These roads were not built to support the weight of traffic they are now taking, let alone further dramatic increases. Drains in these roads have collapsed under the weight of traffic - indeed Clancy Dowcra confirmed to me the drains under the road outside my property have collapsed again during their site visit Monday 20/6/16. Both Glaziers Lane and Westwood Lane suffers from flooding and drainage issues, including site A46. It is fair to say substantial, ongoing costly remedial works to highways will be required to the immediate roads to support the extra 4000+ cars at peak time which will be hugely disruptive to the village and site.

Westwood Lane/ Glaziers Lane through Flexford Lane continues through Wanborough through an area of outstanding Natural Beauty to Wanborough Hill, where queuing traffic waits to exit onto Puttenham Hill/Puttenham Heath Rd to connect to the heavily congested A31 Hogs Back and A3 at Compton. At the other end it exits onto the A323 Guildford Road.

The secondary school will bring in around 2000 cars to these roads, trying to enter and exit within 30 minutes. This will result in long queues and absolute access and exit chaos at school run times. I have attached photos whilst sat in static traffic queues which we already endure on a daily basis.

This development does not have the highways infrastructure to support it and there is no significant opportunity to improve it further. I would like to take this opportunity to remind planners that there has been no significant highways improvements in this area for the past 30 years with no budget for further work.

Given the evidence in this letter and additionally, the data in my objection email to Councillors dated 11.05.16 I am forwarding with this letter, the proposed development at site A46 is clearly not an ‘enabling development’. There are alternative sites which are better suited to development without the associated highways cost and sacrifice of highest grade green belt land eg. behind the pub on the Guildford Road and at Rokers by Fairlands. Thorough research must be undertaken.

Finally, the development itself. Taylor Wimpey build cheap & cheerful houses and retail parks. They never build schools. They will sub contract this out to another developer and this will cost more. The plan for an ‘estate’ of Taylor Wimpey homes would not be in keeping with the rest of the village – where houses all differ and have grown organically. If any development must happen, properties must be sympathetic to the area and in far less numbers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I strongly object to the proposals for Blackwell Farm development (policy no A26) and the proposal to build a road from the A31 to the Tesco roundabout.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

We would like to put forward our strong objection to the Guildford Council proposal for the area of Horsley for being so ferociously drastic when it could easily be preparing a softer solution, better use of brownfield around Guildford area, respecting the importance of the Green Belt in Horsley and it surrounding villages. Current infrastructure cannot cope with the Council’s proposal. Amongst other reasons are the following:

The impact of the proposals on East & West Horsley:
- proposal to remove East & West Horsley out of the Green Belt (along with many other Surrey villages)
- 385 new homes in West Horsley (a 35% increase on the existing housing number - the highest increase of all Guildford villages)
- a 25% increase in housing across the borough against official growth projections of 15%
- a lack of supporting infrastructure (schools, Medical facilities, parking spaces etc) to accompany plans for extra housing in the area)

GBC’s proposal will be absolutely detrimental to Horsley.

Comment ID: PSLPA16/3680  Respondent: 15616513 / Sarah Harrison  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Send village being removed from the green belt. Send provides an essential "gap" or buffer stopping Guildford and Woking becoming one continuous urban area. If Send were removed developers would be quick to take advantage without protection of the green belt.

I object to 45 houses being built at Cockburn nursery. The road infrastructure cannot cope with this volume of additional traffic associated with this level of development. Tannery Lane is just that a Lane, twisty and narrow. There is also a very hazardous junction to Send Road.

I object to building 400 houses and 7000sq metres of industrial space at garlick's arch. Send simply could not support such an increase in housing. The site often floods and I believe this is an area of ancient woodland.

I object to the development of 40 houses and 2 travellers pitches at send hill. The access is via a narrow single land road which is insufficient.

I would be grateful if my comments were shown to the planning inspector and please send confirmation of receipt of this communication.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I would like to register my objection to the Guildford Borough Council local plan and in particular the removal of Horsley from the green belt.

The assessment of the Horsley's within the local plan seems flawed and does not reflect the reality of life in this village.

The Horsley's are primarily a rural community with low population and housing density which add to the open nature of the green belt area within which it is situated.

There is a lot of talk about increasing commercial centres and leisure facilities within the area but I and my neighbours would argue that the leisure facilities that we enjoy are bought about by the rural nature of the village and the ability to walk, cycle, run within the countryside which immediately adjoins our village. The Horsley's benefit from a parade of shops which are supported by the immediate community and not by a larger and wider community as the report would suggest. If this was indeed the case then I am sure that the number of banks would not have dwindled from three of recent years to a sole existing bank. This commercial centre exists because of the affluence of the local community and their willingness and desire to support their local community. We live in a village and want to support our local companies and not be turned into a district centre with high rates where the retail environment only supports national and international chains.

As a predominately small rural village the Horsley's are served by a number of small country lanes highly unsuited to the increased housing and therefore traffic that the new local plan demands.
The area is regularly affected by both flash flooding and longer term floods during the winter months when the main road that serves the village and which would serve the proposed 1000 plus cars suffers severe flooding.

The large number of proposed building sites are compounded by the major new towns that are proposed within five miles of the village boundary. Schools are full and unable to obtain planning permission to rebuild. Rebuilds that are only able to be financed through private financing initiatives with residential developers for more housing alongside the already oversubscribed school. Train stations whose car parks are already full to capacity with nowhere but greenbelt to expand into.

With developments such as the Wisley airfield no doubt being sold on their proximity to the A3, has anyone involved in the compilation of this report ever tried to travel between Wisley and Guildford on the A3 any time after four pm when a twelve minute journey will take in excess of forty five minutes.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPA16/3684  **Respondent:** 15616737 / David Freeman  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

As a long term resident of the Horsley area for over twenty years I would be grateful if you could note my objection to the Local Plan that is being considered for Guildford, and in particular, in relation to its likely impact on West and East Horsley.

I appreciate there is a housing crisis, and that new housing must be built somewhere. However, I would argue that the building of any new housing should be undertaken in a way that that is sympathetic to the tone, style and atmosphere of the villages (West and East Horsley) today. I would argue that increasing the housing stock in West Horsley by 35% will result in a significant change in the village and it represents putting the interests of the future occupiers of the new properties ahead of those who already live there. However, I also appreciate there has to be a balance. There will have to be some development – but increasing the housing stock by 35%, a percentage that is not repeated in other villages, is neither fair, not appropriate.

However an even greater concern is the lack of infrastructure planning in the proposed local plan. It is well known that all local services in the Horsleys are under pressure, some at breaking point, and the failure to provide for water, sewage, schools and medical facilities at a level that can provide the required services for an increased population, will increase pressure on the that population, and perhaps, although I hope not, social tensions.

There will be a significant increase in traffic, and the local roads are already under pressure, and the transport infrastructure is failing the current local population.

However my biggest concern is the proposal whereby the Horsleys will, if I understand the draft plan correctly, fall outside the Green Belt, if the plan is adopted. This insetting will create a dangerous precedent – and could lead to the loss of further facilities and change the environment of the area beyond recognition.

At a time when the political process is the subject of such scrutiny, and people are becoming increasingly focused on asserting their concerns through the medium of local democracy, it has to be hoped that the opinions of those who actually
live in the Horsleys today, and whose lives will be most affected by the adoption such a plan, will be considered and given due weight.

I am not suggesting that the should be no development – just that an increase in the housing numbers in West Horsley by 35% is excessive and inappropriate, and that my concern is exacerbated by the apparent failure to provide infrastructure for the additional people who will occupy those houses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

** I object to the proposed Infrastructure Schedule (Appendix C)

There is no schedule for Garlicks Arch (A43); the plan takes no account of the infrastructure required for this site and therefore it is not fit for purpose

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

** I object to the figure of 693 houses per annum in the borough being too high (Appendix D)

GBC has not published any details as how this figure was arrived at, and has not applied any of the applicable constraints to it. This lack of transparency is not acceptable in a public consultation.

Answer (if comment is on questions 1-7 of the questionnaire): ()

** I object to the employment strategy and impact on Garlicks Arch (A43) (Policies E2 and E5)

The development will result in the loss of existing local successful businesses, which have been employing local people over many decades, and are therefore sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/15544  Respondent: 15616929 / Nigel Wickham  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

** I object to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

This will cause more congestion to the villages of Ripley, Send and Clandon, which have poor condition narrow roads and no footpaths, which are dangerous. More houses will increase this danger and unsustainable volumes of traffic

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**I object to the lack of proper infrastructure planning for sites (Policy I1)**

The current and existing services are over-stretched now, so where are the infrastructure improvements to support the enormous proposed developments, including medical, public transport, schools?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**I object to the congestion that development will cause to the trunk roads A3/M25 (Policy12)**

Both the A3 and M25 need improvements before any developments commence. This is clearly not going to happen in the timescales of the plan, so the proposed developments at Wisley Airfield (A35), Garlicks Arch (A43) and Gosden Hill (A25) should NOT take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
** I object to poor air quality concerns (Policy 13)

The increased congestion that will arise from the massive proposed developments will in turn lead to increased air pollution which will have damaging effect on local residents and their health.

** What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

** Attached documents:**

---

** I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, in addition to Wisley Airfield (site A35) and Garlicks Arch (site A43)

There are no exceptional circumstances (as required by the National Planning Policy) for these villages and sites being removed.

** What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

** Attached documents:**

---

** I object to development in areas at risk of flooding (Policy P4)

The Environment Agency classifies the site at Garlicks Arch (A43) as being in a higher risk than the Council's own assessment. The plan does not take adequate account of the flood risk as required by National Planning Policy, especially as this area has flooded many times in recent years.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

** I object to the local plan as the development proposed is not sustainable (Policy S1)

The volume of proposed housing will damage local communities especially Ripley, Send and Clandon and is not sustainable due to lack of infrastructure. There are no rail stations near the proposed developments and no plans to improve the local roads. What about primary schools, doctors and dentists? Where are the thousands of extra cars going to go with no possibility of significant improvements to local roads?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.
The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015
• 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
Surrey Fire and Rescue deployed.

2016

• 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
• 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
• 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.
The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council’s eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)
The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/15642  Respondent: 15618305 / Lawrence Claridge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPP16/15644  Respondent: 15618305 / Lawrence Claridge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15622  Respondent: 15618305 / Lawrence Claridge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.
The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15624  Respondent: 15618305 / Lawrence Claridge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15626  Respondent: 15618305 / Lawrence Claridge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15647  Respondent: 15618305 / Lawrence Claridge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists, To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in
London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of...
unviability arguments only serves to inflate land values. It will become clear that developments are unviable when
developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location
close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount
of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now
having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the
original owner simply pocketing the profit.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere
near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village
connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve
the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large
executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that
cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including
the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As
drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm
to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy
wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations Ire
available.) The policy should include the need for a balancing exercise including consideration whether more suitable
locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values,
leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will
be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left
undefined the policy could be used to justify significant developments. In the context of the plan a development of 150
homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and
with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.
I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least
one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.
The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinised by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere.
Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford’s circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.
5. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
6. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
7. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
8. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
9. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
10. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
11. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
12. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
13. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
14. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
15. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
16. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
17. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
18. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
19. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development." However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially
confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7036  Respondent: 15618337 / Matthew Pitt  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 – 2014 from Crashmap data

   • Clandon Cross Roads Area to Bulls Head - 17 incidents
   • Bulls Heads Head to Bennett Way - 8 incidents
   • Bennett Way to Highcotts Lane - 15 incidents
   • Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

   • 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.
The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPS16/7038  **Respondent:** 15618337 / Matthew Pitt  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)
The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.
The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment“/Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in
London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15635  Respondent: 15618337 / Matthew Pitt  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of...
unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150
homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and
with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.
I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process, many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Answer (if comment is on questions 1-7 of the questionnaire): ( )
I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least
one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.
The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere.
Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

<td>Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford’s circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.
5. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
6. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
7. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
8. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
9. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
10. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
11. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
12. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
13. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
14. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
15. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
16. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
17. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
18. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
19. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident of West Horsley I would like to strongly object to the proposed plan to build additional houses on the green belt in and around Horsley

The character of the village would be totally changed and the village and residents would be completely affected.

There are other possible alternatives and options available.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I wish to object to the draft Local Plan in the strongest possible terms, for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored and this simply appears to put money in the pockets of overseas investors rather than doing something useful with land that needs regeneration rather than conservation as the greenbelt does.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans. Where has this number come from. They should not be used without complete clarity and transparency.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to

FWA/TFM, an area that at present has only 0.3% of the population of GBC). This does not equate to a reasonable and fair
process of distributing new housing.

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Specifically in respect of Gosden Hill - The population of Burpham is c5,000, including a number of new housing areas; but adding a further 2,000 homes will destroy the sense of the environment.

On a personal note - Merrow Lane north of the railway bridge (to the corner near the A3) is an important part of our countryside, which will be destroyed – for cyclists and walkers alike.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Specifically, the current plan for Guildford Station is an awful “eyesore”, which is out of character for the town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The plans are incomplete in respect of the necessary infrastructure:

1. Schooling, at all levels;
2. Healthcare, in all its forms;
3. Transportation has not been thought through adequately. Deferring to a later assessment, or just awaiting the unintended consequences, will not do.
   1. Redesigning Burpham junction to allow A3 Southbound access/exit, even with unconfirmed reports to widen the A3 through Guildford, will have unforeseen consequences on traffic flows across the area.
   2. Similarly, while noting the 2 extra stations, I do not believe that the full impact of these has been considered. For example, it is as if Merrow East will serve Gosden Hill, but the new station will draw in other traffic, which will disrupt the local area if not adequately considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

There are already increasing concerns regarding parking in the centres of both Burpham and Merrow, both will become exacerbated with new developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The plans encroach into the Green Belt to an unacceptable degree whereby the beautiful environment of Surrey will be devalued immeasurably: towns get bigger, villages appear to merge and we end with endless conurbations which lose the vital “breathing space”.

1. Some existing villages, e.g. Ripley, will be affected will be irreversibly damaged; and
2. Huge new settlements, such as Gosden Hill (see below) will destroy vitally important space around Guildford.

I note promotional content that “our most important countryside, landscapes, and heritage” (per http://www.guildford.gov.uk/newlocalplan/) should be protected, but there are so many aspects to be considered. And while I may not be an expert, nor have the time to scrutinise all the documentation, I note, for example, that of the GBCS 2012 identified villages (Chilworth, East Horsley, Effingham, Fairlands, Flexford, Gomshall, Jacobs Well, Normandy, Peasmarsh, Ripley, Send, Send Marsh/Burnt Common, Shalford, Shere, West Horsley and Wood Street Village) just 2 are excluded. It appears that the residents of the remainder have to suffer the butt of the Plan.

I missed seeing the impact of separate plans to build further homes on the Clandon Estate, removing it from the Green Belt; turning the GBCS “on its head” (Source: MRA). This adds significant housing to the existing population of 8,000/3,500(?) homes, which includes Merrow Park. I am unsure how this extra development fits into satisfying the housing assessment.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Councils must do more to demonstrate they have explored existing brownfield sites, with a greater willingness to change usage requirements in order to allow more smaller developments – particularly for important low-cost housing. Just think of the aggregate number of units which could have been built over the past 5 years if a “big picture” approach been taken.

With more time, and/or in co-operation with others, one could continue this list. Please note that this is not a case of “nimbyism”, especially given I have lived in Merrow Park - the last great expansion in Merrow – for 30 years. However, I see severe shortcomings but in the plan and, for the sake of the future of the community, I am not supportive to allowing the town and its environs to be adversely affected in the manner proposed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/1736  Respondent: 15618561 / Howard Klein  Agent:
In my opinion, this is an extensive plan which deserves a concise review by some form of qualified panel which is not funded by the Council; thereby giving a reasonable opportunity to rebut, in a qualified/expert manner, many of the assumptions made in the plan, including the references to the various guidelines/regulations/etc. However, as a resident of over 30 years, and with a family I have brought up here, I do feel able to comment albeit on just a few specific points.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

I write to you to provide my objections to the Local Plan outlined by Guildford Borough Council. I have spent time participating within the GBC organised exhibitions and reading through the documentation provided.

I am a local resident of West Horsley. I live on Mount Pleasant.

I am deeply dismayed at the proposals for development that have been put forward. These are incongruous to this village and the principles of the green belt.

The volume and density of the proposed housing development is unseen in the Horsley villages. I understand the volume increase to be 35% additional housing within five years and the density to be 5 house / hectare whereas the Horsley's is currently 2/3 houses / hectare.

The Local Plan is inappropriate to the character of the Horsley villages. This is a semi-rural green belt village. West Horsley has one shop and a village hall. It does not have a commercial centre. This is a semi-rural village. Children play safely outside their houses and cycle to their friends houses, deer wander in to gardens and I can hear a rooster calling as the sun rises. The volume and density of housing proposed belong within an urban area not within the villages of the green belt.

Further to this should the proposed development go ahead the Local Plan makes no provision whatsoever for additional infrastructure such as schools, doctors, trains, car parks, roads that would be needed to accommodate an additional 550+ houses that represent the 35% additional housing.

Where will the children go to school? The local school is already full.

How will adults travel to work? The trains and station car park is already full.
How will the existing roads cope with the additional cars? Will there be more traffic jams/accidents?

How will sick people access medical help? The doctors surgery is already busy.

The Local Plan does not represent a solution that is sustainable for existing communities or future generations.

The plan at Garlick's arch does not take infrastructure into account. Clearly this is because it is known that the infrastructure will not be able to cope.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Garlick's Arch is Greenbelt. I want to protect our greenbelt for our future generations. It is precious and it is loved by our communities. It creates a better environment for us and a happier, healthier place to live. We cannot live happy lives with endless sprawl. We need access to green spaces and this is a protected site. It has not purpose being suggested for housing, which should be built on brownfield sites only and in urban areas. Our natural environment cannot be replaced and should not ever be considered appropriate to develop.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The developments being proposed are vast and the consequences will be felt on peoples health with the increased pollution. I have a daughter with asthma and know how serious childhood illnesses exacerbated by pollution can be.

The traffic is already horrendous, we do not want more cars on the roads. There are currently just sufficient parking spaces in Ripley and around. It would not take many more cars on the roads to tip that balance and make for example taking the kids to the park, an impossibility for those who already need to drive into the village centres. The frustrations of congested roads decreases our quality of life as they are horribly stressful, together with the pollution caused and damage to our environment. Many of the roads already require passing places as they are narrow - more traffic will increase the number of accidents as more cars try to navigate these narrow roads.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The greenbelt is highly precious to those in this area - and also to those in London who can access green areas within striking distance. You are pushing the urban sprawl from London further and further out and destroying the pleasure and health benefits our community gain from these areas.

Consider brown field sites only. If you develop our loved green belt, it is gone for ever, which will a travesty. Previous generations provided this for us with good intentions and the benefits they hoped would last for future generations. We went to keep our green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The number of houses being proposed is absolutely disgusting. You are creating urban sprawl with no thought to the congestion that will be causes to the surrounding areas. The nearby M25 (have you seen the gridlock in the Heathrow direction daily?) and A3 are already badly congested as is the main road through Ripley. Increasing the number of cars so dramatically is actually downright dangerous and irresponsible. Having driven on the A3 in rush hour often, your plans are complete madness. Since nearly every household will be a 2 car household, this will add thousands of cars to our roads. The future generations deserve better - open spaces and less pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am at a loss to understand why this Planning Application has not been dismissed out of hand for several reasons.

As a local resident trying to get into Guildford on a daily basis along the A31 and A3, the traffic we experience already makes what should be a 10 minute journey into one that can take as long as 45 minutes, the road infrastructure will not cope with the additional 3k-4k cars that this development will engender.

The new proposed road from the Research Park to the new estate will cut through important Ancient Woodland which has, to date, acted as the original boundary to defensible Green Belt and this together with the wider area is an important wildlife habitat for numerous animals, plants and insects.

This area that is under threat comprises an AONB, Area of Great Landscape and Greenbelt which should be protected by law, so again, a development of this size (or any size to be honest) should not be contemplated on this site particularly
given the fact that there are already empty premises that could be utilised and there is room on the Research Park to build more large commercial buildings if required.

Also the infrastructure we have currently will not cope with the additional requirements of the development which will mean that more will need to be done possibly affecting a larger area than currently proposed and given the additional pollution this will cause means the health of current residents is likely to suffer in the short, medium and longer term.

This is not something that should be considered just because the University needs to add to its coffers. It already has outstanding Planning Consent to build student accommodation on Moor Park and this should be enforced before any further Planning is even considered.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to register my OBJECTION to the proposed building/housing development proposals that are being put forward by the GBC in their Plan.

Although I do not live there at the moment, my Mother lives in East Horsley and, apart from visiting her 2 or 3 times per week, our plan is to move there in 3 years time. So, you can see I have a deep vested interest and concern as to what happens to East Horsley.

So, any potential new housing developments are particularly important to me.

My principle objection is about infrastructure. The roads, the schools, the services are even now at breaking point…..so the effect of a developments at Wisley Airfield, opposite the station at East Horsley, or at the Thatcher’s Hotel is ill thought through, and frankly, incredible.

The roads around East Horsley are, in the main B roads and lanes. This is not the area to add 5,000 or 6,000 cars a day. It would be dangerous, people’s lives would be at risk and the pollution from the cars would dictate that we as adults and particularly our children would have to go around wearing masks like they do in Japan and China. Is this what the planner’s want?

It is inconceivable that the writers of the Draft Plan didn’t reach the conclusion that the East Horsley/Wisley Airfield axis is NOT the place for development.

In addition the Ockham Road South between the two village ‘centres’ in East Horsley is so narrow (around Coningsbees) that two busses cannot pass each other. ….and many many times I have seen big vehicles mount the pavement at that point….just image another 100 cars per hour coming through there! Just last week I was driving towards the station from Thatcher’s direction and a lorry – which must have been about 8 ft wide forced me off the road – ie I had to mount the pavement.
This area also floods and many times I have seen pedestrians splashed with gutter water. No doubt all these problems are curable but, as we all know, Surrey County Council – who are responsible for highways – have no money…..so how they are going to afford all the other grandiose schemes like slip roads on to the A3 and dynamic improvements to the roundabout underneath the A3 at the end of Ockham Road North? It is all just ‘pie in the sky’ thinking.

Whist writing I would also condemn any proposal that targets building on woodland. My thoughts are about Garlic Arch on the old Portsmouth road between Ripley and Send.

Building on grassland is one thing but never, never ever should woodland be considered. It is the home of thousands of animals and plants – and it MUST be preserved. We share this planet with myriads of other creatures…..and it is the responsibility of the Planners to safeguard all of us….not to destroy everything that is worthwhile and valuable in this world.

This is now the time that the Planners of GBC have to be strong, thoughtful and they have to stand up and be counted. If we cannot build more houses then say so to the government or anybody else for that matter and challenge them to do their worst. But…do not weaken your own resolve.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3714  Respondent: 15618881 / Jayne Barmby  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT in particular to including Sites A36-41 (East and West Horsley). This is a back-door way to create a mega-village – essentially, a soulless new dormitory town. The Horsleys feel victimised by this plan, which has been masterminded by Council leaders representing Ash and Tongham at the other end of the borough, where (in a flagrant case of political double standards) the Green Belt is actually being extended under Policy P3.( 15 Councillor Paul Spooner and his predecessor, Councillor Stephen Mansbridge)
Whatever their merits as development sites, the 6 Horsley sites should not be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley.
Building 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the borough. It will destroy the rural character of these communities. (Even some property developers complain about the Council’s bias in favour of oversized developments, e.g. Dandara, whose relatively small Green Belt site on the A246 (Epsom Road) in West Horsley is not considered in the plan)
Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town. If the Council have justifiable reasons to transform a particular community so radically, the plan should present a case rather than putting forward site proposals as a fait accompli.
These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. For instance:
• Thames Water have advised the Council that the current wastewater network will not cope and that the foul drainage system all the way to the treatment works North of Ripley will need to be upgraded.
• Guildford Council’s Education Review says “expansion options may need to be considered for primary” education in the
Horsley area within the first 5 years of the plan, but Surrey County Council have no plans to do so. The Raleigh School is already full. The private Glensk and Cranmore schools are also at or near to full capacity. The suggestion that schools in Ripley can be used contradicts the plan’s stated intention to reduce traffic on the A3 and strategic aim that primary schools should be within walking distance.

- The plan’s Infrastructure Schedule (Appendix C) imagines an “East Horsley and West Horsley traffic management and environmental improvement scheme between 2019 and 2023 by Surrey CC” but gives no details. This scheme is just wishful thinking. The proposed housing can only harm the local environment, not “improve” it.

The harmful impact of these sites is magnified by the proximity of the so-called Wisley Airfield site (Three Farms Meadow), with over 2,000 new homes only 2 miles away (see below).

The density of new housing on the 6 Horsley sites is inappropriate, being greater than anywhere in the locality at present. Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries for which the plan presents no arguments. Contrary to NPPF paragraph 79, this will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

Collectively, these 6 sites militate against NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been a success story in the Horsleys, with the creation of an amenity wood and community garden, the purchase of adjacent fields (on the eastern side of Ockham Road North) by local residents in order to preserve their open aspect, well-maintained pitches for local football and cricket clubs, public tennis courts, open space for a high-quality campsite (at Waterloo Farm) used by many foreign tourists and the approval of plans for a “Theatre in the Woods” – making West Horsley the only village in Surrey with an opera house. The open nature of West Horsley determined that a long portion of the 2012 Olympic cycle races passed through the village. This route has since been adopted by cyclists as a permanent asset, including the annual Prudential cycle race. These and future examples of “positive planning” depend on protecting the Green Belt to maintain the openness and attractiveness of the local landscape and avoiding the urbanisation and traffic congestion that Sites A36-41 will bring.

By surrounding Waterloo Farm campsite with 120 new houses, Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable. This may accord with developers’ plans, since the site would then be vulnerable to infilling with yet more housing.

Site A40 is subject to an unacceptable flood risk from a combination of a high groundwater table and the lack of surface water run-off. This is flat, clay land on the downhill side of the Horsleys where floodwater from new development will accumulate and back up onto existing properties nearby. I can provide photographs proving how badly these fields already flood at present. These problems will only get worse with the increase in extreme weather events associated with climate change. The “appropriate mitigation” suggested in Policy A40 exists only as an abstract notion. It should not overrule the need for Green Belt “exceptional circumstances”. Policy A40 underestimates the problems of safe access and egress.

Firstly, Ockham Road North was closed for several weeks in 2014 because of flooding, and still floods regularly. Secondly, access problems are not confined to flooding and are not addressed by the proposal to extend the existing 30mph zone past the site entrance.

Repeated attempts made by Ockham Road North residents to extend this zone have been turned down by the local authorities, Highways England and Surrey Police, even though data collected in 2015 show that traffic has doubled over the last 15 years and that the average speed in the 40mph section of this road is 52mph, with maximum recorded speeds of over 80mph. No traffic calming measures have so far been achieved. Additional housing will add to several hazards along this stretch of road, including:

- Its use by pedestrians, especially children (using the Raleigh and Glensk schools and catching school buses to Guildford and Howard of Effingham), pensioners living in the string of bungalows at the northern end of the road, and visitors from the Waterloo campsite who are unfamiliar with the area.
- The existence of a narrow footpath on only one side of the road in any one spot. The layout means that walking half a mile between Green Land and East Lane requires crossing the road twice.
- The road’s increasing use by recreational cyclists (see above).
- Its winding nature, poor sight lines (especially when interrupted by summer vegetation) and dangerous, concealed driveways. Most of these were built in the 1930s. Some have been widened but many are too narrow for modern traffic.
- Since a deep ditch runs along most of the road, vehicles have to swing out dangerously when entering or leaving.
- The prospect of additional traffic, including 19,000 HGV movements (90 a day over a long period) if Surrey County Council approves the Drift Golf Course’s planning application to re-landscape its site using bulk waste transported from London.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I OBJECT also to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. (Application reference 15/P/00012)
This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.
This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company. (Including the Rt Hon. David Mellor QC (its erstwhile founder and former Minister), Mr Michael Murray (spokesman for the project and Conservative cabinet member for planning policy at the Vale of the White Horse District Council in Oxfordshire) and the Hon. Charles Balfour (director & descendant of the David Cameron).
Policy A35 should be removed from the plan for all the reasons the development was rejected by the Planning Committee, including:
- Green Belt location and absence of “exceptional circumstances”.
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts.
- Absence of adequate traffic data.
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
- Presence of a Surrey County Council safeguarded waste site.
- Cost of infrastructure required to the detriment of alternative more favourable sites.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
- Impact on listed buildings.
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
- Extreme housing density with tiny garden spaces.
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
- Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley
above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14). (The River Mole would flood even more badly should a new runway be built at Gatwick.)

• Failure to evaluate the cumulative impact of this and nearby development sites on the area.

In addition I object to the following policies in the Town Plan.:

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the absence of any reference to vernacular or historic design guidelines, even in Conservation Areas. Most of the borough, especially the rural areas, has vernacular design guidelines that are available to give suggestions as to appropriate design. These should have mandatory planning force.

The monitoring of this policy is inappropriate. Why should this policy result in a reduction of the number of appeals for poor design? Should it not result in better-designed buildings?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15677  Respondent: 15618881 / Jayne Barmby  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. Sustainability should be an overarching ambition, conditioning the whole local plan and running through it, as claimed in the NPPF, “like a golden thread”. It should be set out clearly in Policy S1, not buried away as a minor detail in Policy D2.

