We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  
Answer (if comment is on questions 1-7 of the questionnaire): ()  

I am writing to strongly object to the proposed building on green belt land in the area of Send, Ripley, Send Marsh, Burnt Common and Clandon.  
The building of new homes on urban brown field site or in existing villages must be the first consideration to provide homes for our young people and families who want to stay in the area, or for people who need to move here for work.  
I object strongly to the changes in the Green Belt Boundaries and also to the buildings proposed at Garlicks Arch!  
The present infrastructure is already unable to cope with the current residents .... Schools, doctors, roads .....  
The A3 is at a standstill both north and south of Ripley causing delays and hold ups into and past Guildford and trying to access the M25 at Wisley. No thought has been given to the traffic situation!  
The strength of feeling against these proposals is very strong in the area

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

2. I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

3. I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.
2. I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick's Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D).

The Plan's proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43).

Garlick's Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for its removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick's Arch.

The site is not appropriate because:
• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding.
• The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

</tr>
<tr>
<td>I object to the employment strategy and impact at Garlick's Arch (A43) (Policies E2 and E5). There is no need for new industrial sites at Garlick's Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning. Furthermore the development at Garlick's Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.</td>

<tr>
<td>I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a) North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved.</td>
<td>What changes (2016)/further amendments (2017) do you suggest should be made to the document? Attached documents:</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3).

The Garlick's Arch (A43) proposal would double the built area in the locality, and would irrevocably damage the character of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy 11).

There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Glandon, with no plan to improve that.

The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the lack of proper infrastructure planning for sites (Policy 11).

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick's Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.
There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/1224  **Respondent:** 15205729 / John Walker **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy 12)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the time frame of this Plan so the developments at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), should not take place.

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/1214  **Respondent:** 15205729 / John Walker **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to poor air quality concerns (Policy 13)

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016).
These are my main reasons/ I object on these grounds / ...

1. I object to the Local Plan as the development proposed is not sustainable (Policy S1)

13,860 new houses proposed is not sustainable - it will damage local communities by over development, especially Ripley, Send and Clandon. The local communities don't need these houses. Wisley Airfield (A35) and Garlick's Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick's Arch. The development should be in urban areas where there is sustainable transport.

I object to all erosion of the green belt and in particular the removal of Send from the Green Belt because the village and its
countryside provides a necessary buffer between Woking and Guildford. A vital lung for our congested and polluted town
centres.

I object to the building on the Green Belt at Send at site cA34, Garlick’s Arch, Clockbarn Nurseries and Send Hill because
it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually
eroded.

I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is
really needed can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.

I object to all the proposed sites in Send because they were not included in the previous consultation in 2014. Unlike the
rest of the borough Send has not been properly consulted and all its sites have been changed substantially.

I object to the proposal for travelers sites in Send. They should be subject to the same requirements as for other council
housing, in work, ability to pay rent, a named person to pay rates, utility bills, council tax, need. With their high social need
these sites need to be located next to main conurbations in Guildford and not in Send where local services are overloaded,
schools, Doctors Surgeries, banks, shops, groceries, and Public transport.

I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more. Where is your transport provision study.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough. Insufficient thought has been given to how the local infrastructure could cope with the additional traffic.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available. The office block on the Portsmouth road at Burnt common has remained unoccupied for 10 years.

I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding, with regular flooding on Portsmouth road where the river had to be diverted and culverted at the intersection with Send Marsh Road.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day, instead of just rush hours.

I object to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/M25. The traffic light intersection is already a major hazard for pedestrians as the walkway is only wide enough for one person, and unsuitable for parents walking their children to the local schools.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.
Please register my objection to the Local Plan, we need to consider our children future. We cannot go on building forever over our green belt. Who will stand up and say enough is enough. Surrey Hills is a unique area, let’s keep it that way.

I object to Policy A42 of the Local Plan because you have ignored my original objection and increased the number of houses from 45 to 60 houses. This will further increase the traffic entering Send Barnes Road. This road and intersection is already too narrow to take the existing traffic. The footpath at the nearby traffic lights is far too narrow, this footpath is used by mothers and children on the way to and from school. The path is so narrow that mothers cannot walk side by side. This is an accident black spot about to happen. This development is a further erosion of the green belt, which the Prime minister has said will not happen.

I object to policy A43, the development of 400 houses at Garlick's Arch. This is a huge development to be built on the green belt. This is unreasonable and out of all proportion to local needs. The Old Portsmouth Road from Burnt Common to the A3 roundabout is already overloaded. The intersection in Ripley regularly blocks solid during busy periods as does the slip road onto the A3. At the Burnt Common intersection the roundabout is regularly blocked with queues in all directions trying to feed from and on to the A3 slip into and onto Send Barns Lane.

I also wish to object to the setting aside for travellers and show people. Ther is no justifiable need. Your addendum notes state that you determined the need by ‘asking them’ very scientific. They children and mothers on these uncontrolled sites are particularly denied access to proper healthcare, and education. We need to break the cycle and provide permanent occupation, close to the services they need. Local services are already overloaded, local children already have to be bussed out of the area for their education.
I object to Policy A58 the construction of an industrial complex at Burnt Common. There is no need. If there is a need in Guildford it needs to be closer to Guildford Centre. There are several light industrial sites in Guildford and Woking that are an inefficient use of the space available. All need rebuilding with proper access to local roads, and some would provide space on the River Way frontage for council houses. I object to the term low cost housing, they are not value for money but cheap, poorly designed with insufficient storage, narrow staircases and little parking, irregular bus service and too far from the needs of those resident.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the above development.

Here follows some of the more important reasons.

1) The land is good quality, productive green belt.

2) The existing road network will not support the amount of traffic generated by the school and housing. Currently HGV’s turning into Glaziers Lane from the Aldershot Road have to use part of the opposite lane to get round.

Both bridges over and under the railway are at a dangerous angle to the existing road layout.

It seems to be a lack of judgement to suggest that many people will use the railway via Wanborough.
Station, they will not, and will use a car particularly when taking children to and from school (if the school is needed, there seems to be some doubt over this).

3) There are existing problems with both rain water, and sewage removal, and further development will add to the unacceptable situation.

4) The current power supply is prone to outage.

Before any decisions are made there must be a comprehensive plan to improve the existing road layout, and services, which must be paid for by the developer. He cannot be allowed to develop just because the area is flat without too many problems.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I'm writing to you with serious concerns over the draft plans for the plans to expand the housing in the Ripley/Wisley/Clandon area.

My family & I are residents of Ripley. I understand the need for additional housing in the area but have serious objections to the current plans put forward among our local villages. The OBJECTIONS I have are:

1) The plans for the manner in which to alleviate the additional traffic in the area: already the roads through Ripley become un-usable at certain times of day and the noise, pollution and lack of traffic control is unacceptable. The new plans will most certainly not alleviate the issue but make it many times worse. The plans for the new on/off ramp at Clandon will only serve to increase the traffic as opposed reduce it as well.

2) The erosion of the green belt.

3) The lack of provision for infrastructure, such as schooling & doctors surgeries.

4) The removal of our villages from the green belt.

5) The disproportionate amount of development in one area: ours are some of the most popular villages in the region and the reduction in their charm & beauty will be terminal for the future of them.

6) The lack of consultation period.

Please feel free to contact me should you wish to discuss in greater detail the issues that I have. There needs to be serious discussion with villagers on the current plans and greater consultation & effort to find more appropriate sites for new housing which could be built with suitable infrastructure in place.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I moved back to the area seven years ago after living in Hertfordshire, having originally moved from Lancashire and the beautiful countryside of the Pennines. As a keen lover of the countryside and wildlife I was keen to move to a green belt area. I am writing to make my objections to proposed Garlick’s Arch and removal of the green belt.

I OBJECT to the removal of 15 villages, including Ripley and Send, from the green belt. This will lead to wholesale, and often inappropriate developments.

I OBJECT to the fact that GBC have not followed the correct process for Send and Ripley developments. Any significant changes to the 2014 proposals, such as the proposal development of Garlicks Arch, should have required another full consultation, which did not happen. This invalidates the whole process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to policy A43.30 the development of new four way interchange onto the A3 which would mean that narrow Send Road (A247) would be the main route for traffic leaving the M25 and A3. It is already crowded and vulnerable to traffic jams. Further traffic from this development would result in permanent gridlock. It simply would not work.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I OBJECT to policy A44 which would see 40 homes and two travellers' pitches on land west of Winds Ridge and Send Hill. This was again a NEW site NOT included in 18 draft and therefore has NOT been consulted on previously. Once again this is Green Belt land partly containing unsafe landfill. Access is by a narrow lane which could never take the volume of traffic that would ensue from traveller's pitches.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the congestion that such development of this magnitude would cause to local village roads (Policy 11) There is too much traffic in the villages of Ripley, Send and Clandon already and the rural roads are narrow, in need of repair and without footpaths in many places. More houses will mean dangerous traffic conditions. Pity the poor cyclists as well as other road users.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the congestion that the proposed development would cause to the trunk roads A3 and M25 (Policy 12) Any proposed development should be preceded by infrastructure improvements. It is foolish to think that funds may be allocated in the future and local communities would be directly adversely affected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1243  Respondent: 15207457 / Robert Erhardt  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to not protecting the Green Belt (Policy P2) I object to removing Ripley, Send and Clandon, Wisley Airfields and Garlick’s Arch from the Green Belt. Such a change can never be reversed and there are no exceptional circumstances to require such action. There are other areas more suitable for accommodating the required housing, not in the Green Belt and consideration should be given to these sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: PSLPP16/1240  Respondent: 15207457 / Robert Erhardt  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Local Plan (Policy S1) as the development proposed is excessive for the area. The proposed 13,860 new houses is such an overdevelopment it will adversely affect local communities. As well, there is insufficient rail access and a limited bus service to cater for the increased population. Private cars will be a necessity and cause congestion. Schools and other infrastructure are also insufficient.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Ripley
I strongly object to the building plans in the Ripley and surrounding countryside areas.

Traffic is a big problem for our village which will get much worse with these proposals There is no evidence that we need all the proposed building.

There are no new schools planned nor provision for more Doctors Surgeries.

I object to the 2016 DRAFT LOCAL PLAN. And urge you to reconsider.

A very concerned Ripley resident.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We are a very small company that offers co-working facilities to technology professionals in the Guildford area. We are based on the Surrey Research Park, and work within a large network of independent games developers and creative tech professionals that that are based in wider Guildford area.

This network comprises mainly of young people, they are not well paid, they take risks with their time to drive the games and technology sectors forward in the area, and they are not close to the planning processes that defines the future of Guildford.

I am writing you to say that common issues with this group of young people is the lack of accessible and affordable housing.

I understand that the local plan that is now subject to a consultation has land allocations for housing across range of prices and accessibility and, for those companies that will emerge from our network, land for the growth of employment, as well as improvements to the infrastructure to support development.

Based on this understanding I am writing to support this plan, and encourage the council to do all they to improve access for young people to affordable housing.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We live in New Inn Lane, Burpham and are extremely concerned about the Proposed Local Plan for Gosden Hill.

There is no evidence supporting the need to build such a high number of extra houses in the area. The scale of the building project is out of proportion compared to previous year figures (693 a year, more than double the previous figure given in 2012 of 322) and out of line with the current political and economic uncertainty which puts people off buying.

The choice of the location of Gosden Hill is also surprising.

Given the lack of any reliable bus routes to Guildford centre, Burpham is not likely to be attractive to working people with no children. The proposed new railway station in Merrow would not help. Commuters who usually travel to London wish to join the fast lines from either Guildford centre or Woking. The incredibly slow trains which run through our currently picturesque villages will not suit busy commuters.

People as always will travel by car. The proposed tunnel would only partly address the traffic problems. The levels of pollution will become alarming. The loss of the green belt will have long-lasting and irreversible consequences for residents’ health and well-being.

Should a credible case for new housing be made, it is not clear why Burpham should bear the grunt of all the extra houses.

Already the construction of Aldi has created daily traffic jams at the end of New Inn Lane. Impatient motorists now fail to stop at the pelican crossing in New Inn Lane, endangering pedestrians and especially children walking to school.

The proposed new 4 way junction at Burnt Common will not alleviate Burpham’s traffic problems as has been claimed. The traffic situation, already dire in Burpham will be made far worse and to the detriment of everyone, residents and road users alike.
Finally, the heavily subscribed local schools will not be able to accommodate such an increase in population. It is irresponsible to push such a large scale project forward without having FIRST built new schools (not to mention bus lines, surgeries etc).

In conclusion, the proposed draft local plan, without any evidence for the need for extra houses on such a large scale, proposes to put the health of residents and the safety of our children in jeopardy.

On grounds of health and safety alone at the very least, it should therefore NOT GO AHEAD.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would wish to make the following comments in respect of the Plan:

I consider the local infrastructure completely inadequate to accommodate the number of properties that are being proposed.

Parking in East Horsley is already difficult and at both Horsley and Effingham stations commuters now often have to park on the roads or, in the case of Horsley, down by the community centre.

The surgery in Horsley is already overloaded and it can take weeks to get an appointment with ones own GP.

School places are simply not available.

I also fail to understand how changing the boundaries can be allowed when this is a deliberate attempt to build on green-belt land, which is supposed to be protected.

The idea of 2000 homes at Wisley must be a joke! 3000 extra cars and 5000 more people.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I list below my objections to parts of the local plan and request that they are brought to the attention of the Inspector.

1. Policy P2 SEND SHOULD NOT BE REMOVED FROM THE GREEN BELT

   I object to the plans to remove land in the villages of Send, Ripley and Clandon from the Green Belt as this would allow the areas to be developed and the villages would lose their individual identity and the whole area become an urban sprawl joining Guildford and Woking. With the middle school combining with the first school this autumn, it would seem likely that the middle school site would be developed which does not appear in the Plan. This is a concern due to the extra traffic and the problem that would cause to Send Hill and Send Road.

1. EVIDENCE

   I object as data presented by GBC is suspect and estimates of required housing exaggerated and strongly object to the Green Belt being used for housing that may not be needed.

5 GBC HAVE NOT FOLLOWED CORRECT PROCESS

   I object to the significant changes in the sites suggested and including new sites at the last minute. The proposals for housing requirements have gone up and down in recent years and it is not acceptable to try and use Regulation 19 rather than the full consultation.

I object to the size of this development on Green Belt land as it would have the affect of practically joining Ripley and Send together. This seems to have replaced the Burnt Common site which together with Slyfield would have been more suitable for some industrial development. The new 4-way interchange onto the A3 at Burnt Common to serve this development would be a disaster for Send and the traffic it would generate on the A247 Send Road through the village. This would become an even busier through route to Woking on an already, at times, gridlocked road, taking many heavy lorries, with the access to two schools directly in to this traffic.

I list below my objections to parts of the local plan and request that they are brought to the attention of the Inspector.

1. Policy A44. 1.9ha LAND WEST OF WINDS RIDGE AND SEND HILL

I object to this Policy as this site has not previously been included and has not been consulted upon.

This land is part of the Green Belt and in past years has been a large land fill site and is still vented which would make it unsafe. The Travellers Pitches are inappropriate due to insufficient access due to the narrow, at times single track, country lane. Any extra traffic would make this lane unsafe and affect the peace and tranquillity of the Cemetery opposite which itself has been enlarged very recently.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

11) I OBJECT TO the lack of immediate provision for new schools

12) I OBJECT TO the lack of any immediate provision for Doctors Surgeries.

This plan effectively merges all villages along the A3 from the M25 to the Hogs Back with no provision for any improvements to either the A3 or local roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/443  Respondent: 15208353 / Janet Green  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

10) I OBJECT TO the lack of evidence for the alleged housing need numbers

2) Evidence

GBC have failed to provide sound evidence in terms of the the Employment Land Needs Assessment 2015 (ELNA) which shows an 80% reduction in employment space from the previous ELNA carried out by GBC in 2013. This means the industrial space at Burnt Common is no longer needed. Housing numbers from the Strategic Housing Market Assessment 2015 (SHMA) are highly questionable. The number of foreign students has been wrongly used to inflate the need. The required 13,860 houses in the local plan is exaggerated. If the population is to grow by some 20,000 in the plan period, we actually need 8,000 homes (based on an average of 2.5 persons per home). The Green Belt does not need to be built over. 50% of new homes needed could be built on brownfield sites. GBC’s Transport Assessment was not even available to councillors for the vote taken on 24th May, being published on 6th June. Infrastructure overload has received scant attention.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/445  Respondent: 15208353 / Janet Green  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send
3) Policy P2. Send should not be removed from the Green Belt.

Send provides a buffer between Woking and Guildford. The particularly vulnerable areas of land being taken out of the Green Belt include: the land behind the school which includes playing fields and woodland, the land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering and land to the left of Cartbridge going up to the old depot on the Wey Navigation.

Further points;

Huge development objectives like these limit ability to mitigate climate change and weather events like flooding.

Environmental health will suffer through increased air pollution, as well as increase both noise and light pollution.

Cyclists and pedestrians will be impacted by the increased traffic congestion.

Healthcare, social welfare and policing will be further stretched.

Surrey County Council is already proposing to reduce the number of bus services serving Ripley, if these plans were to go ahead how would they possibly provide essential bus services for the added population.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4) Policy A43. 30 ha Land at Garlick's Arch, Burnt Common, designated for 400 houses and 7,000 sq m of industrial and warehousing.

There is no need for any more houses on top of the 13,860 already proposed for the borough. This site is NEW and was not included in the Regulation 18 draft and has NOT been consulted upon previously. It is Green Belt permanently protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances. The site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th Century would be endangered. The proposed industrial development of 7000sq m is simply not required since the latest (ELNA) shows a reduction of 80% in required floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield. A new 4 way interchange onto the A3 at Burnt Common to serve this development would be disastrous for Send. Send Road (A247) would be gridlocked all day. Send would be the through route to Woking for traffic leaving the M25 and the A3, the proposed 2,000 houses at Wisley and the 2,000 houses at Burpham. Send cannot take it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attended documents:
4) Policy A44.1.9 ha Land west of Winds Ridge and Send Hill designated for 40 homes and 2 travellers pitches.

This site is **NEW** and was **NOT** included in the regulation 18 draft and has **NOT** been consulted upon previously. Development for housing is inappropriate due to its permanent Green Belt status and high quality Green Belt amenity within an area of beautiful countryside which would be spoilt by any development. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is inappropriate due to the narrow width single track country road providing insufficient access to the site.

Comment ID: SQLP16/292  Respondent: 15208353 / Janet Green  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 5: The examination

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Answer (if comment is on questions 1-7 of the questionnaire): ()

8) I OBJECT TO the limited consultation period
9) I OBJECT TO the last minute inclusion of new sites with less than 2 weeks notice

Furthermore
1) Guildford Borough Council (GBC) have not followed the correct process.
Since 2014 GBC has changed every major site in Send proposed for development and now just added a massive new road junction. The 2014 proposal for 430 houses went down in April 2016 to 185 and has now gone up again to 485. These significant changes require another full consultation under Regulation 18, not the short cut of Regulation 19 which GBC are trying to get away with. This invalidates the whole process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
This plan effectively merges all villages along the A3 from the M25 to the Hogs Back with no provision for any improvements to either the A3 or local roads.

Policy P2. Send should not be removed from the Green Belt.

Send provides a buffer between Woking and Guildford. The particularly vulnerable areas of land being taken out of the Green Belt include; the land behind the school which includes playing fields and woodland, the land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering and land to the left of Cartbridge going up to the old depot on the Wey Navigation.

Further points;

Huge development objectives like these limit ability to mitigate climate change and weather events like flooding.

Environmental health will suffer through increased air pollution, as well as increase both noise and light pollution.

Cyclists and pedestrians will be impacted by the increased traffic congestion.

Healthcare, social welfare and policing will be further stretched.

Surrey County Council is already proposing to reduce the number of bus services serving Ripley, if these plans were to go ahead how would they possibly provide essential bus services for the added population.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2) I OBJECT TO site A43 Garlicks Arch

4) Policy A43. 30 ha Land at Garlick's Arch, Burnt Common, designated for 400 houses and 7,000 sq m of industrial and warehousing.

There is no need for anymore houses on top of the 13,860 already proposed for the borough. This site is NEW and was not included in the Regulation 18 draft and has NOT been consulted upon previously. It is Green Belt permanently protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances. The site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th Century would be endangered. The proposed industrial development of 7000sq m is simply not required since the latest (ELNA) shows a reduction of 80% in required floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield. A new 4 way interchange onto the A3 at Burnt Common to serve this development would be disastrous for Send. Send Road (A247) would be gridlocked all day. Send would be the through route to Woking for traffic leaving the M25 and the A3, the proposed 2,000 houses at Wisley and the 2,000 houses at Burpham. Send cannot take it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4) Policy A44.1.9 ha Land west of Winds Ridge and Send Hill designated for 40 homes and 2 travellers pitches.

This site is NEW and was NOT included in the regulation 18 draft and has NOT been consulted upon previously. Development for housing is inappropriate due to its permanent Green Belt status and high quality Green Belt amenity within an area of beautiful countryside which would be spoilt by any development. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is inappropriate due to the narrow width single track country road providing insufficient access to the site.

</tbody>
</table>

GBC have failed to provide sound evidence in terms of the the Employment Land Needs Assessment 2015 (ELNA) which shows an 80% reduction in employment space from the previous ELNA carried out by GBC in 2013. This means the industrial space at Burnt Common is no longer needed. Housing numbers from the Strategic Housing Market Assessment 2015 (SHMA) are highly questionable. The number of foreign students has been wrongly used to inflate the need. The required 13,860 houses in the local plan is exaggerated. If the population is to grow by some 20,000 in the plan period, we actually need 8,000 homes (based on an average of 2.5 persons per home). The Green Belt does not need to be built over.
50% of new homes needed could be built on brownfield sites. GBC’s Transport Assessment was not even available to councillors for the vote taken on 24th May, being published on 6th June. Infrastructure overload has received scant attention.

8) I OBJECT TO the limited consultation period

9) I OBJECT TO the last minute inclusion of new sites with less than 2 weeks notice

Furthermore

1) Guildford Borough Council (GBC) have not followed the correct process.
Since 2014 GBC has changed every major site in Send proposed for development and now just added a massive new road junction. The 2014 proposal for 430 houses went down in April 2016 to 185 and has now gone up again to 485. These significant changes require another full consultation under Regulation 18, not the short cut of Regulation 19 which GBC are trying to get away with. This invalidates the whole process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council's draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:
- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt increase tail backs on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:
  - disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
  - directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPA16/3950  Respondent: 15216129 / Timothy Hewlett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)
The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

OBJECTIONS TO GUILDFORD BOROUGH PROPOSED SUBMISSION LOCAL PLAN EAST & WEST HORSLEY (JUNE 2016)

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016).

These are my main reasons are…

I object to the Local Plan as the following development proposed is not sustainable (Policy S1)

At least 148 more houses in East Horsley. At least 385 more houses in West Horsley.

I further object to both villages to be taken out of the Green Belt. The new boundary, (called the in-setting boundary) extends the old settlement boundary and includes some fields and open spaces. This means that Kingston Meadows (by East Horsley Village Hall) is included inside the insetting boundary – despite being a valuable green space. Horsley Tennis & Cricket club at the end of Pennymead Drive is also inside the insetting boundary.

This is totally unacceptable. I object to not protecting the Green Belt (Policy P2)

Answer (if comment is on questions 1-7 of the questionnaire): ()

RIPLEY, SEND AND CLANDON

Please find attached my letter objecting to the inclusion of the above locations in the revised draft Guildford Borough Council Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/638  Respondent: 15216129 / Timothy Hewlett  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
I OBJECT TO THE DRAFT LOCAL PLAN FOR THE FOLLOWING KEY REASONS:

1)  

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

1. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1)
access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

2. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:
• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7363  Respondent: 15216129 / Timothy Hewlett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16402  Respondent: 15216129 / Timothy Hewlett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3).

The Garlick’s Arch (A43) proposal would double the built area in the locality, and would irrevocably damage the character of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16404  Respondent: 15216129 / Timothy Hewlett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5).

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16399  Respondent: 15216129 / Timothy Hewlett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1).

There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.

The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous traffic.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the lack of proper infrastructure planning for sites (Policy I1)

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2).

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

I object to poor air quality concerns (Policy I3).

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object to a plan which proposes that over 70% of new housing be built within the Green Belt. Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16400  Respondent: 15216129 / Timothy Hewlett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object to development in areas which are at risk of flooding (Policy P4)

The Plan does not take adequate account of flood risk as required by National Planning Policy. The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

I object to the Borough Wide Strategy (Policy S2)

GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there’s too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11% of the existing housing.

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

To make this document legally compliant it should be scrapped and the people involved in its creation should be subject to a criminal investigation for corruption.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: SQLP16/491  Respondent: 15216129 / Timothy Hewlett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

The plan is wholly unsound, it should be scrapped and a proper national plan be created for housing needs before any proposals are made at local level for development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/492  Respondent: 15216129 / Timothy Hewlett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

Any duty to cooperate should only come into force when the public officials who have created the plan, and the greedy developers who they are hand in glove with have been properly investigated to find out the extent of corruption involved in the creation of this plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/493  Respondent: 15216129 / Timothy Hewlett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)
The Police should be investigating the public officials and the greedy, unscrupulous developers involved to ascertain the level of corruption involved in the development of this unwanted plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4240  Respondent: 15216129 / Timothy Hewlett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

RE: GUILDFORD BOROUGH COUNCIL DRAFT LOCAL PLAN

The submission plan for the above is completely unfit for purpose, containing as it does a number of fundamental errors. As well as this I find the evidence base in the plan to be almost unbelievably poor and I find it hard to believe that this is the work of professional people. The lack of clarity is worrying and reports that I have received regarding the information being difficult to access for people with poor internet connections leads me to wonder if there is an ulterior motive that has led to this difficulty being deliberately put in the way of people as these try to assess this important matter.

I continue to object in the strongest possible terms to the totally unjustified inclusion of policy A35, Three Farms Meadows in the draft Local Plan for the following reasons:

Transport

(Matters that make the site completely unsuitable for inclusion in the local plan):

Three Farms Meadows is adjacent to the most congested stretch of strategic road network in Surrey and close to one the most congested junction in the country (J10 of the M25 and the A3) and the amount of traffic using this area of road it set to increase significantly. No amount of changes to that junction in the future will change these facts. Because of this, any egress onto A3 from Three Farms Meadows at any point will be extremely dangerous and cannot be allowed.

Local roads are already at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks and so on). The roads in the immediate area around Three Farms Meadows are extremely narrow and no responsible plan should seek to increase traffic on these roads. I challenge any Guildford Borough Council employee or elected official to drive around these local roads with me to see how suitable they are.

Any existing or new public transport provision such as bus services to/from Guildford or destinations towards London has to, and will have to negotiate these over-crowded major and minor roads and will therefore be unreliable and subject to frequent delays. This has always been the case with bus services in the area around Three Farms Meadows – as anyone (myself included) who has previously had experience of Green Line / London Country 715 route bus services can testify to. Any new bus services to Horsley or anywhere else will impact the safety of the local road network and lead to road traffic accidents as the lanes are not wide enough to accommodate buses. Again, I challenge any Guildford Borough Council employee or elected official to drive around these local roads with me to see how suitable they are.

I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification whatsoever.
Finally, on transport, I would point out that Three Farms Meadows is further from railway stations than any other identified strategic site in the local plan. These railway stations are visited by trains that are already extremely overcrowded and no there is no short term, medium term of long term rail plan to overcome this overcrowding. I challenge any Guildford Borough Council employee or elected official to drive to these railway stations with me to see how realistic it is to drive to them and to see the car parking provision at these stations.

Finally, on transport, I would point out that Three Farms Meadows is further from railway stations than any other identified strategic site in the local plan. In any case, these stations are visited by trains that are already extremely overcrowded and no there is no short term, medium term of long term rail plan to overcome this overcrowding. Car parks at all of these railway stations are already full. How can anyone possibly think that the flood of additional vehicle from Three Farms Meadows would do anything but add to this parking problem.

**Environment**

(Matters that make the site completely unsuitable for inclusion in the local plan):

I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area, all of which together make a unique and environment – so close to Greater London. These changes to the site boundaries are not identified correctly on the plan (Appendix H p16). As well as this I object to the fact that the increased area, being on the south of the site facing the Surrey Hills Area of Outstanding Natural Beauty will increase the negative impact of the views from the Area of Outstanding Natural Beauty. Unless this monstrous idea is withdrawn Guildford Borough Council will be responsible for an irredeemable act of environmental vandalism.

I object to paragraph 21 which “limits” (notice the use of double quotes) development in flood zone 2 and 3 as development should be excluded in flood zone 2 and 3 and I object to paragraph 22 as this does not reflect the impact of the buildings on the surrounding area.

I object to the disregard for the impact of in-combination development on the Thames Basin Heaths Special Protection Area, particularly the damage caused by nitrogen deposition and high pollution levels.

I object to the total lack of proper sewerage capacity for Three Farms Meadows in the local plan. How can supposedly professional people not make proper provision for this?

**Green Belt**

I object to the sinister removal of additional 3.1 ha from the green belt without any justification and I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact. This inclusion change can only be interpreted as a being undertaken in order to suit the needs of property developers and their aspirations to make money from this site regardless of the wishes of ordinary people. The inevitable and irreversible damage to the local environment that removal from Green Belt would entail would first and foremost the fault of Guildford Borough Council.

**The wishes of the local population, the lack of proper consultation and lack of due process**

(Matters that make the site completely unsuitable for inclusion in the local plan):

I object to the fact that the council has failed to remove this site from the local plan despite receiving thousands of objection from local residents and statutory consultees. I am appalled and puzzled that the Council continues to fly in face of the wishes of the local population in this matter and I can only assume that those persons who responsible for this plan have ulterior motives for including Three Farms Meadows in the plan.

I object to the significant modifications that have made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major. I object to the disturbing fact that there is no clear justification for the removal of one strategic site over site A35.
There are many other totally justified objections in addition to the above that I could make to this appalling plan and I have no doubt that many thousands of other people will make those points in their objections.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Institute of Directors has supported the development of Borough’s Local Plan from when the process started in for the original plan period from 2011 to 2030 and now for the period 2013 to 2033.

I understand that after a great deal of hard work and significant consultation by officers and Member, the Council has now published its pre submission draft version of the plan.

Guildford is an important town in Surrey in which the Institute has a significant number of Members

Particular features of the Plan which the Institute supports include:

• Improvement to the transport infrastructure in the town and in particular to the west of Guildford access from our County Hospital and the Surrey Research Park.
• Planning the provision of 13,680 houses across a range of tariffs and tenures in a number of strategic sites.
• The need to alter the green belt boundary to enable the provision of additional housing and choices of housing.
• It will help to support the educational base in the town
• It will provide additional land for the growth of employment
• There is a recognition in the plan of the importance of the employment base in the Borough and that this needs support if its strategic role is to be met fully
• It meets national planning policy
• It has been subject to intense scrutiny
• It has the support of the elected members of the council
• It is important in terms of putting in place a sound plan that can be used by the community at large, organisations such as the LEP and by business to support further investment in the town.

1. I object to the lack of any evidence for the alleged housing need numbers

Nowhere in the Plan document can I find an explanation for why new houses need to be built other than the obvious that there are too many people. GBC should not punish local residents for the errors of central government in controlling population growth. Its residents will applaud GBC for standing up to central government.

1. I Object to the site A43 Garlick’s Arch

Garlick’s Arch is a 100 acre site of Green Belt and ancient woodland which should be protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I Object to the site A45 The Talbot

This is an unreasonable overdevelopment in a conservation area. Ripley has already been impacted by at least 7 new housing developments in the past 3 years, without any improvements in roads, bus services, schools or medical centres.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/640  Respondent: 15216321 / Douglas Ollington  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A57

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I Object to the site A57 The Paddocks

Planning application 09/P/01554 for site A57 was refused permission by GBC, and the appeal was rejected by the High Court in April 2013. Although the site’s continued occupation has been judged completely illegal, no enforcement action has yet been taken by GBC. GBC should take immediate action on the enforcement notices against illegal occupation. The Council should attach high priority to its planning enforcement role and should not stand idly by where there are flagrant breaches of planning rules, particularly on a prominent site like this in a Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Disproportionate size of sites in relation to rural locations

I object to the allocation of land to the strategic sites of Garlicks Arch (Ripley/Send border), Gosden Hill (Clandon) and Wisley Airfield. The proposed development of these sites will have a disproportionate impact on the surrounding local villages. They will have a permanent and negative impact on each of these communities.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1299  Respondent: 15216321 / Douglas Ollington  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Congestion on the local village roads and lanes

Our villages are already suffering from severe congestion for much of the day. For example the Newark Lane and Rose Lane junction in the center of Ripley, which at peak hours, is regularly gridlocked due to the volume of traffic, made worse when Ripley High Street (B2215) is used as a detour/slip road when the A3 is jammed. I object to further development which will cause even greater congestion in and around our villages.

1. Unsuitability of our local roads for heavy vehicles and more traffic

Many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. Furthermore, the road surfaces are in a poor condition.

1. Poor air quality concerns

Further congestion, particularly in built up residential areas will only lead to greater levels of air pollution. I object to further development, which will result a fall in the air quality.

1. Sites being planned in unsustainable locations

Many of the strategic sites e.g. Wisley Airfield and Garlick’s Arch, are in unsustainable locations. They do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on cars. I object on the grounds that these sites are not sustainable.

1. Parking issues in local villages caused by larger population

Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems, to which I object.
1. Local healthcare facilities will be overwhelmed

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. I object to the further stress it will put upon existing overstretched health services.

1. Local schooling facilities will be overwhelmed

Without proper planning and a commitment to fund new schooling, existing schools will have their services stretched and overwhelmed. Many of these services are already at capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Congestion on the A3 and M25 trunk roads

I object to the development of the strategic sites due to the A3 and M25 already being at capacity during peak hours. Highways England has no plans to look at improving the A3 before 2020. It is therefore not sustainable to identify sites for further development which will worsen the congestion on these motorways and trunk roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the 2016 Draft Local Plan by Guildford Borough Council (GBC) for the following reasons:

1. Destroying the Green Belt

I object to the proposal to remove (“in-set”) Ripley, Send and Clandon from the Green Belt.

No one in this country voted for destroying the Green Belt. We already live in one of the most overcrowded parts of the country. Roads are congested, schools and hospitals are full to capacity. Just to drive out of our village in the morning can take up to 15 minutes to cover a few hundred meters. This is stressful and will only get far worse with more houses.

We are filled with despair at losing what our families have worked all our life so hard for. They have worked hard to ensure their family live in “England’s green and pleasant land”, away from the suburban sprawl. All this is in jeopardy with this plan.

By building more and more houses, this will not only further congest an already congested road network, but the overcrowding will create further pressure on schools, hospitals, and other services, all of which will require more people to be employed, which will probably result in a further round of house building and so on. What is GBC doing to consider the wellbeing of their constituents? Was not happiness and wellbeing also on our Prime Minister’s agenda?

High volumes of traffic and congestion have negative effects. These include road collisions, the severance of communities, the costs of delays and the unreliability of journey times to people and businesses. Environmental impacts include traffic noise, air pollution and amenity issues. At a global scale, vehicle emissions contribute to climate change. Some parts of the major roads in Surrey operate significantly beyond their capacity, resulting in traffic congestion, and forcing drivers down rural / country lanes to avoid main roads, leading to further congestion and road accidents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. Unbalanced allocation of development in one area of the Borough

Between the M25 and Burpham, a distance of only about 5 miles it is proposed that over 6,500 houses are built. This represents over 40% of the housing proposed in the Local Plan. I object to this area being hit so hard by the allocation of development, which is disproportionate to the rest of the Borough.

1. I object to the very high numbers of new houses to be built in the Horsleys and nearby areas. Such numbers will damage the character of the area and will place burdens on the local infrastructure that cannot cope. The roads are not wide enough to tolerate substantial increases in resident numbers and the rail system is almost at capacity now during peak hours and so cannot accommodate any major increases in demand.

1. I object very strongly to the inclusion of the Former Wisley Airfield (FWA/TFM) in the local plan. Extensive public consultation has shown the madness of the idea to build over 2000 houses on the FWA. It is absolutely shocking that GBC is still including the Former Wisley Airfield in the local plan. GBC has no concern for democracy.

Page 95 of 2804
I object to the Guildford Borough Council proposed Local Plan June 2016 for the following reasons.

1. I object to the plan because it proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas for housing increases.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Ripley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to express my objection to the development plans laid out in the Guildford Local Plan 2016.

Ripley

My son is at school in Ripley village, I attend and volunteer at the playgroup there and have a lot of friends in the village. It is a special village with a distinctive historical character. The suggestion to remove land on Rose Lane from the greenbelt is so extraordinary that I didn't believe this could be true at first.

This is greenbelt at its finest. The villages of West Horsley and Ripley are separated by this land and the unique, semi-rural character of each community is wholly dependent on it. Pretty much every morning I see at least one species of bird of prey over Rose Lane, very frequently three different species in one day. Red kites nest in this specific greenbelt land, buzzards and kestrels (less and less common across the UK now) can be seen most days as I drive down Rose Lane.

I have also recently spent a glorious evening in a residential garden in Ripley observing a family of Little Owls. There are also tawny, barn and short eared owls on the Papercourt Meadows along Newark Lane. Be assured that these species cannot survive in isolated pockets of green space. Every bite you take out of the green belt has a direct impact on the whole surrounding area.

It is also worth pointing out the hideous traffic congestion in Ripley village at rush hour. I contend with this on a daily basis and it is both dangerous and stressful for everyone involved and must make the lives of Newark Lane residents a misery at times.

It is astonishing to me that the council sees no duty of care for such a historically significant, thriving village. Instead of supporting the village and it's wonderful wildlife by working to remedy the dreadful traffic congestion you are instead working to worsen this problem and to destroy the very things that make the village special.

Please, leave the greenbelt alone. These developments will cause untold damage to the whole area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
15. We object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

16. We object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is we believe inaccurate; it inflates the needs of the borough by distorted student numbers.

This figure is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

We both trust that the objections made above are fully taken into consideration and that the Plan shall be amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
13. We object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. **Why was a brownfield site removed and replaced by a Greenfield site?**

**There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site.** This only came to light for local residents following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. **Development on this site is wholly inappropriate** (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. **The development of the site will result in the loss of habitat.** No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. **How will the local services such as schools and doctors cope, many of which are already at capacity?** (Policy I1)

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

14. We object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

8. We object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I object to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. We object to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

</table>

2. We object to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7. We object to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1313  Respondent: 15220097 / Douglas Barr Trudy Amos  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

9. We object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

10. We object to the lack of proper infrastructure planning for sites (Policy I1)
Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. We have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1314  Respondent: 15220097 / Douglas Barr Trudy Amos  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

11. We object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. We have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1315  Respondent: 15220097 / Douglas Barr Trudy Amos  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

12. We object to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1307  Respondent: 15220097 / Douglas Barr Trudy Amos  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. We object to not protecting the Green Belt (Policy P2)

We object to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. Once taken the green belt is lost forever.

There are no exceptional circumstances for these villages and the land to be taken from the Green Belt.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1308  Respondent: 15220097 / Douglas Barr Trudy Amos  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **We object to development in areas which are at risk of flooding (Policy P4)**

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well, we are aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1305  Respondent: 15220097 / Douglas Barr Trudy Amos  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object wholeheartedly to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

We set out below our objections to specific policies and matters within the Plan.

1. **We object to the Local Plan as the development proposed will not be sustainable (Policy S1)**

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over development, particularly for the villages between Guildford and the M25, including
Ripley, Send and Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35) and Garlick’s Arch (A43) are in unsustainable locations. They do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. We object to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing units being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages.

The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Land at Burnt Common, London Road, Policy A58.

Now a new allocation for a minimum of 7,000 sq m of industrial or warehousing

We object to Policy A 58 at Burnt Common because:

- It was deleted from the 2014 draft because of all the objections made previously
- The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land
- There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt
- The impact on small surrounding roads will create traffic gridlock
- It will join up existing villages and defeat the purpose of the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
My wife and I have lived in Ockham for over 40 years and find that the plan for Wisley Airfield completely out of order. The traffic congestion at the moment is at a ridiculous high level and the roads in the Ockham are at gridlock several times each day. The fact that the roads are not maintained properly and the sides of the roads are full of potholes and there are potholes even in the middle of the roads are not uncommon. Furthermore this would lead to a big intrusion into the green belt and the pollution would be beyond belief.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

GBC Draft Borough Plan re Normandy - Site Allocation 46 and Site 47

We are writing to object to the proposals to develop Normandy and Flexford as a strategic site, under the draft local plan. We object to this large scale proposal as long term residents of the area, for the following reasons:

The scale of the development is out of keeping with the character of the village and destroying greenbelt land

Normandy is a semi rural village, open with a linear arrangement along the A323, and along Glaziers Lane and Westward Lane, Flexford is an adjoined small residential area. The proposed development with the large number of houses and secondary school is totally out of keeping with the current size of the village, and will infill an open field, on greenbelt land, giving the village the feel of a large estate, dramatically changing the character and openness of the area.

Infrastructure and services

As a resident of Guildford Road we already witness the effect of traffic on the area, particularly during rush hour when the road is busy and already at capacity. Road works and traffic accidents on main routes mean that cars from the A31 and A3 use village roads, including Glaziers Lane and Westward Lane as a cut through. Adding over a thousand houses and a secondary school to the area, with already congested slow, narrow local roads and difficult junctions to the main roads, would result in traffic chaos. The proposals are unrealistic and unsustainable and will lead to gridlocked roads, road safety issues and the potential for a detrimental effect on the well being of residents due to increase in pollution. Traffic simulations have demonstrated that the roads are already operating above the designed capacity, with no viable solutions proposed to mitigate or address this issue.
The doctor’s surgery in Glaziers Lane is already struggling to cope with the needs of current patients, and influx of over 2000 people from the new development would put the service under unacceptable strain leading to even longer waiting times. This issue needs to be addressed not ignored in the planning process.

Drainage in the area is poor and has led to flooding issues in the past. The high water table exacerbates the problem, as will adding a large area of developed land in the middle of the village. Whilst some work has been done in the area to address flooding issues this would need to be considered in the context of the proposed development.

**The Proposed secondary school.**

The data for building a large secondary school in the area must be questioned, particularly as there are two secondary schools Ash Manor and Kings College which are both currently undersubscribed. Funding should be used to develop and support these two schools, both of which have struggled over the years to attract pupils. Surely the council should be working with these schools as a matter of priority to improve their facilities, capacity and results before moving onto building another school. I understand that other schools are increasing their capacity to take more pupils, so I would again question the need for another large secondary school.

The station in Wanborough has been put forward as a means of getting students to and from the proposed new secondary school for students living on the Blackwell Farm development. Whilst on paper this would seem a viable option, I consider that the cost of fares would prove prohibitive for many parents to use this method as would other forms of public transport, and should be examined further. Also should we be creating the need for pupils to commute to school rather than consider more local options?

**Detrimental effect on wildlife**

As a member of Surrey Wildlife Trust I am extremely concerned regarding the irreversible loss of greenbelt land and valuable habitat such as ancient woodland, hedgerows and Grassland for indigenous species. The continued fragmentation of natural habitats has already caused a dramatic decline in bird and wildlife populations and we should be looking to preserve not destroy these areas maintaining Normandy’s unique rural character.

We close by reiterating our objection to the density and scale of the development, doubling the size of the village, destroying the openness and character of the area, and above all building on greenbelt land that should be protected for future generations.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
1) I object to the proposal to build a link road on Clay Lane - particularly phase 2 with the massive roundabout designed for Jacobs Well which is totally out of keeping in the village and moreover it is sited on a very dangerous corner.

2) I object to the burial ground north of Salt Box Lane in Jacobs Well (policy no A23) being removed from the green belt which will no doubt lead to in-filling in the village with more housing being built.

3) I object to the number of houses being built being 693 houses per annum. How will our infrastructure cope with this? Also many of these sites are planned on the green belt.

I do hope local councillors will take some notice of the concerns of local people who will live with the implications of these decisions.

I object to the way new sites have been included with virtually no notice, consultation or consideration for the residents of Send, Ripley and Burnt Common. No sound evidence for the housing numbers stated in the Plan has been presented and there are more appropriate areas for industrial development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

I object, Greenbelt is a precious resource and once destroyed can never be recovered.

In particular I object to Land at Garlick's Arch being developed. 400 houses are far too many, the area of Ripley and Send can not sustain such urbanisation. The roads are already too busy, this will totally destroy it. The junction at A3 is not needed.
Send should not be removed from Greenbelt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the large proposed development 1,850 houses at Blackwell Farm (A26)

It will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Ripley & Send.

Blackwell Farm is located entirely within the green belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet the requirement of the NPPF. Furthermore, Blackwell Farm performs all five functions of green belt.

The Blackwell Farm development would result in harm to the Surrey Hills Area of Outstanding Natural Beauty (AONB), harm to an Area of Great Landscape Value (AGLV), and harm to the setting to the AONB. (Blackwell Farm forms the
views into and out of the Hogs Back ridge). The NPPF is clear that AONBs should be afforded the highest level of protection in relation to landscape and scenic beauty. All development proposals within and adjacent to the AONB must conserve or enhance its special qualities.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the large proposed development of 2,000 houses at Wisley Airfield (A35)

It will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Ripley & Send.

The re-inclusion in the Plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham) is fundamentally wrong. Following a huge public outcry, Guildford Planning Committee has unanimously rejected a recent planning application for precisely this development on 14 separate grounds.
Policy A35 should be removed from the plan for all the reasons the development was rejected by the Planning Committee, including:

- Green Belt location and absence of “exceptional circumstances”.
- Misrepresentation of the site as brownfield land less than 15%.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village.
- Loss of high-quality agricultural land (55% of the site), in breach of national.
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking.
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley.
- Failure to evaluate the cumulative impact of this and nearby development sites on the

Answer (if comment is on questions 1-7 of the questionnaire): ()

I Object

This is Greenbelt land, the area can not be destroyed by development.

There is not sufficient infrastructure in place to support such a development. The roads will be snarled up with traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I also object to 400 houses and 7000Metres of Industrial space at Garlick's arch, there is plenty of Industrial space at Slyfield. It is totally inappropriate at Garlick's Arch because apart from flooding, it is ancient woodland.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no special circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement has been complied with for this site. It only come to light for local residents following a Council meeting on 11th May 2016.

National planning policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. The site is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. The development of the site will increase the risk of flooding. There are other sites that do not flood that can be developed and therefore this site should not be removed from the Plan (Policy P4).
This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and wood peckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

Given the site’s proximity to the A3 it will suffer from considerable noise pollution, which would be detrimental to all residents. The level of traffic along the A3 and with the road often being congested will result in a poor air quality for the site.

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the inclusion of Land for new north facing slip roads to/from A3 at Send Marsh/Burnt Common (A43a)

This is only being included in the Plan as a result of the inclusion of the Garlick’s Arch site (A43). The creation of this junction will create more traffic through Ripley, Clandon and Send.

Should the junction be deemed necessary I am concerned that the land being allocated for the junction will result in a sub-standard junction being created using the existing slip road accesses, rather than investing in a full upgrade to the junction, which may require the compulsory purchase of surrounding land.

The Plan anticipates the delivery of these new slip roads between 2021 and 2027, way after the anticipated delivery of the Site 43. These improvements to the A3 are controlled by Highways England and not Guildford Borough Council. Highways England has indicated that they do not have plans to consider improvements to the A3 before 2020. In reality the new slip roads will not happen at best until the back end of the proposed time frame.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

**PROPOSED SUBMISSION LOCAL PLAN (REGULATION 19) – JUNE 2016**

WEST HORSLEY (SOUTH): PROPOSED INSETTING FROM GREEN BELT AND PROPOSED SUBMISSION HOUSING ALLOCATION SITE A37 - LAND ADJACENT TO AND REAR OF BELL AND COLVILL, EPSOM ROAD, WEST HORSLEY
On behalf of our client, BlackOnyx Developments Limited, please accept and register these formal representations to the Borough Council’s Proposed Submission Local Plan (Regulation 19) in relation to the Proposed Submission insetting of West Horsley (South) from the Green Belt and Proposed Submission Policy A37 Land at and to the rear of Bell and Colvill, Epsom Road, West Horsley.

These representations confirm our support for the following Proposed Submission policies:

- Proposed Submission Policy S2: Borough Wide Strategy
- Proposed Submission Policy P2: Green Belt
- Proposed Insetting of West Horsley (South)
- Proposed Submission Site A37: Housing allocation: Land at and to the rear of Bell and Colvill, Epsom Road, West Horsley

Background

BlackOnyx Developments Limited fully supports the Borough Council’s Submission Local Plan in relation to the proposed insetting of West Horsley (South) from the Green Belt and the proposed allocation of 1.4 hectares of land at and to the rear of the Bell and Colvill, West Horsley as set out in Proposed Submission Policy P2 and Proposed Submission Site Allocation A37.

BlackOnyx Developments Limited has entered into an agreement with the freehold owner of No. 28 The Street, West Horsley to acquire the land in relation to the northern part of Proposed Submission Site A37, we are able to confirm that the northern part of site A37 is available and deliverable during the early part of the Plan period for housing development.

Proposed insetting of West Horsley (South)

West Horsley is a sustainable settlement which has grown significantly to the north of the A246 (Epsom Road) and includes a wide array of housing types together with a mix of local services and amenities including a car sales garage and service repair workshop, a shop, church, two pubs, Cranmore School, a village hall, and a community hall. Despite this, the entirety of the village is currently washed over by the Green Belt in the adopted Local Plan 2003. This approach is inconsistent with the Government’s latest advice contained in the National Planning Policy Framework (‘NPPF’).

In this important regard, the Government makes it clear that Green Belt villages should not to be seen as areas where no development should come forward, but rather where development opportunities, which do not intrude into the purposes underlyng the Green Belt designation, can be provided, they should be grasped. This is clear from NPPF paragraph 79 where the importance of the Green Belt is recognised, through the reiteration of the purposes of Green Belt in paragraph 80 and the approach to boundaries in paragraph 85. Paragraph 86 deals with washed over villages directly and the policy advises that washing over is not the proper approach for those areas where the settlements do not make a Green Belt contribution.

Throughout the preparation of the new Local Plan, the Borough Council has consistently (and publicly) acknowledged that the current policy approach to Green Belt and villages does not accord with the NPPF. For example, paragraph 4.111 in the Draft Local Plan (2014) states:

“All our villages, except Ash Green, and our major previously developed sites are currently washed over by the Green Belt designation. National planning policy states that only those villages whose open character make an important contribution to the openness of the Green Belt should be included in the Green Belt. Those that do not should instead be inset from the Green Belt, removing their Green Belt status. It also states that we should not include land in the Green Belt which is unnecessary to keep permanently open. It is important to stress that whilst the Green Belt policy would no longer apply, other development control policies will still serve to restrict any inappropriate development in these places, including for instance Conservation Area status.” (Paragraph 4.111 Draft Guildford Borough Local Plan: Strategy and Sites - July 2014).
Promoting Sustainable Patterns of Development

The adopted 2003 policy approach to washing over villages with Green Belt has had a significant restrictive impact on the ability to deliver new homes and jobs across the borough. It has clearly played its part in the failure of the borough to meet housing need which has resulted in a step change increase in recent years as evidence by the Objectively Assessed Need (OAN).

In that respect, we note from the Proposed Submission Local Plan the Borough Council’s proposed spatial development strategy and the commitment to delivering up to 13,860 new homes during the new Plan period as part of promoting sustainable patterns of development (to meet acute housing need in the borough). This new approach is set out in Proposed Submission Policy S2: Borough Wide Strategy. We strongly support the aims and objective of Policy S2.

In particular, we note that Proposed Submission Policy S2 has been informed and developed through a series of evidence based assessments including five volumes of the Green Belt and Countryside Study (‘GBCS’) and various iterations of borough-wide housing need assessment. We note that the Council’s Proposed Submission Policy S2 seeks to distribute housing growth fairly across the borough with a focus towards supporting and creating sustainable settlements. We consider that the Borough Wide Strategy is credible and robust and is in accordance with the aims and objectives of the NPPF.

Additionally, we also note the depth of information and evidence contained in the Borough Council’s GBCS (2014) which provides an objective independent assessment of the characteristics of settlements and villages including West Horsley (South). The GBCS confirms that areas of West Horsley (South) to the north of the Epsom Road including the Proposed Submission Site A37 are part of the village and as such lend themselves to inclusion within the inset settlement boundary rather than the open countryside. In accordance with the policy principles of the NPPF we agree that West Horsley (South) does not contribute to the open characteristics of the Green Belt and should therefore be inset from the Green Belt.

Green Belt and Countryside Study Volume IV Stage 3: West Horsley (South) – Proposed insetting from Green Belt

Proposed Submission Housing Site A37

Proposed Submission Housing Site A37 comprises either previously developed (brownfield) land, or comprises land located within the heart of the village and largely surrounded by ‘medium density development’ as confirmed in the Borough Council’s GBCS (2014). The GBCS also concludes that proposed Submission Housing Site A37 has defensible boundaries, and land to the rear of Bell and Colvill has no visual connection to the open countryside. Furthermore, the entirety of the proposed Submission Housing Site A37 has no particular landscape, ecological, or heritage value.

The Proposed Submission housing site benefits from access to a local bus route and the nearest train station (East Horsley) is only 1.9 miles away and can easily be reached by cycle or car. We note that the LAA and GBCS both conclude that the proposed submission site is sustainable and accessible and its development would not be detrimental to sustainability objectives.

Extent of Proposed Submission Policy A37: Land at and to the rear of Bell & Colvill, Epsom Road, West Horsley as illustrated in the LAA and Proposed Submission Local Plan

A range of baseline studies have been undertaken to assess the likely impacts of delivering housing development in this location. The studies include; a transport assessment, planning assessment, flood risk assessment, ecological (stage 1) assessment, acoustic report, and landscape and visual impact assessment. All the studies carried out demonstrate that housing development can be delivered on the proposed submission site without causing any harm to amenities or the local environment.
Indeed the provision of new housing on Proposed Submission Site A37 will benefit local services and amenities by ensuring that the village caters for housing needs, retains a mix of people (including young people), and helps to ensure the continued health of services and facilities in West Horsley.

[IMAGE 3]
West Horsley (South) – Proposed Submission Local Plan - Inset Plan showing extent of village that should be inset from the Green Belt

**Housing Need**

The need to ensure that development opportunities are seized in Guildford borough is particularly important given that past housing delivery has not met identified housing needs and consequently the Council cannot currently demonstrate a 5 year supply of deliverable housing land.

In this respect, it is highly notable that the annual housing Monitoring Report 2014/2015 published in October 2015 acknowledges that the Council has only 2.4 years of housing land supply against a requirement to identify 5 years housing land supply. Furthermore, housing need in the borough has risen from 322 dwellings per year to an Objectively Assessed Need (OAN) of 693 homes per year as identified in the West Surrey SHMA (2015) because housing land. The OAN includes a significant uplift for affordability, economic factors and student growth. The Council needs to facilitate a step change in housing land supply and delivery to meet local need.

The Council’s sustainable development strategy (Proposed Submission Policy S2: Borough Wide Strategy) identifies that the Council’s preferred approach is to focus future housing growth in the most sustainable locations which the Council identify as:

- Guildford town centre
- Urban areas
- Inset villages
- Identified Green Belt villages

This strategy is clearly in conformity with the aims and objectives contained in the NPPF. In that respect, sustainable, accessible settlements such as West Horsley (South) can play an important role in the borough’s development strategy and make a meaningful contribution towards accommodating new housing development to meet acute housing need. The Council’s recognition of this in the Proposed Submission Local Plan is therefore supported.

**Conclusion**

Proposed Submission Policy P2 Green Belt acknowledges that the current adopted 2003 Local Plan policy approach of washing over villages and settlements with Green Belt is not in accordance with the Government’s advice contained in the NPPF (2012). The NPPF is abundantly clear that only villages and settlements whose open characteristics contribute to the purposes of the Green Belt should to be subject to Green Belt designation.

The NPPF also advises that villages have an important contribution to make in terms of accommodating new housing development to help meet housing need as part of sustainable spatial patterns of development. It is completely appropriate that West Horsley (South) takes its fair share of housing growth during the new Plan period. In this regard, the provision of housing on Proposed Submission Site A37 will benefit local services and amenities by ensuring that the village caters for local housing need, retains a healthy mix of people (including young people), and will help to ensure the continued health of village services and facilities.
The current planning policy approach and the washing over of settlements within Green Belt has contributed to a lack of available housing land within Guildford borough. The borough can only currently demonstrate a 2.4 year supply of housing land against a requirement to identify 5 years of deliverable housing land supply.

We note that the GBCS 2014 has objectively assessed the characteristics of West Horsley (South) and its boundaries in relation to the Green Belt. The GBCS has concluded that West Horsley (South) should be inset along new defensible boundaries to incorporate Proposed Submission Site A37.

Furthermore, Proposed Submission Site A37 has already been subject to a range of baseline technical assessments which demonstrate that the proposed submission housing site is of no particular landscape, ecological, or heritage importance. In addition, safe vehicular access to the Proposed Submission Site can be delivered and the land ownership is not a constraint to development.

In light of all of the above, it is clear the case that the proposed insetting of West Horsley (South) within the Green Belt, together with the allocation of Site A37, are appropriate policy objectives and are fully in conformity with the Government’s advice contained in the NPPF. The Proposed Submission Local Plan should be supported accordingly.

I would be very grateful if you would confirm that these representations in support of Proposed Submission Policies; S2: Borough Wide Strategy, P2: Green Belt, the insetting of West Horsley (South), and the Proposed Submission Housing Site A37: Land at and to the rear of Bell and Colvill, Epsom Road, West Horsley have been registered and are ‘duly made’.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

LAND SOUTH OF NEW POND ROAD, FURZE HILL LANE, FARNCOMBE, GODALMING GU7 3NP

On behalf of my client Blackonyx Developments Ltd please accept and register formal representations to the Borough Council’s Proposed Submission Local Plan (Regulation 19) in relation to the Proposed Submission Borough wide Strategy and additionally the omission of land south of New Pond Road, Furze Hill Land, Farncombe from the list of sites proposed for future housing development.

These representations confirm our objection to the following Proposed Submission policies:

- Omission site: Land south of New Pond Road, Furze Hill Lane, Farncombe

Background

The omission site forms the eastern part of a larger 16 hectare linear area of land which is dissected by Furze Hill Lane immediately abutting the north-eastern edge of Farncombe. Farncombe itself is a sustainable, accessible settlement which
flows seamlessly into Godalming town, both settlements lie in the borough of Waverley. Farncombe and Godalming incorporate a wide range of services, amenities, schools, employment opportunities, local retail stores, and a mainline railway station (serving London). The railway station is just 0.7 mile from the omission site.

[IMAGE 1]

The Omission site (highlighted in red) which is contiguous to permitted residential development at Farncombe

The omission site comprises undeveloped fields with a scattering of individual mature trees. The whole site lies within the existing extent of the designated Green Belt. Two established vehicular access points serve the omission site together with laid tracks, one access point is formed via the eastern side of Furze Hill Lane which runs along the entirety of the western boundary of the omission site whilst a further access point exists directly via New Pond Road (B3000) which runs along, and defines, the northern boundary of the omission site. The eastern site boundary is formed by vegetation running alongside the mainline railway line. Contiguous with the southern boundary of the omission site is land which lies within the administrative area of Waverley Borough Council and which now benefits from planning permission for residential development (50 dwellings).

In short therefore, the omission site lies entirely within (bounded by) defined man-made physical features along all boundaries, and is contiguous with a substantial committed residential development.

Additionally, the visual appearance of the omission site is significantly impacted due to the nature of a variety of structures including caravans, motor homes and vehicles which have been in-situ on the site for a number of years.

[IMAGE 2]

Existing access track and established residential community residing on the omission site

The omission site has, until now, been promoted for housing development. The housing potential of the omission site was identified in the Borough Council’s Strategic Housing Land Availability Assessment (June 2014) and was assessed as part of the Green Belt and Countryside Study (2014), these evidence base studies led to the site subsequently being included as a draft housing allocation in the Borough Council’s draft new Local Plan: Strategy and Sites (July 2014) as site No 80. However, the omission site does not appear in the Proposed Submission Local Plan (June 2016).

Green Belt

The majority of the borough is washed over by the Green Belt. Paragraph 79 of the Government’s National Planning Policy Framework (NPPF) recognises the importance of Green Belt in preventing urban sprawl and keeping land open. The policy emphasises that an essential characteristic of Green Belts are their openness. Paragraph 80 of the NPPF sets out the five core purposes served by Green Belt:

- to check the unrestricted sprawl of large built-up areas;
- to prevent neighbouring towns merging into one another;
- to assist in safeguarding the countryside from encroachment;
- to preserve the setting and special character of historic towns; and
- to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

However, notably, in paragraph 84 of the Green Belt policy section, whilst acknowledging the importance of Green Belt the Government also directs local planning authorities to promote sustainable patterns of development by channelling new development towards towns and villages, and in paragraph 85 of the NPPF the Government makes it abundantly clear that when defining Green Belt boundaries, LPAs should:

- not include land which it is unnecessary to keep permanently open.
The Borough Council has publicly recognised that the extent of the Green Belt is seriously impeding its ability to deliver housing and meet its housing land supply requirement. In that regard, the Borough Council commissioned an independent and objective assessment of the Green Belt and Countryside as part of the emerging new Local Plan Evidence Base. The five volumes of technical evidence forming the ‘Green Belt and Countryside Study (2014)’ assessed the quality and contribution that the omission site makes to the openness of the Green Belt and to the characteristics of the AONB and the Study concludes that the site (identified in the Study as area ‘F6-B’) “provides opportunities to accommodate development without significantly compromising the purposes and openness of the Green Belt”.

Housing Land Supply Position

The introduction of the Government’s National Planning Policy Framework (NPPF) directs local planning authorities to deliver a step change in the supply of housing by meeting ‘objectively assessed’ housing needs (NPPF, paragraph 47).

Given that Borough Council’s adopted Local Plan housing provision policy is out of date and there are no ‘saved’ policies in place that address development needs beyond 2006, GBC is out of step with the NPPF in relation to housing delivery. Additionally, the borough has a significant housing land supply shortfall when measured against a five year housing land supply.

We are aware that the West Surrey Strategic Housing Market Assessment (‘SHMA’) suggests the borough’s population is expected to grow by 15% (21,179) over the Plan period. Taking into account these figures together with the adjusted household formation rates, the SHMA (2015) concludes that the objectively assessed overall housing need (OAN) for Guildford borough is 693 dwellings per annum (dpa) over the Plan period.

Additionally, we note that the Borough Council openly acknowledges the acute housing shortfall within the Annual Monitoring Review (‘AMR’) 2013/14 (page 8). Notably, the AMR states that, “we are not currently able to demonstrate a five year supply of deliverable housing land without amendments to the Green Belt boundaries and use of countryside land”. Whilst the number of new homes constructed across the borough has increased, the number of deliverable houses completed last year was 242 dwellings. However, this is still substantially below the identified target need per annum (as set out in the SHMA 2015) and there continues to be a growing housing deficit in the borough.

As at June 2015 the Borough Council’s annual Monitoring Report confirms that Guildford’s total five-year requirement is 5,165 homes. To date, the Borough Council can demonstrate 2.4 years supply (2.5 years supply if pending applications in Ash and Tongham are included) against the identified need of 693 dwellings per annum. In this context, more housing land is required during the Plan period to meet acute need in the borough. The omission site can play an important part in helping to meet the acute shortfall of housing in the borough.

Land Availability Assessment (LAA) January 2015

The omission site is identified in the LAA (January 2015) as site No. 2241 Land at New Pond Road, Shalford. The LAA has discounted the omission site from the range of housing sites that were draft allocated in the July 2014 Local Plan. In this respect the LAA states that the omission site is not in accordance with the Sustainability Appraisal (June 2016) because the omission site is in medium sensitive Green Belt in the AONB. However, it is highly notable that there has been no site-specific assessment of the omission site’s credentials and the Sustainability Assessment only provides generalised performance criteria. In this respect:

- The omission site is now contiguous to a sustainable settlement (given the recent planning permission for 50 dwellings directly adjacent to the omission site),
- Comments received to application PA Ref. WA/2014/1330 adjacent the omission site from the Surrey Hills AONB representative state that this area does not significantly contribute to the AONB,
- The Council is promoting major greenfield land in the Green Belt for housing which score twice as many red sustainability performance markers as the omission site.

We consider that the Council’s decision to discount the omission site lacks credibility.

Related Matters

In addition to the Local Plan Evidence Base reports, the Borough Council will be mindful that since the publication of the draft Local Plan (July 2014), Waverley Borough Council has granted planning permission for 50 dwellings (PA Ref WA/
2014/1330) on land immediately south of the omission site. The decision of Waverley Borough Council effectively means that the omission site lies contiguous with land which will form part of the built-up part of Farncombe and within a clearly identifiable (and defensible) boundary of New Pond Road (B3000).

Under these circumstances, and in light of the established uses on the omission site, it is clearly not appropriate to draw the Green Belt boundary along the southern boundary of the omission site and it is unnecessary to keep it permanently open given there is a very significant defensible boundaries created by New Pond Road (B3000) and the railway line.

I trust that in advancing the new Local Plan the Borough Council will reconsider its decision to discount the omission site, and instead promote the omission site for housing development as it has done previously in accordance with the SHLAA (2014), the Green Belt and Countryside Study (2014), and the draft new Local Plan: Strategy and Sites (July 2014), and in light of Waverley Borough Council’s resolution to approve PA Ref. WA/2014/1330 which effectively means that land south of New Pond Road is contiguous with the built-up part of Farncombe and has clear and defensible man-made boundaries.

I would be very grateful if you would confirm that these representations **objecting** to the Proposed Submission Local Plan have been registered and are ‘duly made’.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**PROPOSED SUBMISSION HOUSING ALLOCATION SITE A27 – WARREN FARM, WHITE LANE, ASH GREEN**

On behalf of our client, BlackOnyx Guildford Limited, please accept and register these formal representations to the Borough Council’s Proposed Submission Local Plan (Regulation 19) in relation to the Proposed Submission Borough wide Strategy and additionally Proposed Submission Housing Site A27: Warren Farm, White Lane, Ash Green.

These representations confirm our **support** for the following Proposed Submission policies:

- Proposed Submission **Policy S2: Borough Wide Strategy**
- Proposed Submission **Site A27:** Warren Farm, White Lane, Ash Green

**Background**
BlackOnyx Guildford Limited fully supports the Borough Council’s Submission Local Plan in relation to the proposed allocation of 3.36 hectares of land at Warren Farm, White Lane, Ash Green as set out in Proposed Submission Site Allocation A27. BlackOnyx Guildford Limited has entered into an agreement with the freehold owners of Warren Farm and Surrey House in relation to the proposed submission site and we are able to confirm that site A27 is available and deliverable during the early part of the new Plan period for housing development.

Ash Green is a sustainable settlement to the south east of Ash with excellent access to the strategic highway network including the A31 (south) and A331 (west). The village currently benefits from a bus service to nearby Ash where there are a wide range of local services and amenities. The village itself lies outside of the Green Belt and outside the Area of Outstanding Natural Beauty (‘AONB’) and Area of Great Landscape Value. Furthermore, the proposed submission site and village are not identified as being within a Conservation Area and there are no listed buildings in the immediate vicinity of the proposed submission housing site.

The absence of Green Belt and AONB means that Ash Green is an appropriate spatial location to accommodate modest housing growth as part of the Council’s proposed spatial development strategy which will seek to deliver up to 13,860 new homes across the borough during the plan period in order to meet acute housing need.

In this respect, we note that Proposed Submission Policy S2: Borough Wide Strategy has been informed and developed through a series of evidence based assessments including five volumes of the Green Belt and Countryside Study (‘GBCS’) and various iterations of borough-wide housing need assessment. We note that the Council’s Proposed Submission Policy S2 seeks to distribute housing growth fairly across the borough with a focus towards supporting and creating sustainable settlements. We consider that the Borough Wide Strategy is credible and robust and is in accordance with the aims and objectives of the NPPF.

[IMAGE 1]

Extent of Ash Green as shown on the Proposed Submission Inset Map with Proposed Submission Site A27 Warren Farm shown highlighted in red

Proposed Submission Housing Site A27

The enclosed character of Proposed Submission Housing Site A27 is a result of existing residential development on two sides and mature woodland on the other boundaries means the site can be developed to form a natural extension of the built form of Ash Green. The site is distinctly separate from the open countryside to the south and redevelopment would not impact significantly on the wider countryside and would be consistent with the existing settlement pattern of Ash Green.

Furthermore, proposed submission housing site A27 has no particular landscape, ecological, or heritage value save for the semi natural ancient woodland which borders (but lies outside) the southern boundary of the site. In respect to the woodland, Natural England has confirmed that, provided new housing development incorporates a 15 metre non-development buffer housing development will not cause any detriment to the woodland area.

The principle of residential development on the site has also been considered by an independent Planning Inspector who concluded, ‘There is no dispute between the parties that, in principle, the development of this site would be acceptable’ (ref: APP/Y3615/A/14/2220129 paragraph 30). All that remains to be resolved are matters of detailed design.

It is also highly notable that the Strategic Housing Land Availability Assessment and draft Local Plan (July 2014) have consistently identified and promoted the proposed submission housing site throughout the emerging new Local Plan process.

[IMAGE 2]

The extent of Proposed Submission Policy A27: Warren Farm, White Lane, Ash Green as shown in the SHLAA

Deliverable Access
One of the key issues to the delivery of Proposed Submission Site A27 is ensuring that safe vehicular access can be created onto White Lane. In this important respect, we are able to confirm that access arrangements to the Proposed Submission site can be safely delivered via Surrey House and that such an access solution will provide appropriate sight lines and forward vision ensuring highway safety for road users. The approach to the site access reflects the access solution proposed for planning application 16/P/00120 which has been reviewed and assessed by the Surrey County Highway Authority. The Highway Authority has confirmed in writing that it has ‘no objection’ to highway access being formed via Surrey House to serve 58 dwellings.

**Other Related Matters**

A range of baseline studies have been undertaken to assess the likely impacts of delivering housing development on Proposed Submission housing site A27. Those studies include; transport assessment, planning assessment, flood risk and surface water run-off assessment, land contamination study, and ecological (stage 1 and stage 2) assessments. All the studies carried out, to date, demonstrate that housing development can be delivered on the proposed submission site without causing any significant harm to amenities or the local environment.

Indeed the provision of new housing on Proposed Submission Site A27 will benefit local services and amenities by ensuring that the village caters for housing needs including affordable housing for local people, and retains a healthy mix of people (including young people and families).

**Housing Need**

Housing delivery in the borough has not kept pace with identified housing need or targets, and consequently the Council cannot currently demonstrate a 5 year supply of housing land. In this respect, it is highly notable that the annual housing Monitoring Report 2014/2015 published in October 2015 acknowledges that the borough has identified just 2.4 years of housing land supply when measured against the required 5 year housing land supply target. The Council needs a real step change in housing land supply and delivery in order to meet local housing need. The lack of sufficient new housing also restricts the ability of the borough’s economy to grow and prosper.

The Council’s sustainable development strategy (Proposed Submission Policy S2: Borough Wide Strategy) identifies that the Council’s preferred approach is to focus future housing growth in the most sustainable locations which the Council identify as:

- Guildford town centre
- Urban areas
- Inset villages
- Identified Green Belt villages

We support the Council’s strategy of focussing housing growth on sustainable settlements and villages. The Council’s development strategy set out in Proposed Submission Policy S2 is clearly in conformity with the aims and objectives contained in the NPPF. In that respect, sustainable, accessible settlements such as Ash Green which are outside of the Green Belt, and not designated as part of the AONB or Area of Great Landscape Value can play an important role as part of the borough’s development strategy and make a meaningful contribution towards accommodating new housing development to meet acute housing need.

The Council’s promotion of Ash Green as a sustainable location for modest housing growth and the promotion of Housing Site A27 in the Proposed Submission Local Plan is appropriate and we strongly support these elements of the emerging Local Plan.

**Conclusion**

The NPPF advises that villages and sustainable settlements have an important contribution to make in terms of accommodating housing grow in order to help meet acute housing need and to support local economies.
The Council’s emerging new Local Plan and the associated evidence base has consistently identified Site A27 land at Warren Farm, White Lane as a suitable site to deliver new housing. An independent Planning Inspector has also concluded that there is no objection to the principle of housing development on the site, subject to detailed design considerations.

Safe vehicular access is available from White Lane and this has been confirmed in writing by the County Highway Authority in relation to planning application 16/P/00120. There are no objections from statutory parties including Natural England which has confirmed that, provided a 15 metre buffer is safeguarded between proposed housing and the woodland to the south of the Proposed Submission site, it will have no objection to housing development.

We are aware that the annual housing Monitoring Report 2014/2015 published in October 2015 acknowledges that the Council has identified just 2.4 years of housing land supply when measured against the required 5 year housing land supply target. Proposed Submission Site A27 will make an important contribution towards helping to address this significant shortfall and meeting the acute housing need locally. It will also deliver an element of affordable housing for those most in need.

In light of all of the above, it is clear that the Proposed Submission Housing Site A27 Warren Farm, White Lane, Ash Green is an appropriate housing site allocation. The promotion of site A27 is fully in conformity with the aims and objectives of the NPPF and it will help support the Council’s proposed spatial development strategy set out in Proposed Submission Policy S2.

I would be very grateful if you would confirm that these representations in support of Proposed Submission Policy S2: Borough Wide Strategy, and our support for the Proposed Submission Housing Site A27: Warren Farm, White Lane, Ash Green have been registered and are ‘duly made’.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

PROPOSED SUITABLE ALTERNATIVE NATURAL GREENSPACE (‘SANG’) - LAND ADJACENT TO LONG REACH, WEST HORSLLEY

On behalf of our client, Green Reach Limited the owner of the land subject of these representations, please accept and register these formal representations to the Borough Council’s Proposed Submission Local Plan (Regulation 19) in regard to the promotion of 24.73 hectares of land adjacent Long Reach, West Horsley to deliver Suitable Alternative Natural Greenspace (‘SANG’).

In this particular regard these representations confirm our support for the following Proposed Submission policies:

- Proposed Submission Policy P5: Thames Basin Heaths Special Protection Areas
- Proposed Submission Policy I1: Infrastructure and Delivery
Additionally, these representations confirm our support the following identified site in Section 3 (Green Infrastructure) contained in the Borough Council’s Infrastructure Schedule:

- SANG 8 Long Reach Farm, West Horsley

However, we wish to propose a minor modification to the proposed site description of SANG 8 as follows:

‘SANG 8 Land Adjacent Long Reach, West Horsley’.

Reasoned Justification: The proposed SANG 8 as described in the Infrastructure Schedule is incorrect as there is no such address as Long Reach Farm. The 24.73 hectare site comprises former agricultural land located to immediately to the west (adjacent to) Long Reach in West Horsley. The land owner is Green Reach Limited. Therefore, an appropriate site description for inclusion within the Infrastructure Schedule is ‘SANG 8 Land Adjacent Long Reach, West Horsley’.

Background

Green Reach Limited fully supports the Submission Local Plan in regard to the provision of a new strategic SANG to the east of the borough at Long Reach, West Horsley. This is an area of the borough that suffers from a significant shortfall of strategic SANG. That shortfall detrimentally impacts on the Borough Council’s ability to encourage people away from the protected Thames Basin Heaths SPA and it has a significant detrimental impact on the Council’s spatial development strategy.

The provision of SANG forms an important part of a mitigation strategy formulated by the Borough Council as part of the adopted Thames Basin Heaths Special Protection Area (‘SPA’) Avoidance Strategy (2009-2016) which is overseen and implemented in partnership with Natural England in its role as an advisor to Government and as a statutory consultee.

The SPA is an area of Lowland Heath covering over 8,000 hectares of land across Surrey, Berkshire and Hampshire. The SPA was designated under the European Birds Directive in March 2005 because it supports important breeding populations of ground nesting birds that are particularly vulnerable to disturbance activities associated with people and domestic pets. To protect ground nesting birds the SPAs are afforded significant protection from new residential development so that the ecological integrity of SPAs are maintained. Accordingly, there is a significant requirement for areas affected by SPA to provide sufficient SANG in the SPA ‘zone of influence’ (400 metres to 5km catchment measured from the boundary of the SPA) to provide accessible areas for walking and outdoor recreation so that existing and future residents have a suitable alternative to using the highly vulnerable SPA for their recreation needs.

