within 5 miles by usable road from the middle of the development

- The applicant’s description of the site as brownfield is a gross over-simplification. 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remaining runway, a habitat for rare flora and fauna, (14ha) has never had buildings. The remainder of the site (55%) is high quality agricultural land.

**Other**: This site is not deliverable within 5 years due to problems with sewerage and water capacity, outlined by Thames Water & the OCK DVOR air traffic control beacon which limits development until 2022

- No very special or exceptional circumstances exist
- Alternative sites exist

- The proposal includes the site SCC safeguarded for waste under the Surrey Waste Plan

- The site is not listed for development under the existing 2003 Local Plan

- There is not enough land to provide a sustainable community based on GBC’s own parameters

- There is no update at all to the Heritage study despite the significant Bronze Age haul found in Ockham village in May 2013 and the likelihood of further remains on the site.

I trust the Council will find this useful, in their deliberations.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPA16/1087  **Respondent:** 15349281 / Steve Aptel  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
1. I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.
The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to Gosden Hill developement being in the Local Plan The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.
No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan. Please ensure that I receive written confirmation that you have received this correspondence by emailing me your acknowledgement.

Please also ensure that my objections are seen by the relevant Planning Inspector.

I have itemised my objections below but also wish to support some of my points by recalling personal experience and other observations (A-C)

1. **FLOODING**: The Garlick's Arch area is a catchment area for The East Clandon. This stream poses a significant flood risk to parts of Send Marsh, especially when there is heavy rainfall in a short time period. Any development of the Garlick's Arch area will significantly increase the rate of "run off" and this is likely to overwhelm the capacity of the stream through Send Marsh.

2. **Increased traffic congestion**: Traffic levels in the area are already high. The road infrastructure cannot cope with more. This is highlighted when there is a problem on the A3 or M25. Traffic diverts through the Ripley / Burnt Common area and there is gridlock.

I respectfully remind Guildford Borough Council that it has a duty of care to residents and this must be taken into consideration when evaluating the impact of traffic in the area.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

1. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition of north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. **I OBJECT to the loss of rural employment (Policy E5)**

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in...
London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

I conclude by adding I realize I am lucky to live here and can see why many would want to do the same. But unrealistic and overly ambitious development destroys the very elements that make Clandon and neighbouring settlements special. Surrey has few real villages left so why not preserve rather than blight them?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

1. I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF. The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond. Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel. The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools. Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day. Burpham's sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost. There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size. Electricity supply is also inadequate and would require a big infrastructure development. The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London. The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants. The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley. If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km. Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3. Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan. Please ensure that I receive written confirmation that you have received this correspondence by emailing me your acknowledgement.

Please also ensure that my objections are seen by the relevant Planning Inspector.

I have itemised my objections below but also wish to support some of my points by recalling personal experience and other observations (A-C)

A. FLOODING: The Garlick's Arch area is a catchment area for The East Clandon. This stream poses a significant flood risk to parts of Send Marsh, especially when there is heavy rainfall in a short time period. Any development of the Garlick's Arch area will significantly increase the rate of "run off" and this is likely to overwhelm the capacity of the stream though Send Marsh.

B. Increased traffic congestion. Traffic levels in the area are already high. The road infrastructure cannot cope with more. This is highlighted when there is a problem on the A3 or M25. Traffic diverts through the Ripley/ Burnt Common area and there is gridlock.

I respectfully remind Guildford Borough Council that it has a duty of care to residents and this must be taken into consideration when evaluating the impact of traffic in the area

I respectfully remind Guildford Borough Council that it has a duty of care to residents and this must be taken into consideration when evaluating the impact of traffic in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. I believe this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/3877  Respondent: 15349281 / Steve Aptel  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy. The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Borough Wide Strategy (Policy S2)

a. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

b. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common-sense view, “West Surrey” is much too small.

c. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”.
Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp173/95  Respondent: 15349281 / Steve Aptel  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Appendix D: Evidence base
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/1090  Respondent: 15349281 / Steve Aptel  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.
The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/198  Respondent: 15349281 / Steve Aptel  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/199  Respondent: 15349281 / Steve Aptel  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: pslp171/201  Respondent: 15349281 / Steve Aptel  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.
There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/195  Respondent: 15349281 / Steve Aptel  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.
The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. I believe this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I understand that the Strategic Housing Market assessment done for this area is quite out of sync with the official estimate of population growth in the Borough, so one must ask, who gains from this proposal other than vested interests in the building trade and insiders to the process. In all we find these proposals to be wholly unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In addition, we are highly surprised and shocked to find out that the Development of over 2000 houses on the Wisley Airfield and surrounding Green Belt areas is back on the plan, having been exhaustively studied and resoundingly rejected. The new plan has not addressed any of the concerns and has hardly changed. The area simply could not absorb this number of new houses and developments and is in between an already congested set of infrastructures would buckle under the strain. By this letter I add our names to object to this plan as well.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The planned addition of over 500 houses (probably housing in the order of another 1500 to 2000 people) in the Horsley's would have huge negative impact on the local community and would overload the already stretched infrastructure with significant deficiencies in the potential provision of additional Healthcare and parking in either of the Railway Stations. There is little or no Public transport, so this does not provide alternates. Schooling in particular is already oversubscribed and adding up to 1000 more children to the area would be catastrophic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We have suffered from flooding in some areas surrounding Horsley, the run off from these additional housing would overload the drainage system and cause extensive flooding across roads and houses.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Local Plan as the development proposed is not sustainable (Policy S1)

13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially the beautiful areas of Chilworth and Shalford. The local communities don’t need these houses. Chilworth and Shalford have inadequate bus and train services, so almost every adult will have to have a car.

The development should be in urban areas where there is sustainable transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
District Centre - GBC proposes that East Horsley is defined as a District. East Horsley is a rural village with character and open spaces in Green Belt and does not have space available for warehousing, offices and industrial sites. There are already a number of empty shop sites which do not attract businesses so there is obviously no demand for a "District Centre".

Conclusion - There has been little or no change from the ill-fated 2014 Plan. GBC continues to Plan to encroach on Green Belt land for which there are "no exceptional Circumstances". No justification has been given for the proposed enormous growth in Housing in the Borough.

I therefore object most strongly to the Proposed Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1810  Respondent: 15349761 / John Kettle  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. A development of this size at Wisley Airfield would have an enormous impact on neighbouring villages, including Ockham, Effingham and the Horsleys. The facilities in these villages will inevitably be swamped by such a large increase in population at the proposed site.

1. The road management plans for the Wisley site appear totally inadequate and unsafe. The traffic leaving/joining the A3 at the Ockham roundabout will create an extremely dangerous situation and we are sure that GBC and the developers would not wish to be responsible for the injuries and deaths that will undoubtedly follow from the development of this site.

1. Air quality has not been taken seriously and pollution in this area is in excess of EU permitted levels and will only get worse if this development proceeds.

For the reasons given above I object to this site being included in the Local Plan and request that it is removed forthwith.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Infrastructure - There is little detail on the Infrastructure required to support the proposed housing development. There is already an overload on East Horsley facilities such as medical, schooling, parking and the narrow roads of this rural area. The usual suggestion is that the infrastructure will follow the developments but this is always years behind. The pressure on East Horsley from increased housing in East and West Horsley, as well as the prospect of a major (2000 homes) site at Wisley is frightening to those living in the Horsleys.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object most strongly to this Plan to turn Wisley Airfield into a "new settlement of 2100 dwellings", for the following reasons:

1. This is Green Belt and there are no 'special circumstances' to be argued in favour of development.

   1. A development of this size, leading to urban sprawl, is totally inappropriate and not the solution to the provision of more housing, which should only be by small growth utilising brownfield sites where possible.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Belt

There is a government defined policy that Green Belt land can only be built on "in exceptional circumstances". Indeed the GBC Local Plan includes the statement "We will continue to protect the Green Belt". The Local Plan proposes extensive use of Green Belt land and makes no case for "exceptional circumstances". GBC is proposing new settlement boundaries for East Horsley encompassing Green Belt land so that new houses can be built in a re-defined village settlement. In addition GBC is proposing a new extended boundary described as "the identified boundary of the village". This is in an area currently protected by Green Belt. There are no "exceptional circumstances" defined for any of the re-drawing of the
settlement area. East Horsley is set in a rural location and the Green Belt has preserved the whole character and openness of this village. A recent East Horsley village survey indicated that 88% of the residents wished to see this maintained. GBC has proposed two sites for development in East Horsley (Thatchers 48 houses and Ockham Road North 100 houses). Both of these would be using Green Belt land, and in addition would be at a density quite out of keeping with the density of local housing. GBC has also stated that 3 further sites, identified as LAA sites, should be considered as potential development sites. These are again on Green Belt land. I should like to make the point that identifying these LAA sites is by no means easy as GBC does not include them in the Local Plan proposals and therefore the general public is not aware of these extra sites unless they know where to look. In my opinion this is a devious and disgraceful way for the Council to behave.

I object to any Housing development that makes use of Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Thirdly, I object to the new interchange at Burnt Common with the A3 because of its impact on the village of Send. Send would absorb additional traffic from the proposed 2000 houses at Wisley Airfield, 2000 at Gosden Hill and 1850 at Blackwell Farm. Send Road is already highly congested at peak times in particular and would not have the capacity to increase traffic load further. There would also be increase in noise and pollution in the village as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to state my objections to the current plans for development at Send.

Only today, Theresa May, as our new Prime Minister, reiterated her government’s commitment to protecting our Green Belt yet Guildford Borough Council seems to be committed to allowing vast expansion of our village to a point where it is in danger of losing its distinction and merging with Woking and Guildford. Once we lose our countryside it is lost forever and remains brownfield. With great advances in civil engineering and smart materials, surely there are more efficient ways of managing brownfield spaces in order to avoid this urban sprawl.

I shall outline my specific areas of objection:-

Firstly, I object to Send village being removed from the Green Belt as this was intended to be a permanent categorisation in order to protect our land from unscrupulous developers and those who might place financial interests over environmental concerns. We must retain Send’s village identity and prevent urban sprawl and loss of our countryside forever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
We object to Guildford Borough Council's draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:

- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- increase tailbacks on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to Guildford Borough Council Proposed Submission Local Plan: Strategy and Sites (June 2016) and to the continued inclusion on the plan of the former Airfield, now known as Three Farm Meadows (TFM) - Allocation for the phased development of a new settlement of 2,068 dwellings.

Although I live outside the borough I use the borough for visiting friends who do live there. I object to the Local Plan for the following key reasons:
1. I object to the threat the local plan poses to the historic rural village of Ockham and the blight on properties there.

1. I object to the detrimental impact the proposed development of over 2,000 dwellings will have on a village with 159-residences. In particular this development and the associated increase in traffic will have a very detrimental impact on the environment, road safety and congestion.

1. I object to a plan which proposes that over 70% of new houses are built on land designated as Green Belt land in contrast to election manifesto promises made to the electorate.

I trust that these objections to the Local Plan will be fully considered and that the plans for development on the former Wisley Airfield (TFM) allocation A35 are now removed from the local plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I would like to support that Chilworth should come out of the green belt because its very difficult for young people to get on to the property ladder & most of the open space is within the green belt there are large amounts of open land mainly in the green belt so if we can then build more housing in the green belt then hopefully the younger generation could hopefully be able to buy a house in the local villages. We have to think about the future not the past...

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I have been a Guildford resident for almost thirty years, some of those in Ripley which I loved, and the remainder in Merrow and I am horrified at the revised plans to merge the villages along the A3 and the Hogs Back into one large housing estate. Apart from anything else, the A3 is already often gridlocked and any loss of the greenbelt would completely destroy the land surrounding Guildford forever.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Both my husband and myself object strongly to the 2016 Draft Local Plan for the following reasons:- 1, An extremely large number of houses to be built in a relatively small area of Guildford which will completely change the villages and their contribution and ambiance of living in the area. If that number of houses are built there will be an enormous increase in the number of cars and general traffic in and around Guildford. The infrastructure cannot cope with the traffic at present and if on average every house has 2 cars this will increase this by up to 12000 regularly using the roads making it frustrating and dangerous.

**Comment ID:** PSLPP16/3978  **Respondent:** 15350625 / Jenny Schneider  **Agent:**
I am writing to let you know that I object to the proposed removal of Green Belt protection from Chilworth. The Green Belt is a very important principal for the containment of urban development and protection of green space to the benefit of a very large number of people. I am very concerned that this is being contemplated and urge you to rethink.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to building 45 houses at Clockbarn Nursery owing to inadequate access and traffic volume. Tannery Lane is far too narrow to take any more traffic. The junction with Send Road is already very hazardous for vehicles trying to join the main road. Planning permission has previously been given for 64 apartments at the Tannery and for building the Marina, both of which will generate additional heavy traffic. The junction is too dangerous already and will make it much worse.

The plan appears to be ill-though through and wholly irresponsible as it would have the following impact on the local community: -

- Threat to area of natural wildlife and beauty
- Ongoing threat of total erosion of the Green Belt and the wildlife it encompasses
- Destruction of a tranquil, peaceful environment
  - Disruption during the construction phase
- Noise from building work
- Roadworks causing intolerable traffic congestion
- The construction of trenches along Tannery Lane for additional drainage, electrical services and supply of mains gas (there is no supply of mains gas along Tannery Lane and beyond – residents are instead reliant on oil or LPG).
  - Concerns of additional traffic, which would cause gridlock as the narrow lanes are ill-equipped to cope.
Tannery Lane – when driving, care is required with pedestrians, where there is no pavement. Turning out of Tannery Lane into Send Road can be extremely hazardous as large vans tend to park close to the junction obstructing the view of traffic to the right and left. The junction would benefit from a mini roundabout. This situation is bad enough with existing traffic – it would become intolerable with extra traffic generated.

Papercourt Lane would become a rat-run – narrow passing points on blind bends – cars frequently have to pull over or reverse into passing points to allow traffic to pass through. My car was recently damaged by a large SUV which was struggling to get past it.

Newark Lane access into Ripley Village is narrow and barely copes with current traffic levels. The road was built in an era where vehicles were much narrower – today wide 4 wheel drive vehicles struggle to get past. There is no opportunity to increase the road width due to the proximity of legacy housing to the narrow pavements. Newark Lane towards Pyrford is narrow and twisty – even now extreme care has to be taken with cyclists and turning right into Warren Lane is currently very hazardous due to a blind bend, on a steep hill. Additional traffic levels would make driving along Newark Lane intolerable.

Send Road - even with existing traffic levels extreme traffic congestion was recently encountered towards Old Woking when temporary traffic lights were installed. With higher traffic volumes this gridlock would become intolerable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to building 400 houses and 7000 sq metres of Industrial space at Garlick’s Arch, opposite Send Marsh Road. The site floods and is covered by ancient woodland. The industrial space is not needed but if it were it should be at Slyfield. Guildford’s housing requirements have been shown to be grossly exaggerated and they have refused to disclose their calculations. There is already great pressure on local school and medical provision and this can only worsen. With proper use of brownfield sites this Green Belt is not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to a new interchange with the A3 at Burnt Common because Send would have to take traffic from the proposed 2000 new houses at Wisley Airfield, 2000 houses at Gosden Hill, Burpham and 1850 at Blackwell Farm. Much of this traffic to and from the A3, M25, Woking and Guildford would go through Send. Send Road, which is already overloaded, would become gridlocked. Noise and pollution levels, already at excessive levels, would worsen. This must be avoided.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the removal from the Green Belt of the former Wisley Airfield, referred to as Three Farm Meadows, and
OBJECT to Allocation A35, the development of a new settlement of up to 2,100 dwellings, as a new settlement does not
accord with the
designation of the site as Green Belt and the Council has failed to provide the exceptional circumstances required by the
NPPF necessary to justify removal of the site from the Green Belt. It was accepted by the Leader of the Council at the
Advisory Board in April 2016 that the Objectively Assessed Needs (OAN) figure was exceeded. There is no need for the Council to exceed its OAN
but the Local Plan proposes to do so by causing harm. The OAN can be satisfied by development of more sustainable sites;
there is no need for A35 and so there cannot be any exceptional circumstances justifying it.

Green Belt

The Green Belt designation of the site prevents the sprawl of the urban areas of Guildford, Woking, Leatherhead and the
Metropolitan area. Previously developed parts of the site

such as the runway, taxiways and the aircraft hardstanding are all open and, therefore, buildings on these areas will cause
considerable harm to openness and the Green Belt. A new settlement would represent inappropriate development in the
Green Belt, would cause significant harm to the character of the surrounding area and significant harm to the setting of a
Listed Building. Development of this Green Belt site will discourage urban regeneration.

Sustainability

The Former Wisley Airfield is within the least accessible part of Guildford Borough, remote from rail stations with poor
local roads and lengthy bus routes and, given the proximity of the A3, it is implausible that development would be prove to
be attractive and safe for cyclists. The development is too small to be self-sustaining and yet large enough to cause
substantial adverse impact.

Deliverability

The site was subject of a recent planning application for a quantum of development comparable to that in the Proposed
Submission Local Plan and with a very similar boundary. The application was recommended for refusal and refused
unanimously in April 2016. Despite 15 months of negotiation with the applicant, Wisley Property Investment Ltd (WPIL),

</table>
additional issues of impact on the Special Protection Area (SPA), impacts on the strategic and local highways network, sustainable transport, affordable housing, air quality and education could not be resolved. The failure of the planning application confirms that there is no reasonable prospect that the project can be delivered.

Soundness

The reasons for refusal of the planning application submitted by WPIL and the failure of the applicant to resolve issues for a proposed development comparable to the Local Plan allocation confirm that the allocation is unsound. The allocation i) does not provide sustainable development ii) is not supported by exceptional circumstances to justify removal of the Green Belt designation and iii) lacks realistic prospects of delivery.

I OBJECT to the removal of East Horsley and West Horsley from the Green Belt. The NPPF requires the provision of exceptional circumstances to justify alteration of the Green Belt Boundary. The Council has failed to provide the necessary justification. Therefore, allocations A36 Hotel at Guildford Road East Horsley, A37 land at the rear of Bell and Colvill Epsom Road West Horsley, A38 land west of West Horsley, A39 land near Horsley railway station Ockham Road North West Horsley, A40 land north West Horsley and A41 land south of West Horsley should be deleted as allocations for residential development.

Too much development in one area of the borough but combined with the developments in other areas, will make Guildford one huge mass of villages which have joined together.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3988  Respondent: 15350785 / Rosemary Dresler  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Lack of details on essential infrastructure – the local schools have already expanded to take the existing capacity, doctors’, and the Royal Surrey are already stretched. The roads around Burpham and Guildford cannot cope with the existing amount of traffic – there are frequently delays getting into and out of Guildford as the A3 around the University and Royal Surrey are unable to cope. This leads to congestion around the Wooden Bridge, Ladymead and Stoke junctions. Any problems on the A3 cause all the traffic to come through Burpham which already has jams and congestion at rush hour along the London Road and Clay Lane without any additional traffic. In addition, the current roads are in a poor state of repair in many places.

The noise levels from the A3 and other local roads is already high – more traffic will make this worse.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the plan which relates to the site A46 and which would have effect of removing this site from greenbelt. It is common knowledge that only "very special circumstances" can ever justify such action.

We read that it was recently conceded as a result of an amendment put forward by Councillor David Bilbe that the only possible candidate for consideration as a very special need would be a proven requirement to build a new secondary school in Normandy. If it should be shown that such a building is not a requirement, the proposal as a whole should fail.

Local Councillor Keith Witham ascertained from personal discussions with appropriate head teachers that, on the contrary, there were many unfilled vacancies. Most schools in the area are under-subscribed and this adds up to a total of over 700 places. Furthermore, when in two years' time the planned new vacancies at the new 'financial College are added in, the total of over 1,000 vacancies will provide ample future provision. Any new secondary school in Normandy would clearly be superfluous. The cost and all the traffic overload at school term times would be unacceptable burdens with no compensatory elements.

The proposal to fill the area between Westwood Lane and Glaziers Lane with buildings would have the effect all by itself of turning Normandy village, a place of some character with beautiful views across the surrounding greenbelt area and which includes a splendid natural pond with a wide range of wildlife, into just another small town. It would be hardly exaggerating to state that that would blight the majority of Normandy people's lives. All the extra traffic would also add to problems with low-lying land and some flooding problems. (A cracked drain in Glaziers Lane has been acknowledged to have been caused by heavy traffic).
Traffic driving down from The Hog's Back into Normandy along Westwood Lane and often forking via Glaziers Lane and so merging with heavy traffic both westwards from Guildford and eastwards from Aldershot already causes constant hold-ups as well as damage to the road surfaces. The proposals would bring conditions to breaking point especially as Rushmore's imminent expansion by thousands of new homes will further to overload these routes.

I should expect further genuine attention being given to permitting more small developments on brown-field sites rather than attempting to build on the greenbelt areas in this heedless way.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1848  Respondent: 15350881 / Mark Hewson  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to take this opportunity to register my objection to the proposal to build 400 houses and 7000 sq metres of industrial space at Garlick's Arch.

- I object to Send Village being removed from the Green Belt status as I feel it is very important to retain the beauty of our countryside. The south east of England will become a concrete jungle if we don't take steps now to protect our ancient woodland and green space.
- I object to the already heavily congested local roads being subjected to further traffic.
- I object to the proposal for a new interchange to the A3 at Burnt Common which will result in further increase in traffic volumes through Send. The A3 is already subject to daily gridlock from high traffic volumes.

I hope the Council will decide the green belt can be respected so that it can continue to be enjoyed by future generations.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Land at Burnt Common London Road being allocated for 7000sq metres of industrial space Policy A58. This is unnecessary as there it would be irresponsible to future generations to develop green belt land where there are many other sites which could be used for industrial space. The Send area is being allocated a disproportionate amount of development which will impact the small roads and lead to the area becoming a cut through to the A3. The word minimum has been changed from the previous maximum which opens up the site to future further development beyond what is in the Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. Wisley Airfield.

I object to the building of 2000 house on the Wisley airfield. The case for so much additional local housing is not made. The pressures from additional nearby homes, people and dogs will jeopardise conservation efforts to preserve a rare habitat for nature at Ockham Heath. The narrow feeder roads will struggle to cope with additional traffic and there will be increased congestion at junctions to nearby main roads. In combination with the other planned developments in the Horsleys, the Wisley site development will create a large block of suburbia in what was previously a mixed semi-rural community.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT most strongly to the removal of EAST and WEST HORSLEY form the GREEN BELT.

A ring of GREEN around London was meant to PREVENT LARGE SCALE URBANIZATION of GREATER LONDON.

I further object to the incredibly large number of houses allocated to EAST and WEST HORSLEY making the two closely linked villages totally unrecognizable from what they are today, with many very old houses, and most of the rest built to reflect and fit in with semi-rural surroundings. I have lived in Surrey for 60 years, 36 in West Horsley, and there has already been considerable development, but not on the scale now proposed, from SEMI-RURAL to URBAN.
Surely further use of BROWN-FIELD sites in GUILDFORD which is now a City and already has many high-rise buildings could be accomplished with careful planning.

Roads, schools, hospitals, public transport (both rail and road), water supplies and sewerage will be adversely affected and will need to be enlarged and up-dated causing considerable disruption to two small villages.

So many extra properties will bring a significant number of extra cars - local traffic is already considerable in the morning rush-hour and also from mid-afternoon when schools close, through to the evening rush-hour.

Many local people and visitors enjoy WALKING and CYCLING in this area, both for recreation and to observe the considerable amount of wild-life - which if this URBANIZATION proceeds will not be available for future generations.

Many areas of this country would welcome housing development and new businesses to provide JOBS and good housing - THERE IS NO SHORTAGE OF JOBS in LONDON and the SOUTH EAST.

I understand that we cannot stand still completely, but please not on so LARGE a scale, and certainly retaining the precious GREEN BELT - once it is gone we cannot ever have it back.

It is proposed by the Council that a number of villages in the Guildford area are to have protection from the Green Belt removed and this means that there would be no protection against development.

One of the reasons I live in Chilworth is because it is a village that sits within open and beautiful countryside and it would be disastrous to allow ribbon development, which is what would happen.

More housing would produce a greater amount of traffic onto our already overcrowded roads and lanes.

The Conservatives were voted in with a promise that they would protect the Green Belt. If this policy is carried out it would be a betrayal that will be remembered at the next elections.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The proposals for Wisley airfield falls exactly into this category...GBC are trying to justify the development under unfulfilled housing need (which has been exaggerated at best) and in any case unfulfilled housing need is not sufficient argument to build on green belt land.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The affordable homes policy is laudable but GBC are planning on building them in the area of least demand where transport links are not good and there are limited jobs. In fact the demand in the village is for affordable three bed homes, contrary to what BC have outlined. The plans fail the test of sustainability on many counts, including this one.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4035  Respondent: 15352065 / Daniel Sinclair  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposed boundary changes would devastate the only open green communal area in East Horsley, Kingston meadows and other boundary changes are ridiculous in that they ignore natural boundaries which exist and are currently used (such as a deep drainage ditch) and would seek to move these to further the machinations of the developers. The arguments for the boundary changes are therefore invalid.

By changing the boundary to include area past the A246..and infilling in the spaces, you are threatening the green belt in the same way as new developments and I view this with the same scepticism and unless the boundary changes can be lawfully justified, they are invalid too.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to express my complete dissatisfaction with the proposed local plan. In many ways it is in breach of regulations and facts have been misrepresented by GBC.

My main objections are as follows: I am not able to express them in legal jargon but these are the feelings of 90% or greater of the two villages of East and West Horsley. The Surrey Hills AONB is one of the great treasures of Guildford Borough and I strongly believe that protecting this area should be given the highest priority.

The opening statement of Policy P2 that “We will continue to protect the Metropolitan Green Belt” is blatantly disregarded all the way through this local plan. GBC appears to be in breach of this policy through the housing policies it has set out in the Proposed Submission Local Plan, whereby some 65% of developments will be made on land that is currently Green Belt. It is not a Government directive to build on greenbelt land as GBC present it and would have us believe. In fact Government guidelines say that greenbelt land should only be built on in. The local plan does not make nearly enough argument for ANY of the proposed greenbelt land developments to be considered ‘exceptional circumstances’. You have a duty to protect the greenbelt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In all, the draft plan is flawed in the extreme and GBC’s insistence on forcing developments where there is no proven need and riding roughshod over laws put in place to protect our valuable green spaces must be prevented at all costs. This plan must be rejected apart from the areas which I have identified.