This policy amounts to “greenwashing”, expounding aspirational environmental targets while ignoring the plan to build dormitory towns across the Green Belt that are environmentally and socially unsustainable. These settlements will bring vastly increased car use and will lead to unacceptable traffic congestion, overstretched social infrastructure, and more greenhouse gas emissions, noise and light pollution. This policy should not be just about saving energy but about preserving the borough’s stock of natural capital, especially the countryside, from futile attempts to rig the housing market.
This policy’s emphasis on Combined Cooling Heating and Power and communal heating networks is meaningless, since no such networks are available locally.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. This policy clashes with the strongly pro-development agenda of the rest of the plan and fails to address the contradiction. History is unamenable to improvement, so the policy should commit the Council firmly to protecting and preserving our heritage assets from development. Instead, the specific policy pledge to “support development” that might “enhance” heritage assets leaves wide scope for abuse in the form of destructive commercialisation and financial leveraging of relevant sites.

This policy is based on the false premise that Guildford’s heritage is inherently in decay. This is a developer’s charter – a short step away from the idea that the historic environment needs to pay its way to be preserved. The Council’s aggressive reviews of Guildford Museum and the Electric Theatre support this interpretation. Whatever the “reasoned justification”, the actual policy wording in the blue box leaves too many loopholes.

Development close to historical assets is harmful and should be expressly prohibited. This policy fails to meet their requirements of NPPF paragraphs 126 and 131-133.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. This is a piously aspirational policy that does not address any of the obvious practical issues already touched on above:

- The plan envisages that 40% of homes built will be “affordable”, but this does not provide any accommodation for low-paid workers, for example, those on the minimum wage, who cannot afford to buy so-called “affordable” homes or pay an “affordable” rent. There is a need for some expansion in social housing, especially in urban areas, where there is a greater concentration of low-paid workers such as those employed in the retail, warehousing and distribution sectors (all of which this plan aspires to expand).
• The number of homes planned in the urban area is too low. There is a glaring need for regeneration in many urban areas, but this is ignored in favour building homes on green-field sites instead. This will not address urban housing needs. It is also unsustainable, since building outside the town does disproportionate harm to road traffic, air quality and overstretched infrastructure.
• The plan envisages a large expansion of the traditional “bricks and mortar” retail sector, but this is a sector in rapid and continuous decline.
• All the stated policy aims for “inset” villages will be negated by the excessive weight of new housing development proposed which would radically change their character forever. Against this disruptive background, it is barely relevant to talk about preserving views!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15674  Respondent: 15618881 / Jayne Barmby  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E8  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposal that sites “on the edge” of District Centres should be considered for retail developments. This is another Trojan horse policy, allowing retail hubs to be vastly expanded in order to smooth the way for vast new housing estates outside in the countryside (e.g. to meet the “everyday shopping and service needs” of the roughly 1,500 people living in the 600 new homes planned for the Horsleys). This is a case of back-to-front priorities. Expanded local retail hubs are being proposed in order to justify more housebuilding in the villages, and in a forlorn attempt to mitigate the serious traffic and infrastructure problems this will bring. The Council have no business preparing the way for new supermarkets in the Green Belt. Rural retail capacity should be left to local demand. The policy proposes not a single measure to support existing rural shops and services that are the lifeblood of village communities, e.g. using business rates and other levers at the Council’s disposal.

11 NPPF 59: “Local planning authorities should consider… the overall scale, density, massing, height, landscape, layout, materials and access of new development in relation to neighbouring buildings and the local area more generally.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E9  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT (for the reasons given under Policy E8 above) to the proposal for retail development adjacent to the 6 rural centres, and sites on the edge of designated centres. This is creeping urbanisation, damaging to the Green Belt and to Guildford town revival as a thriving urban hub. It will contribute to local urban decay and de-population, just as expansion of the suburbs did to mid-20th century London.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** PSLPP16/15671  **Respondent:** 15618881 / Jayne Barmby  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

I OBJECT. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set any rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to de-humanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London. This has been challenged by residents including, by Mr Ben Paton, as far as the Information Ombudsman. But the Council have consistently refused to seek disclosure of the model.

Based on the infrastructure that Highways England, Surrey County Council and others suggest they can provide over the next 15 years, the Council believes it can deliver the full OAN number as the Housing Target. However if, during this consultation, or later on, the anticipated infrastructure is not going to be provided then the council will be forced to apply further constraints to the OAN number, which may reduce the Housing Target number. Therefore, it is clear that the OAN and the Housing Target are not the same. The OAN is objective and the Housing Target is subject to constraints."

Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and underused surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Over provision is inappropriate given other constraints.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

---
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. “Affordable” homes, under national definitions, means homes that are sold or rented at 80% of market value. Even if 70% of these are rented as proposed, the level of market prices in the South-East means (even post-Brexit) that these homes will remain well beyond most people’s means and that starter homes will not become available for local people.

In addition, the viability clause (4.2.40) means that in practice the policy could be unenforceable. Private financial viability has no place in a public policy and should be removed. It is a get-out-of-jail-free card for developers that will sacrifice countryside for no local benefit.

I question the assumptions that seem to underlie this policy: that people have a right (rather than a legitimate aspiration) to own a home; that they should be encouraged to live locally (contradicting the Government’s policy of encouraging labour mobility and development in poorer regions, where homes are cheaper anyway); that increasing local house-building will reduce overcrowding and congestion (rather than simply suck more people into the borough); and that it will stem the rise in house prices (even though 13,860 new homes will be a drop in the ocean, given that prices are determined by an infinite demand-pull from London, whose population is increasing by 100,000 a year, and by the currently low cost of capital for overseas and other buyers). The weak mechanisms proposed in the plan might influence the market in a more remote part of the UK, but not here.

This policy’s version of “affordability” is just a smokescreen for pushing through more development generally. Building more homes in Guildford cannot increase real affordability given the overhang of the London market.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPP16/15680  Respondent: 15618881 / Jayne Barmby  Agent: 

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. Most of the borough’s infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. Yet this plan’s commitment to building housing estates across the Guildford countryside will mean either major infrastructure investment that no-one is prepared to pay for or else a catastrophic and simultaneous collapse in transport, educational, medical, energy, water and communication services. The plan targets greenfield sites – requiring heavy infrastructure investment – in order to generate CIL income necessary to meet an infrastructure shortfall that is already serious. This is not sensible. The current draft CIL scale also encourages development on greenfield sites rather than brownfield.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing infrastructure needs in this area is inadequate, identifying only the tip of an iceberg of existing congestion. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that involve demolishing property and road-widening in residential areas to solve the resultant congestion. The A3 improvements are not guaranteed to take place but they are being used to justify removing large areas from the Green Belt before detailed traffic assessments have taken place. These detailed investigations are being deferred until the planning application stage and will be left to developers to prepare. If a site then
proves to be unsustainable its Green Belt protection will have been lost for no reason and unsuitable development will take place by a more insidious process.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritising greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. (Residents have been incredulous at the Council’s failure to apply infrastructure constraints to housing numbers, in response first to the 2013, There were 20,000 responses each time.)

This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognising this as a key issue, the plan is based on a wing and a prayer.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. This policy is too vague and optimistic. Decisions by Highways England on improving the strategic road network (the M25 and A3) are still years off. The Council have suggested a very expensive tunnel under Guildford, but this is no more than a dream. Even if Highways England accepted this (which is highly unlikely in the post-Brexit public spending climate) it would not be built until the end of the plan period at the earliest. Other, less expensive A3 improvements, and changes to the Junction 10/Heathrow stretch of the M25, will also take years to agree and complete. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is foolhardy. Surrey is the most congested county in England, with 683 people per square kilometre, compared with an English average of 413. This policy will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone). This is a major development constraint that should have been applied to the OAN before this consultation, and not left up in the air.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/15682  Respondent: 15618881 / Jayne Barmby  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT. This is another vaguely aspirational policy, based on wishful thinking and not grounded in the practical realities of daily life. It consists of a standard, box-ticking list of local government measures unrelated to the issues and Options paper and then to the 2014 draft local plan specifics of the plan. Like infrastructure, transport appears to be an afterthought; the policy fails in its essential job of guiding planning decisions, since it assumes development of any kind can be supported by sustainable transport.

The sustainability of the dormitory settlements which the Council want built across the countryside depends on a general “modal shift” from private car use to walking, cycling and public transport. This is unrealistic. The proposed sites are often miles away from the nearest railway station. Bus services even in the largest villages are almost non-existent – just one bus to and from Guildford each day in East and west Horsley and none at weekends. Since bus services depend on profitability, they cannot be expanded and the Council are not proposing to subsidise new ones. Rural buses are too slow anyway for busy people. Most rural roads in the borough are narrow, winding, hilly, potholed, muddy and unlit. Many flood badly and have no footpaths.

The desired modal shift would require a comprehensive co-ordination of bus and train timetables with services every few minutes, seven days a week, to stops within walking distance of every home in the borough. This kind of integrated public transport system has been achieved in Switzerland, for instance, but only at huge public cost and thanks to a political consensus supporting state ownership of trains, buses and the post office, which delivers rural passengers as well as mail. There is absolutely no chance of this in the UK.

The vast majority of the borough’s residents are not, in practice, able to cycle. This includes children, the elderly, commuters who have to look smart, the infirm, the unfit and people carrying goods or shopping of any kind. Dependence on walking and cycling discriminates against these groups, which include some of the most vulnerable members of the community. It is socially unjust.

One in two working people in Guildford commute for up to 3 hours a day, as I used to do. They will not leave their cars for even part of their journey if it means longer travel times.

Park-and-rides are a welcome part of the transport mix but are too slow for commuters and others on a tight schedule. Well-off pensioners seem to be the main beneficiaries. For an adult couple going shopping it is still cheaper to park in town. Forget about water buses. The Wey is too narrow and, with a river speed limit of 4mph, boats are too slow for anything but recreation. Except on the tideway, not even the Thames has such services.

The addition of two new stations appears attractive but will slow down train journeys, which are already slower than at any time since the 1930s. Knock-on effects on localities where the new stations are built have not been worked out or presented.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT. This policy states, “the general extent of the Green Belt has been retained.” This is untrue. The policy wording is tepid in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. It is an inalienable public good. Once gone it is gone forever. It is not the Council’s to give away.

Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:
- Agricultural production
- Rural leisure and tourism amenities
- Water catchment
- Flood control
- Biodiversity
- Natural heritage
- A carbon sink for air pollution
- Room for public facilities such as parks and burial grounds
- Profitable film locations (e.g. Shere)
- Future economic potential such as mineral extraction (even fracking)
- Natural beauty, landmarks, open space, rural views and sight lines
- Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)

(See Ministerial foreword: “Our natural environment is essential to our wellbeing, and it can be better looked after than it has been. Habitats that have been degraded can be restored. Species that have been isolated can be reconnected. Green Belt land that has been depleted of diversity can be refilled by nature – and opened to people to experience it, to the benefit of body and soul.”)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
argues that we should sell 1.6% of the Crown jewels in order to build houses.
I am not opposed to appropriate development in the Green Belt and recently supported a major planning application in my own village. But I fail to see why a system of fair burden-sharing of new development cannot be applied to the borough’s existing settlements in proportion to their size. This alternative would minimise the strain on infrastructure and maximise the chances of retaining the character of each settlement through gradual growth.
It is reasonable to ask urban Guildford, with x times the population of semi-rural East Horsley for instance, to accommodate x times the number of new homes over the plan period. Parish councils could be asked, and will no doubt be willing, to propose where their quota of houses should go. Most rural residents are reasonable people who, if not alienated by top-down planners, will support realistic numbers of new houses in their neighbourhoods.
Unfortunately, this democratic, bottom-up approach has not been attempted.
Instead, while developers flip and land-bank urban sites as a financial speculation, this plan will dump most new development on greenfield sites where building costs are lower, covering the Green Belt with dozens of housing estates that few residents want. 8,086 new houses are planned for the Green Belt but only 1,135 for Guildford urban area. This is disruptive, socially inequitable and unnecessary. It will not only destroy countryside but will also delay and disincentivise much-needed urban regeneration. The remarkable revival and repopulation of central London shows that building dormitory satellite settlements is an out-of-date approach to planning.
I particularly protest at the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. I am deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems determined on self-defeat.
I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors. (Councillor Matthew Sarti, Planning Committee meeting, 18 May 2016)
To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need (especially post-Brexit) and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.10

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses.” This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. This amounts to a war of attrition by the Council in conjunction with developers, since many busy residents are sick and tired of repeating the same comments to deaf ears. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014, This plan is out of date and not creditable. (Further discredited by criminality on the Council. Former lead Councillor for planning Monika Juneja, architect of the 2014 draft plan, is currently serving a two-year sentence on 3 counts of forgery, pretending to be a barrister and obtaining dishonest pecuniary advantage.)

13 Some residents have concluded that commenting is a waste of time. All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. (E.g. Gallagher Homes v Solihull Metropolitan Borough Council [2014] EWHC 1283)

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. This is more protective – as a policy – than the proposals for the AONB and the Green Belt, so is anomalous and wrong. I am not in favour of building on this area, since urban, brownfield areas are sufficient to meet all reasonable housing targets. There is no need to build on any green fields if brownfield, previously developed land is used efficiently (without garden-grabbing).

This policy refers to the countryside near Ash and Tongham (see paragraph 4.3.28). This area does not justify stronger
policy protection than any other part of the borough. The fact that the current and previous Council Leaders represent it should not give it preferential status: “we will seek to limit any development in the countryside unless it can be demonstrated that it is necessary in that location”. Green Belt and AONB areas should by definition have higher levels of protection than non-Green Belt areas. It should also be noted that Ash and Tongham lie beyond Guildford far away from London and therefore make no contribution to controlling Metropolitan urban sprawl, unlike those villages which, ironically, are to be “inset”. That is presumably why Ash and Tongham are not in the Green Belt already. This policy, however, attaches higher priority to preventing the “coalescence between the Ash and Tongham urban area and Aldershot” than it does to the primary purpose of the Metropolitan Green Belt, which is to stop London sprawl. Apart from being a scandalous misuse of local political patronage, this policy effectively says, “Look, we are not destroying the Guildford Green Belt because we are extending it in Ash and Tongham.” It is a cynical piece of tokenism. The leader of the Council needs to be seen to be above reproach by deleting this policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to P 3 countryside beyond the green belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/18584  Respondent: 15618881 / Jayne Barmby  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S1 gives no definition of “sustainable development”. The promise “to secure development that secures the economic, social and environmental conditions in the area” omits to recognise that economic growth, social justice and environmental protection often conflict. It does not say how each element is to be weighted or conflicts resolved. As a practical guide to the tough choices Councillors will face, it is useless. Under this policy, any development will qualify as “sustainable”, thereby failing to apply the NPPF’s most important guideline. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.
There is a gap in Policy S1 with regard to Green Belt. As an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity, the Green Belt is a living example of sustainable development in practice. It is the envy of the world. Policy S1 should commit to uphold Green Belt boundaries and protections, setting at least one clear boundary to planning decisions. The plan’s contempt for Green Belt constraints is amply demonstrated in later policies. The commitment to approve planning applications “wherever possible” and “without delay” reveals this draft plan’s pro-development bias. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all. This policy also ignores, as if they are inconvenient constraints, most of the Core Planning Principles set out in NPPF paragraph 17. In my view Policy S1 is a non-policy.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

---

I OBJECT. I have 5 objections to the proposal to build 13,860 new homes:-

1. The number is based on pre-Brexit projections for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

2. The number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half the people who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent districts of Rushmoor and Mole Valley, minutes from Guildford town, are outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere. Unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and is part of a far wider and more complex housing market. These concerns have been raised since 2014 but the Council have failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so the housing numbers derived from it are unreliable. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford want 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county (none in Mole Valley, for instance). This highly uneven distribution is unexplained.

3. The figure of 13,860 new homes is unsubstantiated. It has not been scrutinised by Councillors despiterepeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by commercial sub-contractor used in preparing the SHMA. The Council say we should trust the contractors’ model because it is used by a large number of other local authorities. Wide usage, however, does not confer objectivity. Guildford’s OAN would fail the basic transparency test even if the methodology used were a universally admired ‘gold standard’. But it is not: it belongs to consultants whose website openly proclaim their pro-development agenda, provoking reasonable suspicion that the figures are inflated. External experts and members of the public have provided detailed critiques of the model. Its most fatal flaw, however, is that it has not been disclosed – not even to the authors of the plan, who have taken it on trust. This is irrational and unsound.

4. The status of the 13,860 figure is ambiguous. The plan fails to set a Housing Target of new homes to be built, or explain
how this relates to the “Objectively Assessed Number” (OAN) for housing need. Elsewhere, the Council have said that the two are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted, but in the same breath say that infrastructure or other constraints may in due course affect deliverability.7 Despite the NPPF, the plan fails to address these constraints. In any case, the number of homes proposed, plus existing planning permission, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how can anything else be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a Housing Target that takes normal constraints and adjustments credibly into account, and which leaves the Council to set one at any level without further consultation. Even if the OAN were not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

5. It is irrational to embark on a radical transformation of the borough without a clear Housing Target. Most of Guildford borough is theoretically protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the existing number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

Comment ID: PSLPS16/7059  Respondent: 15619073 / Paul Collins  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

1. Crownhall Estates (CE) has long standing land promotion agreements in place with the owners of land falling within the overall allocation (edged blue) as shown hatched red on the plan.
2. These land promotion agreements predate the identification of this allocation in the current Draft Local Plan and the promotion of the larger allocation by Ptarmigan Land (PL) on behalf of the owners of that land.
3. Sites A and B are previously developed land1 which could accommodate circa 35 dwellings accessed from Portsmouth Road and Burnt Common Lane respectively.
4. Sites A and B are deliverable housing sites in their own right (as defined by Footnote 11 to Framework Paragraph 47 in that they are available now, offer a suitable location for development now, and are achievable with a realistic prospect that viable housing could be delivered on the site within five years) and both could assist the Council to identify and maintain a 5 year supply as part of the identified annual housing requirements for the district from the base date of 2018 without reliance upon or prejudice to the delivery of the larger allocation or the intended access to same from the A3 (Site Allocation A43a) later in the plan period.
5. However, CE is willing to work with PL and Guildford Borough Council (GBC) to enable the comprehensive development of the wider site as envisaged in the allocation and to ensure that development on each land parcel is complementary to the other and planned in manner that forms an effective and efficient holistic development of the overall allocation for its intended purpose but considers that in the circumstances here the wording of Draft Policy 43 will need to be amended (possibly by adding more detail as to how it is envisaged that the overall package will be delivered particularly with regard to component elements and phasing) so as to allow these two deliverable sites to be released so that they can assist the Council to maintain a 5 year supply whilst the remaining and larger developable part of the site (for years 6 – 10) is put in place with the corresponding level of infrastructure.
6. CE looks forward to working with PL and GBC so as to deliver this allocation.

Comment ID: PSLPS16/7060  Respondent: 15619073 / Paul Collins  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A47

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Crownhall Estates (CE) has a long standing land promotion agreement in place with the owners of the 2 hectare parcel of land as edged blue on the plan.
2. The site is partly previously developed land and partly greenfield and that part of the site shown with green hatching is designated as a "Site of Nature Conservation Importance" (SNCI) primarily due to the site being noted as a “Water Vole Alert Area” due to the presence of the pond and stream on the site.
3. Sites of Nature Conservation Importance' (SNCIs) are local designations which do not in themselves restrict development for the purposes of the Framework and in this case the site could be developed as allocated by setting aside and protecting the areas that are used by water voles (the ponds and the streams) so that any harm to this protected species would be avoided.
4. There are no other known constraints on development and the close proximity of the site to the railway station and the site for a proposed new school means that opportunities to maximize sustainable transport solutions for future residents of any housing and those already living in the area can be delivered by way of any development.
5. CE therefore considers and confirms that this is a deliverable housing site for up to 50 dwellings as envisaged in the allocation and should be identified as such in the allocation (currently the allocation suggests that the site is “developable” (years 6 – 10) rather than “deliverable”) years 1 -5) recognizing that any proposed development will need to address the site constraints identified.
6. Therefore CE looks forward to working with GBC so as to deliver this allocation.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

COMMENT: We broadly support the strategy set out within Policy S2 with regard to the delivery of development to meet the needs of the Borough over the plan period and note the fact that Policy S2 explains that the targets set out for each year of the plan post-adoption are not a ceiling, thus emphasising that these are minimum requirements and that delivery in excess of these targets is supported.

However, having regard to the supporting text to the policy and the housing trajectory set out in the 2016 Land Availability Assessment, it is evident that the plan currently anticipates that much of the delivery will occur in the later years of the plan period, when infrastructure delivery will facilitate large-scale allocations to be brought forward and that a number of smaller deliverable housing sites (i.e. sites which are available now, offer a suitable location for development now, and are achievable with a realistic prospect that housing will be delivered on the site within five years (2018–23)) are being allocated in the plan on the basis that they are developable sites (i.e. developable in years 2022–2028).

Having regard to historical under delivery in the Borough and the National Planning Policy Framework’s (NPPF) emphasis on significantly boosting the supply of housing as soon as possible, it is imperative that any opportunities to deliver
identified residential sites early in the plan period are maximised in order to minimise the adverse socio-economic impacts associated with an under-supply of housing.

Therefore it is considered that to be considered sound the Plan needs to illustrate and demonstrate which of the proposed allocated sites are considered deliverable (as opposed to developable) and will be expected to deliver the full range of housing necessary to demonstrate and maintain a five-year supply of housing land to meet the housing target from the base date of 2018.

Early delivery of those sites which are deliverable and relatively unconstrained should be particularly welcomed and expedited in light of the low rates of delivery in the first years of the plan period, in order to reduce the cumulative deficit against the housing requirements

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**COMMENT:** In order to be considered Framework compliant and therefore sound, more detail is required regarding each of the proposed allocations. In particular the Plan needs to clearly identify key sites which are critical to the delivery of the housing strategy over the plan period; identify which sites (or parts of sites) are considered deliverable and necessary to maintain a 5 year supply from the base date of 2018 and which are considered to be specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

This representation reviews the Guildford borough Proposed Submission Local Plan: strategy and sites document, currently out to consultation, and details our comments on particular draft policies. It also suggests an alternative site, for which we are the agent, which we believe is suitable for delivering much needed additional housing within the borough. The site proposed is land east of Glaziers Lane, Normandy, Guildford, Surrey GU3 2EB.

... It is considered that the site detailed previously is more suitable for delivering much needed additional housing within the borough than some allocated sites within the draft Local Plan. This site is within a very sustainable location, available for development and deliverable within 1-5 years.

The site has been assessed previously by the Council and it was concluded that if sufficient housing land cannot be found in the urban areas and village settlements, this site is potentially suitable for residential development.

The position of the site, adjacent to the Flexford settlement boundary, ensures much needed additional housing could be provided in a sustainable location with only a modest indentation into the existing Green Belt.

The site is more appropriate for residential development in landscaping and ecological terms than other sites allocated within the draft Local Plan for Normandy and Flexford.
The site is in a sustainable location adjacent to Wanborough Station and on bus and cycle routes. The site has easy highways access on to the A31 Hogs Back.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site Location
The site is located to the east of Glaziers lane and to the north of Flexford. It is greenfield land, under private ownership and immediately deliverable.

The alterations to the settlement boundary within the proposed Local Plan 2016 submission now include the large A46 site to the west. Should the redefined settlement zone be agreed, the site will be bordered completely on two sides. An extract from the proposed Local Plan illustrating this is included below: <see attachments>

It is within the 400m to 5km zone of the Thames Basin Heaths Special Protection Area and is moderate/good agricultural land (grade 3). It is located within Flood Zone 1 (low risk).

Assessment of Site Opportunities and Constraints
Outside Guildford town centre, established urban areas, inset villages and identified Green Belt villages, the site is in a very sustainable location. It is adjacent to Wanborough Railway Station which has two services an hour to Guildford taking just 7 minutes and two services an hour to Aldershot taking 11 minutes. A regular bus service also runs down Glaziers Lane (with a bus stop next to the site) linking the area to Guildford, Aldershot and Woking. The site is also only 2 miles from the Puttenham junction of the A31 Hogs Back giving excellent vehicular access to the rest of the borough and south to Farnham. It is well located for easy access to cycling routes.

Site Planning History
The site was identified as potential development area H10-B in the Green Belt and Countryside Study. It scored three against the purposes of the Green Belt and is ranked 22nd in terms of sustainability criteria. The site was classified as suitable, available and viable for residential development in the Strategic Housing Land Availability Assessment (SHLAA reference part of site 2010). It was also included within the Local Plan Issues and Options (reg 18) document and given the reference 68. This document concluded that if sufficient housing land cannot be found in the urban areas and village settlements, this site is potentially suitable for residential development.

Suitability for Inclusion within the Local Plan 2016
As discussed in section 2, the Local Plan submission proposes a number of large urban extensions and new settlements to deliver the levels of assessed housing required over the 15 year plan period. Many of these sites are dependent on infrastructure improvements which are yet to be agreed with the Department of Transport. Therefore, the majority of the housing proposed is back-loaded to the later years of the plan and may not be deliverable within this time period at all.

There is a shortfall within the Local Plan submission of housing which could be delivered in the first five years of the plan period. This site could help reduce the shortfall as it is within a very sustainable location, available for development and deliverable within 1 to 5 years. It has been assessed previously and found by the Council to be suitable for residential development should sufficient housing land not be found in urban areas and village settlements. The Local Plan submission does not meet this requirement and therefore the site at Glaziers Lane should be promoted by the Council.

Comparison with alternative sites allocated within Normandy and Flexford
The Local Plan submission allocates two sites in Normandy and Flexford for residential development. Policy A46 is a large village expansion between the two settlements and will be of mixed use including 1,100 new homes. Policy A47 is a site on Land to the East of the Paddocks, Flexford and is allocated for 50 dwellings. Direct comparison between these sites and the land at Glaziers Lane is clearly difficult given the differing scales of development but this site will have considerably less impact on the landscape and ecology.

An assessment of the landscape impact of development on these sites has been undertaken by Jon Etchells Consulting; a practice registered with the Landscape Institute, with extensive experience of landscape design and assessment. With regard to A47 he notes;
“The landscape to the west of Glaziers Lane is very different; it is more rural, relates far less to the settlement edge and is of much higher quality. It is in productive agricultural use, is expansive with long range views across it, and contains a number of large areas of Ancient Woodland. Development here would have significant adverse effects on the landscape, over a wide area.”

And concludes that;

“This large scale development would be likely to have adverse effects on the setting of the nationally designated landscape of the Surrey Hills AONB, as it would cover a large area and would include some large scale buildings for the proposed secondary school, which is intended to be at the southern end of the draft allocation site, closest to the AONB. This potential effect would be increased significantly if the AONB boundary were to be extended to the north into the AGLV, as is currently under consideration.”

In comparison, the landscape of the application site is small scale, enclosed and strongly related to the settlement edge. It contains no valuable landscape features, and would have no effects on the setting of the nearby AONB by virtue of its limited extent, buildings of residential scale only and screening along its boundaries.

The site at A47 is similar in landscaping terms to the site at Glaziers Lane as it abuts the settlement, is well screened and comprises residential garden and paddocks. However, the majority of it is designated as a SNCI and lies within an area identified as a ‘water vole alert area’. A stream cuts through the centre of the site and potential mitigation measures may restrict the actual developable area. It appears unlikely, therefore, that this site can deliver the number of houses proposed and it seems somewhat perverse for the Local Plan to designate an area for nature conservation value, but also propose its development, if there are alternative sites such as land east of Glaziers Lane available.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: A9Rei4p70_11mafdn_vs.jpg (198 KB)
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H1: Homes for all
It is agreed that new residential development should make the most efficient use of land whilst responding to local character, context and distinctiveness. This said, some existing housing areas in the borough were developed at a time when there were not the constraints on available land that exist today and as a result are low in density. To limit the impact on the countryside and reduce future incursion into the Green Belt, developers should be encouraged to increase density where this will not impact on the character of the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/18689  Respondent: 15619201 / Michael Conoley Associates (James Deverill)  Agent: 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H2: Affordable homes
The provision of affordable housing is dependent on it being financially viable for developers to build market housing. Whilst the policy notes that affordable housing contributions may be provided off-site, or with payment in lieu where the Council agrees that on site provision is impractical, the 0.17ha site area criterion set by the policy triggering affordable housing provision is so restrictive that many sites appropriate for development will not be financially viable. Therefore, financial viability studies will be required even for the smallest developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/18690  Respondent: 15619201 / Michael Conoley Associates (James Deverill)  Agent: 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy P2: Green Belt
It is agreed that the forthcoming Green Belt Supplementary Planning Document (SPD) should set out guidelines on the scale of development that this likely to be considered appropriate and how this is calculated. This will help provide greater clarity to applicants wishing to extend their homes although the figures should still be considered in relation to other design criteria.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2: Borough Wide Strategy
The West Surrey SHMA found that the housing shortfall in the borough was much greater than expected. It concluded that:

"Taking account of these adjusted household formation rates for younger households and adjustment for student growth, the SHMA draws the following conclusions on the overall need for housing across the HMA to be at 1,729 dwellings per annum with need in Guildford at 693 dpa."

To make up for this shortfall, the plan makes provision for 13,860 new homes which would average 924 dwellings per annum. This is a higher level of development than experienced in Guildford borough during the previous Local Plan period and higher than the assessed need to build flexibility into the plan. The Annual Housing Targets set within this policy average out over the 15 year period at the required 693dpa but delivery is back-loaded to the latter years of the plan. Over the first five years a target of just 2,950 has been set which equates to a delivery of 590dpa. This is considerably less than the assessed need and therefore contrary to the requirements set out in paragraphs 47 to 49 of the NPPF.

