Guildford borough Submission
Local Plan: strategy and sites

Regulation 19 consultation representations
(ordered by respondent ID number)

December 2017

Document 8 of 10
Respondent ID numbers 15496001 to 15599329
## Contents

1. Respondent 15496001  
   1
2. Respondent 15506401  
   500
3. Respondent 15576513  
   1000
4. Respondent 15587041  
   1500
Proposed Submission Local Plan Regulation 19 representations (2016 and 2017)

Comment ID: PSLPA16/2550   Respondent: 15496001 / Ryan Hookind   Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

11. I object to lack of transparency regarding the evidence report by GL Hearn and thereby any verification of SHMA figure of 693 homes per annum.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5192   Respondent: 15496001 / Ryan Hookind   Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A25 Gosden Hill as being totally inappropriate and unsustainable development of 2000 homes in the GreenBelt which will cause coalescence and urban sprawl from Burpham to West Clandon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5135   Respondent: 15496001 / Ryan Hookind   Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy A35 Former Wisley Airfield as being totally inappropriate and unsustainable development of 2000 homes in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4890  Respondent: 15496001 / Ryan Hookind  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 land at Burnt Common Ware house which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4973  Respondent: 15496001 / Ryan Hookind  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A43a, the proposed on/off ramps to the A3 at Burnt Common as this will inevitably cause traffic chaos on the local road network throughout Ripley, Burnt Common, Send and West Clandon, with absolutely no possibility of mitigation due to the nature of our rural roads and lanes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5079  Respondent: 15496001 / Ryan Hookind  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A45

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A45 The Talbot Ripley as this is over development in an open space within the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5012  Respondent: 15496001 / Ryan Hookind  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A57

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A57 The Paddocks for the provision of 4 travellers pitches in Rose Lane as this is in excess of current requirements within the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10343  Respondent: 15496001 / Ryan Hookind  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to all insetting of villages from Green belt, in particular for Ripley, Send Marsh/Burnt Common, Send and East/ West Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
10. I object to development in areas which are at risk of flooding such as site A43 Garlick's Arch which is designated as flood zone 3 by the Environment Agency

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I object to the local plan as the proposal of 13,860 homes proposed will not be sustainable and it will have a permanently detrimental effect by overdevelopment in existing communities, in particular Ripley, Send, East/West Horsely and West Clandon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

I object to policy A57 The Paddocks for the provision of 4 travellers pitches in Rose Lane as this is in excess of current requirements within the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
10. I object to development in areas which are at risk of flooding such as site A43 Garlick's Arch which is designated as flood zone 3 by the Environment Agency

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10104  Respondent: 15496193 / Oliver Hemmings  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the local plan as the proposal of 13,860 homes proposed will not be sustainable and it will have a permanently detrimental effect by overdevelopment in existing communities, in particular Ripley, Send, East/West Horsely and West Clandon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10429  Respondent: 15496193 / Oliver Hemmings  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

9. I object to the disproportionate amount (36%) of all proposed development being in one area of the borough from Wisley to Burpham creating a narrow ribbon effect along the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2546  Respondent: 15496225 / Tasha Hemmings  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base
11. I object to lack of transparency regarding the evidence report by GL Hearn and thereby any verification of SHMA figure of 693 homes per annum.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5195  Respondent: 15496225 / Tasha Hemmings  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

11. I object to Policy A25 Gosden Hill as being totally inappropriate and unsustainable development of 2000 homes in the GreenBelt which will cause coalescence and urban sprawl from Burpham to West Clandon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5141  Respondent: 15496225 / Tasha Hemmings  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

11. I object to Policy A35 Former Wisley Airfield as being totally inappropriate and unsustainable development of 2000 homes in the GreeBelt.

1. I object to the local plan as the proposal of 13,860 homes proposed will not be sustainable and it will have a permanently detrimental effect by overdevelopment in existing communities, in particular Ripley, Send, East/West Horsely and West Clandon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Whilst I do not live in the borough of Guildford I do none the less have a very deep interest in the area as I live on the borders and in particular live close to the Wisley site and as a result have an in depth knowledge and respect for this area. I am therefore writing in connection with the above draft local plan to which I wish to express my objections for the following reasons:

- I object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford. The Green Belt was set up specifically to prevent this kind of urban expansion.
- No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.
- There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
- I object to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.
- I object to the threat the Local Plan as drafted poses to the historic rural settlements of Ockham, Hatchford and Downside.
- The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- Hatchford, south of the M25, has some 60 residences off narrow Ockham Lane that would be greatly affected by the proximity of development.
- I object to the potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development.
• The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions.
• Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).
• There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion.
• The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.
• I object to the issue of air quality not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.
• I object to insufficient consideration being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCl).
• The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.

Objections are supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified the serious concerns now being highlighted.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We wish to record our objection to the inclusion in the Guildford Borough Council draft Local Plan (June 2016) of the former Wisley Airfield as a potential development site. This site is Green Belt land and there is no need for its development as there are brownfield sites in urban areas that could be regenerated.

A development of 2,000 dwellings would have a significant effect on the surrounding villages, towns and roads. We live in Cobham and this would be the site’s nearest shopping centre. Cobham is already congested and there is insufficient parking.
The environmental effects of increased traffic have not been given sufficient consideration. Air quality would be affected and this site and areas around it have significant ecological value.

The application no. 15/P/00012 was unanimously rejected by Guildford Council Planning Committee in April 2016 so it is unsettling to see the site included in the Draft Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to submit some general comments on the local plan:

1. Jacobs Well greenbelt - I object to Jacobs Well and Blanchards Hill being removed from the greenbelt with the resulting presumption in favour of building houses. Firstly, the rural character of the area will be ruined by the removal of the surrounding fields and green areas.
2. Secondly, the area is not well equipped infrastructure wise to deal with the increased traffic and people that increased housing would lead to. Clay Lane, Jacobs Well Road and Blanchards Hill are already extremely busy roads. Blanchards Hill has no footpath and is 40mph making it dangerous for there to be further traffic and pedestrians. Although if it is removed from the green belt then I would expect the road safety to be investigated and a 30mph limit put in place along the road as per most residential non green belt roads.
3. I also object to infilling and adding houses to the Jacobs Well village when there is no other infrastructure to support this. It is already the case that living on Blanchards Hill we cannot be certain of which primary or secondary school our child would be able to attend and this uncertainty would only increase if further houses were to be built. In general if more houses are to be built across the borough then schools designed for the
villages (inset or not) need to be built or existing nearby schools expanded. For example, our nearest primary school is Burpham at 0.9 miles but we are highly unlikely to receive a place and children from Jacobs Well village are forced to go to schools all over Guildford which is unacceptable and difficult for working parents. For secondary school the rules are even more ludicrous as the existence of a relatively small Church of England school, Christs College, as our nearest school, which takes 50% of christian faith and then children from several feeder schools first means that our child cannot reasonably be likely to be offered a place at this school in most if not all years. However the "nearest school" criteria used by most other schools (for example our second nearest, George Abbott) then means that we would not get into another nearby school either. Therefore until the schools situation for villages like Jacobs Well is fixed or the local schools are forced to change their admittance criteria so as to cater for people in such villages without them being left to have a place in whichever dire school still has places left each year, then I do not think that further houses should be built in such areas.

4. There are also no other facilities in Jacobs Well such as doctors etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Clay Lane link road

I object to the building of the clay lane link road from Slyfield to Clay Lane. I have previously provided detailed reasons why I object to this but briefly, Clay lane, Blanchards Hill and other local roads are already very busy and dangerous, particularly at rush hour. Blanchards Hill is a rural road with no footpath and would be particularly more dangerous if traffic was to increase. A lot of the houses along all roads are very close to the road and therefore resulting increase in heavy traffic would be detrimental to the buildings as well as causing disruption to the inhabitants. It would also ruin the nature of the area by making it a busy thoroughfare rather than a village where people live.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 land at Burnt Common Ware house which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to take this opportunity to express my views of your proposed developments in the village in which I live (West Horsley) and it's surrounding areas.

I, like many other villagers moved here (30 years ago) deliberately because of the green belt and the village settings. Over the years I have seen modernisations and developments of the area but I feel extremely strongly about this latest proposed plan due to its size - East & West Horsley and the other villages detailed in your scheme would become more like towns than villages without adequate infra structure in place nor the ability to extend or develop the necessary infra structure to meet the proposed requirements. The effect on the roads - lots of them currently in poor condition with pot holes therefore the impact of heavy machinery to construct the developments alone would be extremely detrimental to the roads, then combine this with the extra traffic long term due to volume of people, would create chaos especially in current bottle necks, created by previous expansion, at peak times especially. The roads around the villages are narrow and many of them built up on either side yet some of the developments in the proposed plan intend to increase traffic on these, turning them into main thoroughfares as opposed to the country lanes to gain access only to the houses they were constructed for and in some instances with a knock on effect on roads adopted by the residents; totally unacceptable!. The safety of drivers, pedestrians and cyclist will be put at risk due to the proposed volume of vehicles - some roads have no pavements, the bends in the roads make it hazardous as it is for drivers and cyclist alike (whose numbers have hugely increased, more so recently, if these developments go ahead it will be an accident waiting to happen. Rarely a day goes by now without hearing one of the emergency services dashing along the A246 this has only come about in recent years due to the increases of population. Some of the sites chosen for development are on busy bends and even of the approaches are not directly on these bends they will clog up the narrow village roads leading up to them!

The schools are already enlarging their buildings to accommodated expected increases in current numbers and their sites are restricted to how much if any further development would be possible. The village school has been sold for housing in the past so even this will not be an option for taking some year groups of pupils. The entrances to both the Raleigh and The Howard of Effingham are in a built up area that currently struggles to cope with the increased volume!

As for the knock on effect on the other amenities/services such as the Doctors surgeries, shops, library, car parking to enable use of the amenities, railway travel and utilities it will be put a tremendous strain on already overburdened services.

I would therefore request that the proposed plans for the villages are carefully reconsidered for the above mentioned reasons and would ask that the nature of our chosen villages are not allowed to be destroyed/changed for ever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Whilst the proposal for 2000 houses at Wisley does not directly affect Horsley residents, it will surely increase traffic through the Horsleys and therefore the A3 and A246, both of which suffer regular congestion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

My main concern is the impact that such a considerable increase in housing will have on the roads around the villages of East and West Horsley and Ockham. The roads, frequently narrow and already poorly maintained will become much more congested. Cyclists (encouraged to use the local roads by SCC and GBC) and pedestrians will surely be put at risk.

Parking is very limited at Horsley Railway Station and Bus Services are unlikely to be increased to accommodate such a large increase in population.

The proposed developments will surely place a great strain on schooling. Even if extra places can be found at local schools on their small sites there will again be problems accessing the sites.

Clearly I have not been made aware of all the detailed plans for local amenities and services but it is impossible to believe that sewage, telephone, medical, libraries, broadband, shops and policing will be increased to a level that can sustain such a large increase in population. Indeed, many of these services have been reduced in recent years.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Whilst there may well be a need for some increase in housing within the area, the sites chosen for discussion and the number of houses proposed seems to be ill considered. Thatcher’s Hotel and Bell and Colvill sites seem particularly inappropriate given they are already bottlenecks. Others are sited on minor roads.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 land at Burnt Common Ware house which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to the Guildford Borough Council Proposed Submission Local Plan (June 2016)

I hereby wish to put forward my sincere objections to Guildford Borough Council’s Draft Local Plan regarding the proposed developments in the village of Send. I believe that this plan is not in compliance with the regulations with which it is required to comply. The proposals with which I object are outlined below followed by my considered reasons for this objection.

<table>
<thead>
<tr>
<th>A42</th>
<th>Clockbarn Nursery, Tannery Lane, Send</th>
<th>Send</th>
<th>Homes (C3)</th>
<th>45</th>
</tr>
</thead>
<tbody>
<tr>
<td>A43</td>
<td>Land at Garlick's Arch, Send Marsh Burnt Common and Ripley</td>
<td>Send and Lovelace</td>
<td>Homes (C3) and employment floorspace (B1c, B2, B8)</td>
<td>400</td>
</tr>
</tbody>
</table>
Aside from the obvious issues of destruction of wildlife habitats and decrease of biodiversity if these plans go ahead, the Green Belt land on which these proposed developments are intended to be built is necessary in the protection of identities of small rural villages such as Send. By building so many new houses and industrial premises on this land and adding to urban sprawl, the village of Send will begin to merge more and more with the towns of Woking and Guildford, losing its current charm and negatively impacting the lives of the residents in this area. As Send is a rural village, building new houses in the area will be likely to attract more families which will likely bring at least one-two cars per household, therefore drastically increasing the number of cars on the small local roads. This, coupled with the proposed new slip-roads on and off the A3 and new employment floor space will create more traffic and congestion than the local roads around the village are able to support. The new slip-roads will also add another entrance onto the busy A3, potentially increasing the amount of accidents on this stretch of road, especially at peak times where the A3 is busy enough as it is. Congestion on the local roads is also an issue currently, as are the road surfaces around Send which are already in poor condition. Adding an extra 485-970 plus cars onto this area, not even including those who will be travelling to the new employment space, will considerably worsen both of these issues. These extra cars will also give off more air pollution, which will negatively affect any remaining wildlife that has not already been lost by the reduction of the Green Belt. It is impossible to solve the already prevalent issues regarding the roads by adding more cars into the equation, so therefore these proposed developments are ridiculous, only adding to existing issues without benefitting the community or the environment in the slightest.

It is not only the roads and wildlife that will be negatively affected by the proposed developments but the infrastructure currently in place in the area will not be able to cope with increased strain on their services. As I have already explained, rural villages such as Send attract young families, especially if they are close to large towns, such as Guildford and Woking in this case, which provide good facilities and transport links. The proposed new houses would therefore be a prime location for young families, requiring schools and healthcare and the small village of Send would not be able to withstand the increase in demand of these two primary infrastructures. There is only one primary school and one junior school in Send and these local schools are not large enough to be able to cope with many more students as there simply would not be enough places to be able to accommodate them all. Likewise, The Village’s Medical Centre already struggles with being able to provide enough appointments for the current population of Send; any increase would make it much harder for those who need medical appointments to be able to arrange them. Your proposed developments of 485 homes and the traveller site does not account for these issues and even on the unlikely proviso of there being one resident per new household, this would severely increase the strain on these services, again not benefitting the community in any way. It is for these reasons that I believe these plans to be ill-conceived and I strongly object to the developments.

I hope you will consider my reasons for objection and see that these developments cannot take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick's Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham's sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England's requirement of 2km.
Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an "aspiration" in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site.

There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)
It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3).

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick's Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick's Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the loss of rural employment (Policy E5)

Policy ES supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. Tourism and visitors do not depend on new visitor "attractions" and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/"Disneyficati on". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many "leisure and visitor attractions" already. The case for creating more is not made and no examples are given. Instead, the plan's explicit priorities should be:

1. To protect the borough's prime leisure and tourism asset, its countryside, from inappropriate This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

1. To help make Guildford's river landscape less off-putting and support town-break packages for high-value touri To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

2. To help private providers market local This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An "English town break" (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

1. To rule out the redevelopment of scarce rural hotel sites (g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT (POLICY H1 - Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council's timidity is a case of "regulatory capture" by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog's Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the "mix" this can include "market" housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to the lack of proper infrastructure planning for sites.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents' in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy 12)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

| Comment ID: PSLPP16/10209  Respondent: 15497505 / Jyoti Nanda  Agent: |
| Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3 |

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a 'special circumstance' and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change ver the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| **Do you consider this section of the document; complies with the Duty to Cooperate?** | ( ) | **is Sound?** | ( ) | **is Legally Compliant?** | ( ) |
| **Answer (if comment is on questions 1-7 of the questionnaire):** | () |
| I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1) |
| The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy. |
| The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities. |
| The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided. |
| The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result. |

| **Answer (if comment is on questions 1-7 of the questionnaire):** | () |
| I OBJECT to the Borough Wide Strategy (Policy S2) |
| The borough wide strategy is poorly It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey. |
The Housing number is based on pre-Brexit data for economic and population growth, including These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the "West Surrey" tri-borough area of Guildford, Woking and An HMA should be an area within which a majority of people live, work, shop or study. On any commonsense view, "West Surrey" is much too small. Half of Guildford borough's residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside "West Surrey". Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make "West Surrey" reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour's "need". Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey's 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to strongly object to the proposed building of homes on Blackwell Farm, Guildford.

The volume of traffic that these homes will generate will be enormous in an already heavily congested area. On top of that is the dangerous high pollution levels that will result in the extra traffic.

Where and how will the infrastructure be located and supplied? These are services in short supply already.

It may have been more acceptable for a far reduced number somewhere but the fact that Guildford Borough Council is proposing to add 25 percent of its current housing level and 69 percent of that proposed build will be on green belt is outrageous. How convenient that an area that was always deemed an area of outstanding natural beauty is suddenly reclassified so homes can be built on it - very handy! Money is obviously the ruling factor here.

So just in case you are in any doubt I feel very strongly about this and object in the strongest way possible.

These comments on the Proposed Local Plan (“the Plan”) are submitted by Wanborough Parish Council. They relate to the proposed developments to provide 1800 homes etc. at Blackwell Farm and 1100 homes etc. on “land to the South of Normandy and North of Flexford”.

Under the Infrastructure Act 2015 the Dept of Transport has published a Road Investment Scheme and we note that this is government funded and “ring-fenced”. However that commitment was made before the vote to leave the European Union and there must be some question as to whether those commitments will still be honoured. Within our area we note that there are three road schemes: 1) To commence in 2015-2020 - upgrade of Junction 10 M25/A3 interchange, and 2) Upgrade M25 to four lanes junctions 10-16, 3) To commence 2020-2025 – improve A3 from A320 to A31 ie through Guildford. It is said that this could involve a tunnel or road widening scheme but is subject to a feasibility study.

Pages 108-114 of the Plan appear to acknowledge that improvements to the A3 must be made before the two developments referred to above can proceed. Can you please confirm that this is the position? If not, we consider that the proposed developments are entirely inappropriate, as the existing road infrastructure cannot cope with present traffic flows, let alone the addition of vehicles from the proposed 2900 new homes.

We note the proposals in respect of Blackwell Farm, including the “Sustainable Movement Corridor” for buses, bikes and pedestrians and a new station by 2018-19. That date looks very optimistic and the station is dependent on funding from Network Rail. Is that funding secure and confirmed?. As for roads, we note that there will be one into Guildford via the Hospital, but the main road access (and in our view a fatal flaw with this proposed development) will be by a junction from the A31 controlled by traffic lights or to quote the Plan “via the existing at a realigned junction of the A31 and the Down Place access road signalised”. The A31 as it approaches the A3 is gridlocked for large parts of each working day from 6 am onwards. Traffic lights and the additional traffic from the proposed Blackwell Farm (and Normandy/Flexford) development would only exacerbate the existing extreme congestion.

We also have considerable concerns in relation to how the proposed Normandy/Flexford development will impact on the road infrastructure. We note the proposed cycleways and “opportunities to improve Wanborough Station”, and that “interventions will be required” to mitigate highway performance issues. We are however very concerned at the lack of any detailed proposals. The reality is that traffic flows through Wanborough and up Wanborough Hill will increase considerably. The junction at the top of Wanborough Hill with the B3000 is already unable to deal with present traffic flows, as is the junction with the B 3000 and the westbound slip road from the A31.

We note from Appendix C that Guildford Station will get improved capacity and interchanges between 2024 and “post plan period”. It appears that these will be delivered between 2018 and 2029 (elsewhere it says 2018/19, see above). What is the timescale and is the funding agreed and secure?

We are also confused by the proposal that the A3 slip roads at Tesco will be widened between 2017 and 2020. How does this fit with the proposal to widen the A3 or put it in a tunnel?

Having given careful consideration to these two proposed developments we are of the firm view that neither of these developments should be given further consideration unless and until viable road and rail transport solutions have been properly planned and full funding put in place.

I OBJECT to the disproportionate amount (36%) of all proposed development being in one area of the borough from Wisley to Burpham creating a narrow ribbon effect along the A3

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Guildford Local Plan 2016

Because I am visually impaired I am unable to interact with your online feedback system. Therefore, please accept this written submission containing my general comments on the broad strategy.

1. Just how much green belt do we require for the rejuvenation of our souls? As a keen dog walker I am struck by how under-used our green belt is. Considering there is something like half-a-million people living within 5 miles radius of Guildford it is odd how few people I meet when out with my dog - up St Martha's, the Chantries, or Newlands Corner - with regard to the latter there are more people sitting in cars than out walking. I meet more dog walkers in Sutherland Park than in the previous mentioned beauty spots.

2. There is a large amount of over-rated green belt - more scrubland than stimulating green environment. The quality of green environment matters more than mere quantity. So guard our Surrey Hills with all your might but there is a great deal of so-called boundary or in-between zones that do not constitute stimulating environment.

3. Although there is a great deal of green belt that could be declassified, I am not saying it should all be built on. It is vital to get the density of housing right. It is essential to have adequate availability of park space for sport and social activities. Most people are not looking for one hour walking trails but rather ten to twenty minute walks space where they can get away from traffic noise. Merrow Downs might not be groomed for football but it serves as a very pleasant walking and picnic space.

4. Another aspect of the local Green Belt worth preserving (and developing) are the various water meadows. These are marvellous for the variety of wildlife they support. No doubt these water meadows play a part in flood management.

5. Planners just have to come up with a figure for the ratio of housing to recreation space and stick to it. Green belt restrictions are forcing developers to pack houses into small pockets of Brownfield sites with the result houses are becoming too small for effective family living and with inadequate parking spaces. Green Belt restrictions are acting as a choke on the quality of the housing stock. Retirees need bungalow type houses that are all on the flat. This is not so efficient in terms of land use, but such houses are in short supply.

6. It is depressing to hear the whining of the Nimbies. All they want is their green surroundings retained for their status quo. If their views were acted on all house building would come to a halt. This clearly would be a farcical situation. After all, probably half the population of the wider Guildford area are living in houses that were built on pristine green fields within the last 60 years.

7. Obviously, issues of adequate infrastructure, environmental sustainability and flood management have to be recognised and catered for. But we are talking about housing developments taking place over the next twenty years. GBC has to come up with impact statistics and published proposals for dealing with these challenges in advance of the new township developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposal for the development of Garlick’s Arch (Policy A43). 400 homes and an industrial unit are not wanted. Industrial, commercial and personal vehicles will increase traffic beyond an acceptable level for the area. Access roads at Burnt Common are not wanted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4896  Respondent: 15497857 / Elisabeth A Hawkey  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

I also object strongly to Policy A46 Land south of Normandy and north of Flexford being build upon. It is an inappropriate size of development housing and school in an area of rural roads, two small railway bridges and it is totally unsuitable to increase the traffic on these unclassified roads. I lived there for the first 20 years of my life. I know the beauty the area has, this should not be sacrificed to increase housing. The congestion to surrounding villages is totally ridiculous. The infrastructure in this borough is not there to cope with 1000+ homes. Is there a need for this school?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10185  Respondent: 15497857 / Elisabeth A Hawkey  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
I object to the number of homes you propose to build will inevitably put strain on the current infra-structure including highways, schools and GP surgeries. I understand that there are not enough secondary school places for the current number of young people and GP Practices do not have the resources to expand.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the use of Green Belt land the protection of which, was and still is, a Government priority. Guildford Borough Council are stealing it from under our noses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the limited consultation period.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4901  Respondent: 15497889 / Hugo Wadey  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43a, the proposed on/off ramps to the A3 at Burnt Common as this will inevitably cause traffic chaos on the local road network throughout Ripley, Burnt Common, Send and West Clandon, with absolutely no possibility of mitigation due to the nature of our rural roads and lanes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4902  Respondent: 15497889 / Hugo Wadey  Agent:

<tr>
<td>Objection to Guildford Borough Council draft Local Plan (June 2016) and to the inclusion in the Plan of Site Allocation A35 - the Former Wisley Airfield - for a new settlement with 2,000 dwellings</td>
</tr>
<tr>
<td>I object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford. No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt. There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.</td>
</tr>
</tbody>
</table>
I object to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham and also the threat the Local Plan as drafted poses to the historic rural settlements of Ockham, Hatchford and Downside.

I object to the potential harmful impact on transport, local roads and road safety by the suggested developments. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development. The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions. The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.

I object to the issue of air quality not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.

I object to insufficient consideration being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objection to Guildford Borough Council draft Local Plan (June 2016) and to the inclusion in the Plan of Site Allocation A35 - the Former Wisley Airfield - for a new settlement with 2,000 dwellings

I object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford. No
exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt. There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.

I object to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham and also the threat the Local Plan as drafted poses to the historic rural settlements of Ockham, Hatchford and Downside.

I object to the potential harmful impact on transport, local roads and road safety by the suggested developments. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development. The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions. The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.

I object to the issue of air quality not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.

I object to insufficient consideration being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
happen elsewhere, where no natural beauty will be needlessly destroyed.

I do understand that there is a need for housing, but cannot fathom why it needs to be here. Particularly considering my next point:

2. **Infrastructure**: The Horsleys cannot realistically cope with the proposed increased population: the narrow roads, limited parking, sewage systems, drainage, the already full train station parking lot, to name just a few. Where would an additional (minimum of) 533 cars go?

3. **Schooling**: A significant personal objections is that I live within 2 miles of the local school and my child cannot get in, due to it's increasing over subscription. By no stretch of the imagination will Horsley be able to school any more children. This is a great great pity as it stands already. Why would we want to make this any worse??

4. **This is a peaceful village**: with a wonderful sense of community, a treasure so uncommon in today's world. People move and stay here to enjoy and appreciate the quieter village lifestyle. The development of chain stores and other facilities would ruin it for the existing and proposed homes.

I hope that you will kindly consider these points.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

I am writing with respect to the GBC draft Local plan which I strongly oppose.

I strongly disagree with building on Green belt land.

**In no way would the current infrastructure support the number of houses proposed in East and West Horsley.** Horsley station is already congested. The medical centre is barely sufficient for the number of people already living here. The Raleigh school is bursting at it's seems. The roads could not cope with such a traffic increase.

I appreciate the need for housing however, I think it is important that we protect the green belt for generations to come. I love London but I chose to move out to the Horsleys to give my children green open spaces and the chance to be brought up within a small rural community.

I sincerely hope that you take account of this letter, and of the many other people who I know are unhappy with your local plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Please find below my objections to the Guildford Local Plan.

West Horsley is defined by Guildford Council as a Green Belt Village.

Policies in the Governments National Planning Framework (NPPF) require that new building is regarded as inappropriate in the Green Belt.

These Policies also say that only limited infilling with Housing is appropriate.

Neither of these policies support substantial new development in the green belt.

The Councils Proposals total some 500 new dwellings in the green belt, which is clearly contrary to the above policies.

Previous objections to the Local Plan by West Horsley residents have been totally ignored by the council, who have shown no community engagement in producing the current plan with the increase in housing and the expansion of the village contrary to their wishes.

In producing the new Local Plan larger sites are proposed west of Guildford to reduce the pressure on the green belt. No benefit is evident to the residents of West Horsley from this reappraisal and in fact an increased requirement for housing in their green belt is proposed.

The existing roads, schools and health facilities have no plan for funding set out in the plan to address 500 new houses.

Several of the new sites proposed extend the built area out into the countryside, which is clearly damaging to the Green Belt where any new building is regarded as inappropriate in government policy.

The council are proposing new village boundaries which extend the built area outwards into the green belt, again clearly damaging to the Green Belt where any new building is regarded as inappropriate in government policy.

The proposed new development has been focussed on West Horsley with no Special Purpose being defined as required by policy to promote development in the green belt.

The protection of Birds in the special protection area near Wisley requires special consideration within 5 km. All of the sites in West Horsley and the site at Wisley Airfield are within this 5km. Any new development requires the possible effect on the birds to be addressed by the provision of alternative open space to draw residents away from Wisley. Effingham Common has been identified to serve this propose but in order to be usable for this purpose it requires a public car park.
which it has not got. Common Rights and planning permission issues may well stop this ever coming forward. This puts in doubt the feasibility of the sites in the long term.

For all of the above reasons I object to the Local Plan and request that the minister addresses the green belt points and confirms that West Horsley remains a green belt village, recognises the uncertainty relating to the protection of the birds and that as a result removes the pink coloured sites as development sites from the plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the disproportionate amount (36%) of all proposed development being in one area of the borough from Wisley to Burpham creating a narrow ribbon effect along the A3

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I am a frequent visitor to the borough, working in Guildford and visiting relatives in Ockham where I grew up. I am writing to object to the draft Local Plan for the following key reasons:

1) There is plenty of brownfield land in the borough which should be regenerated before Green Belt land is even considered. I therefore object to the plan for such a huge amount of new housing to be built on Green Belt land.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. Development on the site will create an urban corridor stretching from London to Guildford. I don't believe there are any exceptional circumstances which warrant removing the land from the Green Belt under the NPPF.

3) I object to the excessively high number of houses to be built per year -693. This is more than double the figure used in previous plans and there is no clear reason for the dramatic increase.

4) I object to the threat to the village of Ockham and the blight on properties there. The plan calls for a small village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development.

5) I object to the negative impact on transport, local roads and road safety. I specifically object to:
1. The suggestion that the development will result in a meaningful shift to cycling and walking. The development is too isolated for people to give up their cars.
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads.
6. The lack of suitable public transport. The Guildford Waterloo rail route is already hugely overcrowded and cannot cope with the proposed increase. Car parking at the stations is already at capacity.

6) I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) when the planning application has already been rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I request that these objections are fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/10244   Respondent: 15498529 / Donna Smith   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policies E7 Guildford Town Centre and E9 Local Centres.

1. Introduction
1.1 We have considered the above policies with regard to the principles set out within the Framework. Local Plans should “plan” positively for development; be justified; effective; and consistent with the Framework. Policy E7 and E9 are therefore considered not sound.

1.2 We consider that limiting the number and location of hot food takeaways in such a way would be unsound. By way of overview, the Framework provides no justification at all for using the development control system to seek to influence people’s dietary choices. Minimal justification has been issued for 500m exclusion zone, and there is no evidence to justify such an approach.

2. Policies E7 and E9 are not positive, justified, effective or consistent with the Framework.

2.1 Restricting the location and concentration of new A5 proposals within the Borough is not a positive approach to planning. The Frameworks “foreword” promotes sustainable development this is about positive growth, making economic,
environmental and social progress for this and future generations.

2.2 As worded, the policy E7 takes an ambiguous view of A5 uses in relation to schools. It applies an over-generic approach to resist development with little sound planning reasoning or planning justification. This is contrary to Para 14 of the Framework which advises authorities to positively seek opportunities to meet development needs of their area.

2.3 The policy is inconsistent with Para 19 and 21 of the Framework. Para 19 states:

Planning should operate to encourage and not act as an impediment to sustainable growth. Therefore significant weight should be placed on the need to support economic growth through the planning system.

2.4 Para 21 states:

Investment in business should not be over-burdened by the combined requirements of planning policy expectations.

2.5 The Inspectorate recently concluded that the Greenwich Local Plan would be unsound if it contained the attempt in paragraph 4.3.55 to restrict new hot food takeaways within 400 m of a school. The Inspectors Report published May 2014 confirms “If such a restriction is to be imposed as a matter of policy then it must be included in Policy TC(c). However, I do not consider that such a restriction serves any land use planning purpose. In any event, I can foresee difficulties in attempting to implement such a restriction. For example, what criteria would be used to determine “unhealthy” food, and how frequently would this be assessed for an individual business? In addition, the practicalities of enforcement at a time when public expenditure is being reduced may render such a policy incapable of enforcement. Whilst it may be a laudable aim, the Local Plan would be unsound if it contained this provision.”

2.6 There is a lack of evidence to demonstrate the link between fast food, school proximity and obesity. We confirm this at Appendix A to this objection. This appears to be recognised by the use of the word ‘potential’ in the policy. There is no evidence and the statement in the draft policy should be removed.

2.7 A systematic review of the existing evidence base by Oxford University (December 2013), funded by the NHS and the British Heart Foundation ‘did not find strong evidence at this time to justify policies related to regulating the food environments around schools.’ It instead highlighted the need to ‘develop a higher quality evidence base’.

2.8 This lack of evidence has been confirmed in a number of planning decisions. For example, in South Ribble the Planning Inspectorate raised concerns about a similar 400m school proximity restriction on fast food, stating ‘the evidence base does not adequately justify the need for such a policy’, and due to the lack of information, it is impossible to ‘assess their likely impact on the town, district or local centres’.

2.9 The evidence provided at Appendix B confirms that 70% of purchases by students in the school fringe are purchased in non A5 shops.

2.10 Policy E7 does not restrict the location of new A1, A3 or A4 uses within the 500m zones and therefore the sale of food and drink will still occur. The proposed approach is therefore not effective and is unjustified. The policy will place a moratorium against one use class of development, but will not meet the ambition of the policy.

2.11 There is lack of evidence to demonstrate that purchases in fast food outlets are any more or less healthy than purchases in other A Class premises. Evidence confirming this is set out in Appendix C.

2.12 Research by Peter Dolton states that “At least 50% of the days in a year kids don’t go to school if we count weekends and holidays and absence. They are only there for 6 hours and all but 1 are lessons. So only around 2-3% of the time can [children] get fast food at school.” This clarifies that a blanket restriction on location is unjustified.

2.13 Similarly, research by Brighton & Hove concluded that ‘the greatest influence over whether students choose to access unhealthy food is the policy of the individual schools regarding allowing students to leave school premises during the day’.

Footnotes

1 J Williams, P Scarborough, A Matthews, G Cowburn, C Foster, N Roberts and M Rayner, Nuffield Department of Population Health, University of Oxford, page 13, 11th December 2013. A systematic review of the influence of the retail food environment around schools on obesity-related outcomes.

2 Letter to South Ribble Borough Council, 29th April 2013, from Susan Heywood, Senior Housing & Planning Inspector, The Planning Inspectorate

2.14 Only limited purchases of food are made at A5 uses on journeys to and from school. Further details are set out in Appendix D.
2.15 Given the limited access that children have to fast food during the school day, this generic restriction is disproportionate; is not justified; and would not be effective.

3. Soundness – summary
3.1 We consider that restricting the concentration and location of hot food takeaways as proposed would be unsound and fails to meet the four tests of the Framework. It is not a positive approach to planning; justified; effective; or consistent with national planning policy.
3.2 The Inspectorate with regard to the Greenwich Local Plan concluded that he does not consider that such a restriction serves any land use planning purpose. Furthermore the Inspector confirmed that he could foresee difficulties in attempting to implement such a restriction. Such a policy should therefore not be taken forward. No alternative wording or alterations can be suggested that would make the proposed policy sound.
3.3 Many restaurant operators have made major steps to expand the range of healthy options and work with the communities within which they are / will be part of. No account has been considered in relation to the food sold from different types of outlet.

4. McDonald’s has made major steps in recent years to expand the range of healthy offerings
4.1 As a responsible business, McDonald’s recognises it has a role to play to support its staff, customers, and the communities in which it operates to live healthier lifestyles. For this reason, McDonald’s has invested significantly to evolve its menu over the last 10 years – both to extend the range of choice, and to reformulate our products. For example, McDonald’s has:
  - Added porridge, salads, grilled chicken wraps, carrot sticks, fruit bags, orange juice, mineral water, and organic milk to its menu
  - Completely removed hydrogenated trans-fats from its menu
  - Reduced salt in our Chicken McNuggets by 36%, and our fries by a quarter since 2003
  - Reduced fat in its milkshakes by 34% per serving since 2010
  - Reduced fat in its deli rolls by 42% since 2011
4.2 McDonald’s has also led the way displaying nutritional information to help its customers make informed choices. Since 2011, McDonald’s has provided calorie information on every one of its 1,200+ menu boards in restaurants across the UK.
4.3 This is in addition to the nutritional information that is already available on its website, on its tray liners, on its packaging, and via McDonald’s mobile phone app. In 2012 alone, McDonald’s received 2.2 million visits to its nutrition web page.
4.4 Furthermore, McDonald’s is committed to responsible advertising, and advertise to children only food items that are not classified by the Government’s nutrient scoring criteria as High in Fat, Salt or Sugar “non-HFSS”. All of McDonald’s advertising to children features at least one portion of fruit or vegetables, and a no added sugar beverage such as milk.
4.5 As a significant customer of British farming, McDonald’s buys quality ingredients from 17,500 UK and Irish farmers. It now spends more than £390 million every year on British and Irish produce, compared to £269 million in 2009. 4.6 All of McDonald’s burgers are made with 100% British and Irish beef. We use whole cuts of forequarter and flank, with nothing added or taken away in the process.
4.7 In addition, McDonald’s only uses 100% British RSPCA Freedom Food Pork across its entire menu. As a result, all pork suppliers are required to meet strict animal welfare standards.
4.8 McDonald’s was also one of the first retailers to switch to using free range eggs – which it did back in 1998. Free range eggs are now used in its entire menu – including its sauces, muffins and the coating on chicken nuggets. Every year McDonald’s use over 100 million free range eggs, sourced from more than 200 UK producers, and for its work in this area they have been awarded ‘Food Business of the Year’ by the British Free Range Egg Producers Association.
4.9 The strength of McDonald’s supply chain – which was clear of any horsemeat – has also been confirmed by Professor Chris Elliott, who said in light of the horsemeat scandal: “McDonald’s invited us to look at farms and abattoirs – it was a very simple supply chain. The other thing I was very impressed about was the length of contract McDonald’s had with its suppliers.”
5. McDonald’s also contributes to the community
5.1 As the Community Partner of the Football Association, McDonald’s has helped to train and recruit more than 25,000 coaches. These coaches in turn have provided more than 2 million hours of free quality coaching, to one million young...
players.

5.2 Over 1,000 McDonald’s restaurants across the UK are ‘twinned’ with a local team to provide free kit, equipment, advice and expertise.

5.3 Each of McDonald’s restaurants also conduct a minimum of three litter patrols on a daily basis, and conduct larger Love Where You Live ‘clean up’ events. McDonald’s is also the primary sponsor of the Mayor of London’s Capital Clean Up campaign, to tackle litter across London.

5.4 Last year, McDonald’s restaurants in Greater London organised over 50 community clean-up events, with over 1,400 volunteers taking part.

6. McDonald’s is a major employer of young people

6.1 McDonald’s is a major employer of young people under the age of 25, and for many it provides a first step on the career ladder. McDonald’s offers all staff the opportunity to gain qualifications which include Adult Certificates in English and Maths, a Level 2 Apprenticeship, and a Foundation Degree in Managing Business Operations.

6.2 McDonald’s invest £43 million annually in staff training and development.

7. There is a lack of evidence to demonstrate whether fast food is located by schools, or whether schools are located by town centres

7.1 When McDonald’s looks at the economic viability of a new site, it does not factor in predicted sales from school children or proximity to schools.

Footnotes

6 Evidence at Environment, Food & Rural Affairs Select Committee Inquiry, January 2014

7.2 Research by Christoph Buck has identified a similar approach with other retailers. His research suggests that ‘food retailers are mainly located near major roads and in inner cities.’

7.3 Indeed, ‘food retailers are not clustered around schools for up to 1.5 km’8 Correlations between schools and fast food density are therefore due to the proximity of both to town centres, where there is a broad mix of retail on offer.

7.4 With a policy restricting location in place, all A5 development would likely be directed away from major, district and local centres – contrary to the sequential test.

Appendix A – There is a lack of evidence to demonstrate the link between fast food, school proximity, and obesity.

