Answer (if comment is on questions 1-7 of the questionnaire): ()

Allocation A35 for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the detrimental impact on transport, local roads and road safety. I specifically object to: The assertion that the development will result in a meaningful shift to cycling and walking.

The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

The Village of Cobham attracts many visitors with its shops and restaurants and the most direct route from the area of Ockham is via Ockham Lane. This road was built for easy access to Cobham for use by the local residents, it is very narrow with no footpaths or cycling track and is only suitable for light traffic due to having very many bends and blind corners. It passes through Ratchford and a flood plain, it is very often closed due to flooding. The danger that any increase in traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them) has to be considered.

The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed.
without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCH).

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWAIT FM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

My first comment is that the draft Local Plan is not accessible to the majority of residents. As far as I am aware there is no printed book and the files on your website are far too big and numerous to be digested by most members of the general public. Summaries of the Plan should have been produced. If such a document exists please would you send me a copy or advise where I can obtain one.

Having done the best to review the revised draft Plan I think that the scale of development is too great. Too much countryside, which helps to define Guildford as great place to live, will be sacrificed to housing. It is Green Belt for a reason!
Worse still is the fact that the housing will be bought by people working in London and elsewhere, will not address local needs and will mean that the A3 and trains into London will be ever more congested by people travelling from Guildford to their places of work.

Constraints must be placed on the number of houses built and the land taken up. Proper consideration must be given as to how all the additional people and cars are to move around the Town and Borough. The Town is totally congested and its streets dangerous. Accidents are all too frequent on the Stag Hill section of the A3 while there have been fatal accidents in Bridge Street, North Street and a very serious and unpleasant accident in Lower North Street by the Friary involving 2 small children and their grandparents.

The draft Local Plan must be amended to take account of these concerns.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

Please accept this letter as an objection on all accounts to the building development proposal on the land with boundaries Westwood Lane to the West, Glaziers Lane to the east, Guildford Road to the North and the Railway Line to the South.

This horrendous proposal of 1100 houses, plus other unnecessary buildings, is totally out of keeping with the local area and would effectively double the population of our village.

The government statement: "there are no plans to relax strong protections that prevent inappropriate development on the green belt" would be completely undermined by success of this proposal.

The local population would incur many years of disruption, noise and pollution.

The surrounding roads already cannot support the existing load at peak times without long queues. There would be traffic chaos both during and after the development.

On completion, the valley, north of the middle of the Hogs Back would be scarred and lit up like a beacon at night.

The rural environment that the majority of the local population support would be destroyed forever.

There are many more small pockets of land in the local area enclosed by residential and commercial properties that would be more suited to progressive sustainable development to meet the needs of the local population. The Council should show a more proactive support for the development of these areas for efficient residential expansion.

There are also brown field and unused commercial sites within the perimeter of Guildford town and in the outlying districts which could be redeveloped for housing needs before destroying the open arable land of the countryside.
The need for a 1500 pupil secondary school in this area is unsubstantiated and is a red herring to gain housing development approval. Some schools to the west of Guildford are currently under subscribed and others have the capability and willingness for expansion. The slow population growth does not support the need for additional schools.

Similarly the need for retail development is also unsubstantiated and in fact all household supply shops that were core to the village 45 years ago have failed and are now out of business. There are numerous retail facilities offering a wide range of merchandise within a six mile radius of the village which the local population have shown to prefer.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5538  Respondent: 15400353 / Michael Williams  Agent:
I object to the 2016 draft Local Plan on a number of grounds, some of which are as follows:

1. There is no evidence backing the alleged need for new housing on this scale
   1. Where is the provision of new schools and Doctors Surgeries to support this?
   2. I object to the limited consultation period
   3. I object to any erosion of the Green Belt
   4. I object to site A43 Garlicks Arch, which will increase the already chaotic traffic conditions on the Portsmouth Road
   5. I object to site A43a at Clandon, which will only increase traffic conditions
   6. I object to the over development at site A45
   7. I object to the unlawful site A57
   8. I object to the disproportionate amount of development proposed for the Ripley area
   9. I strongly object to any erosion of the Green Belt
12. Road traffic and parking in Ripley is already chaotic, making these proposals unsustainable

Answer (if comment is on questions 1-7 of the questionnaire): ()

- The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Object to the issue of air quality not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.

• Object to the potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development.
• The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions.
• Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).
• There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion.
• The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.

Answer (if comment is on questions 1-7 of the questionnaire): ()

This awful proposal of 1100 houses and other buildings is totally out of keeping with the local area and would double the population of our village.

The rural environment of the local population support would be destroyed forever.

Disruption and both noise and air pollution would affect the local population for many years during and after the development.

Transport on the surrounding roads is already a problem. The existing infrastructure cannot support the existing load at peak times without long queues. There would be traffic chaos both during and after the development.

During development and after completion, the valley viewed from Hogs Back would be scarred forever and lit up like a beacon at night.

Small pockets of land in the local area enclosed by residential and commercial properties would be more suited to sustainable development to meet the needs of the local population. The Council should show more support for the development of these areas.

Brown field and unused commercial sites within the perimeter of Guildford town and in the outlying districts should be redeveloped for housing needs before destroying the open arable land of the countryside.
The need for a 1500 pupil secondary school in this area is unsubstantiated. Some schools within the Guildford Borough are currently under subscribed and others have the ability for expansion. The population growth does not support the need for additional schools.

A need for retail development is unsubstantiated. All household supply shops that were core to the village have failed and are now out of business. The local retail facilities offering a wide range of merchandise within a reasonable distance of the village have proven to be adequate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2496  Respondent: 15400545 / James Harper  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I raise objection to the Guildford Borough Council draft Local Plan (June 2016) and to the inclusion in the Plan of Site Allocation A35 - the Former Wisley Airfield - for a new settlement with 2,000 dwelling as we use this Green Belt are extensively for recreation and appreciation of wildlife.

There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land and as such No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt so I OBJECT to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.

I OBJECT to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys, Effingham and Cobham. The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs, this in no way is acceptable.

The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions. Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable/unachievable/unreal. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).

The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used, this car park is also at full capacity as are the route through Cobham Villiage to get to the station. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.
I Object to the issue of **air quality** not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.

I Object to **insufficient consideration being given to the environmental and ecological value of the site and the area around it**, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

**The area is a haven for wildlife, some of which is already endangered.** The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.

Objections are supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified the serious concerns now being highlighted.

I reiterate the area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford and the roads, public transport in the area are not of a standard to accommodate the development.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):**

I am writing to object to the inclusion of the Former Wisley Airfield in your Borough plan.

Although I do not live in the borough I have lived in the area for over 40 years and have a great interest in the wider environment and how developments will impact on surrounding areas.

I see the proposal has no basis for inclusion when other brownfield sites can be identified, green belt should be preserved as a basis of preventing urban creep.

The surrounding areas, villages, roads, schools, countryside, will be swamped by such a development.

Residents in the area already suffer severe congestion on the local and national roads (A3 and M25). Air quality is already a major concern on many local roads being used by locals and those vehicles trying to avoid the aforementioned congestion.

The inclusion of this site is a little strange and surprising bearing in mind your own planning committees rejection of application no 15/P/00012 in April of this year.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to new sites (Garlicks Arch) being introduced as an after thought when it was not even considered in the previous plan. A slip road on the A3 at Burnt Common has been added to the Draft Local Plan without Highways England consent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East bas taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners' views, or the costs involved in improving the infrastructure, currently out side their financial capability.

The methodology is also flawed as this plan bas been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.
I object to the 2016 Draft Local Plan as it has had no regard to schools required, additional medical or hospital facilities which would make a plan sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment - already a cause for concern in several areas in the Borough.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I write to note my objections to the Proposed Local Plan. That the Local Borough could propose such a plan, with total disregard for the necessary infrastructure for it to be in any way viable is nothing short of ludicrous. My main objections, which echo the sentiments of almost the entire village, are as follows:

**(1) Schools & Medical Facilities/Local Amenities -**

Local schools are already at capacity - where will newcomers go to school? No extra places are planned in the Horsleys. We specifically moved to the area as a family so that our daughter could be schooled at the local school. Already bursting at the seams, there is no provision for the extra potential 1,000 children to be educated. WHERE WILL THESE CHILDREN GO TO SCHOOL? The same problem exists with the local health centre. There is again no provision whatsoever. There is similarly no plan for the necessary local amenities for the additional homes. Where are we to shop? It seems the 'plan' is to throw up as many houses as possible, ignore the Green Belt and hope for the best.

**(2) Increased Traffic and Lack of Parking Facilities -**

On the assumption that every new house has at least 2 cars, this means potentially 6,000 more cars within a 3-mile radius of the Horsleys. The impact on local roads will be awful. The roads are already in a terrible state, continually crumbling due to the strain of existing traffic and poor drainage causing flooding. Parking at Horsley & Effingham Junction stations (which are already full), at the shops, at the medical centre and at the village hall will all be untenable.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

OBJECTION TO PROPOSED LOCAL PLAN

I write to note my objections to the Proposed Local Plan. That the Local Borough could propose such a plan, with total disregard for the necessary infrastructure for it to be in any way viable is nothing short of ludicrous. My main objections, which echo the sentiments of almost the entire village, are as follows:

(1) Schools & Medical Facilities/Local Amenities –
Local schools are already at capacity – where will newcomers go to school? No extra places are planned in the Horsleys. We specifically moved to the area as a family so that our daughter could be schooled at the local school. Already bursting at the seams, there is no provision for the extra potential 1000 children to be educated. WHERE WILL THESE CHILDREN GO TO SCHOOL? The same problem exists with the local health centre. There is again no provision whatsoever. There is similarly no plan for the necessary local amenities for the additional homes. Where are we to shop? It seems the ‘plan’ is to throw up as many houses as possible, ignore the Green Belt and hope for the best.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10726  Respondent: 15400769 / H L Cunnah  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

(3) Increased Traffic and Lack of Parking Facilities -
On the assumption that every new house has at least 2 cars, this means potentially 6,000 more cars within a 3-mile radius of the Horsleys. The impact on local roads will be awful. The roads are already in a terrible state, continually crumbling due to the strain of existing traffic and poor drainage causing flooding. Parking at Horsley & Effingham Junction stations (which are already full), at the shops, at the medical centre and at the village hall will all be untenable.

(4) Local Road Networks –
As mentioned above, the roads in the Horsleys struggle to cope with the volume of traffic that already exists. In respect of the proposals for development at Wisley Airfield and for an upgrade the current A3 junction at Burntcommon to a full 4-way junction, SCC traffic modelling anticipates increased use of Guileshall Lane, Hungry Hill Lane and Tithebarns Lane for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond. The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”. It appears that the Plan is proposing a strategic site at Wisley Airfield without even knowing what improvements to the local road infrastructure will be required. If that is the case for Wisley Airfield, then it is inevitably true for the proposed developments in East and West Horsley as well.
(5) Pollution – 
The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment – already a cause for concern in several areas in the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/5601  Respondent: 15400769 / H L Cunnah  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- Loss of Green Belt land -
Sadiq Khan, the new Mayor of London, has instructed London planners not to approve development on Green Belt Land within the M25. If we continue to build on our countryside it won't be many decades before we have none left. Creeping development has led to almost continuous housing from Central London to Effingham. Is this to carry on to Guildford and beyond? (1,700 houses are planned for the Guildford end of the Hogs Back and 1,000 new houses on Greenfield sites in Normandy.) We must place some value on Greenbelt land as otherwise there will be none left for future generations.

- **Flooding**

The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents are well aware of how much standing water there is in their gardens after rain. Building on such land will only exacerbate the problem. We already know what happens to local roads when it rains - the drains can't cope. There are no plans in place to improve the drains, which are already unable to cope, but rather to place an enormous additional strain on them that will exacerbate the problem and cause further problems for all residents.

My husband works in the property sector, and his business relies upon development. I am certainly not opposed to the idea of sustainable, reasonable development - but the proposed plan will ruin the Horsleys, destroy the beauty of the surrounding Green Belt and makes no provision for the obvious strains on services and infrastructure that such development would cause.

Normandy and Flexford needs and priorities do not include a secondary school. I object to this proposal as there are already two such schools to the west of Guildford with some hundreds of empty places.

The local so-called plan will permanently destroy Normandy and Flexford rural status. It will bring chaos to traffic movements, air pollution will increase and will turn a very pleasant village into urban sprawl.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

A46. A47. A50.

I object to any building between Westwood Lane and glaziers lane because they are both too narrow, and each one has a lethal railway bridge. Any increase in local traffic would greatly increase the likelihood of more motor accidents on these two lanes. There have been deaths at both bridges in past years.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]

adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to note my objections to the Proposed Local Plan. That the Local Borough could propose such a plan, with total disregard for the necessary infrastructure for it to be in any way viable is nothing short of ludicrous. My main objections, which echo the sentiments of almost the entire village, are as follows:

(1) Schools & Medical Facilities/Local Amenities -

Local schools are already at capacity - where will newcomers go to school? No extra places are planned in the Horsleys. We specifically moved to the area as a family so that our daughter could be schooled at the local school. Already bursting at the seams, there is no provision for the extra potential 1000 children to be educated. WHERE WILL THESE CHILDREN GO TO SCHOOL? The same problem exists with the local health centre. There is again no provision whatsoever. There is similarly no plan for the necessary local amenities for the additional homes. Where are we to shop? It seems the 'plan' is to throw up as many houses as possible, ignore the Green Belt and hope for the best.

(2) Increased Traffic and Lack of Parking Facilities -

On the assumption that every new house has at least 2 cars, this means potentially 6,000 more cars within a 3-mile radius of the Horsleys. The impact on local roads will be awful. The roads are already in a terrible state, continually crumbling due to the strain of existing traffic and poor drainage causing flooding. Parking at Horsley & Effingham Junction stations (which are already full), at the shops, at the medical centre and at the village hall will all be untenable.

Flooding –
The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents are well aware of how much standing water there is in their gardens after rain. Building on such land will only exacerbate the problem. We already know what happens to local roads when it rains – the drains can’t cope. There are no plans in place to improve the drains, which are already unable to cope, but rather to place an enormous additional strain on them that will exacerbate the problem and cause further problems for all residents.

I work in the property sector, and my business relies upon development. I am certainly not opposed to the idea of sustainable, reasonable development - but the proposed plan will ruin the Horsleys, destroy the beauty of the surrounding Green Belt and makes no provision for the obvious strains on services and infrastructure that such development would cause.

I trust that my objections are noted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to building 400 houses and 7000sq metres of industrial space at Garlick's Arch, opposite Send Marsh Road. This is a site with precious ancient woodland and it is also susceptible to flooding. Surely with proper use of brownfield sites near Guildford this area is not needed.

As a resident of Send I am writing to object to the PROPOSED DESTRUCTION OF OUR VILLAGE!

There are so many aspects of the proposed development that I am extremely concerned about as follows:

I OBJECT to Send Village being removed from the Green Belt. I moved to this village specifically because it was in Green Belt and if this is removed from the area it will give leave to Developers to take advantage and build over our beautiful fields and ultimately joining Woking and Guildford as one massive conurbation.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East has taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners' views, or the costs involved in improving the infrastructure, currently out side their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

I object to the 2016 Draft Local Plan as it has had no regard to schools required, additional medical or hospital facilities which would make a plan sustainable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

“Objection to Guildford Borough Council draft Local Plan (June 2016) and to the inclusion in the Plan of Site Allocation A35 - the Former Wisley Airfield - for a new settlement with 2,000 dwellings"

As someone who has lived in Surrey for many years I strongly object to the above plan. The proposed development is far too big and would have an enormous impact on the surrounding communities. In particular it would lead to greatly increased congestion unless extensive new roads were planned and they, in turn, would destroy the ambience of the vicinity. Many local services are already stretched and an increase in population of this scale would greatly aggravate matters.

I urge you to reject this application.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5618  Respondent: 15404449 / H Albertyn  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
My wife and I recently bought a property in west horsley near the Raleigh school. We moved from London to get away from all the rush but if all these new houses will be built in our area then it will ruin the whole experience. The Horsleys are not geared up for all this and the roads are already in a poor state so I cannot imagine what it will be like with all the additional traffic. The station car park will be overfull, we wont be able to see the local GP, there will be a scramble for school spaces and the whole village feel will be gone.

End of the day this area is outside the M25 and if more houses are needed then this should be built within that zone as most of these people will be commuting to the city.

I urge you to reconsider this proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2539  Respondent: 15405409 / Louise Whelan  Agent:  

Objections to GBC Proposed Submission Local Plan

Although I live outside the Borough I keep my horse at stables in the Borough and visit regularly to go riding on the Bridleways across the Former Wisley Airfield and the surrounding areas in the Borough.

I OBJECT to the Proposed Submission Local Plan for many reasons and in particular for the following key reasons:

1. I object to the use of the Green Belt for over 70% of new The brownfield land in the urban areas should used for rebuilding.
2. I object to removing from the Green Belt the Former Wisley Airfield and neighbouring properties on its southern No exceptional circumstances have been established to justify removing the land from the Green Belt.
3. I object to the threat the Proposed Local Plan poses to the historic rural village of The urban 2,068 dwelling development is totally out of character with this village of 159 homes.
4. I object to the adverse impact on transport, local roads and road I specifically object to the increased volume of car traffic. The proposed development would result in around 4,000 additional cars on the roads. This will cause congestion on the narrow rural roads in Ockham and the surrounding areas. The danger from this traffic will be to cyclists and pedestrians, and particularly to horse riders. The increase in the already severe congestion on the A3 and M25.
5. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heath Special Protection Area, the Sites of Special Scientific Interest and Special Nature Conservation.
6. I object to the continued inclusion of a site where the planning application has already been unanimously rejected by GBC's Planning.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am disappointed that my previous objections to the draft local plan have not been reflected in the latest draft.

Please confirm that all of these comments together with all my previous comments are passed to the Inspector.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including the following:

1. No effort has been made to demonstrate exceptional circumstances for the removal of any land from the Green Belt. I object that the green belt has been preferred over brownfield land in the urban area without taking notice of the response to previous consultations.
2. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The Plan has not taken into account the associated daily traffic increase to and from the RHS as well as for the regular events at the RHS which attract 1000’s more visitors several times a year.
3. It is the least sustainable strategic site identified in this version and in previous versions of the plan because of the constraints on the site and the physical location.
4. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
5. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
6. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
7. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
8. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
9. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
10. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
11. It remains unclear when and if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
12. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate despite talking of “good urban design”
13. Opportunity (3) should be common to all sites and is not unique to this site
14. I object to the increased area of the site as this now abuts and overlooks the Ockham Conservation Area.
15. I object to the fact that the increased area, being on the south of the site facing the North Down AONB will increase the negative impact of the views from the AONB.
16. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
17. I object to the removal of additional 3.1 ha to be removed from the green belt without any justification
18. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
19. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
20. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
21. I object to the fact that the council has failed to remove this site from the local plan despite receiving many thousands of objections from local residents and statutory consultees in two full consultations.
22. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
23. The changes to the plan can only be made if the previous plan was ‘unsound’ and the changes should explain how they will make the plan sound. I object to the absence of proper procedure, leaving an unsound plan not capable of being accepted.
24. I object to the Council wasting tax payers and residents’ time and money not following due process and in particular ignoring previous representations.
25. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
26. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
27. I object to the inclusion of Site A35 as it will not contribute to the 5-year housing projection due to many constraints including the provision of a new sewerage facility.
28. I object to the Housing number which is unsound and open to legal challenge.
29. I object to the disregard for the impact on the Thames Basin Heaths SPA, particularly the damage caused by nitrogen deposition and high pollution levels.
30. I object to Policy S2 where it states: “4.1.9a The figures set out in the Annual Housing Target table sum to a total of 12,426 homes.” yet the figures in the table add up to 9,810. The difference of over 20% demonstrates the lack of understanding of the housing requirements of the Borough. It is also an example of why the Plan is not sound.

For the reasons listed above and numerous other reasons I consider that the plan is unsound and not fit for purpose.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
• I object to a plan with 70% of new housing in the Green There is ample brownfield land in the urban areas of the 
Borough. That would reflect election promises to preserve the Green Belt.
• I object to the housing number of 693 houses per year; this estimate is far too high and is the result of hidden It 
cannot be justified.
• I object to the proposal to remove the Former Wisley Airfield (FWA) from the Green There are no exceptional 
circumstances to warrant removing the land from the Green Belt.
• I object to this urban 2,000 plus house development being placed in the historic rural village of 159 homes in 
• I object to the impact on transport, local roads and road The proposed development would result in around 4,000 
additional cars on the roads. This will increase the danger from traffic to horse riders, cyclists and pedestrians on 
the narrow rural roads in Ockham and the surrounding area. It will increase in the already very bad congestion 
on the A3 and M25.
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the 
site, in relation to the Thames Basin Heath Special Protection Area (SPA), the Sites of Special Scientific Interest 
(SSSI) and Special Nature Conservation Interest (SNCI).
• I object to the threatened loss of high quality

The Former Wisley Airfield, site A35, should be removed from the Submission Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

For the reasons listed above and numerous other reasons I consider that the plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objection to Guildford Borough Council Proposed Submission Local Plan

I live outside the Borough and keep my two horses at stables in the Borough. I visit regularly to ride on the Bridleways across the Former Wisley Airfield and the surrounding areas.

I OBJECT to the Proposed Submission Local Plan for many reasons, particularly the following:

1. I object to the proposal to allocate so much new housing to the Green Belt; it should be put on the brownfield land in the urban areas of the Borough. That would reflect election promises to preserve the Green

2. I object to the housing number of 693 houses per year; this number appears to me to be far too high, particularly in the context of Brexit

3. I object to the proposal to remove the Former Wisley Airfield from the Green There are no exceptional circumstances to warrant removing the land from the Green Belt. This area clearly fulfils an important objective of separating Ripley, Cobham, Woking and Horsley.

4. I object that this urban 2,000 house development would be totally out of place in the rural village of 159 homes in Ockham.

5. I object to the danger from its effects on transport, local roads and road The proposed development would result in around 4,000 additional cars on the roads. This will increase the danger from traffic to horse riders on the narrow local roads in Ockham and the surrounding area and increase the already severe congestion on the A3 and M25. Cycling would be dangerous.

6. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heath Special Protection Area, and the Sites of Special Scientific Interest and Special Nature Conservation Endangered ground nesting birds such as the Skylark and the Nightjar will be threatened by the development.

7. I object to the threatened loss of high quality farmland where crops have been grown for decades and probably for centuries.

8. I object to the continued inclusion of this site where a recent planning application has already been unanimously rejected by the Planning Committee.

I request that the Former Wisley Airfield, site A35, is removed from the Submission Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Objections to Guildford Borough Council Proposed Submission Local Plan

Although I live outside the Borough I keep my horse at stables in the Borough and visit regularly to go riding on the Bridleways across the Former Wisley Airfield and the surrounding areas in the Borough.

I OBJECT to the draft Submission Local Plan for many reasons including those set out in the letter from Ockham Parish Council and in particular for the following key reasons:

1. I object because it proposes to use the Green Belt for over 70% of new housing. The brownfield land in the urban areas should used for rebuilding.
2. I object to the removal from the Green Belt of the Former Wisley Airfield (FWA) and neighbouring properties on its southern boundary. No exceptional circumstances have been established to warrant removing the land from the Green Belt.
3. I object to the threat the draft Local Plan poses to the historic rural village of Ockham. The urban 2,000 dwelling development is totally out of character with this village of 159 homes.
4. I object to the detrimental impact on transport, local roads and road safety. I specifically object to the increased volume of cars. The proposed development of 2,000 homes would result in around 4,000 additional cars on the roads. This will cause congestion on the narrow rural roads in Ockham and the surrounding areas. The danger from this traffic will be to cyclists and pedestrians, and particularly to horse riders. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25.
5. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heath Special Protection Area (SPA), the Sites of Special Scientific Interest (SSSI) and Special Nature Conservation Interest (SNCI).
6. I object to the continued inclusion of a site where the planning application has already been unanimously rejected by GBC's Planning Committee. Please remove the Former Wisley Airfield from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4114  Respondent: 15405729 / Tiggy Hooper  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am disappointed that my previous objections (14th July 2016) to the draft local plan have not been reflected in the latest draft.

Please confirm that all of these comments together with all my previous comments are passed to the Inspector.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including the following:

1. No effort has been made to demonstrate exceptional circumstances for the removal of any land from the Green Belt. I object that the green belt has been preferred over brownfield land in the urban area without taking notice of the response to previous consultations.
2. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The Plan has not taken into account the associated daily traffic increase to and from the RHS as well as for the regular events at the RHS which attract 1000’s more visitors several times a year.
3. It is the least sustainable strategic site identified in this version and in previous versions of the plan because of the constraints on the site and the physical location.
4. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
5. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
6. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
7. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
8. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
9. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
10. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
11. It remains unclear when and if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
12. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate despite talking of “good urban design”.
13. Opportunity (3) should be common to all sites and is not unique to this site.
14. I object to the increased area of the site as this now abuts and overlooks the Ockham Conservation Area.
15. I object to the fact that the increased area, being on the south of the site facing the North Down AONB will increase the negative impact of the views from the AONB.
16. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).
17. I object to the removal of additional 3.1 ha to be removed from the green belt without any justification.
18. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
19. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
20. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
21. I object to the fact that the council has failed to remove this site from the local plan despite receiving many thousands of objections from local residents and statutory consultees in two full consultations.
22. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
23. The changes to the plan can only be made if the previous plan was ‘unsound’ and the changes should explain how they will make the plan sound. I object to the absence of proper procedure, leaving an unsound plan not capable of being accepted.
24. I object to the Council wasting tax payers and residents’ time and money not following due process and in particular ignoring previous representations.
25. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
26. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
27. I object to the inclusion of Site A35 as it will not contribute to the 5-year housing projection due to many constraints including the provision of a new sewerage facility.
28. I object to the Housing number which is unsound and open to legal challenge.
29. I object to the disregard for the impact on the Thames Basin Heaths SPA, particularly the damage caused by nitrogen deposition and high pollution levels.
30. I object to Policy S2 where it states: “4.1.9a The figures set out in the Annual Housing Target table sum to a total of 12,426 homes.” yet the figures in the table add up to 9,810. The difference of over 20% demonstrates the lack of understanding of the housing requirements of the Borough. It is also an example of why the Plan is not sound.
For the reasons listed above and numerous other reasons I consider that the plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**APPENDIX C**

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

2. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as III as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as III as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe
constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. APPENDIX D

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

1. The “objectively assessed need” figure of 693 homes a year is too high.
2. A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
3. The current SHMA inflates the proposed housing figure due to
   ° failure to correct for errors in the historical data for international migration flows,
   ° issues with the way it considers students and affordability and
   ° flaws in the method for estimating the number of homes needed to support job growth.

1. It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.
The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

1. **POLICY A25 - Gosden Hill Farm**

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays

Surrey Fire and Rescue deployed.
2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 June 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.
If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2553  Respondent: 15405857 / Raymond Mackay  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)
The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement - often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )

1. **POLICY D4**

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

---

**Comment ID:** PSLPP16/5647  **Respondent:** 15405857 / Raymond Mackay  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )

1. **POLICY E1**

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and...
general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E2

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E5

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Comment ID: PSLPP16/5661  Respondent: 15405857 / Raymond Mackay  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is
likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.
4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** PSLPP16/5655  **Respondent:** 15405857 / Raymond Mackay  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. **POLICY H1**

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.
It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H2

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Attached documents:

---

Comment ID: PSLPP16/5660  Respondent: 15405857 / Raymond Mackay  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. POLICY I1

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable
(and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY I2

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).
Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

1. POLICY I3

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt.” This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.
This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPP16/5646  **Respondent:** 15405857 / Raymond Mackay  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. **POLICY P4**

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

Re: Responses to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

1. **POLICY S1**
I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY S2

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these
adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can
be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a
“plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account,
leaving the Council to set one without further consultation. Even if the OAN Ire not flawed, it is at best only a baseline
figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of
Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA).
Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible
change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the
housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would
remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the
plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's
commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than
elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase
availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere.
Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter
belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green
Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints.
It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears
to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing
that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing
built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable
development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and
surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the
local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand.
The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in
the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up
areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the
borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill
Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing
being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent
only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being
allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of
identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing
across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a
disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of
these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

### Questions posed by Guildford Borough Council as part of its consultation.

**24.A. Question 1: The evidence base and submission documents**

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

**ANSWER**

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up-to-date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

### 24.B. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

- why you consider it is or is not legally compliant and
- what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

**ANSWER**

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

### 24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

- why you consider it is or is not sound and
- what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

**ANSWER**

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Sound.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.
5. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.
6. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.
7. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessor, consider unsound.
8. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.
9. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.
10. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.
11. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.
12. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
13. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and...
foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

14. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

15. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

16. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

17. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

18. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

19. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24.D. Question 4: Duty to cooperate

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate? Please provide the following information being as precise as possible:

• why you consider it has or has not complied with the Duty to cooperate and
• what change(s) (if any) you consider necessary to make it comply with the duty to cooperate, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.
The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. APPENDIX C

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base
I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to

1. APPENDIX D

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)
The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A25 - Gosden Hill Farm

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data
- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.
Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. **POLICY A43 AND A43a – Garlick’s Arch**

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.
I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a).

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. POLICY D3

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3).

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. POLICY D3

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D4

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPP16/5675  Respondent:  15406017 / Eleanor Roberts  Agent:  

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. POLICY E1

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E5

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5693  Respondent: 15406017 / Eleanor Roberts  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For
example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.
4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E7

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable
residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

---

1. **POLICY H1**

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students are accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.
It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H2

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Answer (if comment is on questions 1-7 of the questionnaire): ()

<table>
<thead>
<tr>
<th>1.  POLICY H3</th>
</tr>
</thead>
<tbody>
<tr>
<td>I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.</td>
</tr>
<tr>
<td>The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”</td>
</tr>
<tr>
<td>The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.</td>
</tr>
<tr>
<td>The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.</td>
</tr>
<tr>
<td>The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.</td>
</tr>
<tr>
<td>The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)</td>
</tr>
<tr>
<td>The policy wording should be restricted to adjoining sites or define the concept of being &quot;closely related&quot;. In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)</td>
</tr>
<tr>
<td>The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.</td>
</tr>
<tr>
<td>The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.</td>

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY II

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy II. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable
(and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

1. POLICY I2

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).
Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. **POLICY P2**

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation process restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.
This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. POLICY P4

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

1. **POLICY S1**

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY S2

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

Page 92 of 2543
The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.
The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I attach my response to the Guildford Borough Proposed Submission Local Plan.

Having considered the terms of the planning policy I OBJECT. This Plan is unsustainable, unworkable and, in many provisions, unnecessary. I was born and grew up, until the age of 24, in the Guildford area. Having moved to London to work in recent years I have always considered Guildford and particularly Clandon to be an area I would like to return to raise a family. These plans would fundamentally change my view of Guildford and the surrounding areas. In addition, my parents still live in West Clandon and I therefore have a strong vested interest in the proposed plans.

I trust that the objections included in the attached are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. Questions posed by Guildford Borough Council as part of its consultation.

Questions from GBC

24.A. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

**ANSWER**

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

24.B. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

- why you consider it is or is not legally compliant and
• what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

• why you consider it is or is not sound and
• what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt." Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24.D. Question 4: Duty to cooperate

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate? Please provide the following information being as precise as possible:

• why you consider it has or has not complied with the Duty to cooperate and
• what change(s) (if any) you consider necessary to make it comply with the duty to cooperate, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.
The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government. I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

*Answer (if comment is on questions 1-7 of the questionnaire):* ()

I write to object to the proposal to build on greenbelt land on the former Wisley Airfield.

Whilst I live outside the Guildford area I am very concerned at the impact it would have on the area:

Reasons for objections are:

I object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.

No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt. There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.

I object to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.

I object to the threat the Local Plan as drafted poses to the historic rural settlements of Ockham, Hatchford and Downside. The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs.

Hatchford, south of the M25, has some 60 residences off narrow Ockham Lane that would be greatly affected by the proximity of development.

I object to the potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development.

The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions.
Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).

There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion. The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.

I object to the issue of air quality not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.

I object to insufficient consideration being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI). The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.

Objections are supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified the serious concerns now being highlighted.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the unfair imbalance of the Plan across the borough. 

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become *even more* biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the11350 homes proposed in the Plan, 40.6% (4613) *are within 3 miles of Send Marsh*, most of them on Green Belt. This is *grossly unfair* on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to removal of Brownfield site (A34) from the Plan

Site A44 in Broadford Business Park has also been removed. This is another brownfield site that has already been developed. The Council’s claims to “have adopted a ‘brownfield first’ approach” (page 5) but this is clearly not the case, and is contrary to national guidelines.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1244  Respondent: 15406145 / Paul Moore  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which, I believe, is totally unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There appear to be no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, ... (site allocation A25) [ than the Burnt Common site did ]"
2. The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A50

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan is self-inconsistent in respect of traveller sites.

A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots ...” Clearly A50 more than covers the total “need” of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects:

i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!) , and

ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. That has now been removed, thereby accepting that needing to make greater than normal profit is to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT STRONGLY TO Policies A36, A37, A38, A39, A40, A41

- The number of houses being proposed is ridiculous, and will completely turn our beloved village into an ugly, urban sprawl.

- The congestion of new people and buildings will be unsustainable with our current infrastructure as well as schools and facilities

As stated, we moved from London out to the Horsleys less than a year ago, so that we could raise our children in the peace and beauty of our new home and its surrounding spaces. This proposal will completely ruin the "feel" of the entire area and would break the hearts of many loyal residents, including mine.

Many thanks for your time.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although I live in Cobham. This plan would severely impact on our area. One of our main objects is the fact that Cobham is the nearest shopping centre to the proposed development. Cobham cannot possible cope with any increase in traffic - let alone some 5000 additional occupiers.

Also, there has been a suggestion that Cobham & Stoke d'Abernon station could be used as an alternative station to Effingham and Horsely. It is almost impossible to find a parking space in Cobham station carpark already. Any additional passengers would make the situation intolerable.

These are only two of many objections - but ones which would impact on our lives in Cobham.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although I live in Cobham. This plan would severely impact on our area. One of our main objects is the fact that Cobham is the nearest shopping centre to the proposed development. Cobham cannot possible cope with any increase in traffic - let alone some 5000 additional occupiers.

Also, there has been a suggestion that Cobham & Stoke d'Abernon station could be used as an alternative station to Effingham and Horsely. It is almost impossible to find a parking space in Cobham station carpark already. Any additional passengers would make the situation intolerable.

These are only two of many objections - but ones which would impact on our lives in Cobham.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Dear Sir / Madam

We object to the proposed large scale development planned for 1100 new dwellings and a 1000 place secondary school on two Green Belt sites in Normandy and Flexford. (Site A46) Current population 3000 inhabitants - proposal 100% increase.

**Insufficient infrastructure / amenities:**

- No retail shops, except for a music store
- No Post Office / No Bank / No Library
- No Public House / Restaurant
- Doctors surgery over subscribed resulting in residents travelling to Fairlands for appointments (approx distance 2.5 miles)
- Minimal local employment
- Lack of Infrastructure
- Existing traffic congestion and consequent safety issues
- Electricity supply already insufficient for local residents, there are many power cuts
- Broadband already insufficient for local need
- Flood area

**Green Belt**

Normandy and Flexford are located in the Green Belt. National policy retains strong protections against inappropriate development for valuable areas such as the Green Belt and states that planning should recognise the intrinsic character and beauty of the countryside.

**National Planning Policy Framework**

NPPF, paragraph 80 exists to safeguard the countryside from encroachment and to retain a Green Belt buffer to stop urban areas from merging. It also requires that Green Belt boundaries should be permanent (para 83) and to prevent urban sprawl (para 70) by keeping land permanently open.

The Guildford Landscape Character Assessment should be an important consideration in any review of the Green Belt.

**Special Protection Area**
The proposed development areas are within a 400 metres - five kilometres protection zone of the Special Protection Area (SPA). All sites require Strategic Alternative Natural Greenspace (SANG) to be found in advance before any development can be considered. The proximity of more people and the associated air pollution from the associated / anticipated car journeys is a threat to SPA status and the flora and fauna that dwell there.

Secondary School

There are 'no exceptional circumstances' to remove the proposed development site from The Green Belt. The secondary school is a new addition to The Local Plan as a strategy to enable this developer led proposal. There is no need for an additional secondary school whilst other secondary schools in the local area are substantially undersubscribed. This school would be an unviable project and a serious waste of tax payers money.

Infrastructure

Roads

Access to the proposed development sites would be via rural residential roads which are ill equipped to deal with any increase in traffic.

Glaziers Lane - unclassified road (060) - no continual footpath, pedestrians would have to cross the road at several places or risk walking in the road. Railway Bridge with limited visibility and hazardous station access. Route would be hazardous for cyclists.

Westwood Lane - C Class road (C16) rural residential road. No continual footpath. Single track road under Railway Bridge with 14'3" restricted height access. Route would be hazardous for cyclists.

These roads are already seriously overburdened and access is already restricted. At the northern end access onto the A323 is difficult; particularly from Glaziers Lane where traffic backs up substantially and where there have already been fatalities. At this junction volume of traffic and excessive axle weights caused sub terranean damage to gas and water services in 2013 leading twice to extensive, disruptive and costly deep repairs to stabilise the sub soil. The A323 has been identified in GBC's 'Options Growth Scenario Transport Assessment Report' as being at full capacity already. Extra development in the area will cause additional serious access problems and safety issues.

Railway Station - access onto Glaziers Lane - a tight turn northbound from the station with the vulnerability of unsighted vehicles coming over the Railway Bridge. Disabled access only on one side. Approximately 8 car parking spaces. Liable to flooding.

Flooding

Normandy and Flexford are situated on the slopes of the Hog's Back. They are subject to frequent flooding due to the high water table and clay composition soil. The drainage and sewage system are already inadequate for current needs. A development of this size would create further problems.

In summary we feel that this excessive scale development is inappropriate for this rural Green Belt area. Environmentally it is wrong. The infrastructure and amenities are inadequate to support a development of this size. No necessity has been
identified for an additional secondary school in the area while other local secondary schools are undersubscribed and can potentially increase in size on their present sites if the need ever arose.

We would wish you to take our concerns and objections into consideration.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. Specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure
enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted level. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd.'s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to add, as one interested in the amenity of our more elderly members the need for a return of the town's shuttle bus service which enabled them to cope with our 'hilly' town. It really should be called the shopper's bus because, apart from helping elderly people - it would benefit the wider population as, as in the past it called at the Railway Station and the Bus Station before serving the top of the town, including Glive before returning via North St.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **APPENDIX C**

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

2. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it
cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. APPENDIX D

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Comment ID: PSLPS16/2568  Respondent: 15406529 / David I Allan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A25 - Gosden Hill Farm

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

• Clandon Cross Roads Area to Bulls Head - 17 incidents
• Bulls Heads Head to Bennett Way - 8 incidents
• Bennett Way to Highcotts Lane - 15 incidents
• Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

• 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays

Surrey Fire and Rescue deployed.

2016

• 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
• 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
• 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).
The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **POLICY D4**

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. **POLICY E1**

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.  POLICY E2

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **POLICY E5**

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. **POLICY E6**

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E7

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:

Comment ID: PSLPP16/5715  Respondent: 15406529 / David I Allan  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H1

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. **POLICY H2**

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to other towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

1. **POLICY H3**

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. **POLICY II**

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy II. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy II requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPP16/5713  **Respondent:** 15406529 / David I Allan  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

1. **POLICY I2**

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
1. **POLICY I3**

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

1. **POLICY P2**

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.
The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires
there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. **The plan says that “allocating these sites does not grant planning permission for development.”** However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY P4**

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY S2

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these
adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN Ire not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** SQLP16/953  **Respondent:** 15406529 / David I Allan  **Agent:**
Questions posed by Guildford Borough Council as part of its consultation.

24.A. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

ANSWER

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up-to-date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

24.B. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

- why you consider it is or is not legally compliant and
- what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

- why you consider it is or is not sound and
- what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

ANSWER
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and
foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both
technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic
issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it
overstates housing need. The Council has prevented councilors or others from properly considering the SHMA
by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's
circumstances, including in particular the Green Belt and road infrastructure. National policy permits such
constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on
a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required
infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have
the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the
Council to very little.
The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and
Greenfield sites and each of the above points addressed.

24.D. Question 4: Duty to cooperate

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to
cooperate? Please provide the following information being as precise as possible:
• why you consider it has or has not complied with the Duty to cooperate and
• what change(s) (if any) you consider necessary to make it comply with the duty to cooperate, explaining why this
is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to
cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes
and requirements of the vast majority of the residents in its Borough.
The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposed new slip roads for the A3. Traffic is very bad in the village and on many surrounding roads at most times of the day. Please do not make it even worse. Pollution from traffic fumes has been known to affect the health of the vulnerable, yet there seems to be no plans to alleviate any issues that will arrive from such an increase in the number of cars and lorries on the road to serve these houses and businesses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I also object to the type of houses that will be built. The council mentions ‘affordable housing’ but I am single and in my late twenties, have worked continuously since I left College at 17, but am in low-paid employment. I am unable to afford any type of housing, rented or otherwise in this area, and this plan to offer a small amount ‘affordable housing’ will not be affordable to me, or others like me. Someone has to man the shops and clean the floors of your offices, empty the bins and work in the coffee shops. Those people will not be able to live in the housing intended though.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the enclosure of the Green Belt within the planned village boundaries. This is the beginning of a process that will affect the natural environment in which we all live for the future.

I object to the destruction of and any planned development on the Green Belt surrounding Send village or in the Borough as a whole. I think Guildford has a responsibility to keep green spaces for generations to come, and should not simply build houses to line developers' pockets when there might be suitable sites in brownfield areas.

Comment ID: PSLPP16/16609  Respondent: 15406849 / Anthony Forth  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Rather than looking at each individual site proposed in the Horsleys an overall view of the number of houses really required and the impact
this will have regarding the Infrastructure, Schooling, Traffic and the Green Belt should be made.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of The Former Wisley Airfield (FWA/FM) from the Green The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, 36% of the Plan's new housing is proposed in the northeast of the borough (x% of which is allocated to TFM), an area that at present has only 11% of existing housing.

5. I object to the loss of the historic rural village of Ockham. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five stories high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to assume a reduced reliance on private cars.
   2. The increased volume of car A proposed development of 2,068 homes would indicate an increase of approximately 4,000 additional cars on the roads.
   3. The impact this traffic will have on the narrow rural roads in Ockham and the surrounding areas, also including increased bus and lorry movements.
   4. The impact this traffic will have on local cyclists and pedestrians, due to the absence of any cycling paths and the lack of proper pedestrian footpaths (and the space to provide them).
   5. The impact on the already congested Strategic Road Network on the A3 and M25. A further planning application at RHS Wisley (with increased visitor traffic) and a proposed 600 pupil secondary school would add further congestion at the M25/A3 junction as well as local roads. Infrastructure enhancements to the A3 and M25 would have to be completed before any development commences. Highways England has stated that they have no plans to even consider improving the A3 before 2020.
   6. The lack of suitable public The local rail stations of Effingham and West Horsley cannot cope with the proposed increase in passenger traffic.

   - I object to the fact that insufficient consideration has been given to the site's value from an environmental and ecological standpoint, in relation to the Thames Basin Heath Special Protection Area (SPA), the Sites of Special Scientific Interest (SSSI) and Special Nature Conservation Interest (SNCI).
   - I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction is in excess of EU permitted level. Additional traffic will exacerbate this situation, impacting the health of all current and future residents.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% both wish to see the historic features of the village maintained and to protect the village's green spaces, including the FWA/TFM.
• Lastly, I object to the continued inclusion of a site where the planning application has already been unanimously rejected by GBC's Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We simply do not have the infrastructure to support even this infill development never mind the proposals contained in the local plan. Dr's Surgeries are very busy and appointments increasingly difficult to make.

Roads are totally inadequate with big lorries screaming through the village (there should be a weight limit).