We consider that to comply with the requirements for a deliverable five year supply of housing land, the Council should promote additional sustainable smaller sites on the edges of existing settlements that would be deliverable in years one to five of the Local Plan period.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/18686  Respondent: 15619201 / Michael Conoley Associates (James Deverill)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Vision and ambition

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Spatial Vision
The plan provides for the delivery of 13,860 additional homes by 2033. Considerable effort has been undertaken by the Council to understand the borough’s housing needs through the Land Availability Assessment (LAA) and Strategic Housing Market Assessment (SHMA) and, for the purposes of this representation, we do not seek to challenge the Council’s conclusions in this regard.

We agree that the preferred location for this development should be existing brownfield sites however; only 2,800 units are proposed by the plan for the urban areas which take advantage of the existing infrastructure and services. The plan notes the benefit of these sites is that they reduce the need to travel and offer alternative modes of transport to the private car.

Significant expansion is also planned to the Guildford Urban Area and around Ash and Tongham which takes advantage of the existing infrastructure and services.

Much of the remaining provision is in a new settlement at Wisley (2,000 homes) and a significant expansion at Normandy and Flexford which will provide over 1,000 homes. As noted within the plan, the delivery of some of these major sites is dependent upon major improvements to the M25/A3 interchange and the A3 around Guildford and therefore the houses will not be able to be delivered until the later years of the plan. Some of the larger sites may not be deliverable within the plan period at all should agreement not be received from the Department of Transport for the infrastructure improvements. Therefore, it appears the delivery of the required 13,860 additional homes may not be achieved by this plan.

The plan also proposes almost 1,200 dwellings on non-strategic sites within and around existing villages and over 750 dwellings as extensions to existing villages. We agree that this is important because it will help offer a variety of housing in villages and help contribute to maintaining and improving local services and village life. When Michael Conoley Associates have organised Public Consultations for small residential developments in villages in the borough, the overwhelming feedback from residents is their support for schemes which will improve the facilities and services in their village and provide lower cost housing that their children may be able to afford and allow them to continue to live locally.

A number of smaller more sustainable sites on the edges of villages have been identified in the past by the LAA and the Green Belt and Countryside Study but omitted from the Proposed Submission Local Plan, the Council apparently having concluded that the provision of the larger sites will limit the impact of new development to a few pockets within the borough. Given the majority of the proposed housing will only be deliverable towards the later years of the plan period (if ever) we consider that additional smaller allocated sites should be included within the document to meet the supply requirements for the shorter term (first five years in particular). As discussed in 2.2 it would make sense that the small sites which are promoted are those that are located in villages which benefit from existing facilities and offer alternative modes of transport to the private car to lessen the impact on the overstretched road network in Guildford. As an example, both Normandy/Flexford and Ash/Tongham benefit from railway stations with regular and direct access to Guildford on the North Downs Line. This will improve following the addition of the proposed station at the Surrey Research Park.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A26 Blackwell Farm There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints. Blackwell Farm is located entirely within the green belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Blackwell Farm performs all five functions of green belt, and fulfils purposes 1, 3 and 5 very strongly. Purpose 1 - "checking the unrestricted sprawl of large built-up areas". There is huge pressure to develop on the western edge of Guildford; the University of Surrey has stated publicly that its key objective is to develop the whole of its landholdings, stretching west to Flexford Farm. This, combined with the indefensible boundary being proposed (a
hedgerow rather than the existing belt of ancient woodland), will put more of the green belt and the Surrey Hills Area of Outstanding Natural Beauty (AONB) at risk of future development. Purpose 3 “assists in safeguarding the countryside from encroachment” - the proposed movement of the green belt boundary on the west of Guildford to allow for development of the University in 2004 resulted in the encroachment on countryside and the loss of working farmland (including some Grade 2) at Manor Farm. The proposed future change in the boundary would result in further encroachment and the loss of farmland including further Grade 2. The proposed road development with access road from the A31 would also effectively cut off farm access to the south of the development area leading to further urban influence on this countryside. The University’s stated key objective is to develop land, which includes Chalkpit and Wildfield farms leading to the risk of further boundary change and further encroachment in future years. Purpose 5 - “assists in urban regeneration by encouraging the recycling of derelict and other urban land” Whilst all green belt assists towards this purpose, the ownership of this land by the University of Surrey with its extensive landholdings within the urban boundary (including land it leases to the Hospital and Holiday Inn, the Surrey Research Park, Hazel Farm as well as two large campuses) means that the location of Blackwell Farm within the green belt plays an even greater and direct role in encouraging the more efficient usage of urban land. Stopping development on Blackwell Farm would result in the University of Surrey investing in, and regenerating, land in its ownership and delivering its commitments following the 2003 boundary review (including 270 homes for key workers, 3,125 student residences and releasing further accommodation at Hazel Farm). The University has 17 hectares of surface car parking that could be built over with offices and flats. This is a more sustainable option than building over open farmland (largely grade 2 and 3a) within the green belt. The Blackwell Farm development would result in harm to the Surrey Hills Area of Outstanding Natural Beauty (AONB), harm to an Area of Great Landscape Value (AGLV), and harm to the setting to the AONB. (Blackwell Farm forms the views into and out of the Hogs Back ridge). The NPPF is clear that AONBs should be afforded the highest level of protection in relation to landscape and scenic beauty. All development proposals within and adjacent to the AONB must conserve or enhance its special qualities. The NPPF also makes it clear that applications for major development in the AONB will be refused unless exceptional circumstances are demonstrated and the development is proven to be in the public’s interest. Guildford Borough Council has not shown that the proposed housing development or the extension of the Research Park, or the proposed link road from the A31 to Gill Avenue, is in the wider public interest. Indeed, the increased traffic through the already congested Egerton Road/Gill Avenue junction, which would result from the development, would impede emergency vehicles travelling to the Hospital and this would be very much against public interest. GBC’s Policy P1 states that, “The Surrey Hills Area of Outstanding Natural Beauty (AONB) will be conserved and enhanced to maximise its special landscape qualities and protect it from inappropriate development. All proposals will be considered against whether they conserve and/or enhance the setting and views of the AONB”. I question how the proposal to carve a new two-lane carriageway through the AONB fits this policy, or meets para 115 of the NPPF? Finally, nearly the whole site has been identified as a “candidate area” for AONB status in the Landscape Evaluation Study commissioned by Compton, Worplesdon and Wanborough parish councils. Therefore, the entire site should be treated as though it is within the AONB during this local planning process. The access to the proposed Blackwell Farm site will put additional peak hour pressure on two of Guildford’s worst congestion “hot spots”: the A31 (Hog’s Back) and the Tesco Roundabout on Gill Avenue. GBC’s proposal to create a new major route into Guildford from the west at, or close to, the Down Place private driveway, and to make this the main access to the planned Blackwell Farm development, does not appear to have been thought through. There are queues stretching back from the Farnham Road Bridge as far as the Down Place driveway entrance most weekday mornings and any traffic generated by the new development would not be able to clear the junction. In order to accommodate the volume of traffic using the new junction (generated by residents of the new housing estate, employees at the Surrey Research Park, Hospital and University, and visitors to the new school/supermarket), there would almost certainly need to be a roundabout (rather than the proposed traffic-light controlled junction) and GBC has ruled out a roundabout on grounds of landscape impact and traffic. The secondary access to the site at Gill Avenue also presents problems, and as GBC states in its Transport Assessment (14.9.5), changes planned for the Tesco roundabout will not mitigate against the increased level of traffic through the junction as a result of the Blackwell Farm development, and this in turn will impact on the Egerton Road/Gill Avenue junction, which serves the Royal Surrey County Hospital. I question whether it is responsible to allow a development that would impede emergency access to an A&E department and a major incident unit. The traffic impact resulting from the development of Blackwell Farm on the strategic road network would not appear to be properly assessed but it would be alleviated in part (but not completely) by widening the A3. However, timing and funding for this work is unclear so there would be many years of traffic chaos before any widening took place (if indeed it does). More significantly, the widening of the A3 would create noise and environmental impact on the neighbouring residential areas of Onslow Village and Beechcroft Drive and a six-lane highway would cause greater severance between Guildford and Blackwell Farm and areas to the west. The NPPF states in Section 6 para 47 that local authorities should “identify a supply of specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15”. In a footnote to this, it further adds, “To be considered developable, sites should be in a suitable location for housing development and there should be a reasonable prospect that
the site is available and could be viably developed at the point envisaged.” I consider that the proposed access arrangements to Blackwell Farm are wholly inadequate for a development of this scale and thus the site cannot be “viably developed”.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of land from Greenbelt for the provision of two traveler pitches on Puttenham Heath Road to 'enable delivery'. The area warrants Green belt status and should remain in Green Belt. Removal is a big step towards the eventual development of permanent accommodation, which would result in loss of the two pitches.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy D1 Making better places I object to the absence of any reference to vernacular or historic design guidelines, even in Conservation Areas. Most of the borough, especially the rural areas, has vernacular design guidelines that are available to give suggestions as to appropriate design. These should have mandatory planning force. The monitoring of this policy is inappropriate. Why should this policy result in a reduction of the number of appeals for poor design? Should it not result in better-designed buildings?

I object to Policy D2 Sustainable design, construction and energy. Sustainability should be an overarching ambition, conditioning the whole local plan and running through it, as claimed in the NPPF, “like a golden thread”. It should be set out clearly in Policy S1, not buried away as a minor detail in Policy D2. This policy amounts to “greenwashing”, expounding aspirational environmental targets while ignoring the plan to build dormitory towns across the Green Belt that are environmentally and socially unsustainable. These settlements will bring vastly increased car use and will lead to unacceptable traffic congestion, overstretched social infrastructure, and more greenhouse gas emissions, noise and light pollution. This policy should not be just about saving energy but about preserving the borough’s stock of natural capital, especially the countryside, from attempts to rig the housing market. This policy’s emphasis on Combined Cooling Heating and Power and communal heating networks is difficult to understand, since no such networks are available locally.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy D3 Historic Environment. This policy clashes with the strongly pro-development agenda of the rest of the plan and fails to address the contradiction. History is unamenable to improvement, so the policy should commit the Council firmly to protecting and preserving our heritage assets from development. Instead, the specific policy pledge to “support development” that might “enhance” heritage assets leaves wide scope for abuse in the form of destructive commercialisation and financial leveraging of relevant sites. This policy is based on the false premise that Guildford’s heritage is inherently in decay. This is a developer’s charter – a short step away from the idea that the historic environment needs to pay its way to be preserved. The Council’s reviews of Guildford Museum and the Electric Theatre support this interpretation. Whatever the “reasoned justification”, the actual policy wording in the blue box leaves too many loopholes. Development close to historical assets is harmful and should be expressly prohibited. This policy fails to meet the requirements of NPPF paragraphs 126 and 131-133.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/15751  Respondent: 15623745 / Stella May  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4
I object to policy D4 Development in urban areas and inset villages. This policy that does not address the opportunity for building in the urban areas. The plan envisages that 40% of homes built will be “affordable”, but this does not provide any accommodation for low-paid workers, for example, those on the minimum wage, who cannot afford to buy so-called “affordable” homes or pay an “affordable” rent. There is a need for some expansion in social housing, especially in urban areas, where there is a greater concentration of low-paid workers such as those employed in the retail, warehousing and distribution sectors (all of which this plan aspires to expand). The number of homes planned in the urban area is much too low. There is a glaring need for regeneration in many urban areas, particularly Guildford Town Centre but this is ignored in favour of building homes on green-field sites instead. This will not address urban housing needs. It is also unsustainable, since building outside the town does disproportionate harm to road traffic, air quality and overstretched infrastructure. The plan envisages a large expansion of the retail sector, but this is hard to justify because the sector is in rapid and continuous decline.

THE BROWNFIELD OPPORTUNITY
Yes, we need a new Local Plan for our borough in order to provide a development strategy within which we can accommodate our local housing, economic and environmental needs. But first we must make good use of our urban brownfield before we consider building in the Green Belt or countryside. Paragraph 80 of the NPPF clearly states that Green Belt serves a key purpose, “to assist in urban regeneration, by encouraging the recycling of derelict land and other urban land”. In order to comply with central planning policy we need a brownfield strategy that states clearly. “We are committed to a brownfield first initiative whereby all applications on previously developed land are given fast track priority and every facility to promote development for residential purposes and employment purposes in order to satisfy the needs of local people. In parallel a low CIL incentive should be given for all residential development on brownfield land. In response to the detailed objections received in the Regulation 18 process of the 2014 Local Plan and also in accordance with government policy a Guildford brownfield land register should be urgently compiled showing address, ownership, occupier, current use and detailed planning brief. Perhaps someone could be appointed at GBC with a clear briefing to deliver brownfield targets of housing and employment space. GBC needs to accelerate the residential redevelopment at Woodbridge Meadows, Walnut Tree Close and the Station within the next 5 years.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to policy E1 sustainable employment. I note that there is a significant reduction of between 71% and 79% in the previous job target and resultant 79% reduction in employment space in response to the many objections lodged in 2014 against an unsubstantiated agenda for economic expansion in the last draft and based on new findings by Aecom in the latest ELNA 2015. I have concern as to the ill-informed clustering of all B classes in terms of the clarity of market evidence required to inform effective planning and a failure to provide a clear understanding of business needs required under Section 160 of the NPPF. I also note the dramatic reduction in assessed demand by two Employment Land Needs Assessment Reports carried out under the same terms of reference within a period of 2 years which calls into question the general reliability of the process of collection and interpretation of data in the overall forward planning process by GBC. I am concerned however that the research undertaken by Aecom is generally superficial and lacks sufficient detail and analysis between B1a, B1b, B1c, B2 and B8 use classes and that no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of office, research and development, light industrial, general industrial and warehousing and distribution floor space. No proper analysis has been made of data held by GBC in respect of different B classes in terms of planning applications granted or evidence gathered by the economic development function at GBC and no robust assessment of local market demand apart from fairly brief references to freely available market research undertaken by commercial estate agents such as Lambert Smith Hampton covering a much wider area. GBC appear to fail to appreciate the fundamental rationale of the Use Classes Order as a planning tool in terms of useful property market research or forward planning. What we are left with is a fairly clumsy and poorly informed plan which clusters B classes without any appreciation of widely different employment impact and economic sustainability. E.g. B1 generates at least 5 times as much employment as B8. The lack of appreciation as to the opportunity for widely different uses being generated within B class clusters defeats the whole point of proper planning of employment uses and can significantly endanger previously good planning put forward in the previous 2003 plan. E.g. the creation of a research and development park linked to the University but now has the threat of being downgraded into a general business park (see below). Little regard has been given in the plan to the economic reality of falling demand for B2 industrial space which is clustered with other B classes almost randomly throughout the plan. Little regard is given to the opportunity of B1b space as an opportunity for research and development which needs to be nurtured and preserved without the detrimental and confused clustering with other B classes both in terms of planning and promotion of a research hub. I note that the past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 derived from VOA analysis and that the calculated annual floor space demand is 0.7% over the plan period up to 2033. I support the concept of seeking increased investment in our local knowledge-based, high technology economy. This will provide well paid, creative jobs and generate the funding necessary to pay for the infrastructure and environment this sort of industry requires. We need to distinguish between wanting to increase the added value of the economy and physical expansion, especially given the scarcity of land in Guildford. Guildford is not the place for large space hungry businesses. So I should target high added value small and medium sized enterprises rather than the headquarters of larger corporations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15743  Respondent: 15623745 / Stella May  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to policy E2 location for new employment floor space I object to the policy of expanding the Research Park onto
Blackwell Farm and I do not believe there are exceptional circumstances to justify incursion into this permanent and high
quality area of Green BelThe Surrey Research Park currently extends to 65,000 sq m. There is already granted consent to
expand to a further 9,000 sq m (14%)The past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to
2012 based on ELNA 2015 derived from VoA analysis. The ELNA 2015 calculated annual floor space demand is 0.7%. The
data point for our analysis is today in 2016 so we have 17 years to go to the end of the plan period. The necessary growth in
floor space over the plan period is therefore 17 years x 0.7% = 11.9%. There is currently 14% expansion space already
available. The proposal by GBC to expand the 65,000 sq m by 9,000 sq m (existing allocation) with an additional 35,000 sq
m amounts to an increase of 67% of the Research Park which is not required. The Research Park is currently developed at a
density of 25% plot ratio. The majority of existing buildings are 2 stories giving a developed floor space plot ratio of
12.5%. The existing Research Park has the opportunity to markedly increase its density without infringing any Green Belt
land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the
top potential to match the existing densities of existing academic buildings on the university campus which are three to four
times higher. Together with the existing expansion of 14% through existing consents and the opportunity to increase its
density the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university. A
preferred location for increased B1a and B1b space would be in the Town Centre close to housing and a convenient
transport hub.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy E3 maintaining employment capacity I object to the ill-informed policy of resisting change of use from
B1a to residential because it flies in the face of positive property market solutions for the regeneration of brownfield land.
It is also contrary to current government policy which has recently been reaffirmed and permits a change of use from B1a
(offices) to C3 (residential). I believe that the existing government policy which has recently been made permanent of
allowing change of use from B1a to C3 is sound.

Many office buildings reaching an age of more than 30/50 years become redundant in terms of energy compliance making
them illegal to occupy for employment purposes and the cost of refurbishment makes them redundant and uneconomic. The
reality of market demand is that the gross development value of refurbished residential space is in excess of the gross
development value of refurbished old office space in many locations (this gross development value assessment is supported
by the analysis by property consultants GVA in the supporting evidence within the Allies and Morrison Masterplan for
Guildford dated 2015). To resist change from B1a to C3 is contrary to the concept of brownfield first for residential
development schemes. To resist change from B1a to C3 in Strategic or Significant Employment Sites is contrary to the
concept of integrated mixed use communities whereby the journey to work is minimised. London has led the way with
significant residential schemes being created from redundant office stock. A good example is the South Bank in London
adjacent to Waterloo Station where in 2005 the Shell Centre has been converted into flats. Another early example is the
2000 scheme at Metro Central Heights at Elephant and Castle where the old Alexander Fleming House was converted to
435 flats by St George. GBC needs to adopt more modern trends and policies.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy E4 Surrey research Park. I support the maintenance of research, development and design activities, in any science, including social science, that is complementary to the activities of the University of Surrey at the Surrey Research Park. I object however to the completely unnecessary expansion of the Research Park into a larger Business Park. I believe that the planning policy going forward for the Surrey Research Park should be to maintain and enhance the integrity of its research base allowing for the economic value add to the local economy of knowledge and technology transfer from the University. I believe that B1b (should be the primary use class for the Research Park and that applications for B1a should be resisted due to the danger of dilution of the core purpose and reputation of the park. I object to the inclusion of B1c uses which is inappropriate and unnecessary. Research parks based on the early UK technology transfer exemplars of the Cambridge and Oxford need careful monitoring, nurturing and protection to ensure the integrity and quality of the park is maintained and the park continues to be a destination for innovation and enterprise. There is a danger for research parks to be overwhelmed by short sighted development opportunities being taken by park managers provided by standard office activities and administrative functions which in time turn them into standard business parks which can be found anywhere in the country. Their relative low density and attractiveness make them targets for “any other” office user. Research parks that lose their way stop being the location of choice for new innovative enterprises. I hope the Surrey Research Park in Guildford remains focussed on a broad spectrum of scientific research including computer science, bio-chemistry, design, space-science, eco-science, health science, software development, laser technology, media-science, artificial intelligence, robotics and super-manufacturing Monitoring indicators should include new start-ups and new patents created Facilities should be provided whereby new small businesses can secure premises under subsidised licence fee arrangements with no onerous rent or lease commitment I support the idea of a variety of sizes of unit including some small units (between 15 – 80 sq m) bearing in mind one workstation is 10 sq m Consideration should be given to the concept of shared “enterprise hubs” where individuals can take as pay go workstations in shared spaces similar to touch down business centres similar to the “enterprise village” concept I object to the policy of any new extension of the research park more than the existing 14% already provided for within the park or within the footprint of the park. The Surrey Research Park currently extends to 65,000 sq m There is already granted consent to expand to a further 9,000 sq m (14%) This space has been available for 10 years and is still to find a taker. The past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 based on ELNA 2015 derived from VoA analysis. The ELNA 2015 calculated annual floor space demand is 0.7%. The data point for our analysis is today in 2016 so we have 17 years to go to the end of the plan period. The necessary growth in floor space over the plan period is therefore 17 years x 0.7 = 12% which is less than the current expansion space of 14%. The research park is developed at a plot ratio of 25%. This could be increased to 50% within the same footprint of the existing park without damage to its amenity. The actual current land use for development in the park is in fact only 12.5% because most buildings are 2-storey.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to policy E5 Rural Economy In my opinion this policy should only apply to small-scale development in rural areas which means development of less than 100 sq m (gross) which is in keeping with and the permanence and amenity of the green belt. Use of rural areas for town centre uses without applying the sequential approach is against the principles of localism that require local people to be consulted and heeded, not ignored. Villages need protecting in terms of both design and scale and character. Previous commitments to improved high-speed broadband and mobile phone coverage have now been diluted, despite general support. This disregards the responses from the 2014 public consultation.

The consultation process was not well publicized; many Parish Councils had no idea of this. The emphasis on voluntary efforts and greater community efforts is far removed from reality for this 'solution' was presented for almost every aspect of rural life from managing crime to looking after elderly to education and more besides. Villages by nature are usually small and the percentage of the population who are able to do voluntary work is smaller still. The solution is therefore unworkable. The results of the consultation were not publicized but were instead collated and summarized and bore no resemblance to the submissions I had sight of.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to policy E6 the leisure and visitor experience. I believe that the importance of a visitor attraction hub could be much better articulated. Guildford has great potential to become a “must see” destination for tourists and visitors. Surrounded by the natural beauty of the Surrey Hills, it is already distinguished as an historic county town. The historic part of the town should be exploited to the full creating a real sense of vibrancy and atmosphere. This should be linked to the attractions of the Museum, the Castle, the Wey and the historic High Street including its views of the Hogs Back. .

The economic impact would create big advantages for both the leisure and the niche speciality retail sectors in the town. Given the local and wider catchment of the town Guildford should strive for high quality definition making it a great centre for people to live in and visit. Guildford the historic “Gateway to the Surrey Hills” has far more potential than Guildford just any other stereotypical centre found anywhere around London. Re-branding walks, such as a new “Pilgrims Trail” similar to the Patriots trail in Boston USA with marked yellow footsteps leading from the station to the River and up through the historic heart of the town. There is a need to make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms. There is a need to help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local
tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to RHS Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently bypass Guildford to go to Bath, Oxford or Cambridge instead. THE TOWN CENTRE OPPORTUNITYI do not consider that the target of 1,172 homes in the town centre takes account of the need and demand for housing or the opportunities that brownfield sites present for increasing the residential development in the core of the town which will in itself help to sustain the retail core by increased economic impact. What the town centre needs in terms of urban regeneration and to attain a thriving night time economy is more residential development. The Town Centre policy needs to maximise the potential for residential development on brownfield and include as an absolute minimum the 2,551 units proposed in by Allies and Morrison for the town centre included in the masterplan 2015. The reality is that the Town Centre and other areas of brownfield in the borough has the capacity to provide significantly more than this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy H2 Affordable homes. “Affordable” homes, under national definitions, means homes that are sold or rented at 80% of market value. Even if 70% of these are rented as proposed, the level of market prices in the South-East means (even post-Brexit) that these homes will remain well beyond most people’s means and that starter homes will not become available for local people. In addition, the viability clause (4.2.40) means that in practice the policy could be unenforceable. Private financial viability has no place in a public policy and should be removed. It is a get-out-of-jail-free card for developers that will sacrifice countryside for no local benefit. I question the assumptions that seem to underlie this policy: that people have a right (rather than a legitimate aspiration) to own a home; that they should be encouraged to live locally in enormous debt (contradicting the Government’s policy of encouraging labour mobility and development in poorer regions, where homes are cheaper); that increasing local house-building will reduce overcrowding and congestion (rather than simply suck more people into the borough); and that it will stem the rise in house prices (even though 13,860 new homes will be a drop in the ocean, given that prices are determined by an infinite demand-pull from London, whose population is increasing by 100,000 a year, and by the currently low cost of capital for overseas and other buyers). The weak mechanisms proposed in the plan might influence the market in a more remote part of the UK, but not here. This policy’s version of “affordability” is just a smokescreen for pushing through more development generally. Building more homes in Guildford cannot increase real affordability given the overhang of the London market.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy H3 Rural Exception Homes. This is a type of Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix”, this can include “market” housing – i.e. normal commercial development which in Guildford usually means expensive executive homes. This policy means building anywhere, and ignoring all historic planning restrictions. The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/15752  Respondent: 15623745 / Stella May  Agent:
I object to policy I1 Infrastructure and delivery Most of the borough’s infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. Yet this plan’s commitment to building housing estates across the Guildford countryside will mean either major infrastructure investment that no-one is prepared to pay for or else a catastrophic and simultaneous collapse in transport, educational, medical, energy, water and communications services. The plan targets greenfield sites – requiring heavy infrastructure investment – in order to generate CIL income necessary to meet an infrastructure shortfall that is already serious. The current draft CIL scale also encourages development on greenfield sites rather than brownfield and will reduce or negate developer's obligation to sell a percentage of homes at 20% below market value. The policy wording says nothing about roads and traffic. The Council’s methodology for assessing infrastructure needs in this area is inadequate, identifying only the tip of an iceberg of existing congestion. Compton Village is already close to tipping point, yet it will see a significant increase in traffic volume, will be completely congested and yet no plans exist to mitigate the problem. The schemes referred to in this policy barely solve existing congestion and are inadequate when development takes place. The full impact on local road networks has not been fully considered. Some proposed development locations would require highway schemes that involve demolishing property and road-widening in residential areas to solve the resultant congestion. The A3 improvements are not guaranteed to take place but they are being used to justify removing large areas from the Green Belt before detailed traffic assessments have taken place. These detailed investigations are being deferred until the planning application stage and will be left to developers to prepare. If a site then proves to be unsustainable its Green Belt protection will have been lost for no reason and unsuitable development will take place by a more insidious process. Compton Village will actually incur increased traffic flow as a consequence of A3 widening according to the study, yet as was pointed out above, no solutions are in place to improve the situation. Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritising greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognising this as a key issue, the plan makes too many assumptions, not least being the verbal promise that development will not take place without infrastructure preceeding it. It is not clear how this will happen and is not in the Plan, as it should be, if it is achievable. The highways network is under stress at peak times in many parts of the borough. Queuing is the daily experience of drivers going to and from work. The local plan recognises the problems in para 2.14. Much of the road network is single-carriageway, and junctions act as constraints. The key evidence on future traffic conditions is provided in the Strategic Highway Assessment Report (SHAR) which summarises the results of the tests carried out by Surrey County Council at the request of GBC. Five scenarios were examined using SCC’s strategic traffic model. Scenario 1 contains all developments and planning permissions from 2009 to date. As such it corresponds to today’s circumstances, and describes the current unsatisfactory traffic conditions in peak periods. Scenario 5 represents the position at the end of the plan period, including all development and highways schemes in the local plan. The results of the analysis show that there will be widespread congestion in the morning peak hour across the network. The key strategic routes, the A3 through Guildford NE bound, and the M25 between Junctions 10 and 11, are shown to be at or over capacity. The summary network statistics presented in the SHAR, while useful, require some interpretation because the analysis of vehicle-hours is derived from link speeds only, and does not reflect junction delays and queues. The tables that show the ratio of flow to capacity and level of service are especially helpful to gaining an understanding of the conditions on the network in the forecast. Where the forecast traffic volume is above or close to capacity, flow becomes unstable and there is congestion. The SHA results provide evidence that, in 2031, congestion will be worse than it is today on much of the network. It is the case that the traffic modelling does not take into account the potential for increased use of other modes, but the trip rates used for developments already have built in the typical level of use of other modes, and services will be required to meet that need. It is also the case that the model does not allow for park and ride, which would improve matters in the town centre, as discussed below. In order to gain an insight into conditions across the network, it is necessary to combine information from several tables in the SHAR. Table 4.5 shows that the M25 and A3 will be at capacity in Scenario 5. The other roads that will have poor levels of service.
include those in Table 4.5 but also those in 4.12 (except the A3) and those in Tables 4.3 and 4.4 with levels of service E and F that will not be given some relief by improvement of the A3 in Scenario 5. Paras 4.10.3, 4 and 5 point out that there will be increased congestion. Given that the starting point is unsatisfactory, there can be no expectation that the schemes in the Infrastructure Development Plan will provide an overall improvement. There will be some local benefits, such as the Ash rail bridge for example, but in general conditions will be as bad and in many places, such as Compton Village, worse. So the statement in the SHAR para 4.2.5 that ‘the combined mitigation as reflected in Scenario5...indicates that at the strategic level it accommodates the additional PSLP demand’ needs qualifying – ‘at the cost of a lot of queuing’ and makes no mention of the impact this will have on pollution, which is already a known problem at the A3 end of Compton. The cumulative effect of the additional traffic generated by the developments in the local plan will be to increase congestion, even with the proposed highway schemes in place. More detailed analysis of the junctions and queuing is required. So we question the conclusion that the developments would have “an acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF”. Appendix 3 of the Transport Topic Paper shows the phasing of housing development and transport infrastructure. The major scheme being considered for the A3 between the A31 and the A320 is scheduled for delivery in the period 2023/24 to 2027/28. The strategic developments at Blackwell Farm and Gosden Hill Farm are shown as being phased in from 2021/22 onwards. The Garlick’s Arch development is shown as starting in 2019/20. Therefore, there will be a period in which the existing A3 has to cope with the additional demand arising from those developments before extra capacity is provided. The following comments regarding the strategic sites are taken from the SHAR: Blackwell Farm – there will be congestion at the A31 junction, and the problems at the Tesco junction, and the Egerton road/Gill Avenue junction (para 4.9.5). Traffic is likely to access the Surrey research park and the RSCH through the development (para 4.7.3) Gosden Hill Farm – there will be an increase in traffic through Burpham. There will be pressure on the A3100/B2234 roundabout (paras 4.7.6, 4.7.7 and 4.7.8). Wisley – traffic will increase on minor roads to gain access to the A3 (N and S bound) and other routes (para 4.7.11). The development will add more traffic to the A3. The Burnt Common slips help alleviate the traffic through Ripley according to the model, but queuing on the A3 could mean this does not happen (para 4.7.14). Normandy/ Flexford – the report has little to say about the impact of this large development. The increase in flow on Westwood Lane is noted (para 4.5.7). Tables 4.10 and 4.11 show junction delay reducing at the Westwood Land, B3000 junction, but an increasing at the Puttenham Hill/Millbrook junction. Ash – development in Ash is not specifically addressed, but there are major increases in traffic on a number of roads. The new rail bridge will bring relief (but traffic will move to the next junction). Slyfield – there are no remark relating to SARP, and as there are no additional trips shown in and out of the Slyfield residential zone in Tables 3.3 and 3.4, it is possible that this development has been omitted. There is a significant increase in trips to and from the Slyfield industrial zone, which will impact on the A320 and Clay Lane. Town Centre – the report has very little to say about the town centre. It is evident that the model is forecasting severe congestion on the approaches to the town centre, such as the A281, the A31 Farnham Road, and Woodbridge Road for example. No mitigation measures are planned. And in the Transport Strategy, GBC states that the intention is to adopt Allies & Morrison’s Scenario 2 which would have the effect of significantly reducing the capacity of the town centre road system. The implications have not been examined, but traffic using the A281 from Waverley, for example, would be affected.