1. This has been confirmed by Public Health England and the Local Government Association (November 2013). Their paper, Healthy People, Healthy Places states there is ‘an unavoidable lack of evidence that can demonstrate a causal link’ between fast food, school proximity and obesity.

2. The same paper states there are only ‘theoretical arguments for the value of restricting the growth in fast food outlets’.

3. Oxford University’s Department of Population Health conducted ‘A systematic review of the influence of the retail food environment around schools on obesity-related outcomes’ (December 2013).10 This was funded by NHS Berkshire and the British Heart Foundation, and is a comprehensive analysis of the existing evidence base.

4. The research ‘did not find strong evidence at this time to justify policies related to regulating the food environments around schools’. It instead highlighted the need to develop a ‘higher quality evidence base’ which for instance:
   - Uses a consistent way to classify a food outlet, in order to compare results from different studies
   - Looks at the age range of children, and their interaction with the environment. Age can influence travel time, distance travelled, the availability of pocket change, and other factors
   - Understands the need to assess a child’s mode of travel to and from school in decisions about appropriate buffer distances
   - Recognises that food environments vary between countries – most associations between food environment and obesity came from North America

5. The review did find some limited evidence for an effect of the school environment on body weight, but it added ‘these results should be interpreted cautiously’. Of 72 associations, only 19 showed a statistically significant positive relationship
between body weight and exposure to food outlets. The review also identified associations with convenience stores as well as fast food outlets.

6. A number of studies have reached similar conclusions. These include, but are not limited to:
- David Harris – ‘no correlation between students’ being overweight risk and the presence of stores with unhealthful food choices near their schools.’ 11
- Philip Howard – Research ‘failed to find a consistent association between school overweight rates and nearby fast food restaurants’. 12 If anything, this research found ‘Convenience stores demonstrated stronger correlations with school overweight rates’.
- An and Sturm – ‘no evidence to support the hypotheses that… less exposure to fast-food restaurants or convenience stores within walking distance improve diet quality or reduce BMI among Californian youth.’13
- Fleischhacker – This systematic review of fast food access studies concluded 53% did not find any significant associations between the fast food environment and obesity. ‘In children, only one of five studies found an association between BMI and the fast food environment.’14

7. This lack of evidence has also been confirmed in a number of planning decisions.
- For example, in South Ribble the Planning Inspectorate raised concerns about a similar 400m school proximity restriction on fast food, stating ‘the evidence base does not adequately justify the need for such a policy’, and due to the lack of information, it is impossible to ‘assess their likely impact on the town, district or local centres’.15
- Further, in Newham the Planning Inspectorate called for ‘deletion of an exclusion zone for A5 use class within 400m of secondary schools’ as ‘the policy is not supported by the evidence at present’.16

15 Letter to South Ribble Borough Council, 29th April 2013, from Susan Heywood, Senior Housing & Planning Inspector, The Planning Inspectorate
Appendix B – Food in the school fringe tends to be purchased in non-A5 properties.
1. Research by Professor Jack Winkler (London Metropolitan University) into the ‘school fringe’ – found just 3/10 purchases by students in a 400m school fringe were made in A5 properties.17
2. 70% of purchases in the school fringe were made in non-fast food outlets, and the same research concluded ‘the most popular shop near Urban was the supermarket, with more visits than all takeaways put together’.  
3. Professor Winkler’s findings are not an isolated case. A report by Public Health England and the LGA states that fast food school proximity restrictions do ‘not address sweets and other high-calorie food that children can buy in shops near schools.’18
4. Research by Brighton and Hove found that ‘Newsagents were the most popular premises [in the school fringe], with more pupils visiting newsagents than any A5 premises’.19
5. Likewise, research for the Food Standards Agency on purchasing habits in Scotland found that ‘Supermarkets were the place that children reported they most frequently bought food or drinks from at lunchtime’.20
6. Indeed, there are several more researchers who have found no evidence to support the hypothesis that less exposure to fast food, or better access to supermarkets are related to higher diet quality or lower BMI in children.21 22 23

Footnotes
18 Public Health England & LGA, Healthy people, healthy places briefing: Obesity and the environment: regulating the growth of fast food outlets, page 5, November 2013
19 Brighton & Hove City Council & NHS Sussex, Hot-food takeaways near schools; An impact study on takeaways near secondary schools in Brighton and Hove, page 28, September 2011

Appendix C – There is a lack of evidence to demonstrate that purchases in fast food outlets are any more or less healthy than purchases in other A class premises.
1. A key finding of Brighton & Hove’s research was that ‘newsagents and supermarkets [are] equally as influential on the unhealthy choices of pupils.’24
2. Hot food take-aways are identified as a particular concern, but there is a lack of evidence to inform why A5 units have been identified as a concern over other units, namely A1 and A3 units.
3. Research by the Children’s Food Trust for instance found that ‘Once outside school… students faced an environment designed to encourage less healthy food purchasing, mostly from corner shops and supermarkets near to school, outlets which successfully promoted less healthy foods to this population.’25
4. The report added ‘this study observed no visits to takeaway outlets’ – although it did qualify this saying a ‘larger, more representative study’ was required to determine whether proposals to restrict A5 outlets are effective in promoting healthier eating habits in teenagers.
5. Similarly, research elsewhere found ‘traditional fast food outlets offered a greater variety of healthier breakfast entrees, healthier lunch/dinner entrees, and healthier lunch/dinner side dishes’ than convenience stores, grocery stores, and supermarkets.26
6. We therefore assert that sole inclusion of A5 premises is irrational, will not be effective, and is therefore not justified.
July 16
Appendix D – Only a limited number of journeys to and from school involve a purchase at a food outlet.
7. This has been confirmed in research by the Children’s Food Trust, which found that only 8% of all journeys to and from school included a purchasing visit to a food outlet.27
8. Of the food purchases made on school journeys, confectionary was the most popular item sold – which McDonald’s does not offer on its menu.
9. Likewise, research by Ashelsha Datar concluded that children ‘may not purchase significant amounts of junk food in school’ – partly due to ‘fewer discretionary resources to purchase them’.28
10. Indeed, even where purchases were made, ‘children may not change their overall consumption of junk food because junk food purchased in school simply substitutes for junk food brought from home.’
11. Similarly, research by Fleischhacker highlighted the need for future school-based studies to ‘gather information on whether or not the students attending the studied schools actually eat at the restaurants near their schools.’29
12. This was also highlighted in the systematic review by Oxford University, which states ‘future work should also incorporate a child’s usual mode of travel to and from school into decisions about appropriate buffer distances.’ The review added that age should also be taken into consideration, as this can impact on travel time and the availability of pocket change.30

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

I OBJECT to the disproportionate amount (36%) of all proposed development being in one area of the borough from Wisley to Burpham creating a narrow ribbon effect along the A3

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the local plan. My reasons are the following:

First I would like to say I don't think you should stick to the local plan, building on the green belt because it will badly affect poor aminals e.g. nesting birds like by me.

It will also affect people in Horsley because you wouldn't be able to enjoy the space and for children they might play there so it will affect them.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/10260  Respondent: 15499297 / Alex Mundy  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy D4: I object to the insetting of villages (meaning in fact, removal of villages from Green Belt protections) and the fact that they will be suffer from higher density development and the resulting increase in traffic, use of infrastructure which is already under pressure. I object in particular to the insetting of West Clandon, Send and the Horsleys. This will have a detrimental impact on Green Belt openness and the views in and out of the AONB in direct contravention of Policy P1 and P2.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/10255  Respondent: 15499297 / Alex Mundy  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the Settlement Boundary which has been imposed on East Clandon without any consultation. This imposition provides no protection to further development outside of the settlement boundary (Policy P2 para 4.3.25) and I deem as being unnecessary in an already tightly developed ancient and rural conservation village with high archaeological potential. I demand that this proposal be removed as it will endanger the openness of the Green Belt, the views in and out of the AONB (protection of the AONB Policy P1) and the character of our village.

Policy P2 – Green Belt: I object to this significant erosion of the Green Belt with the proposals for large towns being developed on Green Belt land thereby removing the openness of the Green Belt. I note in particular the huge developments proposed for the North East quadrant of the borough which will adversely affect our amenity, but also unfairly targets our tranquil rural villages because we can provide ‘dormitory’ facilities for commuters to London. These developments directly affecting our villages are the proposals for Wisley Airfield, Gosden Hill Farm, various farms and tracts in the Horsleys and Garlicks Arch at Send.

Further, on the erosion of Green Belt and I object that Policy P2 is not met where it states that Green Belt should be protected. I object to the disproportionate use of Green Belt land for housing – some 65% of the housing proposed is on Green Belt and with little consideration being given to redevelopment of brown field sites.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I was object to Policy S1 not offering sustainable development as regards roads and rail infrastructure which currently does not cope with demand, congestion on the A3 in particular, but also other A roads in the area such as the A247, the A246 and then there is the already overcrowded and slow train system for those already living in the borough and needing to commute to London. No pre-emptive planning has been made to alleviate these real problems which will be much exacerbated by large increases in housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Continuing with Policy S1 (Presumption in favour of Sustainable Development) I object that this is not being met and that GBC are contravening this when it is clear that no fixed plans are available to improve the provision of shops, medical facilities, schools in our immediate area (besides roads and rail already mentioned) to service us. If the GBC were serious about improving the infrastructure and sustainability of our communities, they would have secured plans and funding to ensure these facilities are available and not just at the behest and hoped-for goodwill from the developers. Further, how will developers be held accountable to their promises to build infrastructure? Stories are legion of developers reneging on commitments as the ‘money runs out’ even though vast profits will be made from turning agricultural and Green Belt land into highly valuable housing land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the 2016 Draft Local Plan as a whole and in particular I object to the specific issues (listed below). I believe that this deeply flawed Local Plan will have a direct and detrimental effect on the amenity currently enjoyed by residents of East Clandon and to the even greater detriment to the neighbouring villages of West Clandon, Ripley, West and East Horsley. It erodes the openness of the Green Belt and endangers the beauty and views in and out of the Surrey Hills AONB.

I object to Policy S2 for the proposed provision of the very high overall housing numbers of 13,800 new homes (690 new dwellings being built every year for 20 years) and I object on two grounds; these housing numbers have been imposed on us with no real consultation being undertaken with the residents of East Clandon and the borough as a whole. Secondly, the housing numbers are based on a high-growth economic development plan which in itself has had no consultation with us and this combined with estimated demand from London residents will turn Guildford into a dormitory town for London.

Further, I object to the fact that no real economic or housing demand factors have been provided by the borough planners to substantiate the very high housing target of 13,800 new dwellings over the next 20 years. This is in direct contravention of the NPPF’s requirement for the planning authority to provide meaningful consultation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I specifically want you to note the winding, narrow and dangerous route via the A247 through West Clandon which then drives people to use a cut-out with the even narrower rural road, the Ripley Road, through East Clandon to and from the A3. This will be much exacerbated with the large increase in housing twinned with large increase in cars and travel.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/10259  Respondent: 15499297 / Alex Mundy  Agent: [Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2]

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the fact that GBC have not met the requirements of the NPPF Paragraph 155 which imposes an explicit obligation to have early and meaningful consultation. This has not been met in a number of areas by GBC. We have not had a meaningful consultation on imposing a settlement boundary on East Clandon, on the absence of meaningful economic and population growth figures for Guildford showing various scenarios with high, medium and low growth scenarios being offered.

I demand that there should be a significant challenge to the GBC scenario planning and the housing and growth numbers should be revised and especially in the light of uncertainty and change which will accompany Britain’s withdrawal from the EU.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A25 Gosden Hill as being totally inappropriate and unsustainable development of 2000 homes in the Green Belt, which will see coalescence and urban sprawl from Burpham to West Clandon

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/5001  Respondent: 15499873 / Pan Illingworth  Agent: 

I OBJECT to Policy A35 Former Wisley Airfield as being totally inappropriate and unsustainable development of 2000 homes in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5002  Respondent: 15499873 / Pan Illingworth  Agent:

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5003  Respondent: 15499873 / Pan Illingworth  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to Guildford Borough Council’s Proposed Submission Local Plan: strategy and sites 2016, with particular reference to Site A46.

The proposal to allocate this area of Green Belt land for residential development is inconsistent with policies set out in the Council’s draft local plan itself. In particular,

Policy P2: Green Belt

This policy states that “In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.” Very special circumstances have not been demonstrated. The proposal for Site A46 is essentially to allow a new town to be developed within a village in the Green Belt. This contradicts the statement in Policy P2 (4.3.24) that “Development within villages in the Green Belt is limited to small scale infilling”.

Attached documents:
Policy D4: Development in urban areas and inset villages

The allocation of Site A46 for development is inconsistent with the statement in Policy D4 that “proposals for new development within inset village areas will have particular regard to (inter alia): the distinctive settlement pattern of the village and the important relationship between the built development and the surrounding landscape”. It completely fails to protect the important character (4.5.50) of the village of Normandy. Such a large-scale development would by definition fail to “protect local landscape and townscape character” as indicated in the LCA, which states that “development will be expected to: conserve, and where possible, enhance existing character … and respect the setting of, and relationship between, settlements and buildings in the landscape”.

Briefly, my reasons for objecting to the proposal are:

- The number of new homes indicated in the proposal is completely disproportionate to the size of the village and would fundamentally alter its
- Alternative sites exist where development would not impact on sensitive Green Belt land and on the character of a rural
- The argument that a school would be justified by the development is When no case exists for building a school, a school cannot be used as justification for the residential development.
- The local infrastructure is unable to support such a large-scale The roads in this rural area cannot sustain the inevitable increase, with consequent safety issues. Peak time traffic is already a serious issue. It is unrealistic to suggest that increased parking at Wanborough station or measures to encourage cycling and walking would go any significant way to addressing this. The fact is that there are often multiple cars per household and people choose to drive even for very short journeys.
- Significant flooding is already an issue in the

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

While welcoming the removal of site allocations A46 and A47, I object to the proposed Green Belt boundary amendments that would result in the Normandy and Flexford settlements being inset from the Green Belt. The statement in Policy P2 that these villages (among others) are now inset presupposes that the proposal indicated on the map at Appendix H has been approved, so it is unjustified. Evidence of "exceptional circumstances" for these changes has not been provided. Furthermore the proposed boundary changes are incompatible with the principle of "openness", would be detrimental to the preservation of the character of the villages and would risk unmanageable pressure on local infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
3. There is an ERROR in the Land Availability Assessment dated February 2016, and I ask that GBC corrects this. There is a plan on page 299 that appears to show access to Fangate Manor from Manor Close. Manor Close is a private road, and access will not be granted. MCRA would oppose any change to the character of this very quiet road. The road and the verges are narrow and are not suited to any growth in traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I am writing in response to the draft local plan and in particular the proposal to change the Settlement Boundary so that it includes Fangate Manor, thereby removing Fangate Manor from the Green Belt.

1. I OBJECT to the proposal to inset East Horsley from the Green Belt. The proposal to inset East Horsley from the Green Belt will be detrimental to the rural character of the village and should be dropped. The specific changes proposed are not justified under the National Planning Policy Framework rules.

2. I strongly oppose and OBJECT to the proposal to remove Fangate Manor from the Green Belt and include it within the Settlement Boundary. There are no exceptional Planning circumstances to justify removing Fangate Manor from the Green Belt, and changing the Settlement Boundary does not in any way enhance the defensible nature of the Settlement Boundary. It merely involves moving the boundary from one hedgerow to another, but leads to the loss of Green Belt and agricultural land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
5. I OBJECT also to the re-inclusion in the plan of Policy A35 (Wisley airfield, Ockham). Under the plan, there would be significant change to neighbouring communities by creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

4. I OBJECT to the proposed development sites in East and West Horsley (A36-41). Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town. These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick's Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/5084  Respondent: 15500161 / Joanna Scott  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4) Why not?

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1) Some of my friends have struggled to get school places as it is!

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic.

I already live on a busy road. This will have a very negative impact on my family's (and other residents) health and wellbeing, including not being able to sleep at night due to increased traffic. This is going to affect our quality of life!

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Glandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Answer (if comment is on questions 1-7 of the questionnaire): ()
If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick's Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ( )
Policy ES supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan. As somebody with a child relying on their bike to get around I object to this being even more dangerous! As a car driver I object to the added safety implications.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/10307  Respondent: 15500161 / Joanna Scott  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
I object to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, I (and other residents) will see our quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. I use this centre when I need to, and I know it is difficult to get an appointment already. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable. In recent years we have lost our local police presence and it is unrealistic to expect that will improve.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to poor air quality concerns (Policy 13)

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and our health. Hold on a minute, I live here and I object!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding.

Knowing the area well because I live alongside it, I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over development, particularly for the villages between Guildford and the M25, including Ripley (where my family live), Send and Glandon. The services in these villages will be unable to cope with the level of development proposed. I do not believe the proposed developments meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35) and Gartick's Arch (A43) are in unsustainable locations. We do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on cars. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Gartick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Surely greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. I know this as we have to use them daily. At the slightest issue on the A3 traffic queues outside our house using it as a cut through. Stationary engines running. Noise and pollution increasing. Further vehicle movements will result in even more acute congestion and greater pollution. My family and other residents and the environment will suffer as a result.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other borough Councils in Surrey.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill (Glandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Glandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, we are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.
The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities. On MY community!

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to voice my strong objections to the plans proposed for Normandy and Flexford in the revised local plan.

The supposed need for a new school

At the borough council meeting it was agreed that the decision to proceed with any development in Normandy/Flexford would be entirely predicated on the need for a new school.

- The requirements for new schools are determined by the county council, and in reviewing their plans I cannot see anywhere a proposal for a new school to be built in this part of the borough. There is simply no requirement for this from Surrey County Council.
- In addition, our Country Councillor, Keith Witham, has done an excellent job in engaging with other schools in the area, and without exception, found that they are all under-subscribed. There was no support at all - quite the opposite, in fact - from school heads that a new school was needed.
- Surrey County Council has already started development on a new school at Mayford, also in the catchment area.
- This area of the borough is well covered for schools, notably Ash Manor, itself under-subscribed. There is no need for a new school in 'the west of the borough'.
- To suggest that a new school be built at considerable cost when there is no demonstrable need is financial mismanagement of the highest order; this is public money, and I do not want my taxes spent in this way.

Given this, your proposal to highlight the need for a new school as an 'exceptional need', that would override green belt restrictions, is spurious and totally unfounded.

Building on the Green Belt

Normandy is a small rural community sitting in the protected Green Belt, adjacent to Areas of Outstanding Natural Beauty and Sites of Special Scientific Interest. The specific area of land you are proposing to build on is adjacent to Listed Buildings, and contains pastures, farming, hedgerows, trees and grasslands, all supporting a wide variety of wildlife. This is why I choose to live here. Your proposals would turn this pleasant rural community into a hideous housing estate, which I, and I suspect most residents of Normandy, simply do not want.

The purpose of the Green Belt is to protect the land around larger cities from urban sprawl, maintain areas for forestry, agriculture and wildlife, and to have open areas with clean air for outdoor activities. Your role as councillors is to preserve and protect that vision, not to ride rough shod all over it.

David Cameron recently wrote of the requirement to protect the green belt and ensure that planning decisions were made by...
local people. That is us, the residents of Normandy and Flexford, and not you in isolation.

Your rationale for attempting to justify this intrusion on to the Green Belt with 'exceptional circumstances' is spurious, flawed and, through linking it with an additional 1,100 residences, is self-fulfilling.

**The supposed need for additional housing**

I am frankly speechless that you feel a proposal to double the number of dwellings and triple the number of residents is in any way a sensible thing to do. And to then further propose that this all takes place on land designated in the Green Belt beggars belief. To link this with the supposed need for a new school at the same location represents a bizarre circular logic, each requirement justifying the other. Neither are needed.

Your plans speak of the 'potential' need for additional housing. If the need is only potential, the circumstances cannot be exceptional. Which, of course, they are not.

Nonetheless, you seek to bring the number of residents to 4,000. This because it is apparently a threshold for a sustainable village community. But we already have an active community in Normandy - we don't need to triple the population to do this. We already have a nursery school. We already have a primary school. We already have a surgery. We already have a pharmacy. We don't need 4,000 people!

You choose to combine the communities of Normandy and Flexford to reconcile your numbers of 4,000 residents, but these are separate communities. Seeking to bring them together and then add a further 2,500 resident is not 'coalescence', it is urban sprawl in action - you are supposed to prevent this, not cause it. You are justifying this with numbers and spreadsheets, and ignoring the needs of the existing residents.

An additional 1,100 residences simply represents a scale of development that is wholly inappropriate in relation to the existing communities. The government itself has stated recently that there are no plans for such inappropriate development - why are you choosing to override this guidance?

The existing infrastructure in the village barely sustains the current population, how do you propose to cope with treble the number of residents:

- You cannot build new roads between Glaziers Lane and Westwood Lane. They will become overly congested and vastly increase pollution - the exact opposite of what we currently have with the protected Green Belt. These roads have restrictions in terms of railway bridges and single file access (railway bridge in Westwood Lane)
- The Hogs Back and Guildford Road are already congested nightmares during the rush hour, your proposals will make this even worse
- again, the cost of upgrading this and all other infrastructure (drainage, electricity, new roads, telephone and internet upgrades) simply smacks of poor use of public funds

My suggestion would be that you look to develop brownfield sites, and not contemplate the unwarranted intrusion onto the Green Belt.

I believe the proposed changes are ill-considered, and I urge you to review and reject outright the changes to the local plan as they affect Normandy and Flexford.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** PSLPA16/2481  **Respondent:** 15500449 / John Banks  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. There is an **ERROR** in the Land Availability Assessment dated February 2016, and I ask that GBC corrects this. There is a plan on page 299 that appears to show access to Fangate Manor from Manor Close. Manor Close is a private road, and access will not be granted. MCRA would oppose any change to the character of this very quiet road. The road and the verges are narrow and are not suited to any growth in traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPA16/2480  **Respondent:** 15500449 / John Banks  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing in response to the draft local plan and in particular the proposal to change the Settlement Boundary so that it includes Fangate Manor, thereby removing Fangate Manor from the Green Belt.

1. I **OBJECT** to the proposal to inset East Horsley from the Green Belt. The proposal to inset East Horsley from the Green Belt will be detrimental to the rural character of the village and should be dropped. The specific changes proposed are not justified under the National Planning Policy Framework rules.
2. I strongly oppose and **OBJECT** to the proposal to remove Fangate Manor from the Green Belt and include it within the Settlement Boundary. There are no exceptional Planning circumstances to justify removing Fangate Manor from the Green Belt, and changing the Settlement Boundary does not in any way enhance the defensible nature of the Settlement Boundary. It merely involves moving the boundary from one hedgerow to another, but leads to the loss of Green Belt and agricultural land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
5. I **OBJECT** also to the re-inclusion in the plan of Policy A35 (Wisley airfield, Ockham). Under the plan, there would be significant change to neighbouring communities by creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

4. I **OBJECT** to the proposed development sites in East and West Horsley (A36-41). Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town. These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops.

GBC Draft Borough Plan re Normandy - Site Allocation 46 and Site 47

I hereby I **like** to **object** against the Draft Plan for Normandy.

As you get probably plenty of emails I would like to keep it short.

Reasons for Objection:

Traffic Chaos.

I live on Westwood lane (cunningham close) with a young family. Traffic is already a major problem.
From the numbers of cars, types of vehicles and their speed.
A development of this size would cause westwood lane to be a dangerous and unhealthy place to live.
Something we did not choose for when we bought this house.
School
A secondary school is not needed in this area as two nearby schools are under subscribed.
So please can we protect the greenbelt.
Also you are breaking an election promise as in July 2015 it was said: We always protect green belt and make sure planning decisions are made by local people.
I am very worried for the future of Normandy and my children. If the plans go ahead I will definitely be moving out of the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to lack of transparency regarding the evidence report by GL Hearn and thereby any verification of the SHMA figure of 693 homes per annum

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5028  Respondent: 15500513 / Alex Illingworth  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Policy A25 Gosden Hill as being totally inappropriate and unsustainable development of 2000 homes in the Green Belt, which will see coalescence and urban sprawl from Burpham to West Clandon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5029   Respondent: 15500513 / Alex Illingworth   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A35 Former Wisley Airfield as being totally inappropriate and unsustainable development of 2000 homes in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5030   Respondent: 15500513 / Alex Illingworth   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000 sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5031   Respondent: 15500513 / Alex Illingworth   Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43a, the proposed on/off ramps to the A3 at Burnt Common as this will inevitably cause traffic chaos on the local road network throughout Ripley, Burnt Common, Send and West Clandon, with absolutely no possibility of mitigation due to the nature of our rural roads and lanes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5032  Respondent: 15500513 / Alex Illingworth  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A45

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A45 The Talbot Ripley as this is over development in an open space within the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5033  Respondent: 15500513 / Alex Illingworth  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A57

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A57 The Paddocks for the provision of 4 traveller pitches in Rose Lane as this is in excess of current requirements within the borough.

Comment ID: PSLPS16/5035  Respondent: 15500769 / A L Tozer Ltd (Laurence Dawson)  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am an owner and director of an international horticultural business in Cobham which owns land in Cobham and Ockham. Our Ockham site is very important for the development of the business and there are regular movements between the two sites of Tractors and cultivation and/or harvesting equipment. We also have vehicle movements between the two sites moving commercial stock.

I object very strongly to the re-inclusion of the Former Wisley Airfield/ Three Farms Meadows site into the Borough Local Plan after it was rejected as a suitable site for housing by the full planning committee and the planning department of the Borough.

I object to the plan’s proposal to remove the Wisley airfield / Three Farms Meadows from the green belt and we also strongly object to the similar proposals to build on green field sites in the Parish’s of East and West Horsley, Send and Ripley, and to the removal of these parish’s or parts of them from the Green Belt.

We object to the loss of the Agricultural land at The Farms Meadows through the proposed development there. Good agricultural land is a declining resource.
I object to the proposed development of the various sites in the parish’s of East and West Horsley, Ockham, Ripley and Send because they cannot happen without a big investment in services and this major requirement is hardly mentioned. Already the district is struggling with overflowing sewerage, with shortages of other utilities of Gas, water and electricity supplies. There is already a desperate shortage of school places for all age groups in this area of Surrey; Medical services are also fully stretched and inadequate for more clients. The Hospital will need to expand too.

I object to the proposals to increase the number of houses in this area by such a large amount on an annual basis. The road infrastructure is inadequate. The roads were developed in the days of the horse and cart, are narrow and cannot be widened easily because they are bounded by hedges. There are few footpaths and no cycle lanes or lighting. The mix of pedestrians, cyclists and ridden horses with fast cars and trucks are a recipe for disaster and litigation if no planning consideration was made. Due to the high traffic movements and the high number of goods vehicles using these lanes they are now breaking up. The area has some of the worst roads in the county.

I object strongly to the development because of its likely affect on the Wisley and Ockham commons, part of the Thames Basin Heaths Special Protection Areas, particularly considering atmospheric pollution, increased footfall and dog exercising on these fragile environments.

I object to the planning department, the planning committee and their subcontractors in devising a housing need without consideration and planning for the infrastructure needed to establish their proposals.

I strongly object to the proposals because of the effect on the picturesque villages which have a high number of old and historic houses, many listed. The proper development of The Borough should be to increase the number of high rise buildings in the centre, now that Guildford is a city, with schemes such as the station development, lesser rise building should be encouraged in the suburbs of Guildford.

We object to the lack of planning for work and employment for the residents of these developments. They cannot all take the train to London.

I object to the planned A3 junction changes at Burnt Common due to the negative effect on the surrounding villages which will not be able to handle the additional traffic in an already busy area. It will lead to more through traffic increasing the chances of road traffic accidents, particularly around the local schools.

I object to all the additional houses when the local schools are already overwhelmed with new applicants. The school in Send where my children attend is currently being rebuilt, with no further capacity to take additional children and has no desire to do so.

I object to all the additional houses as the local doctors surgery is already at its full capacity and this will put additional pressure on the services impacting local services.

I object to the additional amount of cars that will be on the road in the immediate and surrounding areas, causing further risk to our children as they travel to and from school.

I also object to the proposed housing development & traveler pitches off of Send Hill. This is completely unnecessary & Send Hill will struggle with the increased traffic. The road is not wide enough to accommodate caravan traffic & I would be hugely concerned about a increase in crime.

Please keep our Green Belt green, that is why we chose to move to Send & bring our children up here.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Comment ID: PSLPP16/10294  Respondent: 15501057 / Spelthorne Borough Council (Geoff Dawes)  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Further to our detailed letter of 4 September 2014 the Borough Council welcomes Guildford’s approach to housing issues and notes that the plan seeks to provide for all of the objectively assessed housing needs for Guildford as established in the Final SHMA for Woking, Guildford and Waverley published in October 2015. It also notes that delivery of the required housing is dependent on key infrastructure, particularly major highway improvements, being provided during the plan period. Spelthorne Borough Council would have concerns if Guildford was unable, for whatever reason, but particularly because of the lack of highway improvements, to meet its commitments. Spelthorne BC would therefore welcome greater clarification on what options (Para 1.19) the Borough Council would consider in the event that the council finds that it is not meeting its objectively assessed need.

This Council also welcomes the fact that Guildford is seeking to meet all the assessed needs for gypsies and travellers for the plan period. It is noted that no provision is being made for transit sites at this stage but should a need be identified in the wider area this Council would expect to be consulted under the Duty to Cooperate.

The Council notes Guildford’s approach in seeking to achieve densities compatible with the local area context, character and sustainability. Paragraph 47 of the NPPF notes that local authorities should ‘set out their own approach to housing density to reflect local circumstances’. Whilst it is agreed that the local plan does this, Spelthorne would hope that, in order to maximise opportunities within the existing urban areas to meet the housing targets set out in policy S2 Guildford will seek to achieve higher densities in general. Policy H1 refers to supporting higher densities in Guildford town centre, but this could be extended to include employment areas, public transport hubs and other sustainable locations in the borough.

Spelthorne is currently undertaking work to consider the impact of extensions on the stock of dwellings which tends to increase the stock of larger dwellings whilst depleting the supply of smaller more affordable dwellings. Given the mix of housing types and tenures the Council is seeking to achieve it is not clear if Guildford has taken the effect of housing extensions into account as part of this process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The primary river in Guildford is the River Wey and its tributaries enter the River Thames at Shepperton. Spelthorne BC would be concerned if a reduction of floodplain storage in its upper catchment would result in greater flood water levels entering the Thames and affecting Spelthorne. This Council would therefore agree that Policy P4 on flood risk should ensure that flood storage capacity is maintained and ideally bettered, as any loss in capacity could lead to increased flows downstream. Spelthorne’s own policy on flooding (policy LO1 of the Core Strategy and Policies DPD 2009) reflects these principles of flood storage capacity.

I trust that you will find these comments helpful, but please let me know if you require further clarification on any of the points raised. We look forward to further discussions under the Duty to Cooperate in due course as necessary.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

The council relies on a strategic housing making assessment that is in question. The council have not scrutinised the figure provided and rely purely on the fact that other councils have used the consultant GL Hearn to assess the housing need. The SHMA appears to be exaggerated against ONS data. Two independent reviews have identified similar faults, which suggest that the figure is too high and inaccurate. They also identify that the recent referendum result relating to Europe may have an impact on economic growth and consequently should be reviewed. The SHMA must be reviewed to ensure that it is accurate before the housing figure is agreed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the use of the ‘Green belt and countryside study 2014’ within the evidence base. This is a subjective view of the green belt provided by one company, It is not evidence. It does not provide exceptional circumstances to remove land from the green belt.

I OBJECT to the use of the transport study within the evidence base. The SINTRAM model is designed for major routes and is not suitable for local roads as it takes no account of junctions. The three hour period also skews the data disproportionately downwards. This means that it will not necessarily provide a true reflection of traffic movement within Guildford. A different model should be used and the peak times adjusted to accurately reflect traffic, particularly within rural areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/4162  Respondent: 15501217 / Luke Sarti  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the disproportionate amount of development in this small area of the borough; The area surrounding East and West Horsley will attract in excess of 5000 new homes, which accounts for over thirty-six percent of development. The area is predominantly rural in structure, nature and environment and does not have the infrastructure to cope.

I OBJECT to the disproportionate increase in housing in West Horsley. The local plan proposes an increase of thirty-five percent for a rural village, this is totally out of character. The density suggested by the council is not in keeping with the current environment, almost double the levels within the majority of the village.

I OBJECT to the inclusion of A35 Wisley Airfield in the local plan. The principle of the local plan is a presumption in favour of sustainable development. The Housing and Planning Act 2016 grants permission in principle to any development included within the local plan leaving only technical details to be considered by planning authorities. The site at Wisley failed in its planning application on a large number of points including infrastructure and sustainability. It is highly unlikely that these will be met in the future due to its positioning. Part of the site is green belt and no exceptional circumstances have been demonstrated. Aspects of the site also include high quality agricultural land.

I OBJECT to the inclusion of Policy A41 relating to land south of East Lane. This is in contravention of para 85 NPPF which states that borders must clear and readily recognised. The natural border is the wood to its east. The inclusion of this site is not in keeping with the current settlement and character of the village; houses front East Lane up the woods to the east of this site which borders the road for approximately 400 yards. The land is green belt, no exceptional circumstances are made.

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy A43a, the proposed on/off ramps to the A3 at Burnt Common as this will inevitably cause traffic chaos on the local road network throughout Ripley, Burnt Common, Send and West Clandon, with absolutely no possibility of mitigation due to the nature of our rural roads and lanes.

The Council have failed to consult effectively with infrastructure providers prior to publishing the draft local plan and as a consequence the Raleigh school has only recently put forward a proposal to build a new school on site A41. I am unable to comment on this because I do not have sufficient information.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17102  Respondent: 15501217 / Luke Sarti  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the fact that there is no provision for a larger primary school within East or West Horsley despite the fact that Para 38 NPPF states that for large developments a primary school should be built within walking distance. Over 500 houses within East and West Horsley is large development when considering the size of the villages. The Surrey infrastructure review does not state that a new school is necessary despite the fact that the school is already oversubscribed causing children to be driven to other villages. (They do state the school may in the future identify a suitable site through infill opportunities). Surrey have suggested that children from the Horsleys can be accommodated either in Ripley or Clandon; both of which would necessitate parents driving, and in the case of Ripley travelling through a traffic blackspot.

I OBJECT to the local plan making East and West Horsley less sustainable. This is breach of para 7 and 9 NPPF and policy S1 of the proposed local plan. Failing to provide essential health, education and community facilities forces residents to use private vehicles to reach these when at present the majority can walk. The Infrastructure survey suggests that primary and junior school aged children will have to travel to Ripley and Clandon to attend school. No provision is made for any other facilities including health, dental, community and sport.

I OBJECT to the fact that the Local plan does not effectively demonstrate proposals to improve road networks to accommodate the additional vehicles likely to travel through East and West Horsley. The majority of through roads are narrow, have pinch points and are subject to closure through flooding on a regular basis.

LRN7 intends to introduce interventions to address potential highway performance issues resulting from the development of Wisley airfield. If these are those put forward by the developers they are likely to have a significant negative impact on East and West Horsley, or any traffic travelling to or through even without additional housing.

LRN22 East and West Horsley traffic management and environmental improvement scheme is non specific and the suggested £1m is insufficient to make sufficient improvements to deal with the substantial traffic increase likely if all aspects of the local plan are allowed.

I OBJECT to the council failing to deliver sufficient infrastructure to cope with the proposed development within this area of the borough. The bus network is almost non-existent and new buses are linked only to the Wisley development. The train
station car-parks at Horsley and Effingham junction are always full and there is no space to enlarge them. The roads are not suitable for commuters to cycle any distance due to the narrowness of the roads, speed of traffic and lack of space to build cycle paths.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The council appropriately identifies that the enhancement of the A3 is essential to the scale of development possible within the local plan. Page 21 Strategy and sites states 'The delivery of housing in the later stages of the plan period is dependent upon major improvement to the A3 through Guildford'. Highways England have made no commitment to improve the A3 and yet the local plan still seeks to deliver the full housing target through the delivery of three of its four strategic sites sighted directly beside the A3. The transport survey also highlights that traffic will be impacted and congestion worsened irrespective of what improvement measures are put in place.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

| Comment ID: PSLPA16/2489 | Respondent: 15501377 / Elmbridge Borough Council (Karen Randolph) | Agent: |
Green Belt & Countryside Study

As part of the Draft Local Plan consultation the Council expressed concern regarding the transparency of the study and the subsequent methodology and assumptions for the appraisal of sites. Following the inspection of the Draft Local Plan; Topic Paper: Green Belt and the Countryside; and the Volume II Addendum, the Council welcomes the reconsideration of Green Belt as a constraint and the weight applied to the strength of each individual Green Belt parcel and how this has influenced the assessment of Potential Development Areas. The Council considers therefore that its concern regarding the process of applying the weight of the Green Belt parcels to have been addressed.

Nevertheless, the Council remains concerned that the original study and subsequent updates made since the Draft Local Plan consultation, make no attempt to address the strategic significance of the Green Belt across the wider area and its fundamental aim in preventing the sprawl of London. We feel it is essential that any study seeks to address this issue and that Guildford Borough Council works with surrounding Housing Market Areas (HMAs) in doing so. If we have missed this consideration amongst the evidence base documentation, we would be grateful if this is signposted.

In addition, we note a number of instances where development sites adjoin or are close to borough boundaries e.g. Land at Former Wisley Airfield. We are sure that it is appreciated that it will be important to work with the relevant boroughs districts as the Local Plan continues forwards on these issues, and in their stages of delivery / implementation. This will be particularly relevant where urban areas already coalesce.

Exceptional Circumstances Case

As recognised in the Topic Paper: Housing Delivery, exceptional circumstances are required to justify any amendment to the Green Belt boundary in accordance with the National Planning Policy Framework (NPPF), para. 83. We acknowledge the factors set out in para. 4.17 of the Topic Paper which Guildford Borough Council considers in general terms are exceptional. We do not wish to dispute that these are challenges for Guildford Borough Council. However, we have some concern that the issues identified are not particularly unique to Guildford Borough e.g. affordability and unmet need, are common place within a South-East and Surrey context. Further consideration may therefore be required to ascertain whether the Guildford Borough Council considers that this is an 'exceptional' case to amend the Green Belt boundary.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A35- Land at Former Wisley Airfield, Ockham

In regards to the proposed new settlement at Wisley (Policy A35), many of the concerns we previously raised have now been addressed through the publication of additional evidence base documents e.g. Habitats Regulation Assessment and Draft Infrastructure Delivery Plan, and by way of the evidence and statutory responses submitted in regards to the two planning applications for this site. The Council would however, like to reiterate those comments which it considers to be outstanding as well as make some additional comments in light of the publication of the Proposed Submission Plan and supporting evidence base.

Due to the location of Wisley Airfield in relation to Elmbridge Borough, this site is of keen interest to us and our residents and so, we continue to query whether this is the right location for this scale of growth when considered against the principles of Green Belt. The fundamental aim of the Metropolitan Green Belt is ultimately to prevent the spread of London. The site is located in the very north west of the Guildford Borough where the Green Belt is already very fragmented and particularly vulnerable to additional development, a point that was noted by the Inspector for the examination into our Core Strategy. It is therefore considered that further evidence should be provided to indicate why this site has been identified in preference to other sites having regard to the strategic significance of the Green Belt in this location.