Parking is very difficult most of the time and impossible some of the time. The flooding issue is not contained. Whenever there is heavy rainfall there is excessive surface water and flooding on the main roads. The main arterial road A3 is frequently blocked and the fact that we have the research Park, the university, the cathedral, and the hospital all pouring on to it at the same junction make it a no go area at certain times. This situation is not going to be helped by the proposals to build thousands of houses in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5763  Respondent: 15407393 / Margaret Read  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infilling is happening all the time and properties previously occupied by elderly people have been demolished and replaced by monstrous mansions. This is happening in High Park Avenue, and Glendene Avenue. Two bungalows on the latter have been either been made into houses by adding another storey or demolished and replaced by very large properties. These are not in keeping with the character of the Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5762  Respondent: 15407393 / Margaret Read  Agent:

Please find this letter / email supporting the removal of the above sites and that in my view any future planning will have a detrimental impact on the infrastructure being able to cope with such developments, i.e.:-

- Roads with increase in local traffic and the environmental damage - noise, pollution etc,
- Pressure on local amenities such as health centres / hospitals.
- Negative impact on Green Belt land.
- Increased pressure on domestic services such as the national grid, gas suppliers, sewage treatment etc.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East has taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners' views, or the costs involved in improving the infrastructure, currently outside their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.
I object to the 2016 Draft Local Plan as it has had no regard to schools required, additional medical or hospital facilities which would make a plan sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2] Secondly I object to the total lack of any substantial information on providing adequate infrastructure for the developments proposed. It is simply not good enough to make bland statements about infrastructure, since, before any development of the frightening level proposed is considered, fully costed and detailed infrastructure plans for items such as new schools, Medical Centres etc. must be clear.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

8] Eighthly I object to the proposed development of the Wisley site and am astonished that GBC has even considered including the site in the Local Plan, especially since planning has already been refused. Whilst I agree that the Wisley developers have included much needed extra infrastructure, the whole plan completely fails on the traffic issue. Our local roads are already very congested and the roads around the M25 and A3 junctions are mostly chaotic. It would be absolute madness for GBC to consider this plan unless it was for a very small number of houses which did not create the risk of further traffic chaos. Under no circumstances can this site be considered without careful and close discussion with local Wisley and Ockham residents, in particular.

<tr>
<td>3] Thirdly I strongly object to the use of the brown field sites for industrial or office development. There is no justification whatsoever to show that there will be an adequate demand for such space. Indeed it seems highly unlikely that such space would be able to be let or sold in our high cost area. Therefore the reassurances made by GBC officers, after the last consultation, to use brown field sites for housing have been ignored. This is of such importance that I find that this complete lack of attention to this point is insulting.</td>

7] Seventhly I **object** to the early exhibition of a SANG in Longreach, West Horsley by a Company, Greenreach Ltd, which is totally owned by developers. How dare the GBC support the concept of this exhibition when we have many wonderful areas of country for recreation? To put this artificial plan forward before the Local Plan has completed its consultation is disgraceful, especially since it has been created by Developers who clearly expect the GBC to favour them.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )

4] Fourthly I strongly **object** to the plan to inset several rural villages from the Green Belt. The GBC seem to have completely forgotten that people who live in the rural villages in the Borough have chosen a particular lifestyle to live in a rural community and the latest local plan would ruin many people’s lives. The policy is grossly unfair to these people and the local plan should be completely altered so that development only occurs in brown field sites and on the urban edges of main towns. In addition the protection granted to residents for future development would be undermined giving villagers limited ways in which they could prevent unacceptable development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )

Whilst I will leave official bodies, such as Parish Councils, to comment in more detail on the specific Policy Issues, I now set down my principal concerns.

1] First and foremost I **object** to the number of new homes proposed for the Borough. By every calculation this target would increase the population of the Borough at a rate higher than at the latest 10 year period as measured by the censuses. Furthermore this figure is totally unsustainable by any measure.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
5] Fifthly I **object** to the specific plan relating to my village, West Horsley. It seems utterly incredible that GBC could propose such a plan for a village which is probably the most rural village after East Clandon. Not only is the proposed increase of 385 houses over four sites unbelievable but it is also an increase of 35% which is more than any other location. Whilst I understand that any Neighbourhood Plan has to fit into the Borough Local Plan, a recent survey of the whole village showed that residents felt that only 40 houses were needed [or could be coped with sustainably - no shop, no Post Office, difficult parking in East Horsley, railway station parking at capacity and limited Bus Service] in the same period. Even allowing for the GBC needs, this shows just how distorted the numbers are in Local Plan.

**Guildford Local Plan 2016 Consultation**

I am responding to your request for residents of the Borough, and other interested parties, to make their views known on the latest Draft Local Plan.

My first comment is that I am deeply shocked to see that little or no attention has been paid to the comments made by a significant number of residents in the last consultation. The overwhelming local view that the Green Belt must be maintained at all costs, and that brown field sites should be used for a large part of the housing needs, has been completely ignored.

Once again the method of communicating to Home Owners and Occupiers is totally unacceptable. In January 2014, I had sent a suggestion of how the Borough might **directly** write to **every** Home Owner or Occupier so that they are fully aware of the proposals. This is because so many key people were not aware of the plan or the needed action. I had an email from the then Councillor in charge of the Local Plan agreeing that their consultation must be improved. This has not been done and so many people may be disenfranchised.

These points above show that the much needed democracy to progress such an important plan is destroying the credibility of the process.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to POLICY P2 which removes Send from the protection of the Green Belt, without justification and no “exceptional circumstances”.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not agree with the local plan. I think as well as affecting walks on Green Belt land. It will affect the wild animals houses on Green Belt. Why build hundreds of houses on grass? I do not want the local plan to build houses on the Green Belt Land.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am a resident of Normandy. I have lived here for 40 years.

I strongly object to the disproportionate scale of the proposed new A46 development. In 2014's consultation is was safeguarded. Exceptional circumstances have not been demonstrated or approved by the inspectorate. A 100% increase in the number of homes in the village will destroy the natural environment. The fundamental aim of "green belt" policy is to prevent urban sprawl by keeping land permanently open. GBC is ignoring Past verdicts of planning inspectors that the green fields of Normandy (A46) contribute to the openness of this area of Surrey Green Belt and to the panoramic view of the green fields to the Surrey Hills AONB. Development should not be approved except in very special circumstances (NPPF).

GBC is required to demonstrate "exceptionally Circumstances' to justify the release of sit A46 from Green Belt. There is no clear evidence of these exceptional circumstances within the LP.
I also object to the proposals because the extra traffic generated by so many new homes will cause chaos. The A323 is already often congested, especially at peak times in the mornings and evenings. It is regularly gridlocked when accidents occur in Guildford, on the Hogs Back and Aldershot. The minor roads - Glaziers Lane and Westwood Lane will not be able to cope with the extra traffic which the extra 1100 homes will generate. The railway bridges on both roads will be put under enormous stress. There will also be a massive increase in exhaust pollution of NOX and CO2. This cannot be desirable. Planning Policy has not fully considered the location of the site & the traffic impact A46 will have on this rural community.

Dear Sirs

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SN CI).
• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M2S/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

• I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

• Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

• Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

The volume of traffic has increased with an alarming rate over the last 15 years - not only due to many newly built houses (infill) but also due to Satellite Navigation systems sending traffic from the A246 through East Horsley to the A3 and A246. The roads are barely wide enough to accommodate the heavy load of lorries, coaches, large 4x4s and other traffic. Very often there is nowhere to park in the village as the car park behind the shops fills up very rapidly these days. So THE HORSLEYS ARE FULL.

I therefore strongly object to the horrifying idea of building any more houses in or around the Horsleys.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The infrastructure of our villages cannot cope with many more residents. The schools are full, the Doctor's surgery is almost impossible to get an appointment with. The trains into London are to full capacity as is the parking facility at the train station.

The volume of traffic has increased with an alarming rate over the last 15 years - not only due to many newly built houses (infill) but also due to Satelite Navigation systems sending traffic from the A246 through East Horsley to the A3 and A246. The roads are barely wide enough to accommodate the heavy load of lorries, coaches, large 4x4s and other traffic. - I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Dear Sirs

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

* I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

* I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

* I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

* I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC). The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

* I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and a further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M2S/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational,medical, energy, water and communication services.
- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Summary

I object to the local plan for the above reasons.

Also, and importantly, I have not seen any justification for the increase in numbers of houses required and presumably that justification will now be less with the decision to leave the EU.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Wisley

A development of 2000+ houses at Wisley is again a breach of the Green Belt that is in place to protect the country from just such development.

In addition to the 533 proposed houses for the Horsley villages many of the new residents in the Wisley new town/village will clog the roads and parking in East and West Horsley and surrounding villages. It is daft to assume all the residents will leave this village via the A3. They will of course use the local amenities. It will be gridlock.

As the development for Wisley was very recently rejected by GBC for numerous, and what appear to be insurmountable, reasons why is this Wisley development still in the Local Plan?

Facilities
The huge additional housing both in numbers and percentage terms will have a significant impact on the infrastructure. Specifically:

- **Doctors Surgery** – I have an 88 year old mother and making an appointment at the surgery is very difficult. If an additional 533 houses are built in the Horsleys, which is a huge percentage increase it will become impossible. 
- **Parking** – Is at its limit at both the station and at the East Horsley shops and there is no obvious way of extending this to cope with the additional cars from 533 extra houses. 
- **Roads** – All the local roads are country lanes either without pavements or single sided pavements. Again the area will not be able to cope and there is no scope for improvement. 
- **Schools** – Are at full capacity so there is no where for additional children to go to school at either primary or secondary level. 
- **Surface water flooding** – Is particularly serious in East Lane and elsewhere in the villages of West Horsley and East Horsley. East Lane is flooded every year during storms. The development either side of East Lane will make this worse as will the developments elsewhere in the Horsley villages. 
- **Water supply** – Is very weak.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

**Objection to the Local Plan**
I wish to strongly object to the Local Plan on a number of grounds.

**Green Belt**
I object to the West Horsley being taken out of the Green Belt. The development sites A38, A39, A40 and A41 are clearly areas which should not be included in the Settlement boundary. They are clearly part of the ‘Green Belt’ countryside that surrounds West Horsley. 

In addition A41 is starting a creep that will inevitably lead to the joining of West Horsley village to the Northern part of West Horsley and East Horsley. 

All of this also has a detrimental impact on the rich wildlife with much of that habitat and wildlife corridors being removed.

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

15. I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick's Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/1478  Respondent: 15408513 / Brian Rawling  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

16. I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA repory methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, I also undertsand that is it based on 'commercially confidential' modelling assumptions that cannot be checked, reviewed or audited independently. I note that there has been no transparency to this evidence base and it is therefore impossible to assess its accuracy. I firmly believe that this has been conducted in an undemocratic fashions and is not appropriate for consultation of the Plan.

The National Plannig Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

I trust that all my objections made above are fully taken into consideration and that the Plan is withdrawn.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

13. I object to the inclusion of the land at Garlick's Arch, Send Marsh/ Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. It has not been confirmed to why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this.

I am also concerned that the fields behind my property will be used as site access/egress with a typical works compound, and of course the construction site, for the entire works period. Given, its' proximity this will see a 24 hour security fenced and lit compound. Movements of heavily construction traffic within a short distance from my house, will happen 5 or 6 days a week to amount to thousands of movements of material away and deliveries. My whole family will suffer the consequences of noise pollution, dust pollution, and construction activity for the duration of the development.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Clandon and Burnt Common. This increased funneling will cause immense damage to those arwas with narrow roads, all increasing the possibility of road traffic accidents.

This Plan does not address the needs of local communities of the Borough in this regard. Ther has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
8. I object to the damage of the historic environment as a result of the scale of the proposed development (Policy D3)

I object to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick's Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient Oak trees. It is well documented that Oaks provided a habitat rich in biodiversity, supporting more life forms than any other native tree species which each Oak housing hundreds of species of insect, supplying many native birds with an important food source. I autumn mammals such as badgers and deer take advantage of the falling acorns. Development will see the destruction of these trees and further damage to the local biodiversity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

5. I object to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick's Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable and less disruptive.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
6. I object to the location for new employment floorspace at Garlick's Arch - Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick's Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

7. I object to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of several successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them wish to leave their premises. The Plan does not promote rural employment, rather it will result in the loss of existing local rural business.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
9. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in an around our villages. The Plan does not provide and achievable strategy for improving capacity on these local roads.

Furthermore, a large number of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition, and have not been tendered. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested, with traffic accidents more likely to happen. I mention this as Surrey has become a mecca for cycling, particularly at weekends hundreds of cyclists passing through Ripley, Send and Clandon on the way to the Surrey Hills. Trade to local businesses such as the coffee shops in Ripley have benefitted from this pursuit, along with employment and wealth creation form local Small to Medium Enterprises (SME’s). I am like many a keen cyclist, and I am concerned that the Surrey Hills will be damaged beyond recognition should this development be brought forward, thus losing it's brand value, attraction and status. With no proper cycle lanes on narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road traffic accidents involving cyclists as a result of the development proposed under the local plan. This comes at a time when many of the local schools are trying to encourage cycling within their School's Travel Plans (STP's).

Most of the local rural roads also do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians. To example, in Clandon, where footpaths do exist, they are often very narrow in places with construction lorries mounting pavements in order to pass, and this has been already well documented by West Clandon Parish Council.

10. I object to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, I share the view that my family and I along with all other existing residents’ in the locality will see our quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site. The farm land around the South bound extension, floods regularly. Should this development go ahead, I expect that the flood waters will be pushed close to my property and will present greater risk of flooding.

I also note that without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and very likely be overwhelmed. It is well documented that many local services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I am also concerned with the general reduction in future Police funding (Surrey Police identified that it needed to save £28.4m over the four years of the spending review between March 2011 and March 2015). Savings have been made, but their scope with new developments will increase, creating extra pressure. This will have further impact to all local residents as local Police will have 13, 860 new homes during the plan period.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

11. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Reviewing Highways England material, suggests that it has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make situations worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()

12. I object to poor air quality concerns (Policy I3)

As a local resident, with a young family I am acutely concerned, with air quality and the levels of harmful motor transport emissions. Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." As this development, is within 400m from my house, I ask GBC to detail how they achieve this? This proposed development, particularly in the north east of the borough will lead to considerable further congestion, and emissions in traffic will mount up waiting for the lights to change. This will be particularly acute to nearby properties such as mine. This will have a detrimental health effect to my children when they play in their garden.

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. I object to not protecting the Green Belt (Policy P2)

I object to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt.

There is a real danger that the loss of this Greenbelt will result in a mess of urban sprawl and the neighbouring villages merging into one another. The significance of this development, will result in the character of these villages being lost and the natural habitat and countryside being encroached.

I am bemused to why the existing brownfield site just to the south of the site at Burnt Common, has not been considered.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
4. I object to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2- having between a 1% and 0.1% annual probability of river flooding. As a local resident, I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay (in Winter 2013 to the depth of 2 feet in places). Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
villages, this will force more motor vehicles to what is already congested roads. These sites are unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve wider infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution.

With the proposed development coming within 400m of my property, I am acutely aware of the destruction, the increased noise, pollution and damage this development will have to the local habitat. This will perhaps, affect me more than most but all residents in Send, Clandon and Ripley will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. I object to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present there three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only 5 miles. It will in effect create a sprawl, with the merging of 'identities' of the surrounding villages, with no delineation between one village and the next.

The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. This development will have a permanent and detrimental impact on each of these communities, should this Plan be approved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2604  Respondent: 15408545 / Michael J Lewis  Agent:
I refer to latest addition to the local plan for Send's future development. This site would obviously be built on Green Belt Land which is totally unsuitable for this area.

Object for the following reasons:

1. I object to - Send Hill is a very narrow lane and where this site will be there is absolutely there is no room for vehicles to pass each other, therefore the road would have to be widened, at a considerable cost, to enable lorries and caravans to go back and forth on this site. The sewage in Send Hill has always been a problem with excess effluence, there is considerable back up so our properties has to be cleaned out on a regular basis, this will only be exacerbated by any additional properties.

1. I object to - The private owner part of this development which is opposite our property has become a haven for wildlife with deer and there young, badgers, rabbits, bees, owls, and various species of birds.

1. I object to - When this piece of land was sold to the present owner there was a Covenant that a corner of this plot should not be disturbed as it was used as a dog and pet. Building on this plot surely is breaking the lease.

1. The GBC area of this development has been used for many years for recreation, children and dog walking.

1. I object to - Previously the land was used and a waste. This infill was extremely toxic and has been vented over a period of time. If building was to take place, surely this would disturb any existing toxicity present which could result in serious problems!

1. The Cemetery enlargement in Send Hill has now been offered to all denominations which will increase both traffic and parking problems adding yet more chaos from your proposed development. If you take in consideration the traffic from schools and their latest rebuilds, this will increase the traffic problems. By the riding stables on Send Hill the road gets even narrower and very dangerous leading into Potters Wood.

I object to the proposed alterations to the Local Plan site - for the following reasons.

I object to - The proposals are being built on what was green belt and seems extremely underhand by moving the green belt boundary lines. This goes against the Sectary of State guide lines and the Government planning Minister.

A letter received from Sir Paul Beresford in July 2014, stated that only in exceptional circumstances could properties be built on green belt land. This proposal could be built on brown fields and do not show special reasons for green belt building.

The Send Hill development is in a complete residential area and could not cope with a increase in traffic, including commercial lorries being used by travellers.

A copy of this letter is being sent to the Secretary of State, Ministry of Planning and our local Member of Parliament and Prime Minister, David Cameron.

I want my comments to be seen by the inspector.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object most strongly to the proposed development at Garlick Arch, Wisley Airfield, Gosden Hill and Clan don Golf course. These large developments will have a profound effect on the Clandons and surrounding villages and countryside. The traffic situation locally is impossible already and will become much greater if any of this proposed development goes ahead. The Clandons and other small villages will just merger and become a suburb of Guildford.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to comment on and object to the Local Plan.

In particular, Iam concerned about a number of the proposals as they impact East and West Horsley (the "Horsley's") and the surrounding area.

Quite apart from the fact that it is absolutely clear that the residents are totally against the Horsley's being removed from the Green Belt, the proposal to increase the number of dwellings in West Horsley by around 35% is excessive in the extreme.

In this regard, I understand that the National Planning Policy Framework must take account of and respect the character and density of housing in the area of new residential development and the quantity of new dwellings be limited by the availability of infrastructure and local facilities.
Many residents like me have made their home in the Horsley's attracted by the village atmosphere but the high density developments proposed for West Horsley would forever change this.

In the 30 years I have lived in West Horsley I have seen a steady increase in the numbers of new residents moving to this area.

In doing so, services such as the Medical Centre have already become so busy that it is often difficult to make an appointment. Parking at the Medical Centre is also at a premium.

Access to parking in the area of the East Horsley shops is already often extremely difficult with the current volume of shoppers and traffic and the Horsley railway station parking facilities, once adequate, are generally pretty full.

Furthermore, the car park at Effingham Junction Station, which in the past could be used as an alternative to Horsley Station, is regularly full.

The proposed developments will result in traffic movements becoming significantly greater following the inevitable increase in the number of vehicles on the road. Consequently, traffic using the local roads are likely to come to a grinding halt at the times when travellers are attempting to get to or return from the local railway stations to get to work or school.

It must be clear to anybody that the increase in population resulting from the proposed developments would generate a huge increase in traffic in the area which would be significantly exacerbated by any development of Wisley Airfield.

I believe that the road capacity in the Horsley's is totally inadequate to support these plans.

I understand there are other issues which have been raised by the local Parish Councils which include concerns about road and transport infrastructure for West Horsley as well as concerns about the existing pressure on sewage and the local wastewater network's ability to support the demand from the proposed developments.

It seems to me that Guildford Borough Council has simply decided to remove the Horsley's from the Green Belt and build an inappropriate and excessive number of houses in West Horsley without any justification.

Given the scale of the proposed development in West Horsley which would lead to the unnecessary end of village life and an adverse impact on the infrastructure across the Horsley's I object to these proposals in the strongest terms.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am most concerned over the proposals contained in the Guildford plan in relation to West Horsley, and would cite the following among my main concerns:

I am very much against the higher density of the proposed new homes in West Horsley which would spoil the whole character of our village.

It is clearly unreasonable that any major increases in the number of homes in West Horsley should be considered without major parallel improvements to- and expansion of much necessary infrastructure- much of which is already operating under severe pressure.

I cannot see any valid reason or any 'very special circumstances' as to why West Horsley should be taken out of the Green Belt and am opposed to any such measure.

I also have real concerns as to the validity of many of the assumptions upon which the Guildford plan is based- particularly in relation to West Horsely.

I trust the above points are sufficient to illustrate my opposition to the currently proposed plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/1460  Respondent: 15411041 / V Reid  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am opposed to many aspects of 'The Guildford Plan' concerning West Horsley- especially to the following.

1) I was shocked at the proposed removal of West Horsley from the Green Belt, particularly in the absence of any stated "exceptional circumstances" to justify such a main change to our village.

2) I object to the disproportionately high increase in the number of proposed new homes in West Horsley compared to similar areas in the Guildford Plan.
3) Local facilities—such as the medical centre, schools of public transport—all already overstretched—would NOT be able to cope with any significant increases in the population of West Horsley.

I could easily, yet again, add to the above objections to the plans, but would urge you to reconsider and amend it in the light of objections such as those noted above.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

• I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

• Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no
funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

- Finally, I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the area. It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

All this to say nothing of the devastating impact it would have on a small rural village being transformed into something just short of urban! I will not here endeavour to point out the obvious impact on the beautiful countryside, lying as it does in an area of Outstanding Natural Beauty on the North Downs. I believe that any visitor to the village would agree it would be utterly abhorrent to encroach on the countryside around West Horsley! Surely Beatrix Potter, celebrated children’s author who used to stay at a cottage in the village with her uncle and aunt and did many of her paintings and wrote some of her books there, will be turning in her grave at the prospect of these plans for turning West Horsley into suburbia!

As I see it, it is the task of the council to protect the environment for its residents, not facilitate the cruel scarring and destruction of the kind of the beautiful landscape and lifestyle that makes our borough desirable as a tourist and visitor destination. Before you vote on this proposal, please visit our village to see with your own eyes how profoundly ill-considered these proposals are!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Amenities such as shops, schools, post office, medical centre (East Horsley) and public transport (Horsley station - the car park of which is already over-capacity!), to say nothing of the narrow, poorly maintained roads through the Horsleys (already too dangerous for me to consider cycling or walking and regularly closed due to flooding) would be pushed beyond breaking point!

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the proposal made in the current Proposed Local Plan to build hundreds of new houses in the green belt village of West Horsley.

Agreed, there is a need to create more small, affordable homes in the borough, however proposing an increase of some 50% in the number of properties in this small rural village seems, if I may say so, to border on madness! Surely a far better solution (or rather multiple smaller-scale solutions) could be sought on brown field sites or in the conversion of abandoned commercial properties.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also
I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. - I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M2S/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I would like to object to the proposed development of Wisley Airfield on the grounds that:

- it should remain as a protected green belt area.
- there are insufficient services such as schools, shops and doctors surgeries for a development of its size.
- the impact of increased traffic on the surrounding country lanes and on the already dangerous confluence of the M25 and A3 should not be underestimated.
- lack of public transport, buses and trains and lack of commuter parking at existing stations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I support the objection made by WAG as well as the objections made by Ockahm/Ripley/East Horsley parish councils.

I object particularly to the loss of the publane footpath which cross the Wisley Arifiled, I played some part in getting the footpath instated and sedicated.

I object any plan which is dissected to violate the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am alarmed by what I have read about the plan for the prospective development of Guildford.

The scale is surprising and the failure of GBC to apply any constraints to housing numbers (like other councils) is hard to understand. The prospective worsening of traffic problems in the town (where the new Waitrose has already made the traffic in York Road slower and more congested) is particularly worrying.

It is hard to understand why our council has opted for change on a scale which appears to be directly to the disadvantage of existing residents. This whole plan needs to be looked at again. We need a sensitive and measured approach to Guildford’s future development, not over-ambitious gigantism.

The plan is not sustainable and there is no 'non biased' specialist report advising of the need for 13,000 plus houses in the Borough, particularly now the country has decided to Brexit. I understand your Advisors work for the Property Developers in the Guildford Area.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The road infrastructure is inadequate to cope with any further development in the area. The A247 running through West Clandon is narrow and dangerous and is overloaded with traffic, before any major housing or business developments take place in the area. Traffic is always congested at peak times and many other times heading north on the A3 with cars trying to access the M25. Regularly the M25 is closed and all the traffic comes through the Clandons. Also Stag Hill is congested each night.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object most strongly to the Proposal within the Local Plan to use Green Belt land for major development. The Clandons were my home for some 25 years and I visit 2 or 3 times each week and I want my children to enjoy the Green Belt areas around the Clandons which I enjoyed when growing up. Green Belt was designated “Green Belt” to protect our countryside for future generations.

I object to areas of East Clandon becoming a settlement area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings.

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor
stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including bus and HGV movements.
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public transport stations. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
  - Most of the borough's infrastructure is antiquated, congested and strained to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I OBJECT to building 400 houses and 7000 sq metres of industrial space at Garlick’s Arch, as this area regularly floods and building additional housing there would mean that water needs to go somewhere else, causing further flooding. It is also an area of ancient woodland. With proper use of brownfield sites, this green belt site is not needed.

I OBJECT to the A3 intersection at Burnt Common because the traffic along Send Barnes Lane from the traffic lights is already overstretched on a regular basis. The traffic are often gridlocked with traffic backing up from the Burnt Common roundabout all the way back into Send. It can take 15 - 20 minutes to drive less than half a mile some mornings to get from Send to Burnt Common. I walk a lot and the car fumes are horrible, not to mention the noise not just from engines but from car horns of disgruntled motorists from the endless queuing. Often the lights change and nothing has moved at all.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the development of 40 houses and 2 travellers’ pitches at Send Hill. I live close to the traffic lights at the end of Send Hill and Send Hill is not built to cope with much traffic. It is already extremely congested and the other end of the road is single track and not suitable for lots of traffic. I regularly walk in the area and the countryside is beautiful. I would be heartbroken to see our lovely landscape spoiled with more buildings.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT most of all to Send being removed from the Green Belt. I thought the whole point of the Green Belt was to have a permanent protection of towns and villages around London to ensure they don’t merge into each other and to ensure sufficient green landscapes to retain our beautiful countryside. Why are Local Councillors and Central Government reneging on a promise in the election to protect our Green Belt?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. I would like to state my objection to the building of 2,000 new homes on the Former Wisley Airfield. The A3 is already under pressure from traffic with the interchange of the M25. I live in Cobham and use the A3 nearly daily, the increase of traffic over the last few years is disproportionate to the area. Access onto the A3 from Elm Lane off the airfield is very dangerous as is Old Lane, a potential increase of over 2,000 vehicles, even through Hatch End, Martyrs Green area, would impact greatly on Cobham, which is often at a standstill.

1. Infrastructure issues:

There are, as the consultation documentation recognises, important infrastructure requirements if there is to be any further housing development in the Guildford area. With regard to Shalford the A281 needs relief and not more traffic joining an already congested road. If, as is widely anticipated, the Broadford brown site development in Shalford proceeds this will test the stretched infrastructure and should not be compounded by development on the fields behind the Village Hall. Chinthurst Lane is a rural lane without footways. Many residents, including children, those with pushchairs, walkers and runners are forced to use the carriageway. The traffic generated by additional houses would aggravate the current vehicle/pedestrian conflict in the lane and be at odds with its attractive semi rural character. Since land adjoining the carriageway is in part in private ownership, in part registered common land and the provision of footways would spoil the lane’s character, the absence of footways will continue to exist. The Society objects to the fact that the infrastructure has not been properly assessed and is inadequate to deal with current housing levels - roads, doctors, schools will not be able to cope if there is development before suitable infrastructure arrangements are in hand.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

The above Society is an informal group of like minded individuals who have been working since 2009 to protect the fields behind Shalford Village Hall from development. A number of members of members of the Society are intimately familiar with the recent history of the this land and stand ready to provide any further information that would assist the Council in understanding the concerns regarding the proposals affecting these fields and ideally to help the Council to draw the appropriate conclusions.

In short, the members of the Society **strongly object** to the proposed changes to the Green Belt designation and the change to the Settlement Boundary with regard to the fields behind the Shalford Village Hall.

1. **Original intention for the fields:**

For a number of years, each time there has been a consultation on the Local Plan we and many, many others have objected strongly to the proposal to remove the Green Belt protection from this site and include it within the Shalford Settlement Boundary.

In short, but much more detail is available on request, this land was originally protected by mutual covenants including the Shalford Parish Council as a Trustee for the Village Hall. The land which includes the Village Hall was given for the benefit of the people of Shalford and the local community in 1985 and suitable covenants imposed on the surrounding land. The current owner of the fields in question would never have been able to purchase them without agreeing to the covenants.

Subsequently, the covenants were released when the Village Hall and Tennis Club wanted to expand and also build the bowling green. At the time the Parish Council was mindful of, and comforted by, the facts the fields were:
• outside the Settlement Boundary,
• part of the Green Belt, and
• designated an Area of Great Landscape Value (AGLV).

1. Lack of Clarity and Certainty in Consultation documentation:

At what appears very short notice it is now proposed to designate the fields as "Open Space (currently being updated to include assessment of villages following insetting)"; this proposal appears to arise from a report dated June 2016, hence the feeling of this all being done in a possibly ill-thought through hurry as the Local Plan consultation covering '000s of pages began on June 6". Further, Open Space is not defined in any Glossary in the consultation documentation. The import of the words in brackets creates considerable doubt as to what has been decided or is intended. Although a Surrey County Council footpath runs past the land (Shalford PFP266) there is no public access to the fields and it is not clear how the Council could utilise the land as Open Space.

Further the consultation proposes that the whole of Shalford is covered by the AGLV protection. It is understood this is an error, although this is not widely known.

It is strongly believed the arguments for changing the Settlement Boundary and removing the Green Belt protection are not justified by this opaque designation as "Open Space (currently being updated to include assessment of villages following insetting)."

The cynical would suspect it is a process to enable development, as once the Settlement Boundary is changed and the Green Belt protection removed it will be eminently possible for developers to undermine the Open Space designation, which seems to be unachievable.

It is understood developers have a contractual obligation to spend significant sums of money seeking planning permission to develop this land and the uncertainty and lack of clarity in the consultation paperwork is opening the door to them. If the Green Belt protection is removed the presumption would be in favour of housing development and the current confusion would open the door to the developers to this land.

1. Strength of local feeling against any development on these fields:

In the last consultation process in 2014 over 700 local signatories signed a petition objecting to the redesignation of the fields behind the Shalford Village Hall. This strength of feeling persists and if it isn't reflected in the volume of objections received on this occasion it should be borne in mind there is an element of consultation fatigue, again it is all at very short notice, during a holiday period, the paperwork voluminous and bewildering and as described above unclear as to what is intended and the potential consequences.

1. Previous advice sought and provided to the Council:

It is not believed anything material has changed regarding this land from the report provided to the Council in 2007 in the Landscape Assessment Study by Chris Burnett and Ass. Which concluded regarding Shalford:

• "A semi-rural landscape persists;
• Need to ensure long term protection and management of the commons, grass verges and open spaces that exist between the areas of development;
• The area is especially vulnerable and sensitive to adverse change and could very quickly change to a landscape perceived as part of a continuous urban area and extension of Guildford

Key vulnerabilities and sensitivities primarily relate to small commons, grass verges and open land that exist between developments. These 'gaps' do not all have formal protection as registered common land and are therefore vulnerable to development as well as smaller scale incremental change such as the creation of car parks and recycling facilities that create more typical urban fringe character. Today, the historic origins at the landscape can still be perceived, although
further development could obscure these references by imposing a more homogenous, ubiquitous landscape on the fragmented, piecemeal mix which creates the current character of the area.

Conserve the low key rural character of the roads and Lanes that form the boundaries as this area and avoid upgrading, widening and imposition of formal highways infrastructure. Seek to limit suburbanising elements on the urban edge (lighting, fencing etc.) that detract from the rural character of the area.

The area has similar characteristics to the neighbouring Area of Outstanding Natural Beauty."

In the Society's view nothing significant has changed and these conclusions and recommendations could almost be about the fields behind Shalford Village Hall and Chinthurst Lane.

A semi-rural aspect does still exist to the east of Chinthurst Lane and any development on the fields would inevitably require the Lane to be widened and upgraded. Is it really the case the trees bounding the Common at the King's Road end of Chinthurst Lane will be sacrificed along with the current characteristics of the area, as described above, to allow a developer to exploit the two fields behind the Village Hall? Is it really the case the trees bounding the Common at the King's Road end of Chinthurst Lane will be sacrificed along with the current characteristics of the area, as described above, to allow a developer to exploit the two fields behind the Village Hall? It is interesting that the consultation paperwork divides Shalford into a North and South. South Shalford and in particular that area south of the railway line is not urban in character and the proposed changes to the fields behind the Village Hall will jeopardise this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

In summary the Society objects to this proposal to change the Settlement Boundary and removal of Green Belt protection because:

• A slightly amended existing boundary following clearly defined boundaries would be more logical excluding this and other open land from the Settlement Removing the Green Belt protection means there will inevitably be an application pursued with vigour at length by developers. The current boundary is clear, physical, recognisable and has proved eminently defendable to date.

• The wording in the consultation is too unclear for us to consult on; there is no definition of 'Open Space' and we don't know the possible consequences of "currently being updated to include assessment of villages following insetting". Why is it proposed to change the AGLV boundary to cover all of Shalford?

• There is no logic in making the proposed changes and then designating the fields as "Open Space". If the Council wishes to avoid the inevitability of a development on this land then the best thing would be to keep the Green Belt protection, not include the fields within the Settlement Boundary and further, declare it Local Green Space and subject to Special Calling it Open Space is, as currently proposed, unclear and likely to be easily overturned by the developers.
The strongly held views of significant numbers and proportion of Shalford residents (as evidenced by the petition signed by over 700 residents in 2014) and those of the Tennis and Bowling Clubs and Village Hall Committee together with the Parish Council, which is an important voice of the local community, all object to this. The expressed view of the local community is that this land should be left undeveloped. Therefore this intention would be best met by retaining this land in the Green Belt with its additional AGLV protection and outwith the Settlement Boundary. It is understood it could still then be declared Open Space if this is possible and appropriate.

It is possible that many local residents probably think there is now no longer any threat of the land being developed and therefore do not need to write.

The history of the fields and the intention for them to be left for the benefit of the people of Shalford and the local community and the basis upon which the covenants were released.

Chinthurst Lane is not wide enough to accommodate more traffic. The Society strongly believes the Council should work to preserve the low key rural character of the roads and lanes that form the boundaries of this area and avoid upgrading, widening and imposition of formal highways, street lighting and fences which would suburbanise a rural part of the Village.

These fields contribute to the open character of this part of the village of They rise 32 feet above King's Road. Buildings of any height would change the skyline of Shalford and tower over and detract from the enjoyment of the many users of the tennis, Bowls Clubs, the Village Hall and the Common.

The Society considers that this open land is inappropriate for inserting from the Green Belt and being included within the settlement of Shalford that would have protected this AGLV land. It is possible that Council officers and members are trying to accommodate the wishes of the local community with the Open Space designation. It is however submitted that all three designations should be included in the Plan; Green Belt, AGLV and Open Space with regard to these fields which give a much better chance of them being saved from development.

I object to Local Plan Policy A58 because there is no need to build on Green Belt land when there is clearly industrial space available in the local area. The road and traffic situation in the area of the proposed development is already congested and the increase in HGV traffic will only cause further problems. I also object to the infilling of areas between villages via the use of Green Belt land.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor
stretches from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public transport stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

- Most of the borough’s infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan’s commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to a new interchange with the A3 at Burnt Common because Send would have to take traffic from the proposed 2000 new houses at Wisley Airfield, 2000 houses at Gosden Hill, Burpham and 1850 at Blackwell Farm. Send Road is already overloaded and increase in traffic from A3, M25, Woking and Guildford would become gridlocked with noise pollution levels increasing which are already very high. This must be avoided.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to send village being removed from the Green Belt. It was intended to be permanent as required by the National Planning Policy Framework and it is wrong and not justified to abandon it. Without the green belt there is no buffer between Woking and Guildford to prevent it becoming one conurbation. If the Green Belt is lifted there will be nothing to stop developer building and building until our lovely villages in the area are destroyed.

As a resident of Shalford and a member of Shalford LTC I wish to make known my objections to the current version of the local plan which removes the fields behind the Village Hall and Tennis Club from the Green Belt and puts them in the Shalford settlement boundary.

Although these fields have been classified as "open spaces" there is no explanation or confirmation to say that this would give them the same degree of protection as the Green Belt from housing development.

Any construction on these fields which are 25ft above the village hall would tower over the tennis courts and bowling green and totally destroy the Green lung of the village.

The considerable traffic from a development would have to exit on Chinthurst lane not only adding to the traffic chaos and pollution but increasing the potential for an accident.

By implementing a small adjustment back to the 2003 boundary GBC could protect these fields and ensure they remain open spaces.

---

At the present time there are understood to be some 2808 houses in East and West Horsley combined and if the present Local Plan is adopted it would add 533 houses on 'large' sites and 60 houses on 'small' sites within these two villages - a 21% increase! As Horsley residents, we think it is excessive and objectionable.

This increase, moreover, should be viewed against the proposed developments within a 5 mile radius of Horsley, in particular 2000 houses on the Wisley Airfield site, 400 on Burnt Common, and 2000 at Gosden Hill Farm, making in all 4993 houses, a staggering total which will, in our opinion, completely ruin the current attractive rural character of the area.

It is thought that the inflated number of new proposed houses arises from a 'Strategic Housing Market Assessment that was generated by a consultant's mathematical model- not revealed in the Plan. That housing number has been increased by GBC to give a population increase which is almost 70% higher than the official national estimates for population growth in the Borough, which thus leads to alarming results.

It is not just the increase in housing which is relevant, but all the changes that come with it - for example, the increase in population and household cars, demands for school, medical practitioners and hospital places, and transport facilities,
which have to be considered against the existing positions. In the Horsleys, the local schools are full, medical facilities stretched, roads are overloaded and drainage inadequate.

Answer (if comment is on questions 1-7 of the questionnaire): ()

In this Local Plan there is a proposal to remove the Horsleys from the 'Green Belt', but the 'exceptional circumstances' required to be present before taking this action have NOT been demonstrated. Nor have any sound reasons been given for the extension of the boundaries of the 'settlement areas' of the Horsleys, We also object to 'Station Parade' being designated a 'District Centre' which completely misrepresents the village centre, and if accepted, would thereby allow detrimental future urban development.

In our opinion, and for all the above reasons, this Local plan should be rejected.

---

1. **Planned level of housing need.** I cannot see that the assumption of housing need at 693 per annum has been adequately explained / evidenced - since this is a critical assumption determining the scale of required developments I cant see how any decision to proceed with the plan can be supported.

1. **Traffic and Road infrastructure plans.** Having reviewed the transport impact analysis arising from both the Slyfield link road and the Gosden Hill housing development I have found it unconvincing.
   
   • As a result of these developments Burpham will be faced with significant traffic increases of both commercial and private vehicles which I would expect to cause major issues on a daily basis
   
   • In particular the estimate of heavy lorry traffic southbound off the A3 to Slyfield is especially concerning as it is simply too low
   
   • I have not found any convincing analysis showing the combined effect of the two developments on the traffic in the Burpham area
   
   • Of particular concern is the lack of consideration of the traffic flows having to pass through Burpham from the Gosden Hill development wanting to travel north along the A3

Until full details of the proposed road infrastructure and a full traffic analysis, detailing assumptions and their appropriateness behind the analysis, is made available I cannot see how a decision to proceed with the plan can be supported

1. **Air pollution.** I cannot see any adequate estimate of the affect of increased traffic levels on air pollution in the area. I have not been able to find any analysis of either existing levels of air pollution in and around the area and any expected impact from the developments. When looking at the stalled traffic on a daily basis currently seen morning and evening on London Road I would expect high levels of pollution already which will be exacerbated by increases in commercial and private vehicle traffic as a result of the development. Lack of such a detailed baseline analysis looking at the specific areas and critical sites (e.g. Burpham primary school) and the anticipated
impact of the development the adoption of the plan may well become subject to legal challenge leading to significant cost and delay to the councils plans.

Until a detailed baseline analysis and impact assessment focused on the specific areas where traffic is expected to increase I cannot, again, see how a decision to proceed with the plan can be supported.

Answer (if comment is on questions 1-7 of the questionnaire): ()

At the present time there are understood to be some 2808 houses in East and West Horsley combined and if the present Local Plan is adopted it would add 533 houses on 'large' sites and 60 houses on 'small' sites within these two villages - a 21% increase! As Horsley residents, we think it is excessive and objectionable.

This increase, moreover, should be viewed against the proposed developments within a 5 mile radius of Horsley, in particular 2000 houses on the Wisley Airfield site, 400 on Burnt Common, and 2000 at Gosden Hill Farm, making in all 4993 houses, a staggering total which will, in our opinion, completely ruin the current attractive rural character of the area.

It is thought that the inflated number of new proposed houses arises from a 'Strategic Housing Market Assessment that was generated by a consultant's mathematical model- not revealed in the Plan. That housing number has been increased by GBC to give a population increase which is almost 70% higher than the official national estimates for population growth in the Borough, which thus leads to alarming results.

It is not just the increase in housing which is relevant, but all the changes that come with it - for example, the increase in population and household cars, demands for school, medical practitioners and hospital places, and transport facilities, which have to be considered against the existing positions. In the Horsleys, the local schools are full, medical facilities stretched, roads are overloaded and drainage inadequate.

229
In this Local Plan there is a proposal to remove the Horsleys from the 'Green Belt', but the 'exceptional circumstances' required to be present before taking this action have NOT been demonstrated. Nor have any sound reasons been given for the extension of the boundaries of the 'settlement areas' of the Horsleys. We also object to 'Station Parade' being designated a 'District Centre' which completely misrepresents the village centre, and if accepted, would thereby allow detrimental future urban development.

In our opinion, and for all the above reasons, this Local plan should be rejected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M2S/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
• Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

• Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The "objectively assessed need" figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/1487  Respondent: 15420833 / Marjorie Moss  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Clandon

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am a resident of West Clandon. I have lived on Meadowlands Estate since 1957 - nearly 60 years. West Clandon is a small village and will be squeezed in amongst the development plans detailed in the Local Plan. The road through the village is narrow in places, lorries frequently mount the pavements and there have been worrying incidents/accidents. Traffic does not adhere to the speed restrictions. It is dangerous to walk through our village, especially for my daughter pushing me in my wheelchair. The traffic is particularly heavy due to the A3, where vehicles come off at Burnt Common and through West Clandon when traffic is queued on the A3. I append my objections to the Local Plan as follows:-

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.
I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt.

If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 -2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015
- 21 Oct 2015 - A247 near shell garage - Three vehicles collided causing delays Surrey Fire and Rescue

2016

Comment ID: PSLPS16/2738  Respondent: 15420833 / Marjorie Moss  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
15 April 2016 12 year old boy injured in The Street - A247 closed in both directions
28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham's sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.
If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England's requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an "aspiration" in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Comment ID:** PSLPS16/2739  **Respondent:** 15420833 / Marjorie Moss  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43 and A43a on Garlick's Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)
The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current "soft" edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate.

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan.

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders.

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site.

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a).

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic. The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick's Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will "enhance" heritage assets which I fear is a developer's charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick's Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick's Arch (A43) is in the scheme of industrial development relatively small. Just to the
south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6000  Respondent: 15420833 / Marjorie Moss  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace.

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick's Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6001  Respondent: 15420833 / Marjorie Moss  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the loss of rural employment.

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6021  Respondent: 15420833 / Marjorie Moss  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor "attractions" and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment"/"Di sneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many "leisure and visitor attractions" already. The case for creating more is not made and no examples are given. Instead, the plan's explicit priorities should be:

1. To protect the borough's prime leisure and tourism asset, its countryside, from inappropriate This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require. no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford's river landscape less off-putting and support town-break packages for high value To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An "English town break" (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London)
would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6016  Respondent: 15420833 / Marjorie Moss  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E7 Guildford town Centre

The policy "vision" describes protecting the Guildford's unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council's own Town Centre Master Plan, the Guildford Vision Group's proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford's character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6012  Respondent: 15420833 / Marjorie Moss  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 - Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council's timidity is a case of "regulatory capture" by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog's Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over provision is inappropriate given other constraints.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of...
unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an 'affordable home' is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will 'affordable homes' be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to Policy H3 - Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the "mix" this can include "market" housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.
The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be "closely related" Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.) The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances." The size and location of sites should be better defined and it should be clear market housing cannot be included.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the road's serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and
with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough's infrastructure is already heavily strained. However the plan's determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council's methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy 11. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough's infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council's control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non viable.