The urgent requirement for SANG has understandably resulted in the Borough Council identifying the need for new SANG land as part of the Infrastructure Schedule which accompanies the Proposed Submission Local Plan.

The Proposed Submission Local Plan identifies the need for, and objectives of, additional SANG land as part of Proposed Submission Policy P5: Thames Basin Heaths Special Protection Areas and Proposed Submission Policy I1: Infrastructure and Delivery. We fully support the aims and objectives of these proposed submission policies which are fully consistent with the Government’s National Planning Policy Framework (NPPF) and with Policy NRM6 of the South East Plan (which remains applicable at the regional level).

Specifically, in regard to national planning policy; section 11 of the NPPF is dedicated to the need to conserve and enhance the natural environment and in particular the need to minimise impacts on biodiversity and providing net gains in biodiversity wherever possible. Section 11 encourages local planning authorities to, ‘...set out a strategic approach in their Local Plans, planning positively for the creation, protection, enhancement and management of networks of biodiversity and green infrastructure’. In this regard, we consider that Proposed Submission Policy SP5 and Policy I1, and proposed SANG 8 are fully in accordance with the NPPF.

Suitable Alternative Natural Greenspace – SANG 8 Long Reach, West Horsley

SANG’s themselves need to be rural in character and appearance, they should be interesting in their own right, comprise a minimum of 8 hectares in size incorporating at minimum 2.3 kilometre walk, and maintained and managed in perpetuity,
and to deliver works that will improve SANG’s overall quality. This enhances the SANG’s capacity for recreation, makes it more attractive to users, and increases residents choice of sites to visit, thereby providing a range of sites of comparable interest and quality and removing visitor pressure on the fragile habitat of the SPA. At 24.73 hectares in size with potential for a car park and, the proposed Long Reach SANG will be able to accommodate an appropriate circular walk and would have a mitigation catchment area of 5 kilometres meaning that it would represent a strategic SANG in a geographic part of the borough that is short of available SANG land.

The site itself comprises 24.73 hectares of former agricultural land. The proposed site is not within a conservation area and there are no listed buildings or structures on the site. Furthermore, the site is not within the designated Area of Outstanding Natural Beauty (‘AONB’) and is not identified as being important in terms of any ecological designation. The site is located within the Green Belt, however, the primary function of SANG land is for informal recreation purposes drawing people away from the SPA and therefore the function and use of SANG will maintain the open characteristics of Green Belt in accordance with national planning policy.

A raft of baseline studies have been undertaken to assess the likely impacts of delivering a strategic SANG in this location, including; transport assessment, planning assessment, flooding and flood risk, ecological (stage 1) assessment, and landscape and visual impact assessment. All of these assessments demonstrate that the proposed SANG 8 can be delivered without causing detriment and indeed the benefits to the landscape, ecological value of the site and to the conservation objectives arising from the need to protect the Thames Basin Heaths SPA are considerable.

[IMAGE 1]

**Proposed SANG 8 Land Adjacent Long Reach, West Horsley**

A further benefit of proposed SANG 8 is that such provision would enable the potential impacts of permitted housing within the appropriate catchment to be properly mitigated and delivered in areas of the borough that would not otherwise be able to accommodate new housing. To be clear, SANG does not make unacceptable housing proposals acceptable. Its primary function is to act as mitigation against the potential harmful impacts of residents who might otherwise travel to the SPA for their outdoor recreation needs. Additionally, once designated and laid-out SANG land is maintained and improved in perpetuity meaning that it cannot be developed for alternative uses. Longer term maintenance and management of SANG will also ensure that SANG land deliver enhanced habitats for flora and fauna leading to ecological enrichment of landscapes.

The owners of proposed SANG 8 have already engaged with a variety of local and national stakeholders to discuss matters of broad principle including compliance with the Thames Basin Heaths SPA Avoidance Strategy. In particular, the owners have engaged with Natural England as part of its Discretionary Advice Service and has secured (without prejudice) advice on the principles of delivering a strategic SANG in this location. Natural England has confirmed that, subject to detailed considerations, it has no objection in principle to SANG 8 at Long Reach, West Horsley which is proposed in the Infrastructure Schedule.

**Conclusion**

The proposed Long Reach SANG (‘SANG 8’) as identified in the Borough Council’s Infrastructure Schedule and as supported by Proposed Submission Policy SP5 and Policy I1 is fully in accordance with the objectives of the Government’s National Planning Policy Framework, it will support the aims and objectives of policy NMR6 in the South East Plan, and it will support and uphold the Borough Council’s commitment towards the preservation and mitigation of the Thames Basin Heaths SPA as set out in the Council’s adopted Avoidance Strategy (2009-2016).

In all these respects the delivery of a strategic SANG site in this part of the borough, where there is a significant shortfall of appropriate SANG, is fully in accordance with the strategic policy objectives of the Borough Council.

We trust therefore that the Borough Council will continue to support the proposed SANG 8 as part of its Infrastructure Schedule with the minor modification to the proposed description of the SANG as set out in these representations.

In light of all of the above, I would be very grateful if you would confirm that these representations in support of Proposed Submission Policy P5: Thames Basin Heaths Special Protection Areas and Proposed Submission Policy I1: Infrastructure...
and Delivery, and **support** (with minor modification) for the proposed SANG 8: Long Reach, West Horsley are ‘duly made’.

I am writing just to endorse what other people have said.

So many houses will ruin our village, as it is the medical centre [text unreadable], the schools are at breaking point and we have very little [text unreadable] as it is.

As for taking some of the Green Belt would be terrible [text unreadable] as it was put there to protect villages such as ours. [text unreadable]

The policy echoes the guidance of the NPPF in saying that the Green Belt will be protected, and that while development on Green Belt land will be considered inappropriate in general, infilling within villages is acceptable. The policy identifies Gomshall as one of the villages within which limited infilling is permitted, and the draft plan proposes to increase Gomshall’s identified boundary in order to include the site, both of these things are supported.

The document’s glossary entry for infilling has been amended from “the filling of an underdeveloped plot in an otherwise built up frontage by not more than two dwellings.” It now reads: “Development of a small gap in an otherwise continuous built-up frontage, or the small-scale redevelopment of existing properties within such a frontage. It also includes infilling of small gaps within built development.” This definition broadens the terms of what is considered infill, and appears to
recognise that a greater level of tolerance is required in order to ensure that the plan can meet the borough’s housing requirement.

The widening of the identified boundaries of villages, along with the broadening of the plan’s definition of infill, is supported. My client’s land is located within the village envelope, and is a gap within the built development, and thus meets the definition of infill as set out in the local plan. In the interests of certainty, the local authority’s confirmation of this would be much appreciated.

Please do not hesitate to get in touch if you have any questions relating to the above. In the meantime I would be grateful if you could confirm receipt of this representation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The policy has reduced the amount of housing for which the plan provides from 13,860 units to “at least” 12,426 (equivalent to 654 dwellings per year). However, it is noted that this coincides with:

• An addition of a year to the plan period;
• An increase in the previous estimates of population growth, equating to an additional 229 people per year;
• An Annual Housing Target in the policy document which provides for only 9,810 units over the plan period;
• The SHMA (2014) indicated that the housing need could be up to 816 units per year. The March 2017 addendum has a lower figure. No real evidence is provided to justify this; and
• The publication of an addendum to the LAA in June 2017 which stated the housing requirement for the period 2017-2022 to be 4,681. This is using the OAN of 654, and includes a deficit of 631 with a buffer of 20%. It is an effective requirement of 936 dwellings per annum.

Taken as a whole, these points indicate that housing need is likely to be higher than 12,426, possibly considerably so. As such, we support the presentation of the figure as a minimum target. However, given the apparent tension with the identified supply, the Local Authority should be taking a positive approach to residential development, and supporting the principle of development within settlement boundaries, including villages in the Green Belt such as Gomshall.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Alterations to Local Plan Site A44

I refer to latest addition to the local plan for Send's future development. This site would obviously be built on Green Belt Land which is totally unsuitable for this area.

I object for the following reasons-

1. I object to - Send Hill is a very narrow lane and where this site will be there is absolutely there is no room for vehicles to pass each other, therefore the road would have to be widened, at a considerable cost, to enable lorries and caravans to go back and forth on this site.

The sewage in Send Hill has always been a problem with excess effluence, there is considerable back up so our properties has to be cleaned out on a regular basis, this will only be exacerbated by any additional properties.

2. I object to - The private owner part of this development which is opposite our property has become a haven for wild life with deer and there young, badgers, rabbits, bees, owls, and various species of birds.

3. I object to - When this piece of land was sold to the present owner there was a Covenant that a comer of this plot should not be disturbed as it was used as a dog and pet cemetery. Building on this plot surely is breaking the lease.

4. The GBC area of this development has been used for many years for recreation, children and dog walkers.

5. I object to - Previously the land was used and a waste infill. This infill was extremely toxic and has been vented over a period of time. If building was to take place, surely this would disturb any existing toxicity present which could result in serious problems!

6. The Cemetery enlargement in Send Hill has now been offered to all denominations which will increase both traffic and parking problems adding yet more chaos from your proposed development. If you take in consideration the traffic from schools and their latest rebuilds, this will increase the traffic problems. By the riding stables on Send Hill the road gets even narrower and very dangerous leading into Potters Lane.

I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

Attached documents:
I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is immediately removed from the Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a development of more than 2,000 dwellings, with five storey high urban-style buildings and a population density higher than most London boroughs.

**Answer (if comment is on questions 1-7 of the questionnaire):**

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars;
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads;
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements;
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them);
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest;
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

**Answer (if comment is on questions 1-7 of the questionnaire):**
I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

Re: Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I strongly object to the draft Local Plan for a number of reasons, namely:

I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to (the electorate are being ignored.

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The Submission Plan contains several significant errors and there appears to be a lack of transparency in terms of the evidence base, the methodology and the subsequent assumptions that have been made. This is particularly so in relation to the ‘amended quantities of the new requirements for homes’ – the housing need figures - which in my view are open to legal challenge. By way of example, Policy S2 states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is just one of several glaring examples of why the plan is unsound. The inclusion of a 10% buffer in the housing number over the plan period which is entirely unnecessary. I object to the fact that in terms of the housing number, the Council has not (as it is required to do) used any constraints such as Green Belt, infrastructure, air quality, AONB and TBHSPA.

The plan represents a steady erosion of the Green Belt and no attempt appears to have been made to address the strategic significance of the Green Belt and its fundamental aim of preventing the sprawl of London. Specifically, I object to the change in the Green Belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact. I also object to the removal of 3.1 hectares from the Green Belt without any justification, to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

In short, the proposed Submission Local Plan is unreliable, unbalanced and therefore unsafe. The Council has failed to remove this site from the Local Plan despite receiving thousands of objections from residents and from statutory consultees. The Council must know that site cannot contribute to the five-year housing projection due to several constraints, perhaps most notably the provision of sewerage capacity.

For the reasons listed above, I consider the plan is unsound and clearly not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A21

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I support retaining this land for allotment use, and also I support Policy 14. It is an important green area in the Guildford area, and needs to be retained as such. The view at the top of the site is very impressive, with commanding views of the surrounding areas. In the early morning here, you will see foxes and their cubs. There is an abundance of wildlife. Particularly a sparrow hawk, green woodpeckers, pied wagtails, robins and wrens, the latter nesting close to my allotment plot. Near my plot are a number of bee hives which are extremely important for the pollination of crops in the vicinity.

I am a pensioner, and love my allotment as I have PTSD and need to escape from my constant past memories, by working there daily, listening to the birds and wildlife, and chatting with my fellow ‘plotters’ about growing vegetables and fruit. I live 10 minutes walking distance from the site. I normally work there from about 7am to lunchtime, depending on the
weather. This is my first year working this allotment and I have been overweight, and on Doctors advice have been dieting. This year I have lost 2 stone in weight, from digging and continual exercise at the site, and feel much better for it. It has thus become my life, and I would be lost without my allotment. It is a lovely place to go and spend my time. Every Tuesday I also help out for an hour working on the school allotment helping year 3 children, learn how to plant seeds, tend their crops, and answer their questions about where their food comes from. This in my mind is extremely important. I have 4 grandchildren and they like visiting and learning about growing their own fruit and vegetables. Fresh produce is good for their health, and they must learn and understand where it comes from and that it is not found in a supermarket. Today for instance, for my lunch, I had new potatoes, broad beans, cos lettuce, radishes, beetroot and cucumber, all grown by myself. My health is improving as a result.

Lastly it is utterly important to have the entrance gates to the site. I have seen in my life devastating injuries as a result of chain saw usage, and power machinery. The emergency services must have access to the site at all times, especially if I or anyone else was to suffer a heart attack or stroke for instance.

Please keep our allotments.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

---

I have lived in Send Marsh for 50 years and over the years have seen our green spaces being concreted over and planning permitted for people to sell off gardens for development. Enough is enough. We love our villages and to permit the construction of so many houses would destroy completely our rural life. This is an expensive area and to state that there would be affordable housing is complete rubbish. There is no such thing as "affordable" housing in this area.

I OBJECT to the removal of 15 villages, including Ripley and Send, from the green belt. This will lead to wholesale, and often inappropriate developments.

I OBJECT to the fact that GBC have not followed the correct process for Send and Ripley developments. Any significant changes to the 2014 proposals, such as the proposal development of Garlicks Arch, should have required another full consultation, which did not happen. This invalidates the whole process.

I OBJECT to the fact that GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment which shows that industrial space at Burnt Common IS NO LONGER NEEDED.

I OBJECT to Policy A43.30 the proposed development of Garlicks Arch designated for 400 houses and an industrial estate. This is a new site not included in the Regulation 18 draft and has NOT been consulted on previously. It is not only permanently protected green belt but also a site of ancient woodland with some trees planted in the 16th century.

I OBJECT to policy A43.30 the development of new four way interchange onto the A3 which would mean that narrow Send Road (A247) would be the main route for traffic leaving the M25 and A3. It is already crowded and vulnerable to traffic jams. Further traffic from this development would result in permanent gridlock. It simply would not work.
I OBJECT to policy A44 which would see 40 homes and two travellers' pitches on land west of Winds Ridge and Send Hill. This was again a NEW site NOT included in 18 draft and therefore has NOT been consulted on previously. Once again this is Green Belt land partly containing unsafe landfill. Access is by a narrow lane which could never take the volume of traffic that would ensue from traveller's pitches.

I OBJECT to the fact that the Local Plan takes no account of schools, doctors surgeries and roads that are already operating at full capacity. Another 4000 houses in this area with a conservative estimate of a further 8000 cars would be catastrophic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the continued inclusion of a site (the former Wisley Airfield,- now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee .

After 14 months of consideration (and various extensions and amendments), Wisley

Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 6th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is immediately removed from the Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a development of more than 2,000 dwellings, with five storey high urban-style buildings and a population density higher than most London boroughs.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars;
2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads;
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements;
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them);
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest;
6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

Re: Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 -for the phased development of a new settlement of up to 2100 dwellings

I am employed in the Ockham area and wish to strongly object to the draft Local Plan for a number of reasons, namely:

I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed Submission Local Plan. The document contains a significant number of inaccuracies and, as a result, cannot be relied upon.

By way of example, the housing need number (which in any event appears to be incorrect) lacks any evidence in support. Statements are made without any supporting documentation being available.

In addition, I object to Paragraph 22 of the Submission Local Plan which in my view clearly doesn’t reflect the impact of the buildings on the surrounding area.

The constraints on the site and its physical location mean that this site remains the least sustainable strategic site identified in both this version and in previous versions of the plan.

Local Plan Consultation 2016

Please take note of my formal objections listed below, to parts of your Plan and my wish for this letter of objection to be seen by the Government’s Planning Inspector.

New Village Boundaries

I strongly object to your proposal to remove, Send, Send Marsh/Burnt Common & Ripley from the Green Belt and expanding their boundaries which encroach on a large proportion of Green Belt Land, which is to be used for Housing & Industrial development, (Policy P2).

This proposal is in direct contravention to the Government’s stated Policy as part of their pre-election manifesto and their issued guide lines to Councils with respect to the preservation of Green Belt land

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Garlick’s Arch (Policy A43)

I strongly object to the proposed development of this area and its inclusion at a very late stage in the Proposal which would appear to be questionable in-so-far as ‘Correct Process’ has not been followed

This area is unsullied Green Belt land partially covered in ancient woodland, that was not considered as a potential ‘Development Area’ in the 2014 consultation. In fact during 2014 a planning application to build 25 houses in this area was rejected on ‘Sound Planning Grounds’.

It is therefore, to my mind, inconceivable that suddenly it has become acceptable to build 400 houses together with 7,000 sq.metres designated for light industrial usage on this Green Belt Land.

In additional to all this, is the fact that there is no existing or potential infrastructure which would be required to support such a development.

Further, the Employment Land Needs Assessment 2015 shows an 80% reduction in employment space from the previous ELNA conducted by GBC in 2013, which indicates that there is absolutely no need for the proposed 7,000 Sq.m. development at Burnt Common

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **New North & South Bound Slip Roads to the A3 from the Clandon Road. (Policy A43a)**

(a) I strongly object to this proposal.

The A247 Clandon Road, is a narrow winding road in parts. Large articulated lorries can only traverse certain parts of it by running up over the opposite kerb. There is no prospect of the road being widened with housing and listed building being adjacent to the road.

It is already running at maximum capacity for large parts of the day, being the main feed road to Woking, Portsmouth and London via Ripley, for a very large area south of the A3 and could not possibly handle any increase in traffic flow.

The same comments apply to Send Barns Lane that becomes Send Road at the traffic lights, which leads to Woking via Old Woking. The roads thru Old Woking are also twisty & narrow and are currently a source of severe congestion. The introduction of Slip Roads onto the A247 would encourage traffic from the M25 & London which would only impact this increasingly deleterious situation further to the detriment of every householder in the whole Clandon, Send, Send Marsh/ Burnt Common & Ripley areas.

(b) I note also that the proposed development of the Slip Roads is dependent on land being ‘Gifted’ by the developer. To the best of my knowledge and that of my lawyers, the land immediately behind my property and that of my neighbours, is ‘Common Land’. Quite how the developer has acquired the right or ownership of this land, to ‘Gift’ is a mystery which will be investigated further.

These are just three of the items which most directly affect me. There are many others within in my immediate area which are less direct, but will nonetheless have deleterious effects on my environment.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A42 Clockbarn Nursery, Tannery Lane.

Reasons for objection to the proposals of 2016 are well documented and remain valid. An increase of a further 15 houses in
addition to the original 45, representing a 33.3% increase is completely unjustified and can only exacerbate further, an
already deleterious situation in the immediate locale. In addition it will contribute to worsening the situation at the A247
corner with the London Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A43 Garlick’s Arch – Send Marsh, Burnt Common and Ripley

Again, the many thousands of objections to the proposed development in the 2016 Consultation have been completely ignored with respect to this Green Belt land.

Now 8 Pitches/Plots for ‘Travelling/Showpeople have been added to the original 400 houses, without any proven demand or requirement.

There has not been any visible consideration given to the infrastructure which would be required to support this type of expansion. This proposal is impractical.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The number of new houses it is suggested need to be built cannot be justified.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPA16/3378  Respondent: 15227905 / Nigel Alexander  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT ESPECIALLY TO 6 POLICIES: A36, A37, A38, A39, A40 & A41:
• Amount of new housing far exceeds local need.
• Housing density excessive when compared with existing development.
• Would transform the Horsleys into a sizable town, something for which no case is made.
• No local support.
• Collective impact of these 6 sites on a small part of the borough not considered. Should not be treated as isolated, separate sites.
• Total amount of new building out of scale with the planned development elsewhere the borough, especially less sensitive urban areas not protected by Green Belt.
• Sites unsustainable. Key infrastructure lacking. No adequate provision is made to increase it – e.g. poor wastewater capacity, lack of schools, absence of traffic management plan, flooding.
• No account taken of additional impact of Wisley Airfield site on Horsleys.
• Extension of settlement boundaries too permissive. Horsleys characterised by streets with development along only one side of the road. Policies allow too many adjacent green fields to be developed by squaring off boundaries and claiming they don’t contribute to Green Belt “openness”. 6
• Green Belt gap with neighbouring settlements hugely narrowed, especially if Wisley Airfield is built on.
• Will harm compliance with NPPF 81 – e.g. by making cycling (including Prudential cycle races) too dangerous, ruining the rural setting of Waterloo Farm campsite, destroying the ambience of Grange Park Opera’s new “Theatre in the Woods”.
• Policy A40 especially unviable because of high water table and poor drainage, leading to regular winter flooding.
• Safe access and egress at Site A40 unachievable, owing to flooding, high speed limits, poor sight lines, narrow access to existing properties, inadequate pavements for elderly and schoolchildren, increasing use by recreational cyclists etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/685  Respondent: 15227905 / Nigel Alexander  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green

The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
10. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 4th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A3S, is removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPS16/6562  **Respondent:** 15227905 / Nigel Alexander  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I OBJECT ALSO TO POLICY A35 (WISLEY AIRFIELD):
• Should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties.
• Irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application).
• Unacceptable Conservative Party links between the developers and the Council.
• No Green Belt “exceptional circumstances” presented.
• Not a brownfield site as stated – only 15% of it.
• Proposed SCC waste site ignored.
• Loss of farming land.
• Too near RHS Wisley and Thames Basin Heath SPA.
• SANG would harm on SPA.
• Will aggravate traffic jams at A3 roundabout and M25 Junction 10.
• Unacceptable increase in air pollution.
• No existing public transport and stations miles away.
• No proper traffic data.
• Housing density far too great.
• Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed buildings.
• Access confined to inadequate narrow lanes.
• Water table and surface water flooding not considered for site itself or for downstream areas on River Mole.
• Major impact on neighbouring villages, especially Horsleys.
• No assessment made of collective impact on area of this and 6 Horsley sites.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**I OBJECT TO POLICY D3 (HISTORIC ENVIRONMENT):**

- Supports over development: you can’t “enhance” history. Doesn’t ban private interests from trying to make aggressive profits from privatising, commercialising and Disneyfying public historic assets.
- Doesn’t ban development near historic assets.
- Ignores NPPF 126, 131, 132, 133.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

Page 167 of 2804
I OBJECT TO POLICY D4 (DEVELOPMENT IN URBAN AREAS AND INSET VILLAGES)

• No commitment to expand social housing or accommodation for people who can’t afford so-called affordable homes.
• Not enough new homes in urban areas, despite demand and need for urban regeneration and protection of Green Belt.
• Objectives for inset villages cancelled out by plans for excessive housing growth there.
• Too much emphasis on traditional shops, when a lot of this sector is in terminal decline.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY E4 (SURREY RESEARCH PARK):
• Subordinates public planning policy to the University of Surrey’s private, commercial enterprises (not its public academic purpose).
• No cost/benefit analysis of harm to Green Belt involved in extending research park.
• Waters down research purpose of park, turning into a general business park.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13744  Respondent: 15227905 / Nigel Alexander  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY E5 (RURAL ECONOMY):
• Incompatible with high housing numbers proposed for rural areas elsewhere in the plan.
• Insetting and settlement boundary extension endanger appropriate rural activities listed that depend on maintaining rural areas’ character.
• Town-centre uses for rural areas contradict government’s localism policy and need to consult and protect village environments.
• Established commitments to high-speed rural broadband and mobile coverage watered down despite 2014 consultation responses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPP16/13745  **Respondent:** 15227905 / Nigel Alexander  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1 OBJECT TO POLICY E6 (LEISURE AND VISITOR EXPERIENCE):

- Danger of overdevelopment: success doesn’t depend on building “attractions” which can harm heritage and rural settings. No case made for creating new ones.
- No policy of opposing reduction in rural hotel capacity
- No definition of what added value interventions by Council can make to normal visitor market mechanisms.
- No policy of supporting Guildford countryside as its prime leisure and visitor asset, whose value rises as London gets bigger and busier.
- No vision of what the ideal visitor experience of the borough actually is and how to support its various elements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1 OBJECT TO POLICY E7 (TOWN CENTRE):

- No statement in policy wording of value of Guildford’s rural setting and views.
- No consideration of Town Centre Master Plan, GVG proposals or station redevelopment plans.
- Proportion of new housing in town far too small. Development pushed into countryside, ruining the latter and harming urban regeneration.
- No brownfield register.
- Too much big retail, despite online shopping revolution and decline of traditional high streets internationally. Futile to try to turn Guildford into Woking or Kingston.
- No measures to support small, niche retailers in town, e.g. through business rates.

</table>
I OBJECT TO POLICY H1 (HOMES FOR ALL):
• Policy doesn’t set any constraints on building.
• Housing mix based on pre-Brexit growth and demographic assumptions and unreliable SHMA that wasn’t put out to formal public consultation and wasn’t scrutinised by Councillors.
• Fails to compel University of Surrey to use its thousands of planning permissions and existing space, such as car parks, for student accommodation.
• Lets University off the hook of accommodating all its students, so as to free up houses for the most needy in town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13735  Respondent: 15227905 / Nigel Alexander  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY H2 (AFFORDABLE HOMES):
• Using the official definition of Affordable is a joke. Affordable homes round here are not affordable! Pushing for these homes just means pushing for more development.
• The viability clause lets developers off the hook of providing even these (non-) affordable homes. Too open to manipulation.
• Contradicts government policy to develop less advantaged regions of the UK. People don’t have to live and work in Guildford but should be encouraged to move to cheaper, less congested areas.
• This policy won’t affect market forces or house prices. Guildford is too small and too near London to influence these, however many homes it builds.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13736  Respondent: 15227905 / Nigel Alexander  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT TO POLICY H3 (RURAL EXCEPTION HOMES):
  • It loosens the criteria by allowing “market housing” and development that changes the housing mix. Developers would be able to override NPPF 2 “exceptional circumstances” and other restrictions to build large houses in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1393  Respondent: 15227905 / Nigel Alexander  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the detrimental impact on transport, local roads and road Ispecifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT TO POLICY I1 (INFRASTRUCTURE & DELIVERY)
• Infrastructure considered here as an afterthought, rather than pre-condition of development. Should be a key issue for the rest of the plan.
• Excessive housebuilding in countryside not supported by any funding or provision for infrastructure.
• Heavy focus on building on greenfield sites inefficient and unnecessary: cheap for developers but much more expensive for the public who have to fund the infrastructure.
• Draft CIL scale discourages use of brownfield land first.
• No plan for organic increase in existing traffic congestion, let alone once thousands of houses are built across the countryside. Local roads hardly considered. Green Belt being eroded before road widening/improvement plans certain, encouraging over-development of greenfield sites.

There has been insufficient or no thought or planning for improved infrastructure to sustain normal living requirements. It is unreasonable to believe that unless there is a radical change to road and transport services, education facilities, medical services, drainage and water supply the planned increase in house density will not be sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13757  Respondent: 15227905 / Nigel Alexander  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY I2 (SUPPORTING DTP’S ROAD STRATEGY):
• Doesn’t allow for catastrophic increase in traffic resulting from spreading new housing estates across the borough.
• Out of sync with DTP’s strategy: houses to be built and Green Belt destroyed before plans for A3 etc implemented.
• Road plans too optimistic anyway, especially post-Brexit. Probably won’t happen.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13758  Respondent: 15227905 / Nigel Alexander  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT TO POLICY I3 (SUSTAINABLE TRANSPORT):
• Just a list of generic measures, not related to real life or the particularities of Guildford.
• Fails to treat sustainability as a constraint. Assumes excessive levels of development proposed in the plan can be supported by sustainable development.
• Unrealistic. Most people can’t or won’t walk or cycle – commuters in a hurry, the elderly, children, people who are unwell or unfit, people carrying heavy shopping or other goods. I.e. most residents!
• Town’s eye view of transport. Ignores scarcity of existing rural public transport and commercial unviability of increasing it. Ignores terrible state of Surrey’s roads, potholes, flooding etc. Ignores extra stress to be created by huge new housing estates in countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. I object to the fact that air quality concerns have not been taken seriously- air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted Additional traffic will exacerbate this situation, Impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the Irreversible impact of the habitat degradation.
2. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT TO POLICY I4 (GREEN & BLUE INFRASTRUCTURE):
• No teeth. Policy cancelled out by huge developments across the countryside. No mention of opportunity costs of loss of Green Belt services and amenities (e.g. farming).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/1387  Respondent: 15227905 / Nigel Alexander  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) -

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY P2 (GREEN BELT):
• No declaration of support for protecting the Guildford Green Belt, contrary to NPPF and government statements.
• No evaluation of value of local Green Belt as a public and private asset: it’s just treated as potential building land with a few inconvenient restrictions.
• Impact of Green Belt development on local agriculture ignored.
• Impact on rural leisure and tourism ignored.
• Impact on flood control ignored.
• Impact on carbon sink and knock-on effects for air pollution and climate change ignored.
• Impact on biodiversity ignored.
• Impact on natural heritage ignored.
• Impact on water catchment ignored.
• Impact on room for public space amenities (parks, cemeteries, waste facilities etc) ignored.
• Impact on rural business (e.g. mineral mining, film making) ignored.
• Impact on natural landmarks and views ignored.
• Harm to public health and wellbeing (physical, psychological) ignored.
• Allows excessive levels of development in breach of views expressed in last consultation and Conservative Party manifesto commitments at the last local elections.
• Has allowed ruling Councillors to argue that there is an acceptable percentage of Green Belt that should be sacrificed to development, when no such rule exists in the NPPF.
• Ignores alternative approaches, such as fair burden-sharing under which settlements would undertake to accommodate new development in proportion to their size.
• Disproportionate amount of development (most of it, in fact) to be in Green Belt. Too few new homes in urban areas where most people (especially the young and less privileged) want to live. This will act against much needed urban regeneration.
• “Insetting” of most villages disproportionate and unjustified in terms of their contribution under the NPPF to the purposes of the Green Belt. Based on flawed Green Belt and Countryside Study. Idea that most Guildford villages do not contribute to “openness” is subjective.
• Major settlement extensions allow indiscriminate housebuilding, as irregularly shaped villages are squared off to enclose green fields.
• Overall harm to Guildford Green Belt unjustified by any objective development need post-Brexit.
• Ignores most of NPPF 17 stipulations.

In addition to these comments I attach a key document I have referred to which gives greater detail of all the points of objections all of which I support fully.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT TO POLICY P3 (COUNTRYSIDE BEYOND THE GREEN BELT):
• Gives Ash and Tongham more protection than rest of borough, including existing Green Belt. But they don’t contribute to preventing London sprawl.
• Special treatment of ward represented by current Council Leader and his predecessor. Politically biased.
• A minor extension of Green Belt in one place does not justify its major destruction elsewhere (the inset villages).

1. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13740  Respondent: 15227905 / Nigel Alexander  Agent:
I OBJECT TO POLICY P5 (THAMES BASIN HEATH S.P.A.):
• Compensation mechanism too feeble to provide protection.
• Cynical encouragement of SANG to justify nearby development in protected
  areas. Does not extend protection or amount of green space, and can damage
  them (e.g. dog and cat attacks on wildlife).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT TO POLICY S1 (SUSTAINABLE DEVELOPMENT):
• No definition given, no reference to its importance in the NPPF, no guidelines for
  applying it to planning.
• No statement of how economic, social and environmental impacts should be
  balanced.
• No mention of Green Belt, Guildford’s greatest legacy by far to Sustainable
  Development. No commitment to protecting it.
• No reference to most of the NPPF Core Planning Principles.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT TO POLICY S2 (SUSTAINABLE DEVELOPMENT):
• No definition given, no reference to its importance in the NPPF, no guidelines for
  applying it to planning.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4) I object to the disproportionate allocation of housing in this particular part of the Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13733  Respondent: 15227905 / Nigel Alexander  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY S2 (BOROUGH-WIDE STRATEGY:

• Numbers based on growth and demographic data now invalidated by Brexit.
• No justification given for 13,860 housing figure. Figure based on a secret formula used by consultants and never seen by anyone on the Council or by the public. Council has failed to seek its disclosure.
• 13,860 figure confuses the OAN with a housing target. No definite housing target given, leaving too much scope for the Council to make one up. I can’t understand how we’re being consulted when we don’t know how many houses the Council want to build, taking all the contraints into account.
• Figures based on a Housing Market Area that ignores 2 neighbouring districts (Rushmoor and Mole Valley) and is much too small, since most people commute or travel far outside the Area to shop or study. This distorts the figures: no reason why Guildford needs to build nearly twice as many large housing estates as the rest of Surrey put together, or half of all sites over 100 units.
• High numbers involved would transform character of the borough from mainly rural/Green Belt to urban, creating a corridor of development out of London as per Woking or Croydon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp173/585  Respondent: 15227905 / Nigel Alexander  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object strongly to the latest draft of the GBC local plan which has not allayed any of my concerns I raised in my original letter of objection.

The GBC plan still proposes to inset East Horsley from the Greenbelt, land which was designated as protected land for future generations, a decision made rightfully then and those reasons remain today and will do so into the future.

The development of over 2000 homes on the old Wisley Airfield site will change the landscape and environment of the local areas and beyond for ever and one feels will just continue the spread of Greater London into the countryside. The current infrastructure of roads, railways, schools, doctors surgeries, public services and the list goes on will not be able to handle such a large increase in the local population nor in many cases will it be possible to increase and improve those infrastructure requirements to meet the expanded needs. In short the local area will become paralysed and the lives of current residents diminished dramatically. One only needs to look at the already full railway car parks, the congestion at road junctions, the difficulty in securing a local school place and an appointment at the doctors to realise this to be the case. The proposed development of the Wisley site on its own would be a significant change to the quality of life in this part of Surrey without all the additional development proposals such as the additional 100 homes proposed near Horsley station.

What surprises me is that the new draft plan has not taken into account the revised ONS forecast for the increase in population which is less than half of the increase in housing stock being proposed. This daft plan needs to back to the drawing board.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Send being moved from the Green Belt. The Green Belt area is why I moved here and I object very strongly to Send being removed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the increase in housing from 185 to 485 - these changes require another full consultation of regulation 18 not the short cut of regulation 19 which you are trying to away with.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the proposed industrial development of 7000 houses sq metres as it is not required in this area. There are many more industrial sites standing empty in the surrounding area and the proposal for the housing is new and has not been consulted upon. The new 4 way interchange on to the A3 at Burnt Common would cause major road blockages on our small roads which are already very busy and getting busier.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the land west of Winds Ridge being designated for a travellers site and 40 houses - this is an open site and it would be dangerous to have an opening on to the narrow Send Hill.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I am writing to object to the inappropriate proposals to develop a large number of houses on Wisley Airfield and in the villages of East and West Horsley.

Collectively, you have failed to take into account the widespread resentment of your proposals in the local communities. In particular,

1) the residents within these communities have chosen to live in rural/semi rural surroundings. If they had wanted urbanisation then they would be living in better serviced and valued areas like Guildford or Surbiton. Our area is a magnet to visiting tourists from London and the surrounding areas to enjoy its beauty, unique wildlife and beautiful vistas in harmony with their surroundings. The amount of cyclists using our area is ever increasing and that is just one example of why it is important to protect our environment. This has a social and economic value.

2) The roads in our area are VERY poor. The conduct of the authorities in maintaining them is also poor. They are largely narrow lanes but with the increased traffic it can only make the situation worse for health and safety reasons.

3) The impact on our local services will be highly detrimental. Already, the stress of getting into the local doctors surgery at a suitable time or even just finding a suitable place to park can be very stressful to a large number of older residents in particular. Parking in the village is already poor especially at the weekend where even a minor event such as a wedding can make it extremely difficult. How will schooling cope? You are already adding to a county wide crisis of building more new homes with ever decreasing neighbourhood facilities.

4) The roads around East Horsley from 7am onwards are VERY busy. It can take up to 20 minutes on occasions just to cross the Effingham crossroads on the A246. Any additional housing of the scale you are proposing could lead to gridlock and again safety and pollution concerns in a wider area leading to the increased need for additional policing. Has this been included in your planning?
5) Local transport is very poor meaning ever increasing car journeys on ever more dangerous roads. There is virtually no existing infrastructure to accommodate these developments or very low levels of local employment which leads to increased traffic and environmental damage. The junction currently close to the Ockham Bites café onto the A3 is HIGHLY DANGEROUS. The traffic flow here is very fast and dense making it extremely difficult to join the road.

6) Within East and West Horsley once again the scale of these developments and some like on the Thatchers hotel site are on pristine land that I believe has never been sprayed by agri chemicals. Surely something to cherish.

Finally, if you feel the need to do a Milton Keynes style attack on some of our finest landscapes then consider further down the A3 corridor towards Guildford where the current car boot sale is held. This may give easier access onto the A3 by being on a straight stretch away from junctions and the damage to the landscape and environment is arguably more "acceptable" as it is arguably less polluting and gives a speedy access to the shops and facilities of Guildford and Burpham.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
3) The Garlick's Arch (Policy A43) proposal to build 400 houses and 7,000 sq. metres of light/ general industrial/ storage distribution space on the Green Belt.

**Comment ID:** PSLPS16/1321  **Respondent:** 15231137 / Martin Rossetti  **Agent:**
Re: Proposals for development in Normandy's Green Belt between Glaziers Lane & Westwood Lane, Guildford Borough Council (GBC) Draft Local Plan Site A46

We, as residents of Normandy, are writing to express our concerns and objections to the above proposals that are included in the draft structure plan for our village - proposals that include 1100 new houses, secondary school for 1500 pupils, primary school for 420 pupils, retail shops, showmen's pitches and yards, 60 bed residential or care home etc etc.

We object to the above proposals for the reasons below -

This area is green belt land, land for our enjoyment, open space, countryside, land full of wildlife, deer, hedgehogs, birds, foxes, badgers etc etc. Natural habitats and wildlife need to be protected, our area is a priority habitat under The Wildlife and Countryside act 1981 and the NERC act. We object to the erosion of our green belt land; green belt policy is about preventing urban sprawl by keeping land permanently open, the National Planning Policy Framework (NPPF) writes about openness and permanency, openness and permanency in our Surrey Hills Area an area of outstanding natural beauty ... we have a Surrey Hills sign less than half a mile from our house. The above proposals would destroy our green belt.

The proposals are disproportionate and would be an unsuitable development, a 100% increase in the number of homes in our village, the joining of Flexford and Normandy infilled with housing destroying the rural environment and taking away the free space between our hamlets. This area referred to as Site A46 is arable grade 3 pasture land, erosion of this free space will have devastating effects on our wildlife - where will they have to live? The proposed development will increase the urbanisation and joining of Guildford, Normandy, Flexford and Ash/Tongham areas.

Surrey County Council (SCC), we understand, recommended a development at Blackwell Farm site A26 for a number of reasons but in particular for reasons of accessibility in transport terms. Why has this been ignored in favour of this proposal A46? The site A46 proposals would cause complete and unworkable traffic chaos - our roads are gridlocked during rush hour times as it is, Guildford Road/Aldershot Road and the Hogs Back A31. We have a narrow humpback bridge with weight restrictions in Glaziers Lane over the railway and a single track bridge with the railway going over the top in Westwood Lane. The junction at the beginning of Glaziers Lane at the crossroads with the Guildford Road/Aldershot Road has been turned down for improvement due to lack of space, ditto the Westwood Lane junction at the Wyke Church of St Marks. These are both narrow country lanes totally unable to cope with the necessary construction traffic let alone the traffic generated by 1100 additional homes and the 2 proposed schools! In many places there is insufficient room to widen either of our country lanes, Glaziers Lane/Westwood Lane, there are Grade 2 listed buildings, 'Little Glaziers' for example which is close to the edge of the lane and would be severely impacted by any road widening proposals.

GBC objected to development on MOD land in Aldershot on grounds of insufficient capacity of our roads network, how can they therefore propose development here on the same limited road network?

The railway bridge in Westwood Lane would not permit double decker buses to pass under it and we question if it would be safe for the volume of school children on foot to pass under it with the current level of traffic let alone the increased volume due to the expansion of our villages/hamlets after the completion of the proposed development.

Wanborough railway station would only be a marginal advantage, the 2 stations either side of it are Ash Station and Guildford Main Station, any
school children would be far better served to attend the current primary and secondary schools in the main Guildford area or Ash Manor Secondary School and its surrounding primary schools.

Both Ash Manor School and Kings College are undersubscribed on pupil numbers, Kings College currently undersubscribed by 57%, 511 free places,
Ash Manor currently undersubscribed by 110 places so there is no need for a further secondary school in this area. There is the new Guildford University Technical College due to open in 2018 which will take 240 pupils from the age of 14 in its first year and will double to 480 places. Christ's College is currently taking 30 more pupils than its official quota as it has the spare capacity to absorb them. Connaught School is undersubscribed by 90 places, and the brand new Hoe Valley Free School that has only just opened last September is undersubscribed. Currently there are a total of 736 vacancies at the nearest secondary schools in the western parishes of Guildford plus the 480 technical college places, a total of 1216 free places at this time or in the very near future!

In addition, SCC have approved plans for the expansion of both the Guildford County School on the west side of Guildford and St Peters School in Merrow. Also the birth rate in this area has fallen, not increased in the last 2 years, and the recent EU referendum result will likely enable this country to place sustainable limits on future population increase due to migration from EU counties. There is no proven need for a secondary school in this area therefore no justification for housing in our Green Belt Land!

Services, electricity, gas, water, sewage etc. are all at capacity we have been informed, the top of Glaziers lane water pipe has continued to break presumably due to the increased pressure being put through the pipe at peak times to meet the increasing demand for this essential service to our existing housing. This couldn't cope with any further demands. The area between Glaziers And Westwood Lanes has a high water table and is prone to flooding, covering this area with concrete and tarmac will only make this problem worse and even if a need for a secondary school were proven, and we suggest it is not, it would need sports playing field facilities which would not be possible on this often water logged land. This land is the natural water course off the Hogs Back hill, an area as previously stated, of outstanding natural beauty in the Surrey Hills. The area has ancient and natural woodlands within it, these may be earmarked to be preserved within the proposals but how can they be enjoyed surrounded by concrete, bricks and tarmac. The wildlife won't be fooled into staying in an urbanised area just because we keep the woods and not the surrounding fields that we currently enjoy, the open space we moved here to live within.

To meet their quota for new housing GBC appear to be concentrating development to a small number of larger development sites. It would be much fairer and acceptable to all concerned to allocate, and share equally, development to all parishes within the borough rather than destroy large areas of our countryside. Using controlled, small scale, infilling within all of the parishes would preserve our beautiful countryside and the larger open spaces. This may mean that GBC need to look at increasing staffing levels in planning and building control departments, we accept this, but this could be a short term increase for 10 - 15 years whilst the larger number of smaller developments are being built, rather than the permanent destruction of our countryside and green belt. The needs and wishes of SCC and GBC residents need to be considered over and above GBC workload. A smaller number of large scale development sites makes work for GBC staff easier we accept but this is not an argument or reason to permit the permanent destruction and loss of our environment. Multiple smaller scale developments shared across all of the borough would be fair and just to all residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. The green belt is a major reason why many people invested in their property at significantly higher than average premiums. To carry out the plan in the affected locations will impact significantly and irreparably on many thousands of peoples lives with out them having real involvement in the planning or decision making. This is nothing short of dictatorial.

2. There is no concrete demonstration that the housing need is not met in the areas – any development would be of they type that would attract overspill from London and the suburbs to the areas and not be catering to local demand/requirement.

I trust my voice will be added to the thousands objecting.

- I OBJECT TO the disproportionate amount of development in one area of the Borough

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of up to 2100 dwellings

I object to the inclusion of the site formerly known as Wisley Airfield in the local plan as a possible site for the building of a large number of houses - basically a New Town. The planning committee have unanimously refused planning permission for houses to be built on that site so there is no reason to include it in the Local Plan. I object to the local council not making these reasons known - if there are any, which I doubt there are except possible financial considerations which have again not been made clear.

I object to the inclusion of the site formerly known as Wisley Airfield in the local plan as a possible site for the building of a large number of houses as 'localism', taking note of what the local people want, is supposed to be the new watchword in political circles especially after the Referendum vote showed exactly how out of touch the governors are with the governed. In this case the governed do not want a development on the airfield, Three Farm meadows, as particularly evidenced by the unusually high rejection of the people to the inclusion of it in the local plan. If the Council continue to fly in the face of local wishes they too will in the end suffer at the hands of the electorate in the same way as the Government did at their hands.

I object to the detrimental impact on transport, local roads and road safety. I specifically object to the proposition that the development will result in a meaningful shift to cycling and walking. The development is miles from anywhere and the residents will be entirely reliant on their cars to get about as there are no transport links of any kind except narrow roads and the enormously busy M25/A3 junction, which could not stand an influx of thousands of extra cars. There have in my experience in the last month already been two accidents on the section of the A3 between the M25 and the Wisley Roundabout and that is with the present amount of traffic.

Because the Olympic Cycle race and the Prudential Ride London-Surrey cycle race come through Ripley and past Ockham and Horsley, Cyclists are encouraged to cycle throughout this area and the number of cyclists on these narrow roads has increased dramatically especially in Saturday mornings, the favoured shopping time for most people, when large phalanxes of cyclist can be seen racing down the narrow lanes covering them from hedgerow to hedgerow. I object to the addition of any extra cars that will be a massive danger to these cyclists and discourage cycling in direct contravention of the governments aim to encourage it.

Wisley Gardens has proposed an expansion which will increase visitor traffic more than it stands today and so I object to any proposal that will increase the traffic any further and put an already over populated road junction under even greater strain making long stationary queues a probable permanent feature of this junction. Come and see what five thousand extra people visiting Wisley Gardens on special event days does to the M25/A3 junction as well as The Ripley Roundabout.

I object to the detrimental effect the development would have on there character of the area, what I believe the planners refer to as 'street scene'. ALL houses in Ockham, the nearest village, are old, vernacular, set back from the road, built in hollows or behind trees, are a maximum of two stories, with perhaps and attic conversion, and very sparsely arranged in terms of number of houses per hectare. This development is scheduled for the crest of a
It is urban in nature, has a population density equal to or greater than the most congested parts of London and will have living units up to five stories high; twice the height of anything in the area.

I object to the fact that even though the local people (those living in Ripley, Ockham, Wisley, and the Horsleys) do not want it, even though the planning committee have unanimously rejected it, STILL the Council are fighting tooth and nail to have it included in the Local Plan. Why?? As the ubiquitous phrase would have it - 'Follow the money'.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4051  Respondent: 15232513 / Barnaby Lawrence  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of Three Farms Meadows (otherwise known as Wisley Airfield) Development in the Local Plan and would like it removed.

I object to the fact that it is in the wrong place as it will be under the pollution cloud from M25 Junction10, it is constrained by ill-equipped country lanes, SSSIs, lack of public transport links.

I object to the injection of thousands more cars into transport links that are already often subject to overcrowding especially on warm sunny days when everybody and his wife visits Wisely Gardens and they intend to increase their visitor numbers.

I object to being too big and aggressively impacts the openness of the Green Blet, by being built high, along the skyline and to use the Council's own phraseology is of too great a 'Bulk and Mass'.

I object to the fact that the Council has no justification for removing the land from the Green Blet except that they want to.

I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

I object that only a portion of the plan is being considered when it should be the totality of the plan that is under consideration. The Council have given to reasons for this when the changes are major changes.

I object to the Council ignoring the thousands of objections from private individuals and also the objections from statutory bodies requesting the removal of the site from the plan.

I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

I object to the fact that the plan would appear to be full of inaccuracies - eg. in one part of the document the started number of houses is 12,426 and yet when the figures in the table are added up the total is 9,810. It is therefore not possible to consider the plan until it is presented accurately otherwise it is open to misinterpretation and challenge upon challenge because its foundation is so weak.
I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose. There are many many more objections to which I would add my name, but I have already done so over and over again and I am getting really really fed up with being forced to over and over again object and object and object.

The development is basically unsound and purely speculative and anyone who has no ulterior motive can see it.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to highlight my objections to the new Guildford Borough local development plan recently published.

Permanent Damage To Green Belt; I object to the expansion of the Horsley village boundaries and its subsequent removal including Ripley, Send and Clandon from the greenbelt. There are insufficient details and or evidence within the local plan to support why this action is necessary and as such I strongly object to this recommendation. All this is doing is permanently destroying the greenbelt unnecessarily without any due care or attention to the consequences.

Disproportioned Number of New Houses For Local Facilities; I strongly object to the number of new houses being proposed. In particular within the Horsley, the schools, doctors and train stations are struggling to cope with current demand let alone the addition of circa 500 new houses in the area which on average would equate to another 1100 people using the local facilities.

Pollution; I object to the number of new houses being built on the grounds that the level of additional traffic and therefore unnecessary pollution will be substantial. Adding 2,000 houses at Gosden Hill farm, 2,000 at Wisley, 500 in Horsley, 400 houses at Garlicks Arch will have a significant impact on the environment due to the car pollution, both fumes and noise, that will be generated.

The proposed development plan is over kill and as such is directly out of proportion to the size and availability of brown field sites available for development.

I would ask that the council consider my objections and avoid destroying the Borough's green belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The site known as ‘Send Business Centre’ comprises the main building complex to the north of Tannery Lane comprising some 7,400sqm floorspace, the industrial curtilage to its west, the car and truck park and storage to the south of Tannery Lane and the island to the north of the complex between the Canal and the New Cut; in all approximately 3.2ha (8 acres).

The site has been used for industrial purposes for over 200 years originally as a tannery. The present owners were tenants in 1939 and purchased the freehold in 1948, moving to Send at the outbreak of World War 2 on 5th September 1939. This was due to an explosion and fire at their existing plant in Arbutus Street, London which required the owners to find a new factory site.

At that time, most of the site was operated as a tannery processing rabbit skins. Following the purchase of the site’s freehold in 1949, the original tannery was gradually closed and the whole site turned over to the manufacture and processing initially of gum and resins to meet supply contracts with the MOD, the Admiralty, and Ministry of Food. Due to war shortages, goods arrived both by lorry and barge from the London docks and were unloaded along the site’s wharf for processing on the Island due to the contaminative nature.

After the war the site operated principally as a chemical grinding and milling works. These heavy industrial operations continued in tandem with other business uses of the site up until about 5 years ago, when the manufacturing operations ceased and moved to Teeside, thus freeing up the whole of the site to be used as a Business Centre.

The house known as Cheriton and its former garden has been part of the curtilage of the site since the last war and a barge dock was excavated into the former garden of Cheriton to facilitate barge turnarounds and loading. It was also used to transport Gum Damar to and from the northern site’s island curtilage for processing in one of the company’s industrial stills. The iron framework of the still remains in situ on the land forming part of the curtilage of the site between the River Wey Navigation canal and the New Cut. The still was operated remotely from the rest of the buildings due to the hazardous nature of the processes as volatile solvents were used in the process.

The area for the future expansion of the Business Centre therefore originally comprised ‘Cheriton’ a house and its former garden that was brought into the industrial complex and additional land to the west acquired in 1961. The former garden to Cheriton was used to extend and improve the wharf whilst the house provided lodgings for German and Italian prisoners of war working as indent labour on site. When the post war economic conditions improved in the 1970s and housing and labour became more freely available, Cheriton was occupied by the site’s security guard and factory foreman as part of the 24/7 manufacturing operations whilst its former garden continued to be used for industrial operations.

The open land adjacent to and west of Cheriton that was acquired by the company in 1961 was used to store pallets, burn surplus packaging and as open storage. This land had its western boundary planted with cypress trees to screen the open storage and industrial operations from the village in the 1960s and the road frontage was also fenced shortly after its acquisition. In order for it to be used as part of the industrial complex, large areas of hardstanding and road planings were put down to enable forklift access to move pallets and redundant packaging out of the works for disposal or to be burnt on the open land. The area is subject to low grade, but non-migratory, contamination as the result of its long term continuous use for pallet storage and waste consolidation and disposal and incineration. This land is still in use today as open storage, car parking and the hardstanding also provides access to the recently refurbished and enlarged barge dock granted planning permission in 2016. It is also used as an entrance for Tannery Studios by HGV construction vehicles.

That part of the site immediately adjacent to and south of Tannery Lane has been used as car and truck parking, open storage for pallets, chemical drums, packing and containerised goods for the entire length of time since planning consent was granted for it in 1961.

Over the years of ownership a wide range of planning applications have been made over the entire site’s curtilage varying from replacement buildings, car parking, etc. In 2006 permission to realign Tannery Lane to the site’s southern boundary...
was granted so that the entire complex can be operated without Tannery Lane running through the middle. This consent is still extant since a lawful start was made on the re-aligned road and correspondence with the council confirmed that to be the case. The company plans to complete the road re-alignment as soon as it has sufficient funds to do so to complete the consolidation of the site’s entire 3.2ha (8 acre site).

Send Business Centre presently provides for the employment needs for a range of start-ups and innovative business as well as more established companies. The site is focussing on the fast-growing creative digital sector with a view to providing a regional hub to meet the demand from the unique local supply chain of companies as well as liaison of the self-employed creative sector activities such as studios, video, sound & post production and app development. Moreover, LEP funding has already improved fibre infrastructure and promote innovation support at the site.

An important part of Send Business Centre is Tannery Studios (TS). TS is collaborating with both Enterprise M3 LEP and the Surrey Research Park based start-up incubator ‘Set Squared’ to develop TS’ facilities into a globally significant hub specialising in digital media / creative companies. Successful companies at TS will interact with locally based companies such as Guildford’s EA Games, thereby benefitting the Borough. However, site capacity within the existing buildings will be reached shortly and there is a need to provide much needed additional space to reflect the LEP priority of Digital employment in a sector that Guildford is especially strong.

TS already has numerous innovative and expanding companies such as:
• Lifelines Limited, a recipient of the Queens Award for Commerce;
• Tactic Games, the sales agent of the Angry Birds game;
• Ben Preston, the producer for Rhianna and music for the Harry Potter Films
• Alemba – VM software

The demand for multi-purpose studio space is forecast to grow exponentially due to demand from onsite companies and the localised supply chain. Send Business Centre extends to some 3.2ha, and comprises over 7,400 sqm of B1 and R&D employment floorspace. The Local Plan refers to ‘Strategic Sites’ as those that account for over 100 jobs. By comparison, Send Business Centre presently employs 195 people and is therefore well above the minimum parameters for being designated as a ‘Strategically Important Site’ in the Local Plan. Moreover, as referred to above, it is the home of a number of innovative and expanding companies who provide local employment and contribute significantly to the local borough and national economies.

The appeal of Send Business Centre is demonstrated by research that the creative businesses prefer “interesting space” over traditional office stock. Send Business Centre has played to its unique strength of canal views and is also developing its green credentials to attract the next generation of millennials and the creative class.

Send Business Centre is a major recipient of The Enterprise M3 Local Enterprise Partnership (LEP) support and Government funding through the LEP. In 2013, the Enterprise M3 LEP Board decided to proceed with two projects as being recipients of a total of £6.8M funding, Tannery Studios - which is an integral part of Send Business Centre - was one of the two recipients. The allocated £1.3 million is being used to create a purpose built 1,900 sq. m Innovation Centre at Send Business Centre that will deliver a range of bespoke facilities specifically designed to support the needs of high growth creative companies. The facilities will include video studios, sound studios, a live room, editing suites, innovation units and offices which will benefit local ACM and University of Surrey’s Tonmeister Course graduates. Additionally, Guildford’s recognised world strength in the computer games industry through ties to TIGA and the fast-growing audio-visual creative sector.

Commenting on this project Geoff French, Chair of the Enterprise M3 Board, said: “I am very pleased to announce that the Enterprise M3 Board has approved a further two projects to receive funding from our Growing Enterprise Fund. These projects are very exciting examples of what both the private and public sector are doing in the Enterprise M3 area to stimulate long-term economic growth. In our Strategy for Growth, the LEP has identified four key priority areas – enterprise, skills, innovation and infrastructure – that we will be addressing to deliver economic growth in the Enterprise M3 area. Both of these two successful bids that we are announcing today is focused on at least one of these areas and therefore is a very worthy recipient of Growing Enterprise Fund funding.” This all points to the strategic importance of Send Business Centre and reinforces the need for it to be recognised as such. Not only does it provide significant floor space and jobs well in excess of the requirements of the
Local Plan but perhaps it is how that space has been and will be continued to be used that justifies its inclusion as a Strategic site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send Marsh/ Burnt Common

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Analysis
There is an acknowledged lack of suitable and diverse employment sites that discourages investment from new companies in the Borough and encourages existing firms to relocate to other parts of the UK or overseas. Moreover, the lack of supply is hampering the aspirations of ‘start-up’ businesses. Accordingly, it is right to look at potential land, including those sites in the countryside that provide for sustainable development locations and provide enough employment land to meet the expected employment needs of existing and new residents. This is particularly the case where a number of established employment sites in the countryside can provide for sustainable expansion without harming countryside interests. The rural wards of the Borough accounted for almost half of the new jobs created in Guildford Borough between 2002 and 2008 according to the Guildford Economic Strategy 2011 - 2031.

In the short term, the need for employment land may be met through the intensification and redevelopment of existing sites and the protection of employment use on key strategic sites. This relates to both urban sites and established employment sites in the countryside. In this regard, it is anticipated that with the more efficient use of the existing space at Send Business Centre that a limited amount of more modern space can be made available. However, it is acknowledged by the research undertaken that this and similar sites elsewhere are unlikely to be sufficient in the medium to long-term and does not allow for any choice for potential occupiers or flexibility within the digital studio market. The land on the western side of Send Business Centre is therefore ideally placed to provide choice for businesses to start up as well as supporting existing businesses to expand. Such expansion would be in accordance with para 3.35 of the previously published Local Plan Strategy and Sites Issues and Options paper that advised “…. the Local Plan needs to continue to support job creation and business in rural areas.”

The case for expansion of Send Business Centre and Tannery Studios is:
• the shortage of the specialist studio facilities within the borough and wider afield to meet identified demand
• the need for Tannery Studios to improve its production facilities to meet that demand
• the potential of Tannery Studios in providing for growth
• the pool of expertise and facilities already present at Tannery Studios
• the economic benefits of employment particularly job creation builds on an area which Guildford is already particularly strong and foresees expansion in the years to come with a projected growth of the digital film, television and throughout the media industry
• Government’s policy of supporting sustainable economic growth and support for the creative industries
• the existing legacy electrical infrastructure from the site’s manufacturing history offers the large scale resilient power required for lighting and digital storage. The site also offers resilient fibre having invested heavily in two alternative internet routings.

The planned expansion onto the site’s western curtilage is likely to provide in the order of an additional 6,500sqm (70,000 sqft) of business space as outlined in the Design Principles below.
Key Design Principles

The western part of the site is generally flat, is not liable to flood and as referred to above has formed part of the industrial complex for many decades. It is bounded on its northern side by the canal, its eastern side by the existing built complex, Tannery Lane to the south and a belt of trees along its western boundary.

Beyond the western boundary, construction has commenced implementing planning permission for a new marina, chandlery buildings and car park for 70 cars. The proximity of the canal (which forms part of a conservation area), the site’s location within the Green Belt and adjoining and adjacent land uses and feature have all informed the layout of the proposed expansion of the site. Wey Estates Ltd. are in discussions with the owners of the marina development to collaborate with this development with the objective of making use of their permitted dual use 70 space car park in connection with Send Business Centre thus meeting sustainability objectives whilst minimising demands for car parking in the Green Belt and allowing a safe cycle route through both sites.

Since there are well founded policies in the Development Plan to resist the loss of residential buildings, Cheriton is to be relocated to a more appropriate location on the edge of the site and thus there will be no loss of residential accommodation.

Buildings

The council have recently issued a Lawful Development Certificate for external and internal improvements to the existing Business Centre complex for use as design studios and other related facilities. This will bring into use some additional 1,900sqm (20,500 sq ft) redundant and underused space within the existing built complex.

As to the expansion of the Business Centre onto its adjoining site, the Masterplan envisages that this can provide an additional 6,500 sqm (70,000 sq ft) of new business space, primarily used in connection with Tannery Studios contained within 8 separate but linked buildings to provide flexible accommodation to future tenants but with an emphasis on the space being used to provide bespoke facilities specifically designed to support the needs of high growth creative companies associated with the digital sector. The new space will therefore cater primarily for this sector providing:

- the production of web-based video and sound content
- film production
- television productions
- video games and digital content services
- sound post production and additional studios
- music

over and above what are presently planned within the refurbished buildings which can only offer small floor plates below 2,500 sq. ft. Together with the refurbished space means that the site can deliver a significant and strategic component to the Borough’s specialist employment needs which is not met elsewhere within the borough.

The expansion space will predominately be 80% to 90% either Class B1 and R&D business uses. A small ancillary use of sui generis, and/or class D will provide amenities such as a yoga studio / staff gymnasium or public / exhibition space / crèche or nursery. Having regard to its countryside and Green Belt location, the proposed units will be linked will by glass atriums thus allowing views between and around the buildings. In terms of built ‘footprint’ there will only be 20.5% site coverage by business buildings meaning that approximately 80% of the site will be free of buildings thus maintaining as far as possible the openness of the site.

In terms of the bulk and scale of the buildings it is anticipated that the accommodation can be contained in a mix of two and three floors and it is anticipated that the buildings will not need to exceed the height of the existing buildings on site.

The architects have arranged the accommodation in such a way to maintain the ‘canal-side’ setting of the existing buildings with the footpath adjacent to the wharf and new barge dock extended along the canal side to the extent of the site boundary.

Landscaping will be an important component of the Masterplan. Not only will the site boundaries be soft landscaped with indigenous broadleaf trees and hedgerows but the parking and turning areas will similarly be soft landscaped cognisant of the site’s semi-rural location. Movement

The site is located some 600m north east of the A247 through Send and is reached via Tannery Lane. The first half of the route from the junction with A247 has commercial and residential frontages but then the road becomes a rural lane with hedgerows on both sides. There is an existing (unsurfaced) public footpath which runs along the south eastern side of this section of Tannery Lane, beyond the roadside hedgerow.
The existing business park development comprises some 7,400sqm of employment floor space currently in B1 and R&D type uses. The site employs a minimum of 195 people and there are approximately 170 car parking spaces. Tannery Lane runs effectively through the middle of the site being immediately adjacent to the buildings and between the buildings and the car parking. Due to the site’s historical B2 and B8 uses, it continues to generate a significant number of HGV movements every day, although HGV use is declining as the site moves to business within the B1 and R&D classes.

Because Tannery Lane effectively divides the existing business park site into two, it compromises the owners’ ability to develop and improve the site in a comprehensive manner. Accordingly, planning permission was obtained to divert that section of Tannery Lane to a new alignment running along the south eastern boundary of the site. That consent remains extant because a lawful start was made on its construction and a Lawful Development Certificate was issued at that time by the Council. The company plans to complete the road realignment when it has sufficient funds to do so as part of the consolidation of the entire site. This would improve the overall efficiency and safety of Tannery Lane through that section of the highway.

A requirement of the road realignment consent is that the length of the existing Tannery Lane which becomes bypassed should be formally stopped up. The land will then revert to the company’s ownership and can be incorporated into future improvements of the site. The current Master Plan is based upon a minor adjustment to the alignment of the proposed new section of road, moving it a small distance to the south east so as to maximise the site. Access into the Master Plan area will remain in the same location, however, as on the currently approved road realignment scheme.

The latest Master Plan layout drawings indicate an expansion of some 6,500sqm gross floor space for the Business Park and an additional 200 or so car parking spaces. Whilst that level of car parking provision is a little below the Council’s parking standards (one space per 30sqm) comparison with the existing use of the Business Park site indicates that what is proposed will be sufficient to meet demand. Moreover, the owners are collaborating with the developers of the adjoining site such that there is a likelihood that an additional 70 spaces will be available for use in connection with the Business Park.

The current floor area of 7,400sqm has 170 car parking spaces associated with it and experience proves that this is sufficient to meet the demand. That level of car parking is a ratio of one space per 44sqm. The 200 car parking spaces proposed with the new floor area of 6,500sqm is a ratio of one space per 33sqm, and the resulting car parking provision for the expanded Business Park as a whole (comprising a total of 14,530sqm with 370 car parking spaces) is a ratio of one space per 39sqm (leaving aside the additional 70 spaces on the adjoining site). That is an increase of some 16% in the parking ratio compared with the current provision.

The new development will, of course, incorporate a range of effective travel planning measures to reduce car usage, together with cycle parking in accordance with the Council’s standards.

As previously described the site is some 600m from A247 in Send where there are hourly bus services operating between Woking and Guildford. The site is also just 4.3km from Clandon Railway Station which operates four trains per hour in each direction between Guildford and London Waterloo, as well as being approximately 5km from the major rail interchange at Woking where there are some 15 trains per hour to London Waterloo at peak times. Both of those stations are within comfortable cycling distance of the site and offer opportunities for people to get to and from work without using cars. The site already has in place a green travel plan and is in discussions with another employment site in Send regarding running a peak hour direct bus service to Woking and Guildford city centres. The majority of car trips generated by the existing Business Park travel via Tannery Lane to and from the A247 at Send. Although much of this section of Tannery Lane is a narrow rural road it accommodates the existing levels of traffic without undue difficulty. There have been no injury accidents along that section of Tannery Lane between the Business Park and the A247 junction or in the car park adjoining Tannery Lane during the last five years. As part of the Master Plan proposals it is intended that improvements will be carried out to the extent that this is feasible within the existing highway boundaries and these measures will improve forward visibility around bends and create passing bays.

Whether or not improvements are required at the junction of Tannery Lane with A247 will depend upon the outcome of a detail Transport Assessment. Previous development proposals for the wider area demonstrated that practical measures to improve capacity and safety can be achieved at the junction if justified. The proposal is likely to reduce the demands of HGV’s as the businesses that would occupy the newly designed buildings would be more R&D based rather than industrial. Access is likely to be primarily from the A247. Deliverability and Phasing
The first phase of the improvements to Send Business Centre by bringing back into use the redundant space is presently under way and it is anticipated that this will be completed by 2018.

In terms of phasing the new build units on the open land to the west, it is anticipated that this would be phased over a 10 year period, commencing in 2020 thus ensuring the deliverability of the employment space within the currency of the Local Plan by 2030.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We are concerned with the inference given in Policy E2 that there will be some form of ‘sequential test’ in considering proposals for employment development on designated Strategic Employment Sites (unless it is for development of less than 200sqm). This is at odds with other parts of the Employment policies. If otherwise acceptable proposals come forward on a Strategic Employment Site, why should such proposals need to be ‘sequentially tested’?

For example, Send Business Centre provides for the creation and development of small and local businesses by encouraging a range of types and sizes of new premises including incubator units, managed workspace and serviced office accommodation – precisely the type of business accommodation identified under Policy E1(3) that the Plan says: ‘will be supported’.

Similarly, Policy E5(1)(a) says the sustainable growth and expansion of all types of business and enterprise in rural areas
will be supported, through inter alia provision of well-designed new buildings of appropriate scale, provided they are in accordance with (where relevant, green belt policy) and other policies in the plan.

Furthermore, it is noted that Industrial, warehousing and storage development is not ‘sequentially tested’. (see Policy E2(5). We believe that if employment proposals otherwise meet with other policies in the Plan, then there is no need to sequentially test employment development on Strategic Employment Sites.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

We support the change to the Policy Map that indicates that Send Business Park is now inset from the Green Belt. The extent of the land inset from the Green Belt is broadly contiguous with the long established industrial curtilage of these business premises and which has been used initially for industrial and latterly for a wider range of business purposes for very many years. This is elaborated further in the attached Masterplan for Send Business Centre that was prepared at the request of the Borough Council in January of this year and which the subsequent Employment Topic Paper commented: 

"Initial master planning ideas show sensitive design to complement the surroundings.”

There has been concerns expressed by some local residents over the proposed change to the Policy Map in relation to Send Business Centre, these focussing on:

- **It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation**
- **There is highly restricted vehicular access along Tannery Lane in both directions**
- **Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate**

Looking at each of these concerns in turn, we would like to comment as follows:

**It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation**

In response to these concerns it is right to say that the business complex has been established at the site for many years: indeed, industrial activity at this site has continued without a break over the past 200 years or so. The premises - and the local / village employment it brings - has therefore served the local community and the rest of the borough since time immemorial. Whilst it is acknowledged that local people value the attractive appearance of the surrounding countryside, by any reasonable test the same could not be said of the appearance of the site and its curtilage which is used for car parking, open storage and industrial buildings. Nevertheless, change can be the impetus for improvements: the land between the canal and the River Wey is also within the ownership of SBC and is testament as to how the present owners have invested in improving the appearance of the site in collaboration with The National Trust such as the public garden the owners have installed by Tanyards Bridge. These improvements are set to continue if the proposal to inset the site from the Green Belt is confirmed with opportunities for further improvements and landscaping of the site. The recently published (July 2017) Rural Economic Strategy for the Borough specifically identifies Send Business Centre where improvements are being made. Page 25 of the Strategy highlights the site as a Case Study commenting as follows:
“There is a strongly supportive and sustainable rural business and community atmosphere among current tenants and, with funding support from the Enterprise M3 Local Enterprise Partnership, the family owners are bringing to fruition ambitious plans to develop a creative hub hosting hi-tech film and video studio and post-production facilities. Collaboration with the National Trust has resulted in canal-side improvements that are being further enhanced by the building of a marina to provide moorings away from the main waterway”. (see page 25 Rural Economic Strategy published by Guildford Borough Council, July 2017).

There is highly restricted vehicular access along Tannery Lane in both directions.

As to the vehicular access to the site along Tannery Lane, this issue has been specifically addressed by highway experts Bellamy Roberts who have been advising the owners regarding access and traffic issues and is referred to in detail in the accompanying Masterplan under the heading ‘Movement’. In this regard, it is important to point out that:

1. Historically, the site generated significant HGV movements in the past associated with the previous industrial processes that were carried out on site. Due to the site’s historical B2 and B8 uses, it continues to generate a significant number of HGV movements every day, although HGV use is declining as the site moves to business within the B1 and R&D classes.

2. Planning permission was obtained to divert a section of Tannery Lane to a new alignment running along the south-eastern boundary of the site. That consent remains extant because a lawful start was made on its construction and a Lawful Development Certificate was issued at that time by the Council. The company plans to complete the road realignment when it has sufficient funds to do so as part of the consolidation of the entire site. When completed this will bring about significant improvement to highway and pedestrian safety.

3. The site already has in place a green travel plan and is in discussions with another employment site in Send regarding running a peak hour direct bus service to Woking and Guildford city centres. The new development will incorporate a range of effective travel planning measures to reduce car usage, together with cycle parking in accordance with the Council’s standards.

4. Although much of this section of Tannery Lane is a narrow rural road it accommodates the existing levels of traffic without undue difficulty. There have been no injury accidents along that section of Tannery Lane between the Business Park and the A247 junction or in the car park adjoining Tannery Lane during the last five years. As part of the Master Plan proposals it is intended that improvements will be carried out to the extent that this is feasible within the existing highway boundaries and these measures will improve forward visibility around bends and create passing bays.

5. Furthermore, additional improvements are likely to take place at the junction of Tannery Lane and the A247 arising from other developments within the village.

Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

It is acknowledged that additional buildings will be associated with the planned expansion on the adjoining ‘curtilage’ land. Nevertheless, as acknowledged by the council, “the Initial master planning ideas show sensitive design to complement the surroundings.” Moreover, NPPF acknowledges that the limited infilling or the partial or complete redevelopment of previously developed sites (brownfield land) such as Send Business Centre can be considered to be appropriate development in a Green Belt provided that certain conditions are met.

The council are however, taking the correct approach by ‘insetting’ the site from the Green Belt acknowledging not only the fact that the site has over the past two centuries performed an important role in providing much need employment for local people but that it can perform perhaps a more important role in the future by, for example, continuing to provide low-cost serviced office space with high-speed broadband access, with many of the existing companies have been supported from a great range of industries, with occupiers including Queens Award winners in healthtech, finance, property, insurance companies and start-ups. The site’s current focus is the creative digital creative sector: a key building block in the Borough’s economic growth.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
We would like to make the following comments in relation to the updated Employment Topic Paper that was published at the same time as the amendments to the proposed new Local Plan.

In relation to paras 4.43-4.49 dealing with Send Business Centre and Tannery Studios, Tannery Lane, Send the following points are made:

1. At para 4.43 it is wrong to suggest that the 1.4 ha site identified in the earlier draft Local Plan is “undeveloped”. With reference to the Masterplan accompanying these representations it is clear that the land in question has been long established as part of the curtilage of the business premises and continues to provide important functions in connection with Send Business Centre such as for storage and access to the wharf: indeed there are already a number of buildings on the site already.

2. In both Topic Papers there is reference to the site previously being located in ‘high sensitivity green belt’ although the Plan now acknowledges that due to the unique circumstances that arise in the case of Send Business Centre, the site is suitable to be inset from the Green Belt. We question however, the initial assessment of the site’s location being ‘highly sensitive’, given that the site is sandwiched between 2 landfill sites from former mining operations. It is of course not a definition used in NPPF or other guidance from the Government regarding Green Belts. Moreover, it is neither within the AONB or AGLV and as referred to above part of the curtilage of long established industrial premises immediately adjacent to extensive former and worked out gravel quarries. In the circumstances, we believe it is wrong to describe the Green Belt hereabouts as ‘high sensitivity’. If it is based upon a subjective assessment on the purposes of including land within the Green Belt, then clearly the site today performs poorly in that regard since it is already substantially developed, its expansion will not lead to the merging of settlements (the nearest settlement to Send is Old Woking, but this is located to the north and separated from the site by extensive areas of undeveloped land), nor will it lead to encroachment onto the adjoining countryside since the site is contained within the curtilage of the existing business complex.

3. Para 4.47 of the Employment Topic Paper says that “There are existing buildings on the site, mainly unused.” On the contrary, all the buildings at Send Business Centre are fully occupied (other than a limited number of units presently being refurbished). The Masterplan explains why there is a need to provide additional accommodation to meet the demand from both existing and new tenants looking to either expand or relocate to SBC (see representations above and references in the Rural Economic Strategy).

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am Michael Hamburger and have been both a director and shareholder of the companies occupying the site for over 40 years. I am now aged 72 and spent much of my childhood playing on the site and observed first-hand the industrial use and evolution of the entire site's curtilage since my childhood.

The curtilage of what is known as Send Business Centre comprises the main former works to the north of Tannery Lane of some 80,000 sq.ft of buildings, mainly open storage land to the rear and side of Cheriton; the car and truck park to the south and opposite the main factory complex and the island to the north of the works between the Canal and the New Cut; in all approximately 9 acres. (Cheriton, a dwellinghouse, is now no longer part of the industrial curtilage).

My family's business was initially a tenant of the site and first occupied the land in 1939. The freehold was purchased in 1948 during which time it had operated as a chemical grinding and milling works. This use continued for over 60 years until 2008 when our manufacturing operations moved to Teesside. Since then it has operated as, and is now known as 'Send Business Centre'.

We originally moved to Send at the outbreak of World War 2 on 5th September 1939. This relocation occurred due to an explosion and fire at our previous plant in Arbutus Street, London. The family needed a new factory site and decided on Send, at that time most of the Tannery Lane site operated as a tannery processing rabbit skins. The island section of the site's curtilage was in use from the seventeenth century up to the 1950s for lagoon settlement pits for the fleshings resulting from degreasing the rabbit skins prior to tanning.
Following our purchase of the site's freehold, we gradually closed the original tannery and turned the whole site over to the manufacture and processing of initially gum and resins to meet supply contracts with the MOD, the Admiralty and Ministry of Food. Due to war shortages, goods arrived both by lorry and barge from the London docks and were unloaded along the site's wharf for processing.

The site's current built footprint replaced the outworn wood and brick tannery buildings over a 20- year period terminating in the 1970s. Following the rebuild the site was used for processing agrochemicals such as herbicides and biocides.

The house known as 'Cheriton' was part of the site curtilage since the 1930s. Cheriton's curtilage originally extended down to the canal, but this was much reduced in size when the company decided to excavate and extend the barge dock to receive goods and facilitate barge turnarounds in the 1960s. The former curtilage of Cheriton was also needed to transport Gum Damar to and from the 'island' for processing in one of the company's industrial stills. The iron frame work of the Still is still present on the land forming part of the curtilage of the site between the River Wey Navigation canal and the New Cut (the island site). The Still was operated remotely from the rest of the buildings due to the hazardous nature of the processes as volatile solvents were used in the process.

The brickwork and iron structure of the 'Still' is still visible today on the island

Due to labour shortages during the War, Cheriton was used to provide lodgings for German and Italian prisoners of war working as indent labour on site. When post-war economic conditions improved in the 1970s and housing and labour became more freely available, Cheriton was occupied by our site's security guard and factory foreman as part of the 24/7 manufacturing operations but now on a much reduced curtilage. We retain ownership of the curtilage round Cheriton including the lawn and drive, to enable the new road to be built.