In addition, we would like to understand further the process for considering the eire. 100, parcels of Green Belt and countryside that were considered to have low or medium sensitivity and how the work has resulted in this site, as opposed to other areas, being proposed for allocation. Working our way through the various Volumes and Addendum it would appear that Guildford Borough Council has been selective in assessing the environmental capacity and sustainability of the parcels and we query why only those parcels on the edge of the urban edge were considered. Furthermore, Parcel G18 (Wisley) is not located next to the urban edge and therefore in accordance with this general approach, should have been excluded for further consideration as have other similar parcels.

Turning to the Proposed Submission Plan, we would recommend that Table 1- Planned Delivery between 2018 and 2033, be amended to show more clearly when it is envisaged that each strategic allocation would be delivered rather than generically stating the period of 1 - 15 years. Our concerns regarding the impact on the strategic road network remain, particularly in regard to the proposed development at Wisley but also other proposed development sites along and in close proximity to the A3. For example, Policy A43 Land at Garlick's Arch, Send Marsh / Burnt Common and Ripley which will further compound the impact on the road network should the appropriate mitigation measures not be implemented. Without the mitigation measures identified in the Government's Road Investment Strategy (RIS) (phases 1 and 2) the residual cumulative impact of the Proposed Submission Local Plan on the highway network could be considered severe. As set out in the evidence base, the RIS schemes are complicated and may involve land acquisition and planning permission and, as a result, Highways England is cautious about programming these schemes. Given these complications, and also the infrastructure required on-site to support the scheme and the securing of the land north of the site for Suitable Alternative Natural Greenspace (SANG) (in regard to the Wisley scheme), it is considered that the Borough Council could provide a better estimate in terms of delivery knowing that the development of some sites is unlikely to be in the first few years of the plan.

I hope you find these comments useful in progressing work on the Local Plan.

Please do not hesitate to contact Mark Behrendt, Planning Policy Manager, if any of the points raised requires further explanation. Officers would be happy to meet with you to discuss our comments in more detail.

At this time the Council would like to reserve the opportunity to attend the examination in public.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Gypsies, Travellers and Travelling Showpeople

Policy S2: Borough Wide Strategy sets out the proposal to provide 43 permanent pitches for Gypsies and Travellers and 6 permanent plots for Travelling Showpeople over the period 2012-2017. A further 30 pitches and 2 plots are then proposed between 2017 and 2027. In regard to the provision of new pitches and plots, the Council would like to reiterate the comments it made on the Draft Plan, namely:

- **it is confusing that the time periods stated above do not cover the same time period as the Submission Plan.**

Given that the plan period is from 2013 - 2033, the Council is concerned as to how the additional need for pitches and plots beyond 2027 will be accommodated, as identified through an updated Traveller Accommodation Assessment (TAA). The Council would be grateful if some indication could be provided as to a timetable for an updated TAA and whether this would allow the Council sufficient time to identify additional sites prior to the examination and adoption of the plan. The concern being that the existing TAA is out of date, not reflecting the Government’s changes to the Planning Policy for Traveller Sites (August 2015). In addition, and notwithstanding the fact that the Draft Local Plan seeks to allocate more pitches and plots than is required, the concern is that based on the proposed allocations set in the Sites table on page 123 onwards, land designated as Green Belt is likely to be required to meet any further need. This could lead to a potential conflict with paragraph 83 of the NPPF (local authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period) should an updated TAA not be forthcoming and, in the event that an updated TAA identifies a higher need than the surplus allocated.

- **it would be useful for the Sites table on page 123 onwards to include information on the proposed allocation of pitches I plots for Gypsies, Travellers and Travelling Showpeople where this is part of a larger allocation I mixed-used development**

For example, Site Allocation A24 Slyfield Area Regeneration Project. This will provide clarity to the overall numbers proposed to be allocated, their location and timeframe for delivery.

In addition to those points made previously, the Council would like to take this opportunity to raise two further points in regard to Policies S2 and H1 Homes for all; and the Sites listed in the Proposed Submission Plan.

1. Policy H1 states that Traveller accommodation should be provided on development sites of 500 homes or more whilst there remains an identified need. The Council would therefore query why there is no mention of the provision of pitches I plots on Land to the south and east of Ash and Tongham (Policy A29). The site details show that this is a strategic location proposed for allocation with the provision of approximately 1200 homes. In accordance with Policy H1, four pitches or plots should be provided. If Guildford Borough Council considers that identified need has been met (despite not having an up to date assessment of need up to 2033), we would like to discuss the opportunity for some of our surplus need for Gypsy; Traveller; and Travelling Showpeople pitches I plots to be met across the Borough boundary in accordance with the Government's duty to cooperate.

1. There appears to be a potential discrepancy between the total number of pitches and plots being provided as set out in Policy S2 and within the Sites table on page 123. As noted above, Policy S2 identifies that 73 pitches are required between 2012 and 2027 and 8 pitches are required for Travelling Showpeople. However, the Sites table lists that 82 pitches and 20 plots are to be provided. Firstly, the Council would like some clarification as to these sets of figures. Secondly, should Guildford Borough Council be able to identify sufficient suitable, available, and achievable sites over the required figure both now and in the future, we would welcome the opportunity to discuss whether unmet need arising in Elmbridge Borough could be met through the preparation of the Guildford Local Plan in accordance with the Government's duty to cooperate.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford borough Proposed Submission Local Plan: strategy and sites (June 2016)

Thank you for consulting Elmbridge Borough Council on Guildford Borough's Proposed Submission Local Plan.

As you know, we are keen to work with you and other authorities within our respective Housing Market Areas to seek to meet needs across the wider area, ensuring the best and most suitable sites are brought forward for development and, that other cross-boundary and strategic planning matters are continuously addressed.

In responding to this latest consultation, we note that a number of the points we previously raised have been addressed. This consultation response therefore focuses on outstanding matters and those which have arisen from examining newly published and updated evidence base documents. Please note we have not been able to review the entire Proposed Submission Local Plan and all supporting evidence base documents in detail. As such, we continue to raise a number of queries I comments on the key topics that are of particular importance to Elmbridge Borough Council.

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick's Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The "objectively assessed need" figure of 693 homes a year is too high.

- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.

- The current SHMA inflates the proposed housing figure due to:
  - failure to correct for errors in the historical data for international migration flows
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.

- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.
The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data: 2010 -2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tythebarns Lane to Poi ts1100th Road Birch Close - 8 incidents 2015
  - 15 April 2016 12 year old boy injured in The Street - A 247 closed in both directions
  - 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
  - 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and sec is reluctant to impose further speed limits as congestion is already very high.
I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until the A3 reaches the A320 Stock Road.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham's sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the local plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,DDD. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England's requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an "aspiration" in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.
Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43 and A43a on Garlick's Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick's Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current "soft" edge approach to Guildford.
Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (BB).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPS16/5309  **Respondent:** 15502209 / Shirley Atkinson  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and redkites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I **OBJECT** to the inclusion of the land for new on/off ramps at Burnt Common (A43a)
The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic. The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10553  Respondent: 15502209 / Shirley Atkinson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development.

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough. The proposed development at Garlick's Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10660  Respondent: 15502209 / Shirley Atkinson  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will "enhance" heritage assets which I fear is a developer's charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10673  Respondent: 15502209 / Shirley Atkinson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and
general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick's Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick's Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and BS) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick's Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the loss of rural employment.  

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Answer (if comment is on questions 1-7 of the questionnaire): ()

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford.

Accordingly the policy should recognise that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor "attractions" and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/"Disneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many "leisure and visitor attractions" already. The case for creating more is not made and no examples are given. Instead, the plan's explicit priorities should be:
1. To protect the borough's prime leisure and tourism asset, its countryside, from inappropriate This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

1. To help make Guildford's river landscape less off-putting and support town-break packages for high-value To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

2. To help private providers market local This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An "English town break" (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

3. To rule out the redevelopment of scarce rural hotel sites (e. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E7 Guildford Town Centre

The policy "vision" describes protecting the Guildford's unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council's own Town Centre Master Plan, the Guildford Vision Group's proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.
The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford's character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10615  Respondent: 15502209 / Shirley Atkinson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1- Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council's timidity is a case of "regulatory capture" by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students Ire accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog's Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

I OBJECT to Policy H3 - Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford housing list. To make the housing viable, or to improve the "mix" this can include "market" housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances." The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 300 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be "closely related" Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances." The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure.

Our villages are already suffering from severe congestion for much of the day for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough's infrastructure is already heavily strained. However the plan's determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council's methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy II. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough's infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council's control and on the vagaries of Cll income. Instead of recognizing this as a key constraint, the plan is based on
hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents' locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy 12) I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 &
M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):**

I OBJECT to not protecting the Green Belt.

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council's to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of "only" 1.6% of the borough's Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an "acceptable" percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council's growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers' hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and
the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the "insetting" of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the "openness" of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF's other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To "inset" two-thirds of the borough's rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough's location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed "insetting" and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17's aim of "empowering local people to shape their surroundings" and other NPPF provisions.

Paragraph 4.3. 17 states that "the general extent of the Green Belt has been retained." I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called 'strategic sites' of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick's Arch (A43) and all other strategic sites.

National Planning Policy requires there to be an exceptional circumstance for the Green Belt to be altered, "there are exceptional circumstances for these sites and villages (as mere housing need does not constitute a 'special circumstance') to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC's Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that "allocating these sites does not grant planning permission for development." However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether "exceptional circumstances" existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

1. Having determined housing need the Council was entitled to consider constraints before determining the housing I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

2. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless "exceptional circumstances" for development are proven in relation to that specific site, as stipulated repeatedly in the The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to development in areas which are at risk of flooding.

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding.

Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable.

The NPPF states that the presumption in favour of sustainable development "should be seen as a golden thread running through both plan-making and decision-taking." As the first policy in the Plan, PoliW 51 ought to set a clear framework. Instead, no definition of "sustainable development" is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims "to secure development that secures the economic, social and environmental conditions in the area". This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as "sustainable", in breach of the NPPF's most important guideline.

Policy 51 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the
Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications "wherever possible" and "without delay" reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17. The purpose of the planning system is to contribute to the achievement of sustainable development,

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy.

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the "West Surrey" tri borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study.
On any common sense view, "West Surrey" is much too small. Half of Guildford borough's residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside "West Surrey". Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make "West Surrey" reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour's "need". Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey's 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit reduced inflation number for housing needs. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford's DAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this DAN, the plan as a whole cannot be considered "sound".

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the DAN are identical because the DAN is "deliverable" and is by definition objective and cannot be contradicted. The DAN is only deliverable because of the Council's cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate.

This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered "deliverable". In addition, the number of homes proposed, plus existing planning permissions, plus expected "windfall" sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a "plan" that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the DAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% ADNB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly.

The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London's commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The land appears to have been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick's Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. **An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population.**
   Guildford is already one of the highest 'value creation' areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

2. **SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set.**
   Independent assessments of the SHMA (eg from Guildford Residents' Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal. As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford ocal Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GI Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick's Arch was added to the draft Local Plan without any prior consultation under Regulation 1
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. I do not believe the draft plan accords with the NPPF policies on protecting the Green 14. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not itself very special circumstance justifying an indiscriminate removal of sites from the Green Belt. Having properly calculated a housing needs number, constraints should be applied to it to reflect the
Green Belt and AONB. Each proposed Green Belt site then needs to be considered on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances, and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt, can the proposal proceed. The draft plan does not demonstrate that this has been done. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council's refusal to co operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan. Despite campaigning on a clear statement 'Conservatives Say Green Belt To Stay', the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages. This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick's Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The "objectively assessed need" figure of 693 homes a year is too high.

- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.

- The current SHMA inflates the proposed housing figure due to:

  - failure to correct for errors in the historical data for international migration flows
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.

- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.
The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** PSLPS16/5298  **Respondent:** 15502241 / Richard Atkinson  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43aat Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data: 2010 -2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tythebarns Lane to Portsmouth Road Birch Close - 8 incidents 2015
- 15 April 2016 12 year old boy injured in The Street - A 247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and sec is reluctant to impose further speed limits as congestion is already very high.
I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4-way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until the A3 reaches the A320 Stock Road.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham's sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the local plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,DDD. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England's requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an "aspiration" in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.
Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5307  Respondent: 15502241 / Richard Atkinson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I OBJECT to Policy A43 and A43a on Garlick's Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick's Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current "soft" edge approach to Guildford.
Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (BB).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and redkites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)
The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic. The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development.

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough. The proposed development at Garlick's Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will "enhance" heritage assets which I fear is a developer's charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and
general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I OBJECT to the loss of rural employment.

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford.

Accordingly the policy should recognise that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor "attractions" and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment."Disneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many "leisure and visitor attractions" already. The case for creating more is not made and no examples are given. Instead, the plan's explicit priorities should be:
1. To protect the borough's prime leisure and tourism asset, its countryside, from inappropriate This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

1. To help make Guildford's river landscape less off-putting and support town-break packages for high-value To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

2. To help private providers market local This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An "English town break" (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

3. To rule out the redevelopment of scarce rural hotel sites (e. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E7 Guildford Town Centre

The policy "vision" describes protecting the Guildford's unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council's own Town Centre Master Plan, the Guildford Vision Group's proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.
The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford's character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1- Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council's timidity is a case of "regulatory capture" by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog's Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H3 - Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford housing list. To make the housing viable, or to improve the "mix" this can include "market" housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances." The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations Ire available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be "closely related" Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances." The size and location of sites should be better defined and it should be clear market housing cannot be included.

Comment ID: PSLPP16/10578  Respondent: 15502241 / Richard Atkinson  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure. Our villages are already suffering from severe congestion for much of the day for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough's infrastructure is already heavily strained. However the plan's determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council's methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough's infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council's control and on the vagaries of Cll income. Instead of recognizing this as a key constraint, the plan is based on
hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents' quality of life will significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing reduced funding. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10587  Respondent: 15502241 / Richard Atkinson  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy 12) I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are likely to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 &
M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT to poor air quality concerns.

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---
I OBJECT to not protecting the Green Belt.

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council's to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of "only" 1.6% of the borough's Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an "acceptable" percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council's growth aspiration. An important consideration is that more housing need could be met on urban sites than on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the "insetting" of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the "openness" of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF's other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To "inset" two-thirds of the borough's rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough's location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed "insetting" and boundary extensions go ahead.
This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17's aim of "empowering local people to shape their surroundings" and other NPPF provisions.

Paragraph 4.3.17 states that "the general extent of the Green Belt has been retained." I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called 'strategic sites' of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick's Arch (A43) and all other strategic sites.

National Planning Policy requires there to be an exceptional circumstance for the Green Belt to be altered, the development at Garlick's Arch to be altered, the development at Wisley Airfield to be altered, the development at Gosden Hill Farm to be altered. Exceptional circumstances for these sites and villages (as mere housing need does not constitute a 'special circumstance') to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC's Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that "allocating these sites does not grant planning permission for development." However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to
consider whether "exceptional circumstances" existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

1. Having determined housing need the Council was entitled to consider constraints before determining the housing I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

2. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless "exceptional circumstances" for development are proven in relation to that specific site, as stipulated repeatedly in the The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding.

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding.
Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I OBJECT to this Policy as the development proposed will not be sustainable.

The NPPF states that the presumption in favour of sustainable development "should be seen as a golden thread running through both plan-making and decision-taking." As the first policy in the Plan, PoliW 51 ought to set a clear framework. Instead, no definition of "sustainable development" is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims "to secure development that secures the economic, social and environmental conditions in the area". This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as "sustainable", in breach of the NPPF's most important guideline.

Policy 51 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications "wherever possible" and "without delay" reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17. The purpose of the planning system is to contribute to the achievement of sustainable development,

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.
The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy.

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the "West Surrey" tri borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough's residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside "West Surrey". Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make "West Surrey" reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour's "need". Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey's 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.
The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit reduced inflation number for housing needs. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinised.

The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford's DAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this DAN, the plan as a whole cannot be considered "sound".

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the DAN are identical because the DAN is "deliverable" and is by definition objective and cannot be contradicted. The DAN is only deliverable because of the Council's cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate.

This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered "deliverable". In addition, the number of homes proposed, plus existing planning permissions, plus expected "windfall" sites, exceeds the total of 13,860. So how many homes do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a "plan" that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the DAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% ADNB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly.

The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London's commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The appeal 11a deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick's Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest 'value creation' areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents' Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal. As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: SQLP16/1352  Respondent: 15502241 / Richard Atkinson  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford ocal Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GI Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick's Arch was added to the draft Local Plan without any prior consultation under Regulation 1
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. I do not believe the draft plan accords with the NPPF policies on protecting the Green 14. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not itself very special circumstance justifying an indiscriminate removal of sites from the Green Belt. Having properly calculated a housing needs number, constraints should be applied to it to reflect the Green Belt and AONB. Each proposed Green Belt site then needs to be considered on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances, and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt, can the proposal proceed. The draft plan does not demonstrate that this has been done. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council's refusal to cooperate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement 'Conservatives Say Green Belt To Stay', the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages. This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

Finally the most important objection:

I OBJECT to Send village being removed from the Green Belt. This fantastic legacy from our Victorian Philanthropists was always intended to be permanent, as required by the National Planning Policy Framework. There are no special circumstances to justify abandoning this fantastic legacy. The Green Belt in Send provides an ESSENTIAL Buffer, stopping Woking and Guildford becoming one conurbation. The GBC Councillors and Government gave clear election promises to protect the GREEN BELT. This plan blatantly reneges on those promises, and goes against Government Guidelines as pointed out by Sir Paul Beresford our local MP. This would be a Developers Charter to provide unlimited development all over our Village and some other villages.
Please do not allow this dreadful error which will be irreversible.

I object to the GBC removing the green belt status behind St Bedes School and near the Canal in Send this is vital green space for the village and must be put back as green belt to prevent developers incursion into our vital green belt.

**Comment ID:** PSLPS16/5103  **Respondent:** 15502433 / Jill Murphy **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
I OBJECT to Wisley Airfield, which is classified as a brownfield site on a spurious technicality when everybody can see that it is not what is understood by brownfield, being included in the Local Plan as a development site for 2000 houses when Guildford Planning Committee have just refused the planning application relating to it. Either the left hand does not know what the right hand is doing or this is a devious diversion. I object for all the reasons identified by GBC Planning Committee when it rejected the application.

I OBJECT to building 2000 houses at what GBC calls Wisley but is actually at Ockham, because it would massively and detrimentally overwhelm Ockham village, East and West Horsley and the entire neighbouring area. The proposal is ill conceived, showing scant regard for the Green Belt, infrastructure requirements, transport, or pollution and lacking nearly all the evidence that is needed to show that such a development would be sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7866  Respondent: 15502433 / Jill Murphy  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

I OBJECT to building 45 houses at Clockbarn Nursery. There is inadequate access and high local traffic volume. Planning permission has been given for 64 apartments at the Tannery and for building the Marina. This will generate additional heavy traffic. By adding another 45 houses, this will greatly add to the traffic already there it will be even more gridlocked. The junction with Send Road is already very dangerous for vehicles joining the Main Road, this proposal will make it far more dangerous.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to a new interchange with the A3 at Burnt Common because Send would have to take traffic from the proposed 2000 houses at Wisley Airfield, 2000 at Gosden Hill and 1850 at Blackwell Farm as well as 485 from Send itself. This is in addition to what it takes at the moment. Much of this traffic to and fro the A3, M25, Woking and Guildford would go through Send. Send Road, which is already overloaded, would face gridlock. This would exacerbate noise and pollution levels which are already excessive and is wholly unacceptable.

I OBJECT to the new interchange with the A3 at Burnt Common because it is being presented as a way of facilitating the movement of a massive increase in vehicles whereas in reality it would cause havoc on the A247 and the many feeder roads in Ripley and Clandon in addition to Send.

I OBJECT to the fact that Guildford Councillors approved the Local Plan before the Transport Assessment had even been published which indicates what scant regard they had for the traffic implications which are at the forefront of residents’ worries. They have to contend with the problem every day in terms of delays, pollution and noise which are already destroying our villages as decent places in which to live.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to building 400 Houses and 7000 sq meters of industrial Space at Garlicks Arch opposite Send Marsh Road. This is Green Belt Land with Ancient Woodland, and is prone to considerable flooding. The industrial space is definitely not needed as there is adequate space at Slyfield Green, and the owners at Slyfield are keen to have extra use there. You do not in fact need at all extra industrial Space. If GBC used the brownfield sites this Green Belt land would not be needed. The gridlock that this development would cause on the local Roads would be in addition to the congestion that there already exists around this area and getting the developers to bribe SCC with a new junction will only add to the congestion by pulling in extra traffic trying to access the A3.

I OBJECT to GBC withholding from residents their consultant’s and sub-consultant’s calculations of housing need, which is what is driving this whole issue. It would appear that even some individual councillors are not privy to the calculations or how the total has been reached but are blindly accepting a figure produced without workings or explanation. There are strong grounds for believing that GBC, aided and abetted by their consultants, have overstated by a wide margin what the figure should be. There are also grounds for believing that the numbers have been exaggerated as a result of pressure from developers. As the grabbing of Green Belt land is predicated on the need for a particular number of houses, a good starting point would have been to get the number right and to show transparently how it was reached.

Other submissions will provide supporting statistics and there are authoritative figures online to show the escalation of housing need in Guildford Borough has been about 0.5% per year for the last ten years. The draft plan provides no proper data which proves that it is increasing significantly more at the moment or that in future years it will rise by so much more. Guildford’s projected number in the last draft local plan was challenged by the Office of National Statistics which is a more reliable source since it is not driven by developers. Since the current set of figures was published other underlying data has changed; for example it was too late to take into account the effects on housing demand of changes to the population which could arise from Brexit. Nor has GBC applied the normal constraints to their maximum projections. For a proper professional assessment of housing numbers I refer the reader to the submission from Andrew Procter on behalf of the Save Send Action group.

I OBJECT to the combined total of 2000 (Wisley) + 485 (Send) + 2000 (Gosden Hill) + 1850 (Blackwell Farm) houses all alongside a short stretch of the A3 between the M25 and the university. To concentrate 6335 of the borough’s assessed need for housing of 13860, that is close to half of it, in such a small area of the borough is by any standards unreasonable. If GBC wants to build this number of houses, which has more to do with developer pressure than properly calculated need, it should spread them more evenly throughout the borough, which it is manifestly failing to do. This would help to alleviate excessive traffic congestion and pollution which is a certain consequence of GBC’s current proposals.

Applied specifically to Send, although it is the largest village in the borough it should not have to take a significantly higher proportion of new houses than the borough overall. It should also not have to take a significantly higher proportion of new houses on account of its current size which arises as a result of a disproportionate volume of housing previously being located in Send, Send Marsh and Burnt Common. When the Wimpy Estate of several hundred houses (Linden Road, Maple Road and all adjacent “tree” roads) was built in Send some 40 or more years ago it represented a massive increase in the size of Send Marsh which increase at the time was disproportionate to the size of the village and its amenities. A further massive increase now, which relates numbers proposed to numbers existing, compounds the offence. It would be more equitable to say that as Send accepted a very large number previously, it should not be expected to do so again.

The housing number calculations also have to take into account the constraints, in particular those resulting from the Green Belt. I therefore repeat the points made in paragraph 11 above which cannot be over emphasised. The NPPF states that in their local plans local authorities are required to meet objectively assessed housing needs “as far as is consistent with the policies set out in this Framework”. The policies referred to include Section 9 - Protection of the Green Belt. The Court of Appeal has clarified the interpretation of this by stating categorically that there may be nothing very special about a housing shortfall in an area which has very little undeveloped land outside the Green Belt.

The key question is not “is there a shortfall in housing land supply?” You have to ask “have special circumstances been demonstrated to outweigh the Green Belt objection?” And such circumstances are not demonstrated simply because there is a less than five year supply of housing land. Special circumstances will not exist unless the potential harm to the Green Belt is clearly outweighed by other considerations. Given the large amount of Green Belt in Guildford Borough, the council can legitimately argue that it does not have to match the housing targets of boroughs with less Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Belt Objections

I OBJECT to the Local Plan because it seeks to build on Green Belt land unnecessarily. The work of Professor Anne Power at the London School of Economics, amongst much other expert research, clearly demonstrates that there is more than sufficient land to build all the houses that are needed without taking any of the Green Belt. In our area several studies show that unused brownfield sites in Guildford Town itself are capable of yielding most of the required land. GBC has not properly explored the capacity which is available there or on brownfield sites elsewhere in the borough, which would have provided a sensible starting point since GBC own many of them.

I OBJECT to the Local Plan in that GBC’s approach to the Green Belt introduces a concept of grading its quality. This is an alien concept, not recognised in law. Of course some Green Belt is seen to be better than other Green Belt but the law does not make any distinction, nor should it. It depends who is looking at it and from what standpoint they are looking. Green Belt is Green Belt and it is not for GBC to stand in judgement on what bits it thinks are worth keeping and what are not.

I OBJECT to proponents of the plan representing those against it as “nimbys”. Those against are not against building houses. They recognise the need for them. They are against building them in unsuitable, unthought out locations which damage existing amenities. This relates particularly to building them on Green Belt land, thereby destroying an existing amenity, when it is not necessary to do so.

I OBJECT to the Local Plan because it seeks to promote sites for houses with woefully inadequate attention being paid to the infrastructure to support those sites. Without proper infrastructure none of the identified sites will deliver what is claimed for them. No detailed thought has been given to the form of the infrastructure required, still less to how much it would cost and, it would appear, none at all to where the money for it would come from.

I OBJECT to removing Send and other villages from the Green Belt. The Green Belt was intended to be permanent, and its permanence was enshrined in law through the National Planning Policy Framework, reinforced by the NPPG and a succession of Ministerial guidance statements. For all of this to be overridden requires “special circumstances” which do not exist in the case of Send.

I OBJECT to all four proposed sites in Send because they are all in the Green Belt and not one of them displays the very special circumstances which would be needed in order to outweigh the substantial harm caused by reason of inappropriateness. There is abundant legal authority but I would cite the Court of Appeal cases of City of St Albans v Hunstan Properties and Gallagher Homes v Solihull Metropolitan Council. These precedents, which have been ignored by Guildford Council before, show that it is necessary to demonstrate that harm to the community at large, by taking the Green Belt, would be less than if it was not taken. The crucial words are “to the community at large”. Paragraph 47(1) of the NPPF advises local authorities “to ensure that their local plans meet the full, objectively obsessed, needs for markets and affordable housing in the housing market area as far as is consistent with the policies set out in this framework”. As the Court of Appeal has made clear one cannot rely on objectively assessed needs without having regard to the policy constraints. The qualification in this clause “as far as is consistent with” is not qualifying housing need; it is qualifying the extent to which the local plan should go to meet those needs. It is quite clear from the precedents that exceptional circumstances will not exist unless the potential harm to the Green Belt has been shown to be clearly outweighed by other considerations. In other words harm to the Green Belt is included in the factors which the NPPF requires to be taken into account.

The NPPF further states that in their local plans local authorities are required to meet objectively assessed housing needs “as far as is consistent with the policies set out in this Framework”. The policies referred to include Section 9 - Protection
of the Green Belt. The Court of Appeal has clarified the interpretation of this by stating categorically that there may be nothing very special about a housing shortfall in an area which has very little undeveloped land outside the Green Belt.

The key question is not “is there a shortfall in housing land supply?” You have to ask “have special circumstances been demonstrated to outweigh the Green Belt objection?” And such circumstances are not demonstrated simply because there is a less than five year supply of housing land. Special circumstances will not exist unless the potential harm to the Green Belt is clearly outweighed by other considerations. The draft plan has not begun to demonstrate that there are exceptional circumstances and indeed offers very little to suggest that the authors have even read what the Court of Appeal has said about the provisions in the NPPF.

It is noted that the Court of Appeal precedents have been ignored before by GBC, which appears to regard itself as over and above the law. GBC seems willing to expend residents’ funds on counsel’s advice, in support of what its client developers want to do, but cannot bring itself to get a QC’s opinion in order to guide it on understanding the case law that actually exists, which manifestly it does not understand.

Given the large amount of Green Belt in Guildford Borough, the council can legitimately argue that it does not have to match the housing targets of boroughs with less Green Belt. But if Guildford wants to match the housing target which would apply if it was not constrained by the Green Belt, it can still do so using brownfield land which is in plentiful supply. It is difficult to avoid the conclusion that it has not taken either of these legitimate routes because it finds the allure of developers’ propositions on green field sites more attractive. GBC should also note that the Green Belt was created not just for the benefit of local residents. It came to be known as the Metropolitan Green Belt because it was intended to be of benefit to a much wider range of people, especially Londoners visiting open spaces outside but near to London. It is beyond the remit of GBC to arrogate to itself the power to override Parliament’s intention.

I OBJECT to any sort of diminution of Send’s Green Belt because it provides an essential buffer stopping Woking and Guildford becoming one conurbation. It has served this purpose effectively since its inception and should continue doing so for the benefit of subsequent generations living here. No group of councillors, especially without a mandate, has the authority to impose a different future on residents.

I OBJECT to any reduction in Send’s Green Belt because so much land in Send provides the setting for the beautiful Wey Navigation corridor, which is a conservation area that enhances biodiversity, is visually important, provides a valuable leisure facility and combined with the surrounding lakes an exceptional habitat for a wide range of bird species and other wildlife.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to CLOCKBARN NURSERY TANNERY LANE POLICY A42 because:

Increasing the homes from 60 instead of 45 is an increase of 33% is far too many.

Why have all the previous objections been ignored and then you have added to the number of houses?

The Junction of Tannery Lane and the A247 are at gridlock, lots of times each day at present, and coming out from this junction is VERY DANGEROUS.

Adding any houses to Tannery Lane would add to the danger but 60 houses with say another 120 vehicles as well as delivery vans will give constant gridlock, and accidents.

It will add to the existing surface water flooding.

As a boat user on the River Wey Navigation it will detract from the lovely views from this Canal.

It will further erode our precious Green Belt, which the Government is Committed to keep.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT TO POLICY A 43 because:

It ignores thousands of previous objections made by us local people.

It will cause even more traffic congestion, which is dreadful already, gridlocking the Roads in and out of Send and Ripley.

It will fill in the gap between Send Marsh and Ripley, so defeating the purpose of the Green Belt.

It will cause over development of our village and this number of homes is excessive.

There are NO "exceptional circumstances" existing to use our precious, beautiful Green Belt Land.

The beautiful Ancient Woodland in this site has been there since Elizabeth the First and must be protected for future generations.

Being a flood zone 2 allocation it is prone to frequent flooding, so the surface water will be moved onto the lower ground where I live.

There is a clay pigeon shooting site here which has polluted the ground with lead shot for over 50 years.

There is NO PROVEN demand for Traveling Show people plots here.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I Object to POLICY A58 at BURNT COMMON because:

It was deleted in the 2014 plan because of so many objections were made.

There is no need to build industrial or warehousing development IN THE MIDDLE OF THE PRECIOUS GREEN BELT when Slyfield and Guildford have EMPTY sites and industrial units.

The 2017 Employment Land Need Assessment shows a REDUCTION in demand to 3.9 hectares for industrial use in the whole Borough NOT a huge allocation of 10 hectares at SEND IN THE GREEN BELT.

The resultant GRIDLOCK in the already very congested local roads from car and heavy transport would be a disaster for local Send residents.

AGAIN this will join up local villages thus defeating the object of our precious Green Belt.

The WORD MINIMUM has been craftily changed from the previous MAXIMUM in the 2016 plan and since then there has been a large decline in demand for industrial land.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Major doubts concerning housing numbers - The inflated number of new houses proposed arises from a SHMA that has not been shared as part of the local plan. This SHMA target housing number if further increased by GBC to give a population increase which is almost 70% higher than official national estimates for population growth in the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?  
Attached documents:
I am writing to object to the proposed local plan for the Horsley villages. I live in East Horsley and object on the following points:

1. **Removal of the Horsleys from the Green Belt** – The Green Belt was put in place to stop towns and villages running into huge unbroken settlements. I feel it is wrong for our council to over-turn a national environmental protection scheme to meet inflated housing quotas. The removal of the Horsleys is an arbitrary decision with no logical basis and is a needless destruction of a historic village. The national plan states that Green Belt land may be removed in ‘exceptional circumstances’. No exceptional circumstances have been presented within the plan to justify this act. Building on Greenfield sites in the UK is significantly cheaper than developing Brownfield sites and the decision to build large tracts of houses rather than infilling or developing these smaller sites is purely economic. Developing smaller sites is good for the local economy, supporting local developers and generating sustainable jobs in the local area. Large developments will import labour and export profits.

2. **Significant changes to the character of the village** - The plan aims to build 593 new houses within the Horsleys and a further 2000 between the Horsleys and the A3 at Wisley Airfield. The national plan definition for Green Belt infill states that gaps in housing within villages can be in-filled and villages can be expanded so as not to alter their character. I have no objection to this sensible approach to development within the village and recent developments including the development near the Horsley railway station have been in keeping and at a scale which does not alter the village character. The proposed plan would irreversibly alter the character of the village, increasing the number of houses and population by over 50%, turning what is a busy and thriving village into a gridlocked satellite town with insufficient amenities and infrastructure.

3. **Infrastructure concerns** – Despite living in East Horsley only a short distance from the Raleigh school, my oldest son was ineligible for a place in reception, as the school was filled from a catchment less than a mile from the school. If we have an additional 600 houses, or roughly 600-1200 children, the pressure on places will be even more extreme. Ockham Road south, the major thoroughfare of East Horsley is already overloaded and leads to significant queues at rush hour to get through the village and onto the A246. This leads to people taking huge risks to get onto the 246, as they are so fed up they pull out just in front of oncoming traffic. It is a major accident waiting to happen. Also, the road is so narrow that when a bus and a lorry meet on this road, it all comes to a grinding halt which results in significant congestion and pollution in the village. The plan aims to build an additional 3000 homes within a 3 mile radius of the Horsley’s and the current road system is just not able to cope with this additional load. There is no indication of how construction would occur (how many additional lorries)?

Horsley station car parks are already full and cannot deal with increased numbers. Trains to Waterloo are full and adding an additional station and houses will just add to this issue. There is not sufficient capacity on the Guildford-Surbiton-Waterloo rail network to cope with the additional housing. It only takes one late train on a weekday morning to cause chaos on this route leading to dangerous overcrowding of trains and platforms. I do not see this addressed in the plan at all and therefore it lacks understanding of basic infrastructure needs.

Adding slip roads to the A3 will further increase congestion. The junction with the M25 is a dangerous intersection and adding a slip road in this area will cause additional accidents with traffic filtering onto congested inner lanes with

1. **Major doubts concerning housing numbers** – The inflated number of new houses proposed arises from a SHMA that has not been shared as part of the local plan. This SHMA target housing number if further increased...
by GBC to give a population increase which is almost 70% higher than official national estimates for population growth in the borough. There is simply no need for the number of houses projected.

1. **Flooding** - During the heavy winter rains we have experienced over the past couple of years the Horsley area has suffered with terrible flooding, which particularly affect the main roads though the village which all flood. With additional building and additional cars, this issue and the congestion it causes will get much worse. Storm water management in the area is at capacity and I have personally witnessed backup of sewer systems and the forcing off of drain covers due to the lack of capacity for rain events. This causes polluted discharge into the local rivers from the sewer system leading to long term environmental damage. The increased housing will further reduce the permeable surface, even considering modern paving and surfacing technology. Much of this excess peak flow will end up in local streams and rivers and significantly increases the risk of flash floods, maybe not in our borough, but certainly in those downstream.

1. **Designation of East Horsley as a ‘District Centre’** - I understand that a district centre can be described as 'a LARGE group of shops, together with supporting non-retail facilities and services. They normally feature not less than 50 units'. We are a village with a handful of shops and therefore should not be classed as a district centre. The parking in the village for shopping consists of a single row of spaces in front of the shops and an area for around 4 cars to the side of the Budgens store. This area is already congested and increasing demand by 50% would cause gridlock in the village.

1. **Plan omissions** - Within the local plan I would expect to see a vision for sustainable growth which includes the infrastructure required to support the proposal and the impact on peoples health and the environment. The current plan is about meeting housing quotas which are at the top end of forecasts, with no thought for the impact of the proposal on the environment or on the people living in these areas. There is no clear plan on how capacity for water, waste water, and electricity will be met and the impacts to storm water management within the borough and the incidental impacts to other boroughs such as Elmbridge and Mole Valley through increased instantaneous river volumes. I would like to see average traffic volumes and speeds forecast in the plan and the resulting impact to air quality and life expectancy for local residents especially those suffering from COPD and asthma. The implementation of this plan will lead to higher incidence of environmentally triggered respiratory disease and will decrease the overall appeal of living in the Guildford area. If you envisage the future with this plan implemented in the Horsleys you will see a grid-locked, polluted suburb where there was once a very pleasant community.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Removal of the Horsleys from the Green Belt** - The green belt was put in place to stop towns and villages running into huge unbroken settlements. I feel it is wrong to just arbitrarily decide that it now suits the council to change the green belt, therefore our village is being removed. It is also against the policy that says ‘exceptional circumstances’ are required to make this change. There are no exceptional circumstances that have been provided to justify this change.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing in the strongest terms possible to voice my objection to the proposed plan for the new housing development sites in East and West Horsley. I have lived in West Horsley for 20 years – my husband and I moved to the village as we considered the area to be one of outstanding natural beauty where we could bring up our family in a safe, pollutant free environment. During the time that we have lived here, there have been a substantial number of new houses being built which, generally speaking, have been sympathetically developed on land which had previously had housing or by extending plots within established gardens – as has been seen on our road – Nightingale Crescent where 2 new houses were built.

The suggestion that the Horsleys’ require the number of new houses proposed is ridiculous. The local amenities are just about coping with the number of residents currently housed in the two villages. Without significant input into increasing the local amenities – such as schooling, doctor’s surgery, dentists etc the two villages cannot sustain any further increase in the population. Our local roads are already under increased pressure from the daily number of vehicles and again without a significant amount of investment into their upkeep, the road surface will getting increasingly worse.

We fondly refer to East and West Horsley as being beautiful caring villages – the new proposed plan would create a monstrous sprawling housing estate – a far cry from the countryside village that we moved to in 1996. I love where I live and I certainly don’t wish for the Horsleys to change in anyway!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Any additional housing would lead to a further increase in the number of cars using the local roads. The proposal to build circa 2000 houses on the Wisley Airfield site would increase daily car usage to between 2000 and 4000 vehicles which would lead to further delays and frustration for all road users.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I represent the owners of an international horticultural business in Cobham which owns land in Cobham and Ockham. Our Ockham site is very important for the development of the business and there are regular movements between the two sites of Tractors and cultivation and/or harvesting equipment. We also have vehicle movements between the two sites moving commercial stock.

We object very strongly to the re-inclusion of the Former Wisley Airfield/ Three Farms Meadows site into the Borough Local Plan after it was rejected as a suitable site for housing by the full planning committee and the planning department of the Borough.

We object to the plan’s proposal to remove the Wisley airfield / Three Farms Meadows from the green belt and we also strongly object to the similar proposals to build on green field sites in the Parish’s of East and West Horsley, Send and Ripley, and to the removal of these parish’s or parts of them from the Green Belt.

We object to the loss of the Agricultural land at The Farms Meadows through the proposed development there. Good agricultural land is a declining resource.