Policy 11 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents' in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25.

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns.

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council's to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of "only" 1.6% of the borough's Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an "acceptable" percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council's growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers' hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.
I object to the "insetting" of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing "to the openness" of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF's other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To "inset" two-thirds of the borough's rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough's location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed "insetting" and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17's aim of "empowering local people to shape their surroundings" and other NPPF provisions. Paragraph 4.3.17 states that "the general extent of the Green Belt has been retained." I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called 'strategic sites' of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick's Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a 'special circumstance') to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC's Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that "allocating these sites does not grant planning permission for development." However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether "exceptional circumstances" existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing need. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless "exceptional circumstances" for development are proven in relation to that specific site, as stipulated repeatedly in the The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding.

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.
The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable.

The NPPF states that the presumption in favour of sustainable development "should be seen as a golden thread running through both plan-making and decision-taking." As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of "sustainable development" is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims "to secure development that secures the economic, social and environmental conditions in the area". This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as "sustainable", in breach of the NPPF's most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.
The commitment to approve planning applications "wherever possible" and "without delay" reveals the pro development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of **sustainable** development becomes a presumption in favour of **any** development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the "West Surrey" tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, "West Surrey" is much too small. Half of Guildford borough's residents work elsewhere, and
half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haselmere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside "West Surrey". Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make "West Surrey" reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour's "need". Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey's 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford's OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered "sound".

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is "deliverable" and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council's cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered "deliverable". In addition, the number of homes proposed, plus existing planning permissions, plus expected "windfall" sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a "plan" that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London's commuter belt, demand for housing is, in practical terms, unlimited.
This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick's Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local Guildford is already one of the highest 'value creation' areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.
1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green " Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not It has not been properly examined by Councilors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.
5. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the
6. The housing number is at least twice the achieved rate of building in the Borough over the last few There is no evidence in the Plan to show that this rate is achievable and sustainable.
7. Much of the infrastructure required to support the level of development proposed is outside the Council's The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer's business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
8. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.
9. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
10. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
11. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
12. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
13. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
14. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
15. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
16. The proposal for Garlick's Arch was added to the draft Local Plan without any prior consultation under Regulation 18
17. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and
foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

1. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

2. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

3. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

5. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

6. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council very little.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.
The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2701  Respondent: 15420865 / Thomas Jimmison  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M2S/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

• I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

• Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

• Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I despair at the lack of vision in exploring innovative solutions. Over 30 years of almost total inaction with the sole exception of P&R. There are so many things that could be done:

- integration of bus and rail services is essential

- rapid transport solutions of various kinds linking P&R, the centre, the main station, the hospital and research park etc, perhaps comprising an expanded train service with new stations plus trams or even buses running on raised tracks above the narrow main road arteries coupled with a dramatic reduction in public car parks (disabled only?) to ensure new public transport services are fully used and thereby have a chance of being economic

Objection to Guildford Borough Council Proposed Submission Local Plan

Although I live outside the Borough I am, and have been for many years, the tenant farmer at Bridge End Farm in the Borough. I visit every day the Former Wisley Airfield and the surrounding areas. I am disappointed that my previous objections to the draft local plan have not been reflected in the latest draft.

I OBJECT to the draft Submission Local Plan for many reasons, particularly the following:

- I object to the proposal to allocate so much new housing to the Green Belt; it should be put on the brownfield land in the urban areas of the
- I object to the housing number of 693 houses per year; this number appears to me to be far too high, particularly in the context of Brexit
- I object to the proposal to remove the Former Wisley Airfield (FWA) from the Green Belt. This area clearly fulfils an important objective of separating Ripley, Cobham, Woking and Horsley.
- I object that this urban 2,000-house development would be totally out of place in the rural environment of Ockham.
- I object to the danger from its effects on transport, local roads and road safety. The proposed remote development of 2,000 homes would result in around 4,000 additional cars on the roads, with residents having to drive to work and drive children to school. I am obliged to drive my large tractors on the narrow local roads in Ockham and the surrounding area as well as on the A3. More cars would increase congestion on the local roads and the A3. Cycling would be dangerous.
- I object to the threatened loss of high quality farmland, including 4ha classified as Best and Most Versatile land where crops have been grown for decades and probably for centuries.
- I object to the continued inclusion of this site where the Planning Committee has already unanimously rejected a recent planning application.

I request that the Former Wisley Airfield, site A35, is removed from the Submission Local Plan and the land kept as Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objection to Guildford Borough Council Proposed Submission Local Plan

Although I live in Surbiton I drive every week to visit friends in the Borough

I OBJECT to the draft Submission Local Plan for the following reasons:

- I object to the proposal to take so much land out of the Green Belt; new housing should be put on the brownfield land in the urban areas of the
• I object to the proposed number of houses; it seems too
• I object to the proposal to remove the Former Wisley Airfield from the Green Belt; it separates Ripley from
• I object to the urban 2,000 house development being placed in the historic rural village of 159 homes in
• I object to more development which would have an impact on transport, local roads and road. The narrow rural roads in Ockham and the surrounding area cannot cope with the extra traffic, which would increase the already severe congestion on the A3.
• I object to the continued inclusion of this site A35 where a recent planning application has already been unanimously rejected by the Planning

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposal for building 45 houses at Clockbarn. It feels as if comments made by residents of Send are simply ignored from one planning proposal to the next. I sat through the planning meeting where planning permission was granted for a marina on Tannery Lane. Even though the problems of vehicle access along Tannery lane and at its exits – a narrow windy lane with stretches of single passing, with an extremely narrow and windy residential stretch, if traffic continues onto Papercourt Lane, and a tricky junction onto the A247 in Send where visibility to turn out onto the main road is very tricky and hazardous – were raised by many, those who voted to grant permission in no way addressed those issues – the permission to develop the Green belt seemed to be granted on the basis that there were ‘special circumstances’ thereby making it acceptable. The requirements attached to the permission for the marina only appear to address the issues of a pathway through to Wharf Lane and the widening of a 200m stretch towards Send Road. This will not be adequate to eradicate traffic problems from this development and will certainly not support further development. I have never understood what the special circumstances are that would justify introducing hazardous traffic levels to our area and there was the additional concern, at the time, that granting of this permission would lead to further applications in this area, Tannery Lane cannot take any more traffic.

Answer (if comment is on questions 1-7 of the questionnaire): ()

In addition I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan and there are plenty of examples of unused existing floor space that should be utilised before provision of more. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available. The additional traffic that would be brought to the area by an industrial area will not be able to be serviced by the road infrastructure and the proposal for the new interchange will in no way help.

The Garlick’s Arch site also has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding. Economic growth in the Guildford area should not require the loss of our rural heritage or be targeted at an area that cannot cope with it.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposed new interchange onto the A3 at Burnt Common. I believe it would be disastrous for Send. The Transport Evidence is incomplete and unreliable but, even so, shows there will be congestion because Send would be used as a cut through to the A3/M25. The A247 already suffers from over loading so any additional traffic would be disastrous and we may well have a situation where we are gridlocked regularly through the day. Traffic tail backs are already easily triggered either towards Old Woking or through Send to Burnt Common - any additional traffic to and from the A3 would result in these queues stretching in both directions through the length of Send.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I also object to the development of 40 houses and 2 Travellers Pitches at Send Hill. Again, this is an area which has already come under planning proposals and residents have already spent time trying to explain the problems. Not only would this spoil a beautiful area of Green Belt but it is unsuitable for development for many reasons. It has no suitable vehicle access as Send Hill is a narrow residential lane which cannot support further traffic and has poor junctions at both ends. The junction with the A247 only copes on the basis that traffic from and to Send Hill is light. At both ends of the school day, when traffic is higher, I would divert down Potters Lane and along Send Rd rather than try to use the junction of Send Hill and the A247. It is impossible to pass and extremely dangerous for the children arriving and leaving school. If it is that bad already, how could we support more? Additionally, the other end of Send Hill, where it joins Potters Lane is already extremely hazardous. It is a single passing bending section, accessing onto a bend of Potters Lane, with very limited visibility. My daughter’s driving instructor advised her to stop at the junction of Send Hill and Potters Lane and wind down the window, whatever the weather, so that she has some chance of hearing whether there is any traffic approaching from either direction of Potters Lane as it is impossible to see traffic coming. This junction cannot support higher levels of traffic.

In addition, development here would be sighted on an area where the subsoil has previously been documented as containing unsafe land fill waste. The local plan is flawed in its reference to this area as it describes it as a quarry whereas it was a landfill site “refuse tip” prior to a time when proper licensing/registration was required and predating the 1999 EU Landfill Directive regulations. GBC has recognised this problem, stated it has “areas of potentially contaminative industrial activities”, installed gas monitoring wells and recorded methane gas discharge. I therefore believe that there is a danger that any disturbance would be a health hazard. The area is also vulnerable to flooding. A Wasteland Solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area, the Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005 identified that changes to the proposed site could cause potential ground water vulnerability to properties and you only need to walk in the area to see how susceptible it is. Further development would disturb the water table and increase risk of flooding in the area. The recent death of a child as a result of seepage of contaminated ground following flooding prove that developing any such sites is a danger to health in addition to the problems of flooding.

It would be totally unacceptable to offer such an area for a Travellers’ pitch. The Travellers would also be being located in an area where other elements of the infrastructure, such as schools, doctors (it is already almost impossible to get a doctor’s appointment in an acceptable time scale, we have resorted on many occasions to the walk-in centre in Woking) and other services, would not support their needs.
My additional objection to this proposal lies in the fact that the Traveller Accommodation Assessment research does not seem genuine as the research is dated June-July 2012, by Mill Field Services, but this market research company was dissolved in January 2011 according to the government companies’ site.

I also feel very strongly that this is an area of nature reserve nearby. I object on these grounds as we shouldn’t be endangering such areas, especially when there is no justification for the development. Unfortunately such considerations do not seem to carry the importance that they should but, alongside all the other reasons, they should add any necessary further weight to the objection.

I do feel that I cannot express sufficiently strongly how I feel about this new plan and the objections to it. If it remains in its current form, it will be looked on with regret, as the moment when this area of our beautiful country, which we thought we had saved by the imposition of the Green Belt, was irrevocably destroyed for future generations.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Green Belt was implemented for a very important reason – up to now it has been hugely valuable in saving our countryside – I do feel we owe it to future generations to do all we can to preserve the beauty of our country and not have them look back with regret that the green belt was not maintained, when the urban sprawl from London extends outwards engulfing Guildford and Woking and, with no imposed buffer, having no restriction to its spread. The whole point of the Green Belt was to stop such a disaster. How, therefore, can either destroying the Green Belt by huge areas of development or removing sections of the Green Belt be even considered when, despite various claims, there is no actual need?

I object to the clear contravention of the government’s commitment for Green Belt protection and the proposals for insetting of the Green Belt which can only open the doors for unscrupulous developers. The Government’s pre-election commitment to protect our Green Belt should be upheld by GBC. I completely understand that the government has set huge targets for housebuilding but we must not give up the green belt for these targets – it is possible to meet these targets without – we must not be influenced by the wishes of developers either wanting to avoid the costs of reclamtion of brownfield sites or wanting to take advantage of premium areas to build houses that will command higher value. In any case, the latter are not the housing need and destroying our green belt is not the answer.

The Local plan proposals to build on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill, and elsewhere in the borough are not justified when we can use urban brownfield areas of Guildford which are already better served by infrastructure. Such building is not justified by any special circumstances and therefore doesn’t justify erosion of the Green Belt. I object to the fact that GBC have failed to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt, and the failure to include the Town Centre Masterplan 2015 within the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object that we are given an exaggerated “housing need” figure of 13,860 and that 70% is targeted at the Green Belt – the housing need figure has been wrongly calculated and wrongly apportioned to our area and, also, the housing need for students wrongly assessed – we must not use our Green Belt, but use our urban land better, finding better ways to provide affordable housing and for additional student accommodation we should concentrate on existing areas of the University of Surrey’s campuses where there is much unused land and large areas of surface parking.

I object to the housing numbers that are proposed in our locality (including the 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm) - they are not only far too large for an area that does not have sufficient infrastructure but they will totally destroy the Green belt and large areas of agricultural land. These enormous areas of development will completely change the nature of the environment over a huge area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I also object to the fact that proposed sites in Send, including the Garlick’s Arch proposal, have been added as a last minute addition. They were not included in the 2014 consultation, Send has not been properly consulted and other proposed sites have been substantially changed. The development at Garlick’s Arch for 400 houses was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to the draft local plan

I object to the development at Wisley on the grounds that the development is huge (higher than an urban one) resulting in vast numbers of additional cars which the roads are completely unable to cope with.

I support the objection made by the parish councils of Ripley, the Horsleys, Ockham on the grounds that the government (and local councillors) pledged to protect the green belt.

I object to the Local Plan as it would encourage Urban sprawl linking the villages eventually with Woking.

I object to the development on Long Reach. It is not a "suitable alternative" although it definitely is a "Natural Greenspace" and as such any development would wreck the countryside which separates the villages of Ripley, the Horsleys and Ockham.

I sometimes wonder if the planners who come up with this local plan actually travel on local roads or do they simply look at a map and see a road.

The roads in this area (Ripley/ Send/ Horsleys/ Ockham/ Pyrford) are COMPLETELY UNSUITED to a huge increase in traffic and the whole area (THE COUNTRYSIDE) does not deserve the added pollution.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high

   ° The “objectively assessed need” figure of 693 homes a year is too high.

   ° A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
The current SHMA inflates the proposed housing figure due to
- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability and
- flaws in the method for estimating the number of homes needed to support job growth.

It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked, making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to Gosden Hill development being in the Local Plan The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

. I OBJECT to Gosden Hill development being in the Local Plan The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from
encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

Comment ID: PSLPS16/2741  Respondent: 15422145 / Orlando Lee  Agent:
1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43).

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I OBJECT to the sustainable employment policy

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
1. I OBJECT to the loss of rural employment

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.
Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.
4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the lack of proper infrastructure planning for sites

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested.

These narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians AND you have given no consideration to this point.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I OBJECT to poor air quality concerns

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

1. I OBJECT to not protecting the Green Belt

I OBJECT to any proposal to take land out of the Greenbelt as is suggested with villages such as Ripley, Send and Clandon as well as sites of Wisley Airfield (A35) and Garlick’s Arch (A43). The National Planning Policy states clearly that it requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt and that housing need is not such an exceptional circumstance.
There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

1. I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is no way sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.  I OBJECT to the Borough Wide Strategy (Policy S2)
2.  The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.
3.  The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For
instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

**POLICY P2 Send**

**POLICY A43, 30ha Land of Garlick's Arch**

**POLICY A44, 1.9 ha Lands West of winds ridge and Send Hill**

It is my opinion that the Ripley / Send areas are NOT in need of further development. Furthermore these areas are of borderline flood risk areas (there is a clue in the road name "Send Marsh Road" and so I believe that these areas must stay within the green belt area.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I write to strongly object to the following issues,

I believe that it is self-evident that GBC have not followed the correct planning processes and have not truly taken into consideration the impact these developments will have on our surrounding areas, for instance we already suffer from massive traffic congestion at rush hours and in times of overflow from the A3 road. To further develop our surrounding areas will have a massive impact on traffic and our environment not to mention social needs and services. There are no exceptional circumstances at all to justify these plans.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
1. **APPENDIX C**

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **APPENDIX D**

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A25 - Gosden Hill Farm

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays

Surrey Fire and Rescue deployed.

2016
• 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
• 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
• 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.
If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)
The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY D4**

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY E1**

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and
general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY E2**

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

1. **POLICY E5**

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

1. **POLICY E6**

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is
likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. **POLICY E7**

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes
could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

**1. POLICY H1**

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.
It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. **POLICY H2**

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e., normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable
(and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY I2

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).
Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY I3

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt.” This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.
This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

1. SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. POLICY P4

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY S2

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these
adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN Ire not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Questions from GBC

24.A. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

**ANSWER**

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up-to-date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
24.B. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

- why you consider it is or is not legally compliant and
- what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of ”About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and...
foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.
The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

I object to insufficient consultation period, of 6 weeks to review a 1800 document

I object to the last minute inclusion of new sites with less than two weeks notice

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The 4 policies (A42/A43/A43a and A44) are totally unacceptable for the village and there are far more suitable places for development, especially within Guildford and therefore I suggest GBC considers alternative sites. Send cannot cope with the level of development proposed and any development will have a detrimental effect on the local community and environment.

Please can I request that my comments are shown to the Planning Inspector who will decide on the proposed developments in Send and the surrounding area. Please can you also confirm receipt of my letter.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2751  Respondent: 15422689 / Felicity Thorpe  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Additional housing (A43) at Garlick's Arch will exasperate and add to the local chaos on the roads and the already stretched amenities. I therefore strongly object to building 400 Houses and 7000 sq metres of industrial space at Garlick's Arch. The site floods and is covered by ancient woodland. The industrial is not needed as there are many offices and warehouses sitting idle in the local area. Fill these sites first before developing more empty units. Any new industrial units should be built at Slyfield where there is already an established site and the roads can cope with the traffic. Guildford's housing requirements have been shown to be grossly exaggerated and they have refused to disclose their calculations. With proper use of brownfield sites this Green Belt site is not needed.

In addition to the other proposals, I object to Policy A42, 45 houses proposed to be built in Clockbarn Nursery, Tannery Lane. Tannery Lane is a country, single access and the staggered cross roads-junction with Send Road is already dangerous, especially due peak times. This will just add to the growing congestion in Send. Planning permission has previously been given for 64 apartments at the Tannery and for building the marina, both of which will generate additional traffic (large vehicles for boats etc) The lane cannot cope with any more traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2750  Respondent: 15422689 / Felicity Thorpe  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a
Policy A43/A43a - I strongly object to a new interchange with the A3 at Burnt Common as this would generate a huge volume of traffic through the village. It is already congested during rush hours especially with the school on Send Barnes Road. When the northbound lanes of the A3 are congested both in the morning and evening rush hours (which is most weekdays) Send Village is totally congested and then many local drivers speed down country lanes (Potters lane) to avoid Send Road/Send Barnes Road and drive dangerously. Additional traffic will only exaggerate the situation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Policy A44 – I strongly object to the development of 40 houses and 2 travellers' pitches at Send Hill. The narrow country lane (Send Hill) would not cope with any additional traffic. It is narrow and already busy with traffic to the cemetery (which has recently been extended). The junction at the bottom of Send Hill with Potters Lane is very dangerous due to speeding traffic off of the A3. Any more traffic would make it even more hazardous. It is an inappropriate location for 40 houses because the road is narrow and single access. Also the soil of the proposed site contains documented unsafe landfill waste registered by GBC. The land is totally unsuitable for dwellings and traveller pitches. I believe the unsafe landfill will be harmful to health of any home owners. Any development there would spoil a high amenity area set in beautiful countryside. The area is used for recreational activities such as walking and would be greatly missed by locals.

Send will not be able to cope with the proposed developments. St Bedes C/E School will shortly be demolished. Currently a new school is being built in the grounds of Send First School. The new infant/middle school when complete will not be able to cope with a large influx of children. There does not seem to be any long term planning in line with GBC proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
With regard to proposed development in and around Send, I wish to object to the following proposed plans:-

I strongly object to Send Village being removed from the Green Belt. The Green Belt was intended to be permanent, as required by the national Planning Policy Framework, and there are no special circumstances to justify abandoning it. Send's Green Belt provides an essential buffer stopping Woking and Guildford becoming one conurbation. Local councillors and central government gave a clear election promise to protect the Green Belt and this reneges on it. Developers will be quick to take advantage and there will be nothing to stop them. There is plenty of brownfield land still available for developing in the Surrey area.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The draft local plan for Normandy and Flexford which has yet to be approved by the GBC Executive will involve building on green belt land. I had understood that this area was a strategic site (Site 368) and described as safeguarded in GBC’s 2014 local plan. I don’t believe that there are exceptional circumstances requiring it’s removal.

I would like to register my objection to the local plan as I believe it is indefensible to build on this green belt land because:

- there is no evidence for the need for a school. Surrey’s secondary schools are expanding and Ash Manor and King’s College are undersubscribed. Building in this way in Normandy does not follow a ‘sensitivity’ approach to the green belt and justifying the plan by saying there is a need for a school incorrect.
- the traffic congestion that would follow such a development would be unsustainable. There are already unmanageable traffic problems during rush hour and this plan would compound the problem.
- 100% increase in the number of homes in Normandy would destroy the rural environment. I often hear cuckoos, deer live in the local forested areas, we have protected newts, rare orchids and so on. Lifestyles in this semi-rural area will be completely changed and the beauty of the local area devastated.
- we are close to Surrey Hills AONB and the plan would remove our panoramic views and green fields.
- brown field sites should be built on first. There are many other areas around Guildford which could be considered to be more suitable for development such as Epsom Road, West Horsley. Normandy and Flexford is not surrounded by existing development, on a strategic highway route, it is not low quality green belt land or visually self-contained. This development proposal does not protect the highest quality green belt and countryside.
- the plan breaks election promises not to build on green sites and to make sure that planning decisions are made by local people. This plan was devised without the knowledge of or consultation with local people.
- sustainability and sensitivity scores have been skewed. Treating Normandy and Flexford as one settlement for the purposes of sustainability and separately for sensitivity, results in maximized and minimized scores respectively has rigged the statistics.
Please note also that Natural England is there to protect our countryside and therefore the THBSPA. Normandy is within the 5 mile protection zone and 1.5km away from the proposal. I'll be contacting them with my concerns over the future of our Special Protection Area.

Respondent: 15422849 / Ryan Clarke and Lauren Emberson  
Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. **I object to the figure of 693 houses per annum in the borough being too high (Appendix D)**

   The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans. But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. **I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)**

   Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for its removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

   The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

   The site is not appropriate because:
   - There is no sustainable transport infrastructure.
   - The site is liable to frequent flooding
   - It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
   - There are no plans to improve local schools, medical or utilities to cope.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2765  Respondent: 15422849 / Ryan Clarke and Lauren Emberson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)
   North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of "through" traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. **I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)**
   There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning. Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. **I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)**
   In our short time here, we have already noted there is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no apparent plan to improve that. The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. **I object to the lack of proper infrastructure planning for sites (Policy I1)**

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity. There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. **I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)**

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I and my partner Lauren are new residents to Ripley and indeed Guildford Borough. Since moving to the area only a few weeks ago, the Guildford Borough Proposed Submission Local Plan (June 2016) has come to attention and we could not help but submit our strong objection to this plan. It either an ill thought out plan or one that prioritises private enterprise over your residents livelihood and that local environment.

We have set out our objections below.

1. **I object to not protecting the Green Belt (Policy P2)**
   I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6089  Respondent: 15422849 / Ryan Clarke and Lauren Emberson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **I object to development in areas which are at risk of flooding (Policy P4)**
   The Plan does not take adequate account of flood risk as required by National Planning Policy. The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

352
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the Local Plan as the development proposed is not sustainable (Policy S1)
   13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick’s Arch.

The development should be in urban areas where there is sustainable transport.

Comment ID: PSLPP16/6091  Respondent: 15422849 / Ryan Clarke and Lauren Emberson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the Borough Wide Strategy (Policy S2)
   GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there’s too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11% of the existing housing.

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages.

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Secondly, I object to a new interchange with the A3 at Burnt Common. I assume this has been included to appease objectors to the proposed developments at Wisley Airfield, Gosden Hill and Blackwell Farm. As someone who lives directly by this new interchange I’d like to tell you what the traffic is like presently. I can not turn right out of my drive during rush hour due to the amount of traffic and lack of visibility. This requires me to turn left and then go around the Burnt Common roundabout before I can properly start my journey. The footpath stops on one side of the road and then continues on the other side exactly where you plan to put in a slip road. It is dangerous enough crossing here without any additional traffic. My other concern regarding this interchange is about how many people will then use the smaller country
roads to access the new junction. These are not built to handle excessive traffic. The noise levels and pollution along the Clandon Road are already high and this will only get worse. Think about the health of residents and recent studies which suggest high levels of pollution cause one in three strokes.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although I do not live in the Guildford Borough, I live much closer to the above undesirable proposed development than many others who do.

I particularly object to the Wisley site being removed from the Green Belt. This would run counter to the whole purpose of the Green Belt in preventing urban development which could ultimately see Guildford subsumed into the mass of London - there are no special circumstances that would justify this. I object also to the proposed increase in housing in Ockham, Ripley, the Horsleys and Effingham for the same reason and also because this would change the whole character of the area very much for the worse.

There would be many other harmful side effects but particularly the impact on local roads, especially the A3, and services of the increase in population. Congestion is already quite severe and the regular presence of a further 4,000 (at least) cars plus service vehicles could lead to gridlock in a number of places and there would be a serious deterioration in air quality.

Little consideration seems to have been given to the environmental and ecological value of the site and the surrounding area.

There is plenty of brownfield land that could be developed without the need to threaten the Green Belt and I hope that the council will reconsider.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

School facilities

I object to the plan on the grounds of the impact to local schools, which are already at capacity and with an extensive waiting list. There are no extra places are planned in the Horsleys, and the school places proposed at Wisley Airfield will not planned until many years into the project.

Traffic & parking

I object to the plan on the grounds of the additional vehicles and impact this will have on local parking and local roads. Assuming that every new house has at least 2 cars, this means potentially 6,000 more cars within a three mile radius of the Horsley villages. Parking at the, already full, stations, local shops and amenities will all be seriously affected.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Loss of green belt land

I object to the plan on the grounds of the loss to green belt land. The Mayor of London has instructed London planners not to approve development on Green Belt Land within the M25. If we continue to build on our countryside it won’t be many decades before we have none left. Creeping development has led to almost continuous housing from Central London to Effingham. Is this to carry on to Guildford and beyond? (1,700 houses are planned for the Guildford end of the Hogs Back and 1,000 new houses on greenfield sites in Normandy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16868  Respondent: 15423201 / Alex Bailey  Agent:
Flooding

I object to the plan on the grounds of the potential increased flooding it will cause. The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents are well aware of how much standing water there is in their gardens after rain. Building on such land will only make the problem worse. Heavy rain already causes flooding on local roads, where the drains cannot cope.

Comment ID: SQLP16/1857  Respondent: 15423201 / Alex Bailey  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Road network

I object to the plan on the grounds of the impact to the local road network, which I do not believe has been adequately addressed. In respect of the proposals for development at Wisley Airfield and for an upgrade the current A3 junction at Burmstcommon to a full 4-way junction, SCC traffic modelling anticipates increased use of Guileshall Lane, Hungry Hill Lane and Tithebarns Lane for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond. The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”. It appears that the Plan is proposing a strategic site at Wisley Airfield without even knowing what improvements to the local road infrastructure will be required. If that is the case for Wisley Airfield, then it is almost inevitably true for the proposed developments in East and West Horsley as well.

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident of Ripley I write to object 'most' strongly' regarding The Government's and Guildford Borough Council's intention to destroy this area, with their radical plans to build 14,000 homes, Residential Industrial Units and various new roads, all within this Idyllic Green Belt Area'.

May I remind you, that in the Last General Election, The Conservatives had an Election Mandate to 'save our Green Belt' What a farce! Considering your latest, proposals, whereby Fifteen Local Villages are in line to be removed from the Green Belt. To be replaced by suburbia and Urban Sprawl! It is outrageous and totally 'disproportionate' for one, beautiful area of the country and the county, to be considered for such a massive overdevelopment! It doesn't make sense. It is proposed that 'Fifteen Local Villages' be removed from the the Green Belt. It all sounds far too 'expedient' in that G.B.C can claim very conveniently that the local plan only represents a loss of 2% of Local Greenbelt - Whereas, the reality is , it is a massive destruction of a huge area of 'Fifteen Villages', thousands of peoples lives as they had planned them, their futures, all their aspirations, their love of their rural pursuits, all wiped out in one fell swoop! Or should I say Goodbye countryside and Hello Suburbia and Urban Sprawl! Hello Environmental pollution!

I object to the 2016 draft local plan.
I object to all erosion of the Green Belt.
I object to any in-setting (i.e removal) of any villages from the Green Belt.
I object to the disproportionate amount of development in one area of the Borough.
I object to the Limited Consultation Period.
I object to the last minute inclusion of new sites with less than two weeks notice.
I object to the lack of any evidence for the alleged housing need numbers.
I object to the lack of immediate provision for new schools.
I object to the lack of immediate of immediate provision for new schools.
I object to the lack of immediate provision for doctors surgeries.
I object to all the extra pollution of the environment.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick's Arch (A43) which is not mentioned.

It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The "objectively assessed need" figure of 693 homes a year is too high.

- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects

- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability, and-
  - flaws in the method for estimating the number of homes needed to support job growth.

- It is unacceptable that demographic and economic model assumptions have been withheld from scrutiny and therefore cannot be checked making the process unaccountable.

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is more than double the figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. It is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.
The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill currently does exactly what the Greenbelt was designed to. It provides a green buffer between the Guildford Urban Area and West Clandon and other villages and gives Burpham a defined green boundary and breathing space.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. These are all requirements of the NPPF.

The scale of the Gosden Hill development is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

While no connection is currently shown between Gosden Hill and A247 (save an already overloaded A3) the developer will almost certainly seek to introduce such a connection and bring major new traffic into the village and the problematic A247.

Gosden Hill is the most obvious location for the north end of an aspirational A3 tunnel to bypass Guildford. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will add to the burden on to the A3 which is already stationary every day during rush hours. The linking of the A3100 through Burpham, B2215 through Ripley and A247 through West Clandon would channel thousands of cars, delivery vehicles and construction vehicles through the narrow, winding (A247) road through West Clandon. This is already a road where large lorries mount the pavement virtually every day.

The enhanced volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Without major as yet unplanned modifications, the existing two way north facing junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day. There is no south facing slip and traffic would need pass through Merrow and Ladymead to access the A3 / A31 southbound. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.
Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost. There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size. Electricity supply is also inadequate and would require a major infrastructure development.

A proposed railway station was previously rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London. This has not changed but we are more dependent than ever on motor cars to access the station.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are all developed, the north of Guildford will deliver 36% of demand, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

Development and improvement of the A3 is not even slated to start until after 2020. The building of a tunnel, which is only an "aspiration" in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill and may have health and safety issues.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the sustainable employment policy.

If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick's Arch (A43) is in the scheme of industrial development relatively small.

Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site, which is in the Green Belt, should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

The proposed development of up to 7,000 sq m of a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick's Arch (A43) is in the scheme of industrial development relatively small.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses which have been in existence for over 30 years, and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. Tourism and visitors do not depend on new visitor "attractions" and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment / "Disneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many "leisure and visitor attractions" already. The case for creating more is not made and no examples are given. Instead, the plan's explicit priorities should be:

1. To protect the borough's prime leisure and tourism asset, its countryside, from inappropriate This is all the more valuable because of its accessibility from London, the rest of Britain and from overseas.

2. The most valuable forms of tourism, such as walking and cycling, require no new In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

3. To enhance and promote Guildford's river landscape and to seed-corn town-break packages for high-value touri To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT (POLICY H1- Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area to suit the aspirations of town dwellers. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should be provided for 100% of new students and more than 60% of existing students. This would free up family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council's timidity is a case of "regulatory capture" by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, up to 2,000 homes would be freed up in town.

Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H3. This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the "mix" this can include "market" housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure. The proposed development under the plan will cause greater congestion in and around our villages. Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The A247 through West Clandon is a real issue of concern as an "A" road with inadequate width, inadequate lighting and inadequate speed control.

Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists pass through the villages on the way to the Surrey Hills. There are no proper cycle lanes on the narrow local roads surrounding the villages and with greater vehicle traffic being generated from the proposed developments there is a real danger that there will be an increase in road accidents involving cyclists directly as a result of the development proposed under the local plan.

The Plan does not provide an achievable strategy for improving capacity on these local roads. To wilfully add traffic load would be quite irresponsible.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon, The Street (A247) generally only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements as has happened most recently on 12th July 2016.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6136  Respondent: 15424865 / Robert Victor Ewen  Agent:
I OBJECT to the lack of proper infrastructure planning for sites.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents in the locality will see their quality of life significantly deteriorate in many ways. Without proper planning and funding for healthcare and other facilities, local services will be overwhelmed.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no consideration of provision of the increased capacity of Guildford hospital.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy 12)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity and even standstill during peak hours and any development prior to improvement of these roads will exacerbate the situation further.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---
I OBJECT to poor air quality concerns (Policy 13)

Paragraph 4.6.27 of the Plan states: "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to further highways congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute as traffic spills onto roads in built up residential areas and will lead to greater levels of air pollution, which in turn will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6121  Respondent: 15424865 / Robert Victor Ewen  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

I OBJECT to not protecting the Green Belt.

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a 'special circumstance') justifying the land to be taken from the Green Belt. Once taken, the Green Belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The high relative amount of development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC's Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site. Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to development in areas which are at risk of flooding.

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced to help the Council apply the exceptions test (as described in the NPPG) as necessary to permit development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. This area often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
villages are forever reducing as they become commercially non-viable. Residents will be reliant on motor vehicles for almost all leisure, shopping and commuting journeys. These sites are unsuitable due to being unable to access sustainable public transport. Furthermore, there are no plans to improve the transportation infrastructure for Garlick's Arch in the Infrastructure Plan. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further traffic loading will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1 OBJECT to the Borough Wide Strategy.

1. The borough wide strategy is poorly It proposes 13,860 housing being developed across the borough and does not apply any constraints to moderate the overall housing figure, as would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

2. The Housing number is based on pre-Brexit data for economic and population growth, including mi These now need to be revised downwards, possibly quite seriously.

3. The housing number is based on an arbitrary Housing Market Area (HMA): the "West Surrey" tri-borough area of Guildford, Woking and An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, "West Surrey" is much too small. Half of Guildford borough's residents work elsewhere, and half of those who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside "West Surrey". Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is also outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere. Unlike Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014, but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it.

The absence of a ready alternative, however, does not make "West Surrey" reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour's "need". Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey's 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted within the Plan is also out of balance. There is disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new
housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are proposed between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a huge impact on the surrounding local villages and will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
see the first steps of destroying valuable greenbelt land in this area. This scheme would be more suited to the brownfield site sat and around Guildford/Woking where it can easily combine with the town centre facilities, especially with regards to water and sewage treatment.

Traffic, especially heavy goods vehicles, has increased rapidly over the past 10 years and this will continue when the development goes ahead. These are small country lanes with no traffic flow management, the road traffic accident will have to go up.

Public transport is limited in this area with no bus routes and only 2 Railway Stations at Horsely/Effingham Junction. Station car parking at both of these stations is now at full capacity, also morning peak rush hour services on the trains are also heavily congested.

These 2 proposed Roundabouts located near Old lane will make traffic more heavily congested and will deteriorate the quality of life for the residents near to them. Also the Constant noise and inconvenience to the residents during and afterwards the installation of the Roundabouts.

Very little thought and planning for the nearby residents who will have to tolerate the increased noise and pollution (noise and air pollution) that the construction this housing scheme will bring forever to this place in rural Surrey.

These are my objections to this proposed scheme and please put them on the record.

2. We object to the Settlement Boundary which has been imposed on East Clandon without any consultation. This imposition provides no protection to further development outside of the settlement boundary (Policy P2 para 4.3.25) and is deemed by us as being unnecessary in an already tightly developed ancient and rural conservation village with high archaeological potential. We demand that this proposal be removed as it will endanger the openness of the Green Belt, the views in and out of the AONB (protection of the AONB Policy P1) and the character of our village. |
| What changes (2016)/further amendments (2017) do you suggest should be made to the document? |
We object to this significant erosion of the Green Belt with the proposals for large towns being developed on Green Belt land thereby removing the openness of the Green Belt. We note in particular the huge developments proposed for the North East quadrant of the borough which will adversely affect our amenity, but also unfairly targets our tranquil rural villages because we can provide ‘dormitory’ facilities for commuters to London. These developments directly affecting our villages are the proposals for Wisley Airfield, Gosden Hill Farm, various farms and tracts in the Horsleys and Garlicks Arch at Send.

4. Further, on the erosion of Green Belt and we object that Policy P2 is not met where it states that Green Belt should be protected. We object to the disproportionate use of Green Belt land for housing – some 65% of the housing proposed is on Green Belt and with little consideration being given to redevelopment of brown field sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
9. We object that GBC are contravening the NPPF framework stipulation in paragraph 87 with the proposed developments at Gosden Hill Farm, Ripley, East and West Horsley and Garlicks Arch, Send. Paragraph 87 states “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.” and GBC have not proven any special circumstance for developing on these Green Belt areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

5. We object to Policy S1 not offering sustainable development as regards roads and rail infrastructure which currently does not cope with demand, congestion on the A3 in particular, but also other A roads in the area such as the A247, the A246 and then there is the already overcrowded and slow train system for those already living in the borough and needing to commute to London. No pre-emptive planning has been made to alleviate these real problems which will be much exacerbated by large increases in housing.

We specifically want you to note the winding, narrow and dangerous route via the A247 through West Clandon which then drives people to use a cut-out with the even narrower rural road, the Ripley Road, through East Clandon to and from the A3. This will be much exacerbated in housing twinned with large increase in cars and travel.

6. Continuing with Policy S1 (Presumption in favour of Sustainable Development) we object that this is not being met and that GBC are contravening this when it is clear that no fixed plans are available to improve the provision of shops, medical facilities, schools in our immediate area (besides roads and rail already mentioned) to service us. If the GBC were serious about improving the infrastructure and sustainability of our communities, they would have secured plans and funding to ensure these facilities are available and not just at the behest and hoped-for goodwill from the developers. Further, how will
developers be held accountable to their promises to build infrastructure? Stories are legion of developers reneging on
commitments as the ‘money runs out’ even though vast profits will be made from turning agricultural and Green Belt land
into highly valuable housing land.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objection to the Guildford 2016 Local Plan

East Clandon Parish Council objects to the 2016 Draft Local Plan as a whole and in particular we object to the specific
issues (listed below). We believe that this deeply flawed Local Plan will have a direct and detrimental effect on the amenity
currently enjoyed by residents of East Clandon and to the even greater detriment to our neighbouring villages of West
Clandon, Ripley, West and East Horsley. It erodes the openness of the Green Belt and endangers the beauty and views in
and out of the Surrey Hills AONB.

Our specific points are:

1. We object to Policy S2 for the proposed provision of the very high overall housing numbers of 13,800 new
homes (690 new dwellings being built every year for 20 years) and we object on two grounds; these housing
numbers have been imposed on us with no real consultation being undertaken with the residents of East Clandon
and the borough as a whole. Secondly, the housing numbers are based on a high-growth economic development
plan which in itself has had no consultation with us and this combined with estimated demand from London
residents will turn Guildford into a dormitory town for London.

Further, we object to the fact that no real economic or housing demand factors have been provided by the borough
planners to substantiate the very high housing target of 13,800 new dwellings over the next 20 years. This is in direct
contravention of the NPPF’s requirement for the planning authority to provide meaningful consultation.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 5: The examination

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
7. We object to the fact that GBC have not met the requirements of the NPPF Paragraph 155 which imposes an explicit obligation to have early and meaningful consultation. This has not been met in a number of areas by GBC. We have not had a meaningful consultation on imposing a settlement boundary on East Clandon, on the absence of meaningful economic and population growth figures for Guildford showing various scenarios with high, medium and low growth scenarios being offered.

We demand that there should be a significant challenge to the GBC scenario planning and the housing and growth numbers should be revised and especially in the light of uncertainty and change which will accompany Britain’s withdrawal from the EU.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In policies SRN9 and SRN10 we note the change in responsibility for delivering new A3 slip roads at Burntcommon from Surrey County Council to either Highways England or developer. We have concerns that if delivered by Highways England alone there would be no local level control over if/when/how the scheme was delivered. This is an existing concern for other schemes including SRN2 and SRN3 (Stoke interchange and M25 J10/A3 interchange), where Highways England have sole responsibility.

We also have concerns over the changes in funding in policies SRN2 and SRN3. While we strongly welcome developer ‘funded’ (which implies more financial commitment than ‘contribution’) for road network improvements which are required as a direct result of new housing, we are concerned this may lead to a reduction of the affordable housing percentage delivered (which should be 40% in most cases). This concern is in part due to a change in Section 4.2.40, where there is in our view some softening of the language around the issue of developers needing to demonstrate lack of economic viability of affordable homes in order to reduce their standard quota (40%). This concern applies to other developer funded projects including Wisley cycle networks.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Key facts

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We object to the population growth figures in section 2.3, which have actually increased by almost 5000. By returning to a 2014 evidence base, we feel this does not account for more recent political and economic changes.

We object to Policy A25 Gosden Hill Farm, in that even though housing numbers at this site on the surface seem to have been revised slightly downward to 1700 from 2000, in actual fact the wording in Policy A25 now states ‘Approximately 2,000 homes of which a minimum of 1,700 homes will be delivered within the plan period’. This seems to be attempting to indicate a change which in reality may not exist, and is misleading.

We object to site A58 Burntcommon, which has now become a ‘Strategic Employment Site’. The overall burden on Send (and West Clandon) of the minimum of 7000sq m of industrial space (i.e. could be much larger) is greater than the now deleted up-to 7000 sq m from the neighbouring site A43 Garlick’s Arch. This is a net gain in traffic and congestion in this area. The proposed insetting of Send Business Park from the Green Belt indicates GBC’s increased emphasis and ambition for growth of this village.

Comment ID: pslp171/861  Respondent: 15425665 / East Clandon Parish Council (Alyson Blackwell)  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Answer (if comment is on questions 1-7 of the questionnaire): ()
We object to POLICY P2 (6), specifically the new phrasing ‘Limited infilling may also be appropriate outside the inset or identified settlement boundaries, where it can be demonstrated that the site is as a matter of fact on the ground within the village’ referring to Ockham and Wisley, and by extension to other villages with settlement boundaries. We feel this change in language creates less clarity around the purpose of settlement boundaries as regards development policy. This objection is made in the context of the fact that there is no change to POLICY P2 (5), the intention for East Clandon to have a settlement boundary for the first time, which we have previously and still object to.

We object that GBC are contravening the NPPF framework stipulation in paragraph 87 which states “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.” (Policy P2, P3, E5). The Guildford Green Belt Group have stated that 70% of new housing will be in countryside and 58% of this is on Green Belt (Gosden Hill, Wisley, Blackwell Farm). This is exceptional in size and thus does not meet the criteria to demonstrate exceptional circumstances. We support instead developing and densification of brown belt and urban areas. According to Policy H13, developments should have a maximum (and minimum) densification policy to prevent developers from using land inefficiently which leads to countryside erosion and ineffective use of brownfield sites.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Policy S2 for the proposed provision of the very high overall housing numbers of 12,426 new homes, which is only a small reduction on the previous figure of 13,860. These numbers are still based on an overly high-growth economic development plan which in itself has had no direct consultation with us. They remain too high as shown by an objective assessment made by the report made for the Guildford Residents Association (GRA) by Neil MacDonald (independent adviser and commentator on housing demographics).

Also in Policy S2 housing numbers, we object to the fact that downward economic pressures (including Brexit) have not been adequately accounted for. Additionally in Policy E1, E2 there is too much emphasis on providing retail and commercial in Guildford town centre, when the pattern of business is changing and more town centre housing is needed rather than retail. This would ease the pressure on housing on the Green Belt.

Furthermore, we object to Policy S2 because we believe the 12,426 homes includes estimated demand from London, and also now possibly from Woking’s perceived unmet need, and we feel Guildford will become a dormitory town for London and the surrounding areas, rather than meeting the needs of residents of Guildford Borough.

We object to the fact that in Policy S2, despite the afore mentioned slight apparent reduction in overall housing numbers and industrial space, the reduction is mostly in Normandy/Flexford and the load on the East of the borough is still disproportionate and has even increased.