The B3000 will be severely affected by development schemes and will not benefit from road improvements. It is essential that the impact of all change to road networks are looked at in conjunction with one another for any survey to be meaningful. The local plan does not state an objective for congestion. The two strategic objectives that are included for infrastructure refer to supporting sustainable development and delivering a balanced system. However, in para 2.15 there is an aspiration expressed about opportunities ‘to improve the performance of the road networks through transport infrastructure and service improvements’, which taken with the previous paragraph includes reducing congestion. The evidence so far shows that this will not happen. The mitigation proposed is not sufficient to overcome the problems that will be caused by the level of growth in the local plan. Congestion will worsen. The network will lack resilience and be vulnerable to disruption due to incidents. Minor roads will have to cope with a lot more traffic, for which they are unsuitable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy i2 Supporting the Department of Transport’s “Road Investment Strategy” This policy is too vague and unrealistically optimistic. Decisions by Highways England on improving the strategic road network (the M25 and A3) are still years off. The Council have suggested a very expensive tunnel under Guildford, but there is no evidence to show that this is a realistic option. Even if Highways England accepted this (which is highly unlikely in the post-Brexit public spending climate) it would not be built until the end of the plan period at the earliest. Other, less expensive A3 improvements, and changes to the Junction 10/Heathrow stretch of the M25, will also take years to agree and complete. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is foolhardy. Surrey is the most congested county in England, with 683 people per square kilometre, compared with an English average of 413. This policy will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone). This is a major development constraint that should have been applied to the OAN to constrain the housing target.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy I3 Sustainable transport for new developments This is another aspirational policy, not grounded in the practical realities of daily life. It consists of a standard, box-ticking list of local government measures unrelated to the specifics of the plan. Like infrastructure, transport appears to be an afterthought; the policy fails in its essential job of guiding planning decisions, since it assumes development of any kind can be supported by sustainable transport. The sustainability of the dormitory settlements which the Council want built across the countryside depends on a general “modal shift” from private car use to walking, cycling and public transport. This is unrealistic. The proposed sites are often miles away from the nearest railway station. Bus services even in the largest villages are almost non-existent – just one bus to and from Guildford each day in the Horsleys and none at weekends. Since bus services depend on profitability, they cannot be expanded and the Council are not proposing to subsidise new ones. Rural buses are too slow anyway for busy people. Most rural roads in the borough are narrow, winding, hilly, potholed, muddy and unlit. Many flood badly and have no footpaths. The desired modal shift would require a comprehensive co-ordination of bus and train timetables with services every few minutes, seven days a week, to stops within walking distance of every home in the borough. This kind of integrated public transport system has been achieved in Switzerland, for instance, but only at huge public cost and thanks to a political consensus supporting state ownership of trains, buses and the post office, which delivers rural passengers as well as mail. There is absolutely no chance of this in the UK. The vast majority of the borough’s residents are not, in practice, able to cycle. This includes children, the elderly, commuters who have to look smart, the infirm, the unfit and people carrying goods or shopping of any kind. Dependence on walking and cycling discriminates against these groups, which include some of the most vulnerable members of the community. It is socially unjust. One in two working people in Guildford commute for up to 3 hours a day. They will not leave their cars for even part of their journey if it means
longer travel times. Park-and-rides are a welcome part of the transport mix but are too slow for commuters and others on a tight schedule. For an adult couple going shopping it is still cheaper to park in town. I like the idea of water buses but have concerns over the reality. The Wey is narrow and, with a river speed limit of 4mph, boats are too slow for anything but recreation. Except on the tideway, not even the Thames has such services. The addition of two new stations appears attractive but will slow down train journeys, which are already slower than at any time since the 1930s. Knock-on effects on localities where the new stations are built have not been worked out or presented. Ie. Cost of housing will increase.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy I4 green and blue infrastructure. This policy is a box-ticking exercise with no teeth to it. It sits oddly with the plan’s onslaught on the Green Belt. The plan to build on large areas of countryside and to inset villages will cancel out any benefits from extending the principle of enhancing biodiversity beyond Biodiversity Opportunity Areas. There is no mention of the value of wildlife gardening to biodiversity or the important role that larger gardens play in a village setting. ABSENCE OF POLICY ON RIVER WEY I object to the omission of a policy for the River Wey which was included in the previous local plan. The existing policy G11 from 2003 Local Plan should be included so that development within the River Wey corridor will only be permitted provided that: It protects or improves the special character of the River Wey and the Guildford and Godalming Navigations, in particular their visual, setting, amenities, ecological value, architectural and historic interest;The special character of the landscape and townscape in the corridor is protected or improved;Views both within and from the corridor which contribute to this special character are protected or improved;Where appropriate, public access is provided to and along the River and the Navigations. The Nature Conservation value of the site is protected or improved

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to policy P1 Surrey Hills Area of Outstanding National Beauty. This policy weakens existing protection when it should strengthen it. It is dependent on the Surrey Hills Management Plan. The latter welcomes housing development. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated. Much of my concern stems from the loose wording of the Policy, which in some places renders the policy ineffective, for example: “All proposals will be considered against whether they…” “All development proposals within and adjacent to the AONB will be expected to conserve or enhance its special qualities.” Terms such as “considered” and “expected” are not strong enough in prohibiting development proposals that do not conserve and enhance the AONB, and it is likely that developers will be able to use this loose wording to their advantage. Of particular concern is the paragraph 3, which begins: “Whilst the AONB designation does not preclude specific types of development in the Surrey Hills and proposals will be assessed on their individual merits…” This whole opening clause is unnecessary and almost invites development proposals. I believe that it should be deleted, and the sentence should therefore begin: “There is a presumption against major development in the AONB in accordance with NPPF.” In addition to the weakness of the language, I am also concerned that the AONB criteria listed in the policy are not the most important ones in determining whether a planning application should be approved. Aside from the one outlined in the first bullet point (which relates to the AONB setting) none of these criteria is concerned with the key characteristics of AONB, ie landscape character, scenic beauty, important views, tranquility etc. Whether or not a development supports the rural economy or provides public access are of far less national importance than preserving the quality of the landscape itself. I believe that the AONB Policy in the Draft Plan 2014 provided greater protection to the AONB, and would like to see the following sentences reinserted: “The national significance the AONB will be afforded the highest level of protection and only proposals which can be sensitively amalgamated into the area and which complement and enhance the character of the AONB will be considered” “Proposals within the AGLV which would have a negative impact upon views into and out of the AONB and which do not respect the setting, will not be acceptable.” In accordance with the most up to date Minerals and Waste Plan, safeguarding of applicable land within the AONB and/or AGLV may be necessary and deemed appropriate. Finally, I would like to see a clause which gives protection to the candidate areas for AONB status in the forthcoming Surrey Hills AONB Boundary Review. This should include Blackwell Farm which was recently reviewed by an Independent consultant and deemed worthy of inclusion as a candidate. I consider that all land that has been assessed as meeting the latest Natural England criteria for AONBs should be subject to the same level of protection as an AONB, not just land that has been designated AGLV.

---

I object to Policy P2 green belt. This policy states, “the general extent of the Green Belt has been retained.” This is a misleading statement. The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. Once gone it is gone forever. It is not the Council’s to give away. Policy P2 completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up...
areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world. Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of: 1. Agricultural production

2. Rural leisure and tourism amenities
3. Water catchment
4. Flood control
5. Biodiversity
6. Natural heritage
7. A carbon sink for air pollution
8. Room for public facilities such as parks and burial grounds
9. Profitable film locations (e.g. Shere)
10. Future economic potential such as mineral extraction (even fracking)
11. Natural beauty, landmarks, open space, rural views and sight lines
12. Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)

As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations. It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. I object to the “insetting” of 14 villages from the Green Belt. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat. I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors. To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead.

I object to the removal of over 400 hectares of Green Belt land in and around Blackwell Farm to facilitate further development of Surrey Research Park and for 1800 homes. Over 60 hectares were removed from Green Belt 12 years ago for the same developer (Surrey University) who has yet to fulfill their planning obligations. This valuable land has been squandered with over 17 acres of surface car parking and as one of the key features of Green belt is its ‘permanence’ this second request for yet more Green Belt land to be released in such a short space of time, with all the outstanding issues that remain makes this all the more objectionable.

Furthermore I object on grounds of the impact this development will have in terms of congestion on our highways, these issues have been highlighted under ‘infrastructure’.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to ALL Green Belt sites allocated for development in the local plan object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses.” This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. This amounts to a war of attrition by the Council in conjunction with developers, since many busy residents are tired of repeating the same comments as it appears to be a waste of time and effort. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy P3 Countryside (i.e. beyond the Green Belt) This is more protective – as a policy – than the proposals for the AONB and the Green Belt, so is anomalous. I am not in favour of building on this area, since urban, brownfield areas are sufficient to meet all reasonable housing targets. There is no need to build on any green fields if brownfield, previously developed land is used efficiently (without garden-grabbing). This policy refers to the countryside near Ash and Tongham (see paragraph 4.3.28). This area does not justify stronger policy protection than any other part of the borough. The fact that the current and previous Council Leaders represent it should not give it preferential status: “we will seek to limit any development in the countryside unless it can be demonstrated that it is necessary in that location”. Green Belt and AONB areas should by definition have higher levels of protection than non-Green Belt areas. It should also be noted that
Ash and Tongham lie beyond Guildford far away from London and therefore make no contribution to controlling Metropolitan urban sprawl, that is presumably why Ash and Tongham are not in the Green Belt already. This policy, however, attaches higher priority to preventing the “coalescence between the Ash and Tongham urban area and Aldershot” than it does to the primary purpose of the Metropolitan Green Belt, which is to stop London sprawl. I agree to the prevention of coalescence but this should apply to all villages including East and West Horsley and Flexford and Normandy.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy P4 Flood risk and water source protection zones Urban development on existing hardstanding would not create additional flood risk, especially where there is scope for improved flood resistance measures to be included in the design. Sites such as Woodbridge Meadows Industrial Estate and the Arriva bus depot, on the River Wey bank, are potential high-value brownfield sites that would not be available for housing if this policy is implemented. It is not the footprint of existing buildings that should limit future development, but the extent of existing hardstanding. Tarmac and concrete do not act as functional floodplain, and some land with hard standing close to the river, within the town centre and within easy walking distance of the railway station, provides an excellent opportunity for real urban regeneration that could protect the surrounding countryside. I strongly believe that this policy should not be used as a convenient excuse not to build on the extensive area of brownfield sites between the station and Ladymead. Any new development in this area could easily be built on stilts with flood resistant ground floor parking in areas that are identified as high flood risk. This area has been built over successfully over the last 50 years. We do not need to stop now.

I do not support building directly on (as opposed to over) flood plain as the land is effectively a soak away, but intelligent architecture has been dealing with this problem for many decades in other parts of the UK and the globe.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to policy P5 Thames Basin Heath Special Protection Areas. This policy is not robust enough. The mitigation (cash compensation) offered for development in the special protection area is so small as to be meaningless. SANG (Suitable Alternative Natural Greenspace) is not beneficial since the sites identified or targeted are already green space. This is just using agricultural or wooded land as recreation land in order to justify building on other green spaces nearby. There is no actual increase in open space or environmental protection; instead, it is a ploy designed to permit building on otherwise protected areas. SANG – in part used to prevent dogs and cats attacking nesting birds – must also ensure that it is not using land which is adjacent to the Special Protection Areas.

Comment ID: PSLPP16/15732  Respondent: 15623745 / Stella May  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy S1 as stated and the presumption in favour of sustainable development. The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” Policy S1 ought to set a clear framework. No definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts. The promise “to secure development that secures the economic, social and environmental conditions in the area” omits to recognise that economic growth, social justice and environmental protection often conflict. It does not say how each element is to be weighted or conflicts resolved. As a practical guide to the tough choices Councillors will face, it is without value. Under this policy, any development will qualify as “sustainable”, thereby failing to apply the NPPF’s most important guideline. The most gaping hole in Policy S1 is the Green Belt. As an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity, the Green Belt is a living example of sustainable development in practice. It is the envy of the world. Policy S1 should commit to uphold Green Belt boundaries and protections, setting at least one clear boundary to planning decisions. The plan’s contempt for Green Belt constraints is amply demonstrated in later policies. The commitment to approve planning applications “wherever possible” and “without delay” reveals this draft plan’s pro-development bias. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all. This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.3.

Page 823 of 2988
I object to policy S2 the Borough Wide Strategy and the commitment to build 13,860 homes based on the Strategic Housing Market Assessment (SHMA) 2015 prepared by GL Hearn. The OAN “objectively assessed need” figure in the SHMA of 693 homes a year is far too high. I am very surprised and concerned that GBC have adopted the OAN of 13,860 homes as the housing target without any application of constraints as required under the National Planning Policy Framework and the National Planning Policy Guidance. The scale of the housing number proposed, inevitably increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole. Other local planning authorities appear to take a more balanced view in their approach to planning. The Woking Core Strategy 2012 applies a constraint of 50% from the 594 new homes identified in their own SHMA. "It should be noted that local evidence (Strategic Housing Market Assessment - SHMA) highlights a need for an additional 499 new affordable homes every year in the Borough and a total of 594 new homes every year when taking into account demand. Given the level of environmental constraints present in the Borough, it is considered that the provision of an average of 292 dwellings per annum represents a reasonable level of housing growth for Woking and is deliverable." Historically GBC have correctly applied constraints on housing numbers to protect the Green Belt. The Surrey Structure Plan 1994 advocated a general slowing down in the rates of development “because of the environmental constraints which exist in the County, including Green Belt”.

This slowing down was reflected in the requirement that Guildford Borough should accommodate a net increase of 3,800 dwellings between 1991 and 2006. This was a lower rate of development than in previous years. It is interesting to note that the Structure Plan at that time expected sufficient land to arise within the urban areas to accommodate this requirement. However it would appear that today GBC have effectively ignored the real potential of the urban area to provide for housing. At the same time GBC have adopted a radically different approach to the policy of the Council over the last 20/30 years and are now ignoring government policy in relation to the Green Belt. A detailed and comprehensive professional review of the SHMA dated June 2016 by NMSS an independent expert firm dealing with housing and demographics procured by Guildford Residents Association (GRA) has concluded that the OAN figure should be revised down from 693 homes per annum to 510 homes per annum. The 41 page report by NMSS which can be found on the GRA website entitled “A Review of the West Surrey SHMA as it relates to the Objectively Assessed Housing Needs of Guildford”. It was a real community effort. It was paid for by over separate 20 Guildford Residents Associations and Local Parish Councils none of whom were convinced that the SHMA report procured and presented by GBC was accurate or transparent or accessible in a meaningful way. So they clubbed together and collected contributions from many hundreds of Guildford residents to try to find out the truth of the housing need figure presented in the Local Plan. The report concluded amongst other matters that:

- The affordability of housing in Guildford is no worse than in other Surrey districts and boosting supply beyond the demographic OAN would not result in a noticeable improvement in affordability but simply in more people moving to the area.

There are reasons for believing that the SHMA’s estimate of the number of homes needed for students may be too high and that an adequate provision for students is already included in the demographic OAN. The report advises that the Council should commission a separate student housing need figure for Guildford given the distorting effect of students on our...
overall OAN. It envisages that, once this exercise is undertaken, improved accuracy means the overall OAN would be likely to reduce still further.

The SHMA seeks to estimate the number of homes needed to support employment growth using employment rate assumptions that are inconsistent with the employment forecasts. This produces misleading results. An analysis of the Cambridge Econometrics and Oxford Economics forecasts using employment or economic activity rate assumptions consistent with the forecasts suggests that in neither case is there a need to provide more housing than suggested by the demographic analysis. Indeed, in both cases a smaller population growth (and hence fewer homes) could support the jobs growth that is forecast. A further independent report was procured in 2016 by the Campaign for the Protection of Rural England CPRE from Richard Bate of Green Balance, an independent consultancy with expertise in demographic and housing matters to carry out a review of the GL Hearn SHMA. The report by Green Balance runs to 37 pages and its findings are that the OAN for homes in Guildford should be reduced from 693 per annum to 481 because:

1. the vacancy rate figures should be taken from local government annual records rather than from the 2011 Census. This would reduce vacancy rates to 2.9% in Guildford.
2. there should be no increase for affordability above basic demographic change.
3. there should be no increase for Student housing and it was considered unrealistic that the University should be allowed to exert such substantial pressure on the domestic housing market.
4. the use of employment-led forecasts should be abandoned using purely household projections instead which are more reliable as a form of prediction. Two completely independent expert reports are surprisingly consistent in their findings. In broad terms a figure of approximately 500 homes per annum would appear to be a correct estimate of OAN for Guildford. However, this is before constraints are applied to arrive at an acceptable housing target. The SHMA is based on pre-Brexit projections for economic and population growth, including migration.

These now need to be revised downwards. It is unacceptable that demographic and economic model assumptions have been withheld by GBC and cannot be checked making the process unaccountable.

The figure of 13,860 new homes is unsubstantiated. It has not been scrutinised by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by commercial sub-contractor used in preparing the SHMA. Both the National Planning Policy Framework and National Planning Policy Guidance provide a clear policy direction that the overall housing target should be reduced by a variety of constraints to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors. I have corrected this omission below. Infrastructure policies should be planned at the same time as Local Plans but in this case they have effectively been left out and are not sufficiently developed. The Framework also makes clear that, once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. Unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development on a site within the Green Belt.

THE NEED TO APPLY CONSTRAINTS

Ministerial guidance in relation to building on the Green Belt is clear:

1. “the single issue of unmet need - is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development in the Green Belt” - Nick Boles to Sir Paul Beresford MP 7th February 2014.

2. “we were always very clear that we would maintain key protections for the countryside, and, in particular, for the Green Belt. The Framework makes it clear that a Green Belt boundary may be altered only in exceptional circumstances and reiterates the importance and permanence of the Green Belt” – Nick Boles to Sir Michael Pitt, Planning Inspectorate 3rd March 2014.
3. “Planning Guidance, updated in March 2014, also states that unmet housing need is unlikely to outweigh the harm to the Green Belt to constitute the very special circumstances justifying inappropriate development within the Green Belt” – Nick Boles to Sir Paul Beresford MP 18th June 2014. 70% of the sites put forward in the Local Plan are in the Green Belt which flies in the face of current government planning policy. The National Planning Policy Framework (NPPF), National Planning Policy Guidance and case law make it clear that Green Belt is an absolute constraint on housing supply.

Exceptional circumstances need to be shown to adjust boundaries. Other constraints under the NPPF include assessments of sustainability, strategic flood risk assessment, physical constraints on land use and infrastructure constraints (this can include road congestion, schools, drains, power supply and medical requirements). Constraints should be applied to the Objectively Assessed Housing Need (OAN). However this itself is overstated and should be reduced from 693 per annum to 500. In view of the comments above it would appear logical to apply CONTRAINTS in line with government policy to a corrected OAN of approximately 50% to account for the fact that 89% of the borough is in the permanent Green Belt and development is not supported by adequate major infrastructure. This reduction is in line with the constraints percentage of 50% applied by Woking Borough Council. This would result in a more acceptable and practically achievable HOUSING TARGET of 250 homes per annum which over a 20-year period would be 5,000 homes. All of these homes could be built in the existing urban brownfield areas of the borough and would in part satisfy the 20,000 objections made by residents to the 2014 draft plan and also relieve the additional problems of inadequate infrastructure. It would also mean that there is currently 8.5 years supply of housing (2131/250) which is made up of existing permissions granted (1,518) and completions made (613) during 2013/2015. (Monitoring Report by GBC 2015) The Brexit vote may have strengthened government policy further. Theresa May, the new prime minister, announced on 11 July that she is personally committed to protecting the Green Belt once she takes office. Whilst I have many significant objections to the GBC Local Plan I applaud the policy statement by GBC in their Monitoring Report, “We will continue to monitor the use of previously developed land, and continue to identify as many opportunities as possible for redevelopment of previously developed land.” I believe it will be to the benefit of all residents if GBC can apply themselves vigorously to this endeavour in order to protect the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/1743  Respondent: 15623745 / Stella May  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Key parts of the evidence are still missing, flawed or based on withheld assumptions. The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach, and the Transport Assessment is too late and incomplete to be relied upon to inform the Plan.

The Plan excludes the Town Centre Master Plan, which plays a pivotal role and fails to address the results of infrastructure difficulties, or use these and Greenbelt to constrain the level of development.

The Employment Land Needs Assessment

I object
This document omits many important points that are to be addressed at a future stage. The information is, however, very relevant and necessary and without it the document is weak on evidence. The overview given does not assess the capacity of existing supply to accommodate future growth. The paper acknowledges that almost 9% of commercial premises are empty and this somewhat flies in the face of arguments to vastly increase the volume until the reasons are understood. Around 30% of businesses are considering leaving Guildford (congestion being cited as a reason). There are also issues with planning permissions being granted to convert office space to residential, whilst at the same time it is argued that more offices are needed? The contradictions appear to indicate that policies related to this need firming up and that the evidence is incomplete.

I disagree with 40% of land in the town centre being given over to retail as there is no evidence that Guildford will 'buck the national trend' in terms of declining high-street sales, as has been suggested by Cllr Furniss. Guildford urban area ranks no 1 in terms of being the most sustainable location in the borough and, as housing is a priority, there should be more than 1,172 residences in the town centre.

I object to Policy E4 (expansion of the Surrey Research Park into the Blackwell Farm) The existing Research Park has been built at a very low density (25% plot ratio), which is very low for an urban extension. The majority of existing buildings are 2 storeys giving a developed floor space plot ratio of only 12.5%.

The existing Research Park has acres of surface car parking, which provides it with the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing density of the neighbouring academic buildings on the university campus at Manor Park, which is five times higher.

Together with the existing expansion of 14% through existing consents and the opportunity to increase its density, the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university, without utilising additional land.

Infrastructure

I object

The infrastructure schedule makes reference to 'improvements' without saying what they are. It includes a junction at the Guildford end of the A31, and another junction at Tongham. No evidence or traffic modelling data is available to demonstrate whether these 'improvements' will indeed improve anything at all given the additional traffic that will be generated by the new developments included in the plan. The Highways Assessment indicates that, even with these 'improvements', the level of congestion on the A3, A31, the B3000 and A25 will leave these roads over capacity and congested.

Constraints should be applied to the housing need/number as a full application of the overinflated number will have a severe detrimental impact on our road network. Smaller housing estates may be more difficult financially, but they would have less impact on infrastructure and could be considered where infrastructure already exists. The borough has many acres of surface car parking which, if replaced by multi-storey versions, and combined with current Brownfield sites, would free up enough land to build housing where it is wanted and needed and not on valuable Green Belt. There would be no need to build high-rise style development in Guildford town, which we don't support, but we do believe that buildings of 6-10 storeys (with underground parking) would be in keeping in some urban areas (where they don’t impinge on important vistas). [Some existing buildings already reach 5-7 levels in height].

The traffic maps omit the area south of Guildford borough completely and the lack of detail about impact on the B3000, a strategic route, is highly questionable, particularly as there are no solutions in place to deal with the impact. I am particularly concerned that, after the main highways routes of M25, A25, and the A320, the B3000 will incur the greatest increase in flow as this road is already close to capacity, with tailbacks at peak times. The road is no longer fit for purpose and modelling shows that developments planned, and the introduction of a new westerly route through Blackwell Farm, will severely worsen the situation, whether major work takes place on the A3, or not.

The Highway Assessment

I OBJECT
The strategic highway assessment requires a great deal more work and hence I OBJECT to the inclusion of this as evidence.

The B3000 runs through Compton, a small village with many listed buildings, most of which are very close to the road. The road already carries in excess of 5 million vehicles a year with average flow rates exceeding most A roads. It is the only settlement area in the borough where pollution levels exceed EU regulations and it is close to capacity now, with tailbacks at peak times, which add to the pollution problem. [see legal section]

The study is highly misleading. It refers to a figure of zero additional traffic from scenario 3, which includes the traffic from the strategic sites, one of which is partly in Compton. The assessment does not make it clear that the modelling is extremely limited and only includes impact on developments within the immediate area. Blackwell Farm is excluded from Area 107 (part of Compton) as false boundaries have been set. I believe that the impact from the strategic sites will be far-reaching and will most certainly impact Compton and beyond. Each village needs to be able to see the impact that development will have.

The Highways Assessment concentrates on peak time traffic only and gives no indication of overall volume increases or traffic type using specific routes outside peak hours. Understanding of the overall increase is important, as there is a bridge on the B3000 between Artington and Compton, which has a width restriction and may also require a weight restriction as it needs replacing within the next 2 years and no funding has been set aside for this. Instead Network Rail, SCC, GBC and Waverley BC continue to battle over responsibility for, and scope of, the project.

It appears that traffic data has been collected at different times of the year and over varying time scales in order to provide averages. This method of data collection can underestimate measurements by at least 30%.

Furthermore, I have been told that the person responsible for ratifying traffic data at Surrey County Council (SCC) has been off sick for over a year and that, whilst the daily data boxes continue to collect data, that data has not been collected or analysed for 2015. The data put forward for Compton's B3000 was based on a 3-week period in January and, as this was not representative, we understand it was removed. That said, the year-on-year data is for different periods and different times, varying from a few weeks in winter to longer periods over many months. I would like a more robust approach to traffic data collation.

The cumulative effect of the additional traffic generated by the developments in the proposed submission Local Plan will be to increase congestion, even with the proposed highway improvement schemes in place. More detailed analysis of the junctions and queuing is required. We question the conclusion that the developments would have *An acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF*. We do not believe that the impact on the B3000 will be acceptable, as it is already operating beyond capacity, and this situation will be made much worse following the mitigation proposed for the A3.

The Highways Assessment is limited to 30 results. Roads have been omitted from the report and it is unclear whether findings for the B3000 (also referred to as The Street B3000) are in fact from the Street or the roundabout from which there is a feeder road to Godalming via Priorsfield Road.

The table comparing scenarios and the impact on traffic is difficult to decipher. Scenario 1 includes current planning permissions plus Waverley's strategic sites. This shows an increase of just 9 vehicles per hour at peak times on the B3000. The next scenario 2 is the same, but includes GBC's strategic sites. Given that there is a strategic site in Compton of 1,800 homes and another of 1,000 at Normandy, the expectation would be for the volume to be not only higher, but considerably higher. The result is however, ZERO. We understand that this is because the impact measured is only from the immediate area and, as Blackwell Farm has been removed from the village for modelling terms, this does not give a realistic result. The omission of the Town Centre Master Plan and its impact on the roads further diminishes the integrity of this Highways Assessment.

Even without the full impact being understood, it is clear from the scale of development on the west of Guildford (1,800 homes at Blackwell Farm, 1,000 homes at Normandy, 1,300 homes at Ash, 3,800 homes in the Aldershot urban area, 1,200 homes at Borden) that the increase in traffic on the B3000 and other main routes would be severe.

The Highways Assessment shows that as a result of the proposals put forward in this draft of the Local Plan the B3000 will suffer the highest increase in flow rates at peak times (after the M25, A320 and A25. It also reveals that traffic flows would
increase if the A3 was widened, as the A3 would then attract more traffic via the B3000. Despite this, there are no solutions planned to mitigate the situation and we are therefore strongly objecting to the level of development and in particular strategic development at Blackwell Farm as outlined in the Local Plan.

The proposal to introduce a new route to Guildford town centre from the west via Blackwell Farm has been ill thought out. The volume of traffic that will use this new ‘rat run’ through the new development and the university campus/business park, has been underestimated. There will be problems for traffic wishing to exit the new development in both directions during peak hours - traffic is frequently queuing for miles along the A31, and the Tesco roundabout is one of the worst bottlenecks in Guildford. The knock-on effect on the Egerton Road/Gill Avenue junction would impede emergency vehicles getting to and from the hospital.