We object to the proposed development of the various sites in the parish’s of East and West Horsley, Ockham, Ripley and Send because they cannot happen without a big investment in services and this major requirement is hardly mentioned. Already the district is struggling with overflowing sewerage, with shortages of other utilities of Gas, water and electricity supplies. There is already a desperate shortage of school places for all age groups in this area of Surrey; Medical services are also fully stretched and inadequate for more clients. The Hospital will need to expand too.

We object to the proposals to increase the number of houses in this area by such a large amount on an annual basis. The road infrastructure is inadequate. The roads were developed in the days of the horse and cart, are narrow and cannot be widened easily because they are bounded by hedges. There are few footpaths and no cycle lanes or lighting. The mix of pedestrians, cyclists and ridden horses with fast cars and trucks are a recipe for disaster and litigation if no planning consideration was made. Due to the high traffic movements and the high number of goods vehicles using these lanes they are now breaking up. The area has some of the worst roads in the county.

We object to the proposed development of the Former Wisley Airfield on health grounds in that the site is very close to the major trunk roads of M25 and A3 and junction 10 of the M25. I have personally experienced discomfort due to the air pollution engendered by the traffic when walking on Ockham Common which is very close to the site when the wind is from the North round to the South East.

I object strongly to the development because of its likely affect on the Wisley and Ockham commons, part of the Thames Basin Heaths Special Protection Areas, particularly considering atmospheric pollution, increased footfall and dog exercising on these fragile environments. We object to the cavalier attitude of the planning department, the planning committee and their subcontractors in devising a housing need without consideration and planning for the infrastructure needed to establish their proposals. If it were a business making such poor plans they would quickly lose their money and become bankrupt. We object as taxpayers that we would have to bear the financial consequences of the planning.
We strongly object to the proposals because of the effect on the picturesque villages which have a high number of old and historic houses, many listed. The proper development of The Borough should be to increase the number of high rise buildings in the centre, not that Guildford is a city, with schemes such as the station development, lesser rise building should be encouraged in the suburbs of Guildford. We object to the lack of planning for work and employment for the residents of these developments. They cannot all take the train to London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the 2016 Draft Local Plan on the grounds of (i) the limited consultation period and (ii) it appears to be unsound in a number of key aspects.

On reviewing the document it appears the plan is unsound because there is a lack of evidence for the alleged housing need which in turn has led to the proposed disproportionate level of development on one area of the Borough.

Additionally, there is a lack of specific detail concerning the essential infrastructure to support all the proposed development stated in the above Draft Plan especially as there is an acknowledged existing deficit already.

Furthermore, there appears to be a total disregard for the potential loss of Green Belt.

Therefore, as a result of the poor quality of the draft plan it appears to be total unsound for it’s proposed purpose and so should be re-considered and drafted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposed Infrastructure Schedule (Appendix C)
The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the figure of 693 houses per annum in the borough being too high (Appendix D)
The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)
Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance. What will happen for doctors, dentists and schools? It is bad enough already.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**Comment ID:** PSLPS16/5119  **Respondent:** 15502817 / Linda Margaret Cutbush  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:
- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

Why is it deemed necessary for a new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of existing successful rural businesses, which have been there for decades employing local people and are therefore clearly sustainable.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)
The Garlick’s Arch (A43) proposal would double the built area in the locality, and would irrevocably damage the character of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)
There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.

The rural roads in this area are in very poor condition and have little or no footpaths. 5000 more houses means dangerous and unsustainable traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the lack of proper infrastructure planning for sites (Policy I1)
The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)
The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

I object to the Local Plan as the development proposed is not sustainable (Policy S1)
13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick’s Arch.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object to the Borough Wide Strategy (Policy S2)
GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there’s too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11% of the existing housing. What plans are there for south of Guildford?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

I OBJECT to Policy A43a, the proposed on/off ramps to the A3 at Burnt Common as this will inevitably cause traffic chaos on the local road network throughout Ripley, Burnt Common, Send and West Clandon, with absolutely no possibility of mitigation due to the nature of our rural roads and lanes.

## 1. INTRODUCTION

1.1 Guildford Borough Council (GBC) is producing a new Local Plan to cover the plan period 2013 to 2033 and guide development within the borough whilst also complying with the principles and wider national policies identified within the National Planning Policy Framework (NPPF).

1.2 These representations are made as part of the Regulation 19 to the public consultation for the Proposed Submission Local Plan.

1.3 The representations relate to Land to the west and south west of Fairlands – ‘Land adjoining Fairlands, Guildford’ which was identified in the former Draft Local Plan Document as a ‘safeguarded’ site under Site Allocation 1. The site has not been taken forward as an allocation in the Proposed Submission Local Plan.

1.4 This statement provides a site summary and a review of Policy 2 of the borough wide strategy. It then addresses reasons why the land at Fairlands should be allocated for housing development in the Submission version of the Local Plan, covering issues such as housing requirements, the 5 purposes of the Green Belt and the questionable deliverability of large scale strategic sites that have been included in the Proposed Submission Local Plan.

## 2. Site Summary

2.1 The land to the west and south west of Fairlands has been identified on the map below:

![Image 1: Site Location plan](image1.png)

2.2 The land adjoining Fairlands, Guildford’ was identified in the former Draft Local Plan Document as Site Allocation 11.

2.3 The site was also identified in Volume III of the Green Belt and Countryside study as providing opportunities to accommodate development without significantly compromising the purposes of the Green Belt. The parcels of land identified as H8-A H8-B (former allocation 118) have a capacity of circa 500 dwellings. The site is well related to existing services such as a local service centre, a doctor’s surgery and bus routes located within Fairlands, which is a residential area in character. The site provides the opportunity for a natural extension to the residential area of Fairlands on a contained site which is surrounded by defensible boundaries and tree cover.

2.4 This site is deliverable and available now. It is within a single ownership and as it was last in agricultural and equestrian use there are no constraints to the site coming forward for residential development. The site is achievable, it is capable of being delivered within five years and is entirely viable.

2.5 Fairlands uniquely is capable of accommodating an on-site SANG to mitigate the impact of any development upon the Thames Basin Heaths. The developable area is shown edged red on Image 1 and the proposed SANG land is edged blue and hatched. We have discussed this with Natural England who have advised that this could be bespoke SANG land to support the development.

2.6 There is an existing access to Littlefield Manor and the land shown hatched brown on Image 1 will be used as a principle access road to the development land from the A323 Aldershot Road.
2.7 Fairlands is a sustainable settlement, with a number of services including a school, doctor’s surgery, post office, community centre and shops. Fairlands is located just 2 miles from Guildford, providing access to a range of quality services and infrastructure. It is therefore a wholly sustainable location for development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

4 HOUSING LAND SUPPLY

Annual Monitoring Report

4.1 The recent Annual Monitoring Report (AMR) published in October 2015 to assess the period of 2014-2015 showed that net completions that year had been just This is an under delivery of 80 dwellings against the interim housing figure and an under delivery of 451 units when assessed against the annual housing target for the plan period identified in the Proposed Submission Local Plan. The previous interim housing figure of 322 dwellings per annum agreed on May 2012 did not take account of up to date assessments of housing need and therefore was not NPPF compliant. The phased delivery of housing proposed will further exacerbate this issue.

4.2 The AMR states that “housing provision is currently restricted by the lack of available and deliverable development land in the borough….delivery rate is only likely to increase when larger areas of land are suitable and available for development”. This demonstrates the need in the district for large scale strategic sites such as the land adjoining Fairlands. These representations therefore identify the key reasons why the site should be considered appropriate for housing and should be reinstated in the Local Plan for removal from the Green Be Paragraph 83 of the NPPF addresses removal of land from the Green Belt and states that boundaries ‘should only be altered in exceptional circumstance’. The current under delivery of housing is considered to be an exceptional circumstance and as a result Green Belt land such as the site at Fairlands should continue to be considered as an allocation site in the final Local Plan.

5 Year Housing Land Supply

4.3 The NPPF addresses the matter of housing land supplies in Paragraph 47 which stipulates a requirement for Local Planning Authorities (LPA) to “identify and update annually a supply of specific deliverable sites sufficient to provide five years worth of housing against their housing requirements with an additional buffer of 5%. ’ It goes on to state that where there has been persistent under-delivery of housing in the district or borough, LPAs should increase the buffer to 20%. It is clear that GBC cannot currently demonstrate a 5 year housing land supply with in the region of only 4-2.5 years supply being currently identifiable. This will continue to be the case if GBC adopt the phased process identified in table 1 of this report.

4.4 The level of under delivery of housing is also likely to perpetuate as inward migration from the London Boroughs continues. Much of the SHMA is based on figures from 2012 which are now out of date and no longer accord with the
population projections supplied by the Office of National Statistics (ONS) which show that by 2037, the population of Surrey is expected to increase by over 200,000.

4.5 It is therefore considered essential that previously identified deliverable sites, such as the land at Fairlands are included in the final Local Plan document as development allocations.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

7 CONCLUSION

7.1 It is acknowledged by GBC that it does not have a five year land supply against the OAN target of 693 dwellings per annum. This is exacerbated by a continuous under delivery of development in recent years, as well as the proposed phased approach taken by GBC to backload the housing delivery to the later part of the plan period.

7.2 There is an evident housing shortage in the borough in the immediate term and a reliance upon some sites which have serious deliverability constraints has the propensity to exacerbate this defi. In addition, the Local Plan recognises that Green Belt land will need to be developed in order to meet the OANs for the borough. In light of this, there is no rationale for the removal of Fairlands Land from the Local Plan as a former proposed allocation site. The land is available and deliverable, and capable of assisting in meeting the current pressing housing need, particularly as the former proposed allocation removed the site from the Green Belt.

7.3 GBC has identified at least two major strategic sites which are anticipated to deliver circa 3,000 dwellings to assist in meeting the 693 dwelling per annum figure, that have significant deliverability problems. Simultaneously GBC has removed the land at Fairlands which is capable of delivering circa 500 dwellings if released from the Green Belt as previously proposed in the Draft Local Plan. On this basis, the land to the west and south west of Fairlands should be allocated as a development site to assist in meeting the borough’s OAN and allowed to provide certainty in the event that any of the currently identified sites fail to come forward.

7.4 There can be no justification for an authority which has an immediate housing deficit, a lack of genuinely deliverable sites and Green Belt constraints to backload such significant proportions of projected housing delivery to the later stages of the plan period. Land adjoining Fairlands had previously been identified as suitable for release from the Green Belt, it is available and it is deliverable now. The site should, therefore, be introduced as an allocation for residential development during the current plan period.

5 DELIVERABILITY OF STRATEGIC SITES

5.1 GBC anticipates that there are a number of sites within Guildford that can come forward within either 5 or 11–15 years. Whilst there may be a number of sites within the settlement that could be capable of coming forward, Slyfield Area Regeneration and Wisley Airfield have been identified as being unlikely to be in a position to meet the criteria of being either deliverable or developable.

Slyfield Area Regeneration Site Allocation A24

5.2 Slyfield is identified as a major development site with the capacity of accommodating 1,000 residential units as well as other infrastructure on a wider mixed use. This site is occupied by a number of existing uses including a waste transfer station and a large sewage treatment works operated by Thames Water. The treatment works currently process effluent from Guildford, Godalming, Cranleigh and surrounding villages and is clearly required for this function.

5.3 There is limited evidence that the replacement of the treatment works is supported by Thames Water and that this is desirable, deliverable or The sewage treatment works would require a significant cordon sanitaire in order to ensure that the residential amenity of future occupiers is protected. It is our experience that this is likely to sterilise much of the developable area of the site and would be required regardless of whether the works is relocated or remains in situ. Given the size and nature of the sewage treatment works a cordon sanitaire of c.300-400 metres around the treatment works is likely. The need for a significant cordon sanitaire around the sewage treatment works does not appear to have been acknowledged, nor has the need for support from Thames Water and Surrey County Council for the proposals.

5.4 It is noted that GBC envisages this site coming forward within the 11-15 year period. However, there is no evidence that there will be a reasonable prospect that this site will come forward for residential development or that the site is capable of accommodating the quantum of development envisaged given the need for a cordon sanitaire and the need to accommodate a number of competing uses identified for the site, including an 11 hectare site allocated for a waste facility in the Surrey Council Waste Plan, 2008. This allocation of 1000 units is a development commitment for a significant amount of the site. There is no evidence that the site is viable given that the proposed allocation includes a number of municipal facilities including: a new waste management depot, 11 hectares of waste facilities (an allocation in the Surrey Waste Plan, 2008), a new sewage treatment works and a primary school.

5.5 Indeed given that the site is only 40 hectares and over one quarter is allocated for waste facilities, in order to accommodate the proposed quantum of uses and the amount of residential development the resulting density would need to be in excess of 50 dwellings per hectare which would not be desirable in terms of the character of the area.

5.6 In the light of the considerable constraints that this site experiences it should not be relied upon to deliver the proposed 1,000 dwellings identified at allocation A24.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Wisely Airfield Allocation Site A35

5.7 This proposed redevelopment site would provide 2,000 new homes as part of a larger mixed use development. There are, however, significant concerns that this site is unsuitable in planning terms, particularly regarding the strategic highway network.

5.8 The NPPF is clear that plans and decisions should ensure developments that generate significant movements are located where the need to travel will be minimised and the use of sustainable transport modes can be maximised. The site is manifestly not sustainable, it is not related to any existing settlement or infrastructure or local services. Indeed it is located in open countryside, remote from any settlement infrastructure. Development of this site would constitute a major housing development in a rural area which will rely upon car based travel to and from given the proposed access on to the A3 which is not conducive to encouraging modal shift to non-car based transport.

5.9 The inherently unsustainable location of this site means that its development as a major housing and employment site will conflict with the policies of the Framework. An Inspector will have to give very careful consideration as to whether it constitutes the most suitable location for the proposed form of development. The site is also the most contentious proposed allocation in GBC’s plan. Its suitability for major development will need to be very carefully scrutinised.

5.10 In the light of the potential deliverability issues displayed by some of the most significant strategic sites identified in the Plan, as well as GBC requiring yet further sites to meet its OAN of 693 dwellings per annum, there is no justification to not consider the land at Fairlands for development. The site is suitable, available and deliverable now.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

6 GREENBELT

6.1 The key restriction regarding the development of the land at Fairlands site is its Green Belt. There are 5 purposes to the Green Belt which have been set out below in relation to this proposed allocation site.

To check the unrestricted sprawl of large built-up areas

6.2 The land to the west and south west of Fairlands adjoins the settlement of Fairlands, 2.6 miles north of Guildford. The western boundary of the site is constrained by the existing development of Littlefield Manor, including Littlefield Manor Riding School and the extent of the flat, developable area of land. The northern boundary is heavily wooded between the site and the Aldershot Road. The eastern boundary is formed of residential streets. The southern boundary is restricted by
an existing track and an established row of clustered mature trees. The site is therefore largely contained, and the less defined boundaries to the south and west could be strengthened through additional soft landscaping. It is therefore considered that this site is not required to be in the Green Belt in order to prevent the village from sprawling.

To prevent neighbouring towns merging into one another

6.3 The proposed extension to Fairlands would be to the west of the settlement. The nearest development to the west is a row of housing along Frog Row Lane. This is 1.2km from the existing western boundary of Fairlands and would still be 1km away should the site subject of this report be developed. The nearest village to the west is Willey Green which is 2km west of Fairlands. It is therefore considered that there is no risk of the proposed development of the site resulting in neighbouring settlements merging together.

To assist in safeguarding the countryside from encroachment

6.4 As set out in the two points above, the site is largely contained by existing development and mature woodland and vegetation. Development of the site would allow for a sustainable extension to an existing settlement.

To preserve the setting and special character of historic towns

6.5 Fairlands is not considered to have any special or historic character. The settlement was first built in the 1930’s with the majority of development taking place in 1960’s. The settlement is not considered to contribute to the setting of any nearby historic towns and therefore does not meet this purpose for land being within the Green Belt.

To assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

6.6 The West Surrey SHMA found that the objectively assessed need was 1,729 homes per annum for the region between 2013 and 2033, 693 of which are to be provided within the Guildford local planning area per annum. It is therefore necessary for the Local Planning Authority to consider a range of sites, both brownfield and green. Of course brownfield sites should be developed first, however the Council has recognised that the existing available brownfield sites within the area are not sufficient to meet current housing requirements. There is therefore a clear indication that the Council will need to identify Greenfield land, much of which will be Green Belt if it is to meet housing requirements. In addition, Policy 2 of the Borough Wide Strategy clearly indicates that Green Belt land will need to be released for development in order to meet the OANs for the borough. On this basis there is a strong case for this identified site to be removed from the Green Belt to allow for beneficial development.

3. POLICY 2: BOROUGH WIDE STRATEGY

3.1 The Borough Wide Strategy identifies Guildford Borough Council’s housing target as 13,860 during the plan period (2013-2033). The Objectively Assessed Need (OAN) is therefore 693 dwellings per annum. This figure was confirmed as part of the West Surrey Strategic Housing Market Assessment (SHMA) The SHMA also included Waverley and Woking within the Housing Market Area (HMA). Policy 2 stated that the delivery of homes is expected to increase over this plan period due to the time lag associated with delivering infrastructure. This phasing of delivery has been set out in the table below:

Table 1: Proposed phased housing delivery in GBC from 2018-2032

3.2 GBC demonstrated an under delivery of net completions of housing delivery between 2010 and 2015 and have continuously failed to meet their current OAN of 693 dwellings per annum as well as the former lower interim housing target of 322 dwellings per annum.

Supporting Text

3.3 Paragraph 18 and 4.19 of the supporting text for policy S2 in the Proposed Submission document state that countryside beyond the Green Belt will be required in order to meet housing requirements:

‘4.1.8 ‘Whilst these sustainable locations are our preferred locations for new development, they are unable to accommodate all of the new development we need. We will therefore release allocated land for development in other areas. These include:

• countryside beyond the Green Belt
• urban extensions to Guildford and Ash and Tongham
• new settlement at the former Wisley airfield
• development around villages (including some expansion).

4.1.9 These will be phased according to deliverability and identified need. We anticipate that smaller allocated sites will provide the majority of supply in the first five years. Larger development sites, including the strategic development sites, will deliver the majority of new development in the 6-10 and 11-15 year periods of the plan.’

3.4 The land at Fairlands can be demonstrated as deliverable and could come forward in the earlier years of the plans in order to assist in addressing the continuous under delivery of development that has been seen over the past 5 plus years. It is therefore considered that this site should be re-introduced to the Local Plan and be allocated for housing development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: 2016-07-15 written reps to Proposed Submission Local Plan HR FINAL.pdf (453 KB)
1.1 Guildford Borough Council (GBC) is producing a new Local Plan to cover the plan period 2013 to 2033 and guide development within the borough whilst also complying with the principles and wider national policies identified within the National Planning Policy Framework (NPPF).

1.2 These representations are made as part of the Regulation 19 to the public consultation for the Proposed Submission Local Plan.

1.3 The representations relate to Land to the west and south west of Fairlands – ‘Land adjoining Fairlands, Guildford’ which was identified in the former Draft Local Plan Document as a ‘safeguarded’ site under Site Allocation 118. The site has not been taken forward as an allocation in the Proposed Submission Local Plan.

1.4 This statement provides a site summary and a review of Policy 2 of the borough wide strategy. It then addresses reasons why the land at Fairlands should be allocated for housing development in the Submission version of the Local Plan, covering issues such as housing requirements, the 5 purposes of the Green Belt and the questionable deliverability of large scale strategic sites that have been included in the Proposed Submission Local Plan.

**SITE SUMMARY**

2.1 The land to the west and south west of Fairlands has been identified on the map

2.2 The land adjoining Fairlands, Guildford’ was identified in the former Draft Local Plan Document as Site Allocation 118.

2.3 The site was also identified in Volume III of the Green Belt and Countryside study as providing opportunities to accommodate development without significantly compromising the purposes of the Green Belt. The parcels of land identified as H8-A H8-B (former allocation 118) have a capacity of circa 500 dwellings. The site is well related to existing services such as a local service centre, a doctor’s surgery and bus routes located within Fairlands, which is a residential area in character. The site provides the opportunity for a natural extension to the residential area of Fairlands on a contained site which is surrounded by defensible boundaries and tree cover.

2.4 This site is deliverable and available now. It is within a single ownership and as it was last in agricultural and equestrian use there are no constraints to the site coming forward for residential development. The site is achievable, it is capable of being delivered within five years and is entirely viable.

2.5 Fairlands uniquely is capable of accommodating an on-site SANG to mitigate the impact of any development upon the Thames Basin Heaths SPA. The developable area is shown edged red on Image 1 and the proposed SANG land is edged blue and hatched. We have discussed this with Natural England who have advised that this could be bespoke SANG land to support the development.

2.6 There is an existing access to Littlefield Manor and the land shown hatched brown on Image 1 will be used as a principle access road to the development land from the A323 Aldershot Road.

2.7 Fairlands is a sustainable settlement, with a number of services including a school, doctor’s surgery, post office, community centre and shops. Fairlands is located just 2 miles from Guildford, providing access to a range of quality services and infrastructure. It is therefore a wholly sustainable location for development.

**POLICY 2: BOROUGH WIDE STRATEGY**

3.1 The Borough Wide Strategy identifies Guildford Borough Council’s housing target as 13,860 during the plan period (2013-2033). The Objectively Assessed Need (OAN) is therefore 693 dwellings per annum. This figure was confirmed as part of the West Surrey Strategic Housing Market Assessment (SHMA) 2015. The SHMA also included Waverley and
Woking within the Housing Market Area (HMA). Policy 2 stated that the delivery of homes is expected to increase over this plan period due to the time lag associated with delivering infrastructure. This phasing of delivery has been set out in the table below: <see attachments>

3.2 GBC demonstrated an under delivery of net completions of housing delivery between 2010 and 2015 and have continuously failed to meet their current OAN of 693 dwellings per annum as well as the former lower interim housing target of 322 dwellings per annum.

Supporting Text

3.3 Paragraph 4.18 and 4.19 of the supporting text for policy S2 in the Proposed Submission document state that countryside beyond the Green Belt will be required in order to meet housing requirements:

‘4.1.8 ‘Whilst these sustainable locations are our preferred locations for new development, they are unable to accommodate all of the new development we need. We will therefore release allocated land for development in other areas. These include:

countryside beyond the Green Belt
urban extensions to Guildford and Ash and Tongham
new settlement at the former Wisley airfield
development around villages (including some expansion).

4.1.9 These will be phased according to deliverability and identified need. We anticipate that smaller allocated sites will provide the majority of supply in the first five years. Larger development sites, including the strategic development sites, will deliver the majority of new development in the 6-10 and 11-15 year periods of the plan.’

3.4 The land at Fairlands can be demonstrated as deliverable and could come forward in the earlier years of the plans in order to assist in addressing the continuous under delivery of development that has been seen over the past 5 plus years. It is therefore considered that this site should be re-introduced to the Local Plan and be allocated for housing development.

HOUSING LAND SUPPLY

Annual Monitoring Report

4.1 The recent Annual Monitoring Report (AMR) published in October 2015 to assess the period of 2014-2015 showed that net completions that year had been just 242. This is an under delivery of 80 dwellings against the interim housing figure and an under delivery of 451 units when assessed against the annual housing target for the plan period identified in the Proposed Submission Local Plan. The previous interim housing figure of 322 dwellings per annum agreed on May 2012 did not take account of up to date assessments of housing need and therefore was not NPPF compliant. The phased delivery of housing proposed will further exacerbate this issue.

4.2 The AMR states that “housing provision is currently restricted by the lack of available and deliverable development land in the borough….delivery rate is only likely to increase when larger areas of land are suitable and available for development”. This demonstrates the need in the district for large scale strategic sites such as the land adjoining Fairlands. These representations therefore identify the key reasons why the site should be considered appropriate for housing and should be reinstated in the Local Plan for removal from the Green Belt. Paragraph 83 of the NPPF addresses removal of land from the Green Belt and states that boundaries ‘should only be altered in exceptional circumstance’. The current under delivery of housing is considered to be an exceptional circumstance and as a result Green Belt land such as the site at Fairlands should continue to be considered as an allocation site in the final Local Plan.

5 Year Housing Land Supply

4.3 The NPPF addresses the matter of housing land supplies in Paragraph 47 which stipulates a requirement for Local Planning Authorities (LPA) to “identify and update annually a supply of specific deliverable sites sufficient to provide five
years worth of housing against their housing requirements with an additional buffer of 5%.’ It goes on to state that where there has been persistent under-delivery of housing in the district or borough, LPAs should increase the buffer to 20%. It is clear that GBC cannot currently demonstrate a 5 year housing land supply with in the region of only 1.4-2.5 years supply being currently identifiable. This will continue to be the case if GBC adopt the phased process identified in table 1 of this report.

4.4 The level of under delivery of housing is also likely to perpetuate as inward migration from the London Boroughs continues. Much of the SHMA is based on figures from 2012 which are now out of date and no longer accord with the population projections supplied by the Office of National Statistics (ONS) which show that by 2037, the population of Surrey is expected to increase by over 200,000.

4.5 It is therefore considered essential that previously identified deliverable sites, such as the land at Fairlands are included in the final Local Plan document as development allocations.

DELIBERABILITY OF STRATEGIC SITES

5.1 GBC anticipates that there are a number of sites within Guildford that can come forward within either 5 or 11–15 years. Whilst there may be a number of sites within the settlement that could be capable of coming forward, Slyfield Area Regeneration and Wisley Airfield have been identified as being unlikely to be in a position to meet the criteria of being either deliverable or developable.

Slyfield Area Regeneration Site Allocation A24

5.2 Slyfield is identified as a major development site with the capacity of accommodating 1,000 residential units as well as other infrastructure on a wider mixed use site. This site is occupied by a number of existing uses including a waste transfer station and a large sewage treatment works operated by Thames Water. The treatment works currently process effluent from Guildford, Godalming, Cranleigh and surrounding villages and is clearly required for this function.

5.3 There is limited evidence that the replacement of the treatment works is supported by Thames Water and that this is desirable, deliverable or viable. The sewage treatment works would require a significant cordon sanitaire in order to ensure that the residential amenity of future occupiers is protected. It is our experience that this is likely to sterilise much of the developable area of the site and would be required regardless of whether the works is relocated or remains in situ. Given the size and nature of the sewage treatment works a cordon sanitaire of c.300-400 metres around the treatment works is likely. The need for a significant cordon sanitaire around the sewage treatment works does not appear to have been acknowledged, nor has the need for support from Thames Water and Surrey County Council for the proposals.

5.4 It is noted that GBC envisages this site coming forward within the 11-15 year period. However, there is no evidence that there will be a reasonable prospect that this site will come forward for residential development or that the site is capable of accommodating the quantum of development envisaged given the need for a cordon sanitaire and the need to accommodate a number of competing uses identified for the site, including an 11 hectare site allocated for a waste facility in the Surrey Council Waste Plan, 2008. This allocation of 1000 units is a development commitment for a significant amount of the site. There is no evidence that the site is viable given that the proposed allocation includes a number of municipal facilities including: a new waste management depot, 11 hectares of waste facilities (an allocation in the Surrey Waste Plan, 2008), a new sewage treatment works and a primary school.

5.5 Indeed given that the site is only 40 hectares and over one quarter is allocated for waste facilities, in order to accommodate the proposed quantum of uses and the amount of residential development the resulting density would need to be in excess of 50 dwellings per hectare which would not be desirable in terms of the character of the area.

5.6 In the light of the considerable constraints that this site experiences it should not be relied upon to deliver the proposed 1,000 dwellings identified at allocation A24.

Wisely Airfield Allocation Site A35

5.7 This proposed redevelopment site would provide 2,000 new homes as part of a larger mixed use site. There are however significant concern that this site is unsuitable in planning terms, particularly regarding the strategic highway network.
5.8 The NPPF is clear that plans and decisions should ensure developments that generate significant movements are located where the need to travel will be minimised and the use of sustainable transport modes can be maximised. The site is manifestly not sustainable, it is not related to any existing settlement or infrastructure or local services. Indeed it is located in open countryside, remote from any settlement infrastructure. Development of this site would constitute a major housing development in a rural area which will rely upon car based travel to and from given the proposed access on to the A3 which is not conducive to encouraging modal shift to non-car based transport.

5.9 The inherently unsustainable location of this site means that its development as a major housing and employment site will conflict with the policies of the Framework. An Inspector will have to give very careful consideration as to whether it constitutes the most suitable location for the proposed form of development. The site is also the most contentious proposed allocation in GBC’s plan. Its suitability for major development will need to be very carefully scrutinised.

5.10 In the light of the potential deliverability issues displayed by some of the most significant strategic sites identified in the Plan, as well as GBC requiring yet further sites to meet its OAN of 693 dwellings per annum, there is no justification to not consider the land at Fairlands for development. The site is suitable, available and deliverable now.

GREENBELT

6.1 The key restriction regarding the development of the land at Fairlands site is its Green Belt location. There are 5 purposes to the Green Belt which have been set out below in relation to this proposed allocation site.

To check the unrestricted sprawl of large built-up areas

6.2 The land to the west and south west of Fairlands adjoins the settlement of Fairlands, 2.6 miles north of Guildford. The western boundary of the site is constrained by the existing development of Littlefield Manor, including Littlefield Manor Riding School and the extent of the flat, developable area of land. The northern boundary is heavily wooded between the site and the Aldershot Road. The eastern boundary is formed of residential streets. The southern boundary is restricted by an existing track and an established row of clustered mature trees. The site is therefore largely contained, and the less defined boundaries to the south and west could be strengthened through additional soft landscaping. It is therefore considered that this site is not required to be in the Green Belt in order to prevent the village from sprawling.

To prevent neighbouring towns merging into one another

6.3 The proposed extension to Fairlands would be to the west of the settlement. The nearest development to the west is a row of housing along Frog Row Lane. This is 1.2km from the existing western boundary of Fairlands and would still be 1km away should the site subject of this report be developed. The nearest village to the west is Willey Green which is 2km west of Fairlands. It is therefore considered that there is no risk of the proposed development of the site resulting in neighbouring settlements merging together.

To assist in safeguarding the countryside from encroachment

6.4 As set out in the two points above, the site is largely contained by existing development and mature woodland and vegetation. Development of the site would allow for a sustainable extension to an existing settlement.

To preserve the setting and special character of historic towns

6.5 Fairlands is not considered to have any special or historic character. The settlement was first built in the 1930’s with the majority of development taking place in 1960’s. The settlement is not considered to contribute to the setting of any nearby historic towns and therefore does not meet this purpose for land being within the Green Belt.

To assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

6.6 The West Surrey SHMA found that the objectively assessed need was 1,729 homes per annum for the region between 2013 and 2033, 693 of which are to be provided within the Guildford local planning area per annum. It is therefore necessary for the Local Planning Authority to consider a range of sites, both brownfield and green field. Of course brown field sites should be developed first, however the Council has recognised that the existing available brown field sites within the area are not sufficient to meet current housing requirements. There is therefore a clear indication that the Council will
need to identify Greenfield land, much of which will be Green Belt if it is to meet housing requirements. In addition, Policy 2 of the Borough Wide Strategy clearly indicates that Green Belt land will need to be released for development in order to meet the OANs for the borough. On this basis there is a strong case for this identified site to be removed from the Green Belt to allow for beneficial development.

CONCLUSION

7.1 It is acknowledged by GBC that it does not have a five year land supply against the OAN target of 693 dwellings per annum. This is exacerbated by a continuous under delivery of development in recent years, as well as the proposed phased approach taken by GBC to backload the housing delivery to the later part of the plan period.

7.2 There is an evident housing shortage in the borough in the immediate term and a reliance upon some sites which have serious deliverability constraints has the propensity to exacerbate this deficit. In addition, the Local Plan recognises that Green Belt land will need to be developed in order to meet the OANs for the borough. In light of this, there is no rationale for the removal of Fairlands Land from the Local Plan as a former proposed allocation site. The land is available and deliverable, and capable of assisting in meeting the current pressing housing need, particularly as the former proposed allocation removed the site from the Green Belt.

7.3 GBC has identified at least two major strategic sites which are anticipated to deliver circa 3,000 dwellings to assist in meeting the 693 dwelling per annum figure, that have significant deliverability problems. Simultaneously GBC has removed the land at Fairlands which is capable of delivering circa 500 dwellings if released from the Green Belt as previously proposed in the Draft Local Plan. On this basis, the land to the west and south west of Fairlands should be allocated as a development site to assist in meeting the borough’s OAN and allowed to provide certainty in the event that any of the currently identified sites fail to come forward.

7.4 There can be no justification for an authority which has an immediate housing deficit, a lack of genuinely deliverable sites and Green Belt constraints to backload such significant proportions of projected housing delivery to the later stages of the plan period. Land adjoining Fairlands had previously been identified as suitable for release from the Green Belt, it is available and it is deliverable now. The site should, therefore, be introduced as an allocation for residential development during the current plan period.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of
Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II)

There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.

The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the lack of proper infrastructure planning for sites (Policy I1)

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

### I object to development in areas which are at risk of flooding (Policy P4)

The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a **higher** risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

1. I object to the Local Plan as the development proposed is **not sustainable** (Policy S1)

13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick’s Arch.

The development should be in urban areas where there is sustainable transport.

In addition I object to A43 change at Garlick's Arch because it ignores the many previous objections made by local residents and will generate significantly more traffic without the requisite infrastructure being put in place.

Furthermore I object to policy A58 at Burnt Common because it was deleted from the 2014 draft due to all the objections made at the time and there would seem to be no justification for building a new industrial/warehouse development when there are empty sites at Slyfield and Guildford.

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to Policy A43a, the proposed on/off ramps to the A3 at Burnt Common as this will inevitably cause traffic chaos on the local road network throughout Ripley, Burnt Common, Send and West Clandon, with absolutely no possibility of mitigation due to the nature of our rural roads and lanes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy A45 The Talbot Ripley as this is over development in an open space within the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPS16/5205   Respondent:  15503585 / B Powell   Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A57

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A57 The Paddocks for the provision of 4 traveller pitches in Rose Lane as this is in excess of current requirements within the borough

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPP16/10423  Respondent:  15503585 / B Powell   Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to all insetting of villages from the Green Belt, in particular for Ripley, Send Marsh/Burnt Common, Send and East/West Horsley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPP16/10425  Respondent:  15503585 / B Powell   Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT to development in areas which are at risk of flooding (Policy P4) such as site A43 Garlick's Arch which is designated as flood zone 3 by the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10420  Respondent: 15503585 / B Powell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Local Plan as the proposal of 13,860 homes proposed will not be sustainable policy S1 and it will have a permanently detrimental effect by overdevelopment in existing communities, in particular Ripley, Send, East/West Horsley and West Clandon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10422  Respondent: 15503585 / B Powell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the disproportionate amount (36%) of all proposed development being in one area of the borough from Wisley to Burpham creating a narrow ribbon effect along the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2519  Respondent: 15503617 / Stephen Roy  Agent:
I OBJECT to lack of transparency regarding the evidence report by GL Hearn and thereby any verification of the SHMA figure of 693 homes per annum

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5211   Respondent: 15503617 / Stephen Roy   Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A25 Gosden Hill as being totally inappropriate and unsustainable development of 2000 homes in the Green Belt, which will see coalescence and urban sprawl from Burpham to West Clandon

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT TO the on and off ramps (site A43a) at Burnt Common – which will serve only to increase traffic problems in Ripley, Send, Burnt Common etc, as through traffic uses local roads as ‘rat runs’ in order to access the A3 and M25. Traffic is already gridlocked during busy times and existing roads are narrow, at times impassable and totally unsuitable for heavier traffic levels.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT TO site A45 The Talbot – This is overdevelopment in a conservation area and should remain protected by the Green Belt

Objection to Horsleys Draft Local Plan and removal of Horsleys from the Green Belt

I object to the proposed development of the Horsleys for the following reasons;

- The road and rail infrastructure would not cope with an increase traffic. The local roads are already water logged and full of pot holes and are not developed enough for any more traffic. The access to the A3, should the Wisley proposal go ahead, would be impossible at peak times of the day.
- The infrastructure within the Horsleys is not capable of withstanding a huge increase to it’s current population. Namely, the doctor’s surgery and car parks within the village would be over subscribed. Although, my family does not use the local school, I would imagine this to be full to capacity too.
- There is no reason to remove the Horsleys from Green Belt status. No exceptional circumstances have been given and as such, the Horsleys should remain Green Belt.
- The proposed percentage increase to such a small village, appears excessive and alarming and would affect the core of the village life itself. I have lived in the village for almost seven years and my above concerns are because of the personal and local knowledge, built up over this time.
I hope you take my concerns into consideration.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

It is fundamental that there are no grounds for East and West Horsley to be taken out of the Green Belt. I object to the extension of the settlement boundaries by the redrawn insetting boundary. These can only be to try and make more land available for what has been shown to be inappropriate development and included in an enormous document so that they will probably be missed by residents. I particularly object to the inclusion of Kingston Meadows, land owned by GBC and previously dedicated as open space for the use and benefit of the community. No change to the settlement boundary has been justified. I object to the inclusion in the Plan of six large housing sites in the two villages (A36 - 41). They should be removed from the Plan as they are contrary to the Green Belt and to include them preempts proper decision making.

In addition I draw your attention to the very serious existing problems in the village with infrastructure - roads, flooding and drainage, sewage, etc - and facilities - schools, doctors, failing businesses, no useful buses, to mention just a few. For
these reasons a large increase in housing is not feasible. It would also destroy the character of the village. For all the reasons given above, I am against any additions to housing in East and West Horsley.

I object to the revised Settlement Hierarchy with another meaningless tick box exercise. East Horsley is not a rural district centre within any ordinary meaning of the phrase. People do not come from outlying area to East Horsley for shopping or work, they go to Guildford, Dorking, Leatherhead or other urban areas, including Surbiton, Kingston and London. East Horsley is not suitable for town centre type developments and I object to these policies (E8).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

New Settlement at Ockham

I strongly object to the proposal to use farm and previously requisitioned land at Ockham for 2,100 houses. The impact on my village would be enormous and unsustainable. Planning permission has recently been refused for numerous reasons and the site should therefore be removed from the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Green Belt (including Policies S1, S2, P2)

I strongly object to the proposed changes to the Green Belt Boundary to inset my village and about 13 other villages from the Green Belt. All the villages should remain in the Green Belt. If someone hadn't had the vision to create the Green Belts before I was born, I am sure my village and the countryside around it would just be urban sprawl by now. It would not be here for the thousands who come out from London every week to cycle or walk or simply be in the countryside. It would not be here to act as green lungs for the whole of England, to contribute towards easing the climate problems we are creating, to help to maintain biodiversity. I have been lucky enough to grow up here, so I see how important it is for others.
I also know the Walton, Weybridge, Byfleet area and Staines, Egham, so I can see what happens when anything happens to allow higher density development in - urban sprawl. This is too important to risk. The Green Belts are not ours or yours to give away, but a precious gift to be preserved for my children and their children.