</table>
1. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
2. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
3. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
4. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
• I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd.’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsley’s (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five story’s high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road s I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

1. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to building 400 houses and 7000 square metres of industrial space at Garlick’s Arch which is currently the site of ancient woodland. Brownfield areas around Guildford should be used for this, NOT precious Green Belt land. There is no road infrastructure to support these additional houses. The A3 is already backed up way before rush hour.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) -

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous pl
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsley's (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
• I object to the detrimental impact on transport, local roads and road I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The
development is too isolated, and even within the development
itself too spread out to anticipate a reduced reliance on private cars

  1. The increased volume of car A proposed development of 2,008 homes would result in an estimated 4,000
additional cars on the roads
  2. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas,
exacerbated by wide vehicles including increased bus and HGV movements
  3. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the
lack of pedestrian footpaths (and the space to provide them)
  4. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further
planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil
secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No
development can proceed without significant infrastructure enhancements to the A3 and Partial improvement
works on the A3 south of the site are not due to start until 2019 at the earliest
  5. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the
proposed increase in passenger traffic and car parking is already at capacity

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the
site, in relation to the Thames Basin Heaths Special Protection Area (SPA),Sites of Special Scientific Interest
(SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the
borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will
exacerbate this situation, impacting all current and future residents. No account is being taken of the
acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradati
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced
through the Ockham Parish The top two responses as to why local residents enjoy life in Ockham are (1) access
to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see
both the historic features of the village maintained and the village's green spaces, including the FWA/TFM,
protected.
• I object to the continued inclusion of a site (the former Wisley Airfield,- now known as Three Farm Meadows) -
where the planning application has already been unanimously rejected by GBC's Planning Committee.

After 14 months of consideration (and various extensions and amendments),Wisley Property Investments Ltd's (WPIL)
planning application was unanimously rejected by GBC on 8th April2016 on the recommendation of GBC Planning
Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms
Meadows),Allocation A35,is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result the scale of incursions into the Green Belt is based on false premises and should be reconsidered.

1. The Council was entitled to apply constraints before determining the housing number. I believe that as well as being entitled to do this the Council should have done it. It is hard to see why in fact this has not been done. The scarcity of sites outside the Green Belt as well as infrastructure (most notably roads) considerations all represent constraints which should have been taken into account in determining the final housing number.

1. Having properly applied constraints if there is a need to develop in the Green Belt then “exceptional circumstances” must be demonstrated for each site. It can hardly be considered “exceptional” if in fact 65% of the housing ends up on land taken from the Green Belt. The Green Belt should trump short-term considerations such as perceived housing need, as ministerial statements and case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and Green Belt can be allocated for building at will.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A25 - Gosden Hill Farm

I object to Policy A25 Gosden Hill Farm.

1. The Green Belt at this point serves the important function of separating the parish of West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce, defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and the houses along The Street in West Clandon (owned by the same developer as Gosden Hill Farm) will come under enormous pressure.
1. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch, give the appearance of almost continuous development from Send through to Guildford.

1. The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

1. I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon-a road which Surrey County Council says cannot be improved. This road is already very heavily used at peak times and when the A3 suffers probl It is unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement-often at speed. It has narrow bends with poor sight lines, a primary school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. The addition of the development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians including children walking to and from the school.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A43 AND A43a – Garlick’s Arch

I object to Policy A43 and A43a on Garlick’s Arch.

This site had been previously considered and rejected before the previous draft of the Plan. The site was then inserted in this draft only hours before its publication without any consultation. I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site. This is a cavalier approach to public engagement by the Council.

1. The site is not a sustainable site being far from any infrastructure facilities and transport lnks. The bus service is infrequent and being cut back and future residents will have to rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

1. The site is susceptible to flooding and development will cause harm to the ancient woodland on and by the sit

1. The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

1. The Council appears to view the development as an enabling site to obtain land and developer funding for slip roads on/off the A3. This is not an exceptional circumstance to justify taking Green Belt land. The slip road land
if needed could be safeguarded in the Plan and acquired by compulsory purchase when required. Lack of current funding for the slip roads is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so-called enabling development proposal intended to fund the rebuilding of the Howard of Effingham school was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

1. The development will put more traffic on to the A247 through West Clandon—a road which Surrey County Council says cannot be improved. This road is already very heavily used at peak times and when the A3 suffers problems. It is unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, a primary school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. The development will only exacerbate the problem and make the road even more congested and unsafe for pedestrians including children walking to and from the school.

1. Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY D4 - Development in urban areas and inset villages

I object to this policy:

1. The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

2. The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion on road infrastructure which cannot cope. For many inset villages, the public transport is utterly inadequate and is being cut year by year. Such development is not sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6211  
Respondent:  15426305 / I C Dean

POLICY E1 - Meeting employment needs

I object to this policy.

1. I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with completely inadequate public transport links. Many of the jobs will be taken by people from outside the area and it is likely all travel to and from work will be by car adding to local congestion together with the attendant commercial traffic. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

1. I object to the inclusion of a strategic employment site at Gosden Hill. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6213  Respondent: 15426305 / I C Dean  Agent:

POLICY E6 - The leisure and visitor experience

I object to this policy.

The policy should acknowledge that much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly, the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
POLICY E7 Guildford Town Centre

I object to this policy.

1. The “vision” describes protecting Guildford’s unique setting and historical character and sets out some of the ways this will be However the policy and supporting text concentrate too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. Above all, the retail development proposals must not damage the viability of the High Street.

2. There is little reference to the major elements of the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion As a policy for the town centre for the next 20 years it is lamentably short-sighted and narrow in its ambition.

3. There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist The policy misses the opportunity to propose forward looking sustainable residential development in, for example the Walnut Tree Close /Woodbridge Meadows area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the Plan period without harming the countryside.

4. There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

5. The policy fails to provide guidance on design requirements, as required by the NPPF.

POLICY H3 – Rural Exception Homes

I object to this policy.

1. The wording of the policy is far too wide and drives a coach and horses through all other aspects of planning policy.

1. The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfulfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included. This will force up land values and lead to appeal

1. The criteria appear to be “identified need” and “adjoins a settlement”. There seems to be no provision to balance the desirability of the development against other considerations including harm to the Green Belt or the AO

1. The policy wording should define small, either in land size or number of units. I am concerned that if “small” is left undefined the policy could be used to justify significant development

1. The policy wording should define “closely related” and remove the “safe and easy walking distance” concept. The latter will extend the potential radius within which sites will be argued to be “closely related” – when the secondary school in West Clandon was proposed a mile was considered “easy walking distance”.

1. The wording of the policy itself does not require the local connection requirement for tenants to be permanently secured - only affordability is secured. The supporting text includes this point, but what weight does it carry at appeal?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY I1 - Infrastructure and delivery

I object to this policy:

1. The Council’s methodology for assessing traffic congestion - averaging it over periods of 3hrs and ignoring the effects of junctions - simply hides the problems which will be caused by the proposed scale of development. The borough’s infrastructure is already heavily strained particularly with respect to local roads, existing congestion and public transport. The planned housing will make this far worse but CIL money cannot in general be used to address existing shortfalls but only for enabling infrastructure. The local road network has not been given sufficient consideration and bus services are being cut.

2. The Plan assumes that infrastructure is not a constraint and will be in place as needed. However, this provision is critically dependent on funders and decision makers outside the Council’s control and is in no way guaranteed.

3. It is highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

4. A key element of infrastructure seems to be the so-called “snake” across the town. The evidence that this will cause the benefits claimed for it is very skimpy and sections of it have not yet been shown to be feasible.

POLICY I2 - Supporting the Department of Transport’s “Road Investment Strategy”

I object to this policy:

I am being asked to buy into something which is so vague and undefined with no defined outcome against which I can form a judgement. It is not what the intention of the work is. Is it to relieve congestion from natural growth or to relieve some or all of the congestion predicted from the Council’s planned growth? Whatever the case, significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft Plan, however, commits to building housing estates along the A3 before any of these road improvements are in place. This will lead to massive traffic disruption. Road infrastructure represents a major constraint that should have been applied to the OAN at a much earlier stage in the Plan process and not left as an unresolved difficulty in the draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6209  Respondent: 15426305 / I C Dean  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
I object to this policy.

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is just not How can it be that building 65% of all new housing on the Green Belt does not cause damage to it?

1. It does not sufficiently safeguard the Green Belt. Sacrificing areas of the Green Belt to an aggressive growth agenda is not sustainable develop Green Belt was last taken in the 2003 Plan and now it is again proposed to move the boundaries.

1. The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage.

1. Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

1. The Countryside Study was a simplistic exercise based on the erroneous principle that ranking Green Belt land would identify candidates for development. The Council has not carried out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently Planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

1. I object to the “insetting” of 14 villages from the Green Belt and to the wholesale extensions to the settlement boundaries in many villages. Effectively, this policy turns each village in the Green Belt into a nucleus for development.

1. Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

SITES - POLICIES A1 TO A57-sites in the Green Belt

I object to each of the proposals for the Green Belt sites in this list on the following grounds:

1. The identification and allocation of sites in this Plan is made without regard to Green Belt, infrastructure or other constrains. The Plan says that “allocating these sites does not grant Planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification in my view shows that the previous consultations were not intended to change a preconceived development agenda.

POLICIES

Many of the “blue box” policy statements are vague and general and incapable of providing guidance for planning decisions. The accompanying text is essential to understanding and adds much detail but its status is apparently not that of “policy”. It is certainly not possible in many cases to read across from the non-policy wording to the policy itself.

POLICY S1 – Presumption in favour of sustainable development

I object to this policy.

Policy S1 ought to set a clear framework. Instead there is no definition of “sustainable development” and no principles for balancing economic growth, social justice and environmental protection when making local planning decisions are given. However, apparently, all incursions into the Green Belt constitute “sustainable development”. It is clear that economic growth is the overriding factor and the policy ignores the 12 Core Planning Principles set out in NPPF paragraph 17.

The commitment to approve Planning applications “wherever possible” and “without delay” seems to fly in the face of the NPPF presumption in favour of sustainable development and becomes a presumption in favour of any development at all. It also seems at odds with public statements from the Leader of the Council to the effect that including a site in the Plan does not mean that permission will be given for development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S2 – Borough Wide Strategy

I object to this policy.

1. The OAN (adopted as the housing number) lies at the heart of the Plan. This number is now unsupportable (if it ever was) following the referendum.

2. The OAN can only be considered “deliverable” because the Council has failed to consider the protection afforded to the Green Belt in the NPPF, ministerial statements and local and national Conservative Party manifesto commitments.

3. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get Planning permission. Constraints in the supply chain and maintaining profit levels have been more important. The Plan itself appears to recognize that infrastructure and other constraints may affect deliverability. It is unlikely that the number of houses can be built at the rate proposed.

1. Guildford is part of London's commuter belt and the demand for housing is, in practical terms, unlimited. The increase in the supply of housing in Guildford will simply result in a shift of population into the area. The Plan will not significantly reduce prices or increase affordability except at the margins.

1. The Council has not taken account of constraints to development from the Green Belt and infrastructure. This approach differs from the other boroughs in S. The Plan is based on the assumption that “growth is good” and therefore “sustainable”. More consumption, more congestion, more Green Belt being taken is not a sustainable strategy.

1. The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon, Ripley and Send in particular. The developments at Garlick’s Arch and Gosden Hill Farm will put severe strain on the road infrastructure in and around West Clandon which will be unable to cope. The proposed A3 slip roads at Burnt Common will make matters much worse. The edge of urban Guildford will be moved much closer to West Clandon. It will be built on Green Belt land which was to safeguard the countryside from encroachment and check the sprawl of large built up areas.

1. The Plan is out of balance in proposing 65% of housing on the Green Belt and 36% in the three wards of Lovelace, Send and Clandon and Horsley. These are rural areas whose identities will be greatly and detrimentally changed by these proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am a householder in West Clandon village and I wish to make the following comments on the above document:

Question 1: Evidence Base. I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

- The evidence base documents do not yet reflect the post-referendum circumstances. The documents and the Plan must be modified to these into account.
- The Transport Assessment document is detailed and was published too late to study its detailed conclusions. The document appears to show that congestion will worsen significantly over the period of the Plan even if all the proposed infrastructure is built. The assessment is inadequate because it does not include the effects of junctions and averages flows over 3hr periods thus masking the impact of peaks.
- The SHMA attempts to justify an OAN based on a very aggressive desire for growth in the borough No case is made that such growth is sustainable. The assumptions and estimates are not transparent and have not been adequately scrutinized by Councillors so that people have to take on trust the work of a consultant. In any case events have overtaken the SHMA.
- The number and complexity of the documents in the evidence base have made reading, understanding, analysis and assimilation extremely difficult. The relevance and status of some of the documents is unclear.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Question 2: Legal Compliance. I have no legal training. Surely this is a matter for the Council’s own advisers and the Inspector?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Question 3: Soundness. I do not agree that the Plan is sound for the following reasons:

- The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
- The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
- The draft Plan does not accord with the NPPF policies on protecting the Green Belt. The housing number has been used to justify removing numerous sites from the Green Belt amounting to 65% of the proposed housing number. Exceptional circumstances need to be shown site by site to justify removing them from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statement.
- The assumptions made in calculating the OAN are now almost certainly incorrect following the referendum.
- There is no evidence in the Plan to show that the proposed rate of building is achievable and sustainab The housing number is at least twice the achieved rate of building in the Borough over the last few years.
- The Infrastructure Plan is very weak. Much of the desired provision is not committed and/or is outwith the Council’s contro It seems very clear that infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
- The NPPF states that Councils cannot impose conditions which make development non-viable. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A24 Slyfield – Objection

The development of 1000+ houses on this site with the access via Clay Lane will put a great deal more traffic onto the A3 and this will generate more traffic on the A247 from those wishing to go due south. In addition, the industrial site at Burnt Common (with a reference to a waste site) will be linked with the Slyfield Industrial Estate causing more movement of commercial vehicle on the A247.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2988  Respondent: 15426305 / I C Dean  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A25 – Objections

1. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of the green belt.
2. If this development proceeds, it leaves a narrow strip of Green Belt remaining between Guildford and West Clandon. The same developer who is promoting Gosden Hill has several times tried to develop this land for housing. The current policy on treating green belt land as a developable resource means that it is only a matter of time before the village is joined up with the urban area.

3. The development will be highly visible from the A3 when approaching Guildford.

4. Together with the developments at Garlick’s Arch and Burnt Common there will be an almost uninterrupted ribbon of development along the A3 extending 5 miles from the centre of Guildford.

5. The development of this site will cause massive congestion in surrounding roads. It will generate many thousands of vehicle movements onto the A3 which is stationary every day during rush hours. The linking of the A3100, A2215 and A247 would channel large amounts of traffic onto the narrow, winding road through West Clandon and Send.

6. The proposal for a link road to bring traffic from the Gosden Hill development to a 4 way junction at Burnt Common has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon and Send - a road which is already under traffic stress.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A35 Wisley – Objection

The development of a new village / town with at least 2000 houses, 4-entry form secondary school and employment land at Wisley will generate large amounts of additional traffic onto the A3. If the slip roads at the A3/A247 junction (said to be to relieve the impact of this development on Ripley) do get built, traffic on the A247 will increase dramatically. I can see no recognition of this in the Plan and no plans to alleviate this.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
### Policy A58 Burnt Common – Objections

This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously. The Plan calls for a minimum of 7000sq. m (previously in the 2016 Plan a maximum figure) but will take 9.26 hectares out of the green belt. There is no proper justification given for taking the additional land.

1. The evidence base does not support this scale of additional industrial space and the justification for placing it in the green belt is not made out. The 2017 Employment Land Need Assessment shows a demand for about 4 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Burnt Common in the green belt.
2. A far better use of land would be to redevelop some of the inadequate and rather decrepit industrial premises not encroach on the green belt.
3. The reference to waste management facilities mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and should not be so casually included for this site.
4. The A247 through West Clandon and Send is likely to experience large volumes of additional traffic including heavy vehicles generated by the proposed light industry, storage, distribution and waste management activities at Burnt Common. There is also the likelihood of commercial vehicle traffic between Slyfield and Burnt Common particularly when the Clay Lane access is built which will impact the same road.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

### Policy ID1 Infrastructure – Objections

1. Even if all the infrastructure listed in App C to the Plan is provided in a timely fashion, the Plan admits …”we forecast that there will also be an absolute increase in overall traffic volumes” and also that congestion at junctions will increase (but this is not modelled so we don’t know by how much or where). Residents are being asked to accept very large amounts of development but to take it on faith that Highways England’s as yet unformed plans will solve the problem of the A3.
2. The cumulative effects of the developments in the north east of Guildford are certain to have a devastating impact on the A247 through West Clandon (and of course on Send) and it is hard to see how any of the infrastructure proposals in the Plan (App. C) will do anything to mitigate this impact. GBC has little or no control over the plans of Surrey County Council as the local highways authority and it is well known that they have no money available.
3. Developers are now expected to fund nearly all of the infrastructure elements and planning permission will be refused if timely provision of infrastructure cannot be secured. I question how realistic it is to expect developers not only to pay for all the infrastructure but also to have it in place in a timely fashion. It is very likely that each refusal on those grounds will be appealed and it is unlikely that the courts will come down on the council’s side in all cases. Developers’ business models are based on building and selling houses to create the cash required to provide infrastructure. Problems will have arisen before infrastructure will be put in place.
4. If development were to be refused the land would still have been removed from the green belt and its future rendered uncertain.
5. The developments in the north east will draw very large amounts of additional traffic to the A247 through the village of West Clandon and there is no reference to this in the Plan. The employment sites and schools will cause considerable additional traffic on the A247 generated by:

- residents moving around the area
- children from elsewhere being delivered to Gosden Hill schools and collected
- the employees of the offices and industrial sites getting to work and returning home
- the vehicle movements generated by distribution and storage activities
- traffic from Wisley wishing to travel south and returning
- traffic from Gosden Hill wishing to travel south and returning
- traffic from Slyfield wishing to travel south and returning
- private and commercial traffic originating in the south and accessing Gosden Hill, Burnt Common or the A3 and returning (including traffic from Dunsfold)
- SCC’s business plan for Newlands Corner

The A247 through West Clandon is classified as an A road but it has none of the characteristics and should be downgraded. The road is a well-known problem (to Surrey Highways for example) and a number of domestic planning applications have been turned down on highways objections. It is quite unsatisfactory to even consider putting more traffic on a road that:

- is less than 2 vehicles wide in places
- does not have continuous footpaths
- has several very sharp bends
- has a hump-backed bridge with poor sight lines
- has many properties with very poor exit sight lines
- has a very difficult and dangerous junction with the station access road
- has a dangerous junction with the southbound A3 on-slip road
- is largely unlit
- has a primary school
- is already very congested at times

1. it is very clear that the developments proposed in the 2017 Local Plan will increase the amount of traffic on the A247 over and above that in the 2016 draft to which residents strongly objected. The A247 is quite unsuited to coping with additional traffic and there is nothing in the Infrastructure Schedule which addresses this issue. Indeed several of the infrastructure proposals will themselves lead to significant increases in traffic on the A247.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy P2 Introduction – Objection

1. The removal of green belt protection from the prison site means that it is likely to come forward for housing development. Access to the site will necessarily involve the A3/A247 junction and put additional traffic onto the A247.

Policy P2 Green Belt - Objection

The Plan states: “4.3.16 National planning policy requires that Green Belt boundaries are only amended in exceptional circumstances and that this must be undertaken as part of the Local Plan process. We consider that exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development.”

1. The Plan fails to demonstrate that exceptional circumstances have been identified for each site that is to be taken from the green belt. The scoring system used to classify pieces of green belt was deeply flawed and assumed that because the housing number could not be accommodated on brownfield or previously developed land in the green belt, it is therefore legitimate to move the boundaries. The Plan implies that it is legitimate to have a blanket change to green belt boundaries to meet the housing number. That is not in accord with the NPPF or ministerial statements.

2. The Plan claims that in fact more housing could be delivered than the OAN which implies that excess land is being taken from the green belt. Doubtless some of Woking B.C’s shortfall will be built in Guildford.

3. The green belt appears to be functioning as a resource to be developed whenever the borough claims it is short of development land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Soundness of the Plan – Objection

The Local Plan is not sound.

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

1. The many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land have been ignored in the main. There is no evidence of a collective vision on green belt. In my area more land is being taken from the green belt.

2. There is no hard information available on any future plans for alleviating congestion on the A3 between the M25 and the town in spite of this being acknowledged as one of the major causes of public discontent. Residents are not able to know what the future holds.

3. There is no recognition of the cumulative impacts of the concentration of development in the north east of the town centre all of which will generate traffic on the A247:
   - Gosden Hill
   - Slyfield
   - Garlick’s Arch
   - Burnt Common
   - Wisley
   - 4-way junction near Send/Burnt Common
   - slip roads to the A3 off the A247
   - diverting traffic from the south to go around and not through Guildford

1. The Plan does not consider the implications of Surrey County Council’s business plan for Newlands Corner to attract 100,000 more visitors a year. A significant proportion of these can be expected to use the A247.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report. I believe the SHMA report to be inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Wisley Airfield (A35) and Garlick’s Arch (A43) are in locations that do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. The sites are totally unsustainable. There are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2815  Respondent: 15426337 / C Cope  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.
I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed and there are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. So why was a brown field site at Burnt Common, capable of accommodating approximately 100 houses, removed from the Plan and replaced with the Garlick’s Arch site? There was no proper consultation in relation to the inclusion of this site.

There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages.

Also, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. The road surfaces are in a poor condition with many potholes. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths and are unlit at night. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

I object to the lack of proper infrastructure planning for sites

I have serious concerns over the planning of the infrastructure requirements and wonder that any will be put in place at all.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. I know as I live there. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse. The M25 is at a standstill in this area most of the time. Traffic through Ripley village is unbearable and not just at peak times. The restricted width in Newark Lane means most lorries and vans cannot turn down there and 2 cars cannot pass.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to poor air quality concerns (Policy I3)

The high level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the Local Plan as the development proposed will not be sustainable

The development of over 13,000 homes is not sustainable. It will have a permanently detrimental impact on existing local communities by over development, particularly for the villages between Guildford and the M25, including Ripley, Send and Clandon. The services in these villages will be unable to cope with the level of development proposed.

I object to not protecting the Green Belt (Policy P2)

I object to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt. Once taken the green belt is lost forever.
There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

I object to development in areas which are at risk of flooding (Policy P4)

The drainage in these areas cannot cope at the moment. We suffer from flash floods and road closures particularly around Ripley and Ockham. There is nothing in place to rectify this. More building will only increase the flood risk.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the Borough Wide Strategy (Policy S2)

It is clear that this is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in a merging of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPP16/6205  Respondent: 15426337 / C Cope  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the local plan based on the impact it will have on the special countryside of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6214  Respondent: 15426337 / C Cope  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I OBJECT to the inclusion of strategic site Policy A43 Garlick’s Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send,Burnt Common,Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send,Send Marsh,Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the building of 45 houses at Clockbarn Nursery. The added traffic will bring congestion and hazards to an already busy and narrow country lane. The Business Park on Tannery Lane is already working at capacity so it is impossible to imagine how the traffic would be managed at the junction of Tannery Lane and Send Road. A cursory glance demonstrates how difficult that junction is to navigate.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Cobham & Downside Residents’ Association object to the above draft Local Plan on the following grounds:

• The removal of the former Wisley Airfield from the Green Belt – the Green Belt prevents the urban sprawl and no exceptional circumstances have been established to warrant such a removal

• There is ample brownfield land in urban areas which need to be regenerated

• There would be a disproportionate allocation of a proposed increase in housing to the settlements of Ockham, Hatchford and Downside

• Harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs to service the development

• The assertion that the development would result in a considerable increase in cycling and walking is astonishing. There is insufficient space to provide cycle lanes/footpaths and those attempting to cycle or walk could be put at risk

• There would be an increase in the already severe congestion on the A3 and M25 and the junctions of those major roads as well as local roads

• The lack of suitable public transport

• Air quality has not been given serious consideration. Air pollution in this area already exceeds DEU-permitted levels, affecting adversely the health of current and future residents

• Objections are supported by the unanimous rejection of Application No 15/P/00012 by the Planning Department of Guildford Borough Council on 8 April 2016

The reasons for not removing the former Wisley Airport from the Green Belt are overwhelming and it is very much hoped that the Consultation will result in the Green Belt status being retained.

*Answer (if comment is on questions 1-7 of the questionnaire): (*)*

However I do agree that smaller homes need to be built as there are presently several large houses on the market that would appear to have been on the market for some time. The population is ageing and there is little provision of houses for the elderly. It is well known that the population of East Horsley is very active and that many activities take part in the village Hall – ie the centre of the village. The proposed site in Ockham road North appears to be a well sited area for homes for the elderly and for starter homes.

I feel strongly that consideration needs to be given to building a retirement village that would provide homes for the retired in the village but would enable far less use of cars. Any family homes built inevitably mean more cars and often not enough parking spaces.

The Thatchers Hotel site or the Ockham road site would be perfect for a retirement village so long as the homes built were low and built in keeping with local architecture. There are many such sites in other counties – Linden Village Sunninghill,Berkshire  Bramshott Place, Hampshire, Elmbridge Village, Cranleigh – all have been well designed and bring people of a certain age and time in their life together. Car ownership is discouraged and community transport is provided. Outings, hobbies, sports, interests are all encouraged on site enabling those recently bereaved or who find themselves single able to take part rather than living a possible lonely existence.

I would dearly love to see more thought given to retirement village living as being a useful solution to some of the housing needs in Guildford.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
The local schools are oversubscribed, doctors surgeries are also under immense strain and the local narrow tree lined roads were not built for the volumes suggested.

I travel to work by car to Guildford most days and my journey varies in time depending on the traffic at the Duke of Wellington Pub and A246.

This is already a bottle neck and I cannot imagine what it will be like if 500 new homes are built in the area.

I would like to add my objection to the proposed massive development of Normandy for the following reasons:

1) I do not oppose some development, say 100-200 houses in the village if it is well planned with retail outlet etc, but the proposed 1100 is just crazy and totally out of proportion to the size of the village.

2) The road through Normandy already queues in rush hour, it could never cope with all the extra houses in Normandy, Ash and Tongham. New roads would be necessary.

3) The land flash floods, developing it will cause further flooding in the village.
4) It really 8 form ‘entry’ rather than an 8 form total school? Is that 8 forms x 7 years x 30 pupils = 1680 pupils in a small village!! How could Glaziers Lane and the surrounding lanes cope with that!

I realise there is pressure to develop further areas, but it really seems that no thought or logic has gone into this proposal whatsoever. It even makes one wonder if there is some kind of hidden financial interest to propose such a crazy scheme.

Answer (if comment is on questions 1-7 of the questionnaire): ()

In view of flawed evidence, Guildford's proposal for more than 12,426 homes is excessive and will result in needless loss of Green Belt and character. It will also result in increased congestion that cannot be justified in our heavily constrained borough.

Population estimates and growth estimates are over-inflated

Congestion is severe and requires step-change remedial action before any further housing is approved

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to object to the above proposed submission (Local Plan) for Normandy and Flexford

My objections area as follows:

1. The proposed development (1100 homes) is developer led with the carrot of them providing land for a secondary school – which is not needed

The two local secondary’s (Ash Manor and Kings College/Park Barn) are both undersubscribed and have extra capacity for expansion should they reach their capacities on their present sites and are willing to expand should the need arise – money would be better spent improving and upgrading these.

1. Other secondary’s in the area are also expanding school places at Guildford county and St Peters, Merrow.

Infrastructure – Traffic for the proposal (school and homes) would feed on to minor roads and not directly onto A class roads so causing further strain and overload onto the village at Peak Times. The A323 is already well over capacity and any problems on the A31(Hogs Back) causes and lock regularly

There are no plans to upgrade/improve the A323 in the foreseeable future

Furthermore Westwood lane and Glaziers lane are both bisected by the railway line – both are ‘dog-legged’ and one can only take alternative flow traffic

• Exceptional Circumstances – GBC has to demonstrate such circumstances to justify releasing site A46 from the green belt – it has not dove this there is no evidence let alone clear evidence, furthermore
  1. Environmental aspects have been disregarded
  2. Flexford and Normandy are separate settlements but have been ‘lumped together’ for simplistic and analytical purposes
  3. Flooding has been ignored and is a problem
  4. The doubling of the population is not viable nor sustainable

1. In conclusion I strongly oppose the proposed development. Development of brownfield sites, smaller, sensitive and logical methodology is needed where expansion is scattered and better planned

Existing approvals gained by developers that they are merely ‘sitting on’ looks better as an appreciating ‘asset’ on their balance sheet should be developed first-will a ‘stick’ if necessary (ie rescind the approvals).

The University is also sitting on land until permission for student accommodation AND staff accommodation – exactly where it is needed! This would free up property around the town where it is most needed and minimise the burden on infrastructure.

The deep mistrust that GBC exudes is enormous – villagers do not trust their councils – recent events in the past 2-3 years has fuelled this. The council has little to be proud of in the way this and previous planning policy local plans have been handled

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
22. APPENDIX C

I OBJECT to the proposed Infrastructure Schedule (Appendix C).

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the Plan depends. For each of the Key Allocated Sites in the Borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

1. Having determined housing need the Council was entitled to consider constraints before determining the housing I believe that as well as being entitled to do this the Council was required to give proper consideration to
constraints. The scarcity of sites outside the Green Belt as well as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

2. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the Plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1533  Respondent: 15427617 / Ken Scotland  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

23. APPENDIX D

I OBJECT to the SHMA figure of 693 houses per annum in the Borough being too high (Appendix D).

- The “objectively assessed need” figure of 693 homes a year is too
- A professional review by NMSS (a housing demographics consultant) has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting
- The current SHMA inflates the proposed housing figure due to failure to correct for errors in the historical data for international migration flows, issues with the way it considers students and affordability and flaws in the method for estimating the number of homes needed to support job
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the Borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the Borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant
infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2855  Respondent: 15427617 / Ken Scotland  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

20. POLICY A25 - Gosden Hill Farm

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data: 2010 – 2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highecotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents 2015
- 21 Oct 2015 – A247 near Shell garage - Three vehicles collided causing delays Surrey Fire and Rescue

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Send Marsh Road - Motorcyclists with injuries airlifted to hospital

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and Surrey County Council (SCC) is reluctant to impose further speed limits as congestion is already very high.
I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Green Belt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the Doomsday Book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.
Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

21. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the Draft Plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council may have been attracted by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the Plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding should be available for it. (One of the reasons for turning down the so-called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running South past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement - often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for Southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4).

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a).

The addition of North facing ramps to the A3 at Burnt Common would have serious repercussions for local communities. There is no requirement for local traffic to access the A3 to the North, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the East of Guildford (Merrow etc.) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas, as the traffic would be on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
West Clandon and the villages and amenity areas around it constitute at present pleasant and peaceful semi-rural habitation. The proposed housing changes would evidently change all of that, resulting in a quasi-urban environment which is not what the local peoples wish for. I understand that there may be a need for increased housing, but would question whether that should be done at the cost of destroying much of the quality of life of existing residents. There are other areas where such developments could be done without such consequences.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

15. POLICY D3

I OBJECT to Policy D3 - Historic environment.

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which leaves plenty of scope for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D4

I OBJECT to Policy D4 - Development in urban areas and inset villages.

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
5. POLICY E1

I OBJECT to the sustainable employment policy (Policy E1).

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is an alternative brownfield site very close by.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

6. POLICY E2

I OBJECT to the location for new employment floorspace (Policy E2).

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.
There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7. POLICY E5

I OBJECT to the loss of rural employment (Policy E5).

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

18. POLICY E6

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For
example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment or “Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the Plan’s explicit priorities should be:

1. To protect the Borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value visitors. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

1. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

2. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6270  Respondent: 15427617 / Ken Scotland  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E7

I OBJECT to Policy E7 Guildford Town Centre.

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.
There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

12. POLICY H1

I OBJECT to Policy H1 – Homes for all.

Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free-up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the Plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to
accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and
under-used surface car parks). If all students are accommodated in this way, 2,000 homes would be freed up in town and
there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or
other university sites. The plan should take account of the university's ability to house its own students and reduce the
housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is
inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant?  ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

13. POLICY H2

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility, and that it should be more firm and
explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk
and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The
price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of
unviability arguments only serves to inflate land values. It will become clear that developments are unviable when
developers start selling land for alternative non-development uses.

It should be noted in the Plan that because of Guildford's relative popularity as a place to live combined with its location
close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount
of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now
having a market value of over £360,000 the discounted price is still not going to be affordable to anyone on a normal
income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price? As we have seen with council
houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing
the profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6277  Respondent: 15427617 / Ken Scotland  Agent:
17. POLICY H3

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy.

It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances”. The wording of the policy is far too wide, so compromising all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no facility to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the Plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development, then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related”. Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances”. The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1).

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads. Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow: wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever more popular past-time, particularly at weekends when hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road traffic accidents involving cyclists as a result of the development proposed under the local plan. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring additional accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The Borough’s infrastructure is already heavily strained. However the Plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problems, which will get
worse as development proceeds. The schemes referred to in this Policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this Plan it is an afterthought buried away in Policy 11. By prioritizing greenfield over urban, brownfield regeneration, the Plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the Borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This Plan, however, assumes infrastructure will follow the needs of housebuilding. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of Community Infrastructure Levy (CIL) income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy 11 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to, capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision for increased capacity of Guildford’s hospitals: where is this assessed and remedied?

Answer (if comment is on questions 1-7 of the questionnaire): ()
10. POLICY I2

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2) I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

11. POLICY I3

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the North East of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built-up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2).

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the Borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in apparently protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need is not itself an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. It appears that the Plan has fallen into the developers’ hands, and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.)

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infill and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this
policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the Plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the Borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused a lot of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. Mere housing need does not constitute a ‘special circumstance’, so there are no exceptional circumstances for these sites and villages to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The proposed development in these villages will result in the character of these villages being lost and the countryside encroached.

Guidford Borough Council's (GBC’s) Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development: however, other considerations (e.g. traffic congestion) should preclude the use of this site also.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

4.POLICY P4

I OBJECT to development in areas which are at risk of flooding (Policy P4).

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 Strategic Flood Risk Assessment (SFRA) has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the National Planning Practice Guidance (NPPG)) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

My detailed objections are listed below.

I OBJECT to the Guildford Borough Proposed Submission Local Plan (June 2016). In my opinion the Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

1. POLICY S1

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1).

The National Planning Policy Framework (NPPF) states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to rely on motor vehicles. These sites are also
unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Re: Responses to Guildford Borough Proposed Submission Local Plan (June 2016)

My main objections to the Local Plan are on the grounds of the large increase in traffic that is bound to ensue through the village of West Clandon, and to object also because of the consequent destruction of Green Belt lands. The detailed comments below on the paragraphs within the Local Plan have been prepared by others, but nevertheless accurately and succinctly reflect my own views, and are therefore largely unaltered.

Traffic in West Clandon is significant in off-peak times, and becomes congested for most of the peak-traffic times, with frequent tail-backs from the Clandon Road/Portsmouth Road roundabout (A246/B2215) to the West Clandon/Guildford Road cross-roads (A246/A247). As the present Clandon Road (A247) cannot cope with peak traffic demands, and any significant improvement in traffic handling on that road would require many houses in the village to be removed and house frontages drastically reduced, so any proposed significant increase in traffic would appear to be the result of inadequate or negligent planning. You will be aware that as recently as 12.07.16 there was yet another traffic accident in the village, this time involving two cars. As a pedestrian walking on the narrow pavements (which are sited on only one side of the road, there being insufficient space for pavements on both sides) I frequently see vehicle debris lying at the road side, presumably as a result of vehicles side-swiping one another on the narrow road. I also not unusually have to have my car mount the pavement in order to pass on-coming wide vehicles (or for them to have to do so).

You should also be aware that traffic congestion in Guildford usually results in congestion on the A3 and A246 leading into Guildford, which then causes severe congestion on the A247 through West Clandon, presumably as traffic on the other two routes tries to find alternative routes. The proposed housing developments in the Gosden Hill and Garlick Arch areas would only result in grid-lock through the village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. POLICY S2
I OBJECT to the Borough Wide Strategy (Policy S2).

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey. The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite substantially.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”.

Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the Strategic Housing Market Assessment (SHMA) and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s Objectively Assessed Needs (OAN) is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The Plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The Plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan”
that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN are not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the Borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% Area of Outstanding Natural Beauty (AONB) and about 75% protected by Special Protection Area (SPA)). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number, the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been skewed towards growth without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites, and through increasing the housing density of existing built-up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is therefore unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. Questions posed by Guildford Borough Council as part of its consultation. Questions from GBC

20.A. Question 1: The evidence base and submission documents

"The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?"

ANSWER

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up-to-date or

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

20.A.Question 2: Legal Compliance

"Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

• why you consider it is or is not legally compliant and
• what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the "

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by over 20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

20.A.Question 3: Soundness

"Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

• why you consider it is or is not sound and
• what change(s) (if any) you consider necessary to make it sound, explaining why this is the "

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green" Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

1. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites - which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few There is no evidence in the Plan to show that this rate is achievable and sustainable.

1. Much of the infrastructure required to support the level of development proposed is outside the Council’s The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

2. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

3. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.

4. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

5. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound.

6. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.

7. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.

8. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

9. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

10. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

11. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burgham which have to be met by the developer These include Electricity Grid supply problems and sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

12. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.
13. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

1. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
2. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
3. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
4. The status of the text which accompanies each policy box is not If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites given priority over commercial development and greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

20.A. Question 4: Duty to cooperate

"Do you consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate? Please provide the following information being as precise as possible:

- why you consider it has or has not complied with the duty to cooperate and
- what change(s) (if any) you consider necessary to make it comply with the duty to cooperate, explaining why this is the "

**ANSWER**

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.
Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2853  Respondent: 15427649 / Alan Martin  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although I am not a resident of Guildford Borough Council, as a resident of Cobham (Elmbridge) I would be adversely affected if the above Plan were to be approved, bearing in mind the proximity of the former Wisley airfield to Cobham. I request you to reject the Plan, in particular for the following reasons:

1. The area of the former Wisley airfield serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.
2. No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.
3. There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
4. There would be a disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.
5. My home town of Cobham is the closest shopping area to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic.
6. There is a lack of public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.
7. Protected species on and near the site and wildlife corridors would be destroyed.
8. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

** I object to the figure of 693 houses per annum in the borough being too high (Appendix D)

GBC has not published any details as how this figure was arrived at, and has not applied any of the applicable constraints to it. This lack of transparency is not acceptable in a public consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
** I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlik's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

** I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

This is disastrous as the increased volume of traffic would impact the local communities. The increased traffic from London (M25) to Woking would go through Burnt Common, Send and Old Woking, which currently cannot cope with the existing traffic. This is unsustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()
** I object to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

This will cause more congestion to the villages of Ripley, Send and Clandon, which have poor condition narrow roads and no footpaths, which are dangerous. More houses will increase this danger and unsustainable volumes of traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

** I object to the lack of proper infrastructure planning for sites (Policy I1)

The current and existing services are over-stretched now, so where are the infrastructure improvements to support the enormous proposed developments, including medical, public transport, schools?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

** I object to the congestion that development will cause to the trunk roads A3/M25 (Policy 12)

Both the A3 and M25 need improvements before any developments commence. This is clearly not going to happen in the timescales of the plan, so the proposed developments at Wisley Airfield (A35), Garlicks Arch (A43) and Gosden Hill (A25) should NOT take place.

Please record these objections individually against the relevant sections of the plan and ensure that they are submitted to the Planning Inspectorate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

** I object to poor air quality concerns (Policy 13)

The increased congestion that will arise from the massive proposed developments will in turn lead to increased air pollution which will have damaging effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

** I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, in addition to Wisley Airfield (site A35) and Garlicks Arch (site A43)

There are no exceptional circumstances (as required by the National Planning Policy) for these villages and sites being removed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

** I object to development in areas at risk of flooding (Policy P4)

The Environment Agency classifies the site at Garlicks Arch (A43) as being in a higher risk than the Council's own assessment. The plan does not take adequate account of the flood risk as required by National Planning Policy, especially as this area has flooded many times in recent years

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2871  Respondent: 15428033 / Michael Wells  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the Plan. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London.
- I object to the detrimental impact on transport, local roads and road I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and the development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary
school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

1. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

   • I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
   • I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted level. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
   • I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Pl The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
   • I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd.’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. THREE FARMS MEADOWS SITE (Wisley Airfield) Policy A35

I STRONGLY OBJECT to the location of a new town with some 2000 new houses in the middle of the greenbelt in the middle of nowhere. This planning application was unanimously rejected by the GBC planning committee recently on 14 separate grounds. The site is located miles away from any public transport, is on a site that floods regularly and is surrounded by narrow, muddy, winding, unlit country lanes. The addition of at least 4000 cars will cause a constant gridlock throughout the area. An assumption that residents will walk or cycle to reach amenities is completely unrealistic. An infirm pensioner cannot be asked to walk along these narrow lanes to the doctor and to expect them to cycle would be unacceptable. There is no employment nearby which would result in a huge growth of commuter traffic on the A3 and nearby country lanes causing more pollution and traffic jams; commuter trains are already standing room only and this new town would increase the number of commuters and cause chaos on a daily basis.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6312  Respondent: 15428097 / Bridget McClellan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

LEISURE AND VISITOR EXPERIENCE. Policy E6

I OBJECT to this policy, the Guildford area does not need "new" attractions, the whole point of the attraction of Guildford is its historic nature and quirkiness. The countryside, purely as it is, in its natural state is a big tourist attraction, to add "attractions" is completely missing the point, the countryside is what people want to enjoy, not a huge concrete car park.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
DOCTORS AND SCHOOLS Policy I1, Infrastructure and delivery
I OBJECT to the strain all the extra people will put on medical facilities. It is very difficult to get a doctor's appointment even now and all local schools are full to overflowing with "temporary"classrooms dotted around.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6315  Respondent: 15428097 / Bridget McClellan  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

INFRASTRUCTURE AND DELIVERY. Policy 11
I OBJECT, infrastructure is already hopelessly congested and cannot cope with even organic growth. The policy does not seem to mention roads and traffic which is the major cause of congestion, anyone who drives either up or down the A3 at any time of day will tell you how congested it is. Adequate infrastructure MUST be a pre condition of sustainable development. Greenfield sites present huge infrastructure problems and brownfield sites already have it in place, so it is much more sensible to use brownfield sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

SUSTAINABLE TRANSPORT FOR NEW DEVELOPMENTS. Policy 13
I OBJECT, as often the proposed sites are remote from existing bus stops, stations and even roads with pavements. This assumes that people will stop using cars as transport methods. This assumption is unrealistic as has been proved time and time again in new developments resulting in parking chaos around the developments as residents try and park near home and traffic snarl ups.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

PERCENTAGE OF NEW HOUSING ON GREENBELT Policy P2
I OBJECT to the large percentage of new Borough housing being built in the current greenbelt. There are more than enough brownfield sites and urban area that require re-development. Those should be used before destroying greenbelt which is an accessible amenity for all.

EAST AND WEST HORSLEY BEING REMOVED FROM THE GREENBELT Policy P2
I OBJECT to East and West Horsley being taken out of the greenbelt. These are green, rural villages with narrow country lanes running through them and contribute to the openess of the greenbelt.

GREENBELT Policy P2
I OBJECT to the wording and content of this policy which states "the general extent of the greenbelt has been retained" we are losing nearly 7% of the greenbelt when including insetting, filling and increasing settlement boundaries.

VILLAGE BOUNDARIES Policy P2
I OBJECT to East and West Horsley's boundaries being greatly enlarged. This will ruin the rural nature of both villages and cause them to become soulless dormitory towns with no heart.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

DISPROPORTIONATE NUMBERS OF NEW HOUSING IN EAST HORSLEY
I OBJECT to 533 new houses. This is a disproportionate number for this part of the borough. 23% of the Plan's new housing is in the area of the Horsleys, Ockham, Ripley and Send, a rural area that has only 0.3% of GBC population. The infrastructure will collapse under the strain and chaos will ensue.

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
• I object to the disproportionate allocation of housing in this particular part of the Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London.

• I object to the detrimental impact on transport, local roads and road I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25.
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCT).

• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted level. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC's Planning Department.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd.'s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)
   ◦ The “objectively assessed need” figure of 693 homes a year is too high.
   ◦ A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
   ◦ The current SHMA inflates the proposed housing figure due to
   ◦ failure to correct for errors in the historical data for international migration flows,
   ◦ issues with the way it considers students and affordability and
   ◦ flaws in the method for estimating the number of homes needed to support job growth.
   ◦ It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

Comment ID: PSLPS16/2882  Respondent: 15428225 / Vian Lee  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for “overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that
order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY H3 – Rural Exception Homes**

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested.
These narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians AND you have given no consideration to this point.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

</tbody>
</table>

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?
I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to any proposal to take land out of the Greenbelt as is suggested with villages such as Ripley, Send and Clandon as well as sites of Wisley Airfield (A35) and Garlick’s Arch (A43). The National Planning Policy states clearly that it requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt and that housing need is not such an exceptional circumstance.

There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is no way sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

1. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

2. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to any increase in traffic on send barns lane where I live. This being the Woking – Dorking – Brighton route is heavily congested during the rush hours and I usually have to wait for 5 mins just to cross the road at the roundabout to catch the bus .

Furthermore it should be taken into account that there are two schools (Send First and Second) Further down the line people driving children have to part on the lane turning area into a bottle neck. To have more roads converging at burnt common would be accidents just waiting to happen.

There is mention of a distribution centre which would mean more heavy traffic and offices. There is no need for these. When those that are there now were built they stood unlet for some time.

I do not want to see send removed from the Green Belt or joined up with other places creating an urban sprawl. Once this happens it would be for good. The whole of the Guildford – Woking area would be one conurbation.

The answer surely is for new towns, which could cope with expansion to build the houses needed? Now would be a temporary measure.

Families Grow and then where do they go? Let us keep the Green Belt and create fresh towns. I object to losing it.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although I do not live in the Guildford Borough, I live much closer to the above undesirable proposed development than many others who do.

I particularly object to the Wisley site being removed from the Green Belt. This would run counter to the whole purpose of the Green Belt in preventing urban development which could ultimately see Guildford subsumed into the mass of London - there are no special circumstances that would justify this. I object also to the proposed increase in housing in Ockham, Ripley, the Horsleys and Effingham for the same reason and also because this would change the whole character of the area very much for the worse.

There would be many other harmful side effects but particularly the impact on local roads, especially the A3, and services of the increase in population. Congestion is already quite severe and the regular presence of a further 4,000 (at least) cars plus service vehicles could lead to gridlock in a number of places and there would be a serious deterioration in air quality.

Little consideration seems to have been given to the environmental and ecological value of the site and the surrounding area.

There is plenty of brownfield land that could be developed without the need to threaten the Green Belt and I hope that the council will reconsider.

Page 509 of 2543
I am a retired SECAMB Paramedic who used the hospitals in and around Surrey. Over the years I have have seen these hospitals struggle against the increase in the numbers of patients being treated. Even when I retired 6 years ago, the ambulances had to wait excessive lengths of time waiting for spaces to become available in A&E, from what I am told by my colleagues who are still working, the situation has got much worse.

There is also a strain on the local GP's, with the numbers of doctors not going into General Practice, it is a situation that will only get worse over time.

There are insufficient places in local schools, any increase in demand will again only exacerbate the problem.

Our roads are even now grid locked, the traffic on A3 and M25 is often reduced to a crawl at all times of the day and obviously worse during the rush hour and school run.

The Guildford Borough Council plan to build over 14,000 houses is madness, even 10% of this figure would create problem.

The villages in around Guildford are currently delightful places to live, PLEASE DO NOT RUIN THEM, IF YOU DO, IT WILL BE YOUR LEGACY

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although I do not live in and around Ripley, I object to the 2016 draft local plan.

I object most strongly to any loss of the green belt. Apart from the Green Belt proving a habitat for wild animals, it provides access to the countryside for thousands of people. It also creates a barrier between urban areas and prevents ribbon development. If the proposed housing development goes ahead, eventually there would be further application to build on even more of the Green Belt, eroding it further.

New house building should be restricted to Brown Field sites only, or by infilling.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to object strongly about the proposed housing planned for Gosden Hill Farm. These are the reasons:

- My main concern is traffic and the inevitable exacerbation of an already congested area. New Inn Lane and Park Road are already at breaking point plus the junctions at London Road and Epsom Road. People going to work and children going to school will be seriously inconvenienced by more traffic. And remember these days each home has at least 2 cars!
- Local parking: will the plan provide more parking spaces for the Burpham Parade? Epsom Road in Merrow? BP Garage / M&S in Merrow? Sainsbury's? Aldi? - I think not! It will make life around here so much more stressful and unpleasant.
- Has the water table and sewage disposal been properly researched? Again I suspect not.
- Having traveller sites included will cause social tension and [Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]

Please acknowledge my concerns and add my name to the objectors list

As a regular commuter with a young family we moved to the area for space and to enjoy the green spaces. I am dismayed to find that the plans propose to remove Horsley from the Green Belt, ruining the villages and their surrounds. The knock on impact of additional housing is of great consequence to schools, medical facilities, parking and over crowded trains. No distinction will be discernible between Horsley and any other suburb of Greater London if this building and development work is permitted to continue on the scale proposed. Our creaking drainage systems and busy roads with well known pinch points will deteriorate further with untold consequences.

I implore you to reconsider the options available, but at all costs protect the Green Belt for generations to come.

I protest at the proposal to take Chilworth out of the Green Belt

The village is entirely rural nestling in the Tillingbourne Valley between St Martha’s and Blackheath, and is unobtrusive in this picturesque environment, which has enormous amenity value. It is unthinkable to open it up to the possibility of major development.

Having recently reviewed the proposed developments within the GBC boundaries, I feel I must object to all of the proposals due to:

- An inadequate road network that could not cope with any additional traffic.
- The utilities cannot meet current demands yet alone an increase in demand for their services.
- The impact of thousands of proposed properties would have a huge detrimental effect on the villages (Ockham, Send, Ripley and The Clandons in particular) affected.
The local Health Centres struggle at this time to meet demand both from trying to recruit trained staff and the demand of the current population. Additional demands would see staff moral dropping and therefore the quality of Health Services will diminish further.

I would suggest that you have received many similar objections to the proposed developments.
Therefore please reject all planning applications until at least the above concerns are rectified.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

Having previously written stating my objection to the plans put forward at that time, I am amazed that there are further plans which would only cause greater harm to the immediate area.

My areas of concern were traffic flow increase, infrastructure capacity and the demise of the rural nature of the area.

Surely if the infrastructure was to be modernised to allow for the increased capacity prior to any developments this would assist in reducing concerns.

If ALL vehicular access to A58 (Burnt Common), A35 (Wisley Airfield) A43 (Garlicks Arch) were to made purely from the A3 carriageway this would also alleviate local concerns over traffic flow and volumes.

From the above proposed developments only foot traffic/pedestrian access should be allowed from other bordering roads and lanes.

The revised proposed plans fail to address any of the recent concerns so please note my objection to all of the above developments on the above basis as above.

Any development should be in keeping with the countryside and the local environment. No industrial or commercial storage facilities should be even considered in the green/agricultural environment in the immediate surrounding areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the assessment used in the West Surrey Strategic Housing Market Assessment. for 517 house a year to be built in Guildford over a 20 year period from 2013 to 2033. The infrastructure in the town is already operating at capacity with congested roads, oversubscribed NHS services and capacity commuter services. I do not see how this need can be justified in the context of a public consultation. I would urge the council to reconsider this in the face of strong local opposition and extend the period of consultation to be both more inclusive and allow for due consideration of all interested and not just the narrow and vested political and commercial interests.

I took great pride in the council rejecting the proposed development at Guildford station and hope a similar level of pragmatism can be adopted in this interest.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to the lack of Evidence supporting GBC Strategic Housing Market Assessment 2015 which is highly questionable and for which GBC has consistently refused to provide details of its calculations despite a petition and several requests to do so. I believe that the requirement for 13,860 new homes in the Borough is exaggerated. Even were the population to grow by 20,000, based on an average family size of 2.5 persons in each home, the need would only be for 8000 homes. It would appear that the number of temporary foreign students has been wrongly used to inflate the population need. The Green Belt does not need to be built over to meet that need, when 50% of the 13,860 new homes stated as needed, could be built on existing Brownfield Sites. GBC's Transport Assessment was not even been made available to Councillors when the vote on the New Local Plan was put to them on 25th May, which again questions the objectivity and competence of GBC and its Planners.

I OBJECT to the Lack of Evidence supporting the need for Industrial Development at Burnt Common. The latest Employment Land Needs Assessment (ELNA) in 2015 shows an 80% reduction in employment space need from the ELNA carried out by GBC in 2013. Bearing in mind the significant amount of vacant premises in the Borough and surrounding area, there is no need for new commercial and industrial development and the traffic and pollution problems that will ensue because of it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1 I OBJECT to the New Local Plan in principal, since it fails to achieve Guildford Borough Council's stated objective of "protecting the borough's most important countryside, landscapes and heritage". This New Plan fails to achieve any of these objectives in the case of Send Village in particular, whose History dates back past the Middle Ages and proposes development of 480 houses and 7,000 sq metres of industrial and warehousing space which will destroy Send's living environment; local countryside; areas of natural beauty; and cause harm to ancient woodlands - let alone a village community which has survived for hundreds of years.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
**I OBJECT to POLICY A 43.30 ha LAND AT GARLICK'S ARCH Burnt Common for the building of 400 houses and 7,000 sq metres of industrial and warehousing.** If there was need for more industrial space, it could be developed more easily on the existing industrial site at Slyfield and no new 4-way A3 interchange would be needed in this environmentally sensitive area. There is photographic evidence of flooding on the site, making it unsuitable for housing. If this area was developed it would destroy the village communities of Send, Ripley and West Clandon and the quality of life and health of its residents and cause major problems in relation to Road Safety. There is no need for any more houses in this area, or even as many houses as the new Local Plan states are needed (13,860) - neither is there any need for the additional 7,000 sq metres of industrial and warehousing space.

</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I OBJECT to POLICY A 444.1.9 ha LAND WEST OF WINDS RIDGE AND SEND HILL which has designated the development of 40 homes and 2 Travellers' Pitches. This site is NEW and was NOT included in the Regulation 18 Draft and has not been consulted upon previously.** Development for housing is inappropriate due to its permanent Green Belt status and it is a Green Belt amenity within an area of natural beauty which would be totally destroyed by development. The site contains documented contaminated land which is vented. The site of the proposed Travellers' Pitches can only be accessed via a narrow single track country road, which makes access very limited and thus unsuitable for development.
I OBJECT that the already overloaded infrastructure and existing transport overload seems to have been completely ignored in the case of Send, as has the existing traffic congestion during peak times and in particular Send Barns Lane (A247) being used by large commercial vehicles, for which the road is totally unsuited. This is without the inevitable significant overload which will be caused by the proposed additional housing population and industrial development which is just not sustainable and will cause major traffic jams and significantly increased pollution for the existing population of Send. A Narrow Boat Marina and additional housing is already being developed in Tannery Lane, using a narrow road with a dangerous junction onto the A247 in the middle of Send Village. Send has already become a principal through route from Woking to the M25 and A3 and will become gridlocked all day - even without the proposed NEW 4-Way A3 Interchange. This alone could destroy the village and cause major Health and Safety problems, particularly in relation to the new development and merger of two schools which front onto Send Barns Lane (A247). There is already serious parking congestion and traffic problems with just the one current school. With the addition of the new second, congestion will increase.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT TO POLICY P2 REMOVING SEND FROM THE GREEN BELT. Send is an historic settlement dating back many hundreds of years and provides an essential buffer between the large urban areas of Woking and Guildford. Send contains areas of Special Scientific Interest as well as areas of natural beauty and ancient woodlands: providing much needed habitats for wildlife and an amenity much enjoyed by Send residents as well as other GBC residents and clubs. Without the Green Belt to provide permanent protection afforded by the National Planning Policy Framework, Developers would have free rein and future development could not be stopped. Very quickly there would be no separation between
Woking and Guildford, as intended by Central Government in the NPPF, which is intended to prevent the merging of settlements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The new plan clearly demonstrates a lack of concern for Green Belt land and the residents of Send, who made thousands of objections to the 2016 Plan, all of which have been completely ignored in the latest Local Plan. An even greater number of houses have been proposed for the areas between and around Ripley and Send.

GBC appears oblivious to the loss of the Green Belt and the increase in pollution that will be caused by their proposed developments. GBC is ignoring the traffic and environmental problems which this Plan will cause - clearly totally uncaring for the health and safety of residents. GBC is deliberately ignoring the inadequate infrastructure of the area and are failing to place constraints, to take into account the lack of schools, medical facilities and roads, as is required by Law.

The assumption is that GBC and its Officers are placing commercial organisations and considerations over care for Residents and the areas of special scientific and historic interest contained in and around Send and Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3820  Respondent: 15429985 / Jennifer Slade  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A42 change at Clockbarn Nursery, Tannery Lane because the proposed housing has increased by 33% from 45 to 60 homes on a road with very restricted access: being effectively single lane in places. Tannery Lane is already used by many motorists as a cut through and is particularly dangerous in winter, as there are no street lights and no restriction on speed. There have already been hundreds of objections by Send residents to the inevitable increase in traffic on this road. This is also an area prone to serious surface water flooding, making it unsuitable for increased housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to Policy A43 change - Land at Garlick's Arch, Send Marsh because despite thousands of previous objections to development, it is now proposed that 400 homes and 6 Travelling Showpeople Plots are constructed. GBC has produced no evidence for any proven need for Showpeople Plots in this area, which is permanent Green Belt with no "exceptional circumstances". This area contains irreplaceable ancient woodland, dating back to Elizabeth I, which GBC is now proposing to destroy. It is currently a Flood Zone 2 allocation having frequent flooding and is a health risk for people and animals, being contaminated land with lead shot following 50 years of shooting activity. The proposed development will generate excessive traffic on roads that already get gridlocked in Send and Ripley at peak times and also remove the main area of green space between the villages of Ripley and Send, which is contrary to the purpose of the Green Belt.

I object to Policy A58 change - Land at Burnt Common, London Road which was deleted from the 2014 draft Plan, due to the large number of objections. There is no proven demand now or in the future for additional industrial capacity. It would therefore appear that GBC is presuming that a new A3 junction will be built sometime in the future at Send and justify this excessive industrial development within a Green Belt residential/rural area. The existing industrial areas in Slyfield and Guildford still have empty sites and industrial units and the 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for the whole of Guildford Borough - not the excessive allocation of 10 hectares in Send alone within the Green Belt which will cause major traffic gridlock in the surrounding roads and join up existing villages - again defeating the Green Belt. It is also noted that the word "maximum" in the 2016 Plan has, very significantly, been changed to "minimum". The existing roads cannot service such a development and the weight of commercial vehicles. This proposed industrial development on green belt is totally unacceptable and unnecessary.

I object to Green Belt, Policy 2 at paragraph 4.3.15 - Send Business Park taken out of Green Belt because it is an old, non-conforming user in an area of countryside of outstanding natural beauty, which is also an area of special scientific interest adjacent to the Wey Navigation Canal. Tannery Lane has very restricted vehicular access in both directions; has major junction problems with the A247; is prone to flooding and any further development of this area is inappropriate - not least because it detracts from the openness and effectiveness of the Green Belt.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

My family and I have lived in Send Marsh for thirty-three years and enjoyed the benefits of a small community within the Green Belt. The services, transport and schooling area sustainable for the present population and allow the sense of identity for all those who live in Send, Send Marsh and Ripley.

The boroughs plans for new homes under represent draft plan is an enormous concern to us and many families in the green belt will cause the destruction of our rural village life and identity.

We greatly object to the Garlick’s Arch proposal, near to our home. The increase in housing, population and transport will have a strain on the present lifestyles and smooth running of services and especially transport to the A3 and M25.

Furthermore, there are more concerns to object to, which include: the buildings at clockbarn nursery; Send hill and the creation of a new interchange with the A3 at Burnt common.
The local councillors need to protect our greenbelt area and prevent the creation of a large conurbation which will be a failing for those living there.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7369  Respondent: 15430049 / Michael Armstrong  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Gosden Hill site at Clandon/Burpham with 2,200 homes will result in even worse traffic congestion at the A3, the traffic jam which occurs every day and regularly to Burnt Common will extend to Cobham and cause even further congestion at the M25 intersection. The regular traffic chaos which we encounter will be exacerbated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/7367  Respondent: 15430049 / Michael Armstrong  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object very strongly to the 2016 draft local plan.

I object to the disproportionate amount of development in the area, particularly to the Garlick Arch site at Burnt Common for at least 400 homes. The Portsmouth Road is already heavily laden with traffic and drivers often cut through this road in order to ‘short cut’ the jam on the A3 leading to the M25. The villages of Ripley, Wisley, Send, and Clandon are constantly affected by traffic when the main roads are jammed, a regular occurrence. How can the addition of 2,000 homes at the Wisley site be considered in view of traffic congestion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I have enjoyed and lived in Sendmarsh for over 30 years. The green belt is an aspect that has to be retained as it is such a valuable feature of the region and adds hugely to the well-being of commuters, it is such a relief for people to come home knowing there is the tranquillity of green belt that surrounds our villages.

During the last 2 decades there has been an enormous increase in traffic in the region, with the M25 and A3. On a daily basis when there is queuing traffic along the A3 at the various intersections, particularly at the junction of the M25: when there is an issue on either of these 2 main roads which are closely linked to the surrounding villages, traffic backs up very quickly having a detrimental effect on the journey of local people going about their daily business, such as going to school/work/hospitals etc.

I have outlined just a few of the concerns I have but have many other concerns too, which is why I feel very strongly against the plans to hugely increase housing and destroy the green belt.

Comment ID: PSLPA16/1553  Respondent: 15430113 / N Cook  Agent:
What is very worrying is that the Housing assessment report was carried out by GL Hearn who are advisors to house builders, so this report can hardly be deemed credible and GL Hearn certainly have a conflict of interest. To date there is no credible evidence to demonstrate the need for 13,000 plus houses in the Borough and now the country has decided to Brexit, housing needs will change.

I object most strongly to Green Belt land being turned over for building purposes. I lived in the Clandons for 20 years and visit the area each day. My leisure and work involve use of the countryside within the Clandons and surrounding villages. Green Belt is land which should never be built on, so future generations are able to enjoy green open spaces.

Worryingly I see it is proposed that areas in East Clandon should be included in a settlement area and also I understand there is a proposal to extend the settlement area in West Clandon, both proposals I object to.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Most surveys conducted by parish council and local groups show a need and tolerance for no more than 50 - 100 new homes. Such a number could be slotted in around / within existing housing areas and if planned and executed sensitively, will have hopefully minimal impact on the character and practical functioning of the village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/6370  Respondent: 15430241 / Tina Grace  Agent: 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

To increase a village population by over 30% without any thought to the additional strain placed on already strained local services, roads, schools/education, transport, drainage is misguided to say the least. The impact of 450 + new homes and the 900 additional cars that will add to the village roads, will seriously change the character of the village and will put local children who cycle or walking to school - something quite rightly encouraged by the local primary school- in a very position indeed.

Attached documents:

Comment ID: PSLPP16/6372  Respondent: 15430241 / Tina Grace  Agent: 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Please reconsider your proposal for 450+ new homes in West Horsley and take a more measured approach in line with feedback expressed by the existing residents. The people of West Horsley are not being unreasonable. We understand that some increase in housing stock is need, as current residents wish to stay on in the village and new people wish to join our community. However, to increase the population of West Horsley by the numbers of people and cars you propose would destroy the character and effective functioning of the village for both existing and future residents.

I sincerely hope that you reconsider your proposal and that we can arrive at numbers which the West Horsley residents can embrace as a positive outcome for an organically evolving village.

Comment ID: PSLPS16/2936  Respondent: 15430369 / Sarah Long  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to Policy A43a, the proposed on/off ramps to the A3 at Burnt Common as this will inevitably cause traffic chaos on the local road network throughout Ripley, Burnt Common, Send and West Clandon, with absolutely no possibility of mitigation due to the nature of our rural roads and lanes.

This plan provides too much land for development but not enough to ease congestion.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Gosden Hill Farm site is in the Green Belt and the 'National Planning Policy Framework' clearly states that any new Green Belts should only be established in exceptional circumstances. This Draft Plan does not show sufficient exceptional circumstances to justify its inclusion.

---
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I draw your attention to the speech made by the new Prime Minister of the UK Theresa May in her inaugural speech where she said when questioned on fulfilling the need for more house building:

“I AM NOT TALKING ABOUT BUILDING IN THE GREEN BELT.
THE GREEN BELT IS VERY IMPORTANT”

Theresa May spoke further about the need to plan “MORE CLEVERLY”.

Building on the Green belt is not “Clever”, therefore:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt la Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see
both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

4. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the statement under A43 that there is a stated opportunity that this will improve bus frequency and encourage travel to and from the site. It is hard to understand how the development of the number of houses proposed will in fact change the current occasional bus service to sufficiently reliable and frequent but service that can be relied upon for travel to and from employment.

I object under A43 the opportunity to reduce the flood risk. Any development will increase the risk both locally and in the area in general. All surface water drains to the Wey navigation which frequently overflows during periods of high rainfall and development put increased pressure on this.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

I object to A44 the development of the area west of Send Hill Road which is not suitable to take increased traffic, it is not wide enough for two lanes of traffic as is evident by the lack of the middle white line. South of Send Hill is Potters lane which is already over used and is a frequent road with incidents where cars coming of the A3 cut through maintaining the speed they where traveling on the A3 and soon getting to the small number of houses and the blind corner where they meet an oncoming vehicle on a lane wide enough for a single car only. This is made worse in the winter months where the particular area is prone to flooding and the formation of ice frequently.

Further objection under A44 is that this is currently Green Belt and has an existing abundance of plant and wild life, this development will destroy this area with little or no regards to the eco system! The plan states “Green corridors and linkages to habitats outside of the site” where as in fact the plan removes the eco system habitats so hardly a linkage. The green belt beyond the site is predominantly farm land and not natural habitat.

I also object under A44 that requires “Sensitive design at site boundaries that has significant regard to the transition from village to greenfield” this only affects the boundary development whereas as the complete development will not be in keeping with the existing Village. As I personally have been rejected twice a conversion on my home for this very fact despite general support from the majority of my neighbours.

Under A44 there is a stated evidence of a quarry, but no mention that this was actually more recently used as a land fill, including the disposal of Asbestos! Therefore what precautions are taken into account for this? Development on a previous landfill should be considered very carefully. I understand that the area has been monitored recently and considered safe, however a major development would drastically affect this. The dumping here predates the 1999 EU landfall directive regulations.

Also the area under A44 one of the few areas locally for dog walking with access both via Send Hill and a foot path to the village, developing this will remove one of the few remaining places people within send can let their dog roam free.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the proposed plan affecting the Send and Send Marsh Areas:

I object to the local plan A44 as this would have an adverse impact on street parking.

Plans A42, A43 and A44: The village of Send and Send march have limited access, and no public transport which can be relied on for travel to employment. Therefore the creation of new homes within these areas will dramatically affect the already congested road network. It is noted that under the plan A43A there are new slip roads for the A3, and this is supported, however this will not by anyway relive the existing problem. The fact is during the rush hour periods and frequently on the weekends the A3 is congested from around the BP services to the M25. All new homes will still be served by the existing North bound slip at Ripley as it will take commuters closer to the M25. In fact it may encourage more of the existing A3 north bound traffic to travel through the over used village roads.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I support this policy of retaining this land for Allotment use. In particular I am concerned with the Allotment in Guildford named Aldershot Road where I have been a plotholder for almost forty years and which has given me so much important exercise together with so much fresh vegetables. This I am sure has been the experience of all people so involved in this pursuit and it would be such an awful loss to the community if any plans in hand meant that any allotments would be lost! Apart from the personal loss there is the matter of loss of the green infrastructure of the area which must be kept to a minimum at all costs. In mentioning my allotment above, it has a serious local problem which I feel needs to be given specific consideration. Following on the area surrounding our lower vehicular access changing from being a car park, it appears that this access in now in jeopardy and all our plotholders are very worried about the alternative plan which has been mooted. Any such change would involve people coming to the plot having a long uphill walk to the old higher gate and there is the additional problem for car users finding parking space. Any such change must have serious thought before implementing. I do hope that everyone agrees with me that all plans involving allotments must be looked at with great care because the implications are widespread indeed.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I am writing to object in the strongest terms to the plan to remove the Villages of Send, Ockham, the Clandons and the Horsley’s from the Metropolitan Green Belt. Our parent's era devised the idea of this green belt in 1935 to stop the ongoing sprawl of London and other cities to give permanently open space, devoid of inappropriate development, and open air for everyone to enjoy. You only have to visit our villages every weekend to find the roads full of cyclists enjoying the countryside and fresh air. To change this policy will mean unethical developers will build on every scrap of land and we will become yet another London suburb -this must not happen.

Particular to Send, where we live, I object to the underhand planning application for Garlick’s Arch which came to light very late in the planning application process. Send itself already struggles to provide sufficient school places, doctors’ appointments, and bus services and the traffic is already at an unacceptable level at peak times. To add 400 more houses and an industrial area on this small wedge of green belt land is crazy and just greedy on the part of the landowners, who clearly have no conscience for the village and its needs.

I also object to the plans to build a new interchange onto the A3 at Burnt Common to take all the extra traffic going through our village from the proposed developments -not only at Garlick’s Arch but the proposals for Wisley Airfield, Gosden Hill, Burpham and Blackwell Farm. Send Road and Send Barns Lane is already extremely congested and would become grid-locked.

Finally, I object to the renewed application for 2 travelers’ pitches at Send Hill. This road is extremely narrow and the surrounding countryside a favorite walking spot for many Send residents, let alone visitors to the cemetery [Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to inform you that I wish to object to the proposal of Building Houses (593) in the Horsley’s, one of my main objections is to remove the Horsley’s from the Green Belt – Such a decision and action would be a disastrous act of stupidity because an increase of homes would mean an upheaval for most residents to the environment such a development would cause.

Village roads cannot cope at the best of times, let alone a further increase of traffic which in turn cause more pollution to this green village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I Object strongly to any development built on GREEN BELT At Gosden Hill Farm

Local plan draft is unsound:

Flawed Guildford Borough Council data was used to overestimate housing figures,

The SHMA figure of 693 pa is TOO HIGH

It has doubled from the figure given 4 years ago when the Brexit vote had not happened. It needs to be reduced in light of the reduced immigration in the future
It failed to correct historical errors, errors in student needs and errors in estimated homes needed to support job growth. Therefore the GBC needs to reduce this housing needs figure now after BREXIT. Instead they have refused to release their calculations. The report is unaccountable and therefore **THE LOCAL PLAN MUST BE CONSIDERED UNSOUND.**

An independent report commissioned by the guildford residents assoc, put the pre Brexit number at only 510 per year. This is also reducable in light of less immigration to Britain now we are out of EU.

The number of development of homes during the Plan period at 14000 is based on flawed and pre-Brexit data and is in any case unsustainable. It would result in massive overdevelopment. The destruction of the precious natural environment to disproportionately expand Burpham, with no constraints on the plan to protect the rural nature of the village would result in total loss of Send, Ripley, Wisley and Burpham's unique village identities.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object because Wisley airfield is greenbelt land, there are plenty of brown belt sites that could be developed, it would be completely wrong to develop this area of outstanding natural beauty, it will be greatly detrimental to the wildlife there, the narrow rural lanes are not suitable for the large increase of traffic and the congestion it will cause and there will be an increase in air pollution, it will be shameful if Guildford borough council allow this development to go through for the reasons above and for the people living in the area, I don't live by the area but I go to the area often and know people in the area and it's shocking to think this lovely area could be destroyed by development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I Object to the Draft Local Plan for the following reasons.

(1) I object to the plan as the site is remote and occupants will rely on the use of the private motor car adding to traffic congestion on both the Strategic Route Network (the A3 and the M25) and local roads which already running over capacity.

(2) I object as the application relies on people switching to walking, cycling and public transport. This is unrealistic as it is two miles to the nearest railway station and at least half the route has no footpath. Roads are narrow and unlit, and there is no spare parking capacity at either of the local stations.

(3) I object because a site of this size are required to provide outdoor open space. The applicant has not complied with this requirement but rather has “double counted” the outdoor space with that required for SANGS.

(4) I object to the loss of high quality agricultural land is in contravention of policy.

(5) I object on the grounds of Air quality, the air quality figures are based on an unreliable transport assessment and therefore should not be used in evidence.

(6) I object as there is documentary evidence that the applicant has not used the DEFRA modelling statistics as required and rather appears used numbers from an unrecognised (and unreliable source)

(7) I object as a person who has COPD to the poor air quality which will be exacerbated in the area by such a development, Young and Old are extremely susceptible to poor air quality.

- It is clear that air quality is deteriorating largely due to the emissions from the traffic, I believe that the impact of poor air quality on the internationally famous RHS Gardens at Wisley and the Thames Basin Heath Special Protection Area is already in excess of legal limits.

(8) I object because in my opinion the transport assessment makes a number of ridiculous assumptions and is not credible. It is completely unrealistic to assume that there will be a decrease in vehicle movements after completion of this development, and there will no impact on traffic for the recently added secondary school, nor from the fact that prior to the school being built the children living on site will have to be transported to the nearest available school in Leatherhead –
adding to congestion and pollution, and there will be no impact shown for the 270 daily bus movements which will impact local roads further, or for the waste lorries or HGV deliveries to the site.

The traffic counts bear no relation whatsoever with counts submitted to Guildford or to Woking borough councils in support of other large development projects.

(9) I object because the number of daily trips is understated in the region of 1000 vehicle movements. Additional traffic will have a negative impact and cause irreparable damage to historic houses and other buildings in Ockham, Ripley, and Downside and further afield. If allowed, the impact of the additional traffic may prohibit other developments further south on the A3 or indeed those planned by the RHS.

(10) I object because the site is in the Green Belt in a rural location, hemmed in by the A3 to the west, the Special Protection Area and the M25 to the north and the Conservation area of Ockham Village to the south. Green Belt boundaries can only be changed in the local plan process and in exceptional circumstances. The applicant has not demonstrated that exceptional circumstances exist.

(11) I object because the four and five storey buildings are not appropriate in the rural environment. Residents will be crammed in with little outdoor space, in a noisy location with very poor air quality.

(12) I object to the proposed closure of local road, coupled with the massive increases in traffic, will effect us & a large number of other road users from Cranleigh to Cobham and everywhere else in between. We regularly have to use Ockham Lane to avoid the chaos on the A3 when picking up our Grandchildren from school in Cobham.

Further, Ripley- The traffic data suggests fewer vehicles (15-28% less than today) on Portsmouth Road/High Street and Newark Lane. This information is flawed. We are daily subjected to queuing traffic on the Portsmouth Road, and as Senior citizens have given up in crossing this road to take our walk through to Polesden sailing club.

More traffic queuing in Ripley High Street will increase levels of NOx and NO2 pollution, possibly beyond EU limits.

- Additional traffic accessing the A3 will lead to longer journey times and additional driver stress. - The closure of Ockham Lane to vehicles will result in your separation from schools, doctors surgery etc. resulting in longer journey times and delay (via Old Lane/Forest Road or Old Lane/through the development, Ockham Road North to Horsley). More noise and dust pollution through the 12 year build resulting in loss of amenity- Loss of country footpaths and bridleways which become rights of way through a densely populated settlement.

- Traffic assessment does not include the A245 or Painshill junction despite the fact that it is likely that these roads will carry significant additional traffic.

We already have had to choose to curtail early appointments at the Village Surgery Send, because of the traffic build up at the Burmton Common Roundabout.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**I object to removal of Brownfield site (A34) from the Plan**

Site A44 in Broadford Business Park has also been removed. This is another brownfield site that has already been developed. The Council’s claims to “have adopted a ‘brownfield first’ approach” (page 5) but this is clearly not the case, and is contrary to national guidelines.

---

**I object to removal of Brownfield sites (A4) from the Plan**

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

**I object to the extended development in the Green Belt (Policy P2, Site A43)**

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

---

**I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch**
The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A50

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Plan is self-inconsistent in respect of traveller sites. A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots …” Clearly A50 more than covers the total “need” of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

• The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm,… (site allocation A25) [ than the Burnt Common site did ]”
• The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are
almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses].” That has now been removed, thereby accepting that needing to make greater than normal profit \( IS \) to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:
“We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

The Garlich Arch, Burntcommon, Send & Wisley proposals will have a devastating affect on the quality of life, and pollution from the traffic it would generate, as all these developments will necessitate their traffic to be directed through Ripley, Ripley has already become a by pass for the A3, which on a daily basis has problems.

I object removing Send Business Park from the Green Belt (4.3.15).

Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

I Object to the Draft Local Plan for the following reasons.

(1) I object to the plan as the site is remote and occupants will rely on the use of the private motor car adding to traffic congestion on both the Strategic Route Network (the A3 and the M25) and local roads which already running over capacity.

(2) I object to the application relies on people switching to walking, cycling and public transport. This is unrealistic as it is two miles to the nearest railway station and at least half the route has no footpath. Roads are narrow and unlit, and there is no spare parking capacity at either of the local stations.

(3) I object because a site of this size are required to provide outdoor open space. The applicant has not complied with this requirement but rather has “double counted” the outdoor space with that required for SANGS.

(4) I object to the loss of high quality agricultural land is in contravention of policy.

(5) I object on the grounds of Air quality. The air quality figures are based on an unreliable transport assessment and therefore should not be used in evidence.

(6) I object as there is documentary evidence that the applicant has not used the DEFRA modelling statistics as required and rather appears used numbers from an unrecognised (and unreliable source).

(7) I object as a person who has COPD to the poor air quality which will be exacerbated in the area by such a development, Young and Old are extremely susceptible to poor air quality.

- It is clear that air quality is deteriorating largely due to the emissions from the traffic. I believe that the impact of poor air quality on the internationally famous RHS Gardens at Wisley and the Thames Basin Heath Special Protection Area is already in excess of legal limits.

(8) I object because in my opinion the transport assessment makes a number of ridiculous assumptions and is not credible. It is completely unrealistic to assume that there will be a decrease in vehicle movements after completion of this development, and there will no impact on traffic for the recently added secondary school, nor from the fact that prior to the school being built the children living on site will have to be transported to the nearest available school in Leatherhead – adding to congestion and pollution, and there will be no impact shown for the 270 daily bus movements which will impact local roads further, or for the waste lorries or HGV deliveries to the site.

The traffic counts bear no relation whatsoever with counts submitted to Guildford or to Woking borough councils in support of other large development projects.

(9) I object because the number of daily trips is understated in the region of 1000 vehicle movements. Additional traffic will have a negative impact and cause irreparable damage to historic houses and other buildings in Ockham, Ripley, and Downside and further afield. If allowed, the impact of the additional traffic may prohibit other developments further south on the A3 or indeed those planned by the RHS.

(10) I object because the site is in the Green Belt in a rural location, hemmed in by the A3 to the west, the Special Protection Area and the M25 to the north and the Conservation area of Ockham Village to the south. Green Belt boundaries can only be changed in the local plan process and in exceptional circumstances. The applicant has not demonstrated that exceptional circumstances exist.

(11) I object because the four and five storey buildings are not appropriate in the rural environment. Residents will be crammed in with little outdoor space, in a noisy location with very poor air quality.

(12) I object to the proposed closure of local road, coupled with the massive increases in traffic, will effect us & a large number of other road users from Cranleigh to Cobham and everywhere else in between. We regularly have to use Ockham Lane to avoid the chaos on the A3 when picking up our Grandchildren from school in Cobham.

Further, Ripley- The traffic data suggests fewer vehicles (15-28% less than today) on Portsmouth Road/High Street and Newark Lane. This information is flawed. We are daily subjected to queuing traffic on the Portsmouth Road, and as Senior citizens have given up in crossing this road to take our walk through to Polesden sailing club.
More traffic queuing in Ripley High Street will increase levels of NOx and NO2 pollution, possibly beyond EU limits.

- Additional traffic accessing the A3 will lead to longer journey times and additional driver stress.
- The closure of Ockham Lane to vehicles will result in your separation from schools, doctors surgery etc. resulting in longer journey times and delay (via Old Lane/Forest Road or Old Lane/through the development, Ockham Road North to Horsley)
- More noise and dust pollution through the 12 year build resulting in loss of amenity - Loss of country footpaths and bridleways which become rights of way through a densely populated settlement.

--- Traffic assessment does not include the A245 or Painshill junction despite the fact that it is likely that these roads will carry significant additional traffic.

We already have had to choose to curtail early appointments at the Village Surgery Send, because of the traffic build up at the Burntcommon Roundabout.

**Answer (if comment is on questions 1-7 of the questionnaire): ()

I object on so many levels, all have been well documented by others, but most particularly on the scant regard given by both Unis and SCC Highways in mitigating the impact of traffic increase on both A31 Hogs Back and the A3 by-pass. The University have consistently falsified their own projections on traffic increase and will continue to do so if this development goes ahead. Since the initial development of Manor Farm they have denied any increase in traffic above some minimal and notional percentage to Egerton Road, despite the recent vast redesign of the junction with Manor Farm and continuing increase in traffic volume since. With the addition of the Sports Centre, The Park and Ride and now the Veterinary Centre, Unis claim there has been no increase in traffic volume, how can they be believed on any future projections supporting their own development. Any future increases to this road system will have profound implications on the RSCH access and represents a significant danger in emergencies, all of which appear to be given scant regard in the pursuit of their own and GBC's financial gain. Why cannot they fulfil their own quota of accommodation build for which they already have planning consent? Or are they a special case to be treated differently from individuals or less influential bodies? I thought we lived in a democratic society.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We wish to most strongly object to the removal of Chilworth, or ANY Surrey village, from the Green Belt under your proposed Local Plan.

We question why Surrey village and other residents should have their lives adversely affected and probably be exposed to those profiteering vandals known as property developers just because National Government has failed to implement/control any sensible immigration/population policy (despite promises!). The thinking is profoundly wrong. We should be actively controlling and reducing population (reducing demand) in this tiny island rather than insanely attempting to disproportionately increase housing (supply) to the detriment and discomfort of everyone, especially as we have no hope whatsoever of increasing adequate infrastructure.

We therefore ask you please, just for once, as our Council, to 'man-up' and actually support the wishes of your own electors and fellow Surrey residents and say 'NO' to National Government demands on this. Be a bit defiant for a change! Do you want Surrey covered in concrete? Don't you CARE?

With luck the EU Referendum result might ease the problem.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I support the policy for retention of allotment land at Aldershot site. This is very important for people with mental health issues, obesity, healthy living and encouragement children to take an interest in gardening. At Aldershot road site we have a school plot which got a gold medal in Guildford in bloom in 2015. There is a self-help group WASHA which helps families, elderly people and anyone who is struggling with their plot.

My grandchildren love going to the allotment to pick fruit and vegetables, also looking for wildlife, pond creatures, hedgehogs, slowworms and the green woodpecker. It is very important that we still have the lower vehicular access as it is quiet on dangerous walk around for children. I support Policy I4 (Green and Blue infrastructure) as it is enhancing biodiversity, allotment needs to be included in the list of green spaces in the definition of “green and blue infrastructure” in paragraph 4.6.31 of the draft plan (page 116)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to express my deep concern and anger over the recent new building proposals for Send.

I was saddened by and strongly object to Send being removed from Green Belt status. This will permanently alter the character of the village and will only open the way for yet more building development in the future. One of the main reasons we have chosen to live in Send is the fact it is surrounded by fields which gives it its rural status. With building on the Green Belt land our village feel and status will be irreversibly lost. Green Belt is exactly what it says it is and is there to protect the nature of places, provide open green spaces and enhance the lives of those that live there. Once lost, it is lost forever!

I am very concerned and strongly object to the way Guildford Borough Council have tried to 'sneak' these plans through without proper consultation. Significant changes legally require full consultation under Regulation 18. Since the last consultation major development proposals have been added to the plans and the council are obviously trying to quietly push them through. The 2014 proposal for 430 houses went down to 185 in April 2016. These have now gone up to 485! Every major site proposed for development in Send has been changed and a massive new road junction added on. I am disappointed in the council's approach which has been very underhanded and dishonest to the people of Send.

Send already struggles with the large amount of traffic driving through the village which often results in long queues and tail backs. The infrastructure will not be able to cope with all these new building proposals. You cannot just take a small village and dump hundreds of houses and large industrial developments onto it and expect it to work. There are not enough school places, it is already extremely difficult to get a doctor's appointment at the medical centre, the roads will be permanently grid locked and the status of village and village life will be gone forever. We do not wish to be an extension of Guildford but wish to remain a separate village with our own identity.

I strongly object to policy A43. 30ha Land at Garlick's Arch. There is no need for more houses on top of the 13,860 already proposed by the borough. It is Green Belt protected by the NPPF which prevents the merging of settlements. It is covered in ancient woodland with trees dating back to the 16th century and once lost, is lost forever. The latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. Therefore the proposed industrial development of 7000sq m is not needed. The obvious place for any new industrial development is at Slyfield, Guildford - an industrial site already set up and running. There would then be no need to have to build a new 4-way interchange onto the A3 at Burnt Common to serve this industrial development. Surely saving money!

I was shocked by and strongly object to the policy A44. 1.9 HA Land West of Winds Ridge and Send Hill. This has been designated for 40 homes and 2 traveller's pitches. Where has this come from? It was NOT included in the regulation 18 draft and has NOT been previously consulted on. This is an area of unspoilt natural beauty and should not be destroyed. The subsoils documented as containing unsafe land fill waste which is currently vented, thereby making it unsuitable for development. Anyone visiting the village will be aware of the enormous volume of traffic it experiences daily especially during morning and evening rush hours and school drop off and collection times. The junction at the bottom of Send Hill already struggles to cope. Adding yet more houses and traveller pitches (with caravans) will make this junction impossible to cope and dangerous. Send Hill is a narrow width single track country road and certainly not built for so much extra daily traffic. Surely common sense dictates this is not a sensible idea.

Thank you for taking the time to read my concerns. Please do not allow Guildford Borough Council to 'sacrifice' the village status of Send with its beautiful surrounding countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I write to object to the Draft Local Plan (DLP) and in particular the proposals as they apply to East and West Horsley and the surrounding area.

I regularly visit my daughter and her family in East Horsley, and consider that the proposals for development and in relation to the road infrastructure in the area will have a significantly bad impact on traffic flow through, and access to the village. The roads are narrow and winding and already suffer from regular congestion, particularly if there has been an accident or breakdown on the M25 or A3.

The proposed new interchange at Burnt Common will simply encourage more vehicles to attempt to bypass any traffic jams by using the local roads. Such traffic is also likely to cause problems with speed and risk-taking, which increases the danger for pedestrians and cyclists, including children walking or cycling to and from school.

Additionally, the proposals in relation to the Wisley Airfield site and other local housing developments will add significantly to local road use, particularly at peak times. The DLP envisages some 533 new houses in the Horsleys, plus in excess of 2000 new houses on the Wisley site, the likelihood is that the majority of these new homes will be households running at least 2 vehicles. There are already difficulties at Effingham cross-roads, Effingham Junction and in getting into Cobham, all of which are regular routes for commuters and for the school run. The local roads are not capable of absorbing an addition 5000 or so vehicles without adding substantially to the delays and congestion in the area and decreasing the safety of all road users.

I object to changing the status of the land currently within the Metropolitan Green Belt. The National Planning Policy Framework (NPPF) requires that any change of Green Belt boundaries must demonstrate exceptional circumstances. No exceptional circumstances have been demonstrated within the DLP, and to change the status of current Green Belt land would change the character of the area for ever, to the considerable detriment of the Borough as a whole and the local communities.