In 1961 the company needed additional land to expand the industrial processes and land immediately to the west of Cheriton was acquired for this purpose, primarily for open storage. Also in 1961 other land was acquired opposite (south) of the main factory complex for parking both of motor cars and the heavy commercial vehicles associated with bringing goods to and from the site. Planning permission was obtained to use this land for parking and it was hard surfaced.

The car park and container storage area, the permitted re-alignment of Tannery Lane runs behind the containers and car park

This part of the industrial curtilage to the south (opposite) the main factory complex of the site has been used for HGV parking as well as for open storage for pallets, chemical drums, and packing and containerised goods for the entire length of time since planning was granted back in 1961. Put simply, the site in its present use as a Business Centre and its previous use as a chemical processing mill would not have been viable without this land since it was the main parking and pallet/container storage area serving the site. The same could be said for the open storage area west of Cheriton.

In 1995 an additional small triangle of land was acquired adjacent to the car park/storage area to enable Tannery Lane to be moved to the south of the car park to improve the site's safe operation. Planning permission was applied for and granted for the realignment of Tannery Lane demonstrating the land to the south of Tannery lane was and remains part of the site's curtilage. The aerial photos below dating from over an extended period of time shows the historic use of the entire site's curtilage.

Note the open storage on the curtilage land west of Cheriton and the temporary structures on the same land in the photo below

The land acquired in 1961 west of Cheriton had its western boundary planted with cypress trees to screen the open storage and industrial operations from the village in the 1960s (see the photo immediately below showing the cypress tree sc
The road frontage was also fenced shortly after its acquisition. This part of the company's land holdings has consistently been used as part of the site's industrial and business operations to date.

Entrance to the Cheriton curtilage buildings occupied by Complete Building Solutions Ltd.

In the mid-1960s large areas of hardstanding and road planings were laid to enable forklift access to move pallets and redundant packaging out of the works for disposal or to be burnt on the site. This is very evident in the first of the aerial photos above. These operations, together with the periodic renewal and maintenance of the hard surface continued up until 2008 when the chemical grinding and milling works relocated to Teesside. The area is subject to low grade non-migratory contamination as the result of its long term continuous use for pallet storage and waste consolidation and disposal and incineration. Since 2010, this part of the site has remained in use as parking and open storage. The hardstanding also provides much needed access to the newly improved barge dock for which planning permission was granted in 2015 to be further enlarged and improved. It also functions as a secure fire escape from the rear of the buildings.

Over the years of ownership, a wide range of planning applications have been made over the entire site's curtilage varying from a helicopter landing pad on the open storage land adjacent to Cheriton to a planning consent to realign Tannery Lane to the site southern boundary so that the entire curtilage can be operated as one unit without Tannery Lane running through the middle. This consent is still extant since the council has subsequently agreed that a lawful start on it was made. The company plans to complete the road re-alignment as soon as it has sufficient funds to do so to complete the consolidation of the site's entire 9 acre curtilage.

*It has just occurred to us that you may wish us to explicitly state that in our view the Submission Plan is unsound although that would of course be obvious from the representations we have made. I would also add that we are happy to attend and make oral submissions to the Inspector if he feels that would be helpful to him in considering the points we raise.*

Policy E1: Meeting employment needs

We support the inclusion of Send Business Centre as a Strategic Employment Site as part of Policy E1(5) and its designation on the Policies Map.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
We are concerned with the inference given in Policy E2 that there will be some form of ‘sequential test’ in considering proposals for employment development on designated Strategic Employment Sites (unless it is for development of less than 200sqm). This is at odds with other parts of the Employment policies. If otherwise acceptable proposals come forward on a Strategic Employment Site, why should such proposals need to be ‘sequentially tested’?

For example, Send Business Centre provides for the creation and development of small and local businesses by encouraging a range of types and sizes of new premises including incubator units, managed workspace and serviced office accommodation – precisely the type of business accommodation identified under Policy E1(3) that the Plan says: ‘will be supported’.

Similarly, Policy E5(1)(a) says the sustainable growth and expansion of all types of business and enterprise in rural areas will be supported, through inter alia provision of well-designed new buildings of appropriate scale, provided they are in accordance with (where relevant, green belt policy) and other policies in the plan.

Furthermore, it is noted that Industrial, warehousing and storage development is not ‘sequentially tested’. (see Policy E2(5).

We believe that if employment proposals otherwise meet with other policies in the Plan, then there is no need to sequentially test employment development on Strategic Employment Sites.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2 Green Belt

We support the change to the Policy Map that indicates that Send Business Park is now inset from the Green Belt. The extent of the land inset from the Green Belt is broadly contiguous with the long established industrial curtilage of these business premises and which has been used initially for industrial and latterly for a wider range of business purposes for very many years. This is elaborated further in the attached Masterplan for Send Business Centre that was prepared at the request of the Borough Council in January of this year and which the subsequent Employment Topic Paper commented: “Initial master planning ideas show sensitive design to complement the surroundings.”

There has been concerns expressed by some local residents over the proposed change to the Policy Map in relation to Send Business Centre, these focussing on:

- It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
- There is highly restricted vehicular access along Tannery Lane in both directions
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

Looking at each of these concerns in turn, we would like to comment as follows:

**It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation**

In response to these concerns it is right to say that the business complex has been established at the site for many years: indeed, industrial activity at this site has continued without a break over the past 200 years or so. The premises - and the local/village employment it brings - has therefore served the local community and the rest of the borough since time immemorial. Whilst it is acknowledged that local people value the attractive appearance of the surrounding countryside, by any reasonable test the same could not be said of the appearance of the site and its curtilage which is used for car parking, open storage and industrial buildings. Nevertheless, change can be the impetus for improvements: the land between the canal and the River Wey is also within the ownership of SBC and is testament as to how the present owners have invested in improving the appearance of the site in collaboration with The National Trust such as the public garden the owners have installed by Tanyards Bridge. These improvements are set to continue if the proposal to inset the site from the Green Belt is confirmed with opportunities for further improvements and landscaping of the site. The recently published (July 2017) Rural Economic Strategy for the Borough specifically identifies Send Business Centre where improvements are being made. Page 25 of the Strategy highlights the site as a Case Study commenting as follows:

“There is a strongly supportive and sustainable rural business and community atmosphere among current tenants and, with funding support from the Enterprise M3 Local Enterprise Partnership, the family owners are bringing to fruition ambitious plans to develop a creative hub hosting hi-tech film and video studio and post-production facilities. Collaboration with the National Trust has resulted in canal-side improvements that are being further enhanced by the building of a marina to provide moorings away from the main waterway”. (see page 25 Rural Economic Strategy published by Guildford Borough Council, July 2017).

As to the vehicular access to the site along Tannery Lane, this issue has been specifically addressed by highway experts Bellamy Roberts who have been advising the owners regarding access and traffic issues and is referred to in detail in the accompanying Masterplan under the heading ‘Movement’. In this regard, it is important to point out that:

1. Historically, the site generated significant HGV movements in the past associated with the previous industrial processes that were carried out on site. Due to the site’s historical B2 and B8 uses, it continues to generate a significant number of HGV movements every day, although HGV use is declining as the site moves to business within the B1 and R&D classes.
2. Planning permission was obtained to divert a section of Tannery Lane to a new alignment running along the south-eastern boundary of the site. That consent remains extant because a lawful start was made on its construction and a Lawful Development Certificate was issued at that time by the Council. The company plans to complete the road realignment when it has sufficient funds to do so as part of the consolidation of the entire site. When completed this will bring about significant improvement to highway and pedestrian safety.

3. The site already has in place a green travel plan and is in discussions with another employment site in Send regarding running a peak hour direct bus service to Woking and Guildford city centres. The new development will incorporate a range of effective travel planning measures to reduce car usage, together with cycle parking in accordance with the Council’s standards.

4. Although much of this section of Tannery Lane is a narrow rural road it accommodates the existing levels of traffic without undue difficulty. There have been no injury accidents along that section of Tannery Lane between the Business Park and the A247 junction or in the car park adjoining Tannery Lane during the last five years. As part of the Master Plan proposals it is intended that improvements will be carried out to the extent that this is feasible within the existing highway boundaries and these measures will improve forward visibility around bends and create passing bays.

5. Furthermore, additional improvements are likely to take place at the junction of Tannery Lane and the A247 arising from other developments within the village.

It is acknowledged that additional buildings will be associated with the planned expansion on the adjoining ‘curtilage’ land. Nevertheless, as acknowledged by the council, “the Initial master planning ideas show sensitive design to complement the surroundings.” Moreover, NPPF acknowledges that the limited infilling or the partial or complete redevelopment of previously developed sites (brownfield land) such as Send Business Centre can be considered to be appropriate development in a Green Belt provided that certain conditions are met.

The council are however, taking the correct approach by ‘insetting’ the site from the Green Belt acknowledging not only the fact that the site has over the past two centuries performed an important role in providing much need employment for local people but that it can perform perhaps a more important role in the future by, for example, continuing to provide low-cost serviced office space with high-speed broadband access, with many of the existing companies have been supported from a great range of industries, with occupiers including Queens Award winners in healthtech, finance, property, insurance companies and start-ups. The site’s current focus is the creative digital creative sector: a key building block in the Borough’s economic growth.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: masterplanv8.pdf (2.7 MB)
glossed over in the report that are not resolved by GBC recent actions. The impact on infrastructure, which is clear for all to see, only gets a passing mention. For example, the transport report by the developer's consultants has been torn apart following many comments and objections. Missing traffic numbers, grossly understating the impact of the development on trunk roads and local roads. The information provided in the Local Plan implies that if billions are spent on road and transport network improvement the development at Wisley could proceed with improvements funded by developers.

3.3. There appear to be 58 projects included in GBC wish list; statements have been made that for the housing program to move forward, it would require the majority of the programme of work to be delivered. At this point in time only 4 of the 58 projects have received committed funding even one of these is in doubt if Highways England is to be believed.

3.4. No solutions have been arrived at for the problems in the centre of Ripley. After more than 2 years of meetings and discussions involving SCC and the developer's consultants no workable solution has been identified. GBC local plan dismisses this significant problem saying it will be resolved with a "management solution". I would be very interested to hear what that solution could be and I suspect SCC highways would also be interested.

3.5. Both Highways England and SCC Highways issued holding objections in relation to the recent planning application for the Wisley site. This is, apparently, all they can now do as they are unable to refuse an application. If these two key agencies have expressed their grave reservation over the potential development on this site, why do GBC insist in promoting the site?

3.6. Under the latest Housing and Planning Bill, if sites are included in a local plan there is a presumption in favour of an application with matters of detail only to be resolved. Large slices of GBC traffic solutions are based on survey and analysis yet to be done when more detail can be made available. In other words they do not know the full extent of the problem. This information will be the result of a further examination of the issues and with solutions that are not currently apparent. I suppose this is the reason for the vagaries of the budgets. The only beneficiary of such an ill conceived and ill prepared approach will be lawyers representing the future developers when they are asked to pay for or contribute towards any mitigation.

3.7. The budget costings are said to err on the conservative side. Worked out on the back of a fag packet is more the case! How can anybody be expected to take a budget plan seriously when the individual projects have a budget plan estimate in the range of £100m to £250m on a single project. It is no wonder only 4 of the 58 projects have any commitment.

3.8. There are serious environment issues on the Wisley site and the nearby SPA. Pollution levels already exceed EU levels. The proposed SANG provision is immediately adjacent to the SPA a point that was criticized by Wildlife Trust, and Forestry Commission and initially by Natural England. The latter making a reversal of earlier comments following changes in personnel.

3.9. I therefore Object to the Wisley Airfield site being taken out of the Green Belt where it continues to serve the purposes intended by its original inclusion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
I would like to raise the following objections to the above Plan:

1. Housing

1.1. The target for new homes outlined in the Local Plan represents a 25% increase in the housing stock of the borough; The Office of National Statistics ("ONS") projects a population increase (including that for economic growth) of some 15% for Guildford Borough over this same period. Why do we need the 25% increase in homes?.

1.2. The infrastructure proposals are inadequate even to meet existing needs let alone the proposed additional developments in the Local Plan.

1.3. Policy S2: is a Borough Wide Strategy (the “SHMA”), which looks at how the annual housing target of 693 homes is made up. It estimates that 517 homes per annum arise from ‘the demographic figure (supported by ONS office national statistics) projections. To this GBC plan has added another 120 homes per annum in order to ‘support extra economic growth’, a further 31 homes per annum to ‘improve affordability’ and 25 homes due to ‘student growth’, all of which totals up to 693 homes per annum target more than in the rejected plan.

1.4. This does not make any sense as we do not need an uplift for extra economic growth. Current growth patterns are included in ONS projection.

1.5. The increase of 25 homes to ease affordability issues will result in only 10 social/affordable houses being built. It would be better if planning permission was only granted for 1, 2, 3 bed properties for a period of 2 - 3 years with a restriction on the percentage of 4 & 5 bed if required . This would help to provide a better mix for both market and affordable homes in all parts of the borough.

1.6. Student accommodation should be provided by the university. The University’s expansion should be in line with what it can deliver in terms of extra student accommodation.

1.7. GBC Affordable Housing Policy H2 is proposing that all development sites (other than those with less than 10 units) will be required to have 40% of their homes offered as affordable housing. This to be on all site irrespective of where they are or where the homes are most needed. Local authorities are able to take payments in lieu from developers, but GBC have rejected this option. Why? This “one size fit all” policy will mean that homes will be built where they are not needed and not enough will be built where they are needed. Developers are therefore able to influence the level and type of affordable homes built. The housing mix in the Local Plan suggests more 1-bed homes should be built than 2-bed. GBC have ignored the figures from their own needs data (where more 2-bed homes are needed) in favour of those produced by their external consultants report. These reports have been influenced not by sound internal data from their housing records but by the vested interests of the development lobby. The only changes that can be made to the number on each site is at the developers discretion and at their request. GBC are unable to promote changes.

1.8. If any affordable social housing is built in a village like East Horsley and on most of the sites in West Horsley they could be lost to the market as there is no rural protection against the right to buy or enfranchise.

1.9. Most of the social housing in EH has already been lost as a result of right to buy. GBC should take payment in lieu from developers and build the social affordable home in more urban areas where they are most needed

1.10. GBC’s new policies will encourage the buy to let investors who will receive a good return on their investment.

1.11. POLICY H3: Rural exception homes are required on a small scale and can be retained as affordable and built on the edge of village and have significantly less impact on the Green Belt.

1.12. I therefore object to the proposed housing numbers and policies based on the above points.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):**

1. **Green Belt**

2.1. Proposed Submission Local Plan includes the statement “We will continue to protect the Metropolitan Green Belt”. No this is not the case. The housing policies set out in the Proposed Submission Local Plan; indicate that 65% of proposed new developments will take place on land that is currently in the Green Belt.

2.2. Under NPPF regulations GBC and other Local Authorities are permitted, once they have determined their Objectively Assessed housing Need (OAN), to make allowance for factors which may constrain the delivery of new housing. Constraints such as the need to protect the Metropolitan Green Belt, or the restrictions required to protect the Surrey Hills Area of Outstanding Natural Beauty, or land costs etc. Although these designated areas make up a large proportion of the land area of Guildford Borough, GBC has made no attempt to reduce its housing numbers in order to take account of such constraints. They have instead increased the number, beyond that required for normal growth projections to satisfy their own egotistical view on a path of massive economic growth.

2.3. Currently development is permitted within the settlement boundary, where villages are washed over by the green belt with particular planning regimes being applicable that have proved beneficial in preventing the urbanization of many villages. They are very successful, because of the non urban nature of small scale new development to help to retain the openness of the villages. These villages house, in some cases, a population of 4000 plus people, yet are regarded by residents as small villages. For those who drive through these areas they do not see a mass of urban style developments but trees and hedges, views between homes, views through spaces that don't reveal row upon row of homes but space and openness with trees amongst the homes and a variety of scale and architecture.

2.4. Washing some of the larger villages will result in them becoming their own urban sprawl as a result of disproportionate infilling.

2.5. Changes to settlement boundaries have been made in order to make more land available for the developers under the guise of making the boundaries more defensible. Many straight lines have now been drawn which result in villages developing hard edge profiles with buildings replacing the fragmented softer edge of the original hedgerows, trees and green fields.

2.6. Loss of Green Belt resulting from these boundary realignments can only be justified in exceptional circumstance. None of which have been provided. Moving a boundary from one already defined boundary to another, again can only be done in exceptional circumstance. Housing need has already been turned down as such an exceptional circumstance.

2.7. I object to all these changes being made to the Green Belt.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I very strongly object to the Guildford Borough Proposed Submission Local Plan (June 2016). I object on the following grounds

I object to the Local Plan as the development proposed is not sustainable (Policy SI)

The 13,860 new houses proposed is totally unsuitable- it will damage local communities by over development, particularly Ripley, Send and Clandon. The local communities do not need this number of houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan does not include anything to improve the infrastructure for Garlick’s Arch.

The development should be in urban areas not in green areas, where there is sustainable transport.

I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

I object to development in areas which are at risk of flooding (Policy P4)

The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

There is way too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.

The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

The Garlick’s Arch (A43) proposal would double the built area in the locality, and would irrevocably damage the character of the Ancient Woodland on the site, which includes over 80 ancient oak trees.
I object to the Borough Wide Strategy (Policy S2)

GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there’s too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11% of the existing housing.

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the
- There are no plans to improve local schools, medical or utilities to

I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

I object to poor air quality concerns (Policy I3)

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.
I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

I object to the lack of proper infrastructure planning for sites (Policy I1)

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick's Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

I wish these objections to be fully taken into consideration and that the plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

As a local parent whose children are and will use the adjacent school, I would like to oppose this planning application for new housing.

currently it is very difficult to park or drop off and collect the children at peak hours.

any further housing is likely to add up to 2 extra cars per house using the existing limited infrastructure.

i do not see any proposals from the developer to aid or compliment the local ergonomics.

Infrastructure:

Glaziers Lane and Westwood Lane, which on the Plan are either side of the proposed project are totally incapable of taking the construction and subsequent residential traffic.

Westwood Lane has an irrevocable, narrow one way system under the railway bridge and on Glaziers Lane the bridge has a bend and blind spot.

The A323, the fundamental service and main traffic route through the village is extremely busy, speed limits are ignored and the main junctions are both potentially and actually dangerous.

There is no opportunity, without significant housing demolition to improve these routes and junctions which would be essential to attempt to accommodate an additional 2000 domestic and service vehicles.

Much of the proposed site is low lying and subject to flooding, the large increase in hard surfaces and the inability of the current surface and foul drainage systems to cope threatens a major disaster.

School:

Research by our County Councillor indicates that there is no fundamental need for a secondary school on the site and any calculation as to secondary education need will have to be revised downwards as a result of the Brexit decision.

The linkage of school need to Green Belt development is most definitely not proven.

Amenities:

Normandy is almost totally devoid of local amenities.

There is a perimeter bus and rail service, an overloaded doctors surgery, 2 churches and a well appointed village hall.

There are no services for the every day supply of food or drink.

All the latter needs are serviced outside the village requiring travel to access them.

Clearly Guildford has a commitment to provide housing for an increasing population but there are two fundamentals that have not been addressed:-

What is the demand for housing going to be when immigration is brought under control, an area for recalculation of demand.

Secondly housing in Guildford is extremely expensive and likely to remain so, as a construction professional, I doubt if low cost housing can be built (if resources are available) that is truly affordable.

I urge that any significant development in Normandy is not implemented as the fundamentally flawed logic for a secondary school on Green Belt is not proved and therefore the surrounding development does not need to go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
As a Normandy resident of more than 20 years I wish to object to the desecration that would be caused by the adoption of the proposed Local Plan and especially the devious way in which a late amendment was introduced.

Reasons:

1. Green Belt:

I have lived in Normandy for many years and I truly value our green belt its use for development would be irreversible.

There are brown field sites around which possibly could be used in and around the borough as a priority.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Forthly, I object due to the congestion that development will cause to both local and larger roads, A3/M25 (Policy I2)

The A3 or M25 must be improved before development is done. There are no plans to even start considering improving the A3 before 2020, so rendering the timescales are completely mismatched which means the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a) North facing ramps to the A3 at Burnt Common are likely to increase the amount of ‘through’ traffic. including but not limited to more traffic from London/M25 to Woking routing through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved and current traffic is heavy for long hours every day.

The roads concerned are of increasingly poor quality and the additional volumes will cause further deterioration, leading to risk of vehicle damage, accidents, especially cyclists, and broader impacts to adjoining land, properties, etc.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Secondly, I object to the failure to protect the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon, Wisley Airfield and Garlick's arch from the Green Belt. There are no stated exceptional circumstances for these villages and sites areas being removed, as stipulated in the National Planning Policy. There are many brownfield sites in Surrey (Guildford and Woking) which should be used before even considering removal of country areas such as Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Thirdly, I object to development in areas which are at risk of flooding (Policy P4).

I believe the Plan does not take adequate account of flood risk as stipulated in the National Planning Policy.

The flood classifications of Garlick’s Arch (A43) by the Environment Agency and the Council are different. As a resident of 20 years I have seen this area flooded many times and believe development will have a huge potential impact on the flood plains between Woking and Send, just creating a new problem in a slightly different place that will impact new and existing development for miles around. I see no evidence of this being taken into account.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:

Comment ID: PSLPP16/1466  Respondent: 15233889 / Claire Sallows  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Firstly, I object to the Local Plan due to lack of long term sustainability of the proposed development (Policy S1)

The number of new houses proposed is not sustainable as it will damage local communities by over development, especially Ripley, Send and Clandon, and with further impact to Old Woking. The traffic levels are unacceptable already, and funnel into Woking via a supposed Conservation area where Old Woking High Street is protected for historical reasons as a road designed for traffic volumes in the early 20th century.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I fully support the rejection by the entire planning committee of the development of Wisley airfield (Three Farm Meadows) to the inclusion of the site formerly known as Wisley Airfield in the local plan and object strongly to its continued inclusion.
I object to the inclusion of the site known as Wisley Airfield in the local plan as it goes against the published Ockham Parish Local Plan which we are encouraged to issue so that everybody has a clear idea of what local people actually want rather than what the Council think they want.

I object to the awful impact a development on Wisley will have on transport, local roads and road safety.

I object to the impact on the local environment such a development would have especially on the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to attempts to remove Three Farm meadows (Formerly known as wisely airfield) from the green belt. The site is actually prime agricultural land that the government promised to remove the airstrip from it when they had finished with it and under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the mass of cars that will be unleashed on our narrow roads that are flooded with cyclists.

I object to more cars on our roads as there are no provisions for pedestrians and we take our lives in our hands when we walk the roads even with the traffic we have now and there is no room for pavements.

I object to the Council using inflated/dodgy statistics (West Surrey Strategic Market Housing Assessment (SHMA)) to base their need for so many houses.

I object to the proposition that the development will result in a meaningful shift to cycling and walking, of course it won’t as there are no transport links and the new residents will obviously use their cars.

I object to the fact that the houses that are proposed are completely out of keeping with the whole area.

I object to the fact that even though the planning committee have unanimously rejected it, even though the local people don’t want it, the Council are still determined to have it included in the Local Plan.

I object to the Council trying to force people to live in an atmosphere poisoned by fumes from the M25/A3.

I object to the fact that Guildford Borough Council are completely ignoring the Ockham Parish Local Plan.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
We strongly object to the 2016 Draft Local Plan.

We are concerned that there will be a significant loss of areas currently designated as green belt particularly in Burpham. It seems that you want to merge local villages along the A3 into one, this will be detrimental to the area.

It appears that you plan to build 693 new homes a year. I believe this is more than double the figure given in 2012. Where is the justification for this. Burpham, Gosden Hill, seems likely to get a disproportionate amount of new housing/development and yet there is no provision for improving the road links and amenities. Burpham is already burdened with high levels of traffic, if your plan went ahead we would come to a standstill!

I believe there has been some discussion about building a tunnel to serve the Gosden Hill development, this would improve the traffic situation but we still feel that the Gosden Hill development is too large and is not in keeping with the area.

It also appears that the consultation time on such a complex development is rather short.

Is this draft plan still viable given the current political and financial situation?

I would like my comments to be seen by the inspector.

This plan has not been thought through, with potential major impacts on the villages of Send and Ripley.

The traffic is already bad particularly at rush hour times and also affected badly when the A3 is blocked around Guildford.

- I object to 2016 Draft local Plan
- I object to all erosion of the Green Belt
- I object to any “in-setting” of any villages from the Green Belt

Answer (if comment is on questions 1-7 of the questionnaire): ()

With regard to the sites numbered:

• A25 – Gosden Hill
• A43 and A43a - Land at Burnt Common – known as Garlick's Arch
• A35 – Former Wisley Airfield

in the revised draft local plan.

I would like to object to the inclusion of these sites in the draft local plan for the following reasons:

1. The number of houses needed in the Borough was changed between the first and second issues of the draft plan indicating that there is considerable uncertainty in this figure and the basis and method of calculation. In view of the recent EU referendum vote and its impact on future immigration, the number of houses required is likely to reduce further. With smaller house numbers the need for any loss of the Greenbelt should be reassessed as 'special circumstances' necessary for reclassification have not been established.

2. Sites 43 & 43a were introduced at the last minute and there has been insufficient time for consultation before its inclusion in the draft plan.

3. Wisley/Ripley/Send/Burnt Common/Send Marsh is a semi-rural area and development on this large scale will lead to urbanisation and permanently change the nature of the area. In particular this could provide the starting link in connecting Guildford to the M25.

4. These developments place a disproportionate burden on the north east of the Borough.

5. Traffic will increase significantly and the access and exit roads to and from the A3 are too narrow to cope with the resultant increase in traffic - particularly at peak hours.

6. Other infrastructure.
   Is there adequate power, drainage and sewage provision for industrial development and is there sufficient school, medical and similar provisions for domestic expansion?

7. Light and sound pollution.
   The area enjoys fairly dark skies for its proximity to London. Any additional development will add to the light pollution unless provisions are made to ensure strict control of any additional lighting. Please consult Guildford Astronomical Society. It already suffers from noise pollution from the A3. Traffic noise pollution seems inevitable if development proceeds.
   If included in the plan, provision should be made for strict control of noise and light pollution emanating from the site – particularly at nighttime.

8. The sites contain a substantial number of trees many of which are quite mature and must make a significant contribution to the Borough's carbon reduction target. It seems perverse that planning permissions have been
refused because of the impact on the individual trees whilst the wholesale destruction of woods seems inevitable if these sites are included.

It seems difficult to reconcile these two extreme positions. If included in the plan preservation orders should be placed on appropriate trees as a minimum requirement.

With respect to the site numbered A44 in the revised draft local plan.

I would like to object to the inclusion of this site in the draft local plan for the following reasons:

1. The number of houses needed in the Borough was changed between the first and second issues of the draft plan indicating that there is considerable uncertainty in this figure and the basis and method of calculation. In view of the recent EU referendum vote and its impact on future immigration, the number of houses required is likely to reduce further.

   With smaller house numbers the need for any loss of the Greenbelt should be reassessed as 'special circumstances' necessary for reclassification have not been established.

2. This site was introduced at the last minute and there has been insufficient time for consultation before its inclusion in the draft plan.

3. This development will add to the disproportionate burden on the north east of the Borough.

4. There is a question as to the suitability of the land for building purposes.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Please note my objection to the draft local plan. I particularly object to the villages of Send, Ripley and Clandon being removed from the Green Belt and site A43 Garlicks Arch. This kind of development will have a negative impact of the surrounding area and affect the 'atmosphere' of the villages. Ripley is a particularly thriving community based around traditional village activities. Over population and ever increasing traffic will greatly affect this. Already there are limited school places and demand on other local facilities in this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/533  Respondent: 15234177 / Brianne Vally  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule
I object to the lack of immediate provision for new schools. For instance, Surrey's primary school population has risen by more than 10,000 since 2010 and by 2,200 in 2015 alone.

I object due to the congestion that the proposed development will have on an already over loaded road network. I feel changes to existing trunk roads especially A3/M25 will have to be made prior to further development being considered/suggested. Moreover the rural roads around ripley, send and clandon are already overloaded with through traffic. These are narrow and in poor condition. Most don't currently have a footpath nor cycle path. There is no plan to improve these hence I object.

I object to the lack of any immediate provision for doctors surgeries. I feel the plan does not identify suitable infrastructure improvements in lieu of the sheer scale of proposed development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to development in areas which are at risk of flooding. I understand that the site at garlick's arch is classified by the EA as being at higher risk than the council's own assessment. The environment agency has previously stated that one in six homes in England is currently at risk of flooding with 2.4 million threatened by rivers and seas and a further 2.8 million at risk from surface water flooding so let's not add to these already worrying numbers. Under the Civil Contingencies act 2004 Guildford Borough Council has a duty to assess the risk of emergencies occurring and use this to inform contingency planning so why make the matter worth by building in a sensible area.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM)- Allocation A35-for the phased development of a new settlement of up to 2100 dwellings

I object to the draft local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBE).

5) I object to the threat the local Plan poses to the historic rural village of Ockham and the Blighton properties there. The plan calls for a Village of 159 residences (With narrow lanes, no street lights, very few pavements and many listed houses) to be subsumed into a 2,000 dwelling development, with urban-style buildings Up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development walking. The development is too isolated, and even within the development

b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RH S Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25! A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heath Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously—air pollution in many parts of the borough, and particularly at the M25! A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heath SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s greenspaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a large number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency

8) I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM)

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

1. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

The Royal Surrey County Hospital supports the developments listed under Policy Sites A16 and A17. This will improve the provision of low cost affordable housing for hospital and key worker staff. This will ensure the hospital is better able to attract and retain staff both now and in the future. The development of these areas is overdue.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
The strategy is sound because the local area needs to develop housing and transport infrastructure to ensure ongoing growth and prosperity.

The provision of key worker housing is a major issue for the hospital as is transport access. Our staff have to travel significant distances to be able to work at the hospital so these are major retention issues.

The area around the University and the Research Park has inadequate transport and car parking infrastructure which causes patient, visitor and staff issues. This requires upgrading as it has not really changed for 15 years despite ongoing growth over this period.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Draft Local Development Plan - Send, Send Marsh & Burnt Common

I am very concerned indeed about your proposal to increase the number of new homes in our villages from 185 to 485 by the sudden late (and, in my opinion, underhand and cynical move by Guildford Borough Council) inclusion of the large Green Belt Garlick's Arch area of fields and ancient woodland in this latest, and very flawed, Plan.

The last Plan put out two years ago allocated a total of 431 homes to our villages, which would have increased the population by nearly 25% - itself far too high for the local infrastructure - roads, schools, medical centre, etc - to cope with.

The revised Plan submitted to the Guildford Borough Council executive committee in April this year, lowering the figure to 185, was far more realistic, but even this would put great pressures on our infrastructure. At the Send Parish Council public
meeting at the Lancaster Hall on Tuesday 14th June, Councillors Spooner and Furniss, from GBC, promised that none of this massive development would take place before the infrastructure was in place to cope with it. But we all know how long it takes Governments and County Councils Highway Departments to plan for and actually build new roads, schools etc.

Political promises are much easier to make than keep! I OBJECT to the inclusion of the Garlick's Arch site in this Plan.

I wish this letter to be forwarded to the Government's Planning Inspector.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. I object to the inclusion of land at Garlick’s Arch, Burnt Common and the proposed 400 houses and 7000 sq m of industrial warehousing on that site (Policy 43). Policy A43 and A43A were included at the last minute. They were not in the Regulation 18 draft and had not been consulted upon prior to the inclusion 2016 Local Plan.

5. I object to the impact of Policy A43 on ancient woodland on that site, on noise pollution and air pollution levels. The site is also prone to flooding.

6. I object to the impact of Policy A43 and A43A on local infrastructure. Congestion levels on A247 are already increasing at an alarming rate and will be further exacerbated by the development of Garlick’s Arch as the residents will have to rely on the use of private cars.

7. I object to the unsustainable nature of the site at Garlick’s Arch (Policy 43).

8. I object to the inclusion of policy A43 of 7000sq m of industrial warehousing as the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft. Slyfield Industrial Estate still has spare capacity and could accommodate any additional warehousing need if required.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In particular, I object on the following basis.

1. I object to the creation of a new 4 way interchange onto the A3 on the A247 (Policy A43A) as this would add to the ever increasing levels of traffic on the A247, A3 and through Send and Clandon. Send would become a through route to and from the A3 and will become gridlocked all day.

2. I object to the impact that Policy A43A will have on the air quality for those living in the surrounding areas and for future generations.

3. I object to the impact on residents that the resulting noise pollution of Policy A43A will have.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of land west of Wind Ridge and Send Hill designated for 40 homes and 2 Travellers' Pitches (Policy A44). The site was not included in the Regulation 18 draft and has not been consulted upon prior to the inclusion in the 2016 Local Plan.

12. I object to the impact of Policy A44 on an area of beautiful Green Belt countryside.

13. I object to the impact of Policy A44 as the subsoil of the existing site contains documented unsafe land fill waste which is currently vented.

14. I object to the impact of Policy A44, which includes 2 Travellers' Pitches, on the local infrastructure. The narrow width single track country road provides insufficient access for the pitches.

The obvious issues are that Park and ride were deemed a necessity hence this area turned into a car park bringing more dangers to area which has a growing and substantial school population no long term thinking going on there.

Now greed has kicked in and you are hoping to do away with this parking area, so where will these cars which use this site go.

You are considering building 38 homes so lets say each property has a min 2 car property 76 more cars in the area, of which about 38 actual spaces will be made for the 78 cars for these potential new residents.

Adding to parking issues in this area.

Currently school play areas are not sufficient why not turn some of this area into school field and use.

Oh yes that's right not enough money would be made out of this.
Now let's have a think about this while working class family are squeezed into a smaller and smaller living area with pot-holed roads. (Northway and side road along Aldershot road where frail OAP live, I'm sure you have not noticed only been like this for the last 5 years).

Students packed into ex-family homes ruining the mix of the area, devaluing house prices.

I have an idea, there is lots of lovely space around Albury, Chilworth Shalford, Merrow, Clandon, Shamley Green, Atrington, Puttenham.

Maybe some of these areas could absorb the flow of Migrants and the need for new builds to a growing population.

But no this will not happen why!

Oh yes you guys live there hey or your cohorts.

So hey ho another 38 homes whacked into an overcrowded area more pollution and fumes.

Cycles lanes for who? Not my Kids to dangerous.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Object to building 45 houses at Clockbarn Nursery because of inadequate access and traffic. The junction with Send Road is already very hazardous for vehicles trying to join the main road. Planning permission has already been granted for 64 apartments at the Tannery and for building the Marina both of which will generate additional extra traffic. The junction is already too dangerous.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Send Village being removed from the Green Belt. The Green Belt was intended to be permanent, as required my the National Planning Policy Framework, and there are no special circumstances to justify abandoning it. Send's Green Belt provides an essential buffer stopping Woking and Guildford becoming one conurbation. Local Councillors and central government gave a clear election promise to protect the Green Belt and this reneges on it. Developers will be quick to take advantage and there will be nothing to stop them.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to 400 houses and 7000 sq metres of industrial space at Garlicks Arch opposite Send Marsh Road. The site floods and is covered by ancient woodland. The industrial space is not required but if it were it should be at Slyfield. Guildford housing requirements have been shown to be grossly exaggerated and you have refused to disclose your calculations. With proper use of brownfield sites the Green Belt is not needed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the development of 40 houses and 2 travellers pitches at Send Hill. It is an inapp location because the narrow single access country road provides insufficient access. The subsoil of the proposed site contains documented unsafe landfill waste registered at GBC. Any development there would spoil a high amenity area set in beautiful countryside.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed designation of the site at Blackwell Farm for the building of 1,800 houses, an industrial park, supermarket and travellers' pitches. This is likely to destroy views from the Hog's Back ridge, a designated Area of Outstanding Natural Beauty; remove 72 hectares of scenic farmland and ancient woodland from the green belt; increase tailbacks on the already very busy A31 and traffic congestion on this side of Guildford generally; result in rat-running through local residential roads causing both a nuisance and a danger to local residents as well as adding to pollution of the local area.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This is a substantial development on green belt land. I see no evidence for the need to to make such a large development on green belt land and 'exceptional circumstances' have not been demonstrated to justify 1,100 houses to be built on the green belt. There is no need for a new secondary school as nearby schools are not currently full and there is no need for a school to serve local residents. It seems the council needs to build this many houses to justify the school rather than the school be required to serve the existing local community.

Has a local census been undertaken to demonstrate the need for a new secondary school? I see no empirical evidence for the need for a school to serve the existing local community in the plan.

This development will increase traffic and there is no evidence in this plan how to manage this extra traffic.
No assessment has been made at peak travelling hours when queues of traffic already appear at key junctions such as the junction of the A323 Guildford Road, Glaziers lane and Hunts Hill Rd and the junction of Westwood Lane and the A323 Guildford Road.

Doubling the size of the village will increase the traffic at these key junctions and before any plan is approved this issue needs to be addressed. Current roads are not designed to handle this extra traffic and Glaziers lane especially is not wide enough to cope with this extra traffic. I would like to see the traffic analysis which supports this huge increase in houses and subsequent traffic.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A47

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The plan, ref A47, proposes 50 new dwellings next to the railway with no direct access to a main road. This will create a big increase in traffic through a quiet residential cul de sac street which is currently only designed to serve the 30 existing houses. Any proposed development of this size requires direct and simple access to main roads and is inappropriately placed within a residential area. The Paddocks is already a site of 30 houses and to increase it by a further 50 houses will disrupt access to the existing houses and this busy road will risk injury to the elderly people that live in the sheltered housing which opens on to the road. In short this plan proposes to turn a quiet, safe cul de sac into a dangerous access road.

This site is area of natural beauty with diverse wildlife next to the Christmas Pie way and this development will destroy the essential habitats of this wildlife.

This wildlife is preserved by waterways and casual water which floods the area every year. Building on this site will require substantial drainage, which will kill this water dependent wildlife, including the water voles. Has the appropriate research and assessment been carried out to ensure that the required drainage will not impact the existing wildlife? I would like to see evidence of the due process undertaken to measure this impact.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the local plan of building on Green Belt land. Site A43 Garlick's Arch increase of housing will be extremely harmful to the rural area of Ripley, Send and Clandon.

The inclusion of 6 x travelling show people plots with storage facilities is entirely inappropriate on Green Belt Land with the designated formula for 1500 to 1999 homes is out of scale.

The increase of industrial floor space to an unspecified amount does not provide enough information for a proper consultation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object to any development at Send Hill proposals to develop this site have blighted the Send Hill community for nearly a decade. Proposals for gypsy site / affordable housing was first tabled – 2007. The objections from Send residents ran into many hundreds. These responses must still be on record, are they just ignored?

I object the proposed development in Send Hill on health grounds. The site is a former land fill site, insufficient records are available to indicate what is buried there; the environment agency website indicates all types waste was disposed of including hazardous. My environmental surveyor indicated that there old landfill site were not dangerous if left alone and undisturbed.

I object to the proposed development in Send Hill as it would destroy a beautiful tranquil amenity used by many villages. This field is regularly used by the local community for recreational use such as dog walking jogging rambling cricket and picnics. It is surrounded by public footpaths and has many mature trees and bushes upon it. It is a quiet area and forms a perfect haven for wildlife and birds including deer, bats, rabbits, squirrels, moles, hedgehogs, jays, woodpeckers to name a few. There is a large pond nearby containing frogs newts and wild fowl. Some of these species are protected. It is only...
I object to the proposal at Send Hill because Send Hill is a single track country road; it is too narrow to accommodate the potential new levels of traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wrote to you on the 1/7/2016 detailing my objections to the local plan in general terms. I am writing again with more specific objections.

I object to any “in setting” (i.e. removal) of any villages from the Green Belt. Guildford Borough Council took the DCLA to judicial review in 2009 and the court quashed policies that would have forced GBC to find Green Belt land for homes. With the government abolition of regional spatial strategies the requirement to seek Green Belt sites has gone. At the time Andrew Povey (S.C.C leader) said providing more homes should not happen if it means cementing our vast area of countryside. Sir Paul Beresford and GBC conservative councillors stood on a policy of no development in the green Belt unless in exceptional circumstances – There are no exceptional circumstances. The whole issue of in setting is undemocratic. Local people have raised concerns for the last decade concerning over development of our villages. I know Sir Paul Beresford is on record as saying that local people must have a real say in housing numbers he is also omitted to protecting our natural environment and wildlife from over-exploitation of resources and development.

**Comment ID:** PSLPS16/1173  **Respondent:** 15239169 / First Regional Estates Ltd (Daniel Goldberg)  **Agent:** GL Hearn Limited (Paul Woods)

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A10

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

---

Our client, First Regional Estates Ltd, is the owner of the Jewsons builders’ merchant site, Walnut Tree Close in Guildford town centre. A strip of land within the western and northern boundaries of our client’s site forms part of the site allocation for a ‘Sustainable Movement Corridor: Town Centre Phase 2’ under Policy A10. As set out in the Council’s Progress Update on Sustainable Movement Corridor Scheme (June 2016), we understand that the branch of the corridor along the western side of our client’s site is to be used by pedestrians and cyclists to access Guildford railway station and onwards to the town centre, as an alternative to the sustainable movement route on the southern section of Walnut Trees Close.

We object to this site allocation on the basis that the timing for this initiative is uncertain and the allocation would potentially prevent the full and effective use of our client’s site for alternative development. The sustainable movement corridor scheme is included within the Council’s Infrastructure Schedule at Appendix C of the Submission Draft Local Plan. This notes that the scheme is to be delivered by a combination of Surrey County Council, Guildford Borough Council, Network Rail and developers(s) and that the delivery timeframe is set between 2018 and 2033. It is further noted that the scheme is likely to cost in the region of £5 -10m and the likely funding source will be developer contributions and the Local Growth Fund. We further understand that the works are subject to the replacement of Yorkie’s bridge across the railway, which in itself is estimated to be delivered in the same timeframe by the same partners and through the same funding source. The Guildford Borough Transport Strategy (2016) confirms that both these schemes do not fall within the ‘Committed’ category as defined within the Strategy; rather they fall within the ‘Anticipated’ category and are subject to a positive business case being prepared.

In the absence of certainty at this stage on the deliverability of these schemes, we consider that the area of our client’s site the subject of Policy A10 should be incorporated into the Policy A5 allocation within the Submission Draft Local Plan and the A10 allocation deleted accordingly. As part of the redevelopment of our client’s site under Policy A5, there should be an opportunity to provide for a shared pedestrian/cycle link through the site linking Station View with Walnut Tree Close and the alignment of this could be appropriately designed as part of a comprehensive redevelopment of the entire site.

Having regard to the above, we consider that Policy A10 is unsound on the basis that it is not justified and does not represent the most appropriate strategy for the development of the area when considered against the alternative of a comprehensive redevelopment which has the potential to incorporate a pedestrian/cycle link.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Our client, First Regional Estates Ltd, is the owner of the Jewsons builders’ merchant site, Walnut Tree Close in Guildford town centre, part of which is the subject of a proposed residential allocation for approximately 125 homes under Policy A5.

The Jewsons site is a regular shaped site in a highly accessible location being situated on the edge of the town centre, a short distance from Guildford railway station. The site was first identified in the Council’s Strategic Housing Land Availability Assessment (2014) under site ref: 1107 as suitable for residential development, although it was also noted that there was a possibility of redeveloping to provide a mixed use to include new homes and employment. The site was subsequently identified as a site allocation in the Council’s draft Local Plan Strategy and Sites Consultation (Regulation 18) which took place over a 12 week period from 1 July 2014. Identified as site 29, the allocation referred to ‘Housing (C3) and/or office (B1a)’. The commentary indicated that the site is situated in a sustainable location close to the station and that there was potential to incorporate commercial office use as part of a residential led mixed use scheme.

For the reasons set out below, we consider that there should be flexibility on the potential uses of the site to include in addition to residential use, the potential for student accommodation and the potential for an element of commercial space including office, retail/restaurant or leisure use as part of a mixed use scheme. We also consider that the indicative housing number of 125 homes underestimates the development potential of the site.

As set out in our comments on Policy A10, in the absence of certainty on the deliverability of the sustainable movement corridor scheme the subject of A10, we also consider that the Policy A5 site allocation should be extended to include the strips of land in our client’s ownership to the west and north currently the subject of the site allocation under Policy A10. This would provide for an enlarged site area of 0.73 hectares to accord with the site allocation 29 within the Council’s previous Draft Local Plan Regulation 18 consultation.

Potential Uses

We welcome the Council’s acknowledgment that the site is suitable for residential development. However, in light of the site’s central and sustainable location close to Guildford town centre, Guildford University and the railway station, we consider that the site would lend itself to a range of potential uses and we would ask that this is reflected in the policy with reference in particular to the site having flexibility to provide residential or student accommodation with the potential for an element of commercial floorspace including office, retail/restaurant or leisure uses.

With respect to potential commercial uses, the potential of the site for commercial offices was previously recognised by the Council at least in part and commercial offices are being developed as part of a mixed use scheme to the south of the site at 1 & 2 Station View. Central government policy set out in the National Planning Policy Framework (NPPF) (2012) indicates at paragraph 23 that local planning authorities should, inter alia, allocate a range of suitable sites to meet the scale and type of retail, commercial, office, tourism, cultural, community and residential development needed in town centres and that it is important that needs for retail, leisure, office and other main town centre uses are met in full and are not compromised by limited site availability. Demand for such space will play a factor, however our client wishes to retain the flexibility at this stage.

With respect to student housing, we consider that the site represents an ideal location for such development having regard to its location. Not only is it located close to the town centre and railway station, but also the main University of Surrey...
Stag Hill Campus is situated a short distance away from the site on the other side of the railway line accessed via Yorkie’s bridge.

Policy H1 (Homes for All) of the Council’s Submission Draft Local Plan indicates that new residential development is required to deliver a wide choice of homes and meet a range of housing needs as set out in the Council’s latest Strategic Housing Market Assessment (SHMA). With respect to students, the draft policy notes that the Council will expect 60% of the University of Surrey eligible student population (full time equivalent) to be provided with student bed spaces and accommodation on campus.

Consideration of student housing need is contained at Appendix C of the West Surrey SHMA (September 2015). This sets out predicted growth in student numbers over the plan period and notes that currently University accommodation only meets the needs of 52% of eligible students. With the expected increase in student numbers as noted in the SHMA, there will be increased pressure on the University to provide student accommodation and off site provision conveniently located for the University Campus would assist in meeting this need and in turn would release pressure on the general housing market, particularly the less expensive rented sector.

The site has the flexibility to meet the demand for the above range of uses. We would ask that this flexibility is reflected in the site allocation rather than the site being restricted to a single use.

Density of Development

We consider that the allocated provision of approximately 125 residential units underestimates the development potential of this edge of town centre site, particularly having regard to its proximity to the railway station.

Policy H1 of the Submission Draft Local Plan indicates that new residential development is required to make the most efficient use of land whilst responding to local character, context and distinctiveness. The policy describes how residential densities will vary dependent upon the local area context and character and sustainability of the location. It is noted that higher density development will be supported in Guildford town centre. Supporting paragraph 4.2.8 indicates that there is a responsibility to use natural resources, such as land, wisely and that efficient use of land is essential. The paragraph describes how increasing densities can help reduce the land needed for new homes and make development more sustainable and can also help support facilities and services. This is particularly important for a town like Guildford which is surrounded by Green Belt and where there is invariably development pressure on green field sites.

Paragraph 17 of the NPPF sets out 12 core planning principles which it indicates should underpin both plan-making and decision-taking. These include encouraging the effective use of land by reusing land that has previously been developed; promoting mixed use developments; and actively managing patterns of growth to make the fullest possible use of public transport, walking and cycling and focusing significant development in locations which are or can be made sustainable.

The Government consulted on proposed changes to national planning policy in the NPPF over the period 7 December 2015 to 22 February 2016. One of the topics the subject of consultation was increasing residential density around commuter hubs. Paragraph 14 of the consultation document indicates that there are significant benefits to encouraging development around new and existing commuter hubs, thereby reducing travel distances by private transport, making effective use of private and public sector land in sustainable locations, and helping to secure the wider regeneration and growth of the local area. It is noted in the paragraph that in this context the Government is keen to support higher density housing development around commuter hubs to help meet a range of housing needs. Paragraph 15 indicates that the Government is proposing to change national planning policy to require higher density development around commuter hubs wherever feasible. The Government is proposing that a commuter hub is defined, inter alia, as a public transport interchange (rail, tube or tram) where people can board or alight to continue their journey by other public transport (including buses), walking or cycling. Whilst this policy approach has yet to be incorporated into national policy, it is a clear statement of intent on the part of Government to increase residential densities around commuter hubs.

Having regard to the above, Policy A5 should be looking to maximise the potential of the site having regard to its sustainable location. It is clear that Guildford Station falls within the definition of a commuter hub as noted above and the
The indicative housing number for the site of 125 homes based on a plot of 0.64 equates to a residential density of 195 dwellings per hectare. We consider this underestimates the development potential of the site.

In particular, we refer to the residential led mixed use scheme (incorporating offices) immediately south of the site at 1 & 2 Station View, which is the final stages of construction under outline planning permission ref: 06/P/02309 and reserved matters approval ref: 09/P/01965 with subsequent minor alterations under variation of conditions permission ref: 14/P/01614. This development provides for 177 dwellings on a site of 0.5 hectares equating to a residential density of 354 dwellings per hectare. Furthermore, the scheme at 1 & 2 Station View provides for 1,837 sqm of B1 office floor space in addition to the residential floor space.

The Council’s planning committee report in relation to the outline planning permission ref: 06/P/02309 for the scheme at 1 & 2 Station View in consideration of density indicated that the site is highly sustainable and therefore it was appropriate to seek a high density, although it was noted that a balance needs to be made between making best use of limited urban land and ensuring that any development integrates with the surroundings through a design lead approach.

The Jewsons site and the site at 1 & 2 Station View sit within a similar urban context. If one was to apply the same density to the draft site allocation under Policy A5 as that accepted by the Council at 1 & 2 Station View, based on a site area of 0.64 hectares a potential redevelopment scheme could give rise to 226 residential units with potential for some additional commercial space as part of a mixed use scheme. Based on a larger site allocation of 0.73 hectares incorporating the strips of land to the west and north of our client’s site, a potential redevelopment scheme could give rise to 258 units plus some commercial uses. We would recommend that the proposed density for the Policy A5 site is more aligned to the density of development at 1 & 2 Station View acknowledging that it is a guide to development and actual form and scale of development will be determined through a design led approach.

Having regard to the above, we consider that the current wording of the policy is unsound on the basis that it is inconsistent with national planning policy. Also, the extent of the allocation and current drafting of the policy is not justified when considered against reasonable alternatives and is not effective in making the best use of the site at an appropriate density. It is also not flexible enough to allow for a suitable range of town centre uses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Paragraph 22 of the National Planning Policy Framework (NPPF) indicates that planning policies should avoid the long term protection of sites allocated for employment use where there is no reasonable prospect of a site being used for that purpose. The NPPF notes that where there is no reasonable prospect, applications for alternative uses of land and buildings should be treated on their merits having regard to market signals and the relative need for different land uses to support sustainable local communities.

On 13 October 2015, the Government announced that the temporary permitted development rights allowing change of use from offices to residential would be made permanent and these rights have since been confirmed through amendments to the General Permitted Development Order. The Housing and Planning Minister, Brandon Lewis, said at the time of the announcement: “We’re determined that, both in Whitehall and in town halls, everything is done to get the homes we need built. Today’s measures will mean we can tap into the potential of underused buildings to offer new homes for first-time buyers and families long into the future, breathing new life into our neighbourhoods and at the same protecting our precious green belt”.

Such an approach is particularly pertinent to an area such as Guildford which is surrounded by green belt and which currently only has a 2.4 year supply of specific deliverable housing sites based on the Council’s latest Annual Monitoring Report for 2014/2015 published in October 2015.

Having regard to the above, we consider that the policy as currently drafted is unsound on the basis that it is not justified. It does not provide the most appropriate strategy having regard to the clear need to deliver new housing within the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2682  Respondent: 15239169 / First Regional Estates Ltd (Daniel Goldberg)  Agent: GL Hearn Limited (Paul Woods)

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A10

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We submitted comments to the proposed submission draft version of the Local Plan on 18 July 2016 in respect of Policy A10 (Comment ID PSLPS16/1151) on behalf of our client First Regional Estates Limited, which is the owner of the Jewsons builders merchants site. We objected to the policy and recommended that it be deleted. Whilst part of the site allocation has been incorporated into the allocation under Policy A5, for the reasons set out in our original representations, we maintain our objection that the policy should be deleted. Notwithstanding, we note that further changes have been made to the policy wording to which our client strongly objects.

Under Requirements paragraph (1), reference to Appendix C Infrastructure Schedule has been deleted and in its place reference has now been made to ‘...having regard to the Sustainable Movement Corridor Supplementary Planning Document’ (SPD). We understand from the Council's Planning Policy team that this SPD has yet to be produced even in draft and will not be produced until after work on the preparation of the Local Plan is complete. We consider that the draft Plan is unsound in making reference to, and placing justification on, a SPD that does not currently exist.
Under paragraph (2), the wording has been amended to indicate that access to the Jewsons site will only be maintained for pedestrians. Our client strongly objects to this change on the basis that restricting vehicular access will severely prejudice both the existing operation and future development potential of the site.

With respect to the existing operation, there is no indication that the policy will be implemented in tandem with the redevelopment of the Jewsons site under Policy A5. The Policy as currently worded is ill conceived and should be deleted. The operation of the Jewsons Builders Merchant site is reliant on its main vehicular access from Walnut Tree Close which is used by all customers and visitors and through which trade is undertaken. Taking away these access rights will prejudice this local employer. Secondary access is provided to the site from Station View, however Station View is not adopted highway and access is through the station car park and mixed use development to the south and is not suitable as the main access to the site.

Restricting vehicular access from Walnut Tree Close as part of any redevelopment of the Jewsons site would also serve to restrict the options and flexibility for redevelopment of the site and so undermine its redevelopment potential. In our view, it is difficult to see how vehicular access to serve a single development site in this location (which would have the benefit of additional access from Station View) would give rise to traffic generation levels which would undermine the Council's aspirations for a sustainable movement corridor in this location.

For the above reasons we consider that the policy is unsound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

For the reasons set out in our original representations, we consider that the policy should be deleted. Notwithstanding, access to the Jewsons site from Walnut Tree Close should be maintained for vehicles and pedestrians and reference to the Sustainable Movement Corridor SPD should be deleted.

Attached documents:

Comment ID: pslp172/2683  Respondent: 15239169 / First Regional Estates Ltd (Daniel Goldberg)  Agent: GL Hearn Limited (Paul Woods)

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We submitted comments to the proposed submission draft version of the Local Plan on 18 July 2016 in respect of Policy A5 (Comment ID PSLPS16/1150) on behalf of our client, First Regional Estates Ltd, which is the owner of the Jewsons builders merchant site. Our comment on the opportunity to incorporate the provision of a shared pedestrian/cycle route through the site has been partly addressed, however the Council has sought to keep Policy A10 in respect of the strip of land to the north of our client's site to which we maintain our objection (see our response to further amendments to Policy A10).

We maintain our objections to the other elements of Policy A5 as set out in our original representations. We also now object to the following further amendments.

Under Requirements paragraph (2), reference is made to ‘...having regard to the Sustainable Movement Corridor Supplementary Planning Document' (SPD). We understand from the Council's Planning Policy team that this SPD has yet
to be produced even in draft and will not be produced until after work on the preparation of the Local Plan is complete. We consider that the draft Local Plan is unsound in making reference to, and placing justification on, a SPD that does not currently exist.

Paragraph (3) introduces a new requirement that vehicular access to the site will be from Station View. Our client strongly objects to this new requirement on the basis that restricting vehicular access from Walnut Tree Close as part of any redevelopment of the Jewsons site would serve to restrict the options and flexibility for redevelopment and so undermine the site's redevelopment potential. Access from Station View is secondary access to the site and Station View is not adopted highway. In our view, it is difficult to see how vehicular access from Walnut tree Close to serve a single development site in this location (which would have the benefit of additional access from Station View) would give rise to traffic generation levels which would undermine the Council's aspirations for a sustainable movement corridor in this location. On this basis, we consider that the restriction on vehicular access is unnecessary and is unsound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We maintain our original objections to the submission draft Local Plan. With respect to the proposed further amendments, we recommend deletion of '...having regard to the Sustainable Movement Corridor Supplementary Planning Document' under paragraph (2) and deletion of paragraph (3).

4. I object to the inclusion of land at Garlick’s Arch, Burnt Common and the proposed 400 houses and 7000 sq m of industrial warehousing on that site (Policy 43). Policy A43 and A43A were included at the last minute. They were not in the Regulation 18 draft and had not been consulted upon prior to the inclusion 2016 Local Plan.

5. I object to the impact of Policy A43 on ancient woodland on that site, on noise pollution and air pollution levels. The site is also prone to flooding.

6. I object to the impact of Policy A43 and A43A on local infrastructure. Congestion levels on A247 are already increasing at an alarming rate and will be further exacerbated by the development of Garlick’s Arch as the residents will have to rely on the use of private cars.

7. I object to the unsustainable nature of the site at Garlick’s Arch (Policy 43).

8. I object to the inclusion of policy A43 of 7000sq m of industrial warehousing as the latest £ Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft. Slyfield Industrial Estate still has spare capacity and could accommodate any additional warehousing need if required.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
In particular, I object on the following basis.

1. I object to the creation of a new 4 way interchange onto the A3 on the A247 (Policy A43A) as this would add to the ever increasing levels of traffic on the A247, A3 and through Send and Clandon. Send would become a through route to and from the A3 and will become gridlocked all day.

2. I object to the impact that Policy A43A will have on the air quality for those living in the surrounding areas and for future generations.

3. I object to the impact on residents that the resulting noise pollution of Policy A43A will have.

Objections to the 2016 local Plan

Following the approval of the revised Local Plan by the full council of Guildford Borough Council on 24th May, I would like to make it clear that I object to the provisions set out in the Local Plan as they threaten to destroy the established nature and identity of our villages by building on Green Belt land and will add considerably to the already unacceptable levels of traffic on the A3, A247 and M25 and many other roads in the borough.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 5: The examination

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the limited consultation period.

I object to the last minute inclusion of new sites with less than 2 weeks notice.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/569  Respondent: 15240161 / R O Moore  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

10. The proposed Infrastructure Schedule (Appendix C)

The Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/568  Respondent: 15240161 / R O Moore  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
9. The Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough. This is more than double the figure of 322 used in previous plans.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/790   Respondent: 15240161 / R O Moore   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

6. The inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch, which has ancient woodland, is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance. The Plan states the preference is for the use of previously developed land. GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

3. Road congestion that development will cause to the local village roads because of lack of road infrastructure (Policy I1)

There is too much traffic in the villages already and this plan will cause more congestion in Ripley, Send and Clandon. The rural roads in this area are narrow, in poor condition (eg Polesden Lane) and have no footpaths. 5000 more houses means unsustainable traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1622  Respondent: 15240161 / R O Moore  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

13. The lack of proper infrastructure planning for sites (Policy I1)

There are no adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43). There are no plans to improve the capability of the medical, emergency and other services to cover the proposed developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1623  Respondent: 15240161 / R O Moore  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

14. The congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

According to Highways England, no real improvements to the A3 or M25 are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

I wish the above objections to be fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
11. Poor air quality concerns (Policy I3)

The huge developments, particularly in the north east of the borough will lead to further congestion and greater levels of air pollution, which will have a detrimental effect on the health of local residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1618  Respondent: 15240161 / R O Moore  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

2. Removal of Green Belt (Policy P2)

Ripley, Send, Clandon and sites at Wisley Airfield (A35) and Garlick’s Arch (A43). must not be removed from the Green Belt, I object to the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
### Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

### 4. Development in areas which are at risk of flooding (Policy P4)

The Plan does not take adequate account of flood risk as required by National Planning Policy. The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment.

**Objections to Guildford Borough Proposed Submission Local Plan (June 2016)**

I lived in Kiln Lane, Ripley for over 22 years and object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016) on the following grounds.

1. **The development proposed is not sustainable (Policy S1)**

13,860 new houses will damage local communities by over development, especially Ripley, Send and Clandon. We don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services and resultant car usage will be high. The Plan has nothing to improve the infrastructure for the Garlick's Arch area. The Plan takes no account of the effects of the recent referendum which rejected UK membership of the EU any may reduce the demand for new housing in the future.

7. The Borough Wide Strategy (Policy S2)

The Plan is unbalanced across the borough; there is too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11% of the existing housing.

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will lead to a loss of village identities.

- There is no provision for improved road traffic access/facilities. The road conditions in East Lane reflect those of an undeveloped country!

- There is no viable provision for additional infrastructure to accommodate the proposal; no references are made to mitigate for increased needs for improved public transport (bus and rail/rail parking), medical and educational needs (Primary & Secondary).

- The increase in demand on existing shopping and parking facilities would prove highly detrimental to all those using them.

- Waste water and sewage requirements are not adequately provisioned for and the inclusion of proposed builds in FRZ 2/3 are not suitably mitigated.

Please do not proceed with this ill conceived plan!

I am writing to object, in the strongest terms, to the above mentioned plan for the following reasons:

- Policies P1 & P2 are clearly at odds with your policy of protecting the Metro Greenbelt and AONB from inappropriate development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/1632  Respondent: 15240673 / Chris Cook  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- Policy S2 proposes a ridiculous volume of new higher density homes (385) which will completely change the character of the village to its' detriment. A very small volume of affordable homes should be considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/800  Respondent: 15240929 / P. A. Finch  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the developments as Garlicks Arch is protected as it is in a Green Belt area and there are no exceptional circumstances to remove it from the Green Belt as housing need is not an exceptional circumstance as stated by Central Government.

The plan states that it would be preferable to use previously developed land but Guildford Borough Council have removed a brownfield site at Burnt Common without reason.

I object to the proposed new industrial sites at Garlicks Arch as this will result in a loss of employment for local people in the four existing rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2 I object to the proposed on/off ramp at Burnt Common. This will increase the amount of traffic going through Ripley, Send and Old Woking and should there be any closure on the A3 the traffic will be diverted through these villages, as it has been in the past, and the roads will be gridlocked.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1645  Respondent: 15240929 / P. A. Finch  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

6 I object to the Borough wide strategy for over 13,000 new houses without any constraints. This differs to all the other borough councils in Surrey and is over twice the figures for previous years. There is already too much new development in Wisley, Ripley and Clandon. If the proposed development goes ahead then these villages would lose their individual identities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
5 I object that there are no plans to improve schools, medical services or the utilities which are almost at full capacity now. The local shops would not cope with the population increase as there is already serious congestion around local shops especially in Ripley and parking is a real problem with people parking in restricted areas just to be able to use the local amenities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1643  Respondent: 15240929 / P. A. Finch  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have lived in the Ripley area for 46 years and therefore list below all my objections to the proposed developments at Garlicks Arch, Wisley and Gosden Hill.

1 I object to the congestion this will cause. There are no railway stations in Ripley and Wisley and no reliable bus service. This will result in an increase of road traffic as everyone will be using cars. The local roads are narrow and in bad repair.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/1646  Respondent: 15240929 / P. A. Finch  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7 I object to the damage that would be caused by the proposed plan to the wildlife and the ancient woodland with the old oak trees.

8 I object to development in areas which are at risk of flooding. The area at Garlicks Arch has flooded many times in the past and is therefore at greater risk.

9 I object to not protecting the green belt.

10 I object to the villages of Ripley, Send and Clandon being removed from the green belt as there are no exceptional circumstances to remove these villages from the green belt.
I wish my objections to be taken into consideration.

This proposed development of area covered by A46 (Normandy and Flexford) is totally wrong for a "Greenbelt" designated site(s).

Suddenly, this so-called protected area can be released to suit-- I would suggest that few, if any, planning committee members live here or in the region, if they even know where it is, or they would be totally aware of the problems that already exist in this village, like basic infrastructure, and the already increase in the volume of traffic "rat run" and all that that entails. Many suffer with unreliable drainage, and the 2 bridges in Westwood Lane and Glaziers Lane have their own problems. We certainly do not need another school in this area, and I know the reasons why not, have been covered by those with far more knowledge of this than myself.

Over the 50+ years that we have lived here, there has been much infilling between properties, which has happened gradually, and any extra strain on local amenities has been slowly absorbed, but to put in developments en masse such as suggested by A46 is pure madness, and will totally swamp the surrounding facilities, such as they are. We are already faced with a "pincer movement" from the travelling community, which has its own intricacies, please don't add to an already overloaded village, and destroy what was once described many years ago as" an unfortunate example of ribbon development"-- we like it that way, and the "lungs" of the village give us space to introduce our families and friends to wildlife and recreation.

We therefore strongly object to Planning proposal A46

John and Patricia Short

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to strongly object to this plan. The draft local plan includes Policy A57 which proposes 4 traveller pitches to be formally established at The Paddocks, Rose Lane.

The current occupant has temporary consent until 2018, granted by the appeal inspector in 2015; in conclusion, the inspector wrote:

"Overall, therefore, I conclude that "temporary planning permission being granted for a temporary period of 3 years."

This summary by the inspector hardly implies an expansion of the site to 4 pitches, and although the policy specifies single family occupancy, this will be impossible to control and multi-family occupancy will result, if not already in place.

Policy A57 states: "Bricks and mortar housing, or any buildings capable of being converted to bricks and mortar housing, are not appropriate and will be resisted on this site"

As has been reported, a brick dwelling has already been constructed on this site in direct disobedience to the Council's edict.

If this policy is realised, the expansion of this sensitive green belt site is likely to continue indefinitely - on the lines of the West End Farm development which we saw in 2009, which in the end was only stopped by private legal action.

So please register my STRONG objection to this plan. It is not in line with the Green Belt regulations, is not in accord with the atmosphere of Ripley village, and has strong objections from the local residents.

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling
2. The increased volume of car traffic. A proposed development of 2,068 homes
3. The congestion this traffic will cause on the narrow rural roads in Ockham and
4. The danger this traffic will be to local cyclists and pedestrians, due to the
5. The increase in the already severe congestion on the Strategic Road Network
6. The lack of suitable public transport. The local rail stations of Effingham and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars would result in an estimated 4,000 additional cars on the roads on the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
7. The absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
8. The A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest. Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I STRONGLY object to the 2016 Draft Local Plan on the following grounds:

I PARTICULARLY OBJECT to the erosion of the Green Belt.

I OBJECT to the lack of any evidence for the alleged housing need numbers

I OBJECT to the last minute inclusion of new sites with less than 2 weeks notice

I OBJECT to the limited consultation period

I OBJECT to any removal of any villages from the Green Belt

I OBJECT to a disproportionate amount of development in a single area

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as ThreeFarms Meadows (TFM) –A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected. D3

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons. I am writing again, and I require confirmation that all of these comments together with all my previous comments are passed to the Inspector.

I object strongly to many of the things in the plan, including the following:

There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.

The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

I consider for these reasons and many others that this plan is unsound and not fit for purpose and I strongly object to it. I would be grateful to know that my objection has been received and sincerely considered.

**Strategic Site A46 – Normandy/Flexford**

I wish to record my strong objections to the above site which has been included in Guildford Borough Council’s draft local plan.

The plan to build 1,100 homes, a secondary school, a nursing home and traveller pitches on Green Belt land is obviously developer led and no constructive thought has been given to the following:

- **Road Safety**

Glaziers Lane is an unclassified road and Westwood Lane is classified as a C-class road. The amount of traffic which already uses these roads is immense. They are often used as ‘rat runs’ by vehicles taking a short cut between the A31, A323 and the A3. Because the Lanes are narrow, cars park on the footpaths leaving no room for parents with pushchairs or carers with wheelchairs to get past them so they have to step out onto the roads in order to get past. There is no continuous footpath along Glaziers Lane and people have to cross the road at various points in order to walk on the footpath. Street lighting is also poor in Glaziers Lane. If owners of cars from the proposed housing estate are commuters there are insufficient parking spaces at Wanborough Station and this will lead to more cars trying to park in Glaziers Lane. Also, Wanborough Station car park floods when there is heavy rainfall. There is a humpback bridge over the railway line in Glaziers Lane and despite the electronic 30 mph speed signs cars often exceed the speed limit which is extremely dangerous at this point because of poor sight lines over the humpback bridge. There is also a single-way road under a railway bridge in Westwood Lane with a height restriction so double-decker buses are not able to use this route.
A nursery school is run at the Emmanuel Church in Glaziers Lane. Traffic is especially busy here when parents drop off and collect their children. A proposed entrance in Glaziers Lane to the new estate would be close to the church and, in my view, could pose safety problems for the small children and their guardians. Staff who work at the nursery school have to park in Glaziers Lane as the area at the front of the church is used as a play area for the children.

- **Services**

Glaziers Lane is prone to flooding when there is heavy rainfall and there have been problems with the sewers backing up. Our garden has been flooded with sewage in the past. Normandy also suffers from frequent power cuts so there would be extra pressure on the already stretched water and electricity services.

Extra pressure would also be put on the medical services in the village. It is difficult already to obtain an appointment at the local doctors’ surgery. The practice cannot be expected to appoint more doctors because of the influx of more people from the proposed 1,100 homes in the village. Where would these people receive medical care? This could lead to more pressure on the Royal Surrey Hospital to cover people’s immediate medical needs.

- **School**

There is no need for a secondary school in Normandy as there are places available for children at Ash Manor School and Kings College and the new Hoe Valley School. If houses are built first in Normandy these children would have to attend other local schools but if the school is built first there would not be enough children to warrant a large secondary school being built. The building of the Hoe Valley School is in its first stages and already traffic jams are building up on the Egley Road because of services being installed and the site traffic. Glaziers Lane and Westwood Lane would not be able to cope with all the extra site vehicles and traffic which would be using the Lanes for the proposed housing estate and school.

I am extremely concerned that, since the referendum Taylor Wimpey’s share prices have fallen dramatically and should permission be granted for this developer to build the 1,100 houses, the school, the nursing home and all the other services they say they will provide, they will renege on providing the land for the school because of lack of funds. Without the school there would be no need for such a large housing estate and I feel Guildford Borough Council should take their responsibility to the people of Normandy very seriously and remove this developer led project from the local plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

**Comment ID:** pslp172/1789  **Respondent:** 15241281 / Susan Burchett  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A46

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**
I am writing in support of Guildford Borough Council’s decision to remove site A46 (the proposal to build 1,100 homes and a school on land to the south of Normandy and north of Flexford) and the removal of site A47 (the proposal to build 50 homes on land to the east of the Paddocks, Flexford.) The infrastructure would have been unable to cope with developments of this size, namely the roads, wastewater, sewage, flooding, electricity supply and also the health care.

I also object to the removal from the Green Belt of homes in Guildford Road, northern end of Glaziers Lane, Flexford, Walden Cottages and Palm House Nurseries traveller site. This could enable future development within these areas at a much higher density and could give greater success for future planning applications. In my opinion this is a wrong decision as these areas contribute to the ‘openness of the Green Belt.’

Thank you for listening to the views and concerns of the residents who wrote to you previously regarding the implications of the proposed building in Normandy as set out in the draft Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to the following with reference to the above development.

We object to the Local Plan as the development proposed is not sustainable.

We object to not protecting Green Belt land between the villages. Ripley, Send and Clandon

We object to due to congestion that development will cause to the local village roads and lack of road infrastructure.

We object to development in areas which are at risk of flooding and have done so in the past.

We object to the inclusion of the land for new on/off ramps at Burnt Common.

We object to the inclusion of the land at Garlick’s Arch, Send Marsh/ Burnt Common and Ripley.

We object to the poor air quality that extra traffic will make within the villages as traffic use to connect with M25 and A3 every day.

We object to the lack of proper infrastructure planning for site .

We object to 400 houses and 7000 sq meters of industrial buildings opposite Send Marsh road. The site floods and is covered by ancient woodland. The industrial space is not needed but if it were it should be at Slyfield. Guildfords housing requirements have been shown to be grossly exaggerated and they have refused to disclose their calculations. With proper use of brownfield sites this Green belt is not needed.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Policy A42 Clockbarn Nursery, Tannery Lane

1) to the increase to 60 homes in place of 45 homes is 33% and too much for our area.
2) It ignores all the hundreds of previous objections made by local people.
3) It will worsen access and traffic problems in Tannery Lane and at the A247 Junction.
4) It will make erosion of the Green Belt in our village worse.
5) It will make surface water flooding, which is already bad, even worse.
6) It will impact open countryside views from the River Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A43 Land at Garlick’s Arch, Send Marsh.

1) it ignores all the thousands of previous objections made by local people.
2) there is no proven demand for Travelling Showpeople plots in this location.
3) it is beautiful permanent Green Belt and no “exceptional circumstances” exist.
4) it will cause over-development of our village and the number of homes is excessive.
5) it is exquisite ancient woodland that existed the time of Elizabeth1.
6) it will join up Ripley and Send and defeat the key purpose of Green Belt.
7) it is subject to frequent flooding and is currently a flood zone 2 allocation.
8) it is contaminated by lead shot accumulated over fifty years.
9) it will generate excessive traffic that will block up the local roads of Send and Ripley which have very heavy traffic now without accommodating extra traffic this will cause.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Policy A58 at Burnt common

1) there is no need to build industrial or warehouse development in the middle of Green Belt when Slyfield and Guildford still have empty sites and industrial units.
2) the impact on small surrounding roads will create traffic gridlock.
3) it will join up existing villages and defeat the purpose of Green Belt.
4) the 2017 employment land need assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/465  Respondent: 15241313 / Christine Relf  Agent:

---
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Belt, Policy 2 at paragraph 4.3.15

1) it is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation.

2) there is highly restricted vehicular access along Tannery Lane in both directions.

3) further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I disagree with the suggestion to remove East Horsley from the greenbelt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the proposed development at Send Hill, because I understand that the area for the proposed development would be where there was a landfill and there are pollutants as well as dangerous gases that if released, would cause concern of the health of the people in Send Hill and areas around. I moved to Send Hill so that in my wives later age she can have a better health. She suffers from **Asthma** & other breathing problems. I am not happy at all about this proposed site as I believe this proposed plan did not consider peoples views and so is illegal.

There are NO changes I can think of that would work in this area, for the reasons I have mentioned above. I am just a retired man who wants a better quality of life for my wife and myself. If this land is 'worked on' I hope Guildford County Council realizes that there may be serious consequences for the chamber to face.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Send village being removed from the Green Belt. On section 9, paragraph 79, of the Planning Practice Guidance. communities.gov.uk, "The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open: the essential characteristics of Green Belts are their openness and their PERMANENCE" Who gave you the right to change something that has and should be PERMANANT?

You should reconsider this move as it will alienate Guildford Council from it's residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

The argument that a high school is needed in the area is not valid as the only reason we would need one is due to an influx of residents at one time such as a whole new development of houses. The village is great the way it is and you are going to negatively impact our way of life by bringing in so many new people at once

Recent and compelling evidence has shown that Guildford has greatly over-estimated its population growth. Guildford's proposal for more than 12,426 homes (plus a buffer of 1,155 homes) is excessive and will result in needless loss of Green Belt and green character, and increased congestion, that cannot be justified in our already constrained borough.

Allocating too much land for development in the 2017 Plan will result in Guildford being required to provide homes for Woking on our Green Belt, which is irrational and reckless given the severity of congestion in Guildford, a gap town set in the Surrey Hills AONB. We do not need to sacrifice so much Green Belt nor increase town cramming simply to provide for Woking's unmet housing needs. We will be sacrificing our Green Belt to protect Woking's, and I strongly oppose this.

We need our Plan to be based on real figures, not one with inadequate infrastructure and destruction of Guildford's precious green character.

Please refer to the attached representations in section titled "Policy D2: Sustainable design" for our comments in detail

[Relevant comments from attachment added below - Planning officer]

**Policy 02: Sustainable design, construction and energy** This policy is unsound in parts and conflicts with national policy:

This policy does not support the requirements of sustainable development

Sustainable development is a golden thread which runs through the National Planning Policy Framework. As a result, all development should be achieving sustainability as part of overarching planning policy. Persimmon Homes ensure that all development sites are in sustainable locations and look to achieve the highest levels of sustainability.