89% of Guildford Borough is in the Metropolitan Green Belt. The Local Plan should have the protection of the Green Belt at its heart. The Green Belt was always intended to be permanent and its boundaries cannot be changed except in exceptional circumstances. You have shown no exceptional circumstances under the NPPF for the Green Belt boundary to be changed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Village sites - East and West Horsley

It is fundamental that there are no exceptional circumstances for East and West Horsley to be taken out of the Green Belt. Any additional housing should therefore be small scale. I object to the extension of the settlement boundaries by the redrawn inletting boundary. This can only be to try and make more land available for what has been shown to be inappropriate development and included in an enormous document so that they will probably be missed by residents. I particularly object to the inclusion of Kingston Meadows, land owned by GBC and previously dedicated as open space for the use and benefit of the community. That is a key green space and recreational area where I have used the play parks, bike humps, trim trail and football pitch for decades with friends from the village and outside. It is used by hundreds of dog walkers and for village celebrations. No change to the settlement boundary has been justified. I object to the inclusion in the Plan of six large housing sites in the Green Belt outside the two villages (A36 - 41). They should be removed from the Plan as they are contrary to the Green Belt and to include them preempts proper decision making. I object to a Plan which allocates Housing disproportionately to the Green Belt villages and in particular the Ockham, Send, Horsleys area. This is morally and legally wrong and contradicts your Vision. A proper assessment of urban brownfield sites should provide enough sites for housing to be allocated at least proportionately as between the urban area and villages.

In addition I draw your attention to the very serious existing problems in the village with infrastructure - roads, flooding and drainage, sewage, etc - and facilities - schools, doctors, failing businesses, no useful buses, to mention just a few. There is a high dependence on car use. We walked to school for years but were part of a very small number because people said they were to frightened of the narrow roads and traffic! There is flooding along the roads almost every time it rains. For these reasons a large increase in housing is not feasible. It would also destroy the character of the village and of the Green Belt which surrounds it. For all the reasons given above, I am against anything other than small scale additions to housing in East and West Horsley.

I object to the revised Settlement Hierarchy with another meaningless tick box exercise. East Horsley is not a rural district centre within any ordinary meaning of the phrase. People do not come from outlying areas to East Horsley for shopping or work, they go to Guildford, Dorking, Leatherhead or other urban areas, including Surbiton, Kingston and London. East Horsley is not suitable for town centre type developments and I object to this policy (E8).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Housing

I object to all policies based on your housing figures, which I believe are too high even before the Brexit vote which should take them down further. Also my councillor tells me that the calculation of those figures has not been explained even to him! How can that be right? Housing policy should be based on real and understandable housing NEED for borough residents, restricted necessarily by the requirement to preserve the Green Belt boundary. I further object to a Plan which requires 70% of housing to be built on the Green Belt.

Brownfield land - empty shops, unused railway land, - is available in the town centre. I expected you to really work hard to develop policies which require the use of urban brownfield sites first and to seek out those sites, which I believe can cope with real housing and commercial need and I object to your policies which do not do this (Policies H1,H2). The need for
shopping and commercial space is declining with current retail trends and Guildford town centre should be revitalised with more town centre housing than is proposed. (Objection to policy E7).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Your proposed housing numbers of 13,860 are too high. The figures seem to be subject to serious doubt, as will be detailed by groups representing the interests of borough residents such as the East Horsley Action Group, which I support and others. I therefore object to all policies based on your housing figures until such figures are no longer in doubt.

Brownfield land is available in the town centre. I would direct you to the open letter and brownfield site assessment sent to GBC councillors by Guildford Green Belt Group. I call on you to develop policies which require the use of urban brownfield sites first, which I believe can cope with real housing and commercial need and I object to your policies in this matter. Guildford town centre is the only place in the region with any requirement for redevelopment, but that should be undertaken within existing buildings, where retail developments are no longer viable.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

APPENDIX C
I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

• The “objectively assessed need” figure of 693 homes a year is too high.
• A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
• The current SHMA inflates the proposed housing figure due to
  ◦ failure to correct for errors in the historical data for international migration flows,
  ◦ issues with the way it considers students and affordability and
  ◦ flaws in the method for estimating the number of homes needed to support job growth.
• It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2536  Respondent: 15504001 / Margaret Banks  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix F: Policies overview map
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.
The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council’s eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.
Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3).

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

**POLICY D4**

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.
The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10516  Respondent: 15504001 / Margaret Banks  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10519  Respondent: 15504001 / Margaret Banks  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10577  Respondent: 15504001 / Margaret Banks  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/10546  Respondent: 15504001 / Margaret Banks  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.
I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Attached documents:

Comment ID: PSLPP16/10573  Respondent: 15504001 / Margaret Banks  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H3

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers...
under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to
build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I
cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the Green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood
risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including...
Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”.

Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with
only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the
area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clendon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on. That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated
an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites— which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to your draft Local Plan of June 2016 relating to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford. No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt and there is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.

The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs. In addition, Hatchford, south of the M25, has some 60 residences off the narrow Ockham Lane that would be greatly affected by the proximity of development.

I strongly object to the potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development. The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupants at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions. Also, owing to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes). There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion.

The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.
Also, insufficient consideration is being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.

My objections are supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/5243  Respondent: 15504129 / Simon Hurdle  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43 - Garlick’s Arch

I object -

1) This is land is Green Belt - designed to prevent sprawl and the merging of settlements. No ‘exceptional circumstances’ have been claimed – indeed there has been little time to address this or the other issues below. This site was not in the 2014 Section 18 original draft Local Plan, not the revised Section 19 Local Plan in April 2016, and appeared just thirteen days before the Council met to recommend consultation – a poor way to make large decisions.

2) The development is too large – the proposal for 400 homes plus light industrial facilities represent an increase of about a quarter the size of Send village. People living there will use the Send schools and the Send-based Villages Medical Centre which serves Send and Ripley. These are currently working at capacity. 400 homes at Garlick’s Arch would provide too many patients and pupils for present arrangements, and not enough to make feasible the building of a new school or new medical facilities.

3) The proposed new links to the A3 would mean a large increase in traffic through Send and at the Burnt Common Roundabout; these road are already jammed at times. It is claimed that it is not permitted to link the Garlick’s Arch directly to the A3, so traffic to and from the site would use the narrow Burnt Common Lane, the Portsmouth Road, Burnt Common Roundabout and the A247 Clandon Road before accessing the new links, hugely adding to local traffic. Even if the direct link to the A3 could be made, some vehicles from Garlick’s Arch traffic would be bound to use the A247 through Send to Woking, going through Burnt Common Roundabout.

The A247 and Burnt Common Roundabout are already gridlocked at busy times; any further traffic would cause significant delays for longer periods, and consequently higher levels of traffic pollution ( diesel particulates, carbon monoxide and oxides of nitrogen ).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2 - Green Belt

I object – to the proposed insetting of villages from the Green Belt, and the green light given to infilling. This means to villages are open to development as well as the allocated sites. Green Belt protection is national policy – its protection was strongly promoted by national political leaders in the 2015 General Election and by most candidates, including those of the majority party in Guildford, in the 2015 Local Elections. Appeal case law has shown that even if housing need does exist, that does not automatically over-ride the protection accorded by the Green Belt legislation.

Guildford B.C. claims that less than 2% of Green Belt will be lost, but factoring in the insetting of villages the figure appears to be nearer 6%.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Policy S1 - Presumption in favour of sustainable development**

**I object** – The policy fails to accept the current infrastructure deficit, principally though not exclusively concerning roads. The plan does not appear to have to have had the permitted ‘Constraints’ applied; in this area Green Belt and already gridlocked road could and should have been used to constrain the target for building homes.

The Council claims that all development is predicated on the delivery of new infrastructure. New links may well improve roads such as the A3 itself, but there is no conceivable improvement which could be made to any road joining the A3, when the entire purpose is to attract more traffic at these points. It is pointless to rely on an infrastructure which it is physically impossible to deliver, regardless of the level of funding.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Policy S2 - Borough wide strategy**

**I object** – The calculation that 13,860 homes are required is based on a calculation made by a sub-contractor who will not share the basis of the calculation, citing commercial confidentiality. Wrong in principle – government should be open and transparent; important data should be open to give public confidence that it is accurate, based on sound assumptions, and free of commercial bias.

In 2014, the House of Commons and Local Gov. C’tee was critical of the accuracy of SHMA processes; it noted cases where two independent calculations yielded different results. Their report concluded (Section 69), “Communities need to
have confidence that the figures on which their local plans are based are accurate. There can be little reassurance about the SHMAs when two assessments of the same area, ....... produce very different results.”

The method of calculating the population of a town with many foreign students also distorts the population total. The Employment Land Needs Assessment 2015 indicates that Guildford does not need a large increase in employment space, which suggests that such housing as is needed could largely be built on Brownfield sites.

OBJECTION TO PROPOSED RESIDENTIAL DEVELOPMENT IN WEST HORSLEY

The proposals currently being considered for increasing the density of housing in this area must take account of the B2039 (Ockham Road North/Ockham Road South) which is the only road linking the A3 through to the A246 Guildford road. This road is incapable of supporting the amount of traffic the proposed new housing would generate. I would imagine the cost of building or widening a connecting road would make the development proposals financially unfeasible.

2. Proposed Housing Strategy

- This section considers the requirement for a Local Planning Authority to identify, plan for and deliver a supply of new homes to meet an identified Housing Need.

Housing Need

- The need to identify a deliverable supply of new housing land is set out within the Government’s National Planning Policy Framework (NPPF), and National Planning Practice Guidance (PPG).

Requirements of the NPPF

- The NPPF was published in March 2012, long before work began on the Local Plan. Therefore, the evidence base which supports this Local Plan should be NPPF-compliant.

- One of the key aims of the NPPF is to boost significantly the supply of To achieve this aim, the NPPF places new responsibilities on local planning authorities to “use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in their housing market area” (Paragraph 47). This evidence base should be “adequate, up to date and relevant” (Paragraph 158). The NPPF also requires that the Plan should identify the scale and mix of housing which:
  - Meets household and population projections;
  - Addresses the need for all types of housing, including affordable housing; and
  - Caters for housing demand and the scale of housing supply to meet this

Requirements of the PPG

- The Planning Practice Guidance to accompany the NPPF was first published in March 2014 and is kept up-to-date on an on-going basis. It provides further guidance on the steps that plan-makers should take when determining the objectively assessed housing need in their area.

- Paragraph 080 requires that housing “needs should be assessed in relation to the relevant functional area, e.g. housing market area”. This means that authorities should consider the need in those neighbouring authorities with which it has strong economic or migration links, in addition to its own need.

- Paragraph 015 goes on to set out that the household projections published by the Department for Communities and Local Government (DCLG) should provide the starting point for estimating the overall housing needs.

- Paragraph 016 states that wherever possible, local needs assessment should be informed by the latest available data. The NPPF is clear that Local Plans should be kept up-to-date.
• Paragraph 018 requires that an adjustment to the starting point should be considered to ensure that sufficient housing is provided to meet the needs of the economy (by increasing the local labour supply). It states: “Plan makers should make an assessment of the likely change in job numbers based on past trends and/or economic forecasts as appropriate and also having regard to the growth of the working age population in the housing market area”.

• Paragraph 019 goes further, setting out that a further adjustment should be applied if there are market signals indicating an imbalance between the demand for and supply of housing: “prices or rents rising faster than the national/local average may well indicate particular market undersupply relative to demand”. Relevant indicators include house prices, rents, affordability and

Compliance with NPPF and PPG

• The Proposed Submission Local Plan (July 2016) (Regulation 19 consultation) sets out that the council will make provision for 13,860 additional new homes (Policy S2) over the plan period (2013-2033). This equates to an annual figure of 693 dwellings per This is made up of an anticipated requirement of 517 dwellings, with an uplift of 25 homes for student growth, 120 homes for economic growth and 31 homes to address market signals and affordability (total 693).

• This figure of 693 dwellings per annum is taken from the West Surrey Strategic Housing Market Assessment (SHMA) – Guildford Summary Report (October 2015) prepared by GL Hearn (Section 4 - Objectively Assessed Need).

• The previous iteration of the Local Plan (draft version - July 2014) (Regulation 18) set out that provision would be made for 13,040 new homes over the plan period (2011-31), equating to an annual requirement of 652 new homes a This updated figure, therefore, represents an increase of 820 homes over the plan period, compared to the previous (Regulation 18) version.

• This increased annual requirement is consistent with the Fully Objectively Assessed Need (FOAN) set out in the West Surrey SHMA October

• The PPG requires that the starting point for the calculation of OAN is the household projections published by the Department for Communities and Local Government (DCLG) when estimating the overall housing need (Paragraph 015). The 2015 SHMA applies household formation rates from the 2012-based household projections to the 2012-based ONS Sub-National Population Projections to provide an appropriate starting point for considering housing

• This is unsound, given that, since the publication of the mid-2012 population projections in 2013, mid-year population projections have been published for mid-2015, mid-2014 and mid- As a minimum, the mid-2014 projections should have been used as the basis for the 2015 SHMA which was prepared in 2015 and published in October 2015, well after the mid- 2014 projections were published.

• We consider that, on the basis of the above, the SHMA should be revised to take into account the latest 2014 mid-year projections in order to meet the requirements of the NPPF and The 2014-based projections show an increase of 39 households per annum over the 2012-based projects. Applying this increase logically to the overall OAN, the Council has a need to for 732 dwellings per annum and an overall plan target of 14,640.

Duty to Co-operate and the wider Housing Market Area (HMA)
• The 2015 SHMA identifies that Guildford shares a HMA with Woking Borough Council and Waverley Borough Council. Both authorities are also in the plan-making process and it has not been determined whether either Council will be able to meet their own OAN requirements as set out in the SHMA.

• The Plan should build the contingency of an early review if the plans of the neighbouring authorities are delayed or if they are unable to meet their In this scenario, there may be a requirement for GBC to provide for the unmet need of its neighbours in line with Paragraph 182 of the NPPF.

Five year supply

• In accordance with Paragraph 47 of the NPPF, the Council is required to identify and update annually a supply of specific deliverable sites sufficient to provide five years’ worth of housing against their housing need.

• Housing need within the Borough was most recently assessed as part of the West Surrey Strategic Housing Market Assessment (SHMA), published in October. The report considers the need for housing within the West Surrey Housing Market Area, which includes Guildford, Waverley and Woking Boroughs. Overall, the SHMA identifies an Objectively Assessed Need (OAN) of 693 dwellings within the Borough of Guildford per annum.

• The council currently monitors this supply through its Annual Monitoring Report (AMR). The most recent version of the AMR, published in October 2015, concludes that there is a 4 year supply against the OAN of 693 homes per year. The council is, therefore, unable to demonstrate a five year supply of housing land.

• The Proposed Submission Local Plan: Sites and Strategy continues to base its housing trajectory on this. To take account of rising population levels, and to build greater flexibility into the plan, Policy S2 sets out a target of between 700-800 additional dwellings per annum.

Identified supply of housing

• In order to meet the requirements of Policy S2, the emerging Local Plan allocates a number of sites considered to be suitable for residential. These allocations provide land for approximately 10,778 new homes over the plan period across 34 identified sites. The remaining housing provision is made up of windfall sites, broad locations (such as Ash and Tongham) and commitments.

Deliverability

• The site allocations set out within the emerging Local Plan identify a number of large sites capable of accommodating over 1,000 new homes. Some of these larger sites are reliant on some significant infrastructure works which will need to be provided for before housing could be delivered, these include:

• (A24) Slyfield Area Regeneration Project, Guildford;

Allocated for 1,000 new homes. Policy A24 states that delivery and timing will be dependent on the key infrastructure requirements as set out in the Infrastructure Delivery Plan.

• (A25) Gosden Hill Farm, Merrow Lane, Guildford;

Allocated for 2,000 new homes. Implementation is reliant upon highway works to relocate the southbound on-slip of the A3, and a new roundabout to provide a link to the A3100.

• (A26) Blackwell Farm, Hogs Back, Guildford;
Allocated for 1,800 new homes. Implementation reliant upon the realignment of a junction on the A31 and the Down Place road, which will need to be signalised. Secondary vehicular access is required from the site to Egerton Road, preferably via Gill Avenue. A through vehicular link is required via this access between Farnham Road (A31) and Egerton Road to provide a new route to Surrey Research Park. Other highways impacts may need to be mitigated against.

- (A35) Land at Former Wisely Airfield, Ockham;

Allocated for 2,000 new homes. Interventions will be required which address the possible highway performance issues including a number of mitigation schemes to address issues, particularly on the A3/M25 junction Wisley interchange.

Summary

- Overall, the plan has been positively prepared in an attempt to fully meet the Council’s identified Objectively Assessed
- Unfortunately, the evidence base behind the OAN is out of date and will need to be updated ahead of the submission of the Plan to the Secretary of This is likely to result in an uplift to the overall housing target which reinforces the need for the Flexford/Normandy strategic allocation. This allocation would also have the capacity to provide additional residential accommodation if the Council is required to find more housing land to meet an increased target.
- Whilst we do not contest the deliverability or soundness of any of the proposed allocations within the Plan, we do note that many of the larger allocation are reliant upon the delivery of significant highway infrastructure before any dwellings will be This further supports the allocation of the Normandy/Flexford site which has relatively few constraints to the deliverability of much needed housing and social infrastructure.
- The merits of the Normandy/Flexford site are discussed in more detail within the following

2. Land to the south of Normandy and north of Flexford (Policy A46)

- This section of the report assesses the Allocation of the south of Normandy and north of Flexford
• Policy A46 allocates land to the south of Normandy and north of Flexford for a residential led mixed use development, to include:

• Approximately 1,100 homes (C3), including some specialist housing and self-build plots (C3);
• A nursing or residential care home (C2) with approximately 60 beds;
• 6 Travelling Showpeople plots (sui generis);
• Approximately 400 sqm of comparison retail floorspace (A1);
• Approximately 300 sqm of convenience retail floorspace (A1);
• Approximately 400 sqm of services (A2-A5);
• Approximately 300 sqm of community facilities (D1);
• A secondary school (D1) (up to eight form entry); and
• A village green

• The development will provide a sustainable and inclusive community which will also enhance the accessibility to services of existing residents in Flexford and

Principle of the allocation

Sustainability

• We support the allocation of Policy A46 Land to the south of Normandy and north of The development will deliver a truly sustainable development to meet the three arms of Paragraph 7 of the NPPF.

• With regards social and economic elements of sustainability, the Council, in identifying an OAN for housing has sought to plan positively for social and economic In light of the analysis in Section 2, this allocation is crucial to the Council’s housing strategy over the plan period. The associated benefits of the scheme which will include a substantial amount of housing (bringing with it significant economic benefits) a much needed secondary school, village green, a local centre, Travelling Showpeople pitches and a nursing home will serve the existing community as well as future residents.

• With regards the environmental element of sustainability, this has been duly considered by the Council in preparing the draft All ecological considerations have been taken into account and wider Green Belt and landscape considerations and set out below.

• We agree that this opportunity, along with the relative sustainability of the site in close proximity to Wanborough Train Station, provides exceptional circumstance to support this allocation, in accordance with paragraph 83 of the

• A key strength of the site is its proximity to Wanborough railway station and accessibility to the local ‘A’ road. The site scores well from a sustainability perspective (identified within Table C of the Sustainability Appraisal (SA)) and where the site currently lacks sustainability credentials (for example access to recreation, retail and education facilities), these are to be provided for within the proposed allocation.
Green Belt and Garden settlement

- We do, however, contest the Council’s findings with regards the value of the site in relation to the purposes of the Green The SA states at paragraph 10.11.3:

“With regards to Green Belt, the point to note is that greater weight is now being applied to sensitivity than was the case in 2014, and it is only because Normandy/Flexford presents an exceptional circumstance that allocation is proposed here on a red-rated site.”

- We are of the opinion that the site has relatively limited Green Belt With regards the NPPF purposes of the Green Belt:

  - Purpose 1 (to check the unrestricted sprawl of large built-up areas) – Neither Normandy nor Flexford could be regarded as large built-up The site’s comprehensive development will, effectively, create a new settlement which will, in itself, be sustainable. In this context, development of the site would not, in any way, cause urban sprawl.

  - Purpose 2 (to prevent neighbouring towns from merging into one another) The proposed development will create a new well-planned

  - Purpose 3 (to assist in safeguarding the countryside from encroachment) – Development of the site will, inevitably, result in increased built-form in the However, the scheme will provide substantial improvements to the accessibility of the site to help improve accessibility to outdoor recreation and ultimately, will not undermine the integrity of the countryside.

  - Purpose 4 (to preserve the setting and special character of historic towns) – we agree that the site does not preserve the setting of a historic town

- The exceptional circumstances for the allocation of the Flexford/Normandy site to deliver much needed housing and social infrastructure justify the site’s

- Paragraph 52 of the NPPF promotes the supply of new homes through planning for larger scale developments such as new settlements or extensions to existing villages that follow the principles of Garden The Normandy/ Flexford development allocation clearly seeks to accord with paragraph 52 of the NPPF.

- The development will provide an integrated settlement with an accessible, centrally located local centre with retail space, community facilities, a school and outdoor recreation, including a village The settlement will provide high quality housing to meet local needs (in line with the other proposed policies of the Plan) that will integrate into its rural surroundings.

The school

- We support the identification of the site for a secondary The evidence base provided by GBC and Surrey County Council (SCC) clearly demonstrates the need for new secondary school capacity to support a likely additional pupil yield from new developments of 2,962.

- The site has the capacity and accessibility to deliver a well located and much needed secondary The school will serve the Blackwell Farm strategic allocation as well as the Normandy/Flexford development.

- We also support the wording of Policy A46 to direct the new school close to Wanborough
railway station to encourage sustainable travel and facilitate a catchment which could include pupils from Ash and Guildford Town.

Quantum and transport

- We note that the Sustainability Appraisal (SA) at Table 2 identifies that the allocation for 1,100 homes will remain constant throughout the housing growth options (OAN to OAN, plus 34% buffer).
- The policy text states that interventions will be required which address the potential highway issues which could otherwise result from the Guildford Borough Transport Strategy 2016 identifies aspirations to improve the A323 Guildford Road at various These are primarily relatively small scale improvements relating to traffic management and the environment. The exception to this is the proposed new road bridge and footbridge scheme to enable a level crossing closure on A323 Guildford Road adjacent to Ash railway station (Policy reference A30).
- It is currently unclear how much funding for the new bridge will come from planning It is imperative that the Normandy and Flexford scheme is not required to provide unjustified and excessive levels of contributions towards this scheme. The majority of planning obligation funding for this infrastructure project should be sought from the strategic growth of Ash and Tongham which is more directly related to the proposed bridge.
- The site has good access to the local rail network and we anticipate that a significant proportion of vehicle traffic will be directed east towards Guildford and the As such, only a limited proportion of vehicle movements are expected to use the Ash and Tongham proposed bridge (for access to the A331 and M3). Any financial contribution from the development of the site must be fairly and reasonably related in scale and kind to the development in order to comply with the CIL Regulations.

Design and layout requirements

- Policy A46 states that sensitive design at site boundaries will be required in order to have regard to the transition from village to We support the wording of the policy with regards the design requirements as it is not overly restrictive which will allow an appropriate layout to be prepared during design development.

Thames Basin Heath SPA

- The site is within the 5km buffer zone to the Thames Basin Heath Any impact on the SPA by the development will be mitigated in compliance with the relevant policy and legislative requirements.

Deliverability

- There are no barriers to the deliverability of the site which would prevent or delay housing coming forward within the short The infrastructure and design requirements associated with the development are relatively minor compared with other strategic sites within the Plan and will not delay the deliverability of the much needed housing.
- If allocated, we would expect the site to begin delivering houses within a five year The housing trajectory provided at Table 1 suggests that the site will not deliver housing until 2021/2022, we believe that the site can deliver housing sooner than this and would recommend this be updated to 2020/21.
Summary

- As noted in the previous section, the allocation of the strategic site at Normandy/Flexford is crucial for the Council to be able to implement its strategy. The site will provide much needed infrastructure that will serve the wider needs of the existing population, other key strategic development sites, as well as the future residents of the site itself.

- It has been identified that the site is sustainable and will enhance the sustainability of the surrounding area (Normandy and Flexford) through the delivery of new infrastructure and

- We agree that exceptional circumstances are required to release land from the Green Belt and the infrastructure provision of the site (alongside general housing need) provides this exceptional However, we contest that the findings of the GBCS do not accurately reflect the true value of the site in Green Belt terms when compared with analysis of other sites in the Borough.

- The development will create what is effectively a new self-contained This approach accords with Paragraph 52 of the NPPF to increase the supply of new homes through large village expansions or new settlements by applying the principles of Garden Cities.

- There are relatively few barriers to the delivery of the scheme and, as part landowner, our client would be in a position to begin delivering housing on the site within a five year

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H2: Affordable housing

- The PPG at Paragraph 020 states that planning obligations should not be implemented where they would make a development proposal It is emphasised that this is particularly relevant for affordable housing contributions. Without reference to viability and affordable housing, Policy H2 is currently in conflict with this element of the PPG. We suggest the following sentence be added to the policy text:

“Proposals departing from these requirements will be expected to justify any lower provision through the submission of a financial viability appraisal”. 
• Whilst we appreciate that this provision is set out within the supporting text to the policy, in order to be implemented as part of the policy it must form part of the policy text.

PolicyS2: Borough Wide Strategy

• As noted above, we are generally supportive of the council’s approach to housing delivery, though believe the target will need to increase in order to meet up-to-date.
• To accord with Paragraph 182 of the NPPF, and for the Plan to truly be positively prepared, Policy S2 should be re-worded so it makes provision for “at least” the identified A caveat should then be included to begin an early review of the Plan if housing requirements change, for example if neighbouring authorities are unable to meet their own housing needs.

• We also object to the proposed phasing of the annual housing target as set out in Policy. The phasing of the housing targets will result in the Council failing to meet its housing requirements until 2022.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In addition I object to the proposed major development sites across the Horsleys and at Okham. This objection is based on the fact that the local infrastructure is already overloaded and any further major developments in this area would seriously affect the safety and quality of life of the current residents. The local schools are full, medical services stretched and in particular from a safety and environment point of view the local roads are totally inadequate for any potential increased traffic. The quantity and speed of traffic through Forrest Road and Ockham Road are currently a major issue.

I write as a resident of West Horsley in support of retaining the Horsleys status as part of the green belt which continues to serve its original purpose of providing a useful escape from urban encroachment – a much appreciated open space to counter over development.

However this should not be taken as endorsement for the overly negative approach taken by most local planners who seem obsessed with maintaining the status quo irrespective of the needs of a thriving and growing community. Sensible plans which add to the housing stock and which are consistent and commensurate with existing structures would be welcome. Too often the planners say no when they might easily loosen some planning guidelines which do not involve building brand new properties on pristine green belt land.

Once again we are required to say NO to large developments that will totally change the character of this area no longer making it a village but part of an urban sprawl. I moved from a city because my family and I wanted to live in a village and all that entails. Large green spaces for children to enjoy and their children. Not vast housing estates taking away the character of village life. All the problems of urban living overcrowding of roads/ country lanes. Over stretched local services, schools and health services. We have to protect our Green Belt not only for future generations but also for the animal population. I do not understand how by the stroke of a pen and the lure of developers money that Green Belt status can be rescinded. It makes me question if certain people in authority in the council and above have vested interest in the proposed development. If we can not protect the Green Belt future generations will never have any understanding of what green fields and space is like they will just be used to vast urban areas. It is out duty to fight for the right to protect our Green Belt. I understand the need for housing there are plenty of brown filled sites around Guildford that are better placed for road access and amenities. We will not give up and will campaign and fight the council at every opportunity. Say NO to the local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPP16/10665  Respondent: 15504801 / M A Lawrence  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Schools

There is only ONE state primary school in West Horsley and NO state secondary schools. The Raleigh School is already oversubscribed and many children living in West Horsley were NOT offered places at their local school in the last few years. There is already a problem here with a lack of places and this already needs resolving WITHOUT adding another 533 homes. How do you propose to deal with this??

Medical services

It is already difficult to get an appointment at Kingston Avenue Medical Centre, the ONLY surgery in East and West Horsley. You cannot dilute this service any more.

Drainage and Flooding

There are known sewage overflow problems in Ockham Road North and Green Lane. There will be serious capacity issues with the sewer network in the village going right through to the treatment works if the large numbers of dwellings proposed are constructed.

The amount of flooding experienced a couple of years ago meant many main roads were closed for weeks on end. We were forced to use small lanes to exit the village. By doubling the number of cars in the village, this issue will be exacerbated.

I am disappointed that, despite the many objections to your plans, you STILL continue to ignore the overwhelming feedback from local residents. It is us, the current residents, who will have to live alongside these new developments.
and put up with the vast increase in local traffic and demand for public transport, schools, medical facilities and parking, etc.

Your plans will have a **HUGELY negative impact on our day-to-day lives.**

I trust that you will finally listen and review your plans substantially.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Traffic**

The increase in traffic on East Lane, in particular, will be intolerable with the proposal of over 345 new households impacting on this road (potentially up to 750 more cars?). It is already congested during school times from Nightingale Avenue and Northcote Road. This will have a massive impact on our day-to-day lives.

2000 houses are being planned for Wisley Airfield. Many of these potential residents will be driving in and out of Horsley to use the station and shops. **We simply DO NOT have the capacity for additional parking at Horsley Station and local shops. The Station car park is currently full every weekday as it is. It will become impossible to use the train as there is no alternative parking.**

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I refer to the proposed planning in West Horsley, the extent of which is entirely unacceptable.

The latest plan indicates over 530 new homes for The Horsleys. This level of new housing would COMPLETELY change the character of the village, not to mention the impact it will have on its infrastructure.

Green Belt

You seem determined not to respect the green belt. How can you possibly consider removing these villages from the green belt??

We moved to West Horsley nearly three years ago and chose this area specifically because we wanted a village environment to bring up our daughter.

We wanted to get away from traffic and congestion and enjoy the green belt around us.

The proposed development of homes on green belt sites at much higher densities than currently exist would be totally out of character with existing housing. It is also unsustainable in terms of drainage, road capacity, schools, shops, medical facilities, parking and public transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the draft local plan.

The A3 problems have been with us for many years. how can planning for an enormous increase in housing be done before infrastructure ie A3 and local roads requirements is in place, or at least planned.

The best solution for the A3 would be a tunnel. The obvious place for the tunnel entrance would be Gosden Hill Farm which precludes building 2000 houses. A smaller number might be accommodated.

If Gosden Hill were to be built as planned then the effect on Burpham (where I live) would be dreadful. Thousands more vehicles would come through Burpham both to enter and leave the development. Access should be both Southbound and Northbound to the A3 and a four-way junction would be essential.

The calculation for the number of houses required is suspect. The figures used are not released - why?

As a member of Burpham Community Association I support their objections to the plans. They are more expert than I.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick's Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPA16/2578  Respondent: 15504929 / William Scott  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5311  Respondent: 15504929 / William Scott  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (88). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community
Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy 03).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14) Why not?

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11) Some of my friends have struggled to get school places as it is!

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

I already live on a busy road. This will have a very negative impact on my health and wellbeing.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I object to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick's Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees. I am a 16 year old who is really interested in country life and want to preserve the woodlands.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick's Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.
I object to the location for new employment floorspace at Garlick's Arch -Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class 81c, B2 and 88) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick's Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

I object to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.
I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley.

The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Glandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan. As somebody who relies on their bike to get around I object to this being even more dangerous!

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

I object to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, I (and other residents) will see our quality of life significantly deteriorate in many ways.
Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

I object to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and our health. Hold on a minute, I live here and I object!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to not protecting the Green Belt (Policy P2)

I object to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over development, particularly for the villages between Guildford and the M25, including Ripley (where I live), Send and Clandon. The services in these villages will be unable to cope with the level of development proposed. I do not believe the proposed developments meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35) and Garlick's Arch (A43) are in unsustainable locations. We do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. I know this because I can't drive yet and rely on lifts and public transport.

Residents will have few options, but to be reliant on cars. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Surely greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. I know this as I have to use them daily. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, we are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities. On MY community!

</tr>
<tr>
<td>• GBC has installed gas monitoring wells on site since July 2000. One well recording methane gas discharge.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Both the Envirosearch Report RS1100201_1_1 dated 17th February 2004 and historical map data and information from GBC has identified site as landfill and has “areas of potentially contaminative industrial activities”. Development of this site would be a health hazard.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
The Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies proposed site as a local authorised landfill site as licences under Part II of Environmental protection Act 1990. The proposed site is not a quarry as specified in the GBC Local Plan. And is therefore not suitable for the proposed usage. It also Identifies proposed site as potentially contaminative industrial land. With usage of “Heap and unknown constituents”. This causes concern as to what it does contain and dangers if disturbed.

Overall, I OBJECT to the Local Plan. I would like these comments to be seen and considered by a planning inspector.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to register my objection to the inclusion of the land to east of the paddocks in the proposed submission Local Plan: strategy and sites 2016.

The inclusion of this piece of greenbelt land to the policy is in excess of the housing requirement in the area and there is by no means exceptional circumstances that require development on this land.

We bought our property in good faith that the protected green belt area in which we live would remain so. We live here because we want to bring our family up in a rural area; we access the house via an unadopted road and have no gas supply. Our neighbours including the owners of the local working farms work hard to protect and cherish the countryside we live in.

Flexford Road runs next to our property and is incapable of sustaining an increase of road users. The bridge floods every time it rains and Flexford road adjacent to the proposed site collects surface water after heavy downpours. The site itself can also flood at times of heavy rain. I have called the council numerous times to report the flooding on road and also the foul smell of sewage that can occur at times of flooding. It by no means feels a highway or drainage system capable of enduring a larger population.

Comment ID: PSLPS16/5305  Respondent: 15505089 / Richard Horton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A26
As a local resident and member of the Hogs Back residents association I write to register my strong objection to Guildford's local plan site allocation A26 (Blackwell Farm). Whilst I accept the need for additional housing around Guildford I object on 2 counts:

First the new junction that will connect the site to the A31 will increase the congestion on an already very busy road. East bound traffic along the eastern end of the Hogs Back is frequently stationary for miles in the peak morning periods and any junction will only exacerbate the situation.

Second, the site is adjacent to an Area of Outstanding Natural Beauty, and I understand it may be re-designated as part of it. As such any development will be very detrimental to the area.

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. This is the first key point.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans. This statement is based on information that is out of date.
• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads which cannot support the current flow of traffic and the surface water which does not drain away
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements. The wide vehicle cause damage to the narrow country lanes
  4. The danger this traffic will be to local cyclists, pedestrians and horse riders due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport and roads that a large bus can safely travel on. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I believe there is a planning application in and I would like to raise our families objections to until we have certain guarantees and questions have been answered.

Why is such a large development required? Why could not a series of smaller developments be done that would not be so catastrophic on small villages but instead gradually increase their size so as not to break to eco system of that community.

Why are urban brownfield sites not being considered instead? I agree we need to provide housing in the SE of England but this is a huge development that would change the human and natural ecosystems of the area.

We need some assurances that if this goes ahead there will be additional schools built, both junior and senior, nurseries funded because we are talking about 1000's of additional children and the current schools can't cope nor do we need to have mega schools with masses of classes per year.

Roads - what additional road widening, traffic control measures, new roads are going to be built to cope with the traffic? Cobham traffic is already a joke because the parking bays prevent cars from going through but now this development would add to those queues without any considerations of the issues we have already. There simply isn't the parking spaces nor the volume of shops to cope with that number of additional people. What is to be done?

Travel - the local train services cannot support this type of development, assuming this means there is an additional 1000 per day who travel into London, how many extra trains are SW going to put on, will they be doing fast trains as well as slow trains like they do at Woking? There isn't enough parking at any of the trains along the line to cater for these additional people, there is never more than 30 spaces free at Cobham in any one day. If you think people are going to be able to walk to these stations then that is a joke because some roads in the local area don't have pavements, in fact an extraordinary number dont so how are people expected to walk safely to these stations?

I don't object to building more houses but I do strongly object to large developments without considered planning of the impact on other communities and their current way of living. This would have a serious impact on my way of living and would mean Cobham is no longer the place I bought into as it would take longer to get around, less certainty about where to shop, where to park, whether I would get a parking space at the station, time to travel to work etc. Do this in a considered way with more disperse developments spread around the area and it's less impactful.

Please acknowledge this email so that I know it has been logged as a formal objection.

Answer (if comment is on questions 1-7 of the questionnaire): ()

object to the figure of 693 houses per annum in the borough being too high (Appendix D)
The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, that is more than double the figure of 322 used in previous plans.

This figure cannot be verified because the Council will not publish the SHMA report. This lack of transparency is deplorable for a realistic consultation of the Plan to be conducted.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the building of 45 houses at Clockburn Nursery.

The inadequacy of Tannery Lane and the nearby roads to cope with the additional traffic caused by the unwanted development of 64 apartments and a marina must not be compounded by adding even more traffic if the Clockburn Nursery development is granted. This over-development must not be allowed to happen if we are to avoid appalling traffic destroying the enjoyment of this quiet village.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt.

The Ancient Woodland on the Garlick's Arch site (A43), including over 80 ancient oak trees, is something a civilized society value but the vast development that is proposed would double the built area in the locality and would irrevocably damage the character of this area for future generations.

As already stated, there are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2).

The site at Garlick's Arch (A43) is also liable to frequent flooding and is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore, the Council’s assessment is not good enough to be included in the plan.

The Plan states the preference is to use previously developed land but GBC have, for no reason, removed a brownfield site at Burnt Common and replaced it with Garlick’s Arch. This site should be re-instated as a brownfield site and additional commercial capacity should be taken up in Slyfield, that already has excellent and appropriate facilities

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

North facing ramps to the A3 at Burnt Common would be a disaster for local communities. The addition will draw in a huge amount of ‘through’ traffic from London/M25 to Woking. This is not sustainable as these roads are already overloaded and have no scope to be improved. It will result in gridlock and would also cause appalling deterioration to the air quality

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

I object to the development of 40 houses and 2 travellers' pitches at Send Hill.  
The narrow width single access road provides insufficient access and is inappropriate. Furthermore, the subsoil of the proposed site contains unsafe landfill waste that has been documented and registered at the GBC. This high amenity area set in beautiful countryside should not be lost by unnecessary development.

I object to not protecting the Green Belt (Policy P2)  
Removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) would utterly destroy the character of the area. This must be avoided at all costs. Retention of the UK's Green Belt has been supported by every government for decades and has always been more critical the closer to London. It would be intolerable if the London sprawl is allowed to extend to Guildford and beyond its southern borders.

There are more than enough brownfield sites in the Guildford area that should be developed for the Plan.

There are no exceptional circumstances for these villages and sites being removed from the Green Belt, as required by the National Planning Policy (Policy P2).

Central Government state clearly that housing need is not an exceptional circumstance.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

<tr>
<td>I object to policy A42 change at Clockbarn Nursery, Tannery Lane due to the following points:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>The site has very restricted access along Tannery Lane which is single track for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical with 45 homes, so an increase of 33% is just ridiculous.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with traffic for 45 extra homes, so an increase is not going to work.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. The traffic for this development has not yet been added to the current traffic situation.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane, so an increase in homes just exacerbates the problem.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
This change ignores hundreds of previous objections. These have been made by people who live locally, the people who know the area best, they should be listened to, not pushed to one side.

Surface water flooding will be increased with the original number of homes, additional homes will make the situation worse still.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**I object to policy A43 Garlicks Arch due to the following points.**

There is no proven demand for plots to accommodate Travelling Showpeople.

National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt land. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. It constitutes over development. These further changes to the plan are not required.

It is an unsustainable location. It will undoubtedly cause traffic chaos on the minor surrounding roads. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion, anyone who lives in these areas will confirm that this is the case. Substantially more vehicle movements will result in even more congestion and greater pollution. Residents and the environment will suffer as a result.

This area contains ancient woodland dating back to the 16th century, which should be preserved. There is no good reason to tamper with it.

This site is identified as being in a Flood Zone 2 and regularly floods during winter months.

This site contains land which is heavily contaminated by many years of shooting with lead shot.