Please take these points into account and reject the Draft Local Plan as inappropriate for the area. A new Draft should be put forward which properly takes these factors into account.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal to inset Send Business Park from the Green Belt (Policy 2 at paragraph 4.3.15) because:
- It is effectively an old non-conforming user in an area of outstanding natural beauty which will be lost forever with consequent impacts on the quality of life of future generations
- There is highly restricted vehicular access along Tannery lane - in both directions
- Once again, it eliminates the openness of the Green Belt and is inappropriate

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Specifically, I object to Policy A42 change at Clockbarn in Tannery Lane because:
- It will cause extreme congestion at the junction with the A247. Already, at certain times of the day during the working week the whole village is gridlocked. This proposal will only serve to exacerbate the problem
- It will remove greenbelt land which gives the village its 'village feel'
- It will damage open countryside views from the River Wey Navigation and create an eye sore
- It will risk increasing the likelihood of surface water flooding

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 at Burnt Common because:
• It seems unfair to resurrect this idea given all the previous objections resulting in it being deleted from the 2014 plan
• With the increased uncertainty caused by Brexit there is an anticipated decline in demand for industrial land in the South East
• The industrial estate in Slyfield and in other parts of the borough have spare sites and excess capacity
• The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not the proposed huge allocation of over 10 hectares at Send - and in the Green Belt
• Once again, the impact on congestion will be significant

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There seems to be no justification for the size of the increase in the overall housing numbers detailed in the plan which are almost 70% above official national estimates for population growth in the Borough.

I am writing to express my concern over the recent new building proposals for *Send*

I strongly object to *Send* being removed from Green Belt status. This will permanently alter the character of the village and will only open the way for yet more building development in the future. With building on the Green Belt land, our village feel and status will be irreversibly lost. Green Belt is exactly what it says it is and is there to protect the nature of places, provide open green spaces and enhance the lives of those that live there.

I am very concerned and strongly object to the way Guildford Borough Council have tried to 'sneak' these plans through without proper consultation. Significant changes legally require full consultation under Regulation 18. Since the last consultation major development proposals have been added to the plans and the council are obviously trying to quietly push them through. The 2014 proposal for 430 houses went down to 185 in April 2016. These have now gone up to 485! Every major site proposed for development in *Send* has been changed and a massive new road junction added on. I am disappointed in the council's approach which has been very underhanded and dishonest to the people of *Send*.

*Send* already struggles with the large amount of traffic driving through the village which often results in long queues and tail backs. The infrastructure will not be able to cope with all these new build proposals. You cannot just take a small village and dump hundreds of houses and large industrial developments onto it and expect it to work. There are not enough school places, it is already extremely difficult to get a doctor's appointment at the medical centre, the roads will be permanently grid locked and the status of village and village life will be gone forever. We do not wish to be an extension of Guildford but wish to remain a separate village with our own identity.

I strongly object to policy A43.30ha Land at Garlick's Arch. There is no need for more houses on top of the 13,860 already proposed by the borough. It is Green Belt protected by the NPPF which prevents the merging of settlements. It is covered in ancient woodland with trees dating back to the 16th century and once lost, is lost forever. The latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. Therefore the proposed industrial development of
7000sq m is not needed. The obvious place for any new industrial development is at Slyfield, Guildford - an industrial site already set up and running. There would then be no need to have to build a new 4-way interchange onto the A3 at Burnt Common to serve this industrial development and thus saving money!

I strongly object to the policy A44. 1.9 HA Land West of Winds Ridge and Send Hill. This has been designated for 40 homes and 2 traveler’s pitches. Where has this come from? It was NOT included in the regulation 18 draft and has NOT been previously consulted on. This is an area of unspoilt natural beauty and should not be destroyed. The subsoil is documented as containing unsafe land fill waste which is currently vented, thereby making it unsuitable for development. Anyone visiting the village will be aware of the enormous volume of traffic it experiences daily especially during morning and evening rush hours and school drop off and collection times. The junction at the bottom of Send Hill already struggles to cope.

Adding yet more houses and traveler pitches (with caravans) will make this junction impossible to cope and dangerous. Send Hill is a narrow width single track country road and certainly not built for so much extra daily traffic. Surely common sense dictates this is not a sensible idea.

Thank you for reading my concerns.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2345  Respondent: 15433441 / Jacob Green  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Specifically, I object to Policy A42 change at Clockbarn in Tannery Lane because:
• It will cause extreme congestion at the junction with the A247. Already, at certain times of the day during the working week the whole village is gridlocked. This proposal will only serve to exacerbate the problem
• It will remove greenbelt land which gives the village its 'village feel'
• It will damage open countryside views from the River Wey Navigation and create an eye sore
• It will risk increasing the likelihood of surface water flooding

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy A43 change at Garlick's Arch because:
- There is no proven demand for Travelling Showpeople plots in this location
- It will cause the village to be 'over-developed' with the consequent impact on local services such as schools and health services which are already stretched
- It will join up the villages of Ripley and Send into one ribbon development and so defeat the key purpose of having a Green Belt
- It is a flood zone 2 area
- It will cause excessive traffic which will increase air pollution and cause congestion

I object to Policy A58 at Burnt Common because:
- It seems unfair to resurrect this idea given all the previous objections resulting in it being deleted from the 2014 plan
- With the increased uncertainty caused by Brexit there is an anticipated decline in demand for industrial land in the South East
- The industrial estate in Slyfield and in other parts of the borough have spare sites and excess capacity
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not the proposed huge allocation of over 10 hectares at Send - and in the Gree Belt
- Once again, the impact on congestion will be significant

I object to the proposal to inset Send Business Park from the Green Belt (Policy 2 at paragraph 4.3.15) because:
• It is effectively an old non-conforming user in an area of outstanding natural beauty which will be lost forever with consequent impacts on the quality of life of future generations
• There is highly restricted vehicular access along Tannery lane - in both directions
• Once again, it eliminates the openness of the Green Belt and is inappropriate

I OBJECT to Policy A42 (building 45 houses at Clockbarn) because the roads are completely inadequate for the increase in traffic volume this will cause. Tannery Lane is a very narrow, windy, country road which has a hazardous junction for emerging traffic with Send Road. There is already planning permission for 64 houses and a new Marina which is going to generate too much heavy traffic as it is!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT to Policy A43.30 the proposed development of Garlicks Arch designated for 400 houses and an industrial estate. This is a new site and has not been consulted on previously. This is not only permanently protected Green Belt, but also a site of ancient woodland containing trees planted in the 16th century, and serving as a rich habitat for wildlife and plants. The industrial development of this site is completely unnecessary. There is a more appropriate site ready and available at Slyfield. There is also a history of flooding in this area.

I OBJECT to Policy A43.30 the development of a new four-way interchange onto the A3 which would mean that the narrow Send Road (A247) would be the main route for traffic leaving the M25 and A3. It is already overcrowded and vulnerable to traffic jams and this proposal would be an utter disaster for Send and Ripley villages. Further traffic from this development would result in gridlocked roads. Send will be the through route to Woking for traffic leaving the M25 at Junction 10, the new houses proposed at Wisley, and the new development proposed at Burpham – our roads cannot cope with this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the 2016 Draft Local Plan by Guildford Borough Council (GBC) for the following reasons:

I OBJECT to the removal of Send from the Green Belt as the village provides a necessary ‘buffer’ between Woking and Guildford.

I OBJECT to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban brownfield areas, much closer to existing transport hubs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp173/347  Respondent: 15433473 / Kay Webb  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I strongly object to the over development of my village and our insetting from the greenbelt. Send has been disproportionately allocated additional development in this submission even though the overall housing numbers have been reduced. It seems that as a village we raised the largest amount of objections, but GBC have ignored us and instead dumped even more housing/industrial development on us, which will result in us being even more gridlocked with traffic and pollution and our village losing its identity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/2625  Respondent: 15433473 / Kay Webb  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43, Garlick’s Arch, Send Marsh; Despite 1000s of previous objections this site is still being proposed for development. This a site of ancient woodland and a beautiful area of green belt - no exceptional circumstances exist that should allow for this area to be built on. The increase in traffic from the 400 homes on its own will cause gridlock on our already overburdened roads, but in conjunction with other proposed sites in Send and the surrounding area is just madness.

I object to the allocation of 6 travelling showpeople sites in Policy A43, Garlick’s Arch. There is no proven demand for Travelling showpeople plots in this location, and combined with Policy A44 Winds Ridge, we will have a total of 8 of these plots - this is too much for our area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to **Policy A58**, Land at Burntcommon, London Road. This was previously deleted from 2014 draft because of all previous objections made but has now been included again with a change in wording from ‘up to 7000sqm’ to ‘a minimum of 7000sqm. This potentially opens up this site to unlimited development (the site is over 90,000sqm) when there is no justification for industrial development in the borough, especially on green belt land. This site will also create even more traffic gridlock for Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to the continued inclusion in the Guildford Borough Council Proposed Local Plan (June 2016) of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the inclusion of FWA/TFM in the draft Local Plan for the following key reasons: 1) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt.

The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. FWA/TFM is prime green belt, and was given to the country for an airfield as part of the war effort, based on the promise that the land would be returned to the community after the need for an airfield had passed. This promise has been broken, and no effort has been made to see whether there is a moral or equitable duty to return this land to the existing community.

- I object to the disproportionate allocation of housing in this particular part of the Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham (of which I am the Rector) and the blight on properties th The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

  1. The assertion that the development will result in a meaningful shift to cycling and walki The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

  6. The lack of suitable public The local rail stations of Effingham Junction and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted level. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation. In particular, two schools should not be planned in the FWA/TFM area which is known to have poor air quality, which will only be exacerbated by the planned development.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 3th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this 1 Those reasons remain valid, and there are no adequate ways to overcome them.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment. I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being broken.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans. It also fails to take into account the new situation due to Brexit, a factor which makes the draft Local Plan now appear hopelessly out of touch.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsley's (of which 65% is allocated to FWA/TFM, an area that at present has only 3% of the population of GBC).

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the disproportionate potential distribution of new houses across the Guildford Borough: the villages to the North East of Guildford are projected to take an unsustainable number of additional residents in a area where country lanes are narrow and the volume of traffic already using through routes already makes roads gridlocked during the rush hours. Your proposals do not show the effect on local roads - in particular the A247 and Potters Lane

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the removal of villages from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am a resident of Send Village and would like to express my concerns regarding the proposed development contained in the above plan.

I feel strongly that the development of villages is best achieved via the Neighbourhood Plan process which allows residents to determine an organic growth for any additional housing according to the needs of the village.

I therefore object to Guildford Borough Council determining the rise in the annual number of houses to be built each year: it would appear that the projected number of houses to be built has been overestimated by 30% which must surely be put down to financial gain rather than social need. This is a totally unrealistic number of houses for narrow country lanes to absorb.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
In the Surrey Advertiser article, I believe the Earl of Onslow committed that he would undertake to provide a high quota of affordable housing and retirement homes if any development were allowed to proceed. In addition, he made a commitment to build a school to serve the new community. All these facilities and services are compelling and in high demand locally.

Another benefit of Clandon Park is the traffic and infrastructure in the area is strong as it was put in place to support a growth if traffic from the original development of the golf club. Sadly, something that never happened but the roads are at least in place. The other benefit to this site is the existing park and ride which is a fundamental advantage. It demonstrates that the site is excellently located for transport and also that the site has already been identified as suitable in principle for development.

From the review of the Local Plan some of the other sites would seem to have disadvantages and material infrastructure issues and are also prone to flooding. Surely the events of recent years and the devastation caused by floods in areas where development has proceeded without full consideration of the flood risk must teach us all lessons. My understanding is that the Clandon Park area is not a flood risk area.

Clandon Park (as described in the Surrey Advertiser) would be developed as a Village garden community and consistent with the aims and objectives outlined in important government policy. No other site meets these criteria. The need for a solution to the local housing shortage as soon as possible is another major advantage of the Clandon Park site. The sites mentioned in the local Plan all seem to have long lead times before development could start and further delays need to be avoided if possible. Moreover, it would seem to me that there are fundamental uncertainties attached to the development of the other large sites which might preclude material development. For instance, the refusal of the Wisley planning application states that there are still "fundamental" problems with the highways. It would seem to me from a cursory knowledge of Clandon Park that it has no "fundamental" problems and it would seem sensible for GBC to include the site for the certainty of deliverability.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A24

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

A24 - SLYFIELD REGENERATION SITE

- This is a brownfield site and as such clearly from that point of view is a preferable site
- The previous use of the site (sewage and landfill) suggest material environmental issues which at the very least is likely to mean that there will be no development of this site in the next few years.

I hope that the Local Plan can proceed as soon as possible and that much needed affordable housing, specialist housing for the elderly and schools for our children can be developed. Having read the Surrey Advertiser article and hearing the commitments from the Earl of Onslow I feel Clandon Park Gold Club site would offer so much and the loss of a local golf course whilst disappointing is probably also inevitable.

### A25 GOSDEN HILL FARM

Transport and environmental issues would delay development. In particular:

- New juncture on A3 - expensive / disruptive / long lead time
- Provision of new railway station - expensive / very long lead time
- Other infrastructure issues - expensive / disruptive / long lead time
- There are flooding issues / draining issues
- Boundaries require sensitive design and are not consistent with government policy of ensuring that any boundary changes to the green belt will have a degree of permanency
- There are tree preservation Orders in place

### A26 BLACKWELL FARM

Transport and environmental issues:

- Traffic: Significant traffic issues which bring into question the timing of commencement of development
- Rail: Requirement to contribute to network rail. I sense this can take many years to agree and implement
- *location: The location is not bordering to the town
- There are flooding issues / drainage issues
- Boundaries require sensitive design and are not consistent with government policy of ensuring that any boundary changes to the green belt will have a degree of permanency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**A29 ASH AND TONINGHMAM**

* Village extension: The plan envisages a rather ad hoc village extension. Preservation of the integrity of villages is generally recognised as a paramount objective of the green belt and therefore including this site seems inappropriate. This is particularly so as the "site' actually consists of 8 separate sites

* Flooding and drainage issues are significant, and will require co-operation of adjoining land owners, that may not be forthcoming, and which are likely to delay the commencement of any development

* Boundaries require sensitive design and are not consistent with government policy of ensuring that any boundary changes to the green belt will have a degree of permanency. Of course as there are 8 separate sites, there are 8 boundaries that need to be considered

* Rail - There is a requirement for a new road bridge and level crossing - again this will impact on the timing of the commencement of development

* Traffic - significant traffic issues, including roads between the 8 sites

* Ownership - The 8 sites are under "multiple ownership".

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
A35 WISLEY

- Schooling: Highly questionable education plan which involves busing in children to secondary school - surely hugely undesirable from the point of view of children / parents / highways.
- Traffic - Fundamental problems (as detailed in the rejection of the planning application). At best, highway solutions will take many years to resolve and implement and any solution that is identified will be imperfect. It is quite plausible that no viable solution will be found. It seems unlikely that a proper and timely solution will be forthcoming.
- Buses - a significant bus network will be required to access railway and other transport links. All highly problematic: it will add to traffic on roads, many of which are already over congested. Developer is meant to fund costs going forward - how will this be secured?
- There are flooding / drainage issues.
- Boundaries require sensitive design and are not consistent with government policy of ensuring that any boundary changes to the green belt will have a degree of permanency.
- There are noise and air quality issues.
- Part of site is allocated for waste use and it is not clear.
- The development of the site would lead to the loss of 13 hectares of "the Best and Most Versatile agricultural land.”
- There were 7 representations in favour of the One positive that was identified was that the development meant that village expansions would be avoided.
- There can be no certainty about whether the site can ever be developed and even on the best scenario commencement of development is certain to be many years hence. The location and sustainability of the site are both questionable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

A46 NORMANDY / FLEXFORD

- This is a village development / village extension and as such is inconsistent with national policy which favours leaving the integrity of villages intact. The universal opposition of the inclusion of this site from local villagers is entirely understandable.
- The boundaries will require sensitive design and are not consistent with government policy of ensuring that any boundary changes to the green belt will have a degree of permanency.
- There are flooding / drainage issues.
• Infrastructure issues - These will clearly take considerable time to resolve bringing into question the possible commencement date. In particular, the traffic increase through the local villages will be significant.

• Listed buildings and ancient wood lands complicate the development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Ockham. As someone who worked for 20 years in museums and the historic environment, I am particularly concerned about the threat posed by the Local Plan to the rural village of Ockham, which has many fine listed historic buildings including the Grade I listed All Saints Church. The Plan calls for a small village of 159 residences with a low level of public amenities to be subsumed into a development including over 2,000 dwellings. In addition, many of the proposed buildings are high density dwellings up to five stories high, making them completely inappropriate for a rural area such as Ockham and its environs.

I hope that these objections will be fully considered by the Council and that the former Wisley Airfield (Three Farms Meadows), Allocation A35, will be removed from the Local Plan with immediate effect.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to make the following objections to the draft Local Plan:

**Green Belt.** I am very concerned about a plan which proposes that over 70% of new housing be built within the Green Belt. Priority should be given to building on existing brownfield sites before encroaching on Green Belt land. As a resident of Hertfordshire, I am well aware of the threat posed by the destruction of the Green Belt around London and believe that this should be preserved wherever viable alternatives for development exist.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to the Guildford Borough Council Proposed Submission Local Plan: Strategy and Sites (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadow (TFM) – Allocation A35 for the phased development of a new settlement of 2,068 dwellings

Although I am not a resident of Guildford Borough Council, I often visit my aunt and uncle in Ockham and enjoy the beautiful, unspoilt nature of the village and the surrounding area.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
Objections to the continued inclusion in the Guildford Borough Council Proposed Local Plan (June 2016) of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation 35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the inclusion of FWA/TFM in the draft Local Plan for the following key reasons: 1) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt.

The site serves a vital role in protecting against urban sprawl from London.

Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. FWA/TFM is prime green belt, and was given to the country for an airfield as part of the war effort, based on the promise that the land would be returned to the community after the need for an airfield had passed. This promise has been broken, and no effort has been made to see whether there is a moral or equitable duty to return this land to the existing community.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsley’s (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties theret. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the detrimental impact on transport, local roads and road safety I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

2. The increased volume of car traffic proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

6. The lack of suitable public transport. The local rail stations of Effingham Junction and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation. In particular, two schools should not be planned in the FWA/TFM area which is known to have poor air quality, which will only be exacerbated by the planned development.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Those reasons remain valid, and there are no adequate ways to overcome them.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/6513  Respondent: 15433697 / Beniah Grear  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016)

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being broken.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans. It also fails to take into account the new situation due to Brexit, a factor which makes the draft Local Plan now appear hopelessly out of date.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   ◦ The associated traffic increase from the RHS has not been taken into account.
   ◦ The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
16. I object to the removal of additional 3.1 ha from the green belt without any justification
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.
26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose. Indeed, in ordinary words and common language, I believe that this draft local plan, and these revisions, in totality, but in particular relating to Three Farm Meadows are “bonkers”!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
OVERESTIMATED HOUSING LEVELS BY GBC

The Plan is Flawed from the building of this SEVERELY OVERESTIMATED housing, of 693 houses by the SHMA, DOUBLE the figure given 4 years ago, and now due to BREXIT this figure needs to be massively reduced and no doubt will be. The number of immigrants needing housing has reduced due to Britain leaving the EU. I believe the GBC local plan should take the public's wishes in the Brexit vote to reduce the number of houses as Waverley Borough Council did, but they gave an OVERestimate of what housing needs will be. This is not acceptable to the residents of Burpham whose lives will be ruined by the dumping of unnecessary development all in one place on our beautiful country surroundings. The GBC have refused to release how the estimate has been calculated - their report is unaccountable and therefore should be considered unsound.

This Disproportionate Level of Development Is USUSTAINABLE. The unique identities of Send, Ripley and Burpham will be lost, and the wildlife of the countryside separating the villages in the Green Belt should have overriding priority over the greed and corruption of the Property company Martin Grant. The GBC planners who obviously do NOT put the needs and views of the people they were paid and elected to represent first, nor the legacy of the RURAL FARMING land we wish to leave to future generations UNSPOILED, not an urban sprawl of new low income housing estates and around 10-100 travellers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3043  Respondent: 15433793 / Jennifer Morris  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Councils housing estimate needs are flawed and should be massively reduced in the way Woking and Waverley council has applied constraints to overall Housing growth.

Especially in light of Brexit the figures for housing needs now need to be recalculated before this unnecessary development of 2000 houses at Gosden Hill goes ahead, destroying the GREEN BELT. The local peoples desire or the communities necessity for a low income and traveller site estate on the Green Belt is absolutely zero.

The National Planning policy Framework states that:

The essential characteristics of Green Belts are their openness and their permanence.

The Local Plan does NOT give sufficient evidence of exceptional circumstances to justify allocating Green Belt land at Gosden Hill, an ancient forest with massive importance to conservation of wildlife, and local residents and future generations pollution, noise and quality of environment for unnecessary development.

Instead more consideration can be given to brownfield regeneration, homes in the town centre instead of retail which is becoming less needed as internet shopping takes over for most people. More Student housing can be built on campus, it is not needed out in the countryside many miles from the University.

The proposed 2000 houses dumped on Gosden Hill would have a devastating effect on Burpham and must be thrown out. A Park and Ride for 1000 cars, 2 schools - unfunded by govt plans, and a train station also not planned for in Wessex railway.
plans are going to put an atrocious level of congestion and pollution all on the area of Burpham. Clay Lane is proposed in the plan as the only way for 3000 cars from Gosden Hill Site to access the A3 northbound. Putting this level of traffic through Burphams already busy centre would be fundamentally flawed and the only solution would be a 4 way intersection at Potters Lane A3.

This, along with the Tunnel to ease traffic congestion in Guildford are not on the plan.

A decision on the tunnel is needed before Gosden Hill can be earmarked for housing development.

The council used flawed data, an unsatisfactory consultation period, and lack of evidence for alleged housing needs in the future therefore the local plan is UNSOUND and must be refused.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this the most on the grounds that the natural surroundings that I live in and have existed in the ancient woodland at Gosden Hill would be destroyed forever by greedy developers who have NO regard for the lives of deer, birds, myriad other animals who live in the hedgerows that they want to kill. The green space to the immediate rear of my house would be destroyed and turned into an urban sprawl joining Guildford to West Clandon, with total loss of wildlife in an unimaginable slaughter by traffic on the roads.

[Summary of redacted paragraph: Objection to 2000 houses and facilities for 9 traveller sites - it would be detrimental to the area; and the proposal has the potential to increase tension between the traveller and non-traveller community which would result in social, economic and environmental impacts]

The traffic alone that would have to come through the village to rejoin the A3, would cause pollution to rise over 30%...causing huge damage to the health of residents, many of them elderly and children of Merrow Lane and Gosden Hill Road. The damage to the environment would be irreversible and extreme.

I object to Guildford borough Council’s draft Local Plan June 2016 on the grounds that it is unsustainable and based on unsound data; insufficient consulting periods and flawed data have been used to come up with the Local plan, it is therefore UNSOUND.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
1. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

2. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

3. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

4. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I object to Send Village being removed from the Green Belt

As I understand the Green Belt was always intended to be kept as such to provide a division between Villages, towns etc.

- I object to the building of 45 houses at Clockbarn Nursery. Tannery Lane has an exceptionally narrow and winding road, in places only room for one car and if you meet a lorry there is no room for maneuver. Also a very hazardous junction coming from Tannery lane to join the Send Road, the sight vision is dreadful with parked cars either side of the junction onto the main road.
- I object to the building of 400 houses and an Industrial space at Garlick’s Arch. This site in particular is covered with woodland and pasture and certainly never intended for building purposes. The site floods dreadfully, water coming off the A3 into the stream which then floods the fields. We have photographic proof of this as it is Cobham Sporting Gun Club site and has been for the best part of 30 years and floods often. The Industrial proposal should be sited at Slyfield which would be ideal to extend and keep in one place.
- I object to the development of 40 houses and 2 pitches on Send Hill called the Paddocks. Again access to this site is very narrow especially from the Cemetery down to Potters Lane where that junction is often a cause for concern the way the traffic speeds along Potters Lane and again an inappropriate place for houses and travelers site.
- I object to a new interchange with the A3 at Burnt Common very The traffic now if there is a problem on the M25 or A3 is horrendous through the villages of Ripley, Send Marsh and Send and we become grid locked with traffic finding alternative routes out of the congestion. The roads are not capable of taking on all the extra volume of large lorry’s, which is what would happen. We had to have an Air Ambulance land on Send Marsh Green last week for an accident and part of our road was closed diverting bus and large vehicles around the Green causing havoc, we cannot support all this extra traffic, its spoiling our lovely English Villages here in Surrey.

Let’s not ruin our lovely countryside when there are a lot of Brown Sites to consider first … WE DONT WANT TO BE JOINED TO GUILDFORD / WOKING etc.

What consideration has been taken for Dr’s, Schools, Colleges, Transport
Leisure etc.?
All these things require a car, bus, train, coach which again add to the volume of traffic at rush hours

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to building on the Green Belt in any of the designated areas, including Wisley Airfield, Burnt Common and in Send.

I object to the proposed number of new houses in an area where residents experience traffic congestion every single day, where I have to drive my husband to the station at Effingham Junction as there are no parking spaces for his car by the time he leaves after 9.30am, where it already takes two or three days before a doctor's appointment is available in East Horsley, and the Waitrose car park in Cobham already has a daily queue for entry which blocks the approach road. Cobham, Ockham, the Horsleys and Ripley are already at capacity for the road and support infrastructure.

In the meantime if we choose to go to Guildford to support the Farmer's Market the traffic getting in and out is painful. Last weekend I had to complete my weekend meat order by calling in at the butcher's in Bramley. The A281 back to Guildford was solid so I went via Godalming and there was a roadworks diversion on the Charterhouse road. I sat in traffic for an hour trying to get home to Cobham. Compton was at a standstill. There are already too many people here!

I have lived in Ockham for 37 years and the quality of life has diminished here in that time along with the air quality due to the increase in traffic jams on the A3. Your local plan does not make life better for the residents who have been paying GBC Council Taxes for many years - we get less for more money.

In the meantime Guildford Town centre has great capacity for residential development in the hideous and dirty car parks around the cinema for example. I went there when the cinema in Esher was being refurbished and had the worst cinematic evening out in my life. To have a drink before the film we crossed a three lane road to the nearest hostelry on an earsplitting roundabout, and the pub floor literally squelched with spilt alcohol and stank. I was embarrassed to have brought foreign guests to the "City" of Guildford which seemed as poor and shabby as a Third World country. North Street is like Belfast in the 1970's. Spend our money on smartening up your town before you concrete over our Green Belt!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The roads are small, narrow and unclassified and as such the plans for a large scale development would result in a road system that would be unable to cope.
2. The area is known for flooding and sewage problems and as a result these facilities would be unable to cope.
3. There is a large selection of local secondary schools, many that are under subscribed that would render any planned secondary school as unnecessary.
4. The area is an historic green belt area and a large scale development would spoil this for future generations.
5. The village of Normandy provides us with a true village feel that would be lost with a development of this size.

I hope you will consider my objections to the proposal at A46 on the draft local plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The local infrastructure is already under great strain. The schools are full and medical facilities are sorely stretched. The volume of traffic is extremely heavy and way beyond what a rural village shround be expected to bear. The roads are totally inadequate for the volume of traffic and numbers of heavy lorries which use the B2037. Existing pavements are too narrow and pedestrians are constantly at risk from vehicles which are far too big for the local roads or from vehicles which travel much too fast through the Horsleys. There is little or no scope for expansion of the current infrastructure.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The "objectively assessed need" figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable. Why is this so?

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The development will generate in the region of 6,000 vehicles which will pour onto the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced by a Greenfield site?

There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the loss of rural employment (Policy E5).

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to (POLICY H1 – Homes for all). Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim to be necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT as this is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision for the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion development will cause to the trunk roads A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ or the land to be taken from the Green Belt. Once taken the green belt is lost forever!!

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1  I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and West Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

2. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

3. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and why were Councillors not allowed to scrutinise it? The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500
units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clendon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on but there is no schedule for Garlick’s Arch (A43), so the Plan does not take no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The SHMA report more than doubles the figure of 322 used in previous plans.

This figure cannot be verified because the council will not publish the SHMA report. There is a lack of transparency which is not right for consultation on the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3048  Respondent: 15434273 / Brian Crosby  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

5. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is currently protected from development as Green Belt.

The Plan states the preference is to use of previously developed land, but

GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch, however, the Plan’s preference states that previously developed land should be considered first.

There are no planned increases in schools or Doctor’s surgeries.

The local secondary schools are already too full for local residents to gain access to – our children’s allocated school was a 40 minute bus ride away which is why I ended up paying for private education!

It is already virtually impossible to get an appointment at our local Doctor’s surgery in Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43) since there is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed but that site was removed from the Plan without any reasoning.

Developing Garlick’s Arch would cause the loss of 4 local rural businesses which are successful.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which are clearly sustainable since they have been for there decades employing local people.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done.

The M25 at J10 is blocked virtually every day already but the Highways England includes no measures to improve it before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly.

1. **I object to not protecting the Green Belt (Policy P2)**

Removing Ripley, Send and Clandon from the Green Belt will inevitably result in developments filling in all available spaces between the villages, destroying green belt and resulting in a similar urban sprawl to that created by Woking and its nearby villages all eventually merging into one urban development. The National Planning Policy gives no exceptional circumstances for these villages to be removed.

The Plan should develop the existing **brownfield** site at Burnt Common rather than developing Garlick’s Arch (A43).

**Objections to Guildford Borough Proposed Submission Local Plan (June 2016)**

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016) for the following reasons:

1. **I object to the Local Plan as the development proposed is not sustainable (Policy S1)**

I believe that the number of houses proposed will result in a massive increase in car numbers which will be too much for Ripley, Send and Clandon to absorb. Already the villages are busy at peak times. Ripley and Send do not have Railway stations and bus routes are infrequent so cars are the obvious means of transport for new residents.

I see no plans to improve the infrastructure in the Garlick’s Arch development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the Borough Wide Strategy (Policy S2)

GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough with too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]).

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will result in urbanisation and an inevitable merging of the current the villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the proposed Guildford Borough Council Local Plan application, with the proposal to remove Green Belt status from the villages of Send and Ripley in order to build residential and industrial sites (elements A42, A43 and A44), for the reasons stated below.

I object, as the road network in Send and Ripley, centred on the A247, is barely adequate for the current population of these villages; it is already frequently congested during rush hour. Any population growth or industrial expansion in the area will inevitably result in an increase of traffic, particularly heavy vehicles, which will not only bring congestion to the network, but also increase pollution and noise levels, which will adversely affect the health of those who have chosen to live in a peaceful, environmentally friendly environment.

I object, to the proposed removal of Send Village from the Green Belt. The Green Belt has always been intended to be permanent, this is a requirement stated by the National Planning Policy Framework, and no special circumstances can justify abandoning this requirement now. Send's Green Belt is an essential buffer, preventing urban sprawl and stopping Woking and Guildford becoming one conurbation. There is a very clear commitment from Local councilors and central government to protect the Green Belt and this reneges upon this guarantee.

Developers will be quick to take advantage and the Villages of Send and Ripley will lose their heritage and traditions.

I object, to the proposal to build 400 houses and 7000 sq. metres of industrial space at Garlick's Arch (Policy A43), opposite Send Marsh road. This site is covered by ancient woodland; industrial sites will destroy this forever. The extra industrial space, if required, could be added to the current industrial area in Slyfield, as adding to this industrial area would
have much less impact. As Guildford's housing requirements have been shown to be grossly exaggerated with a refusal to disclose their calculations. With proper use of brownfield sites this Green Belt site is not needed.

I object, to the development of 40 houses and 2 travelers’ pitches on Send Hill, opposite Send Cemetery. The narrow country road does not provide sufficient access, making this an inappropriate location to develop. The subsoil of the proposed site contains documented unsafe landfill waste, as registered with Guildford Borough Council. Guildford Borough Council has already installed gas monitoring wells on the site, since July 2000; one well recorded methane gas discharge. An environmental report by Wasteland Solutions, from March 2004, found evidence of past ponding of water in the excavated area, so any development could disturb the water table and increase the risk of flooding to nearby properties, including my home. As this area is already suffering from congestion, particularly at school times, the proposed number of houses will potentially result on an increase of unnecessary traffic, pollution and noise. Any type of development would spoil an area of natural beauty, resulting in the destruction of a valuable and irreplaceable natural habitat.

I object strongly to the G.B.C. proposed new local plan.

Whilst I appreciate that there is a need for some development there is also a need to protect East Horsley village. The greenbelt is vital for this and any "exceptional circumstances" need to be clearly explained and demonstrated which is not the case. P2

Also, the area cannot cope with a new development at Wisley. Already, the roads are, at times gridlocked, the schools are full and cannot expand, the medical facilities are stretched and the shops and parking are barely adequate now and as for air quality and drainage they would only worsen.

The former Wisley Airfield should NOT be on the draft local plan and I strongly object that, after it has been thrown out by the Guildford Council, that it is still included.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to a totally unrealistic number of houses for the country lanes to absorb.

I object to raising the annual number of houses built per year. With no rational reason given, one must assume these are developers' numbers for financial gain and not for social need.

I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East has taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.

The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

The Plan is self-inconsistent in respect of traveller sites. A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots ...” Clearly A50 more than covers the total “need” of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch.

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, ... (site allocation A25) [ than the Burnt Common site did ]”
2. The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”
Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects: i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!), and ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says: *Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site."

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. That has now been removed, thereby accepting that needing to make greater than normal profit IS to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan."

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object removing Send Business Park from the Green Belt (4.3.15).

Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The local infrastructure is already under great strain.
The schools are full and medical facilities are sorely stretched.
The volume of traffic is extremely heavy and way beyond what a rural village shroud be expected to bear.
The roads are totally inadequate for the volume of traffic and numbers of heavy lorries which use the B2037.
Existing pavements are too narrow and pedestrians are constantly at risk from vehicles which are far too big for the local roads or from vehicles which travel much too fast through the Horsleys.
There is little or no scope for expansion of the current infrastructure
I object to the removal of the Horsleys from the green belt and the proposed developments on the following grounds:

Brownfield sites have not been properly developed.

No sound reasons have been provided for the proposed changes.

I object to the removal of the Horsleys from the green belt and the proposed developments on the following grounds:

Brownfield sites have not been properly developed.

No sound reasons have been provided for the proposed changes.

The inflated number of new houses would result in an alarming increase in the number of Horsley residents, an estimated 35% in an area with an already overstretched infrastructure.

I sincerely hope my objections will be duly noted.

I object to the removal of the Horsleys from the green belt and the proposed developments on the following grounds:

No sound reasons have been provided for the proposed changes.

The inflated number of new houses would result in an alarming increase in the number of Horsley residents, an estimated 35% in an area with an already overstretched infrastructure.

I sincerely hope my objections will be duly noted.
We object to Guildford Borough Councils draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hogs Back at Blackwell Farm which will: • destroy views from the Hogs Back ridge - a nationally designated Area of Outstanding Natural Beauty.

- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt.
- increase tailbacks on the A31 and traffic congestion.
- result in rat running through local roads.
- add to Guildford's pollution.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

The reason we moved to this area was due to the Green Belt area, and these additional homes will virtually make one large new town between Aldershot and Guildford. I don't believe sufficient plans have been made for infrastructure to support this increase, not only for traffic but also for vital services such as doctors and hospital. Local surgeries are already under strain with waiting times of up to 2 weeks for non urgent appointments, this can only get worse. Issues with being able to park in Ash Vale to shop already demonstrate how quickly a trouble free trip to the shops can become a nightmare as it has been impossible to park on some occasions since the opening of the Co Op in place of Budgens, there will be far greater requirements for this type of shopping, and no plans for appropriate additional shops or parking.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
My objection is on the grounds that traffic in the area (particularly along the A323) is already bad particularly in rush hour, and an increase by more than 2400 houses will only worsen this congestion.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Housing
Construction on the Green Belt may not be necessary at all now that housing needs have fallen because of Britain’s imminent departure from the EU.

The council has estimated incorrectly based on flawed data- the SHMA figure has doubled from 4 years ago, and it is wrong on several counts, it fails to correct historical errors, it fails to account for immigration from EU falling to zero after the BREXIT, it is flawed in the way student needs are considered and estimations in job growth post Brexit.

Waverley and Woking Borough Councils are sensibly applying REDUCTIONS to the proposed levels of housing growth, and so must Guildford Borough Council, BEFORE the earmarking of GREEN BELT countryside for development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

As GBC did not properly account for how the reports figures were arrived at, and too short a period of consultation was given the Draft Local plan is unaccountable and therefore UNSOUND.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I very strongly object to the Draft Local Plan June 2016

It is unsound for many reasons but the main objection I have is to the inclusion a travellers site on Green Belt Land at Gosden Hill Farm.

The infrastructure provision for building 2000 houses here is clearly unsustainable and would ruin the village of Burpham, as well as destroying the unique and important separate identities of the villages surrounding the area, West Clandon, Send and Ripley.

[Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it.]

[Summary of redacted paragraph: Objection to the proposal for 9 traveller pitches at Gosden Hill Farm on the basis that: it would be detrimental to the area; Burpham is already an attractive area for the gypsy traveller community without the provision of further sites; and the proposal has the potential to increase tension between the traveller and non-traveller community which would result in social, economic and environmental impacts, as seen at other traveller sites in in Egerton Road, Bannisters Field, Worpleston, Compton and Woking.]

The 30% rise in transport polluting Burpham were the Draft Local Plan to bring about the unnecessary development of Green Belt at Gosden Hill Farm would seem like nothing compared to the actual rubbish tip the travellers would no doubt dump in our gardens, roadsides, green spaces and hedges. The Common Land along Merrow Lane and the beautiful ancient woodland adjacent to the proposed traveller site would quickly and irrevocably be damaged, polluted and become a rubbish tip.

If Guildford Borough Council were to allow this plan to develop Gosden Hill Low income housing estates on Green Belt countryside they would be diminishing the property values of local homeowners, and quality of life of all the residents of Burpham, West Clandon and Merrow to hell. Policy requiring local authorities to plan to meet the housing needs of gypsies and travellers should be axed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
No exceptional circumstances to allow Unnecessary Development have been shown by Borough Council to warrant the 200 house and traveller sites being built on Gosden Hill Farm.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Retail
Retail Space is planned at 40% growth, clearly going against trends in retailing and internet shopping, and Post Brexit economy influences. This is clearly UNSOUND planning. The need for less traffic in the already congested town centre should be given priority over more development. There will be less need for the proposed 1000 car park and ride, not more. Any needed development should be done on BROWNFIELD sites that will no doubt appear in town as the retail sector reduces, NOT on pristine country rural Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Transport-
the following needs are unsupported in the plan:

Evidence of future traffic conditions which is in the SHAR has not been finished and has been provided too late for the PLAN to respond to.

The proposed Sustainable Movement Corridor is unsound, due to narrow roads and pinch points. At Burpham the London Road is supposed to carry 2 bus/cycle lanes north and south bound as well as 2 general traffic lanes each way. This will result in the Gosden Hill development, the 1000 car park and ride, 2 schools and railway station as well as unspecified retail and business traffic proposed to start as early as 2021 delivering massive traffic to London Road/new inn lane junction before the proposed A3 improvements in 2023-2027.
The tunnel, railway station etc issues need to be decided before the building of 2000 houses on the site where the 4 way junction of A3 is planned to go

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object very strongly to the Local Plan proposal to build on GREEN BELT

Top priority should be given to SAVING THE GREEN BELT.

The "EXCEPTIONAL CIRCUMSTANCES" under which Green Belt can be developed have NOT been evidenced by GBC, using the flawed data they have come up with in the Draft 2016 Local Plan.

The destruction of rural land is unnecessary and National Policy attaches greater importance on conserving this precious natural resource for wildlife, free from development and pollution that the plan would bring.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I also do not believe that the Council has given sufficient regard to where all these new inhabitants are going to work. There is little or no employment in these villages, there is very little bus transport, the railways are currently crammed in rush hour with no room for extra capacity and the station car parks are not big enough to cater for more cars. And yet how are people meant to get to work in Guildford, Woking and London as the primary employment centres? The answer will be by car, whether this be by way of a short journey to the station (where they will end up parking on the streets) or a full journey into Guildford (which is already rammed in rush hour). I cannot see how this can sit comfortably with the Council's Green agenda. The Council certainly will not be able to force the bus and train companies to extend their services as these are now privately owned businesses operating for profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6616  Respondent: 15434881 / M G Waugh  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the proposals as many of these sites do not reflect the level of infrastructure in place to support such a volume of housing, from schools to medical facilities, shops, bus services, train station parking and we have seen how many villages in the area have been blighted by the bolt on Council Estates of the post war years - dumped on village back land with no regard to the architectural merits of the development, the local amenities on offer or the employment of the proposed residents. Each site should be considered on its own individual merits under the existing planning regime which has been designed to protect the environment of our rural life and given its particular circumstances.

2. I object to the proposal to build 100 houses on site A39 in East Horsley as it is fundamentally flawed. The plan already recognises that the site is in a flood plain and notes that the flood risk needs to be reduced and that accordingly there is to be no greater flood risk to anywhere else. Surely by interfering with the flood plain at the site doesn’t become viable for 100 houses. The existing proposal by Cateby Land to develop 100 affordable homes here simply does not sit comfortably with any sustainable, accessible or employment rationale. It is building the wrong types of houses in the wrong place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
My principle overarching objection is the proposal to take a number of Surrey villages out of the Green Belt, and East and West Horsley in particular. This proposal in particular will have “urbanisation” implications far beyond those envisaged by the mantra that more houses must be built in the Borough. Whilst I fully accept the need to provide additional housing in the Borough, I do not agree with the drastic actions of removing the Green Belt status in order to be able to provide large scale developments that would otherwise be subject to far greater planning scrutiny.

1. I object to your proposal to remove the Horsleys from the Green Belt. The Green Belt was established for a very defined purpose by statute. It was designed to prevent urban sprawl and to a large extent has succeeded in doing this. It is there for the benefit of not just our generation but those that succeed us. This area not only contains many areas of Outstanding Natural Beauty but also Sites of Special Scientific Interest. The Green Belt enables these areas to be protected in order that the Guildford/Leatherhead/Dorking area does not become a suburban sprawl such as Hersham/Weybridge/Walton on Thames.

2. Large numbers of people visit the Surrey Hills area because of its stunning beauty, villages and leisure opportunities. These visitors in turn support many businesses both large and small whose livelihood depends upon the area retaining its rural charm. You simply have to remember that these people are your citizens, your ratepayers and your electorate and changing the nature of their environment will potentially destroy the uniqueness of their businesses.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Council’s failure to unlock the development potential of brownfield sites in the Borough and the volume of currently unoccupied residential properties in the Borough should be given a greater priority in the search for developable land before ruining the environment, livelihood and well-being of a unique area of Britain.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to:

1) I refer to site A46 in your proposal to build 1100 homes on land that has not been removed from the Metropolitan Green Belt, and exceptional circumstances have not been demonstrated or approved.

2) There are approximately 3,000 resident in Normandy, and the majority of them wish for Normandy to remain a village with the sense of community that brings. We have no need for a secondary school, as both Ash Manor and Kings College, which serve this parish are under subscribed and have room for expansion as and when neccessary. Surely the residents needs and priorities come first.

I also object on the grounds of destruction of the wildlife that live along side is in this area (A46). I have an allotment on Westwood Lane, and know from experience that there are little owls nesting in an oak tree next door, and on walks along the nearby public footpaths, I have seen grass snakes and adders, hedgehogs. toads and slow worms as well as a great variety of butterflies including the small tortoise shell, which is becoming rare. Any large development would destroy all of this.

Answer (if comment is on questions 1-7 of the questionnaire): ()
There is a proposed development for 350 homes to be built at Fairlands- Rokers land with land given for provision of a secondary school there. So why build a school at Normandy? There is simply no need.

And lastly, I object on the grounds that everyone on of us needs wide open spaces, trees, woods and hedges, some peaceful place, and clean air to breathe. So, Normandy can and does provide this, for not just the residents, but also nearby by towns, especially as places like Ash and Tongham which are becoming more and more urbanised. It is often reported in the press by the medical profession that stress levels are immediately lowered by a visit to a peaceful quiet country area, (such as Normandy) so the heath benefits are essential. We do not want to become part of the urban sprawl planned by Guildford Borough council.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Flooding at site A46 has always been an issue in the area, which alone makes it completely unsustainable. Even given the best drainage and sewage systems in the place, all that water had to go somewhere, so its common sense to assume that more residents will experience sewage back-ups and other health issues, and some people else where will will have flooded homes.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I’m writing regards certain issues outlined in the GBC local plan 2017. Removal of the site A46 for 1,100 homes and a school, I fully support, as the impact on the infrastructure and the greatness of so much development would be overwhelming for our roads, water supplies and flood, electricity, gas and the doctors surgery.