Answer (if comment is on questions 1-7 of the questionnaire): ()
West Horsley is being considered as two separate plots and therefore the allocation of housing is increased due to this. I feel baffled as to why West Horsley is split into North and South since it has only one small section of shops near Bell and Colville. The village should be considered as one entity. When viewed as such, it is clear that the proposed density of housing is an extraordinarily high percentage, once again far outstripping identified need, none of which warrants building on green belt land, or reclassifying green belt land because there are no exceptional circumstances.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The need for housing projected over the next few years is far lower than GBC are supposedly making provision for. What you are proposing in effect is a 35% increase in housing in two small villages which barely have the facilities and infrastructure to cope with the population as it stands. This is unprecedented and far beyond anything proposed elsewhere in the borough. It is completely unreasonable especially since predicted growth in the area is much nearer 15%. GBC has voluntarily chosen to pursue a policy of aggressive civic and economic expansion which underpins all of the housing policies in the Local Plan. GBC’s target of a 25% increase in housing stock is entirely down to a political choice made by GBC and well in excess of the official statisticians’ forecasts. Why are GBC pursuing this aggressive house building project when there is no proof of demand?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

There is too much traffic in these villages already and this plan will cause more congestion in Chilworth and Shalford, with no plan to improve that.

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly.

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016).

I object on these grounds:

1. I object to the Local Plan as the development proposed is not sustainable (Policy S1)
13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially the beautiful areas of Chilworth and Shalford. The local communities don’t need these houses. Chilworth and Shalford have inadequate bus and train services, so almost every adult will have to have a car.

The development should be in urban areas where there is sustainable transport.

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
As a resident in this area I am greatly concerned over the impact not only here on our green belt, but on the constant traffic congestion that we experience on the A31 one which is a through road leading to the A281.

The A3 also experiences not only congestion but seems to have a frequency of RTAs.

We do not have the infrastructure to support this proposal which certainly not solve our need to provide “affordable” housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the proposal of removing Green Belt Protection to Chilworth Village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to building 400 houses and 7000sq metres of industrial space at Garlick's Arch. This area is known to flood. It is part of the Green Belt and is covered by ancient woodland. With proper use of brownfield sites, this Green Belt site is not needed. It would also add additional traffic to the Portsmouth Road and through both Ripley and Send. The local area does not have capacity at the doctors surgery or at the local primary schools. There is already huge concerns by current local residents about the lack of secondary school places for this area, to which this would add increased demand.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I Object to Send Village being removed from the Green Belt. The Green belt was intended to be permanent under the National Planning Policy Framework and there are no special circumstances that justify abandoning it. Both local councillors and central government gave a clear election promise to protect the Green Belt and this reneges on it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the disproportionate amount of development in one area of the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
If you're keen to use the green belt, go further afield to the outskirts...and build smaller premises for smaller shops to grow new businesses.

...Normandy or Ash...so many places to choose from.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have lived in Horsley since a child in the 60's and attended local schools in that time i have seen a massive change in the facilities and infrastructure of the village and local area.

Already the roads around Horsley are pot holed and in bad repair the A3 is now bottled necked everyday around Junction 10 M25.

The waiting time to get an appointment at the local doctors is now over 2 weeks and there are no places at the local schools.

All this is before any of the proposed 593 houses in the Horsley as well as the possible 2000 at Wisley i strongly feel that Horsley cannot support this level of development.

With all these projects it will be a few developers and land owners who will make a massive profit and the local community who will once more suffer.

Comment ID: PSLPS16/1876  Respondent: 15353409 / Sheila Mary Bailey  Agent:
We object to Guildford Borough Council’s draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

- Destroy view from the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
- Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- Increase tailbacks on the A31 and traffic congestion
- Result in rat running through local roads
- Add to Guildford’s pollution

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to object to the inappropriate proposals to develop a large number of houses on Wisley Airfield and in the villages of East and West Horsley.

Collectively, you have failed to take into account the widespread resentment of your proposals in the local communities. In particular,

1) the residents within these communities have chosen to live in rural/semi rural surroundings. If they had wanted urbanisation then they would be living in better serviced and valued areas like Guildford or Surbiton. Our area is a magnet to visiting tourists from London and the surrounding areas to enjoy its beauty, unique wildlife and beautiful vistas in harmony with their surroundings. The amount of cyclists using our area is ever increasing and that is just one example of why it is important to protect our environment. This has a social and economic value.

3) The impact on our local services will be highly detrimental. Already, the stress of getting into the local doctors surgery at a suitable time or even just finding a suitable place to park can be very stressful to a large number of older residents in particular. Parking in the village is already poor especially at the weekend where even a minor event such as a wedding can make it extremely difficult. How will schooling cope? You are already adding to a county wide crisis of building more new homes with ever decreasing neighbourhood facilities.

Finally, if you feel the need to do a Milton Keynes style attack on some of our finest landscapes then consider further down the A3 corridor towards Guildford where the current car boot sale is held. This may give easier access onto the A3 by being on a straight stretch away from junctions and the damage to the landscape and environment is arguably more "acceptable" as it is arguably less polluting and gives a speedy access to the shops and facilities of Guildford and Burpham.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The roads around East Horsley from 7am onwards are VERY busy. It can take up to 20 minutes on occasions just to cross the Effingham crossroads on the A246. Any additional housing of the scale you are proposing could lead to gridlock and again safety and pollution concerns in a wider area leading to the increased need for additional policing. Has this been included in your planning?

5) Local transport is very poor meaning ever increasing car journeys on ever more dangerous roads. There is virtually no existing infrastructure to accommodate these developments or very low levels of local employment which leads to increased traffic and environmental damage. The junction currently close to the Ockham Bites café onto the A3 is HIGHLY DANGEROUS. The traffic flow here is very fast and dense making it extremely difficult to join the road.

I OBJECT to adding a station at West Clandon (shown on map at page 18, but made no mention of elsewhere in the document that I can find), which will add tremendous burden onto all local services, not least loading up train services by the time they reach Horsley (which at peak times are already full by the time they reach Oxshott).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7. I OBJECT especially to Policies A36, A37, A38, A39, A40 and A41: all of the proposed Horsley sites for all the reasons stated in my introduction. I am aware of no local support for these plans. The amount of new housing proposed far exceeds local need. The proposed density of construction is too high (approx. 37 dwellings/hectare at A36) compared with existing development (approx. 8 dwellings/hectare around that site). The sites proposed are unsustainable with no supporting plans for enhanced services e.g. wastewater, schools, traffic management, flooding. No account is taken of impact of suggested Wisley Airfield site development. The inset lines suggested seem arbitrarily drawn and do not feel at all in keeping with the actual spaces on the ground e.g. some streets have houses on only one side so to develop opposite would be ruinous. Policies A37, A38, A40 and A41 require moves to the Green Belt, which I fundamentally disagree with and are contrary to Local Plan Policy P2 which states “we will continue to protect the Metropolitan Green Belt.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to OBJECT to the Proposed Submission of the Guildford Local Plan: Strategies and Sites June 2016 as it is in its current format.

I have tried to be objective as this is of historical, environmental and social importance. I have read the local press, looked at the GBC website, videos and Plan (very hard to read and scrutinise), been to local meetings and spoken to local people to get a balanced view.
I was brought up in Walton-On-Thames where my parents still live so I have called this area home for the past 40 years. A year ago I returned to Surrey with my husband and young son to live in West Horsley. I was fortunate to be brought up in the area and very happy to have been able to return here now.

We moved here to be close to family and friends, enjoy the more rural aspects of life and leave the hustle of London. However having known the area so long I am aware of the problems the area faces already such as severe congestion, overcrowded trains, enormous infilling of housing (radically changing the look and feel of the area, especially Walton and Weybridge), over stretched schools and health facilities. I am a nurse and I am very aware of the existing pressures on local health facilities.

My three main objections to the Local Plan are therefore:

• Erosion of the immensely precious Green Belt by redefining the boundaries; “the essential characteristics of Green Belts are their openness and their permanence” (Department for Communities & Local Government) both of which will be irrevocably lost if this Plan goes ahead. I feel that the “exceptional circumstances” needed to justify this environmentally devastating change have not been demonstrated by the Guildford Borough Council Local Plan.

• A very worrying lack of provision of infrastructure in the Plan to cope with the disproportionate scale of the proposal. Health, education, transport, sewerage are all currently under pressure and not convincingly addressed in the proposal. For our village, West Horsley, the Guildford Plan does not even consider the need for extra local services but the schools, the GP, the roads, the car parks are full, the bus service basic, the roads suffering severely from potholes and the area is subject to flooding and sewerage problems.

• The scale and density of the proposed plan is alarming which has not been satisfactorily explained in the GBC Plan. GBC has not revealed how it has arrived to the conclusion that such expansion and development is needed. In which case how can such potentially environmentally catastrophic changes even be put forward? How does this comply with Government guidelines?

From a far more local perspective, i.e living in West Horsley I am extremely alarmed at the density and scale of the proposed Green Belt change in the Horsleys and the density of permitted housing proposed. Why on earth is there a proposal for a 35% increase in new housing for West Horsley (the highest % than any other borough) when the allowance for surrounding villages is so much lower and for Guildford Town centre only 11%? I understand that Guildford University has available land for building and yet this is somehow being protected? Surely building there would be of greater local use than farther afield villages for university and hospital workers?

Furthermore the density of housing proposed in the Horsleys is not in keeping with the current local density of housing which will permanently change the community feel and look. The Key Evidence given in the Guildford Borough Economic Strategy 2013-31 does not explain the need or demand for this huge increase in housing, i.e 148 houses in East Horsley and 385 houses in West Horsley. And this number does not take into account any potential future developments once the villages are taken out of the Green Belt.

With regards to the surrounding villages and areas I am also very alarmed at, and object to, the scale and number of proposed sites which are all within the vicinity of the A3 dual carriageway: Wisley Village (2068 houses), Garlick’s Arch, Send Marsh, Ripley (400 houses), Gosden Hill Farm (2000 houses). This road and surrounding roads struggle daily to cope with heavy congestion. The proposals will only worsen this and the pollution increase yet further. With scarce and unreliable local transport and hence heavy reliance on private cars how can this proposal be realistically sustainable?

The proposed Wisley Airfield village (or more correctly new town) is incredibly close to Ockham, Ripley and the Horsleys. The repercussions on the Horsleys and the already over subscribed schools and GPs will be immense. I object strongly to this large scale development and understand that again the local infrastructure will not cope with this new town.

I have also been concerned to read that despite 20,000 objections to the 2014 Plan the New Plan 2016 is barely different and in fact the number of houses to be built per year is more than in 2014 Plan.

I wholeheartedly hope that local objection will force this Plan to be rejected on the grounds of un-sustainability, excessive scale, environmental repercussions, density, lack of infrastructure, lack of demand and most importantly the unrecoverable loss of precious Green Belt protection.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

11. I OBJECT to Policy A25: Gosden Hill Farm, which is massively out of proportion and will add tremendous burden onto all local services.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1883  Respondent: 15353633 / Neal Stone  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

8. I OBJECT to Policy A35: the proposed Wisley Airfield development which is completely out of keeping with the will add tremendous burden onto all local services. Only a small proportion of the site is brownfield (not totally as stated). It will add traffic to the already busy M25/J10/A3 junction. The number of houses suggested will ruin Ockham conservation area. The development would have a major negative impact on Horsleys facilities such as shops, trains, health centre etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1884  Respondent: 15353633 / Neal Stone  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
10. I OBJECT to Policy A43: Garlick’s Arch etc. site which is massively out of proportion and will add tremendous burden onto all local services.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

As any good citizen I understand the need to develop housing – especially that which is affordable for key workers. However, development must surely always be kept in check with the tone and style and density of the local spaces as well as the amenities that serve those communities. The suggested development areas earmarked in the Horsleys and the surrounding areas particularly Gosden Hill Farm and Wisley Airfield are completely out of proportion of the existing neighbourhoods and would change the feel of the local area irrevocably. And of course, other knock-on effects such as increased traffic and pollution are inevitable along with immense strain on services.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I suggest you really do listen to the voices of people from the communities that you serve and withdraw and then fundamentally rethink your proposed 2016 plan. Furthermore I would suggest that you truly engage with the communities that you serve and embrace their good ideas and criticism. The proposed submission is completely out of keeping with the local rural neighbourhoods and would be ruinous for generations to come, who will not get to enjoy the bucolic green spaces that their parents moved here for.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/4078  Respondent: 15353633 / Neal Stone  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. I OBJECT to Policy H1: you should compel the university to use its own space first of all to house students. This would surely have the effect of freeing up some housing space in town for those most in need.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/4081  Respondent: 15353633 / Neal Stone  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

5. I OBJECT to Policy I1: there is very poor consideration for the infrastructure needed to support the proposed changes. Such lack of consideration calls the thoroughness of the entire document into question for me. Local roads are hardly considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Potholes on East Lane have not been attended to in the year that we’ve lived here (despite reporting them) with existing traffic levels. And yet the plan proposes to add 35% more households into the

Horsleys? Imagine the increased use that our roads will take, not to mention the jump in traffic noise, road safety and pollution. Even with only one car per household (and most rural households seem to have at least two cars given public transport is so poor) that is an increase of 3000 cars in our immediate area alone. Have you ever tried to park at Horsley or Effingham Junction station in the rush hour, or had to wait for a space to park by the East Horsley shops? Our wonderful Horsley Medical Centre already seems to be running at capacity, with some waits at times to be seen. More households will add additional strain on already overstretched services locally and regionally. Have you ever seen the car park at Royal Surrey hospital mid morning or had to wait in A&E at Royal Surrey with a toddler? How many more consultants, registrars and nursing staff at Royal Surrey have been allowed for in your plans?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4082  Respondent: 15353633 / Neal Stone  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

6. I OBJECT to Policy I3: which ignores the current scarcity of rural transport and makes no mention of the dilapidated state of Surrey’s roads. The policy ignores the additional strains placed on the transport system by the thousands of houses proposed. For the railway, where are the suggested longer platforms, or more frequent trains, or early or late services, or toilets on rolling stock to support the plan?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4075  Respondent: 15353633 / Neal Stone  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Might it be more sensible to focus more modest development areas around those which are already significantly urban, rather than eradicating the protection afforded by the Metropolitan Green Belt? I was heartened by your statement in P2 that “we will continue to protect the Metropolitan Green Belt” but this is contrary to various Policies elsewhere. Your plan as it relates to the Horsleys and local environs seems to me to be completely out of keeping and proposes one of the greatest and fastest increases in housing numbers which is way beyond what seems in keeping, threatening villages that have grown very slowly over centuries.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

3. I OBJECT to Policy P2: your proposal to move (and effectively eradicate in places) the Metropolitan Green Belt in order to allow development of our precious green spaces. The green belt was instigated with a brilliant single idea in mind, which was to prevent urban sprawl and your plan demonstrates scant regard for its protection. All these spaces are discussed as potential land for development and I am shocked that there are no balancing values offered for enjoyment of these spaces for leisure, tourism, public health and wellbeing, biodiversity or natural heritage.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

4. I OBJECT to Policy P3: a minor extension of Metropolitan Green Belt here in Ash and Tongham seems not justify the greater changes proposed in P2 et al for insetting villages. Also, why is this ward (represented by the current Council Leader) given special treatment and called out specifically for protection?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLP16/4077  Respondent: 15353633 / Neal Stone  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to Policy S2: since surely Brexit invalidates the demographic data. Also there is no definite housing target given, which leaves the policy too open to future interpretation. The overarching impact of the plan being put in place would be to create an urban corridor connecting to the London suburbs, which would be devastating to the feel of local communities. Surely the policies cannot be seen in isolation since the effect of one on another is so significant.

Answer (if comment is on questions 1-7 of the questionnaire): ()

OBJECTION TO THE GUILDFORD LOCAL PLAN (sent by email)

A little over one year ago my wife and I moved to West Horsley from West London with our young son. We moved here away from the hustle and bustle of everyday London life, its density of housing and lack of green open spaces both for us to enjoy and our son to explore. West Horsley is the epitome of what we sought in leaving London: A peaceful, community-spirited, spread out village with local shops with acres of open, pleasant green spaces in and around to enjoy whilst being really well connected to the main roads, railways and airports.

I have tried my best to understand the Guildford Borough Proposed Submission Local Plan: June 2016, but have found it very complex and frankly unwieldy to digest. For your information, the links to Appendices B-E are missing from your website at http://www.guildford.gov.uk/newlocalplan/proposedsubmission

Despite your claims to have ‘listened’ to citizens following the last version of the plan it seems as though very little has changed and, in fact, more development is now being tabled than before. I am writing to OBJECT to the Guildford Borough Proposed Submission Local Plan: June 2016.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/546  Respondent: 15353633 / Neal Stone  Agent: 
I welcome the reduction in the number of new homes being proposed in West Horsley, but this does not go far enough in reducing the still very large number of properties proposed on the green belt in East and West Horsley. It also has the effect of making the eastern side of the borough take a greater proportion of the proposed developments.

Additionally, despite the reduction in proposed dwellings, there is no corresponding uplift in the sustainability of amenities, infrastructure or services such as shops, medical centre, library and Horsley Station proposed.

I also wish to note that Guildford is choosing not to constrain its overall housing growth like many other councils. I understand that the proposed dwelling building plan provides homes for a population estimate that is over DOUBLE the Office for National Statistics predictions for the same period.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We object to Guildford Borough Council’s draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

- Destroy view from the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
- Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- Increase tailbacks on the A31 and traffic congestion
- Result in rat running through local roads
- Add to Guildford’s pollution

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

· Destroy view from the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
· Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
· Increase tailbacks on the A31 and traffic congestion
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to register my strong objection to the New draft Local Plan.

I cannot understand why, after the GBC Planning Committee unanimously rejected the proposal for 2,000 homes (mostly on the site of the former Wisley Airfield), it has again been included in the plan; an explanation of this repeated inclusion should be made public in conjunction with clarification of the new reasons that justify it.

Much of this development would be adjacent to the Nature Reserves of Wisley and Ockham Commons and Chatley Heath. Substantial parts of this land have SSSI designations and development adjacent to such is forbidden under Natural England's Wildlife and Countryside Act 1981 and Access to the Countryside Act 1949 - amended by schedule 11 Natural
Environmental and Rural Committees Act 2006. You need to make public the proposed and actual consultations that you have had (and intend to have) with Natural England regarding the plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

No thought seems to have been given to the traffic congestion that will inevitably ensue; the only station with a good service to London is Woking, and anyone who travels to Woking from the Ripley, Send or Clandon areas will have already experienced the frustrating drive to Woking Station - the roads are not good enough for the present traffic let alone the additional traffic from the proposed development. Increased air pollution will also result from extra traffic.

Many of the local lanes have no pavements or paths for pedestrians and are narrow. Any increase in traffic (especially lorry traffic) will bring real danger to motorists, cyclists and pedestrians. The provision of cycle lanes is sporadic.

The poor state of repair of many of these roads seems to indicate that The Council already finds maintaining them difficult; a greatly increased volume of traffic will inevitably stretch resources even further.

This development is out of all proportion in relation to the currently existing infrastructure. Where are the plans that detail how this infrastructure problem will be solved?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
To remove Ripley, Send and Clandon from the Green Belt would create an amorphous suburban sprawl out of the three villages and, as such, compromise their identities. According to the National Planning Policy Framework set out by the Government in 2012, "There is a general presumption against inappropriate development, unless very special circumstances can be demonstrated to show that the benefits of development outweigh the harm caused to the green belt." (NPPF.2012). Beyond the need for new housing (which, as a reason, does not amount to "very special circumstances"), there is little in the new plan that satisfies this stipulation. Indeed, the following concerns (largely relating to infrastructure) would appear to demonstrate the opposite to be true.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposal to increase the size of the site for development will lead to even greater numbers of vehicles on roads which are not designed for even the present volume of traffic. The delays around the M25 Junction 10 slip roads have recently led to long build-ups on the A3 so how on earth will the present infrastructure cope with such a vast development of housing.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposed minimum of 400 houses to be built, coupled with the sites for "Travelling Show People" (why do they need permanent sites if they are "Travelling"?), and storage, is a development far too large for the area. The houses will be on Green Belt Land and result in a huge conurbation when coupled with the proposed development of Wisley Airfield. The roads in this area are already greatly overcrowded, with often poor air quality as a result. It will also involve the destruction of woodland full of glorious oaks which are a haven for wildlife.

4.4.23a A potential site for a Waste Management Facility is mentioned (tucked away in the hope that it will not be noticed?).

It is hardly a sensible option to plan to build so many houses and then put a Waste Disposal Site so close. With even the best of intentions these sites smell (especially in hot weather and with global warming happening, we are promised more heat) and to place them in residential areas is not reasoned. It would also be within 'striking distance' of the RHS Wisley - a world renowned enterprise - which would be highly sensitive to any malfunction of a waste disposal unit.

It is not worth the risk of the possible damage to people's physical and mental health to use this site.

It seems that far from taking into consideration the responses of the communities to the original local plan you have perversely altered the plan to build even more housing and industrial development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have lived in Hatchford since my marriage in 1959. I wish to add my name to list of objections who state that Allocation A35 Former Wisley Airfield be removed from the local plan.

I object to more houses being built on this site now named three farms meadow. The narrow winding lanes are not suitable for an increase of vehicles. It is too dangerous now for me to walk 200yards to post a letter at the Black Swan public house post box. I have to drive for my own safety.

I object to more traffic causing the air quality to further break the EU permitted levels.

I object to loss of Green Belt land. My husband and I are great nature lovers and walk through the woods almost daily on public rights of way!

I object to Guildford Borough Council proposed local plan (June 2016) and to continued inclusion in the plan of the former Wisley Airfield now know as Three Farm Meadows.

I would like to object in the strongest possible terms to the proposed increase in the number of dwellings in the Horsley area. The schools are already full. It is almost impossible to get a Doctor’s appointment without a week or two’s delay. It is difficult to park for the shops and the volumes of traffic are already equivalent to that of a busy town rather than 2 villages. Please reconsider!

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Effingham

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing in reference to the local plan for housing development in Effingham and in particular to the revision of its settlement/ inset boundary as detailed on page 338 of the local plan.

I am objecting to the revision of the inset boundary to include those areas marked in yellow.

In particular :-
1. The amenity land at rear of Middle Farm Place is designated open space and there is no need to include it in the settlement as this increases the 'crawl' of the village westwards. It is also an important part of the Middle Farm Place children’s recreational area and is constantly used for ball games etc.

2. The land immediately behind the houses in Middle Farm Close has no access and is part of the conservation area and is adjacent to farm land.

4/5. The inclusion of this land enables the urban ‘crawl’ westwards as stated above. Regarding the proposed allocation of the Barn (no 4) for housing, this is a barn of historic interest and from an access feasibility point of view can only accommodate a max of 5-7 residences. Any site allocation for such purpose should reflect a proper feasibility assessment on highway grounds.

In terms of land which could be accommodated within the settlement which at present are not, are the lands shown edged blue. These lands are in the main already developed and are intrinsic to the village configuration, particularly St Lawrence school and the Red House and British Legion. The only potential issue is the vacant land known as Lyons Field adjacent to the school, which is a natural extension to the village boundary and is arguably infill in any event, being bordered on 3 sides by development and on the other by the school playing fields.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1941  Respondent: 15356513 / Anthony Gatford  Agent: Tony Gatford

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. I OBJECT to building 45 houses at Clockbarn Nursery, due to inadequate access and traffic volumes. The junction with Send Road is already very hazardous for vehicles trying to join the main road. Planning permission has already been given for 64 apartments further along Tannery lane which will generate additional heavy traffic. This new additional housing would compound an already dangerous situation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1939  Respondent: 15356513 / Anthony Gatford  Agent: Tony Gatford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Page 1943 of 2804
2. I OBJECT to building 400 houses and 7000 sq metres of Industrial space at Garlick's Arch, Opposite Send Marsh Road. This is an area of Ancient woodland and very prone to flooding indeed recently over half a million pounds was spent downstream of this location to prevent flooding to houses in Maples Road and surrounding area's. The Industrial space is not needed but could however already be accommodated at Slyfield Park in nearby Guildford. Guildford Boroughs housing requirements have been shown to be grossly over exaggerated, and they refuse to disclose what formula they use to arrive at their calculated requirements. Proper use of Brownfield sites within the Borough should eliminate the need to encroach on such a Green Belt area!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1940  Respondent: 15356513 / Anthony Gatford  Agent: Tony Gatford

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. I OBJECT to a new interchange with the A3 at Burnt Common, because Send would have to try and then cope with traffic from the proposed 2000 new houses at Wisley Airfield, 2000 houses at Gosden Hill, Burpham and 1830 at Blackwell Farm. Traffic on this section of the A3 is already at a standstill during rush hour periods, and all such additional traffic would then flow through Send road which is already overloaded. This must be avoided.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1942  Respondent: 15356513 / Anthony Gatford  Agent: Tony Gatford

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
5. I OBJECT to the development of 40 houses and 2 travelers pitches at Send Hill. It is an inappropriate location, which would be serviced by a narrow single access Country road. Subsoil at the proposed site contains unsafe landfill waste as registered with GBC.

1. I OBJECT to Send Village being removed from the Green Belt.

The green Belt was intended to be permanent, per the National Planning Policy Framework and I believe there are no special circumstances to justify abandoning it. Send's Green Belt is an essential buffer between Guildford & Woking stopping it becoming one Urban Mass! Central Government & Local Councillors made a clear election promise to protect the Green Belt and this Plan reneges on the promise given to the electorate. Developers would be quick to seize upon such an opportunity and there would be no policy in place to stop them.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. GBC HAVE NOT FOLLOWED CORRECT PROCESS WITH THIS LATEST PLAN.