Above all, the latest changes to this site have completely ignored the thousands of previous comments from residents (who know the area best of all) during the 2016 Local Plan.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A58
I object to Policy A58 Burnt Common due to the following points:

There is no requirement for new industrial or warehouse space as there is availability at Slyfield and Guildford Industrial estates, developing in this way is pure stupidity and is just building for the sake of it.

Additionally, this site is in the Green Belt, there are no exceptional circumstances to justify development here.

According to the 2017 Employment Land Need Assessment there is a reduction in demand to 3.9 hectares for industrial land in the whole borough. Why is there a huge allocation of 10 hectares in Send? This policy has not been thought through at all.

Generally transport evidence for this policy is incomplete and unreliable. What would happen in reality would be serious accidents, major traffic jams twice a day and therefore excessive pollution.

Any extra traffic would cause traffic chaos in the local area with its small roads, adding commercial vehicles to this would be completely unsustainable.

This site was deleted from the 2014 Local Plan due to previous objections, why has it returned?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

I OBJECT to the disproportionate amount (36%) of all proposed development being in one area of the borough from Wisley to Burpham creating a narrow ribbon effect along the A3

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

For almost twenty years I have been a regular visitor to the beautiful greenbelt village of East Horsley and its neighbouring communities and villages. I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
• I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) – where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a regular visitor to East Horsley and its neighbouring communities and villages I was horrified to hear of the proposed development at Wisley Airfield in what is the heart of greenbelt land. Having witnessed the many developments that have already had in my opinion a negative impact on the beauty of this wonderful part of Surrey, this development is totally out of character and will without doubt spoil what has always been a protected untouched halcyon of days gone by. To say that the proposed development would be grossly out of context is a definite understatement. I trust that Guildford Borough Council will have the common sense to reject this application which would be much better suited to some of the many brownfield sites crying out for redevelopment.

443
As a regular visitor and former resident of East Horsley, I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to register my strong objection to the latest draft of the Guildford Borough Council local plan.

I am very disappointed to see that it still proposes to inset East Horsley from the Greenbelt in order to facilitate the development of 100 homes proposed near to Horsley Station and over 2000 homes on Wisley Airfield. Why, when the ONS forecast predicts only a 10.4% increase in population size for Guildford does GBC seek to increase housing stock by 22%?

At present the local infrastructure is not sufficient to support the demand put on it in terms of schooling, medical facilities and transport. How does GBC propose that a huge increase in demand will be slotted into the local infrastructure?

When you consider all the proposed changes to East Horsley, the equation proposed by GBC simply does not add up.

Again, please note my strong objection to this latest draft of the Guildford Borough Council local plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

For almost twenty years I have been a regular visitor to the beautiful greenbelt village of East Horsley and its neighbouring communities and villages. I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the building of thousands of homes and the business park on Blackwell Farm in particular.

**Reasons stated below:**

Guildford can't cope with the current traffic. To add more vehicles to the congested and often gridlocked roads is ridiculous. It's not just at rush hour - it's bad at the weekends too.

The South East does not have enough water. How are we going to supply an extra 2000 homes?

I don't believe the sewerage infrastructure will cope well either. The climate is changing. There will be more flooding. Fields soak rainwater up. Housing estates don't.

I live in Guildford and I've just had to wait 21 days to see a GP. Who's going to look after the thousands of new residents?

No one wants more pollution - air quality will get worse leading to more health problems. More noise from all the additional traffic and more light pollution.

I walk past Blackwell Farm everyday. I see deer, skylarks, buzzards, kites, shrews and butterflies everyday. Where will they go if we destroy their habitat? There are orchids too, and a myriad of plants and insects.

I also walk the ancient woodland? It's beautiful and peaceful. The new proposed road from the Surrey Research Park, Gill Avenue to the new estate will cut through the important Woodland which was the original, defensible Green Belt boundary.

I object to the Surrey Research Park expansion. There are empty office blocks all over Guildford. More traffic. More lorries. No thanks.
All of the land earmarked is either an Area of Outstanding Natural Beauty, Area of Great Landscape Value or Greenbelt and should be protected by law. Lose it and it's gone forever. Unimportant to the greedy developers. Devastating to Guildford residents.

Guildford was lovely when I moved here 10 years ago. It's not so nice now. I won't stay if this plan goes ahead.

Answer (if comment is on questions 1-7 of the questionnaire): ()

P2 Please do not approve the plans to build on Guildford Greenbelt land.
The surrounding green spaces are areas of extreme beauty, home to many wild animals and beautiful rare birds such as wild deer, shrews, kites and buzzards. Where will they go of the land is lost?
As a keen horse rider in the local area, I am disheartened that the beautiful landscapes and historic woodlands, once built on will be lost forever. Never replaceable. Gone. Forever.
The fields would no longer absorb the rainfall, deterring flooding to the local population.

Please, please do not build on the greenbelt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to the Guildford Borough Council Proposed Submission Local Plan (June 2016)

I wish to express my strong concerns and objection to Guildford Borough Council to object to the Council’s ill-conceived Draft Local Plan in relation to the proposed developments (as shown in table below) in the village of Send. I believe that this plan is not in compliance with the regulations with which it is required to comply. My reasons and arguments against are explained below.

| A42  | Clockbarn Nursery, Tannery Lane, Send | Send Homes (C3) | 45 |
| A43  | Land at Garlick's Arch, Send Marsh Burnt Common and Ripley | Send and Lovelace | Homes (C3) and employment floorspace (B1c, B2, B8) | 400 |
| A43a | Land for new north facing slip roads to/ from A3 at Send Marsh/ Burnt Common | Send and Clandon and Horsley new northbound on-slip to the A3 trunk road from A247 Clandon Road and a new southbound off-slip from the A3 trunk road to A247 Clandon Road |
| A44  | Land west of Winds Ridge and Send Hill, Send | Send | Homes (C3) and traveller pitches (sui generis) | 40 |

Send is a small, quiet village surrounded by a number of areas of greenbelt land and development of these areas would cause numerous negative impacts to both the environment and character of the village. I therefore very strongly object to the councils proposed development plans.

Over recent years Send has already seen some more housing developments and as a result has increased the population of this village. The proposed plan to develop a further 485 homes is ludicrous as the current infrastructure in place in this village is not able to cope with an increased number of people. The roads are already in a poor state in places and an
increased number of cars using them will only lead to further deterioration. More cars will add to the traffic problems, especially during rush hour times, where it already takes a long time to get out onto the (((((Portsmouth Road)))) from Send Marsh Road and leading to traffic queues to back up on the small roads through the village of Send Marsh. The housing development will likely bring at least 1-2 cars per household leading to a further 485-970 cars and that is not including the additional cars that will be accessing the area at peak times to get to the new employment spaces that are being proposed. New slip roads accessing already busy areas of the A3, especially at peak times would only increase the risk of accidents along those sections of roads as people try to join the A3 flow. I do not believe it is a sensible, well thought idea to go ahead with a development plan that could increase the chances of road traffic accidents.

Increased population size will add to the strain on The Villages Medical Centre, which is already very busy. Further development will make it near impossible to be able to get an appointment within a reasonable time on an already heavily strained Centre. As Send it situated between two large towns, Woking and Guildford, which provide good access to local facilities and transport links, it makes it a prime location for families to establish. The children that grow up here will need access to a local school and Send only has 1 infant school and 1 junior school which could become over-subscribed from an increased number of residents that would be caused from the additional houses that are being proposed to be built and increase the pressure on these schools.

The greenbelt land provides an open feel to the area and gives Send its characteristic of being a small village with a more rural feel. The development of employment floor space and resulting loss of this greenbelt land would see Send lose its identity and start to merge with the larger towns of Woking and Guildford. Greenbelt land is aimed to help minimise urban sprawl and is not a place for industrial development. Aside from this, greenbelt land provides important spaces for wildlife to survive amongst the ever developing landscape. Building on this land will see a loss of both plant and animal species therefore reducing biodiversity of organisms in the area. These species will either die out due to habitat destruction or have to find new homes, leading to competition within other habitats and putting strain on other ecosystems nearby.

New development plans should impact the lives of the residents in a positive manner and as you can see from my reasons stated above this would not be the case with these proposed ideas and why I strongly object to these development plans. I trust that you will take these points into consideration and drop the proposed plans.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the fact that the first notification I received of the proposed changes to include development of Garlicks Arch was as in early June via a leaflet distributed by a concerned neighbour and not via Guildford Borough Council.

I OBJECT to the fact that GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment which shows that industrial space at Burnt Common IS NO LONGER NEEDED.

I OBJECT to Policy A43.30 the proposed development of Garlicks Arch designated for 400 houses and an industrial estate.
This is a new site not included in the Regulation 18 draft and has NOT been consulted on previously. It is not only permanently protected green belt but also a site of ancient woodland with some trees planted in the 16th century.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5397  Respondent: 15506369 / Sheila Jennings-Giles  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to policy A43.30 the development of new four way interchange onto the A3 which would mean that narrow Send Road (A247) would be the main route for traffic leaving the M25 and A3. It is already crowded and vulnerable to traffic jams. Further traffic from this development would result in permanent gridlock. It simply would not work.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5398  Respondent: 15506369 / Sheila Jennings-Giles  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to policy A44 which would see 40 homes and two travellers' pitches on land west of Winds Ridge and Send Hill. This was again a NEW site NOT included in 18 draft and therefore has NOT been consulted on previously. Once again this is Green Belt land partly containing unsafe landfill. Access is by a narrow lane which could never take the volume of traffic that would ensue from traveller's pitches.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10848  Respondent: 15506369 / Sheila Jennings-Giles  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the fact that the Local Plan takes no account of schools, doctors surgeries and roads that are already operating at full capacity. Another 4000 houses in this area with a conservative estimate of a further 8000 cars would be catastrophic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLP16/10805  Respondent: 15506369 / Sheila Jennings-Giles  Agent:

Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5441  Respondent: 15506401 / Alicia Robinson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43a, the proposed on/off ramps to the A3 at Burnt Common as this will inevitably cause traffic chaos on the local road network throughout Ripley, Burnt Common, Send and West Clandon, with absolutely no possibility of mitigation due to the nature of our rural roads and lanes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

I OBJECT to all insetting of villages from the Green Belt, in particular for Ripley, Send Marsh/Burnt Common, Send and East/West Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10842  Respondent: 15506401 / Alicia Robinson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

I OBJECT to development in areas which are at risk of flooding (Policy P4) such as site A43 Garlick's Arch which is designated as flood zone 3 by the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the Local Plan as the proposal of 13,860 homes proposed will not be sustainable (policy S1) and it will have a permanently detrimental effect by over development in existing communities, in particular Ripley, Send, East/West Horsley and West Clandon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight onto the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4552  Respondent: 15506401 / Alicia Robinson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site
will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4553  Respondent: 15506401 / Alicia Robinson  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of
Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5387  Respondent: 15506465 / Lisa Garner  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43a, the proposed on/off ramps to the A3 at Burnt Common as this will inevitably cause traffic chaos on the local road network throughout Ripley, Burnt Common, Send and West Clandon, with absolutely no possibility of mitigation due to the nature of our rural roads and lanes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to not protecting the Green Belt (Policy P2) Removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) would ruin the area and cannot be allowed. The UK's Green Belt has been supported for years and is critical so close to London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10807  Respondent: 15506497 / James Hall  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Borough Wide Strategy (Policy S2) All the other Borough Councils in Surrey are at odds with Guildfords proposal and this must be addressed. The plan should also balance development proportionally across the borough, it should not all be focused on Wisley / A3. Clearly, any new development should be in urban areas where there is already sustainable transport. There are more than enough brownfield sites that should be developed for the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3051  Respondent: 15506561 / Stuart Harrison  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Regarding the proposed developments in the Send Green Belt area. The National Planning Policy Framework intended the Gren Belt to be permanent, there are no special circumstances to justify abonding it.

I object to Send Village being removed from the Green Belt. Without the green belt, Woking and Guildford will merge into one large conurbation. This goes directly against a promise that Central Government and Local Councillors gave to protect the Green Belt.

I object to building 400 houses and several thousand square meters of industrial space at Garlich's Arch.

Any industrial development should be an extension to the existing area at Slyfield. Incidentally, the Slyfield Industrial Estate does need another access route.

The Garlich's Arch site is prone to flooding, and is covered in Ancient woodland.

If brownfield site were effectively used this Green belt would not be needed.

I object to the development of 40 houses and 2 travellers pitches at Send Hill.

The single lane road provides insufficient access. Un-safe landfill waste is in the subsoil of this site, and this is registered with Guildford Borough Council.

I object to the building of 45 houses at Clockbarn Nursery. The vehicular infrastructure is totally inadequate for any more traffic.

I object to the proposed new interchange with the A3 at Burnt common.

Send Road cannot, and must not have to deal with increase in traffic that this junction would create. My children go to school at Send First and St Bedes Schools, and the risks of crossing the road outside Send First are already frightening.

I work in Guildford and it can take me 45 minutes to get to work when the A3 has come to a halt. Adding to its use in this area is a preposterous idea.

The whole concept of these developments seem to ignore all the existing issues with congestion, on the roads, getting a school place, booking an appointment at he Dr's etc.

I moved to Send to be AWAY from overcrowded suburbia, and into a Village existance.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

policing. I object to the new sites because with so many new properties being proposed, can the local police force deal with the rising work load they may receive.

In conclusion I object to the proposed plans for the areas of Ripley, send and clandon as the areas just do not have the adequate infrastructure to deal with such a large number of new properties, and the families that come with it. There isn't enough schools in the area forcing any new children to the area to look further afield. Which will only add to the traffic problems in the morning. The local villages don't have the facilities to cater for all the new homes. So any families moving to the area have to travel by car to the supermarkets etc and the village roads can not handle the rise in car traffic.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
infrastructure. I object to the developments for new sites within the green belt, for example the garlick arch site. As the infrastructure in Ripley village in not adequate to accommodate such a large number of new residents. At rush hour times trying to get through Ripley is bad enough. With queues backing up to the m25 in the evenings. Trying to join the a3 or come off the a3 will become far harder if there is so many new homes being built.

The parking is currently lacking in Ripley as already a small village and high street. With 400 new houses proposed at the garlick arch site, there could be potentially 800+ cars. As most households would have two vehicles. The local areas can not cater for this influx of vehicles. There is not enough parking in Ripley and send for this.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I OBJECT to Policy A25 Gosden Hill as being totally inappropriate and unsustainable development of 2000 homes in the Green Belt, which will see coalescence and urban sprawl from Burpham to West Clandon

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
Comment ID: PSLPS16/5433  Respondent: 15506881 / Chloe Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A35 Former Wisley Airfield as being totally inappropriate and unsustainable development of 2000 homes in the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5435  Respondent: 15506881 / Chloe Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5437  Respondent: 15506881 / Chloe Brown  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43a, the proposed on/off ramps to the A3 at Burnt Common as this will inevitably cause traffic chaos on the local road network throughout Ripley, Burnt Common, Send and West Clandon, with absolutely no possibility of mitigation due to the nature of our rural roads and lanes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to Policy A25 Gosden Hill as being totally inappropriate and unsustainable development of 2000 homes in the Green Belt, which will see coalescence and urban sprawl from Burpham to West Clandon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to Policy A35 Former Wisley Airfield as being totally inappropriate and unsustainable development of 2000 homes in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of
Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

I OBJECT to the Local Plan as the proposal of 13,860 homes proposed will not be sustainable policy S1 and it will have a permanently detrimental effect by overdevelopment in existing communities, in particular Ripley, Send, East/West Horsley and West Clandon

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the disproportionate amount (36%) of all proposed development being in one area of the borough from Wisley to Burpham creating a narrow ribbon effect along the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2634  Respondent: 15507553 / David Lawton Garner  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2633  Respondent: 15507553 / David Lawton Garner  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: PSLPS16/5523  Respondent: 15507553 / David Lawton Garner  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

---

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

---

I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.
Furthermore, the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been there for decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5526  Respondent: 15507553 / David Lawton Garner  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10935  Respondent: 15507553 / David Lawton Garner  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

The Garlick’s Arch (A43) proposal would double the built area in the locality, and would irrevocably damage the character of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10932  Respondent: 15507553 / David Lawton Garner  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II)

There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.

The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10937  Respondent: 15507553 / David Lawton Garner  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

I object to the lack of proper infrastructure planning for sites (Policy II)

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10938  Respondent: 15507553 / David Lawton Garner  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2
I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPP16/10936  Respondent:  15507553 / David Lawton Garner  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to poor air quality concerns (Policy I3)

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPP16/10931  Respondent:  15507553 / David Lawton Garner  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPP16/10933  Respondent: 15507553 / David Lawton Garner  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to development in areas which are at risk of flooding (Policy P4)

The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10930  Respondent: 15507553 / David Lawton Garner  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the Local Plan as the development proposed is not sustainable (Policy S1)

13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick’s Arch.

The development should be in urban areas where there is sustainable transport.

1. I object to the Local Plan as the development proposed is not sustainable (Policy S1)

13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. The local communities don’t need these houses. I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to Policy A43a, the proposed on/off ramps to the A3 at Burnt Common as this will inevitably cause traffic chaos on the local road network throughout Ripley, Burnt Common, Send and West Clandon, with absolutely no possibility of mitigation due to the nature of our rural roads and lanes.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A25 Gosden Hill

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

Gosden Hill is located entirely within the green belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt.

The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be
highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A26 Blackwell Farm. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

Blackwell Farm is located entirely within the green belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Blackwell Farm performs all five functions of green belt, and fulfils purposes 1, 3 and 5 very strongly.

Purpose 1 - “checking the unrestricted sprawl of large built-up areas”. There is huge pressure to develop on the western edge of Guildford; the University of Surrey has stated publicly that its key objective is to develop the whole of its landholdings, stretching west to FlexfordFarm. This, combined with the indefensible boundary being proposed (a hedgerow rather than the existing belt of ancient woodland), will put more of the green belt and the Surrey Hills Area of Outstanding Natural Beauty (AONB) at risk of future development.

Purpose 3 “assists in safeguarding the countryside from encroachment” - the proposed movement of the green belt boundary on the west of Guildford to allow for development of the University in 2004 resulted in the encroachment on countryside and the loss of working farmland (including some Grade 2) at Manor Farm. The proposed future change in the boundary would result in further encroachment and the loss of farmland including further Grade 2. The proposed road development with access road from the A31 would also effectively cut off farm access to the south of the development area leading to further urban influence on this countryside. The University’s stated key objective is to develop land which
includes Chalkpit and Wildfield farms leading to the risk of further boundary change and further encroachment in future years.

Purpose 5 - “assists in urban regeneration by encouraging the recycling of derelict and other urban land”

The Blackwell Farm development would result in harm to the Surrey Hills Area of Outstanding Natural Beauty (AONB), harm to an Area of Great Landscape Value (AGLV), and harm to the setting to the AONB. (Blackwell Farm forms the views into and out of the Hogs Back ridge). The NPPF is clear that AONBs should be afforded the highest level of protection in relation to landscape and scenic beauty. All development proposals within and adjacent to the AONB must conserve or enhance its special qualities. The NPPF also makes it clear that applications for major development in the AONB will be refused unless exceptional circumstances are demonstrated and the development is proven to be in the public’s interest. Guildford Borough Council has not shown that the proposed housing development or the extension of the Research Park, or the proposed link road from the A31 to Gill Avenue, is in the wider public interest. Indeed, the increased traffic through the already congested EgertonRoad/Gill Avenue junction, which would result from the development, would impede emergency vehicles travelling to the Hospital and this would be very much against public interest. GBC’s Policy P1 states that, “The Surrey Hills Area of Outstanding Natural Beauty (AONB) will be conserved and enhanced to maximise its special landscape qualities and protect it from inappropriate development. All proposals will be considered against whether they conserve and/or enhance the setting and views of the AONB”. I question how the proposal to carve a new two-lane carriageway through the AONB fits this policy, or meets para 115 of the NPPF? Finally, nearly the whole site has been identified as a “candidate area” for AONB status in the Landscape Evaluation Study commissioned by Compton, Worplesdon and Wanborough parish councils. Therefore, the entire site should be treated as though it is within the AONB during this local planning process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A35 Wisley. I object to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee unanimously rejected a recent planning application for precisely this development on 14 separate grounds. However, the site had been reinserted into the new draft local plan published only 24 hours before the planning decision. There is no need for housing on this site because the local plan housing target is incorrect &inflated and ignores constraints.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

Green Belt location and absence of “exceptional circumstances”.

Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).

Proximity to A3/M25 bottleneck and Ripley village and roundabouts.

Absence of adequate traffic data.

Loss of high-quality agricultural land (55% of the site), in breach of national policy.

Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.

Presence of a Surrey County Council safeguarded waste site.

Cost of infrastructure required to the detriment of alternative more favourable sites.

Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.

Impact on listed buildings.

Extreme housing density with tiny garden spaces.

Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).19

Failure to evaluate the cumulative impact of this and nearby development sites on the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A42 Clockbarn Nursery. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints. The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area. The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical. Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic. Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5549  Respondent: 15507649 / Nick Turner  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A43 Garlick’s Arch. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. There is a danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

I object to the proposal to build 7,000 sq m of light industrial, general industrial or warehousing on the site at Garlick’s Arch. There is no need for a Strategic Employment Site in this location when there is ample space available at Slyfield (40 ha) and the Employment Land Needs Assessment (ELNA) 2015 has been reduced by 80% since the ELNA 2013. I object to the loss of rural employment on the site as the development would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road &
Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

I object to the lack of proper infrastructure planning for sites (Policy 11) which requires improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object on the grounds of the congestion that development will cause to the trunk roads, A3/M25 (Policy 12). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. The A3 & M25 are already at capacity during peak hours and development prior to improvement of these roads will make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5550  Respondent: 15507649 / Nick Turner  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a). The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

I object to the proposed Infrastructure Schedule (Appendix C). The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/5551  Respondent: 15507649 / Nick Turner  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A44 Send Hill

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

The proposed development is not sustainable because of poor infrastructure. Send Hill is a single track country road and too narrow to provide sufficient access to the site for travellers or accommodate the potential new levels of traffic the proposed development would bring.

The site is a high quality green belt amenity area within beautiful surrounding countryside and would be spoilt by the development.

A Wasteland Solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area. Further development would disturb the water table and increase risk of flooding to surrounding properties.

The site was used as a GBC registered landfill site and shown on the 1963-8 Ordnance Survey maps as “refuse and slag heap”. It is therefore unsuitable for such a development on health reasons. There is a danger that any disturbance would be health hazard due to the unknown materials, and GBC has installed gas monitoring wells on site since July 2000. Methane gas discharge has been recorded making the development of this site a health hazard.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Page 579 of 1920
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Green Belt and Countryside Study does not look strategically at options for development in major settlements beyond. The Green Belt sensitivity analysis is not a valid basis for informing decisions. Exceptional circumstances do not exist to justify amendments to Green Belt boundaries as part of the Local Plan process. It is quite achievable for realistically prepared and identified development needs to be accommodated in Guildford’s urban areas and villages.

It is unacceptable to treat Green Belt as a readily available source of development land during Plan preparation. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level. Releasing Green Belt to fund infrastructure or build on open, previously-developed Green Belt does not pass this test. Opportunities to channel development towards brownfield locations beyond the outer Green Belt boundary, linked to sustainable transport, have not been adequately considered. It is not credible to suggest the Green Belt is being treated as permanent when its boundary was changed as recently as 2003 as part of the last Local Plan review. Indeed, land released in 2003 is neither fully developed nor efficiently used. An approach of eroding the Green Belt at each Local Plan review is not sustainable. If there is a case for Green Belt development, it needs to be proven through the application of policy.

Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach.

The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GBC have failed to apply any reduction which makes the plan undeliverable and unsound. It would be harmful to the character, quality of life and economy of Guildford not to reduce the housing figure to a number significantly below 13,860 new homes by 2033. It would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to government policy to develop on the scale currently proposed. I am concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

The extent to which the Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”, fails to consider options that constrain development or that make greater use of brownfield or previously released greenfield land. Focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect Green Belt around Woking does not consider environmental limits or impact on the next generation in terms of weighing demand for homes for the young alongside the use of all possible last resort greenfield options by one generation.

The National Planning Policy Framework requires that objectively assessed needs should be met unless: “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted.”

Notwithstanding that the Sustainability Appraisal should be proportionate, strategic and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements.

I object to all Green Belt sites allocated for development in the local plan.
I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses.” This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5571  Respondent: 15507969 / Ian Draper  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43a, the proposed on/off ramps to the A3 at Burnt Common as this will inevitably cause traffic chaos on the local road network throughout Ripley, Burnt Common, Send and West Clandon, with absolutely no possibility of mitigation due to the nature of our rural roads and Lanes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5597  Respondent: 15507969 / Ian Draper  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A45

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A45 The Talbot Ripley as this is over development in an open space within the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object in the strongest possible terms to your proposal to increase the number of houses in the villages of West and East Horsley by about 500.

My reasons for objecting are firstly the local infrastructure is already severely overloaded and more importantly there is no land other than Green Belt available.

Should this plan go ahead the pleasant village life experienced in these two villages will be carelessly wasted all for what will at be at best a brief respite from further creeping urbanisation.

For the above reasons I urge you to reconsider your Local Plan proposals and resubmit them to better reflect the wishes of your local constituents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing with regards to the above proposal build 1100 homes, a Secondary school & six travelling show pitches on GREEN BELT LAND! I have read the proposal & knowing the site(s) well, having lived in the village for most of my life and a child played in the proposed fields, I wish to **strongly object** due to the attributing factors listed below -

- Disproportionate & unsustainable development, on Green Belt land.
- Erosion of green belt land when there are brownfield sites, elsewhere in Guildford, far better suited with all the amenities already on their doorstep.
- Destruction of rural environment where currently protected brown snakes, deer & other wildlife live, 500 year old oak trees & open fields will just become a concrete mass, building houses on this type of land is not the way forward.
- The Council are ignoring the advice of previous planning inspectors that the fields of Normandy add to the openness of the green belt.
- As for the claims that a Secondary School is a necessity & “trumps” planning policy on greenbelt is simply untrue as there is no legal evidence to support this, as there are numerous Secondary Schools in our area all of who are undersubscribed.
- Glaziers Lane & Westwood Lane are country lanes and are not remotely suitable for the vast increase of traffic that would ensue from building these houses. The houses would actually be boxed in by road & rail, congestion on the roads in Normandy is already a major issue with multiple delays & accidents not to mention the pollution.
- People actually move to Normandy for the open fields & try to give their families a safe and rural life, fully aware there are not schools and large housing estates.
- Who is going to pay for the extra emergency services required to service this out of town area as this proposal would double the size of our village?

We have all been blessed with nature on our doorsteps, embrace it & protect it as it is so precious, if you agree for this to be all ripped away it will never, ever be replaced.

Surrey County Council has always prided itself on being one of the forerunners of providing green, open land for people to walk, ride & play in, don’t now destroy this legacy.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT most strongly to the removal from the Green Belt of homes in Guildford Road, northern end of Glaziers Lane, Flexford & Walden Cottages as these areas were identified, by the Council, as contributing to the “openness of the Green Belt”, so these areas should remain washed over by the Green Belt status. Please see below my further points as to why I object.

- I object to the changes to Policy P2 because they have not addressed many of the 32,000 objections made to the 2016 plan.
- I object to the new para (1) “The Metropolitan Green Belt will continue to be protected as shown designated on the Policies Map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.” The words “as shown designated on the Policies Map” should be deleted. The Policies Map has effectively ignored huge areas of Green Belt protection and the new para (1) is therefore a sham.
- I object to the proposed change that Normandy settlement, Flexford settlement and Walden Cottages should be inset from the Green Belt due to the fact that:
  - There is evidence in past planning appeals APP/Y3615/W/3002308, APP/Y3615/A/102140360 and APP/Y3615/A/10/2131590 that the land here contributes to the "openness" of the Green belt
  - There is evidence in the Sustainability Appraisal para 10.4.7 that the agricultural land between the settlements is of BMV quality, exhibits 'openness' and contributes to the rural economy
  - The land in and around the settlements of Normandy and Flexford contributes to views into and from the Surrey Hills AONB (Hog's Back)
- Policy P2 fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it needs to be permanently protected. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land.
- Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital.
- It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when setting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of land that may be removed from the Green Belt.
- I object to the statement in the Draft Local Plan under Green Belt Policy P2 (4.3.13) which claims that 14 villages are “now inset from the Green Belt”. This statement is untrue as GBC is proposing to “inset” these village. No decision has been made by an Inspector, therefore the villages remain in the Green Belt.
- I object to the changed “insetting” of 15 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages.
- I am concerned that settlement boundaries are to be hugely extended in many villages (including Send) and that infilling is also proposed outside the settlement boundaries of 11 further villages. This is completely unplanned and unmeasured development outside of the OAN.

I SUPPORT – Removal of site A46 & removal of site A47

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The removal of the former Wisley Airfield from the Green Belt which serves a vital role in the prevention of London sprawl.

No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.

The Local Plan as drafted poses a threat to the historic rural settlements of Ockham, Hatchford and Downside.

The potential harmful impact on transport, local roads and road safety by this suggested development. The result of an additional 2,000 homes could result in an estimated 4,000 more cars, plus other vehicles to service the development.

Such increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham.

The absence of cycle paths and footpaths renders the assertion that the development would result in a shift to using cycles and walking is not viable.

There would be an increase in the existing severe congestion on the Strategic Road Network of the A3 and M25. Also any proposed secondary school would add to this congestion.

There is not sufficient capacity at all the local railway stations to accommodate further large increase in passenger traffic and parking facilities.

Air quality issue does not seem to be given sufficient consideration; near the M25/A3 junction, it already exceeds EU-permitted levels.

These and other objections are supported by the unanimous rejection of application 15/P00012 by the Planning Committee at Guildford Borough Council on 8th April 2016.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I can find no evidence for the alleged housing need numbers of 693 a year which is more than double the previous figure of 322 in 2012. Flawed evidence is exaggerating the need for expansion as shown clearly by the GRA report on housing.

Brownfield opportunities are being ignored. We need homes in the centre, more accommodation on campus for students, and homes for the elderly would free up family houses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The loss of Green Belt land, more specifically the proposed Green Belt development at Gosden Hill. I oppose unjustified Green Belt development. Allowing Green Belt development to pay for transport schemes will simply generate yet more traffic from more homes, fuelling congestion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

There is a lack of specific details of essential infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
It is irresponsible to squander every last resort greenfield site in a single Plan, robbing our future generations.

There is a disproportionate level of development in one area of the Borough.

Expansion should be constrained to protect the character of town and country in our congested gap town.

The consultation period is limited in time. I believe the Local Plan should be presented properly at public consultations and the feedback taken on board because I don’t see that it has been to date.

Tunnelling of the A3 should be agreed before Gosden Hill is planned for development.

Transport evidence is not yet fit for use and major transport issues are unresolved e.g. another river crossing, a central bus facility.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I don’t believe you have addressed the objections raised previously. I also believe the Draft Local Plan is still unsound and unsustainable.

2,000 new homes on Gosden Hill will be a huge mistake. The infrastructure simply is not there and Burpham cannot take any more traffic. The roads are already blocked every day, the pollution is in excess of permissible levels and will only get worse. The thousands of vehicles that will be generated will mostly travel through Burpham and is dangerous for pedestrians and for all our health. You recently allowed the Aldi application who have since then broken every planning restriction originally passed and now the many large lorries are numerous, dangerous and heavily polluting.

You cannot take our Green Belt away. Housing in Gosden Hill is in our Green Belt and with such plans you are eventually going to join Guildford up with Woking and/or Clandon. You need to safeguard our countryside from encroachment, from merging into other towns and preserve the character of Burpham.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the extension of the boundaries of the settlement areas of the Horsleys - no sound reasons have been given for this proposal.

I strongly object to the proposal to develop Green Belt land for housing, particularly sites A37, A38, A39, A40 and A41. All of which play an important part in the character of the Horsleys, in terms of the green and leafy environment. The requirement for this many new houses in the Horsleys has not been demonstrated.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Transport

A realistic traffic solution must be put in place before any agreement is made on housing - Particularly the decision regarding the A3 tunnel.

The proposals for the infrastructure for transport are insufficient and inappropriate – there is not enough space for the suggestions of bus lanes and cycle lanes on both sides of London Road in Burpham – it does not have the capacity for the current levels of traffic - the traffic is solid along the London Road and peak times and school start and end times already. So the impact on the environment will be worse not better with even more vehicles stationary while they move through Burpham.

After the building of Aldi in Burpham there is undeniable proof that the methods of calculation used by GBC and SCC to predict traffic movements are seriously flawed and incorrect – there is much congestion around the A3100/A2234 roundabout due solely to Aldi customers.

I OBJECT, this additional junction on the A3 is within 2.5 miles of an existing junction. Junctions increase the risk of accidents with drivers leaving it late to get in the correct lane to leave a fast road, where as traffic joining effectively reduce the principal road by one lane. It will not improve the traffic flow on the local roads, it could even make it worse, as it could draw traffic from the south and southwest of Woking on to the A247 through Send to join the A3, where as they may use the Byfleet road to the A3 junction at Pains Hill This proposal is only there so the council can claim to be doing road infrastructure work to assist with traffic flows that all these proposed development will produce.

I OBJECT, This area may have started off as a quarry but it became a landfill site prior to the EU Landfill Directive with type of waste not identified. Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005 identifies the proposed site as GBC recorded landfill site Ref GU/11 LLC. This area is also shown on a number of Ordnance Survey Maps as refuse tip. The Envirosurvey Report RS1100201_1_1 dated 17th February 2004 and historical map data and information from GBC has identified site as landfill and has ‘areas of potentially contaminative industrial activities’ it would be far better to leave the site undisturbed. Any development of the site would add an extra 80 cars on the roads of Send producing addition congestion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT. Sustainability should not be confined to just the building it should also apply to access to the buildings and with public transport slowly being reduced these settlements will bring vastly increased car use and will lead to unacceptable traffic congestion, overstretched social infrastructure, and more greenhouse gas emissions, noise and light pollution. Build dormitory towns across the Green Belt that are environmentally and socially unsustainable are totally unacceptable. This policy should not be just about saving energy but about preserving the borough’s stock of natural capital, especially the countryside, from futile attempts to rig the housing market. This policy’s emphasis on Combined Cooling Heating and Power and communal heating networks is meaningless, since no such networks are available locally. And developers will have no interest in installing these because it will affect their bottom line.

---
I OBJECT. History is unamenable to improvement, so the policy should commit the Council firmly to protecting and preserving our heritage assets from development. Instead, the specific policy pledge to “support development” that might “enhance” heritage assets leaves wide scope for abuse in the form of destructive commercialisation and financial leveraging of relevant sites.

This policy is based on the false premise that Guildford’s heritage is inherently in decay. This is a developer’s charter – a short step away from the idea that the historic environment needs to pay its way to be preserved. The Council’s aggressive reviews of Guildford Museum and the Electric Theatre support this interpretation. Whatever the “reasoned justification”, the actual policy wording in the blue box leaves too many loopholes.

Development close to historical assets is harmful and should be expressly prohibited. This policy fails to meet the requirements of NPPF paragraphs 126 and 131-133.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. This policy that does not address any of the obvious practical issues already touched on but it is essential, that a reasonable amount of affordable housing is available for purchase but it also essential that there should property that are affordable for rent. Yet recently when any development has taken place in Send affordable is the last thing on the developers mind. Tice the builder, house and yard was recently redeveloped with four-bed room houses. A police house was redeveloped, Skene Close was the result with six houses selling for between £630 to 690,000, and a plot in Send...
Marsh, which was two houses away from some cottages, had a detached house built which sold for £1005000. The site could have accommodation two pairs of semi-detached cottages, which would have stood some chance of being affordable.

Low-paid workers, for example, those on the minimum wage, who cannot afford to buy so-called “affordable” homes or pay an “affordable” rent. There is a need for some expansion in social housing, especially in urban areas, where there is a greater concentration of low-paid workers such as those employed in the retail, warehousing and distribution sectors.

The number of homes planned in the urban area is too low. There is a glaring need for regeneration in Guildford and not retail or office space, but this is ignored in favour building homes on green-field sites instead. This will not address urban housing needs. It is also unsustainable, since building outside the town does disproportionate harm to road traffic, air quality and overstretched infrastructure. The plan envisages a large expansion of the traditional “bricks and mortar” retail sector, but this is a sector in rapid and continuous decline. All the stated policy aims for “inset” villages will be negated by the excessive weight of new housing development proposed which would radically change their character forever. Against this disruptive background, it is barely relevant to talk about preserving views!

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. Use of rural areas for town centre uses without applying the sequential approach is against the principles of localism that require local people to be consulted and heeded, not ignored. Villages need protecting in terms of both design and scale. Most of the economic activities listed in 4.4.44 depend on maintaining the rural character of our villages which would be endangered by the wholesale “insetting”, boundary expansion and house building proposed in other parts of the plan.

Policy E5 is incompatible with the high housing numbers proposed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment “Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm. Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be: 1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11082  Respondent: 15509057 / Richard Golding  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. The policy “vision” refers to protecting the Guildford’s “unique setting” (including, surely, its surrounding Green Belt and countryside views) but this is not carried over into the formal policy wording in the blue box. It is therefore a worthless commitment. There should be much more residential uses of the town centre where most people, especially the young and less well-off, want to live and where the necessary amenities and infrastructure exist. But all the council thinks of is more retail development surely the dinosaurs in the planning department must have realized that shopping is moving on line, and if any more retail space is provided it will have a very negative effect on the traditional shopping area like the High Street. The policy misses the opportunity to propose a visionary regeneration plan for the River Wey/Walnut Tree Close area, where there is arguably enough brownfield land for 4,000 new homes, meeting near all the borough’s housing need over the plan period without harming the countryside. There is an urgent need for a brownfield register and to focus on brownfield redevelopment before considering development outside the existing urban area. CIL strategy must promote brownfield redevelopment. Yet the local plan totally ignores the Council own plan for the Town centre, the redevelopment of the railway station and the Vision group proposal for a new rail river crossing. It also ignores the NPPF requirements to provide guidance on design requirements.