Normandy is a small village community and we value our way of life, and the open spaces, woodland, trees and fields, and the wildlife we share these spaces with.

I do object to your proposal to remove certain areas from the protection of the Green Belt, as this measure usually means allowing an insidious growth of development to occur, which again will have an enormous impact on our roads etc. as things are at present, Westwood Lane, and Guildford Road, and Glaziers Lane are under pressure from surrounding houses, development and high density of traffic.

The cost of all these proposals is not just a monetary one, it’s the cost to our health and well-being as well.

Please reconsider removing the Green Belt status from parts of Guildford Road, Glaziers Lane, Flexford, Walden Cottages, and Palm Hous Nurseries Traveller site, as proposed in your local plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()
What are we leaving for a future generation? An urban sprawl, no breathing space and further congestion?

Already we have an infrastructure that cannot cope i.e. Schools, roads, hospital

Move houses in Green Belt means more concrete areas affecting water table, more pollution (air and light) A devastating effect on nature and wildlife. Surely Green Belt was meant to protect all this!

There must be many areas better suited to development, brown sites and military non used land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I wish to object about the draft plans to develop a huge number of houses plus an industrial park on the site of Blackwell Farm on the Hogs Back. Views from the Hogs Back, an AONB, will be destroyed and a large area of farmland will be lost. In addition, extra traffic that such a development would be bound to create, would cause increased traffic queues on the A31, a road already blighted with very lengthy tailbacks especially at peak times.

Sirs, I beg you to reconsider, and reject, this truly unacceptable development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objection to Guildford Borough Council draft Local Plan (June 2016) and to the inclusion in the Plan of Site Allocation A35 - the Former Wisley Airfield - for a new settlement with 2,000 dwellings" We live in Cobham and therefore close to the old Wisley Airfield. Because of that proximity, we are more affected by developments at Wisley than residents in many other parts of Guildford Borough.

We are very concerned that the Guildford Local Plan proposes to remove Wisley Airfield from the green belt and permit the building of numerous houses on it because:

- It is an important green buffer to prevent the spread of urban sprawl southwards.
- The immediate area consists of very small hamlets connected by narrow lanes. Adding thousands of houses on the airfield site would totally change the area from rural to semi-urban.
- Roads connecting to any of the local railway stations are narrow and have no pavements, it would be dangerous to cycle or walk along them, meaning that cars would be used which would dramatically increase the traffic in these lanes.
- Connection to the trunk roads of the A3 and M25 can only be via the roundabout at the North end of Ripley which is already a seriously difficult access going north. Going South would have to pass through the village of Ripley which is already congested at busy times.
- Air quality is already poor here because of the proximity to the A3/M25 junction. Major development here and especially the increase in traffic would make it worse.
- There is much wildlife on the site and surrounding area, some of it endangered, it would be seriously impacted by a major development at this site

Guildford Borough Council recently rejected planning application 15/P/00012 for two thousand houses on this site for the above reasons and the resultant report spells them out.

Please amend the plan to keep Wisley Airfield as part of the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I was appalled to learn that Guildford Borough Council are proposing under their new Local Plan to remove Chilworth, Shalford and Peasmarsh from the existing Green Belt.

As a resident of Chilworth, I am concerned that a village based in an area of outstanding natural beauty (the Surrey Hills) should be removed from Green Belt listing, which will then allow for unfettered development. This area is popular with ramblers, nature lovers and those just wishing to enjoy the peace and quiet of the Surrey Hills. To remove its Green Belt protected status could open it up to mass development, which will then destroy the very qualities which make it such a charming area attracting visitors from all over the country.

Hence, I wish to raise the strongest of objections to the Council's proposal to remove Chilworth and the other local villages from Green Belt protection

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Regarding: 'The Local Plan’

I request that my comments below be seen by the planning Inspector:

I OBJECT to the building of 400 houses and 7000 square metres of industrial space at Garlick’s Arch Burnt Common for the following reasons:

1. My property in Manor Road, Send Marsh where I have lived for 45 years is now classed as being in a flood plain area. This was narrowly spared from flooding in the late 1960s. I feel that the development of the area known as Garlicks Arch will greatly increase the risk of flooding in Send Marsh village which includes my property. The Send stream which boarders the rear of my property carries surface and flood water. Although flood protection improvements were made several years ago in Send Marsh Road, the level of the stream on some occasions can be very high during heavy rainfall. Consequently I am greatly concerned of the risk posed by further surface drainage water running off of a large development / concreted area.

1. Due to traffic at peak times of the day, the junction of Send Marsh Road with the Portsmouth Road can be both difficult and dangerous. Further traffic in this immediate vicinity will greatly increase this already present problem.

1. I cannot understand why Guilford Borough Council wish to deplete the Green Belt within its boundaries instead of prioritising existing brown field sites. The character of this borough is strengthened by having individual villages such as Send and Send Marsh which enhance the beauty of the this part of Surrey. I therefore strongly object to Send Marsh / Send losing its Green Belt Status. Local councillors together with central government gave a promise to protect the Green Belt. Therefore you as a council should uphold this pledge.
I OBJECT to a new interchange with the A3 at Burnt common because of the increase in local traffic including from the proposed 2000 new houses at Wisley Airfield. Additional local traffic would affect the already busy Portsmouth Road and particularly Send Road which is often at gridlock already during peak times.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Fields are available to help people to have access to healthy open spaces - this is helpful in terms of children’s development and mental health improvement for people of all ages.  

The proposed plan is too large and should concentrate on Brown Field sites such as the Wisley Airfield at Ockham which is a concrete/tarmac jungle with noise from the A3. This could be made into a proper village with facilities for families, single people, the elderly and social housing and also a traveller site. Unlike the plan for the rest of the villages where landowners will not take into account with developers on enhancing people’s lives.

Some development is necessary but not in this scale and taking over the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The village of West Horsley is essentially a semi-rural parish of varied size and design homes with few areas of high density housing. The proposed plan to build so many new homes in such density will put so much extra strain on services and resources in the village. Already drainage is overstretched and several areas are regularly flooded.

Parking will be further overstretched particularly at the local station, where it is often impossible to find a parking space, and the village shops. The local schools are already at saturation point and the taking and collecting of more children by car will exacerbate an existing problem of traffic flow.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

A new interchange with the A3 at Burnt Common - I object to this proposal as the increase in traffic would be devastating to Send. Send is already overloaded with traffic and is already frequently gridlocked! An increase in volume of traffic would have an adverse effect on the environment from air and noise pollution, resulting in poorer quality of life!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

40 houses & 2 traveller pitches - again, I object! It is absurd given that Send Hill Road is totally unsuitable; there is not sufficient access, it's already unable to support increased traffic levels. Increased pollution would be detrimental to the residents and environment (not to mention the much needed peaceful ambience of the cemetery), safety to residents would be comprised, and the negative impact to services like the local school and doctors would be significant, need I say more!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Removal of Send Village from the Green Belt - I object as I thought there was a permanent Green Belt protection in place for Send. There is no justification for this. I am concerned for the adverse impact on the area if agreed to as developers will plan to build out, this will result in significant pressure on local services, infrastructure & the environment.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to register my objection to aspects of the local plan effecting the villages of Send and Ripley. My first objection is to the removal of the green belt status of the villages. I have lived at the above address for over 35 years and the area has gradually improved throughout that time. The idea of removing either of these villages from the Green Belt, currently before the planning committee, would be little short of vandalism. The dividing line between Send and Old Woking is already and extremely thin one. The dividing line between Send and West Clandon (the A3) is already virtually non-existent. If new building is allowed to fill the little green belt that remains then yet another urban sprawl will be the result and the people who, like my family, moved out of London to enjoy the green fields of 'leafy' Surrey will be cheated out of the life style they bought into and have paid the premium for.

My second objection is to any large housing development in the area such as the proposal for 400 new houses at the Garlick's Arch site on Burnt Common. Over the years I have witnessed the growing strain on the infrastructure of the two villages. Int he last few years finding a parking space in each has become progressively more difficult. Clearly any significant increase in the local population will completely overload this capacity. This will also put unacceptable strain on the provision of local school places and doctor's surgeries. I do not have any objection to small developments that local services can cope with.

I am, of course, well aware of the national housing shortage and the problems specific to London (successive politicians have done little to be proud of on that score in the last forty years). However, building too many houses in this area will not solve that problem -they will be too expensive for the people who really need accommodation to afford. What is needed are more 'new towns', where the infrastructure can be designed appropriately. What is not needed is the destruction of the nation’s village heritage.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1611  Respondent: 15437313 / Sarah Gooden  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Normandy and Flexford
We are writing to object to Guildford Borough Council's Draft Local Plan. We believe Normandy is unsuited to the sort of expansion proposed. We are particularly concerned by the high levels of development proposed which completely disregard Green Belt protection.

It is clear that GBC has taken no account of one of the major purposes of the Green Belt which is the prevention of urban sprawl. It is important that the rural farming village of Normandy retains its green belt status. No account has been taken by GBC of the concept of "openness" and yet this is one of the main purposes of Green Belt, as evidenced by the Planning Inspectorate in recent appeal decisions (indicating they recognise that land contained in Normandy contributes to the openness of Green Belt).

NEW SECONDARY SCHOOL

We object to the proposal for the 1100 housing development on Land parcel A46 because there is no proven need for a new Secondary School. And without a school there is no need for the associated development plan.

Currently neighbouring Secondary Schools - Kings College and Park Barn - are under-utilised (the latter by 57%). The Head Teachers of Ash Manor School and Kings College have expressed a willingness to expand once they are full. They have the facilities to do this. Secondary Schools to the west of the Borough are under subscribed by 736. Another 480 places will be available at the new Technical Collage (2018) and there are approved expansions at Guildford County School and St Peters. The new Hoe Valley School will have 120 places available per year, 25 places this year not taken (no catchment area). Developments in teaching and learning (independent learning) mean that Secondary Schools could become obsolete in the near future. In addition there is a falling birth rate in Guildford.

Surrey County Council has failed to prove an undisputed need for a 7 Form Entry Secondary School as well as the availability of financing this to make it a reality.

With No Proven Need there can be -

No New Secondary School and Therefore No Housing Development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
ENVIRONMENT

We object to the development proposed by GBC as 20 years of research evidence has shown that the continual fragmentation of natural habitat has caused the dramatic decline of our birds and wildlife species to levels when even our most popular species are under threat. Gardens planned for this development are not enough to combat this decline.

All habitat within or adjoining the parcel of land called A46 are priority habitats under the NERC Act including protected species. Therefore it is vital that this is a key consideration when drafting the Local Plan. However GBC has failed to adequately consider the protection of wildlife within Policy 14.

The following are becoming increasingly rare in the local area:- Hedgehogs, Dormice, Great Crested Newts, Barn Owls, Stag Beatles, Skylarks, Toads, Lizards, Grass Snakes, Adders, Slow worms, Badgers, Bats.

There are vitally important ecological networks (green infrastructure corridors) that surround A46 (namely Ancient and Semi-natural Woodland, Veteran Trees, Hedgerows, Semi-improved Grassland, Farmland and the Stream which flows along the back of Guildford Road properties lining the field at the back of The Old Vicarage, Wyke). These connect to other important and protected sites within Normandy Parish and the wider countryside (namely Wanborough and Normandy Woods Site of Nature Conservation Importance (SNCI), A47 The Paddocks SNCI, Normandy Pond SNCI (into which the stream runs) . Normandy Common SNCI (put forward by the Surrey Local Nature Partnership in 2015), Wyke Churchyard SNCI and Little Flexford SNCI.)

This site is in close proximity (0.8 km) to the European Nature 2000 "Thames Basin Heaths Special Protection Area” that hosts 3 rare ground-nesting bird species in a rare heathland habitat.

GBC should apply constraints when calculating the overall housing target in the Borough because of the TBHSPA (NPPF). GBC has not applied constraints and so are compromising sensitive 'designated wildlife sites and landscapes' for pro development. A46 is an 'unsustainable' development so therefore fails Policy 5.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: PSLPS16/3104  Respondent: 15437313 / Sarah Gooden  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

A46 WAS NOT PROPOSED OR CONSIDERED AS A STRATEGIC SITE IN THE FIRST CONSULTATION

A46 'strategic site', was not previously proposed in an earlier consultation. It is not appropriate development at this stage. In 2014's consultation A46 was 'safeguarded'. It was not removed from the Metropolitan Greenbelt. 'Exceptional circumstances' have not been demonstrated or approved by the Inspectorate. You can't just inset boundaries around pieces of greenbelt, A46/A47/A50 and urbanise them. They must remain Green Belt, according to the recent Solihull ruling. So we object to GBC's proposal to build over Green Belt land with the Local Plan.
In addition there has been no meaningful engagement made or requested from local people. We object to the fact that GBC have not listened to residents and have breached the National Planning Policy Framework (NPPF).

**Sensitivity versus Sustainability**

We understand that two of the key concepts that underpin the Local Plan are: Sustainability and Sensitivity. Individual settlements are ranked on both counts and development is favoured in the most sustainable ones whereas it is least favoured in the most sensitive ones. What is significant here is that for the purposes of assessing Sustainability, Normandy and Flexford have been treated as one settlement which maximises its score on this count - whereas in terms of Green Belt Sensitivity the open area between the two settlements is disregarded which reduces our score on that one. This is simply inconsistent. In fact the original data (used in the first consultation) identified Normandy as one settlement. The data was rewritten in 2014 dividing the settlements in two. Data cannot be changed.

We object to the deliberately misleading and inconsistent calculations used to override our Green Belt. GBC's intention to build 1,100 new homes in Normandy and Flexford shows no objective assessment of the needs of existing residents in these settlements.

Thames Basin Heaths Special Protection Area's SANG Avoidance Strategy is about to expire (2016). We object to the fact that a new Avoidance Strategy for TBHSWPA is not available. There is 'bespoke' SANG on A46 but there is no guarantee the SANG will be delivered by the developer.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**TRAFFIC CHAOS**

We object to the planned development because it will cause traffic chaos and gridlock. When GBC's elected councillors voted through the Draft Plan (on 24.5.16) they failed to scrutinise the Strategic Transport Report - a major piece of evidence. (Adjournment was requested so that this vital piece of evidence could be considered but GBC's councillors failed to allow this).

Surrey County Council's traffic simulations verify that the level of traffic on our roads is already above the capacity that they were designed for. GBC's unrealistic growth plans for Normandy and Flexford will force more traffic onto the already congested A3, A323, C16 and D60. There is no evidence of secure funding for any improvements to the A3 during the lifetime of the Draft Plan.

The already highly congested road network in and around Normandy/Flexford will grind to a halt at peak times causing significant adverse impact to the daily lives of local residents and small businesses. One major existing traffic congestion issue is the railway arch in Westwood Lane which only allows alternate single lane through traffic. It is already hazardous and a bottleneck for traffic at peak times. There is no capacity to change this in the future. The increased traffic will also...
cause a massive increase in exhaust pollution with excessive levels of nitrous oxide and carbon dioxide - threatening the health of all residents.

Traffic Black Spots Near Site Access - North end of Parcel of land A46 (Guildford Rd Junction with Westwood Lane).

Access to any development of houses and I or flats at rear of The Old Vicarage, Wyke would cause increased traffic dangers to an already very dangerous junction at corner of Westwood Lane and Guildford Road where there have been several fatalities.

There is also already heavy traffic at the Wyke Primary School across the road from the same junction.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**GREEN BELT**

We object to the GBC Planning Policy team ignoring the "Openness" of the Green Belt land between Normandy and Flexford (recognised as such in the Green Belt and Countryside Study documents).

Such a large development as proposed would bring with it a huge increase in street lighting which would generate significant light pollution. This would be easily visible from the Surrey Hills AONB ruining the view for all time, for residents and visitors to the area.

Furthermore, Policy 14 also states that "permission would not be granted for proposals that are likely to materially harm the nature conservation interest of local sites unless clear justification is proved that the need for development clearly outweighs the impact on biodiversity". If there was no "alleged" need for a Secondary School in the West of the Borough, the THBSPA and SSSJ would not allow this site to be taken out of Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
In Conclusion - we object to the fact that Green Belt is being eroded by disproportionate 'strategic sites' without secure funding for infrastructure and road improvements, inset villages, insetting, the manipulation of boundaries, using rural exception sites outside settlement areas for the whole Borough rather than 'needs' of individual rural communities.

Guildford and the surrounding village and countryside will be damaged irreparably.

NPPF 17 requires local authorities to 'take account of the different roles and character of different areas, promoting the vitality of our main urban areas, protecting the greenbelts around them, recognising the intrinsic character and beauty of the countryside and supporting thriving communities within it.' GBC Draft Local Plan does not meet the requirement of Policies S2, H3, P6, 04).

USE BROWNFIELD SITES FIRST

It would seem far more sensible to build more homes on Brownfield Sites first. These should be in or near Guildford town centre - close to the station and existing services eg Woodbridge Meadows, Walnut Tree Close and North Street. Normandy’s station is a tiny rural station (Wanborough) which would in no way support the proposed 100% population increase.

It would be better to provide accommodation for 80-90% of university students on campus, freeing up hundreds of homes in the town - instead of GBC’s proposed 60% of university students living on campus.

Redundant retail space should be turned into homes as there should be no need for massive retail expansion in the town (due to traditional retail activity falls resulting from increased internet shopping habits).

We trust that our comments will be considered carefully by GBC before the Local Plan is finalised.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
FLOODING

We object to GBC’s building of 1100 homes in land parcel A46 due to insufficient attention to the significant flooding risks already present in this area.

There is an extremely high water table in the Normandy/Flexford area and no reference in the GBC plans to improve the water/sewerage management. Already there is inadequate drainage in Normandy and sewerage back-flush problems are regularly experienced around Guildford Road and Glaziers Lane.

Every winter the fields in and around Normandy are subject to extreme flooding and therefore unsuitable for building on.

The assessment carried out of the available land takes into account old data regarding flood risk and we question its value.

For a number of years there has been much concern about the high levels of flooding in St Mark’s Churchyard, Wyke and the field at the rear of The Old Vicarage is very boggy ground, subject to extreme flooding. Every winter the land is shin-deep in water and regularly floods some of the properties lining it (e.g. Tanglewood was flooded by the storms of recent years with several inches of water entering car and integral garage).

Stream Through Land

There is a significant stream which flows along the back of the Guildford Road properties that line this field (behind The Old Vicarage, Wyke). This runs very high in rainy weather and regularly flows over its banks.

Building development on this site and area would exacerbate existing and significant flooding problems. There would be far fewer fields to absorb the excess water and the new “hard-standing” would affect even more adversely the general drainage and sewerage, not to mention the strain added by an increased number of users.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I also object to the plans to build a new interchange onto the A3 at Burnt Common to take all the extra traffic going through our village from the proposed developments - not only at Garlick Arch but the proposals for Wisley Airfield, Gosden Hill, Burpham and Blackwell Farm. Send Road and Send Barns Lane is already extremely congested and would become grid-locked.

Finally, I object to the renewed application for 2 travelers' pitches at Send Hill. This road is extremely narrow and the surrounding countryside a favourite walking spot for many Send residents, let alone visitors to the cemetery who would lose the peace and tranquillity of that place should the travellers be allowed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/3097  Respondent: 15437505 / Terri Smart  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

A3 Highway Infrastructure

I OBJECT to the inclusion of land for new on/off slip roads at Burnt Common. These would draw in a huge amount of 'through' traffic from the area and funnel it through the A247 through West Clandon and or the Ripley Road from East Clandon via HM Prison Ripley and Tithe Barns Road. Both these routes are narrow and dangerous and the addition of traffic to them to gain/leave A3 access would be seriously detrimental to both villages, in terms of road safety, road damage and air pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6717  Respondent: 15437505 / Terri Smart  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy D4

I OBJECT to the insetting of villages a.k.a. removal of villages from Green Belt protection. I OBJECT to the insetting of West Clandon, Send, East Horsley and West Horsley which will have a detrimental impact on the openness of the Green Belt and the views in and out of the AONB.

These neighbouring village developments will result in higher density development, additional road traffic and use of infrastructure in our area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6718  Respondent: 15437505 / Terri Smart  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H3

I OBJECT to Rural Exception Homes that would be allowed to be permitted where the site adjoins or is closely related to a defined or a non-defined rural settlement on the grounds that this gives permission for development of these types of buildings in any area near existing dwellings. The wording of the policy is far too wide and as drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2

I OBJECT to the many proposals that do not protect the Green Belt in the Borough. The Green Belt constitutes 89% of the borough and the local plan proposes that two thirds of the housing and industrial development is to be built on Green Belt land. The Green Belt was established in perpetuity to protect valuable countryside from the type of development now proposed. The proposals are not occasional, exceptional developments on Green Belt for special circumstances but development on the Green Belt on an enormous scale over various sites in the North East of the borough. By any measure the proposed development on Green Belt are excessive and unsustainable.

I OBJECT to extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. The scope for development on the perimeters of Green Belt villages will result in inappropriate encroachment into the countryside.

I OBJECT that in 14 Villages in the Green Belt, "Limited infilling may also be appropriate outside the inset or identified settlement boundaries" as this will encourage large numbers of developments on village edges in the Green Belt which will inevitably impact the openness of the Green Belt.

I OBJECT to the enormous impact on the Green Belt of the proposals for large scale developments on Green Belt land at Wisley Airfield, Gosden Hill Farm, various sites in East and West Horsley and Garlicks Arch at Send. These proposed developments will have a huge impact on our local roads, rail services, medical facilities, shops and other infrastructure and will adversely affect our amenity and our tranquil rural village.

I object in the strongest terms to Guildford Borough Council’s Draft Local Plan June 2016.

I believe the Draft Local Plan is unsound and unsustainable due to lack of detail on basic infrastructure including the road network. Priority should be given to a solution being found and implemented to relieve the extensive existing traffic problems in and around the Guildford area especially the town centre and the A3 arterial route.

Until congestion relief is delivered on a sustainable basis it would be unsound to consider any major development in the area.

I Have 3 points to make

1) There is already frequent congestion on the A3 and A3100 which run through Guildford and lead to gridlock in Burpham and cause high pollution levels on a frequent basis. Guildford Council have conveniently overlooked this and have provided no information as to current levels and the impact of pollution of up to 2000 more properties at Gosden Hill Farm.

2) The Local Plan should include improvements to busses & public transport so cars are less essential. By this I mean more than just a Park and Ride included in the Gosden Hill development.

3) There is no certain reference to Guildford being in the Surrey Hills Area of Outstanding Natural Beauty and the Metropolitan Green Belt and how Guildford Council respect and plan to maintain these.

We object most strongly to the above proposal. Although we are not living in the borough of Guildford, Cobham be affected by such a development as we believe the traffic on the A3 would be absolutely horrific if the proposal should go ahead. The slip road off of the A3 to Cobham is already a nightmare every morning, and we dread to think of the impact such a large development would make.

Parking is also a major problem in Cobham at the moment, and this would become intolerable with so many more houses in the area.

We trust that the Council will reject this most inappropriate scheme.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Why is only 1/4 of the CIL funds being allocated to such important issues. When you consider a new school in Effingham was going to cost around £20 million the funding is totally inadequate. Also if such a massive re-structuring of the Guildford Borough is going to be undertaken where is the financial plan. The business sector would never consider such a plan without ensuring the funding, it seems funding does not enter the equation in the public sector which probably explains why we are in such a mess

Answer (if comment is on questions 1-7 of the questionnaire): ()

- Garlick's Arch (policy A43)

The proposal to build so many new houses and light industrial storage/workshops on what is part of the Green Belt defies all reason. We have been constantly told that the green belt was safe and it was essential for it to remain in place in order to prevent urban sprawl.

Villages need to keep their separate identities but if the green belt barriers are ripped down then how is this to be achieved? I object to any in-setting of any villages in the Green Belt. Last year an application to build 25 houses on part of this site was refused, so how can the building of 400 houses suddenly become acceptable? This is a disproportionate amount of development in one area of the borough.

Send Marsh /Burnt common has no shops and very limited resources – I hardly think that "Little Waitrose" can be listed as a shop when it only an overpriced addendum to the garage. The doctor's surgery is over-subscribed and getting an appointment is becoming a significant problem. I understand that plans have been mooted to reduce further the bus timetable in the area. In order to go about one's normal everyday life recourse will have to be made to the motor car.

- New north and southbound slip-roads to and from the A3 (policy A43a)

The Clandon Road once was a quiet road. Now the traffic starts to build up each day in the early hours and I am regularly woken by the sound of traffic (even with the benefit of double glazing) at just after 5.00 am. This is now, what will be the position once additional traffic is encouraged to use the new slip roads? Once there was the all-day breakfast now will we have the all-day traffic jam?

The A247 hasn't much more capacity so more vehicles will equal more congestion. Working in Ripley I used to be able, with a slight delay, to make a right turn into the A247 out from where I live in Woodlands. Now I have to make a detour in order to avoid this manoeuvre as it has become progressively more difficult due to the numbers of vehicles using the road.

Many cyclists use the road. It is quite narrow with little or no scope to be widened. I have safety concerns that when cars are held back they tend to travel a little faster in order to make up for lost time and if a cyclist happens to be in the way ....
Petrol and diesel cars have one thing in common, when static in jams, they pollute. Has appropriate research been undertaken to consider the effects on our health? If not why not?

Planning for our borough – our spatial development strategy

I object to the proposed SHMA figures. I support the submission by Guildford Residents’ Associations which challenges the figure of 693 houses per annum. The reports commissioned by GRA and others prove that the methodology used has been deliberately withheld from public scrutiny and seems to be flawed and that such a high level of housing is not justified, particularly in the light of the recent economic and political situation

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Local Plan as a whole as I cannot support it when the Leader of the Council says (as he did at the Council meeting on 24/5/2016) that "given the size of this beast there is no way it is 100% correct". Whilst Councillor Spooner evidently thinks it is acceptable for the Local Plan to contain errors I and, I am sure, many residents of the Borough, do 'not agree, especially when those errors are errors of fact or contradictions of other statements in the plan or its supporting documentation. Some examples from documents on the Council website supporting the draft local plan, relating to areas close to my home (I haven't looked at other areas) are:
From Guildford Borough Settlement Profiles:

Send - Retail and employment:

Send village has a small parade of shops with flats above and there is a reasonable selection of convenience and comparison shops, including a post office, mini-supermarket, and sandwich bar.

Send - Transport:

A bus also goes to Kingston upon Thames 13 times a day during the week, with limited weekend service.

Send - How well the village works:

As a connected village, Send scores very poorly as public transport is limited ....

Send Marsh/Burntcommon: Retail and employment:

The only convenience shop within the settlement is located in a petrol station and located opposite the entrance to Boughton Hall Avenue.

Send Marsh/Burntcommon - Transport

There is a reasonable bus service. ••

Send Marsh/Burntcommon - How well the village works:

As a connected village, Send Marsh scores very poorly as public transport is very limited ••.

Although there are some local shops and businesses....

From Major Village Expansion: Guildford Borough Green Belt & Countryside Study

Send

Send has a bus service rating of 3 within GBC's settlement hierarchy and therefore has good public transport connections.

Send Marsh/Burntcommon

Send Marsh and Burntcommon is served by a good bus service scoring 3, as defined within GBC's Settlement Hierarchy.

In an earlier document The Villages Medical Centre, which is located on Send Barnes Lane, Send, was shown instead as being in Send Marsh.

Inconsistencies:

Send: The Settlement profile statement that "Send scores very poorly as public transport is limited" is totally inconsistent with the Green belt & Countryside Study Major Village Expansion comment that Send "has good public transport connections".

Send Marsh/Burntcommon: The Settlement profile statement that "Send Marsh scores very poorly as public transport is very limited" is totally inconsistent with the Green belt & Countryside Study Major Village Expansion comment that Send Marsh and Burntcommon "is served by a good bus service".

Also, the settlement Profile for Send Marsh/Burntcommon contradicts itself by saying under Transport "there is a reasonable bus service" and under How well the village works "Send Marsh scores very poorly as public transport is very limited".

So according to the Local Plan support documentation Send Marsh/Burntcommon:

- Has a reasonable bus service
- Scores very poorly as public transport is very limited
- Is served by a good bus service
One thing is for sure, you would find it very difficult to find anyone in Send or Send Marsh/Burntcommon who thin ks that the bus service is good.

Errors:

Although it is correct to say that bus service 515 runs from Guildford to Kingston it is NOT CORRECT to say that this bus service serves Send village. A 515 bus travelling from Kingston to Guildford leaves the A3 after the M25, travels along Ripley High Street and Portsmouth Road, then turns left at the Shell Petrol Station roundabout onto the A247 towards Clandon and onto the A3. It DOES NOT go into the village of Send.

Although Send has a convenience store in the form of McColls, with the best will in the world this cannot be described as a mini-supermarket.

The Villages Medical Centre is in Send NOT Send Marsh - I confirmed this with Dr Burns when I identified this error in September 2014.

Send Marsh/Burntcommon Settlement Profile : How well the village works includes "there are some local shops" Where are they? The only convenience store is at the Shell Garage as mentioned elsewhere. There are no other "shops".

Although these errors may at first seem minor, they were very significant as the information was used in scoring the different villages for Local Plan purposes, resulting in erroneous scores for both Send and Send Marsh.

How can anyone trust the content of the Local Plan when there are such errors and blatant inconsistencies in the supporting information on which it is based? There are others, including saying that Global Companies have their headquarters in Guildford. One of those quoted is "Phillips". Having worked for the Dutch Philips Electronics Group for over 30 years I, unlike the Council, at least know how to spell Philips correctly and also that the Philips HQ in Guildford is that of the UK Philips organisation, the UK being only one of more than one hundred countries in which Philips operates, whilst the Global HQ of Philips Electronics is in the Netherlands and has been since 1891. Is the Council again trying to mislead the public?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
This will have the effect of attracting even more traffic from Burpham and the proposed Gosden Hill Farm 2000 home, Park & Ride and Secondary School development to Send, Send Marsh/Burntcommon and Ripley than will already be attracted by the A34a proposed new A3 junctions onto and off from the A247 at the junction with B2215 London Road at Burntcommon, including even more traffic through Send and Send Marsh/Burntcommon to/from Woking and surrounding area.

I realise that such an "Aspirational" scheme is not considered as a key infrastructure requirement on which the delivery of the plan depends but as 5.91 on page 25 includes "However, we do consider that it is appropriate to promote these schemes at this time" I consider it appropriate to strongly object to scheme ASP3 at this time.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of Site Policies A42 Clockbarn Nursery, Tannery Lane, Send, Winds Ridge and Send Hill, Send, A45 Land at the rear of the Talbot, High Street, Ripley and A57 The Paddocks, Rose Lane, Ripley as there is already a very significant problem with parking in shopping areas locally and this would only be exacerbated by the addition of a further 507 local families. Ripley is particularly bad for parking with it often being impossible to find a free space. Send is not much better.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3149   Respondent: 15438049 / David A Sprigings   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to site policy and at Garlick's Arch Send Marsh, Burntcommon and Ripley and A43a Land for new north facing slip roads to/from A3 at Send Marsh/Burntcommon as I believe that the circumstances leading to the inclusion of these site policies in the Local Plan are in breach of regulation requirements under The Town and Country Planning Act.

They were only presented to Guildford Borough Council on 11 May 2016, just 13 days before the Executive Meeting of the Council to agree putting the updated Draft Local Plan, including these two site policies, out for Public Consultation. I believe that this is in breach of regulations as there was totally insufficient pre-consultation under Regulation 18.

The very late addition of A43 Land at Garlick's Arch Send Marsh, Burntcommon and Ripley is clearly demonstrated by the Inclusion on GBC's Local Plan website of a draft version of the Submission Document, dated June 2016 on the front cover, which includes A43 (2016 classification) as Land at Burntcommon Warehouse with 100 homes, which is site proposal 74 from the 2014 Draft Local Plan. This is still there on 10/07/2016.
The very late inclusion of A43 and A43a is also clear from the fact that in the Local Plan section on page 04 of the Council's Summer 2016 issue of "About Guildford", which was delivered in June 2016, it says "....In April this year we published the revised Draft local Plan.."

How could the Council publish the revised Draft Local Plan in April 2016 when site allocations A43 and A43a were not presented to the Council for inclusion in the revised Draft Local Plan until 11 May 2016 and the Executive did not approve the draft for submission for Public Consultation until 24 May 2016?

Is the Council trying to mislead the public by suggesting that the current Draft Local Plan was published in April?

I object to site policy A43 Land at Garlick's Arch and A43a Land for new north facing slip roads to/from A3 at Send Marsh/Burntcommon as I believe that the circumstances leading to the inclusion of these site policies are, at best, highly unorthodox and irregular and need thorough checking by the Planning Inspectorate.

I understand from a very reliable source that the land for Site Policy A43a Land for new north facing slip roads to/from the A3 at Send Marsh/Burntcommon has been gifted to the Council by its owners and that those owners have also offered to pay the £20m cost of A43a.

Isn't it a strange coincidence that part of the land at Site A43 land at Garlick's Arch is also owned by the owners of the land being gifted to the Council for Site A43a, which, if site A43 is approved, would no doubt result in an extremely large financial windfall for the owners?

Isn't it also a strange coincidence that these are the very same sites which were only proposed to the Council for inclusion in the Draft Local Plan on 11 May 2016, which I believe to be in breach of regulations as in 11 above?

Although I understand that the cost of the A3/A247 on/off slip roads is to be borne by the owners of the land, the Draft Guildford borough Infrastructure Delivery Plan 2016 shows on page 68 the £10m likely cost for each of the two slip roads as "Developer funded". If the cost IS to be borne by the land-owners who have gifted the land to the Council, it is very misleading to state in the plan documentation that the cost is to be Developer funded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of 400 new homes on site policy A43 Garlick's Arch Send Marsh, Burntcommon and Ripley as there is no need for this many to be built. The site 74 Land around Burntcommon warehouse which included 100 new homes should have the 100 homes reinstated and increased to 159. The plan Sustainability Appraisal page 110 shows 100 as Housing Capacity for Use H and a further 59 Housing Capacity for Use E, so 159 in total.

I object to inclusion of site policy A43 Land at Garlick's Arch, Send Marsh/Burntcommon and Ripley as it is an area of Ancient Woodland which includes a number of trees with Tree Preservation Orders. These beautiful trees should be retained and there should be no building on this site.
At the Council Executive Meeting on 24/05/2016 I was appalled by the comment from one Councillor in support of inclusion of site policy A43 "they are only trees, they are going to die anyway".

Yes, they will die (eventually) anyway, but this very short-sighted view ignores the fact that the trees date back to the 161 Century and the life span of such trees is several times that of any houses or industrial buildings, as well as being much better to look at and benefiting the environment instead of harming it.

I object to inclusion of site policy A43 Land at Garlick's Arch, Send Marsh/Burntcommon and Ripley on the grounds of the harm it would do to the local environment.

In terms of the environment the words of Tony Juniper, President of the Wildlife Trusts, are much better than my own so I quote his from the Spring 2016 issue of Surrey Nature, published by the Surrey Wildlife Trust:

"Many people have become used to hearing that looking after our environment and conserving nature is an unaffordable luxury, especially during times of economic hardship. Nothing could be further from the truth. The more research we have the more we see that nature is not a distraction from our interests as a country, but is essential for our health, wealth and security. At a time of rising population, increased demand for resources and pressure on the land it is more vital than ever that this message is heard".

I object to inclusion of site policy A43 Land at Garlick's Arch, Send Marsh/Burntcommon and Ripley on the grounds of the harm it would do to the local environment in terms of noise pollution.

At the Executive Council Meeting on 24/05/2016 a point made supporting the proposed amendment to remove A43 Garlick's Arch from the Draft Local Plan was that the noise problem from A3 traffic to residents living on the other side of Portsmouth Road from Garlick's Arch would be worsened by felling the Ancient Woodland on the site.

The response from the Leader of the Council was that the trees do not form a noise barrier, a view which was met with derision from the members of the public present, including myself.

I also object to A43 on the grounds of Noise Pollution as noise metering has, I understand, been carried out between Garlick's Arch and the A3 and, I am assured, the readings in decibels exceed the allowable noise level for the building of new homes so none should be built there.

It seems that the Council chooses to ignore anything which is a barrier to its plans.

I object to the inclusion of Site Policy A43 Garlick's Arch, Send Marsh and Burntcommon and Ripley on the grounds of its adverse impact on wildlife on the site.

The site has numerous species including Badgers, Bats, Deer, Red Kite and their habitat would be destroyed by this development. I believe that the Water Vole, now rare in this country, has also been seen. I understand that no wildlife study has been undertaken in respect of this site which appears to be another procedural shortcoming.

I object to site policy A43 Land at Garlick's Arch and A43a Land for new north facing slip roads to/from the A3 at Send Marsh/Burntcommon In respect of the proposed timing of these developments in the Draft Local plan.

Site A43 and at Garlick's Arch is stated to be suitable for the first phase of planned development (first 5 years) (Executive 11 May 2016 Supplementary Information page 8 Delivery "....the Garlick's Arch site is deliverable in the first five years of the plan") whilst page 68 of the Draft Guildford borough Infrastructure Delivery Plan 2016 shows both SRN9 "A3 northbound on-slip at A247 Clandon Road" and SRN10 "A3 southbound off-slip at A247 Clandon Road" to be delivered between 2021 and 2027.

Does no-one involved with the Draft Local Plan have any common sense or apply any logic to these plans, especially in respect of development timing schedules?
If it is the case that, should both these site policies be approved and delivered with A43 first and A43a some years later, the traffic congestion in the local area would be an absolute nightmare.

The very numerous heavy lorries that would be required to remove huge trees and deliver vast amounts of building materials to site A43 would have to use existing inadequate roads, either off the A3 through Ripley or via the Burntcommon roundabout at the junction with the A247.

This would be intolerable and dangerous. Portsmouth Road junction with Send Marsh Road is already a dangerous black spot for accidents, as I know to my cost since a car drove into mine there earlier this year, the other driver having ignored the Give Way signs for traffic turning onto Portsmouth Road from Send Marsh Road. The existing junction of the A247 and the A3 southbound on-slip is also an existing dangerous accident black spot. Both of these would only become worse and more dangerous with these planned developments, as would the junctions of Burnt Common Lane, Kiln Lane and Grove Heath Road with Portsmouth Road.

I **object** to site policy A43 Land at Garlick's Arch Send Marsh/Burntcommon in respect of the lack of infrastructure planning for the site.

The sections of the Guildford borough Infrastructure Delivery Plan 2016 in respect of Utilities:

Electricity & Gas Distribution & Supply pages 76/77/78

Water Supply pages 78/79

Wastewater Connections & Treatment pages 79/80

Flood Risk Reduction: Surface Water Mitigation Measures pages 80/81

contain no mention whatever of A43 Garlick's Arch.

How can this planned site development go ahead when there are apparently no plans whatsoever to provide the utility infrastructure which would be required to support 400 homes and 7000 sq mts of industrial/warehousing development?

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

I object to site policies A43 Land at Garlick's Arch Send Marsh, Burnt common and Ripley and A43a Land for new north facing slip roads to/from A3 at Send Marsh/Burnt common as I believe that the circumstances leading to the inclusion of these site policies in the Local Plan are in breach of regulation requirements under The Town and Country Planning
They were only presented to Guildford Borough Council on 11 May 2016, just 13 days before the Executive Meeting of the Council to agree putting the updated Draft Local Plan, including these two site policies, out for Public Consultation. I believe that this is in breach of regulations as there was totally insufficient pre consultation under Regulation 18.

The very late addition of A43 Land at Garlick’s Arch Send Marsh, Burntcommon and Ripley is clearly demonstrated by the Inclusion on GBC’s Local Plan website of a draft version of the Submission Document, dated June 2016 on the front cover, which includes A43 (2016 classification) as Land at Burntcommon Warehouse with 100 homes, which is site proposal 74 from the 2014 Draft Local Plan. This is still there on 10/07/2016.

The very late inclusion of A43 and A43a is also clear from the fact that in the Local Plan section on page 04 of the Council’s Summer 2016 issue of “About Guildford”, which was delivered in June 2016, it says “... in April this year we published the revised Draft Local Plan....”.

How could the Council publish the revised Draft Local Plan in April 2016 when site allocations A43 and A43a were not presented to the Council for inclusion in the revised Draft Local Plan until 11 May 2016 and the Executive did not approve the draft for submission for Public Consultation until 24 May 2016?

Is the Council trying to mislead the public by suggesting that the current Draft Local Plan was published in April?

I object to site policies A43 Land at Garlick’s Arch and A43a Land for new north facing slip roads to/from A3 at Send Marsh/Burntcommon as I believe that the circumstances leading to the inclusion of these site policies are, at best, highly unorthodox and irregular and need thorough checking by the Planning Inspectorate.

I understand from a very reliable source that the land for Site Policy A43a Land for new north facing slip roads to/from the A3 at Send Marsh/Burntcommon has been gifted to the Council by its owners and that those owners have also offered to pay the £20m cost of A43a.

Isn’t it a strange coincidence that part of the land at Site A43 land at Garlick’s Arch is also owned by the owners of the land being gifted to the Council for Site A43a, which, if site A43 is approved, would no doubt result in an extremely large financial windfall for the owners?

Isn’t it also a strange coincidence that these are the very same sites which were only proposed to the Council for inclusion in the Draft Local Plan on 11 May 2016, which I believe to be in breach of regulations as in 11 above?

Although I understand that the cost of the A3/A247 on/off slip roads is to be borne by the owners of the land, the Draft Guildford borough Infrastructure Delivery Plan 2016 shows on page 68 the £10m likely cost for each of the two slip roads as “Developer funded”. If the cost IS to be borne by the land-owners who have gifted the land to the Council, it is very misleading to state in the plan documentation that the cost is to be Developer funded.

*Answer (if comment is on questions 1-7 of the questionnaire):* ()

I object to the inclusion of site policy A43 Land at Garlick's Arch, Send Marsh/Burntcommon and Ripley as it is unsustainable with totally inadequate public transport. Bus services are poor and infrequent, and Surrey County Council is proposing to reduce the number of journeys serving Ripley, Send Marsh, Burntcommon and Send, whilst the nearest Railway Station at West Clandon is a 40 minute walk away, and that is only if you are fit. (Policy S1)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of Site Policies A42 Clockbarn Nursery, Tannery Lane, Send, A43 Land at Garlick's Arch Send Marsh, Burntcommon and Ripley, A44 Land west of Winds Ridge and Send Hill, Send, A45 Land at the rear of the Talbot, High Street, Ripley and A57 The Paddocks, Rose Lane, Ripley as there is already a very significant problem with parking in shopping areas locally and this would only be exacerbated by the addition of a further 507 local families. Ripley is particularly bad for parking with it often being impossible to find a free space. Send is not much better.

I object to inclusion of Site Policies A25 Gosden Hill Farm, Merrow Lane, A35 Land at former Wisley airfield Ockham, A42 Clockbarn Nursery, Tannery Lane, Send, A43 Land at Garlick's Arch Send Marsh, Burntcommon and Ripley, A44 Land west of Winds Ridge and Send Hill, Send, A45 Land at the rear of the Talbot, High Street, Ripley, A57 The Paddocks, Rose Lane, Ripley and the numerous Site Policies in East and West Horsley as together these would add more than 5000 new homes and probably 10000 cars to an area within 3 miles of Send.

This huge increase in local car traffic, which would be bound to have a major impact on the local villages of Ripley, Send Marsh/Buntcommon and Send, would significantly increase traffic congestion in the whole area to an unacceptable level.

It would also make the roads more dangerous for children going to/from school.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to A35 Wisley former airfield and A44 Clockbarn Nursery, Tannery Lane, Send on the grounds of their adverse impact on local wildlife. There are numerous species of Dragonfly at Boldermere/Wisley Lake, also the rare "wasp" spider, and both Beautiful and Banded Demoiselle Damselflies on the River Wey Navigation, as well as many species of both smaller and larger wildlife which would be adversely impacted by these developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I request that all my objections and comments are shown to the Planning Inspector.

1. I object to the numerous proposals to undermine the Green Belt in various areas of the this is because the lead party in Guildford Borough Council, Conservative, campaigned for election on their policy of protecting the Green Belt for Guildford Borough residents.