The 4-way junction on the A31 has no detail at all and the concern is that permission in principle will be given to the site in the hope that these problems are surmountable. If they are insurmountable, which I believe they are, then enormous amounts of Green Belt land within the setting of the Surrey Hills AONB will have been sacrificed for nothing. The 4-way junction, if it goes ahead, is likely to be huge and, due to its elevated position, will cause significant harm to the AONB in terms of landscape and light pollution.

The Highways Assessment has many limitations, not least being the absence of the Town Centre Master Plan, which includes potential road closure and re-routing. Compton is likely to be very much affected by any reduction in road capacity in the town centre and it is important that we are presented with the whole the picture.

The Assessment acknowledges that not all impacts of proposed Blackwell Farm development have been modelled and that, due to the emphasis on the A31 and the A3, not all roads were included.

The report concludes that the improvements to the A3 are necessary to maintain adequate flow rates on the strategic network. Further work is needed to determine what impact any widening or junction improvements will have on local roads, and what will be done to mitigate against the increased flows through Compton, particularly given that a section of the B3000 though the Village is anticipated to become an Air Quality Management Area. GBC has resisted requests by members of the PC to have the northern end of The Street made an AQMA, but readings of nitrous oxide in this area are well above EU legal limits.

There is little information about the tunnel but the map indicates that one access / egress point will be in Compton near the A3, although no land has been safeguarded for this purpose. This is likely to have the same impact as the improvements to the A3, i.e. increased traffic (and pollution) through Compton.

**The Spatial Hierarchy**

The spatial hierarchy, which outlines Guildford's preferred strategy, does not match up with the proposed plan. The hierarchy places Brownfield sites (including those on Green Belt) as a priority, but the Plan has 66% of development on Greenbelt and only 34% on Brownfield. The hierarchy lists Guildford town and urban areas as a priority followed by inset villages and identified Green Belt villages. A relatively small percentage of housing is allocated for Guildford town (the most sustainable location) and Green Belt areas, such as Blackwell Farm, with high sensitivity have been classified as within the 'Guildford urban area' when they are in fact in the open countryside. We are told that only 1.6% of the 89% Green Belt has been earmarked for removal and that the 6% removed via insetting doesn't count as these villages are already developed. If this is the case, why list them in 4.1.16 of policy s2 - Spatial Strategy?

4.18 The preferred options cannot accommodate all that Guildford 'needs'. This is untrue. Two specialist consultants have independently critiqued the OAN and both question the level of uplift and the use of ONS data without full correction for changes and anomalies. They refer to 'double accounting' as the uplift is introduced at several stages and the assumptions that result in the final OAN are not explained. See comments on Strategic Housing Market Assessment (SHMA).

**Strategic Housing Market Assessment (SHMA)**

**I Object**

The “objectively assessed need” figure of 693 homes a year is too high.
A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the SHMA method should be changed to consider student housing need separately due to the distorting effects of students on the figures.

The current SHMA inflates the proposed housing figure due to:

- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability, and
- flaws in the method for estimating the number of homes needed to support job growth.

It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

Two additional reviews of the SHMA reach similar conclusions, one having been produced by CPRE and the other by Cllr. David Reeve.

The Land Assessment

I object

The exclusion of sites of 5 dwellings or fewer from the list might make administration easier, but the addition of these sites plus windfalls and outstanding (but current) permissions gives rise to a higher number of dwellings than is actually needed. There is therefore no justification for release of all the Green Belt put forward.

The criteria used to include or exclude sites because of this study lack consistency, with many sites excluded as 'unsuitable' with no further explanation offered (many of which were in the urban area of Ash). The assessment lacks objectivity and detail.

Green Belt & Countryside Study

I object

GBC’s Green Belt & Countryside Study does not value appropriately the “fundamental aim” of Metropolitan Green Belt or look strategically at options for developing in major settlement areas beyond the Green Belt. It is pointless for London to apply constraints to protect its Green Belt if areas within it, such as Guildford, choose to ignore this option. It is the same Green Belt and serves the same purposes, all of which are acutely valuable.

The way Green Belt is parcelled up and scored is invalid: serving 2 Green Belt functions well is as legitimate as serving 3 to 5 functions less effectively. The Green Belt sensitivity analysis is not a valid basis for informing decisions. This method also omits purpose one, on the basis that all Green Belt sites encourage regeneration of urban sites. This should not be excluded for it is valid and could even be argued to be particularly valid in areas close to the town. Boundaries used for Blackwell Farm were neither permanent nor defensible.

Proposed removal from the Green Belt of a number of relatively small sites where development of an exceptional nature has taken place, plus adjoining land, has lost sight of the scale at which Green Belt is effective.

Assessment of which villages to take out of the Green Belt does not adequately consider that villages contribute to the openness of the Green Belt, as seen from surrounding AONB.

A key principle of Green Belt is its permanence. The University Consultants stated this 13 years ago when seeking permission to take Manor Farm out of the Green Belt to create Manor Park. They reassured residents that the boundary would not be frequently moved and that Blackwell Farm would be opened up to the public for “informal recreation”. The same Consultant has now repeated this promise in putting forward the University plans to develop on Blackwell Farm, saying that the new boundary would be permanent for at least 25 years!
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** SQLP16/1744  **Respondent:** 15623745 / Stella May  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan preparation process has had inadequate regard for national policy, which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

The report states that there are no pollution issues in Guildford. This is not true. The A3 end of the B3000 exceeds Eu regulations and this should be flagged in the 2015/16 air quality report which the Council has yet to publish.

I object

The 2015/2016 air quality management report has not yet been published and this will/should include an area at the A3 end of Compton, which exceeds the recommended max NO2 reading. One year results for NOx are **48.728 with high’s of 68 using National bias adjustment.**

Cllr Furniss indicated that the location of the test tubes may have made them invalid, but measurements show that they were positioned correctly and monitored for over a year by GBC environment officers, who have now added additional monitoring devices (See Annex 2 – Correspondence between Cllr Curtis and Cllr Furniss). This area qualifies as an air quality management area (AQMA) and it is disingenuous to omit this from the report or to use an old report on the basis that the 2015 report is not yet published, as the problem is known and recognised by the environment department within GBC.

The traffic survey shows increases in overall flow at the B3000 monitoring point, of values between 5.6% and 16.5%. This would severely impact flow, which is not in line with National Policy as further congestion would exacerbate the current air quality issues as the A3 end of the Street.

I do not believe that a regulation 19 consultation is appropriate. Whilst few changes have been made, additional sites have been included without opportunity for regulation 18-consultation input.

The video used and paid for by GBC and taxpayers is biased towards development, and hence raises questions over the validity and legality of such marketing campaigns. All the individuals featured in the video, with the exception of one nurse have previously spoken in the Council Chamber in favour of house building/building on Blackwell Farm; and there is not a single voice representing protection of the Countryside or outstanding landscapes.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object

The plan is not so much positively prepared as avariciously prepared. I do not consider that it is reasonable to take on unmet need from neighbouring authorities, which have given greater protection to their Green Belt if it means our own is compromised on the scale being put forward.

_I believe that constraints should be applied to the housing target, which we understand equates to the objectively assessed need (OAN) as no reasonable constraints have been applied. The constraints that could and should be applied are Greenbelt and considerable infrastructure issues. The solutions suggested to accommodate the inordinate levels of growth are both inadequate and costly and the net result will be serious debt for many years if not generations._

It was recommended by landscape consultant Alison Farmer Associates that the area known as Blackwell Farm should be considered in the AONB boundary review, yet it was omitted in Surrey CC’s landscape evaluation. This meant the Parish Councils of Worplesdon, Compton and Wanborough had to fund an independent review to ascertain whether the area was a contender for AONB classification. The survey was carried out by in May 2016 by Land Management Services Ltd, which concluded that most of the 265 hectare farm was of a landscape and scenic quality that merited inclusion within Natural England’s revised Surrey Hills AONB boundary.

It raises serious question about the soundness of the evidence base when Surrey CC says that it only has to account for evidence submitted and not for that omitted? _The area within the proposed development site at Blackwell Farm should now be considered by Surrey Hills as part of the AONB boundary review and land to the west should remain undeveloped, as it is important to the setting of the AONB._

The plan is not justified. Residents groups have suggested other strategies but these have not been tested or considered against the current trajectory, which has remained largely unchanged since day one.

Many aspects of the Plan were strongly objected to in 2014 and not only have these points been ignored, they have in fact been embellished or made worse. I refer to the points that GBC referred to in their own summary, which stated that most people objected to the scale of development and the harm to the Green Belt. At that time there were 4 strategic sites and now there are 5. At that time approx 50% of development was in Green Belt and now it is 66% with only 34% on previously developed sites. 58% of development is on just 5 sites.

_A more realistic appraisal of the town centre with more multi-storey car park development and less retail would make way for a greater percentage of housing in the town centre, which is after all the most sustainable and sought after area. Additionally, greater pressure must be placed on the University to house more students at Manor Park in order to free up affordable rented accommodation in the town for key workers._
There is a conflict of interest when the developer (University) drags its feet over the provision of promised student accommodation (thereby putting pressure on the housing market) whilst at the same time seeking permission to build 1,800 new homes to help Guildford's need? The University is at least five years behind with programme of building student residences and staff housing. It is widely agreed among residents groups that the University must fulfil all of its current building plans and substantially increase the proportion of students on campus. If the University built the outstanding units, the housing need would reduce substantially yet much of this is omitted from the outstanding permissions list?

GBC has approached development without applying constraints that are applicable such as Green Belt and infrastructure. It is wholly inappropriate to build a Plan without constraints when there is widespread opposition to this approach. Furthermore, there are serious doubts over the validity of the objectively assessed housing need. Housing need underpins the entire plan, and we are being asked to accept the figure of 693 on trust. Without an understanding of the methodology behind the OAN, the public cannot 'buy into' this figure, especially as it has been illustrated by two reputable professionals that there have been errors such as 'double accounting', which has resulted in uplift. Both consultants have concluded that a more accurate figure would be around 500 new homes pa and the most recent one, which was done in pre Brexit -June 2016 acknowledges that due to the high number of International students here in Guildford a student SHMA would better inform this plan. Both consultants feel that the current SHMA is flawed and that the OAN of 693 is too high. These reviews will be submitted by CPRE and the GRA and we support the findings of both.

Putting 58% of development on 5 sites, which are within the Green Belt, or largely within the Green Belt, is not consistent with national policy. The definition of 'exceptional' is forming an exception or rare instance; unusual; extraordinary. What possible exceptional circumstances can justify 3 sites of approx 2,000 each and two of 1000 each, on Greenbelt. This makes a mockery of the term 'exceptional'?

The plan has a maximum number and a hefty buffer. It has underestimated windfalls and overestimated need. It is likely therefore that if one of the major sites fails to come through, the Plan could still succeed in terms of numbers, but would fail in terms of impact on infrastructure and reliance on aspirational, but distant 'yet to be discussed' schemes such as railway stations, making the plan undeliverable. If more people are not given the opportunity to live in Guildford town, the night time economy cannot grow and if the gamble to use 40% of the land for retail fails, shops will close and we will have created a leafy green ghost town, whilst the villages outside the town will have changed beyond all recognition as the impact of urban sprawl takes its toll.

The plan puts many eggs into 5 baskets with 58% of all development on just 5 sites. If these are not deliverable, the plan will fail. This strategy has been roundly criticised by Inspectors in other parts of the country.

Taking on such a high OAN without scrutinising it and then taking land out of Green Belt to fulfil it, and using developer funding to secure infrastructure (which reduces significantly the proportion of affordable housing delivered) is destructive and risky.

It is inconceivable that 5 sites between 1,100 and 2,000+ each can be built on Green Belt land without affecting the purposes of the Green Belt.

AONB should be given the highest protection. Despite being put forward for AONB review Blackwell Farm was omitted and an independent consultant had to be commissioned by local parish councils. The findings showed that the area met Natural England’s latest criteria for AONB and should not therefore be developed but should instead be properly recognised.

The proposal at Blackwell Farm has been reduced from 2100 to 1800 to take account the impact on future AONB or for views in and out of the existing and future AONB from public areas as determined by planning policy. It is feared that if this site were approved and if access could be made possible without causing serious problems to the surrounding road network, that the AONB in this location would undoubtedly be destroyed.

GBC argues that it is necessary to remove more than 1.6% of its 89% Green Belt and to remove more than 6% of its Green Belt from villages (by way of insetting) in order to meet its need, yet at the same time the Council advocates making an additional area Green Belt? The area of land being put forward for inclusion within the Green belt is on the same ridge as two areas of Green Belt it wishes to remove (Normandy & Blackwell Farm). This approach lacks consistency.
Cllrs Paul Spooner and Matt Furniss have stated clearly that there will be no development without supporting infrastructure and that the infrastructure must come before, or alongside, development. It is difficult to see how this will materialise as developers’ CIL contributions (which will fund infrastructure) are paid from profits made from the development. This statement appears to be unenforceable and could offer false reassurance to residents who may support the Plan on this basis.

Developers are being asked to fund large amounts of infrastructure. They will offset this against any agreement for affordable housing and it is highly possible that affordable housing will not be built or that only a small proportion will be built. This was one of the key drivers and is factored into the housing need, yet may not be delivered. Where is the general analysis to see what level of affordable housing might actually be delivered given the level of infrastructure needed to implement this level of development on new sites?

The omission of the Town Centre Master Plan (on the basis that this has different timescales) invalidates two key components of the Plan - the Infrastructure and Highways assessments. The suggested road closures in the town centre and the resulting re-routing of traffic should be factored into the highways assessment, but they are currently omitted. The consequences of this could render the whole Plan undeliverable and I don't believe the Plan can be approved without factoring in the Town Centre Master Plan.

GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA), which CPRE and GRA consider unsound. The methodology for the uplift and assumptions made have not been made available and thus the openness and transparency required for public understanding as outlined in the NPPF has not been adhered to.

I understand that Highways England will not start to consider its intentions as regards the A3 in the vicinity of Guildford until 2018. It is difficult to see how plans can be approved without the inclusion of this information.

Network Rail has not made available for the public consultation any plans for a new railway station at Merrow, nor have we been told where the station car park would be situated nor how the railway bridge between Merrow and Burpham would be re-constructed to take the additional traffic. Likewise, there are no detailed plans for the railway station at Park Barn and Network Rail has not confirmed the status of either. These schemes must have a sounder footing to be included in the Plan if they are to be used to justify large developments nearby.

The access to, and from, Blackwell Farm (via the A31) has not been thought through. There proposed new route will likely be used as a rat run to the A3/Guildford, but this will put pressure on a congestion hot spot, and result in increased traffic at the Compton turn-off and Down Lane (home to Watts Gallery). It is also recognised that congestion at the Tesco roundabout will be made worse and this area is already subject to considerable problems. Additional traffic via the business park from Blackwell Farm will add to congestion at the Egerton roundabout and impede access for emergency services to the hospital.

The proposal at Blackwell Farm has been reduced from 2100 to 1800 to take account of the AONB, but this does not account for views in and out of the AONB from public areas.

The greenbelt sensitivity study is not objective. The reference to Blackwell Farm as ‘South West Guildford Urban’ is totally misleading as it is unadulterated countryside that fulfills all the purposes of Green Belt. I consider this Study, which was the subject of much criticism in the last plan, to be flawed, yet it remains in this Plan. Why?

The damage caused to the Green Belt by the addition of Blackwell Farm would outweigh benefits gained from development, as there is ample space and lapsed planning permission on the existing Manor Park land for development for student accommodation, which would free up affordable rented accommodation in the town.

The proposal for Garlic Arch was added to the draft Local Plan without any consultation under Regulation 18.

No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Guildford citizens.

No land has been safeguarded for a tunnel, which would show a real intent.
This consultation included 'significant changes' according to GBC, although most residents would strongly dispute this. Some key reports were added and 6 weeks was not long enough to properly digest the information and impart this to residents. Many additional questions had to be asked and many points required clarification, which essentially meant adequate information, was not made available until two thirds of the way through the consultation.

The level of objection at the 2014 consultation was considerable - these objections have NOT been dealt with, but have been carried through to a regulation 19 consultation, undeterred. This is not in the spirit of Localism or the NPPF.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Cooperation is a two-way street. Guildford objected to Waverley's plans for Dunsfold on the grounds of increased traffic and in the same submission referred to positive consideration of unfulfilled OAN. Guildford also refers to its duty to consider Woking's unfulfilled housing. Guildford does not have land to spare to assist Waverley or Woking without taking vast amounts of land out of Green /belt, which is protected by the NPPF. Greed is not 'an exceptional circumstance' and if both Woking and Waverley (and indeed London as it is the Metropolitan Green Belt) prefer to protect their Green Belt then the question must be asked as to why Guildford is happy to relinquish its Green Belt land, especially in the face of strong public opposition.

Many also question the choice of just Woking and Waverley as partners in the SHMA as there are considerable links with Aldershot and Farnborough in Rushmoor, which have very different needs and their inclusion could have provided a better balance.

Comment - Localism

The Plan is supposed to be informed by residents and by parish councils and residents' groups and their input used to formulate the Local Plan, not for it simply to be presented to them and objections and subsequent input ignored. Despite a great deal of effort from these groups and many like-minded responses, the Plan has not taken their concerns on board. The Plan has barely changed since day one and residents feel their views have been ignored and that the consultations have not been genuine. To add insult to injury, some of the key points raised have actually been exacerbated or made worse, such as the scale of development and harm to the Green Belt and issues over infrastructure.

The NPPF is open to interpretation, but it is our belief that GBC has chosen to interpret it in a way that lacks objectivity in an effort to appease developers in order to avoid costly court cases at a later stage. GBC has cited cases where development has been granted in an effort to justify this pro-development stance but has failed to balance this against the many sites where development has been refused.

To gain true public reaction, material presented has to be factual and unbiased and written without jargon and acronyms. This has not been the case. A degree of 'double speak' has led to absurdities such as 'affordable housing' which is over £300,000 i.e. ten times the average salary; 'safeguarding' which does not mean protection of land as most people would think, but rather potential future development and 'insetting' which means removal? It is recognised that these terms are not locally derived but all the same they are confusing for most of us.

Some Councillors have shown a lack of knowledge about environmental matters. Cllr. Gunning - webcast 24th May section 7 - 3:39

'About ancient woodlands, of course they are very attractive things, but they are ancient and trees don't last forever, so can we be practical about ancient woodlands and consider their value or their life, I should say, their life'

May 11th - Cllr Ellwood announced that he couldn't understand what all the fuss was about pollution as his Mother had lived (presumably unaffected by it) under the flight path at Heathrow?

Whilst people have been encouraged to take part in consultation, objectors have been subjected to name calling and public humiliation. There are too many examples to list and so I am listing the most recent. http://www.guildford-dragon.com/2016/07/10/letter-not-surprised-mr-patons-comparison/#comment-157440

The Local Plan has divided communities and highlighted weaknesses and alliances, which have resulted in a breakdown of trust between residents and those whose job it is to implement the Plan.
The Plan has been roundly criticized and objected to and yet it is presented to us once again. Many feel the consultations to date have been worthless and feel they have already made their points, which were ignored and will not therefore be making them again as they fail to see the point?

It simply is not possible to address infrastructure shortfalls by building in the hope that developers contributions will cover the costs as the level of development needed negates any benefits gained and in many cases, the situation is made worse.

Central government funding is needed to address current problems so that funding from development can be used to implement additional infrastructure needed to make new sites viable without damaging their surroundings. It must be accepted that geography and lack of previous investment leaves some areas with less opportunity to do this than others.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to oppose the development of land near Ripley.

The proposed site for housing is in the Local Plan as "Garlick's Arch".

Although GBC have been consulting with the public on the draft local plan since 2014 the Garlick's Arch development was only included in the plan just two weeks before it went to the full Council for approval at the end of June.

This area is beautiful and large scale development would desecrate the wonderful countryside here. Furthermore, my local clay pigeon shooting club (Cobham Sporting Gun) operates on this land and is a wonderful example of the kind of british country pursuit that this land development would quash.

Ripley and the surrounding land has an old world charm of an idyllic british village. Wholesale development would forever change the area awfully.

I implore you to reconsider developing here.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term...
considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

• The “objectively assessed need” figure of 693 homes a year is too high.
• A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
• The current SHMA inflates the proposed housing figure due to
  ◦ failure to correct for errors in the historical data for international migration flows,
  ◦ issues with the way it considers students and affordability and
  ◦ flaws in the method for estimating the number of homes needed to support job growth.
• It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 – 2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.
The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15830  Respondent: 15624577 / Alec Marshall  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15798  Respondent: 15624577 / Alec Marshall  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and
general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable
forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students IRE accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”
The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer-led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15807  Respondent: 15624577 / Alec Marshall  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause
greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.
Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy 13)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from
the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brownfield sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPP16/15794  Respondent: 15624577 / Alec Marshall  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15786  Respondent: 15624577 / Alec Marshall  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be
taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**
I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible
change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  - The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  - The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  - The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  - The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  - The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  - The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.
After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We have view the proposed new development plans and after careful consideration we have decided that there are far too many dwellings proposed to be built in such a small area. Also if the Horsleys are taken out of the green belt there could be even more building works than what is already proposed at present.

We moved to a beautiful Surrey village 13 years ago to get away from town life, having had to live in a town due to work commitments. We are concerned that:-

The village doctors, schools and services are already just about coping, we wonder what will happen to our lives if thousands of people decent on the village, they too will want to use these services.

For those that work in London and use the train, the station car park will NOT be able to cope.

The development of the Wisley Air field is absurd with the only entry/exit onto the Ockham roundabout by the A3, there are so many accidents already on that stretch of road occurring with the volume of traffic. The only people interested in pushing this development are investors from overseas, they will get the planning and then sell on to developers for a lovely profit, not caring of the legacy they will leave behind.

If and when these areas are developed and the countryside and villages are ruined, are we not responsible for keeping our lovely “green and pleasant land” for future generations?

If London used brown sites, gaps and properties that are not currently lived in, it could cope for expansion for the next 10 years. A much better idea than ruining our green spaces.

Please, please give our plea careful consideration.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

On behalf of our client, Tyrrell Place Limited, please accept and register these formal representations to the Borough Council’s Proposed Submission Local Plan (Regulation 19) in relation to the Proposed Submission Borough wide Strategy and additionally to the omission of the Tyrrell Site, Long Reach Ockham from the list of sites proposed for future housing development.

These representations confirm our **objection** to the following Proposed Submission policies:

- Omission site: Former Tyrrell F1 Site, Long Reach, GU23 6PG (LAA site no. 1502). The failure to allocate this brownfield former industrial site for housing development.
- Proposed Submission Policy S2: Borough Wide Strategy. The absence of a clear linkage between sustainable patterns of development and the re-use of brownfield land in the Green Belt in advance of greenfield sites.
- Proposed Submission Policy P2: Green Belt. The absence of a clear local policy approach regarding the re-use of brownfield sites in the Green Belt.

**Background**

Tyrrell Place Limited **objects** to the Borough Council’s Submission Local Plan in relation to the omission of the Tyrrell Site, Long Reach, Ockham (‘the omission site’) from the schedule of Proposed Submission Housing Sites. We are particularly concerned that this brownfield site is not being actively promoted given the very favourable assessment of housing potential in the Council’s Land Availability Assessment (‘LAA’) February 2016 which forms a key component of the evidence base underpinning the Proposed Submission Local Plan.

The omission site comprises 5.7 hectares of land, much of which is established and permitted brownfield, within the current extent of the Green Belt. A significant proportion of the omission site is previously developed (brownfield) industrial land formerly occupied by Tyrrell F1 (the principal buildings are now occupied by a wedding accessory supplier).

The omission site is also subject to an implemented industrial and commercial development which could deliver a very significant amount of additional development footprint on the brownfield site of approximately 2,782 square metres of industrial space. Furthermore, a large expanse of the site is covered in tarmac hard-standing whilst there is also an established dwelling within the omission site. The site also accommodates the original Tyrrell F1 shed where the first Tyrrell Formula 1 cars were designed, manufactured and serviced.

The southern section of the omission site is undeveloped and characterised by grass and other vegetation. The northern, eastern and southern boundaries of the site are lined by existing trees. The woodland serves to visually screen the omission site from the surrounding countryside and from the principal through-road known as ‘Long Reach’.

Long Reach has dispersed development along its length including existing houses, playing fields, and a plant nursery. The village of Ockham is less than a kilometre to the north-east of the omission site and it is notable that Long Reach becomes steadily narrower and winds its way toward the B2039 and then on to the strategic highway network. The rural roads in this part of the borough are wholly unsuitable to accommodate modern heavy goods vehicles (HGVs) and service vehicles associated with the current and implemented industrial use.
In that respect, a new industrial occupier could intensify the industrial use of the omission site significantly and would not require planning permission to do so given the implemented planning permission and the large area of hardstanding that is already established on the site.

The omission site has no particular heritage, ecological or landscape importance attached to it. Furthermore, the omission site is not within a Conservation Area and there are no listed buildings on the site. The omission site is not located within the Area of Outstanding Natural Beauty (AONB) or within the Area of Great Landscape Value. Finally, there is SANG available locally to help fully mitigate the impact of new housing on the Thames Basin Heaths SPA.

The nearest railway station to the site is at East Horsley approximately 1km to the south east, where there is also a range of local shops and services.

The Potential for Redevelopment to assist the Housing Land Supply

Various discussions have taken place over the past 3 years with Council officers. The advice received on separate occasions from officers is an acknowledgement, in principle, that an element of redevelopment for housing is acceptable in place of the existing and potential industrial development. This view is unambiguously supported by the Borough Council’s Land Availability Assessment (LAA) February 2016.

We acknowledge that there has been disagreement between various parties and Council officers in relation to the quantum of new housing that Council officers would be willing to support on the omission site. Nevertheless, this brownfield site could make a valuable contribution towards delivering new homes, subject to detailed design considerations which could be delivered as part of a planning brief. This is also a view clearly shared by the Council’s LAA.

Delivering Brownfield First

The Foreword contained in the Proposed Submission Local Plan and produced by Leader of the Borough Council, together with the Spatial Vision (contained in section 3), both emphasise a clear preference towards delivering new housing development on brownfield sites in advance of developing greenfield sites. Yet despite those unambiguous statements and the vision, the reality is that:

1. The Borough Council is not promoting the established brownfield industrial land on the former Tyrrell F1 site for housing development.
2. The Borough Council is failing to meet housing need in the borough and has consistently under-performed in terms of housing delivery; and
3. The Proposed Submission Local Plan is promoting major greenfield, and strategic green belt land release to meet acute housing need, in direct conflict with its own stated objectives and vision regarding its ‘brownfield first’ development strategy.

Related Matters

A range of baseline studies have been undertaken to assess the likely impacts of delivering housing development on the eastern part of the omission site. Those studies include amongst others; a transport assessment, planning assessment, flood risk and surface water run-off assessment, land contamination study, and ecological (stage 1) assessments. All the studies carried out demonstrate that housing development can be delivered towards the eastern part of the omission site without causing any significant harm to amenities or the local environment.

Indeed the provision of new housing on the omission site will benefit local services and amenities by delivering a mix of housing for families and local people. Moreover, a modest amount of housing development would be far less visually prominent or harmful that an intensification of industrial use in this rural locality should the implemented (but as yet uncompleted) industrial premises be delivered by a new commercial occupier.

Housing Need and Land Availability Assessment

We note from the evidence base supporting the Proposed Submission Local Plan that housing delivery in the borough has not kept pace with identified housing need. Furthermore, the Borough Council cannot currently demonstrate a 5 year supply of deliverable housing land.
It is also highly notable that the Borough Council’s Land Availability Assessment (LAA) published in February 2016 specifically identifies the former Tyrrell Site (site no. 1502) as being a ‘realistic candidate for development’.

Indeed, the LAA cannot be any clearer in terms of the credibility of the omission site when it states that, ‘Provision of new homes here would help towards meeting the housing number in the Local Plan and contribute towards achieving sustainable, inclusive and mixed communities’ Additionally, the LAA is equally supportive in terms of the environmental credentials that new housing on this brownfield site would have on the local environs, it states, ‘There is no known reason why well designed new homes in this location, that take account of the amenities of the neighbouring properties, should have an unacceptable impact.’ The LAA concludes by stating that, ‘This site is most suited for residential development, to provide new homes to help meet the identified need.’

The only aspect of the LAA which we do not agree with is the very low density of housing potential (8 units at 2 dwelling per hectare) particularly in the context of the amount of approved and existing industrial floorspace on the site including existing residential development.

In this context we are mindful that the Borough Council needs to facilitate a significant step change in housing land supply and housing delivery in order to meet local housing need. Brownfield sites such as the omission site, which has received such a favourable assessment in the LAA, can help play their part towards meeting housing land supply, and in line with the vision contained in the Proposed Submission Local Plan, brownfield land should be considered in advance of promoting greenfield land.

It is also highly notable that the omission site is outside of the AONB and beyond the Area of Great Landscape Value and it can, with appropriate design and sensitive planning, play its part in helping to meet the borough’s acute housing need, in advance of releasing major greenfield sites.

The redevelopment of the omission site for housing would also secure a more appropriate use of the site than intensified industrial uses in a rural location where increased HGVs and service vehicles would cause detriment to the environment and to nearby residential amenities.