Since 2014 GBC has changed every major site in Send proposed for development, (now standing at some 485 houses and a massive new road junction). These very significant changes should require another full consultation under regulation 18, not a shortcut of Regulation 19 which GBC are attempting to get away with. This undoubtedly invalidates the whole Local Plan Process!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4) I object to the proposal to Inset Send Business Park from Green Belt because: There is extremely restricted vehicular access along Tannery Lane in both directions. Further development at this location would detract from the openness of the Green Belt and is totally inappropriate and uncalled for.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the Policy A42 change at Clockbarin Tannery Lane because: It ignores all previous objections by residents, and is a 33% increase in homes over and above the original ill conceived plan. Which would exacerbate existing traffic and flooding issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2) I object to Policy A43 change at Garlick's Arch because: It ignores the thousands of previous objections made by local people. It will cause extensive over development of our village and the number of homes is excessive. It will generate more traffic which will not only block up the local roads of Send and Ripley, but also the major P3 trunk road into Guildford which already struggles to cope with current traffic levels during rush hour periods. It is also a flood zone 2 allocated area, and subject to frequent flooding. There is also no proven demand for Travelling Show-people plots in this location.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2693  Respondent: 15356513 / Anthony Gatford  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3) I object to Policy A58 at Burnt Common because:
It was deleted from the 2014 draft because of previous objections. There is no proven reason to have more industrial and Warehouse development in the middle of the Green Belt, when Slyfield and Guildford still have empty sites and industrial units. This amounts to a huge over allocation of industrial land, in the middle of the Green Belt, given the current decline in demand for such industrial premises within the Guildford area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write in respect of the above and in defence of the Green Belt, a policy which has served us well over the past 50 or so years. Preserving the green lung around our metropolitan areas and the character and equilibrium of the villages in which we live.

Whilst I appreciate the need for more housing, I would direct you towards the many brown field site which exist where development opportunities are available without encroaching into large areas within the confines of our villages which are currently green and unspoilt creating the ambience in which we choose to make our homes.
In particular I would like to draw your attentions to the designated areas within the parishes of east and west Horsley, development of which would overwhelm the two places we all so enjoy and which would bring an unbelievable burden upon the services and residences existing at the present time.

In the event of development being permitted I foresee two outcomes, the pressure from existing services and infrastructure will bring with it the lead for further urbanisation and that land sold for redevelopment will be for the profit of the buyers who will erect five bedroom three bathroom houses rather than the smaller dwelling for which there is an undeniable need.

I feel that the array of notice boards which are being erected in the Horsley’s Dondens and Ripley more than endorse the view that changes to the status quo are unwelcome

I urge you to resist the pressures from central Government and preserve the integrity of the Green Belt for the benefit of future generations.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

One of the very serious issues it that of utilities of all kinds, but most notable in the area is that of drainage. This has been well documented over many years, including houses in New Inn Lane having raw sewage in their gardens, and the ‘run off’ from another 2,000 homes on Gosden Hill doesn’t bear thinking about. The schools, health services and community support systems will need to be doubled, so how will this be funded? We cannot afford the extra funding, and in spite of promises of improvements by past developers, nothing has been forthcoming.

I therefore register my official objection.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to register my dismay and objection to the re-hashed and poorly compiled report known as ‘the Guildford Local Plan’…which is presented in the manner that Chilcot would be proud of - wordy, far too long, unclear and ambiguous and appalling font and colours which render it impossible to read - should anyone have the time - for people with vision impairment.

I have many concerns and comments, however, will confine them to the main issues. I am confused as to why the issue of the already congested road network around the area - especially affecting Burpham - has not been addressed. I have it on good authority that the SHAR is unfinished! Surely you cannot even remotely consider attempting to cram in another 1,500 or 2,000 houses in the area until you have a sustainable infrastructure. This encompasses many things, but as at times the roads around Burpham are already almost gridlocked on a daily basis, you will add what amounts to another 3,000+ cars all trying to get through Guildford via Burpham. The pollution caused by this will take the air quality down even further as cars ‘idle’ on the roads. No further comment is needed about the road surfaces around here - they are notorious and known as some of the worst in the South east.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Just how accurate are your SHMA figures and was the person/people responsible for the figures adequately briefed or qualified to declare these? Only 4 years ago, the number of houses needed was put at 322 per year, even then this figure was disputed, however, comments and objections were never addressed and fortunately this was not carried through. So here we are, 4 years on and the figure has soared to around 693 per year in Burpham alone. What justification can you make for this dramatic and frankly terrifying number which will double the size of the village.

I object to the plan for the Gosden Hill development

1. The number of houses planned far exceeds the number suggested 4 years ago.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPA16/1120  Respondent: 15356801 / Clare Harlow  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

17. I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I OBJECT to the Strategic Housing Market Assessment (SHMA) figure of 693 houses per annum in the borough being too high (Appendix D)

- The "objectively assessed need" figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability and
- flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

14. I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from
encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**Attached documents:**

---

**Comment ID:** PSLPS16/1951  **Respondent:** 15356801 / Clare Harlow  **Agent:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

14. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

16. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

8. I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
5. I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

6. I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7. I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in pri An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in...
London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

3. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

13. I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

19. POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

9. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and
with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

10. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()

12. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and
the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4153  Respondent: 15356801 / Clare Harlow  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1) The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4155  Respondent: 15356801 / Clare Harlow  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2.

I OBJECT to the Borough Wide Strategy (Policy S2)

a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensibl This approach differs from all the other Borough Councils in Surrey.
b. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

c. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4. I OBJECT to building 45 houses at Clockbarn Nursery, due to inadequate access and traffic volumes. The junction with Send Road is already very hazardous for vehicles trying to join the main road. Planning permission has already been given for 64 apartments further along Tannery lane which will generate additional heavy traffic. This new additional housing would compound an already dangerous situation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1946  Respondent: 15356833 / Carolyn Gatford  Agent: Tony Gatford
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. I OBJECT to building 400 houses and 7000 sq metres of Industrial space at Garlick's Arch, Opposite Send Marsh Road. This is an area of Ancient woodland and very prone to flooding indeed recently over half a million pounds was spent downstream of this location to prevent flooding to houses in Maples Road and surrounding area's. The Industrial space is not needed but could however already be accommodated at Slyfield Park in nearby Guildford. Guildford Boroughs housing requirements have been shown to be grossly over exaggerated, and they refuse to disclose what formula they use to arrive at their calculated requirements. Proper use of Brownfield sites within the Borough should eliminate the need to encroach on such a Green Belt area!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1947  Respondent: 15356833 / Carolyn Gatford  Agent: Tony Gatford
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. I OBJECT to a new interchange with the A3 at Burnt Common, because Send would have to try and then cope with traffic from the proposed 2000 new houses at Wisley Airfield, 2000 houses at Gosden Hill, Burpham and 1830 at Blackwell Farm. Traffic on this section of the A3 is already at a standstill during rush hour periods, and all such additional traffic would then flow through Send road which is already overloaded. This must be avoided.

1. I OBJECT to Send Village being removed from the Green Belt.

The green Belt was intended to be permanent, per the National Planning Policy Framework and I believe there are no special circumstances to justify abandoning It. Send's Green Belt is an essential buffer between Guildford & Woking stopping it becoming one Urban Mass! Central Government & Local Councillors made a clear election promise to protect the Green Belt and this Plan renegades on the promise given to the electorate. Developers would be quick to seize upon such an opportunity and there would be no policy in place to stop them.

1. GBC HAVE NOT FOLLOWED CORRECT PROCESS WITH THIS LATEST PLAN.

Since 2014 GBC has changed every major site in Send proposed for development, (now standing at some 485 houses and a massive new road junction). These very significant changes should require another full consultation under regulation 18, not a shortcut of Regulation 19 which GBC are attempting to get away with. This undoubtedly invalidates the whole Local Plan Process!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp173/357  Respondent: 15356833 / Carolyn Gatford  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4) I object to the proposal to Inset Send Business Park from Green Belt because:
There is extremely restricted vehicular access along Tannery Lane in both directions. Further development at this location would detract from the openness of the Green Belt and is totally inappropriate and uncalled for.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/2695  Respondent: 15356833 / Carolyn Gatford  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1) I object to the Policy A42 change at Clockbar4 in Tannery Lane because: It ignores all previous objections by residents, and is a 33% increase in homes over and above the original ill conceived plan. Which would exacerbate existing traffic and flooding issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/2696  Respondent: 15356833 / Carolyn Gatford  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2) I object to Policy A43 change at Garlick’s Arch because:
It ignores the thousands of previous objections made by local people. It will cause extensive over development of our village and the number of homes is excessive. It will generate more traffic which will not only block up the local roads of Send and Ripley, but also the major A3 trunk road into Guildford which already struggles to cope with current traffic levels during rush hour periods. It is also a flood zone 2 allocated area, and subject to frequent flooding. There is also no proven demand for Travelling Show-people plots in this location.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2697  Respondent: 15356833 / Carolyn Gatford  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 at Burnt Common because:
It was deleted from the 2014 draft because of previous objections. There is no proven reason to have more industrial and Warehouse development in the middle of the Green Belt, when Slyfleld and Guildford still have empty sites and industrial units. This amounts to a huge over allocation of industrial land, in the middle of the Green Belt, given the current decline in demand for such industrial premises within the Guildford area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/4178  Respondent: 15357025 / Emma Willis  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to lodge my objection to the proposed new Local Plan that removes Green Belt protection from Chilworth village. The NPPF places great weight on the protection of Green Belt and states that Green Belt boundaries should only be altered in exceptional circumstances. The need for housing is not considered exceptional and I believe Chilworth village contributes greatly to the openness and character of the countryside that the Green Belt is meant to protect for future generations.

The village undeniably adds to the open character of the countryside in topography and views. It is bounded on side by the Tillingbourne river and the historic Gunpowder Mills in the Tillingborne Valley with steep part wooded slopes up to St Martha's church; which is a prominent landmark and backdrop for the village. The village itself represents a modest and narrow strip of development that is bounded on the other side by the railway.

Further infill development would encroach on the north towards the steeply rising slopes of St Martha's with the historic medieval church of St Marthas and to the South the ecological conservation area of Blackheath.

Surely, the status affords Chilworth some recognition of the historic and current value to the Green Belt. The area surrounding Chilworth is in the Area of Outstanding Natural Beauty and therefore is of national landscape importance - indeed the link with historic industry means that the Area of Great Landscape Value recognises the area of County importance. The Chilworth conservation area has large area of open space which contributes to a soft, rural feel complemented by a backdrop of semi-wooded steep hillsides. Indeed, the removal of Green Belt status threatens the character and feel of the area from overspill and infill development.

**OBJECTION** to A46 Normandy & Flexford’s strategic site plan.

The plan to put 1100 new homes and a school for 1500 pupils is going to have a massive effect on the area. This is a huge development on Green Belt land that will dramatically change the area.

The roads in this area barely cope with the level of traffic at the moment. Clearly 1100 new homes is going to dramatically worsen the situation and then to throw in a 1200 pupil & 300 staff school, most of whom will be coming from outside of Normandy is just madness.

Any idea that large numbers of pupils are going to cycle or walk to school along these overcrowded & narrow roads simply isn't going to happen, also the idea that hundreds of people are going to go to school via Wanborough Station, I find risible. What is likely happen is what happens everywhere else, the kids will get driven to school. This will add hundreds of car journeys into the area twice a day. The whole area is just going to be gridlocked.

The increase in traffic is bound to increase pollution, especially as so much of it will end up at a snails pace, at which point cars are their most polluting.

I object to the effect on wildlife much of which is in sharp decline. I fear the proposed Sangs are in areas prone to flooding and in the winter will push walkers and others on to Ash Ranges which has SSSI status, and the increase in users can only have a detrimental effect on vegetation and wildlife.

I object to the nature of the development and feel it should be in keeping with the existing housing.
I feel strongly that the burden of new homes should be spread more evenly throughout the UK and not heavily in southeast and not in large developments, however lucrative and convenient for builders.

Lastly and not least the vote to leave the EU has sent a clear message that the country does not want mass immigration, thus putting the whole need for such a review in doubt.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to changes to policy P2 for the following reasons

The statement that the metropolitan green belt will be protected against inappropriate development should be changed to the metropolitan green belt will be protected. The words inappropriate development are clearly designed as the thin end of the wedge to allow development that once started will continue and expand.

The green belt is designed to protect against unrestricted development and prevent towns and villages merging into each other and should be protected at all costs.

I object to the insetting of 15 villages an infilling of the green belt villages as this is another ploy in allowing development in the green belt.

I object to the Traveller site at Palm House Nurseries and Show–People site at Whittles Drive being made permanent an inset from the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s draft Local Plan proposals to build 1800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

• Destroy views form the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
• Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
• Increase tailbacks on the A31 and traffic congestion
• Result in rat-running through local roads
• Add to Guildford’s pollution

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

---

I am writing TO OBJECT to this proposal most strongly. There are so many reasons why this is totally inappropriate and a very bad decision, I will try and summarise my objections as follows:

- This proposal was added to the plan at the last minute it seems, and it is not properly thought through as I will demonstrate below – it comes across as suiting the wishes of the development company to make huge profits at the expense of the local community, and suiting GBC who would complete a large part of their obligations with one single development – again at the expense of the existing community and village
- It is totally reckless to destroy a village and local community with such a large disproportionate development – I totally understand the need for new housing and would welcome a smaller development – were this to be distributed across GBC fairly and proportionately
- GBC have not demonstrated the exceptional circumstances required to justify the release of this land – red sensitivity - from the Green Belt – no school is needed and if it were it does not have to be built on the Green Belt. Rokers are offering the potential for a school and development in a far more accessible area with better roads.
- A school is not needed in this area – there are very few children in the village, and a number of schools in the area which are currently undersubscribed – and were this situation to change could easily expand to take in further pupils which would be far less costly than building a new school from scratch. It seems that the need for a school has been invented to provide a convenient reason to destroy a large part of the green belt – which this present council during last year’s elections vowed to protect -what hypocrisy.
- So the school justifies the housing estate which justifies the school ………… you are creating the need which didn’t exist previously…….. Unfair on the local community, great for the developers and their pockets
- Our roads are already congested at peak times, and whenever anything goes wrong on other local roads, and busy the rest of the time. Adding in the traffic that would come with a further 1100 houses would bring the area to a standstill. I can’t see how there is any capacity to develop Westwood Lane or Glaziers Lane or Wanborough Hill – all country lanes which already struggle with the amount of cars on the road through the village – given the restrictions of existing houses and the railway bridges. The A323 similarly gets extremely congested. While
there is a station, the reality is that most people use cars to travel locally. South West trains are notoriously unreliable. An additional 1000 to 2000 cars on the road daily will bring us to a complete halt.

- It is already difficult to get a fast appointment at the doctors surgery – I can’t see that there would be capacity for this many further people.
- The impact on local wildlife would be devastating – why not look at brownfield sites – surely the green belt should only be looked at when there are no further brownfield sites available, and then in a proportionate manner?
- Concreting over so much land would be likely to worsen the flood risk in the area
- Our drainage systems are already very poor. We have called out Thames Water around ten times recently, as we are constantly getting sewage come up in our garden. What would be the impact of so many new homes on the current drainage system?
- There would be an adverse impact on the health and wellbeing of existing local residents – our needs are being callously swept aside – for profit and convenience

There has to be a better way, proportionate and reasonable development across the whole borough, focussing on brownfield sites and existing school resources. Please drop the proposal for A46 immediately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the late inclusion of the Garlick's Arch site A43 opposite the Send Marsh Road. This is a Green Belt site with ancient woodland and is prone to flooding. The planned 7000 sq metres of industrial site is not suitable and if required should be sited at Slyfield where there is already adequate space for such warehousing. Also the requirement of 400 houses on this site is based on dubious calculations which Guildford Council have refused to disclose. With proper use of Brownfield sites in and around Guildford, this Green Belt site is not needed.

I object to the planned new interchange with the A3 at Burnt Common as this would make the already crowded local roads completely gridlocked. Together with the proposed 2000 houses at Wisley Airfield, the 2000 houses at Gosden Hill Burpham and 1850 at Blackwell Farm, as well as the 400 proposed for Garlick's Arch, all traffic would have to travel through Send Village and local roads which are already overloaded.

I object to Send Village being removed from the Green Belt. The Green Belt was instended to be permanent as required by the National Planning Policy Framework and there are no special circumstances for abandoning it. Local councillors and central Government gave a clear election promised to protect the Green Belt and this should be upheld.

I object to the disproportionate amount of planned development in this area and the Council's complete lack of consideration for local residents whose lives will be severely affected by the mahem which will be caused by these large scale developments.

I feel that Send, Ripley and Send Marsh must be protected from the vast amount of development planned on Green Belt land and the health and welfare of existing residents should be considered.

Safety

The increased congestion and low speed cars for prolonged periods throughout the day will lead to very high levels of pollution in the local area. I am very concerned for my two young sons heath due to the proposed development at Gosden Hill Farm. From Winterhill Way there is no safe crossing point across this A3100 which is required to reach Burpham Sainsburys or Burpham Primary School. This is already a busy road and the proposed development will add 5,000+ additional cars to this section. I am concerned about the safety implications to my two young sons due to the proposed development at Gosden Hill Farm.

Infrastructure

The proposed development at Gosden Hill Farm will add significant strain on the local infrastructure. The sewage, water and power networks are currently strained for the local population and therefore significant improvements are required to be implemented before even considering building any more houses in the local area. There is not sufficient details in the local plan regarding essential infrastructure improvements and as such the Local Plan should be considered unsound.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Education**

I have two young sons, my eldest is 3 years old and we hope that he manages to get a place at Burpham Foundation Primary School for the 2017 intake and then on to the George Abbott when he is 11. Schools in the local area are heavily oversubscribed and adding 2,000 homes to the local area will obviously make the situation much worse. There is insufficient details about schooling and who will be providing additional school places for the Gosden Hill Farm development, as such the Local Plan should be considered unsound. I am very concerned that my children’s education will suffer due to this unnecessary development at Gosden Hill Farm.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Transport**

The road transport network is currently not fit for purpose. I am stuck in traffic every evening for a significant time trying to complete my journey home, this is mainly due to heavy congestion on the A3 and poor connection to / from the A3 in the Burpham area. The current road network needs to be upgraded to be suitable for the existing population before considering adding 5,000+ additional cars to the local roads that would be caused by the new homes, industry and park & ride proposed at Gosden Hill Farm. I understand that a tunnel under Guildford is being considered underneath the 50 mph section of the A3, the proposed location at Gosden Hill Farm would be the most sensible entry point for this tunnel so it is very short sighted to develop this land for houses. Improvements to the A3 like the proposed tunnel under Guildford are required to be implemented before even considering building any more houses in the local area. The A3100 London Road is the intended entry point to this new development at Gosden Hill Farm, this will become two way and all traffic heading
north on the A3 will be routed south down the A3100 to the Clay Lane slip road. This will lead to very heavy congestion around the Burpham roundabouts and all roads into Burpham. New Inn Lane and the A3100 are currently grid locked every evening due to rush-hour traffic, the development at Gosden Hill Farm will add 5,000+ more cars and cause significantly more inconvenience to everyone who uses these road systems. Improvements to the current road network in Burpham are required to be implemented before even considering building more houses in the local area. As a minimum any new development would need to include a 4 way A3 interchange north of Burpham around Potters Lane, this should be included as part of the future tunnel project. The Strategic Highway Assessment Report (SHAR) and Sustainable Movement Corridor (SMC) do not take account of the current narrow road limitations, pinch points or include adequate information regarding congestion and as such the Local Plan should be considered unsound. Congestion is clearly going to be very severe and make travel round Burpham impossible at certain times of day.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the 2016 Draft Local Plan,

I live on Winterhill Way in Burpham and am extremely concerned about the 2016 Draft Local Plan. In particular the proposed development of Gosden Hill Farm to build 2,000 homes and allocate multiple pitches for Travellers.

Green Belt

My family decided to live in Burpham because we liked the character of the village, wanted to send our children to the local schools and live in an area surrounded by beautiful Green Belt countryside. The 2016 Draft Local Plan puts all of these qualities that made the area desirable to us at risk. In particular the loss of Green Belt, once Green Belt is built upon it will be lost forever. Green Belt should only be built upon in exceptional circumstances and the Local Plan does not provide sufficient evidence to justify developing Gosden Hill Farm and as such should be considered unsound. More consideration should be given to developing brownfield areas. It is very upsetting to think that our local Green Belt areas are at risk due to an ill thought through and unnecessary development that will ruin the character of the local area forever.

Comment ID: PSLPP16/4224  Respondent: 15357761 / Ross Haimes  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
As per ONS Census Data, there were 5,221 people living in the Burpham area in 2001. Building 2,000 new homes on Gosden Hill Farm at the edge of the village will easily add an additional 5,000 people (assuming 2.5 people per home). This is clearly a disproportionate level of development in one area of the borough to the detriment of everyone currently living there, Burpham will double in size due to an ill thought through and unnecessary development. As mentioned in Housing Numbers above, this disproportionate level of development in Burpham has a high potential of leading to a property price collapse in the local area with significant negative economic consequences.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Housing Numbers

I do not agree with how Guildford Borough Council (GBC) have handled the Strategic Housing Market Assessment (SHMA). The SHMA method of calculating housing numbers is not clear and as such the Local Plan should be considered unsound, the number of houses proposed in the plan far exceeds what is required. GBC have simply taken the maximum projected number of houses by the SHMA without using common sense or rational judgement, I understand that other boroughs (e.g. Woking) are applying constraints to their overall housing growth and believe that Guildford should have a similar approach. The SHMA has been demonstrated to overestimate housing numbers in several areas, in particular the amount of new homes required to support job growth and students. Any population growth figures need to be revisited, especially following the vote for Great Britain to leave the European Union which is likely to significantly reduce external migration to the region. The building of houses far in excess of requirement has potential of leading to a property price collapse in the local area which will have long lasting negative economic consequences for all those who currently own homes there.

Consultation Period

I was shocked that a plan of this scale with such a devastating effect to the Green Belt, population, culture and infrastructure of the Burpham area is being rushed through with such a short consultation period. The plan was submitted in June and responses need to be received within 6 weeks by 18th July. This is a disgusting blatant attempt to steamroll the voice of the local population in order to get unnecessary additional houses built without due process.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to register my objection to removal of the green belt protection from Chilworth and Shalford and Peasmarsh

This would allow the guildford area to become a sprawling suburban development and would not be good for the rural environment

This is some of the most scenic country and well farmed, productive and used land and allowing building would be foolish.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
As a resident of Send, I am writing to Object to the proposed Draft Local Plan.

I object to Send village being taken out of the Green Belt. This is because the Green Belt I understand was always intended to be permanent as required by the National Planning Policy Framework, and there are no special circumstances to justify abandoning it. Send's Green Belt provides a much needed buffer to prevent the village being swallowed up and becoming a suburb of Woking & Guildford.

I also object to the proposal to build 40 houses and 2 travellers pitches at Send Hill.

This location is entirely inappropriate since the only access road is very narrow, and also the subsoil of the proposed site contains well documented unsafe landfill waste that has to be regularly vented; this information is registered with GBC.

Answer (if comment is on questions 1-7 of the questionnaire): ()
In a way this does not directly concern me since I live in Old Woking (Woking Borough Council, of course). However the billboards displayed throughout Send become increasingly alarming. Is there any really good reason for the opposition against the proposed development? Is there a shortage of land in the area - probably not? Yes it is part of a "green belt", but that can extend as far as you wish it to. Is there any good reason for this opposition except a dislike of change? As a well-intentioned member of the public I hope that the Borough Council will have very good reasons before they turn down this planning application.

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

We object to Guildford Borough Council’s draft Local Plan proposals to build 1800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

- Destroy views form the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
- Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- Increase tailbacks on the A31 and traffic congestion
- Result in rat-running through local roads
- Add to Guildford’s pollution

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Comment ID:** PSLPA16/1124  **Respondent:** 15358305 / Frances Hodgson  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPS16/1991  **Respondent:** 15358305 / Frances Hodgson  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.
The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

The Garlick’s Arch (A43) proposal would double the built area in the locality, and would irrevocably damage the character of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4238  Respondent: 15358305 / Frances Hodgson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.

The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: PSLPP16/4244  Respondent: 15358305 / Frances Hodgson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the lack of proper infrastructure planning for sites (Policy I1)

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4246  Respondent: 15358305 / Frances Hodgson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to poor air quality concerns (Policy I3)

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I object to not protecting the Green Belt (Policy P4)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to development in areas which are at risk of flooding (Policy P4)

The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016).

These are my main reasons/ I object on these grounds / …

1. I object to the Local Plan as the development proposed is not sustainable (Policy S1)

13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick's Arch.

The development should be in urban areas where there is sustainable transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4240  Respondent: 15358305 / Frances Hodgson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the Borough Wide Strategy (Policy S2)

GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there’s too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11% of the existing housing.

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

Objections to Guildford borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the former Wisley Airfield FWA, now known as Three Farms Meadows TFM Allocation A 35 for the phased development of a new settlement of up to 2100 dwellings

I STRONGLY OBJECT to the draft Local Plan for the flowing reasons:

1. I object to 70% of new housing planned on green belt when there is ample brownfield in urban areas

1. I VERY STRONGLY OBJECT to the removal of the former Wisley Airfield site from the Greenbelt land the site is needed to protect against an urban corridor from London

1. I OBJECT STRONGLY to the disproportionate allocation in this part the borough .

The impact on the narrow roads around the villages of Ockham, Ripley, Wisley, Horsley and others will be detrimental to health due to heavy pollution levels from the A3/M 25 junction, light pollution and general impact of heavy traffic down narrow beautiful country lanes .

1. I STRONGLY OBJECT to A proposed development of over 2,000 houses would result in more than 4,000 cars, heavy lorries and buses for proposed schools, chaos at the station of Horsley and Effingham, impact on village life, cafes and public houses and local amenities.

Chaos at the Ripley roundabout.