The plan only seems to be interest in increasing the shopping area even thought this requirement in a town is in decline.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E8

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the proposal that sites “on the edge” of District Centres should be considered for retail developments. This is absolutely crazy. Shops in existing villages are closing and being converted into residential property. So there must be another reason; it could well be to let build shops, then we have a good reason to build a lot more houses. This nothing more than creeping urbanisation. One of the reasons the Green Belt policy was established after the second world war. This is another Trojan horse policy, allowing retail hubs to be established and expanded in order to smooth the way for vast new housing estates outside in the countryside, and in a forlorn attempt to mitigate the serious traffic and infrastructure problems large housing developments will bring. The Council has no business preparing the way for new supermarkets in the Green Belt. Rural retail capacity should be left to local demand. The policy proposes not a single measure to support existing rural shops and services that are the lifeblood of village communities, e.g. using business rates and other levers at the Council’s disposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/11084  Respondent: 15509057 / Richard Golding  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E9

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT (for the reasons given under Policy E8 above) to the proposal for retail development adjacent to the 6 rural centres, and sites on the edge of designated centres. This is creeping urbanisation, damaging to the Green Belt and to Guildford town revival as a thriving urban hub. It will contribute to local urban decay and depopulation, just as expansion of the suburbs did to mid-20th century London. In Send since the turn of the century four shops have gone from the village; Chemist, shoe shop and an electrical contractor supplier, these have been demolished and replaced by offices and residential, where the local post office and general provision store has been converted into residential use.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I Object “Affordable” homes, under national definitions, means homes that are sold or rented at 80% of market value. Even if 70% of these are rented as proposed, the level of market prices in the South-East and in a short journey time to London means (even post-Brexit) that these homes will remain well beyond most people’s means and that starter homes will not become available for local people. And when the planning applications are lodge the bulk will be for 4/5 bedroom properties and the planners will not be able to resist this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough-housing list. To make the housing viable, or to improve the “mix”, this can include “market” housing – i.e. normal commercial development, which in Guildford usually means large executive homes. This policy means building anywhere, and ignoring all historic planning restrictions.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infrastructure and delivery I2 Supporting the D.O.T. “Road Investment Strategy”

I OBJECT. Most of the borough’s infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. Yet this plan’s commitment to building housing estates across the Guildford countryside will mean *either* major infrastructure investment that no-one is prepared to pay *or else* a catastrophic and simultaneous collapse in transport, educational, medical, energy, water and communications services. The plan targets greenfield sites – requiring heavy infrastructure investment. Public Transport in the form of buses are being cut, bus operators require a profit or subsidy to run a service and the council s are withdrawing the subsidy so the service is withdrawn. The chance of getting new stations on the rail network is very remote; they cost an out of this world figure and slow the overall service down. The dwell time of modern stock at stations is high due to the time it takes to open and close the doors. Most of the proposed improvements to the major roads will take year’s take Send at the moment the A247 Send Road comes to a standstill during the peak period adding a minimum of 480 houses which will be around 960 cars to the roads will cause grid lock this excludes the the HGV to the industrial units. Most people will use private cars as they are always have a time deficiency and buses are always slow and never there when they should be. Surrey is the most congested county in England with 683, people per square kilometer compared to an average of 413. With massive disruption during construction and a huge increase in the number of cars on the local roads, grid lock awaits?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY I3 - Sustainable transport for new developments

I OBJECT. This is just a pie in the sky bit of box ticking, if one assumes that households have a minimum of one car but looking around it seems that most have two or more and this will be the normal means of transport. These days people will not wait around for a bus that fails to turn up, we will certainly not have a service like central London with one every 5 minutes, so if one is missing it is not to long to wait for the next. Unless Guildford borough bans the ownership of cars, cars will be the standard method of transport. People will not want to cycle because of the large number of cars.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. This policy weakens existing protection when it should strengthen it. It is dependent on the Surrey Hills Management Plan. The latter welcomes housing development. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11076  Respondent: 15509057 / Richard Golding  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. This policy states, “the general extent of the Green Belt has been retained.” This is a lie. There is a major reduction in the plan for Green Belt land between Guildford and the M25. The policy wording is tepid in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. It is an inalienable public good. Once gone it is gone forever. It is not the Council’s to give away even if central office is whispering in the ears of its councilors as to how great it would be for developers and such an advantage for them.
Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

- Agricultural production
- Rural leisure and tourism amenities
- Water catchments
- Flood control
- Biodiversity
- Natural heritage
- A carbon sink for air pollution
- Room for public facilities such as parks and burial grounds
- Profitable film locations (e.g. Shere)
- Future economic potential such as mineral extraction (even fracking)
- Natural beauty, landmarks, opens space, rural views and sight lines
- Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)

As a matter of law, morality and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations. (All though the government has recently seemed to opted for a back door policy to destroy the green belt) It is disreputable to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No one argues that we should sell 1.6% of the Crown jewels in order to build houses. I am not opposed to appropriate development in the Green Belt in Send, Send Marsh and Ripley. But I fail to see why a system of fair burden sharing of new development cannot be applied to the borough’s existing settlements in proportion to their size. This alternative would minimise the strain on infrastructure and maximise the chances of retaining the character of each settlement through gradual growth. It is reasonable to ask urban Guildford, with x times the population of semi-rural Send, Send Marsh or Ripley for instance, to accommodate x times the number of new homes over the plan period. Parish councils could be asked, and will no doubt be willing, to propose where their quota of houses should go. Most rural residents are reasonable people who, if not alienated by top-down planners, will support realistic numbers of new houses in their neighbourhoods. Unfortunately, this democratic, bottom-up approach has not been attempted. Instead, while developers flip and land-bank urban sites as a financial speculation, this plan will dump most new development on greenfield sites where building costs are lower, covering the Green Belt with dozens of housing estates that few residents want. 8,086 new houses are planned for the Green Belt but only 1,135 for Guildford urban area. This is disruptive, socially inequitable and unnecessary. It will not only destroy countryside but will also delay and disincentivise much-needed urban regeneration. The remarkable revival and repopulation of central London shows that building dormitory satellite settlements is an out-of-date approach to planning. I particularly protest at the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. I am deeply disturbed that settlement boundaries are to be extended in many villages including Send, Send Marsh and Ripley and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell-bent on self-defeat.

I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councilor, was irregularly commissioned by Council officers without the authority of Councillors. To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable
development need (especially post-Brexit) and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Send is a good example of villages that ought to retain their Green Belt status. Send provides an important Green Belt buffer between Woking and Guildford. Yes, it is true that Send comprises old ribbon development but this should not mean it can be removed from the Green Belt so that Woking joins up to Guildford. The village and the countryside behind the A247 should all be protected.

I OBJECT to three particularly vulnerable areas of high quality amenity land being taken out of the Green Belt around Send which include:

1. The land behind the schools including playing fields and woodland.
2. The land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering.
3. Land to the left of Cartbridge going up to the old depot on the Wey Navigation.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the way this local plan totally disregards the protection the Green Belt gives to field and open spaces, it is cynical the way the council wish to create urban sprawl along the A3, (Policy A35, A43 and A25) this was one of the founding reason for creating the Green Belt in the first place, to stop urban sprawl along trunk roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11077  Respondent: 15509057 / Richard Golding  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT. This is more protective – as a policy – than the proposals for the AONB and the Green Belt, so is anomalous and wrong. I am not in favour of building on this area, since urban, brownfield areas are sufficient to meet all reasonable housing targets some owned by Guildford borough and Surrey County Council. There is no need to build on any green fields if brownfield, previously developed land is used efficiently (without garden-grabbing). This policy refers to the countryside near Ash and Tongham (see paragraph 4.3.28). This area does not justify stronger policy protection than any other part of the borough. The fact that the current and previous Council Leaders represent it should not give it preferential status: “we will seek to limit any development in the countryside unless it can be demonstrated that it is necessary in that location”. Green Belt and AONB areas should by definition have higher levels of protection than non-Green Belt areas. It should also be noted that Ash and Tongham lie beyond Guildford far away from London and therefore make no contribution to controlling Metropolitan urban sprawl, unlike those villages, which, ironically, are to be “inset”. That is presumably why Ash and Tongham are not in the Green Belt already. This policy, however, attaches higher priority to preventing the “coalescence between the Ash and Tongham urban area and Aldershot” than it does to the primary purpose of the Metropolitan Green Belt, which is to stop London sprawl. Sprawl from towns that occurred between the two wars was one of the main reason for establishing the Green Belt. Apart from being a scandalous misuse of local political patronage, this policy effectively says, “Look, we are not destroying the Guildford Green Belt because we are extending it in Ash and Tongham.” It is a cynical piece of tokenism. The leader of the Council needs to be seen to be above reproach by deleting this policy.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT. This policy is weak. The mitigation (cash compensation) offered for development in the special protection area is so small as to be meaningless. SANG (Suitable Alternative Natural Green space) is not beneficial since the sites identified or targeted are already green space. This is just using agricultural or wooded land as recreation land in order to justify building on other green spaces nearby. There is no actual increase in open space or environmental protection; instead, it is a ploy designed to permit building on otherwise protected areas. SANG – in part used to prevent dogs and cats attacking nesting birds – must also ensure that it is not using land which is adjacent to the Special Protection Areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S1 Presumption in favour of Sustainable Development.

I object, the proposals in this policy have totally ignored the most SUSTAINABLE item we have been given, THE GREEN BELT, the Green Belt. As an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity, the Green Belt is a living example of sustainable development in practice. It is the envy of the world. Policy S1 should commit to uphold Green Belt boundaries and protections, setting at least one clear boundary to planning decisions. The contempt for Green Belt constraints was amply demonstrated by counselor Spooner at the open meeting in Send when he said its only green belt not an Area of Outstanding Natural Beauty when a query was raised by one of the members of the public present.

The commitment to approve planning applications “wherever possible” and “without delay” reveals this draft plan’s is just a developers charter and one can be sure that any development will be heavily biased towards large properties 4/5 bedrooms as has been shown by the small amount of redevelopment which has already occurred in Send. This develops at all cost. With the references to sustainability being so vague that the NPPF the presumption in favour of sustainable development becomes a presumption in favour of any development at all.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposals to build 13,860 new homes the bulk of these on the green belt.

The number is based on pre-Brexit projections for economic and population growth, including migration. There is all ready softening of the housing market with Property Company shares falling these numbers now need to be revised downwards, possibly quite seriously.

The number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any commonsense view, “West Surrey” is much too small. Half of Guildford borough’s residents work in London a short commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; Where as half the people who work in Guildford live outside the borough. This so called HMA nothing more than a bit of fiction dreamt up by the planners as a way to try and concrete over a large area of green belt. The HMA for an area that is part of the London commuter belt fails to follow that of a self contained town such Exeter, Taunton etc.

Guildford is part of a far wider and more complex housing market. These concerns regards the HMA have been raised before but the council has ignored it.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The need for the 13,860 properties seems to bear no relation ship to the population forecast produced by the Office of National Statistics (ONS) these show the general level of population in Guildford Borough will stay fairly static (births = deaths) with the exception of students, which could well change with Brexit, with these being at the university, surely it would make far more sense to replace the proposed 48,000 m2 of additional retail space with accommodation more suitable for young couples and students, The changes in the retail world with the growth of online shopping has already brought about the demise of a number of stores of the type that would use shopping mails/centers and this will develop even more during the period of this local plan. Additional retail space would be very negative on the traditional shopping areas such as the High Street and North Street.

The university should also be provided student accommodation this would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on require their university to accommodate far more students than Guildford. Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and underused surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Overprovision is inappropriate given other constraints.

Justin Gardner Consulting Ltd, who produced this HMA have got there figures totally wrong. I would suggest the ONS figures are closer to reality especial with Brexit on the horizon, given that Justins Gardners web site shows they mainly
work for developers, I would suggest what they have produced in short is a developers charter. Or possible they are trying to create a new town called Wokeford.

Answer (if comment is on questions 1-7 of the questionnaire): ()

GENERAL COMENTS ON LOCAL PLAN

This local plan is just a developer charter; The HMA has effectively been prepared by a Consultant to please developers, with the sole object of providing nice building sites in the remains of the Green Belt for 4/5 bedroom houses. It fails to do anything for young people and totally ignores Guildford Town Centre except looking to add even more unwanted retail space, The figure of the number of homes required have been estimated way above the governments figures as prepared by the Office of National Statistics. This plan should be consigned to the waste bin.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal to inset Send Business Park from the GREEN BELT because: this would enable the development to grow which would be totally out of keeping with the rural location, this old no conforming use is located on one of Guildford Borough’s jewels, the Wey Navigation, and any development would be very detrimental to it. Access to the site from the A247 is by a very narrow lane just one vehicle wide far more suitable for a horse and cart than a forty-four-ton HGV. Any development at this point would detract from the openness of the land (GREEN BELT) around the site.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A42 changes at Clockbarn in Tannery Lane because: There is no need for housing on this site, the local plan housing target is incorrect. The figures quoted way exceed the local need, the local requirements are for social housing and not large executive boxes as favoured by developers to maximize profits. The revised proposal to increase the development by 33% makes a mockery of THE GREEN BELT. The site is part of the permanent GREEN BELT at Send and should remain undeveloped in order to preserve the amenity of the surrounding area. Any development will create URBAN SPRAWL along the Wey Navigation and have a very negative effect on this asset of Guildford Borough. The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical. Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic. Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the policy A43 changes at Garlick’s Arch because: This land is GREEN BELT it contains two areas of ancient woodland 50% of the site is subject to flooding and is recognised locally as a FLOOD PLANE (see attached photographs), it carries a flood zone 2 allocation any work carried out to reduce the area flooded would increase the likely hood of flooding in Send Marsh, the Environment Agency undertook work a few years ago in Send Marsh to reduce the risk, but any work on Garlick’s Arch could neutralise the good work done.

If the proposed development of 400 houses and 6 travelling show peoples’ plots were built where will their surface water go, will it just be spirited away, it will certainly not soak into the ground under such a density of buildings.

The proposal for 400 homes totally ignores the thousands of previous objections made by local people, and there is no proven demand for travelling show peoples plots in this location.
The ancient woodland on the site has protection under the NPPF section 118 if one locates a development of this size adjacent to woods it can not fail to damage it. I do realise the policy does allow exception for thing of national importance, but this certainly fails to meet that standard. A UK wide state of nature survey undertaken in 2016 shows worrying trends, so Surrey Wildlife Trust landscape manager Mile Waite undertook a state of nature survey in Surrey and this showed that Surreys flora and fauna appears to be fairing particularly badly with losses far higher than the national level – 12% compared nationally 2%. Of a total of 404 priority species of national conservation concern almost 31% are locally extinct in Surrey while 37% are threatened or in worrying decline leaving 32% considered stable or recovering. The proposed development will not improve the situation it would have a negative effect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (

I OBJECT TO A58 at Burnt Common because: this site was deleted from the 2014 Local Plan due to objections, yet put back into the 2016 Plan, this current proposal looks too increase the development above the 7,000 square meters of warehouse or industrial units proposed in the 2016 Local Plan. There is currently no requirement for more industrial units. Guildford and Slyfield currently have empty sites and there is a decline in the demand for such sites, the 2017 employment land need assessment shows a reduction in demand to 3.9 hectares for the whole borough, yet the council are proposing to destroy 10 hectares of Sends GREEN BELT for unnecessary units, putting even more pressure on the local roads and adding to the development along the A3 corridor totally against the GREEN BELT policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Objection to new local plan

I object to Send village, Wisley, Clandon and Ripley being removed from the Green Belt. We bought our house in this village to be outside of the hustle and bustle of Guildford or Woking and to bring up our children in a small village environment. This environment will be ruined by these plans.

I object to the number of homes that the plans intend to deliver.

I object to the new 4-way on/off ramp to A3 at Burnt Common (A43a). This will not alleviate traffic in Send, Ripley or Clandon. I believe it will make it worse. And it will enable further development.

I object to the inclusion of Green Belt within the proposed new Village boundaries (which is very likely to lead to more development in the future)

I object to Garlick's Arch proposal (Policy A43) to build 400 houses and 7000 sq. Metres of light industrial warehousing. This is literally on our doorstep and the increased traffic and noise would be unbearable.

I object to the destruction of the Green Belt in this area, including the development of 2,000 homes at Gosden Hill Farm, Merrow (Policy A25) which is in clear contravention of the central Government's stated commitment to Green Belt protection.

I object to the last minute inclusion of new sites with less than 2 weeks notice. Due process has not been followed.

I object to the limited consultation period which doesn't give residents enough chance to digest everything and the impact this will have on their lives.

I object to policy A44 involving 1.9 ha of land to be designate for 40 homes and 2 travellers' pitches. This is new and was not included in the regulation 18 draft, and has not be consulted upon previously. Development for housing is inappropriate due to its permanent Green Belt Status.

The Green Belt was intended to be permanent, as required by National Planning policy Framework, and there are no special circumstances to justify abandoning it. Send's Green Belt provides an essential buffer stopping Woking and Guildford becoming one conurbation.

If we had wanted to live in an urban environment we would have bought a house in Guildford or Woking. We bought into the beautiful countryside on our doorstep. These plans will be devastating for the villages of Send, Clandon and Ripley and I wholeheartedly object to them.

I would like my comments to be given to the planning inspector.

Answer (if comment is on questions 1-7 of the questionnaire): ( )
We object to the new local plan which will destroy extensive AONB by invading greenfield sites.

In particular we have doubts about the sustainability of the proposed development off the Hogs Back at Blackwell Farm.

This would destroy views from the Hogs Back ridge, Remove 72 hectares of scenic farmland and ancient woodland, Add 1800 houses, an Industrial Park, traveller's pitches, and a new highway, Increase traffic congestion along the A31, A3, and the B3000 through Compton village, And add to Guildford's pollution.

Don't let this happen.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Guildford Borough Council's changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England's forthcoming boundary review [para. 4.3.8].
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion - particularly around the hospital and A&E - and will also encourage rat-running through residential areas such as Compton village.
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]. Accessing the A31 from the top end of Down lane will become impossible.
- adds to air pollution in neighbouring areas, which already exceeds safe EU limits for Nitrous Oxide.

Re. Paragraph 4.3.16 and Proposals Map Settlement Boundary Changes in East Horsley.

I OBJECT to the proposed boundary change to move the settlement boundary westwards from the houses on the west side of Kingston Avenue to the tree line running along the parish boundary on the west edge of of Kingston Meadows which would result in taking all of Kingston Meadows out of the green belt.

I have lived in my house since October 1979 and daily walked in the Meadows with my dogs. When GBC bought the Meadows, renaming them Kingston Meadows, we were assured by GBC that they would forever be used as recreation area for the residents of East Horsley. A large circle of Whitebeam trees was planted at the far (south) end of the Meadows and we were told the land there was to be used by locals to freely roam, picnic, exercise, walk children and dogs etc. Subsequently the children's play areas, tennis courts, football pitch and so on were built, all plainly for use by villagers.

No sound reasons have been given for the proposed extension of the boundary, which seems to be aimed solely at increasing the land available within the settlements for future additional development. Moving the green belt boundary westwards does not constitute an 'exceptional circumstance' under the NPPF rules and as such I believe this to be an invalid proposal.

Therefore I OBJECT TO THIS PROPOSED BOUNDARY CHANGE.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley South

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to notify my concerns regarding the Guildford Local Plan (the Plan) and specifically the development as outlined in East & West Horsley where it would appear that the proposal incorporates nearly 600 new houses to be constructed within a five year period of the adoption of the Plan.

Whilst I appreciate the need to provide additional housing stock it is imperative that any development of this magnitude considers commensurate attention and improvements to the hinterland’s basic infrastructure. I am not convinced that this infrastructure improvement is adequately demonstrated or supported within the Plan.

My major concerns include;

1. There is a proposal to remove East & West Horsley from the Green Belt. My understanding is that this drastic action should only be contemplated in “exceptional circumstances”. I do not believe that these “exceptional circumstances” have been adequately demonstrated.
2. There appears to be a proposal to extend the boundaries of the Settlement areas of East & West Horsley. It is not clear to me why these changes are proposed with no persuasive reasons or evidence to support the proposal. I am advised that the sole purpose of this extension appears to be aimed at increasing the land available within the settlements for future additional, but as yet unspecified, development. This is a serious concern.
3. I have previously mentioned my concerns regarding the additional burden the Plan’s proposals would place on the existing infrastructure. There is already inadequate car parking at both Horsley and Effingham Junction railway stations each of which cater for very heavy commuter traffic. Local schools appear to be more or less at capacity. The medical services are clearly stretched at present and obtaining appointments with doctors is difficult with long waiting times as routine. Drainage and water supply pipework appears overloaded and inadequate with frequent bursting of pipes and overflowing of drains in winter. The road surfaces are poor, potholed and in need of regular repair. The Drift, a very popular and busy cut through from West to East Horsley, is a prime example. There appears to be little or no scope or interest in improvement and certainly nothing that I have seen in the Plan which offers any comfort here.
4. I notice that Station Parade is designated as a “District Centre”. I understand District Centres to be large groups of shops, together with appropriate supporting non-retail facilities and services, which collectively form a coherent shopping centre. I am further advised they normally feature not less than 50 units, often many more, and are well placed to serve the County’s major population concentrations. To classify Station Parade as a District Centre demonstrates a serious failure to comprehend the nature of the facilities currently provided in the village centre and would leave the area at risk of further, future, damaging and inappropriate urbanisation.
5. There is a staggering proposal to develop more than 2000 housing units on the former Wisley Airfield at Ockham. This is represented as a new housing village. The impact on East & West Horsley of such a massive mixed housing, retail, commercial, traveller and schools development all less than two miles away would be significant and damaging. The additional proposals for extensive development at Burnt Common (400 houses and...
commercial developments), Gosden Hill Farm and Burpham (2000 houses and mixed use developments) only compound the adverse impact on East & West Horsley.

6. I am advised that there is a major doubt concerning the basis upon which the additional housing numbers have been proposed. It appears that the inflated number of new houses proposed arises from a Strategic Housing Market Assessment (SMHA) that was generated by a consultant’s mathematical model but the basis and detail of that model is not provided or revealed in the Plan. Nor, I am advised, has the model been shared with Guildford Borough Council (GBC). I am advised that the SMHA target housing number has then been further increased by GBC to extrapolate a population increase which is almost 70% higher than the official national estimates for population growth in the Borough. It is clear that the scale of this increase has alarming consequences and produces potentially unsafe results such as a projected increase of up to 35% in existing Horsley households. This, I am advised, is greater than any other single area in the Borough and tends to suggest that the basis upon which the number of additional houses has been calculated may be in need of the most careful scrutiny.

For these reasons I must register my objection to the Plan as currently proposed.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley South

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident in Heatherdene, West Horsley, I write to object to the planning proposals to the Horsley areas.

I object to the amount of housing proposed to be built in the Horsley areas. The roads and local infrastructure will not be able to support the increased population within it's own areas and those of close surrounding areas and will be detrimental to the local residents and safety of all.

The numbers proposed must be revised to keep Horsley area roads safe for children and elderly and free from increased traffic pollution.

Particular attention to the widths of the pavements along the Ockham Road North and South needs to be considered: narrow pavements with a heavy increase in vehicle numbers both commercial and private vehicles poses an increase in potential to traffic accidents and risk to pedestrians. Air quality will undoubtedly be effected negatively too.

Increase in the requirement for doctors surgeries, dentists etc would not be covered by current local infrastructure, and realistically there would be an extended period of potential years of chaos whilst a 'catch up' plan is implemented.

Page 651 of 1920
I strongly object to the Guildford Local Plan 2016. As a fairly new resident to Chilworth, I was incredibly upset to learn that it was planned that Chilworth plus the other surrounding villages such as Shalford should be removed from the Green Belt, for this is the very reason we decided to move here. The area needs to be protected from over-development. As it is, Chilworth and Shalford have quite a lot of traffic going through it and we certainly do not need more. Extra developments would lead to a change in the infrastructure (roads etc.) which would spoil the area completely. Guildford’s surrounding villages are a huge asset and attracts many tourists and visitors and must be protected at all costs. I would urge you to reconsider the new local plan and keep the area protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including
I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows),
Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to totally OBJECT to the continued inclusion of the former Wisley airfield now known as Three farms meadows as a strategic site in the local plan. I object to the total destruction of the historic village of Ockham where I have lived my whole life. The station, small lanes, schools, doctors surgeries and general layout of Ockham is not suitable in the slightest for this massive encroachment on the green belt, they are already at maximum capacity. It would ruin every part of living in Ockham and the beautiful countryside surrounding it which we should preserve for future generations. This would be the greatest disruption to the green belt in the entire country and this is why I completely object to over 2000 houses being built in my village.

To summarise I once again want this development out of the local plan and totally object to the continued inclusion of the former Wisley airfield now known as Three Farms Meadows as a strategic site in the local plan.

Please take my reasons into consideration and understand what massive destruction this would cause to not only the people that live in Ockham but all the surrounding villages.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I would like to object to GBC’s Proposed Submission Local Plan unreservedly. As a local resident I have objected to all
the proposals the GBC has put forward along with thousands of others in our area. It really is appalling that our objections
have been completely ignored and the Local Plan has failed in the number of key areas to take into account or to answer our
valid comments and criticisms submitted by thousands of residents and organisations in respect of the previous 2013 Draft
Local Plan. What is the point of us all objecting whole-heartedly if we are just ignored. I have to say that in my opinion it
raises questions about your governance and vested interests.

The meeting on 8th April regarding The Wisley Property Investments Ltd (WPIL) planning application of January 2015
(Ref: 15/P/00012) was unanimously rejected by GBC following the recommendation of the GBC Planning Officers.

The reasons for the refusal of the application were many but included that the proposed development:

(a) was an inappropriate development within the Green Belt;

(b) would have a clear and substantial detrimental impact on the openness of the Green Belt and conflict with the purposes
of including land within the Green Belt;

(c) failed to demonstrate that the benefits amounted to very special circumstances such as to clearly outweigh the harm to
the Green Belt and the other harm identified;

(d) failed to comply with the objectives of policy RE2 of the Guildford Borough Local Plan 2003 (as saved by CLG
Direction dated 24/09/2007) and chapter 9 of the National Planning Policy Framework;

(e) was within the 0 -400m and the 400m to 5km zones of the Thames Basin Heaths Special Protection Area, etc.

(f) would have a severe adverse impact on the safe and efficient operation of the strategic road network, and a severe
impact on the efficient operation of the local road network;

(g) failed to deliver the required transport sustainability measures;

(h) failed to secure an appropriate provision of affordable housing;

(i) was detrimental to the viability and vitality of the existing district and local centres in the vicinity of the site;

(j) would result in loss of the safeguarded waste site;

(k) presented a dense and urban form of development owing to its quantum and scale;

(l) had an adverse impact on the setting and significance of a designated heritage asset;

(m) had an unacceptable air quality impact;

(n) impacted on education infrastructure;

(o) impacted on policing infrastructure;

(p) impacted on health infrastructure;

I object very strongly to the submission of the local plan, on the above reasons, specifically for The Three Farm Meadows
(the former Wisley Airfield).

Answer (if comment is on questions 1-7 of the questionnaire): ()

Council draft Local Plan Site Allocation A35 Former Wisely Airfield

We wish to object to proposed development for the following reasons:-

1. The removal of the site from the green belt.
   1. No exceptional reasons are given for the action in 1. above.
   2. Generous amounts of brownfield land is available in urban areas.
   3. The nearby villages of Effingham, Ripley, Ockham and the Horsleys will be severely affected.

5. Ockham with only 159 residences will be completely overwhelmed by 2000 dwellings up to 5 stories high.

6. Hatchford with 60 dwellings off Ockham lane would be severely affected. 2000 additional dwellings with -overtime- say 4000 cars will have very significant effects on local and main roads including safety. The A3 is often blocked by cars queueing to exit onto the M25 causing tailbacks and some “shunts”.

8. At present the roads through and around Cobham are often blocked at peak times.
   1. There is very little provision of cycling and footpaths and the increased traffic would make these activities extremely dangerous.
   2. The local rail stations could not cope with large increases in traffic and of course the car parking facilities are already over capacity/ 11. Air quality is of vital importance and due to the existing traffic and the number of planes this is vital and has not been given proper consideration.
   3. Insufficient consideration is given to the existence of SPA, SSSI, and SNCI sites.

13. This development was unanimously rejected by the Planning Committee on 8th April 2006 and this should be repeated for the new application.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I have grown up in Horsley and strongly object to the new plans for increasing the number of housing to the area and removing us from the green belt. The green belt was put in place to protect rural areas from development so I find it bizarre that such intensive urbanisation is being purposed in an area that has previously been categorised as an region worth conserving. The roads are already overcrowded and, at peak times, fail to cope with the volume of traffic and size of larger vehicles. This issue will be magnified if these plans go through. Doctors surgeries and schools are already struggling with numbers.

Moreover, many people from the city move out to places, such as Horsley, to escape from busy city life and enjoy the picturesque surroundings found in the Green belt. Not only is it a stunning location for city workers to set up a family life, but Surrey's countryside is often used as day trips for Londoners. Small villages such as Shere, which receive many tourists due to its classic English village feel, will no longer possess their traditional charm but be transformed into heavily developed and overcrowded centres; no longer appealing to tourists. We don't want London to end up like cities in America, such as LA, which expand over huge areas with no clear center and boundaries.

I don't want to see this beautiful area be ruined so strongly object to these new plans.

I wish to Object to the insetting of Shalford as mentioned in the Guildford Plan 2016.

I live in an area of outstanding natural beauty and wish it to stay this way. The plan has not properly been thought out and the roads that are suggested to be used for more traffic are not appropriate for use, and will increase CO2 pollution in the local areas suggested.

Please rethink your planning with a more environmentally sound concept. Plenty of homes are not occupied in the local area, why not work to use what already exists rather than create more housing monstrosities in a beautiful area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to you to express my views and concerns regarding your plans for building development in East and West Horsley.

Having been born and living in West Horsley for 48 years, I have noticed many changes over the years in regards to a lack of smaller housing and infrastructure.

Though I believe there is a need for housing, I also believe your quantities of houses and time scales are far too brutal (ie: an increase of 35% I believe) for the current infrastructure ie: Shops, Roads, schools, doctors appointments, parking etc.

I think a more prudent approach to new houses and building timescales will allow problematic local issues to arise in a more controllably fashion, and therefore will be resolved more easily.

Which in turn will be less traumatic for current residents and future one

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the Inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9].

My objections are:

1) disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]

2) directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas

3) ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]

4) adds to air pollution in neighbouring areas, which already exceeds safe EU limits for Nitrous Oxide [Policy A26].

5) The proposed link road from the A31 to the new sire passes through historic & AONB land, this traffic route seems unviable.
6) The housing need seems un substantiated. A review of the Strategic Housing Market Assessment commissioned by Guildford Residents Association has identified a flaw in the way that the housing need figure has been calculated, this needs to be reviewed prior to any sites being allocated.

Furthermore I wish to object to the removal of SRN6 offering a safe access to Beechcroft Drive, currently studies show this as a dangerous junction and offering no resolution to the residents in the local plan is unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The greenbelt should be protected for our children’s sake. There are plenty of smaller alternatives for housing, so let’s exhaust them first and deal with our traffic issues at the same time. Large estates on the edge of town are not the answer. If we really have to do so then please give the small builder and self-builder a chance and sell of the plots not hand over large developments to the greed of a few. I expect the borough council prefer it but the generic housing that we put up with is unsightly, dull, unimaginative and out balances profit over architectural innovation and inspiration.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Please hear my objection to the local town plan. I feel Surrey University is not playing it part in the community and putting pressure on housing. They failed to deliver the student housing that they promised back in 2003 and in recent times the students have been feeling the negative effects of this. It’s not good looking back at the estate that I grew up on and seeing it almost lost to student housing. As for the town centre there are plenty of brown field sites being ignored in favour of retail property. Do we need 40% more shops, when more and more of us are turning to the online shop?

Answer (if comment is on questions 1-7 of the questionnaire): ()

It is wrong to build on green belt land, destroying the countryside and natural habitats which are home to endangered wildlife.

It is wrong to take the population density of the area to the proposed level, which is higher than the majority of London boroughs. Five storey developments do not suit the area, and besides, the area does not have the infrastructure to support such a high density of residents.

The development will overcrowd the area and I object to this. The development will make traffic and parking in the local area even more treacherous. As a competitive cyclist myself, I would mock the planning team’s idea that there would be an useful/positive increase in cycling. The majority of local routes are long, windy country lanes with very little cycling safety – plenty of blind spots and no cycle lanes, putting cyclists lives at risk. The increased traffic (estimated 4,000+ cars) from the new homes would make the cycle routes even more dangerous. The routes are hardly efficient for commuting!

I believe the development will take pollution to dangerous levels that could worsen the health of local residents. Air pollution in the development area already exceeds levels recommended by the EU and this should be taken seriously.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/5658  Respondent: 15569217 / Stephen Mahon  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

DOBJECTION TO GUILDFORD BOROUGH COUNCIL DRAFT LOCAL PLAN (JUNE 2016) AND TO THE INCLUSION IN THE PLAN OF SITE ALLOCATION A35 – THE FORMER WISLEY AIRFIELD – FOR A NEW SETTLEMENT WITH 2,000 DWELLINGS

I write to express my objection to the removal of the former Wisley Airfield from the Green Belt.

The area serves a vital role in preventing urban sprawl and development would create an urban corridor stretching from London to Guildford. There are no exceptional circumstances established to warrant removing the site from the Metropolitan Green Belt. There is ample brown field land in urban areas which needs to be regenerated without the need to encroach on protected Green Belt land.

The local plan as drafted poses a threat to the historic rural settlements of Ockham, Hatchford and Downside.

The potential to create an additional 2,000 homes in close proximity would be disastrous for the general area and Cobham.
The traffic congestion would be horrendous and the infrastructure simply will not cope with such a large development. The shopping and rail facilities at Cobham are already saturated.

We are supposed to have a Green Agenda but this cannot be the case when developments of this type are under consideration. Not only would air quality be severely impaired but the area is a haven for wildlife with protected species on and near the site.

Objections are supported by the unanimous rejection of Application No 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of the Planning Officers.

On this basis, I cannot comprehend why the former Wisley Airfield should be removed from the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed housing planning and number of houses in the Horsley area.

This is totally unacceptable, far too many as the infrastructure cannot cope. I worry this is a proposal to get through some houses which I would also object to, as we cannot cope with anymore houses in the area.

So please I do not wish any houses to be built at all.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I write to object to the current Local Plan proposals and endorse the Guildford Residents Association rejection of expanding housing in Guildford so dramatically. There is no realistic justification for such an increase in housing for the people currently dwelling in Guildford.

In the last 30 years of living in Guildford, I have seen the continual approval of piecemeal speculative developments of ever increasing. In that time no serious strategic plan to improve the local infrastructure has been made to cope. Therefore the traffic congestion, and associated dangerous pollution, has steadily eroded the quality of living in the town. To embark on a further massive expansion in housing with no improvement to the A3, no solution to the new north-south route through Guildford, and no additional crossing of the river Wey in the town centre, is irresponsible. We are still (just) proud of our town but are already living with the chronic failure of the Planning Department to actually plan ahead. This draft Local Plan must be radically improved and any substantial new development made conditional upon prior infrastructure improvements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2694  Respondent: 15569345 / Alexander Alexiou  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to building 45 houses at Clockbarn Nursery. This is a ridiculous idea. Tannery lane is a narrow and bendy road joining Send Road at a very difficult and potentially dangerous junction. The traffic in Send is already heavily congested and further traffic emerging from Tannery Lane will only make this worse. Traffic improvements at the junction will not help, as the congestion is the result of bottlenecks at both the Burnt Common and Old Woking roundabouts. The future traffic has already been exacerbated by planning permission for 64 apartments and a marina further down Tannery Lane.

Local councillors and central government gave a clear election promise to protect the Green Belt. The current proposals renge on those promises.

1. I object to Send being removed from the Green Belt. The Green Belt was established as a permanent feature required by the National Planning Policy Framework and not something that can be taken away under pressure from property developers, unjustified government targets or a Borough Council who prefers to develop in the areas that they believe will give them the least resistance.

There are no special circumstances to justify Send losing its Green Belt status and as a buffer to separate Guildford from Woking it is essential that its Green Belt status be retained.

Local councillors and central government gave a clear election promise to protect the Green Belt. The current proposals renge on those promises.

1. I object to building 400 houses and 7000m^2 of industrial space at Garlick’s Arch. Ancient woodland! Subject to flooding! Plenty of brownfield sites already available in the borough! Slyfield is already the industrial centre of Guildford Borough so why create another one especially as there is an over supply of industrial space in the area at the moment and for the foreseeable future. In addition, Guildford’s housing plan requirements have been shown to be grossly exaggerated and when challenged, the council refuses to release their calculations.

1. I object to the development of 40 houses and 2 travellers’ pitches at Send Hill. Another ridiculous idea. As with the Clockbarn proposal, the affect of the additional traffic on the already congested Send Road will be
significant and unacceptable. Send Hill is also a narrow residential lane and will be badly affected by the additional traffic.

1. **I object to a new interchange with the A3 at Burnt Common.** I have already described how Send Road is heavily congested especially at peak times. By creating a new interchange at Burnt Common this will choke Send Road and the Village with additional traffic to and from Woking. Not only will this become the new rat run into Woking from the A3 and the M25 but will also have to contend with additional traffic from the proposed 2000 houses at Wisley, 2000 houses at Gosden Hill and 1850 houses at Blackwell farm. This on a road that is already heavily congested.

I urge you to reconsider before inflicting irreversible damage to our communities - because that is exactly what you will be doing.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The need for Infrastructure

Even with a much smaller percentage increase in housing major issues need to be incorporated into the plan; underinvested public transport, gridlock at certain points at peak times, crumbling roads (without heavy construction lorries thundering down them), schools at capacity, struggling medical services, and even simple things like needing to add footpaths (for which there is no space) or to add crossings that are currently not needed. The plan does not seem sustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to raise my objections to 2016 Guildford Borough Council's Draft Local Plan. My husband and I regularly visit East Horsley, where my son, his wife and young family live.

I go there weekly to look after two grandchildren. So not only do I know about the village they live in, but also the surrounding area which I love for its gorgeous, green countryside and quiet villages. This area is not only a true escape from the urban sprawl of London, but even from what you might perceive as the relative quiet suburbs of Camberley. Even if I don’t live there, changes will have a negative impact on me.

My main points of opposition to the Plan are:

Disregarding the Green Belt

The Surrey Hills areas of outstanding natural beauty must continue to be protected. It is too close to London to allow small chunks to be eaten away.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Impact on the community

The pressure for housing is obvious throughout the South East. With seemingly no national strategy, in an expensive area like Guildford will probably go the same way as an expensive area, like mine, in Camberley. There will be unrelenting demand from relatively well-off buyers from London. The housing density will increase. Absolute limits are needed to stop the villages turning into suburbia. The plan simply does not respect the character of the area.

The planned increase in housing in the villages seems out of balance when compared to larger towns and even urban London. The plan will wither away village life.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will cause to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCl).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the proposals for Blackwell farm development (policy no A26) and the proposal to build a road from the A31 to the Tesco roundabout.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to protest against the development on our green belt areas.

These are areas which prevent this small island from becoming one big concrete block, yes we do need to house people, however this cannot be done at the detrimental effect of destroying our countryside which is how the proposal intended will cause.

The overloaded services cannot sustain any more therefore more consideration needs to be taken to keep the area around London green. Affordable housing needs to be spread away from London to ensure other cities proper rather than placing a concentration to an already overload Capital.

Please think before making this monumental decision as there is no going back once it has been taken. Please don’t destroy our countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy A15 - Land at Guildford Cathedral

This site is currently designated as protected open space. We write to object to the proposed redesignation of this site as C3 Housing for the following reasons.

1. This site is an important open green space, which benefits local residents in an area of Guildford which has few open green spaces for public enjoyment. In recent years, central Guildford has seen considerable development and it is more important than ever to protect our existing green spaces - especially in light of proposals to develop the neighbouring Guildford Park car park and station areas.

1. This site is the setting for the Cathedral, a Grade II Listed Building, which is an important Guildford landmark and which enjoys an elevated position visible from many other parts of Guildford. Development of this site for residential use will potentially obscure this listed building and impair views of the Cathedral from elsewhere in Guildford.

1. This site is not suitable for development for residential uses. It has a history of drainage and subsidence problems and would require extensive deep piling to accommodate 100 new homes. This in turn would have repercussions for existing homes in neighbouring roads (Ridgemount, Alresford Road, Scholars Walk etc) and would impact on the flooding problems that have been experienced in this area in recent years.