This Policy states that strong support will be given to proposals for zero carbon development. As part of such development the following are set out as points that must be delivered as part of any new development:

- The highest levels of energy and water efficiency that are achievable and,
- The lowest level of carbon emissions that is achievable

As with Policy H2 regarding Affordable Homes, Persimmon would not support proposals that result in unviable development. There is ambiguity as to what 'the lowest level of carbon emissions' means and we have reservations about its enforcement. Further down in the policy there is mention of a requirement to achieve a reasonable reduction of at least 15%. It is unclear as to whether this figure relates to the lowest level of carbon emissions that is achievable or if this is a set figure which has to be achieved. In addition to this, the planning contributions SPD has an existing requirement for a reduction of 10% for carbon emissions.

Persimmon Homes have reservations that any change from the existing reduction of 10% would have an impact on the viability of future schemes. We are unsure as to whether it would be practicable for delivery of the level of housing
required if an increase in reduction was required. In addition to this, Persimmon also has reservations about the practicality of having all developments connect to (C)CHP distribution networks as there are a number of areas within Guildford where such a connection will not be possible. This will therefore have a further impact on the viability of schemes and will restrict developments to particular areas, in a borough which is already heavily restricted by Green Belt. It is arguable that this policy does not align with sustainable development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy 02: Sustainable design, construction and energy

This policy is unsound in parts and conflicts with national policy: This policy does not support the requirements of sustainable development

Sustainable development is a golden thread which runs through the National Planning Policy Framework. As a result, all development should be achieving sustainability as part of overarching planning policy. Persimmon Homes ensure that all development sites are in sustainable locations and look to achieve the highest levels of sustainability.

This Policy states that strong support will be given to proposals for zero carbon development. As part of such development the following are set out as points that must be delivered as part of any new development:

- The highest levels of energy and water efficiency that are achievable and,
- The lowest level of carbon emissions that is achievable

As with Policy H2 regarding Affordable Homes, Persimmon would not support proposals that result in unviable development. There is ambiguity as to what 'the lowest level of carbon emissions' means and we have reservations about its enforcement. Further down in the policy there is mention of a requirement to achieve a reasonable reduction of at least 15%. It is unclear as to whether this figure relates to the lowest level of carbon emissions that is achievable or if this is a set figure which has to be achieved. In addition to this, the planning contributions SPD has an existing requirement for a reduction of 10% for carbon emissions.

Persimmon Homes have reservations that any change from the existing reduction of 10% would have an impact on the viability of future schemes. We are unsure as to whether it would be practicable for delivery of the level of housing required if an increase in reduction was required. In addition to this, Persimmon also has reservations about the practicality of having all developments connect to (C)CHP distribution networks as there are a number of areas within Guildford where such a connection will not be possible. This will therefore have a further impact on the viability of schemes and will restrict developments to particular areas, in a borough which is already heavily restricted by Green Belt. It is arguable that this policy does not align with sustainable development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

This representation has been prepared by Persimmon Homes and constitutes Persimmon Homes Limited's formal response to the above consultation. These representations cover our responses to two policies which are included within the emerging Local Plan. As part of the Persimmon Group, the company represents one of the largest house builders in the UK and is a significant stakeholder with a vested interest in the long-term future of Guildford Borough.

We would like to submit the following representations on the Local Plan and we would welcome, in due course, participating in hearings of the Examination in Public.

Policy H2: Affordable Homes

The policy is unsound because it is contrary to national policy: the increase proposed is not supported by evidence and is unjustified.

This policy states that "on sites providing five or more homes, or sites of 0.17 ha or more regardless of the number of homes. At least 40 per cent of the homes on these sites must be affordable homes". This equates to at least 5,544 affordable dwellings over the plan period.
Persimmon Homes accept that there is a need for affordable housing as part of residential development within the borough. Persimmon Homes are also willing to contribute positively to assist in increasing the supply of affordable housing within the borough.

Guildford is subject to a number of significant constraints to housing development such as the high level of Green Belt land which limits the amount of land available for development that does not carry this designation. It is important that, given Guildford's housing needs of 693 dwellings per annum, the Borough remains an attractive proposition for developers in order to deal with this challenging housing need. The West Surrey Strategic Housing Market assessment (SHMA) highlights that across the Housing Market Area (HMA), comprising Guildford, Woking and Waverley, it is Guildford which has the highest level of under-supply with a shortfall of 419 dwellings against its housing requirement. There is, therefore, a concern that Guildford will struggle to achieve the housing requirement, or close to it, due to a pre-existing under deliver on a housing requirement of 322 dpa which is significantly lower than the need as set in the emerging Local Plan of 693 dpa.

It is understandable that an increasing housing requirement will naturally lead to an increasing affordable housing target, however we do not believe that this warrants a 15% increase in affordable housing provision. The Local Plan 2003 set out a requirement of 25% of all new developments to provide affordable homes. This was supplemented by the Planning Contributions Supplementary Planning Document (SPD) which set the affordable homes requirements at 35% in 2011. Using this as a starting point, there is insufficient evidence to justify an increase up to 40%. By increasing the affordable housing requirement this will jeopardise delivery. Guildford has shown under-delivery with the affordable homes requirement of initially 25% and then subsequently 35% and so there is no evidence to show that delivery will increase sufficiently to justify a further rise in affordable homes requirements. Any increase will impact on the viability of schemes which are already challenging to achieve within the Borough. Until Guildford can show a reasonable rate of delivery over a sustained period of time then there can be no justified reasoning behind increasing affordable homes requirements.

We would advocate that the Council should keep the affordable housing requirement at a maximum of 35% as stated within the Planning Contributions Supplementary Planning Document (SPD). The Council must deliver housing and development sites must therefore be considered to be viable. Any increase in affordable housing requirements would have a detrimental impact on the delivery of housing sites, which at this point Guildford cannot afford to do. The increase in housing requirements from the interim figure from the Local Plan 2003 of 322 dpa to the newly established 693 dpa in the emerging Local Plan will be even more challenging to deliver given the limitations on available land and the costs of acquiring land in the south-east and particularly the Surrey commuter belt. These factors must be considered when establishing if a scheme is viable and an addition of a largely unjustified increase in affordable housing requirement will only exacerbate issues of delivery and impact on the viability of such sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Guildford BC planning context & housing numbers

Guildford BC is currently in the process of producing a new Local Plan which is to cover the period 2013 – 2033 and guide development within the borough and is to be compliant with the National Planning Policy Framework (NPPF). This representation is in response to the Regulation 19 consultation phase for the pre-submission version of the draft Local Plan. Persimmon Homes are pleased to have been given the opportunity to make representations on this concerning the Site and general planning matters within the Borough. Persimmon are also pleased that Guildford BC has acknowledged the significant challenges that the borough faces in delivering sufficient housing to meet its needs. The previous interim housing figure of 322 dwellings per annum agreed on May 2012 did not take account of up to date assessments of housing need and therefore was not NPPF compliant. The reliance on this figure has meant that Guildford BC has significant under-delivered on their housing requirements over the past five years as shown in the below table:

<table>
<thead>
<tr>
<th>Year</th>
<th>Net Completions</th>
</tr>
</thead>
<tbody>
<tr>
<td>10/11</td>
<td>190</td>
</tr>
<tr>
<td>11/12</td>
<td>262</td>
</tr>
<tr>
<td>12/13</td>
<td>234</td>
</tr>
<tr>
<td>13/14</td>
<td>137</td>
</tr>
<tr>
<td>14/15</td>
<td>242</td>
</tr>
</tbody>
</table>

As the housing completions above show, Guildford has not only been under-delivering against the now up-to-date Objectively Assessed Need (OAN) but there has also been consistent under-delivery against the interim housing target, which also needs to be factored into an emerging housing target moving forward.

The most recently produced Annual Monitoring Report (AMR), published in October 2015 for the period 2014/2015 showed that net completions of dwellings in the borough for this period was 242 and that the majority of homes completed in this period are on sites of under 20 homes. As the AMR notes “the number of new homes completed this year (2014/15) is still lower than required to meet our objectively assessed need…contributes to a growing deficit of new homes”. The recommendation within the AMR following this states that “housing provision is currently restricted by the lack of available and deliverable development land in the borough….delivery rate is only likely to increase when larger areas of land are suitable and available for development”. This shows the necessity for suitable and available sites to be considered and this should apply to all sites within the borough that meet this criteria. Persimmon Homes have control of the Site through an option agreement with the landowners and the Site is available for development. The council also consider the site to be suitable for development, having identified it within the proposed submission Local Plan.

i. Objectively Assessed Need

Guildford Borough has an indentified (OAN) of 693 dwellings per annum following the conclusions of the West Surrey Strategic Housing Market Assessment (SHMA) produced in September 2015 by GL Hearn. This assessment was carried out as part of the Housing Market Area (HMA) known as West Surrey which included Waverley and Woking in addition to Guildford. Persimmon have concerns that the SHMA may have under-estimated the OAN for Guildford due to migration from London into the borough expected to increase and by downplaying the need for jobs. The most recent population projections produced by Office of National Statistics (ONS) shows that by 2037, the population of Surrey is expected to increase by over 200,000 and this increase is anticipated to be faster than previously considered based on 2012 population figures, which have informed the SHMA which in turn has informed the housing requirement for the new Local Plan. It can be expected that a large proportion of this increase will be in the West Surrey HMA due to its proximity to London, strong rail connections and reputation as being part of the commuter belt and a desirable place to live. It is on this basis that Persimmon believe that the OAN to be inaccurate and should be revised upwards taking into account the increases based on the 2014 projections as opposed to the 2012 figures. This should, in turn, mean that the housing requirements in the new Local Plan should also be revised upwards, taking into account the updated projections; the constant under delivery in recent years and the need to better allow for flexibility within the plan for economic growth reasons etc.
This point is further supported by the established planning principle of seeking to plan for balanced growth in jobs and homes where possible with a view to reducing the need to travel and commuting distances. The SHMA identifies that to support the forecast growth in employment a high level of growth is needed.

ii. Five-year supply of deliverable housing land

Paragraph 47 of the NPPF states that there is a requirement for Local Planning Authorities (LPA) to “identify and update annually a supply of specific deliverable sites sufficient to provide five years worth of housing against their housing requirements with an additional buffer of 5%...where there has been a record of persistent under-delivery of housing, LPAs should increase the buffer to 20%”. It has been established that GBC cannot demonstrate a robust five year supply of deliverable housing land and at best the Council can show 2.5 years supply whilst at worst this drops to 1.4 years. It is also clear that Guildford has persistently and consistently under delivered and therefore those sites, which are capable of coming forward sooner should do, without being fettered by ill conceived policy requirements.

ii. Housing requirements within new Local Plan (2013-2033)

The pre-submission version of the draft Local Plan makes provision for the delivery of 13,860 new homes over the plan period (2013-2033). This equates to 693 dwellings per annum which matches the identified housing need through the SHMA. The draft Local Plan states that “the delivery of new homes is expected to increase over the plan period, reflective of timescales associated with delivery of strategic sites”. The draft Local Plan sets out the housing delivery in different tranches as below:

Annual Housing Targets (as set out in the draft Local Plan – Policy S2)

The above shows that there is proposed to be an increasing level of delivery over time as the plan progresses through the plan period. On this basis, to ensure the minimum housing requirements are achieved, over the first five years of the plan an average of 693 dwellings per annum are to be delivered. This raises an immediate concern given that GBC cannot demonstrate a five year land supply of any better than 2.5 years. As the net completions table also shows, the first two years of the plan period 2013/14 and 2014/15 have delivered significantly fewer than 693 dwellings per annum. We are concerned that insufficient sites have been identified to deliver this housing provision and concerns particularly over the deliverability of Wisley Airfield. Should the airfield be unable to deliver the allocated 2068 dwellings as proposed, then this number will have to be subsumed in other areas and given the local opposition to this scheme and impact on the highway network the deliverability of Wisley Airfield must be strongly questioned.

It is therefore clear that the evidence used for the Proposed Submission Local Plan Strategy from a housing perspective is not adequate or up to date.

Does the SHMA use the latest housing projections?

In addition, for those reasons above, whilst we recognise that the council has made some difficult decisions concerning some of the large strategic allocations, these are by their very definition slow to deliver units and it is clear that the council are not planning to deliver any meaningful increase in supply in the short term and for these reasons, those sites which are capable of delivering units quickly within the first five years of the plan should be considered favorably; this includes land to the east of Foreman Road, Ash.

With regards to more specific comments, Persimmon Homes are pleased that both policies A29 and A30 identify the site for development, however, we do not believe for those reasons below, that the identification of a road through part of the site is appropriate; feasible or indeed the correct approach. For the reasons set out below it is therefore clear that the evidence used for the Proposed Submission Local Plan Strategy and Sites is not adequate, up-to-date or indeed relevant.

The following comments should be read alongside the Odyssey Markides Technical Note dated July 2016, which accompanies these representations. We have drawn some of the comments within the Technical Note out, but expansions of these points are made within the note.
Two land allocation policies of note in the draft LP are Policy A29 and Policy A30. Policy A29 is a land allocation for up to 1,200 dwellings on land adjacent to that in control of PHTV, between Foreman Road and Harper’s Road, as well as other small areas to the west. Policy A30 allocates land which is, in part, under the control of PHTV for provision of a new railway over bridge for vehicles and pedestrians. This new bridge will facilitate the closure of the existing level crossing on the A323 Guildford Road allowing unrestricted movement along the A323 and safer crossing for pedestrians; refer to Drawing A/GBC-ASHSTATION.1/04 (Mayer Brown, November 2015).

Having reviewed the proposed railway over bridge it is apparent that it has been designed with some relaxation in Design Manual for Roads and Bridges (DMRB) standards applied, in order to allow the bridge to closely align to the existing route of the A323. A 30mph design speed has been used, with 90m forward visibility provided.

Based on this data it is considered that although implementing a new bridge over the railway line would be effective in reducing delay to the local highway network, it is not necessary in highway capacity terms as the operation of the level crossing would still be within capacity even after the LP developments are implemented.

The new bridge is set out in the Guildford Borough Transport Strategy 2016 as Local Road Network (LRN) Scheme LRN21 ‘New road bridge and footbridge scheme to enable level crossing closure on A323 Guildford Road adjacent to Ash railway station’. Its status is ‘Anticipated’ and its estimated cost is ‘£15m’, with delivery between 2017 and 2026.

Those schemes categorised as anticipated are ‘subject to a positive business case, funding can be secured, and planning and statutory approvals are likely to be achieved’.

The GBC Infrastructure Schedule, contained in Appendix C of the draft LP, states that the likely cost is £15m and the likely funding sources will be developer contributions, Local Growth Fund and from Network Rail. This document sets the delivery timescale as between 2018 and 2022.

It is reasonable for some material funding to come from developers of ‘Land to the South and East of Ash and Tongham’ for 1,200 residential dwellings, as set out in Policy A29.

It is however understood from the Enterprise M3 Local Enterprise Partnership (LEP) that there has been no submission made to the LEP for funding. The latest Expression of Interest (EoI) for the Enterprise M3 Local Growth Fund closed on 31 March 2016. This EoI allows for funding requests for schemes up to the year 2020/21. As the new railway bridge is stated as being delivered before 2026 it is therefore concluded that either (1) the bridge would be funded by developer contributions and Network Rail only or (2) that LEP funding will be requested in future and the delivery of the bridge would occur towards the end of the suggested delivery timescales (i.e. 2026).

It is not clear how much funding Network Rail would be providing for this new bridge. Network Rail would likely have to also fund a new pedestrian / cycle footbridge with lifts in order to maintain, or improve, the current level of accessibility for local residents. Relying on pedestrians and cyclists using the new bridge would be contrary to this given the material greater distance to cross the railway line and the steepness of the proposed crossing. The cost of the footbridge with lifts could be c.£1.5M.

It is therefore unclear why GBC would classify this new bridge as ‘anticipated’ rather than ‘aspirational’. Aspirational schemes are classified as ‘a strong business case will need to be demonstrated in order to secure funding as the estimated cost presently exceeds typical funding envelopes and / or there are significant planning and statutory approvals to be achieved’.

No details are publically available with respect to the vertical alignment of the new bridge; however, it appears that the northbound forward visibility over the bridge would be materially compromised.

This is due to the gradient of the road between Foreman Road and the crest of the bridge, which would likely materially reduce the forward visibility in the vertical plane.

The forward visibility would also be impinged by the actual bridge structure. The bridge would need material safety structures and barriers along the edge of the parapets and embankments for both pedestrian and driver safety. As these
would be a solid structure of over 600mm in height it would therefore compromise forward visibility, especially in the northbound direction.

Although it is understood that the location of the bridge was chosen to align as closely to the existing alignment of the A323 as possible, this alignment is not considered feasible.

It is also clear that no discussions have taken place between the parties over the delivery of the wider scheme and there is no common agreement over delivery, timings and funding etc and therefore piecemeal development will continue to come forward in the short term, further impacting upon the aspirational road scheme to come forward.

For those reasons listed above we therefore are of the view that the plan is unsound, because it is not justified, effective or indeed consistent with national policy.

For those reasons set out above we do not believe that the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant. We have set out suggested changes under question 3 below.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

For those reasons set out previously we do not believe that the plan as proposed is sound. Whilst the concept within A30 of a road bridge, is a sound one, it is obvious that the evidence base supporting both its identification and indeed location are fundamentally flawed.

A more appropriate approach would see the complete delivery of land east of Foreman Road for residential development, with land being safeguarded for the delivery of a pedestrian crossing. The road bridge could then be delivered more appropriately within the major development area. This would allow units to be delivered early within the plan period, which as has been shown previously is much needed and more importantly, will allow the delivery of a new bridge, which has been designed properly, is deliverable, appropriate and capable of serving not only existing residents, but also future ones.

It is not considered that the new rail bridge is required at this time, as the vehicle queues at the existing level crossing clear between the time that the barriers are down and as already determined by SCC the crossing would still operate within capacity even in 2031 with the addition of the LP sites.

It is however considered reasonable that there is a long-term desire to close the level crossing and provide a bridge over the railway line. It is indeed Network Rail policy to close level crossings wherever possible, in order to improve pedestrian safety and reduce rail related accidents.

If it is accepted that the level crossing should be closed and an overbridge provided in the long-term, it is considered that there is a more suitable location for the new bridge. It is considered that the bridge should be located further southeast. This would then sit across the land between the A323 and the Policy A29 land boundary and within the latter itself.

This has a number of benefits, most notably there would be more land for the road alignment to be designed to allow for sufficient forward visibility, both in the vertical and horizontal planes.

There is also the potential for a new comprehensive link road to be established between the A323 Guildford Road, through the ‘Land to South and East of Ash and Tongham’ site, to South Lane. This link road would then continue through the ‘Land South of Ash Lodge Drive’ site, as per their planning permission, to Manor Road.

The northern end of the link road could realign Guildford Road into the ‘Land to South and East of Ash and Tongham’ site, which could then provide the new bridge within land under this site’s control. This could also have the benefit of enabling the parcel of land to the north of the railway line (and west of the new road) to realise a car park or drop-off area for Ash Railway Station.
The new bridge over the railway line could also be designed to have less environmental impact, than the current proposed alignment, as it could be fully designed into the proposed 1,200 residential unit development. The spine road, south of the railway line, would connect south to South Lane and also connect to Foreman Road thus giving alternative routeing options for both development and through traffic.

The principle of a new railway bridge to come forward in the long-term alongside the closing of the level crossing is accepted; however, it has been demonstrated that this is not required in the short-term.

Furthermore, it is considered that in order to realise a suitable design, and thus implementation, a revised alignment would be needed. A more suitable and achievable location for the bridge, and the alignment of the A323 either side of the bridge, would be for it to align through the Policy A29 site. This could enable the bridge to be designed in accordance with DMRB standards with suitable forward visibility achieved.

Please see our comments and responses under question 1. Whilst the council should be applauded for making difficult decisions with regards to the increase in the housing numbers to be planned for and indeed decisions associated with Green Belt releases it is clear that the Duty to Cooperate has not been met with regards to seeking to meet the needs from London for example.

We would like the opportunity to attend the Examination in Public as we believe that the comments, recommendations and observations we have made need to be discussed in a public arena and so that we can outline the reasons for the emerging plan failing the soundness tests as drafted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4084  Respondent: 15244097 / Persimmon Homes (Craig Hatton)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A40

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This comment refers directly to the draft allocation Policy A40: Land to the north of West Horsley.

This policy remains unchanged and Persimmon Homes support this. The majority of the land included within the draft allocation is land owned by Persimmon Homes. Persimmon are the UK's largest house builder with the resources and desire to build out this site. The land included within this policy remains available, developable and deliverable within the next five years. Persimmon are however concerned by the inclusion of the element of self-build and custom house building plots within the allocation. The inclusion of this is not based on any evidence formally published which suggests that there is a need or demand for these plots on this site. Persimmon Homes fully intend to build out the dwellings themselves using their own resources. It is unclear as to where these self build and custom plots would be located.

This site is proposed to deliver a significant proportion of local housing needs within West Horsley and is a key site for development. It is unclear as to the level of demand in the local area for custom and self-builders and the Council register is not made public. Persimmon Homes have not been approached regarding the provision of self-build and custom plots on their owned land.

Persimmon would request that the reference to the custom house building and selfbuild plots are removed from this policy as the inclusion is unjustified. The inclusion of this will also jeopardise the delivery of a logical, sensitive housing development within West Horsley which will provide a suitable quantum of development, including affordable homes, in an area where this is much needed.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The proposed reduction in the housing requirement is unsound as this reduction is not justified

It is extremely disappointing that the Council have reduced their housing requirement from the 2016 iteration of the Plan to the 2017 version. Guildford's OAN has previously been identified as 693 dpa upon which the 2016 housing requirement was set, with Guildford seeking to meet its housing needs in full. This was an extremely positive step in an area where housing needs have increased significantly and where pressure for new housing is extreme. The 2017 version has lost some 1400 dwellings from the 2016 iteration, which equates to a reduction of 75 dpa over the plan period. This is a significant reduction and one which is not justified. The most up-to-date population projections produced by the Office for National Statistics (ONS) shows that by 2037, the population of Surrey is expected to increase by over 200,000 people. It can be expected that a large proportion of this increase will be in the West Surrey HMA due to its proximity and access to London and reputation as being part of the commuter belt and a desirable place to live. The OAN as calculated in the new draft Local Plan is therefore inaccurate and should be revised upwards.

The 2017 addendum to the SHMA indicates that due to changing circumstances the Borough's housing need should be reduced from 693 dpa to 654 dpa. The argument for this appears to be based on economic and migration factors. The SHMA addendum uses the 2014 household projections as the most up-to-date figures available at the time of the compiling of the evidence. These projections show a percentage increase of 1.2% from the 2012 projections used previously. The migration argument is based on both internal and international migration. The SHMA identifies that there is likely be a reduction in EU migration following the vote for the UK to leave the EU. However, as the SHMA states in paragraph 3.73 Guildford 'sees a lower proportion of EU in-migrants than was the case at a regional/ national level'. Therefore, any reduction in EU migration is likely to have little impact on Guildford. Even if EU migration is reduced, any future trading relationships established with other countries is likely to see a requirement to allow movement of people. This therefore means that there is a likely expected increase in international migration and the impacts of this do not appear to have been sufficiently assessed.

Internal migration focuses primarily on out-migration from London. At the most recent assessment, London has a substantive unmet housing need and a number of Local Authorities in London are developing Local Plans which do not appear to make concerted efforts to deal with this unmet need. The SHMA addendum identifies that migration flows from London to Guildford have been steady since 2008/9 and there has been no increase in net flows since the end of the recessionary period which is noted as being 2012. We are concerned that paragraph 3.45 seems to dismiss any potential increase in migration from London. Whilst there still remains some uncertainty regarding migration flows over the next 10 years evidence from the GLA shows that migration patterns will move towards the levels since pre-2008. The recovery in the economy and the availability of credit has seen an increase in home ownership and mortgage applications since 2012. Therefore it can be widely assumed that an increasing number of people are seeking to purchase homes where possible. London's affordability has decreased substantially and this will have an impact on those areas around Greater London which have access into the Capital for work and leisure purposes. Guildford, with a mainline train station and proximity to the A3 and M25 is historically an area where many people re-locate to from the Greater London area. In all likelihood, it is difficult to see how over the next 10 years there will not be an increase in migration from London to areas such as Guildford. That no provision appears to be made for this and paragraph 3.46 argues that there are no signals for a return to increasing levels of migration should be given limited weight as this is based on a single year of evidence.

There is an increasing need for housing in the Borough and this is coupled with an increasing requirement for affordable housing. The 2017 addendum shows that the need for affordable housing has increased to 517 dpa from the 2015 SHMA figure of 478 dpa and this is supported by paragraph 5.32 which states that 'it is clear that house price growth has accelerated in the Borough since mid-2013'. This affordability issue has been substantially affected by the low levels of housing growth in Guildford. In seven of the past eight years, Guildford has significantly underdelivered against its housing requirements. For the past seven years in a row the Council have delivered barely half of its annual housing requirement and this significant underperformance has enhanced levels of unaffordability in the Borough and is a strong justification as to why the Council should not be looking to further reduce its housing requirement. Paragraph 5.49 states that 'the analysis indicates that 629 dpa would be required to support the rebased SNPP ....... to support economic growth, a marginally higher level of housing provision at 631 dpa would be required'.

The 2017 addendum shows an increase in household projections, an increasing need for affordable homes and no consideration of the impacts of likely increased migration from London, suggests that insufficient uplifts have been included to account for these increases. The decreasing affordability is exacerbated by the Council's persistent under-
delivery against its housing requirement and therefore there is no justification as to why the requirement should be reduced in this Local Plan.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Guildford Local Plan is unsound as the identified housing delivery strategy is ineffective

Persimmon Homes believe that the proposed housing trajectory and the process of delivery is flawed and will result in significant under-delivery of expected units. The removal of the Housing Trajectory within Policy 52 is concerning and this now places a greater emphasis on the delivery towards the end of the plan period. This approach places a significant risk that the Plan may fail to meet its housing requirement particularly when there is an over-reliance on large sites being delivered for this period. This will leave the Council in a difficult position as there will be little time afforded to make up any shortfalls in delivery. This approach appears to be a way of the Council delaying development until as late in the plan period as possible and there can be no element of positive planning about this. The Council must consider smaller sites which are capable of delivering a sufficient quantum of development to run alongside the larger strategic sites. The Housing White Paper (HWP) has referred to the importance of including smaller sites to ensure a consistent supply is maintained.

The issue of deliverability is exacerbated by the Council's inability to demonstrate a five year housing land supply. The Council are unable to show this for the first 5 years of the plan period when it is in operation. There are severe concerns over the delivery of some of the larger sites upon which the Council are relying. The Plan proposes that smaller sites will deliver in the first five years with the larger strategic sites delivering in the 6-10 and 11-15 year periods. This back loading of the majority of development is concerning particularly when there are deliverability issues with some of the strategic sites such as Wisley Airfield. A planning application was refused for this site and an appeal to be heard later in the year. Neighbouring authorities Mole Valley and Elmbridge objected to this proposal and Highways England have previously raised concerns over the impact that this development will have on the A3 and M25 at junction 10.

Paragraph 47 of the NPPF states that there is a requirement for Local Planning Authorities (LPA) to "identify and update annually a supply of specific deliverable sites sufficient to provide five years worth of housing against their housing requirements". It has been established that GBC cannot demonstrate a robust five year supply of deliverable housing land and at best the Council can show 2.1 years supply. Guildford therefore need to make more land available for development as without this Guildford cannot expect to be able to show a five year supply. Guildford have removed sites from this draft of the Local Plan which are in the Green Belt and considered to be sensitive. Guildford should be looking to allocate smaller sites, which are able to contribute to providing for housing delivery in order to ensure a rolling five year land supply. The NPPF at paragraph 83 states that "Green belt boundaries should only be altered in exceptional circumstances" however we would advise that the inability to show a five year land supply should be considered to be exceptional circumstances.

In terms of an approach to assessing the five year supply it appears that the Council are favouring the Liverpool method which will see the backlog delivered over the life of the plan period. This does not accord with national policy which suggests that the Sedgefield method should be used which aims to deliver the backlog as quickly as possible and ensures
that development is not delayed. In addition to this the Council propose to use 20% buffer which we would agree with given the past delivery problems. We believe that the Local Plan is unsound as the current proposed housing trajectory is ineffective and will not provide the full housing requirement over the plan period. There is too greater a reliance on large sites and the Council should be looking to bring forward smaller sites earlier in the Plan period in order to be able to demonstrate a five year land supply.

Answer (if comment is on questions 1-7 of the questionnaire): (No)

The reduction in housing requirement for the Plan to 12,426 dwellings means that the Plan is unsound as the Council have failed to positively plan for meeting the needs of the Housing Market Area (HMA).

Persimmon are concerned that Guildford's co-operation with the neighbouring authorities within its HMA is insufficient. The HMA is made up of Guildford, Waverley and Woking of which only Woking has an adopted plan in place. Woking's Core Strategy sets out its housing requirement as 292 dpa which is 225 units below the OAN identified within the 2015 West Surrey SHMA. This results in significant unmet needs yearly and there appears to be no effective cooperation ongoing within the HMA to meet these unmet needs.

Due to the significant amount of unmet needs within the HMA it is unjustified for Guildford to consider reducing its housing requirement by 1400 units. It is unjustified on the basis that there is insufficient evidence to show that reducing its requirement is necessary and that Guildford appear to have made no attempts to assist with meet some of these unmet housing needs. The on-going examination of the Waverley Local Plan has also brought this issue to the fore. The inspector made reference to the unmet need generated within the HMA and has strongly intimated that Waverley and Guildford should be seeking to accommodate the unmet need from Woking. Similar examinations at Mid-Sussex and Horsham have resulted in recommendations that both of these authorities take 150 units each of Crawley's unmet housing needs. Horsham's plan was adopted with this requirement included and it appears that Mid Sussex's Local Plan will only be found sound if this contribution is also made in addition to increasing their housing requirement.

The SHMA addendum has been produced solely to inform Guildford's Local Plan and not in conjunction with the HMA as a whole. Therefore this addendum has only considered Guildford's needs into account rather than also considering those of the HMA. If the Council believe that a reduction was justified then the impacts of this should have been considered on the wider HMA however this does not appear to have been the case. On this basis, it can not be said that the duty to cooperate has been met and the Local Plan cannot be found sound.

As a result of this, Guildford's approach will only continue to exacerbate issues of unaffordability and increasing unmet needs for the HMA. That no consideration has been taken to dealing with the existing unmet needs is concerning. GBC by reducing their housing requirement are contributing to these unmet needs and this approach cannot be justifiable in the face of increasing unaffordability and demand. The suitability of the figures used to determine the new housing requirements are questionable in their soundness. An appropriate strategy, if the OAN were to be 654 dpa, would be to provide for an additional contribution towards the unmet needs in the HMA. The Inspector at the Waverley examination has recommended that a 150 dpa contribution be made towards these. Whilst it is accepted that Guildford's LP will be examined separately, the needs of the HMA are an important factor to which significant weight should be afforded.
Therefore, Guildford should be taking consideration to a similar provision to be included in the Local Plan. On this basis, it cannot be said that the plan has been positively prepared as require by the NPPF and therefore cannot be found sound.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There appears to be some confusion created by the conflicting Local Plan periods which are given at various stages in the draft Local Plan. The introduction section in Local Plan paragraph 1.2 states that the Local Plan is for the period 2013 - 2033 however within the Spatial Vision and paragraph 3.1, the plan is stated to cover the period to 2034 and this is the time period upon which the housing requirement is based. The plan period therefore needs clarification and is required to be clearly shown. There is no justification for the period to have been extended by a further year as most Local Plans should cover a twenty year period. Therefore, the plan period should cover the period 2013-2033 and this should be clearly shown. We would also advise that the plan period is shown on the front page of the Local Plan document to make this clear.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly support policy A21 in retaining the Westborough Allotments as allotments. I also support POLICY I4 (Green and Blue Infrastructure) in its aim of enhancing biodiversity and believe that allotments need to be specifically included in the list of green spaces in the definition of "green and blue infrastructure" in para 4.6.31 of the draft plan (page 116). As a mum of a 9 year old I have had an allotment on the Aldershot Road site for 4 years and for 4 years previously I helped another new mum with her plot on the same site. I strongly believe that allotments help physical and mental health, encourage healthy outdoor activities for whole families, help people from all walks of life interact socially about a common love of gardening, encourage healthy eating, and combat obesity.

The allotment has provided a safe place for me to take my daughter as a baby to get exercise and fresh air while also providing food for the table. As my daughter has grown she has enjoyed helping on the plot, digging, planting and harvesting. It's helped with both our wellbeing and educated her about food and where it comes from. We've also seen plenty of wild life in its natural habitat with slow worms nesting under slabs, mice in the shed and the odd brave fox. She also gets to interact with people from the older generation which gives her different and varied role models. It's a lovely oasis in an urban childhood. Even the bog toilet is an adventure.

We have adopted one of the old gentlemen as a surrogate grandad and he benefits by having a reason to visit us, to be included in our family and, get himself out and about rather than staying in and being lonely.

On our site in particular, we have a self help group WASHA which runs an educational program for children from a local school and novice gardeners. I benefited from this facility in the early years as one of the older gardeners provided invaluable mentoring. He gardens on a plot that was his dad's and which he helped on a boy so has been on the plot for 60 odd years.

Our site has been an allotment site since before the First World war. It is a site with historical value and I think it is a vital part part of the green infrastructure that enhances the landscape of Guildford. Furthermore allotments provide important recreational and health benefits for the residents of Guildford and need to be protected.

Retention of the lower vehicular access to the Aldershot Road allotments is crucial. I have one of the lower allotments and need that access point to load and unload equipment and harvests. The site is on a steep hill which makes vehicular access from the top very dangerous when the ground is wet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
We object to Guildford Borough Council's draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:
- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty

- add to Guildford's pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Whatever their merits as development sites, the 6 Horsley sites should not be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley.

Building 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the borough. It will destroy the rural character of these communities. "16

Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town. If the Council have justifiable reasons to transform a particular community so radically, the plan should present a case rather than putting forward site proposals as a \textit{fait accompli}. 

These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. For instance:

- Thames Water have advised the Council that the current wastewater network will not cope and that the foul drainage system all the way to the treatment works North of Ripley will need to be upgraded.
- Guildford Council's Education Review says "expansion options may need to be considered for primary" education in the Horsley area within the first 5 years of the plan, but Surrey County Council have no plans to do so. The Raleigh School is already full. The private Glenesk and Cranmore schools are also at or near to full capacity. The suggestion that schools in Ripley can be used contradicts the plan's stated intention to reduce traffic on the A3 and strategic aim that primary schools should be within walking distance.
- The plan's Infrastructure Schedule (Appendix C) imagines an "East Horsley and West Horsley traffic management and environmental improvement scheme between 2019 and 2023 by Surrey CC" but gives no details. This scheme is just wishful thinking. The proposed housing can only harm the local environment, not "improve" it.

The harmful impact of these sites is magnified by the proximity of the so-called Wisley Airfield site (Three Farms Meadow), with over 2,000 new homes only 2 miles away (see below).

The density of new housing on the 6 Horsley sites is inappropriate, being greater than anywhere in the locality at present.

Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries for which the plan presents no arguments. Contrary to NPPF paragraph 79, this will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

Collectively, these 6 sites militate against NPPF paragraph 81's encouragement of access to the Green Belt and its amenity and recreation value. This has been a success story in the Horsleys, with the creation of an amenity wood and community garden, the purchase of adjacent fields (on the eastern side of Ockham Road North) by local residents in order to preserve their open aspect, well-maintained pitches for local football and cricket clubs, public tennis courts, open space for a high-quality campsite (at Waterloo Farm) used by many foreign tourists and the approval of plans for a "Theatre in the Woods"—making West Horsley the only village in Surrey with an opera house. The open nature of West Horsley determined that a long portion of the 2012 Olympic cycle races passed through the village. This route has since been adopted by cyclists as a permanent asset, including the annual 

"14 E. Gallagher Homes v Solihull Metropolitan Borough Council [2014] EWHC 1283

"15 Councillor Paul Spooner and his predecessor, Councillor Stephen Mansbridge.

"16 Even some property developers complain about the Council's bias in favour of oversized developments, g. Dandara, whose relatively small Green Belt sites on the A246 (Epsom Road) in West Horsley is not considered in the plan.

Prudential cycle race. These and future examples of "positive planning" depend on protecting the Green Belt to maintain the openess and attractiveness of the local landscape and avoiding the urbanisation and traffic congestion that Sites A36-41 will bring.
By surrounding Waterloo Farm campsite with 120 new houses, Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable. This may accord with developers' plans, since the site would then be vulnerable to infilling with yet more housing.

Site A40 is subject to an unacceptable flood risk from a combination of a high groundwater table and the lack of surface water run-off. This is flat, clay land on the downhill side of the Horsleys where floodwater from new development will accumulate and back up onto existing properties nearby. I can provide photographs proving how badly these fields already flood at present. These problems will only get worse with the increase in extreme weather events associated with climate change. The "appropriate mitigation" suggested in Policy A40 exists only as an abstract notion. It should not overrule the need for Green Belt "exceptional circumstances".

Policy A40 underestimates the problems of safe access and egress. Firstly, Ockham Road North was closed for several weeks in 2014 because of flooding, and still floods regularly. Secondly, access problems are not confined to flooding and are not addressed by the proposal to extend the existing 30m ph zone past the site entrance. Repeated attempts made by Ockham Road North residents to extend this zone have been turned down by the local authorities, Highways England and Surrey Police, even though data collected in 2015 show that traffic has doubled over the last 15 years and that the average speed in the 40mph section of this road is 52mph, with maximum recorded speeds of over 80mph. No traffic calming measures have so far been achieved. Additional housing will add to several hazards along this stretch of road, including:

- Its use by pedestrians, especially children (using the Raleigh and Glenesk schools and catching school buses to Guildford and Howard of Effingham), pensioners living in the string of bungalows at the northern end of the road, and visitors from the Waterloo campsite who are unfamiliar with the area.
- The existence of a narrow footpath on only one side of the road in any one spot. The layout means that walking half a mile between Green Land and East Lane requires crossing the road twice.
- The road's increasing use by recreational cyclists (see above).
- Its winding nature, poor sight lines (especially when interrupted by summer vegetation) and dangerous, concealed driveways. Most of these were built in the 1930s. Some have been widened but many are too narrow for modern traffic. Since a deep ditch runs along most of the road, vehicles have to swing out dangerously when entering or leaving.
- The prospect of additional traffic, including 19,000 HGV movements (90 a day over a long period) if Surrey County Council approves the Drift Golf Course's planning application to re-landscape its site using bulk waste transported from London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. Three Farms Meadow site

I OBJECT also to there-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision - a clear signal to the developers to try again.

This is not an NPPF "presumption in favour of sustainable development" but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company. 

Policy A35 should be ditched from the plan for all the reasons the development was rejected by the Planning Committee, including:

- Green Belt location and absence of "exceptional circumstances".
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts.

"17 Application reference 15/P/00012.

"18 Including the Rt Hon. David Mellor QC (its erstwhile founder and former Minister), Mr Michael Murray (spokesman for the project and Conservative cabinet member for planning policy at the Vale of the White Horse District Council in Oxfordshire) and the Hon. Charles Balfour (director, descendant of the Tory Prime Minister).

- Absence of adequate traffic data.
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
- Presence of a Surrey County Council safeguarded waste site.
- Cost of infrastructure required to the detriment of alternative more favourable sites.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
- Impact on listed buildings.
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA. Extreme housing density with tiny garden spaces.
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
- Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).19
- Failure to evaluate the cumulative impact of this and nearby development sites on the area.

*****
"19 The River Mole would flood even more badly should a new runway be built at Gatwick.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY D1 -Making better places**

I OBJECT to the absence of any reference to vernacular or historic design guidelines, even in Conservation Areas. Most of the borough, especially the rural areas, has vernacular design guidelines that are available to give suggestions as to appropriate design. These should have mandatory planning force.

The monitoring of this policy is inappropriate. Why should this policy result in a reduction of the number of appeals for poor design? Should it not result in better-designed buildings?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY D2 -Sustainable design, construction and energy**

I OBJECT. Sustainability should be an overarching ambition, conditioning the whole local plan and running through it, as claimed in the NPPF, "like a golden thread". It should be set out clearly in Policy 51, not buried away as a minor detail in Policy 02.

This policy amounts to "greenwashing", expounding aspirational environmental targets while ignoring the plan to build dormitory towns across the Green Belt that are environmentally and socially unsustainable. These settlements will bring vastly increased car use and will lead to unacceptable traffic congestion, overstretched social infrastructure, and more greenhouse gas emissions, noise and light pollution. This policy should not be just about saving energy but about preserving the borough's stock of natural capital, especially the countryside, from futile attempts to rig the housing market.
This policy's emphasis on Combined Cooling Heating and Power and communal heating networks is meaningless, since no such networks are available locally.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

**Comment ID:** PSLPP16/1749  **Respondent:** 15244641 / Wesley Raynbird-Tilbury  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY D3 - Historic environment**

I OBJECT. This policy clashes with the strongly pro-development agenda of the rest of the plan and fails to address the contradiction. History is unamenable to improvement, so the policy should commit the Council firmly to protecting and preserving our heritage assets from development. Instead, the specific policy pledge to "support development" that might "enhance" heritage assets leaves wide scope for abuse in the form of destructive commercialisation and financial leveraging of relevant sites .

This policy is based on the false premise that Guildford's heritage is inherently in decay. This is a developer's charter- a short step away from the idea that the historic environment needs to pay its way to be preserved. The Council's aggressive reviews of Guildford Museum and the Electric Theatre support this interpretation . Whatever the "reasoned justification", the actual policy wording in the blue box leaves too many loopholes.

Development close to historical assets is harmful and should be expressly prohibited. This policy fails to meet the requirements of NPPF paragraphs 126 and 131-133.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY D4- Development in urban areas and inset villages

I OBJECT. This is a piously aspirational policy that does not address any of the obvious practical issues already touched on above:

- The plan envisages that 40% of homes built will be "affordable", but this does not provide any accommodation for low-paid workers, for example, those on the minimum wage, who cannot afford to buy so-called "affordable" homes or pay an "affordable". There is a need for some expansion in social housing, especially in urban areas, where there is a greater concentration of low-paid workers such as those employed in the retail, warehousing and distribution sectors (all of which this plan aspires to expand).
- The number of homes planned in the urban area is too low. There is a glaring need for regeneration in many urban areas, but this is ignored in favour of building homes on green-field sites instead. This will not address urban housing needs. It is also unsustainable, since building outside the town does disproportionate harm to road traffic, air quality and overstretched infrastructure.
- The plan envisages a large expansion of the traditional "bricks and mortar" retail sector, but this is a sector in rapid and continuous decline.
- All the stated policy aims for "inset" villages will be negated by the excessive weight of new housing development proposed which would radically change their character forever. Against this disruptive background, it is barely relevant to talk about preserving views!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E1 -Meeting employment needs

I OBJECT because -

- The evidence base is unreliable;
- There is unclear differentiation between B class uses;
- Only high value-added business uses, contributing to a modern "knowledge economy", are desirable, not low-grade, low-employment warehousing which is also land hungry;
- Industrial and commercial businesses must be concentrated in the urban area or existing business parks (e.g. Slyfield) not in the rural environment which the infrastructure is unable to support;

"10 See footnote 3 above.

The rural environment must support micro- or high-tech businesses, agricultural industries, and tourism, and these sectors must not be damaged by general industrial development which is inappropriate.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

POLICY E2 - Location for new employment floorspace

I OBJECT . It would be more sensible to confine all new office and research and development (use Class B1a and B1b) floor space to Guildford town centre. I oppose the policy of expanding the Research Park onto Blackwell Farm (see my reference to "regulatory capture" of local public policy by the University, Policy H1, above). No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

POLICY E4- Surrey Research Park

I OBJECT. The Council are required by the NPPF to facilitate commercial science and technology clusters. But, as with Policies H1 and E2 above, this policy seems to be dictated more by the ambitions of Surrey University than the public interest. In an extremely tangled sentence, it says that the Research Park will be "protected for business use... in any science ... that is complementary to the activities of the University of Surrey."

This fails to distinguish adequately between the University's public role as a state-funded, academic institution and its private, financial interest in profit-making business spin-offs. It ignores enterprises that might be commercial rivals of the University. And it fails to consider the public harm done by turning the Research Park into a larger Business Park, such as the loss of Green Belt social and environmental capital.

B1b should be the primary use class for the Research Park and applications for B1a should be resisted given the danger of diluting the core purpose and reputation of the park. The inclusion of B1c uses is inappropriate and unnecessary.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY E6- The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor "attractions" and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/"Disneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many "leisure and visitor attractions" already. The case for creating more is not made and no examples are given. Instead, the plan's explicit priorities should be:

1. To protect the borough's prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford's river landscape less off-putting and support town-break packages for high-value To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

2. To help private providers market local This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An "English town break" (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to RHS Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by pass Guildford to go to Bath, Oxford or Cambridge instead.

1. To rule out the redevelopment of scarce rural hotel sites (e. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan, yet just a short walk from the new opera house).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY E7 Guildford Town Centre

I OBJECT. The policy "vision" refers to protecting the Guildford's "unique setting" (including, surely, its surrounding Green Belt and countryside views) but this is not carried over into the formal policy wording in the blue box. It is therefore a worthless commitment.

There should be much more residential use of the town centre where most people, especially the young and less well-off, want to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose a visionary regeneration plan for the River Way/Walnut Tree Close area, where there is arguably enough brownfield land for 4,000 new homes, meeting near all the borough's housing need over the plan period without harming the countryside. There is an urgent need for a brownfield register and to focus on brownfield redevelopment before considering development outside the existing urban area. CIL strategy must promote brownfield redevelopment.

Strangely, the policy does not address any of the major issues raised by the Council's own Town Centre Master Plan, the Guildford Vision Group's proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public debate.

This policy also fails to provide guidance on design requirements, as required by the NPPF.11

Instead, it is far too concerned with shopping. Town-centre shopping is in decline internationally as consumers move irreversibly online. There is no need to expand physical retail capacity or warehousing floorspace, which will only kill off existing shops while using up valuable housing land. The delays to the redevelopment of North Street is a flashing red light warning that consumer patterns are shifting. Guildford is a large town without a single butcher or fishmonger, showing that the Council need to use the fiscal and other mechanisms at its disposal to support niche retailers. To opt for large, impersonal department stores and dull high-street chain stores at the expense of Guildford's unique character would be an historic blunder. For this type of shopping, most residents can go to Woking or Kingston, whose ugly town centres should serve as a dire warning to Guildford planners.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E8

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E8 - District centres

I OBJECT to the proposal that sites "on the edge" of District Centres should be considered for retail developments. This is another Trojan horse policy, allowing retail hubs to be vastly expanded in order to smooth the way for vast new housing estates outside in the countryside (e.g. to meet the "everyday shopping and service needs" of the roughly 1,500 people living in the 600 new homes planned for the Horsleys).

This is a case of back-to-front priorities. Expanded local retail hubs are being proposed in order to justify more housebuilding in the villages, and in a forlorn attempt to mitigate the serious traffic and infrastructure problems this will bring. The Council have no business preparing the way for new supermarkets in the Green Belt. Rural retail capacity should be left to local demand.
The policy proposes not a single measure to support existing rural shops and services that are the lifeblood of village communities, e.g. using business rates and other levers at the Council's disposal.

"11 NPPF 59: ""Local planning authorities should consider ... the overall scale, density, massing, height, landscape, layout, materials and access of new development in relation to neighbouring buildings and the local area more generally."

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E9 - Local centres

I OBJECT (for the reasons given under Policy E8 above) to the proposal for retail development adjacent to the 6 rural centres, and sites on the edge of designated centres. This is creeping urbanisation, damaging to the Green Belt and to Guildford town revival as a thriving urban hub. It will contribute to local urban decay and depopulation, just as expansion of the suburbs did to mid-20th century London.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H1 - Homes for all

I OBJECT. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set any rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.
The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to de-humanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

"5 This has been challenged by residents including, by Mr Ben as far as the Information Ombudsman. But the Council have consistently refused to seek disclosure of the model.

"6 See http://www.glheam.com/developer/Pages/Overview.aspx: ‘we act for many of the leading developers.’ G L Hearn is now part of Capita Real Estate.

"7 See letter from Neil Taylor, Director of Development at Guildford Borough Council, in the Surrey Advertiser of 3 June 2016: "I would like to highlight the difference between the Objectively Assessed Housing Need (OAN) figure produced by G L Hearn (693 homes per year) and the Housing Target for the Local Plan. Some opponents of the Local Plan appear to blur the edges of the two figures. The OAN figure is the one produced by the modelling tool. The Housing Target figure is the proportion of the OAN that the Council feels it can successfully deliver. Based on the infrastructure that Highways England, Surrey County Council and others suggest they can provide over the next 15 years, the Council believes it can deliver the full OAN number as the Housing Target. However if, during this consultation, or later on, the anticipated infrastructure is not going to be provided then the council will be forced to apply further constraints to the OAN number, which may reduce the Housing Target number. Therefore, it is clear that the OAN and the Housing Target are not the same. The OAN is objective and the Housing Target is subject to constraints.”

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council's timidity is a case of "regulatory capture" by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Over provision is inappropriate given other constraints.

POLICY H2- Affordable homes

I OBJECT. "Affordable" homes, under national definitions, means homes that are sold or rented at 80% of market value. Even if 70% of these are rented as proposed, the level of market prices in the South-East means (even post-Brexit) that these homes will remain well beyond most people's means and that starter homes will not become available for local people.

In addition, the viability clause (4.2.40) means that in practice the policy could be unenforceable. Private financial viability has no place in a public policy and should be removed. It is a get-out-of-jail-free card for developers that will sacrifice countryside for no local benefit.

I question the assumptions that seem to underlie this policy: that people have a right (rather than a legitimate aspiration) to own a home; that they should be encouraged to live locally (contradicting the Government's policy of encouraging labour mobility and development in poorer regions, where homes are cheaper anyway); that increasing local house-building will reduce overcrowding and congestion (rather than simply suck more people into the borough); and that it will stem the rise in house prices (even though 13,860 new homes will be a drop in the ocean, given that prices are determined by an infinite demand-pull from London, whose population is increasing by 100,000 a year, and by the currently low cost of capital for overseas and other buyers). The weak mechanisms proposed in the plan might influence the market in a more remote part of the UK, but not here.

This policy's version of "affordability" is just a smokescreen for pushing through more development generally. Building more homes in Guildford cannot increase real affordability given the overhang of the London market.

POLICY H3- Rural Exception Homes

I OBJECT. This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the "mix", this can include "market" housing - i.e. normal commercial development which in Guildford usually means large executive homes. This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY 11 - Infrastructure and delivery

I OBJECT . Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. Yet this plan's commitment to building housing estates across the Guildford countryside will mean either major infrastructure investment that no-one is prepared to pay for or else a catastrophic and simultaneous collapse in transport, educational, medical, energy, water and communications services.

The plan targets greenfield sites - requiring heavy infrastructure investment - in order to generate CIL income necessary to meet an infrastructure shortfall that is already serious. This is not sensible. The current draft CIL scale also encourages development on greenfield sites rather than brownfield.

The policy wording says nothing about roads and traffic. The Council's methodology for assessing infrastructure needs in this area is inadequate, identifying only the tip of an iceberg of existing congestion. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that involve demolishing property and road-widening in residential areas to solve the resultant congestion. The A3 improvements are not guaranteed to take place but they are being used to justify removing large areas from the Green Belt before detailed traffic assessments have taken place. These detailed investigations are being deferred until the planning application stage and will be left to developers to prepare. If a site then proves to be unsustainable its Green Belt protection will have been lost for no reason and unsuitable development will take place by a more insidious process.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy 11. By prioritising greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough's infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council's control and on the vagaries of CIL income. Instead of recognising this as a key issue, the plan is based on a wing and a prayer.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY I2 - Supporting the Department of Transport's "Road Investment Strategy"

I OBJECT. This policy is too vague and optimistic. Decisions by Highways England on improving the strategic road network (the M25 and A3) are still years off. The Council have suggested a very expensive tunnel under Guildford, but this is no more than a dream. Even if Highways England accepted this (which is highly unlikely in the post-Brexit public spending climate) it would not be built until the end of the plan period at the earliest. Other, less expensive A3 improvements, and changes to the Junction 10/Heathrow stretch of the M25, will also take years to agree and complete.

The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is foolhardy. Surrey is the most congested county in England, with 683 people per square kilometre, compared with an English average of 413. This policy will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone). This is a major development constraint that should have been applied to the OAN before this consultation, and not left up in the air.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY I3 - Sustainable transport for new developments

I OBJECT. This is another vaguely aspirational policy, based on wishful thinking and not grounded in the practical realities of daily life. It consists of a standard, box-ticking list of local government measures unrelated to the "12 Residents have been incredulous at the Council's failure to apply infrastructure constraints to housing numbers, in response first to the 2013 Issues and Options paper and then to the 2014 draft local plan. There were 20,000 responses each time.

specifics of the plan. Like infrastructure, transport appears to be an afterthought; the policy fails in its essential job of guiding planning decisions, since it assumes development of any kind can be supported by sustainable transport.

The sustainability of the dormitory settlements which the Council want built across the countryside depends on a general "modal shift" from private car use to walking, cycling and public transport. This is unrealistic. The proposed sites are often miles away from the nearest railway station. Bus services even in the largest villages are almost non-existent- just one bus to and from Guildford each day in the Horsleys and none at weekends. Since bus services depend on profitability, they cannot be expanded and the Council are not proposing to subsidise new ones. Rural buses are too slow anyway for busy people. Most rural roads in the borough are narrow, winding, hilly, potholed, muddy and unlit. Many flood badly and have no footpaths.

The desired modal shift would require a comprehensive co-ordination of bus and train timetables with services every few minutes, seven days a week, to stops within walking distance of every home in the borough. This kind of integrated public
transport system has been achieved in Switzerland, for instance, but only at huge public cost and thanks to a political consensus supporting state ownership of trains, buses and the post office, which delivers rural passengers as well as mail. There is absolutely no chance of this in the UK.

The vast majority of the borough's residents are not, in practice, able to cycle. This includes children, the elderly, commuters who have to look smart, the infirm, the unfit and people carrying goods or shopping of any kind. Dependence on walking and cycling discriminates against these groups, which include some of the most vulnerable members of the community. It is socially unjust.

One in two working people in Guildford commute for up to 3 hours a day, as I used to do. They will not leave their cars for even part of their journey if it means longer travel times.

Park-and-rides are a welcome part of the transport mix but are too slow for commuters and others on a tight schedule. Well-off pensioners seem to be the main beneficiaries. For an adult couple going shopping it is still cheaper to park in town.

Forget about water buses. The Wey is too narrow and, with a river speed limit of 4mph, boats are too slow for anything but recreation. Except on the tideway, not even the Thames has such services.

The addition of two new stations appears attractive but will slow down train journeys, which are already slower than at any time since the 1930s. Knock-on effects on localities where the new stations are built have not been worked out or presented.

**POLICY I4 Green and blue infrastructure**

I OBJECT. This policy is a box-ticking exercise with no teeth to it. It sits oddly with the plan's onslaught on the Green Belt. The plan to build on large areas of countryside and to inset villages will cancel out any benefits from extending the principle of enhancing biodiversity beyond Biodiversity Opportunity Areas.

There is no mention of the value of wildlife gardening to biodiversity or the important role that larger gardens play in a village setting.

There is no mention of the impact of the plan on food production, or monitoring the loss of agricultural land.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P2- Green Belt

I OBJECT. This policy states, "the general extent of the Green Belt has been retained." This is a lie.

The policy wording is tepid in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government's policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations - an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. It is an inalienable public good. Once gone it is gone forever. It is not the Council's to give away.

Policy P2 omits any assessment of the Green Belt's value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

- Agricultural production
- Rural leisure and tourism amenities
- Water catchment
- Flood control
- Biodiversity
- Natural heritage
- A carbon sink for air pollution
- Room for public facilities such as parks and burial grounds
- Profitable film locations (e.g. Shere)
- Future economic potential such as mineral extraction (even tracking)
• Natural beauty, landmarks, open space, rural views and sight lines
• Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)\textsuperscript{6}

As a matter of law, morality and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations.

It is disreputable to argue, as the Council do, that the plan would involve the loss of "only" 1.6\% of the borough's Green Belt. In reality the figure is nearer 7\% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no "acceptable" percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6\% of the Crown jewels in order to build houses.

I am not opposed to appropriate development in the Green Belt and recently supported a major planning application in my own village. But I fail to see why a system of fair burden-sharing of new development cannot be applied to the borough's existing settlements in proportion to their size. This alternative would minimise the strain on infrastructure and maximise the chances of retaining the character of each settlement through gradual growth. It is reasonable to ask urban Guildford, with \( x \) times the population of semi-rural East Horsley for instance, to accommodate \( x \) times the number of new homes over the plan period. Parish councils could be asked, and will no doubt be willing, to propose where their quota of houses should go. Most rural residents are reasonable people who, if not alienated by top-down planners, will support realistic numbers of new houses in their neighbourhoods. Unfortunately, this democratic, bottom-up approach has not been attempted.

Instead, while developers flip and land-bank urban sites as a financial speculation, this plan will dump most new development on greenfield sites where building costs are lower, covering the Green Belt with dozens of housing estates that few residents want. 8,086 new houses are planned for the Green Belt but only 1,135 for Guildford urban area. This is disruptive, socially inequitable and unnecessary. It will not only destroy countryside but will also delay and disincentivise much-needed urban regeneration. The remarkable revival and repopulation of central London shows that building dormitory satellite settlements is an out-of-date approach to planning.

I particularly protest at the "insetting" of 14 villages from the Green Belt, and at "infilling" 12 of the borough's Green Belt villages. I am deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed \textit{outside} the settlement boundaries of 11 further villages. Many Guildford villages are "leggy" in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the "openness" of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF's other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hellbent on self-defeat.

I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors.\textsuperscript{9} To "inset" two thirds of the borough's rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough's location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed "insetting" and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need (especially post-Brexit) and has caused tidal waves of
opposition from residents. It flies in the face of NPPF paragraph 17’s aim of "empowering local people to shape their surroundings" and other NPPF provisions."10

Answer (if comment is on questions 1-7 of the questionnaire): ()

SITES

1. Green Belt sites

I OBJECT to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that "allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses." This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. This amounts to a war of attrition by the Council in conjunction with developers, since many busy residents are sick and tired of repeating the same comments to deaf ears. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014.13 Some residents have concluded that commenting is a waste of time.

"13 Further discredited by criminality on the Council. Former lead Councillor for planning Mokija Juneja, architect of the 2014 draft plan, is currently serving a two-year sentence on 3 counts of forgery, pretending to be a barrister and obtaining dishonest pecuniary advantage.

All Green Belt sites should be removed from the plan until "exceptional circumstances" for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. "14

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY P3 - Countryside (i.e. beyond the Green Belt)

I OBJECT. This is more protective - as a policy - than the proposals for the AONB and the Green Belt, so is anomalous and wrong. I am not in favour of building on this area, since urban, brownfield areas are sufficient to meet all reasonable housing targets. There is no need to build on any green fields if brownfield, previously developed land is used efficiently (without garden-grabbing).

This policy refers to the countryside near Ash and Tongham (see paragraph 4.3.28). This area does not justify stronger policy protection than any other part of the borough. The fact that the current and previous Council Leaders represent it should not give it preferential status: "we will seek to limit any development in the countryside unless it can be demonstrated that it is necessary in that location". Green Belt and AONB areas should by definition have higher levels of protection than non-Green Belt areas.

It should also be noted that Ash and Tongham lie beyond Guildford far away from London and therefore make no contribution to controlling Metropolitan urban sprawl, unlike those villages which, ironically, are to be "inset". That is presumably why Ash and Tongham are not in the Green Belt already. This policy, however, attaches higher priority to preventing the "coalescence between the Ash and Tongham urban area and Aldershot" than it does to the primary purpose of the Metropolitan Green Belt, which is to stop London sprawl.

Apart from being a scandalous misuse of local political patronage, this policy effectively says, "Look, we are not destroying the Guildford Green Belt because we are extending it in Ash and Tongham." It is a cynical piece of tokenism. The leader of the Council needs to be seen to be above reproach by deleting this policy.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P4 - Flood risk and water source protection zones

I OBJECT. Urban development on existing hardstanding would not create additional flood risk, especially where there is scope for improved flood resistance measures to be included in the design. Sites such as the Arriva bus depot, on the River Wey bank, are potential high-value brownfield sites that would not be available for housing if this policy is implemented. It is not the footprint of existing buildings that should limit future development, but the extent of existing hardstanding. Tarmac and concrete do not act as functional floodplain, and some land with hard standing close to the river, within the town centre and within easy walking distance of the railway station, provides an excellent opportunity for real urban regeneration that could protect the surrounding countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY P5 - Thames Basin Heath Special Protection Areas

I OBJECT. This policy is weak. The mitigation (cash compensation) offered for development in the special protection area is so small as to be meaningless.

SANG (Suitable Alternative Natural Greenspace) is not beneficial since the sites identified or targeted are already green space. This is just using agricultural or wooded land as recreation land in order to justify building on other green spaces nearby. There is no actual increase in open space or environmental protection; instead, it is a ploy designed to permit building on otherwise protected areas. SANG- in part used to prevent dogs and cats attacking nesting birds - must also ensure that it is not using land which is adjacent to the Special Protection Areas.

Comment ID: PSLPP16/1728  Respondent: 15244641 / Wesley Raynbird-Tilbury  Agent:

POLICY S1 - Presumption in favour of sustainable development

I OBJECT. The NPPF states that the presumption in favour of sustainable development "should be seen as a golden thread running through both plan-making and decision-taking." 1 Standing at the head of the draft plan, Policy S1 ought to set a clear framework. Instead, no definition of "sustainable development" is given."2 The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The promise "to secure development that secures the economic, social and environmental conditions in the area" omits to recognise that economic growth, social justice and environmental protection often conflict. It does not say how each element is to be weighted or conflicts resolved. As a practical guide to the tough choices Councillors will face, it is useless. Under this policy, any development will qualify as "sustainable", thereby failing to apply the NPPF’s most important guideline.

The most gaping hole in Policy S1 is the Green Belt. As an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity, the Green Belt is a living example of sustainable development in practice. It is the envy of the world. Policy S1 should commit to uphold Green Belt boundaries and protections, setting at least one clear boundary to planning decisions. The plan's contempt for Green Belt constraints is amply demonstrated in later policies.
The commitment to approve planning applications "wherever possible" and "without delay" reveals this draft plan's pro-development bias. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.3 In my view Policy S1 is a non-policy.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S2 - Borough Wide Strategy

I OBJECT . I have 5 objections to the proposal to build 13,860 new homes:

1. The number is based on pre-Brexit projections for economic and population growth, including migration . These now need to be revised downwards, possibly quite seriously.4

2. The number is based on an arbitrary Housing Market Area (HMA): the "West Surrey" tri-borough area of Guildford, Woking and Waverley . An HMA should be an area within which a majority of people live, work, shop or study . On any commonsense view, "West Surrey" is much too Half of Guildford borough's residents work elsewhere, and half the people who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside "West Surrey". Puzzlingly, the adjacent districts of Rushmoor and Mole Valley, minutes from Guildford town, are outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere. Unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and is part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council have failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make "West Surrey" reliable. The area is artificial, and so the housing numbers

"1 NPPF paragraph

"2 The most widely accepted definition is the 1987 United Nations one from the Brundtland Report: " Development that meets the needs of the resent without compromising the ability of future generations to meet their own needs."

"3 Including: " empowering local people to shape their surroundings ... Take account of the different roles and character of different areas... protecting the Green Belts around them ... recognizing the intrinsic character and beauty of the countryside and supporting thriving communities within it... Support the transition to a low carbon future ... Contribute to conserving and enhancing the natural environment and reducing pollution ... Encourage the effective use of land by reusing land that has previously been developed (brownfield land)... Conserve heritage assets ... Actively manage patterns
of growth to make the fullest use of public transport and cycling and focus significant development on locations which can be made sustainable."

"At the time of writing, about £8billion (40%) has been wiped off the value of the UK’s top 4 housebuilders alone.

derived from it are unreliable. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour's "need". Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey's 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county (none in Mole Valley, for instance). This highly lopsided distribution is unexplained.

1. The figure of 13,860 new homes is It has not been scrutinised by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by commercial sub-contractor used in preparing the SHMA. The Council say we should trust the contractors' model because it is used by a large number of other local authorities. Wide usage, however, does not confer objectivity. Guildford's OAN would fail the basic transparency test even if the methodology used were a universally admired 'gold standard'. But it is not: it belongs to consultants whose website openly proclaim their pro-development agenda, provoking reasonable suspicion that the figures are inflated. External experts and members of the public have provided detailed critiques of the model. Its most fatal flaw, however, is that it has not been disclosed- not even to the authors of the plan, who have taken it on trust. This is irrational and unsound.

1. The status of the 13,860 figure is The plan fails to set a Housing Target of new homes to be built, or explain how this relates to the "Objectively Assessed Number" (OAN) for housing need. Elsewhere, the Council have said that the two are identical because the OAN is "deliverable" and is by definition objective and cannot be contradicted, but in the same breath say that infrastructure or other constraints may in due course affect deliverability. Despite the NPPF, the plan fails to address these constraints. In any case, the number of homes proposed, plus existing planning permission, plus expected "windfall" sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a "plan" that fails to propose a Housing Target that takes normal constraints and adjustments credibly into account, and which leaves the Council to set one at any level without further consultation. Even if the OAN were not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

1. It is irrational to embark on a radical transformation of the borough without a clear Housing Most of Guildford borough is theoretically protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the existing number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to Guildford Borough Council's draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:
- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt increase tail backs on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

Economy

E6 Leisure and Visitor Experience

I object to the approach taken. We do not require buildings or extra attractions. We do need to value, appreciate and co-ordinate what we have.

I have a story to tell from last Spring - I met two tourists, stranded on Woodbridge Road, on the gyratory, in the rain, trying to get from the Railway Station to visit the Cathedral!

They had asked for and looked for directions all the way, without success – nobody knew. I accompanied them on a further, unpleasant trek to the Bus Station. There is not a bus to Guildford Cathedral.

E7 Guildford Town Centre

I object to the concentration on more retail sites. They just are not needed.

It is a sad thing to walk around existing shopping areas and see the numbers of empty shops.

Let the town centre be a place for people to live. Please use the brownfield sites for housing: aiming for a convivial, thriving town.

It would be lovely to have some safe areas for small children in the town centre and more outdoor seating.

I fear we are heading for empty, anonymous concrete canyons for people to drive to sometimes.

Housing

H1 Homes for all

I object here again, because, again, we understand that the assumptions have not been scrutinised or evaluated – surely this should be basic. Please debate these very basic things; it is what we expect our Councillors to do. The University should be making arrangements for its students – this would avoid the loss of so much accommodation which families desperately need and the escalating prices which are already unaffordable to many.

Answer (if comment is on questions 1-7 of the questionnaire): ()
H2 Affordable homes

I object to this supposed provision, because ‘affordable’ doesn’t really happen in Guildford. The policy for the provision of affordable homes should be taken seriously, strengthened and given much, much greater importance. We have a personal, family knowledge of this situation where a young family is living in unsuitable accommodation. Trying to cope in unsuitable accommodation puts a huge extra strain on the hard-working parents, who earn average salaries but still can not afford anything more, and even though they do their best to minimise the disadvantage to the children, it affects the children badly. This is what their lives will be founded upon.

Protecting

P2 & P3 The Greenbelt and the Countryside The Greenbelt and the Countryside must be retained as “the greenbelt” and “the countryside”, not seen as optional, attractive development opportunities. If they are not safeguarded, we will never get them back, and we and future generations of Guildfordians will be the losers.

I object to what I believe is deference made to demands from business developers for easier, glamorous schemes and bigger profits: over what is actually in the best interests of residents and the environment – using brownfield and maximising the use of brownfield sites.

We have a particular interest in this issue also. Until 2015, Guildford Borough Council owned an empty piece of brownfield land, of over 1,000 square metres, near our home, in Christchurch ward. It had good access to two roads.

From 1975 when we first came to Guildford, we were told that it would be wanted for development. But in 2015 it was sold-off as garden-land, at £36 per square metre, and we have been unable to find-out the reason.

I do not know how many units of housing can be accommodated on 1,000 sq m.; it would be interesting to know this also. It appears to be a failure of duty by the Council.

**Strategic**

S1 Presumption in favour of sustainable development

I don’t think it makes sense to give the Plan an overall presumption in favour of sustainable development. I object to this being primary and comprehensive. With many, many ideas, in many areas, there are not sufficient services, transport possibilities or other infrastructures in existence, or even possible or practicable. This must come first. It is already very, very difficult to move around in Guildford. It has a detrimental affect on the quality of life.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**The Green Belt** – P2, P3, E5 and specific sites

Here again the changes do not show responsiveness to the weight of public opinion which is heavily against weakening these policies. I object to this. No attempt is made to demonstrate exceptional circumstances feeding in to figures quoted.

Also, the Rural Economic Strategy which is covered in 4.51a quotes as a main aim promoting affordable homes everywhere in the countryside including AONB. It could work as a mechanism to produce overdevelopment in the countryside. I object to this and it has not been subjected to full public consultation.

The three major strategic sites of Blackwell Farm, Wisley Airfield and Gosden Hill Farm are in the Green Belt. I object to them still being put forward.

Previous consultations show that in line with the NPPF the public prefer the use of brownfield land in the urban area first for housing.
We object to Guildford Borough Council's draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:
- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt increase tail backs on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

I OBJECT TO the lack of immediate provision for new schools.
I OBJECT TO the lack of immediate provision for doctors surgeries.

Page 380 of 2804
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- **Statement of objection.**
  - **Object** to the large scale ‘strategic’ development proposed at Policy A46 which I consider to be inappropriate development.
  - The Local Plan does not demonstrate any ‘exceptional circumstances’ that warrant Normandy’s removal from the Green Belt.

- **Need for a secondary school in Normandy.**
  - I question the need for a secondary school to be placed specifically in Normandy. I have not seen any evidence, either from GBC or SCC that supports this requirement.
  - I understand from my county councillor (Cllr K Witham) that there is an abundance of pupil places available at other secondary schools in the area to the west of Guildford. Some of these schools also have capacity to expand in the future. Why has this not been fully considered as part of the Local Plan?
  - If a further school is required, it could equally be built elsewhere within the borough. Normandy secondary school pupils already commute by train to schools in Guildford.
  - With no requirement for a school in Normandy there is no requirement for 1100 homes.

- **Access to Site A46.**
  - I am concerned that the two lanes (Glaziers Lane and Westwood Lane) that will provide access routes into the development are not fit for purpose. They are narrow, with bridge and tunnel restrictions. By their nature, the Lanes offer little opportunity for improvement in order to provide safe transit of vehicles and pedestrians alike, this is particularly so with what will be a significant increase in traffic.

- **Traveller and show people plots.**
  - Normandy already has a high percentage of sites within its parish compared with others across the borough. **Policy A49** seeks to grant permanent permission to a site that has had temporary retrospective planning permission since 2009. Why is it proposed to increase the number of these sites still further in Normandy when other parishes could share the responsibility?

- **Increased provision for GPs and Dental surgeries in Normandy (Appendix C - HSC).**
  - Residents of Normandy are currently served by The Fairlands medical practice for GP and dental services, with a small surgery and pharmacy outlet in Normandy.
  - To gain an appointment to see a doctor of choice in Normandy currently takes in excess of 2 weeks.
  - As proposed, the development would double the size of the village and have the consequence of placing considerable extra burden on an already stretched facility. Why therefore has no consideration been given to enlarging this medical provision under **Appendix C – HSC**?

- **Environment.**
  - I am very concerned at the impact that a proposed development of this size would have on the local environment for flora and fauna. There is no evidence in the Local Plan of acceptance or mitigation of what permanent effect this proposed development would have. The proposed development is within close proximity to the Thames Basin Heaths Special Protection Area.

I am writing to protest against the local plan proposals and in particular the proposed developments in West Horsley.

I must make it clear that I accept there is a need for further housing and that there should be some development in West Horsley but what is proposed is not only disproportionate but would have the inevitable effect of ruining a village and causing irreparable damage to the Green Belt.

West Horsley has a rich and varied mix of well established low housing density settlements with a considerable number of historic buildings. It is a pretty village which receives a considerable number of recreational visitors through the seasons each year who are undoubtedly attracted by its setting in a rural environment.

It is of note that the Key Evidence document 'Guildford Borough Economic Strategy 2013-2031 makes no case for locating large numbers of homes in West and East Horsley or neighbouring villages.

The sites proposed cannot be considered individually but must be considered for their cumulative impact on the area.

Building 385 new houses on these 4 sites, plus at least another 50 on small sites will destroy the rural character of this community.

I fail to understand why West Horsley in particular has been singled out to increase in size by 35% when the rest of the borough will increase by a far lower percentage and in particular Guildford town is scheduled to have an increase in size of only 11%.

A development of this size will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops.

There are as far as I am aware no plans whatsoever to provide the necessary schools to cope with such an increase in population.

The Raleigh School is already full and the private Glenesk and Cranmore schools are also at or near to full capacity. The suggestion that schools in Ripley can be used contradicts the plan’s stated intention to reduce traffic on the A3 and the strategic aim that primary schools should be within walking distance.
The secondary school situation is already critical. The Howard of Effingham is well oversubscribed and is struggling to cope on a site which it outgrew many years ago there seems to be no proposal from Surrey County Council to cope with the present situation let alone that which would arise if these plans were to go ahead.

There are other reasons why the proposed village expansion is unsustainable. With only one small shop which is due to close in September, no post office, a very limited weekdays only bus service through the village, there is no infrastructure which could begin to support the proposed high volumes of new housing development.

The development of 385 homes on the 4 proposed sites are at much higher densities than currently exist in the village settlement and will be totally out of character with the existing mix of different housing styles and layout of the village.

An increase in village population will increase pressure on station parking and traffic movements to and from Horsley station and an increase in school children going to Guildford and Leatherhead.

The volume of traffic generated from the proposed new housing estates will be considerable and the impact on the local roads, which already struggle to cope with adverse weather conditions, will be significant.

Kingston Avenue Medical Centre which serves all of East and West Horsley and surrounding areas is already extremely busy and residents experience difficulty in making appointments.

For all these reasons I implore you to agree that the need for so many houses to be built in West Horsley is totally unproven and unrealistic.

**GREEN BELT**

The first line of Policy P2 states, “We will continue to protect the Metropolitan Green Belt against inappropriate development.”

A survey of the residents of West Horsley conducted in 2015 showed that they are totally opposed to the village's removal from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries.

I of course accept that their views cannot dictate planning policy, but such a strength of feeling should surely only be ignored if there is cogent evidence to justify it.
No exceptional circumstances or other justification is made for the new Green Belt boundaries that will result from the proposed insetting of West and East Horsley from the Metropolitan Green Belt.

West Horsley's defined Settlement Area boundaries (ref 2003 Local Plan) do not need to be extended and should not be.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The plan is to build 400 new homes under a revised local plan. This would surely cause havoc.

I also object to the lack of evidence for the provision of new schools, doctors surgeries, not to mention drainage/sewage facilities and public transport. Chaos would be caused by traffic. In this day and age the norm has become for most houses to have 2 or 3 cars. The mind boggles at the number of cars on these local roads at any one time, especially in rush hour.

I object also to the short amount of notice given to the inhabitants of the above mentioned villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 5: The examination

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the limited consultation period

I object to the last minute inclusion of new sites with less than 2 weeks notice

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposed development outlined for A46. It is a disproportionately large development which will change the nature of the village of Normandy forever. There has not been enough consultation with local people on this matter. I feel that Guildford Borough Council has decided to push a large proportion of proposed new housing into Normandy/Flexford rather than looking at other sites, especially brownfield ones. The green belt should remain as it is. It should be sacrosanct and not tinkered with. There are no clear or special circumstances by which it is necessary to build upon the green belt. Although other areas of housing have been identified across the borough, the largest proportion allocated close to existing communities is here in Normandy. This is unfair and the rest of the borough should bear the burden more equally - if indeed so many extra houses are really needed (see my comment below).

There is also real concern about the impact on infrastructure that the proposed development will have. Traffic is already very bad during busy periods, and the small roads in the local area cannot support further traffic. Pollution from road traffic will also affect the local population and local wildlife.

The noise, dust and road traffic problems caused during a protracted period of building in this area will also affect families who are trying to get on with normal lives in a currently very peaceful area.

I question the accuracy of statistics that state that the population of Guildford will grow to the extent that the number of homes suggested here and across the rest of the local plan will be needed. The numbers of short-term visitors, especially university students have skewed the statistics and are giving false indications as to how many extra homes are really required.