1. I STRONGLY OBJECT ......My main concern, viewed with complete amazement and horror is the inclusion of the Wisley Air Field (three Farms Meadow) in the Local Plan I was at the meeting when EVERY COUNCILLOR to a MAN objected and refused permission!!!!!!

WHY therefore has it been included? Whose suggestion was that?

I need answers please.

All the authorities represented refused permission for the right reasons as the whole proposed development for the airfield is preposterous and the impact would be felt for years to come., To the detriment of all who live in the local area and the people yet to come .

Therefore in conclusion I demand that the Wisley Airfield is withdrawn from the local plan with immediate effect.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object most strongly to the plan to build 400 houses and 7000 sq m of industrial spaces at Garlick's Arch. As well as threatening ancient woodland, this proposal destroys the green swathe of land which is all that separates Send Marsh (where I live) from the traffic and pollution of the A3. The implications of the infrastructure of roads and local services (the Medical Centre and schools for example) are unsupportable. 

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object also to the proposed new interchange at Burnt Common which is a knock-on effect of the Garlick's Arch development. Anyone who watches the flow of traffic along Send Barns Lane and Send Marsh Road as things are at the moment will quickly realise that the additional traffic attracted to slip-roads for the new interchange will cause major traffic jams and pollution on our already overcrowded roads. During the rush hours (and the 'school run'), the result will be grid-lock.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Finally, I understand there is a proposal for 40 houses and two travellers' pitches at send Hill. Such a proposal will destroy a further area of open ground which affords pleasant views down towards the Wey. It is clearly not an appropriate site for this development, so I must object to that, too.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to this village (Send) being 'inset' and thus removed from the Green Belt. Green Belt is supposed to be in perpetuity, and in this case it provides an essential green zone which stops Woking and Guildford becoming a single conurbation unrelieved by open spaces. The removal of send from the Green Belt will inevitably destroy its character as a village with a healthy environment and good recreational amenities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the most recent draft Local Plan most strongly. I accept that people must have houses to live in and work opportunities, but the first version of the Plan which I saw included development of housing and infrastructure implications which were disproportionate to the size of our village. After two years of discussion and consultation, I welcomed the revised Plan which followed because it had significantly reduced these pressures, and seemed a much fairer distribution of the necessary development.

I was dismayed when I read that, at the 'eleventh hour', a further draft had been published which not only undoes the good that had been achieved with the earlier revision, but imposes an even greater burden on this area. My first objection is to the way in which this revision was slipped in so late in the day. Frankly, this smacks of sharp practice and raises questions about the integrity of the Council.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy A43 which adds 8 travelling showpeople patches to the Green swathe between Send Marsh and the A3 ('Garlick's Arch'). These cannot be in-keeping with the housing development proposed, and there is no known demand for this amenity.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 which relates to development at Burnt Common which was deleted in 2014 because the objections made at the time were acknowledged. Its re-appearance in 2016 included up to 7000 sq m of industrial or warehousing use. This now appears as a minimum, which opens the way to further industrial development in the future. This will exacerbate all the negative impacts on infrastructure and the environment to which I have objected previously.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy 2 at para 4.3.15 which will take the Send Business Park area (including the aforementioned marina site) out of the Green Belt altogether. This area of the Wey is a beautiful public amenity, the site is poorly served by a very narrow road, and this further incursion on the Green Belt will open up the possibility of further loss to an area of outstanding rural beauty. I trust my objections will receive your earnest consideration.

7. We object to the fact that GBC have not met the requirements of the NPPF Paragraph 155 which imposes an explicit obligation to have early and meaningful consultation. This has not been met in a number of areas by GBC. We have not had a meaningful consultation on imposing a settlement boundary on East Clandon, on the absence of meaningful economic and population growth figures for Guildford showing various scenarios with high, medium and low growth scenarios being offered.

We demand that there should be a significant challenge to the GBC scenario planning and the housing and growth numbers should be revised and especially in the light of uncertainty and change which will accompany Britain’s withdrawal from the EU.

8. Policy D4: we object to the insetting of villages (meaning in fact, removal of villages from Green Belt protections) and the fact that they will be suffer from higher density development and the resulting increase in traffic, use of infrastructure which is already under pressure. We object in particular to the insetting of West Clandon, Send and the Horsleys. This will have a detrimental impact on Green Belt openness and the views in and out of the AONB in direct contravention of Policy P1 and P2.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
5. We object to Policy S1 not offering sustainable development as regards roads and rail infrastructure which currently does not cope with demand, congestion on the A3 in particular, but also other A roads in the area such as the A247, the A246 and then there is the already overcrowded and slow train system for those already living in the borough and needing to commute to London. No pre-emptive planning has been made to alleviate these real problems which will be much exacerbated by large increases in housing.

We specifically want you to note the winding, narrow and dangerous route via the A247 through West Clandon which then drives people to use a cut-out with the even narrower rural road, the Ripley Road, through East Clandon to and from the A3. This will be much exacerbated with the large increase in housing twinned with large increase in cars and travel.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. We object to the Settlement Boundary which has been imposed on East Clandon without any consultation. This imposition provides no protection to further development outside of the settlement boundary (Policy P2 para 4.3.25) and is deemed by us as being unnecessary in an already tightly developed ancient and rural conservation village with high archaeological potential. We demand that this proposal be removed as it will endanger the openness of the Green Belt, the views in and out of the AONB (protection of the AONB Policy P1) and the character of our village.

2. Policy P2 – Green Belt: We object to this significant erosion of the Green Belt with the proposals for large towns being developed on Green Belt land thereby removing the openness of the Green Belt. We note in particular the huge developments proposed for the North East quadrant of the borough which will adversely affect our amenity, but also unfairly targets our tranquil rural villages because we can provide ‘dormitory’ facilities for commuters to London. These developments directly affecting our villages are the proposals for Wisley Airfield, Gosden Hill Farm, various farms and tracts in the Horsleys and Garlicks Arch at Send.

3. Further, on the erosion of Green Belt and we object that Policy P2 is not met where it states that Green Belt should be protected. We object to the disproportionate use of Green Belt land for housing – some 65% of the housing proposed is on Green Belt and with little consideration being given to redevelopment of brown field sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

6. Continuing with Policy S1 (Presumption in favour of Sustainable Development) we object that this is not being met and that GBC are contravening this when it is clear that no fixed plans are available to improve the provision of shops, medical facilities, schools in our immediate area (besides roads and rail already mentioned) to service us. If the GBC were serious about improving the infrastructure and sustainability of our communities, they would have secured plans and funding to ensure these facilities are available and not just at the behest and hoped-for goodwill from the developers. Further, how will developers be held accountable to their promises to build infrastructure? Stories are legion of developers reneging on commitments as the ‘money runs out’ even though vast profits will be made from turning agricultural and Green Belt land into highly valuable housing land.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Objection to the Guildford 2016 Local Plan

East Clandon Parish Council objects to the 2016 Draft Local Plan as a whole and in particular we object to the specific issues (listed below). We believe that this deeply flawed Local Plan will have a direct and detrimental effect on the amenity currently enjoyed by residents of East Clandon and to the even greater detriment to our neighbouring villages of West Clandon, Ripley, West and East Horsley. It erodes the openness of the Green Belt and endangers the beauty and views in and out of the Surrey Hills AONB.

Our specific points are:

1. We object to Policy S2 for the proposed provision of the very high overall housing numbers of 13,800 new homes (690 new dwellings being built every year for 20 years) and we object on two grounds; these housing numbers have been imposed on us with no real consultation being undertaken with the residents of East Clandon and the borough as a whole. Secondly, the housing numbers are based on a high-growth economic development plan which in itself has had no consultation with us and this combined with estimated demand from London residents will turn Guildford into a dormitory town for London.

Further, we object to the fact that no real economic or housing demand factors have been provided by the borough planners to substantiate the very high housing target of 13,800 new dwellings over the next 20 years. This is in direct contravention of the NPPF’s requirement for the planning authority to provide meaningful consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I wish to express my objections to the Guildford Borough Local Plans for the following reasons:

- I consider that the overall plan indicates considerable overdevelopment of the Normandy and Flexford areas, which will destroy the openness and rural environment, which currently
- I object to the proposed development of a minimum of 1200 houses within the boundaries of Strategic Site A46, which is all within Green Belt
- Building on Green belt land can only be considered if it can be shown that there are very special GBC have not demonstrated any special circumstances within the Local Plan as to why it is necessary to remove this land from the protection of the Green Belt, is therefore against National Policy for the Protection of the Green Belt, and strongly object to the proposals. The intended purpose of the Green Belt is to maintain areas of green fields and natural beauty of the green fields, which will be destroyed if Site A46 is allowed to be developed.
- The proposed development is within sight of the Hogs Back and the Surrey Hills which are allocated as Areas of outstanding Natural Beauty and as such would be detrimental to the openness and beauty of this area.
- There are many brown field sites that exist within the GBC area, which could be used to meet the housing needs, but the Local Plan does not demonstrate that these sites will be used to meet the demand of future housing
- Whilst may accept more houses are needed, if this site and is approved for development of 1200 homes, Normandy would increase by 60 to 70% and would create one large urban sprawl, almost joining up with the additional developments approved within Ash and Tongham. The proposed allocation of houses in Normandy is very disproportional compared to many of the other villages and parishes within the Guildford Borough. The proposed demand for additional housing contained within the Local Plan should be spread evenly amongst all the villages and parishes within the Guildford Borough area.
Infrastructure:

Traffic: There are no proposals to improve the existing road systems and footpaths within Normandy and the developments would increase traffic and congestion, not only from transportation of building materials over many years but also the resulting additional housing.

In Normandy, the A323 suffers with congestion with the main junctions at Glaziers Lane and Westwood Lane, as does the A324 at its junction with the A323 at Elm Hill. In particular Glaziers Lane has no continuous footpath from one end to the other and pedestrians have to cross the road twice where there is a humped back railway bridge and a blind bend.

Similarly, there is a narrow railway bridge situated in Westwood Lane, which has a Priority One Way system for vehicles, and co-joining with a blind road junction with Beech Lane. The increase of traffic volumes with this proposed development and the proposed new Secondary School would be dangerous to pedestrians and traffic and cause unacceptable congestion.

Flooding: Flooding frequently occurs due to inadequate surface water drainage and also from the sewer. Both of the system have insufficient capacity for the existing houses and would need to be significantly enlarged to prevent future flooding.

Utilities: The existing overhead Electricity supply would also need to be modernized as it frequently cuts off whenever there is high winds or heavy downfalls of

Shops: Although the proposed development within the area of Site A46 contains provision for shops there is no guarantee that there will be General Grocery shops, within the development to supply the household requirements of food and other domestic supplies. Without these assurances that these types of shops will be provided within the site there would be a significant increase in road traffic on the existing minor roads of Glaziers Lane and Westwood Lane.

Primary School/Nurseries: Wyke School does not have the capacity to absorb the potential increase of children from the significant increase in family homes necessitating major additional building work to increase the number of classrooms

In conclusion, within the Local Plan documentation, Normandy appears to have been identified to take significantly more proposed housing development than many of the other larger Wards within the Guildford Borough Council Planning jurisdiction.

Other Wards appear to have the same or better, transport and community services but Normandy appears to have been singled out to take proportionally more additional housing within the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to the Guildford 2016 Local Plan

My parents live in East Clandon, at [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998.] and I frequently visit them and spend many days in the village with my family. I am currently overseas so am writing to you by email in respect of the above. Accordingly this letter will not be hand signed.

I object to the 2016 Draft Local Plan as a whole and in particular I object to the specific issues (listed below). I believe that this deeply flawed Local Plan will have a direct and detrimental effect on the amenity currently enjoyed by my family and other residents of East Clandon and to the even greater detriment to our neighbouring villages of West Clandon, Ripley, West and East Horsley. It erodes the openness of the Green Belt and endangers the beauty and views in and out of the Surrey Hills AONB.

My specific points are:

1. I object to Policy S2 for the proposed provision of the very high overall housing numbers of 13,800 new homes (690 new dwellings being built every year for 20 years) and I object on two grounds; these housing numbers have been imposed on the borough with no real consultation being undertaken with the residents of East Clandon and the borough as a whole. Secondly, the housing numbers are based on a high-growth economic development plan which in itself has had no consultation with us and this combined with estimated demand from London residents will turn Guildford into a dormitory town for London.

Further, I object to the fact that no real economic or housing demand factors have been provided by the borough planners to substantiate the very high housing target of 13,800 new dwellings over the next 20 years. This is in direct contravention of the NPPF’s requirement for the planning authority to provide meaningful consultation.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 5: The examination

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7. I object to the fact that GBC have not met the requirements of the NPPF Paragraph 155 which imposes an explicit obligation to have early and meaningful consultation. This has not been met in a number of areas by GBC. We have not had a meaningful consultation on imposing a settlement boundary on East Clandon, on the absence of meaningful economic and population growth figures for Guildford showing various scenarios with high, medium and low growth scenarios being offered.

We object to Guildford Borough Council’s draft Local Plan proposals to build 1800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

- Destroy views form the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
- Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- Increase tailbacks on the A31 and traffic congestion
- Result in rat-running through local roads
- Add to Guildford’s pollution

I am writing to register my objections to the very large number of proposed houses and housing developments within the above Parish Council area at Strategic Site A46 for the following reasons:

1. Green Belt:

The intention and importance of the Green Belt is to ensure that the hamlets and villages within it are separated by openness and are not conjoined by large scale housing developments such as those proposed adjoining the west side of Glaziers Lane and the east side of Westwood Lane.
The proposed Local Plan will double the number of homes in the centre of rural Normandy which is designated as Green Belt. Previously Planning Inspectors have declined previous applications and consider that the green fields contribute to the openness of the Green Belt with views to the Surrey Hills AONB.

In June 2015 the Conservative Government and the Prime Minister in their election manifesto said 'we will always protect the Green Belt and make sure planning decisions are made by local people' and only in exceptional circumstances when there are no other options would the Green Belt be allowed to be built on.

1. Destruction of rural environment:

I strongly object to the proposed development of an additional 1,100 houses within the Green Belt and is currently prime pasture/agricultural land.

The Green Belt is in place to check unrestricted sprawl of built up areas which will occur with the number of proposed houses in Tongham and Ash, leaving only a small strip of open land between them and Normandy preventing them from joining up.

It is also to safeguard the countryside from the encroachment of building development. With regard to the proposed Local Plan document these principles appear to have been completely disregarded.

1. Infrastructure:

The existing roads flanking both the east and west side of the proposed site for the 1,100 houses are classified as minor ‘C’ class roads and will not be able to cope with the increase in additional traffic generated by this large development. At present Glaziers Lane (C60) does not have a continuous footpath on any one side of the road from its junction with Flexford Road and the A323 Aldershot Road and pedestrians have to cross the road twice at two very dangerous points on this busy road.

One is the north side of the humped back railway bridge at Wanborough Station and the other one is between Numbers 38 to 43. If the proposed number of houses are built with resulting large increase in traffic there would be a need to have footpaths constructed over the length of Glaziers Lane in the interests of road safety to pedestrians.

Westwood Lane crosses underneath the railway line and is insufficiently wide for 2 way traffic flow (priority to traffic going north to south) which, at busy commuter times, traffic will build up either side of the railway bridge at this point.

The A323 Guildford. Road at commuter times frequently build up through Normandy at present due to the increase in large developments of houses within the ash parish and Rushmoor area.

The increase of traffic travelling up Wanborough Hill /Westwood Lane (C16) to join the A31 will severely increase the queues of traffic travelling east to Guildford or west to Farnham and also the B3006, Puttenham Heath Road to join the A3. These roads are already gridlocked at peak times now without the additional traffic generated by the proposed development.

4) Justification of Second School:

You have suggested that the need for a Secondary School is sufficient 'exceptional circumstance' to justify to build on the Green Belt but GBC have not proven that there is sufficient demand for a new school with regard to existing pupils.

The proposed 1,100 homes appears to be a Developer led development.

The proposed Secondary School land and building being offered by them at nil cost could allegedly be conceived to be an inducement (or bribe) to obtain support from Guildford Borough Council and Surrey County Council to obtain Planning Permission for such a large development on Green Belt land.

The Secondary School, if approved, will generate even more additional traffic and the existing traffic queues at peak times will exacerbate the traffic problems at the start and end of school hours.
The area in Glaziers Lane (C60) where the Hoe stream crosses underneath the road between Numbers 68 and 76 on the west side and Numbers 38 and 43 on the east side is subject to flooding and is designated as an area liable to flooding on the Environmental Agency maps. The flooding occurs when there is heavy continuous rainfall and can occur summer or winter. The two main causes of this flash flooding is the rainwater runoff from houses and driveways with drains connected the main sewer. This causes the 150mm main sewer running south to north to surcharge causing the road and surrounding land and gardens to flood. As the 150mm connects into a 225mm main sewer between Numbers 38 and 48 which is also of insufficient capacity the sewer also surcharges at this point causing additional flooding.

Thames Water is well aware of this flooding problems and there would need to be major increase in sewer capacity if any of the proposed housing developments take place.

The proposed new developments would detrimentally increase the risk of flooding the above mentioned location causing great distress to the residents currently living there.

5. Shops and other Commercial development

These will again generate more traffic on the minor and major roads in the area.

1. Wyke Junior School:

Wyke School does not have the capacity to absorb the potential increase of children from the significant increase in family homes necessitating major additional building work to increase the number of classrooms required.

In conclusion, within the Local Plan documentation, Normandy appears to have been identified to take significantly more proposed housing development than many of the other larger Wards within the Guildford Borough Council Planning jurisdiction.

Other Wards appear to have the same or better, transport and community services but Normandy appears to have been singled out to take proportionally more additional housing within the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to lodge an objection to the 2016 Draft Local Plan, which I believe to be poorly thought through in terms of housing need and proposed infrastructure.

Most importantly, I believe that we must have clarity on the viability of a much-needed tunnel taking the A3 underneath Guildford before committing to building on Gosden Hill Farm, where the tunnel is likely to begin/end.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In addition the infrastructure of the area including roads, local facilities such as they are, as well as services for water and drainage are already stretched and in the latter case clearly insufficient. Ockham Road North and South have significant pinch points and the junction by Station Approach is dangerous without introducing more traffic with another junction close by to accommodate more housing by the station.

I understand that the local schools are also full and the medical facilities stretched, I must therefore object to the designation of this area as a District Centre, which clearly it is not nor could be.

Station Parade in East Horsley is currently a village centre with about 15 shops/restaurants, with very limited scope for any expansion. There is no space for additional car parking and access to the shops is already difficult at some times of day. It is not, and cannot become, a “District Centre” with the expansion that implies without building across existing housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Existing village boundaries reflect the ability of the local infrastructure to provide reasonably for the current population. However, the local infrastructure is already overloaded and at times struggles to cope: there are not enough school places, our medical facilities are stretched, the roads and car parks have reached their capacity and the trains are frequently full. We cannot accommodate a significant increase in the local population without people’s quality of life being seriously affected. To increase housing in the Horsleys by over 30% would put a completely unreasonable strain on these villages. Extension of the village boundaries now is a precursor to even more potential development which would be even more detrimental to the environment for existing and new residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4317  Respondent: 15359329 / Andrew & Elizabeth Robinson  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Highways Agency has already judged that the access from the A3 to the Horsley/Wisley area is not sufficient to cope with the likely increase in traffic volume from proposed developments. Ockham Road and Forest Road are narrow “B” roads and there is no scope for any effective improvement. The increase in traffic will cause significant local problems, resulting in other, even more minor, local roads being used as “rat-runs” to avoid key junctions.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
As long-standing residents of East Horsley we wish to express our objections to the Guildford Local Plan as proposed. We are extremely concerned that the proposed development plans will change the character of several lovely Surrey villages for ever.

We object to the removal of the Horsleys from the Green Belt. There has been no effective demonstration of “exceptional circumstances” as required under the Government’s “Green Belt” Briefing Paper of January 2016. The proposed developments in the Horsleys do not meet the “exceptional” criteria and there is therefore no need for the Green Belt designation to be changed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

- The proposed extent of the development to the east of Guildford, including Gosden Hill Farm, Burnt Common, Wisley and East/West Horsley will create an additional 5,000 homes within the area of a few square miles. An increase in population of 10,000–15,000 people would likely result. This calls into serious doubt the basis of the housing plan. Guildford Borough population increased by 7,500 (5.8%) between 2001 and 2011. To propose houses which can accommodate up to 15,000 people suggests an expected increase just from these few developments, and without taking into account other Borough developments, of over 10%. This increase cannot be sustainable or desirable in the context of an existing population for the whole of Guildford Borough of 137,000 (at the time of the last census).

Overall, we regard the extent of proposed development to the east of Guildford, and specifically in and around the Horsleys, to be out of all proportion to the existing housing stock. They are consequently an unrealistic set of proposals in the context of the sustainable development that can be achieved.

- Result in rat-running through local roads
- Add to Guildford’s pollution

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object the inclusion of new slip roads for access to the A3 at Burnt common (A43a). No mention of who is going to foot the considerable bill for these Trunk road access point additions; as they are being proposed purely to service the extra traffic brought about by the proposed new developments, then it follows that the tax payer should not have to pay, the developers should.

Trusting that these submissions will be acknowledged and duly considered accordingly.

Comment ID: PSLPP16/4325  Respondent: 15359905 / John Burns  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object most strongly, to implementation of policy D3 and the potential for gross damage to the historic and natural environment; this IMO is an act of vandalism. Almost every portion of GB affected is highly regarded and needed by the local community. In the case say, of Garlick's Arch there, is a sizeable woodland area, including ancient oak trees that will be destroyed.

They are all TPO'd and exist within an area of special scientific interests.

The impact of this loss will more exposure to the polluting effects of the A3 as well loss of vital habitat for wildlife. The NPPF allows for an overall housing target to be reduced to take account of situations like those at Garlick's Arch. Protecting wild life areas (Thames basin Heath SPA), areas of natural recreational resource, AONB, Scientific Interest Areas, Conservation areas, GB and flood risk parts; however, this Local Plan appears to completely ignore any of these requirements?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policies E1,E2,E5: I object to.

The first two fly in the face of the fact that a Brown Field site already exists to the south of Burnt Common, yet the GB site is recommended to be used for a mix of warehousing, light industrial and general industrial for sustainable employment, next to what is also proposed as a residential site? The latter is still not necessary IMO and it follows that the former is not either; why? Because it can be housed along with over 100 houses if necessary, on the BF site referred to above. So why create an unnecessary strategic employment site on GB, when a BF site exists nearby to accommodate this growth?

It has to be noted further, that the development of Garlick's Arch would result in the loss of 4 established businesses employing dozens of local people; so IMO this policy is not working in this instance, it is destructive and wasteful as opposed to economic and productive. This is a direct contradiction of the aim of policy E1; again bizarre?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policies I1, I2, I3,

I further object to: in a nut-shell, the roads and infrastructure pose a limit to the enforced growth which GBC want to implement; the roads simply could not cope with major increases in vehicles that will derive from increased development and foul waste / rain water drainage are at full capacity already.

Ripley is a good example of the every day build up in traffic congestion: infilling within the Parish boundary and use of the High St. as an ad hoc by-pass for the A3, has pushed levels to saturation at certain times. With greater than 5,000 houses planned close to Ripley, this will inevitably lead to massive grid lock and higher levels of pollution they already registered. This latter point contradicts the intention stipulated within I3, in regard to mitigation of detrimental impact on air quality and public health.

I would also add that to date none of the developments within Ripley's boundary have been charged with improving the community's local road network or foul waste systems. As a matter of common sense IMO that situation will soon become unsustainable in the face of increases in housing and vehicles, unless there are major improvements in infrastructure, paid for by the developers.

### Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I further object to policy P2 on the grounds that it conflicts with the guidelines, strictures and aims of the National Planning Policy Framework (NPPF) for protection of the GB. The authorities have not demonstrated why the boundaries have been moved when there are NO EXCEPTIONAL CIRCUMSTANCES to warrant such. As such the historic and rural setting of villages like Ripley will be irreparably damaged and any conservation areas will lose their raison d'être.

Development in flood risk areas, Policy P4: this really is stupid, flood risks are all too real yet here the L.A. seem to be encouraging it by allowing such areas to be included within the Plan. Land at Garlick's Arch is a good example of this, it is identified by the Environmental Agency as being in a flood Zone 3; this is the highest risk of flooding each year. Yet the L.A. have categorized the area as a flood zone 2 which has a lower probability for flooding. So we appear to be held hostage by the L.A's attempt to redesignate the areas flood risk despite the evidence of floods each winter?

### Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As follows here are my structured objections: -

Policies S1 & S2: I object to these on grounds of unsustainability and disproportionally. The policy does not reflect the needs of local communities, yet the impact on affected areas will be such as to destroy the physical environments; e.g. villages such as Ripley, Send and Clandon. The absolute and relatively (respectively) isolated sites of Three Farms Meadow and Garlick's Arch are good examples of actual and pending unsustainability. TFM has been refused Planning consent at least on two occasions by no less than 14 sustained objections, yet the developers are allowed to have another try because of the removal of the GB and a predetermination in favour of development; if that's not blinkered ideology pursuing something regardless of economic cost, I don't know what is!

No mention appears to be made of moderation of the overall figure of nearly 14,000 dwellings spread across the Borough, but mostly in the north where the three Wards of Lovelace face the greatest impact. The plan to build over 5,000 houses within five miles from Burpham to the M25 junction with the A3, represents a new town that will swamp old communities in situ.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I attach my objections to this covering email, I have tried to relate them directly to the terms of reference used by Guildford Borough Council; however, I should like to make some fundamental points which I hope the Inspectorate take on board as they point to a flaw, in my opinion, in the Local Plan.