Conclusion

Discussions have taken place over the past 2 years between various parties and Council officers which have consistently demonstrated that officers accept that some residential development on the former Tyrrell F1 site is acceptable, in principle, in place of the built and permitted industrial development.

The Council’s most recent Land Availability Assessment (LAA) February 2016 cannot be any clearer in terms of the credibility of the omission site when it states that, ‘Provision of new homes here would help towards meeting the housing number in the Local Plan and contribute towards achieving sustainable, inclusive and mixed communities’ Additionally, the LAA concludes by stating that, ‘This site is most suited for residential development, to provide new homes to help meet the identified need.’

The Proposed Submission Local Plan ‘Vision’ and the Foreword drafted by the Council Leader make it abundantly clear that the Proposed Submission Local Plan will promote a ‘brownfield first’ policy approach to housing land identification, and yet despite those stated objectives and the clear support provided in the LAA, this brownfield former industrial site has not been identified for housing development.

Moreover, the activated planning permission on the omission site means that industrial uses could be greatly intensified (together with associated HGVs and service vehicles) without the need for fresh planning permission. Such a scenario would not be in the best interests of the local amenities or the rural environs.

In light of all of the above, it is abundantly clear that the former Tyrrell F1 site at Long Reach is capable of accommodating a modest number of family to help meet the acute and rising demand for new housing, and in so doing ensuring that a future industrial occupier does not intensify the established use and generate a greater numbers of HGVs in this quiet rural location. It is highly notable that the intensification of the omission site for industrial purposes can occur without the need for further planning permission.
We are therefore seeking the identification of the former Tyrrell Site, as identified and supported in the LAA (February 2016) for housing purposes. The precise quantum and amount of housing development to be subject to the preparation of site brief.

I would be very grateful if you would confirm that these representations objecting to the omission of a brownfield former industrial site for housing development in the Proposed Submission Local Plan, have been registered and are ‘duly made’.

Answer (if comment is on questions 1-7 of the questionnaire): ()  

Housing numbers:  
Regarding housing numbers the Strategic Housing Market Assessment has given a housing need of 693 per year, this is far too high and is double the figure given just 4 years ago.  
Guildford Borough Council have not given details of how the figures have been calculated, the report is therefore unaccountable so should not be used.  
The SHMA is fundamentally flawed, historical errors have not been corrected, there are issues over student housing requirements and errors in the estimation of homes needed to support growth.  
By contrast the independent report by Guildford Residents Association comes up with a much lower figure of 510.  
All other boroughs have reduced the figure that their SHMA came up with, Guildford have taken the highest number. Why have Guildford not constrained the figure?  
The proposed 14,000 homes is a massive increase on the current housing stock, this is overdevelopment and is unsustainable. No justification has been put forward for such a massive increase in one town.  

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Gosden Hill Farm:

This massive proposed development will have a huge impact on Burpham, the proposal is to effectively double the size of Burpham. This is a major assault on a village area on the outskirts of town. Burpham is already congested particularly at peak times, adding to this 2000 houses, a 1000 car park and ride, 2 schools and perhaps a station will add thousands more car movements to an already congested road network. The increase in solution is unacceptable.

Gosden Hill is in the Green Belt, the topography of the hill means it is a very visible site when driving on the A3. Development of these green fields will spread the urban sprawl in a very visible manner significantly up the A3.

A large portion of the traffic from this massive site will head towards Guildford via the roads through Burpham, this is already congested and will simply not cope with the increase, moreover the pollution of near stationary cars will blight the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15908  Respondent: 15626881 / Mariah Mills  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Transport:

The evidence on future traffic conditions which has been provided in the Strategic Highway Assessment Report was produced late and is incomplete. Critical information on congestion has not been given in time to be taken into account in the plan proposals.

The proposed Sustainable Movement Corridor is simple unsound and cannot be delivered due to the narrow roads and pinch points on an already very congested route through Burpham.

Of further note is that the proposed Gosden Hill development of 2000 houses plus offices, school etc will add significant pressure to the already congested London road and New Inn Lane. The increase in solution and noise is unacceptable.

The phasing of the proposed Gosden Hill development is in advance of proposed improvements to the A3. This makes no sense.

The major transport issues around Guildford need to be resolved before any further development is considered, these include the proposed A3 tunnel, new river crossing, a workable central bus terminal and a rail station at Merrow.
The Green Belt:

The National policy is clear in that it attaches great importance to the nature of the Green Belt.

The Plan does not show evidence of exceptional circumstances to justify why the Green Belt land should be used for strategic development.

Brownfield land needs more consideration, surely the decline in the need for retail space means that houses could be built in the town centre instead of more retail units, student accommodation should be constructed on campus even if higher rise accommodation is used.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object in principle to the removal of areas from the Green Belt, and note that the areas to be cut out of the Green Belt include some of the most attractive villages in North Surrey, most obviously East Clandon, which together with Hatchlands and West Horsley place form an area of unique character and beauty in Surrey.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/15925  Respondent: 15627009 / Alison Morrison  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
I object to the number of houses proposed. 13,860 houses will have a devastating effect on local communities. In an already traffic sensitive area due to the situation near the junction of A 3 and M 25 and with no train station or frequent bus service, the increase in use of cars would not only result in further congestion but also in severe air pollution in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of the Horsleys, Ockham, Ripley and Send.

I object to the proposals relating to number, density and sustainability of new housing in West Horsley. The 385 homes on the four proposed sites are at much higher densities than currently exist within the village and will be totally out of character with the existing mix of different housing styles and layout of the village. For West Horsley this would represent a 35% increase in the number of houses within 3-5 years of a plan being adopted. The home building proposals are unsustainable in terms of schooling, drainage, roads capacity, shops, parking and public transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

The increased volume of car traffic.

• The congestion this traffic will cause on the narrow rural roads in the Horsleys and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
• The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
• The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
• The lack of suitable public transport. The local rail stations of Horsley and Effingham cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

As a past resident and regular visitor to family living in West Horsley, I write to Object to the proposals set out in the above proposed local plan as they affect The Horsleys, Ripley, Send and Ockham.

I strongly object to the proposed removal of West and East Horsley from the green belt. The villages are well into the green Belt, are not adjacent to any non green belt urban areas and it would be incongruous to have Areas of Outstanding Natural Beauty (AONB) within or adjacent to urban areas.

I strongly object to the proposal to add 385 new homes within the parish of West Horsley and further I object to the proposal to build 100 homes in East Horsley close to the railway near to East Horsley Station, but adjacent to parts of West Horsley.
I object to the proposals on the grounds that the villages do not have the infrastructure to service the homes proposed; that is insufficient water, electricity, gas and sewerage. In addition there is no provision for extra school places, at all levels the schools are over subscribed, nor plans to expand medical provision. The current road network is based on roads which remain country lanes, founded in the days of horse and cart, are narrow, without safe pedestrian footpaths and because of the increasing heavy use are even now breaking up.

If Guildford Borough Planning department was of a mind to develop and plan the development of the borough and region in a meaningful and positive way it would start with planning improvements and expansion of the infra structure. If the planning department was a business it would fail as it has not thought through or planned for the development it is proposing. The way it is going about the plan will lead to the Borough trying to develop without sufficient income to service the plans. The proposals do not demand that developers contribute meaningful sums to the infrastructure development.

I object to the plan as the housing density proposed is much higher than anywhere in the parishes and while the parishes do not need more large 4-5 bed houses, but smaller 2-3 , particularly 2 bed maisonettes, and terraced houses so that younger people can live in the area, with green space between the blocks to maintain the garden feel of the parishes. In some locations, perhaps near railway embankments 4-5 floored blocks of flats of interesting design could be built.

It is time that Guildford Borough acknowledged that a good part of the housing need could be met by the development of high rise buildings in the centre of Guildford, such as the railway redevelopment proposals. Other areas are also suitable. As towns develop into cities their centres go up. Centres of the Guildford suburbs could also rise higher to perhaps 5/6 storeys.

I object to the plan as Guildford Borough Council has not demonstrated joined up policies for car parking, access to shopping areas, development of local shopping opportunities rather than their reduction. There has to be access to shops and parking and parking availability to increase footfall. This is necessary while transport locally is geared to the motor car. Busses are like trains they cannot go everywhere so many people will not use them and then they are uneconomic.

I object to the proposed plan for its impact on the green belt and in particular on the Surrey Hills ANOB, which abuts and is part of the parishes of East and West Horsley.

I also object to the plan as there is no or little indication of where the new residents will likely find employment to enable them to live in the new houses planned. The Railways are already at capacity as are the local trunk roads and there is no surplus parking space at any of the local railway stations. As we are likely to continue to use the motorcar for personal transport and with buses rather like trains in that they only travel on limited routes the current plans will increase pollution in the local atmosphere.

These local plan proposals have not been well thought out and must be rejected.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I am writing to object to the plans to the insetting of Chilworth and the removal of Green Belt status on grounds of

1. Loss of countryside in the beautiful Tillingbourne valley.
2. Intolerable increase in levels of traffic through small communities.
3. Loss of individual character of Surrey villages

I have been a resident in Chilworth for twenty years, having been attracted here by the specific character of the village, namely a single string of houses lining New Road (A248). This enables wonderful access to walking on many footpaths in the lovely unspoilt countryside along both sides of the Tillingbourne valley, including the Down's link, of which many locals and visitors to the area take full advantage.

The unique character of the village has recently been more widely appreciated with the essential clearing work of the heritage site at the old Gunpowder factory works, around which the village originally sprung up. Much money, time and effort has gone into the reclamation from thick undergrowth of the old works and a newly installed information trail is designed to encourage more visitors to come and enjoy the historical significance of our village, once famous throughout Europe. It really is a picturesque setting alongside the Tillingbourne river, with views to St Martha's hill and church having been opened up. A launch event is scheduled for September.

However, since moving here, I have witnessed a steady increase in the amount of traffic on New Road, which peaks at school dropping off and picking up times due to Chilworth infant school and the Tillingbourne middle school situated at either end of the village, both of which are popular schools locally. This causes long queues through the village. There really is no other way for the traffic to go, apart from along New Road. Due to a programme of infilling over recent years, with the development around Chilworth station and St Thomas's Close among others, the increase in traffic has been inevitable such that new residents complain that Chilworth, once a quiet little village, now has a real traffic problem.

Encouraging more visitors to the old Gunpowder works, though welcomed by the locals many of whom have been involved as volunteers in clearing the area, will further add to this traffic congestion.

The loss of Green Belt protection in the area surrounding Chilworth would be devastating, leading to the possibility of Chilworth being subsumed into Blackheath, Albury, Shalford or Wonersh and an intolerable increase in traffic through these small communities. Each of these villages has it's own specific identity and charm, the loss of which would be seriously detrimental to the overall beauty and attractiveness of the Surrey Hills.

I urge the planners and Guildford Borough Council to reject this plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the continued inclusion in the Local Plan of a site (the former Wisley Airfield, - now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

It is clear that development along the lines provided in the Local Plan is completely unsustainable, as well as a betrayal of the whole concept of the Green Belt. Many residents do recognize that there may be a need for a limited amount of additional housing, but the current draft Local Plan is absolutely not the way to address this requirement. There is no alternative but for the Council to revise the housing number down significantly, to amend the Local Plan to make greater use of brownfield/previously used land rather than green field sites (of which there are significant amounts of the former within the Borough), and to propose credible, evidence-based plans for how the sustainability of any development will be achieved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the lack of coherent proposals relating to schools and medical facilities for the Horsleys.

There is a continuing lack of state primary school places in the Horsleys. The Raleigh School which serves both East and West Horsley is full every year and this has been the situation for many years. Secondary school places are limited in number at the Howard of Effingham School and other secondary schools involve a much longer journey of time and distance from the Horsleys to reach them. Glenesk and Cranmore private schools are well supported by many families living in Guildford and other villages up to 14 miles away. Each of these private schools during term time, receives high volumes of traffic going to and from each school at each end of the school day, on Ockham Road North and the A246 respectively.

Kingston Avenue Medical Centre, serving all of East and West Horsley and areas beyond, is always extremely busy and residents experience difficulty in making appointments. The planned population increase (in excess of Government ONS forecasts) for the borough will require a major extension of the Royal Surrey Hospital to cope.
I object to the lack of coherent proposals relating to waste water infrastructure for the Horsleys. These words receive a mention in Reasoned Justification under Policy I1, but no detail for West Horsley has been found in any of the Local Plan documents, including the Infrastructure Delivery Plan.

There are known sewage overflow problems in the Ockham Road North / Green Lane area.

Thames Water has advised Guildford Borough that the area’s wastewater network is unlikely to be able to support the demand anticipated from all the proposed developments. The foul drainage system from West Horsley to the treatment works north of Ripley will need to be upgraded to cope. Thames Water advises ‘a 2 to 3 years lead-in period’ to install the necessary waste water network and treatment capacity after planning permission for a development is granted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15937  Respondent: 15627265 / Rachel McClung  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The words “Roads and Transport Infrastructure” are mentioned in Definitions under Policy I1 (Infrastructure and Delivery), but no detail for West Horsley has been found in any of the Local Plan documents, including the Infrastructure Delivery Plan.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). 5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of the identities of the villages. There is too much traffic in our villages already and this plan will cause more congestion in West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon, with no plan to improve that. The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses in such a small area means dangerous and unsustainable traffic.

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Under the current economic climate, it is unlikely any additional funding will be made available for new capital projects. Clearly no real improvements are possible in the timeframe of this Plan.

Policy I3 provides that developers “will be expected” to propose and secure travel plans for their developments and contribute to transport arrangements for the able and disabled. Legally, this is meaningless - this proposed policy lacks ‘teeth’ and is unrealistic where development and major housebuilding companies are involved.

I object to poor air quality concerns (Policy I3). The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health. It has been shown that Wisley already has NOX levels above the EU legal limits and by law a school cannot be located in this area as a result.

Whilst Horsley station has frequent trains to London and Guildford seven days a week, the station car park is normally full on weekdays. An increase in village population will increase pressure on station parking and traffic movements to/from Horsley station, to drop off/ collect travellers to London and school children going to Guildford and Leatherhead.

Attached documents:

---

Comment ID: PSLPP16/15935  Respondent: 15627265 / Rachel McClung  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Green Belt (Policy P2)
Our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city’s playground. It is for us to conserve and protect it. There are five legal purposes for Green Belt, and it meets them all:
• To check the unrestricted sprawl of large built up areas
• To prevent neighbouring towns merging into one another
• To assist in safeguarding the countryside from encroachment
• To preserve the setting and special character of historic towns
• To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

The Local Plan contains no rational, reasonable or credible justification for building on the Green Belt as proposed. The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances, and the Local Plan neither demonstrates, nor discloses, any such exceptional circumstances. Unmet housing need is NOT an exceptional circumstance in law. It is clear, therefore, that the Green Belt boundaries should NOT be changed, and that this policy is flawed and should be amended.

In the last consultation just six individuals, out of the c. 7,000 of those who took part in the consultation, supported the policy. Another 20 comments of support were from organisations such as: the University of Surrey, local councils (including Guildford), consultants (e.g. Savills) or landowners. But of the 1,371 who commented on the green belt policy, 1,332 (97%) were against.

Over 70% of the proposed housing is planned for land currently in the Green Belt. Housing need is not a reason in law for protected Green Belt land being used. It is perverse for so much housing to be planned for the Green Belt. Clearly, the Green Belt has not been used as a constraint as clearly set out in Government advice, planning policy guidance, the NPPF, case law, election manifestos and Ministerial letters to MPs.

I object to the proposed removal of West Horsley from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries, and no exceptional circumstances or other justification is made for this proposal. The Green Belt & Countryside Study is flawed and the Key Evidence document ‘Guildford Borough Economic Strategy 2013-2031’ makes no case for locating large numbers of new homes in West and East Horsley or neighbouring villages. The number and density of housing proposed is not in keeping with the local area and is therefore against policies within the NPPF.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposals relating to the number of new houses and the density of such housing.

The housing numbers proposed across the borough are for 13,800 homes over the Plan Period to 2031. This number is too high and unsustainable in Guildford’s villages. The model used to calculate the number has not been seen or the assumptions tested by the Council or any of its officers. It has been, on numerous occasions, shown to be flawed by various third parties. This housing target will result in the borough’s permanent resident population increasing at 4.5 times the rate of population increase during the period 2001 to 2011. This population growth, by definition, is excessive and unsustainable for a gap town with many environmental, physical and infrastructure constraints.

In West Horsley, the 385 homes on the four proposed sites are at much higher densities than currently exist within the village and will be totally out of character with the existing mix of different housing styles and layout of the village. For West Horsley this would represent a 35% increase in the number of houses within 3-5 years of a plan being adopted. The home building proposals are unsustainable in terms of schooling, drainage, roads capacity, shops, parking and public transport.

I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of the Horsleys, Ockham, Ripley and Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary space between Woking and Guildford.

I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” Standing at the head of the draft plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

Horsley is a rural village NOT a District Centre, and everything is at overload at present.

The planned development on WIsley Airfield, Ockham, frightens everyone to death, because although the original drawings are all very ‘Pretty’ with doctors surgeries, schools, shops etc, we all know that these will be the last to be built …..and may not be built at all…..and the pressure on the nearby village of Horsley will be huge.

Small developments of 100 or so houses in available land in West and East Horsley, will build up to be a vast new influx of people, and the village just cannot cope unless assurances are given to improve and enlarge the infrastructure of our very special village.

I have been a resident of Woodland Drive for 44 years and the qualities I cherished back in 1972 are still appropriate today. Plenty of nearby countryside and fields and walks, yet a good train service to London and Guildford.

Please don’t ruin our Area. Future generations have the right to enjoy the beauty and uniqueness of this village in the years to come. IF YOU STOP YOUR PLANS TO ENLARGE DEVELOPMENT TO THE UNACCEPTABLE LEVEL YOU ARE PROPOSEING, THEN Horsley will remain largely as it is, and we have, by objecting, secured it’s future.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Transport

County council officers continue to work with borough officers, as well as with Highways England and potential developers, on transport matters. This includes transport impact assessment work and identifying mitigation measures to address the transport impacts of development proposed in the Local Plan.

The county council’s highway assessment work indicates that the schemes which are included in the Department for Transport’s Road Investment Strategy March 2015 and identified in the Infrastructure Schedule (Appendix C) are essential to mitigate the impact of the development proposals set out in the Guildford borough Proposed Submission Local Plan. Without such investment, the cumulative impacts of the new development proposed on the Local Plan’s strategic sites on the Strategic Route Network (SRN) could be considered “severe” in the context of the NPPF, as the additional pressure on the SRN is likely to generate safety issues.

The Infrastructure Schedule also identifies a number of new transport infrastructure projects. As these projects are developed and further details regarding their land requirements are known, appropriate action will need to be taken to safeguard the land to allow these projects to be implemented.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

APPENDIX C Infrastructure Schedule

Strategic Road Network

Page 278 – re SRN4, SRN9, SRN10

For those elements of infrastructure that are entirely the responsibility of a given developer, Surrey County Council should be deleted from the "Delivered by" column.

Local Road Network
The new signalised junction from Blackwell Farm site to A31 Farnham Road, would be a Section 278 Agreement, delivered in its entirety by the developer. Surrey County Council should be deleted from the "Delivered by" column.

Local Road Network

Page 280 – re LRN3, LRN4, LRN5, LRN6, LRN7, LRN8,

For those elements of infrastructure that are entirely the responsibility of a given developer, Surrey County Council should be deleted from the "Delivered by" column.

Bus Transport

Page 287

Under BT2, Surrey County Council should be deleted from the "Delivered by" column.

We suggest the inclusion two additional BT infrastructure entries relating to the need to provide significant bus networks serving the two east and west urban extensions.

Active Modes

Page 288

We suggest the inclusion of two additional AM infrastructure entries relating to the need to provide significant cycle and pedestrian permeability improvements linking these extensions into the existing urban fabric.

OS Open Space

Page 298

We do not consider it appropriate to deal with school playing fields under Open Space. Public access to the playing fields at Gosden Hill will need to be controlled for security and operational reasons.

PED Primary Schools

Page 299

PED1

Re Expansion of Wyke Primary School by 1 additional FE, please add: “OR RELOCATION OF THE SCHOOL ONTO THE STRATEGIC SITE”

Page 300

PED6

Re Ash Grange in the column headed “Delivered when” delete from years 0-5 to Years and add 1 – 10

SED Secondary Schools

SED1

Under the column headed “Infrastructure Type Infrastructure Project”, the reference in the first sentence to “maxim 6 FE” needs to be amended to state: “up to 7 FE”.

890
To be consistent with the other entries, in the column headed “likely cost and funding source,” please delete: “Developer contributions (from other sites) to fund building”.

It is suggested that wording is added to say that the shared community use of the school playing fields will be secured by a legal agreement.

Page 301

SED2

Under the column headed Infrastructure Type Infrastructure Project, please remove the words: “(to age 16)” to facilitate flexibility for future provision.

In the column headed “likely cost and funding source” please amend the first entry to read: “Developer to provide serviced land at nil cost and transfer it to SCC.”

SED3

In the column headed “Infrastructure Type Infrastructure Project”, the reference in the first sentence to an “A 7- form entry (7FE) secondary school” needs to be amended to “up to 8 FE to” be consistent with the penultimate bullet point under “Allocation” in Policy A46.

In the column headed “likely cost and funding source”, after the words “...including Blackwell Farm strategic site” we would suggest that the following words are added:

“and the site allocation comprising land to the South and East of Ash and Tongham.”

In the column headed “likely cost and funding source”, please amend the first entry to read: “Developer to provide serviced land at nil cost and transfer it to SCC.”

Key Diagram Page 18

The proposed Guildford East (Merrow Station) is notated incorrectly as West Clandon. Effingham Junction station has no notation although it is an existing station.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Policy A10

Land for sustainable movement corridor Town Centre Phase 2, off Walnut Tree Close Page 147

In the 2003 Local Plan under Policy M7 (Access from Walnut Tree Close to Guildford Station) a scheme involved the Safeguarding of part of Walnut Tree Close. This no longer needs safeguarding for the reasons envisaged. However, some of the safeguarded land comprising the West/East alignment of the corridor may be needed for future operational purposes, for whatever schemes goes forward in this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A11

Guildford Car Park, Guildford Park Road Page 149

Under “Requirements”, we would like to see included within the second bullet point: “Potential route for the Sustainable Movement corridor”.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Policy A24

Slyfield Area Regeneration Project Page 175 - 176

There is no direct, or indirect reference to Clay Lane under this policy, even the southern element, which uses a substantial part of this site. Even though SARP may not be reliant upon the full link road going through, the northern part of the allocated site does include the southern network of roads/roundabouts forming the Phase 1 of the Clay Lane scheme.

Under “Requirements”, it may be appropriate to refer to the need to provide permeability for pedestrians and cyclists into and from the development, especially from the existing urban fabric of Guildford, in accordance with the Sustainable Movement Corridor scheme objectives. This could be referenced in the context of a justification for the developer contribution referred to under the third bullet point.

Surrey County Council’s education assessment finds that development of this site will require a new primary school. It is assumed that this is not referenced in Policy A24 because it is considered that Weyfield Primary School would be expanded to meet the need generated by the new development, given the proximity of the existing school to the site. This would be the preferred option, rather than building a new school which would compete with Weyfield. The school would need to expand by 1-2 forms of entry and a decision to take this option forward is dependent on the outcome of detailed feasibility studies that are being undertaken. If these find that it is not feasible to expand the school, additional land might be required.
to be allocated within the SARP area, in addition to a developer contribution. This reflects discussions between officers of our councils.

In the table headed Description under key considerations, the fact that some 11 ha of the site is allocated for waste management purposes in the Development Plan for the area (under Policy WD2 of the SWP) should be specifically acknowledged.

Under allocation we would like to see clarification by stating:

New or enhanced waste management facilities including the following facilities:

- Waste transfer station
- Community recycling centre
- Sewage treatment works

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site Allocation A25

**Gosden Hill Farm Page 178/9**

Under “Requirements”, a bullet point should be included under the heading, “Infrastructure” requiring the provision for extended/new bus services to provide seamless connectivity between the site, the existing eastern suburbs of Guildford, and the town centre (as well as any through journeys that can be provided in the future to the western fringes of the town), unless this will be adequately met by the Sustainable Movement Corridor.

In addition, it may be appropriate to refer to the need to provide permeability for pedestrians and cyclists into and from the development, especially from the existing urban fabric of Guildford.

To ensure consistency throughout the document, change wording relating to primary schools to accord with the format of Policy A26 Blackwell Farm and Policy A35 Wisley.

Under “Allocation”, within the penultimate bullet point, we would like to see the wording “potentially as a through school” deleted as the organisation of the school will be decided at a later stage.

Under “Requirements,” Infrastructure, we consider that the secondary school site provision should be dealt with under a separate bullet point. Reference should be made under the new bullet point to the dual use of the playing fields which are essential for the school. It should be stated that ownership of the playing fields will be made over to the school and the dual use will be managed by the school according to an appropriate legal deed of covenant.

It would be useful for us to know where the playing fields are to be located.
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A26 Blackwell Farm Page 182

The reference to the A31/Down Place access as being the Primary Access should be changed in the column headed “Allocation”, final bullet point, and in the column headed “Requirements,” first and third bullet points. Further assessment work needs to be undertaken to determine the appropriate access strategy. Within a sustainable urban extension, we would want to encourage Guildford town bound movements to be by non-car modes. Whilst the Down Place access provides for vehicular access to the West, towards Winchester, southbound on the A3, to Portsmouth via Down Lane, and eastwards into Guildford town, we would expect A3 London/M25/ east Guildford/Woking traffic, to use the A3 Egerton Road access.

We would further suggest that the Site Allocation plan on page 185 should include the land necessary to provide the access link to the east (i.e. into Egerton Road). According to the current plan, the site is isolated from the east, especially given that the Ancient Woodland provides a barrier between the site and the urban fabric of West Guildford.

Under “Requirements,” fourth bullet point, reference to the need to manage this through-link should also be included in the text.

Under “Requirements,” A bullet point should be considered for inclusion under the heading, “Infrastructure,” requiring the provision for extended/new bus services to provide seamless connectivity between the site; the existing western suburbs of Guildford; the town centre and also any through journeys that can be provided in the future to the eastern fringes of the town. Whilst the provision of the Sustainable Movement Corridor might be considered sufficient, other bus services and routes into the development might also be needed.

Also under “Requirements,” it might be appropriate to refer to the need to provide permeability for pedestrians and cyclists into and from the development, especially from the urban area of Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A29

Land to the east of Ash and Tongham Page 190

Under “Requirements,” given the volume of potential new homes, an additional bullet should be included which refers to the existing substandard junction of White Lane with A31 Hogs Back needing to be either improved or closed. Also, the current gap in the central reservation which requires traffic turning into Ash Green from the East to cross the eastbound A31 traffic is inappropriate for any material increase in traffic.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A35

Land at former Wisley airfield, Ockham Page 203

More detail is required in the column headed, “Requirements” regarding the potential interventions that will be required to address issues on B2215 Ripley High Street. This comprises two slip roads at A247 Send. If the land necessary for these has now been secured, is presumed that there will not be a problem in linking these to Wisley.

Some 17 ha is allocated for waste management use under Policies WD2 & WD5 of the SWP and is also considered suitable for aggregate recycling. The proposed allocation contains no specific waste use allocation other than an allocation for general industrial purposes which could in principle include some suitable, but smaller scale, waste uses (see below).

The county council would wish to see part of the site continue to be allocated specifically for waste management purposes (the county council acknowledges that much less than 17 ha would be required for waste management purposes - perhaps of the order of 5 ha including any necessary environmental buffer). Therefore as waste planning authority, we object to this proposed policy as it involves the loss of this waste management site and is therefore contrary to SWP 2008 Policies WD2 and WD5 and government policy contained in the NPPW. We consider the Plan to be unsound in terms of being positively prepared in that it does not take account of this acknowledged requirement for waste management facilities and the SWP allocation.

In view of the ongoing need for additional waste management capacity in Surrey, including for the recycling of construction and demolition waste, the proposal would prejudice the successful implementation of the SWP by reducing land availability for such uses and limiting flexibility to make adequate strategic provision. As such it will fetter the implementation of the waste hierarchy and undermine the targets included in SMP Core Strategy Policy MC5 for the production of alternative aggregates in Surrey.
The county council is currently in the early stages of preparing a new waste plan that will consider the need for new waste management capacity in the county.

It should be noted that the wording relating to primary school provision in policies A25, A26 and A35 is not consistent.

Policy A46

Land to the south of Normandy and north of Flexford Page 229

We note that the site was proposed to be removed from the green belt and safeguarded for potential future development in the previous draft Local Plan. The current version proposes to bring this site forward for development in this plan period to meet Guildford’s housing needs.

Given this position and in the context of our forecast needs for additional school places over the plan period, required to support the proposed new housing to the west of Guildford, it is our view that the option to locate a secondary school here is acceptable, provided that the scale of housing proposed on this site is delivered to meet the need identified in the plan. This would also help to meet sustainable transport objectives, particularly if the scale of housing supports the delivery of the rail connectivity proposals and the station improvements.

Policy D3: Historic environment Page 103

We suggest that the section on the historic environment would be better placed within the "Protecting" section, rather than within the “Design” section as heritage management shares many common objectives and practices with other environmental protection policies.

Policy D8 mentions support for "development of the highest design quality”. We consider that this needs to be more clearly defined. Assessment of design quality and aesthetic appeal is of course highly subjective, but we would nevertheless recommend that at least some parameters for outlining a definition for "high quality" would be helpful in the implementation of this policy and suggest that this should be set out either in the supporting text or in an appendix. A possible approach could be for, “highest quality” to be required to satisfy the relevant "architectural interest” requirements that are commonly assessed as part of the Listing process for historic buildings (set out in "Principles of Selection for Listing Buildings", DCMS, 2010).