The inclusion of many new traveller pitches in the proposed site is also a concern. The fact that there are already a number of traveller sites in the Normandy area does not mean that more should be added. These allocations are not being spread evenly across the borough. This proposal risks pigeonholing our area the borough as specifically traveller-heavy areas and this is not acceptable.

Ours is a beautiful and semi-rural community. It should not be overwhelmed by a housing development that is too large and does not have the support of the local community, myself included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICIES A37, A38, A40 & A41, located in West Horsley

The LAA identifies six sites in West Horsley for potential development, the four largest having allocation policies within the Proposed Submission Local Plan. The total housing number arising from these six sites is 405 homes in total. For a village which had 1,124 dwellings at the 2011 Census, this represents a proportional increase of 36% over the plan period, an enormously high proportion by any standards.

The four policy sites are all located within the Green Belt. One is a partly brownfield development but the other three sites are all open fields used for agriculture and all lie within the current Green Belt at the edge of the Settlement Area. The reasons presented by the consultants, Pegasus, in the Green Belt & Countryside Study to justify these settlement boundary movements appear to us highly questionable and in no way to meet the requirements of the NPPF that such boundary movements are only to be made in ‘exceptional circumstances’. These movements clearly represent a deliberate pushing back of settlement boundaries in order to provide more greenfield sites for housing development. As such, I consider these proposed movements in settlement boundaries to be invalid.

These proposals are also contrary to the principles of the Metropolitan Green Belt. West Horsley represents one of the first ‘lines of defence’ against London urban encroachment outside of the M25 circle. Yet these policies will eliminate a significant part of this defence as they seek to expand the boundaries of this village and fill-in every bit of green space within this rural setting.

It is also totally contrary to the opening statement of Local Plan Policy P2 that “We will continue to protect the Metropolitan Green Belt” It seems that in West and East Horsley at least the draft Local Plan is doing exactly the opposite.

Given the scale of the development proposed in West Horsley, the inevitable destruction of its village character and the impact on infrastructure across West and East Horsley, I OBJECT to the site allocation policies A37, A38, A40 and A41.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A35: Land at former Wisley Airfield

Policy A35 proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt.

I have major concerns about this proposed development and have objected against prior planning applications at this location. I consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country.
I strongly OBJECT to this proposed policy for the reasons below.

1. **a) The proposed development represents a fundamental breach of Metropolitan Green Belt rules:**

The site forms part of the Metropolitan Green Belt. Under the NPPF, development on such Green Belt land is only permitted under ‘very special circumstances’. GBC’s Planning Officer, in assessing a previous planning application from the developer of this site, rejected their application, arguing that: *It has not been demonstrated that the benefits of the proposal amount to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified.*

Ministerial guidance has repeatedly confirmed that unfulfilled housing need does not qualify as a very special circumstance. Whilst the developers’ previous planning application was judged and rejected based upon the 2003 GBC Local Plan, the proposal to include this site within the 2016 Proposed Submission Local Plan does not fundamentally change the argument against it. Any removal of this site from the Green Belt can only be made based upon ‘exceptional circumstances’, which cannot be justified on the basis of unfulfilled housing need. If this was the case, then the entire Metropolitan Green Belt would already have become filled with housing.

Removal of this site from the Green Belt is totally against its rules, regulations and underlying spirit. The site location at the edge of the M25 circle represents a ‘first line of defence’ against metropolitan encroachment into the Surrey countryside. If this site is developed then it becomes only a question of time before Guildford itself is absorbed into the sprawling London conurbation.

*Accordingly, I OBJECT to Policy A35 as a fundamental breach of the Metropolitan Green Belt rules.*

1. **b) This site does not meet acceptable levels of sustainability:**

Sustainability Appraisal is a core concept of planning policy, yet this site is rated very poorly in terms of its sustainability.

The sustainability appraisal undertaken by GBC’s consultant, AECOM, is presented in the Local Plan Evidence Base report ‘Sustainability Appraisal (SA) of the Guildford Borough Local Plan’ issued in June 2016. In their report AECOM have graded all Local Plan policy sites according to 21 different criteria using the conventional ‘traffic light’ system. Red colouring signifies poor sustainability. Of the six larger sites included in their evaluation, (those with proposed housing numbers of 1000 homes or greater), AECOM rates Site A35 as the very worst of all in terms of its sustainability. No less than 8 out of the 21 criteria are graded as ‘Red’ by AECOM for this site, more than any other large site.

Detailed reasons why this site has such poor sustainability include the following:

- There is currently no infrastructure whatsoever at this site, meaning that all water, electricity, gas and phone services will need to be newly established;

- New large-scale sewage disposal will be needed, a fact recognised by Thames Water, indicating it may take 3+ years to provide adequate sewage handling facilities for this site;

- There are presently no schools, medical services or shops within walking distance of this site;

- There is presently no local employment at this site and little after the development is completed;
• There will be a significant destruction of agricultural land arising from this development;

• There will be significant environmental damage from this development;

• There is no public transport currently serving this location;

• The nearest train stations are Horsley and Effingham Junction, both around 3 miles away and so too far to walk. Neither station currently has significant parking capacity available.

• Travel from this site will be primarily dependent upon motor vehicles. Any new site so dependent upon motor vehicles for transport cannot be considered as being ‘sustainable’;

• New access roads will be needed and significant changes proposed to the surrounding road network, leading to further pressure on over-crowded rural roads and increase in the traffic congestion in nearby settlements;

Whilst some of these issues may be mitigated, e.g. by building new schools, medical facilities, etc, others such as the environmental issues and infrastructure impact may not. This proposal, fundamentally, represents an attempt to create a large-scale new settlement in a poorly-sited green field location. However, as the GBC’s own consultant has demonstrated, this site does not reach acceptable minimum levels of sustainability.

Accordingly, I OBJECT to Policy A35 on grounds of its unacceptable sustainability.

1. c) The site will have a severe impact on local traffic & infrastructure:

The proposed development will have a severe adverse impact on road traffic in the surrounding area. This includes East Horsley where high volumes of additional traffic are likely from the residents of this new settlement accessing East Horsley’s two stations, shops and nearby schools. Most of the rural roads in this area are narrow winding ‘lanes’ – a term used in a recent local public meeting by John Furey, senior SCC councillor for Infrastructure to describe East Horsley’s through roads. Many of these ‘lanes’ are without pavements for large stretches, whilst the principal through-roads of Ockham Road South and Forest Road pass along unlit residential areas so narrow that two buses cannot cross in many sections of these ‘lanes’.

The road closures and junction changes being proposed to accompany this development will only serve to increase traffic volumes through the village centres of East Horsley, Cobham and Ripley, and around the station at Effingham Junction, all of which already suffer from traffic congestion at peak hours. The further increase in traffic congestion at the A3-M25 intersection would only exacerbate an existing problem for the highways authority - we understand Highways England have repeatedly expressed serious concerns about this development.

Neither Horsley nor Effingham Junction railway stations currently have any significant spare parking capacity. The suggestion of the developer that large numbers of cyclists from Site A35 will cycle 6 or 7 miles each day along busy roads in order to travel there and back to these stations lacks credibility. Other village facilities in East Horsley, such as the medical centre, are also likely to suffer adversely from a substantial increase in users as a result of this proposed development.

Accordingly, I OBJECT to Policy A35 on grounds of its severe impact on local infrastructure.

1. d) There are damaging health & safety implications arising from development at this site:
The site is located close to the junction of the M25 and A3, one of the busiest road junctions in the country. The Nitrous Oxide (‘NOx’) emissions recorded around this area are extremely high and will affect residents living at the proposed site. The proposal to build new primary and secondary schools at this location is also contrary to government policy prohibiting the building of schools on sites in areas where there is high NOx.

In rejecting the previous planning application by the developers, the GBC Planning Officer cited the “failure to provide adequate information on NOx emissions and nitrogen deposition and to provide any information on acid deposition” as one of the grounds for this rejection.

Accordingly, I OBJECT to Policy A35 on grounds of its adverse health & safety implications

1. e) The environmental impact on protected wildlife will be substantial:

GBC’s Land Availability Assessment which supports Policy A35 states that the site lies within the 400m-5km ‘Zone of Influence’ of the Thames Basin Heaths Special Protection Area (‘SPA’). This is not correct. The site is immediately adjacent to Ockham & Wisley Commons, an area designated as a Site of Special Scientific Importance (‘SSSI’), which forms one part of the Thames Basin Heaths SPA and much of the site lies within the 400m Exclusion Zone where new building is effectively prohibited.

The SPA was set up to provide protection for rare and threatened birdlife in certain lowland heath locations, the provisions of which were agreed by GBC in its ‘Thames Basin Heaths SPA Avoidance Strategy’.

This strategy establishes zones to protect the SPA from the impact of new development, particularly from the damage caused by pets (dogs, cats, etc) of local residents to the habitats of threatened ground-nesting birds. Land within 400m of the SPA is designated as an ‘Exclusion Zone’ where “there will be a presumption against additional new dwellings”. Since the Wisley Airfield site is immediately adjacent to Ockham Common for a significant length, much of this site falls within 400m of the SPA Exclusion Zone.

The remaining portion of this site falls within the 400m - 5km ‘Zone of Influence’ set out under the SPA policy, which requires developers to contribute a new SANG (‘Site of Alternative Natural Greenspace’) to mitigate for potential damage caused to the SPA from new development – the size of the SANG is a function of the scale of the development. In their previous planning application the developers proposed that the land within the 400m Exclusion Zone would provide their SANG contribution. If accepted as a SANG, this would only encourage the 5000+ residents of the new settlement to allow their pets access into this space, therefore defeating the objective of the SANG mitigation.

Even with the 400m Exclusion Zone in effect, the positioning of such a large site immediately adjacent to such an important protected space will inevitably have a major detrimental impact on the wildlife within it.

Accordingly, I OBJECT to Policy A35 on grounds of its material adverse environmental impact.

The impact of the Exclusion Zone and SANG requirements, together with the need to provide for the existing waste facility, means that the actual area of land available for housing development at this site is estimated to be around 43 hectares.

1. f) The development is totally out of keeping with local character, context & distinctiveness:

It is a key element of planning policy that new developments should be in keeping with the established pattern of development in the area. In the 2016 Proposed Submission Local Plan, GBC’s very first housing policy, Policy H1, requires that development should: “make the most efficient use of land whilst responding to local character, context and distinctiveness.” However, Policy A35 fails to do this.
With its proposal to build some 2,100 homes on and around the site of the former Wisley Airfield, Policy A35 will create a new settlement larger than any other in Guildford Borough, outside of Guildford itself. The nearby historic village of Ockham has merely 159 dwellings. It will be completely swamped by a development on such a scale.

Moreover, the design and density of the proposed development will be completely out of context with its surrounding area. Due to the restrictions of the SPA Exclusion Zone, the need for SANG provision and the land needed for the waste facility, the actual land area to be used for housing development under Policy A35 is estimated to be around 43 hectares. Therefore, with 2,100 homes proposed for this site, the overall housing density of the settlement area may be calculated at around 49 dwellings per hectare (‘dph’).

East Horsley, just three miles from this site, is the largest settlement in Guildford borough outside of Guildford town, with some 1,760 homes. East Horsley presently has an overall housing density of 8.1 dph within its settlement area. Therefore, the proposed development under Policy A35 is six times as dense as the nearest settlement of a comparable size. The proposed development under Policy A35 therefore utterly fails to respond to local context and as such is in breach of GBC’s own Housing Policy H1.

The density of 49 dph proposed under Policy A35 is effectively an urban density appropriate for a metropolitan location. It is to be achieved in part by building apartment blocks of five stories in height, according to the designs previously presented by the developer. For a setting within the middle of rural Surrey this is completely out of character.

Other settlements close to this site are small rural villages such as Ockham, West Horsley and Ripley. These villages have grown up organically over a thousand years. They contain many historic, listed or otherwise protected buildings as well as a range of residential housing, predominantly detached two-storey houses or bungalows. They are all picturesque villages with charm and character. Visitors come to the area to enjoy some of the prettiest villages and countryside in southern England, all within easy access of London. The character of this whole area would be irreparably destroyed if this development goes ahead.

Accordingly, I OBJECT to Policy A35 on the grounds that it is out of keeping with local character, context and distinctiveness, and therefore breaches the NPPF and emerging GBC Policy H1.

Concluding remarks

I do not share the same vision for the future of Guildford Borough as GBC, although I do recognise that an enormous volume of work has gone into the preparation of the Proposed Submission Local Plan, which is now out for public consultation.

However, after more than 20,000 responses were submitted in 2014 in connection with the previous draft Local Plan, most of them opposed to its proposals, GBC has made relatively few changes from the earlier version and none of any materiality.

At the heart of the problem is GBC’s desire to pursue a ‘Forced Growth’ policy which results in highly aggressive and unjustified targets being set for housing development in the Borough. These excessive targets – the proposed 25% increase in housing stock in particular – create a tremendous strain on both land and infrastructure in an already over-crowded and over-stretched part of the country.

These targets will also have a material adverse impact on the Metropolitan Green Belt across this area, despite all the political promises made to the contrary. The irony of Policy P2 which states that ‘We will continue to protect the Metropolitan Green Belt’ does not fool anybody.

Accordingly I OBJECT to the Proposed Submission Local Plan.

I sincerely request that GBC that radically re-assess its own policy objectives rather than force through the Council a Local Plan which clearly does not have the wider support of the residents of Guildford Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

### 1. SITES POLICIES

Of the many sites policies set out in the Proposed Submission Local Plan, I comment upon those in East Horsley as well as several in the surrounding area which may affect the village.

Five East Horsley sites are identified in GBC’s Land Availability Assessment (‘LAA’), two of which are allocated under policies in the Proposed Submission Local Plan. The adjacent parish of West Horsley has six sites identified in the LAA, four of which are allocated in the Proposed Submission Local Plan. Our comments on these site policies are as follows:

**POLICY A36: Hotel, Guildford Road**

Policy A36 proposes to re-develop the current Thatcher’s Hotel for housing.

I am concerned about the loss of this long-standing village hotel and significant employer. However, assuming that the employment loss can be justified, (which is a condition of Policy A36), then I am broadly supportive of housing development at this location, providing it is done in a manner that is in keeping with its prominent landmark position at the entrance to the village. The site is also close to the East Horsley Conservation Area and housing designs and site configuration must reflect the sensitivity of this setting.

Whilst I endorse many of the requirements set out in Policy A36, my principal concern is over the number of houses proposed for this site - approximately 48 dwellings. This number gives an implied gross housing density of 37 dwellings per hectare, which is exceptionally high for this location. The average housing density across the East Horsley Settlement Area is 8.1 dwellings per hectare and the highest density found in any of the roads around this location is 13 dwellings per hectare.

I would only support development at this location if it has a significantly lower housing density.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attachments:
POLICY A39: Land behind Ockham Road North, near Horsley railway station

Policy A39 proposes a housing development of some 100 dwellings on a 5.7 acre green-field Green Belt site behind the houses on the western side of Ockham Road North. Access is to be secured by demolishing the first two houses next to the railway bridge.

As discussed earlier, I consider that the proposed western movement of the settlement boundary needed to bring this site within the settlement area is unjustified and contrary to NPPF rules. If this boundary movement is invalid, as I believe, then this site remains a part of the Metropolitan Green Belt. As such and with no ‘very special circumstances’ to justify housing development upon it, I OBJECT to Policy A39.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E2: Location for new employment floorspace

Under this policy, areas within 500 meters of a "public transport interchange" play a key role.

Proposals for new office and research and development floorspace are to be directed to firstly Guildford town centre and then to areas within 500 meters of a public transport interchange ("PTI").

East Horsley has two railway stations, Horsley Station and Effingham Junction Station, but currently the draft Local Plan only proposes that Horsley Station should have PTI status.

The explanation given at 4.4.17 for Effingham Junction Station ("EJS") not enjoying this status is that either it is located within the Green Belt, or it is within an AONB or it is isolated away from the village or centre. It is not clear which of these applies to this particular station, but we believe strongly that none apply and that there is a strong case for EJS deserving PTI status in the same way as Horsley Station.

I will deal firstly with the three alternative reasons given for EJS not supposedly qualifying as a PTI.

Firstly there is the Green Belt aspect. This is not logical since if location within the Green Belt were determinative, this would mean that Horsley Station would also fail to gain PTI status.

Also the draft Local Plan proposes elsewhere at Policy P2 that the whole of East Horsley, including both Horsley Station and EJS, should be inset from the Green Belt. It will be seen elsewhere in these comments that I object strongly to this
proposal, but the point remains that if location within the Green Belt were a valid reason for not being given PTI status, the Local Plan itself makes it clear that under Policy P2 this will not apply in the case of both Horsley Station and EJS.

Secondly EJS is not located in an AONB. EJS is within the envelope of the village settlement and will remain as such under the draft Local Plan.

Thirdly EJS is not "isolated" or "away from the village centre."

Effingham Junction (the area immediately south and west of EJS, served by respectively Forest Road south of the railway bridge and Old Lane) may not have the extensive shopping parades enjoyed by East Horsley's two other centres (Station Parade and Bishopsmead Parade) but it is a thriving community with a significant population and also a significant number of active and successful employment floorspaces and sites.

These include in Forest Road a general store (Forest Road General Store), a car sales and car repair business (PJB Car Sales/The Body Shop), a dental health centre and chiropractic clinic (Mortiboys) and on Horsley Road, Cedar Garden Centre, Royce Turf and Irrigation and at the Newmarsh Farm site, a number of businesses including Richmonds Horse Transport, Braye Hydraulic Repairs and TTS Surfacing Ltd.

It is therefore vital that the Local Plan's economy policies affecting the area protect these spaces and sites and create conditions for their sustainable growth and hence job creation.

Since all or most of these businesses are located within 500 meters of EJS, Policy E2 would be an invaluable driver for such growth which could play a major role in ensuring that Effingham Junction maintained and enhanced its position as East Horsley's "third centre" for homes and jobs. On the other hand, to exclude EJS from PTI status could very well stifle its sustainable development and condemn it to a future as a dormitory "backwater" of East Horsley.

It is also counter-intuitive in the extreme to refuse EJS "PTI" status. This is for the simple reason that EJS is clearly a "public transport interchange" as that term would be normally understood. This is for the following reasons:

1. As the name "Effingham Junction" indicates, EJS is at an important junction and interchange. The railway line from Guildford splits here into two lines which take different routes into London, so many London-bound passengers will change trains here;
2. EJS serves not only the Effingham Junction area, but also the many residents of Effingham and Little Bookham for whom EJS is far closer than Bookham Station;
3. EJS also serves the many residents of the Cobham area for whom EJS is far closer than Cobham and Stoke d'Abernon station EJS also serves the residents of Ockham and Ripley;
4. EJS also serves the considerable numbers who visit local leisure activity sites, including three paintball sites and two clay pigeon shooting sites, for whom EJS is the only viable public transport hub; and
5. EJS will be the nearest railway station to the land at the former Wisley Airfield site which is proposed for the building of 2000 homes under Policy A35 of the draft Local Plan and if, despite the objections of many including East Horsley Parish Council, this proceeds, then significant numbers of residents will be taking one form of travel to EJS and then interchanging onto the railway.

I accordingly OBJECT to Policy E2 insofar as it fails to confer "public transport interchange" status on Effingham Junction Station.

**POLICY E9: Local centres**

I support this policy, including the designation of Bishopsmead Parade, East Horsley, as a rural Local Centre under the draft Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. HOUSING POLICIES

This section provides comments on the housing policies set out in the Proposed Submission Local Plan.

POLICY H1: Homes for all

I support the general policy statements made in this policy, which are mostly repeating NPPF polices. My main concerns, as set out previously, are primarily with the scale of new housing being proposed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY H2: Affordable Homes

I support the general principle that developers should be required to contribute part of their development profit towards the cost of social housing in the borough. However, this ‘one-size-fits-all’ policy is seriously flawed and likely to prove highly inefficient, if not unworkable, in the longer term.

In this policy GBC have taken no regard whatsoever of the differences in affordable housing need across the borough. This has significant consequences in East Horsley, which is the area with the lowest demand for affordable housing in the borough. Moreover, East Horsley is not classified as a ‘rural area’ under the 1997 Housing Order and therefore is not exempt from the new ‘right to acquire or enfranchise’ entitlement – a factor which is likely to see affordable houses in the parish being bought up as soon as possible and thereafter lost to the affordable sector.
Under Policy H2, 40% of all but the smallest development sites in East Horsley will be required to have affordable housing built upon them, irrespective of whether there is actually demand for more social housing in that area. Moreover, the affordable housing targets proposed in the Proposed Submission Local Plan indicate that the biggest component of affordable housing (40%) should be built as 1-bed dwellings despite the fact that GBC’s own studies show that the strongest affordable demand in the borough is actually for larger 3-bed dwellings.

As a result of this flawed affordable housing policy, a significant volume of social housing is likely to be built in places where it is not needed and offered to tenants who do not want to live there nor have jobs near that location.

Policy H2 thereby fails the test of sustainability and should be radically revised. If not, the outcome will be serious inefficiency in the provision of social housing in the borough. In an area such as East Horsley this is likely to be manifested in a rapid buying-up of properties for quick re-sale at a generous profit, at which point these homes also become lost to the affordable sector.

I accordingly OBJECT to Policy H2.

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. INFRASTRUCTURE POLICIES

This section of the Proposed Submission Local Plan sets out details covering a range of infrastructure policies.

POLICIES I1, I2 & I3

These three policies cover Infrastructure & Delivery, Supporting the Department of Transport’s ‘Road Investment Strategy’ and Sustainable Transport. Whilst I support the general policy statements as presented in each case, it is the detailed infrastructure proposals for Guildford Borough which give me cause for concern.

I believe there are serious deficiencies and shortcomings in the infrastructure of Guildford Borough as it is today and that the aggressive housing policy as proposed by GBC in the Proposed Submission Local Plan will exacerbate this problem.

I would make the following comments specifically about infrastructure in East Horsley today:

- Roads across the parish are in poor condition with many potholes. Many roads are unable to sustain their current levels of traffic, particularly the increasing levels of HGV traffic;
- The principal through roads traversing East Horsley are narrow and winding, have a series of pinch points, have sections without any pavements and are generally unlit. As a senior SCC councillor remarked at a recent public meeting in the village hall: “East Horsley has lanes, not roads.” East Horsley’s ‘lanes’ are totally unsuitable for high volumes of traffic, in particular for the volume of HGV’s now using them;
- Many of the drains are blocked or otherwise in poor condition giving rise to frequent surface water flooding when it rains;
- The pavements are in poor condition. As well as being narrow, they are often uneven and/or cracked making it difficult, for example, for people with pushchairs or prams or in wheelchairs;
- There are insufficient school spaces for the number of local children needing them, with the result that children are often allocated to schools a significant distance away such as Dorking or Woking; and
- The Medical Centre in East Horsley is already at capacity in terms of its number of patients.

It is recognised that, as stated in the Proposed Submission Local Plan, the maintenance of adequate infrastructure and its expansion to meet growing needs is the responsibility of the relevant infrastructure provider. This is often not GBC itself but rather, for example, Surrey County Council or utility companies.

In respect of East Horsley, there are only two specific proposals in Appendix C:

LRN 25 - East Horsley and West Horsley traffic management and environmental improvement scheme. It is not clear what is proposed here, and its timing and funding have to be considered uncertain. It is stated that funding will, at least in part, come from developer contribution. However, it is not at all clear what development is likely to give rise to such a contribution, but it certainly implies that funding could only come if there were a development; and

HSC 5 - Expansion of East Horsley Medical Centre to provide additional capacity and services for future population in years 5 – 15 of the plan.

There are no proposals in respect of all the existing problems with for example roads, pavements, drainage, and schools. Furthermore, it is inevitable that the proposed developments in East Horsley itself and nearby, particularly in West Horsley and the proposals for Wisley, will put further strain on the existing infrastructure. There are no proposals at all to cater for this.

Although an expansion of the Medical centre is proposed in the Infrastructure Schedule, this is not until years 5 – 15 of the Plan. Given that it is already at capacity, EHPC believes that this needs to be done earlier.

Local primary schooling is also a very pertinent issue. There are 11 housing development sites identified in the LAA for East and West Horsley, which taken together would result in the building of 593 new houses in the two parishes that are today served by a single primary school - The Raleigh, in West Horsley. Planning guidance suggest that this number of new
homes will require the provision of around 150 additional primary school places to accommodate such an increase in population. Today there is no spare capacity at The Raleigh, yet no proposals are made in the Proposed Submission Local Plan to provide for any more schooling in the Horsley’s.

I believe that the failure to address the inadequacies of the existing infrastructure to meet the needs of what is there already is a serious deficiency in the Proposed Submission Local Plan.

I accordingly OBJECT to the infrastructure proposals on these grounds. I further OBJECT to the proposals for infrastructure in that they do not meet the stated objective of providing infrastructure to support the proposed developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P2: Green Belt

Local Plan Policy P2 states that: We will continue to protect the Metropolitan Green Belt. We fully and un-equivocally support this policy.

Unfortunately, despite such brave words, GBC appears to be in breach of this policy itself through the housing policies that it has set out in the Local Plan. The analysis included in the Appendix shows that around 65% of the developments proposed in the Proposed Submission Local Plan are to be built on land currently within the Metropolitan Green Belt. We consider this outcome to be outrageous.

Under NPPF rules, GBC is permitted to make allowance for factors which may constrain the delivery of new housing, such as the need to protect the Metropolitan Green Belt or the restrictions required to protect the Surrey Hills Area of Outstanding Natural Beauty (‘AONB’) which is offered protection under the NPPF comparable to that of a national park.

Although these areas make up a large proportion of the land area of Guildford Borough, GBC makes no attempt to reduce its housing delivery in order to take account of such constraints. I find this approach inexplicable.

There are also a number of further issues relating to the detailed implementation of this policy which are set out further below:

1. a) Paragraph 4.3.13: Proposal to inset East Horsley from the Green Belt

Policy P2 proposes that East Horsley should be inset from the Green Belt, instead of being ‘washed over’ as it is today. Currently development is permitted within the settlement boundary, although this area is still considered to be Green Belt with a particular planning regime being applicable.

East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Moreover, being ‘washed over’ by the Green Belt has not been a serious constraint on development within the village. For example, GBC’s planning records indicate that no less than 149 net new homes were added to the village housing stock through in-filling and brownfield developments between 2000 and 2015.

GBC attributes the need to inset East Horsley to NPPF requirements, arguing that the test for remaining ‘washed over’ is that the village should make an important contribution to the openness of the Green Belt. This East Horsley clearly does.

No less than 36% of East Horsley is composed of woodlands, whilst inside the settlement area there is an average housing density of just 8.1 dwellings per hectare (‘dph’). Woodlands and large residential gardens make a vital contribution towards bio-diversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the greenbelt. It is
one thing for a planner to study a map and see a settlement area filled with housing, but it is quite another actually to come to a rural village like East Horsley and see how the Green Belt has preserved the rural character and openness of this village.

Today East Horsley is a picturesque and flourishing rural community, which has and continues to experience steady incremental growth as a result of being ‘washed over’ by the Green Belt. As the saying goes: “If it ain’t broke, don’t fix it”. This applies to East Horsley in the matter of insetting.

I therefore OBJECT to the proposal to inset East Horsley from the Green Belt and request that this proposal be dropped from the Local Plan.

1. b) Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley

GBC are proposing to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area, as set out in the Proposals Map, with the justifications seemingly provided in the Green Belt & Countryside Study prepared by the consultants, Pegasus.

I object to two specific boundary changes, which have been proposed, as follows:

1. There is a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Ockham Road North up to the eastern boundary of Lollesworth Wood. This proposal removes over 5 hectares of agricultural fields from the Green Belt. The present boundary line is clearly defined by a deep and well-maintained drainage ditch which is classified by the Environment Agency as a ‘main river line’ and therefore represents a highly defensible Green Belt boundary.

Moving this boundary west to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. I do not believe this proposal can be considered as an exceptional circumstance. Clearly the only justification for this change is to bring a large agricultural field within the settlement area in order to provide more housing land. However, under NPPF rules this is not a sufficient justification for changing a Green Belt boundary. As such, I believe it is an invalid proposal.

I accordingly OBJECT to this proposed boundary change.

1. There is also a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Kingston Avenue up to a tree line running along the Parish Boundary at the western edge of Kingston Meadows. The result is to take all of Kingston Meadows out of the Green Belt.

Kingston Meadows is the main public recreational space of East Horsley, comprising various sports facilities and playing fields. The present settlement boundary is clearly defined by a deep and well-maintained drainage ditch running along its eastern side. It therefore represents a very defensible Green Belt boundary. Moving this boundary westwards to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. I do not believe that this can be considered as an exceptional circumstance. As such we believe this is an invalid proposal.

I accordingly OBJECT to this proposed boundary change.

In the Green Belt & Countryside Study and its accompanying Topic Paper, GBC justifies the need to make changes in settlement boundaries in order to meet unfulfilled housing need in the Borough. However, Green Belt rules make it clear that unfulfilled housing need is not normally considered to be ‘an exceptional circumstance’. If it were the entire Green Belt would already be covered in tarmac.

The NPPF is clear that every movement in settlement boundaries must be justified by ‘exceptional circumstances’. GBC have offered only a generic justification in their Topic Paper of meeting unfulfilled housing need, but a case by case justification has not been provided. As such, I believe the settlement boundary changes referred to above (and many others) are invalid without such detailed justification.

1. c) Paragraph 4.3.17: Proposal to remove Wisley Airfield from the Green Belt
I OBJECT to the proposal to remove Wisley Airfield from the Green Belt. The only justification for this proposed change is unfulfilled housing need which is not considered an exceptional circumstance. The proposed Wisley development is discussed further below in the Site Allocation section.

1.  
   
   **d) POLICY P2: Limited In-filling**
   
   A new planning designation has been introduced called ‘the identified boundary of the village’. For East Horsley this covers a number of roads south of the A246. It is a sizeable area, covering 45 hectares, the equivalent of 23% of the present Settlement Area of the village. Within this area, Policy P2 sets out proposals that would allow ‘limited in-filling’ within this boundary.

   I find it hard to reconcile the opening statement of Policy P2 that “We will continue to protect the Metropolitan Green Belt” with this sizeable reduction in effective Green Belt status. In my opinion, this policy represents a de facto extension of the Settlement Boundary and a substantial reduction in the operational effectiveness of the Green Belt, whose effectiveness is significantly weakened where this new planning designation applies.

I accordingly OBJECT to the proposal to designate roads south of the A246 as being within the ‘identified boundary of the village’ and to allow limited infilling within this area.

1. STRATEGIC POLICIES

This section provides comments on the two basic strategic policies which provide the overall framework for the Proposed Submission Local Plan.

Policy S1: Presumption in favour of sustainable development

I support the objective of favouring sustainable development as set out in Policy S1. It is in effect merely repeating what is already NPPF policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I have carefully considered the Proposed Submission Local Plan which Guildford Borough Council (“GBC”) has now published for public consultation. My comments are set out in this letter.

I have strong concerns about the Proposed Submission Local Plan and the evidence and assumptions which support it. In particular, I do not agree with the scale of the house building programme which is being proposed by GBC. The target outlined represents a 25% increase in the housing stock of the borough, whilst I note that the Office of National Statistics (“ONS”) projects a population increase of some 15% for Guildford Borough over this same period.

I also note that the Proposed Submission Local Plan includes the statement “We will continue to protect the Metropolitan Green Belt”. I support this policy. However, unfortunately GBC appears to be in breach of this same policy through the housing policies it has set out in the Proposed Submission Local Plan, whereby some 65% of developments will be made on land that is currently Green Belt.

I am also concerned that the infrastructure proposals are inadequate even to meet the needs of what is there at the moment, let alone the proposed developments in the Local Plan.

**I therefore OBJECT to the Proposed Submission Local Plan.**

Detailed comments on the six different policy areas which form the basis of the Proposed Submission Local Plan are now set out below, followed by my comments on specific site allocation policies.

**Policy S2: Borough Wide Strategy**

This policy sets out the objective of adding 13,860 new homes to Guildford Borough over the 2013-2033 period of the Proposed Submission Local Plan, equating to an annual build of 693 new homes per annum.

I have serious concerns about the enormous scale of this building programme, which represents a net increase of 25% in the housing stock of Guildford Borough, a remarkable rate of increase for a borough in the English Home Counties. It is even more remarkable when the official statisticians at the Office of National Statistics (“ONS”) are projecting a population increase of some 15% for Guildford Borough over this same period.

Some explanation for this mismatch may partly be found in the conclusion of the West Surrey Strategic Housing Market Assessment, (“SHMA”), which looks at how the annual housing target of 693 homes is comprised. It estimates that 517 homes per annum arise from ‘the demographic starting point’ – effectively what the official statisticians at the ONS and the Department of Communities and Local Government (“DCLG”) are predicting Guildford will require based upon their population and household forecasts. To this is added in the SHMA another 120 homes per annum in order to ‘support economic growth’, a further 31 homes per annum to ‘improve affordability’ and 25 homes due to ‘student growth’, all of which totals up to 693 homes per annum target.

I find this analysis perplexing. Economic growth is already factored into the statistics produced by ONS and DCLG, so what GBC are proposing actually comes on top of the official household growth forecasts for the borough. Moreover, the GBC Affordable Housing Policy H2 is proposing that all development sites (other than the very smallest) will be required to have 40% of their homes offered as affordable housing, so why another 31 homes per annum is needed as affordable housing on top of this 40% ratio is quite incomprehensible.
Furthermore, DCLG research has concluded that there is on average a 97% correlation between population growth and household formation. Therefore, if GBC’s target of a 25% increase in housing stock were actually realised, the outcome will be that Guildford Borough would see its population rise by around 25% over this period. This means that the resultant population growth for Guildford Borough would be at a level 67% higher than the official forecasts.

One of my particular concerns in reviewing the Proposed Submission Local Plan is that the impression is conveyed upon the reader that GBC’s housing targets are effectively needed to fulfil NPPF requirements or because of central government policy – in other words that GBC has no real choice but to put forward these projections, unpalatable though they might be. However, the reality is very different. GBC has voluntarily chosen to pursue a policy of aggressive civic and economic expansion – one might perhaps term it a policy of ‘Forced Growth’ – which underpins all of the housing policies in the Local Plan. In short, the difference between the official statisticians’ forecasts and GBC’s target of a 25% increase in housing stock is entirely down to a political choice made by GBC.

Of course, there is nothing fundamentally wrong in GBC adopting a Forced Growth policy for the Borough – not as long as that policy is made clearly and explicitly and is fully supported by a majority of its electorate. However, I doubt whether this is actually the case. It is certainly not a vision that is shared by me, which unequivocally rejects GBC’s Forced Growth policy.

I accordingly OBJECT to the borough housing targets set out in Policy S2.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2045  Respondent: 15247617 / Michael Curtis  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object strongly to the proposals for a massive increase of new houses along the Hogs Back. We have lived in Onslow Village for over 38 years and in that time we have seen an enormous increase in traffic congestion and pollution. This proposed development is going to create a catastrophic effect in the area already blighted with severe traffic congestion. My wife and I have been retired now for the past 10 years and can only assume that our quality of life is going to change for the worse as a result of these proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. SITES POLICIES

Of the many sites policies set out in the Proposed Submission Local Plan, I comment upon those in East Horsley as well as several in the surrounding area which may affect the village.

Five East Horsley sites are identified in GBC’s Land Availability Assessment (‘LAA’), two of which are allocated under policies in the Proposed Submission Local Plan. The adjacent parish of West Horsley has six sites identified in the LAA, four of which are allocated in the Proposed Submission Local Plan. Our comments on these site policies are as follows:

POLICIES A37, A38, A40 & A41, located in West Horsley

The LAA identifies six sites in West Horsley for potential development, the four largest having allocation policies within the Proposed Submission Local Plan. The total housing number arising from these six sites is 405 homes in total. For a village which had 1,124 dwellings at the 2011 Census, this represents a proportional increase of 36% over the plan period, an enormously high proportion by any standards.

The four policy sites are all located within the Green Belt. One is a partly brownfield development but the other three sites are all open fields used for agriculture and all lie within the current Green Belt at the edge of the Settlement Area. The reasons presented by the consultants, Pegasus, in the Green Belt & Countryside Study to justify these settlement boundary
movements appear to us highly questionable and in no way to meet the requirements of the NPPF that such boundary movements are only to be made in 'exceptional circumstances'. These movements clearly represent a deliberate pushing back of settlement boundaries in order to provide more greenfield sites for housing development. As such, I consider these proposed movements in settlement boundaries to be invalid.

These proposals are also contrary to the principles of the Metropolitan Green Belt. West Horsley represents one of the first ‘lines of defence’ against London urban encroachment outside of the M25 circle. Yet these policies will eliminate a significant part of this defence as they seek to expand the boundaries of this village and fill-in every bit of green space within this rural setting.

It is also totally contrary to the opening statement of Local Plan Policy P2 that “We will continue to protect the Metropolitan Green Belt” It seems that in West and East Horsley at least the draft Local Plan is doing exactly the opposite.

Given the scale of the development proposed in West Horsley, the inevitable destruction of its village character and the impact on infrastructure across West and East Horsley, I OBJECT to the site allocation policies A37, A38, A40 and A41.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPS16/893  **Respondent:** 15247745 / Brian Aitcheson  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**POLICY A35: Land at former Wisley Airfield**

Policy A35 proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt.

I have major concerns about this proposed development and have objected against prior planning applications at this location. I consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country.

I strongly OBJECT to this proposed policy for the reasons below.

1. **a) The proposed development represents a fundamental breach of Metropolitan Green Belt rules:**

The site forms part of the Metropolitan Green Belt. Under the NPPF, development on such Green Belt land is only permitted under ‘very special circumstances’. GBC’s Planning Officer, in assessing a previous planning application from the developer of this site, rejected their application, arguing that: It has not been demonstrated that the benefits of the proposal amount to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified.
Ministerial guidance has repeatedly confirmed that unfulfilled housing need does not qualify as a very special circumstance. Whilst the developers’ previous planning application was judged and rejected based upon the 2003 GBC Local Plan, the proposal to include this site within the 2016 Proposed Submission Local Plan does not fundamentally change the argument against it. Any removal of this site from the Green Belt can only be made based upon ‘exceptional circumstances’, which cannot be justified on the basis of unfulfilled housing need. If this was the case, then the entire Metropolitan Green Belt would already have become filled with housing.

Removal of this site from the Green Belt is totally against its rules, regulations and underlying spirit. The site location at the edge of the M25 circle represents a ‘first line of defence’ against metropolitan encroachment into the Surrey countryside. If this site is developed then it becomes only a question of time before Guildford itself is absorbed into the sprawling London conurbation.

Accordingly, I OBJECT to Policy A35 as a fundamental breach of the Metropolitan Green Belt rules.

1.  b) This site does not meet acceptable levels of sustainability:

Sustainability Appraisal is a core concept of planning policy, yet this site is rated very poorly in terms of its sustainability.

The sustainability appraisal undertaken by GBC’s consultant, AECOM, is presented in the Local Plan Evidence Base report ‘Sustainability Appraisal (SA) of the Guildford Borough Local Plan’ issued in June 2016. In their report AECOM have graded all Local Plan policy sites according to 21 different criteria using the conventional ‘traffic light’ system. Red colouring signifies poor sustainability. Of the six larger sites included in their evaluation, (those with proposed housing numbers of 1000 homes or greater), AECOM rates Site A35 as the very worst of all in terms of its sustainability. No less than 8 out of the 21 criteria are graded as ‘Red’ by AECOM for this site, more than any other large site.

Detailed reasons why this site has such poor sustainability include the following:

- There is currently no infrastructure whatsoever at this site, meaning that all water, electricity, gas and phone services will need to be newly established;

- New large-scale sewage disposal will be needed, a fact recognised by Thames Water, indicating it may take 3+ years to provide adequate sewage handling facilities for this site;

- There are presently no schools, medical services or shops within walking distance of this site;

- There is presently no local employment at this site and little after the development is completed;

- There will be a significant destruction of agricultural land arising from this development;

- There will be significant environmental damage from this development;

- There is no public transport currently serving this location;
• The nearest train stations are Horsley and Effingham Junction, both around 3 miles away and so too far to walk. Neither station currently has significant parking capacity available.

• Travel from this site will be primarily dependent upon motor vehicles. Any new site so dependent upon motor vehicles for transport cannot be considered as being ‘sustainable’;

• New access roads will be needed and significant changes proposed to the surrounding road network, leading to further pressure on over-crowded rural roads and increase in the traffic congestion in nearby settlements;

Whilst some of these issues may be mitigated, e.g. by building new schools, medical facilities, etc, others such as the environmental issues and infrastructure impact may not. This proposal, fundamentally, represents an attempt to create a large-scale new settlement in a poorly-sited green field location. However, as the GBC’s own consultant has demonstrated, this site does not reach acceptable minimum levels of sustainability.

Accordingly, I OBJECT to Policy A35 on grounds of its unacceptable sustainability.

1. c) The site will have a severe impact on local traffic & infrastructure:

The proposed development will have a severe adverse impact on road traffic in the surrounding area. This includes East Horsley where high volumes of additional traffic are likely from the residents of this new settlement accessing East Horsley’s two stations, shops and nearby schools. Most of the rural roads in this area are narrow winding ‘lanes’ – a term used in a recent local public meeting by John Furey, senior SCC councillor for Infrastructure to describe East Horsley’s through roads. Many of these ‘lanes’ are without pavements for large stretches, whilst the principal through-roads of Ockham Road South and Forest Road pass along unlit residential areas so narrow that two buses cannot cross in many sections of these ‘lanes’.

The road closures and junction changes being proposed to accompany this development will only serve to increase traffic volumes through the village centres of East Horsley, Cobham and Ripley, and around the station at Effingham Junction, all of which already suffer from traffic congestion at peak hours. The further increase in traffic congestion at the A3-M25 intersection would only exacerbate an existing problem for the highways authority - we understand Highways England have repeatedly expressed serious concerns about this development.

Neither Horsley nor Effingham Junction railway stations currently have any significant spare parking capacity. The suggestion of the developer that large numbers of cyclists from Site A35 will cycle 6 or 7 miles each day along busy roads in order to travel there and back to these stations lacks credibility. Other village facilities in East Horsley, such as the medical centre, are also likely to suffer adversely from a substantial increase in users as a result of this proposed development.

Accordingly, I OBJECT to Policy A35 on grounds of its severe impact on local infrastructure.

1. d) There are damaging health & safety implications arising from development at this site:
The site is located close to the junction of the M25 and A3, one of the busiest road junctions in the country. The Nitrous Oxide (‘NOx’) emissions recorded around this area are extremely high and will affect residents living at the proposed site. The proposal to build new primary and secondary schools at this location is also contrary to government policy prohibiting the building of schools on sites in areas where there is high NOx.

In rejecting the previous planning application by the developers, the GBC Planning Officer cited the “failure to provide adequate information on NOx emissions and nitrogen deposition and to provide any information on acid deposition” as one of the grounds for this rejection.

Accordingly, I OBJECT to Policy A35 on grounds of its adverse health & safety implications.

1. **e) The environmental impact on protected wildlife will be substantial:**

   GBC’s *Land Availability Assessment* which supports Policy A35 states that the site lies within the 400m-5km ‘Zone of Influence’ of the Thames Basin Heaths Special Protection Area (‘SPA’). This is not correct. The site is immediately adjacent to Ockham & Wisley Commons, an area designated as a Site of Special Scientific Importance (‘SSSI’), which forms one part of the Thames Basin Heaths SPA and much of the site lies within the 400m Exclusion Zone where new building is effectively prohibited.

   The SPA was set up to provide protection for rare and threatened birdlife in certain lowland heath locations, the provisions of which were agreed by GBC in its ‘Thames Basin Heaths SPA Avoidance Strategy’.

   This strategy establishes zones to protect the SPA from the impact of new development, particularly from the damage caused by pets (dogs, cats, etc) of local residents to the habitats of threatened ground-nesting birds. Land within 400m of the SPA is designated as an ‘Exclusion Zone’ where “there will be a presumption against additional new dwellings”. Since the Wisley Airfield site is immediately adjacent to Ockham Common for a significant length, much of this site falls within 400m of the SPA Exclusion Zone.

   The remaining portion of this site falls within the 400m - 5km ‘Zone of Influence’ set out under the SPA policy, which requires developers to contribute a new SANG (‘Site of Alternative Natural Greenspace’) to mitigate for potential damage caused to the SPA from new development – the size of the SANG is a function of the scale of the development. In their previous planning application the developers proposed that the land within the 400m Exclusion Zone would provide their SANG contribution. If accepted as a SANG, this would only encourage the 5000+ residents of the new settlement to allow their pets access into this space, therefore defeating the objective of the SANG mitigation.

   Even with the 400m Exclusion Zone in effect, the positioning of such a large site immediately adjacent to such an important protected space will inevitably have a major detrimental impact on the wildlife within it.

   Accordingly, I OBJECT to Policy A35 on grounds of its material adverse environmental impact.

The impact of the Exclusion Zone and SANG requirements, together with the need to provide for the existing waste facility, means that the actual area of land available for housing development at this site is estimated to be around 43 hectares.

1. **f) The development is totally out of keeping with local character, context & distinctiveness:**

   It is a key element of planning policy that new developments should be in keeping with the established pattern of development in the area. In the 2016 Proposed Submission Local Plan, GBC’s very first housing policy, Policy H1,
requires that development should: “make the most efficient use of land whilst responding to local character, context and distinctiveness.” However, Policy A35 fails to do this.

With its proposal to build some 2,100 homes on and around the site of the former Wisley Airfield, Policy A35 will create a new settlement larger than any other in Guildford Borough, outside of Guildford itself. The nearby historic village of Ockham has merely 159 dwellings. It will be completely swamped by a development on such a scale.

Moreover, the design and density of the proposed development will be completely out of context with its surrounding area. Due to the restrictions of the SPA Exclusion Zone, the need for SANG provision and the land needed for the waste facility, the actual land area to be used for housing development under Policy A35 is estimated to be around 43 hectares. Therefore, with 2,100 homes proposed for this site, the overall housing density of the settlement area may be calculated at around 49 dwellings per hectare (‘dph’).

East Horsley, just three miles from this site, is the largest settlement in Guildford borough outside of Guildford town, with some 1,760 homes. East Horsley presently has an overall housing density of 8.1 dph within its settlement area. Therefore, the proposed development under Policy A35 is six times as dense as the nearest settlement of a comparable size. The proposed development under Policy A35 therefore utterly fails to respond to local context and as such is in breach of GBC’s own Housing Policy H1.

The density of 49 dph proposed under Policy A35 is effectively an urban density appropriate for a metropolitan location. It is to be achieved in part by building apartment blocks of five stories in height, according to the designs previously presented by the developer. For a setting within the middle of rural Surrey this is completely out of character.

Other settlements close to this site are small rural villages such as Ockham, West Horsley and Ripley. These villages have grown up organically over a thousand years. They contain many historic, listed or otherwise protected buildings as well as a range of residential housing, predominantly detached two-storey houses or bungalows. They are all picturesque villages with charm and character. Visitors come to the area to enjoy some of the prettiest villages and countryside in southern England, all within easy access of London. The character of this whole area would be irreparably destroyed if this development goes ahead.

Accordingly, I OBJECT to Policy A35 on the grounds that it is out of keeping with local character, context and distinctiveness, and therefore breaches the NPPF and emerging GBC Policy H1.

Concluding remarks

I do not share the same vision for the future of Guildford Borough as GBC, although I do recognise that an enormous volume of work has gone into the preparation of the Proposed Submission Local Plan, which is now out for public consultation.

However, after more than 20,000 responses were submitted in 2014 in connection with the previous draft Local Plan, most of them opposed to its proposals, GBC has made relatively few changes from the earlier version and none of any materiality.

At the heart of the problem is GBC’s desire to pursue a ‘Forced Growth’ policy which results in highly aggressive and unjustified targets being set for housing development in the Borough. These excessive targets – the proposed 25% increase in housing stock in particular – create a tremendous strain on both land and infrastructure in an already over-crowded and over-stretched part of the country.

These targets will also have a material adverse impact on the Metropolitan Green Belt across this area, despite all the political promises made to the contrary. The irony of Policy P2 which states that “We will continue to protect the Metropolitan Green Belt” does not fool anybody.

Accordingly I OBJECT to the Proposed Submission Local Plan.
I sincerely request that GBC that radically re-assess its own policy objectives rather than force through the Council a Local Plan which clearly does not have the wider support of the residents of Guildford Borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A36: Hotel, Guildford Road

Policy A36 proposes to re-develop the current Thatcher’s Hotel for housing.

I am concerned about the loss of this long-standing village hotel and significant employer. However, assuming that the employment loss can be justified, (which is a condition of Policy A36), then I am broadly supportive of housing development at this location, providing it is done in a manner that is in keeping with its prominent landmark position at the entrance to the village. The site is also close to the East Horsley Conservation Area and housing designs and site configuration must reflect the sensitivity of this setting.

Whilst I endorse many of the requirements set out in Policy A36, my principal concern is over the number of houses proposed for this site - approximately 48 dwellings. This number gives an implied gross housing density of 37 dwellings per hectare, which is exceptionally high for this location. The average housing density across the East Horsley Settlement Area is 8.1 dwellings per hectare and the highest density found in any of the roads around this location is 13 dwellings per hectare.

I would only support development at this location if it has a significantly lower housing density.

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY A39: Land behind Ockham Road North, near Horsley railway station

Policy A39 proposes a housing development of some 100 dwellings on a 5.7 acre green-field Green Belt site behind the houses on the western side of Ockham Road North. Access is to be secured by demolishing the first two houses next to the railway bridge.

As discussed earlier, I consider that the proposed western movement of the settlement boundary needed to bring this site within the settlement area is unjustified and contrary to NPPF rules. If this boundary movement is invalid, as I believe, then this site remains a part of the Metropolitan Green Belt. As such and with no ‘very special circumstances’ to justify housing development upon it, I OBJECT to Policy A39.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E2: Location for new employment floorspace

Under this policy, areas within 500 meters of a "public transport interchange" play a key role.

Proposals for new office and research and development floorspace are to be directed to firstly Guildford town centre and then to areas within 500 meters of a public transport interchange ("PTI").

East Horsley has two railway stations, Horsley Station and Effingham Junction Station, but currently the draft Local Plan only proposes that Horsley Station should have PTI status.

The explanation given at 4.4.17 for Effingham Junction Station ("EJS") not enjoying this status is that either it is located within the Green Belt, or it is within an AONB or it is isolated away from the village or centre. It is not clear which of these applies to this particular station, but we believe strongly that none apply and that there is a strong case for EJS deserving PTI status in the same way as Horsley Station.

I will deal firstly with the three alternative reasons given for EJS not supposedly qualifying as a PTI.

Firstly there is the Green Belt aspect. This is not logical since if location within the Green Belt were determinative, this would mean that Horsley Station would also fail to gain PTI status.

Also the draft Local Plan proposes elsewhere at Policy P2 that the whole of East Horsley, including both Horsley Station and EJS, should be inset from the Green Belt. It will be seen elsewhere in these comments that I object strongly to this proposal, but the point remains that if location within the Green Belt were a valid reason for not being given PTI status, the Local Plan itself makes it clear that under Policy P2 this will not apply in the case of both Horsley Station and EJS.
Secondly EJS is not located in an AONB. EJS is within the envelope of the village settlement and will remain as such under the draft Local Plan.

Thirdly EJS is not "isolated" or "away from the village centre."

Effingham Junction (the area immediately south and west of EJS, served by respectively Forest Road south of the railway bridge and Old Lane) may not have the extensive shopping parades enjoyed by East Horsley's two other centres (Station Parade and Bishopsmead Parade) but it is a thriving community with a significant population and also a significant number of active and successful employment floorspaces and sites.

These include in Forest Road a general store (Forest Road General Store), a car sales and car repair business (PJB Car Sales/The Body Shop), a dental health centre and chiropractic clinic (Mortiboys) and on Horsley Road, Cedar Garden Centre, Royce Turf and Irrigation and at the Newmarsh Farm site, a number of businesses including Richmonds Horse Transport, Braye Hydraulic Repairs and TTS Surfacing Ltd.

It is therefore vital that the Local Plan's economy policies affecting the area protect these spaces and sites and create conditions for their sustainable growth and hence job creation.

Since all or most of these businesses are located within 500 meters of EJS, Policy E2 would be an invaluable driver for such growth which could play a major role in ensuring that Effingham Junction maintained and enhanced its position as East Horsley's "third centre" for homes and jobs. On the other hand, to exclude EJS from PTI status could very well stifle its sustainable development and condemn it to a future as a dormitory "backwater" of East Horsley.

It is also counter-intuitive in the extreme to refuse EJS "PTI" status. This is for the simple reason that EJS is clearly a "public transport interchange" as that term would be normally understood. This is for the following reasons:

1. As the name "Effingham Junction" indicates, EJS is at an important junction and interchange. The railway line from Guildford splits here into two lines which take different routes into London, so many London-bound passengers will change trains here;
2. EJS serves not only the Effingham Junction area, but also the many residents of Effingham and Little Bookham for whom EJS is far closer than Bookham Station;
3. EJS also serves the many residents of the Cobham area for whom EJS is far closer than Cobham and Stoke d'Abernon station EJS also serves the residents of Ockham and Ripley;
4. EJS also serves the considerable numbers who visit local leisure activity sites, including three paintball sites and two clay pigeon shooting sites, for whom EJS is the only viable public transport hub; and
5. EJS will be the nearest railway station to the land at the former Wisley Airfield site which is proposed for the building of 2000 homes under Policy A35 of the draft Local Plan and if, despite the objections of many including East Horsley Parish Council, this proceeds, then significant numbers of residents will be taking one form of travel to EJS and then interchanging onto the railway.

I accordingly OBJECT to Policy E2 insofar as it fails to confer "public transport interchange" status on Effingham Junction Station.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. HOUSING POLICIES

This section provides comments on the housing policies set out in the Proposed Submission Local Plan.

POLICY H1: Homes for all

I support the general policy statements made in this policy, which are mostly repeating NPPF policies. My main concerns, as set out previously, are primarily with the scale of new housing being proposed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY H2: Affordable Homes

I support the general principle that developers should be required to contribute part of their development profit towards the cost of social housing in the borough. However, this ‘one-size-fits-all’ policy is seriously flawed and likely to prove highly inefficient, if not unworkable, in the longer term.

In this policy GBC have taken no regard whatsoever of the differences in affordable housing need across the borough. This has significant consequences in East Horsley, which is the area with the lowest demand for affordable housing in the borough. Moreover, East Horsley is not classified as a ‘rural area’ under the 1997 Housing Order and therefore is not exempt from the new ‘right to acquire or enfranchise’ entitlement – a factor which is likely to see affordable houses in the parish being bought up as soon as possible and thereafter lost to the affordable sector.
Under Policy H2, 40% of all but the smallest development sites in East Horsley will be required to have affordable housing built upon them, irrespective of whether there is actually demand for more social housing in that area. Moreover, the affordable housing targets proposed in the Proposed Submission Local Plan indicate that the biggest component of affordable housing (40%) should be built as 1-bed dwellings despite the fact that GBC’s own studies show that the strongest affordable demand in the borough is actually for larger 3-bed dwellings.

As a result of this flawed affordable housing policy, a significant volume of social housing is likely to be built in places where it is not needed and offered to tenants who do not want to live there nor have jobs near that location.

Policy H2 thereby fails the test of sustainability and should be radically revised. If not, the outcome will be serious inefficiency in the provision of social housing in the borough. In an area such as East Horsley this is likely to be manifested in a rapid buying-up of properties for quick re-sale at a generous profit, at which point these homes also become lost to the affordable sector.

I accordingly OBJECT to Policy H2.

1. INFRASTRUCTURE POLICIES

This section of the Proposed Submission Local Plan sets out details covering a range of infrastructure policies.

POLICIES I1, I2 & I3

These three policies cover Infrastructure & Delivery, Supporting the Department of Transport’s ‘Road Investment Strategy’ and Sustainable Transport. Whilst I support the general policy statements as presented in each case, it is the detailed infrastructure proposals for Guildford Borough which give me cause for concern.

I believe there are serious deficiencies and shortcomings in the infrastructure of Guildford Borough as it is today and that the aggressive housing policy as proposed by GBC in the Proposed Submission Local Plan will exacerbate this problem.

I would make the following comments specifically about infrastructure in East Horsley today:

- Roads across the parish are in poor condition with many potholes. Many roads are unable to sustain their current levels of traffic, particularly the increasing levels of HGV traffic;
- The principal through roads traversing East Horsley are narrow and winding, have a series of pinch points, have sections without any pavements and are generally unlit. As a senior SCC councillor remarked at a recent public meeting in the village hall: “East Horsley has lanes, not roads.” East Horsley’s ‘lanes’ are totally unsuitable for high volumes of traffic, in particular for the volume of HGV’s now using them;
- Many of the drains are blocked or otherwise in poor condition giving rise to frequent surface water flooding when it rains;
- The pavements are in poor condition. As well as being narrow, they are often uneven and/or cracked making it difficult, for example, for people with pushchairs or prams or in wheelchairs;
- There are insufficient school spaces for the number of local children needing them, with the result that children are often allocated to schools a significant distance away such as Dorking or Woking; and
- The Medical Centre in East Horsley is already at capacity in terms of its number of patients.

It is recognised that, as stated in the Proposed Submission Local Plan, the maintenance of adequate infrastructure and its expansion to meet growing needs is the responsibility of the relevant infrastructure provider. This is often not GBC itself but rather, for example, Surrey County Council or utility companies.

In respect of East Horsley, there are only two specific proposals in Appendix C:

LRN 25 - East Horsley and West Horsley traffic management and environmental improvement scheme. It is not clear what is proposed here, and its timing and funding have to be considered uncertain. It is stated that funding will, at least in part, come from developer contribution. However, it is not at all clear what development is likely to give rise to such a contribution, but it certainly implies that funding could only come if there were a development; and

HSC 5 - Expansion of East Horsley Medical Centre to provide additional capacity and services for future population in years 5 – 15 of the plan.

There are no proposals in respect of all the existing problems with for example roads, pavements, drainage, and schools.

Furthermore, it is inevitable that the proposed developments in East Horsley itself and nearby, particularly in West Horsley and the proposals for Wisley, will put further strain on the existing infrastructure. There are no proposals at all to cater for this.

Although an expansion of the Medical centre is proposed in the Infrastructure Schedule, this is not until years 5 – 15 of the Plan. Given that it is already at capacity, EHPC believes that this needs to be done earlier.

Local primary schooling is also a very pertinent issue. There are 11 housing development sites identified in the LAA for East and West Horsley, which taken together would result in the building of 593 new houses in the two parishes that are today served by a single primary school - The Raleigh, in West Horsley. Planning guidance suggest that this number of new
homes will require the provision of around 150 additional primary school places to accommodate such an increase in population. Today there is no spare capacity at The Raleigh, yet no proposals are made in the Proposed Submission Local Plan to provide for any more schooling in the Horsley’s.

I believe that the failure to address the inadequacies of the existing infrastructure to meet the needs of what is there already is a serious deficiency in the Proposed Submission Local Plan.

I accordingly OBJECT to the infrastructure proposals on these grounds. I further OBJECT to the proposals for infrastructure in that they do not meet the stated objective of providing infrastructure to support the proposed developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: PSLPP16/1826  Respondent: 15247745 / Brian Aitcheson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P2: Green Belt

Local Plan Policy P2 states that: We will continue to protect the Metropolitan Green Belt. We fully and un-equivocally support this policy.

Unfortunately, despite such brave words, GBC appears to be in breach of this policy itself through the housing policies that it has set out in the Local Plan. The analysis included in the Appendix shows that around 65% of the developments proposed in the Proposed Submission Local Plan are to be built on land currently within the Metropolitan Green Belt. We consider this outcome to be outrageous.

Under NPPF rules, GBC is permitted to make allowance for factors which may constrain the delivery of new housing, such as the need to protect the Metropolitan Green Belt or the restrictions required to protect the Surrey Hills Area of Outstanding Natural Beauty (‘AONB’) which is offered protection under the NPPF comparable to that of a national park. Although these areas make up a large proportion of the land area of Guildford Borough, GBC makes no attempt to reduce its housing delivery in order to take account of such constraints. I find this approach inexplicable.

There are also a number of further issues relating to the detailed implementation of this policy which are set out further below:

1. a) Paragraph 4.3.13: Proposal to inset East Horsley from the Green Belt

Policy P2 proposes that East Horsley should be inset from the Green Belt, instead of being ‘washed over’ as it is today. Currently development is permitted within the settlement boundary, although this area is still considered to be Green Belt with a particular planning regime being applicable.

East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Moreover, being ‘washed over’ by the Green Belt has not been a serious constraint on development within the village. For example, GBC’s planning records indicate that no less than 149 net new homes were added to the village housing stock through in-filling and brownfield developments between 2000 and 2015.

GBC attributes the need to inset East Horsley to NPPF requirements, arguing that the test for remaining ‘washed over’ is that the village should make an important contribution to the openness of the Green Belt. This East Horsley clearly does. No less than 36% of East Horsley is composed of woodlands, whilst inside the settlement area there is an average housing density of just 8.1 dwellings per hectare (‘dph’). Woodlands and large residential gardens make a vital contribution towards bio-diversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the greenbelt. It is...
one thing for a planner to study a map and see a settlement area filled with housing, but it is quite another actually to come to a rural village like East Horsley and see how the Green Belt has preserved the rural character and openness of this village.

Today East Horsley is a picturesque and flourishing rural community, which has and continues to experience steady incremental growth as a result of being ‘washed over’ by the Green Belt. As the saying goes: “If it ain’t broke, don’t fix it”. This applies to East Horsley in the matter of insetting.

I therefore OBJECT to the proposal to inset East Horsley from the Green Belt and request that this proposal be dropped from the Local Plan.

1. **b) Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley**

GBC are proposing to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area, as set out in the Proposals Map, with the justifications seemingly provided in the Green Belt & Countryside Study prepared by the consultants, Pegasus.

I object to two specific boundary changes, which have been proposed, as follows:

1. There is a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Ockham Road North up to the eastern boundary of Lollesworth Wood. This proposal removes over 5 hectares of agricultural fields from the Green Belt. The present boundary line is clearly defined by a deep and well-maintained drainage ditch which is classified by the Environment Agency as a ‘main river line’ and therefore represents a highly defensible Green Belt boundary.

Moving this boundary west to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. I do not believe this proposal can be considered as an exceptional circumstance. Clearly the only justification for this change is to bring a large agricultural field within the settlement area in order to provide more housing land. However, under NPPF rules this is not a sufficient justification for changing a Green Belt boundary. As such, I believe it is an invalid proposal.

I accordingly OBJECT to this proposed boundary change.

1. There is also a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Kingston Avenue up to a tree line running along the Parish Boundary at the western edge of Kingston Meadows. The result is to take all of Kingston Meadows out of the Green Belt.

Kingston Meadows is the main public recreational space of East Horsley, comprising various sports facilities and playing fields. The present settlement boundary is clearly defined by a deep and well-maintained drainage ditch running along its eastern side. It therefore represents a very defensible Green Belt boundary. Moving this boundary westwards to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. I do not believe that this can be considered as an exceptional circumstance. As such we believe this is an invalid proposal.

I accordingly OBJECT to this proposed boundary change.

In the Green Belt & Countryside Study and its accompanying Topic Paper, GBC justifies the need to make changes in settlement boundaries in order to meet unfulfilled housing need in the Borough. However, Green Belt rules make it clear that unfulfilled housing need is not normally considered to be ‘an exceptional circumstance’. If it were the entire Green Belt would already be covered in tarmac.

The NPPF is clear that every movement in settlement boundaries must be justified by ‘exceptional circumstances’. GBC have offered only a generic justification in their Topic Paper of meeting unfulfilled housing need, but a case by case justification has not been provided. As such, I believe the settlement boundary changes referred to above (and many others) are invalid without such detailed justification.

1. **c) Paragraph 4.3.17: Proposal to remove Wisley Airfield from the Green Belt**
I OBJECT to the proposal to remove Wisley Airfield from the Green Belt. The only justification for this proposed change is unfulfilled housing need which is not considered an exceptional circumstance. The proposed Wisley development is discussed further below in the Site Allocation section.

1.  
   d) POLICY P2: Limited In-filling

A new planning designation has been introduced called ‘the identified boundary of the village’. For East Horsley this covers a number of roads south of the A246. It is a sizeable area, covering 45 hectares, the equivalent of 23% of the present Settlement Area of the village. Within this area, Policy P2 sets out proposals that would allow ‘limited in-filling’ within this boundary.

I find it hard to reconcile the opening statement of Policy P2 that “We will continue to protect the Metropolitan Green Belt” with this sizeable reduction in effective Green Belt status. In my opinion, this policy represents a de facto extension of the Settlement Boundary and a substantial reduction in the operational effectiveness of the Green Belt, whose effectiveness is significantly weakened where this new planning designation applies.

I accordingly OBJECT to the proposal to designate roads south of the A246 as being within the ‘identified boundary of the village’ and to allow limited infilling within this area.

Comments on Proposed Submission Local Plan

I have carefully considered the Proposed Submission Local Plan which Guildford Borough Council (“GBC”) has now published for public consultation. My comments are set out in this letter.

I have strong concerns about the Proposed Submission Local Plan and the evidence and assumptions which support it. In particular, I do not agree with the scale of the house building programme which is being proposed by GBC. The target outlined represents a 25% increase in the housing stock of the borough, whilst I note that the Office of National Statistics (“ONS”) projects a population increase of some 15% for Guildford Borough over this same period.

I also note that the Proposed Submission Local Plan includes the statement “We will continue to protect the Metropolitan Green Belt”. I support this policy. However, unfortunately GBC appears to be in breach of this same policy through the housing policies it has set out in the Proposed Submission Local Plan, whereby some 65% of developments will be made on land that is currently Green Belt.

I am also concerned that the infrastructure proposals are inadequate even to meet the needs of what is there at the moment, let alone the proposed developments in the Local Plan.

I therefore OBJECT to the Proposed Submission Local Plan.

Detailed comments on the six different policy areas which form the basis of the Proposed Submission Local Plan are now set out below, followed by my comments on specific site allocation policies.

Policy S2: Borough Wide Strategy

This policy sets out the objective of adding 13,860 new homes to Guildford Borough over the 2013-2033 period of the Proposed Submission Local Plan, equating to an annual build of 693 new homes per annum.

I have serious concerns about the enormous scale of this building programme, which represents a net increase of 25% in the housing stock of Guildford Borough, a remarkable rate of increase for a borough in the English Home Counties. It is even more remarkable when the official statisticians at the Office of National Statistics (“ONS”) are projecting a population increase of some 15% for Guildford Borough over this same period.

Some explanation for this mismatch may partly be found in the conclusion of the West Surrey Strategic Housing Market Assessment, (“SHMA”), which looks at how the annual housing target of 693 homes is comprised. It estimates that 517 homes per annum arise from ‘the demographic starting point’ – effectively what the official statisticians at the ONS and the Department of Communities and Local Government (“DCLG”) are predicting Guildford will require based upon their population and household forecasts. To this is added in the SHMA another 120 homes per annum in order to ‘support economic growth’, a further 31 homes per annum to ‘improve affordability’ and 25 homes due to ‘student growth’, all of which totals up to 693 homes per annum target.

I find this analysis perplexing. Economic growth is already factored into the statistics produced by ONS and DCLG, so what GBC are proposing actually comes on top of the official household growth forecasts for the borough. Moreover, the GBC Affordable Housing Policy H2 is proposing that all development sites (other than the very smallest) will be required to have 40% of their homes offered as affordable housing, so why another 31 homes per annum is needed as affordable housing on top of this 40% ratio is quite incomprehensible.
Furthermore, DCLG research has concluded that there is on average a 97% correlation between population growth and household formation. Therefore, if GBC’s target of a 25% increase in housing stock were actually realised, the outcome will be that Guildford Borough would see its population rise by around 25% over this period. This means that the resultant population growth for Guildford Borough would be at a level 67% higher than the official forecasts.

One of my particular concerns in reviewing the Proposed Submission Local Plan is that the impression is conveyed upon the reader that GBC’s housing targets are effectively needed to fulfil NPPF requirements or because of central government policy – in other words that GBC has no real choice but to put forward these projections, unpalatable though they might be. However, the reality is very different. GBC has voluntarily chosen to pursue a policy of aggressive civic and economic expansion – one might perhaps term it a policy of ‘Forced Growth’ – which underpins all of the housing policies in the Local Plan. In short, the difference between the official statisticians’ forecasts and GBC’s target of a 25% increase in housing stock is entirely down to a political choice made by GBC.

Of course, there is nothing fundamentally wrong in GBC adopting a Forced Growth policy for the Borough – not as long as that policy is made clearly and explicitly and is fully supported by a majority of its electorate. However, I doubt whether this is actually the case. It is certainly not a vision that is shared by me, which unequivocally rejects GBC’s Forced Growth policy.

I accordingly OBJECT to the borough housing targets set out in Policy S2.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? (No), is Sound? (No), is Legally Compliant? (No)

Answer (if comment is on questions 1-7 of the questionnaire): ()

Dear Councillors:

I'm writing to express my disbelief at the bogus proposal to forever destroy green belt land in Normandy and Flexford, while increasing the size of our village by 100%, on the basis that a school is justified in our location named A-46 in the draft local plan. What is proposed is wrong on every level, including scale, when David Cameron himself has said repeatedly that "we will always protect the Green Belt and make sure planning decisions are made by local people." Where was any consultation with the residents of Normandy and Flexford? Given the 100% opposition to this by the residents of Normandy, you seem not to be concerned about our wishes. However the proposal should fail on the basis that a school in location A46 is simply not required by any reasoning. In no particular order:

Green Belt - The Green Belt was enacted by forward thinking visionaries who knew the value of open space for future generations, before the importance of battling climate change was even though about. In fact, Surrey was a leading advocate for its creation. Yet you propose to create a continuous concrete strip from the west of Aldershot right through to the east of Guildford that will affect the physical and mental wellbeing of all, while specifically sentencing the residents of our small village to a lifetime of noise, pollution, traffic stress, all health and safety nightmares, for the short term gain of a greedy developer and some short sighted local government officials who will be remembered by history as those who destroyed what was once meant to be preserved for the good of the nation. One of the characteristics of the green belt is that a sense of "openness" is preserved. How does this concrete strip allow for that? The green belt in Normandy is a vital part of the barrier between Ash and Guildford. Flooding, traffic, and accidents on the A323 already drive an intolerable...
amount of traffic onto our D roads. This proposal will result in permanent gridlock. Your stated aim of development is to concentrate on brownfield sites yet 70% of the development you now propose is on greenfield sites, including green belt land, to the detriment of all. Why are you not developing Wisley Aerodrome and its miles of concrete? Or all of the brownfield sites within Guildford itself where the need for expansion exists. And two motorways and Major A road? Instead, because of a developer led whim, you chose our little village.

Transportation and road infrastructure - Normandy with its tricky intersections, narrow lanes, with parked cars narrowing them still further, the one lane railway tunnel on Westwood Lane, unaddressed in the plan, that daily sees accidents and near misses are totally unsuitable for this scale of development. Turning onto the A323 from Westwood Lane is already hazardous and where Glazier's Lane meets Westwood Lane, approaching traffic cannot easily be seen, usually is doing 40 mph+, and again, near misses are common. The railway bridge on Glazier's Lane is narrow, traffic is difficult to see, and among these various traffic risk areas, no improvement can be foreseen that will allow the additional thousands of journeys per day, let alone tens of thousands of vehicle movements that will arise from the proposed development. Pedestrian pavements are at times dangerous and generally entirely inadequate with awful street lighting. There is insufficient space for bicycle paths. And the Wanborough railway station is tiny and there is no scope for making it larger, nor are there plans to enlarge it during the lifetime of the plan. Due to the bridges, double decker buses will never be able to run through this area.

Where Wanborough Hill meets the Hog's Back, again this very steep hill with numerous traffic issues feeds into an already congested A31 and to dump many more thousands of car journeys daily into this area will simply grind the whole place to an absolute halt. It is already backed up every morning and a journey to Guildford can take 30-40 minutes NOW. Lip service has been paid to "improving" this terrible intersection without stating how it will be funded adequately. And will you shave the top off the Hog's Back to make it wider so you can fit more lanes in to funnel the vastly increased traffic onto the impossible to widen A31? How will that increased traffic be then directed onto the A3 or down the hill into town? Locally, our roads will exceed their design capacity almost continuously.

And you can't just put speed bumps everywhere and say the problem is solved. THE ROADS ARE SIMPLY UNSUITABLE AND WILL NOT TOLERATE THIS INCREASE IN TRAFFIC. It has been mentioned that the railway station is one of the things that makes this project sustainable. How is Wanborough with a tiny station, tiny platform, sporadic service, no parking, adequate for the thousands of new people? So it's back to cars and pollution and stress and gridlock. Hardly the hallmarks of modern sustainability. Once we add the school runs for the proposed "free school," this falls apart even quicker on every major quality of life measure. Adding a percentage to a settlement is one thing. Doubling and destroying it is entirely another.

Need for a school - In order to develop the green belt, there must be an EXCEPTIONAL NEED. So far as we can all see, the only need is for Taylor Wimpey to make a quick buck. Paul Spooner is on record as saying that "a school or hospital will trump all other planning considerations. So Taylor Wimpey have pulled a school out of their hat in the two years that talks have apparently been taking place, presumably to try and circumvent planning rules.

Yet there is plenty of space at local schools as yet unfilled and recent planning decisions have included the decision NOT to tear down an existing school as there was insufficient need to destroy it versus harm to the green belt. Virtually every school in the Borough of Guildford is undersubscribed at the moment, some by as much as 60%. A better location might have been Blackwell Farm. A school is currently being built in Mayford on the side of the borough where the need is greatest. Ash has plenty of vacancies and our proximity to Hampshire and the schools it has are not considered or discussed. Normandy has an aging population with very few school age children while the birth rate in Guildford is declining. A questions was asked at a local meeting recently: "How many people have kids 12-16 in school here now?" 6 hands went up out of 300. A 20 y/o girl said she had NO friends here in school while she was in school. A huge new school that there is no need for in a place that neither needs nor wants it is a huge unsustainable cost. It is better to expand existing schools and why not try and fill the existing ones up in the first place? To which the new one in Mayford can be added.

If we add to this the destruction of ancient woodlands, flood prone and muddy clay soil, dangerous traffic conditions for the students due to inadequate roads, it becomes even more unsustainable.

And why 1100 houses? - Is that perhaps because Taylor Wimpey says so? Even though that scale of development will be catastrophic for all of our residents? With half a dozen supermarkets and large retail shopping areas within ten minutes drive, it's no surprise that every Normandy business, pub, etc. (with the exception of the niche motorcycle parts store) has...
closed down over the last twenty years. The shop, the post office, Spar market, all of them. So throwing in a little market won't make anything better and will merely add to the car journeys until it closes too.

On your own website you say that the "Local Plan will help tackle the borough's potential housing crisis." So we have houses that are only "potentially" needed, in an area that doesn't require a school. THIS IS NOT THE EXCEPTIONAL NEED THAT IS REQUIRED TO OVERTURN GREEN BELT DESIGNATION. It is exceptional greed at the expense of an entire village and the law does not provide for the whimsical destruction of green belt land when so many alternatives exist. And there is a long and proud track record with such developments of building and selling all the houses only to find that there are insufficient funds to pay for the promised school. Let alone the road improvements that are alluded to. Post-Brexit, England will likely see a decrease in immigration to go with the declining birth rate in Guildford. It was interesting to note that trading in shares of Taylor Wimpey was suspended after the announcement of the Brexit referendum result.

Environment - In the last local plan, the site was given a "red" level of sensitivity. We have 22 listed building in Normandy, 7 within the perimeter of this so called development. We have 500 year old trees right in the middle of it. We have bats, badgers, newts, hedgehogs, extensive native species of birds, flowers, etc. Bats every night right now. Has anyone noticed that we flood here? Has a proper assessment of flooding risk been made? Or the added burden to our surrounding protected nature areas? The Thames Basin Heath SPA is just across the A323 and will suffer terribly as a result of the vastly increased traffic, pollution, dog walking, etc. Light pollution will adversely affect the Surrey Hills Area of Outstanding Natural Beauty. Let alone the destruction of Green Belt land itself. To quote our MP, Jonathan Lord, "it is simply inexcusable to build here."