1. A development of up to 100 new homes on this site is disproportionate to the existing neighbourhood. Although we recognise that 100 homes is a reduction from the 175 homes specified in last year’s draft local plan, it is still an overpowering number of new homes in comparison with existing housing on neighbouring roads (Ridgemount, Alresford, Scholars Walk etc). Ridgemount and Alresford Road are minor roads with pedestrian pathways down only one side of the road. The additional traffic generated by 100 new homes would completely change the nature of these peaceful roads and would exacerbate the existing congestion problems on Madrid Road, Guildford Park Road and into Guildford Town centre. Further, it would put considerable additional pressure on the local infrastructure and amenities, such as schools, doctors surgeries etc.

In conclusion, we ask that this site should remain designated as protected open space and that the proposal to redesignate this site as C3 Housing be reconsidered and withdrawn.

I am writing to raise objections to the proposals set out in the above document. In particular, the proposals for sites A41 and A38 in the 'Sites' section of the Plan, appear to be at odds with Policy P2 (p42) and with the Council's obligations to retain local distinctiveness and to conserve and enhance the natural environment (as set out in the National Planning Policy Framework NPPF).

Site A41 is an area of sheep-grazed pasture adjoining an area of ancient semi-natural woodland to the east and south. The area is very clearly an integral part of the green belt landscape of sheep and cattle grazed pasture, with blocks of deciduous woodland, which forms a coherent landscape that stretches to the North Downs AONB. Policy P2 (p42) of the Plan allows for limited infilling, but the proposals for site A41 aren't infilling anything other than the landscape of woodland and pasture.

In addition, the ancient semi-natural woodland which adjoins A41 is listed on Natural England's priority habitat inventory, which shows the locations of habitats of principal importance (which can be viewed here: Magic Map Application). The site is already in poor condition due to illegal construction of cycle tracks and jumps, which is denuding the characteristic flora of ancient woodland. All public bodies have a duty to conserve habitats of principal importance under the Natural Environment and Rural Communities Act. The Plan does not articulate how the Council intends to discharge this duty. In fact the Plan does not even register the nature conservation interest of the site.

Site A41 suffers from similar issues. Whilst an argument could be constructed that the southern part of the site might constitute limited in-filling, the northern part of the site clearly extends the village boundaries and intrudes once more into the blocks of woodland and pasture that make up the characteristic green belt landscape.

As the largest proposed development in the West Horsley area (135 homes), the site seems completely out of proportion to the surrounding village. Longreach is a tiny lane, and the area has a rural character. Construction of 125 house would appear to be at odds with Policy D1 as set out in the plan. D1 states that all new developments will:

1. be designed to facilitate and promote walking, providing a high quality environment for pedestrians, and where possible allowing short walking distances to amenities
2. promote and reinforce local distinctiveness to create a sense of place, with innovative architecture encouraged and supported in the appropriate context

Site A41 will simply create more journeys. It is too far to walk to the shops or to the station. In addition, the area is locally distinctive because it is rural. 125 house will change the character - the site will lose its distinctiveness.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to express strong disapproval of the plans to remove West and East Horsley villages from the Green Belt and to build 485 new homes here.

We moved to West Horsley 6 years ago, as we were looking for a semi-rural location in which to bring up our young family, with all the benefits of low traffic, outdoor amenities and countryside, a small village school and a village community feel. The Horsley's are characterised by varied housing and buildings of historic value, with small green pockets of land in between, including ancient woodland and pastures. Green spaces are never far away. Under the current proposals, this would be irrevocably lost.

In addition, I do not believe that the infrastructure - the roads, drainage, schools, shops, parking, GPs, existing amenity areas - could cope with a 35% increase in housing over 5 years. The huge increase in the numbers of cars would destroy the quiet feel of the village and make travelling around and through the village very difficult and time consuming.

I accept the need for some more housing locally, but this needs to be in keeping with its Green Belt location and the size and character of the village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H2 - Affordable Homes

I object that developers can be released from their obligation to provide affordable homes (clause 4.2.40).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLP16/11239  Respondent: 15570145 / Owen Eszeki  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H3 - Rural Exception Homes

I am in favour of Rural Exception Homes to provide homes for local people who cannot afford 'affordable' homes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLP16/11290  Respondent: 15570145 / Owen Eszeki  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy ID1 - Infrastructure and Delivery

I object to any development without the necessary infrastructure being put in place prior to development. I object to developments not providing their planned infrastructure, i.e. schools, health centres, prior to the first properties being sold.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11292  Respondent: 15570145 / Owen Eszeki  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy 12 - Supporting the Dept of Transport's Road Investment Strategy

I object to this policy only relating to the strategic road network, the A3/M25, without ensuring any development includes the necessary road infrastructure being implemented.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11294  Respondent: 15570145 / Owen Eszeki  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy 13 - Sustainable Transport for New Developments

I strongly object to any development being built that does not have existing sustainable transport. Blackwell Farm, Wisley Airfield, Gosden Hill and Garlicks Arch do not have such facilities. The former Wisley Airfield is absolutely isolated and can only be accessed by car and even if a bus service is provided, few will carry shopping, etc., by bus. Blackwell Farm and Gosden Hill are in the same situation and none are accessible by foot. New developments should take place alongside existing sustainable transport facilities. The Merrow Golf Club, proposed for housing, is adjacent to a Park and Ride, that is an example of sustainable transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| Document: | Proposed Submission Local Plan: strategy and sites 2016 / Policy P2 |
| Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( ) |
| Answer (if comment is on questions 1-7 of the questionnaire): () |
Policy P2 - Green Belt

I strongly object to GBC considering building new developments of 2,000 houses in Green Belt. I object to Gosden Hill, Blackwell Farm and the former Wisley Airfield becoming new towns 'dumped' in the Green Belt for reasons of economy and convenience. I particularly object to the former Wisley Airfield being considered for a new town as this is slap bang in the middle of a green belt area and totally unsustainable as accepted by the recent Planning Committee who recently unanimously rejected a planning application on various NPPF grounds.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11246  Respondent: 15570145 / Owen Eszeki  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P3 - Countryside

I believe brownfield sites in all areas, including AONB, should be utilised and all areas should provide some affordable and Rural Exception Homes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11248  Respondent: 15570145 / Owen Eszeki  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P4 - Flood Risk and Water Source Protection Zones

All development sites must have consideration to flood risk, not just on the development, but the affects on the surrounding areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPP16/11234  Respondent: 15570145 / Owen Eszeki  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S1 - Presumption in Favour of Sustainable Development

I object to GBC not using sustainable brownfield sites in Guildford town and all the villages in the borough, but wish to use Greenbelt sites to create new towns of approx. 2,000 houses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11235  Respondent: 15570145 / Owen Eszeki  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2 - Borough Wide Strategy

I object to GBC using SHMA housing figure which are almost double those of Woking and Waverly

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11279  Respondent: 15570209 / Emily Cross  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
**Policy D1 - Making Better Places**

I object to GBC not listening to their residents, who know better than GBC, what is needed to make their areas better places.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/11281  **Respondent:** 15570209 / Emily Cross  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy D2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Policy D2 - Sustainable Design, Construction and Energy**

I agree that all new developments, whatever the size, should conform to the above.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Comment ID:** PSLPP16/11283  **Respondent:** 15570209 / Emily Cross  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Policy D3 - Historic Environment**

I object to GBC not respecting the historic environment of the rural villages when considering inappropriate large developments. These areas need protecting, not destroying due to the effects of increased traffic, parking problems, etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Comment ID:** PSLPP16/11284  **Respondent:** 15570209 / Emily Cross  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy D4
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy D4 - Development in Urban Areas and Inset Villages

I do not object if policies H2 and H3 are implemented and all H2 developments are implemented without developers using clause 4.2.40 to escape their responsibilities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11255  Respondent: 15570209 / Emily Cross  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E1 - Meeting Employment Needs

Permitted development allows commercial properties to be converted to residential use, but at a loss of employment opportunities. I object to development of brownfield sites without some commercial activity being included, proportionate to the size of development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11257  Respondent: 15570209 / Emily Cross  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
**Policy E2** - Location for New Employment Floorspace

I object to excessive development anywhere in the borough when brownfield sites area available.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/11260  Respondent: 15570209 / Emily Cross  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

**Policy E3** - Maintaining Employment Capacity and Improving Employment Floorspace

I object to permitted development as this is decreasing employment opportunities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/11263  Respondent: 15570209 / Emily Cross  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

**Policy E4** - Surrey Research Park

I support the Research Park and its specialism, but I object to the current need to expand. Utilise the land hungry current ground level parking for Research Park employment development and build shared multi-storey or underground parking. Ensure all new Research Park development includes underground car parking, as in other countries.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/11266  Respondent: 15570209 / Emily Cross  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5
Policy E5 - Rural Economy

I object to increasing the rural economy to provide for large, unsustainable, dormitory towns, i.e. Gosden Hill, former Wisley Airfield, Blackwell Farm.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Policy E6 - Leisure and Visitor Experience

The area is already recognised as a tourist area and should be encouraged.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Policy E7 - Guildford Town Centre

I object that GBC do not accept the town centre as the perfect place for sustainable development. Internet shopping has changed the retail landscape so only limited new shops are required. Guildford will have ample opportunity to provide sustainable homes over the Local Plan period.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/11274  Respondent: 15570209 / Emily Cross  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E7 - Guildford Town Centre

I object that GBC do not accept the town centre as the perfect place for sustainable development. Internet shopping has changed the retail landscape so only limited new shops are required. Guildford will have ample opportunity to provide sustainable homes over the Local Plan period.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/11275  Respondent: 15570209 / Emily Cross  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E8

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E8 - District Centres

I object to rural villages becoming District Centres when they are already viable and sustainable local centres. District Centres are preparing the infrastructure for large development and ignore the wishes of residents in those local centres.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed Infrastructure Schedule (Appendix C)

There is no schedule for Garlicks Arch (A43); the plan takes no account of the infrastructure required for this site and therefore it is not fit for purpose

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to object very strongly to the plans put forward for the Horsleys and most of all to the development of the former Wisley Air Field.

The infrastructure is totally inadequate for the number of units planned. The local schools and medical facilities are already overloaded and of course there would be added strain on Guildford Royal Surrey with extra houses in this area and all the other area's within the Guildford boundaries.

The roads are not of the necessary size or structure to take the additional traffic, at times they are unable to cope already especially around school start and finish times.
There are many brown sites that should be developed without intruding on the Green Belt. It cannot be right to double the size of this area which is totally unsuitable for this size of development.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
• It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or
other constraints. The plan says that “allocating these sites does not grant planning permission for
development.” However, each of the sites will be removed from the Green Belt and will be available in principle
for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification
shows contempt for the thousands of detailed comments the Council have received about individual sites ever
since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received
20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the
consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was
produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the
previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to
consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false
premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing
number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to
constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations
all represented constraints which should have been taken into account in determining the final housing number.
Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe
constraints should have been applied. Secondly I believe the Council did not properly consider constraints and
that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt
sites should not be included in the plan unless “exceptional circumstances” for development are proven in
relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term
considerations such as perceived housing need, as case law has established. There needs to be a specific
balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very
special circumstances which are argued in favour of development at that particular site. There is no evidence this
has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it
cannot be met without building on Green Belt then there is no need for any further consideration and any
convenient Green Belt site can be allocated for building at will.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 – 2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highecotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays

  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25 J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.
The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.
Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.
The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: PSLPP16/15292  Respondent: 15570817 / Tom Edelsten  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

---
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15301  Respondent: 15570817 / Tom Edelsten  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15351  Respondent: 15570817 / Tom Edelsten  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Attached documents:

Comment ID: PSLPP16/15326  Respondent: 15570817 / Tom Edelsten  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University,
which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve
the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students
were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s
Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or
other university sites. The plan should take account of the university's ability to house its own students and reduce the
housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is
inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and
explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk
and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The
price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of
unviability arguments only serves to inflate land values. It will become clear that developments are unviable when
developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location
close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount
of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now
having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the
original owner simply pocketing the profit.

<tbody>
<tr>
<td><strong>Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )</strong></td>
</tr>
<tr>
<td><strong>Answer (if comment is on questions 1-7 of the questionnaire): ()</strong></td>
</tr>
<tr>
<td>I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.</td>
</tr>
<tr>
<td>The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”</td>
</tr>
<tr>
<td>The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.</td>
</tr>
<tr>
<td>The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.</td>
</tr>
<tr>
<td>The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.</td>
</tr>
<tr>
<td>The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)</td>
</tr>
<tr>
<td>The policy wording should be restricted to adjoining sites or define the concept of being &quot;closely related&quot;. In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)</td>
</tr>
<tr>
<td>The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.</td>
</tr>
<tr>
<td>The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.</td>

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure
will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have
considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Re: Responses to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to the Plan.

I frequently visit my daughter and son-in-law who live off The Street. Every week this entails many trips to neighbouring villages with small children in the car. The current density of road traffic along The Street makes joining and leaving it on a blind corner a hazardous action; it’s feels as though it’s only a matter of time when, not if, there will be an accident. The children’s ages are 2 and 4; we are confronted with lorries, high-speed bikes and hastening commuters on a daily basis. The only time it feels safe to join the road is when there is one of the rush hour jams.

This is the present situation in a rural village. The consequences of a huge boost in the local population doesn’t bear thinking about.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

There is already considerable concern in the village because of the narrow road running through it. At the particular point where we are, opposite the Church, there is already a bottleneck which it is impossible to change – listed buildings of historic interest etc. At several points in the village, there are tight corners, which cannot be changed because of constriction by buildings, walled gardens, listed features etc.

This isn’t even the narrowest point.

I am by now very familiar with the road through the village and am already concerned about how much traffic “cuts through”; given the lack of facility for expansion, this can only become worse. The plan would seem to be complete madness.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.
This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the
flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.
The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. The road (A247) through West Clandon is particularly hazardous as, in a number of places, two large vehicles are unable to pass in opposite directions without mounting the pavement. Further vehicle movements will result in even more acute congestion, greater pollution and an increased risk of fatal accidents. Residents and the environment will suffer as a result.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.
The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.
It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (e.g., from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together.
with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.
The draft Plan should be reassessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. 1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green. Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4366  Respondent: 15570817 / Tom Edelsten  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

GEF also highlight that there is no objectively assessed need for housing yet established, since the figure used is based on a Strategic Housing Market Assessment that is not transparent in its methodology. Whilst the document has been produced externally to the Council, apparently by established practitioners in the field, and claims to have produced a measure of the “objectively assessed needs” the methodology used by them is (still) being claimed to be confidential. This is outrageous, and demonstrably undemocratic as it denies the public the means by which to assess the veracity of the conclusions therein.

Answer (if comment is on questions 1-7 of the questionnaire): ()

There are some good aspects of the Proposed Submission Local Plan: strategy and sites 2016 but it is deeply flawed in critical areas, as identified by the Guildford Environmental forum of which I am a member. However, I write to you in a personal capacity as a concerned resident of the village of Chilworth and as an academic who works on the social and environmental impacts of encroachments on green spaces from extractive industry developments (which we already have now in Albury village) to inappropriate housing developments which in affectively privatise green spaces, public spaces, common land and green belt rural areas often for the gain of property ‘developers’ – this is compounded by the frequent rhetorical spin of providing for the ‘housing needs of the poor’.

In a society dominated by private property and private capital, where landlords are permitted to allow dwellings to sit unoccupied and where local councils’ first recourse is often to develop green spaces rather than brownfield sites or vacant sites previously run by commercial activities, the last thing our local borough needs is encroachment on that which makes it
special and valuable. The Surrey Hills are an AONB with good reason, they are a beautiful biodiverse area which must be protected from development that will add yet more environmental degradation and CO2 emissions to our already endangered ecosystems and atmosphere. Let’s be clear; ALL development will do this despite the rhetoric of ‘sustainable development’. The villages of Shalford and Chilworth should not be taken out of the Green Belt. They provide vital ecological and social services, as Green Belt land, dimensions which would be ruined by further development of any kind.

The Proposed local plan is unsound as it fails to recognise the constraints placed on ‘the objectively assessed needs for housing’ by the Green Belt. It is quite clear in the government guidance on the NPPF that objectively assessed needs are constrained by designations such as the Green Belt. As GEF point out:

“The Framework is clear that local planning authorities should, through their Local Plans, meet objectively assessed needs unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the Framework taken as a whole, or specific policies in the Framework indicate development should be restricted. Such policies include those relating to sites protected under the Birds and Habitats Directives, and/or designated as Sites of Special Scientific Interest; land designated as Green Belt ...”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The basis on which the council calculated the number of new homes across the whole borough that is required is highly questionable. They are massive mathematical doubts about the basis of the calculations, which in any case have not been released or discussed publicly. In addition the population increase forecasts used in the Plan are about 70% higher than the official national estimates for population growth. This would result in a 35% growth of existing West Horsley households, which is unsupportable, not necessary, and totally inequitable.

We find it very frustrating that after two years consultation, meetings, discussions, that the Borough Council has basically made no changes to its original inaccurate assumptions, or amended the flawed areas of the original plan in any whatsoever. Too much response seems to be driven by reacting to Building Developers' planning approaches rather than creating an overall modern Borough plan that will meet the needs of the residents, and allow well-planned and well-justified growth in the most appropriate areas. Brownfield in Guildford should also certainly not be ignored because it is supposedly 'more difficult and costly'.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write with reference to the above, being an update of the 2014 plan. Unfortunately the Borough has taken very little, if any, notice of the comments made and meetings held after the last plan.

The major points of concern that my wife and I share are as follows:

Why has East Horsley been selected for such a large number of proposed houses when there are still ample brownfield sites within Guildford itself to build upon - within an existing urban environment? The percentage increase in housing for Horsley is amongst the highest of the whole plan!

Why has the village of East Horsley and its proposed expanded boundary has been removed from the Green Belt? This will destroy the nature of the village, and it's infrastructure will be swamped. An incredibly short sighted approach!

No exceptional circumstances have been demonstrated by the council to justify this unacceptable step of removing the Horsley villages from the Green Belt. In addition, the proposed extension of the boundaries of the Settlement areas of the Horsleys have not been justified, they appear to be aimed solely at increasing the land available for future additional development, which only increases congestion and infrastructure pressure even more!

There is also a proposed changes in the designation of Station Parade into a "District Centre". This seems designed only to enable further future urban developments above the current excessive plans. No rationale for this has been expressed, and this move would obviously also add further congestion and pressure on infrastructure and the quality of life.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Added to this is the continued efforts of the Council to build over 2000 homes on Wisley airfield, which is under 2 miles away from our village. This, of course, would add amazing extra pressure on the infrastructure and facilities; particularly medical, schools, roads, station parking and lack of seats on commuter trains into London, all of which would be totally unable to absorb this!!

Answer (if comment is on questions 1-7 of the questionnaire): ()

The question of air-quality around the A3 has also been totally ignored. The existing situation in that the area around Wisley Airfield already breaks the maximum levels of pollution allowed by UK environmental laws. Adding the proposed numbers of houses on the airfield, plus the unrealistic increase in housing proposed for the Horsleys, will make this situation not only much worse, but exceedingly dangerous to many residents of supposedly rural country villages.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

• The “objectively assessed need” figure of 693 homes a year is too high.
• A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
• The current SHMA inflates the proposed housing figure due to
  ◦ failure to correct for errors in the historical data for international migration flows,
  ◦ issues with the way it considers students and affordability and
flaws in the method for estimating the number of homes needed to support job growth.

- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data
  - Clandon Cross Roads Area to Bulls Head - 17 incidents
  - Bulls Heads Head to Bennett Way - 8 incidents
  - Bennett Way to Highcotts Lane - 15 incidents
  - Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015
  - 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
    Surrey Fire and Rescue deployed.

2016
  - 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
  - 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
  - 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.
The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.
Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

I OBJECT to Policy D3 - Historic environment
I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will "enhance" heritage assets which I fear is a developer's charter as it leaves plenty of room for abuse.

16.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15353  Respondent: 15571201 / Zoe Dudgeon  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6
I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.
4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/15328  **Respondent:** 15571201 / Zoe Dudgeon  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University,
which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve
the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students
were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s
Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or
other university sites. The plan should take account of the university's ability to house its own students and reduce the
housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is
inappropriate given other constraints.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and
explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk
and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The
price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of
unviability arguments only serves to inflate land values. It will become clear that developments are unviable when
developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location
close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount
of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now
having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the
original owner simply pocketing the profit.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H3- Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the "mix" this can include "market" housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments. The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations were available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be "closely related". Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based...
on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 &
M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The
fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt.” This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.)

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.
There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. The road (A247) through West Clandon is particularly hazardous as, in a number of places, two large vehicles are unable to pass in opposite directions without mounting the pavement. Further vehicle movements will result in even more acute congestion, greater pollution and an increased risk of fatal accidents. Residents and the environment will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 houses being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is not justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

Page 768 of 1920
The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.
The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

<td></td>
<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford’s circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars

6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham

7. The Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2740  Respondent: 15571425 / Monika Neczaj  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix F: Policies overview map

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT SPECIFICALLY TO POLICIES: A36, A37, A38, A39, A40 & A41:

- Amount of new housing far exceeds local need.
- Housing density excessive when compared with existing development.
- Would transform the Horsleys into a sizable town, something for which no case is made.
- No local support.
• Collective impact of these 6 sites on a small part of the borough not considered. Should not just be treated as isolated, separate sites.
• Total amount of new building out of scale with the planned development elsewhere the borough, especially less sensitive urban areas not protected by Green Belt.
• Sites unsustainable. Key infrastructure lacking. No adequate provision is made to increase it – e.g. poor wastewater capacity, lack of schools, absence of traffic management plan, flooding. • No account taken of additional impact of Wisley Airfield site on Horsleys.
• Extension of settlement boundaries too permissive. Horsleys characterised by streets with development along only one side of the road. Policies allow too many adjacent green fields to be developed by squaring off boundaries and claiming they don’t contribute to Green Belt “openness”. 6
• Green Belt gap with neighbouring settlements hugely narrowed, especially if Wisley Airfield is built on. • Will harm compliance with NPPF 81 – e.g. by making cycling (including Prudential cycle races) too dangerous, ruining the rural setting of Waterloo Farm campsite, destroying the ambience of Grange Park Opera’s new “Theatre in the Woods”.
• Policy A40 especially unviable because of high water table and poor drainage, leading to regular winter flooding.
• Safe access and egress at Site A40 unachievable, owing to flooding, high speed limits, poor sight lines, narrow access to existing properties, inadequate pavements for elderly and schoolchildren, increasing use by recreational cyclists etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5711  Respondent: 15571425 / Monika Neczaj  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY(SITE) A35 (WISLEY AIRFIELD):

• Should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties.
• Irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application).
• Unacceptable Conservative Party links between the developers and the Council.
• No Green Belt “exceptional circumstances” presented.
• Not a brownfield site as stated – only 15% of it.
• Proposed SCC waste site ignored.
• Loss of farming land.
• Too near RHS Wisley and Thames Basin Heath SPA.
• SANG would harm on SPA.
• Will aggravate traffic jams at A3 roundabout and M25 Junction 10.
• Unacceptable increase in air pollution.
• No existing public transport and stations miles away.
• No proper traffic data.
• Housing density far too great.
• Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed buildings.
• Access confined to inadequate narrow lanes.
• Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole.
• Major impact on neighbouring villages, especially Horsleys.
• No assessment made of collective impact on area of this and 6 Horsley sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY D1 (BETTER PLACES):

• Poor monitoring.
• No force given to vernacular or historic design guidelines.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11459  Respondent: 15571425 / Monika Neczaj  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY D2 (SUSTAINABLE DESIGN ETC):

• Targets unachievable if Green Belt covered with amount of housing as proposed, causing traffic chaos, infrastructure failure and unacceptable levels of pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11461  Respondent: 15571425 / Monika Neczaj  Agent:
### Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY D3 (HISTORIC ENVIRONMENT):

- Supports overdevelopment: you can’t “enhance” history. Doesn’t ban private interests from trying to make aggressive profits from privatising, commercialising and Disneyfying public historic assets.
- Doesn’t ban development near historic assets.
- Ignores NPPF 126, 131, 132, 133.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

### Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY D4 (DEVELOPMENT IN URBAN AREAS AND INSET VILLAGES)

- No commitment to expand social housing or accommodation for people who can’t afford so-called affordable homes.
- Not enough new homes in urban areas, despite demand and need for urban regeneration and protection of Green Belt.
- Objectives for inset villages cancelled out by plans for excessive housing growth there.
- Too much emphasis on traditional shops, when a lot of this sector is in terminal decline.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

### Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT TO POLICY E1 (EMPLOYMENT):

- Poor evidence base.
- Too much encouragement to low added-value employment that’s needed elsewhere in the country.
- Fails to concentrate general business activity in urban areas or business parks that have the infrastructure.
- Fails to differentiate this from appropriate rural business.
- Too much encouragement of warehousing, for which Guildford is too congested.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/11447   Respondent: 15571425 / Monika Neczaj   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I OBJECT TO POLICY E3 (EMPLOYMENT CAPACITY AND FLOORSPACE):

- Puts unnecessary obstacles in the way of using brownfield land into useful residential housing, contrary to government policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/11448   Respondent: 15571425 / Monika Neczaj   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I OBJECT TO POLICY E4 (SURREY RESEARCH PARK):

- Subordinates public planning policy to the University of Surrey’s private, commercial enterprises (not its public academic purpose).
- No cost/benefit analysis of harm to Green Belt involved in extending research park.
- Waters down research purpose of park, turning into a general business park.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT TO POLICY E5 (RURAL ECONOMY):

- Incompatible with high housing numbers proposed for rural areas elsewhere in the plan.
- Insetting and settlement boundary extension endanger appropriate rural activities listed that depend on maintaining rural areas’ character.
- Town-centre uses for rural areas contradict government’s localism policy and need to consult and protect village environments.
- Established commitments to high-speed rural broadband and mobile coverage watered down despite 2014 consultation responses.

I OBJECT TO POLICY E6 (LEISURE AND VISITOR EXPERIENCE):

- Danger of overdevelopment: success doesn’t depend on building “attractions” which can harm heritage and rural settings. No case made for creating new ones.
- No policy of opposing reduction in rural hotel capacity.
- No definition of what added value interventions by Council can make to normal visitor market mechanisms.
- No policy of supporting Guildford countryside as its prime leisure and visitor asset, whose value rises as London gets bigger and busier.
- No vision of what the ideal visitor experience of the borough actually is and how to support its various elements.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY E7 (TOWN CENTRE):

- No statement in policy wording of value of Guildford’s rural setting and views.
- No consideration of Town Centre Master Plan, GVG proposals or station redevelopment plans.
- Proportion of new housing in town far too small. Development pushed into countryside, ruining the latter and harming urban regeneration
- No brownfield register.
- Too much big retail, despite online shopping revolution and decline of traditional high streets internationally.
- No measures to support small, niche retailers in town, e.g. through business rates.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

</table>
I OBJECT TO POLICY H2 (AFFORDABLE HOMES):

- Using the official definition of Affordable is a joke. Affordable homes round here are not affordable! Pushing for these homes just means pushing for more development.
- The viability clause lets developers off the hook of providing even these (non-) affordable homes. Too open to manipulation.
- Contradicts government policy to develop less advantaged regions of the UK. People don’t have to live and work in Guildford but should be encouraged to move to cheaper, less congested areas.
- This policy won’t affect market forces or house prices. Guildford is too small and too near London to influence these, however many homes it builds.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11438  Respondent: 15571425 / Monika Neczaj  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY H3 (RURAL EXCEPTION HOMES):

- It loosens the criteria by allowing “market housing” and development that changes the housing mix. Developers would be able to override NPPF 2 “exceptional circumstances” and other restrictions to build large houses in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11464  Respondent: 15571425 / Monika Neczaj  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT TO POLICY I1 (INFRASTRUCTURE & DELIVERY)

- Infrastructure considered here as an afterthought, rather than pre-condition of development. Should be a key issue for the rest of the plan.
- Excessive housebuilding in countryside not supported by any funding or provision for infrastructure.
- Heavy focus on building on greenfield sites inefficient and unnecessary: cheap for developers but much more expensive for the public who have to fund the infrastructure.
- Draft CIL scale discourages use of brownfield land first.
- No plan for organic increase in existing traffic congestion, let alone once thousands of houses are built across the countryside. Local roads hardly considered. Green Belt being eroded before road widening/improvement plans certain, encouraging over-development of greenfield sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11465  Respondent: 15571425 / Monika Neczaj  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY I2 (SUPPORTING DTP’S ROAD STRATEGY):

- Doesn’t allow for catastrophic increase in traffic resulting from spreading new housing estates across the borough. • Out of sync with DTP’s strategy: houses to be built and Green Belt destroyed before plans for A3 etc implemented. • Road plans too optimistic anyway, especially post-Brexit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11466  Respondent: 15571425 / Monika Neczaj  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT TO POLICY I3 (SUSTAINABLE TRANSPORT):

- Just a list of generic measures, not related to real life or the particularities of Guildford.
- Fails to treat sustainability as a constraint. Assumes excessive levels of development proposed in the plan can be supported by sustainable development.
- Unrealistic. Most people can’t or won’t walk or cycle – commuters in a hurry, the elderly, children, people who are unwell or unfit, people carrying heavy shopping or other goods. I.e. most residents!
- Town’s eye view of transport. Ignores scarcity of existing rural public transport and commercial unviability of increasing it. Ignores terrible state of Surrey’s roads, potholes, flooding etc. Ignores extra stress to be created by huge new housing estates in countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/11468  Respondent: 15571425 / Monika Neczaj  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I OBJECT TO POLICY I4 (GREEN & BLUE INFRASTRUCTURE):

- Policy cancelled out by huge developments across the countryside. No mention of opportunity costs of loss of Green Belt services and amenities (e.g. farming).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/11439  Respondent: 15571425 / Monika Neczaj  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I OBJECT TO POLICY P2 (GREEN BELT):

- No declaration of support for protecting the Guildford Green Belt, contrary to NPPF and government statements.
- No evaluation of value of local Green Belt as a public and private asset: it’s just treated as potential building land with a few inconvenient restrictions.
- Impact of Green Belt development on local agriculture ignored.
• Impact on rural leisure and tourism ignored.
• Impact on flood control ignored.
• Impact on carbon sink and knock-on effects for air pollution and climate change ignored.
• Impact on biodiversity ignored. • Impact on natural heritage ignored.
• Impact on water catchment ignored.
• Impact on room for public space amenities (parks, cemeteries, waste facilities etc) ignored.
• Impact on rural business (e.g. mineral mining, film making) ignored. • Impact on natural landmarks and views ignored.
• Harm to public health and wellbeing (physical, psychological) ignored.
• Allows excessive levels of development in breach of views expressed in last consultation and Conservative Party manifesto commitments at the last local elections.
• Has allowed ruling Councillors to argue that there is an acceptable percentage of Green Belt that should be sacrificed to development, when no such rule exists in the NPPF.
• Ignores alternative approaches, such as fair burden-sharing under which settlements would undertake to accommodate new development in proportion to their size.
• Disproportionate amount of development (most of it, in fact) to be in Green Belt. Too few new homes in urban areas where most people (especially the young and less privileged) want to live.
• “Insetting” of most villages disproportionate and unjustified in terms of their contribution under the NPPF to the purposes of the Green Belt. Based on flawed Green Belt and Countryside Study.
• Major settlement extensions allow indiscriminate housebuilding, as irregularly shaped villages are squared off to enclose green fields.
• Overall harm to Guildford Green Belt unjustified by any objective development need post-Brexit.
• Ignores most of NPPF 17 stipulations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11469   Respondent: 15571425 / Monika Neczaj   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

SITES I OBJECT TO ALL POLICIES INVOLVING BUILDING IN THE GREEN BELT:

• No “exceptional circumstances” shown, numbers excessive and the clearly expressed views of residents in previous consultations ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11441   Respondent: 15571425 / Monika Neczaj   Agent:

</table>
I OBJECT TO POLICY P5 (THAMES BASIN HEATH S.P.A.):

- Compensation mechanism too feeble to provide protection
- Cynical encouragement of SANG to justify nearby development in protected areas. Does not extend protection or amount of green space, and can damage them (e.g. dog and cat attacks on wildlife).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11431  Respondent: 15571425 / Monika Neczaj  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY S1 (SUSTAINABLE DEVELOPMENT):

- No definition given, no reference to its importance in the NPPF, no guidelines for applying it to planning.
- No statement of how economic, social and environmental impacts should be balanced.
- No mention of Green Belt, Guildford’s greatest legacy by far to Sustainable Development. No commitment to protecting it.
- No reference to most of the NPPF Core Planning Principles.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY S2 (BOROUGH-WIDE STRATEGY):

- Numbers based on growth and demographic data now invalidated by Brexit.
- No justification given for 13,860 housing figure. Council has failed to seek its disclosure.
- 13,860 figure confuses the OAN with a housing target. No definite housing target given, leaving too much scope for the Council to make one up.
- Figures based on a Housing Market Area that ignores 2 neighbouring districts (Rushmoor and Mole Valley) and is much too small, since most people commute or travel far outside the Area to shop or study.
- High numbers involved would transform character of the borough from mainly rural/Green Belt to urban, creating a corridor of development out of London as per Woking or Croydon.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

My objection is based on the following points:

1. **Greenbelt:** This area is protected Greenbelt land and there is not supposed to be any development taking place here. This land is protected and this is an undisputed fact. This should not be changed in any way just because an over-zealous development company are interested in making as much money as possible. A decision in favour of this development will be to the absolute detriment of the citizens that actually have to live with the consequences.

2. **Impact on Residents:** This will be a 100% increase in the number of homes in this area. The reason most of the current residents moved out here in the country is because we want to live in a rural setting. This development will destroy that and goes against everything the citizens of this area want. You will be hard pressed to find one local citizen who actually thinks this plan is a good idea. This proposal has been extremely stressful for residents and will continue to be until this draft is denied.

3. **Wildlife:** There are a number of protected wild animals currently living on the proposed area including deer, foxes, hedgehogs, pheasants, various birds including great spotted and green woodpeckers, adders, dormice, frogs and toads. The development will without a doubt destroy their ecosystems and drive them from the area or perhaps even kill them. We have a family of three deer living in the adjoining forest next to our house and this year the female gave birth to a fawn. We have really enjoyed seeing them in the fields and my daughter considers them part of her family as well. If this development were to happen, the most heart-breaking effect from this will be the detrimental impact this will have on the wildlife of this area.

1. **Traffic Issues:** The impact on traffic will cause major delays on Glaziers Lane and Westwood Lane. The infrastructure simply cannot cope with the huge volumes of cars from the extra houses that they want to build. No highway improvements can be made to help cope with this. We have unfortunately already had two motorist fatalities, as well as countless pets getting killed, on this road and this is not something that we want to have happen again. Glaziers Lane is a very narrow road and there’s no way it can be widened. Cars already travel at a high rate of speed down the lane anyway, so I cannot imagine the impact thousands of more homes will have on this lane. I am a mother of a young daughter and I’m already afraid to let her play in the front yard, due to the traffic on this road. Please do not allow this development company to jeopardize the safety of citizens in this area.

2. **Secondary school?** A secondary school appears to have been offered by the developers. But why? There is currently no existing demand or requirement for another secondary school in the area. The local secondary schools are currently undersubscribed. In previous local reviews, Surrey County Council disputed the need for another school. The developers have portrayed that they have a solid plan because they are offering a school, but a school is not even needed, so what is the point of this? There is no logic in this. Additionally, the area is subject to flooding so the playing fields of the schools will get flooded on a regular basis. There is a lack of safe...
transport links to the school for teenagers. Glaziers Lane and Westwood Lane don’t have adequate pavements and there are no safe cycling lanes connecting to nearby villages.

3. **Light pollution**: The development and lights will affect the views from Surrey Hills Area of Natural Beauty.

4. **Need?** With Brexit, migration will likely fall, so this will reduce the demand for housing. Brownfield sites should be built on first.

5. **Flooding and drainage**: The area is on flood plains and the current draining infrastructure cannot cope with the proposed extra houses. It is close proximity to the Thames Basin which has special protection. After perusing the developer Taylor-Wimpey’s social media page, I am not convinced that they will be able to cope with any drainage, flooding, or general construction issues. Please see below for screenshots of what has been posted by their very own customers on Taylor-Wimpey’s public social media page. This is only a small sampling of the complaints – please feel free to visit Taylor-Wimpey’s Facebook page, Trustpilot, and BBC Watchdog for the full impact of how this company operates. Please find some of the customer feedback below.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I was under the impression that the green belt only to be overturned in "exceptional circumstances". I feel that these exceptional circumstances need to be outlined clearly to the local community as I do not feel that this has been done. I also feel that the plan has not considered how the increase in population and traffic will affect the Sheepleas nature reserve and site of specific scientific interest. Should the proposed plan be accepted how would these concerns of mine be addressed?

Answer (if comment is on questions 1-7 of the questionnaire): ()

SITES A36-A41. Sites in East and West Horsley - I OBJECT

- Inclusion of Sites A36-41 (East and West Horsley). Whatever their merits as individual development sites, the 6 Horsley sites should not be considered individually but for their cumulative impact on the villages of East and West Horsley.
- Building 533 new houses on these 6 sites, plus at least another 90 on small sites, including those in designated conservation areas is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the borough. It will destroy the rural character of these communities in the green belt. There are no specific "exceptional circumstances" to warrant the inset of these villages.
- The total number of homes in West Horsley will increase by 35%, (urban Ash and Tongham 16% and Guildford urban area only 11%) which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town centre itself.
- These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. EXAMPLE - Thames Water have advised the Council that the current wastewater network will not cope and that the foul drainage system all the way to the treatment works North of Ripley will need to be upgraded.
- Surrey County Council have no plans to investigate the statement by Guildford Council’s Education Review which says “expansion options may need to be considered for primary” education in the Horsley area within the first 5 years of the plan.
- The Raleigh School is already full and proposing to moved to one of the identified sites - causing years of disruption in and around the villages.
- The private Glenesk and Cranmore schools are also at or near to full capacity.
- The harmful impact of these sites is magnified by the proximity of the so-called Wisley Airfield site (Three Farms Meadow), with over 2,000 new homes only 2 miles away (see below).
- The density of new housing on the 6 Horsley sites is inappropriate, being greater than anywhere in the locality at present.
- Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries for which the plan presents no arguments. Contrary to NPPF paragraph 79, this will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.
- Collectively, these 6 sites are at complete odds with NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been a success story in the Horsleys, with the creation of an
amenity wood and community garden, the purchase of adjacent fields (on the eastern side of Ockham Road North) by local residents in order to preserve their open aspect, well-maintained pitches for local football and cricket clubs, public tennis courts, open space for a high-quality campsite (at Waterloo Farm) used by many foreign tourists and the approval of plans for a “Theatre in the Woods” – making West Horsley the only village in Surrey with an opera house. By surrounding Waterloo Farm campsite with 120 new houses,

- Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable.
- Site A40 is subject to an unacceptable flood risk from a combination of a high groundwater table and the lack of surface water run-off. This is flat, clay land on the downhill side of the Horsleys where floodwater from new development will accumulate and back up onto existing properties nearby.
- Additional housing will add to several hazards along this stretch of road (site A40), including: Its use by pedestrians, especially children (using the Raleigh and Glenesk schools and catching school buses to Guildford and Howard of Effingham)
- Site A37 is in a conservation area already and recent planning permission for a much smaller development on the same site was unanimously rejected by the planning committee on several grounds. This should be removed immediately from the local plan for exactly these specific reasons.