The "Monitoring Indicators” table outlines that a "heritage asset register” is necessary: The Historic Environment Record can provide much of the necessary data which will be required to compile this and our Heritage Team would welcome the opportunity to assist.

Para 4.6.9

Page 109

We suggest this should be amended to "Developers will fund and deliver some infrastructure themselves....." rather than "Infrastructure providers will fund and deliver...."

Para 4.6.38

Page 117

This refers to “public” open space and yet the designation includes school playing fields to which public access is restricted.

Answer (if comment is on questions 1-7 of the questionnaire): ()
We support the introduction to the economy policies which succinctly set out the role of Guildford’s economy and note that it continues to perform well but there are signs that it could lose its competitiveness to other locations. This section clearly sets out the role of the university and the research park. In our comments on the draft Local Plan (July 2014) we stated that it would be helpful if the supporting text were to include more detailed explanation of what the LEP is and how it operates, that the reference to the role of Guildford as a Growth Town in the LEP’s Strategic Economic Plan could be expanded and that the submission version of the Plan could contain information about the recent Growth Deal projects for the area. We feel that the supporting text should be expanded to include reference to these points.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policies E1– E3 Pages 63 - 70

We support these policies. We note the requirement for the provision of between 37,000 and 47,000 sq m of floorspace for B1a and B1b uses and between 4.7 and 5.3 ha land for B1c, B2 and B8 use classes and the designation of seventeen Strategic Employment Sites which will be protected for employment uses. We note that sufficient land has not been identified within the urban area to meet the employment land requirements so it has been necessary to allocate new employment sites. We support the policy for new floorspace to be directed first to Guildford town centre, then to locations within 500m of a public transport interchange and then to Office and Research and Development Strategic Employment Sites. This flexible approach should help ensure existing and future demand is accommodated.

We would however be concerned about the delivery of the economy policies if one or more of the key development sites for employment use were not able to proceed due to transport or other reasons. Policy A25: Gosden Hill Farm, policy A26: Blackwell Farm and policy A35: Land at former Wisley airfield are all important for meeting employment needs.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy E2

Location for new employment Floorspace Page 67

Reference should be made to the inclusion of suitable waste management facilities as this would reinforce the principle of directing waste facilities first to industrial/employment sites in urban areas in accordance with Policy CW5 of the Surrey Waste Plan 2008 (SWP) which sets out sequential principles for the location of waste management facilities and Policy CW5 which states that "planning permission for development involving the recycling, storage, transfer, materials recovery and processing of waste will be granted on land that is, or has been used, or is allocated in a Local Plan or DPD or has planning permission for industrial or storage purposes". This is particularly relevant to Policy E2, where inclusion of suitable waste management facilities under the heading “Industrial warehousing and storage” would reinforce the SWP principle of directing waste facilities first to industrial/employment sites in urban areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Minerals and Waste Planning

The county council supports the references to minerals and waste safeguarding and the inclusion of safeguarded areas and sites on the Policies Map. This supports the implementation of policies in the Surrey Waste Plan 2008 (SWP) and the Surrey Minerals Plan 2011 (SMP).

There are no significant implications in terms of the safeguarding of mineral resources. The proposed new settlement at the former Wisley Airfield (A35) is located within a minerals safeguarding area but it is considered very unlikely that the underlying sharp sand and gravel resource will be worked in future. Nevertheless, should the site be allocated in the Local Plan, the applicant should be required to investigate the potential for prior working before any planning application being submitted.

The county council seeks to encourage the recycling of construction and demolition waste and the use of recycled aggregate as both minimise the use of valuable land won aggregate. As such, we strongly support Policy D2: Sustainable design, construction and energy.

The provision of waste management infrastructure is essential to support a modern economy and needs to be considered alongside housing and employment growth (National Planning Policy for Waste (NPPW) Paragraph 1). It is important, therefore, that the borough council acknowledges in the Plan that waste management facilities are essential infrastructure to support new housing and industry.

The Local Plan should acknowledge that many waste management activities fall within the general industrial class in the Use Classes Order and can be considered to be a B1c, B2 or B8 use and can be located within modern, purpose-designed buildings on industrial estates. This accords with SWP Policy WD2, which states that "planning permission for development involving the recycling, storage, transfer, materials recovery and processing of waste will be granted on land that is, or has been used, or is allocated in a Local Plan or DPD or has planning permission for industrial or storage purposes." The SWP specifically identifies a number of urban sites and industrial estates in Guildford borough as being potential areas for accommodating waste management facilities, but this list is not meant to be exhaustive. We would additionally like to see Policy E2 of the Proposed Submission Local Plan under the heading of, "Industrial, warehousing and storage," make reference to the inclusion of suitable waste management facilities to reinforce the principle of directing waste facilities first to industrial/employment sites in urban areas in accordance with SWP Policy CW5.

An issue of concern for the county council which is not resolved in this version of the Local Plan relates to the potential loss of the allocated waste management site at the former airfield at Wisley. In our response, dated 18 September 2014, to the consultation on the previous Draft Local Plan, we pointed to the SWP allocation of the former airfield for waste management use and also an existing planning permission for a waste management facility. The proposals for Wisley effectively prejudice the implementation of Surrey’s waste strategy as set out in the SWP. We therefore object to this proposed policy and consider the Plan to be unsound in terms of being positively prepared in that it does not take account of the acknowledged requirement for waste management facilities and the SWP allocation.

In addition to these concerns, we have a number of comments relating to specific policies and supporting text as set out in the consultation document and these are included in the Appendix attached to this letter.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Education

Since the previous consultation on the Draft Local Plan: strategy and sites in July 2014, we have been working with borough council officers under the Duty to Cooperate in order to progress the approach to school provision to support the delivery of Guildford’s growth strategy. This liaison is ongoing and both our councils recognise that it is essential to provide additional school places to meet the increased needs that will arise from the new housing proposed in the emerging Local Plan in a sustainable way and in appropriate locations.

The county council’s role in this process has been to respond to options for school sites, presented by the borough council, in accordance with the objective of meeting the additional educational demands based on the evidence of forecasted need produced by the county council’s schools commissioning team. The key criteria for selection were the location of sites, which need to be as close as possible to the residential development they are intended to serve, and the provision of safe and sustainable access for pupils that, where possible, enables alternatives to car travel.

We are concerned about the designation of all school playing fields as open space. It is inferred in paragraph 4.6.38 of the Local Plan that these areas will be accessible to the public, whereas access and shared use of school facilities will need to be strictly controlled for operational and security reasons. Playing fields are considered to constitute an outdoor recreation facility rather than an amenity space with public access. Moreover, it is our view that designating all school playing fields in this way may not allow for future operational development needs to be met through the expansion of schools on their existing sites. This might lead to additional land, potentially in the Green Belt, being required for the provision of future education facilities.

Whilst the National Planning Policy Framework (NPPF) paragraph 74 states that existing playing fields should not be built on, at paragraph 72, it requires local planning authorities to give great weight to the need to expand schools. In addition, playing fields are considered to be appropriately protected already under statute as they cannot be redeveloped without prior consent from the Secretary of State for Education under Section 77 of the School Standards and Framework Act 1998.

We fully accept that the loss of a school playing field should be wholly exceptional as an option of last resort. However, the county council is increasingly required to expand schools to meet the need for additional school places generated by population growth and new development. Such expansions can sometimes only be accommodated by extending a school...
onto part of the playing fields. It is considered that this should be facilitated by the Local Plan rather than imposing a requirement to routinely have to make exceptions to policy for even minor extensions to schools. Therefore, we consider that the presumption against the loss of playing fields should be set against the need to provide essential education infrastructure to reflect the NPPF.

Policy R5 (Protection of Open Space) in the 2003 Guildford Local Plan set out an exception for school playing fields “where the proposed new development meets a legitimate educational need that is appropriately met on the site.” We would like to see a similar exception included in Policy 14: Green and Blue Infrastructure, particularly given that a number of school expansions are identified in the Plan’s Infrastructure Schedule as needed to deliver the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/16000  Respondent: 15629025 / Surrey County Council (Sir or madam)  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy 14
Page 118

Policy 14 seeks to protect open space from development in accordance with the NPPF. However, whilst NPPF paragraph 74 states that existing playing fields should not be built on, paragraph 72, requires local planning authorities to give great weight to the need to expand schools. We accept the need to protect school playing fields, however, this should be more clearly balanced against the need for education facilities. Policy R5 in the 2003 Guildford Local Plan included an exception for school playing fields “where the proposed new development meets a legitimate educational need that is appropriately met on the site.” We would like to see a similar exception included in Policy 14 Green and Blue Infrastructure, particularly given that a number of school expansions are identified in the Plan’s Infrastructure Schedule as needed to deliver the Plan. It should be noted that permission for school expansion schemes that will significantly impact on school playing fields is only very rarely sought by the county council as a last resort and such proposals require approval from the Secretary of State.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Vision and ambition
**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**Guildford borough Proposed Submission Local Plan: strategy and sites June 2016**

Thank you for consulting Surrey County Council on the Guildford borough Proposed Submission Local Plan: strategy and sites document. This is an officer response that has been agreed with the Cabinet Member for Environment and Planning.

The county council is committed to ensuring Surrey’s economy remains strong and to maintaining a high quality of life and well being for Surrey residents through economic development and planned growth underpinned by the timely delivery of supporting infrastructure. This is reflected in current partnership working with boroughs and districts through ‘Surrey Future’ and on the recent Surrey Infrastructure Study, which aim to help support the delivery of agreed local plan and economic strategy priorities. The vision and strategy outlined by Guildford Borough Council in its Local Plan is considered to be broadly consistent with this policy position. The Plan sets out the needs of the borough’s residents and the county council acknowledges that balancing the need for housing and employment growth and the need to protect the Green Belt is a matter to be decided locally through the Local Plan.

A key issue for the county council is the implications of the Proposed Submission Local Plan’s policies and proposals for infrastructure, for which the council is the provider, especially education, transport and waste management.

Site Specific Comments: A20

Surrey County Council support the proposed allocation of site A20 (Former Pond Meadow School) and confirm it is available for a minimum of 10 residential units or, if no other SCC operational requirements, solely residential or extra care at an appropriate density for an urban site as determined through the detailed design process.

Previous Site Specific Submissions

All sites previously submitted through the Guildford LAA processes are still considered suitable and available for development, particularly the Countryside Depot (East Horsley) and the land between Oxenden Road and the A331. We encourage GBC to review and positively consider these sites and would welcome the opportunity to discuss further, especially if the housing requirement for the Borough increases. These sites can positively contribute to the OAN (housing numbers) over the plan period, subject to any operational requirements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Vail Williams is instructed by Surrey County Council (SCC) Property to make representations on the Guildford Borough Council (GBC) Proposed Submission Local Plan, June 2017. Previous engagement with the Local Plan process has included site specific comments, these representations focus on the main strategic issues, but refer to particular sites where referenced.

Spatial Development Strategy (Policy S2)

One of the fundamental changes to the Proposed Submission Local Plan is within Policy S2 relating to the Spatial Development Strategy. This includes both the level of housing provision over the whole plan period and also the annual housing target, which has been staggered to increase over the plan period.

Paragraph 4.1.9a states that the increasing annual target has been staggered due to the “the likely rate of delivery, particularly on the strategic greenfield sites, which is dependent upon the delivery of the necessary infrastructure expected
to occur towards the end of the plan period”. Whilst Surrey County Council is fully supportive of delivering necessary infrastructure to support development and local communities, it recognises the necessity to provide sufficient housing to meet the needs of residents within Surrey. The revised phasing of annual housing targets places a greater emphasis on delivery at the end of the plan period, potentially leading to greater need in the short term due to the lower anticipated delivery rates early in the plan. It is considered that options to bring forward planned development earlier within the plan period should be fully explored to seek to provide a consistent level of housing delivery, recognising the National Planning Policy Framework (NPPF) aim to deliver housing especially within the shorter term. This is acknowledged by GBC, including in paragraph 4.1.10 that the phased approach, which is related to assumptions on likely rate of delivery, does “not in any way preclude the earlier delivery of the site where this is sustainable to do so”.

**Economy and Infrastructure**

Associated with the level of housing, is the forecast for economic growth within Guildford Borough., Policy E1, relating to employment needs, sets out the delivery of employment floor space and land over the plan period. As part of sustainable development, as defined by the National Planning Policy Framework (NPPF), the provision of adequate employment land is supported to ensure the three strands of sustainable development can be incorporated within the wider plan objectives.

The Local Plan recognises (paragraph 2.10a) the pressure on existing infrastructure and the importance of providing sufficient infrastructure to support new development and the local community, which SCC Property support

**Environment**

Surrey County Council recognises the benefit of the countryside, including its uses for recreation. The protection of Areas of Outstanding Natural Beauty, Areas of Great Landscape Values, the Greenbelt, and the Special Protection Areas is supported, in accordance with current national guidance.

**Summary**

In conclusion, the plan seeks to balance housing delivery, economic development and the protection of the environment to accord with national guidance. However, appropriate consideration needs to be given to the wider housing market area.

SCC property support much needed housing and infrastructure development within the Borough and have particular site specific comments as above.

We welcome the opportunity to discuss any issues further, including any details relating to SCC sites that have previously been provided to Guildford Borough Council. Please ensure we are kept informed of all progress of the Local Plan and we request a place at the Examination.

**Comment ID:** PSLPP16/16003  **Respondent:** 15629377 / The Woodland Trust (Jack Taylor)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4
The Woodland Trust appreciates the opportunity to comment on the Guildford borough Proposed Submission Local Plan: strategy and sites.

As the UK's leading woodland conservation charity, the Trust aims to protect native woods, trees and their wildlife for the future. Through the restoration and improvement of woodland biodiversity and increased awareness and understanding of important woodland, these aims can be achieved. We own over 1,250 sites across the UK, covering around 23,000 hectares (57,000 acres) and we have 500,000 members and supporters.

Ancient woodland is defined as an irreplaceable natural resource that has remained constantly wooded since AD1600. The length at which ancient woodland takes to develop and evolve (centuries, even millennia), coupled with the vital links it creates between plants, animals and soils accentuate its irreplaceable status. The varied and unique habitats ancient woodland sites provide for many of the UK's most important and threatened fauna and flora species cannot be re-created and cannot afford to be lost. As such, the Woodland Trust aims to prevent the damage, fragmentation and loss of these finite irreplaceable sites from any form of disruptive development.

The Woodland Trust is concerned about a number of site allocations included in the Guildford borough Proposed Submission Local Plan: strategy and sites as they could lead to the damage and loss of ancient woodland. The Trust objects to the inclusion of ancient woodland within these allocated sites; a list of the sites of concern is included at the end of the document.

Planning policy

National Planning Policy Framework (NPPF) paragraph 118 states that "planning permission should be refused for development resulting in the loss or deterioration of irreplaceable habitats, including ancient woodland and the loss of aged or veteran trees found outside ancient woodland, unless the need for, and benefits of, the development in that location clearly outweigh the loss."

Natural England’s standing advice for Ancient Woodland and Veteran Trees (published April 2014), paragraph 4.8.1 states: ‘Ancient woodland is of prime ecological and landscape importance, providing a vital part of a rich and diverse countryside. In particular, ancient woodland:

• is exceptionally rich in wildlife, and supports many rare and threatened species;
• may contain surviving descendants and features from the original natural forests;
• acts as reservoirs from which wildlife can spread into new woodlands;
• has valuable soils due to their undisturbed nature;
• is an integral part of England’s historic landscapes and the biological and visual functioning of a landscape;
• contains a wealth of features of historical and archaeological importance little altered by modern cultivation or disturbance;
• contributes to people’s sense of place and imagination.’

Keepers of Time, a statement of Policy for England’s Ancient and Native woodland jointly written by Defra and the Forestry Commission states that “the existing area of ancient woodland should be maintained and there should be a net increase in the area of native woodland.” One of the objectives set out in Keepers of Time is to “take steps to avoid losses of ancient woodland and of ancient and veteran trees and to sustain the total extent of other native woodland (ensuring that gains exceed losses).”

The Government Forestry & Woodlands Policy Statement (2013) confirms the Government’s commitment to Keepers of Time. Keepers of Time recognises a number of threats to ancient woodland, making specific reference to the threat posed by development pressures:
‘There are still occasions where native and ancient woodland is threatened by development, and many woods suffer attrition through incursions at their boundaries. Even if the woodland itself is protected, it can suffer serious disturbance where houses or roads are built right up to its margins, both directly from the impact of development, or indirectly through changes to drainage.’

**Impacts on ancient woodland**

Approximately one quarter of priority UK BAP species are associated with woodland habitats. Forests, woods, and trees make a significant contribution to biodiversity, and ancient sites are recognised as being of particular value. Due to their longevity, ancient woodlands are more species rich, and are often refuges for specialist woodland species that struggle to colonise new areas.

Development within ancient woodland can lead to long-term changes in species composition, particularly ground flora and sensitive fauna, i.e. nesting birds, mammals and reptiles. Majorly adverse impacts occur as a result of the removal of large areas of woodland to make way for new development.

Furthermore development adjacent to ancient woodland results in more intensive land use, meaning that plant and animal populations are exposed to environmental impacts from outside of the woodland. In particular, the habitats will become more vulnerable to the outside influences, or edge effects, that result from the adjacent land’s change of use. Detrimental edge effects can result in changes to the environmental conditions within ancient woodland, consequently affecting the wood’s stable conditions. Detrimental edge effects have been shown to penetrate woodland causing changes in ancient woodland characteristics that extend up to three times the canopy height in from the forest edges.

As part of the Proposed Submission Local Plan, Guildford Borough Council has outlined areas for future development. As indicated by the table included at the end of the document there are areas of ancient woodland included within sites allocated for future development. The Trust is concerned that the large number of ancient woods that have been included within sites for future development leaves these woods open to potential damage and loss.

Creation of new areas of woodland or buffer zones around semi-natural habitats, and more particularly ancient woodland, will help to reduce and ameliorate the impact of damaging edge effects, serving to improve their sustainability. The size of the buffer is dependent on the intensity of land use in the intervening matrix between ancient woods.

Natural England’s standing advice for Ancient Woodland and Veteran Trees, paragraph 6.4, highlights the importance of keeping development away from ancient woodland and buffering it where necessary:

“Development must be kept as far as possible from ancient woodland, with a buffer area maintained between the ancient woodland and any development boundary. An appropriate buffer area will depend on the local circumstances and the type of development. In a planning case in West Sussex the Secretary of State supported the arguments for a 15m buffer around the affected ancient woodland, but larger buffers may be required.”

The size of a number of the site allocations suggests that large scale development could potentially take place. The minimum 15m buffer recommendation to all development is not effective in ensuring that ancient woodland within and/or adjacent to site allocations is not affected by potential future development. Buffers should be constructed on a case-by-case basis rather than a ‘one size fits all’ approach. The Trust recommends that 15m is an absolute minimum and only suitable for small developments; larger buffers should be sought at every opportunity.

**Conclusion**

The Trust is concerned about the potentially adverse impacts that the proposed site allocations will have in relation to areas of ancient woodland within and/or adjacent to site allocations. Ancient woodland is irreplaceable; once lost it cannot be re-created. Ancient woodland should not be included in areas that are allocated for development, whether for residential, leisure or community purposes as this leaves them open to the impacts of development.

The Woodland Trust objects to the inclusion of the below site allocations in the Guildford borough Proposed Submission Local Plan as they are likely to cause damage and/or loss to areas of ancient woodland within or adjacent to their boundaries. For this reason we believe the sites in the table below are unsound and should not be taken forward.
Secondary woodland should also be retained to ensure that ecological networks are maintained and enhanced.

We hope you find our comments to be of use to you. The Woodland Trust is happy to provide any additional information or support regarding the protection of ancient woodland.

If you require any further information regarding points raised within this document, then please do not hesitate to contact us.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

---

**Background**

Guildford Borough Council is consulting on their Proposed Submission Local Plan: Strategy and Sites from 6 June until 18 July 2016.

This is the first document with the purpose of setting the vision, aims and strategy for the Borough up to 2033. Following adoption of this, a second document will be produced on development management policies.

Wokingham Borough Council responded to Guildford Borough at the Draft Options consultation stage in September 2014. At that stage, a draft Strategic Housing Market Assessment (SHMA) was available indicating that Guildford Borough lies within the West Surrey housing market area. This only gave a draft indication of housing need (of between 650 and 780 dwellings per annum) for Guildford Borough. The main concern of Wokingham Borough Council previously has been whether Guildford Borough Council could release enough land (including potentially from the Green Belt) to meet its housing need.

**Analysis of Issues**

Since the Draft Options consultation stage, the final West Surrey Strategic Housing Market Assessment (SHMA) has been published (in October 2015). This indicates that Guildford Borough lies within the West Surrey housing market area with the boroughs of Woking and Waverley. The SHMA recognised there is a strong relationship between West Surrey housing market area and that covering the Blackwater Valley (centred upon the authorities of Surrey Heath Borough, Rushmoor Borough and Hart District). Therefore, the Blackwater Valley housing market separates Wokingham Borough from the one which includes Guildford Borough. However, it is still important for Wokingham Borough Council to ascertain whether the West Surrey HMA is seeking to meet need within the HMA, as it may have implications for the Wokingham Housing Market Area if they do not.

The final objectively assessed housing need (OAN) for Guildford Borough is 619 dwellings per annum between 2013 and 2033, which gives an overall need of 12,380 dwellings over the 20 year period. (This considerable change between the draft
and final housing need figures is due to the Government’s 2012 Household Projections being published during this time between.

The plan seeks to allocate six strategic sites. This includes taking 1.6% of the Green Belt land in the Borough out of the Green Belt and allocating this for development. Overall the plan makes provision for 13,860 new homes, which will meet the housing need for the Borough.

Wokingham Borough Council is therefore satisfied that on the basis of available information that Guildford Borough Council are planning to meet the need for the Borough, but would welcome further understanding of discussions with Woking and Waverley Borough Councils regarding the meeting of the housing need as an HMA.

OUTCOME / BENEFITS TO THE COMMUNITY

That development proposed through the Guildford Borough Local Plan has minimal negative impacts upon Wokingham Borough and that any positive benefits are maximised.

That development proposed through the Guildford Borough Council Proposed Submission Local Plan document has minimal negative impacts upon Wokingham Borough and that any positive benefits are maximised.

Wokingham Borough Council submit an objection to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites document on the basis of:
1. Failure under the duty to cooperate to achieve the necessary cooperation on the strategic cross boundary matter of meeting housing needs.
2. Failure of the plan to consider the likely unmet need arising from elsewhere in the Housing Market Area.

Wokingham Borough Council had previously responded to Guildford Borough Council’s Proposed Submission consultation stage of their Local Plan: Strategy and Sites. At that stage Guildford had finalised the West Surrey Strategic Housing Market Assessment (SHMA), had an identified housing need and had planned to meet this need within the borough. Guildford are now running a further Proposed Submission consultation, following key changes to policies which were deemed to be significant, rather than merely minor modifications. Guildford are still planning to meet their housing need, however there are concerns regarding further unmet need within the West Surrey HMA and beyond.

The report outlines Wokingham Borough Council’s concern regarding likely unmet housing need arising from Woking Borough and Surrey Heath Borough Councils, which is not appropriately dealt with in the plan.

Background

Guildford Borough Council previously consulted on their Proposed Submission Local Plan: Strategy and Sites from 6 June until 18 July 2016. This Strategy and Sites document is the first document of two, which sets the vision, aims and strategy for the Borough up to 2033. Following adoption of this, a second document will be produced on development management
policies. In October 2015 the West Surrey Strategic Housing Market Assessment (SHMA) was published. This indicated that Guildford Borough lies within the West Surrey housing market area with the boroughs of Woking and Waverley.

The SHMA recognised there is a strong relationship between West Surrey housing market area and that covering the Blackwater Valley (centred upon the authorities of Surrey Heath Borough, Rushmoor Borough and Hart District). Therefore, the Blackwater Valley housing market separates Wokingham Borough from the one which includes Guildford Borough. Guildford Borough Council has now published an update to the Proposed Submission document.

Consultation runs between 9 June and 24 July 2017. This includes policy changes which are deemed to be significant as well as minor modifications. There is also an updated evidence base, which includes an update to the West Surrey SHMA: the Guildford Addendum Report 2017. This SHMA update takes into account the latest population and household projections, mid-year population estimates and the economic projections which have been updated in light of the decision for the UK to leave the European Union. This update identifies a lower Objectively Assessed housing Need for Guildford Borough.

With known issues of unmet housing need in Surrey Heath, it is important for Wokingham Borough Council to ascertain whether the West Surrey HMA is seeking to meet need within the HMA and how the Surrey authorities are engaging given the strong links between their areas.

Analysis of Issues
The update to the West Surrey SHMA: Guildford Addendum Report 2017 identifies a change in housing need in Guildford from 13,860 new homes 2013 to 2033, to 12,426 new homes 2015 to 2034. The Guildford Proposed Submission Local Plan demonstrates that Guildford Borough Council will meet its entire proposed housing requirement of the plan period. The Strategic Housing and Economic Land Availability Assessment (SHELAA) identifies provision for delivery of 13,581 new homes, giving a 1,155 buffer to allow flexibility for delivery. Guildford state that this buffer cannot be used to meet unmet need in other areas.

Guildford Borough is within an HMA with Waverley and Woking Boroughs. Waverley Borough Council propose through their new local plan to meet their own housing need within the borough. Woking are currently unable to meet their housing need, with an existing shortfall of 3,150 homes 2013 to 2027. Woking are currently undertaking a Site Allocations DPD, however this has been delayed and creates uncertainty as to whether housing need will be met within the borough. Guildford Borough Council state in their Duty to Cooperate Statement that they have not been formally asked by Woking to accommodate any unmet need.

Failure to accommodate unmet need in the West Surrey HMA means that neighbouring authorities may have to consider delivering further new homes. To the north is the HMA consisting of Hart, Rushmoor and Surrey Heath Borough Councils. It is known that Surrey Heath have indicated that they are unable to meet their housing need and Hart and Rushmoor Borough Councils are only proposing to meet their own housing needs.

It is evidence that unmet housing need may arise from the Western Surrey HMA, and the adjoining Hart, Rushmoor and Surrey Heath HMA to which there are strong links. Seeking positive opportunities to meet needs in full is a central element of the National Planning Policy Framework (NPPF).

Notwithstanding the Guildford Proposed Submission Local Plan seeking to meet the housing needs arising from their authority’s areas, the plan does not consider the likelihood of unmet needs from elsewhere in the HMA, specifically Woking. Further it does not consider the unmet need arising from the adjoining HMA from Surrey Heath Borough Council. This is a major failing of the plan itself and in the outcome of engagement between the three authorities in the HMA.

Notwithstanding the above, Guildford Borough Council should also be mindful of the White Paper “Fixing our broken housing market” (February 2017) which proposes a standardised methodology for assessing housing needs. It will be
necessary for Guildford Borough Council and the other authorities within the HMA to reconsider the level of housing need in the near future.

In summary, although Guildford Borough Council intend to meet the contribution to wider housing needs the needs of the wider HMA are not addressed. In light of this it is not considered that the Duty to Cooperate has been complied with or that the plan is justified and effective, the result being that it is unsound. Guildford Borough Council should work with Waverley and Woking Boroughs to positively seek opportunities to meet development needs in full.

FINANCIAL IMPLICATIONS OF THE RECOMMENDATION
The Council faces severe financial challenges over the coming years as a result of the austerity measures implemented by the Government and subsequent reductions to public sector funding. It is estimated that Wokingham Borough Council will be required to make budget reductions in excess of £20m over the next three years and all Executive decisions should be made in this context.

How much will it Cost/ (Save)
Is there sufficient funding – if not quantify the Shortfall N/A
Revenue or Capital? N/A
Current Financial Year (Year 1) N/A

Next Financial Year (Year 2) N/A
Following Financial Year (Year 3) N/A

Cross-Council Implications (how does this decision impact on other Council services, including property and priorities?)

Decisions in Guildford Borough Council regarding meeting housing needs, including unmet housing need across the HMA could lead to pressures to deliver housing elsewhere. This could affect the housing targets of other neighbouring local authorities, and potentially WBC.

SUMMARY OF CONSULTATION RESPONSES

Director of Corporate Services.

Monitoring Officer.

Leader of the Council.

Reasons for considering the report in Part 2.

n/a.

List of Background Papers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We support the presumption in favour of development and the emphasis on positive planning that is embodied in Policy 51.

We support the principle that the housing targets in Policy 52 and Table 1 will not be regarded as a ceiling. However, on that basis we object to the use of very precise targets in Table 1.

We are also concerned that there is an over-reliance upon large housing allocation sites in the planned delivery set out in Table 1.

We support the principle that the housing targets in Policy 52 and Table 1 will not be regarded as a ceiling. However, on that basis we object to the use of very precise targets in Table 1.

We are also concerned that there is an over-reliance upon large housing allocation sites in the planned delivery set out in Table 1.

We object to the 5-unit threshold which is contrary to the recent ministerial statement on affordable housing and the related sections in the NPPG. If the threshold is set at this low level it will actually stifle the supply of smaller residential sites by making them unviable, and will not actually deliver affordable housing.

Similarly, applying a 40% affordable housing quota to small sites will adversely affect their viability.

We recommend that the threshold should be set at 10 units, in line with the ministerial statement and NPPG.

We recommend that a sliding scale is adopted for all sites below 25 units.

We object to the identification of this site as a residential allocation.