3850 homes for 5000 people were proposed in Aldershot on MOD land. GBC responded in 2013 to say that the impact on Surrey roads was not considered. Particularly the A323. Yet this proposal would add catastrophic amounts of traffic to all local roads.

I could go on forever. But why are the local residents being ignored when not a single one of us moved here for the "exciting opportunity to have our lives thoroughly blighted, as a whole community, for decades to come!!" Why have none of the important impact things been looked at at all? Why are you proposing to act contrarily to the intent of the green belt legislation meant to preserve at least a little ring of life outside London for your kids and theirs? Where are they going to go to escape the pollution, traffic danger and chaos this will bring? Why aren't the needs of Guildford being addressed by providing infrastructure near the town where the demand and ability to absorb it is? And there is ABSOLUTELY NO EXCEPTIONAL NEED FOR THIS SCHOOL AND DEVELOPMENT SUCH THAT VIOLATING THE GREEN BELT IS REQUIRED OR DESIRED BY ANY CITIZEN. None of us have done anything to deserve this death sentence for our little community.

In summary, as for legal compliance, this proposal rides roughshod over green belt legislation without there being an exceptional need, nor any need for a school in this location and it is hugely detrimental to nearby legislated areas. As far as soundness goes, it does not achieve sustainable development nor is it justified or effective in any way. In fact, it is entirely unjustified. And to say that there has been any compliance with a duty to cooperate is an absolute joke. This development has been sprung on us without warning, and with minimal time to respond. The whole thing stinks, in fact, of absolute dishonesty from stem to stern.

Thank you for taking the time to read this.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the proposed new junction for the A3 at Burnt Common. The A247 to Woking will provide a short cut for many and this road is already at capacity. It is a minor road with cars parked on it and cannot take more traffic. All the proposed development will also increase traffic into Potters Lane where we live. This road is narrow and has an exit directly from the A3. It is already a dangerous road because traffic, including lorries, speeds down it from the A3 - it is a narrow twisty lane and is very dangerous to cyclists, pedestrians and motorists alike.

Please bear in mind the objections and concerns above and of the local residents. We live in an already busy and congested area and we are committed to maintaining the precious countryside around us. Please do not destroy our rural area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to building of 40 houses in Send Hill for the same reasons as above. The beautiful countryside will be ruined and the roads are far too narrow to facilitate more traffic. The travellers’ pitches are an impossibility due to the narrow access to the site. The proposed area is one we know well as we walk there almost daily. It is full of wild plants and is a haven for wildlife, as well as having quiet peaceful residential roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object that all this development will crush our local infrastructure in terms of housing, doctors’ surgeries, hospitals, and all other local amenities. How will we cope with all this additional pressure on services?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

This is to inform you of my objections to the new development plan for my village of Send, and the local area. I am a new resident to the area having moved here in 2015 and I am very concerned for the beautiful local area where I live with regard to the incursions into the Green Belt, the safety of moving around in this area, and for the considerable investment I had to make to live here. My objections to the plan include the following:

1. I object to the removal of Send from the Green Belt. The area in and around Send is rural and green and it provides a break between the urban areas of Woking and Guildford on either side. It is important for residents and future generations that this separation is maintained so that urban sprawl is kept under control in our area. I moved to Send in 2015 and had to pay a premium to buy a house here partly because of its location in the Green Belt. I was prepared to pay a premium for this reason but now it seems that my investment is threatened by a proposal to build considerable numbers of homes and industrial sites nearby. This will impact the area in many negative ways including increased traffic, fast traffic on narrow rural roads, pressure in existing infrastructure, to name three.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**I object to the Policy A42 change at Clockbarn in Tannery Lane because:**

- The increase from 45 homes to 60 in this area is unacceptable. This is too many for our village to support. This is a beautiful area adjoining the river and is at present a narrow country lane and access is very restricted.

- GBC have not listened to residents who know that this will create traffic havoc on Tannery lane and the A247.

- Again the erosion of the Green Belt shows the disdain with which our local council views our village and its residents concerns.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**I object to Policy A 58 at Burnt Common because:**

- Again this will be in the Green Belt which must not be exploited. There is industrial capacity at Slyfield and Guildford and we do not need further sites, particularly on the GB.

- This proposed development was already deleted from the 2014 draft plan – it is obvious that local people are dead against this plan!

- The 2017 Employment Land Need Assessment shows also that there is no such requirement for 10 hectares of land to be developed, indeed it shows a reduced demand of 3.9 for the entire borough – there is no need to build on the Green Belt.
- Our roads cannot support the increased level of traffic. Our roads are narrow and some are country lanes. At present we find huge lorries mounting pavements, stuck down narrow lanes. This area is not appropriate for this kind of development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal in the local plan on the grounds that the 1963-68 Ordnance Survey maps of the proposed site mark it as 'refuse and slagheap'. It is therefore unsuitable for such a development on health reasons. I should know, I worked on these sites and I am now severely disabled with numerous health problems. I object to the proposal in the local plan on the grounds that the 1971 Ordnance Survey maps of proposed sitemap it a 'refuse tip' prior to when proper licensing/registration was required. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbances would be a health hazard due to the unknown materials.

My friends in Australia live on an old goldmine and that was filled in with rubbish. A few of the family are suffering from tumors and one child is in recovery from leukemia.

Answer (if comment is on questions 1-7 of the questionnaire): ()

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1848  Respondent: 15248321 / Gordon Pipe  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

As a local resident in Ockham, I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public transport stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heath Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will
exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

• I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

• Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

• Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

6. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:
• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/917  Respondent: 15248481 / Jamie McCallister  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

12. I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
5. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)
How would the local roads cope, they are small roads with housing either side, how would a major junction on and off ramp work when there are just tiny roads feeding/exiting it?

North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

8. I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)
The Garlick’s Arch (A43) proposal would double the built area in the locality, and would irrevocably damage the character of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

3. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)
There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.

The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

How would Send, Send Marsh and Ripley cope with the extra traffic?
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1867  Respondent: 15248481 / Jamie McCallister  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

13. I object to the lack of proper infrastructure planning for sites (Policy I1)
The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1868  Respondent: 15248481 / Jamie McCallister  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

14. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)
The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
11. I object to poor air quality concerns (Policy I3)
The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

To whom it may concern,

I am writing to Guildford Council to express my great concerns on the proposed development of the Green Belt in Surrey.

What give's you the right to remove this land from the green belt?

The NPPF (National Planning Policy Framework) makes it clear that the fundamental aim of the Green Belt policy is to prevent urban sprawl by keeping land permanently open.

It also explicitly states that once established Green Belt boundaries should only be altered in exceptional circumstances.

There are no exceptional circumstances!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

The whole point of the Green Belt is to stop urban sprawl, your destroying the Green Belt to extend urban sprawl? Insane!

Green Belt Guidelines enclosed as it's obvious you haven't read them.

The UK has voted to leave the EU, so 2.9 million people will be leaving soon, so no reason for all this devastation of the beautiful Surrey Green Belt.
These are pictures taken today of the land proposed to be taken out of the Green Belt for the Housing for Garlick's Arch.

[IMAGE 1]

[IMAGE 2]

2. I object to not protecting the Green Belt (Policy P2)
I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl.

There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield sites at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:  📄 IMAGE 1.jpg (165 KB)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. I object to development in areas which are at risk of flooding (Policy P4)
The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

How can the Council's flood risk be low than the Environment agency's? We seen yearly flooding in the Garlick's Arch area! We leave near there.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1861  Respondent: 15248481 / Jamie McCallister  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the Local Plan as the development proposed is not sustainable (Policy S1)
13,860 new houses proposed is not sustainable and with the recent Brexit vote to leave the EU, not in anyway need – it will damage local communities by over development, gridlock traffic especially in Ripley, Send and Clandon.

The local communities don’t need these houses.

Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick’s Arch.

The development should be in urban areas where there is sustainable transport such as Guildford.

Answer (if comment is on questions 1-7 of the questionnaire): ()

7. I object to the Borough Wide Strategy (Policy S2)
GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there’s too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11% of the existing housing.

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages.

I object to removal of Brownfield site (A34) from the Plan

Site A44 in Broadford Business Park has also been removed. This is another brownfield site that has already been developed. The Council’s claims to “have adopted a ‘brownfield first’ approach” (page 5) but this is clearly not the case, and is contrary to national guidelines.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to removal of Brownfield site (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1370  Respondent: 15248481 / Jamie McCallister  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, … (site allocation A25) [than the Burnt Common site did]"

The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/1372  Respondent: 15248481 / Jamie McCallister  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1371  Respondent: 15248481 / Jamie McCallister  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A50

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan is self-inconsistent in respect of traveller sites.
A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots ...” Clearly A50 more than covers the total "need" of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/1375  Respondent: 15248481 / Jamie McCallister  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects:

i) to hide the number of houses actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!), and

ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses].” That has now been removed, thereby accepting that needing to make greater than normal profit is to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

“We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal in the local plan on the grounds that both the Envirosearch report RS1100201_1_1 dated 17th February 2004 and historical map data and information from GBC has identified site as landfill and has "areas of potentially contaminative industrial activities". Development of this site would be a health hazard. The recent reports of a child dying from seepage of contaminated ground following flooding prove that developing any such sites is a danger to health. Send is surrounded by old gravel pits that were filled in in the late 50's early 60's. The Daily Mail has also recently had an article on how the dangers of living near a landfill site raises cancer concerns. The paper referenced a study published by the International Journey of Epidemiology which tracked 242,000 people living near landfill sites in Italy.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object the change to Policy A42 because:

- This is a 33% increase on the original proposal (to which I and many hundreds of residents of Send have previously objected to) and would be even more inappropriate for reasons including increasing urbanisation, leading to unreasonable stresses on existing transport infrastructure and services, and the lack of any additional capacity for the local GP Centre and the newly amalgamated Send School.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the Policy A43 change because:

- It disregards the overwhelming number of previous objections from local residents which have been ignored.
- The inclusion of pitches for travellers and showpeople is contrary to any proven evidence that there is a demand for such facilities in the foreseeable future.
- The land at this location is Green Belt and must be retained to prevent increasing urbanisation and to preserve the natural habitat of ancient woodland and allow biodiversity to function alongside built-up environments.
- The area has high levels of existing vehicle movements along the A3, A247 and B2215 routes and any reduction in green spaces reduces the opportunities for atmospheric CO2

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Policy A58 change with a proposed “minimal” allocation of industrial or warehousing space because:

• A “minimal” allocation is open-ended and exposes the land to unknown future development encroachment, where such a proposed allocation already breaches the law which is meant to prevent local authorities allowing building on Green Belt unless special circumstances exist.

• No special circumstances exist to encroach upon this area of Green Belt and remove it forever, as the ‘2017 Land Needs Assessment’ shows a reduction of 3.9 hectares of industrial land being required for the whole of Guildford Borough.

• The proposed allocation of over 10 hectares of industrial land at this location is contrary to the reduction mentioned above.

• There is no justifiable case for creating more industrial units in Send when Guildford, including the dedicated commercial site at Slyfield, have vacant sites.

• The proposed additional industrial space at this site would worsen the already overburdened A3 and M25 traffic flows in the area where Highways England have no funded plans to increase vehicle capacity on these major routes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/2196  Respondent: 15251105 / Michael McGrath  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. COMMON OBJECTIONS TO POLICIES A42, A43, A58 & GREEN BELT, POLICY 2 AT PARAGRAPH 4.3.15

I object to the changes to these Policies because:

• Any additional houses and other developments in Send would increase the urbanisation of what is a semi-rural area protected by Green Belt from the closeness of the already built-up Woking Borough.

• The proposed number of new houses and other land appropriation for development adds to what was already an over-development of the area and is a disproportionate allocation of land in the Send Ward within the Borough of Guildford.

• Further developments in the Send Ward will worsen the already chronic problem for vehicle parking for people using the recreational and shopping facilities in Send.

• The prospect of yet more vehicle traffic being added to the minor ‘A’ road (the A247) through Send as this already has high volumes of traffic where the 'uktrafficflow' web site shows an average of nearly 14000 vehicles passing along the A247 in Send each day, which has an adverse effect on the quality of life for the residents of
Send with congestion, noise, and pollution from vehicle emissions, afflicting the lives of residents. This daily high traffic flow is excessive and must not be increased further by senseless developments.

- There are no commensurate plans or funding to increase the provision of water storage and supply to additional households and commercial facilities in the Affinity Water region, to avoid water shortages in future years.

I object to this Policy change to inset Send Business Park from the Green Belt because:

- The Business Park is an anachronistic legacy which has been allowed to develop in an area of public amenity countryside (adjacent to the unique National Trust property that is the Wey Navigation) which should be not be allowed expand further and destroy the Green Belt and impact upon the amenity value and natural biodiversity of the area forever.

- Such expansion is entirely inappropriate in any event because of the highly restricted nature of Tannery Lane.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site.

Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).
The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4). This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14).

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11).

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic.

The route from London/M25 to Woking of would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPP16/1894  **Respondent:** 15253217 / W Orchard  **Agent:**
I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3).

I object to the local plan based on the impact it will have on the special countryside of the borough. The proposed development at Garlick's Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site. The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1 c), general industrial (B2) and storage and distribution (B8) at Garlick's Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

I object to the location for new employment floorspace at Garlick's Arch - Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and 88) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick's Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

I object to the loss of rural employment (Policy ES) Policy ES supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1).

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages.

The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces. Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle Lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents' in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site.
Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services. Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to poor air quality concerns (Policy 13)

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to not protecting the Green Belt (Policy P2)

I object to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1 % annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be recommissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/1881  Respondent: 15253217 / W Orchard  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I object [very strongly] [in the strongest possible terms] [wholeheartedly] to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. I object to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over development, particularly for the villages between Guildford and the M25,
including Ripley, Send and Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35) and Garlick’s Arch (A43) are in unsustainable locations. They do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Glandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the proposed Guildford Borough Council Local Plan, particularly the aspects of the plan that propose removing Green Belt status from Send and Ripley, and building residential and industrial sites (elements A42, A43 and A44), for a number of reasons.

I object, as large parts of Send and Ripley are built on low-lying land that is prone to flooding; building houses, roads or other developments as part of this plan could affect the delicate balance of drainage, and adversely affect all parts of Send and Ripley.

I object, as the current road network in Send and Ripley is quite small, compact, and highly-dependent on the A247 for access to both Woking and Guildford. Any increased development in the area will put more pressure on this road. This road has a number of constrictions, both buildings and waterways, so will be bottlenecks and cause gridlock in the area. Development of the Send Hill site (NUMBER) in particular will place huge pressure on the narrow roads of Send Hill (which is built-up on both sides, with no scope to widen it) and Potters Lane, particularly where they each join the A247 northbound to Woking. Sections of the A247 to the south of Send Hill, on Send Barn Lane, are already prone to partial flooding during heavy rain.

I object, as there are no plans to improve public transport in the area. There are no local railway stations, and the current bus services to Guildford and Woking are very infrequent and expensive; residents in the proposed new houses would be forced to use cars to travel and to commute, putting increased pressure on the roads in the area.

I object, as the plans for industrial estates would adversely affect the area; there would be increased traffic, particularly from HGVs (for which the road network is completely unsuitable), adversely affecting current residents. Industrial sites are just not in keeping with the quiet, rural character of Send and Ripley.

I object, as all of the proposed sites are currently green fields and woodland. I have seen deer, rabbits and other animals on these fields, particularly the site opposite Send Cemetery which has proposed developments, and can not understand why these areas are even being considered for building upon.

I object, as the proposed changes will change the character of Send and Ripley forever. They are tranquil, rural villages, not busy towns; if the residents wanted to live in busy, congested towns, they would not have moved to Send or Ripley. Changing the nature of these villages would be unfair to the current residents. Once Green Belt protection has been removed from these areas, there will be nothing to stop even more development, and they will just become part of the urban sprawl of Guildford and Woking. Is the requirement for further housing in the area more important than protecting the Green Belt?

I object, as there are no clear plans to use the current brownfield sites. Guildford Council should have a register of available brownfield sites; using these would be preferable to eating into precious Greenbelt land.

I object, as the increased traffic and industrial activity will lead to increased pollution (both noise and atmospheric), again this is unfair to the residents who had selected, and expected, a quiet, rural environment.

I object, as there are no plans for increased provision of medical facilities, or schools / colleges, for the extra families who would be living in the proposed new homes. Having moved recently from central Woking to Send, I can personally attest to the effect that the pressure of increased population can have; increased pressure upon local primary schools, waiting a month for a GP’s appointment. Has the effect of the increased population upon current residents been considered?
I object, as some of the proposed areas (particularly Send Hill) have not been included in previous proposals, and so it has not been possible for residents to be consulted with regards to developments in these areas.

I object, as the proposed developments in Send and Ripley account for almost half of all the housing in the current development plan; it seems unfair for Send and Ripley to take such a large proportion of the new homes for the whole of Guildford Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the new local plan as follows

1. I object to the increase in the volume of traffic that so many new homes will generate.

1. I object because the train services at peak times will be overwhelmed. As it is one just about gets a seat at Horsley. By the time the train gets to Effingham and Cobham it is standing room only.

1. I object because the infrastructure proposals are inadequate. Where are the new roads going to come from?

1. I object because the medical services will be under increased strain. It is difficult getting a doctors appointment as it is.

1. I object because the parking at the railway station will be overwhelmed.

1. I object because the parking provision at the village centre will be unable to cope.

1. I object because local schools will be unable to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object because of the **compound effect of development** on so many adjoining villages. What I have seen does not properly accommodate this. Bottlenecks will be created. Look at the situation when the utilities dig up OR north or OR south. The detour when the bridge was out of action was along roads that were unsuitable. Plus locals used roads like The Drift causing misery to local people.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
1. I object because of the issue of flooding. We are on clay and water is slow to drain away. The ditch in front of my house is in full spate at least once every winter. The water hits the bridge and fountains 3ft into the air. The surface water is at times intolerable for pedestrians. I fear that run off from more buildings will lead to flooding.

1. I object because in nearly 30 years living in our house we have never been flooded. But if so many houses are built behind us I fear that the risk of flooding to peoples homes will increase.

Policy P2

We support proposed Policy P2 which allows limited infilling in the Green Belt within the identified settlement boundaries of villages including Gomshall.

Paragraph 84 of the NPPF states:

"When drawing up or reviewing Green Belt boundaries local planning authorities should take account of the need to promote sustainable patterns of development. They should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary".

Gomshall is a sustainable location, given its existing access to sustainable public transport (buses and railway station) and a number of local services within the village including a village hall, public houses and local shops. It is considered that Policy P2 which allows for infill development within the villages washed over by the Green Belt is in accordance with Paragraph 84, as it will direct development to sustainable locations, such as Gomshall.

We note that the Council has provided a definition of limited infilling in paragraph 4.3.26, which provides three circumstances which would be defined as limited infilling:

- Development of a small gap in an otherwise continuous built-up frontage;
- Small-scale redevelopment of existing properties within a built-up frontage; and
- The infilling of small gaps within built development.

We suggest that the third criteria is reworded to read 'the infilling of small gaps within the identified settlement boundary'. The re-wording of this policy would confirm that development within the settlement boundary is acceptable in principle and would be in accordance with the NPPF's presumption in favour of sustainable development, given that Gomshall village is a sustainable location for development.
We support the amendments to the proposals map for Gomshall and the amended identified boundary for the village which now includes the whole of the residential curtilage of Weybrook. It is considered that the proposed boundary is in accordance with paragraph 85 of the NPPF which states that when defining boundaries, local planning authorities should define boundaries clearly, using physical features that are readily recognisable and likely to be permanent.

As noted above, the site is in a highly sustainable location, proximate to services and facilities within Gomshall and as such it is considered to be an appropriate location for small-scale, residential development within the identified settlement boundary. The large undeveloped area to the rear of the existing dwelling offers an opportunity to provide infill, residential development in a sustainable location within the borough.

The whole village of Gomshall is washed over by the Green Belt, however, we consider that the land to the rear of Weybrook is suitable for development and does not meet the five purposes of the Green Belt set out in paragraph 80 of the NPPF:

- to check the unrestricted sprawl of large built-up areas;
- to prevent neighbouring towns merging into one another;
- to assist in safeguarding the countryside from encroachment;
- to preserve the setting and special character of historic towns; and
- to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

We set out our justification for the suitability of the site for development below.

Firstly, the site does not check the unrestricted sprawl of large built-up areas. Gomshall lies around 10 km to the south-east of Guildford and is therefore distinct from large built-up area. The site itself is to the north-east of Gomshall, beyond which is open countryside with some agricultural premises. The land to the rear of Weybrook does not check the unrestricted sprawl of a large-built-up area and therefore does not meet the first purpose of the Green Belt.

Secondly, Gomshall remains distinct from the surrounding villages of Shere (to the west) and Peaslake (to the south). As noted above, to the north of the site is open countryside and there are no neighbouring towns for some distance, as such it is not considered that the site meets the second purpose of the Green Belt.

Thirdly, the Green Belt seeks to safeguard the countryside from encroachment. The site is within the residential curtilage of Weybrook, to the rear of the Tillings cafe/restaurant and now within the proposed settlement boundary for Gomshall. The site is not a countryside location and therefore it is not considered that the site meets the third purpose of the Green Belt.
Fourthly, it is the purpose of the Green Belt to preserve the setting and character of historic towns. The Council has not specifically noted the historic character of Gomshall, the village has not been designated as conservation area and as such it is not considered that the Green Belt in this location fulfils this purpose of the Green Belt.

Fifthly, the Green Belt should assist in urban regeneration by the recycling of derelict and other land. Given the scale of the site it is considered that any development will meet a need for housing within the rural area of the borough, close of public transport links. The site is not of sufficient scale to impact the regeneration of urban sites within the borough.

We would be grateful for written confirmation that these representations have been received and duly made, as part of this consultation exercise. We would be happy to discuss proposals for residential development at Weybrook, Gomshall in due course.

We are the owners of [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998], which consists of a single dwelling house with a large undeveloped area to the rear. The site is located within the village of Gomshall with the United Reformed Chapel to the west of the site and the Tillings cafe to the east. The site is located approximately 350m to the west of Gomshall Station and is surrounded by local services.

Policy S2
The proposed borough housing target of 13,860 (or 693 per annum) exceeds the housing need for Guildford as set out in the West Surrey Strategic Housing Market Assessment of 517 homes per annum. It is considered that the housing target is in accordance with paragraph 159 of the NPPF.

We note that Table 1 projects a net increase of 431 homes within inset villages and infill development within identified Green Belt villages between 2018 and 2033 and additionally 625 homes to be delivered through windfall development. We support the inclusion of small sites and infill sites within Green Belt villages as the Council's Land Availability Assessment (February 2016) confirms that in the past the majority of housing supply in the borough has been delivered on small windfall sites.

Paragraph 47 of the NPPF confirms that local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide five years worth of housing against their housing requirements with an additional buffer of 5%.

We support the Council's inclusion of small sites within the proposed delivery strategy and consider that the land at Weybrook, Gomshall could provide a small-scale residential development to contribute to the Council's housing supply within the next 5 years. Although, the Local Plan proposes several large housing allocations it is considered that small windfall sites will...
continue to have a role in the borough's housing supply, particularly in the early part of the plan period as the large strategic sites will have longer lead-in times before housing can be delivered.

Comment ID: PSLPA16/614  Respondent: 15253537 / Marie-Ann Hillier  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing with regard to final draft local plan, and the objections I have to it.

1) I object to you trying to remove send from the green belt, why remove land that is used by wildlife and locals and acts as a water catchment when it rains, and replace it with concrete? This would be bad socially and environmentally, why ruin such important areas just for money?

2) Similarly I object to you planning to build on garlick's arch, burnt common, again I have environmental concerns, for the existing wildlife, and water catchment and also levels of air pollution, from the massive increase in traffic and builds in the area. Also why add more industrial units, when they are just not required? Lastly, you have not even consulted upon this site and this new massive junction, does the council feel it doesn't have to follow the correct consultation processes?

3) I object to your plans for the land west of winds ridge, again you are trying to skip the consultation process and ruin the green belt. Why kill wildlife, ruin the rain catchment and try to wedge too many houses in an area, with a tiny access road,
which will get congested and polluted. There is also the issue of if the build went ahead, the site has been previously used for landfill, which could possibly lead to future problems for the people who purchase the housing. Lastly why build two travellers pitches, we have no travellers in send, so why would you need to build pitches which are surplus to requirement, plus they would have the same problems as the housing - unsuitable narrow access and existing landfill pollution.

4) I also object to the fact the council has no sound evidence to prove send etc needs all that industrial building, or that amount of homes, where would you find the businesses or people to use all these buildings? Brownfield sites would be a much better option, there would be existing infrastructure, you wouldn't be killing wildlife or ruining the water catchment and the land is already concreted, so it would be better to regenerate the area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**A22 proposed building on land north of Keens Lane Guildford.**

Keens Lane has recently been developed by the creation of Sime Close and Morgan Close.

Keens Lane itself has not had any infrastructure improvement for vehicular movement from Keens lane onto Worplesdon Rd, nor where traffic join Aldershot Rd from Gravetts Lane.

An additional 140 homes would see another 280 vehicles using this area on a daily basis. Significant alterations would be required to the road network. this would not be in keeping with the current environment.

i object to the suggestion of building homes on this green belt site.

this would be to the detriment of local amenities enjoyed by current residents,

Answer (if comment is on questions 1-7 of the questionnaire): ()

GBC Local Area Plan for Ripley, Send and Clandon

Please see below the objections I have to the current plan mentioned above. I believe that the current plan is simply not fit for purpose. Below I set out why I believe this to be the case:--

1. I object to the lack of consideration of infrastructure improvements. It does not make any sense to have a plan that effectively merges all villages along the A3 from Wisley to Blackwell Farm. In order to make it sound, very significant infrastructure improvements would need to be made, including, but not restricted to, completely rebuilding the A3/M25 intersection to make it freer flowing and an additional lane to be added to the M25 in either direction. The A3 through Guildford would need to become 3 lanes too, and the junction with the A31 Hog’s Back significant altered/improved.

2. I object to the limited consultation period. The impact of the proposal on the locality is so high that further consultation is necessary.

3. I object to the process. The correct process has not been followed: Regulation 18 should have been followed bearing in mind the significant changes that have been made to the plans, more widely, and specifically at Burntcommon, (Garlick’s Arch policy A43), and at land west of Winds Ridge and Send Hill (A44). My understanding is that this invalidates the whole process.

4. I object to the situation being labelled as “exceptional”. There is nothing exceptional about the current situation, and if anything, the Brexit vote should put all development on hold until its impact can be fully assessed. The demand for housing may fall if there is a resulting reversal in immigration trends, and foreign student choosing to come to the UK, for example.

5. I object to the disproportionate amount of development in one part of the borough.

6. I object to the villages of Send, Ripley and Clandon being removed from the Green Belt. Send provides a buffer between Guildford and Woking. None of these villages should be “inset”. The better use of Brownfield sites must be fully explored and exploited.

7. I object to the provision of sound evidence. The reduction in ELNA of 80% since the 2013 survey means that the need for industrial space at Burntcommon is no longer present.

8. I further object (following on) to the plans being based on insufficient evidence of future housing needs. Again, with reference to the huge potential of the Brexit decision.

9. I object to only 2 weeks’ notice being given for the inclusion of new sites in the plan.

10. Finally please explain why the inclusion of 2,000 homes at Wisley is still in the plan despite earlier rejection by the GBC on the grounds that they are unsuitable. This gives me no confidence that a logical and valid process is being followed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Clockbarn Nursery, Tannery Lane, Policy A42 I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The plans have increased from 45 homes to 60 homes which is 33% and this is far too much for local infrastructure
- It ignores all the thousands of previous objections made by local people
- It will increase surface water flooding, which is already a problem and is increasing with further development
- It will impact on the open countryside views from the River Wey Navigation
- It will cause erosion of the Green Belt in our village
- It will increase problems with the traffic in Tannery Lane and at the A247 junction

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Garlik’s Arch, Send Marsh, Policy A43 I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people
- The is no proven demand for Travelling Show people plots in this location
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over 50 years
- It will generate excessive traffic that will block up the local roads of Send and Ripley It is beautiful permanent Green Belt and no ‘exception circumstances’ exist
- It will cause overdevelopment of our village and the number of homes is excessive
- It will join up Ripley and Send and defeat the key purpose of Green Belt

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Burn Common, London Road, Policy A58 I object to Policy A58 at Burn Common because:

- It was deleted from the 2014 draft because of all the objections made previously
- The word ‘minimum’ is a change from the previous ‘maximum’ in the 2016 plan and since that time there has been a decline in the demand for industrial land
- There is no need to build industrial or warehouse developments in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
- The impact on small surrounding roads will create traffic gridlock
- It will join up the existing villages and defeat the purpose of the Green Belt
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt.

RE: Land to the North of Ockham Lane, Ockham

Guildford Borough Council Proposed Submission Local Plan: Strategy and Sites – Regulation 19 Consultation

Introduction

These representations have been prepared on behalf of our client, Mr Woolfgang and Mrs Paula Matthews, in relation to the land North of Ockham Lane, Ockham (hereafter referred to as ‘The Site’) which lies within Mr & Mrs Matthews’ ownership.

These representations have been prepared in response to the Guildford Borough Council Proposed Submission Local Plan. Mr & Mrs Matthews seeks to engage positively and constructively in the plan-making process in Guildford Borough. In these representations we comment on the following matters:

• The requirement to objectively assess new housing needs, and the need to review the Guildford Green Belt;
• The A35 strategic proposals; and
• The potential for a standalone housing allocation at Ockham Lane

Mr & Mrs Matthew’s land ownership is identified on the attached land ownership map at Appendix A. The site is bounded to the west by Hatch Lane, beyond which is residential land; to the east by a driveway leading to a dwellinghouse and farm buildings; and to the north by a farm beyond the existing boundary.

The site is situated in fairly close proximity to Guilford town centre, and benefits from good railway links, with Effingham Junction Train Station located just over 2 miles from the site providing a direct service to London Waterloo and Guildford stations. It is also situated just over one mile from the A3 via car.

Housing Need and the Green Belt

The submission is made on the basis of broad support for the Council in preparing a revised Local Plan which has been necessary in order to meet the requirements of the National Planning Policy Framework (NPPF), which states that Local Planning Authorities (LPAs) should positively seek opportunities to meet the objectively assessed development needs of their area. There are potentially significant implications for the Council if it does not have an up-to-date Local Plan, as it will become more susceptible to speculative planning applications. As highlighted by the Housing and Planning Bill, local authorities are required to have a Local Plan in force by March 2017; otherwise applicants will be able to submit planning applications directly to the Secretary of State for determination, and in addition the Secretary of State will have the power to prepare Local Plans for these LPAs.

In accordance with the NPPF and NPPG requirements the Council, in preparing its Local Plan, must first identify the objectively assessed need for the local area. In this regard, Mr & Mrs Matthews support the Council’s intention to identify a plan to deliver what it considers to be its current objectively assessed local need of 693 homes per annum. As set out within the NPPG ‘Household projections published by the Department for Communities and Local Government should provide the starting point estimate of overall housing need’ [Reference ID: 2a-015- 20140306]. We initially note that the recently released (July 2016) 2014-based DCLG Household Projections highlights a national increase to 214,000 households per annum over the period from 2012 to 2037, up from 210,000 in the 2012 projection. Furthermore, the most recent
2014-based household projections for Guildford now average 570 per annum in the plan period 2013 – 2033, compared with the demographic need in the SHMA, derived from the 2012-based household projections of 517 per annum in this period.

In addition, it is significant that the London Plan (2015) indicates that a minimum of 42,000 dwellings per annum is to be met in Greater London, although the 2013 Strategic Housing Market Assessment (SHMA) identifies a need for 49,000 (2015-2036) per annum. Pertinently, the Inspector in finding the FALP sound, called for wider engagement with local planning authorities beyond the GLA’s boundaries (which could include Guildford for example), in accommodating the Capital’s growth.

In summary, we note there remains robust and increasing need for housing within the region but acknowledge that Guildford as a Borough is heavily constrained by Green Belt, particularly within the eastern part of the Borough. Green Belt boundaries should only be reviewed in exceptional circumstances by LPAs when reviewing Local Plans, as established at Paragraph 83 of the NPPF and in this respect Mr & Mrs Matthews welcomes the Council’s commitment to review Green Belt boundaries in recognition of the Council’s consideration of its identified housing need. Accordingly, we would highlight our support for the proposed removal of The Site from the Green Belt, as proposed within the draft Policies Map.

Comments on Policy A35– Wisley Airfield

We would like to take this opportunity to confirm our support for this draft allocation, which provides the strategic level of growth required to make a significant contribution to the Council’s proposed housing targets, as well as providing associated infrastructure to accommodate this level of development.

We welcome the positive and pro-active approach taken by the Council to planning to meet what it considers to be its development needs, as required by the NPPF.

Land to the north of Ockham Lane– Standalone Allocation

Notwithstanding the above, we are also promoting The Site as a standalone allocation.

Firstly, we note that The Site has now been included within the Wisley Airfield Allocation which confirms that the Council considers The Site can perform a housing delivery function. However, the site is also considered suitable for allocation for housing in its own right, irrespective of the wider proposals at Wisley Airfield, for the following reasons:

• As recognised by the Sustainability Appraisal for the submission draft Local Plan, the wider site for Policy A35 performs well as a location for growth, noting that it avoids the need to place pressure on landscapes designated as being of larger-than-local importance or the most sensitive Green In this respect, we note that the site (located within area C18 of the Green Belt and Countryside Study by Pegasus Planning Group in 2013), was considered to meet only two of the Green Belt purposes set out at Paragraph 89 of the NPPF.

• The Green Belt and Countryside Study highlights that Potential Development Areas have been identified as potentially suitable to accommodate new development, located to the north of Ockham (sites C18-A and C18-B) which is in close proximity to The Site. Whilst these two land parcels at sites C18-A and C18- B do not include The Site, we would highlight that they share very similar characteristics with it, in terms of capacity, location to the north of Ockham Lane and containment by existing buildings, and with very similar access to local services and transport links. In this respect, the site would be capable to delivering up to 50 dwellings as part of a suitable extension to the existing settlement at Ockham, which features a number of existing services, and access to the strategic road network, with the A3 and M25 in close proximity. The development could make a significant contribution to the Council’s housing requirements (potentially including affordable housing requirements), and make financial contributions to the provision of Suitable Alternative Natural Greenspace. Any development would be high quality, and would be designed sensitively with due regard to the proximity to the nearby Conservation Area.

• As identified by the assessment of the Potential Creation of a New Settlement at Wisley Airfield, the proposed Wisley Airfield site would provide the opportunities to deliver permanent and defensible Green Belt boundaries, including at The Site adjoining Ockham, in accordance with NPPF In addition, the Green Belt and Countryside
Study also confirms that land parcel C18 provides an opportunity to accommodate appropriate development without significantly compromising the purposes of the Green Belt.

- We note the airfield had been subject to a planning application, which was refused in April 2016 and which The Site did not form part of (LPA ref: 15/P/00012). However, the comments within the assessment of the ‘Potential Creation of a New Settlement at Wisley Airfield’ identifies that the southern parts of the draft A35 allocation, within which The Site is located, are the least environmentally sensitive
- The site fronts onto Ockham Lane so there are opportunities for provision of a suitable access. The site is entirely within Flood Zone 1 so is appropriate in flood risk terms.
- The site is deliverable and developable in the short, medium, or long term.

In summary we welcome the inclusion of draft allocation for Policy A35 and removal from the Green Belt, for which Mr & Mrs Matthews’s land is included. However, for the reasons set out in this letter it is considered that Mr & Mrs Matthews’ site to the north of Ockham Lane is also suitable for an allocation in its own right and should be considered on this basis.

Thank you once again for the opportunity to respond to the Council’s Proposed Submission Local Plan consultation exercise. We would be very grateful for confirmation that these representations have been received.

Mr & Mrs Matthews respectfully requests that the Council notifies Strutt & Parker, on its behalf, of the future arrangements for the Examination of the Local Plan. Moreover, Mr & Mrs Matthews wishes to take this opportunity to formally request the right to appear at all stages of the Examination in Public.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

**Answer (if comment is on questions 1-7 of the questionnaire): (*)**

I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors. trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

**Answer (if comment is on questions 1-7 of the questionnaire): (*)**

I object to the location for new employment floorspace at Garlick's Arch - Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B 1 c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick's Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (82) and storage and distribution (88). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11).
Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Glandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I object to the local plan based on the impact it will have on the special countryside of the borough. The proposed development at Garlick's Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick's Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy 11)
Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages.

The Plan does not provide an achievable strategy for improving capacity on these local roads. Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1938  Respondent: 15254113 / R Orchard  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
I object to the lack of proper infrastructure planning for sites (Policy 11)

Policy 11 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents' in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1939  Respondent: 15254113 / R Orchard  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy 12)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to poor air quality concerns (Policy 13)

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to not protecting the Green Belt (Policy P2)

I object to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.
I object to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding. The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be recommissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I object [very strongly] [in the strongest possible terms] [wholeheartedly] to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. I object to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over development, particularly for the villages between Guildford and the M25, including Ripley, Send and Glandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35) and Garlick's Arch (A43) are in unsustainable locations. They do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Glandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill
(Glandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: PSLPS16/936  Respondent: 15254305 / Ben Barnwell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
10) I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1927  Respondent: 15254305 / Ben Barnwell  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4
8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1924   Respondent: 15254305 / Ben Barnwell   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I would like to express my objection to the proposed policy A35, Three Farm Meadows in the draft local plan for several reasons:

1. The plan is a gross misuse of Greenbelt land whose very purpose is to stop the environmentally unsustainable and detrimental expansion of city areas at the cost of natural green space.
2. The local roads would not be able to sustain the increase in traffic. The A3 and M25 junction is already incredibly congested at all times and the country roads are narrow and dangerous. In recent months there have been multiple accidents at the Old Lane – Ockham Road crossroads.
3. The roads are not wide enough for the new suggested bus routes
4. I find the proposal for walking and cycling on these routes absurd and unbelievably dangerous due to the narrow twisting roads and frequently speeding cars from the A3.
5. There is already insufficient parking at local stations (which for many residents is much more than a quick walk or cycle away), and the addition of so many new residents will make the situation even worse.
6. I object to para 21 which “limits” development in flood zone 2 and 3. Development should not be permitted in flood zone 2 and 3.
7. I object to para 22 as this does not at all reflect the impact of the buildings on the surrounding area.
8. I object to the inclusion of a 10% buffer in the housing number over the plan period; this proposal is completely unnecessary.

I hope that yourself and the developers will consider these reasons when you decide whether or not to ruin our local area and community with these continued ‘cheap and convenient’ fixes to fulfil quotas when alternatives, such as constructing on the numerous brown field sites within and surrounding London, do exist.

I object to the figure of 693 houses per annum in the borough being too high (Appendix D)

GBC has not published any details as how this figure was arrived at, and has not applied any of the applicable constraints to it. This lack of transparency is not acceptable in a public consultation.

I support a new community at Wisley Airfield.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

**I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Ripley (A43)**

Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

This is disastrous as the increased volume of traffic would impact the local communities. The increased traffic from London (M25) to Woking would go through Burnt Common, Send and Old Woking, which currently cannot cope with the existing traffic. This is unsustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

Damage will be caused to the ancient woodland of oak trees at Garlicks Arch site (A43) proposal, and the loss of green space and amenity

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the employment strategy and impact on Garlicks Arch (A43) (Policies E2 and E5)
The development will result in the loss of existing local successful businesses, which have been employing local people over many decades, and are therefore sustainable.

The volume of proposed housing will damage local communities especially Ripley, Send and Clandon and is not sustainable due to lack of infrastructure. There are no rail stations near the proposed developments and no plans to improve the local roads. What about primary schools, doctors and dentists? Where are the thousands of extra cars going to go with no possibility of significant improvements to local roads?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Borough Wide Strategy (Policy S2)

There is too much development in Wisley (A35) Ripley/Send (A43) and Clandon (A25). The plan is unbalanced with over 5,000 houses proposed between M25 and Burpham, which will merge all the villages and their identities. This is unfair and unreasonable.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This is my response to Guildford Borough Council’s draft plan. I strongly OBJECT to the plan as it currently stands. Specifically, I am deeply concerned by the proposal of site A46 in the Green Belt. The current proposal is grossly inappropriate, unsustainable and arguably not legal. Please see below my points of objection:

No demand for a new school:

- Have the council proved that a new school is required? Several local schools according to Keith Witham a local councillor are undersubscribed and if new places were required would be willing to expand if they became fully subscribed. A school is being built in Mayford which has not yet been completed. Is a further school required?
- It is would be more cost effective to extend existing schools to reduce the risk of an empty school given that surrounding schools are under subscribed and birth rates have dropped in recent years.
• GBC itself previously stated that Blackwell farm would be a better location for a new school if required. Why the sudden change of heart? Could this be because of pressure from Taylor Wimpey.
• I question the legality of a school being an enabler and a trump card for development on the green belt as stated by Cllr Paul Spooner.
• When will the school be built? If the houses are built first then all the children would have to go to other schools, negating the requirement for a school.
• When will the train station be built? If it is built after the school and homes how would children and staff get to school? They will drive adding further traffic and cause chaos on the local roads.
• A recent freedom of information outlined that the government does not know how many kids there will be. How can we propose let alone develop a school without accurate forecasts/predictions.

Too many homes being proposed:

• The proposal of over 1000 homes, retail space and a new school would dramatically change the nature of the village beyond recognition. Normandy and Flexford are semi-rural villages with a few hundred houses. The proposed development would change these villages into urbanised areas.
• The proposal of 1,100 homes seems an odd number to suggest and I have not seen any rationale or justification for this figure. I would strongly recommend investigating the calculation of this number. In addition, I call for a review of the SHMA as it appears to have been disproportionality impacted by Surrey University student needs.
• Why have GBC chosen larger sites instead of smaller sites where 30-50 homes could be developed? This would be easier to sustain and fairer on local communities.

Lack of current infrastructure and any proposals to improve it:

• There is a lack of infrastructure to support such a large scale development with the roads around A46 essentially being country lanes. The new school and homes would add hundreds of cars to roads which are already beyond the capacity they were designed to sustain.
• There is not a robust infrastructure plan to support GBC plan. Nothing in the plan suggests how this additional traffic would be managed. I am concerned about road safety with many of the roads having poor visibility due to blind corners, blind humps, no lighting, invisible entrances and poorly maintained bridges. We already have a speeding problem in the area this development would increase the problem. As a parent of young children this really concerns me.
• The plan mentions nothing about the impact of 1100 homes and 1500 pupils/200 staff on the A323 which is already a road struggling to cope with the traffic capacity and such development would push it beyond its designed capacity.
• The funding included within the proposal for infrastructure improvements is insufficient. This would not cover new bridges and crossing on Westwood and Glaziers Lane which would be required to manage the significant increase in traffic particularly HGVs and buses.
• No consideration has been given to the impact on the already busy Fairlands surgery in the area.

Lack of engagement on proposal and unjustified Green Belt development:

• Why don’t residents get to decide the future of their communities? We have never been consulted on what we would like to have developed in our area. No options have been presented other than 1100 homes. My understanding is that the localisation act and National Planning Policy Framework states that locals should be involved and have local consultations? There has been no meaningful engagement and the engagement recently has been at arm’s length and notification rather than consultation. My understanding is that the application by Taylor Wimpey to develop A46 was made 2 years ago. Plenty of time to have fully engaged local residents.
• The GBC proposal fails the NPFF due to the lack of meaningful engagement and disregard for the Green Belt without providing any exceptional circumstances.
• Why do other improvements to the area have to be included in the plan, can they not be developed anyway? I.e. improvements to the Christmas Pie Trail.

Site A46 is not safeguarded and should be proposed and developed in the same plan:
• Site A46 is **not** currently safeguarded. It was proposed but never approved. Can a site be proposed for safeguarding and developed in the same plan? My understanding is that this is not allowed.

• Site A46 appears to have been a last minute addition to the plan. It appears to have poorly thought through.

• Normandy and Flexford are a key sites to stop urban sprawl and Ash, Tongham, Aldershot and Guildford merging. It represents exactly what the green belt was created to do.

**The funding is questionable:**

• How is the plan being funded? It seems to be overwhelming funded by developers. Is this impartial or legal?

**The plan lacks credibility:**

• The proposal by GBC considers both Normandy and Flexford as one settlement (sustainability) in one section and two in another (sensitivity). This is inconsistent and undermines the validity and credibility of the proposal. This appears to have been done by GBC to get a specific outcome. By separating the two villages the sensitivity is lower as the land in between is disregarded.

**The plan will detrimentally impact the quality of life of many people:**

• The A46 proposal will have a significant detrimental impact on the quality of life of local residents. I am a father of two young girls and I am deeply concerned about the impact this will have on my family. We moved to Flexford for the countryside and community. The plans will cause the countryside to be destroyed including some wonderful wildlife and change the character of the community. During the development which will last years it will cause disruption to our lives, with the increase in pollution, noise and make the roads dangerous with the number of HGVs being required.

**The development would increase pollution:**

• I would be concerned for the health of my family if the proposal was to go ahead due to the increase in traffic pollution both during the development and once completed.

• The proposal would significantly increase in light pollution from the development on the SAONB.

**Endangered wildlife would be destroyed:**

• There are many endangered species in site A46 which would be destroyed by the development including but not limited to:
  • Hedgehogs
  • Owls
  • Sky Larks
  • Stag beetles
  • Adders

**The flood risk would increase:**

• The area is supported by Victorian sewage systems which would be pushed beyond design capacity with any new development of this scale.

• Normandy and Flexford often suffer from flooding. A46 is important in reducing the flood risk as it acts as a natural soak away.

• A46 is within 5km of the Thames Basin Heath Special Protection Area.

• There is a stream located near to site A46 at Manor Fruit Farm. If concreted over this will have severe impact on flooding.

**Listed buildings would be impacted:**

• There are 2x Grade 2 listed buildings very close to the proposed site of the development at A46. These have not been considered within the proposal.
The objections above relate to the overall policy and site A46. To call out some specific GBC policies that the objections relate:

S1, S2, H1, H2, H3, P1, P2, P3, P4, P5, E5, E6, E7, E9, D4, I1, P12, P13 and P14.

The arguments outline above demonstrate that the current plan is not fit for purpose and site A46 should be removed from the proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the 2016 Draft Local Plan.
I object to the erosion of the green belt, the removal of villages from the green belt.
I object that you have not provided an adequate consultation process, that you have decided to plan a disproportionate amount of development in one area of the large borough and to include, at the last minute, new sites.
I object to the lack of evidence for this so called housing need.
I object to the ill thought out lack of regard for road infrastructure, services, schools and ancillary services such as shops, doctors surgeries not to mention the increased traffic to an area that is already at maximum capacity and breaking point.
I object that you can make these plans with no regard for the local residents who chose this area, the visitors that come, all of whom enjoy the green belt and all it offers to lifestyles, ways of life, nature and health.

The removal of green belt and over development is a huge life changing, environmental changing decision and one that should not be made with enormous consideration, facts, evidence, local opinion and due debate. I object to you making these decisions.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am born and bred a Guildfordian, I suspect, unlike many of those proposing the acceptance of this housing explosion in our area. Many come here because it is a lovely town still surrounded by greenbelt countryside, yet having a diversity of employment suitable to most, this but still outside the sprawling London suburbs they have left. Surely to retain that attraction we have to maintain it, not destroy it! We are already seeing the awful effects around us of home extensions and the anything goes policy of planning applications. Destroying the character of many areas. Perhaps we are looking at this from the wrong end. Maybe we should be looking at Local Authority/Government built housing, to satisfy the huge demand by that end of the market! Be it shared housing or rented. Control and asset ownership then is in the hands of the people/council. My experience is that housing markets are dictated by first time buyers. This is a way of controlling that process. Building thousands of houses at the £600,000 to £1 million pound end around Guildford is not the way forward. This just to satisfy the pockets of the developers, the ego of council development officers and the niche end of the market.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Here are my reasons:-

1. I OBJECT TO the villages of Ripley, Wisley, Clandon and Send etc being removed from the greenbelt. I OBJECT TO the erosion of the greenbelt in this plan.
2. I OBJECT TO the Garlick's Arch site A43
3. I OBJECT TO site A43a due to increased traffic problems that will potentially be created
4. I OBJECT TO site A45 in order to protect a conservation area.
5. I OBJECT TO site A57 as I believe this to be unlawful.
6. I OBJECT TO the removal of any villages from the greenbelt.
7. I OBJECT TO the excessive quantity of development proposed for this area of the borough.
8. I OBJECT TO last minute addition of new sites at short notice.
9. I OBJECT TO the lack of evidence for housing needs in the proposed areas.
10. I OBJECT TO the lack new schools within the plans to match the level of extra housing.
11. I OBJECT TO the lack of extra Doctors Surgeries within the plans to provide healthcare required for the extra population proposed for the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the inclusion of the site formerly known as Wisley Airfield in the local plan as a possible site for the building of a large number of houses as it flies in the face of ‘localism’.

I especially object to the detrimental impact on transport, local roads and road safety. I specifically object to the proposition that the development will result in a meaningful shift to cycling and walking. The development is miles from anywhere and the residents will be entirely reliant on their cars to get about as there are no transport links of any kind except narrow roads and the enormously busy M25/A3 junction, which could not stand an influx of thousands of extra cars.

Because the Olympic Cycle race and the Prudential Ride London-Surrey cycle race come through Ripley and past Ockham and Horsley, Cyclists are encouraged to cycle throughout this area and the number of cyclists on these narrow roads has increased dramatically especially on Saturday mornings, the favoured shopping time for most people. I object to the addition of any extra cars that will be a massive danger to these cyclists and discourage cycling in direct contravention of the governments aim to encourage it.

Wisley Gardens has proposed an expansion which will increase visitor traffic more than it stands today and so I object to any proposal that will increase the traffic any further and put an already over populated road junction under even greater strain making long stationary queues a probable permanent feature of this junction.

I object to the detrimental effect the development would have on there character of the area. Houses in Ockham are old, vernacular, set back from the road, built in hollows or behind trees, are a maximum of two stories, with perhaps and attic conversion, and very sparsely arranged in terms of number of houses per hectare. This development is scheduled for the crest of a hill, it is urban in nature, has a population density equal to or greater than the most congested parts of London and will have living units up to five stories high; twice the height of anything in the area.

I strongly object to the detrimental effect the proposed development will have on the environment and the various sites of special significance that border it.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
10) I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I object to the 2016 Draft Local Plan.

Firstly traffic is already horrendous in the mornings, and afternoons a further 2000 homes would make it impossible to get anywhere.

There are not enough places in local schools for more children.

Loss of green belt.

I support this policy retaining this land for Allotment use.

I have had an allotment on this site during the 1980’s and again for the last ten years. It is very near my home and has a truly beneficial effect on my physical and mental health.

After two hip replacements, shoulder surgery, and back pain I am unable to walk far but am quite able to attend my allotment to great effect. I have even entered this year’s allotment of the year which will tell you how successfully I can tend my plot. After retirement the practice of growing became my passion and I spend time every day on the plot at Aldershot Road.

If the building of houses went ahead and/or if the gate at the Aldershot Road end were to shut I would be unable to access the plot and would have to give up the practice which would affect my health undoubtedly.

I feel the fact that the local school children having a plot is most inspiring and do feel it is so important for children to know where food comes from and how it tastes. It seems unfair that housebuilding, business and greed could overshadow the benefits to the whole community here at Westborough.

Please think carefully before putting that greed first.

I understand the need for new housing but think retaining our green and cultivated spaces just as important. By the way I hope everyone concerned is aware of the bees on site at Aldershot Road and of their contribution to the balance of nature.

<td>It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.</td>
</tr>
</tbody>
</table>

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/951  Respondent: 15254785 / M.D. Vickers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<tr>
<td>1. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td>1. I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.
The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.
There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1948  Respondent: 15254785 / M.D. Vickers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1956  Respondent: 15254785 / M.D. Vickers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment “Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:
To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1953  Respondent: 15254785 / M.D. Vickers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT(POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.
Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1950  Respondent: 15254785 / M.D. Vickers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I OBJECT to the Borough Wide Strategy (Policy S2)

1. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

2. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

3. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 3,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO THE PLANS OUTLINED IN POLICY A43 on the grounds that this area is Green Belt and is therefore protected from development. It is a wildlife habitat. What does The Council propose to do about this? The brownfield industrial site at Burnt Common is large enough for the 7,000 sq. m. suggested for further development. If the Council builds on this area, the small, beautiful country villages of Ripley and Send will become suburbs of Guildford in no time at all and their uniqueness and beauty will be lost forever. Please don’t touch our Green Belt! This why we moved to this area, because it is unspoilt! I also object to the plan for 400 new homes, on the grounds that there is insufficient infrastructure to maintain this level of development, viz: health centres, schools etc. I also strongly object to the manner in which this plan was put forward at the last moment, without consultation.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO THE PLANS OUTLINED IN POLICY A44 on the grounds that this area borders a country lane, one track in places, in a beautiful, rural position. There is a beautiful cemetery adjacent, a place for peaceful reflection and quietude. The ethos of this area will be destroyed by the addition of 2 traveller sites and a further 40 homes.

</tr>
</tbody>
</table>
inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.
There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size. Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/957  Respondent: 15255553 / J.A. Vickers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community
Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy P4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1969  Respondent: 15255553 / J.A. Vickers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.  I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.  I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy II)

Policy II requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

1. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including...
Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Borough Wide Strategy (Policy S2)

   1. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

   2. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

   3. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guilford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.
It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Sustainability Appraisal

1.29 It is apparent that the proposed allocation at ‘Land to the south of Normandy and north of Flexford’ (Policy A46) which is a residential led mixed use development site for approximately 1,100 homes cannot be considered to be “small scale”.

1.30 Whilst the SA states that the preferred approach “performs well” (including ‘Land to the south of Normandy and north of Flexford’ (Policy A46)) in terms of potential housing provision across the plan period because “there is a reliance on smaller sites at villages partly because these sites are ‘deliverable’” a review of the housing trajectory in the LAA does not demonstrate this.

1.31 Our client’s site could deliver around 70 houses within the first five years of the plan period to contribute to meeting the extensive needs which exist within this area as well as within the Borough as a whole to contribute to ensuring the soundness of the plan.

1.32 With regards to the site options appraisal findings set out in Table C of Appendix IV of the SA it is noted that the spreadsheet which supports this Table was not made available until 11/07/2016 following a request made to the Council. This information was not therefore available for the full six week consultation period.

1.33 Nonetheless from an initial review of Table C it is apparent that based on the ranking exercise undertaken by the Council in the SA that the site allocated in the Local Plan under Policy A43 (Land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley) does in fact have the poorest performance of all of the sites assessed in relation to Send.

1.34 Furthermore if the performance of this allocated site is also compared to the sites considered in respect of Send Marsh as well it remains the poorest performing site with a total of ten indicators being scored as red which equates to 48% of the overall criteria.
1.35 The spreadsheet which accompanies Table C on which the ranking exercise for the SA has been based is also inaccurate in many places in relation to our client’s site. Key areas of concern are set out below:

1.36 Flood risk - ‘Land north of Send Marsh’ is stated as being in Flood Zone 3 and therefore given a red ranking against flood risk in the site options appraisal. The Council was originally presented with evidence in September 2014 to demonstrate that the site is not at risk of flooding and this ranking is therefore incorrect. The entire development can be delivered without encroaching into any areas liable to flooding, and this site should rightly score a green ranking against flooding and not a red ranking.

1.37 Previously developed land - In addition we have also submitted a ‘Previously Developed Status of Land’ report in February 2016 which concludes that there “is no evidence of the site ever being agricultural use in recent times” and provides significant evidence “to support the case for the site being Previously Developed Land.” This category should also score a green ranking and not a red ranking.

1.38 In order to minimise any potential for legal challenge to the Local Plan process, it is recommended that the SA is updated to take the above points into consideration and ensure the soundness of the plan.

1.39 With the correct scoring, it is apparent that ‘Land north of Send Marsh’ performs strongly when assessed against the 21 categories the Council have opted to appraise all reasonable site options against.

1.40 In order to minimise any potential for legal challenge to the Local Plan process, it is recommended that the SA is updated to take the above points into consideration and demonstrate how all reasonable alternatives have been considered in order to ensure the soundness of the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2.5 Odyssey Markides have prepared a Highways Statement which is appended to this statement at Appendix Two, which demonstrates that a residential development of up to 70 dwellings would be deliverable and acceptable in respect of transport issues.

2.6 This report firstly addresses the National policy context, followed by a summary of the background position and then provides a response to the overall strategy, approach to the Green Belt, previously developed land and settlement boundary of villages. It then provides a response to the proposed allocated sites, considers the sustainability appraisal and detailed policy matters and finally draws the representation to a summary and conclusion.

2.7 This report is submitted for consideration in the preparation of the Guildford Borough Proposed Submission Local Plan: Strategy and Sites, June 2016.

2.8 Guildford appears to have embraced national Government Advice, made clear within the Housing and Planning Act, to ensure that Local Plans are put into place as quickly as possible in order to facilitate much needed strategically planned growth. In this regard, Guildford’s commitment to progressing their Local Plan in line with Government Advice and the Housing and Planning Act is supported.

2.9 This commitment to progressing their Local Plan is demonstrated by the fact that Guildford has now progressed to a Regulation 19 consultation, which is also welcomed.

2.10 The proposed settlement hierarchy for the Borough’s settlements is also supported as set out in the ‘Guildford Borough Settlement hierarchy’ which forms part of the evidence base for the Proposed Submission Local Plan: Strategy and Sites June 2016.

2.11 As set out in section 4.0 of the document entitled, ‘Guildford Borough Settlement Hierarchy’, (which refers to the ‘updated settlement hierarchy’), the sustainability ranking of the settlements designates Send Marsh/Burntcommon as a large village. Large villages are defined in the settlement hierarchy as being “unsuitable for substantial growth but capable of accommodating a proportionate extension.”

2.12 The conclusions state that “it would be appropriate to direct new development towards…Send Marsh/Burntcommon” and other locations within the Borough which are considered to be “the most sustainable in terms of their level of community services and facilities, access to higher order centres and employment opportunities, and ability to support new development.”

2.13 This approach and the conclusions in relation to Send Marsh within the ‘Guildford Borough Settlement hierarchy’ are supported.

3.1 This section provides a brief review of the approach which local planning authorities are required to take in preparing Local Plans for their areas, with particular reference to planning for their identified housing requirements.

National Planning Policy Framework

3.2 Published in March 2012, the National Planning Policy Framework (NPPF) provides the overarching Government policy document in relation to planning.

3.3 The NPPF requires Local Plans to be “prepared with the objective of contributing to the achievement of sustainable development” (paragraph 151). As such paragraph 154 states that Local Plans “should address the spatial implications of economic, social and environmental change”. They should set out “the opportunities for development and clear policies on what will or will not be permitted and where”.

3.4 Local Plans should be drawn up over an appropriate timescale. Preferably this will involve a 15-year time horizon but also taking into account longer term requirements.

3.5 The NPPF establishes the ‘presumption in favour of sustainable development’ in paragraph 14, which in particular for plan-making means that:

“Local planning authorities should positively seek opportunities to meet the development needs of their area.”
Housing Provision

3.6 One of the key objectives of the NPPF, set out in para. 47, is to “boost significantly the supply of housing”. In order to achieve this aim, the Local Planning Authority should:

"Use their evidence-base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area, as far as is consistent with the policies set out in the framework, including identifying key sites which are critical to the delivery of the housing strategy over the Plan period."

Delivering a wide choice of high quality homes

3.7 The Government’s ambition is to boost significantly the supply of housing. Paragraph 47 of the NPPF requires local planning authorities to identify and update annually a supply of specific deliverable sites sufficient to provide five years’ worth of housing against their housing requirements, with an additional 5% to 20% buffer depending on past performance of delivery. Local planning authorities need to provide a realistic prospect of achieving planned supply and to identify a supply of specific, developable sites or broad locations for growth for years 6-10 and where possible for years 11-15.

3.8 In addition paragraph 17 states that every effort should be made objectively to identify and then meet the housing needs of the area. Local Planning Authorities are required to ensure that the Local Plan is based on adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area.

3.9 Paragraph 50 of the NPPF deals with the need to deliver a wide choice of high quality housing, widen opportunities for home ownership and create sustainable, inclusive and mixed communities. It sets out three specific points. The first is to plan for a mix of housing based on current and future demographic trends and needs of different groups. The second point is for a Local Authority to identify size, type and tenure as well as the range of housing required in particular locations reflecting local demand. The last point is where affordable housing is required, to set policies for meeting that need on site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

National Position

4.1 Housing and Planning Act and streamlining the planning process

4.2 The objective of the Act is to assist the Government in improving UK housing provision by setting out a number of reforms to assist in the delivery of new homes and to address current issues which are delaying the process.

4.3 The Housing and Planning Bill received Royal Assent on 12 May 2016. Sections 143 to 146 bring in new powers for the secretary of state to intervene in plan-making, reflecting the government’s commitment for all planning authorities to produce a local plan by early 2017.
4.4 On 18th February 2016 the Government published a ‘Technical Consultation on Implementation of Planning Changes’. (The consultation ran until 15 April 2016). The consultation document confirms the intention of the Government to take action to get plans in place and ensure plans have up-to-date policies by:

- Publishing league tables, setting out local authorities’ progress on their local plans;
- Intervening where no local plan has been produced by early 2017, to arrange for the plan to be written, in consultation with local people, to accelerate production of a local plan; and
- Establish a new delivery test on local authorities, to ensure delivery against the number of homes set out in local plans.

Local Position

4.5 The West Surrey Strategic Housing Market Assessment covering Guildford, Waverley and Woking Borough Council’s Final Report dated September 2014 was released into the public domain on Friday 2nd October 2015.

4.6 Paragraph 10.37 of this document set out that, ‘Taking these factors into account the SHMA draws the following conclusions on the overall need for housing over the 2013-33 period: Guildford: 693 homes pa.’

4.7 Prior to this publication, there were various estimates of housing need for Guildford Borough.

4.8 Paragraph 8.24 of the Guildford and West Surrey Strategic Housing Market Assessment Final Draft Report published in May 2014 sets out that, ‘On the balance of the evidence, we would recommend that the Council tests the ability to deliver up to 780 homes per annum within the borough over the plan period to 2031… The additional uplift from 652 to 780 homes per annum would be sufficient to support improvements in affordability; and to make a tangible difference to meeting affordable housing needs…’

4.9 The West Surrey Strategic Housing Market Assessment Summary Report published in December 2014 then set out at paragraph 2.24 that, ‘the SHMA draws the following draft conclusions on the overall needs for housing: Guildford – 620 – 816 homes pa.

4.10 The current need of 693 therefore appears to be a low ‘mid-range point’ of the need referred to in previous iterations of the SHMA.

Local Plan Review

4.11 Guildford Borough consulted on the Draft Local Plan from July to September 2014. This was a consultation under Regulation 18 of the Town and Country Planning ((England) Regulations 2012.)

4.12 In the foreword statement to the Draft Local Plan June 2014 by Councillor Stephen Mansbridge, (the then Leader of the Council), it was suggested that, ‘To ignore or dismiss the borough’s need for more housing and employment land would be a destructive and dangerous strategy that would do great harm to the place that we all cherish. In total this plan will take up 2 per cent of green belt land… The Plan has to take into account our persistent under delivery of housing in past years and the almost complete absence of a 1-5 years land supply.’

4.13 Policy 2: Borough Wide Strategy of the June 2014 Plan set out that, ‘During the plan period (2011-31), we will make provision for 13,040 new homes, which equates to an annual requirement of 652 new homes a year… In order to provide a level of flexibility and to ensure that the realigned green belt boundaries endure beyond the plan period, we are safeguarding approximately 99 hectares of land. ’ As highlighted in the supporting text to the policy, it is recognised that this annual requirement represents a significant increase over the previous Local Plan requirement.

4.14 At that time, the Council’s proposed housing target had been informed by the draft Strategic Housing Market Assessment (SHMA) (January 2014). Notably the SHMA recommended that the Council tested the ability to deliver up to 780 new homes per annum over the period to 2031.

4.15 It is also notable that the Council’s selected housing target at that time was at the bottom level of the scenarios assessed in the SHMA. Para 8.24 of the SHMA set out that, ‘The additional uplift from 652 to 780 homes per annum would be sufficient to support improvements in affordability; and to make a tangible difference to meeting affordable housing needs (although not fully meeting it, this would require a further uplift) as well as meeting the baseline demographic growth in the Borough.’
4.16 Against this backdrop to the housing numbers and policy, ‘Land at Polesden Lane and Send Marsh Road, Send Marsh’ (the site the subject of this representation) was identified in the draft Guildford Borough Local Plan as Site 120, which was proposed to be safeguarded for development beyond the plan period.

Green Belt Review

4.17 A Guildford Borough Green Belt and Countryside Study (GBCS) was published in February 2013. This Green Belt and Countryside Study included the site, the subject of this report as area B16-A. The GBCS identifies this site as suitable for residential development if sufficient deliverable land outside of the green belt is not identified. The GBCS concluded the following in relation to the site:

‘B16-A is surrounded by defensible boundaries with partial visual enclosure including tree cover following ditch and residential gardens at Danesfield to the north and east; residential gardens following Polesden Lane and Send Marsh Road to the south; and tree belts with open farmland to the west, B16-A is relatively unconstrained in environmental capacity terms, however, it is partly located within a designed flood risk area to the north west. B16-A scored 6 and was ranked 22nd according to current sustainability credentials. The estimated residential development capacity of B16-A is 47 dwellings.’

Local Development Scheme

4.18 On 29th September 2015, a formal timetable (Local Development Scheme) for the production of a Local Plan, Development Management Policies and production of the Community Infrastructure Levy (CIL) was considered at an Executive meeting of the Council. The LDS was supported by an Executive Report.

4.19 Of particular note was the discussion of a Regulation 18/Regulation 19 consultation stage in taking the Local Plan forward.

4.20 Statutory instrument 2012 No. 767 sets out The Town and Country Planning (Local Planning) (England) Regulations 2012. This includes Regulation 18 and Regulation 19. Regulation 18 refers to the bodies and persons to be notified at the stage of preparation of the local plan about the subject of a local plan and inviting representations to the local planning authority about what a local plan ought to contain. Regulation 19 refers to the publication of a local plan and what should happen prior to submitting a local plan to the Secretary of State.

4.21 It is therefore clear that the Regulation 18 requirements must be met and complied with prior to proceeding to the Regulation 19 requirements.

4.22 A Regulation 18 consultation is recognised as providing the earlier opportunity to engage in the plan making process with greater flexibility to influence the Local Plan (including policies, housing numbers and allocations). The Regulation 19 consultation is the Publication Stage where the Council is setting out their intended direction with more certainty and therefore considered by many to offer reduced scope for variation.

4.23 There have previously been two Regulation 18 consultations; the Issues and Options consultation in October to November 2013 and the draft Local Plan consultation in July to September 2014.

4.24 Paragraph 5.5 of the Executive Report for the Guildford Borough Local Plan: Local Development Scheme set out that, ‘A legal opinion has been sought on this matter to ensure that the approach taken meets the requirements set by the regulations and can be robustly defended at examination. The advice received is that it would be advisable to proceed straight to Regulation 19 stage for a number of reasons:

- It would make progress towards the goal of achieving a plan.
- The risks can be ameliorated by, if necessary, repeating the Regulation 19 consultation.
- There is a strong argument that the two rounds of consultation already comply with the requirements of Regulation 18.’

4.25 Given the pressing need to prepare a sound new Local Plan as quickly as possible and in light of the legal advice received, Guildford Borough Council has progressed straight to a Regulation 19 consultation.
Background to Previously Developed Land

7.1 The Glossary at Annex 2 of the NPPF sets out the definition of previously developed land as follows: ‘Land which is or was occupied by a permanent structure, including the curtilage of the developed land (although it should not be assumed that the whole of the curtilage should be developed) and any associated fixed surface infrastructure. This excludes: land that is or has been occupied by agricultural or forestry buildings; land that has been developed for minerals extraction or waste disposal by landfill purposes where provision for restoration has been made through development control procedures; land in built-up areas such as private residential gardens, parks, recreation grounds and allotments; and land that was previously-developed but where the remains of the permanent structure or fixed surface structure have blended into the landscape in the process of time.’

Approach at Guildford

7.2 Paragraph 4.29 of the Topic paper: Green Belt and the Countryside June 2016 sets out that, ‘Whilst not villages, a similar approach is applicable to major previously developed sites in relation to whether they should remain washed over or be inset from the Green Belt. National policy requires that land which it is unnecessary to keep permanently open should not be included in the Green Belt. If major previously developed sites are of sufficient scale and do not possess an open character, it is not considered necessary for them to remain within the Green Belt. We consider that this constitutes the exceptional circumstances required to amend the Green Belt boundary to inset these sites.’

7.3 Paragraph 5.6 and 5.7 of the Green Belt and the Countryside Topic Paper list the sites considered to be previously developed and inset from the Green Belt, setting out that, ‘The following major previously developed sites are proposed to be inset from the Green Belt: Henley Business Park, HM Prison Send, Keogh Barracks, Mount Browne, Pirbright Barracks, Pirbright Institute and the University of Law Guildford.’

7.4 ‘The following traveller sites are proposed to be inset from the Green Belt: Land at Cobbets Close, Normandy; Land at The Paddocks, Rose Lane, Ripley; Four Acres Stable, Normandy; Land rear of Roundabout, Wood Street Village; The Orchard, Puttenham; Valley Park Equestrian Centre, Shalford; Land rear of Palm House Nurseries, Normandy; Whittles Drive, Normandy.’

7.5 The broad approach to removing major previously developed sites from the Green Belt accords with national planning policy and is supported. However, the evidence base to support Guildford’s assumptions about the sites considered to be previously developed appears to be somewhat lacking. There are no details as to the methodology or reasoned justification that has been applied to demonstrate that a site should be considered as previously developed land.
7.6 The DCLG, ‘Technical consultation on implementation of planning changes’ covers ‘identifying brownfield land that is suitable for housing.’ Whilst at consultation stage and not implemented, this document provides the an indication of the direction of travel.

7.7 Paragraph 3.13 sets out that, ‘Brownfield or previously developed land is defined in Annex 2 of the National Planning Policy Framework. Sites on brownfield registers will be required to meet this definition of previously developed land. This is a very broad definition and, apart from the exclusions, covers all land in England where there are or have been buildings or other development. Much of this land is already in productive use and would not be suitable for new housing.’

7.8 Paragraph 3.16 then sets out that, ‘Authorities should adopt a positive, proactive approach and consider both large and small sites. They should only reject potential sites if they can demonstrate that there is no realistic prospect of sites being suitable for new housing.’

7.9 Paragraph 3.17 of this consultation document is also relevant, which sets out that, ‘To be regarded as suitable for housing our proposed criteria are that sites must be:

• Available…
• Capable of supporting five or more dwellings or more than 0.25 hectares…
• Capable of development. Local authorities should ensure that sites are suitable for residential use and free from constraints that cannot be mitigated…’

7.10 Paragraph 3.23 then addresses publicity and consultation requirements and sets out that, ‘A key purpose of brownfield registers is to provide transparent information about suitable sites to local communities, developers and others. We propose that information about potentially suitable sites should be available at local authority offices and online. Once local authorities have considered representations on their proposed list of sites, we will encourage them to publicise their decisions, including reasons why sites have or have not been granted permission in principle.’

7.11 It is clear that Guildford’s published evidence base does not address the majority of these points. Indeed, assumptions appear to have been made about whether land is previously developed and these assumptions have not been made public. It appears that these assumptions result in different conclusions about what is considered to be PDL than the definition as set out in the NPPF and proposed to be used by DCLG in the Technical Consultation.

7.12 In the absence of any evidence base being produced by Guildford Borough Council, specific and detailed evidence demonstrating the case for concluding that the site at Send Marsh should be considered to be previously developed land (PDL) was submitted to Guildford Borough Council in February 2016. This report is entitled, ‘Land at Polesden Lane and Send Marsh Road, Send Marsh, Previously Developed Status of Land’ and is attached again at Appendix Four to this representation.

7.13 The February 2016 report at Appendix Four concluded with the words that it had been prepared ‘specifically to correct the description of the site as pasture land’ and additionally as set out at paragraph 1.5 of the report in response to the fact that, ‘The Local Planning Authority now has a requirement to produce and maintain a register of previously developed land within its administrative area.’

7.14 In addition to the evidence of previous development set out in that report, it highlighted that, ‘There is no evidence of the site ever being in agricultural use in recent times. It is in the hands of a house builder and therefore it can be delivered without delay.

‘The site can be developed using land only in Flood Zone 1, i.e. avoiding any land within Flood Zone 2 or 3. Significant evidence has been provided to support the case for the site being Previously Developed Land. The site has been occupied by permanent non-agricultural structures for much of the Twentieth Century. The remains of these structures are still visible on site and the findings of the Geo-Technical assessment lends further support to the existence of foundations to the extent that these have not fully blended into the landscape.’

‘It is considered that because of the history of previous uses of the site that it is to be regarded as Previously Developed Land, which increases its suitability for residential development. Other than the existing Green Belt designation, there are no other overriding constraints to the site which would prevent its early release for development.’
7.15 The above also demonstrates that the approach adopted by Guildford conflicts with DCLG’s proposed approach that, ‘They should only reject potential sites if they can demonstrate that there is no realistic prospect of sites being suitable for new housing.’

7.16 The Guildford Borough Land Availability Assessment (LAA) dated February 2016 considers the site at page 543 within the table entitled ‘Discounted sites – housing’. This document gives the site ID reference 1221, ‘Land at Polesden Lane and Send Marsh Road, Send’. The supporting text sets out, ‘Our spatial strategy and site allocations have been considered through the Sustainability Appraisal and this site no longer accords with the proposed spatial strategy in the Local Plan. The site was identified in the Green Belt and Countryside Study but is located within high sensitivity Green Belt.’ Guildford has produced one table entitled ‘Previously Developed Land in the green Belt, Discounted sites (housing)’ and a second table entitled ‘Green Belt, Discounted sites (housing). As the site is listed under the latter table, it is clear that the Council has concluded that the site is not considered to be previously developed land.

7.17 Although there is a statement at the end of the document setting out that, ‘…if there is information about additional previously developed land in Guildford borough that would help us to update this LAA, we would be grateful to receive it’, it does not appear that information previously sent to the Council has informed that evidence base and latest documents.

7.18 The case to support the removal of the site from the Green Belt has been clearly established above. This identifies the weaknesses within the methodology adopted by the Council and particularly our Green Belt Assessment originally submitted to the Council in February 2016, see Appendix Three which has informed their Green Belt Assessment.

7.19 Our Green Belt Assessment at Appendix Three has clearly demonstrated that our site, ‘at best, makes only a very limited contribution to the purposes of including land within the Green Belt.’ In accordance with the direction referred to at paragraph 6.8 above, by revising the evidence base to justify the release of land within the Green Belt, and adopting the approach as advised, which accords with both PAS guidance and best practice, it is clear, as robustly demonstrated by our Green Belt Assessment that the site at Send Marsh should be removed from Green Belt.

7.20 It has therefore been clearly demonstrated that 1) the site should be removed from the Green Belt and 2) the evidence presented demonstrates that the site should be considered previously developed land in accordance with the definition within the NPPF and subsequently proposed to be taken forward to inform the brownfield register.

7.21 Following Ministerial Guidelines it is therefore of fundamental importance that the Council demonstrates that the proposed approach with regards to both Green Belt and subsequently previously developed land in the Green Belt is supported by a robust evidence base in order to demonstrate it has appropriately considered all reasonable alternatives to ensure the plan and policies P2: ‘Green Belt’ and D4: ‘Development in urban areas and inset villages’ are sound.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Overview of the Sustainability Appraisal

10.1 The Sustainability Appraisal (SA) of the Guildford Borough Local Plan (June 2016) forms part of the evidence base for the emerging Local Plan and is described as a “mechanism for considering and communicating the likely effects of a draft plan, and alternatives, with a view to avoiding and mitigating adverse effects and maximising the positives.”

10.2 In paragraph 5.1.5 the SA sets out that although there are a wide range of issues covered by the emerging Local Plan “the key issue/objective relates to the allocation of land to meet housing needs.” The SA therefore focuses on this issue and sets out to provide an appraisal of the alternative spatial strategies and reasonable alternatives available.

Housing Growth in Villages

10.3 In keeping with the ‘Guildford borough Settlement hierarchy’ the SA identifies that although in line with the sequential approach, growth at Green Belt sites around the villages is the final location at which to deliver growth, nonetheless “significant growth around villages is necessary” and nil growth in these locations “is not a reasonable option as several sites do have merit”.