The Plan rests on a market based solution to a housing crisis, one which has suddenly been visited on us, one that we are expected to compliantly accept as being 100% accurate; I do not accept the latter or the former. There is a housing crisis to be sure, it's been building up for decades, successive National Governments, for political reasons, have succeeded in exacerbating it, year on. It is a crisis which is still obfuscated by politicians, mainly due to National Governments ideological bent to markets, thus it remains improperly diagnosed. Are we talking about people not being forced out of their homes, couples unable to afford rents, housing lists growing; or are we observing wealthy speculators manipulating the situation in order to make large profits at the general expense of most others. There is a housing crisis to be sure, it's been building up for decades, successive National Governments, for political reasons, have succeeded in exacerbating it, year on. It is a crisis which is still obfuscated by politicians, mainly due to National Governments ideological bent to markets, thus it remains improperly diagnosed. Are we talking about people not being forced out of their homes, couples unable to afford rents, housing lists growing; or are we observing wealthy speculators manipulating the situation in order to make large profits at the general expense of most others. There is a housing crisis to be sure, it's been building up for decades, successive National Governments, for political reasons, have succeeded in exacerbating it, year on. It is a crisis which is still obfuscated by politicians, mainly due to National Governments ideological bent to markets, thus it remains improperly diagnosed. Are we talking about people not being forced out of their homes, couples unable to afford rents, housing lists growing; or are we observing wealthy speculators manipulating the situation in order to make large profits at the general expense of most others. There is a way to meet ACTUAL housing NEED without all the economic costs entailed within the Local Plan; i.e. creating vast stretches of sterile urban sprawl, mass immigration of people into the borough, pollution and congestion, unnecessary industrial growth and most importantly, despoliation of our natural environment and existing communities. No where has it been demonstrated that that REAL housing NEED, warrants mass private speculative house building; i.e. profit maximising enterprise satiates social need. In fact, actual housing need being met by speculative house building, as the Government would have it, is a vague, if not doubtful, relationship; indeed, the two aims conflict with each other and inevitably produce ugly side effects.

Having scanned the official Government documentation; i.e. The Economic Basis for Housing need, I cannot find any conclusive evidence that provision of such housing schemes, will solve urgent housing requirements per se. The policy rests on an aspiration that a certain amount of social housing has to result from private developments; but in practice does it? Such housing, in the main attracts purchasers who already are adequately housed, it doesn't necessarily follow that social housing requirement would also be met by any take up along the chain of housing vacated concomitantly alongside sales. At the procurement stage of new build homes, there are many ways any social housing element, built-in to any development, can be reduced; e.g. S106 agreements, appeals and 'subjection to economies'. Even if they are agreed under a S106 agreement, houses seen as starter homes are generally out of reach for people on the local Borough's waiting list, who might want to buy; similarly rents.

The data for the need to build houses - the strategic Housing Market Assessment (SHMA), originates mainly from interested parties, and it's usually stamped as commercially confidential; IMO, it's skewed, inaccessible and uncontestable. Worst still, the policy for gross invasion into the Green Belt is actually being driven by similar, if not the same interested parties, many of whom donate large amounts to fund the Party in Government. So access to analyse, let alone accurately judge whether these figures represent reality, is somewhat limited. One thing is for sure; if anyone wants to move house within our parishes, you only have to go to the nearest estate agent, you won't find it a problem to locate something to your liking. No one is saying a moratorium on private house building, far from it, but you don't necessarily need mass estates built to increase choice, especially when that in itself is
likely to lead to the destruction of an environment that you desired in the first place. There are however, accessible and easily understandable statistics available from Local Authorities, showing accurate housing requirements in the Borough; i.e. numbers and categories of folk registered on the housing list. If that housing NEED was met PROPERLY and as a priority, then the pressure for private building development would diminish, and similarly the pressure on the GB.

It should be clear to those trying to administer the Governments plan, that the crisis started over thirty years ago with another market based policy: Local Authority Housing stocks were systematically reduced by the tax payer subsidised policy of the 'Right to Buy'. In one foul swoop thousands of dwellings were taken from local authority stocks, and not replaced by new build. The result was, despite some heroic efforts made by LA's and the formation of Housing Associations, that social housing struggled to keep pace with demand. Private rented accommodation was supposed to provide where the L.A. could not, or rather, was prevented doing so; that too was a failure. Nearly 40 years on, Central Government now is imposing an even worse policy, via it's Housing Bill. Sanctioned in May 2016, once again the private sector is seen as the panacea to the lack of rentable accommodation and a gateway to house ownership for all; bizarre!

Municipal stock that remains, as well as prime Housing Association stock, will be forcibly sold off via the 'right to buy' mk 2 - at a major cost to the tax payer, again.

As the private sector has historically failed to provide affordable rented accommodation, it is hard to see how such a policy will succeed this time round, especially now that matters emanating from the issue affect most all households, not just those renting Council or H.A. houses. The Governments vision of a home owning utopia is not only unrealistic, but in life, undesirable. You don't need to own something to call it your home: rented accommodation that is well managed and reasonable to pay for, is a way forward for many who want a home proper whilst keeping their mobility, be able to save, and able to plan their future without the burden and responsibility of a mortgage and all that might entail in keeping up with payments. It is the rented sector that has been scandalously neglected IMO by successive Governments; it is this sector in which the L.A. could and should, play a rightfully important role once again. So IMO, the Plan is an ideological sledge hammer, it masks alternative strategies that would not incur the gross diseconomies which will undoubtedly spring from implementation of the Governments Plan.

Major doubt concerning housing numbers.

The derivation of a mathematical model of a Strategic Housing Market Assessment (SHMA) without disclosure of the hypotheses and postulations used or of, for example, standard deviation in the results clearly does not permit any assessment of its validity and reflects poor scientific practice.
The doubt concerning this SHMA target housing figure is further compounded by the Guildford Borough Council inflating the SHMA figure to give a figure for population increase which is almost 70% higher than the official national estimates for population growth in the Borough.

This results in the figure of 593 new houses proposed in the Horsleys within 5 years following adoption of the plan.

The scale of this enormous increase is demonstrated in that it would result in an increase of up to 35% in existing West Horsley households - a truly alarming figure and greater than any other single area in the Borough.

I trust that my concerns will be fully considered by the appointed independent inspector.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Blackwell Farm being included in the Plan (Policy A26) because:

it is situated entirely within the Green Belt

more people objected at the previous consultation to the inclusion of this site than any other and the Council has clearly failed to listen

an independent consultant has very recently declared the site as being “of AONB quality”. On this basis, it should be excluded.

traffic problems resulting from this development would be detrimental to the whole area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The local infrastructure is patently unable to cope with the growth assumed in the Plan as doctors’ surgeries, schools and particularly roads, are currently struggling to cope with the needs of the existing population. Specifically, there is an omission to the Plan as it excludes the Town Centre Master Plan and the effect this could have on the infrastructure, specifically traffic in the outlying villages.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that the traffic impact of the Plan on Compton has been effectively ignored. With the proposed developments at Blackwell Farm (1,800 homes), Normandy (1,000 homes), Ash (1,300 homes) and proposed developments at Aldershot and Bordon, the increase in traffic on the B3000 in Compton is likely to be severe. In fact, the Highways Assessment ranks the B3000 only just below the major A roads and Trunk roads in terms of negative traffic impact. No solutions or steps to achieve some mitigation are offered and I therefore strongly object to the level of building proposed in the Plan and would question why no constraint to the numbers proposed had been applied to reflect this major issue.

Still on the subject of the B3000, GBC has undertaken NO2 readings for a number of properties on the Street (B3000) in Compton. I am aware that one property on the B3000 has exceeded the recommended limit. This fact is known to GBC and I object to the Air Quality problem in Compton not being referred to in the Plan. This is particularly relevant bearing in mind the forecast additional traffic Compton will be getting (see paragraph 6 above).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the “insetting” of so many villages from the Green Belt. (paragraph 4.3.13). The “special circumstances” used to justify this excessive use of the Green Belt are that the Plan’s growth targets require this. However, as stated above, this is all because the SHMA is too high. Get the SHMA down to a sensible level, and the wholesale raid on the Green Belt would not be necessary.

In 2014, many people objected to the proposed Plan, partly because they considered too much Green Belt was to be developed. However I now see that an even greater percentage of homes is scheduled to be built on Green Belt. I strongly object to this as Green Belt should have been used as a constraint.

I object to the number of additional homes being set at 13,860 (or 693 homes per year). (Policy S2) I consider this to be too high for the growth we actually need in the Guildford area. It is unacceptable for the Council not to disclose how the SHMA is arrived at and given the fundamental importance of this figure to many aspects of the Plan, it is totally inappropriate to hide behind the comment that this is proprietary information.

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

We object to Guildford Borough Council’s draft Local Plan proposals to build 1800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

- Destroy views form the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
- Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- Increase tailbacks on the A31 and traffic congestion
- Result in rat-running through local roads
- Add to Guildford’s pollution

I live in Normandy and I do not wish the village to be ruined by overdevelopment damaging our environment. The position of Normandy is not suitable for such an increase in the size of the village. Anybody who has travelled into Guildford from Normandy and vice versa knows how clogged the roads are, how quickly the whole system comes to a standstill.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The plan proposes to use green belt land destroying for ever an asset we all enjoy and wish to pass onto future generations. We should be cautious, politics is moving very fast and what may have seemed pragmatic before 23rd June may on reflection appear unduly hasty. We need to review the situation in the light of the changed circumstances.

In conclusion THERE IS NO EXCEPTIONAL CIRCUMSTANCES TO JUSTIFY USING GREEN BELT LAND NOR FOR REMOVING LAND FROM THE PROTECTION OF BEING GREEN BELT LAND.

The need for large scale developments is now changed since we have made the decision to leave the EU. There is no benefit for Normandy only the destruction of a village this village has a long history and played its part in the last war in preserving our democracy. Normandy with with fields and wildlife should not be sacrificed for a flawed plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()
GBC plan for building a certain number of dwellings within the borough is now obsolete. The way the proposed number were calculates, I understand, are not overt so we can all understand the logic for the decisions. The need to build in such numbers was calculated in the situation we were in before 23rd June 2016. The situation has changed and we are now leaving the EU so the need to fulfil their requirements is now null and void. We will have a new Prime minister in position from Wednesday 13th July 2016.

- Add to Guildford’s pollution
I am writing to you to OBJECT to policy A26 (Blackwell Farm) for the following reasons -

Inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9]:

1) disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]

2) directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas

3) ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]

4) adds to air pollution in neighbouring areas, which already exceeds safe EU limits for Nitrous Oxide [Policy A26].

Please understand and the strong feeling in the surrounding communities that this development is not wanted nor needed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

We object to Guildford Borough Council’s draft Local Plan proposals to build 1,800 houses, an industrial park ad a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

- Destroy views from the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
- Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- Increase tailbacks on the A31 and traffic congestion
- Result in rat-running through local roads
- Add to Guildford’s pollution

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to strongly object to Guildford Council's planning proposals to build up to 14,000 new homes under the revised draft local plan. Form the literature I have received I note with serious concern that the proposal is for large 'strategic sites' at Garlick's Arch (Burnt Common), Wisley and Gosden Hill.

It seems that you are aiming to remove our local villages from the green belt and this will allow unlimited future development and the destruction on our rural villages.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A42 - Clockbarn Nursery, Tannery Lane
1. I object to your proposal to increase the 60 homes in place of the 45 homes, which amounts to an increase of 33%. How can you justify this increase?
2. It ignores the hundreds of objections raised by local people already.
3. It will without doubt have a serious impact on traffic levels and traffic problems in Tannery Lane and at the A247 junction
4. It will also make the erosion of the green belt in Send Village much worse.
5. It will also make surface water flooding, which is already a problem far worse.
6. It will have an effect on the open countryside views from the River Wey Navigation

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

Policy A43 Land at Garlick's Arch, Send Marsh
I object to the A43 changes at Garlick's Arch as follows:
1. You have completely ignored the thousands of previous objections made by local people
2. Why should there be a plot for Travelling Show people in this location when there is no proven demand for this? These people lead a transient lifestyle and therefore there is no need to provide them with a plot of land.
3. You have not provided nor can you justify your reasons for proposing to build on the beautiful permanent Green Belt, there are no exceptional circumstances to allow you to do this.
4. Your proposals will mean our village is 'over developed' and the number of homes excessive.
5. We have beautiful and exquisite ancient woodland that have existed since the time of Elizabeth 1, why do you want to destroy this?
6. These changes will join up Ripley and Send and completely defeat the purpose of the Green Belt
7. This area is subject to flooding and is currently in flood zone 2 and it is contaminated with lead shot which has built up over the last 50 years
8. It will generate more traffic that will cause chaos in the local roads of Ripley and Send

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
Policy A58 - Burnt Common
My objections are that this was deleted from the 2014 Draft - why have you now resurrected it and added it to the revised proposal?
1. There has been a decline for the need of industrial land - many office buildings and industrial lands stand derelict why build more?
2. Slyfield and Guildford have empty sites and industrial units - USE THESE FIRST. There is no need to build an industrial or warehouse unit in the middle of the Green Belt.
3. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt.
4. The impact on narrow surrounding country lanes will create traffic gridlock
5. As stated before it will join up existing villages and defeat the purpose of the Green Belt.

I am writing to you over the proposal to take Chilworth and other villages out of the Green Belt.

As Chilworth, since 1945 on and off has had continuous development, and enough is enough, and the Green Belt, what is left of it should be untouchable.

The removal of it would be give the so called developers the green light. Note, I called them "So called developers". I would like call them "Butchers of the land", Most of them live in offshore tax havens and they could not care less about the devastation of rural England which means so much to us.

DRAFT LOCAL PLAN – CONSULTATION

Wisley Airfield – Site A35

This letter addresses the proposals contained in June 2016 Guildford BC Draft Local Plan for 2013 - 31 for substantial extra housing across the Borough, and particularly at Wisley Airfield close to my home.

In conjunction with my husband, I OBJECT to this ridiculous proposal to begin an unsustainable wedge of development between London & Guildford which will be uncontrollable in the future through the precedent set by this Plan, and support all his comments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. APPENDIX C

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. APPENDIX D

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially
confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY A25 - Gosden Hill Farm**

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.
If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2131  Respondent: 15367361 / Greg Ganjou  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)
The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D3

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D3

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. POLICY D4

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4409  Respondent: 15367361 / Greg Ganjou  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E1

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and
general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E5

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is
likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4407  Respondent: 15367361 / Greg Ganjou  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E7

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes
could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H1

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.
It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. **POLICY H2**

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of £360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

1. **POLICY H3**

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations Ire available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The policy wording itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
1. POLICY I1

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists pass through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable
(and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY I2

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).
Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. POLICY I3

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Re: Responses to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, and I just do not understand how you can propose development on the green belt when I have been told by your office on a different matter that ANY development in the green belt is harmful and with no very special circumstances, therefor against national planning policy and more importantly the wishes of the local residents that will have to live with these ridiculous and unnecessary decisions.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is...
I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY P4

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Attached documents:

Comment ID: PSLPP16/4394  Respondent: 15367361 / Greg Ganjou  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY S1

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy
does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. **POLICY S2**

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.
It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Questions posed by Guildford Borough Council as part of its consultation.

Questions from GBC

24.A. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

ANSWER

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
24.B. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant? Please provide the following information being as precise as possible:

- why you consider it is or is not legally compliant and
- what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

- why you consider it is or is not sound and
- what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.
5. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

1. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
2. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
3. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
4. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
5. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
6. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
7. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
8. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
9. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
10. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

11. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

12. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

13. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

14. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24.D. Question 4: Duty to cooperate

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate? Please provide the following information being as precise as possible:

- why you consider it has or has not complied with the Duty to cooperate and
- what change(s) (if any) you consider necessary to make it comply with the duty to cooperate, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.
Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** PSLPA16/1151  **Respondent:** 15368129 / Sharon Cork  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):**

1. **APPENDIX C**

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

2. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. APPENDIX D

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
• issues with the way it considers students and affordability and
  • flaws in the method for estimating the number of homes needed to support job growth.
  • It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2141  Respondent: 15368129 / Sharon Cork  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A25 - Gosden Hill Farm

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data
• Clandon Cross Roads Area to Bulls Head - 17 incidents
• Bulls Heads Head to Bennett Way - 8 incidents
• Bennett Way to Highcotts Lane - 15 incidents
• Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

2016

• 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
• 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
• 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.
The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a
dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it
wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be
uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West
Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around
14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s
requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in
the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow
for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried
out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2142  Respondent: 15368129 / Sharon Cork  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby
way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport
links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for
journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause
the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this
important issue has been addressed. The Green Belt and Countryside study did not even consider this site.
It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.
I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. POLICY D3

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D4

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **POLICY E1**

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. **POLICY E2**

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.
There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E5

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For
example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/"Disneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY E7**

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable
residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H1

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.
It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H2

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being “closely related”. In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. POLICY I1

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable
(and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY I2

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).
Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY I3

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **POLICY P2**

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.
This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. **POLICY P4**

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY S2**

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these
adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN Ire not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Questions posed by Guildford Borough Council as part of its consultation.

24.A. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

ANSWER

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up-to-date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
### 24.B. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

- why you consider it is or is not legally compliant and
- what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

**ANSWER**

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

### 24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

- why you consider it is or is not sound and
- what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

**ANSWER**
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford’s circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars

6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham

7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and
foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24.D. Question 4: Duty to cooperate

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate? Please provide the following information being as precise as possible:

• why you consider it has or has not complied with the Duty to cooperate and
• what change(s) (if any) you consider necessary to make it comply with the duty to cooperate, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.
The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

Answer (if comment is on questions 1-7 of the questionnaire): ()

This morning it has taken me seven minutes to get out of Sanger Drive onto the main road, so you can imagine what it will be like for me if you allow all these extra houses to be built.

So I object to Policy A43 30km of land at Garlicks Arch, particularly as this was not mentioned at the last meeting in Send I attended, an dthe thought of 400 more houses, probably with two cars each, fills me with horror.

I also object to Policy A44 1.9km Land on Send Hill - again more houses and again a new proposal and the narrow raods to approach the site are certainly not suitable access for a travellers pitch!!

I wish these objectives to be seem by the inspector and also wish to object to send being removed from the Green Belt as it is a buffer zone between Guildford and Woking.

I would Just like you to know that I STRONGLY OBJECT:

To take away our Green Belt in Send

To the Green Belt being built on at Send, Garlick Arch, Send Hill and Clockburn Nurseries as I was told we would have the Green Belt Permanently that is why I bought our Bungalo in Send so we all can enjoy it.

To the amount of housing that is needed 13,860 with this amount needed you would have to use the Green belt I say NO

To ALL in Send and Surrounding areas why can you not use the Brownfield area around Guildford. Not in Send

Also to the interchanging onto the A3 at Burnt Common as we have a lot of traffic now. So with this we would be at a standstill and make Send like a car park in the Rush Hour. Also Send would be used as a cut through to the A3 and M25 also the A247. Why cant you use slyfield for the industrial space

To the site of Garlicks Arch which is known for flooding in the area

To the 45 houses at chockbarn. How are we able to take the traffic through tannery lane as it is to narrow. this road would not take the extra traffic

I object to this site on Send Hill as it has a lot of Green Belt and it is an area of Beautiful Countryside also it was used for land fill years ago and I know there was unsafe waste put in this site. Also to have 2 travellers pitches included there is insufficient acces to this and will also encourage more travellers to park themselves on this site. NOT HAPPY

The GBC has not identified the sufficient Brownfield sites around Guildford, Send, Wisley, Horsley. This will destroy the open amenities of teh Greenbelt also the A3 will end up Gridlocked and the surrounding areas, they are Bad Now so what would happen with all the extra traffic. I wish to breath in FRESH AIR NOT FUMES FROM THE EXTRA TRAFFIC

To the inadequate requirements for the infrastructure of our Village. How will the schools and doctors cope with all this extra traffic.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
I am Objecting to ALL of the plans in and around Send village. Due to eg:

Taking away Green Belt which would destroy all of the lovely countryside Green Belt is meant to be Permanent.

The extra traffic which the Roads and Lanes will not take the extra traffic. Also the schools and the doctors we are having problems now so it will not be able to take these extra persons.

To the 2 travellers pitches which is inappropriate to put them where there is only single track roads so their would be insufficient access to this site also to encourage more to move in on that site.

The interchange at Burntcommon will not work as it will be Gridlocked for nearly all day and the A3 will become congested most of the day as well.

To 70% of the proposed 13,860 houses to be built on Green Belt.

To the infrastructure has not been properly considered and are inadequate to deal with all these proposed housing to be built.

Why are GBC not using up all the Brownfield Sites?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID: PSLPP16/4470  Respondent: 15368513 / Nicola Owens**

**Agent:**

**Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**POLICY H2: Affordable Homes.**

Under Policy H2, 40% of all but the smallest development sites in East Horsley will be required to have affordable housing built upon them and 40% of those should be 1 bed apartments, regardless of whether there is actually demand for more social housing in the area. East Horsley has the lowest demand for affordable housing in the borough. East Horsley is not exempt from the new ‘right to acquire or enfranchise’ entitlement as it is not classified as a ‘rural area’ (1997 Housing Order) so affordable housing in the parish may be bought for a quick resale at a profit and so lost to the market for which they were intended.

I **OBJECT** to Policy H2

Answer (if comment is on questions 1-7 of the questionnaire): ()

NFRASTRUCTURE POLICIES

This section of the Proposed Submission Local Plan sets out details covering a range of infrastructure policies.

POLICIES I1 Infrastructure & Delivery

I2, Supporting the Department of Transport’s ‘Road Investment Strategy’

I3 Sustainable Transport.

I support the general policy statements in each area but the detailed infrastructure proposals appear inadequate. There are serious deficiencies in the infrastructure of Guildford Borough as it is today and GBC’s aggressive housing policy in the Proposed Submission Local Plan will make this worse. There appears to be no strategic plan for additional capacity in schooling and health care and for the narrow and already busy roads in the Horsley area.

If every new house has at least 2 cars, this means potentially 6,000 more cars within a three mile radius of the villages. The impact on local roads and transport facilities will be enormous. Parking at Horsley & Effingham junction stations, which are currently at capacity, at the shops, at the medical centre and at the village hall will all be affected. Local schools are already at capacity and no extra places are planned in the Horsleys.

The proposals for development at Wisley Airfield and for an upgrade the current A3 junction at Burntcommon to a full 4-way junction, SCC traffic modelling anticipates increased use of Guileshall Lane (single track with passing places!), Hungry Hill Lane and Tithebarns Lane for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond. Traffic approaching Guildford from the M25 at peak times is already queuing back as the A3 goes from 3 to 2 lanes at the Guildford junction. The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”. The Plan is proposing a strategic site at Wisley Airfield without identifying what improvements to the local road infrastructure will be required.

I OBJECT to the proposals for infrastructure because they are inadequate to support the proposed developments

POLICY A39: Land behind Ockham Road North, near Horsley railway station

Policy A39 proposes a housing development of some 100 dwellings on a 5.7acre green-field Green Belt site behind the houses on the western side of Ockham Road North. I believe that the proposed western movement of the settlement boundary needed to bring this site within the settlement area is unjustified and contrary to NPPF rules. If this boundary movement is invalid then this site remains a part of the Metropolitan Green Belt.

I OBJECT to Policy A39.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P2: Green Belt – East Horsley should be inset from the Green Belt

East Horsley’s rural village character has been preserved because of its Green Belt status. Currently development is allowed within the village settlement boundary within a particular planning regime. GBC attributes the need to inset East Horsley to National Planning Policy Framework (NPPF) requirements, arguing that the test for remaining ‘washed over’ is that the village should make an important contribution to the openness of the Green Belt. About 36% of East Horsley is composed of woodlands, whilst inside the settlement area there is an average housing density of just 8.1 dwellings per hectare ‘dph’) with many houses having large gardens which make a significant contribution towards bio-diversity, allowing wildlife corridors and open spaces which are vital to the character of the greenbelt.

I OBJECT to Policy P2

Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley.

I object to two specific boundary changes, which have been proposed:

a) The proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Ockham Road North up to the eastern boundary of Lollesworth Wood will remove over 5 hectares of agricultural fields from the Green Belt. The present boundary line is clearly defined by a deep and well-maintained drainage ditch which is classified by the Environment Agency as a ‘main river line’ and therefore represents a highly defensible Green Belt boundary. Moving this boundary west to the edge of woodland in no way improves its defensibility. NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. I do not believe this proposal can be considered as an exceptional circumstance. The only reason for this change seems to be to bring a large agricultural field within the settlement area in order to provide more housing land. However, under NPPF rules this is not a sufficient justification for changing a Green Belt boundary. It is therefore an invalid proposal and I OBJECT to this proposed boundary change.

b) The proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Kingston Avenue up to a tree line running along the Parish Boundary at the western edge of Kingston Meadows (the main public recreational space of East Horsley, comprising various sports facilities and playing fields) will result in taking all of Kingston Meadows out of the Green Belt. The present settlement boundary is clearly defined by a deep and well-maintained drainage ditch running along its eastern side. It therefore again represents a very defensible Green Belt boundary. Moving this boundary westwards to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. I do not believe that this can be considered as an exceptional circumstance.

It is therefore an invalid proposal and I OBJECT to this boundary change.

Paragraph 4.3.17: Proposal to remove Wisley Airfield from the Green Belt

The only justification for this proposed change is unfulfilled housing need which is not considered an exceptional circumstance.

I OBJECT to the proposal to remove Wisley Airfield from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Re: Comments on Proposed Submission Local Plan

I OBJECT to the propose submission local plan on the following issues

- The increase in house stock by 25% is not supported by the estimates of increased population (+15%)
- Many of the proposed developments are on existing Green Belt land
- The proposed infrastructure is insufficient to support the proposed developments

POLICY S2: Borough Wide Strategy.

By adding 13,860 new homes to Guildford Borough Council (GBC) over the 2013-2033 period of the Proposed Submission Local Plan, this represents a net increase of 25% in the housing stock of Guildford Borough and is not justified when the official statisticians at the Office of National Statistics (ONS) are projecting a population increase of about 15% for Guildford Borough over this same period.

I OBJECT to policy S2

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1160  Respondent: 15368577 / A.L. Miller  Agent:

I would Just like you to know that I STRONGLY OBJECT:

To take away our Green Belt in Send

To the Green Belt being built on at Send, Garlick Arch, Send Hill and Clockburn Nurseries as I was told we would have the Green Belt Permanently that is why I bought our Bungalow in Send so we all can enjoy it.