2. I object to the Local Plan as so much of it is dependent on building on or insetting the Green Belt for future building in the Borough as Government advice is very clear that housing need alone is not adequate grounds for building on the Green Belt.

1. I object to the Local Plan as I believe that no "exceptional circumstances" have been identified to justify the proposed building on Green Belt.

1. I object to any in-setting of the villages of Send, Ripley, Send Marsh/Burnt This would result in Woking and Guildford becoming one conurbation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Local Plan, especially the inclusion of Site Policies A25 Gosden Hill Farm, Merrow Lane, A35 Land at former Wisley airfield Ockham, A42 Clockbarn Nursery, Tannery Lane, Send, A43 Land at Garlick's Arch Send Marsh, Burntcommon and Ripley, A44 Land west of Winds Ridge and Send Hill, Send, A45 Land at the rear of the Talbot, High Street, Ripley, A57 The Paddocks, Rose Lane, Ripley and the numerous Site Policies in East and West Horsley as together all the extra building on these sites would - considerably increase flood risk in the areas concerned, whilst nothing appears to be done to resolve existing recurring flood problems such as Ockham Road off the A3/Ockham roundabout and the B2215 towards Ripley, both of which flood with alarming regularity.

There is also a risk of additional flooding at the entry to the site by Garlick's Arch where there are a number of existing businesses, between Kiln Lane and Burntcommon Lane junctions. This is because there is a build up of tree debris at the point where the stream enters 3 pipes under Portsmouth Road which, if left unchecked, could form a dam similar to that at the junction of Portsmouth Road and Send Marsh Road which resulted in flooding of numerous houses in Maple Road and Send Marsh Road some years ago.

I object to the disproportionate amount of development in one area of the It is noteworthy that the proposed number of additional homes for the total of Guildford Town Centre, Guildford Urban Area and Land Around Guildford Urban Area amounts to 35% of the overall total in the 2016 Draft local Plan (with a decrease of 1356 or over 16% from the 2014 Plan, whilst the total for the area within just 3 miles of Send Marsh amounts to almost 40% of the total (and the total number in Villages increases by over 500 or 24%).

I object to site A43 Garlick's Arch, to the building of 400 houses and 7000 sq m of industrial space. The site floods and is of ancient woodlands. The industrial space is unnecessary. If any is needed, it should be at Slyfield. There is a lack of evidence for the alleged housing need numbers, and local services are inadequate to cope with increased population.

I object to the last-minute inclusion of new sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the Local Plan as a whole as it is, to me, totally wrong for the Council to sub-contract a large part of the Draft Local Plan work to a private company which in the main works for developers and so suggests the possibility of a strong conflict of interest.

I object to the Draft Local Plan as a whole as I believe that it is not sustainable. For example, no railway station within easy walking distance of Wisley airfield and Garlick's Arch, poor bus services which are proposed to be reduced, lack of utility infrastructure at Garlick's Arch.

I object to the Borough Wide Strategy especially as Wisley airfield, Garlick's Arch and Gosden Hill Farm will have a disproportionate impact on local villages.

I object to the Draft Local Plan as a whole as I believe that it is untenable.

I object to the Draft Local Plan as a whole as I believe that it is unworkable.

I object to the Draft Local Plan as a whole as I believe that the proposed scale of housing development is excessive.

I object to the Local Plan as a whole as I understand that the GBC Transport Strategy Document had not been published when the revised Draft Local Plan Public Consultation began on 61 June 2016.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to site allocations A35 Wisley Airfield, A43 Garlick's Arch and A58 Land around Burnt Common as the scheduled delivery of the important local transport infrastructure developments is unjustifiably late in the process, eg:
- A43 Garlick's Arch is stated to be available in the first five years of the plan with 400 homes (0) and 6 Travelling Showpeople plots proposed: "There is no available alternative site that can provide Travelling Showpeople plots in the first five years of the plan to meet need", 2017 Sustainability Appraisal.
- A58 Land around Burnt Common warehouse, London Road, Send: Land Availability Assessment (2017 Addendum) page 15: "There is a realistic prospect that development will be delivered within the first five years of the Local Plan"; page 16 "Timescale 0-5 years".
- SRN 9 and SRN 10, new A3/A247 junctions are stated to be scheduled during the period 2021 to 2027. (Guildford Borough Transport Strategy 2017 page 22).

LRN7 Interventions to address potential highway performance issues resulting from the development at former Wisley Airfield site, including various mitigation schemes to address issues affecting Ripley High Street, A3 Ockham Interchange and M25/A3 Junction 10, are stated to be scheduled for likely delivery during the period 2021 to 2033. (Guildford Borough Transport Strategy 2017 page 23). It seems ridiculous that the Local Plan is based on developments A43 and A58 taking place or at least begun BEFORE the required improvements to major local transport networks. Unless the major road network improvements take place before the site developments, the Ripley/Send Marsh/Burntcommon/ Send/Clandon area will be subject to severe traffic congestion arising from the site developments with very limited access for the vast number of heavy vehicle journeys that will be required which will cause an absolute nightmare for traffic in these villages. It will make Portsmouth Road even more dangerous than it is already at its various junctions.

The addition of new A3/A247 junctions (A43a; SRN9, SRN10) will not help the area of these villages as it will encourage far more traffic to join/leave from the A3 via the A247 meaning much more traffic through Clandon, with its very narrow bends on the A247, and Send in particular, the latter making it more dangerous for pupils, parents and staff at Send Primary School and also more dangerous for both patients and staff at The Villages Medical Centre, as well as local residents and businesses in Send.

Although the draft Local Plan includes reference to the Highways England (HE) Proposed M25/A3 Junction 10 improvement it takes no account of the HE attention to close off access from the A3 northbound onto Wisley Lane, which includes access to RHS Wisley. The HE plan is to only have access to Wisley Lane from a slip road running parallel to A3 northbound, its only access being from the Ockham Interchange (Ockham/Ripley roundabout) which will only be accessible from the southbound A3, with NO ACCESS FROM THE NORTHBOUND A3. Although HE say that there will be signs on the northbound A3 advising drivers to go to the M25 junction roundabout, turn around and leave the A3 southbound at Ockham Interchange for Wisley/RHS Wisley, human nature being what it is most such drivers will leave the A3 northbound at London Road B2215 and drive through Burnt Common, Send Marsh and Ripley to get to Ockham Interchange for access to RHS Wisley. So every time an event takes place at RHS Wisley we can expect even worse traffic congestion through Burnt Common, Send Marsh and Ripley which makes the building of 400 homes at Garlick's Arch on Portsmouth Road even less appropriate, and Travelling Showpeople with heavy vehicles for fairground equipment an even bigger mistake. A43 Garlick's Arch should be removed from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/4334  Respondent: 15438049 / David A Sprigings  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
3. I object to site allocation A42 Clockbarn Nursery, Tannery Lane, Send as it is totally wrong to increase the number of planned homes from 45 to 60 when the total number of homes in the borough during the period of the plan has been calculated as 1,434 lower than the 2016 draft Local Plan. There is therefore no justification for an increase on this site.

7. I object to Site Allocation A42 Clockbarn Nursery, Tannery Lane, Send, as the delivery of all site allocations is contingent upon the delivery of new physical infrastructure (see Foreword extract above) whilst the plan does not include any Utility Infrastructure at all for A42: see 2017 Draft Local Plan Submission Appendix C INFRASTRUCTURE SCHEDULE pages 309-338 and, in particular 2 Utilities pages 320-325, which contains NOTHING in respect of A42 in respect of Electricity and Gas distribution and supply; Water supply; Wastewater connections and treatment; Flood risk reduction: surface water mitigation measures, so sufficient physical infrastructure for utilities is NOT planned for.

8. I object to Site Allocation A42 Clockbarn Nursery, Tannery Lane, Send, as the delivery of all site allocations, is contingent upon the delivery of new physical infrastructure (see Foreword extract above) whilst the plan does not include any Transport Infrastructure at all: see 2017 Draft Local Plan Submission Appendix C INFRASTRUCTURE SCHEDULE pages 309-338 and, in particular 1 Transport pages 310-316, which contains nothing specific to A42, just a vaguely worded LRN 20 Send Road/Send Barnes Lane (Send) traffic management and environmental improvement scheme which will do nothing to overcome the increased congestion in the narrow Tannery Lane arising from 60 new homes being built, an increase of 15 from 2016.

9. I object to Site Allocation A42 Clockbarn Nursery, Tannery Lane, Send as the delivery of all site allocations is contingent upon the delivery of new green infrastructure (see Foreword extract above) whilst the plan does not include any Green Infrastructure at all: see 2017 Draft Local Plan Submission Appendix C INFRASTRUCTURE SCHEDULE pages 309-338 and, in particular 3 Green Infrastructure pages 325-328, which contains NOTHING in respect of Clockbarn Nursery, Tannery Lane in respect of Green Infrastructure. To the contrary, the existing Green Infrastructure will be significantly reduced by the building of 60 new homes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4335  Respondent: 15438049 / David A Sprigings  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to site allocation A43 Garlick's Arch as it is totally wrong to increase the number of planned homes by the addition of Travelling Showpeople plots when the total number of homes in the borough during the period of the plan has been calculated as 1,434 lower than the 2016 draft Local Plan. There is therefore no justification for an increase on this site.

The Foreword on page 5 by Councillor Paul Spooner - Leader of the Council, includes the following in the fourth paragraph:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated I an is con tingent open the provision of new infrastructure, which is a key
theme of our Local Plan. The Council will work with infrastructure providers and developers to ensure that sufficient physical, social and green infrastructure is provided during the plan period”.

As the "delivery of sites allocated in this plan is contingent upon" the provision of new infrastructure is a change in the plan it can be commented upon and gives rise to the following objections, in conjunction with changes to site allocations

I object to Site Allocation A43 Land at Garlick's Arch, Send Marsh Burnt Common and Ripley as the delivery of all site allocations is contingent upon the delivery of new physical infrastructure (see Foreword extract above) whilst the plan does not include any Utility Infrastructure at all for A43: see 2017 Draft Local Plan Submission Appendix C INFRASTRUCTURE SCHEDULE pages 309-338 and, in particular 2 Utilities pages 320-325, which contains NOTHING in respect of Garlick's Arch in respect of Electricity and Gas distribution and supply; Water supply; Wastewater connections and treatment; Flood risk reduction: surface water mitigation measures, so sufficient physical infrastructure for utilities is NOT planned for.

I object to Site Allocation A43 Land at Garlick's Arch, Send Marsh Burnt Common and Ripley as the delivery of all site allocations is contingent upon the delivery of new green infrastructure (see Foreword extract above) whilst the plan does not include any Green Infrastructure at all for A43: see 2017 Draft Local Plan Submission Appendix C INFRASTRUCTURE SCHEDULE pages 309-338 and, in particular 3 Green Infrastructure pages 325-328, which contains NOTHING in respect of Garlick's Arch in respect of Green Infrastructure.

To the contrary, the existing Green Infrastructure at Garlick's Arch will be almost wholly taken away due to the planned wanton destruction of the current Ancient (some dating back to the 16th century) and other woodland.

I object to the addition to site allocation A43 Garlick's Arch of 6 Travelling Showpeople plots with associated storage facilities as this is wholly inappropriate in the rural environment of Send Marsh, Burnt Common, Send and Ripley within the Green Belt.

I object to the addition of 6 Travelling Showpeople plots to site allocation A43 Garlick's Arch as this site allocation is outside the scope of the GBC 2017 Local Plan policy in respect of such sites which is as follows:

Point 4.2 Housing Policy, Policy H1 Homes for all, which begins on page 35 includes the following on page 36 under the heading Gypsy, Traveller and Travelling Showpeople pitches and plots:

(7) Accommodation for Gypsy, Traveller or Travelling Showpeople (whether they meet the Planning Policy for Traveller Sites definition or not) should be provided on development sites of 500 homes or more whilst there remains an identified need. Also page 40 "Gypsy, Traveller and Travelling Showpeople accommodation is required within development sites of 500 homes or more to help create sustainable, mixed use communities with suitable accommodation for all".

A43 Garlick's Arch is therefore OUTSIDE THE SCOPE OF THIS POLICY.

I object to the addition of 6 Travelling Showpeople plots to site allocation A43 Garlick's Arch as the GBC 2017 Local Plan Policy for such plots (7) on page 36) shows that 6 pitches or plots should be provided for development sites of 1500 - 1999 homes and so A43 Garlick's Arch is totally outside the scope of this policy.

I object to the addition of 6 Travelling Showpeople plots to site allocation A43 Garlick's Arch as there is no justification for locating in Send Marsh/Burnt Common 75% of the total of 8 such plots identified for the whole of the borough. I object to the inclusion of site allocation A43 Garlick's Arch in the 2017 Local Plan Submission as the main underlying reasons for adding this site to the plan in May 2016 are now defunct.

Supplementary Information provided to Councillors for the GBC Executive Meeting on 11 May 2016, at which A43 Garlick's Arch was very belatedly added to the 2016 Local Plan submission, included the following main reasons for its inclusion instead of the previous site allocation A74 Land around Burnt Common warehouse:

- The site location affords greater separation between Send Marsh/Burnt Common and the proposed site location at Gosden Hill Farm, Merrow Lane, Guildford.
The site provides the employment floorspace needed in the plan to meet identified needs.

As the maximum 7000 sq m industrial/warehousing floorspace included in A43 Garlick's Arch has now been removed from this site allocation in the 2017 Local Plan submission and moved back to the part of the Burnt Common area close to the previous A74 Land around Burnt Common warehouse, though changed to minimum of 7000 sq m, the above reasons used in 2016 to justify the inclusion of A43 Garlick's Arch in the Local Plan are no longer valid and so A43 Garlick's Arch should be totally removed from the 2017 Local Plan Submission, as well as any future variants that GBC may come up with.

I object to the addition of 6 Travelling Showpeople plots to site allocation A43 Garlick's Arch as point 4.2.20 on page 40 says "National planning policy for Gypsy, Traveller and Travelling Showpeople is set out in the National Planning Policy Framework and Planning Policy for Traveller Sites and we will expect all new sites to meet the requirements of national policy. New pitches and plots should have adequate utility services and ...."

However, the plan does not include any Utility Infrastructure at all in respect of A43: see 2017 Draft Local Plan Submission Appendix C INFRASTRUCTURE SCHEDULE pages 309-338 and, in particular 2 Utilities pages 320-325, which contains NOTHING in respect of A43 in respect of Electricity and Gas distribution and supply; Water supply; Wastewater connections and treatment; Flood risk reduction : surface water mitigation measures, so "adequate utility services" as required for Travelling Showpeople plots by national Planning Policy for such plots have not been planned for. This is a further reason to remove these plots from A43 Garlick's Arch.

I object to the addition of 6 Travelling Showpeople plots to site allocation A43 Garlick's Arch based on the Commentary on A43 Garlick's Arch, Send Marsh contained on page 75 of the 2017 Sustainability Appraisal, which says in respect of A43:

- Strategic Development Site

- There is no available alternative site that can provide Travelling Showpeople plots in the first five years of the plan to meet need.

This is a total contradiction as Policy S2 under 4.1.9 on page 29 includes "Larger Development sites, including the strategic development sites, will deliver the majority of new development in the 6-10 and 11-15 year periods of the plan". The Travelling Showpeople plots cannot be delivered both in the first five years of the plan and "in the 6-10 and 11-15 year periods of the plan".

I object to the addition of 6 Travelling Showpeople plots to site allocation A43 Garlick's Arch as the only reason that the commentary in the 2017 Sustainability Appraisal includes "There is no available alternative site that can provide Travelling Showpeople plots in the first five years of the plan to meet need" is that the Sustainability Appraisal 2016 commentary on site allocation A46 Land to the south of Normandy and north of Flexford includes "There is no available alternative site that can provide Travelling Showpeople plots in the first five years of the plan to meet need" and this site allocation has been removed from the 2017 Draft Plan Submission whilst the area it covers is still there.

I can see no justification for the switch in the plan to A43, especially as A43 is outside the scope of the GBC policy in respect of Travelling Showpeople plots.

I object to the addition of 6 Travelling Showpeople plots to site allocation A43 Garlick's Arch as the Local Plan Submission 2017 shows a total need of 8 Travelling Showpeople plots in the borough during the period of the plan (see Policy S2 page 30 "We will identify 4 permanent pitches for Gypsies and Travellers and 4 permanent plots for Travelling Showpeople (as defined by Planning Policy for Traveller Sites) within Guildford borough between 2017 and 2034. Whilst the needs of Gypsies, Travellers and Travelling Showpeople who do not meet the planning definition fall outside this allocation, in order to meet their assessed needs we will seek to provide 41 permanent pitches for for Gypsies and Travellers and 4 permanent plots for Travelling showpeople who do not meet the definition". At the same time on the site allocation summaries on pages 142-145 Site Allocation A50 Whittles Drive, Normandy on page 145 shows Allocated uses Travelling Showpeople plots (suigeneris) and the column Gross number of homes (approx.) over the plan period shows 14, which is MORE than the total identified need of 8 for the borough and so meaning that that NONE are needed on site allocation A43 Garlick's Arch. The same figure 14 also appeared against A50 under Total number of homes (approx.) for Travelling Showpeople sites in the 2016 draft Local Plan, page 125.
I object to site allocation A43 Garlick's Arch as I strongly object to Requirement (10) under the heading Travelling Showpeople plots. "Following completion of the site and a further 18 months of marketing, if the site remains unsold, the future use of the land should have regards to an up to date Traveller Accommodation Assessment (TAA) and Strategic Housing Market Assessment (SHMA), with specific consideration of the use of the land for affordable housing" on the following grounds:

a. This "Requirement" is contingent on the Travelling Showpeople site remaining unsold but this should NOT be included in this site allocation in the first place as it is outside the scope of Council Policy on Travelling Showpeople plots.

b. It is totally wrong and unjustified to increase the number of planned homes on this site allocation when the total number of homes in the borough during the period of the plan has been calculated as 1,434 lower than the 2016 draft Local Plan. There is therefore no justification for any future increase on this site.

I object to site allocations A35 Wisley Airfield, A43 Garlick's Arch and A58 Land around Burnt Common as the scheduled delivery of the important local transport infrastructure developments is unjustifiably late in the process, e.g.

- A43 Garlick's Arch is stated to be available in the first five years of the plan with 400 homes (0) and 6 Travelling Showpeople plots proposed: "There is no available alternative site that can provide Travelling Showpeople plots in the first five years of the plan to meet need", 2017 Sustainability Appraisal.
- A58 Land around Burnt Common warehouse, London Road, Send: Land Availability Assessment (2017 Addendum) page 15: "There is a realistic prospect that development will be delivered within the first five years of the Local Plan"; page 16 "Timescale 0-5 years".
- SRN 9 and SRN 10, new A3/A247 junctions are stated to be scheduled during the period 2021 to 2027. (Guildford Borough Transport Strategy 2017 page 22).

LRN7 Interventions to address potential highway performance issues resulting from the development at former Wisley Airfield site, including various mitigation schemes to address issues affecting Ripley High Street, A3 Ockham Interchange and M25/A3 Junction 10, are stated to be scheduled for likely delivery during the period 2021 to 2033. (Guildford Borough Transport Strategy 2017 page 23).

It seems ridiculous that the Local Plan is based on developments A43 and A58 taking place or at least begun BEFORE the required improvements to major local transport networks. Unless the major road network improvements take place before the site developments, the Ripley/Send Marsh/Burnt Common/Send/Clandon area will be subject to severe traffic congestion arising from the site developments with very limited access for the vast number of heavy vehicle journeys that will be required which will cause an absolute nightmare for traffic in these villages. It will make Portsmouth Road even more dangerous than it is already at its various junctions.

The addition of new A3/A247 junctions (A43a; SRN9, SRN10) will not help the area of these villages as it will encourage far more traffic to join/leave from the A3 via the A247 meaning much more traffic through Clandon, with its very narrow bends on the A247, and Send in particular, the latter making it more dangerous for pupils, parents and staff at Send Primary School and also more dangerous for both patients and staff at The Villages Medical Centre, as well as local residents and businesses in Send.

Although the draft Local Plan includes reference to the Highways England (HE) Proposed M25/A3 Junction 10 improvement it takes no account of the HE intention to close off access from the A3 northbound onto Wisley Lane, which includes access to RHS Wisley. The HE plan is to only have access to Wisley Lane from a slip road running parallel to A3 northbound, its only access being from the Ockham Interchange (Ockham/Ripley roundabout) which will only be accessible from the southbound A3, with NO ACCESS FROM THE NORTHBOUND A3.

Although HE say that there will be signs on the northbound A3 advising drivers to go to the M25 junction roundabout, turn around and leave the A3 southbound at Ockham Interchange for RHS Wisley, human nature being what it is most such drivers will leave the A3 northbound at London Road B2215 and drive through Burnt Common, Send Marsh and Ripley to get to Ockham Interchange for access to RHS Wisley. So every time an event takes place at RHS Wisley we can expect even worse traffic congestion through Burnt Common, Send Marsh and Ripley which makes the building of 400 homes at Garlick's Arch on Portsmouth Road even less appropriate, and Travelling Showpeople with heavy vehicles for fairground equipment an even bigger mistake. A43 Garlick's Arch should be removed from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
20.1 I object to site allocation A58 Land around Burnt Common warehouse, London Road, Send as there is no justification for changing the required industrial/warehousing space (Bic, B2 & 138) from a maximum of 7000 sq mt at A43 Garlick's Arch in the 2016 plan to a minimum of 7000 sq mt at A58 Burnt Common in the 2017 plan when the TOTAL requirement for Industrial Land (Bic, B2 & B8) has fallen from a range of 4.7 to 5.3 ha in the 2016 plan to a range of 3.7 to 4.1 ha in the 2017 plan (Policy S2: Planning for the borough - our spatial development strategy, point (1) page 30 and Policy E1: Meeting employment needs, table under point (1) page 71), a reduction of more than 20%.

21. I object to site allocation A58 Land around Burnt Common warehouse, London Road, Send as it appears to be a means of trying to establish this site allocation as being for future use for Waste Management activities which would be totally unsuitable for this area with many houses and families in the area. This is because "POLICY E1: Meeting employment needs (8) on page 71 is "When developed, new employment land at Burnt Common, together with the existing employment floorspace, will be treated as an Industrial Strategic Employment Site" and page 77 4.4.23a "plus 4.4.23a on page 77 (all in red): "Development involving waste management facilities may be appropriate and will be directed to the Industrial Strategic Employment Sites . . . . . . Some waste management activities fall within the industrial classes in the Use Classes Order and can be considered to be a Bic, B2 or B8 use. This is particularly the case given the increased move towards enclosing waste management activities in purpose-designed buildings". This is totally unjustified for inclusion in site allocation A58. I object to any possible use of site allocation A58 for Waste Management activities as residents are not provided with sufficient information for a full and proper Public Consultation under the terms of the Town & Country Planning Act.

22. I object to any possible future use of site allocation A58 Land around Burnt Common warehouse, London Road, Send for possible Waste Management activities as these would be totally unsuitable for the site and the local area. Any further need for Waste Management should be included in site allocation A24 Slyfield Area Regeneration Project which already includes Allocations (4) New council waste management depot (relocated on site), and (5) New or enhanced waste management facilities (including a waste transfer station and a community recycling centre). As Key Consideration (2) of A24 shows, liha of the site is allocated for Waste Management purposes in the Development Plan for the area (under Policy WD2of the SWP).

23. I object to site allocations A35 Wisley Airfield, A43 Garlick's Arch and A58 Land around Burnt Common as the scheduled delivery of the important local transport infrastructure developments is unjustifiably late in the process, eg: - A43 Garlick's Arch is stated to be available in the first five years of the plan with 400 homes (0) and 6 Travelling Showpeople plots proposed: "There is no available alternative site that can provide Travelling Showpeople plots in the first five years of the plan to meet need", 2017 Sustainability Appraisal. - A58 Land around Burnt Common warehouse, London Road, Send: Land Availability Assessment (2017 Addendum) page 15: "There is a realistic prospect that development will be delivered within the first five years of the Local Plan"; page 16 "Timescale 0-5 years". - SRN 9 and SRN 10, new A3/A247 junctions are stated to be scheduled during the period 2021 to 2027. (Guildford Borough Transport Strategy 2017 page 22).
LRN7 Interventions to address potential highway performance issues resulting from the development at former Wisley Airfield site, including various mitigation schemes to address issues affecting Ripley High Street, A3 Ockham Interchange and M25/A3 Junction 10, are stated to be scheduled for likely delivery during the period 2021 to 2033. (Guildford Borough Transport Strategy 2017 page 23). It seems ridiculous that the Local Plan is based on developments A43 and A58 taking place or at least begun BEFORE the required improvements to major local transport networks. Unless the major road network improvements take place before the site developments, the Ripley/Send Marsh/Burntcommon/Send/Clandon area will be subject to severe traffic congestion arising from the site developments with very limited access for the vast number of heavy vehicle journeys that will be required which will cause an absolute nightmare for traffic in these villages. It will make Portsmouth Road even more dangerous than it is already at its various junctions.

The addition of new A3/A247 junctions (A43a; SRN9, SRN10) will not help the area of these villages as it will encourage far more traffic to join/leave from the A3 via the A247 meaning much more traffic through Clandon, with its very narrow bends on the A247, and Send in particular, the latter making it more dangerous for pupils, parents and staff at Send Primary School and also more dangerous for both patients and staff at The Villages Medical Centre, as well as local residents and businesses in Send.

Although the draft Local Plan includes reference to the Highways England (HE) Proposed M25/A3 Junction 10 improvement it takes no account of the HE intention to close off access from the A3 northbound onto Wisley Lane, which includes access to RHS Wisley. The HE plan is to only have access to Wisley Lane from a slip road running parallel to A3 northbound, its only access being from the Ockham Interchange (Ockham/Ripley roundabout) which will only be accessible from the southbound A3, with NO ACCESS FROM THE NORTHBOUND A3. Although HE say that there will be signs on the northbound A3 advising drivers to go to the M25 junction roundabout, turn around and leave the A3 southbound at Ockham Interchange for Wisley/RHS Wisley, human nature being what it is most such drivers will leave the A3 northbound at London Road B2215 and drive through Burnt Common, Send Marsh and Ripley to get to Ockham Interchange for access to RHS Wisley. So every time an event takes place at RHS Wisley we can expect even worse traffic congestion through Burnt Common, Send Marsh and Ripley which makes the building of 400 homes at Garlick's Arch on Portsmouth Road even less appropriate, and Travelling Showpeople with heavy vehicles for fairground equipment an even bigger mistake. A43 Garlick's Arch should be removed from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object wholeheartedly to the Guildford Borough Council Proposed Submission Local Plan 2017 as the information in respect of the total number of new homes required for the plan, perhaps the most important overall issue, is confusing, contradictory and, in some cases, misleading. For example:

   a. Point (1) of Policy 52 on page 30 says "During the plan period (2015-34) we will make provision for at least 12,426 new homes ...." This at least agrees with the Target figure for the number of new homes permitted and completed, under Monitoring Indicators on page 34 and the total of the Surrey Housing Market Assessment (SHMA) for Guildford.

   b. However, whilst 4.1.9a at the foot of page 30 says "The figures set out in the Annual Housing Target table (above on the same page) sum to a total of 12,426 homes" this is not correct. The figures in the Annual Housing Target table on page 30...
total 9,810, not 12,426. This causes confusion and is misleading. It appears to be because the Annual Housing Target table covers 15 years from 2019/2020 - 2033/2034. Dividing 9,810 by 15 (the number of years) gives an average of 654 pa, the same as the average for 19 years in the Guildford SHMA. The difference between 12,426 and 9,810 is 2,616 which presumably is the total for the 4 years 2015/2016 - 2018/2019 to agree with the total of 12,426 for the 19 year plan starting in 2015/2016. The figure of 2,616 for 4 years also represents an average of 654 pa. This contradicts the statement on page 31 of "a phased target that gradually increases over time ..." Although there is a gradual increase from 450 in 2019/2020 onwards, the figure of 450 represents a decrease of 31% from the average of 654 for the 4 earlier years of the plan. This is both misleading and very confusing.

c. The total for 2017 in the column Gross number of homes (approx.) over the plan period in the listings on pages 142-145 is 11,350, a totally different figure to the 12,426 found elsewhere with absolutely no explanation of the difference. The major reason for the difference seems to be that the figures quoted for site allocations A24, A25 and A26 in the listings are significantly lower than the total on the detail sheets for these site allocations/policies:

POLICY A24: Slyfield Area Regeneration Project, Guildford. "Approximately 1,500 homes of which 1,000 homes (C3) will be delivered within the plan period". The figure 1,500 is in red and so a change (an increase of 500) from the 1,000 which was the equivalent figure in the 2016 plan analysis. This is both very misleading and very confusing as the figure of 1,000 on page 143 is in black and shows no change, thereby hiding the overall increase of 500, with an apparent deferment of 500 beyond the plan period..

POLICY A25: Gosden Hill Farm, Merrow Road, Guildford. "Approximately 2,000 homes of which a minimum of 1,700 homes (0) will be delivered within the plan period ...". "Of which a minimum of 1,700 will be delivered within the plan period" is all in red and so a change from 2016, whereas page 143 shows 2,000 crossed out and replaced by 1,700. This is also very misleading and confusing as it makes it look as though there is a reduction of 300 from 2016 to 2017 whilst the overall figure is unchanged at 2,000, with an apparent deferment of 300 beyond 2033/2034.

POLICY A26: Blackwell Farm, Hogs Back, Guildford. "Approximately 1,800 homes of which a minimum of 1,500 homes (0) will be delivered within the plan period". 1,500 and the related text are in red so a change from 2016 and again what appears to be a deferment beyond 2033/2034 being made to look like a reduction in the total, which it isn't. There are also numerous instances of Gypsy & Traveller pitches and also Travelling Salespeople plots being omitted from pages 142-145 though the numbers are much smaller, totalling 38. I find all this unacceptable and so I object to the plan as a whole.

2. I object to the plan as a whole because of the unjustified focus of planned new homes in the Ripley! Send Marsh/ Burntcommon/Send area and localities as more than 40% of the total for the borough is within 3 miles of Send Marsh.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
3) I object to the housing number of: 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

It is of great importance to all those who properly care about our much envied way of life and the quiet enjoyment we have of that life, is that those elected to protect the wishes & aspirations of said electorate, comply totally with all that they were elected to do – we have just witnessed what happens when even our elected government fails to realise what the majority of the electorate expect!

The fact: The people who put you there can take you away!

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

*I would further object on the likelihood that such development in said or similar areas would eventually lead to the necessity of added facilities, amenities and infrastructure that could only serve in the destruction of our villages, rural areas and general way of life - envied by most of the rest of the world and thereby giving us one of the strongest tourist industries (and therefore large financial income) in Europe; damaging that would damage far more than just this borough’s income!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/6764  Respondent: 15438753 / Peter Fairbrass  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. *The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. *The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. *The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

*I would further object on the likelihood that such development in said or similar areas would eventually lead to the necessity of added facilities, amenities and infrastructure that could only serve in the destruction of our villages, rural areas and general way of life - envied by most of the rest of the world and thereby giving us one of the strongest tourist
*industries (and therefore large financial income) in Europe; damaging that would damage far more than just this borough’s income!*

Answer (if comment is on questions 1-7 of the questionnaire): ()

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to POLICY D1 - Making better places

- There is no reference to vernacular or historic design guidelines, even in Conservation Areas. Most of the borough, especially the rural areas, has vernacular design guidelines that are available to give suggestions as to appropriate design. These should have mandatory planning force.
- The monitoring of this policy is inappropriate. Why should this policy result in a reduction of the number of appeals for poor design?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to POLICY D3 - Historic environment

- Supports overdevelopment: you can’t “enhance” history. Doesn’t ban private interests from trying to make aggressive profits from privatising and commercialising public historic assets.
- Doesn’t ban development near historic assets.
- Development close to historical assets is harmful and should be expressly prohibited. Fails to meet the requirements of NPPF 126, 131, 132, 133.

Comment ID: PSLPP16/6784  Respondent: 15438945 / Jacqueline Davies  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to POLICY E1 - Meeting employment needs

• The evidence base is unreliable;
• There is unclear differentiation between B class uses;
• Only high value-added business uses, contributing to a modern “knowledge economy”, are desirable, not low-grade, low-employment warehousing which is also land hungry;
• Industrial and commercial businesses must be concentrated in the urban area or existing business parks (e.g. Slyfield) not in the rural environment which the infrastructure is unable to support
• The rural environment must support micro- or high-tech businesses, agricultural industries, and tourism, and these sectors must not be damaged by general industrial development which is inappropriate.

</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY E5 - Rural economy

- Incompatible with high housing numbers proposed for rural areas elsewhere in the plan.
- Insetting and settlement boundary extension endanger appropriate rural activities listed that depend on maintaining rural areas’ character.
- Town-centre uses for rural areas contradict government’s localism policy and need to consult and protect village environments.
- Established commitments to high-speed rural broadband and mobile coverage watered down despite 2014 consultation responses.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to POLICY E6 - The leisure and visitor experience

- Danger of overdevelopment: success doesn’t depend on building “attractions” which can harm heritage and rural settings. No case made for creating new ones.
- No policy of opposing reduction in rural hotel capacity.
- No definition of what added value interventions by Council can make to normal visitor market mechanisms.
- No policy of supporting Guildford countryside as its prime leisure and visitor asset, whose value rises as London gets bigger and busier.
- No vision of what the ideal visitor experience of the borough actually is and how to support its various elements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to POLICY E7 Guildford Town Centre

- No statement in policy wording of value of Guildford’s rural setting and views.
- No consideration of Town Centre Master Plan, GVG proposals or station redevelopment plans.
- Proportion of new housing in town far too small. Development pushed into countryside, ruining the latter and harming urban regeneration.
- No brownfield register.
- Too much big retail, despite online shopping revolution and decline of traditional high streets internationally. Futile to try to turn Guildford into Woking or Kingston.
- No measures to support small, niche retailers in town, e.g. through business rates.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E9

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY E9 - Local centres

- No need for retail development “adjacent” to rural centres for same reason as Policy E8.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6776  Respondent: 15438945 / Jacqueline Davies  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1
I object to POLICY H1 – Homes for all

- The policy doesn’t set any constraints on building.
- Housing mix based on growth and demographic assumptions and unreliable SHMA that weren’t put out to formal public consultation and wasn’t scrutinised by Councillors.
- I support higher density development in the urban area
- Fails to compel University of Surrey to use its thousands of planning permissions and existing space, such as car parks, for student accommodation.
- Lets University off the hook of accommodating all its students, so as to free up houses for the most needy in town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

| Comment ID: PSLPP16/6777 | Respondent: 15438945 / Jacqueline Davies | Agent: |
|---------------------------|------------------------------------------|
| Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2 |

I object to POLICY H2 – Affordable homes

- Using the official definition of Affordable is not appropriate. ‘Affordable homes’ in this area are not affordable! Pushing for these homes just means pushing for more development.
- The viability clause lets developers off the hook of providing even these (non-) affordable homes. It is too open to manipulation.
- Contradicts government policy to develop less advantaged regions of the UK. People don’t have to live and work in Guildford but should be encouraged to move to cheaper, less congested areas.
- This policy won’t affect market forces or house prices. Guildford is too small and too near London to influence these, however many homes it builds.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

| Comment ID: PSLPP16/6778 | Respondent: 15438945 / Jacqueline Davies | Agent: |
|---------------------------|------------------------------------------|
| Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3 |
I object to POLICY H3 – Rural Exception Homes

- It loosens the criteria by allowing “market housing” and development that changes the housing mix. Developers would be able to override NPPF “exceptional circumstances” and other restrictions to build large houses in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6787  Respondent: 15438945 / Jacqueline Davies  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY I4 Green and blue infrastructure

- Infrastructure considered here as an afterthought, rather than pre-condition of development. Should be a key issue for the rest of the plan.
- Excessive housebuilding in countryside not supported by any funding or provision for infrastructure.
- Heavy focus on building on greenfield sites inefficient and unnecessary: cheap for developers but much more expensive for the public who have to fund the infrastructure.
- Draft CIL scale discourages use of brownfield land first.
- No plan for organic increase in existing traffic congestion, let alone once thousands of houses are built across the countryside. Local roads hardly considered. Green Belt being eroded before road widening/improvement plans certain, encouraging over-development of greenfield sites.
- All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6779  Respondent: 15438945 / Jacqueline Davies  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY P2 – Green Belt

- No declaration of support for protecting the Guildford Green Belt, contrary to NPPF and government statements.
- No evaluation of value of local Green Belt as a public and private asset: it’s just treated as potential building land with a few inconvenient restrictions.
- Impact of Green Belt development on local agriculture ignored.
- Impact on rural leisure and tourism ignored.
- Impact on flood control ignored.
- Impact on carbon sink and knock-on effects for air pollution and climate change ignored.
- Impact on biodiversity ignored.
- Impact on natural heritage ignored.
- Impact on water catchment ignored.
- Impact on room for public space amenities (parks, cemeteries, waste facilities etc) ignored.
- Impact on rural business (e.g. mineral mining, film making) ignored.
- Impact on natural landmarks and views ignored.
- Harm to public health and wellbeing (physical, psychological) ignored.
- Allows excessive levels of development in breach of views expressed in last consultation and Conservative Party manifesto commitments at the last local elections.
- Has allowed ruling Councillors to argue that there is an acceptable percentage of Green Belt that should be sacrificed to development, when no such rule exists in the NPPF.
- Ignores alternative approaches, such as fair burden-sharing under which settlements would undertake to accommodate new development in proportion to their size.
- Disproportionate amount of development (most of it, in fact) to be in Green Belt. Too few new homes in urban areas where most people (especially the young and less privileged) want to live. This will act against much needed urban regeneration.
• “Insetting” of most villages disproportionate and unjustified in terms of their contribution under the NPPF to the purposes of the Green Belt. Based on flawed Green Belt and Countryside Study. Idea that most Guildford villages do not contribute to “openness” is subjective.
• Major settlement extensions allow indiscriminate housebuilding, as irregularly shaped villages are squared off to enclose green fields.
• Overall harm to Guildford Green Belt unjustified by any objective development need post-Brexit.
• Ignores most of NPPF 17 stipulations.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**I object to POLICY S2 –Borough Wide Strategy**

- No justification given for 13,860 housing need figure. Figure based on a secret formula used by consultants and never seen by anyone on the Council or by the public. Council has failed to seek its disclosure.
- 13,860 figure confuses the OAN with a housing target. No definite housing target given, leaving too much scope for the Council to make one up. I can’t understand how we’re being consulted when we don’t know how many houses the Council want to build, taking all the constraints into account.
- Figures based on a Housing Market Area that ignores 2 neighbouring districts (Rushmoor and Mole Valley) and is much too small, since most people commute or travel far outside the Area to shop or study. This distorts the figures: no reason why Guildford needs to build nearly twice as many large housing estates as the rest of Surrey put together, or half of all sites over 100 units.
- High numbers involved would transform the character of the borough from mainly rural/Green Belt to urban, creating a corridor of development out of London as per Woking or Croydon.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

### Comment ID: PSLPA16/1626  Respondent: 15438977 / William Stiff  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**Objections to Guildford Borough Council Proposed Local Plan (June 2016)**

**I object to the draft Local Plan for the following key reasons:**

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ig
2. I object to the removal of the Horsleys and the Former Wisley Airfield (FWA/TFM) from the Green Bel The later site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the Horsleys and FWA/TFM from the Green Belt.
3. I object to the housing number from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent .I understand that plan includes a figure which is almost 70% higher than the official national estimates for population growth in the Borough.
scale of this increase has alarming results for example an increase of up to 35% in existing West Horsley households - greater than any other single area in the Borough.

4. The infrastructure in the Horsleys and Ockham are already in overload. The local schools are full and the medical facilities are Drainage in inadequate and roads and car parks are overloaded with little or no scope for improvements.

5. I object to the disproportionate allocation of housing in the immediate localities of Ockham, Ripley, Send and the Horsleys.

6. I object to the threat the Local Plan poses to the historic rural villages of Ockham and the Horsleys and the blight on properties These are villages would change considerable with 2,000+ dwelling development at Wisley and the additional housing proposed on the Horsley sites.

7. I object to the detrimental impact on transport, local roads and road I specifically object to:
   1. The assertion that the Wisley development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of around 2,600 homes in the Horsleys and Ockham would result in an estimated 5,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the Wisley site would add additional congestion at the M25/ A3 junction as well as local roads.
   6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

8. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the FWA/TFM site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

9. I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

10. I object to the fact that the proposed plan does not meet the needs and desires of local communities.

11. I object to the continued inclusion of a site (the former Wisley Airfield,- now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd.’s (WPI) planning application was unanimously rejected by GBC on 8th April2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and Allocations A35,A36,A37, A38,A39, A40 and 41are removed from the Local Plan with immediate effect.

Objections to Guildford Borough Council Proposed Local Plan (June 2016)

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Horsleys and the Former Wisley Airfield (FWA/TFM) from the Green Belt. The later site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the Horsleys and FWA/TFM from the Green Belt.

3. I object to the housing number from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent. I understand that plan includes a figure which is almost 70% higher than the official national estimates for population growth in the Borough. The scale of this increase has alarming results for example an increase of up to 35% in existing West Horsley households - greater than any other single area in the Borough.

4. The infrastructure in the Horsleys and Ockham are already in overload. The local schools are full and the medical facilities are under strain. Drainage is inadequate and roads and car parks are overloaded with little or no scope for improvements.

5. I object to the disproportionate allocation of housing in the immediate localities of Ockham, Ripley, Send and the Horsleys.

6. I object to the threat the Local Plan poses to the historic rural villages of Ockham and the Horsleys and the blight on properties. These are villages would change considerably with 2,000+ dwelling development at Wisley and the additional housing proposed on the Horsley sites.

7. I object to the detrimental impact on transport, local roads and road transport. I specifically object to:
   1. The assertion that the Wisley development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   2. The increased volume of car traffic. A proposed development of around 2,600 homes in the Horsleys and Ockham would result in an estimated 5,000 additional cars on the roads.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the Wisley site would add additional congestion at the M25/A3 junction as well as local roads.
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

8. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the FWA/TFM site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
9. I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

10. I object to the fact that the proposed plan does not meet the needs and desires of local communities.

11. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd.'s (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and Allocations A35, A36, A37, A38, A39, A40 and 41 are removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• Development of over 2,000 house village at Ockham (former Wisley Airfield)

The impact on the Horsley villages of such a huge mixed housing, retail, commercial, traveller and schools development, under 2 miles away, would be enormous.

The plan also includes extensive developments at Burnt Common (400 houses & commercial developments) and Gosden Hill Farm, Burpham (2000 houses & mixed use developments).

• Major doubt concerning housing numbers

The inflated number of new houses proposed arises from a Strategic Housing Market Assessment (SHMA) that was generated by a consultant's mathematical model which is not revealed in the plan. Nor, apparently, to Guildford Borough Council, GBC.

This SHMA target housing number is then further increased by GBC to give a population increase which is almost 70% higher than the official national estimates for population growth in the Borough.

The scale of this increase has alarming results e.g. an increase of up to 3 5% in existing West Horsley households - greater than any other single area in the Borough.

My objection is on the grounds that traffic in the area (particularly along the A323) is already bad particularly in rush hour, and an increase by more than 2400 houses will only worsen this congestion.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The reason we moved to this area was due to the Green Belt area, and these additional homes will virtually make one large new town between Aldershot and Guildford.

I don't believe sufficient plans have been made for infrastructure to support this increase, not only for traffic but also for vital services such as doctors and a hospital. Local surgeries are already under strain with waiting times of up to 2 weeks for non urgent appointments, this can only get worse. Issues with being able to park in Ash Vale to shop already demonstrate how quickly a trouble free trip to the shops can become a nightmare as it has been impossible to park on some occasions since the opening of the Co Op in place of Budgens, there will be far greater requirements for this type of shopping, and no plans for appropriate additional shops or parking.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

The Council will not publish the SHMA report so this figure cannot be verified? This lack of transparency is not right for consultation on the Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq. m proposed. That site was removed from the Plan without any reasoning?

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable

Answer (if comment is on questions 1-7 of the questionnaire): ()
Garlick’s Arch is protected from development as Green Belt. There are **no exceptional circumstances** which allow for its removal from the Green Belt (Policy P2). Central Government states clearly that housing need is **not** an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.