10.4 Whilst the hierarchical approach to the allocation of growth across the Borough is broadly supported it is clear that the terminology currently utilised to describe a number of sites in the SA would benefit from revision. In particular in terms of the SA it is apparent that the five sites listed as ‘givens’ in terms of Green Belt sites around the villages cannot be described as “broadly supported” or “relatively small scale”.

10.5 In particular ‘Land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley’ (Policy A43) was not previously included in the Regulation 18 consultation and indeed was added to the draft plan at the point it was considered at the Extraordinary Council meeting for the emerging Local Plan.

10.6 It is therefore unclear how the SA can describe this site as being a ‘given’ owing to the fact it is “broadly supported” when this matter remains untested and will only be demonstrated through the Regulation 19 consultation process to which this report responds.

10.7 In addition it is also apparent that the proposed allocation at ‘Land to the south of Normandy and north of Flexford’ (Policy A46) which is a residential led mixed use development site for approximately 1,100 homes cannot be considered to be “small scale”.

10.8 ‘Land to the south of Normandy and north of Flexford’ (Policy A46) is an allocated site covering 67 ha which is described in Policy A46 as being the “creation of a sustainable and inclusive community that can meet its day to day needs within the community.” It is therefore apparent that this represents a significant strategic site which is to deliver approximately 8% of the Council’s OAN.

10.9 Given the size of this site and the need to ensure the soundness of the plan additional evidence supporting the assumptions set out in the SA that this site “will be deliverable in the early part of the plan period” should be produced. This should address the fact that the SA conflicts with the information presented in the Housing Trajectory. The SA should also be updated to reflect that this is not a “small scale” development.

Housing Delivery

10.10 The ‘Sustainability Appraisal (SA) of the Guildford Borough Local Plan’ “identifies, describes and evaluates’ the likely significant effects of implementing ‘the plan, and reasonable alternatives’”. In total the SA appraises a total of 8 separate spatial strategies which deliver varying levels of housing growth across the Borough including Option 1 which delivers the OAN with no buffer through to Option 8 which delivers the OAN plus a 34% buffer.

10.11 The Council’s preferred approach is Option 4 which represents the delivery of the OAN plus a 14% buffer. The Council notes that the incorporation of this buffer will ensure that Guildford’s OAN is met in practice and ensures that some resilience is built into the Local Plan.

10.12 This corresponds to the Housing Trajectory set out in the Land Availability Assessment (LAA) which demonstrates that the potential housing provision across the plan period is 15,844 homes.
10.13 Whilst the SA states that the preferred approach “performs well” in this regard because “there is a reliance on smaller sites at villages partly because these sites are ‘deliverable’” a review of the housing trajectory in the LAA does not demonstrate this.

10.14 The Housing Trajectory also illustrates that ‘Land to the south of Normandy and north of Flexford’ is not anticipated to deliver any housing before 2021/22.

10.15 Furthermore contrary to the assumptions set out in the SA the Housing Trajectory indicates that in the first five years of the plan period ‘Land to the south of Normandy and north of Flexford’ is only predicted to provide a total of 200 dwellings towards the potential housing provision figure within the Borough. The majority of the housing will be delivered in the later stages of the plan period with approximately 82% of the housing being delivered between 2023 to 2029 based on the trajectory provided in the LAA.

10.16 This therefore re-emphasises that this strategic site will not be able to deliver in the early part of the plan period, contradicting the position as currently set out in the SA.

10.17 Consideration should also be given to the significant infrastructure which is required in respect of ‘Land to the south of Normandy and north of Flexford’ (Policy A46) including a secondary school (up to eight form entry), a significant bus network, an off site cycle network and a bespoke SANG, resulting in likely delays to the delivery of this site. Furthermore Policy A46 also sets out a requirement for any development to address the potential highway performance issues which could otherwise result from the development.

10.18 Given the above requirements and the evidence set out in the LAA it is apparent that this site will not be deliverable in the early part of the plan period.

10.19 This again highlights the point made earlier in this representation in that, in order to ensure the soundness of the plan, there is a need to fill a gap in the early years in the plan period with sites where there is certainty that they can and will be delivered. This will ensure diversity of supply and ensure the plan accords with the requirements of paragraph 47 of the NPPF.

10.20 Our client’s site could deliver around 70 houses within the five years of the plan period to contribute to meeting the extensive needs which exist within this area as well as within the Borough as a whole.

Recommendations

10.21 The SA does to some extent acknowledge this “pressure to allocate sites that are able to deliver in the early plan period” and therefore considers the possibility of allocating additional village sites.

10.22 The SA identifies three sites at Send which “come into contention” owing to the fact that they are outside of the AONB and comprise of amber-rated Green Belt.

10.23 Given the ‘red rating’ of the land parcel in the Green Belt Sensitivity Assessment, Land at Polesden Lane and Send Marsh Road, Send Marsh is not included within the three sites that ‘come into contention’ in Send.

10.24 It is therefore clear that for such heavy reliance in the SA to be placed on the Green Belt Sensitivity Assessment re-emphasises the strong concerns raised above with regards to the Council’s Green Belt Assessment methodology. It results in an incomplete assessment of the reasonable alternatives.

10.25 As such in order for the emerging Local Plan to be found at sound at examination it is considered essential that the SA be updated following a revised Green Belt Assessment to feed into an updated Sensitivity Assessment, as set out above in Section 5 of this representation.

Sustainability Appraisal – Site Options Appraisal

10.26 With regards to the site options appraisal findings set out in Table C of Appendix IV of the SA it is noted that the spreadsheet which supports this Table was not made available until 11/07/2016 following a request made to the Council. This information was not therefore available for the full six week consultation period.
10.27 Given that this information is stated to allow for a much “more effective interrogation of the data” set out in the SA it forms an important part of the evidence base for the Local Plan.

10.28 As such we therefore reserve the right to submit further information in regards to the site options appraisal findings on the basis that the information was not publically available alongside all other consultation documents for the full six week consultation period.

10.29 Nonetheless from an initial review of Table C it is apparent that based on the ranking exercise undertaken by the Council in the SA that the site allocated in the Local Plan under Policy A43 (Land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley) does in fact have the poorest performance of all of the sites assessed in relation to Send Marsh.

10.30 Furthermore if the performance of this allocated site is also compared to the sites considered in respect of Send Marsh as well it remains the poorest performing site with a total of ten indicators being scored as red which equates to 48% of the overall criteria.

10.31 The SA should therefore be revised to provide additional evidence to support the inclusion of this allocated site within the Local Plan and also to re-consider its status as a ‘given’. These revisions are considered necessary in order to ensure that the emerging Local Plan is found sound at examination.

**Land at Polesden Lane, Send Marsh (Our client’s site)**

10.32 Having received the spreadsheet which accompanies Table C it is also noted that the information on which the ranking exercise for the SA has been based is also inaccurate in many places in relation to our client’s site. Key areas of concern are set out below:

**Flood risk**

10.33 ‘Land north of Send Marsh’ is stated as being in Flood Zone 3 and the SA analysis is therefore inaccurate. As a result of this error the site is given a red ranking against flood risk in the site options appraisal. The Council has previously been presented with evidence to demonstrate that the site is not at risk of flooding and this ranking is therefore incorrect.

10.34 As long ago as September 2014 we submitted to the Council a report in response to the Draft Guildford Borough Local Plan: Strategy and Sites consultation, which demonstrated that Flood Zones 2 and 3 only affected the north western segment of the site and contained a plan indicating the greater part of the site which was not so affected. This report with all of the relevant information about flooding, is attached again at Appendix Five and demonstrates that the entire development can be delivered without encroaching into any areas liable to flooding.

10.35 On the basis that the entire development can be delivered without encroaching into any areas liable to flooding, this site should rightly score a green ranking against flooding and not a red ranking.

**Previously developed land**

10.36 In addition we have also submitted a ‘Previously Developed Status of Land’ report in February 2016 which concludes that there “is no evidence of the site ever being agricultural use in recent times” and provides significant evidence “to support the case for the site being Previously Developed Land.”

10.37 Based on the classifications set out in Table C and the accompanying spreadsheet it would appear that the Council has failed to take these representations and previously submitted information into account and no assessment of this evidence appears to have taken place.

10.38 On the basis that evidence has been presented to the Council demonstrating the previously developed nature of the site, this category should also score a green ranking and not a red ranking.

**Site Comparison**

10.39 In order to directly compare sites, the SA scoring must be compared by assigning a quantitative basis for the colour coding. If the same approach utilised by the Council to compare Options 1 – 8 in Table 7.1 of the SA is adopted then a
green ranking is assigned a score of one, an amber ranking is assigned a score of two and a red ranking is assigned a score of three.

10.40 Sites with the greatest number of red rankings across the 21 categories each site is assessed against will therefore have the highest total score whilst sites with the greatest number of green rankings will have the lowest total score.

10.41 On the basis of the incorrect red ranking attributed to flood risk and previously developed land in the site options appraisal then the total score for ‘Land north of Send Marsh’ is 41. However once these errors are corrected and the flood risk and previously developed land categories are correctly assigned a green ranking and assigned a score of 1 then the total score for ‘Land north of Send Marsh’ is significantly reduced to 37.

10.42 If the scoring method outlined above is also applied to all sites within the SA, then ‘Land north of Send Marsh’ (i.e. our client’s site) ranks joint second out of all of the sites assessed in Send Marsh for housing use with a total of 11 green rankings.

10.43 It is therefore apparent that ‘Land north of Send Marsh’ performs strongly when assessed against the 21 categories the Council have opted to appraise all reasonable site options against.

10.44 In order to minimise any potential for legal challenge to the Local Plan process, it is recommended that the SA is updated to take the above points into consideration and demonstrate how all reasonable alternatives have been considered in order to ensure the soundness of the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/4313  Respondent: 15256225 / Boyer (Michelle Thomson)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

12.1 These representations have been prepared in response to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites June 2016. This report has taken into account earlier representations, as relevant, made to the Council in response to consultation on the emerging Local Plan and its supporting evidence base.

12.2 Our client supports the aspirations of the Local Plan in terms of Guildford’s commitment to progress their Local Plan demonstrated through progressing to a Regulation 19 consultation

- Guildford’s commitment to meet their full objectively assessed housing need
- The acknowledgement that Green Belt releases are required to achieve this
- The approach to the settlement hierarchy
- The conclusion that Send Marsh is a ‘large village’ which is considered to be a sustainable location and appropriate to direct new development which represents a ‘proportionate extension’
12.3 It is however apparent that there are a number of outstanding issues which need to be addressed in order for the Plan to be found sound at examination. These points are highlighted below.

Delivery of sites

12.4 In particular these representations have identified that the Local Plan relies heavily on strategic sites to deliver the required housing during the plan period which makes the plan vulnerable. This is particularly the case given that six sites are being relied upon to deliver 66% of the overall OAN requirement in the late stages of the plan period.

12.5 The Plan should demonstrate a 5 year housing land supply at the point of adoption. Guildford Council’s proposed position will be that they will not be able to do so and consequently the plan is unlikely to be found sound on this basis without modification.

12.6 In order to ensure that the Local Plan is found sound at Examination we would therefore strongly recommend that the Council revises its housing trajectory to incorporate a greater number of smaller sites which can deliver in the earlier stages of the plan period thereby ensuring that the housing trajectory is robust and achievable.

12.7 Our client’s site could deliver both market and affordable housing within the first five years of the plan period to contribute to meeting the extensive needs which exist within this area as well as within the Borough as a whole at the start of the plan period.

Approach regarding Green Belt releases

12.8 The Green Belt releases to enable the Council to achieve their OAN are based on a Green Belt and Countryside Study. The Green Belt and Countryside Study prepared by the Council has significant limitations. These in summary relate to 1) The usage of a binary system to assess a site’s contribution to Green Belt purposes (with parcels scoring either a 1 or 0) without providing any quantification on the degree of that contribution and 2) as a result of the first limitation there is not the ability for any detailed form of ranking.

12.9 Boyer has therefore carried out an independent assessment of PDAs and MPDAs around Send/ Send Marsh. This assessment concludes that the site, at best, makes only a very limited contribution to the purposes of including land within the Green Belt.

12.10 In addition it has been demonstrated that the current Green Belt inset boundary as proposed fails to adhere to the NPPF in that it does not follow physical features that are readily recognisable and likely to be permanent (Paragraph 85). This appears to be as a result of incorrect assumptions made about the location of a tree belt and/or fence line to the west of the Danesfield.

12.11 The Green Belt boundary in this location should therefore be adjusted to remove our entire site from the Green Belt in order to ensure the soundness of the plan and policy P2: Green Belt.

Approach regarding Previously Developed Land

12.12 In the absence of any evidence base being produced by Guildford Borough Council, specific and detailed evidence demonstrating the case for concluding that the site at Send Marsh should be considered to be previously developed land (PDL) was submitted to Guildford Borough Council in February 2016.

12.13 The key points taken from the conclusion within this report set out that the report addressing the ‘Previously Developed Status of Land’ has been prepared, ‘specifically to correct the description of the site as pasture land.’ (And additionally as set out at paragraph 1.5 of the report in response to the fact that, ‘The Local Planning Authority now has a requirement to produce and maintain a register of previously developed land within its administrative area.’)

12.14 It is highlighted that, ‘There is no evidence of the site ever being in agricultural use in recent times. ‘It is considered that because of the history of previous uses of the site that it is to be regarded as Previously Developed Land, which increases its suitability for residential development. Other than the existing Green Belt designation, there are no other overriding constraints to the site which would prevent its early release for development.’ It is in the hands of a house builder and therefore it can be delivered without delay.
Settlement boundary of Send Marsh

12.15 Land at Polesden Lane and Send Marsh Road, Send Marsh is bordered on three sides by established housing and defensible boundaries including a footpath to the west (footpath number 46) and a second footpath to the north of the site (footpath number 45). It therefore lies within the effective framework of Send Marsh Village although it does not fall within the proposed settlement boundary as defined by the draft Local Plan.

12.16 As demonstrated in these representations Land at Polesden Lane and Send Marsh Road, Send Marsh is a largely unconstrained site in a sustainable location which is available immediately for development.

Incorrect Assumptions in the Sustainability Appraisal

12.17 Although the spreadsheet which accompanies Table C of Appendix IV of the Sustainability Appraisal was not made available for the full six week consultation period an initial assessment of this appraisal highlights significant inaccuracies in the information utilised to assess our client’s site.

12.18 In particular ‘Land north of Send Marsh’ is incorrectly identified as being located within Flood Zone 3 and not being previously developed land. The site is therefore given a red ranking against these categories in the site options appraisal.

12.19 The Council has previously been presented with evidence to demonstrate that the site is not at risk of flooding and significant evidence “to support the case for the site being Previously Developed Land.”

12.20 Based on the classifications set out in Table C and the accompanying spreadsheet it would appear that the Council has failed to take these representations and previously submitted information into account and no assessment of this evidence appears to have taken place.

12.21 Using accurate information to assess our client’s site, ‘Land north of Send Marsh’ ranks joint second out of all of the sites assessed in Send Marsh for housing use with a total of 11 green rankings.

12.22 It is therefore apparent that ‘Land north of Send Marsh’ performs strongly when assessed against the 21 categories that the Council have opted to appraise all reasonable site options against.

12.23 In order to minimise any potential for legal challenge to the Local Plan process, the SA should therefore be updated to take the above points into consideration and demonstrate how all reasonable alternatives have been considered in order to ensure the soundness of the plan.

Conclusion

12.24 The application of the approach in our Green Belt Assessment and evidence presented in our previously developed land report demonstrates that inter alia on the basis the site would provide for around 70 dwellings that our site should therefore be allocated for residential development. This approach would ensure the soundness of the plan and in particular policies S2: Borough Wide Strategy, P2: Green Belt and D4: Development in urban areas and inset villages.
Garlick’s Arch

1.27 Garlick’s Arch at 400 homes, represents an approximate increase of 56% on the total household numbers in Send Marsh / Burntcommon. This can only be considered to be ‘substantial growth’. The size of the allocated site and the number of new dwellings proposed cannot be considered to represent a ‘proportionate extension’ of the village but rather representative of substantial growth.

1.28 Policy A43 and the allocation of ‘Land at Garlick’s Arch, Send Marsh, Burnt Common and Ripley’ is therefore contrary to the settlement hierarchy established in the evidence base for the emerging Local Plan and its inclusion in the Local Plan is therefore considered to be unsound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Overview

9.1 This section provides an overview and assessment of the relevant allocated sites which are currently set out in the Proposed Submission Local Plan: Strategy and Sites June 2016.

9.2 In total the Proposed Submission Local Plan: Strategy and Sites June 2016 sets out a total of 37 allocated sites which relate to housing (C3) or mixed use redevelopment.

9.3 As set out in Section 4 of these representations the proposed allocations for housing delivery within the Borough rely heavily on strategic sites which are intended to deliver the majority of the overall OAN requirement.

9.4 Key sites also allocated within Send Marsh include site allocation numbers A43 and A43a which relate to ‘Land at Garlicks Arch, Send Marsh, Burnt Common and Ripley’ and ‘Land for new north facing slip roads to/from A3 at Send Marsh / Burnt Common’.

9.5 Further consideration of these sites are set out below

Land at Garlick’s Arch, Send Marsh, Burnt Common and Ripley

9.6 ‘Land at Garlick’s Arch, Send Marsh, Burnt Common and Ripley’ is allocated for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) as set out in Policy A43 of the Proposed Submission Local Plan: Strategy and Sites June 2016.
9.7 The site is approximately 30 ha in size and is stated to have an existing use of paddock and builder’s yard. This includes Grade 2 agricultural land as set out in the spreadsheet which accompanies Table C – Site Options Appraisal of Appendix IV of the Sustainability Appraisal (SA).

9.8 It is noted that this ‘site’ was not previously included in the Regulation 18 consultation for the emerging Local Plan and has been included at a very late stage in the development process of the Local Plan. The draft of the plan presented to the Executive Advisory Board on 13th April 2016 did not include the Garlick’s Arch. By the time the plan was considered at the Extraordinary Council meeting on 24th May 2016, it had been added.

9.9 ‘Land around Burnt Common Warehouse’ which was the previously allocated strategic site in the Regulation 18 consultation has now been removed from the proposed allocations.

9.10 Section 9 of these representations considers the performance of ‘Land at Garlick’s Arch, Send Marsh, Burnt Common and Ripley’ in the Sustainability Appraisal. This illustrates that the site performs poorly when compared to the other sites considered for Send and Send Marsh against several criteria including flood risk, distance from nearby amenities including schools, railway stations and recreational facilities. In addition the site is also categorised in the Sustainability Appraisal as high quality agricultural land and not previously developed land which also contributes to its poor performance against the appraisal criteria.

9.11 Send Marsh/Burntcommon is designated as a ‘large village’ which is defined in the ‘Guildford Borough Settlement Hierarchy’ as being “unsuitable for substantial growth but capable of accommodating a proportionate extension.”

9.12 The office for national statistics breaks down the 2011 Census records into various neighbourhood areas. The relevant areas in relation to our site are:

• Neighbourhood Area Guildford 001D – Burnt Common
• Neighbourhood Area Guildford 001E – Send Marsh.

9.13 The statistics for these areas show that there are 456 households in Send Marsh and 505 in Burnt Common. Based on the mid 2011 population estimates this gives an average of 2.68 people per household across both neighbourhood areas.

9.14 Using the Council’s population figure of 1,931 from 2011 for Send Marsh / Burntcommon and applying this 2.68 average then there are estimated to be approximately 720 households in Send Marsh / Burntcommon.

9.15 Garlick’s Arch at 400 homes therefore, represents an approximate increase of 56% on the total household numbers in Send Marsh / Burntcommon. This can only be considered to be ‘substantial growth’. The size of the allocated site and the number of new dwellings proposed cannot be considered to represent a ‘proportionate extension’ of the village but rather representative of substantial growth.

9.16 Policy A43 and the allocation of ‘Land at Garlick’s Arch, Send Marsh, Burnt Common and Ripley’ is therefore contrary to the settlement hierarchy established in the evidence base for the emerging Local Plan and its inclusion in the Local Plan is therefore considered to be unsound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land for new north facing slip roads to/from A3 at Send Marsh / Burnt Common’.

9.17 ‘Land for new north facing slip roads to/from A3 at Send Marsh / Burnt Common’ is allocated under Policy A43a in the Proposed Submission Local Plan: Strategy and Sites June 2016 for the delivery of a new northbound on-slip and a new southbound off-slip to and from the A3 trunk road to and from the A247 Clandon Road.

9.18 As with Policy A43 this site was not previously included in the Regulation 18 consultation for the emerging Local Plan and has been included at a very late stage in the development process of the Local Plan. As with the Garlick’s Arch site above, the draft of the plan presented to the Executive Advisory Board on 13th April 2016 did not include these slip roads. By the time the plan was considered at the Extraordinary Council meeting on 24th May 2016, it had been added.

9.19 As a consequence of this late inclusion of the site within the Proposed Submission Local Plan: Strategy and Sites June 2016 the Council have failed to comply with the requirements of the National Planning Practice Guidance (NPPG) in relation to the preparation of the sustainability appraisal.

9.20 Paragraph 005 (Reference ID 11-005-20140306) of the ‘Strategic Environmental Assessment and Sustainability Assessment’ section of the NPPG sets out the requirement for a sustainability appraisal to be produced during the preparation of a Local Plan.

9.21 The NPPG is clear that the “local planning authority must carry out an appraisal of the sustainability of the proposals.” This is designed to “help the authority to assess how the plan will contribute to the achievement of sustainable development” and “applies to any of the documents that can form part of a Local Plan, including core strategies, site allocation documents and area action plans.”

9.22 The land allocated as part of Policy A43a of the Proposed Submission Local Plan: Strategy and Sites June 2016 is not included or assessed as part of the Sustainability Appraisal which has been prepared in support of the emerging Local Plan.

9.23 The Council therefore cannot demonstrate that they have thoroughly or rigorously assessed the sustainability of the proposals contained within the Proposed Submission Local Plan: Strategy and Sites June 2016 and cannot fully determine how the plan will contribute to the achievement of sustainable development in the absence of this assessment.

9.24 In the absence of a Sustainability Appraisal for this site, the inclusion of Policy A43a within the Proposed Submission Local Plan: Strategy and Sites June 2016 cannot be considered to be justified or sound.

9.25 Furthermore, the site at Garlick’s Arch and associated slip roads (site references A43 and A43a) fall under several ownerships, increasing the difficulties in bringing forward this site, further emphasising the likelihood of delays in the delivery of these sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<tr>
<td><strong>Answer (if comment is on questions 1-7 of the questionnaire): ()</strong></td>
</tr>
</tbody>
</table>

11.16 Policy D1 of the Proposed Submission Local Plan requires “all new developments to achieve high quality design and enhance the environment in which they are set.”

11.17 Whilst the requirement for ‘high quality design’ by the Council is supported and is in accordance with Paragraph 56 of the NPPF which “attaches great importance to the design of the built environment” (Paragraph 56) it is noted that the NPPF states that “it is important to plan positively for the achievement of high quality inclusive design” (Paragraph 57).

11.18 The Council is therefore seeking to apply a much greater requirement on new development in respect of design than is set out in the NPPF by requiring proposals to not only “achieve high quality design” but also “enhance the environment in which they are set”. This requirement is more closely aligned to the protection given to historic environments which as set out in Policy D3 of the Proposed Submission Local Plan should be ‘conserved and enhanced’.

11.19 No suitable justification has been provided by the Council to support this approach and as such the wording of Policy D1 should be revised to align with the requirements of the NPPF and not afford all development sites the same level of status as heritage assets, which are dealt with in Policy D3.

11.20 As set out previously in these representations whilst the insertion of ‘Policy D4: Development in urban areas and inset villages’ is supported it is considered that the wording of the Policy should be revised to avoid unnecessary duplication with other policies in the Local Plan.

11.21 In particular Policy D4 requires new development to “conserve locally and nationally important heritage assets and conserve and enhance their settings” however this matter is addressed explicitly in ‘Policy D3: Historic environment’ which relates to all developments not just those in urban areas and inset villages.

11.22 Policy D4 also requires new development to have “no unacceptable effect on the amenities enjoyed by the occupants of buildings in terms of privacy, noise, vibration, pollution, dust, smell and access to sunlight and daylight.”

11.23 Whilst there is no objection raised to the requirements of this text from Policy D4 it is noted that Policy D4 is explicitly stated to relate to ‘urban areas and inset villages’. This amenity requirement should be applicable to all forms of development within the Borough and as such should be incorporated into a different policy such as Policy D1.

11.24 The additional repetition of matters addressed elsewhere in the policies of the Local Plan is unnecessary and unjustified. The policies in the Proposed Submission Local Plan should therefore be revised accordingly.

1.21 As set out in draft Policy P2 of the Proposed Submission Local Plan: Strategy and Sites June 2016 the following villages are now proposed to be inset from the Green Belt: Chilworth, East Horsley, Effingham, Fairlands, Flexford, Jacobs Well, Normandy, Peasmarsh, Ripley, Send, Send Marsh/Burnt Common, Shalford, West Horsley and Wood Street Village.

1.22 The approach of the Council to respond to the changes in national policy in respect of the Green Belt designation and to protect these areas using development management policies in accordance with the NPPF are supported.

1.23 The addition of ‘Policy D4: Development in urban areas and inset villages’ in the latest draft of the Local Plan which seeks to “promote the efficient use of land” whilst ensuring that “this does not negatively impact upon the quality of the local environment” is also supported.

1.24 Land at Polesden Lane and Send Marsh Road, Send Marsh is bordered on three sides by established housing and defensible boundaries including a footpath to the west (footpath number 46) and a second footpath to the north of the site (footpath number 45). It therefore lies within the effective framework of Send Marsh Village although it does not fall within the proposed settlement boundary as defined by the draft Local Plan.

1.25 Given the evidence presented in previous sections relating specifically to our client’s site at Polesden Lane, Send Marsh with regards to its contribution to the Green Belt and its previously developed land status, the location of the settlement boundary should be re-drawn around the entire site.

1.26 The application of the approach in our Green Belt Assessment and evidence presented in our previously developed land report demonstrates that inter alia on the basis the site would provide for more than 25 dwellings that our site should therefore be allocated for residential development. This approach would ensure the soundness of the plan and in particular policies S2: Borough Wide Strategy, P2: Green Belt and D4: Development in urban areas and inset villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

11.3 Policy H2 of the Proposed Submission Local Plan states that affordable housing will be provided:

“on sites providing five or more homes, or sites of 0.17 ha or more regardless of the number of homes. At least 40 per cent of the homes on these sites must be affordable homes; and On development providing solely affordable housing either on public sector-owned land or developments by registered providers”

11.4 This is contrary to the recent national guidance published in the National Planning Practice Guidance which states that “contributions should not be sought from development of 10 units or less, and which have a maximum combined gross floorspace of no more than 1000 sqm” (Paragraph 31; Reference ID: 23b-031-20160519).

11.5 Policy H2 does not therefore comply with current planning guidance and the Council has failed to provide any justification to support this approach.
11.6 In addition no justification has been provided for the 0.17ha threshold which the Council has set out in this policy and it is noted that the ‘Guildford Borough Council Local Plan Viability & Affordable Housing Study’ which is a key evidence document in relation to this policy was produced in December 2014 prior to the production of the ‘West Surrey Strategic Housing Market Assessment’ in September 2015.

11.7 For the Local Plan to be found sound at examination the Council should therefore demonstrate how this policy has taken into account the latest SHMA and NPPG Guidance.

11.8 The wording of Policy H2 should also be revised. The proposed wording set out in the Proposed Submission Local Plan states that “The tenure and size of affordable homes provided on each qualifying site must contribute, to the Council’s satisfaction, towards meeting the mix of affordable housing needs identified in the Strategic Housing Market Assessment 2015, or subsequent affordable housing needs evidence.”

11.9 The term ‘to the Council’s satisfaction’ is not a technically defined term and introduces ambiguity into the assessment and determination of future planning applications. The wording of Policy H2 should therefore be revised to remove this phrase and ensure the policy is justified.

11.10 Further consideration should also be given to the wording of the supporting text which relates to Policy H2. In particular paragraph 4.2.39 states that developments will be expected “to provide the required amount of affordable housing in accordance with this policy and Guildford Planning Contributions Supplementary Planning Document (SPD).” However paragraph 4.2.37 states that the Planning Contributions Supplementary Planning Document 2011 will be revised.

11.11 The Council should therefore demonstrate how this policy will be implemented in the absence of an updated Planning Contributions Supplementary Planning Document and set out the proposed timetable for these works to ensure the soundness of the plan.

11.12 Given that the Council have not yet adopted a Community Infrastructure Levy (CIL) Charging Schedule for the Borough the Council should also demonstrate how the affordable housing requirement set out in Policy H2 takes into account this potential additional cost to development.

11.13 It is noted that the ‘Preliminary Draft Charging Schedule’ for the Borough was consulted on between January and March 2015 after the production of the ‘Guildford Borough Council Local Plan Viability & Affordable Housing Study’.

11.14 The Council should therefore justify this approach to demonstrate that the affordable housing requirements set out in Policy H2 are underpinned by a robust viability appraisal across the Borough.

11.15 Policy H2 also fails to make any reference to ‘Starter Homes’ which it is considered should be a consideration of the Proposed Local Plan given the timetable for examination and adoption. To ensure the soundness of the plan it is recommended that reference to ‘Starter Homes’ is made to ensure the Local Plan is not out of date in policy terms upon adoption.

11.25 Policy I1 sets out that to support the delivery of the Local Plan “infrastructure needed to support development should be provided and available when first needed to serve the occupants and users of the development.”

11.26 In addition the Policy states that “the key infrastructure to support the delivery of this Plan is provided in the Infrastructure Schedule at Appendix C. The Local Plan also includes land allocated for infrastructure.”

11.27 The Infrastructure Schedule set out in Appendix C lists the two slips roads allocated under Policy A43a of the Proposed Submission Local Plan under references SRN9 and SRN10.

11.28 In accordance with the wording of Policy I1 these are therefore considered to represent ‘key infrastructure’ which is required to support the delivery of the development identified in the Local Plan.

11.29 Our transport consultants Odyssey Markides have confirmed however that it is surprising “that the A3 slip roads required under ‘Site A43a’ are not directly linked to the delivery of ‘Site A43’ (Garlick’s Arch)…as it is considered that both are reliant upon each other for their requisite delivery; this is not apparent from either site’s policy or their timescales for delivery.”

11.30 As identified in Section 8 of these representations the land allocated under Policy A43a has not been included within the Council’s sustainability appraisal for the Local Plan. As such the inclusion of this site within the Local Plan is considered to result in the Local Plan being unable to demonstrate that it is sound for the purposes of examination and adoption.

11.31 Policy A43a should therefore be removed from the Local Plan and Policy I1 and Appendix C revised accordingly to take into account the removal of this site.

11.32 In contrast our transport consultants Odyssey Markides have confirmed that “the scale of development earmarked for the Polesden Lane site, at up to just 70 dwellings, cannot be considered to lead to a ‘severe’ traffic impact as per the NPPF under any scenario. Indeed, it can be delivered easily with simple connections to the existing highway network rather than being reliant upon significant works to be delivered over a long time period over which there may not be the means to easily control and enable their delivery.”

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Green Belt Assessment

1.10 Significant limitations in Guildford’s approach to their Green Belt Assessment have been identified. Given the need for the evidence base to be sound, Boyer has carried out an independent assessment of the PDAs and MPDAs around Send and Send Marsh as identified in the Council’s GBCS to supplement the GBCS based on guidance published by the Planning Advisory Service (PAS) and the approach of other Local Planning Authorities. This was provided to Guildford Council on 11th March 2016.

1.11 The full report is included at Appendix Three to these representations (which has been updated to refer to the site allocations within the Proposed Submission Local Plan.)

1.12 First, the GBCS considers that a land parcel either contributes or not to a specific Green Belt purpose (i.e. with the parcel scoring either 1 or 0) without providing any quantification or the degree of that contribution (for example the extent to which a land parcel may make towards a particular Green Belt purpose).

1.13 Second, as a result of this first limitation, the methodology of the GBCS does not allow for any detailed form of ranking to assess the relative contribution each land parcel makes towards the purposes of including land within the Green Belt. The GBCS did not therefore carry out any form of comparative assessment between the identified PDAs/MDPAs.

1.14 Notwithstanding this, the GBCS does identify a number of small PDAs that are considered not to significantly compromise the land parcel score as a whole. These have included sites that have subsequently been proposed as site allocations or safeguarded sites within the previous draft Local Plan (2014) (site references 74-76). Our client’s site was previously identified as safeguarded land (site reference 120).

1.15 Boyer has adopted a scoring methodology to address these issues and quantify the contribution made by each PDA/MPDA towards the purposes of including land within the Green Belt. The aim is to build upon the methodology of the GBCS by enabling a comparison between potential sites already identified through the Local Plan process.

1.16 This approach, together with the sustainability methodology adopted within the GBCS, has been applied to the 11 PDAs/MPDAs surrounding Send, Send Marsh & Burntcommon and Ripley.

1.17 This assessment concludes that the site, at best, makes only a very limited contribution to the purposes of including land within the Green Belt. When compared with the PDAs/MPDAs assessed, it is ranked joint top (i.e. contributes least to the Green Belt) along with land south of Burntcommon. It is considered therefore that its release from the Green Belt would not have any adverse impact on the purpose and function of the Green Belt in this part of the Borough and as such there are no overriding constraints to prevent early delivery of the site.

Previously Developed Land

1.18 The broad approach to removing major previously developed sites from the Green Belt accords with national planning policy and is supported. However, the evidence base to support Guildford’s assumptions about the sites considered to be previously developed appears to be somewhat lacking. There are no details as to the methodology or reasoned justification that has been applied to demonstrate that a site should be considered as previously developed land.

1.19 In the absence of any evidence base being produced by Guildford Borough Council, specific and detailed evidence demonstrating the case for concluding that the site at Send Marsh should be considered to be previously developed land (PDL) was submitted to Guildford Borough Council in February 2016. This report is entitled, ‘Land at Polesden Lane and Send Marsh Road, Send Marsh, Previously Developed Status of Land’ and is attached again at Appendix Four to this representation.

1.20 It is therefore of fundamental importance that the Council demonstrates that the proposed approach with regards to both Green Belt and subsequently previously developed land in the Green Belt is supported by a robust evidence base in order to demonstrate it has appropriately considered all reasonable alternatives to ensure the plan and policies P2: ‘Green Belt’ and D4: ‘Development in urban areas and inset villages’ are sound.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3.10 Paragraph 79 of the NPPF confirms that, ‘The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.’

3.11 Paragraph 80 then sets out the five purposes of the Green Belt i.e.

- ‘To check the unrestricted sprawl of large built-up areas;
- To prevent neighbouring towns merging into one another;
- To assist in safeguarding the countryside from encroachment;
- To preserve the setting and special character of historic towns; and
- To assist in urban regeneration, by encouraging the recycling of derelict and other urban land.’

3.12 Paragraph 83 of the NPPF refers to the Green Belt boundaries and sets out that, ‘Local planning authorities with Green Belts in their area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.’

3.13 Paragraph 84 then goes onto say that, ‘When drawing up or reviewing Green Belt boundaries local planning authorities should take account of the need to promote sustainable patterns of development. They should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary.’

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Background to Green Belt position

6.1 Page 22 of Guildford’s Corporate Plan 2015 – 2020 identifies the following action relating to the Green Belt, ‘Protect sensitive greenbelt land and Areas of Outstanding Natural Beauty and designate new SANGS (Suitable Alternative Natural Green Spaces)’.

6.2 The Green Belt and Countryside Study (GBCS) produced by Guildford Borough Council, consisting of 6 volumes (and including the Volume II addendum and re-issue of Volume IV) is a key piece of evidence informing the strategy of this emerging Local Plan. As part of the GBCS, the evidence base now includes a Green Belt sensitivity map, which colour codes parcels of the Green Belt into green, yellow and red, depending on the parcels’ contribution to the green belt, with green meaning a lesser contribution and red meaning the greatest contribution.

Proposed approach

6.3 Paragraph 4.4 of the officer report to the Extraordinary Council meeting confirms that, ‘Alongside the detailed considerations carried out as part of the Sustainability Appraisal process, the sensitivity map has been used as a further targeted constraint in arriving at the amended proposal sites…’

6.4 The general approach to the release of land from the Green Belt is supported i.e. an assessment of the existing Green Belt has been undertaken, based on the division of the existing Green Belt into parcels and an assessment made as to the contribution of each of these parcels against the five purposes of the Green Belt as set out in the NPPF.

6.5 It is however critical that this assessment is based on a sound evidence base. As background, the GBCS identified a number of Potential Development Areas (PDAs) and Major Potential Development Areas (MPDAs) for assessment against the purposes of including land within the Green Belt.

6.6 Significant limitations in Guildford’s approach to their Green Belt Assessment have been identified. Given the need for the evidence base to be sound, Boyer has carried out an independent assessment of the PDAs and MPDAs around Send and Send Marsh as identified in the Council’s GBCS to supplement the GBCS based on guidance published by the Planning Advisory Service (PAS) and the approach of other Local Planning Authorities. This was provided to Guildford Council on 11th March 2016.

6.7 The full report is included at Appendix Three to these representations (which has been updated to refer to the site allocations within the Proposed Submission Local Plan. However, it is clear that the GBCS has significant limitations that have been addressed in the report with a view to assisting the Council and strengthening the Local Plan evidence base.

6.8 First, the GBCS considers that a land parcel either contributes or not to a specific Green Belt purpose (i.e. with the parcel scoring either 1 or 0) without providing any quantification or the degree of that contribution (for example the extent to which a land parcel may make towards a particular Green Belt purpose).

6.9 Second, as a result of this first limitation, the methodology of the GBCS does not allow for any detailed form of ranking to assess the relative contribution each land parcel makes towards the purposes of including land within the Green Belt. The GBCS did not therefore carry out any form of comparative assessment between the identified PDAs/MDPAs.

6.10 Notwithstanding this, the GBCS does identify a number of small PDAs that are considered not to significantly compromise the land parcel score as a whole. These have included sites that have subsequently been proposed as site allocations or safeguarded sites within the previous draft Local Plan (2014) (site references 74-76). Our client’s site was previously identified as safeguarded land (site reference 120).
6.11 Boyer has adopted a scoring methodology to address these issues and quantify the contribution made by each PDA/MPDA towards the purposes of including land within the Green Belt. The aim is to build upon the methodology of the GBCS by enabling a comparison between potential sites already identified through the Local Plan process.

6.12 This approach, together with the sustainability methodology adopted within the GBCS, has been applied to the 11 PDAs/MPDAs surrounding Send, Send Marsh & Burntcommon and Ripley.

6.13 This assessment concludes that the site, at best, makes only a very limited contribution to the purposes of including land within the Green Belt. When compared with the PDAs/MPDAs assessed, it is ranked joint top (i.e. contributes least to the Green Belt) along with land south of Burntcommon. It is considered therefore that its release from the Green Belt would not have any adverse impact on the purpose and function of the Green Belt in this part of the Borough.

6.14 The site is adjacent to the village settlement boundary to the north, east and south and is therefore largely within the existing village envelope. The smaller part of the northern boundary, and the western boundary, adjoin fields but these boundaries comprise of strong and mature landscaping.

6.15 Overall, the site is bordered by established housing and defensible boundaries. It therefore has an enclosed character that is visually contained and separate from the wider countryside beyond. Furthermore, the Site’s western boundary does not extend much beyond the western edge of the existing settlement and does not therefore fall clearly within any identifiable gap between Send and Send Marsh.

6.16 The landscape character assessment by FLA (Appendix 5 of our Green Belt Assessment) concludes as follows:

6.17 “The previous land use for Kennels and other sui-generis uses suggest that the areas landscape character relates more to the village fringe than that of the more open land to the west. Therefore, I consider that this is an in-fill site which relates well to the historic field pattern and although the area does lie on the western edge of the village of Send Marsh, it does not form part of the open land to the west which is part of the gap between the two village settlements.”

6.18 The site is easily accessible to a range of facilities within Send and Send Marsh including The Village Medical Centre, St Bede’s Junior School, The Saddlers public house and Send Village Hall. In these terms it compares favourably with other PDAs/MPDAs, especially those surrounding Send Marsh & Burntcommon and Ripley. This combination of good access to facilities and a high degree of separation and containment from adjoining countryside means that the site represents a logical extension to Send Marsh.

6.19 In light of the characteristics of the site and the Council’s recognition that there is a need for Green Belt release to meet the proposed housing target, we consider that the site should be removed from the Green Belt and allocated for new residential development through the emerging Local Plan.

Comparative Assessment

6.20 The table below identifies the eight PDAs at Send Marsh, Send and Ripley as defined within the GBCS. However, this table provides Boyer’s assessment of each site against Green Belt purposes and, using the Boyer methodology, allows their relative contribution against each purpose to be assessed and for the sites to be ranked accordingly.

<see attachments for table 1>

6.21 As stated above, the site is ranked joint top (i.e. contributes least to the Green Belt) along with land south of Burntcommon. We conclude that its release from the Green Belt would not have any adverse impact on the purpose of the Green Belt in this part of the Borough.

6.22 The attached Green Belt assessment highlights the significant limitations within the Council’s GBCS in terms of the methodology used. Our attached Green Belt assessment also adopts a more refined approach to the review of the Green Belt which is considered necessary to the make both the assessment and the emerging Local Plan sound.

6.23 Whilst the principal of illustrating how areas meet the Green Belt purposes is welcomed, i.e. through the Green Belt Sensitivity Map, the background information informing this must be robust.
6.24 Our Green Belt Assessment has clearly demonstrated that our site, ‘at best, makes only a very limited contribution to the purposes of including land within the Green Belt.’ It is therefore clear that in order to ensure the soundness of the plan, the evidence supporting the release of Green Belt land and subsequently informing the Green Belt sensitivity map must be revisited and the study updated to take into account the recommendations regarding the revised methodology informing the Council’s Green Belt Assessment.

6.25 Policy P2: Green Belt, sets out that, ‘We will continue to protect the Metropolitan Green Belt, as shown on the proposals map, against inappropriate development…’ As set out in paragraph 85 of the NPPF, ‘When defining boundaries, local planning authorities should…not include land which it is unnecessary to keep permanently open…’

6.26 The inadequacies of the Council’s Green Belt Assessment, as identified within our Green Belt Assessment result in the approach to release of land from the Green Belt being fundamentally flawed and not based on a sound evidence base.

6.27 By revisiting the evidence base to justify the release of land within the Green Belt, as detailed above and adopting the approach as advised which accords with both PAS guidance and best practice, it is clear as robustly demonstrated by our Green Belt Assessment, inter alia, that our site should be removed from the Green Belt.

6.28 In order to ensure the soundness of the plan, it is therefore recommended that the methodology is updated in accordance with our Green Belt Assessment and in accordance with this updated evidence, the Proposals Map illustrating the Green Belt boundaries is updated to reflect these findings.

6.29 In addition to the above Green Belt boundary reviews, there are also some more refined adjustments proposed to the Green Belt boundaries. Paragraph 6.9 of the Guildford Borough Green Belt and Countryside Study summary document, dated January 2013 sets out that,

‘There are some instances where the proposed Green Belt boundaries of a village, as set out in Volume IV, might appear to go beyond the existing built up or settlement boundary, suggesting that a PDA has been assumed to be included. This is not the case. The reason for the proposed Green Belt boundaries sometimes not directly following the built up part of a village, is in order to adhere to the NPPF guidance on such boundary lines. This requires at paragraph 85 that boundaries follow physical features that are readily recognisable and likely to be permanent. As explained at 5.6 above, the inclusion of land within a village boundary that is inset from the Green Belt does not automatically imply that development would be acceptable, with other relevant planning policies still applying to any development proposals.’

6.30 The revised Green Belt boundary around the site at Polesden Lane, Send Marsh does not accord with the above methodology.

6.31 Volume IV of the Greenbelt and Countryside Study assesses the potential for insetting villages across Guildford Borough Council which are currently ‘washed over’ by the Green Belt designation.

6.32 The assessment maps relating to Send Marsh / Burntcommon identify a ‘fence line and treebelt located to the west of Danesfield and to the north of Send Barns Road’. This is identified by Reference 3M.

6.33 Contrary to this statement there is no fence line or tree belt which runs in a diagonal north-west to south east direction across the site.

6.34 The proposed insetting boundary for the Green Belt in this location does not therefore adhere to the NPPF guidance on these boundaries and fails to follow a physical feature which is recognisable or permanent.

6.35 To ensure it is consistent with this approach and follows boundaries that are ‘readily recognisable’, the entire site should therefore be removed from the Green Belt. This approach would also accord with the assessment and conclusions in the Green Belt Assessment carried out by Boyer.

6.36 It is therefore recommended that the Green Belt boundary in this location is adjusted to remove the entire site from the Green Belt and follow physical, recognisable and permanent features as set out in the NPPF. These alterations would help ensure the soundness of the plan and the soundness of policy P2: Green Belt.

Safeguarding land
6.37 Paragraph 4.64 to 4.66 of the Council’s Topic Paper: Green Belt and the Countryside June 2016 sets out the following with regards to safeguarded land:

‘The NPPF is clear that when amending Green Belt boundaries we should have regard to their intended permanence so that they are able to ensure beyond the plan period. In doing so, we should safeguard sites in order to meet longer-term development needs. Safeguarded land is therefore safeguarded for future development, not from development.’

The draft Local Plan (2014) included approximately 200ha of safeguarded land around some of our villages and at one traveller site. As part of reconsidering our spatial strategy, we have looked again at the issue of safeguarding. The NPPF states at paragraph 85 (bullet 3):

‘where necessary, identify in their plans areas of ‘safeguarded land’ between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period’ (emphasis added)

The NPPF is therefore explicit that safeguarded land should be on the edge of the urban area. This is consistent with the fundamental aim of Green Belt policy, which is to prevent urban sprawl. We have therefore considered the extent to which safeguarded land could be identified around Guildford urban area. Given the significant constraints that exist to the north and south of the borough (Thames Basin Heaths Special Protection Area and Surrey Hills Area of Outstanding Natural Beauty), we are left with a ribbon across the central part of the borough that remains potentially suitable for development.

6.38 Paragraph 4.67 then sets out that, ‘Safeguarded land is required in order to ensure that, once amended, Green Belt boundaries need not be reviewed at the end of every plan period. It therefore adds certainty and is consistent with their intended permanence. However, given the nature of our borough and the extent to which constraints limit development opportunities, we no longer consider that safeguarding is appropriate for Guildford. In order to be consistent with the NPPF, any safeguarded land would need to be on the edge of Guildford urban area and would need to be of a sufficient scale to negate the need for a Green Belt review until ‘well beyond the plan period’.

6.39 The ‘urban area’ should not be restricted to Guildford; there are other settlements which are considered to be both sustainable and suitable for development and such settlements, which include Send and Send Marsh should be considered for safeguarding land. Without applying such an approach to safeguarded land it will not be possible to comply with paragraph 83 of the NPPF, which sets out that

‘Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they are capable of enduring beyond the plan period.

6.40 Indeed, Guildford Borough Council has already recognised that the failure to safeguard land is likely to necessitate further Green Belt releases. This position is acknowledged at paragraph 4.70 of the Green Belt and the Countryside Topic Paper, which confirms that, ‘We consider that any future local plan would also need to consider a combination of spatial options if needs were to be met, and is therefore likely to necessitate further Green Belt release around the villages.’

6.41 It is therefore concluded that Guildford’s approach with regards to the safeguarding of land is neither effective nor justified and cannot be considered to be sound.

6.42 Contrary to the position adopted in the Topic Paper, the constraints referred to that are limiting the development opportunities are the very reason that land should be safeguarded. I.e. it is acknowledged that the Green Belt is a significant constraint.

6.43 Furthermore, the safeguarding of land should not apply only to land around Guildford Urban Area, but should be informed by a robust Green Belt Assessment where all settlements are considered, particularly those such as Send Marsh, which has been identified as a large village suitable for growth.

6.44 This is demonstrated in the Guildford Borough Settlement Profiles which states that ‘due to its proximity and relationship with Send in terms of sharing facilities there is scope for Send Marsh/Burntcommon to support additional housing development in the future through an extension if suitable sites are found.”
6.45 Referring back to the matters addressed above regarding the Green Belt Assessment, it is therefore of fundamental importance that the Council’s Green Belt Assessment follows a robust methodology in order to ensure it has appropriately considered all reasonable alternatives and can identify land to be safeguarded in order to be justified and ensure the plan and policy P2: Green Belt is sound.

Other comments

6.46 The ‘Green Belt and the Countryside’ Topic Paper highlights that two documents were amended/produced to contribute to the Council’s Green Belt and Countryside Study (GBCS). These documents were firstly Volume II addendum, which amended the way that the land parcels were scored in relation to two Green Belt purposes. Secondly it relates to the preparation of Volume V of the GBCS which sought to assess a number of further spatial strategy options.

6.47 Paragraph 4.85 of the ‘Green Belt and the Countryside’ Topic Paper sets out that, ‘Both these documents were published in April 2014, by which stage the spatial strategy for the draft Local Plan had been formed and there was insufficient time to be able to fully incorporate all the findings from the updated evidence.’

6.48 This demonstrates that insufficient regard has been had to all available evidence in formulating the spatial strategy and raises concerns that in fact the approach proposed is not based on a robust evidence base, and is not the best strategy as all reasonable alternatives have not been assessed. Without demonstrating that the proposed approach is supported by a robust evidence base, the plan cannot be said to be sound.

6.49 Policy P2: Green Belt is the main policy addressing Green Belt matters. A significant amount of the proposed policy is devoted to regurgitating national planning policy. This is not necessary and indeed unless all paragraphs are quoted word for word, the meaning as set out in the NPPF then becomes altered, without justification.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Background to Inset Villages

8.1 As set out in paragraph 4.3.12 of the supporting text which accompanies draft Policy P2 of the Proposed Submission Local Plan: Strategy and Sites June 2016 historically all of the villages with the exception of Ash Green and major previously developed sites have been “washed over by the Green Belt designation”.

8.2 With the publication of the National Planning Policy Framework (NPPF) in 2012 however the Government provided clear guidance in respect of the Green Belt and its essential characteristics and purposes.

8.3 In particular Paragraph 86 of the NPPF states that “If it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt. If, however, the character of the village needs to be protected for other
reasons, other means should be used, such as conservation area or normal development management policies, and the village should be excluded from the Green Belt” (Our emphasis).

The Emerging Local Plan Response

8.4 In response to the NPPF the Council instructed further work to be undertaken in respect of their ‘Green Belt & Countryside Study’ to consider whether villages should be ‘inset’ or ‘washed over’ by the Green Belt designation.

8.5 As set out in draft Policy P2 of the Proposed Submission Local Plan: Strategy and Sites June 2016 the following villages are now proposed to be inset from the Green Belt: Chilworth, East Horsley, Effingham, Fairlands, Flexford, Jacobs Well, Normandy, Peasmarsh, Ripley, Send, Send Marsh/Burnt Common, Shalford, West Horsley and Wood Street Village.

8.6 The approach of the Council to respond to the changes in national policy in respect of the Green Belt designation and to protect these areas using development management policies in accordance with the NPPF are supported.

8.7 Therefore the addition of ‘Policy D4: Development in urban areas and inset villages’ in the latest draft of the Local Plan which seeks to “promote the efficient use of land” whilst ensuring that “this does not negatively impact upon the quality of the local environment” is also supported.

Settlement boundary around the site

8.8 Send Marsh comprises an enclave of established housing closely related to the larger village of Send to the west. The Danesfield development marked a significant change to the character of this part of Send Marsh, introducing a distinct element of estate housing in an area which previously had comprised ribbon housing and non-residential uses.

8.9 As such, the village clearly lends itself to residential development which will rationalise the existing situation creating a long-term defensible boundary without any material outwards projection of built development.

8.10 Land at Polesden Lane and Send Marsh Road, Send Marsh is bordered on three sides by established housing and defensible boundaries including a footpath to the west (footpath number 46) and a second footpath to the north of the site (footpath number 45). It therefore lies within the effective framework of Send Marsh Village although it does not fall within the proposed settlement boundary as defined by the draft Local Plan.

8.11 Paragraph 4.2 of the Green Belt and the Countryside Topic Paper sets out that, ‘Whilst the NPPF broadly represents a continuation of previous policy, there has been a significant change in the policy approach to villages. PPG2 had previously given a choice as to whether villages should remain washed over by the Green Belt or whether they should be inset (removed) from the Green Belt. This is in contrast to the NPPF, which requires that all villages that do not make an important contribution towards the openness of the Green Belt are inset.’

8.12 Paragraph 4.12 of the Topic Paper then confirms that, ‘Volume IV of the Green Belt and Countryside Study (GBCS) in 2012 assesses all of our villages and recommends that the following villages should be inset from the Green Belt:… Send, Send Marsh/ Burnt Common…’

8.13 The Council’s approach with regards to ‘inset villages’ is supported. However, given the evidence presented in previous sections relating specifically to our client’s site at Polesden Lane, Send Marsh with regards to its contribution to the Green Belt and its previously developed land status, the location of the settlement boundary should be re-drawn around the entire site.

8.14 Furthermore, based on the physical characteristics of the site, its usage and its containment it is considered that this site is fundamentally different from the open countryside to the west and north-west.

8.15 The site does not therefore represent pristine, high quality Green Belt land and its previous usage is visible in the character of the site itself and its interrelationship with the surrounding development.

8.16 The inclusion of the site within the settlement boundary would not therefore have any material adverse impact on Green Belt purposes and in particular its openness. The site clearly lends itself to residential development and would rationalise the existing built form creating a defensible village boundary to the west.
8.17 This was demonstrated during the examination of the current Local Plan which was adopted in 2003. As set out in paragraphs 10.4.174 – 10.4.178 of the Inspector’s report the site was put forward on the basis that it had “advantages of being a brownfield site, closely related to a settlement in which there was a reasonable provision of facilities.” The Inspector appeared to agree with this statement noting that “were there a need (for further housing) this site would have features that would make it worthy of consideration.”

8.18 The new Local Plan seeks to identify and meet the needs of the Borough in respect of housing and seeks to provide for the delivery of 13,860 additional homes by 2033.

8.19 As set out above our client’s site would meet this requirement and would provide a proportionate and logical extension to the village whilst contributing to the housing needs of the Borough.

8.20 Whilst the re-alignment of the Green Belt boundary in relation to the Village of Send Marsh as set out in Section 6 is welcomed, given the evidence presented in previous sections relating to the fact that, at best the site makes only a limited contribution to the Green Belt and evidence demonstrating the previously developed status of the land, in order to ensure the soundness of the plan and policy D4: Development in urban areas and inset villages, the settlement boundary should be redrawn around the entire site.

8.21 The application of the approach in our Green Belt Assessment and evidence presented in our previously developed land report demonstrates that inter alia on the basis the site would provide for more than 25 dwellings that our site should therefore be allocated for residential development. This approach would ensure the soundness of the plan and in particular policies S2: Borough Wide Strategy, P2: Green Belt and D4: Development in urban areas and inset villages.

Background

1.1 These representations have been prepared in response to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites June 2016. This report takes into account earlier representations, as relevant, made to the Council in response to consultation on the emerging Local Plan and its supporting evidence base.

Progressing the plan

1.2 Guildford appears to have embraced national Government Advice, made clear within the Housing and Planning Act, to ensure that Local Plans are put into place as quickly as possible in order to facilitate much needed strategically planned growth, which is supported.

Meeting Objectively Assessed Housing Need

1.3 The spatial vision set out in the Proposed Submission Local Plan: Strategy and Sites identifies that the plan makes provision for the delivery of 13,860 additional homes by 2033. This represents the Council meeting its Objectively Assessed Need (OAN) per annum of 693 homes across the plan period 2013 – 2033.
1.4 In order to accommodate the full objectively assessed needs within the Borough, it is acknowledged by Guildford Borough Council that this is dependent on Green Belt releases. The proposed Green Belt releases have been informed by the Green Belt and Countryside Study (GBCS), which has been subject to further work since the last round of consultation on the Local Plan in July 2014.

1.5 Guildford’s commitment to achieving their full objectively assessed housing need is welcomed and supported.

Housing Trajectory

1.6 The Housing Trajectory demonstrates that there is a cumulative housing deficit up until 2027/2028 given the reliance on the delivery of complex/difficult strategic sites. This deficit reaches a peak in 2017/2018 (i.e. the year before the planned adoption of the plan) at an housing under provision of 2,019 dwellings based on the potential housing provision figures between 2013-2018.

1.7 In order to ensure the soundness of the plan there is a need to fill a gap in the early years of the plan period with a greater number of smaller sites where there is certainty that they can and will be delivered in the first five years of the plan period. This will ensure diversity of supply and ensure the plan accords with the requirements of paragraph 47 of the NPPF.

1.8 It has been demonstrated that our client’s site could deliver around 70 dwellings of both market and affordable housing within the first five years of the plan period which will contribute to meeting the extensive needs which exist within this area as well as within the Borough as a whole at the start of the plan period to ensure the soundness of the plan.

1.9 Land at Polesden Lane and Send Marsh Road, Send Marsh is a largely unconstrained site in a sustainable location which is available immediately for development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/17659 Respondent: 15256225 / Boyer (Michelle Thomson) Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Detailed policy matters

1.41 Several concerns regarding individual policies are highlighted, including the size of sites where affordable housing is sought, lack of account taken of started homes and onerous requirements regarding design policies.

1.42 The application of the approach in our Green Belt Assessment and evidence presented in our previously developed land report demonstrates that inter alia on the basis the site would provide for around 70 dwellings that the site in Send Marsh should therefore be allocated for residential development. This approach would ensure the soundness of the plan.
and in particular policies S2: Borough Wide Strategy, P2: Green Belt and D4: Development in urban areas and inset villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Progressing the Plan

5.1 Guildford appears to have embraced national Government Advice, made clear within the Housing and Planning Act, to ensure that Local Plans are put into place as quickly as possible in order to facilitate much needed strategically planned growth. In this regard, Guildford’s commitment to progressing their Local Plan in line with Government Advice and the Housing and Planning Act is supported.

5.2 This commitment to progressing their Local Plan is demonstrated by the fact that Guildford has now progressed to a Regulation 19 consultation, which is also welcomed.

Approach to Objectively Assessed Need

5.3 Since the consultation of the Draft Guildford Borough Local Plan: Strategy and Sites in July 2014, as above, the West Surrey Strategic Housing Market Assessment (SHMA) was published in September 2015. The SHMA was produced jointly with Waverley and Woking as with Guildford, the three boroughs are considered to constitute an Housing Market Area.

5.4 The SHMA sets out that the objectively assessed housing need (OAN) for Guildford is 693 dwellings per annum.

5.5 Our clients have carried out an independent assessment of the objectively assessed need (see Appendix Six) which supports a case for a higher OAN. An OAN of 693 should therefore be treated as a minimum.

5.6 Guildford Borough Council has been clear that, ‘appropriate sustainable sites can be allocated within the plan to meet the OAN for both housing and employment’ (Executive Summary of the Full Council report dated 24 May 2016).

5.7 The plan period is now proposed as 2013 – 2033 and taking the OAN of 693 as set out in the SHMA, this equates to the provision of 13,860 dwellings in the plan period. Policy S2: Borough Wide Strategy confirms this position in the policy, setting out that, ‘During the plan period (2013 – 2033), we will make provision for 13,860 new homes…’

5.8 Of note is the fact that the Draft Guildford Borough Local Plan: Strategy and Sites published in July 2014 had a plan period of 2011 – 2031 and made provision for 13,040 new homes, which equated to an annual requirement of 652 new homes a year.

5.9 The final SHMA published in September 2015 states that it incorporates the 2012 CLG Household projections and other factors such as student growth.

5.10 Guildford’s commitment to achieving their full objectively assessed housing need is welcomed and supported.
Spatial Development Strategy

5.11 Paragraph 4.1.6 of the supporting text to Policy S2: Planning for the borough – our spatial development strategy sets out that:

‘Our preference is to focus growth in the most sustainable locations, making the best use of previously developed land (including in the Green Belt if appropriate). These locations are:

- Guildford town centre
- Urban areas
- Inset villages
- Identified Green Belt villages

5.12 Paragraph 4.1.8 goes on to set out that, ‘Whilst these sustainable locations are our preferred locations for new development, they are unable to accommodate all of the new development we need. We will therefore release allocated land for development in other areas. These include:

- Countryside beyond the Green Belt
- Urban extensions to Guildford and Ash and Tongham
- New settlement at the former Wisley airfield
- Development around villages (including some expansion).

5.13 It is assumed that villages such as Send Marsh and any associated boundary adjustments to the Green Belt in this area will then be considered under the ‘Inset villages’ part of Policy S2 and this approach is supported.

5.14 Furthermore the proposed settlement hierarchy for the Borough’s settlements is also supported as set out in the ‘Guildford Borough Settlement hierarchy’ which forms part of the evidence base for the Proposed Submission Local Plan: Strategy and Sites June 2016.

5.15 As set out in section 4.0 of the document entitled, ‘Guildford Borough Settlement Hierarchy’, (which refers to the ‘updated settlement hierarchy’), the sustainability ranking of the settlements designates Send Marsh/Burntcommon as a large village. Large villages are defined in the settlement hierarchy as being “unsuitable for substantial growth but capable of accommodating a proportionate extension.”

5.16 The justification for deviation from the sustainability scoring is supported, as is the rationalisation that the population size and proximity of the village to the services in East Horsley and Send result in Send Marsh/Burntcommon sitting more ‘comfortably’ with the other large villages within this category.

5.17 It is considered that the classification of Send Marsh is suitable and accurately reflects the characteristics and role/function of both the village and its interrelationship with the surrounding area.

5.18 The conclusions state that “it would be appropriate to direct new development towards…Send Marsh/Burntcommon” and other locations within the Borough which are considered to be “the most sustainable in terms of their level of community services and facilities, access to higher order centres and employment opportunities, and ability to support new development.”

5.19 This approach and the conclusions in relation to Send Marsh within the ‘Guildford Borough Settlement hierarchy’ are supported.

Strategy to Meet Objectively Assessed Need

5.20 The spatial vision set out in the Proposed Submission Local Plan: Strategy and Sites identifies that the plan makes provision for the delivery of 13,860 additional homes by 2033. This represents the Council meeting its Objectively Assessed Need (OAN) per annum of 693 homes across the plan period 2013 – 2033.

5.21 In order to accommodate the full objectively assessed needs within the Borough, it is acknowledged by Guildford Borough Council that this is dependent on Green Belt releases. The proposed Green Belt releases have been informed by
the Green Belt and Countryside Study (GBCS), which has been subject to further work since the last round of consultation on the Local Plan in July 2014.

5.22 This broad approach, which follows the spatial strategy as outlined above to enable the OAN to be met, is supported.

Housing trajectory

5.23 Notwithstanding the above support to the overall approach, there is concern over the deliverability of the housing. The Housing Trajectory identifies the potential housing provision over the plan period (2013 – 2033). This potential provision is broken down into the following five year periods: 1) Pre-adoption (2013 – 2018), 2) the first five years (2018 – 2023), 3) 6 – 10 years (2023 – 2028) and 4) 11-15 years (2028 – 2033).

5.24 What is clear from the Housing Trajectory is that there is a cumulative housing deficit up until 2027/2028 given the reliance on the delivery of complex/difficult strategic sites. This deficit reaches a peak in 2017/2018 (i.e. the year before the planned adoption of the plan) at an housing under provision of 2,019 dwellings based on the potential housing provision figures between 2013-2018.

5.25 This is a significant deficit and with a housing target of 693 dwellings per annum, equates to a deficit of almost 3 years housing provision at the point of adoption of the plan. Such a heavy reliance on strategic sites coming forward at the end of the plan period therefore makes the plan vulnerable.

5.26 The Plan should demonstrate a 5 year housing land supply at the point of adoption. Guildford Council’s proposed position will be that they will not be able to do so and consequently the plan is unlikely to be found sound on this basis without modification.

5.27 In order to ensure the soundness of the plan there is a need to fill a gap in the early years of the plan period with sites where there is certainty that they can and will be delivered. This will ensure diversity of supply and ensure the plan accords with the requirements of paragraph 47 of the NPPF.

5.28 It has been demonstrated that our client’s site could deliver around 70 dwellings of both market and affordable housing within the first five years of the plan period which will contribute to meeting the extensive needs which exist within this area as well as within the Borough as a whole at the start of the plan period.

5.29 Furthermore, paragraph 47 highlights that, ‘Where there has been a record of persistent under delivery of housing, local planning authorities should increase the buffer to 20% (moved forward from later in the plan period) to provide a realistic prospect of achieving the planned supply and to ensure choice and competition in the market for land…’

5.30 Therefore, given Guildford Council’s persistent and significant under delivery of housing, in order to accord with the NPPF, not only should the plan demonstrate a 5 year housing land supply at the point of adoption, but it should also demonstrate a buffer of 20% in addition to this.

5.31 This further emphasises the critical need for the Plan to demonstrate that there is a supply of sites with certainty that can and will be delivered at the start of the plan period, such as our client’s site at Polesden Lane and Send Marsh Road, Send Marsh.

Reliance on strategic sites

5.32 The reliance of the Local Plan on strategic sites to deliver the required housing during the plan period makes the plan vulnerable particularly given that just six sites are being relied upon to deliver 66% of the overall OAN requirement.

5.33 Each of the six strategic sites are all allocated to deliver in excess of 1,000 new dwellings and will therefore inevitably have considerable lead in times prior to their delivery. This is demonstrated in the LAA housing trajectory with five of these sites not expected to deliver any housing before 2021/2022.
5.34 The Sustainability Appraisal highlights this issue and notes that the Council’s preferred approach results in “an increased reliance on larger sites and hence there would be a likelihood of undersupply within the early part of the plan period.”

5.35 In addition the SA acknowledges that the “high reliance on large (‘strategic’) sites results in a risk that one or more sites will deliver slower than anticipated (or, indeed, not deliver at all in the plan period).”

5.36 This is compounded by the fact that a number of the larger sites allocated within the Local Plan are also reliant on the delivery of significant infrastructure which in turn may also result in additional delays or a lack of housing delivery.

5.37 This is highlighted in the Duty to Cooperate Topic Paper which states in paragraph 4.45 that “…the delivery of former Wisley airfield, Gosden Hill and Blackwell Farm is dependent upon the delivery and timing of key infrastructure requirements on the A3. This is reflected in the expected phasing of the sites, with the majority of provision anticipated post 2027.”

5.38 The current housing trajectory therefore places heavy reliance on the delivery of large strategic sites late within the plan period. This strategy increases the risk that the necessary housing delivery rates will not be met during the plan period leaving the Council unable to demonstrate a five year housing land supply.

5.39 As seen in other Local Authorities, including Wokingham Borough Council, where a similar approach has been taken inevitably lead in times for strategic sites and substantial infrastructure projects are greater than anticipated and delivery is often subject to unforeseen delays.

5.40 The proposed strategy results in three of the strategic sites (Wisley Airfield, Gosden Hill and Blackwell Farm) all having annual housing delivery rates of between 230 – 290 new homes per annum, between 2028 – 2033, which as set out above are all sites which are dependent upon the delivery of critical infrastructure.

5.41 It is also worth noting that the annual housing delivery levels for both Wisley Airfield and Gosden Hill are both greater than the entire annual delivery rates of housing within the Borough in 2013/2014 and 2014/2015 respectively.

5.42 In order for the Local Plan to be found sound at examination this issue must be clarified in order to ensure that the housing delivery proposed across the Borough within the plan period is clearly demonstrated through the supply of sites with certainty that they can and will be delivered, such as our client’s site at Polesden Lane and Send Marsh Road, Send Marsh.

Query over conflicting information

5.43 As set out in the Duty to Cooperate Topic Paper which forms part of the evidence base for the emerging Local Plan “…the total provision of new homes across the plan period (including completions since 2013 and outstanding capacity) within the Proposed Submission Local Plan is 15,844. This provides 1,984 homes as a buffer.”

5.44 It is however noted that Table 1 which accompanies Policy S2: Borough Wide Strategy and sets out the planned delivery of housing between 2018 – 2033 only demonstrates 13,652 homes being delivered between 2018 and 2033.

5.45 This is contrary to the supporting text in paragraph 4.1.12 which states that the table “shows a number of new homes that is greater than the figure in the policy” and does not accord with the housing trajectory set out in the LAA.

5.46 The Council has not justified this approach and without such justification it has not been demonstrated that the plan is consistent with national policy and therefore it has not been demonstrated that the plan is sound.

5.47 We therefore reserve the right to submit further information in regards to the housing strategy of the Borough on the basis that the Council has been unable to provide any clarification in respect of these issues during the six week consultation period.

Soundness of the plan
5.48 In order to ensure that the Local Plan is found sound at Examination we would therefore strongly recommend that the Council revises its housing trajectory to incorporate a greater number of smaller sites which can deliver in the earlier stages of the plan period thereby ensuring that the housing trajectory is robust and achievable.

5.49 This would accord with paragraph 035 of the National Planning Practice Guidance (NPPG) which states that “Local planning authorities should aim to deal with any undersupply within the first 5 years of the plan period”.

5.50 As set out in this report Land at Polesden Lane and Send Marsh Road, Send Marsh is a largely unconstrained site in a sustainable location which is available immediately for development.

5.51 We have demonstrated through our Green Belt Assessment and this report that the existing Green Belt designation associated with this land should be removed and as such there are no overriding constraints to prevent early delivery of the site at Polesden Lane.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Plan Making – Tests of Soundness
3.14 The four tests of soundness against which a Local Plan will be examined by an Inspector are set out in paragraph 182 of the NPPF.

3.15 In order to be considered sound, a Local Plan should be;

- ‘Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;
- Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;
- Effective – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic properties; and
- Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.’

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the final draft plans relating to Send and Ripley for the following reasons:

1) I object to the increase in the number of homes being planned which has increased from 185 in April 2016 to 485 and this has been done without any consultation under Regulation 18.

2) I object to the removal of Send and Ripley from the Green Belt. Send provides a strategic buffer between Guildford and Woking with lots of areas which are used for location recreation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the new 4-way interchange onto the A3 at Burnt Common which would have disastrous effect on the traffic in Send and Ripley which is already congested and used as a cut through from Woking to the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the new proposal of building of 40 homes and 2 travellers pitches west of Winds Ridge and Send Hill. This is a new proposal and not included in the regulation 18 draft and had not been consulted upon. Development of houses is inappropriate as the road is very narrow with no pavement or lighting. The land to be used for development was previously used for landfill waste which has to be vented. The area is very popular with dog walkers and is an area of beautiful countryside which would be spoiled by any development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I would be interested to know how the building of 1200 new homes can be justified which will change the character of this village beyond recognition? Fundamentally and in my opinion construction on such a large scale will:

- Create more traffic based on the assumption that to every house there are on average 2 car users.
- Have an impact on the local infrastructure putting pressure on the schools and health centre plus shopping facilities.
- Impact on services - I personally haven't seen any plans to support this increase in housing by providing any new shopping facilities or a much needed Post Office.
- Have a cumulative impact by adding traffic to an already busy road network - A31, A331, A323, Gridlock happens in Ash whenever there is a major incident on any of the aforementioned roads.
- Decimate the wildlife and natural appearance of the countryside.

In my opinion, house numbers should be downsized. Ash seems to take the hit every time there is talk of construction with other villages particularly to the east of the borough escaping development on this scale. Why is this?

There are approximately 3000 new homes planned for Aldershot, which neighbours Ash. All these new residents will be using and thus sharing the same road network with the additional residents in Ash. Inevitably, there will be increased road congestion.

Let's also not forget that 400 new homes are planned for land adjoining Ash Lodge Drive and further development in Tongham and this represents large scale development which will greatly affect the character and nature of this village and put pressure on infrastructure.

There must be better assurances of why this housing is needed and if so guarantees that the infrastructure is put in place BEFOREHAND so as not to make everyone's life a misery. It is appreciated that some housing, and suitable housing at that is needed but not on this scale. If I had wanted to live in the middle of a town or city, I would have moved to one.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A30

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to see a design plan for this proposed new bridge carrying the A323 across the railway at Ash which will replace the level crossing.

At present I cannot visualise what it will look like and thus what impact it will have on the surrounding area. My concerns are that it will INCREASE traffic through an already busy and sometimes gridlocked village and that more HGVs will enter the village. Furthermore it may also be out of keeping with the area.

Additionally, the area set aside covers land east of Foreman Road. I thought that Persimmon Homes wanted to build houses there so how exactly will that work? Persimmon homes have only recently distributed a pamphlet advising of plans to build 50+ homes on the aforementioned site.

Interestingly, Copperwood Developments who propose 154 dwellings on land to the south of Guildford Road say that land is (quote from their literature) 'reserved to accommodate the Council's future flyover'. I was of the belief that infrastructure HAS to be in place BEFORE new housing construction? The wording suggests that building will go-ahead before infrastructure is in place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/647  Respondent: 15256705 / R.V. Vickers  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

  ° The “objectively assessed need” figure of 693 homes a year is too high.

  ° A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.

  ° The current SHMA inflates the proposed housing figure due to

  ° failure to correct for errors in the historical data for international migration flows,

  ° issues with the way it considers students and affordability and

  ° flaws in the method for estimating the number of homes needed to support job growth.

  ° It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe
inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

1. I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.
There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size. Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

1. **I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)**

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community...
Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1985  Respondent: 15256705 / R.V. Vickers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:

Comment ID: PSLPP16/1994  Respondent: 15256705 / R.V. Vickers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/"Disneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3 – Rural Exception Homes

I OBJECT  This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

---
1. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

1. I OBJECT to the Borough Wide Strategy (Policy S2)

   a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

   b. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

   c. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.
These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Garlick's Arch Policy A43. Policy A44 1.9ha. Policy 42. I object with the following points on these policies:

1. The building on the Green Belt at Send at Garlick's Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded. Garlick's
Arch has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 18th century would be endangered. The site is also subject to flooding.

2. The development at Garlick's Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks' notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

3. The proposed industrial development of 7,000 sq m Garlick's Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40 ha site available.

4. To building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the new marina will generate heavy traffic too. The lane and the main A247 road cannot take any more.

5. To the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented.

6. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43A. I object to this policy on the following point:

1. The proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day. I object to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/M25.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am writing to object to a number of proposals in the revised Guildford Borough Proposed Submission Local Plan. I ask that these objections which are listed below are considered by the Inspector.

I object to all proposals to build on the Green Belt at Send because all the development that is really needed can be accommodated in Guildford's urban brownfield areas and is much closer to existing transport hubs. The whole destruction of the Green Belt in this area is in clear contravention of the central government's stated commitment for Green Belt Protection.

I object to the number of houses that the Plan intends to deliver.

I have further objections which I have listed below:

1. Policy P2. The removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The complete failure of GBC to identify sufficient brownfield sites within the urban which should be targeted first development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 5: The examination

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

GBC have not followed correct process. Since 2014 GBC has changed every major site in Send proposed for development and just added a massive new road junction. The 2014 proposal for 430 houses went down in April 2016 to 185 and has now gone up again to 485. These significant changes require another full consultation under Regulation 18, not the short cut of Regulation 19 which I believe GBC are trying to do. This invalidates the whole process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)
   - The “objectively assessed need” figure of 693 homes a year is too high.
   - A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
   - The current SHMA inflates the proposed housing figure due to
     - failure to correct for errors in the historical data for international migration flows,
     - issues with the way it considers students and affordability and
     - flaws in the method for estimating the number of homes needed to support job growth.
   - It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**
1. I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the
Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West
Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors
until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with
paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from
encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All
requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops,
offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back
to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before
the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day
during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow,
winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send
and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two
schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham
which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a
dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it
wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be
uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West
Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around
14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s
requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in
the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for
infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried
out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/969  Respondent: 15256833 / C J Vickers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

1. I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents
are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.
Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.  I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.  I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I OBJECT to the Borough Wide Strategy (Policy S2)

1. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

2. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

3. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **DRAINS, WATER SUPPLY, FLOOD RISK, CONGESTION**

Our drainage system, our water supply, our medical facilities and our roads cannot cope with the proposed number of new homes West Horsley nor the extra homes on the Wisley airfield site.

To increase the number of houses in West Horsley by 35% will change the character of the village. Building this number of homes will lead to flood risk here and downstream (along the Wey and Thames). The planned development on Green Belt is therefore unsustainable.

East Lane and Manor Farm in West Horsley have been flooded and inpassable several times over the last few years, so further building on Green Belt in the area will result less farmland/woodland areas to for the water to soak away.