To the amount of housing that is needed 13,860 with this amount needed you would have to use the Green belt I say NO

To ALL in Send and Surrounding areas why can you not use the Brownfield area around Guildford. Not in Send
Also to the interchanging onto the A3 at Burnt Common as we have a lot of traffic now. So with this we would be at a standstill and make Send like a car park in the Rush Hour. Also Send would be used as a cut through to the A3 and M25 also the A247. Why cant you use Slyfield for the industrial space

To the site of Garlicks Arch which is known for flooding in the area

To the 45 houses at Chockbarn. How are we able to take the traffic through tannery lane as it is to narrow. this road would not take the extra traffic

I object to this site on Send Hill as it has a lot of Green Belt and it is an area of Beautiful Countryside also it was used for land fill years ago and I know there was unsafe waste put in this site. Also to have 2 travellers pitches included there is insufficient access to this and will also encourage more travellers to park themselves on this site. NOT HAPPY

The GBC has not identified the sufficient Brownfield sites around Guildford, Send, Wisley, Horsley. This will destroy the open amenities of teh Greenbelt also the A3 will end up Gridlocked and the surrounding areas, they are Bad Now so what would happen with all the extra traffic. I wish to breath in FRESH AIR NOT FUMES FROM THE EXTRA TRAFFIC

To the inadequate requirements for the infrastructure of our Village. How will the schools and doctors cope with all this extra traffic.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. APPENDIX C

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/1169  Respondent: 15368993 / Tessa Spink  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

2. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as well as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as well as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The "objectively assessed need" figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to:
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. POLICY A25 - Gosden Hill Farm

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  - Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 June 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).
The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.
GARLICK’S ARCH has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition of north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D3

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4549  Respondent: 15368993 / Tessa Spink  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D3

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4551  Respondent: 15368993 / Tessa Spink  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. POLICY D4

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4535  Respondent: 15368993 / Tessa Spink  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E1

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.
1. **POLICY E2**

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **POLICY E5**

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

1. **POLICY E6**

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E7

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H1

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students are accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H2

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being “closely related”. In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. POLICY I1

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. **POLICY I2**

   I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

   I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

   Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

   There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

   **What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
1. POLICY I3

I object to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. POLICY P2

I object to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.
The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even if exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt sites proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called 'strategic sites' of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires
there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

   1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

Attached documents:

Comment ID: PSLPP16/4533  Respondent: 15368993 / Tessa Spink  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4
1. POLICY P4

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Re: Responses to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

It seems to me that the plan is draconian in approach, whilst failing to absorb the previous genuine concerns of local residents regarding infrastructure and traffic problems. Furthermore, the plan seems to assume the annexation of Green Belt, contrary to Governmental stipulations.
1. POLICY S1

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick`s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. POLICY S2

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.
The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brownfield sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Questions posed by Guildford Borough Council as part of its consultation.

24.A. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

ANSWER

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24.B. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

- why you consider it is or is not legally compliant and
- what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

- why you consider it is or is not sound and
- what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

ANSWER
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan reject any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford’s circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites— which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

5. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

6. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

7. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

8. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

9. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars

10. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham

11. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework

12. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

13. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and
foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

24.D. Question 4: Duty to cooperate

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate? Please provide the following information being as precise as possible:

• why you consider it has or has not complied with the Duty to cooperate and
• what change(s) (if any) you consider necessary to make it comply with the duty to cooperate, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.
The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Comment ID:** pslp172/4665  **Respondent:** 15368993 / Tessa Spink  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4666  Respondent: 15368993 / Tessa Spink  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to...
considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4667  Respondent: 15368993 / Tessa Spink  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

1. Summary

Since delivery of the 2014 Draft Local Plan, a new strategic site (designated A46) has been created between Normandy and Flexford in a Green Belt area of high sensitivity (a red area) and brought forward for development within proposed Submission Local Plan: strategy and sites (“the draft Local Plan”) covering the period to 2033; this site having previously been safeguarded for future development in the 2014 Draft Local Plan. This change from “Safeguarding” to “strategic site for development” has been done without any further consultation and is included in the draft Local Plan with a rushed manner, with minimal justification and virtually no objective infrastructure planning and costing.

At a meeting of Guildford Borough Council held on 24 May 2016 the Council resolved inter alia:

(1) That the draft Local Plan: strategy and sites document, as submitted to the Council, be approved for formal public consultation for a period of six weeks beginning 6 June 2016, subject to the following proviso:

As strategic site allocation A46, Land to the south of Normandy and north of Flexford, is a land parcel coloured red on the Green Belt sensitivity map and is only included as a strategic site to support the provision of a new secondary school, this strategic site allocation be deleted should it be demonstrated that provision of such a school within this site is not required.

The document Guildford Draft Local Plan: Education Review, May 2016, (“LP:ER”) is contained within the draft Local Plan, and suggests the provision of an 8FE secondary school at site A46 (SED3 of the draft Local Plan Part 3:Appendix C “SED3”). This proposed secondary school is contained within site A46 conceptual plans submitted to GBC by the aspirant developer Taylor Wimpey plc as part of their response to the 2014 Draft Local Plan. The LP:ER also proposed two other new secondary schools in other locations within the Borough totalling a further 8FE.

The LP:ER calls for only 5FE new secondary places required within the Borough above “that already planned” in the period to 2025 as a result of new dwellings to be built to then. It also states “beyond 2025 there is likely to be a further need for secondary places – potentially up to a further 5FE”.

---
2. Our Objection and Submission

We object to the inclusion of site A46 in the Local Plan.

We submit that the requirement for provision of a new secondary school within site A46 is not demonstrated in the draft Local Plan and its accompanying evidence base and therefore the allocation of site A46 should be deleted from the Local Plan in accordance with the proviso attached to Resolution 1 of the 24 May 2016 GBC meeting.

In fact, the evidence base in the draft Local Plan shows that a secondary school at Site A46 is NOT required.

3. QUESTION 1 – The Evidence Base and Submission Documents.

We do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites, as it relates to site A46 and the need for a new secondary school at that site, is adequate, up-to-date and relevant.

Our reasoning, using the Evidence Base, is given as follows.

3.1 Provision of Education in Surrey

The responsibility for provision of Education in Surrey lies with Surrey County Council, not GBC. SCC annually produces a report, the latest being the Schools Organisation Plan December 2015 (“SOP”). The SOP has a 10 year outlook, and does not call for a new secondary school requirement within this timeframe; therefore SCC in the SOP, as informed by the 2014 draft Local Plan and its inherent new housing plan, is not calling for building of a new secondary school in Guildford Borough in the period to 2025.

In terms of school sustainability and operating efficiency, SCC states that schools have to operate full or nearly (95%) full, and that any schools with more that 25% surplus places will be viewed by SCC as educationally and financially unsustainable; where possible SCC seeks to take action early to ensure that schools do not reach this point of unsustainability. Furthermore, SCC prefers to see existing schools expand rather than develop new schools, since this is a more efficient and sustainable use of infrastructural, economic and human capital.

Also, SCC state that, to be sustainable, a new secondary school has to have a minimum of 6FE. The two other new secondary schools at strategic sites Wisley and Gosden Hill are proposed in the LP:ER to be 4FE, which would be below the SCC threshold of sustainability, since both of these schools are in areas of higher population density and are sustainable strategic sites it is evident that these schools should be increased in size to 6FE each, should it not be proven that existing schools cannot be expanded to meet any future needs.

3.2 Proposed development does not require an 8FE secondary school

The proposed development of 1,100 dwellings on site A46 would result in a secondary school requirement of one Form of Entry (30 places) (Source LP:ER). Therefore the proposed A46 development does not, in itself, require provision of an 8FE secondary school at the site.

3.3 Proposed new secondary school at Site A46 is in wrong location

Site A46 in the Normandy ward is located in a sparsely populated area of the borough (Refer to the housing density map contained in the LP:ER, below), therefore is situated remotely from potential pupils, causing unsustainable travel requirements to fill the school places sufficiently to achieve and maintain school sustainability required by SCC. The justification for the school made in SED3 is that is serves the surrounding area, however the on the Evidence Base contained in the draft Local Plan, Normandy and the surrounding area does not need a secondary school.

[IMAGE 1]

3.4 Local Plan itself shows a secondary school is not needed at A46

According to the LP:ER, Site A46 is located in a ward that does not need additional education provision at all during the life of the Draft Plan, and is immediately adjacent to wards that either also do not need additional education provision over...
the life of the plan, or are only affected in the first 5 years of the plan i.e. before a secondary school could be built. Area 46 is distant from the wards that are affected over the whole life of plan (refer to map below reproduced from the LP:ER). Therefore location of a secondary school at A46 is unsustainable according to both SCC and GBC principles.

Pupils in Ash South and Tongham and Ash Vale also avail themselves of Secondary Schools in Hampshire (Farnham and Aldershot) further reducing need for a new secondary school in Normandy.

3.5 Declining birth rate in Guildford

The birth rate in Guildford is declining, reducing the future need for school places.

3.6 Existing secondary school capacity exists

Representations have been made by the head teachers of various Secondary Schools to the 2014 Draft Plan and to GBC and SCC, stating that they have existing capacity to take new pupils, and that they also have space and infrastructure to permanently expand. This is in accordance with SCC’s school sustainability policy of using under-utilised existing capacity and of expanding existing schools in preference to developing new schools.

3.7 Migration to UK to decline

Following the Brexit vote, government and commentators agree that migration into the UK will decline significantly once the UK exits the EU. This will naturally reduce the demand for housing and education within Guildford Borough, further negating the justification for a new Secondary School at site A46 at Normandy/Flexford.

3.8 A new secondary school at site A46 is unsustainable.

A new secondary school at Normandy is not sustainable on many levels, some being:

- It is not demonstrated that there will be sufficient pupils from the surrounding area to maintain 95% capacity.
- The site is in a sparsely populated area of the B
- The Local Plan shows that Normandy is a ward that does not need additional secondary school provision over the life of the PI
- If any extra secondary provision is needed, it is to the east or north, not west of the borough.
- Road transport infrastructure to the site has limited capacity without major changes to infrastructure.
- The site destroys greenbelt, ancient woodland, vulnerable habitats, impinges on listed buildings and is located on an area of important drainage for flood mitigation.
- Heavy clay soils will give rise to unusable playing and sports fields.

We note that the Sustainability Appraisal of the Guildford Borough Local Plan, June 2016 (“SA”) does not deal with education sustainability nor considers the sustainability of transport and infrastructure requirements arising from education needs arising from the draft Local Plan. In respect of education, the SA merely makes some high level, self-serving and unsubstantiated comments with regard to spatial strategy.

<th>Question 3: Soundness</th>
</tr>
</thead>
<tbody>
<tr>
<td>We do not consider the Proposed Submission Local Plan: strategy and sites 2016 is sound as it relates to site A46 and the need for a secondary school to be located at that site. Our reasoning is given above, and furthermore we do not believe it conforms to the National Policy Planning Framework guidance for soundness. We make our comments below the guidance notes of the NPPF (which are in italics).</td>
</tr>
</tbody>
</table>

To be sound, a plan should be:

- **Positively prepared** – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;

Our comment: The strategy to justify a secondary school at site A46 has not been objectively assessed. The justification made in the LR:ER, SED3 and Evidence Base is subjective and does not draw in specifically from the SCC and other neighbouring county councils that provision education. The siting of an 8FE new school in a development that only directly feeds in 1FE and is in a sparsely populated area of the Borough is not sustainable according to SCC education guidelines. Therefore the site A46 plan is not positively prepared.

- **Justified** – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;

Our comment: The evidence base presented for siting of a new secondary school on a red area of greenbelt shows that the plan is not the most appropriate strategy, and in fact shows that a secondary school at A46 is not required. It is the least appropriate strategy from a site selection basis. If the housing and school provisioning requirements ultimately show need for new secondary schools the more reasonable alternatives would be to provision any new schools at Wisley and Gosden Hill as 6FE schools to meet SCC sustainability guidelines.
• **Effective** – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and

Our comment: The evidence base does not even show how the school at site A46 is deliverable. It makes an estimated capital cost of £22m with no justification of the cost or how it is to be funded apart from a comment of “developer contributions”. Similarly the designs and costs for associated infrastructure are mere “thumb sucks” and vague “funded by developer” comments. There is no evidence within the draft Local Plan of effective joint working on cross-border strategic priorities with regards to this matter. Therefore the plan is **not** effective.

• **Consistent with national policy** – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.

Our Comment: The plan does not enable the delivery of sustainable development from the perspective of education (which is not even considered in the SA), infrastructure, road transport, environment and habitats and most importantly the conflicts with the wishes of the communities at Normandy and Flexford.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

5. **QUESTION 4: Duty to cooperate**

We do **not** consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to Cooperate and particularly with regards to the provision with a new 8FE secondary school at site A46.

Section 20(5) (c) of the Planning and Compulsory Purchase Act 2004 (as amended) and paragraphs 178-181 of the National Planning Policy Framework create a duty on all local planning authorities and other bodies to cooperate with each other to address strategic issues in the preparation of the Local Plan. The body of evidence in the draft Local Plan does not provide objective information regarding co-operation with stakeholders, such as SCC, education professionals, communities and infrastructure providers to develop and demonstrate the need for a school at A46.

16. I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/2169  Respondent: 15370497 / Edward Scott  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

13. I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy 03).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

14. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Glandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

5. I object to the sustainable employment policy (Policy E1). If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick's Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7. I object to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
9. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1).

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Glandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

10. I object to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, I (and other residents) will see our quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

11. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy 12)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

12. I object to poor air quality concerns (Policy 13)

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and our health.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

2194
3. I object to not protecting the Green Belt (Policy P2)

I object to the proposals to remove the villages of Ripley, Send and Glandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

4. I object to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.
The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding.

Knowing the area well because I live alongside it, I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be recommissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4594  Respondent: 15370497 / Edward Scott  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the Local Plan as the development proposed will not be sustainable (Policy S1)

I had believed that the purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over development, particularly for the villages between Guildford and the M25, including Ripley, Send and Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35) and Garlick's Arch (A43) are in unsustainable locations. We do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on cars. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. I know this as I have to use them daily. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
2. I object to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill (Glandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Glandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, we are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities. On MY community!

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to 400 houses and 7000 sq metres of industrial space being built at Garlick's

This will create frequent gridlock due to the extra vehicles. Also when there is a problem/crash or excessive rainfall the Ripley Bypass is often closed and traffic is sent through Send and Ripley - creating miles of traffic queues in all directions. The pointless destruction of ancient woodlands would make the pollution in this area far greater than the problems that already exist. The accurate calculations for housing have not been released, therefore this is unjustifiable and unacceptable.

### APPENDIX C

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

2. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it...
cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. APPENDIX D

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A25 - Gosden Hill Farm

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 – 2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).
The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D3

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D3

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **POLICY D4**

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. **POLICY E1**

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.
I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. **POLICY E5**

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

---

1. **POLICY E6**

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

---

1. **POLICY E7**

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H2

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses through all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )
1. **POLICY I1**

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. POLICY I3

I OBJECT to poor air quality concerns (Policy I3)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.
The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires
there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a 'special circumstance') to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. **SITES - POLICIES A1 TO A57**

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. **The plan says that “allocating these sites does not grant planning permission for development.”** However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P4
Re: Responses to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

1. POLICY S1

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)
The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

1. POLICY S2

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these
adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN Ire not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Questions posed by Guildford Borough Council as part of its consultation.

Questions from GBC

24.A. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

ANSWER

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up-to-date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
24.B. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant? Please provide the following information being as precise as possible:

• why you consider it is or is not legally compliant and
• what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

**ANSWER**

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and
foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**24.D. Question 4: Duty to cooperate**

Do you consider the Proposed Submission Local Plan: strategy and sites **as a whole** has complied with the Duty to cooperate? Please provide the following information being as precise as possible:

- why you consider it has or has not complied with the Duty to cooperate and
- what change(s) (if any) you consider necessary to make it comply with the duty to cooperate, explaining why this is the case.

**ANSWER**

I do not consider the Proposed Submission Local Plan: strategy and sites **as a whole** has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.
The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

Answer (if comment is on questions 1-7 of the questionnaire): ()

5. I OBJECT to the inclusion of the land for new on/off ramps at BurntCommon.

The addition of a new on/off ramps to the A3 at Burnt Common would be a disaster in the making. There is no requirement to access the A3 in this location.

Any new A3 access/exit could be at the Ripley end of the A247. The existing on/off ramps could be upgraded to make two more ramps, one to exit the A3 North bound the other to access the A3 South bound. This addition will increase the flow of traffic through both Send and Ripley, which are both suffering from traffic congestion or Upgrade the A3100 Clay Lane access at Burpham.

| 1.  | I OBJECT to the development of Send Hill. |

I object to the proposal in the Local Plan on the grounds that a Wasteland Solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area. Further development would disturb water table and increase the risk flooding to nearby properties.

The proposed site was used by GBC as a landfill site (and not a quarry as stated elsewhere) and on ordnance survey maps it is marked as "refuse and slag heap". Any disturbance to the site would be a health hazard due to the unknown materials. It is therefore unsuitable for such a development due to health reasons.

Since July 2000, GBC installed Gas Monitoring wells. One well recording methane gas discharge. A recent newspaper article on how the dangers of living near landfill sites raises cancer concerns. Send Hill is a single track country lane and too narrow to provide sufficient access to the site or accommodate the potential new levels of traffic the proposed development would bring.

| 4.  | I OBJECT to the lack of proper infrastructure planning for sites. |

I object to lack of infrastructure for the sites in and around Send. Many of the utilities in the area are at or very close to there maximum capacity, such as the electrical network and main drainage/sewers. No plans to improve these services should mean no developments in this village. The local Send Medical Centre is now operating at full capacity, are they any plans to increase this service?

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. I OBJECT to not protecting the Green Belt

I object to the proposals to remove the villages of Send, Ripley and Glandon from the Green Belt together with the sites of Wisley Airfield and Garicks Arch. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered or the development of the Green Belt. There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. This is something that villagers from each village do not want to happen.

(Instead of developing Garicks Arch and Send Hill, there is a "brownfield" site just to the south of the Burnt Common roundabout with surplus land that could accommodate a further development)

In your recent free newspaper "About Guildford", you state that the Green Belt must be saved and to use all "brownfield" sites for development. So why doesn't the council abide by it's own statements?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Local Plan as the development proposed will not be sustainable.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy. The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact over existing local communities by over development, particularly for the villages between Guildford and the M25, including Ripley, Send and Glandon. The infrastructure/services in these villages will be unable to cope with the level of development proposed and do not meet the needs of the local communities.

The sites of Wisley Airfield, Garlick's Arch, Send Hill and Tannery Lane are in unsustainable locations. They do not benefit from railway stations that are within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options but to be reliant on motor vehicles.

Greater consideration should be given to increasing the density of development in urban areas, such as "brownfield" sites in Guildford, where more practical sustainable transport options are available.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**Housing Numbers** - There is no detailed evidence for the proposed number of housing. Numbers quoted are now double what they were despite potential reduction in estimated population due to reduced net migration following our EU exit. I therefore believe these calculations to be based on flawed data.

I object to how the Strategic Housing Market Assessment has been worked out. There is insufficient detail and it is 50% higher than average and therefore likely to be flawed.

The historic village of Burpham will completely lose its identity, and become part of a long corridor of urban sprawl along the A3 North bound towards London.

Truly affordable housing will never be built in this area. Any reference to such is flawed.

Please consider my strong objection to the proposals in the plan as stated above.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

**Other Basic Infrastructure** - There are no detailed plans for other essential infrastructure, power lines, sewerage, drainage, medical facilities, education and other transport options such as park and ride facility and rail station. The plan is again unsound.

The Royal Surrey County Hospital can barely cope with the population it serves now. There are no details as to how it will cope with potential 25% population increase. The Plan is again flawed and unsound.

**Other Basic Infrastructure continued** - The current water supply is barely sufficient for the current population as evident when Clandon House (built 1720s) burnt to a shell in April 2015 due to lack of water supply available to extinguish flames effectively. Currently the water supply for the Guildford area runs out in 4 hrs. The Plan is therefore unsound on this basis as it has no detail of how further supply would be achieved.

There is no capacity in the current sewerage system for expansion. The Plan is therefore unsound on this basis.
I object very strongly to Guildford Borough Council’s Draft Local Plan June 2016.

I believe it is inherently unsound and unsustainable due to lack of detail on basic infrastructure.

**Transport** - There is no detail on road networks. The current traffic flow problems in Guildford and surrounding areas are frequent and well documented. Until these are addressed in a sustainable manner it would be completely unsuitable to contemplate any large developments in the area. In particular a solution to the congestion on the A3 needs to be addressed ideally by building a tunnel which potentially could be bored in under a year (at 37 mtrs a day). A lesser alternative would be using 2 x 4 way intersections at Potters Lane, North of Guildford and at the Stoke Road/Ladymead junction. No new roads have been specifically identified in the Plan. It would be completely irresponsible and a waste of money to contemplate building even one house without having access, power & drainage to it assured. Some of the land identified for housing may be key to the development of essential infrastructure so the basics need planning first. Land may be required for a major road intersection etc. The possibility of an unsound decision in building an off slip at Garlick Arch may mean that in the future a 4 way interchange at Potters Lane is unfeasible. This off slip would also make no benefit in relieving the congestion through Burpham. I believe road network decisions, including the A3 will be decided by Highways England in 2020. Without decisions on this vital arterial road, further development within its proximity is unsound and unsustainable.

London Road through Burpham is planned to be a sustainable movement corridor but is likely to be congested by thousands more vehicles trying to negotiate to the South of town. I wonder if this road has ever been visited by the authors of the Draft Plan during a rush hour or when the A3 has one of its frequent hold ups. From the start of the south bound A3 slip road the traffic can often be queuing from around 4pm. Traffic moves at barely walking pace in both directions to and from Guildford town centre. The roundabout along London Road where it intersects with New Inn Lane and Burpham Lane is a particular bottleneck even at weekends. When there is a problem on the A3, Guildford and its surrounding villages often come to a virtual standstill.
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Evidence is expected to be up-to-date and relevant. However, the evidence that GBC presents is neither accurate nor up to date. In the Settlement Profiles document (2013) which is part of the Settlements Hierarchy referred to in the Evidence Base (Appendix D of the Plan) GBC state (page 49) "There is a Site of Nature Conservation Importance (SNCI) to the north of Normandy" whereas in fact there are 4/5 SNCIs to the north of Normandy (see Map 2, Appendix 1) namely: Withybed Copse and Henley Park Fields SNCI, Normandy Common SNCI, Wyke School Wood SNCI, and Wyke Churchyard SNCI, and arguably part of Wanborough and Normandy Woods SNCI. In addition to these, there are two others in Normandy Parish, namely Little Flexford SNCI and Broadstreet Common and Backside Common SNCI as well as the remainder of Wanborough and Normandy Woods SNCI. An eighth SNCI, Greencut Copse SNCI is outside Normandy Parish but within 2 km of Site A47.

We are of the opinion that the evidence is flawed and, had it been assessed correctly, A46 would not have been included in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1196   Respondent: 15371361 / Friends of Normandy Wildlife (Alistair Lawson)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Objection to proposal to inset Normandy and Flexford from the Green Belt

We object to the insetting of Normandy and Flexford from the Green Belt on the grounds that these areas do contribute to 'openness of the Green Belt'.

According to the NPPF "the essential characteristics of Green Belts are their openness and their permanence". Paragraph 4.3.1.2 of the Plan (under Policy P2) states that "only those villages whose open character makes an important contribution to the Green Belt should be included in the Green Belt". We contend that the land in both Policy A46 and A47 makes an unparalleled contribution to the Green Belt which stretches from Guildford in the east to Ash/Tongham in the west. If this area is inset and built upon in the manner proposed it will be the beginning of urban sprawl across this stretch of countryside which Green Belt policy was designed to prevent. It will break up wildlife corridors and degrade habitats. The Government have indicated that Green Belt Is supposed to be protected, but GBC are trying to justify development in this area when they themselves designated it as having a 'Red' status under their system for quantifying sensitivity (red being the most sensitive and least likely to be developed). GBC have totally ignored all policies on Biodiversity when proposing to inset these areas.
New developments are supposed to maintain existing Green infrastructure and improve upon it; in order to secure sustainable development, there should be a net gain for biodiversity. It is impossible to agree that any Green infrastructure which would accompany this development could mitigate for the habitat loss and resultant decline of species.

According to the Council for Protection of Rural England (CPRE), 13% of the most important habitat areas identified in UK BAP occur in the Green Belt, and certain species such as the mistle thrush, song thrush and starling (known to use Site 46) are doing better in the Green Belt than in any other parts of England. Green Belt areas also show more positive trends of bird and butterfly species than in the urban fringes compared to them.

Removing large areas of the Green Belt cannot possibly be considered 'sustainable'. FNW totally oppose the Insetting of the Green Belt encompassing and surrounding Normandy and Flexford.

1. Concluding comments

It is evident from our knowledge of the proposed development site that the area covered by the Plan for Normandy and Flexford is of major importance for biodiversity and wildlife. Normandy Parish is one of the most wildlife rich districts in Guildford, comprising seven SNCIs, many additional UK BAP Priority sites, together with areas of ancient woodland. A significant part of the environmentally internationally important TBH SPA is within the Normandy Parish.

The natural environment in Normandy and Flexford will be irreparably damaged if replaced by houses with small gardens, schools, shops and playing fields. There will inevitably be a significant net loss of biodiversity, an impoverished natural environment and significantly reduced wildlife species in and around the area. Although the ancient woodlands will remain on site A46, their ecology will be in a degraded state due to damage to the trees and the life they support from roaming cats, dogs and people (by trampling, picking and uprooting plants, creating fires, foraging, light pollution, noise pollution, air pollution effects on lichens, fungi, invasions from gardens of non-native plants etc.) (see The Woodland Trust article specifically on this subject entitled: Impacts of nearby developments on ancient woodland -addendum by Luci Ryan, December 2012). Individual trees outside of the ancient woodlands could similarly be damaged.

A46 removes over 67ha of land rich in species of both animals and plants and offsets it with a SANG of probably 21ha, the minimum required. SANGS are for mixed use, and can never be as species rich as the land covered by A46, neither can small gardens and playing fields, so there would be a net loss of approximately 46ha of invaluable species rich land. There will be an additional loss of over 5ha from A47, making a total loss of species rich land in Normandy and Flexford of 52ha. The proximity of the housing development to the TBH SPA, and the size and likely condition of the proposed SANG, means that there will be an increase of dog walkers using the TBH SPA which will damage the fragile environment of this internationally important site and have a deleterious effect, particularly on rare ground nesting birds.

It is obvious that in putting forward this plan, GBC have completely ignored their own Policy 14 on the need to maintain Biodiversity and likewise ignored the NPPF and the UK BAP project with regard to biodiversity and habitat protection.

It is therefore our contention that the proposed development is unsustainable in that it does not meet the conditions set out in the NPPF (see 2.1 above). It contravenes the Framework in that the effect of Policies A46 and A47 will be to lead to the loss of irreplaceable habitats and decimation of populations of wildlife species.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Friends of Normandy Wildlife (FNW) strongly object to the proposed development (sites A46 and A47) in Normandy and Flexford as set out in the Guildford Borough Council Proposed Submission Local Plan: Strategy and Sites, June 2016 (the Plan). Our Response comprises the following:

Background: The importance of Normandy and Flexford for biodiversity, nature conservation and wildlife.

Section 2: Conflict of the Plan with relevant national and local policies on biodiversity and the natural environment

Section 3: Deleterious effects of proposed development (Policies A46 and A47) on biodiversity, the natural environment and associated wildlife.

Section 4: Objection to proposal to inset Normandy and Flexford from the Green Belt

Section 5: Concluding comments

There are a number of nationally important sites for nature conservation within and adjoining the Parish of Normandy.

(i) Statutory Designated Sites

Normandy Parish includes a large part of Ash Ranges which form part of the Thames Basin Heaths Special Protection Area (TBH SPA; see Map 1, Appendix 1), a statutory designated site and designated for its rare and vulnerable birds, specifically nightjar, Dartford warbler and woodlark, under the EC Birds Directive. This site also forms part of the Thursley, Ash, Pirbright and Chobham Special Area of Conservation (SAC), a statutory designated site and designated for its North Atlantic wet heaths, European dry heaths and peat bogs.

Ash Ranges also form part of the Ash to Brookwood Heaths Site of Special Scientific Interest (SSSI), a statutory designated site and designated for its dry heathland, wet heathland and bog, bryophytes (mosses and lichens), invertebrates (such as the scarce bog bush cricket), birds (such as hobby, stonechat, yellowhammer, reed bunting, tree pipit, meadow pipit and the previously mentioned SPA bird species), and reptiles (all six native species including the European Protected Species sand lizard and smooth snake).

(ii) Non-Statutory Designated Sites

Within a radius of 2 km from site A47 there are eight non-statutory designated sites (see Map 2, Appendix 1). These sites are known as Sites of Nature Conservation Importance (SNCIs) and are identified on account of the habitats and flora/fauna they support. They are of County or regional wildlife importance.

(iii) Ancient Woodland

Ancient woodland is defined by Natural England as a site that has had a continuous woodland cover since at least 1600 AD. It is an irreplaceable, wildlife-rich habitat known to support more biodiversity than any other UK land habitat, and often includes important archaeological features.
The proposed development site contains several areas of ancient woodland (see Map 3, Appendix 1). The two main areas in or bordering site A46 in the Plan are Pussey's and Walden's Copses. In addition, there are two smaller areas, the offset East-West trending belt of woodland West of Pussey's Copse and the smaller North-South trending belt south of Walden's Copse. This woodland is clearly ancient (as identified from associated flora such as primroses, bluebells, wood anemones and early purple orchids), but is not included in the Ancient Woodland Inventory because it is slightly under the minimum registration size of two hectares. Nevertheless, we believe that this valuable and irreplaceable woodland should be treated as if it was protected and therefore be left intact. The current developer plan shows a road bisecting this woodland; if implemented it would destroy a precious green corridor.

There is an avenue of old oaks towards the centre of the footpath that crosses the site, which are registered on the Ancient Tree Inventory, and other individual trees on the site which the Woodland Trust regards as valuable in terms of conservation.

- Other Habitats of Importance

There are a number of other habitats of importance within the Parish which are important to biodiversity and enhance the natural beauty of the area.

- Hedgerows

Hedgerows surround many of the fields within the Parish. These are important habitats for nesting and foraging birds, small mammals including dormice, amphibians and reptiles, and many invertebrates and plants. They also function as green corridors for wildlife.

- Traditional Orchards

Traditional orchards (see Appendix 2) are also present within the Parish which are all Priority Habitats. The Normandy Traditional Community Orchard is home to a number of species and some of these are Notable Rare or Scarce species.

- Ponds and Streams

A number of important wetland habitats are located within the Parish. Two of these ponds (Normandy Pond and Little Flexford Flax Pond) have been designated as Sites of Nature Conservation Importance. The Flax Pond and stream at Little Flexford have records of water voles (UK's fastest declining mammal species), and the Flax Pond has anecdotal records of great crested newts (European Protected Species).

The stream and Normandy Pond on Normandy Common have records of water voles and Normandy Pond in particular has records of several dragonfly species. There are anecdotal records of great crested newts present on Normandy Common, particularly in the wooded areas near to Normandy Pond.

Some large ponds also occur in the region of Little Flexford. These are home to many species of waterfowl, as well as providing breeding sites for common frogs and toads and foraging sites for grass snakes.

- Fauna and flora present on land between Normandy and Flexford (re Policy A46)

The investigations of the proposed site by FNW were unfortunately limited since our only permitted access was the footpath across the site. Despite this restriction, we have been able to show that the area is rich in species, especially bird species. Had we had greater access and a more prolonged time period over which to monitor the area, we are confident that, given the nature of the habitats, many more species would have been identified.

- Birds

Birds offer our best guide to the presence of species of conservation concern because they can be heard from a distance and they are likely to be seen flying around the general area. Site A46 falls within 4 one kilometre grid squares (SU9250, SU9350, SU9251 and SU9351) which combine to form a tetrad. From our group's records and those of BirdTrack (a collaborative online recording package from the British Trust for Ornithology, RSPB and Birdwatch Ireland) we find that 15 Red listed birds, have been recorded from the A46 tetrad. A full listing can be seen in Appendix 3. Additional birds
such as lapwing, feldfare, grey wagtail, marsh tit and lesser-spotted woodpecker, which are likely to be present given the nature of the habitats, would increase this figure to twenty. In addition, another 18 species occurring on the Amber list (BoCC4) have been recorded from the tetrad. BoCC4, has been compiled by the UK’s leading bird conservation organisations and they state that there are more birds on the Red List that occur in woodland (e.g. woodcock, nightingale) than in any other habitat and that farmland birds (e.g. lapwing, grey partridge, redwing, fieldfare, skylark) are still a major concern. The woodland and agricultural land in Normandy Parish therefore provides a key area for endangered species.

- Amphibians

Amphibians are considered to act as good barometers of the overall health of the environment and are protected species. All of the UK amphibian species have been recorded (based on the Surrey Amphibian and Reptile Group (SARG) Interactive Atlas) in the A46 tetrad with the exception of the most threatened and European protected species, natterjack toad and great crested newt. However, the latter species has been recorded in the tetrads to the South and East and so could be present.

- Reptiles

All UK species of reptiles except for the rare smooth snake and sand lizard have been recorded in the A46 Tetrad (SARG Interactive Atlas).

- Hazel dormice (dormice) and water vole

Dormice and water voles are considered by FNW to be potentially present in the area. A local person living near the A46 site has reportedly seen the fully protected dormice using a box in their garden and, since these animals are known to occupy ancient woodland more frequently than recent woodland, we feel that there is every chance they are present on site A46, but as stated above, our investigations have been limited.

According to Surrey Wildlife Trust water voles have suffered one of the most catastrophic declines of any British mammal and, as mentioned above, have been recorded at Little Flexford in the past. Since their home territories extend linearly along the banks of streams, there is still a possibility that a population exists undetected on private land in upstream or downstream locations, or even on tributaries on site A46. It is imperative that their habitat is reained and not disturbed.

- Other sensitive species

A sensitive species seen in the A46 tetrad is the white admiral butterfly (UK Biodiversity Action Plan priority species). This occurs in woodland areas and along with the purple emperor (Butterfly Conservation 2010 Red list: near-threatened) is likely to be found in site A46. The seriously threatened stag beetle (a BAP priority species and protected in the UK) is a Normandy speciality and has been seen recently in Glaziers Lane and the Guildford Road (North of site A46) amongst other areas.

  - More common species

Pipistrelle bats are relatively common, as are roe deer. There are many of the common species of birds, for example, blue tit, great tit and magpie; butterflies such as orange tip, brimstone, red admiral and peacock; and plants including meadow vetchling, red clover, white clover, early purple orchid and wood sorrel.

One of the most influential figures in nature conservation, Sir Norman Winfrid Moore, stated ”It cannot be said too often that it is as much a conservationist's job to keep common species common as it is to ensure the survival of rare species”. We fully endorse this statement and believe it should be applied throughout Normandy and Flexford.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: [IMAGE 1.jpg](187 KB) [IMAGE 2.jpg](120 KB) [IMAGE 3.jpg](143 KB)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. Conflict of the Plan with relevant national and local policies on biodiversity and the natural environment

The national and local policies on biodiversity and the natural environment listed below all make strong statements about the need to minimise the Impact of development on biodiversity and to conserve the natural environment.

It Is clear that the proposals for development In Normandy and Flexford directly conflict with these policies and we object to these development proposals as GBC have failed to show how they will conserve and enhance biodiversity.

2.1 The National Planning Policy Framework

The National Planning Policy Framework (NPPF) states that "The purpose of planning is to help to achieve sustainable development" and it describes three "dimensions" relevant to this aim: economic, social and environmental. The explanation for how the environmental aspect plays a role includes the statement ".....helping to improve biodiversity, use natural resources prudently ....." (see point 7 of the section in the NPPF dealing with achieving sustainable development).

In section 11 headed "Conserving and enhancing the natural environment", it is stated inter alia that planning policy should protect and enhance valued landscapes and minimise impacts on biodiversity, providing net gains in biodiversity wherever possible to halt the overall decline in biodiversity, by promoting "the preservation, restoration and re-creation of priority habitats, ecological networks and the protection and recovery of priority species populations .....".

2.2 Guildford Borough Council

Guildford Borough Council (GBC) interprets the NPPF through their 'Policy 14' which emphasises the commitment to biodiversity stating: "The Council will conserve and enhance biodiversity and will seek opportunities for habitat restoration and creation, particularly within and adjacent to Biodiversity Opportunity Areas (BOAs) "

Proposals for development must demonstrate how they will deliver appropriate net gains in biodiversity. Where proposals fall within or adjacent to a BOA, biodiversity measures should support that BOA's objectives. The Supplementary Planning Document (SPD) will set out guidance on how this can be achieved. European sites designated as Special Protection Areas (SPAs) and Special Areas of Conservation (SACs), National Sites of Special Scientific Interest (SSSIs), local SNCIs and Local Nature Reserves are all shown on the Policies Map or as subsequently updated.
Policy 14 goes on to say that "Permission will not be granted for proposals that are likely to materially harm the nature conservation interests of local sites unless clear justification is provided that the need for development clearly outweighs the impact on biodiversity."

2.3 The UK Biodiversity Action Plan

The UK Biodiversity Action Plan (UK BAP) describes the UK's biological resources. In Surrey, recognised priority habitats include lowland dry acid grassland, lowland meadows, flood plain grazing marsh, wet woodland, hedgerows, and arable field margins. It is known that farmland offers important habitat for wildlife. The UK BAP also identifies priority species for conservation, which include rare and also declining "species of mammals, birds, reptiles, amphibians, fish, plants, mosses, lichens and fungi". Examples of priority species in Surrey include farmland birds which should be protected from further decline by maintaining and enhancing current populations wherever possible. As it says: "Development could impact on these species by direct loss of habitat, but also through increased recreational disturbance; especially associated with residential developments."

The proposed area for development in Normandy and Flexford encompasses many of the above biological resources, recognised priority habitats, and priority species for conservation. It is also relevant to the Biodiversity Plan for Surrey (see 2.4 below).

2.4 The Biodiversity Plan for Surrey

The Biodiversity Plan for Surrey (BPS) incorporates changes brought about by the NPPF, identifies the importance of Ancient Woodland and veteran trees for biodiversity interest. Such habitats support woodland plants with limited dispersal abilities, mammals such as bats and dormice which are protected species, as well as woodland birds and butterflies (many of which are in decline nationally), invertebrates and often lichen, mosses and fungi.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3.1 Policy A46: GBC have failed to take into consideration the impacts upon wildlife and habitats both within the proposed development site and in SSSI's and SNCI's in the surrounding area in breach of Section 11 of the NPPF (see 2.1 above)

3.1.1 Impact on the wider environment of the Thames Basin Heaths Special Protection Area

We believe that the Plan is unsound in relation to Policy A46 as the Habitats Regulations Assessment prepared for GBC does not take sufficient account of the impact that this huge proposed development specifically will have upon the Thames Basin Heaths Special Protection Area (TBH SPA) which is a European Site as defined under the Habitats Directive and Conservation of Habitats and Species Regulations 2010 (as amended). The proposed development is considerably less than five kilometres away from the TBH SPA and not much beyond the 400m exclusion zone, occupying an area between under km, to just over 2km, from the TBH SPA. It has been indicated
that the cumulative effect of further residential development up to 5 km from protected heathlands will have a significant adverse effect on the heaths. Furthermore, Natural England believes that recreational use of the heaths arising from housing developments up to five kilometres away from a SPA will create disturbance to rare bird populations. The TBH SPA is an internationally important habitat for three rare species of bird - the Dartford warbler, woodlark and nightjar. The latter two are ground nesting and therefore particularly susceptible to disturbance from people and animals.

We therefore question whether enough - or indeed any - consideration been given to the potentially detrimental effect that the proposed strategic development between Normandy and Flexford will have on this internationally important site.

A survey in 2008 showed that more than 83% of visitors to the SPA arrived by car and that 70% of those had come from within 5km of its access point. A very large proportion of the TBH SPA visitors are dog walkers, many of whom visit a particular site on a regular basis. Two hundred and sixty four dogs are likely to come with the proposed development, the current ratio of dogs per household being 24/100, so this could potentially attract between 26 and 132 extra dog-walkers a day.

To deter dog-walkers from visiting the TBH SPA, any Suitable Alternative Green Space (SANG) in the proposed development would have to be of exceptional quality, as the Nightingale Road and Dolley's Hill entrances to the TBH SPA are only either 5 minutes away by car, or 20 minutes on foot. Whatever the size, the SANG would be a very small area in which to exercise 264 dogs. A small number of irresponsible dog owners, who do not scoop the poop, will make such a small area unattractive for walk and play. This is already a problem on Normandy Common.

Another factor is that some areas where a SANG might be located are muddy in wet weather and throughout the winter, whereas many of the tracks on the TBH SPA are dry in wet weather, (including the winter). For those dissatisfied with the proposed SANG for whatever reason, or those wanting a longer walk, the natural alternative is the TBH SPA. If only 10% of dog owners use the TBH SPA, there would be 26 extra dogs a day using the TBH SPA; if 50% do, it would be an extra 132 dogs a day.

Friends of Normandy Wildlife believe, that given the proximity of the proposed development to two entrances to the TBH SPA it will be impossible to design a SANG that will deter many residents from using the TBH SPA to walk their dogs. This will have a very serious impact on the wildlife and overall environment (unique flora and fauna) of this internationally important area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

3.1.2 Impact of increased volumes of traffic on wildlife

If the proposed development goes ahead, there will be an increase in pollution with respect to air quality, noise and light levels, particularly where cars have to queue at junctions or obstructions. The transport strategy proposed by GBC for this strategic site contains no scheduled improvements for Glaziers Lane and very few for Westwood Lane, both rural lanes. The A323 to the North of the site will also be affected, and very few improvements to that road are planned.
This will affect not only the people living in the area but also local wildlife. Natural England addressed this issue in: 'The ecological effects of air pollution from road transport' (2016) which states that: "Biodiversity 2020 identifies air pollution as a direct threat to biodiversity in England. Many habitats of nature conservation importance in the UK are nutrient-conditions and/or are vulnerable to acidification, and are sensitive to additional airborne nitrogen oxides (NOx), sulphur dioxide (SO2) and ammonia (NH3), as well as to nitrogen deposition and acid deposition." In addition, noise from traffic can result in hearing loss in animals. It masks important environmental clues and animal signals. It can result in stress and induce behavioural effects, such as abandonment of territory. With regard to light, predators use light to hunt, and prey species use darkness as cover. Thus increased light at night alters the predator/prey balance and can also affect breeding behaviour in many species.

The environment and the wildlife in and around the four designated SNCIs on the A323 in Normandy i.e. Wyke Churchyard SNCI, Normandy Common SNCI, Wanborough and Normandy Woods SNCI (northernmost wood) and Wyke School Woods SNCI, all of which border the road, will be adversely affected by increased traffic and associated pollution. The UK BAP Traditional Orchard Habitat in Glaziers Lane will also be affected.

Another road where traffic will also be significantly increased is the A324. This borders the TBH SPA and increased traffic and pollution will therefore have an adverse effect on the heathland.

The increase in volume of traffic resulting from the proposed A46 development will reduce Biodiversity and harm wildlife. The transport strategy for the area does nothing to mitigate for this and does little to reduce the number of additional motorised vehicles on the roads around the site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A47

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3.2 Impact of Policy A47.

The majority of the site covered by this part of the development is designated as an SNCI and lies within an area identified as a 'Water Vole Alert Area' as identified by the National Water Vole Database and Mapping Project in 2012.

It is shocking that GBC would ever consider an SNCI a suitable site for development, particularly given the statements in the NPPF (Para 109) and the Council's own Policy 14 as set out in section 2.1 and 2.2 above. We find it a telling insight into the very low value that GBC places on Biodiversity and wildlife.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3.1.3 Impact of the proposed density of housing and Policy D4.
A large development such as proposed for site A46, with urban housing density, will impact significantly on wildlife within the ancient woodland and veteran trees on the site. The damage to both the environment and its wildlife would be immeasurable regardless of whether buffer zones are put in place.

Not only would the woodland wildlife on the site be harmed, but also wildlife in the woodland next to the site, i.e. the North end of Walden's Copse and Pussey's Copse. Furthermore, it is very important not to break the canopy in any of the existing connections between these woodlands for fear of wildlife isolation. Dormice, for example, do not often like to come down to the ground preferring to move through the canopy.

With the proposed development will come cars, noise, light and air pollution all of which are hazardous to wildlife. As well as increased human activity, there are likely to be approximately 187 extra cats in the area, cat ownership currently being 17 out of 100 households, together with a large number of dogs (see section 3.1.1. above). These animals would undoubtedly have a serious impact on the wildlife of the woodland areas no matter how well the woodland are protected by fencing for example (it is well known that people cut fencing to facilitate access).

The elimination of farmland on site A46, which has traditionally been used for grazing, would also be disastrous since it provides habitat for a variety of wildlife including hedgehogs (which are seriously in decline), bats, owls, and woodpeckers. The open fields are important hunting grounds for barn owls, which can only hunt over open space, and birds of prey such as red kite, buzzard and kestrel. Bats have been seen to hunt by the avenue of ancient oaks and on the wooded edges.

At present, the majority of houses in the villages of Normandy and Flexford have fairly large gardens, which support large numbers of wildlife species. The increased density in housing will come with gardens of much reduced size. There is also a trend in such housing developments for areas to be paved over for parking. Taken together, this results in a further reduction in the amount of green space, and the value of the gardens for wildlife declines.

GBC are of the opinion that the size of garden is irrelevant when it comes to maintaining biodiversity (see answer given by GBC to question 26 at the meeting organised by Normandy Parish Council on 24 February 2016). This is incorrect.

According to an internet article compiled by Ken Thompson and Steve Head, entitled 'Gardens as a resource for wildlife' (Wildlife Gardening Forum) It has been shown that total vegetation is a major determinant of diversity and abundance of wildlife. In this article the potential national significance of gardens as a resource for wildlife is clear, but that as garden size decreases, the area occupied by trees, hedges and tall shrubs also declines, with a resulting decline in biodiversity.

Policy D4 anticipates that new possible development sites will be proposed in inset villages (which will include Normandy and Flexford if the Plan is adopted) in addition to current site locations. Whilst they state that they aim to protect the important character of these inset villages using other development management policies, it is inevitable that any such development, if granted, will further increase housing density, with greater impacts on wildlife (as above).

GBC state in the Plan that they have a responsibility to use natural resources, such as land, wisely. They are of the view that increasing densities of housing is one such wise use of land, because it makes development more sustainable. However they fail to take account of the impact of such development on wildlife and the environment, both within the proposed development site and on statutory and non-statutory designated sites in and around Normandy and Flexford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Friends of Normandy Wildlife (FNW) strongly object to eight points in the Guildford Borough Council (GBC) Proposed Submission Local Plan: Strategy and Sites, June 2016 (the Plan). These are:

- The late inclusion of A46 in the Plan
- Errors in the Evidence Base regarding Settlement Hierarchy and Settlement Profile of Normandy and Flexford
- Non-compliance by GBC with Policy 14
- The proposed development in Normandy and Flexford (Site A46)
- The proposed development in Flexford (Site A47)
- The Transport Strategy in relation to Normandy and Flexford
- The urban density of housing proposed for A46 and Policy 04
- The insetting of Normandy and Flexford (Policy P2)

FNW object because we believe the Plan to be unsound and unsustainable and does not therefore meet the requirements set out in the National Planning Policy Framework. The proposed development represents a serious encroachment on the Green Belt and would have a significant and deleterious impact on biodiversity and the natural environment including wildlife. These are factors which are highlighted as important in National, County and Borough Council policies relating to planning, yet they have been completely ignored within the Local Plan.

In view of the fact that the proposed development (A46) was put into the Plan after the Regulation 18 consultations in 2013/14 and not published until April 2016 in the Draft Local Plan, residents of Normandy Parish have not had a previous occasion on which to comment upon it. FNW have attempted to address this omission in this response, in so far as the proposed development impacts upon wildlife and wildlife habitats (flora and fauna), both on the Thames Basin Heaths Special Protection Area, and on the countryside which will be enveloped by this development. This may mean that our response combines a Regulation 18 and a Regulation 19 submission.

In our submission, we demonstrate the major significance of Normandy and Flexford for biodiversity, wildlife and nature conservation with its nationally important sites for nature conservation within and adjoining the parish. We highlight the serious detrimental effects the development will have on these areas, and illustrate how the planning proposals (with particular reference to Policies A46, A47 and the Transport Strategy) directly conflict with National planning policies and Guildford Borough Council's own interpretation of these.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D).

The housing numbers proposed are for nearly 14,000 homes over 15 years from 2016 to 2031. This number is too high. The model used to calculate the number has not been seen or the assumptions tested by the council or any of its officers. It has been, on numerous occasions shown to be flawed by various 3rd parties. This housing target will result in the borough's permanent resident population increasing at 4.5 times the rate of population increase during the period 2001 to 2011. This population growth, by definition, is excessive and unsustainable for a gap town with many environmental, physical and infrastructure constraints.

Over 70% of the proposed housing is planned for land currently in the Green Belt. Housing need is not a reason in law for protected green belt land being used. It is perverse for so much housing to be planned for the green belt. Clearly, the green belt has not been used as a constraint as clearly set out in Government advice, planning policy guidance, the NPPF, case law, election manifestos and Ministerial letters to MPs.

For the West Horsley this is reflected in a 35% increase in the number of houses within 3-5 years of a plan being adopted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

7. I object to the expansion of commercial land in the urban area losing the potential for further housing. Policy E7: Guildford Town Centre

There is no reliable evidence provided that the retail core of the Town Centre can support expansion of 45,000 sq m of additional retail space at North Street.

Online retail is set to account for 21.5% of total retailsales by 2018 from 12.7% in 2013, the highest online retail share in the world according to the Centre for Retail Research. March 2016, online sales rose 12.3%, and it was the third consecutive month in which more than 20% of all non-food shopping took place online. (British Retail Consortium and accounting firm KPMG) With such a high retailers will need just 70 high street stores to create a national presence compared to 250 in the mid 2000's. An expansion on such a scale is negligent when the Council claims to be in such desperate need for housing.

Retail is a declining industry and should not be invested in by the Borough at the expense of housing in the most sustainable urban location, near employment and transport hubs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages. There is too much traffic in our villages already and this plan will cause more congestion in West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon, with no plan to improve that. The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses in such a small area means dangerous and unsustainable traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

6. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Under the current economic climate post Brexit, it is unlikely any additional funding will be made available for new capital projects. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), should not take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to not protecting the Green Belt (Policy P2)

Our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city's playground. It is for us to conserve and protect it. There are 5 legal purposes for Green Belt, and it meets them all:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns
- To assist in urban regeneration by encouraging the recycling of derelict and other urban

This policy is flawed and should have been amended. In the last consultation just six individuals, out of the c. 7,000 of those who took part in the consultation, supported the policy. Another 20 comments of support were from organisations such as: the University of Surrey, local councils (including Guildford), consultants (e.g. Savills) or landowners. But of the 1,371 who commented on the green belt policy 1,332 (97%) were against.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/4697  Respondent: 15371777 / Peter Thackery  Agent: 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7. NO EXCEPTIONAL CIRCUMSTANCES

The local plan proposes nearly 9000 new homes to be built on Green Belt land (compared with 50 000 current homes in Guildford, so approx. equato 18% of the existing homes in the borough) - a huge proportion. The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is NOT an exceptional circumstance in law. No exceptional circumstances have been disclosed. So the Green Belt boundaries should NOT be changed through the plan making process.