1. **LACK OF INFRASTRUCTURE**

The current local amenities of West and East Horsley, car parking, doctors surgery, primary school, station car park are full to bursting and struggle to cope with the existing demand.

The Local Plan makes no reference to providing increased infrastructure to compensate for the extra cars, children and people.

East Lane in particular is a country road with few road markings and gets very congested at school run times, especially where the road narrows to a single lane. Also, there are many children walking, scootering and cycling to school. To increase the number of cars in this area can only endanger children’s lives.

Therefore I ask GBC to revise the housing number, and to amend the Local Plan to utilise brownfield/previously used land rather than green field sites – of which there are significant amounts of the former within the Borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to register objections to the Draft Local Plan for the following reasons:

1. GREEN BELT

The Green Belt is precious and the purpose of the Green Belt is to stop the unrestricted sprawl of large built up areas and prevent neighbouring towns merging.

By removing East and West Horsley from the Green Belt would change the nature of this area of countryside forever and would eventually merge historic and separate villages.

Furthermore, housing, education needs is NOT an exceptional circumstance in law under The National Planning Policy Framework requirements. Under no circumstances should green belt land be used for housing or educational buildings.

We need to preserve the Green Belt for future generations to enjoy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
East Horsley - I have no objection in principle to use the Thatcher's Hotel Site for housing provided the density is reduced and that adequate road access provisions are constructed due to the already very busy and dangerous situation that already exists at the junction of the B2039 with the main A246 road with its two dangerous bends at this location.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

1. I object to the proposal to remove the Horsleys from the Green Belt and for extending the boundaries of the Settlement areas of the Horsleys, thus possibly leading to a substantial number of new homes being built.

2. The public facilities and public transport are already at full capacity. The only practical way to reach East Horsley is by car and parking is already difficult, therefore additional vehicular traffic arising from more people living in the vicinity or coming to East Horsley could not be catered for and would be chaotic for the residents already living there.

3. The infrastructure in East & West Horsley is already over stretched. For instance in East Horsley we have had Thames Water checking the sewers as they have concerns about their capacity. When we have heavy rain we have flooding - refer to government maps which places part of East Horsley on the 'Flood Plain'. The roads around East & West Horsley are already very busy and in many places 2 cars travelling in opposite directions struggle to pass - never mind any larger vehicle. Examples of this can be found on Ockham Road South between Bishopsmead shops and the railway station.

West Horsley - I have no objection in principle to use the Bell & Colville Garage Site for housing.

The remainder of East & West Horsley - As well as the Green Belt issue I mention at the start of my letter, I object to increasing the size of these villages by some 500 additional houses, mainly the proposed additional housing sites in West Horsley. This would destroy the character of both East & West Horsley. In addition to adding the 500 or so houses, such an increase would severely impact East Horsley since West Horsley has no facilities to speak of, i.e. no shops, surgery, bank, library, etc. Therefore more people would travel to East Horsley and further increase the parking problem there. There is a primary school (Raleigh) which is shared with East Horsley but I understand that this is full and certainly the secondary school at Effingham is full. So again any significant increase in people living in East & West Horsley would probably swamp the schools facilities we already have in this area.

In conclusion East & West Horsley as well as Ockham are village communities and I wish them to remain so. Brownfield sites in the Guildford area should be the starting point for any additional housing. Guildford Borough Council being an elected body together with it's Councillors should all be fighting for the wishes of the citizens who have elected them. Whilst I recognise that some additional new housing is required, GBC have a responsibility not to pursue a policy of providing excessive new homes in areas which will encroach into the Green Belt and destroy the wonderful environment of our pretty villages that we live in.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of Wisley Airfield and the land surrounding it from the Green Belt and to designate this area as a potential site for building some 2000 new homes. Again this is Green Belt and an open area which should be protected against the developer.

I object to the continued inclusion of Wisley Airfield (Three Farms Meadow) as a potential site for new housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Wisley Airfield - I strongly object to any form of building here as I mention above. This is an area of Green Belt land with no infrastructure and non-existent transport facilities other than road access. The reasons for unsuitability and rejection of this area for potential development are well documented in the recent rejection by GBC Planning of a planning application for access to this site. The Wisley site must be removed from the Local Plan. Access from this site to the A3 is very poor and already the junction is at capacity at peak travel periods. Rail transport is already at full capacity and the car parks at nearby stations are fully utilised. The large increase of vehicular traffic and people from houses built at Wisley could not be absorbed by the current infrastructure and public facilities.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The land held by Surrey University should be released to permit student accommodation to be built upon it. If students were accommodated in this way then the housing that they currently occupy in the Guildford area would become free and allow other people to live there or allow development of new houses. Again this must be implemented before any Green Belt land is developed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the overall proposal to remove the villages listed in the above document from the Green Belt, in particular East Horsley, West Horsley, Ockham & Ripley. This is fundamentally against the principles that our countryside is protected from building on and to ensure that there is a balance between houses and open spaces. The Green Belt we have in the Guildford area and particularly around East Horsley, West Horsley, Ockham and Ripley preserves/protects the environment, air quality, helps to prevent flooding and provides open countryside for all to share and enjoy.

Answer (if comment is on questions 1-7 of the questionnaire): ()

A part of any local plan should be to use up all brownfield sites first, whether immediately available or at a later date, before any other land for housing is considered. There are areas in the Guildford area where there are unoccupied pieces of land, derelict offices and industrial areas. Areas which need re-generation must be identified and used for housing needs before any other land is considered. Developers must be made to use brownfield land and not just proceed with what they see as a 'cheaper' option, i.e. the development of green fields.

Attached documents:

Comment ID: PSLPP16/10477  Respondent: 15257281 / Kath Frackiewicz  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. The recent proposal for new housing at the Effingham School site was recently rejected by GBC. Surely if this site was rejected then the conditions for building more homes in the Horsleys & Ockham are even less justifiable.

2. Onslow Estate Housing - Why has this proposed area not been listed for new housing? I understand from the local press that GBC do not wish to take up the offer for this large site to have new houses. This site has good access to the A246 and is close to Merrow shops and public transport including the park & ride which provides excellent access to the centre of Guildford.

3. In order to achieve a better balance in the housing stock GBC should implement a strict policy to ensure that the demolition of small houses including bungalows and the resulting construction of replacement houses of a much larger size be immediately stopped. Whilst current policy appears to favour the developer, the removal of smaller housing stock reduces the number of properties to which people can downsize to and obviously if there are no such smaller houses available in the area that people wish to continue to live in they will just remain in their larger homes and not free up existing houses for growing families.

4. It would appear that many of the comments and views raised by local people in the previous consultation appear to have been largely ignored, certainly as far as the Horsleys, Ockham & Ripley villages are concerned.

5. The objective of adding some 14,000 new homes, which I understand represents a net increase of some 25% to the housing stock of Guildford Borough over the next 20 years, appears grossly overstated given the nationally projected population increase of 15% over the same period. I have to question whether employment in the area; infrastructure including roads and public transport; facilities such as hospital, medical and schooling; will increase by a similar amount. If not then it surely is illogical to start to plan for so many additional houses.

Borough Wide Strategy: I object to the statement where it states "the figures set out in the Annual Housing Target table sum to a total of 12,426" yet the numbers in the table only add up to 9,810. What is the significance of the missing 2,616? I also object to the inclusion of a 10% contingency in the housing number over the plan period. This is unnecessary and misleading in putting forward housing requirements.

Comment ID: PSLPA16/2957  Respondent: 15257697 / Deborah allen  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposed removal of Send from the green belt area and to all proposals to build on green belt at Send and elsewhere in the borough when there are adequate brownfield areas to accommodate what is really needed.

I object to a new interchange with the A3 at Burnt Common, this would cause more problems to an already very busy section whereby at peak times will become gridlocked. This would be disastrous for Send and the A247. The noise and pollution levels are already harsh for those living in the area. Send would be taking traffic from the proposed new houses at Wisley, Gosden Hill, Burpham and Blackwell Farm with a lot of this traffic coming through the village to and from the A3 and M25.

I object to the building of 400 houses and 7000 sq metres of industrial space at Garlicks Arch. This proposal only recently became known to the residents of Send without any prior consultation.

The infrastructure requirements have not been properly considered and are inadequate to deal with the proposed housing levels. Our roads, doctors and schools will be unable to cope. Industrial space is not needed and if it was could be accommodated on the Slyfield industrial estate as was originally proposed and would not impact anything else that wasn’t already affected.

I object to the building of another 45 houses at Clockbarn Nursery as Tannery Lane. These roads cannot take anymore traffic and the junction with Send Road is already dangerous as it is quite a blind spot and will be made much worse. Already planning permission has been given for 64 apartments and a marina which is going to generate additional traffic.

I object to the development of 40 houses and 2 travellers pitches at Send Hill there is insufficient access and it would spoil a high amenity area in beautiful countryside. The cemetery has been extended on Send Hill and this will make for more traffic in any event. This area needs to remain as a peaceful area.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The current infrastructure cannot support the proposed development.

The Ash Vale Health Centre has no spare capacity, the existing roads are already congested at peak times, the trains are already busy at peak times, the recent development in Tongham has only just completed and the proposed increase of over 1200 houses in this area will put an impossible strain on schools, in particular infant, junior and Primary schools.

There are no local facilities for young people in Ash and the surrounding area. There are only a few park areas and the sports centre attached to the Ash Manor school is insufficient to support such a swell in population. Library opening hours are limited.

Whilst Ash Vale has a community centre and a small parade of shops, there are few designated parking facilities, which inevitably leads to on street parking which in turn causes traffic build up. There is very little parking at both Ash and Ash Vale stations, which will lead again to more parking problems.

The transport links, especially the number of buses and routes, are very limited in this area and this will inevitably lead to more cars, congestion and pollution.

In this area, there is only a small Post Office counter housed within the One Stop in Ash, this has on occasion run out of stamps. There is no Post Office in Ash Vale and to my knowledge, no plans for one.

The vastness of these proposal is detrimental to the green and open nature of this area. Ash Green will sprawl into Ash and result in a swollen population of a small village, which already has few facilities.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am responding to the proposal A46 for the doubling in size of the village of Normandy which I believe to be unsound.

If as part of a well researched plan there is believed to be a need for a new village/town to be created this needs to be clearly stated and a case made for it and the location chosen. This has not happened in this case. On the basis of a desire by a commercial company to make money a devise (the provision of a secondary school) has been suggest to get around the green belt legislation. If you take a walk over the proposed site you will seeing beautiful Surrey countryside, agriculturally productive and support large amounts of wildlife. If you go there of a spring evening you may here the nightingale that has returned to the same coppice for so many years. For the sake of a need to comply with a bureaucratic planning requirement you will be doing completely unnecessary harm. By all means continue to add 10 or 20 houses a year to the village (and others) as has happened over the last number of years. Organic growth can be absorbed, dumping large ill thought out and under resourced developments without massive new infrastructure (which seems not to have been considered) cannot.

Please reject this proposal. Do not destroy our village and our lives for the next twenty years.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Re: proposed developments in Send and a new interchange onto the A3

I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford and I particularly to the building on the Green Belt at Send at Garlick's Arch, Clockbam Nurseries and Send Hill because it is not justified by any special circumstances. In act that area of Green Belt is meant to be pennant and not continually eroded.

I object to the exaggerated "housing need" figure of 13,860 which is far too high and results in the completely unnecessary development of the Green Belt. The way students, economic need and affordability are calculated inflates the housing need. I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford's urban brownfield areas much closer to existing transport hubs.

I object most strongly to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/M25. This would be disastrous for Send and the A247 would be gridlocked all day; just please visit this area during any of the rush hours to understand the significant weight of traffic that already uses the A247 and the minor surrounding roads. The knock on effect up to the small roundabout at Old Woking (where the B382 joins it) will be a really serious problem.
In fact I object to all the proposed sites in Send because, not least because they were not included in the previous consultation in 2014. Unlike the rest of the borough Send has not been properly consulted and all its sites have been changed substantially. We were promised there would be no major changes made to the 2016 draft plan by the Leader of the Council.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the large proposed development of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the development at Garlick's Arch for 400 houses, which was sprung on the village at the last moment with only 2 weeks' notice and without any prior consultation. This has been quite disgraceful. Also this proposed development is simply not required in terms of housing need either for the village or the borough.

I object to the proposed industrial development of 7,000 sq m at Garlick's Arch because it is simply not required since the latest Employment Land Needs.

Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I object to the development at Garlick's Arch because the site has particular conservation sensitivity since it is covered in
ancient woodland. Trees which have existed since the 16th century would be endangered. The site is attractive open countryside and part of the permanent Green Belt, with is protected under the National Policy Framework. It also represents an unrestricted sprawl and goes against the purposes of the Green Belt which include the prevention of merging towns and settlements. Oh yes, and the site is also subject to flooding!

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I vehemently object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are already at 100% capacity.

I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

I ask that you please take note of the deep concerns of a huge number of Send residents and indeed many others who are connected to the village, pass through it on a daily and use this area for recreational purposes.

Please would you acknowledge receipt of this letter.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A44 would involve building on land fill waste which is currently vented and unsafe.

I object to this.
Policy P2 proposed building on land close to the River Wey Navigation and liable to flooding. It also would improve taking Send out of the Green Belt. There is no need to do this as there are alternatives more suited to the existing road infrastructure.

I object to this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Ref: Proposed Planning For East Horsley Etc,

I am writing to place on record my objections to the above proposals as detailed below:-

1. TRAFFIC AND PARKING

The level of traffic on Ockham Road South/North is already excessive, particularly with heavy vehicles who use it as a short cut to the A3 and the M25. Parking in the centre of the village (ie Station Parade) is already at full capacity and there is no space for building further shops.

2. SCHOOLS AND MEDICAL FACILITIES
These are both under full strain and would be unable to stand up to a large influx of houses (over 500 and 2,068 on Wisley airfield)

3. GENERAL COMMENT

In common with all others in this village we strongly object to the loss of Green Belt status. We came East Horsley in 1971 as shopkeepers and would be against any plans which would change the character of one of Surrey's best villages. Surely there must be other Green Belt areas in Surrey which would be more suited to the plans proposed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Having lived in Woodlands for 32 years, traffic has increased to such an extent that during peak periods residents of Woodlands joining the A 247 can regularly take up to 10 minutes due to a solid line of traffic coming from Woking to join the A3 in a southerly direction.

I OBJECT to the following:-
Policy (A43)
The A247 cannot be widened to take more traffic.

Air quality and noise level for householders along the A247 must also be considered

Our local Send Surgery cannot accommodate more patients.

Our local schools are also filled to capacity.

In 2014 the council rejected a planning application from Old lands to build 25 houses on very sound planning grounds, so now, how is an application to build 400 houses and 7,000 sq metres of industrial buildings even being considered?

Residents in Send, Ripley and West Clandon purchased their properties in villages because all are surrounded by Green Belt.

As ratepayers of Guildford Borough Council, they cannot have this Green Belt destroyed and should be more protected in line with the current government policy by their Council.

Policy 43a

The New North and South slip-roads to and from A3 to the A2.47 Glandon Road) would generate considerably more traffic, pollution and noise through the A2.47 Glandon road, Send Village leading to Old Woking, along both roads which are already at capacity without any widening possibility.

We all understand the need to build new houses, within the borough but all brown field sites should first be used.

I would also favour limited development on the old Wisley airfield providing connecting Country lanes are protected.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have previously objected to the proposed development of 400 houses on this Green Belt prime Agricultural land and historic woods. The new policy A43 now adds eight travelling/showpeople pitches to this development rendering the Policy even more inapporiate for the majority of G Rated properties within a 2 mile radius of this area.

The Borough council is reminded that in past 2/3 years it refused planning application for Oldlands to build 25 houses in the same location. The Council therefore cannot still incorporate this Policy within the Plan and still maintain that it applies Consistant Practice in their Planning Policy. This proposal would increase the local population so considerably and destroy totally the villages of Send and Ripley which in reality is not something that Ratepayers, in West Clandon, Send, and Ripley together with outlying areas would be prepared to accept. There is certainly no genuine reason to destroy Green Belt and Ancient Woodland which it contains, when Brown field sites within GBC areas could be used.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/666  Respondent: 15262305 / L J Crane  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have concerns over the strain the additional proposals will place on local resources. The roads in the surrounding area will not be able to cope with the addition of some 800 vehicles of local traffic. It is also my belief that the current local surgery will be overstretched with the addition of houses proposed causing a backlash for current residents.

I OBJECT to the removal of 15 villages, including Ripley and Send, from the green belt. This will lead to wholesale, and often inappropriate developments.
I OBJECT to the fact that GBC have not followed the correct process for Send and Ripley developments. Any significant
changes to the 2014 proposals, such as the proposal development of Garlicks Arch, should have required another full consultation, which did not happen. This invalidates the whole process.

I OBJECT to the fact that GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment which shows that industrial space at Burnt Common IS NO LONGER NEEDED.

I OBJECT to Policy A43.30 the proposed development of Garlicks Arch designated for 400 houses and an industrial estate. This is a new site not included in the Regulation 18 draft and has NOT been consulted on previously. It is not only permanently protected green belt but also a site of ancient woodland with some trees planted in the 16th century.

I OBJECT to policy A43.30 the development of new four way interchange onto the A3 which would mean that narrow Send Road (A247) would be the main route for traffic leaving the M25 and A3. It is already crowded and vulnerable to traffic jams. Further traffic from this development would result in permanent gridlock. It simply would not work.

I OBJECT to policy A44 which would see 40 homes and two travellers' pitches on land west of Winds Ridge and Send Hill. This was again a NEW site NOT included in 18 draft and therefore has NOT been consulted on previously. Once again this is Green Belt land partly containing unsafe landfill. Access is by a narrow lane which could never take the volume of traffic that would ensue from traveller's pitches.

I OBJECT to the fact that the Local Plan takes no account of schools, doctors surgeries and roads that are already operating at full capacity. Another 4000 houses in this area with a conservative estimate of a further 8000 cars would be catastrophic.

I OBJECT to the proposal in the local plan on the grounds that Send Hill is a single track country road and too narrow to provide sufficient access to the site or accommodate the potential new levels of traffic the proposed development would bring.

I OBJECT to the proposal in the local plan on the grounds that the proposed number of houses potentially could result in 92 extra cars in Send Hill which is already suffering from congestion particularly at school run time.

I OBJECT to the proposal in the local plan on the grounds that a wasteland solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area. Further development would disturb water table and increase risk of flooding to my property.

I OBJECT to the proposal in the local plan on the grounds that the proposed development site (A44) was used as GBC registered landfill site, not a quarry as listed as reference LLA 2081 in the local plan.

I OBJECT to the proposal in the local plan on the grounds that the 1963-8 Ordnance Survey maps of the proposed site mark it as “refuse and slag heap”. It is therefore unsuitable for such a development on health reasons.

I OBJECT to the proposal in the local plan on the grounds that the Traveller Accommodation Assessment research, purported to have been undertaken in June-July 2012 by Mill Field Services, cannot be the case. The Sittingbourne based market research company was dissolved in January 2011 according to the government companies site.

I OBJECT to the proposal in the local plan on the grounds that both Envirossearch report RS1100201_1_1 dated 17th February 2004 concludes “potentially contaminative industrial sites identified from analysis” of Ordnance survey maps.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM)?

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I often visit my in-laws who live in Ockham, who are an integral part of our family. The traffic around the M25/A3 Junction, and indeed the local traffic level in Ockham, is already dangerous due to the volume. If there were to be more cars, as I understand it around 4000, then that junction will become dangerously overcrowded. The local lanes are just not equipped to take the inevitable increase in traffic, especially in view of the many cyclists who use the area.

I object to the inclusion of the site formerly known as Wisley Airfield in the local plan as a possible site for the building of a large number of houses. The planning committee have unanimously refused planning permission for houses to be built on that site so there is no reason to include it in the Local Plan. It cannot be built as there is no permission for it.

I object to the inclusion of the site formerly known as Wisley Airfield in the local plan as a possible site for the building of a large number of houses as it undermines the concept of localism and community cohesion and assent.

I especially object to the detrimental impact on transport, local roads and road safety. I specifically object to the proposition that the development will result in a meaningful detriment to the community’s ability to safely cycle or walk. The development is dislocated from public transport hubs and the residents will be entirely reliant on their cars to travel, as there are no transport links of any kind except narrow roads and the enormously busy M25/A3 junction, which could not stand an influx of thousands of extra cars.

Because the Olympic Cycle race and the Prudential Ride London-Surrey cycle race come through Ripley and past Ockham and Horsley, cyclists are encouraged to cycle throughout this area. The number of cyclists on these narrow roads has increased dramatically especially on Saturday mornings, coincidentally the favoured shopping time for most people. I object to the addition of any extra cars that will be an undeniable danger to these cyclists; discouraging cycling in direct contravention of the governmental aspirations to encourage it both as a sport and mode of transport.

Wisley Gardens has proposed an expansion which will increase visitor traffic to a level that will already increase more than it stands today and so I object to any proposal that will increase the traffic any further and put an already over populated road junction under even greater strain making long stationary queues a probable permanent feature of this junction.

I object to the detrimental effect the development would have on the character of the area. Houses in Ockham are old, vernacular, set back from the road, built in hollows or behind trees, are a maximum of two stories, with perhaps an attic conversion, and very sparsely arranged in terms of number of houses per hectare; it is part of our local culture and heritage. This development is scheduled to be built on the crest of a hill, is urban in nature, and has a population density equal to or greater than the most congested parts of London. It will include units up to five stories high; twice the height of anything in the area. I strongly object to the detrimental effect the proposed development will have on the environment and the various sites of special significance that border it.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**OBJECTION**

As the current occupiers of Ash Green Station, we feel well based to be able to comment on the rather strange boundaries you have created for Ash Green in the plan. You are proposing that Ash Green Road be included in the Ash and Tongham urban area. Where will the boundary be on A28 as you are proposing development of this site? There will be no boundary between Ash and Ash Green. Ash Green actually starts North of Ash Green Road. We believe the greenbelt boundary should be placed north of Ash Green Road as a minimum.

The amount of proposed development in A28 will detrimentally change the character of the village. Large housing developments are not in keeping with Ash Green and the surrounding area and the density of the development is vastly too high. Ash Green is only suitable for accommodating small scale infill housing. Extending the village by over 20% cannot be classed as small scale infill. Rural Ash Green is not a Strategic Area for Growth, this development threatens turning the area from rural to urban.

As the current owners and guardians of the locally listed, historic building of Ash Green Station, we feel that the historic context would be lost as we would be surrounded by and right in the middle of proposed new housing developments, not in keeping with the village.

According to the NPPF guidelines Ash Green is not a suitable location for sustainable development because it has no shops, doctors, community facilities and it's public transport infrastructure is very poor. Guildford Borough Council's own Settlement Hierarchy ranks this as the least sustainable location in the borough.

Local schools, doctors and dentists are already under pressure. We currently struggle to get a doctors appointment within two weeks.

We believe the proposed level of development is fundamentally flawed as there is a huge lack of infrastructure - a practically non existent bus service, no real means to safely get to Ash station (there is little option other than to use a car, either to get to the station or elsewhere), and already major congestion on local roads. Ash Green does not have a suitable transport network - we are not set up to take more residents and therefore more traffic. There are already huge delays and traffic jams locally with the main route through Ash in effect being closed 35 minutes out of every hour at the level crossing causing pinch points. We have eight of the top hotspots for traffic congestion within Surrey in and around Ash. The Hogs Back to Guildford at peak times is extremely congested and would struggle with any increase in volume.

Are Guildford Borough Council in correspondence/consultation with Hampshire County Council regarding the new building developments in Aldershot and the surrounding areas? We share bus, rail and road services (with one of the major routes out of Aldershot meeting the A323 at Ash), these new developments will put a strain on everything before Guildford Borough Council even start with any of their proposed developments.

Ash Green, Ash and Tongham has a long recorded history of flooding issues and the sewerage system is at full capacity. With the proposed level of development this will do nothing other than exacerbate an already major problem. Our house already suffers the effects from poor water drainage as the railway cutting is used for local surface water drainage. We have serious concerns that major development on this site could lead to further issues regarding flooding.

We believe site A28 is not suitable for development as our house which is as stated earlier on the local list of buildings which are of intrinsic historic interest would be impacted massively by any development on this site. The old station is built into the railway cutting, and as such we only have windows on the south side of the building at ground level, which is level...
with the old track bed. Any development of A28 would result in loss of light to our property and also mean we would be completely overlooked by properties on this site, we would lose all privacy. We would also have greatly increased noise and disturbance from all the residents and road noise, both within the estate and on White Lane. Where would the proposed entry and egress points be for this site? White Lane would be awkward and dangerous as it has a blind crest on the bridge to the north and a slight curve in the road to the south. Drovers Way is not designed to take this level of traffic. The junction of White Lane, Ash Green Road and Foreman Road has a history of accidents and a development on A28 would potentially add to this problem with increased traffic levels.

We feel it would be an incredible tragedy to lose such a wonderful greenfield site, which once developed, we would never get back, for us, or future generations. Under the proposed developments Ash Green would lose it's rural identity and historic boundaries. We need to protect these areas and instead redevelop urban areas and brownfield sites.

OBJECTION

As the current occupiers of Ash Green Station, we feel well based to be able to comment on the rather strange boundaries you have created for Ash Green in the plan. You are proposing that Ash Green Road be included in the Ash and Tongham urban area. Where will the boundary be as you are proposing development on site A28? There will be no boundary between Ash and Ash Green. Ash Green actually starts North of Ash Green Road. This is where we believe the greenbelt boundary should be placed.

The amount of proposed development will detrimentally change the character of the village and change it from countryside to urban. The NPPF sites that no development should do this. Large housing developments are not in keeping with the surrounding areas and the density is vastly too high. As the current guardians of the locally listed, historic building of Ash Green Station, we feel that the historic context would be lost as we would be surrounded by and right in the middle of new housing developments, not in keeping with the village. We would end up being the buffer proposed in A29!

We believe this proposed level of development is fundamentally flawed as there is a huge lack of infrastructure - a practically non existent bus service, no real means to safely get to Ash station (there is little option other than to use a car, either to get to the station or elsewhere), and already major congestion on local roads. Ash Green does not have a suitable transport network - we are not set up to take more residents and therefore more traffic. There are already huge delays and traffic jams locally with the main route through Ash in effect being closed 35 minutes out of every hour at the level crossing causing pinch points. We have 8 of the top hotspots for traffic congestion within Surrey in and around Ash. In the plan you suggest changes to road layouts to combat some of these issues, however it would just cause traffic to then travel through Ash Green, creating congestion throughout the entire area as well as on the main road A323. The area cannot take 1200 new homes and the thousands of extra vehicles that would inevitably come with them. The Hogs Back to Guildford at peak times is extremely congested and would again struggle with any increase in volume.

Are Guildford Borough Council in correspondence/consultation with Hampshire County Council regarding the new building developments in Aldershot and the surrounding areas? We share bus, rail and road services (with one of the major
routes out of Aldershot meeting the A323 at Ash), these new developments will put a strain on everything before Guildford Borough Council even start with any of their proposed developments.

Local schools, doctors and dentists are already under pressure. We currently struggle to get a doctors appointment within two weeks.

Ash Green, Ash and Tongham has a recorded history of flooding issues, with the proposed levels of development this will do nothing other than exacerbate an already major problem.

We feel it would be an incredible tragedy to lose so much of the greenbelt, which once developed, we would more than likely never get back, for us, or future generations. Under the proposed developments Ash Green would lose its rural identity and historic boundaries. We need to protect these areas and instead redevelop urban areas and brownfield sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A28

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

OBJECTION TO SITES A28 & A29 AND THE PROPOSED CHANGE TO ASH GREEN BOUNDARIES

I believe the title of Policy A28 needs to be corrected to say “Ash Green” not “Ash”. Policy A28: Land to the east of White Lane, Ash GREEN, states it requires

“(2) Sensitive design at site boundaries that has regard to the transition from urban to rural
(3) No unacceptable impact on trees and ancient woodland
(4) Recognition of the historic location of Ash Green village”.

However I believe the Local Plan (Policy A28) will impact on trees and ancient woodland within the site and does not recognise the historic location of Ash Green village. I have outlined evidence to support my beliefs below.

As the current occupier of Ash Green Station, I feel well based to be able to comment on the rather strange boundaries Guildford Borough Council has created for Ash Green in the 2017 plan. GBC are proposing that the houses of Ash Green Road along with the land south of this up to and including site A28 be included in the Ash and Tongham Urban Area (ATUA), which is historically Ash Green. There will be no boundary between Ash and Ash Green. Ash Green starts on land North of Ash Green Road (part of the proposed A29 development), a fact which seems to have been ignored by placing A28 into the proposed ATUA. I believe the countryside boundary should be placed along Ash Green Road as a minimum but ideally allowing for a buffer into the field south of Ash Manor but north of Ash Green Road, with A28 left as countryside, not shoe-horned in as part of the proposed plans.

The more appropriate, natural defensible boundaries would be either along the old railway line or preferably, along Ash Green Road, which would retain Ash Green village and station in its historic location.

The Ordinance survey map as shown in GBC own Greenbelt and Countryside Study names Ash Green both to the north of the old railway line as well as the south. (see below)

[Map]
As can be seen on this historic O/S map, circa 1920 there were no buildings mapped in Ash Green to the south of Ash Green Lane East, the only properties in Ash Green were those to the north of the railway cutting. Buildings specifically named are Ash Green Station and Ash Green Farm, with the ancient woodland of College Copse running from the railway cutting to Ash Green Lane (east).

[Map]

Ash Green Ash Green (modern estate) (to the south of Ash Green Lane East) was not the original Ash Green, but had started to appear by mid 20th century, as this map shows circa 1944. The entrance to Dene Lodge through the ancient woodland marked as College Copse has been mapped, showing that the whole of site A28 was originally covered by College Copse. A portion of the remainder in A28 is now classed as ancient woodland, therefore we believe any trees north of the ancient woodland on A28, especially on the western boundary of A28 adjoining White Lane up to the railway cutting be treated with a high degree of sensitivity as they are growing on land which once formed College Copse.

[Map]

In addition to the above maps in relation to the boundaries of Ash Green village, this image from 1977 shows signage indicating Ash Green is to the north of the railway cutting as well as to the south.

[Image]

I would also like to bring to attention that the bus stop north of the railway line outside the old station on White Lane is referred to as “Ash Green, Old Station”.

[Image]

I wholly agree with your statement in the local plan (below)

Section 3 Spatial Vision, which states:
“Further development is also proposed in and around Ash and Tongham on land beyond the Green Belt along with new green belt designated to prevent Ash and Tongham merging with the village of Ash Green.”

I wish to see historic Ash Green comprising Ash Green Road and Ash Green Station included as part of the area of separation.

I feel the locally listed building of Ash Green Station under the proposed plans would lose its historic context of actually being in Ash Green. It is a ‘Heritage asset’ as defined by the NPPF; “A building, monument, site, place, area or landscape identified as having a degree of significance meriting considerations in planning decisions, because of its heritage interest. Heritage asset includes designated heritage assets and assets identified by the local planning authority (including local listing)”. The NPPF also states “Significance derives not only from a heritage asset’s physical presence, but also from its setting”. I believe Guildford Borough Council needs to give more consideration to Ash Green Station and its historical setting.

As stated in Policy D3 below: Historic Environment.

“1) We will conserve and enhance the historic environment will be conserved and enhanced in a manner appropriate to its significance. We will support development of the highest design quality that will sustain and conserve, and, where appropriate, enhance the special interest, character and significance of the borough’s heritage assets and their settings and make a positive contribution to local character and distinctiveness will be supported.

2) Heritage assets are an irreplaceable resource and works which would cause harm to the significance of a heritage asset, whether designated or non-designated, or its setting, will not be permitted without a clear justification to show that the public benefits of the proposal considerably outweigh any harm to the significance or special interest of the heritage asset in question. “

The proposal to remove historic Ash Green from Ash Green goes against the NPPF policy contained within the Local Plan (as shown below), which GBC says it will adhere to.
4.5.43 We will ensure that new development must conserve heritage assets in a manner appropriate to their significance. The NPPF defines significance as “The value of a heritage asset to this and future generations because of its heritage interest. That interest may be archaeological, architectural, artistic or historic.” The contribution of the setting of heritage assets to the appreciation of these qualities will be carefully considered alongside more direct impacts of development proposals.

The proposed changes would remove Ash Green Station (locally listed) and Ash Green Road out of Ash Green, as well as the historic housing of the Ash Green area.

By developing A28 there is also potential to lose the aforementioned ancient woodland within A28 as well as detracting the original setting of The Old Station.

A29 also goes against this policy and NPPF guidelines by placing Grade II Listed Ash Manor and associated buildings in the centre of a modern housing estate.

Policy D4: Character and design of a new development states that
1) High quality design is expected in the borough. All developments will:
(l) conserves locally and nationally important heritage assets and conserves or enhances their settings
(m) has no unacceptable effect on the amenities enjoyed by the occupants of buildings in terms of privacy, noise, vibration, pollution, dust, smell and access to sunlight and daylight.

By moving Ash Green village boundary (l) would not be complied with. A28 would also have an impact on Dene Lodge (locally listed building) and A29 (south of Ash Green Road) would impact on the setting of Woodberry (also locally listed). Development of A29 around Ash Manor would impact the historic settings of Ashe Grange, Ash Manor, Old Manor Cottage, The Oast House, Stable and The Barn to the south of Ash Manor, all Grade II listed properties.

In reference to (m), development of A28 has the potential to block sunlight, reduce privacy and increase noise at our property, due to the unusual fact it is built into a railway cutting and as a result it is below the ground level of A28. Station house ground floor only has windows on the southern side of the house (as the northern side is built into the bank), therefore the horizon for our southern aspect on this floor has a much lower effective horizon and as a result the sun only just reaches our windows in winter months. If development occurs on the northern boundary of A28 it could well result in the complete blocking of natural light to the property on the ground floor. Station House suffers from an unusual phenomenon in that sound reverberates and travels along the old railway cutting. We often hear the noise of trains on the current line in our house, even though it is some distance away. We have concerns that noise from A28, A29 and A31 will carry along the cutting in the same way.

As can be clearly seen on the map below, sites A28 and A29 to the south of Ash Green Road really don’t make any sense in terms of preserving historic Ash Green and should be removed from the plan. The buffer zone to separate Ash from Ash Green should be placed on the land to the north of Ash Green Road up to and around Ash Manor to compliment and preserve its well documented historic setting.

With the proposed southern extension of A28 it will potentially require the felling of trees and the destruction of the ancient woodland of College Copse up to the driveway of Dene Lodge. If A28 and the area of A29 south east of Ash Green Road are removed from the Local Plan it will provide obvious continuity to the natural defensible boundary for the countryside (the ancient woodland which bounds the eastern edge of A29 should be included in this) thereby preventing the urban sprawl of Ash and merging of Ash Green into the ATUA.

I also object to some of the current and proposed wording in the plan.

I believe Policy P3: Countryside, 4.3.29 should be amended to “Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before
further development”. This is because I think infrastructure is greatly lacking, especially in relation to roads, traffic and public transport.

I believe 4.3.30 should be amended to “We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green”. I think it is vital this sentence be included in the plan as there is a real danger with the current proposed sites of A28 and A29 losing Ash Green’s historical location and identity.

I believe Policy P3: Countryside (1) (c ) should be amended to “does not lead to greater physical or visual coalescence between Ash Green, the Ash and Tongham urban area and Aldershot”, in order to protect Ash Green as a separate village.

I believe Policy A29: Land to the south and east of Ash and Tongham, Requirements (6) needs to be amended to protect Ash Green village and the houses within it. As I have pointed out and evidenced with maps, Ash Green Station and the houses along Ash Green Road formed the village of Ash Green before the more modern buildings south of the railway cutting appeared, and therefore it is indefensible that GBC want to remove the buildings that originally formed Ash Green village from Ash Green.

I believe the wording needs to be “Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road/White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development should not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the build up area and the countryside beyond”.

The wording in Policy A29, Requirements (8) does not offer enough protection to the Grade II listed buildings of Ash Manor and their surroundings, and therefore should be more specific and say “Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Approaches and views to, from and around this heritage asset must be protected.”

In Policy A29, I believe Requirements (9) of a new road and footbridge should be in place before any development of A29 commences and the wording should reflect this. Also requirement (9) does not address the other significant transport infrastructure improvements that are required to cope with the huge increase in traffic created by Policy A29.

According to the NPPF guidelines Ash Green is not a suitable location for sustainable development because it has no shops, doctors, community facilities and its public transport infrastructure is very poor. Guildford Borough Council's own Settlement Hierarchy ranks this as the least sustainable location in the borough. Site A28 lies within Ash Green and therefore should be removed from the Local Plan.

Local schools, doctors and dentists are already under pressure. I currently struggle to get a doctors appointment within two weeks.

I believe the proposed level of development is fundamentally flawed as there is a huge lack of infrastructure - a practically non existent bus service, no real means to safely get to Ash station (there is little option other than to use a car, either to get to the station or elsewhere), and already major congestion on local roads. Ash Green does not have a suitable transport network - we are not set up to take more residents and therefore more traffic. There are already huge delays and traffic jams locally. We have eight of the top hotspots for traffic congestion within Surrey in and around Ash. The Hogs Back at peak times is extremely congested and would struggle with any increase in volume.

Are Guildford Borough Council in correspondence/consultation with Hampshire County Council regarding the new building developments in Aldershot and the surrounding areas? We share bus, rail and road services (with one of the major routes out of Aldershot meeting the A323 at Ash), these new developments in Hampshire will put a strain on everything before Guildford Borough Council start with any of their proposed developments.
Ash Green, Ash and Tongham has a long recorded history of flooding issues. With the proposed level of development this will do nothing other than exacerbate an already major problem. Our house currently suffers the effects from poor water drainage as the railway cutting is used for local surface water drainage. I have serious concerns that major development around us could lead to further issues regarding flooding.

Where would the proposed entry and egress points be for site A28? White Lane would be awkward and dangerous as it has a blind crest on the bridge to the north and a slight curve in the road to the south. Drovers Way is not designed to take this level of traffic. The junction of White Lane, Ash Green Road and Foreman Road has a history of accidents and a development on A28 would potentially add to this problem with increased traffic levels. I feel it would be an incredible tragedy to lose such a wonderful greenfield site, which once developed, we would never get back, for us, or future generations. Under the proposed developments Ash Green would lose its rural identity and historic boundaries. We need to protect these areas.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Answer (if comment is on questions 1-7 of the questionnaire): ()

17.1 OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Answer (if comment is on questions 1-7 of the questionnaire): ()
18.I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability and
- flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. I OBJECT to Gosden Hill developement being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.
Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
15.1 OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

<tr>
<td>16.1 <strong>OBJECT</strong> to the inclusion of the land for new on/off ramps at Burnt Common (A43a)</td>
</tr>
<tr>
<td>The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved. This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.</td>

8.1 OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)  
I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.  
The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

5.1 OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

6.1 OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

7.1 OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---
1. **POLICY E6 - The leisure and visitor experience**

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains Travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
Student accommodation should provide for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3 – Rural Exception Homes

I OBJECT. This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
9.I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

10.I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
11. OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

12. OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3.1 OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4.1 OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the
flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2057  Respondent: 15263073 / James Walker  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/2058  Respondent: 15263073 / James Walker  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2.1 OBJECT to the Borough Wide Strategy (Policy S2)

a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

b. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

c. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”.

Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4626   Respondent: 15263073 / James Walker   Agent:  
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity.
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4627  Respondent: 15263073 / James Walker  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.
18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented."
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()
PLEASE SHOW TO THE PLANNING INSPECTOR

I object strongly to GBC’s proposal to desimate the countryside surrounding Send Village by removing it from the Green Belt. I cannot believe that as a clear election promise to preserve and protect the Green Belt you now propose to renege on that promise. It would appear you have no special circumstance to justify abandoning the National Planning Policy Framework which was intended as permanent and you now propose to ride roughshod through Ancient Woodland.

I object strongly to the suggestion that GBC are in fact taking the building responsibilities intended for Woking BC I find that a particularly sinister practice.

I object strongly to the fact that you, GBC have changed every major site in Send proposed for development since 2014 and now you have just added a huge new road junction. As you have made significant changes to your original and amended proposals, your current changes now require another full consultation not the short cut of regulation 19 which GBC are now trying slide this proposal through on.

I object to the fact that GBC have refused to disclose the calculations regarding Guildfords housing requirement, the proposal to build 400 houses on Garlicks Arch (a site that floods, and ancient woodland) and 7000sq meters of industrial space is clearly ridiculous and it has been suggested the beginning of GBC to merge Guildford to Woking. Once you remove the Green belt from our Villages you know the developers will desimate our homes, needlessly. you have perfectly adequate accommodation for the proposed industrial space available at Slyfield Industrial Estate inconveniencing no homeowners.

I object to the fact that your proposed building on Clockbarn Nursery and Send Hill are currently served by narrow and twisty lanes. Tannery Lane (Clockbarn Nursery) cannot take anymore traffic the junction is already dangerous. Likewise, Send Hill is inappropriate not only because of the single access country road providing insufficient access but also because the subsoil of the proposed site contains documented unsafe landfill waste which is registered at GBC.

I object to the new interchange with the A3 at Burnt Common as an already busy road, often gridlocked during rush hours, would have to take the traffic from the proposed new GBC building at Wisley, Burpham and Blackwell Farm we simply cannot support it and the noise and pollution levels would be unmanageable and possibly dangerous.

Our infrastructure is already stretched, you have alternative available sites and I find your trudging through the Green Belt and your sinister handling of this planning proposal, unacceptable. I object to the fact that Guildford and Surrey County Council own brownfield sites which would accommodate your plans.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Yet again I find I must write to you regarding your proposal to remove Send and Ripley from the Green Belt. I am so disheartened that you appear to disregard the perfectly valid plea of the local residents and that the infrastructure of our locality is already stretched and many of your plans seem unnecessary, vicious and petty.

I object to the fact that I find my breathing laboured as a direct response to the already heavy weight of traffic which crawls past my house in gridlock, not just domestic traffic but the increase HGV is remarkable in the last few years, and my house now shakes as some of these vehicles pass my house belching pollution into the air we breath, and you feel happy to increase the threat to our health in this way, may I remind you we have a primary school on the road you wish to increase the traffic on, I object to the fact that although there seems plenty of small building projects locally, (indeed I understand there is permission for six more properties on my neighbours garden recently agreed),this is happening all over Send and Ripley, but still not enough to satisfy GBC who really don't care that it is so difficult to get a doctors appointment in our surgery, that we are already subject to local flooding.

I object to the fact that you have a total disregard for the beauty and peace of Ancient Woodland that benefits us all but you wish to heartlessly bulldoze through the heart of British countryside.

I object that you have brownfield sites unused and available but you still feel it necessary to scar our land with more empty warehouses.

I cannot believe that you now plan to increase by over 30% the number of houses you want built in Tannery Lane.

I object to the fact that you need our votes and money but you do not listen, you are prepared to increase the toxicity in this area, you are apparently happy to destroy ancient natural beauty and you make no sense, you are a lazy council, unprepared to listen, to use sites already available, and you still expect unquestioning support. I am completely disheartened, sad, that you have so little heart and fight.

Answer (if comment is on questions 1-7 of the questionnaire): ()

It is essential that layout, scale, form, height and materials, as described is a primary consideration in all applications. In Guildford town no buildings should be developed that exceed 4 stories, except in circumstances where it can be clearly demonstrated that the critical views and surrounding environment will not be compromised, and then 5 stories should be the absolute limit.

Answer (if comment is on questions 1-7 of the questionnaire): ()

It is essential that the University of Surrey be required to provide accommodation for students on campus. I would like to see this percentage increased so that the demand for housing in the town is decreased allowing more houses to be available for general rent and sale. Provision of on campus housing should be scheduled for the early years of the plan.

I oppose the development of the Blackwell Farm site, there cannot be a good solution to the problem of additional pressure on traffic using this part of the road network.

The housing proposals in Guildford Town Centre must only be approved if there is a limit to height of building, no more than 4 stories, that there is no interference with the unique views that give Guildford Town its character. High quality materials should be specified that blend with the natural environment. There should be no increase in the number of houses allocated for the Town Centre, whatever is decided for other sites. Green spaces in the Town need to be preserved.

It should be accepted that provision of the level of housing required will mean some incursion of the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

the assessment of housing need expressed in the SHMA produced by GL Hearn, is flawed, making no allowance for the transient population of higher education students, and by a number of other issues. It is essential that these issues are addressed and rectified with numbers reducing from circa 700 per year to circa 500 per year.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object very strongly to the proposed development which makes no realistic assessment of the impact it will have on a valuable section of greenbelt both for the existing community and a large group who use it as a recreational resource.

In particular I am gravely concerned about the effect on local roads which are already under great pressure and will not cope with the significant additional burden

I appreciate that GBC will encounter objections wherever development is proposed and probably views it as less difficult to try and manage a small number of larger developments than many small ones. However, for this proposed site, the extent and nature of the change is far beyond that which any community could reasonably be expected to accept.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this proposed development as it will greatly increase the volume of traffic on roads which are rural and often used for recreation. The siting of this development will lead to large numbers of vehicles in West Flexford Lane and Flexford Road. The planning document mentions access to the station which is of course important but no household in this area will be without a car and the unpavemented roads on which children may walk to buses and the station will be significant less safe as well as the large number of ramblers who use these routes.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

17.1 I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
18. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability and
- flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to Gosden Hill development being in the Local Plan The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from...
encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

15.1 OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

16.1 OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

8.1 OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
5.1 OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2081  Respondent: 15263905 / Philip Walker  Agent:

Answer (if comment is on questions 1-7 of the questionnaire): ()

6.1 OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7.1 OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/2089  Respondent: 15263905 / Philip Walker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains Travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.
4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

 Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3 – Rural Exception Homes

I OBJECT. This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

9.1 OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and
with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

10.1 OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Answer (if comment is on questions 1-7 of the questionnaire): ()

11.1 OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 &
M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

12.1 OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

3.1 OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and
the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

4.1 OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2076  Respondent: 15263905 / Philip Walker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

   The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

   The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

   The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

   The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

   What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2077  Respondent: 15263905 / Philip Walker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. I OBJECT to the Borough Wide Strategy (Policy S2)

   a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

   b. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

   c. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study.
On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at
this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4604  Respondent: 15263905 / Philip Walker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Brownfield sites centrally should be developed to produce more accommodation for students on campus and homes for the elderly thus freeing up family homes in the surrounding areas that could come back onto the market to ease the housing shortage.

I strongly believe this expansion plan is wholly inappropriate to the structure, size and layout of Guildford.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

17.1 OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/681  Respondent: 15264001 / Robert Peake  Agent:
18.1 OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability and
- flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/1077  Respondent: 15264001 / Robert Peake  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

15.1 OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

16.I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

5.1 OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

6.1 OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):**

7.1 OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/2103  **Respondent:** 15264001 / Robert Peake  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):**

1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that
order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains Travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3 – Rural Exception Homes

I OBJECT. This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

9.I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

10. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
11.1 OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

12.1 OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ()
3.1 OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4.1 OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1.1 OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2.1 OBJECT to the Borough Wide Strategy (Policy S2)

a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

b. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

c. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4608  Respondent: 15264001 / Robert Peake  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to this proposed development. It is in an exceptionally beautiful area of Green Belt land and is entirely inappropriate for development. There has already been significant encroachment by sequential development over the years and there has to come a time when a line is drawn. The remaining ancient woodland appears to be excluded from the proposed development, but this woodland and its important wildlife would inevitably be adversely affected by being enclosed by new and existing development. The traffic issues in the area are already severe, and these should be addressed before consideration is given to increasing the load on the A31 and A3. I know from personal observation and work in collecting evidence for a Rights of Way application, that all the fields included in the proposed site are currently used extensively by walkers (with and without dogs), cyclists and horse riders living in the Wood Street, Onslow Village, Fairlands, Normandy and Wanborough areas, and these fields are therefore a really important part of the amenity of the area. Many of the people I have spoken to also visit the Ranges, part of the Thames Basin Special Protection Area, and they would undoubtedly frequent the latter more if these fields are taken from us. I hope that development on this site will not proceed, but please see my comments above re an addition to the infrastructure requirements under Policy I1 and Appendix C in the event that our objections do not prevail.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object vehemently to the proposed development on this site which seems to me to be the most extraordinarily inappropriate and ill conceived of all the proposals in the draft Local Plan. This is Green Belt land, previously identified as a “red” site of high sensitivity, and the change appears to be predicated purely on the basis of a developer having come forward with a plan, money, and arguments unsupported by evidence.

The sheer scale of the proposal is audacious and totally impractical. Quite apart from the fact that it would destroy the character of our quiet, rural village, and destroy our very special countryside and wild life, the infrastructure is simply incapable of supporting any significant development, let alone something of this scale.

There is clear evidence that there is absolutely no need for an additional secondary school in the area. The neighbouring secondary schools are currently under-subscribed, King’s College by as much as 57%. The New Guildford University Technical College will open in 2018, and both King’s College and Ash Manor have scope to increase their capacity if they reach 100% of their current capacities. Christ’s College also has space, capacity and willingness to expand its intake, and other schools in Ash and Woking can also offer places to Guildford residents. There are thus many ways of meeting Guildford’s needs without going to the expense of building a new school at all, but even if there was a need, this is an entirely inappropriate site. Ignoring the circularity of the suggestion, even if the development went ahead, it would only generate a need for one form per year which could easily be accommodated within existing local schools. I hope that these arguments alone will be sufficient to ensure rejection of this proposed development. However, I would also draw attention to the impact on traffic, flooding and the Thames Basin Special Protection Area:

- **Traffic:** Our roads already take very heavy traffic during the morning and evening rush hours and grind to a halt when accidents on the A31 or A3 prompt motorists to detour via the A323 and Westwood Lane and Glaziers Lane, the rural lanes on either side of the proposed site (each with pinch points at the railway crossings). As things are, it is not unusual for a morning journey from Normandy to Guildford to take over an hour. The impact of the proposal to close off access to Guildford via Farnham Road can only exacerbate matters, as will developments already planned in Aldershot. Adding 1100 new homes plus a school of up to 8 forms per year would simply turn the whole area into a huge permanent gridlock with traffic fumes killing any wildlife that had survived the development. The increase in traffic would not only affect Normandy but the whole of the surrounding area, from Guildford to Aldershot, including Ash, Wood Street Village and Park Barn.

- **Flooding:** Normandy has an extremely high water table and regularly experiences serious problems with flooding. The stream running across Westwood Lane, Glaziers Lane, Elmgrove Lane and under the A323 at Tickners Bridge frequently bursts its banks in a number of places. My house has been completely flooded internally on a number of occasions and we have personally spent a lot of money over the years improving our flood resilience as well as benefitting from supportive measures taken by GBC. However, we are very dependent on the capacity of Normandy’s fields and trees to absorb surface water during the growing months and of the fields to provide water storage space in the winter. Building over the fields will take away this capacity and overload the stream, with consequent flooding at vulnerable points such as the restricted bridges at Glaziers Lane and Elmgrove Lane. Such flooding is highly likely to flood houses internally and to block road traffic. Recent improvements to protect the Beech Lane residents from perpetual flooding have been designed on the basis of current arrangements ie with the fields between Westwood Lane and Glaziers Lane as a buffer, so the downstream risk will be further heightened if this development goes ahead.

The additional housing is also being suggested as a solution to the apparent problem that Normandy and Flexford have lost shops and pubs “due to insufficient populations to support them”. For many years in the past, with smaller populations, our village did sustain shops and pubs. Their demise is far more likely to result from changed behaviour and different needs: cars, internet, smoking bans, etc have significantly altered the way people shop and socialise nowadays. If you ask the people of Normandy whether the provision of a few shops and pubs is worth the destruction of our countryside, wildlife and the character of our village, the answer would undoubtedly be a resounding “no”.

The name of Normandy is believed to derive from “no man’s land”, reflecting the openness of our area. Normandy is, and should remain, a vital “green lung” separating the potential urban spread from Guildford and Aldershot. Allowing 1100 new houses, a huge school, and other buildings to replace open countryside would strangle the whole area. The proposed site is within a stone’s throw of the Thames Basin Special Protection Area. Normandy, Pirbright and Ash residents are close enough to access the firing areas before and after shooting finishes and many of us do use the whole area regularly. This is such a special and lovely place to walk, ride and cycle, that it is inconceivable that, irrespective of any SANG
For all these reasons, this extraordinary and wholly inappropriate proposal should be rejected and taken out of the proposed Local Plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the order of stages inherent in this policy. It is clear that the borough has significant highway problems at present without any additional development, but the measures to address these are not yet clear and would anyway take many years. Some of the proposed developments would clearly have a huge impact on transport pressures, but detailed assessments would not be undertaken until planning applications are submitted. It nevertheless appears that the infrastructure plans are being used to justify taking rural areas out of the Green Belt for developments which could well prove to be unsustainable. This is unacceptable: sustainability should be proven first, with an appropriate timetable.

FRR5: Please see my comments on Policy P4.

SED3: I object to the proposal for a secondary school near Wanborough Station. Please see my comments objecting to Site A46.

Additional: Due to the volume and speed of traffic on the A31, there is already a need to provide safe crossings where footpaths and bridle ways theoretically connect the north and south slopes. The communities of Normandy, Wanborough, Puttenham, Seale, Compton and Wood Street Village used to be well connected, but the north / south links are now almost unusable. If site A26 does go ahead, we will lose a huge amount of countryside on which many of us walk, cycle and ride every day. The developers should be required to provide significant funding for safe access to the southern slopes of the Hogs Back to partially mitigate our loss, with some local government and highways funding also being made available to make our rights of way viable again and to reconnect communities rent asunder by traffic.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I absolutely object to the principle of insetting or removal of any of our rural villages from the Green Belt. I object because they are really are of an open character and do make an important contribution to the openness of the Green Belt. In particular, I object to the insetting or removal of Normandy from the Green Belt. Normandy’s name was derived from “no man’s land”, reflecting its character as a collection of rural settlements with significant open land within, between and beyond them. Furthermore, Normandy is renowned for its very special wildlife which is an important part of the Green Belt. It is thus an absolutely crucial part of the “green lung” for maintaining the separation between urban growth. Elsewhere in the draft Local Plan eg Policy P3, the need to avoid the merging of Ash, Tongham and Ash Vale is recognised. It is just as important to ensure that the open character of Normandy’s settlements is maintained, and this can only be done by retaining Normandy fully within the Green Belt.

I also strongly object to the removal of Blackwell Farm and its surrounding fields from the Green Belt. There has to be a limit to step by step encroachment of urban sprawl, and it is entirely inappropriate to downgrade this exceptionally beautiful area which is still actively farmed today and clearly contributing to the openness of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I believe this policy should be strengthened to require more explicitly that all development proposals should demonstrate how they will manage severe weather events and the impact of surface water on other properties, roads and footpaths. They need to be able to show that they have investigated and understood how local water flows change at such times. It is also important to ensure that the knock on effects of improvements in surface water management are considered eg there has recently been significant improvement work in the Beech Lane area of Normandy. This will put potentially put added stress on downstream areas which would have to be taken into account for any development in the area designated as A46 to ensure that the risks around Glaziers Lane and Elmgrove Lane are not increased during storms or persistent heavy rainfall.

Comment ID: PSLPP16/7479  Respondent: 15264065 / Roshan Bailey  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy as it stands since I believe it needs significant strengthening to ensure the appropriate level of protection for the Thames Basin Special Protection Area. It is important to ensure that measures required of developers will make a real difference in that the new residents will really use the designated alternatives. This means that the density of housing must be limited, truly significant green spaces must be an inherent part of larger developments, and alternative provision for smaller developments must be close by with easy access for new residents. I object to the principle that developers may simply make a payment to Guildford Borough Council against a list of SANG sites which the new residents will not actually use as an alternative to the TBSPA. It is a cop out for developers, albeit a potential money making scheme for GBC, and will not achieve the protection ostensibly sought. Please also see my comments on Policy I1 re an addition to Appendix C. I walk for 1 to 2.5 hours almost every day, half the time towards the slopes of the Hogs Back and half the time on the Ranges (TBSPA). If site A26 goes ahead and the mitigation I suggest does not take place, I will undoubtedly walk on the Ranges even more often, and other walkers and riders would respond similarly.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
While I accept the principle of a presumption in favour of sustainable development, I think it is important to stress the sustainability aspect. In particular, I think this policy should be enhanced with some words to reflect the importance of the Green Belt within our Borough. Please also see my comments on Policy P2.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the numbers set out in this policy. There appear to be serious flaws in the methodology used in the SHMA and the conclusions derived from it are consequently unacceptable. Particular issues of concern are that inconsistent jobs and employment data have been used for the economic assessment of housing need; there is no assessment of the likely impact of Brexit; and the economically derived housing number is taken as the OAN without consideration of the potential for sustainable commuting or the implications of the Green Belt land area within the borough. There is also significant circularity in the arguments. For instance, a significant proportion of the projected economic growth arises from the construction work to build dwellings for the workers needed in economic growth. So you only need the workers if and while you build the houses. This is not sustainable economic growth and cannot justify building the houses. Similarly, schools are said to be needed to serve the new homes. The answer to this circularity is not to build the houses.

I also object to the approach by which huge developments are proposed for just a few sites in extremely sensitive areas. A more organic approach with more but smaller developments spread across the borough to meet only the real needs of our communities would be much fairer and more sustainable. There is a perversity in proposing to destroy the character of our villages and thus reducing their attraction. If the Economic Strategy is not realistically achievable without destroying the character of our borough and its villages, then that strategy should be reviewed. Economic growth at all costs is not a desirable objective.

Given my recognition of the need for some development and for all of us to share the burden, I am not commenting in detail on all the sites in my neighbourhood, only on A26 and A46 (see below). However, I would make the general comment that there must be no “thin end of the wedge”, no continuing encroachment once a small site has been approved, and there should be consistency in application of the policies.

I also object to the lack of any policy reference to retrospective applications. I suggest that specific words should be included in the policies, probably this one, to make it clear that developing first and asking later will not be tolerated. Indeed, there should be a presumption that retrospective permission will not be granted and that enforcement action will be taken except where there is a really exceptional and acceptable explanation for the failure to seek approval first.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I still object to the proposals for site A26 Blackwell Farm as a whole despite the small reduction in house numbers. This site should never be developed. It is an integral part of the beauty and special landscape around the Hogs Back. There has already been too much encroachment onto this area, and any further development should take place within the parts already built up. There is plenty of scope for the University to make greater use of the land already occupied eg building above and below car parks etc. The land is actively farmed and is also extremely well used by local families and individuals for walking, running, cycling, horse riding, bird watching, observing flora and fauna, etc, and elimination of this lovely open space will send more people to the Thames Basin Special Protection Area. The infrastructure changes that would be required for a development of this scale, in particular the roads and junctions, would add further destruction to the AONB, AGLV and Green Belt. I also specifically object to the new proposal for a huge secondary school on this site. The evidence collected and submitted last summer showed that there is absolutely no need for an additional secondary school in the area. The neighbouring secondary schools are currently under-subscribed, King’s College by as much as 57%. The New Guildford University Technical College will open in 2018, and both King’s College and Ash Manor have scope to increase their capacity if they reach 100% of their current capacities. Christ’s College also has space, capacity and willingness to expand its intake, and other schools in Ash and Woking can also offer places to Guildford residents. There are thus many ways of meeting Guildford’s needs without going to the expense of building a new school at all.

I welcome the clearer wording regarding timing, phasing and application of planning conditions and obligations. It is imperative that no developments should be approved without clear, acceptable and funded plans in place to provide adequate and effective infrastructure of all types and that even where approval has been given, development must follow provision of infrastructure and not proceed without such infrastructure.  

What changes (2016)/further amendments (2017) do you suggest should be made to the document?  

Attached documents:
I still object to Policy P2 as redrafted since it still does not address a very large proportion of the thousands of objections made to the previous version. I particularly object to the reference in paragraph 1 to the Policies Map: the words “as shown designated on the Policies Map” must be deleted if this paragraph is to be of any use at all. I object to the proposals that the settlements of Normandy, Flexford and Walden Cottages, and the traveller sites to the rear of Palm House Nurseries (A49) and Whittles Drive (A50), should be inset from the Green Belt. These are all areas and sites contributing to the openness of the Green Belt and also contributing to the views to and from the Hogs Back AONB. I also object to the insetting of other villages from the Green Belt and “infilling” of others and wholesale extension of settlement boundaries across the Borough. Such changes ignore the importance of a permanent Green Belt preventing urban sprawl and providing a “green lung” which should be protected, with any individual changes being subjected to rigorous scrutiny and being dependent on clear demonstration of exceptional circumstances justifying any over-riding of the Green Belt provisions. I would also point out that para 4.3.13 is incorrect and misleading in saying that a long list of villages are now inset from the Green Belt – this simply refers to GBC’s proposal last summer, to which there have been huge objections from residents and which we hope will be rejected through the Local Plan process.

I object to the proposals for amendments to the current Green Belt boundaries.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I strongly object to the building a possible 6000 new homes on green belt land, we are in Charlock Way Burpham and a development of about 40 new houses and apartments have caused problems in New Inn Lane, and Burnet Avenue with on road parking, trying to get in and out now is very difficult, and dangerous when trying to cross the road and for children walking out in between parked cars, I hope you think very hard about loosing our green belt.

Green Belt Policy 2 at paragraph 4.3.15

I object to the proposal to insert Send Business Park from the green belt because.

1. Huge traffic problems already exist in this area and the proposed development would only increase the problems.
2. As with each of the previous policy objections, this policy will seriously effect the beauty of the green belt in this area, and with diligent investigation the planning authority at Guildford Borough Council should show concern for the loss of the green belt and find sites which will be less affected and are not as attractive for residents.

I am particularly concerned at the huge increase in housing proposed for the part of the borough near where I live (Burpham) and the loss of Green Belt as a consequence.

Of particular concern is the lack of attention to the necessary infrastructure given the very large increase in demand it would create, particularly in relation to highways. The already seriously overstretched roads in Burpham where there are frequent major traffic problems already need much greater attention including enhancement of the Burpham junction with the A3 to 4 way if there is to be any significant development in the area. An enhanced junction at Burnt Common will not overcome this problem.

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

This is disastrous as the increased volume of traffic would impact the local communities. The increased traffic from London (M25) to Woking would go through Burnt Common, Send and Old Woking, which currently cannot cope with the existing traffic. This is unsustainable.

I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to you to object against the local development plan that has been proposed by Guildford Borough Council for the villages of Normandy and Flexford (Site A46/A47). You are proposing to build 1,100 new homes, a 1500 pupil secondary school, 6 show people pitches with yards and a nursing home in the rural villages of Normandy and Flexford. This massive development will be built on a huge area of Green Belt land. There are many issues that have been overlooked by you and I am not fully convinced you realise the implications of this build.

The land proposed is a vast square of green belt land, I don’t think I have ever seen such a large piece of Green Belt land sacrificed for development in this area before. If this build goes ahead it will destroy ancient woodland, including 500 year old oak trees that line the old drive of Westwood Place which is a listed building. This drive is now a public footpath and was once joined to Windsor Great Park, the land is steeped in history. The build will disturb defenceless wildlife which will struggle to thrive if forced to move and it will also destroy hedgerows and grasslands resulting in a decline in our bird and bee populations, which are already under threat. There is a proposal to create an area to move the wildlife too which is idiotic. Wildlife will stand a better chance if they are left alone in their natural habitat rather than forced out and ultimately destroyed. This build will change green fields into a large urban sprawl and therefore encroaching on the Surrey Hills Area of Outstanding Natural Beauty. The build will also destroy valuable agricultural land when the UK has already lost a total 2000sq kilometres in the last six years. The area is very prone to flooding and is saved most winters by the surrounding natural streams taking most of the brunt of the rain, a natural flood defence. The site would be built directly over these streams. Where would the water go? Most probably into the homes of Normandy and Flexford residents. Flooding has always been a problem in Normandy, increasing housing would only increase the risk.

This build will increase the number of homes in Normandy and Flexford by 100% each of these homes is likely to have at least one car and so the traffic situation in the area will be chaotic. In addition the proposed 1500 pupil secondary school will also add to a distavorous traffic situation during drop off and pick up times. The road infrastructure around Normandy and Flexford would not be able to cope with this drastic increase in traffic, vast number of homes will be caged in by a single lane railway bridge which will result in daily lengthy tail backs. This increase in traffic will choke a village blessed with clean air by increasing pollution, especially at peak times, risking the health of Normandy and Flexford residents. This proposed build is likely to take 15 years so not only will the end result cause a dramatic change in the road situations in the area but it will cause 15 years of disruptions, fumes, dust, traffic lights, road works and it wouldn’t surprise me if you saw a rise in illnesses within the village especially in the elderly and young as a result in this rise of pollution.

Normandy and Flexford are rural villages. This new proposal will merge them into one Normandy town, killing the rural feel and community forever. I understand the need for new homes in our country, I am 29 years old and getting on the housing ladder will always be a struggle, especially in the Surrey area but I do not understand how GBC can overlook so many brownfield sites that we have in the area and think it logical to ignore these and destroy our wonderful countryside
and build on Green Belt Land instead. There are many more area options for this build, if it is actually needed, that do not encroach on Green Belt land and I am confident that you have a good idea of these areas also. In my opinion GBC have taken the easy way out and this proposal is developer led as there was no mention of A46/A47 in the 2014 consolation and in fact this site was safeguarded so this is only in place because a developer has approached the council and offered them a secondary school in order to build their homes which has no respect for the principals of town and country planning.

The need for secondary school on site A46/A47 has not been proven. Every neighbouring secondary school to Normandy is currently unsubscribed and the birth rate which raised in 2011 and 2012 has now reduced so there seems no real need for a new school as we should just be using the spaces available already.

**Kings College** is 57% undersubscribed and if it does reach full capacity there is options for the school to be further expanded to accommodate new pupils.

**The New Guildford University Technical College** is opening in 2018 and will take 240 pupils from the age of 14 in its first year doubling to 480 places.

**Christ College** is taking 30 extra pupils a year as it has the capacity to do so and is willing to take more.

**Ash Manor** is undersubscribed by 110 and are supportive of the school being expanded to take more pupils in future. Ash Manor are also very concerned with the prospect of a new secondary school being built just three miles away from them as it will surely effect the amount of new pupils coming to their school.

**Connaught School** is undersubscribe by 90 places.

**Hoe Valley, Woking** will have the capacity of 840, at the moment it only has 120.

In addition to these schools, **Guildford County School** and **St Peter’s School** have already had approval to expand, clearly creating more spaces in these schools also.

The need for a new secondary school in Guildford Borough therefore seems unnecessary and there is no reason for one to be built in Normandy. If you wish to proceed with this proposal of a new secondary school the SCC Education officers need to demonstrate a clear need for a school at this location.

Surrey County Councils policy, dating back to March 2013 states that *We will maintain the Green Belt, Sites of Special Scientific Interest (SSSIs) and other environmental protections, and create a new designation – similar to SSSIs –to protect green areas of particular importance to local communities.*

And the SCC resolves

1. To use its power to protect Surrey’s Green Belt.
2. To support the National Planning Policy Framework (section 9 – paragraphs 79 to 92) and the Government’s policy of protecting the Green Belt.
3. To make Surrey’s MPs and the County’s Districts and Boroughs aware of this resolution.
4. That any Green Belt development in the County is in line with the needs and wishes of Surrey residents.

I do hope these pledges and policies do not fall short as at the moment they are not being followed and the Local Plan does not concur with them. I do hope that GBC will not let a community down by destroying its Green Belt, its wildlife and its rural village feel for ever. We are all so very lucky to live in such a wonderful area of outstanding natural beauty, I do not believe any of us have the right to destroy this land so I ask you to reconsider the Local Plan and site A46/A47 as your arguments do not weigh up and there are clearly more negatives then positives for Normandy, Flexford and Guildford Borough.

**Finally I sate again that I OBJECT to the proposed plan for site A46 and A47.**

*What changes (2016)/further amendments (2017) do you suggest should be made to the document?*
Comment ID: PSLPP16/14926  Respondent: 15265377 / Emma Thompson  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the employment strategy and impact on Garlicks Arch (A43) (Policies E2 and E5)

The development will result in the loss of existing local successful businesses, which have been employing local people over many decades, and are therefore sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14923  Respondent: 15265377 / Emma Thompson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

This will cause more congestion to the villages of Ripley, Send and Clandon, which have poor condition narrow roads and no footpaths, which are dangerous. More houses will increase this danger and unsustainable volumes of traffic

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the congestion that development will cause to the trunk roads A3/M25 (Policy12)

Both the A3 and M25 need improvements before any developments commence. This is clearly not going to happen in the timescales of the plan, so the proposed developments at Wisley Airfield (A35), Garlicks Arch (A43) and Gosden Hill (A25) should NOT take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14927  Respondent: 15265377 / Emma Thompson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have lived in Normandy for over 40 years, one reason for choosing my house being the surrounding green belt.

I am astounded that you can contemplate such a massive building programme on green belt land. Normandy is a small comfortable village and your proposals would completely change this with a dramatic fall in the quality of life and house values.

Over these last 40 years the traffic has grown beyond measure, meaning that it sometimes takes up to 15 minutes just to get out of Nightingale Rd. Every day there are long queues on the A31 heading East. The planned development would dramatically worsen this situation.

It must not go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/692  Respondent: 15265569 / Douglas and Sudha Young  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

My wife and I have read the Comments on the 'Proposed Submission Plan' submitted by the East Horsley Parish Council, and are broadly in agreement with the Council.

Being residents in East Horsley, we find that the parking problems in the Village, and at the two railway stations, are worsening all the time, and cannot imagine how it would be if all the proposed new homes are built. The doctors surgery is very busy at the moment, and again, with a great influx of new home owners and their families, it might cause a collapse of the medical facilities, especially in view of the shortage of GPs now-a-days.

We are concerned about the plan to build on Green Belt land as well.

There is the other side of the coin however, in that more houses are needed that are affordable by young families. Also for elderly folk to downsize to.

Horsley is a very pleasant village, with more, perhaps, elderly people than is the norm in small communities. The village serves them extremely well. Most do not want to leave the village when downsizing their properties and so losing touch with all their friends.

So, knowing that you have a very difficult target for new homes to meet, We would suggest that the arguments made in the East Horsley Parish Councils letter of the 13th June 2016 are given very serious consideration in order to reduce the knock-on effects in the future.

07 I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

03 I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.

The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
05 I object to the lack of proper infrastructure planning for sites (Policy I1)

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2136  Respondent: 15265889 / Christine Croston  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

04 I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2133  Respondent: 15265889 / Christine Croston  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

TO THE PLANNING INSPECTOR

I wish to object to the proposal in the local plan as under:

01 I object to not protecting the Green Belt (Policy P2)
I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/2134  Respondent: 15265889 / Christine Croston  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

02  I object to the Local Plan as the development proposed is not sustainable (Policy S1)

13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick’s Arch.

The development should be in urban areas where there is sustainable transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/2138  Respondent: 15265889 / Christine Croston  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

06  I object to the Borough Wide Strategy (Policy S2)

GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.
The Plan is unbalanced across the borough; there’s too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11% of the existing housing.

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**Site Allocation A42**

5.5 Proposed Site Allocation A42: Clockbarn Nursery, Tannery Lane, Send (Page 144), is allocated for new homes (Class C3), with the gross number of homes provided over the plan period now shown as having increased from 45 homes to 60.

5.6 The increase in the number of dwellings identified in the allocation is supported. This represents a more realistic reflection of the capacity of the site to provide new housing if this is to be done in an efficient manner which optimises the nature of the opportunity that exists to do this. It is considered that the optimal capacity of the site is higher than 60 dwellings and that there remains additional capacity to provide housing at an appropriate density. Through careful and sensitive design, particularly in relation to the context provided by adjacent areas of housing, the capacity of the site and the contribution that this makes towards providing new housing whilst avoiding the need to allocate additional sites elsewhere in the Borough (particularly in more sensitive or less sustainable areas), can be maximised.

5.7 The addition of Requirement (3) in the summary table relating to Policy A42 on Page 241 of the document reflects the addition of the designation of the area as the River Wey Navigation. This amendment is welcomed since it affords appropriate recognition of the presence of the River Way Navigation and the proximity of the site to the river itself. It is acknowledged that new development would need to respect the setting of the river corridor and ensure that there is no detrimental impact.

Please see attached for context of representations.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Policy A42: Land at Clockbarn Nursery, Tannery Lane, Send

6.1 The revised policy position in relation to the Clockbarn Nursery site which recognises its increase in capacity from 45 to 60 dwellings is welcomed. The reasoning for this outlined in the Land Availability Assessment (2017 Addendum), is that the scale of the allocation has been “Reconsidered in light of further evidence and understanding of potential capacity”.

6.2 Danescroft (Send) LLP, remain committed to achieving the redevelopment of the Clockbarn Nursery site in a manner which is appropriate to the context provided by the built form in the immediate vicinity, while continuing to make efficient use of land. This is particularly the case since other potential development sites within or adjoining Send are no longer anticipated to come forward as part of the revision of the Local Plan.

6.3 it is therefore considered that a density of approximately 25dph which would result from a development of 60 dwellings, would fail to make efficient use of land, particularly since this relates to a relatively unconstrained site immediately adjoining an existing settlement which is previously developed in character and nature.

6.4 In light of the reduction in the number and range of sites identified elsewhere in the Borough, it is considered that any new housing development should be expected to provide a higher density of housing with potential to provide up to 40dph. Initial master planning and feasibility work has confirmed that a density of 40dph can be achieved alongside the provision of on-site open space to meet the required standards. Providing new residential development at this density would also reflect the context of existing housing areas elsewhere in Send. Providing 40 dwellings per hectare would better reflect the optimum density for dwelling provision and would represent a more appropriate and sustainable quantum of development in this location, while reducing the need for additional housing to be provided in less suitable locations for development elsewhere in the Borough.

6.5 A higher density housing allocation would result in a greater number of market and affordable homes being provided. The latter would be a proportion of the overall number of dwellings being provided. Therefore, the net effect of increasing the allocation would be to increase the number of affordable homes being provided as a result of its development. The Sustainability Appraisal Report (which accompanies the Local Plan: Strategy and Sites), refers to the need to meet the full extent of both objectively assessed (OAN), and affordable housing needs, a higher rate of dwelling provision than that being promoted and planned for in the draft Local Plan would be required.

6.6 The presence of only one other allocated housing site elsewhere in Send which could be developed to provide for new housing reflects the fact that this is one of only two sites considered suitable for providing additional housing to meet local needs in the village for the duration of the plan period. In order to facilitate its development it is essential that this opportunity is maximised, particularly given the presence of Green Belt boundaries drawn tightly around the defined limits of Send where there is little scope for further development.

6.7 In conclusion, the proposed allocation of the site at Clockbarn Nursery for redevelopment as housing and its removal from the Green Belt are supported. Policy A42 identifies the site as suitable for residential development, and proposes that it is allocated for approximately 60 homes. We fully support the proposed allocation of this site for residential development which would represent a significant enhancement to the local environment as well as providing much-needed new housing. However, it is considered that the site has the potential to make a greater contribution towards the housing supply than is currently envisaged. The approach to achieving this is set out in the representations.

Conclusion

6.8 The proposed amendments to the Guildford Local Plan: Strategy and Sites are generally regarded as positive changes to the plan which more accurately reflect the potential and suitability of Site A42: Clockbarn Nursery, Tannery Lane, Send, to provide new housing. The increase in the housing allocation at this site from 45 to 60 dwellings reflects the reassessment of its capacity by the local planning authority and represents a recognition that this represents one of only two sites in or
adjoining Send that can provide new housing for to accommodate growth over the timescale associated with the new Local Plan.

6.9 The reduction in the scale of dwelling provision across the Borough is however of some concern given the previous under-delivery of housing across the Borough and throughout the wider housing market area, as is the differential phasing of housing provision with higher rates of dwelling provision anticipated later in the plan period. Danescroft (Send) LLP would support the use of the previous dwelling provision target of 693 as opposed to 654 in the current iteration of the plan, and for a consistent annual average to be used throughout the timescale of the Local Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H1

5.1 It is notable that a paragraph has been deleted from Policy H1 (Page 35), which relates to density. The omitted paragraph states that:
“New residential development is required to make the most efficient use of land whilst responding to local character, context and distinctiveness. Residential densities will vary dependant upon the local area context and character and the sustainability of the location. Higher density development will be supported in Guildford town centre.”

5.2 The omission of this paragraph from Policy H1 and the supporting text in the form of Paragraph 4.2.8 are considered to detract from one of the core objectives of the Local Plan, which is to ensure that a sufficient number of new homes are provided in a sustainable manner, and that this makes efficient use of land.