8. BROWNFIELD AVAILABLE

There is brownfield land available in the town centre which is being earmarked for commercial development rather than for housing. This is enough to meet our real needs for affordable local homes. There are enough vacant commercial sites to cope with genuine business need, and we have enough retail capacity already, so urban brownfield/derelict land should be used for housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
### 10. DRAINS, WATER SUPPLY, FLOOD RISK, CONGESTION

Our drains, our water supply, our medical facilities and our roads cannot cope with the proposed number of new homes. Building this number of homes will lead to flood risk here and downstream (along the Wey and Thames). The planned development on Green Belt is therefore unsustainable.

In conclusion, I must ask you to revise the housing number, and to amend the Local Plan to utilise brownfield land rather than green field sites.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

### 1. I object to the Local Plan as the development proposed is not sustainable (Policy S1)

13,860 new houses proposed is not sustainable - it will damage local communities by over development, especially West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon. The local communities don't need these houses. Wisley Airfield (A35) and Garlick's Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car.

The development should be in urban areas where there is sustainable transport. West Horsley for example will see the number of housing increased by 35% within 3-5 years of the plan being adopted. The number and density of housing is not in keeping with the local area and is therefore against policies within the NPPF.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions I-7 of the questionnaire): ()

I object to Ripley and Send villages being removed from Green Belt. The Government initiative of Green Belt was intended to be permanent, re National Planning Policy Framework, and there are no special circumstances to justify a change. In particular Send's Green Belt provides an essential buffer to stop Woking and Guildford becoming one conurbation.

Local Councillors and central Government gave a clear election promise to protect the Green Belt and this reneges on it. Developers will be quick to take advantage and there will be nothing to stop them.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
I object to site A43 Garlicks Arch - site of ancient woodland dating to 16th century important wildlife area
I object to site A43a - on and off ramp at Clandon - local roads are already choked with "cut through" traffic. The local roads and infra-structure cannot cope with more traffic, and a junction here would also encourage heavy good vehicles.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I Object to the building of 400 houses and 7000 sq metre of industrial space at Garlicks Arch opposite Send Marsh Road. This site floods and is covered by ancient woodlands. The industrial space here is not needed, and would be better sited at Slyfield. Woodland should be protected and conserved - once gone it cannot be reclaimed - there are better brown field sites that could used.

There is heavy traffic already on local roads as rushhour traffic tries to find "cut throughs". Our Roads cannot cope with such an increase in population, this will result in infrastructure overload

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Hence a further **major objection** to a new interchange with the A3 at Burnt Common.

This would take traffic from the proposed 2000 new houses at Wisley Airfield, 2000 at Gosden Hill Burpham and 1850 at Blackwell Farm. Much of this traffic to and from the A3, M25, Woking and Guildford would go through Send. Send Road, which is already overloaded, would become gridlocked. Noise and pollution levels, already at excessive levels, would worsen.

I would appreciate if the Planning Inspectorate can be made fully aware of my objections and would request confirmation that you have received this communication.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object to the plan to build 40 houses and 2 travellers' pitches at Send Hill. This is inappropriate with a narrow width single access country road. Subsoil of proposed site also contains documented unsafe landfill waste registered at GBC.

With Slyfield Industrial site and large shopping outlet sites on Ladymead Estate is there real proof that further development just a few miles away is needed!

I suggest further consideration of brown field sites or of the Wisley Aerodrome area - this is a large area of underused land that could be better utilised.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
15. I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick's Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Answer (if comment is on questions 1-7 of the questionnaire): ()

16. I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2197  Respondent: 15372417 / P. Mew  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
13. **I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)**

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (82) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy 03).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
1. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Glandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

8. I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I object to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick's Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
5. I object to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
7. I object to the loss of rural employment (Policy ES)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

9. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Glandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
10. I object to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4715  Respondent: 15372417 / P. Mew  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

11. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy 12)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

3. I object to not protecting the Green Belt (Policy P2)

I object to the proposals to remove the villages of Ripley, Send and Glandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43).

National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.
Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. I object to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commisioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4703  Respondent: 15372417 / P. Mew  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on the local communities by overdevelopment, particularly for the villages between Guildford and the M25, including Ripley, Send and Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35) and Garlick's Arch (A43) are in unsustainable locations. They do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4704  Respondent: 15372417 / P. Mew  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. I object to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill (Glandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Glandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.
We object to Guildford Borough Council's draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:

- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- increase tailbacks on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to register OBJECTIONS to the Proposed Submission Local Plan in respect of its impact on East and West Horsley.

GREEN BELT

No sound case has been made for justifying changes to Green Belt Boundaries laid down by national legislation.

The National Planning Policy Framework requires any change in Green Belt boundaries to be the result of exceptional circumstances. No exceptional circumstances have been demonstrated.

PROPOSED HOUSING DEVELOPMENTS

The proposed development of 533 homes on Green Belt sites, at much higher densities than currently exist, would be totally out of character with the existing houses and village layout. These developments would also be unsustainable in terms of drainage, roads capacity, schools, medical facilities, shops, parking and public transport.

LAND AT FORMER WISLEY AIRFIELD

The proposal to build approximately 2000 homes at this site is in effect the creation of a New Town in the Surrey Green Belt. This development would be a severe contravention of Metropolitan Green Belt policy and would have a major adverse impact across a widespread area, including East Horsley.

CONCLUSION

I object to the Proposed Submission Local Plan. The Council should be directed to amend the Local Plan by using brownfield and previously used land for housing instead of encroaching on Green Belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I was born and raised in Send and had just put in an offer on a house in Send and was looking forward to returning to the Borough. I have withdrawn my offer as I would not like to live in an area or Borough that does not try to protect its greenbelt or open spaces. I therefore object for the following reasons.

I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford.

I object to all the proposed sites in Send because they were not included in the previous consultation in 2014. Unlike the rest of the borough Send has not been properly consulted and all its sites have been changed substantially.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

• I object to the proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day.

• I object to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/ M25.

• I object to the fact that infrastructure requirements have not been properly considered and are inadequate to deal with proposed housing Roads, doctors and schools will be unable to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to the building on the Green Belt at Send at Garlick's Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded.
- I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford's urban brownfield areas much closer to existing transport hubs.
- I object to the large proposed development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.
- I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.
- I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4758  Respondent: 15373089 / Gavin Biard  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states that the presumption in favour of sustainable development "should be seen as a golden thread running through both plan-making and decision-taking." Standing at the head of the draft plan, Policy S1 ought to set a dear framework. Instead, no definition of "sustainable development" is given.

The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

Thank you for reading this and I hope my views are I look I object to all the proposed sites in Send because they were not included in the previous consultation in 2014. Unlike the rest of the borough Send has not been properly consulted and all its sites have been changed substantially forward to your reply.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to site A35 Wisley Airfield. The proposed development is totally inappropriate and a more suitable use for the site would be as a park-and-ride 'hub' with buses going to Guildford, Woking (via Send), Heathrow and Gatwick Airports and possibly other places such as Effingham Junction as well. Tilis would reduce traffic flows on the M25, A3 and other local roads.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

I object to the 2016 draft local plan for the following reasons:

I object to the local plan as the development proposed is not sustainable. The number of houses to be built per year is too high, firstly this should be constrained by infrastructure, for example a number of schools are at capacity already, secondly the overall requirement should be reviewed in the light of the recent referendum decision for the UK to leave the EU.

In particular I object to the late inclusion of sit A43 Garlicks Arch. This is a green field site with productive agricultural land and ancient woodland. For the development which is proposed the previous A43 site at Burnt Common was much more suitable, with land which is currently unused.

I support in principle the idea of a new junction with access to and from the A3 in both directions somewhere between Burpham and Burnt Common, however the correct place for this is near to site A25 Gosden Hill Farm, using both sides of the Portsmouth Road dual carriageway to access the new junction from Bumi Common roundabout.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ) is Sound? ( ) is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 at Burnt Common which is now a new allocation for a minimum of 7,000 sqm of industrial or warehousing. Surely this is a mistake and the word should be 'maximum', as in the 2016 plan. Since that time there has been a decline in demand for industrial land. Slyfield and Guildford have empty units and site A45 is totally unsuitable for a large industrial estate. I continue to support in principle the idea of a new junction with access to and from the A3 in both directions somewhere between Burpham and Burnt Common, however the correct place for this is near to site A25 Gosden Hill Farm, using both sides of the London Road dual carriageway to access the new junction from Burnt Common roundabout.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ) is Sound? ( ) is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I cannot understand why you wish to destroy local village life. I am 86 and have lived in Send all my life. It has undergone many changes, but this latest proposal is heartbreaking. Where are the schools or Doctors to help with an already over full village?

I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford. I also object strongly to the following.

I object to all the Proposed sites in Send because they were not included in the previous consultation in 2014. Unlike the rest of the borough Send has not been properly consulted and all its sites have been changed substantially.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2207  Respondent: 15373281 / Elizabeth Stefania  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• I object to the proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day.

• I object to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/ M25.

• I object to the fact that infrastructure requirements have not been properly considered and are inadequate to deal with proposed housing Roads, doctors and schools will be unable to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4775  Respondent: 15373281 / Elizabeth Stefania  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
• I object to the building on the Green Belt at Send at Garlick's Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually
• I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford's urban brownfield areas much closer to existing transport hubs.
• I object to the large proposed development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.
• I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are already at 100% capacity.
• I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

The NPPF states that the presumption in favour of sustainable development "should be seen as a golden thread running through both plan-making and decision-taking."1 Standing at the head of the draft plan, Policy S1 ought to set a dear framework. Instead, no definition of "sustainable development" is given.

The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

Thank you for reading this and I hope my views are I look I object to all the proposed sites in Send because they were not included in the previous consultation in 2014. Unlike the rest of the borough Send has not been properly consulted and all its sites have been changed substantially forward to your reply.

I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East has taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners' views, or the costs involved in improving the infrastructure, currently out side their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formulated by a bottom up approach, not top down.

I object to the 2016 Draft Local Plan as it has had no regard to schools required, additional medical or hospital facilities which would make a plan sustainable.

I object to raising the annual number of houses built per year. With no rational reason given, one must assume these are developers' numbers for financial gain and not for social need.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. A35

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

The assertion that the development will result in a meaningful shift to cycling

The increased volume of car traffic. A proposed development of 2,068 homes

The congestion this traffic will cause on the narrow rural roads in Ockham and

The danger this traffic will be to local cyclists and pedestrians, due to the

The increase in the already severe congestion on the Strategic Road Network

The lack of suitable public transport. The local rail stations of Effingham and

walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars would result in an estimated 4,000 additional cars on the roads on the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

The absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

The A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest. Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

POLICY D1 Making better places

GROUND FOR OBJECTION We support the emphasis on views, natural features, local distinctiveness, and layout of surrounding buildings.

There is no reference to vernacular or historic design guidelines, even in Conservation Areas and we object to the absence of this from this policy. Most of the borough, especially the rural areas, have vernacular design guidelines which are available to give suggestions as to appropriate design. These should have mandatory planning force.

The monitoring of this policy is inappropriate. Why should this policy result in a reduction of the number of appeals for poor design – should it not result in better designed buildings?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY D2 Sustainable design, construction and energy

GROUNDS FOR OBJECTION The emphasis on energy and waste hierarchies and reduction of carbon emissions as part of building design are welcomed. However, the emphasis on CCHP (Combined Cooling Heating and Power) and communal heating networks seems curious – no such networks are currently locally available. There is an element of “Greenwashing” – the imposition of aspirational environmental targets while ignoring the simple fact that building dormitory towns is environmentally unsustainable. These all require increased car use and will lead to increased congestion and so air pollution and higher carbon dioxide emissions and a few solar panels on roofs will not compensate for the considerable environmental cost.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY D3 Historic environment

GROUNDS FOR OBJECTION conserving and enhancing the historic environment may be damaged by supporting ancillary development. In historic locations (Chilworth Gunpowder Mills, the NT sites like Clandon Park or Hatchlands, Guildford Castle, Guildford Museum etc) this policy needs to have an overriding emphasis on protection rather than supporting development. The emphasis on supporting some development – in the context of an authority that has already set in place aggressive reviews of Guildford Museum and the Electric Theatre – should be viewed with some caution. The reasoned justification seems reasonable but it must be noted that it is the wording of the policy, rather than the associated explanation, that must be key.

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY D4 Development in urban areas and inset villages

GROUND FOR OBJECTION There are effectively two separate parts to this policy, both are flawed, and in the case of insetting, fatally flawed. In the case of urban development there are numerous flaws, including:

- The plan envisages that 40% of homes built will be affordable, but this does not provide any accommodation for low paid workers, for example, those on the minimum wage, who cannot afford to buy “affordable” homes, nor can they pay the so-called “affordable” rent. There is a need for some expansion in social housing, especially in urban areas, where there is a greater concentration of low paid workers such as those employed in the retail, warehousing and distribution sectors.
- The number of homes planned in the urban area is too low – there is a need for regeneration in some areas, but this is ignored and instead the plan concentrates on building homes on green field sites, which does not meet the needs for housing within the town, especially with the centre. This is not a sustainable policy as building outside the town has a disproportionate effect on road traffic.
- The plan envisages a large expansion of the traditional “bricks and mortar” retail sector, but this is a sector in long term decline.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E1 Meeting employment needs

GROUND FOR OBJECTION

- the evidence base is unreliable
- there is unclear differentiation between B class uses
- only high added-value business uses are desirable, not low grade, low employment warehousing which is land hungry
- industrial and commercial businesses must be concentrated in the urban area, or existing business parks (e.g. Slyfield) not in the rural environment which the infrastructure is unable to support
- the rural environment must support micro or high tech businesses, agricultural industries, and tourism, and these sectors must not be damaged by general industrial development which is inappropriate

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY E4 Surrey Research Park

GROUNDS FOR OBJECTION We support the maintenance of research, development and design activities, in any science, including social science, that is complementary to the activities of the University of Surrey at the Surrey Research Park. We do not believe that there is a need to expand the Research Park into a larger Business Park. We believe that the planning policy going forward for the Surrey Research Park should be to maintain and enhance the integrity of its research base allowing for the economic value add to the local economy of knowledge and technology transfer from the University. We believe that B1b (should be the primary use class for the Research Park and that applications for B1a should be resisted due to the danger of dilution of the core purpose and reputation of the park. We do not believe the inclusion of B1c uses is appropriate or necessary.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E5 Rural economy

GROUNDS FOR OBJECTION Use of rural areas for town centre uses without applying the sequential approach is against the principles of localism which mean that local people should be consulted – and heeded (not ignored!). Villages need protecting both in terms of design and in terms of scale.

Previous commitments to improved high-speed broadband and mobile phone coverage have now been diluted, despite general support. This is disregarding the responses from the previous consultation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY E6 The leisure and visitor experience

GROUNDS FOR OBJECTION Tourism and visitors do not depend on new visitor “attractions”. Overdevelopment of countryside is a risk.

Surrounded by the natural beauty of the Surrey Hills, Guildford is distinguished as an historic county town. The historic part of the town should be exploited to the full creating a real sense of vibrancy and atmosphere. This should be linked to the attractions of the Museum, the Castle, the Wey and the historic High Street including its views of the Hogs Back. Guildford would be wise to model itself on other historic towns like Bath, Chester and York. The economic impact would create big advantages for both the leisure and the niche speciality retail sectors in the town.

Guildford the historic “Gateway to the Surrey Hills” has far more potential than Guildford being a stereotypical centre found anywhere around London. The countryside can offer high quality tourism – including cycling, National Trust sites, open countryside and cultural events including theatre and opera – which is lucrative. This is not recognised fully.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E7 Guildford Town Centre

GROUNDS FOR OBJECTION. There should be much more residential use of the town centre. There is limited need for further retail, which will disadvantage existing retailers as well as using valuable land inefficiently. Existing niche retailers should be supported, but this does not mean further retail expansion which could be counterproductive. There is an urgent need for a brownfield register and to focus on brownfield redevelopment before considering development outside the existing urban area. CIL strategy must promote brownfield redevelopment. Guildford should strive for high quality definition making it a great centre for people to live in and visit. It would be a great mistake if Guildford were to opt for large impersonal department stores and dull high street chain stores at the expense of exploiting its uniqueness and character which would afford greater benefits.

### POLICY E8 District centres

**GROUNDS FOR OBJECTION** We think it is appropriate that these three district centres should support development consistent with the scale and function of the local centre. We think it is appropriate not to approve planning applications for main town centre uses over 100 sq m outside district centres – although this policy could and should be more clearly articulated. We do NOT support consideration of sites on the edge of district centres for town centre uses.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
POLICY H1 – Homes for all

GROUND FOR OBJECTION. The housing mix is based on the assumptions set out in the Strategic Housing Market Assessment (SHMA) which has not been scrutinised or evaluated and so we must object overall. We support high density development in the urban area. Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up suitable family accommodation in the urban area. Guildford borough has already a higher proportion of traveller sites than most comparable boroughs and this should be taken into account when evaluating need for travellers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H2 – Affordable homes

GROUND FOR OBJECTION. “Affordable” homes, under national definitions, means homes which are sold or rented at 80% of market value. Even at 70% rented this means that these homes will not be cheap, and starter homes will not be made available for local people. There is a viability clause (4.2.40) which means that in practice this could be unenforceable. We would be losing countryside for no local benefit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H3 – Rural Exception Homes

GROUND FOR OBJECTION. This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (this includes agricultural land and the AONB). These homes could be homes for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve
the “mix” this can include “market” housing (ie normal commercial development). This policy means building anywhere, and ignoring all historic planning restrictions.

**POLICY I1 Infrastructure and delivery**

**GROUNDS FOR OBJECTION** Various aspects of Infrastructure are acknowledged as congested, inadequate for the existing population and not able to accommodate much growth. However, greenfield sites – requiring heavy infrastructure investment – are targeted in order to generate CIL income for the council. This is not sensible. The current draft CIL scale also encourages development on greenfield sites rather than brownfield.

The Council’s methodology assessing traffic and roads infrastructure needs is inadequate. It identifies only the tip of the iceberg in terms of existing congestion. Looking at local traffic situations around the Borough it becomes clear that the schemes proposed will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed locations would require highway schemes that involve demolition of property and road-widening in residential areas to solve the resultant congestion. The A3 improvements are not guaranteed to take place but they are being used to justify removing large areas from the Green Belt before detailed traffic assessments have taken place. These detailed investigations are being deferred until the planning application stage and will be left to developers to prepare. If a site then proves to be unsustainable its Green Belt protection will have been lost for no reason and unsuitable development will take place by a more insidious process.

POLICY I2 Supporting the Department of Transport’s “Road Investment Strategy”

GROUND FOR OBJECTION This policy is concerned only with the strategic road network – the A3 and M25 for which the responsibility and decision-making lies with Highways England. It is only reasonable that the council will work closely with Highways England to ensure that the Local Plan does not utilise land in a way that limit the scope for future improvements.

However, the proposals for the A3 are undecided and the council has suggested a very expensive tunnel proposal that, even if HE decided to go ahead with it, is unlikely to be delivered until the end of the plan period. Less expensive alternative A3 improvements would not be delivered before implementation of the current draft Local Plan and would deliver a massive growth in traffic. The road improvements are likely to lead to massive disruption to traffic during the construction phase on top of an already overloaded road network. It would be folly to make matters worse by committing to a massive housing number and the only logical conclusion is that a very significant traffic constraint should be applied to the OAN for this Local Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY I3 Sustainable transport for new developments

GROUND FOR OBJECTION We support the concept of sustainable transport but object on the grounds that the practicalities have not been properly considered,

It is not sustainable to build dormitory towns and call them sustainable.

Not everyone can cycle all the time.

How can large developments outside the town centre maximise sustainable travel? This is a matter for the planning process- the further from the town centre, the less sustainable the development will be.

Reliance on cycling discriminates against vulnerable members of the community. How can the disabled, those with small children, or the very old, or the infirm, or those who are ill, cycle outside the town in order to commute, or even inside the town? Only some people cycle –and Guildford has some steep hills, especially going out of town. Park and rides are slow – how can those with a 3 hour commute add 1 hour to their journey from using park and rides?

The only sustainable mechanism for new developments is to have them in the town centre close to the railway and the main shopping links where a “hoppa bus” can provide satisfactory links for those who cannot walk or cycle.

While we welcome the intention to encourage rail travel by adding two new stations (subject to negotiation with Network Rail) there could unintended consequences.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY I4 Green and Blue infrastructure

GROUND FOR OBJECTION The Policy shows concern for conserving and enhancing biodiversity, which is welcome. We also note and welcome the intention to extend the principle beyond Biodiversity Opportunity Areas. However the current plan to build on large areas of countryside and to inset villages will have the opposite effect. The Policy appears therefore to be a box-ticking exercise with no real teeth to it.

There is no mention of the value of wildlife gardening to biodiversity or the important role that larger gardens play in a village setting.

There is no mention of the impact of the plan on food production, or monitoring the loss of agricultural land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY P1 – Surrey Hills Area of Outstanding Natural Beauty

GROUND FOR OBJECTION This policy is much weaker than previous protection. It is dependent on the Surrey Hills Management Plan. Note that this welcomes housing development. The Surrey Hills needs much more substantial protection. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4812  Respondent: 15377953 / cctvtraining.com ltd (Gordon Tyerman)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P2 – Green Belt

GROUNDS FOR OBJECTION We object to the insetting of 14 villages from the Green Belt, and the proposal that infilling is acceptable within a further 12 villages within the Green Belt. We are concerned that “infilling” is also proposed outside the settlement boundaries of 11 further villages. Essentially, all the villages within the Green Belt are now vulnerable to extensive further development.

Green Belt is supposed to be protected as a matter of national and local policy, but this policy seeks to justify development in a supposedly protected area, in breach of local manifesto commitments and contrary to previous responses to public consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4813  Respondent: 15377953 / cctvtraining.com ltd (Gordon Tyerman)  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P3 – Countryside (ie countryside beyond the Green Belt)

GROUNDS FOR OBJECTION. This seems more protective – as a policy – than the proposals for the AONB and the Green Belt which is anomalous. Note - we are not in favour of building on this area. We think that the brownfield areas within the urban area are sufficient to meet all reasonable housing targets. There should be no need to build on any green fields if brownfield (previously developed) land is used efficiently. (That does not mean garden-grabbing!).

However, we do not think this area justifies stronger policy protection than any other part of the borough. This policy refers to the area of countryside near Ash and Tongham (see paragraph 4.3.28). The fact that the current and previous
Council Leaders represent this area should not give it preferential status: “we will seek to limit any development in the countryside unless it can be demonstrated that it is necessary in that location”. Green Belt and AONB areas should – by definition - have higher levels of protection than non-Green Belt areas, which is not the case with this policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/4814  Respondent: 15377953 / cctvtraining.com ltd (Gordon Tyerman)  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P4 : Flood risk and water source protection zones

GROUNDS FOR OBJECTION . There are aspects of this policy which are acceptable; it is sensible to protect groundwater source protection zones, provided that the maps are accurate.

However, urban development on hardstanding does not create increased flood risk, especially where there is the capacity for improved flood resistance measures to be included in the design. Sites such as the Arriva bus depot, on the River Wey bank, are potential high value brownfield land which may not be used for housing because of this policy. The footprint of existing buildings should not be the limit of future development, but the extent of existing hard standing. Tarmac and concrete do not act as functional floodplain, but some land with hard standing close to the river, within the town centre and within easy walking distance of the train station, provides an exciting opportunity for real urban regeneration which could protect the surrounding countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY P5: Thames Basin Heath Special Protection Areas

GROUNDS FOR OBJECTION. This policy is weak. The mitigation (cash compensation) offered for development in the special protection area is so small and negligible as to be meaningless.

SANG (Suitable Alternative Natural Greenspace) is not beneficial; the sites identified or targeted are already green space. To create SANG is just using agricultural or wooded land as recreation land in order to justify building on other green spaces. There is no actual increase in environmental protection; it is a policy designed to permit building on otherwise protected areas. SANG – in part used to prevent dogs and cats attacking nesting birds - must ensure that it is not using land which is adjacent to the special protection areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

POLICY S1 – Presumption in favour of sustainable development

GROUNDS FOR OBJECTION. While this wording is based on the National Planning Policy Framework (NPPF) – which is binding - this policy fails to recognise that development in rural areas, with inadequate transport and other infrastructure, cannot cope with the proposed scale of development. It is unsustainable. This should represent an absolute constraint on development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY S2 – Borough Wide Strategy

GROUNDS FOR OBJECTION. 13860 homes are proposed. This number has not been scrutinised by councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden. It is not reasonable to produce unsubstantiated numbers in order to justify major structural change in a widely protected area (89% Green Belt, 44% AONB, approx. 75% protected by SPA).

It is inappropriate to allocate this housing number, either over the plan period OR across projected sites, when the number itself is unsubstantiated. External consultants and members of the public have provided detailed criticisms of the model. If the housing number were substantially lower, and only met housing need, there would be no need to build on Green Belt or open countryside.

The number of homes proposed, plus existing planning permission, plus expected “windfall” sites, exceeds 13860. Guildford residents would not accept building homes on open countryside to meet Woking’s designated “need” but this seems to be implied.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/160  Respondent: 15377953 / cctvtraining.com ltd (Gordon Tyerman)  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( Yes ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There are more Traveller sites in the plan than identified in the research carried out using the national traveller policies.

Paragraphs 86 of the plan has been ignored in Ash and Tongham which are being developed in such as way that there will be no demarcation between the two villages. Villages should be able to show green belt areas between them is protected. This huge development does not follow that government advice.

There are NO special circumstances that require Ash and Tongham to be developed in this way. (paras 89/90) There is NO protection for the small villages Ash and Tongham which does not meet the governments national strategy on housebuilding. (Non merger para 80)

Given there has been massive development in Ash and Tongham already, outside of this plan further massive development would create an imbalance of housing to local amenities. There are no school places for such a large growth in housing and subsequent student population. Ash and Tongham should be protected from further massive development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to protest strongly about the new proposal planning in the area. Apart from the strain on the schools, doctors and traffic. The roads around here are in such a state and overcrowded in the village where parking is at present so difficult.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. APPENDIX C

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

2. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.