The assessment at page 219 of the draft plan identifies it as an 'edge of village/semi-rural location'. We consider that there are more appropriate, less visually prominent, locations within the expanded settlement area of Send where new residential development can be satisfactorily accommodated under Policies 51 and 52.

The allocation of this site should be deleted in favour of organic expansion of Send on sites within the expanded settlement area.

To allow a full discussion of our client's objections and a consideration of alternative residential opportunities in Send.

We object to the identification of this site as a residential allocation.

The assessment at page 225 of the draft plan identifies it as an area which would need 'sensitive design at site boundaries that has significant regard to the transition from village to greenfield'. It is currently a valuable source of informal recreation on the edge of the village, with open views to the west and south.

We consider that there are more appropriate, less visually prominent, locations within the expanded settlement area of Send where new residential development can be satisfactorily accommodated under Policies 51 and 52.

Comment ID: PSLPA16/3803  Respondent: 15631105 / Pamela Jacqueline Hagan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed infrastructure schedule (appendix C).

The infrastructure schedule sets out the key requirements that the plan depends on. There is no schedule for Garlick's Arch (A43). This site is, therefore, not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to new on/off ramps for the A3 planned at Burnt Common (A43). The local roads through Send, Clandon and Old Woking already struggle to cope with the volume of traffic in the area.

I object to the damage to the historic environment as a result of the proposed development (policy D3).

Garlick's Arch (A43) proposal would irrevocably damage the character of the Ancient Woodland which includes 80 ancient oak trees and double the built area in locality.

I object to the Strategic Housing Market Assessment figure of 693 houses per annum in the borough being too high.

This figure has more than doubled a figure of 322 used in previous plans. As the council will not publish the SHMA report and the Plan's proposed growth is based on this, the figure cannot be verified.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the employment strategy and impact at Garlick's Arch (A43, policies E2 &E5). There is an existing brown field site at Burnt Common, therefore no need for new industrial sites at Garlick's Arch. There are already 4 long-standing existing sustainable and successful rural businesses in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16074  Respondent: 15631105 / Pamela Jacqueline Hagan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the natural increase in traffic congestion that will be caused by development and will affect our local village roads. The present infrastructure will not support this. (Policy I1)

Our roads in Ripley, Send and Clandon are already overused, in poor repair and often with no footpaths.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16077  Respondent: 15631105 / Pamela Jacqueline Hagan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the lack of proper infrastructure planning for sites (policy I1).

Local sewerage, services, utilities, doctors etc. are already close to capacity. There are inadequate infrastructure improvements planned and none planned for Garlick's Arch (A43). There are also no plans to improve the medical, police and emergency services to cover the extra 5000 houses planned in the north east of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16078  Respondent: 15631105 / Pamela Jacqueline Hagan  Agent:
I object to poor air quality (policy 13).

The huge changes in development planned in the north east of the borough will particularly to increased congestion and, therefore, a rise in air pollution. This will adversely affect the lives and health of the local residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to removing the green belt from its protected status (policy p2). I have extreme concerns for the urban sprawl that this will result in for the villages of Ripley, Send and Clandon. There is already an existing brown field site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to developing areas with risk of flood (policy P4).

National Policy requires adequate account of flood risk: Garlick's Arch (A43) is at higher risk than the council's assessment, this having been classified by the environment agency.

The incidence of flooding has increased considerably in recent years.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/16073   Respondent: 15631105 / Pamela Jacqueline Hagan   Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the local plan: the proposed development is not sustainable (policy S1). The local communities, especially Ripley, Send and Clandon, will be damaged irreparably by the plan for 13,860 new houses which are not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/16076   Respondent: 15631105 / Pamela Jacqueline Hagan   Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Borough Wide Strategy (Policy S2).

GBC's proposal for 13,860 new houses differs from all the other Borough Councils in Surrey. Too much development is planned for the north east of the borough i.e. Wisley (A35), Ripley/Send (A43) and Clandon (A25), namely 36%: this is unbalanced as presently these areas only have 11% of the existing housing within Surrey.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16082   Respondent: 15631201 / Harold Young   Agent: 

Answer (if comment is on questions 1-7 of the questionnaire): ()
We are writing to register our objections to the removal of Green Belt Protection from the area around the Villages of Chilworth, Shalford, Peasmarsh and others.

We are not unsympathetic to the need for more housing in this area but we do not agree with the prospect of ‘approved in principal’ as this would appear to relinquish any control over proposed development. We are also not happy that all 3 Villages are lumped together as no longer applicable for Green Belt Protection, whilst other parts of Guildford Borough are unaffected. On what grounds are these particular Villages to be ‘signed out’ for exclusion? Who decides and has anyone looked, in detail at, or visited this area.

If development is permitted, en-bloc, the eventual result would be a continuous built-up area of housing, linking the Villages of Albury, Chilworth, Shalford and Peasmarsh to Guildford Town Centre.

Fresh, new sites bring Applications from large Developers further afield. What we need are small, localised developments on empty Brown Field sites to be used first, using local Developers who are sympathetic to local needs, e.g. affordable housing.

We already have in excess of 500 new homes in Waverley at Cranleigh and there are proposals for using Dunsfold and Wisley as possible new Brown Field sites.

Do we really need more sites? We believe that control must be maintained to preserve our Green Belt; otherwise, parts of the south-east of England will become a concrete jungle.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPA16/3815  **Respondent:** 15631393 / Katie Waple  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The proposal to build 385 new houses will swamp the small village of West Horsley, which in 2011 had 1,111 homes in the Parish. This is a 35% increase. There is insufficient infrastructure in terms of roads, parking, public transport, medical provision, education and schooling, drainage and sewerage. This is contrary to paragraph 47 of the NPPF, which requires local planning authorities set out their own approach to housing density to reflect local circumstances.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. I wish to object, most strongly, to the Council’s Green Belt policy in relation to the removal of Green Belt land for housing development. In particular I am concerned about the proposed release of the open fields known as Allocation Sites A38, A39, A40 and A41 in West Horsley. My objections are that the Council’s proposal is contrary to Government advice contained within the National Planning Policy Framework 2012;

• Paragraph 79 states that “the Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence”.

• Paragraph 82 states that “New Green Belts should only be established in exceptional circumstances”. Therefore if existing Green Belt land is sacrificed for housing, the quantum of Green Belt will reduce and will not be replaced.

• Paragraph 83 provides “Once established, Green Belt boundaries should only be altered in exceptional circumstances. The Council has not demonstrated “exceptional circumstances” but states that the shortage of available housing land is an exceptional circumstance. The problem is that Green Belt land, which is not Previously Developed Land (PDL), should be regarded as sacrosanct and should only be released as a very last resort and after the re-use of Brownfield and PDL has been exhausted. GBC has made no real attempt to survey and review the availability of Brownfield and PDL but, instead, has targeted Green Belt land predominantly in single ownership, as this is easier to deliver. Good town planning is not about easy deliverability and knee-jerk solutions. This is “lazy” planning and should be rejected.

• Paragraph 87 says “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances. Insufficient “special circumstances” have been advanced by GBC to justify the release of previously undeveloped Green Belt, which still serves its original purpose as Green Belt land.

• The proposal is also contrary to paragraph 88 of the NPPF, which states that exceptional circumstances will not exist unless the harm caused to the Green Belt is outweighed by other considerations. I do not agree that a shortage of housing land is to be considered as an exceptional circumstance but, even if I am wrong, the harm to Green Belt is not outweighed by other considerations.

• Paragraph 89 states that a local planning authority should regard the construction of new buildings as inappropriate in Green Belt.
• In summary the proposal to release Green Belt land is contrary to Government advice and there are, in fact, two distinct tests. Firstly GBC has to prove “exceptional circumstances” to change the boundaries of the Green Belt and secondly it has to prove “exceptional circumstances” to justify inappropriate development.

1. There is case law concerning “special circumstances” and, in particular, whether a housing shortage is a “special circumstance” of sufficient weight to justify the release of Green Belt. I list below the relevant synopsis;

• In Hunston Properties Ltd [2013] EWCA Civ 1610; [2014] JPL 599, it was held that;

On the facts, the Inspector was obliged to find a housing shortfall. However, the weight to be given to such a housing shortfall (and whether it constituted ‘very special circumstances’ for the purposes of NPPF 87) was a matter of planning judgment. The weight to be attached to the shortfall may, as a matter of planning judgment, be reduced where a shortfall is inevitable due to a district being subject to policies, which restrict development (such as AONBs, National Parks or Green Belts).

• Further it was held in R (Lee Valley Regional Park Authority) v Broxbourne Borough Council [2015] EWHC 185 (Admin) that;

“A shortfall in housing land supply can, as a matter of policy, be a very special circumstance, although the occasions when it is likely to suffice by itself to warrant the grant of permission for housing development in the Green Belt are expected to be few and far between”.

• The case of R (Luton Borough Council) v Central Bedfordshire Council [2015] EWCA Civ 537 it was stated that;

“…paras. 87-88 of the NPPF provide guidance regarding the approach to be adopted if there is a proposal for development of an area within the Green Belt set out in a local plan: “very special circumstances” have to be shown. This is a stricter test than that in para. 83 in respect of changing the boundaries of the Green Belt in the local plan.”

As can be seen none of the case law to date supports the development of new housing in the Green Belt.

1. There is no precedent for releasing existing Green Belt land where its original aims and functions are still being met. The original Green Belt legislation and particularly circular 42/55 only envisaged and to a limited scale the “infilling” and “rounding off” within the Green Belt and existing towns and villages should not be allowed to expand any further.

**Comment ID:** PSLPA16/3819  **Respondent:** 15631553 / Anthony Smith  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )
1. I object to the fact that infrastructure has not been properly assessed and is inadequate to deal with current housing levels – roads, doctors, schools will not be able to cope.

Comment ID: PSLPA16/3817  Respondent: 15631553 / Anthony Smith  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - East Clandon

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the Settlement Boundary which has been imposed on East Clandon without any consultation. This imposition provides no protection to further development outside of the settlement boundary (Policy P2 para 4.3.25) and is deemed by me as being unnecessary in an already tightly developed ancient and rural conservation village with high archaeological merit. I demand that this proposal be removed as it will endanger the openness of the Green Belt, the views in and out of the AONB (protection of the AONB Policy P1) and the character of our village.

| Answer (if comment is on questions 1-7 of the questionnaire): () |

1. Policy D4: I object to the insetting of villages (meaning in fact, removal of villages from Green Belt protections) and the fact that they will suffer from higher density development and the resulting increase in traffic, increased use of infrastructure which is already under pressure. I object in particular to the insetting of West Clandon, Send and the Horsleys. This will have a detrimental impact on Green Belt openness and the views in and out of the AONB in direct contravention of Policy P1 and P2.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( ) |
| Answer (if comment is on questions 1-7 of the questionnaire): () |

1. Policy P2 – Green Belt: I object to this significant erosion of the Green Belt with the proposals for large towns being developed on Green Belt land thereby removing the openness of the Green Belt. I note in particular the huge developments proposed for the North East quadrant of the borough which will adversely affect our amenity, but also unfairly targets our tranquil rural villages because we can provide ‘dormitory’ facilities for commuters to London. The developments directly affecting our villages are the proposals for Wisley Airfield, Gosden Hill Farm, various farms and tracts in the Horsleys and Garlicks Arch at Send.
1. Further, on the erosion of Green Belt and I object that Policy P2 is not met where it states that Green Belt should be protected. I object to the disproportionate use of Green Belt land for housing – some 65% of the housing proposed is on Green Belt and with little consideration being given to redevelopment of brown field sites.

2. I object that GBC are contravening the NPPF framework stipulation in paragraph 87 with the proposed developments at Gosden Hill Farm, Ripley, East and West Horsley and Garlicks Arch, Send. Paragraph 87 states “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.” and GBC have not proven any special circumstance for developing on these Green Belt areas.

3. I object to building on the Green Belt because the essential characteristic of Green Belt is its openness and permanence (National Planning Policy Framework paragraph 79).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16090  Respondent: 15631553 / Anthony Smith  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy S1 not offering sustainable development as regards roads and rail infrastructure which currently does not cope with demand, congestion on the A3 in particular, but also other A roads in the area such as the A247, the A246 and then there is the already overcrowded and slow train system for those currently living in the borough and needing to commute to London. No pre-emptive planning has been made to alleviate these real problems which will be much exacerbated by any large increases in housing.

I specifically want you to note the winding, narrow and dangerous route via the A247 through West Clandon which then drives people to use a short-cut the even narrower rural road, the Ripley Road, through East Clandon to and from the A3. This will be much exacerbated with the large increase in housing twinned with large increase in cars and travel.

1. Continuing with Policy S1 (Presumption in favour of Sustainable Development) I object that this is not being met and that GBC are contravening this when it is clear that no fixed plans are available to improve the provision of shops, medical facilities, schools in our immediate area (besides roads and rail already mentioned) to service us. If the GBC were serious about improving the infrastructure and sustainability of our communities, they would have secured plans and funding to ensure these facilities are available and not just at the behest and hoped-for goodwill from the developers. Further, how will developers be held accountable to their promises to build infrastructure? Stories are legion of developers reneging on commitments as the ‘money runs out’ even though vast profits will be made from turning agricultural and Green Belt land into highly valuable housing land.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

<table>
<thead>
<tr>
<th>1. I object to Policy S2 for the proposed provision of the very high overall housing numbers of 13,800 new homes (690 new dwellings being built every year for 20 years) and I object on two grounds; these housing numbers have been imposed on the borough with no real consultation being undertaken with the residents of East Clandon and the borough as a whole. Secondly, the housing numbers are based on a high-growth economic development plan which in itself has had no consultation with us and this combined with estimated demand from London residents will turn Guildford into a dormitory town for London. Further, I object to the fact that no real economic or housing demand factors have been provided by the borough planners to substantiate the very high housing target of 13,800 new dwellings over the next 20 years. This is in direct contravention of the NPPF’s requirement for the planning authority to provide meaningful consultation.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. I object to all other strategic sites in the Local Plan, Blackwell Farm, 3 Farms Meadows, Garlick’s Arch, West Horsley and Hog’s Back. All are out of proportion to the surrounding area and none qualify for the exceptional circumstances required to take them out of the Green Belt.</td>

Comment ID: SQLP16/1781  Respondent: 15631553 / Anthony Smith  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 5: The examination

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

| 1. I object to the fact that GBC have not met the requirements of the NPPF Paragraph 155 which imposes an explicit obligation to have early and meaningful consultation. This has not been met in a number of areas by GBC. We have not had a meaningful consultation on imposing a settlement boundary on East Clandon, on the absence of meaningful economic and population growth figures for Guildford showing various scenarios with high, medium and low growth scenarios being offered. |
| 2. I note that there were over 20,000 responses objecting to the 2014 draft Plan and therefore I object that the Consultation Process has not been properly followed for this Plan which is not materially different from that plan. |

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/1780  Respondent: 15631553 / Anthony Smith  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?
I have lived in Woking for the past 30 plus years and enjoy visiting all the areas named. I find the proposed local plan extremely unwelcome to this area.

I object to the 2016 Draft Local Plan as a whole and in particular I object to the specific issues (listed below). I believe that this deeply flawed Local Plan will have a direct and detrimental effect on the amenity currently enjoyed by my family and other residents of East Clandon and to the even greater detriment to our neighbouring villages of West Clandon, Ripley, West and East Horsley. It erodes the openness of the Green Belt and endangers the beauty and views in and out of the Surrey Hills AONB.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. The proposal to build 385 new houses will swamp the small village of West Horsley, which in 2011 had 1,111 homes in the Parish. This is a 35% increase. There is insufficient infrastructure in terms of roads, parking, public transport, medical provision, education and schooling, drainage and sewerage. This is contrary to paragraph 47 of the NPPF, which requires local planning authorities set out their own approach to housing density to reflect local circumstances.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to object, most strongly, to the Council’s Green Belt policy in relation to the removal of Green Belt land for housing development. In particular I am concerned about the proposed release of the open fields known as Allocation Sites A38, A39, A40 and A41 in West Horsley. My objections are that the Council’s proposal is contrary to Government advice contained within the National Planning Policy Framework 2012;

- Paragraph 79 states that “the Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence”.

- Paragraph 82 states that “New Green Belts should only be established in exceptional circumstances”. Therefore if existing Green Belt land is sacrificed for housing, the quantum of Green Belt will reduce and will not be replaced.

- Paragraph 83 provides “Once established, Green Belt boundaries should only be altered in exceptional circumstances. The Council has not demonstrated “exceptional circumstances” but states that the shortage of available housing land is an exceptional circumstance. The problem is that Green Belt land, which is not Previously Developed Land (PDL), should be regarded as sacrosanct and should only be released as a very last resort and after the re-use of Brownfield and PDL has been exhausted. GBC has made no real attempt to survey and review the availability of Brownfield and PDL but, instead, has targeted Green Belt land predominantly in single ownership, as this is easier to deliver. Good town planning is not about easy deliverability and knee-jerk solutions. This is “lazy” planning and should be rejected.

- Paragraph 87 says “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances. Insufficient “special circumstances” have been advanced by GBC to justify the release of previously undeveloped Green Belt, which still serves its original purpose as Green Belt land.

- The proposal is also contrary to paragraph 88 of the NPPF, which states that exceptional circumstances will not exist unless the harm caused to the Green Belt is outweighed by other considerations. I do not agree that a shortage of housing land is to be considered as an exceptional circumstance but, even if I am wrong, the harm to Green Belt is not outweighed by other considerations.

- Paragraph 89 states that a local planning authority should regard the construction of new buildings as inappropriate in Green Belt.

- In summary the proposal to release Green Belt land is contrary to Government advice and there are, in fact, two distinct tests. Firstly GBC has to prove “exceptional circumstances” to change the boundaries of the Green Belt and secondly it has to prove “exceptional circumstances” to justify inappropriate development.

1. There is case law concerning “special circumstances” and, in particular, whether a housing shortage is a “special circumstance” of sufficient weight to justify the release of Green Belt. I list below the relevant synopsis;

- In Hunston Properties Ltd [2013] EWCA Civ 1610; [2014] JPL 599, it was held that;

On the facts, the Inspector was obliged to find a housing shortfall. However, the weight to be given to such a housing shortfall (and whether it constituted ‘very special circumstances’ for the purposes of NPPF 87) was a matter of planning judgment. The weight to be attached to the shortfall may, as a matter of planning judgment, be reduced where a shortfall is inevitable due to a district being subject to policies, which restrict development (such as AONBs, National Parks or Green Belts).

- Further it was held in R (Lee Valley Regional Park Authority) v Broxbourne Borough Council [2015] EWHC 185 (Admin) that;

“A shortfall in housing land supply can, as a matter of policy, be a very special circumstance, although the occasions when it is likely to suffice by itself to warrant the grant of permission for housing development in the Green Belt are expected to be few and far between”.

Page 942 of 2988
The case of R (Luton Borough Council) v Central Bedfordshire Council [2015] EWCA Civ 537 it was stated that;

“…paras. 87-88 of the NPPF provide guidance regarding the approach to be adopted if there is a proposal for development of an area within the Green Belt set out in a local plan: “very special circumstances” have to be shown. This is a stricter test than that in para. 83 in respect of changing the boundaries of the Green Belt in the local plan.”

As can be seen none of the case law to date supports the development of new housing in the Green Belt.

1. There is no precedent for releasing existing Green Belt land where its original aims and functions are still being met. The original Green Belt legislation and particularly circular 42/55 only envisaged and to a limited scale the “infilling” and “rounding off” within the Green Belt and existing towns and villages should not be allowed to expand any further.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/3822     Respondent: 15631873 / Claire Spencer     Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to express my objection to the proposed plan for Horsley.

I do not believe that exceptional circumstances have been demonstrated to remove Horsley from the Green Belt.

No reasons have been given why there would be an extension to the boundaries of the settlement area of the Horsleys.

Our school is already full and doctors is overstretched – roads are too busy with no improvements made which we are already in desperate need of.

Station Parade cannot possibly be classed as a District Centre.

The amount of houses proposed as a percentage for West Horsley is such a vast increase in comparison with other areas.

I think that all brown sites within already urbanised areas should be used first – eg Guildford.

I particularly object to planning site A41 as this cannot be classed as infilling – it is a separate piece of agricultural land that does not adjoin any developed land.

The green belt was put in place for a reason – to keep our country green and help with the pollution – do not destroy this for our children and their children – it is our responsibility to protect the land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
As residents of East Horsley we wish to lodge our strong objection to the draft plan. Our objection relates to those policies and proposals of the plan relating to: HOUSING and GREEN BELT and INFRASTRUCTURE.

We have seen the objections lodged by The Horsley Countryside Preservation Society, Horsley Parish Council, Guildford Green Belt Group, WAG and others. Insofar as they relate to these three main aspects of the draft plan we agree with them and support the contention that for the reasons they have advanced these aspects of the plan are fundamentally flawed and should be re-written.

However, it has been reported in Surrey Advertiser Friday 15 July 2016 that Guildford Borough Council (GBC) proposes to carry out a further review of the housing strategy following the UK decision to leave the European Union. Furthermore, objection has been made by others that GBC has failed to make full and proper disclosure of the basis on which the alleged housing need figures have been calculated. It is reported that GL Hearn who carried out the Strategic Housing Assessment have refused to disclose to GBC the assumptions and calculations underlying their conclusions. This is fundamental to the proper scrutiny of the soundness of the Housing and Green Belt proposals of the Draft Plan.

In these circumstances there has been a manifest failure by GBC to present a proper evidence base to support and justify the proposals of the Plan relating to the redrawing of the Green Belt Boundaries or to allow residents to properly scrutinise and understand the basis of the Plan. Without it GBC has itself failed to properly consider whether the proposals of the plan are soundly based. Without the information as to how the housing figures underlying the Housing and Green Belt Plan have been arrived at the legal requirements relating to the preparation of the Plan have not been properly followed and the validity of these related aspect of the Draft Plan, if not the whole Plan, is open to doubt and possible legal challenge in due course.

Paragraph 4.3.13 on the draft Plan contends that there are “exceptional circumstances …in order to facilitate the development that is needed to promote sustainable patterns of development.” Leaving aside site specific objections relating to the potential main development sites, in the circumstances referred to above there is no reliable evidence that the redrawing of Green Belt Boundaries is needed to facilitate sustainable patterns of development.

Given the prospect of a further review and decisions by GBC before the Plan is submitted to the Secretary of State we wish this letter to stand as our formal objection and representation on the draft Plan and to support the reasons lodged by the Parish Councils, the Horsley Preservation Society, Guildford Green Belt Group and WAG for objecting to it. We reserve the right to amend, expand or supplement this objection in detail in due course in the light of the Council’s up to date position before the Plan is submitted for Examination or thereafter.

I object to the local plan as a whole, as the Borough has failed to provide proper evidence of the need for such a large amount of housing and for the appropriateness of most of the development.

I believe the Local Plan 2014 lacks valid research and evidence of need; lacks planning for infrastructure improvement already needed without further development of the area; and is being rushed through using the wrong Regulation (19). It must be properly reviewed and consulted fully under the correct Regulation 18.

I object to removal of Send and other villages from the green belt. This can only be done in exceptional circumstances according to planning law, and none exist in this area. The interests of developers profiting from indiscriminate urban development are not exceptional circumstances.

Any weakening or exceptions to green belt protection will lead to its permanent loss. The green belt must be protected in its entirety, according to current law. It is the lungs of the densely populated south east, and an area that is enjoyed by millions, including valuable tourism from abroad.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Developers must use the many brown-field sites identified in the Borough before any other sites are even considered. Developers (and some Councillors) put profit above every else, leaving the taxpayer to pick up the ongoing bill for inappropriate development and inadequate infrastructure improvement.

We want government at all levels to show vision and innovation in development matters, and to conduct planning with due diligence and integrity, as it is the future of their own families at stake as well.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Having reviewed the Local Plan I want to express my concerns over many aspects of the development included. I feel the Council has ignored objections residents made in the 2014 consultation, showing a complete lack of consideration for the impact such extensive development will have in the local area.

I object to the Council making substantial last minute changes to the plan, such as the Garlick’s Arch development in Send and the addition of a major alteration/enlargement of the junction on the A3 at Burnt Common. There are also many other significant changes to the 2014 plan. This requires a full consultation under Regulation 18, not the limited consultation under Regulation 19 for minor changes.

I think the brief six week Local Plan consultation, placed in summer when many people are away on holidays, is a deliberate act to limit residents’ opportunity to fully review the extensive documentation comprised in the Plan and to then make any appropriate objections if required.

I object to both these developments on the grounds that there was improper use of Regulation 18; no local consultation; that Garlick’s Arch is green belt land which includes an area of ancient woodland and parts of which are low lying and subject to flooding.

I object to the alteration to the A3 junction at Burnt Common, as it has not been part of a full infrastructure review and proper consultation with local residents. It was added to the plan at the last minute to avoid proper scrutiny.

Comment ID: pslp171/1173  Respondent: 15632289 / Claire Belton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2
I object to removal or 'inset' from the Green-belt of Send and other villages throughout the Borough, or sections of land such as Send Business Park (Policy 2 at paragraph 4.3.15). This can only be done in exceptional circumstances, for which none exist. This practice is erosion of the Green-belt by stealth and must not be allowed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp17q/211  Respondent: 15632289 / Claire Belton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 6: Any other comments?

The Local Plan needs also to take into account the impact of leaving the EU, which at this stage is difficult to assess. It should therefore be put on hold until this process is fully resolved. In the meantime, development should be contained to existing town and brown-field sites, where it is lawful and appropriate. Councillors and other elected representatives at all levels need to look to the long term future and must conduct themselves with honesty and integrity for those they represent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the plans for Garlicks Arch. Our infrastructure is already struggling with the current occupancy in the area. Our roads are regularly gridlocked, particularly Send Road and Send Marsh Road with the flow of traffic onto the A3, which would only increase with an extra 400 houses and services to the proposed industrial units. Services such as the local schools and doctors are already at full capacity, with it being increasingly difficult to get a doctors appointment even for young children. This issue would only amplify with the proposed developments. Our roads and pavements are already in a state of disrepair and an increase of pedestrians and vehicles will only make this matter worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Send, Ripley and the surrounding villages being removed from the Green Belt. Our MP promised to protect the Green Belt yet the local plan is proposing to remove 15 villages from the Green Belt, this is unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/1787  Respondent: 15633217 / Emma Cooper  Agent:

I object to the way in which many items of the local plan have been introduced. I do not believe Guildford Borough Council have followed correct process by introducing last minute additions and alterations which warrant a full consultation period not the short cut that it appears to be.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3860  Respondent: 15634113 / Joby Lees  Agent:

My name is [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]. I live in Guildford but my Sister and her family and my Mother all live in East Horsley. We've all lived in the area for many many years. It is a lovely place to live and we have enjoyed the scenery and the fact that there is so much Green Belt around meaning lovely spaces to enjoy. Even within these areas there has been a population increase over the years with of course an increase of houses cars etc. Which is inevitable. However it
has always been a relief knowing that whatever happens and however many houses are built, the Green Belt is safe and the area will not be destroyed as promised by the Conservative Party.

The Green belt is an integral part of the community. If the planning permission is granted, the environment will be affected with local wildlife, fauna and flora possibly being destroyed for ever. If the houses are built then the population will triple. As the population has grown already the roads and transport has not increased and has not been improved; so the roads which are already poorly kept and constantly full (and don't get me started on the amount cyclists which are already hogging the roads) will get worse and will probably not be maintained or up graded. There is a lack of public transport so more people use their own cars which means generally 2 cars per house which will double quadruple road usage and more traffic jams and hold ups. Water works which are expensive and average will need up grading which will mean higher costs. More sewage works will need to be built which again means higher costs to those that are already paying. The A3 which is already used to capacity will have more traffic causing more traffic jams meaning the commute to work whether going towards London or Guildford will take much longer.

If the planning permission for the Green Belt goes ahead the Area of Natural Beauty which is why most people move here will be completely destroyed. Once gone it's gone for good and we can never get it back.

I vote that we DO NOT go ahead with the building of more houses and buildings.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The annual housing target (13,860 additional homes by 2033) - how has this figure been determined? As a number with no substance behind it (how it has been derived) it is meaningless. I understand there have been several requests for the calculations to be made available with as yet nothing forthcoming from the Council. I am calling for transparency. It is my belief that 13,860 is excessive given the current population density. I have witnessed an increase in traffic congestion around the Guildford area over the last 10 years to the point now where it is having a negative impact on quality of life.

Related to the above - the recent political changes will undoubtedly have an impact of net migration (immigration and emigration). This factor will need to be addressed by the Plan. Or at least confirmation of what % of the "estimated population" is attributed to migration from the EU. It may also be the case that we see a net emigration as EU migrants transfer to another Country still within the EU.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16235  Respondent: 15636289 / Chris Holmes  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The inclusion of what I see as a wholly inappropriate number of traveller sites. The region (especially the band running from NE Guildford through Normandy to Aldershot) already has the highest density of traveller sites I have seen in any other County. Why is this so, and why are more sites being considered when there are areas within Surrey with no traveller sites?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/16236  Respondent: 15636289 / Chris Holmes  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Incursions into the Green Belt - I believe this is wholly inappropriate. The green belt is so designated to provide support for our Wildlife which is already under great threat from habitat destruction from over-development and to preserve an environment that is also conducive to maintaining an acceptable quality of life - access to sufficient open spaces.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

GBC states the population of Guildford is estimated to reach 162,188 by 2033. If the whole region is tarmacked and high rise flats built on every scrap of land this figure could easily rise to 500,000 or more. The more houses that are built, the more the population will increase. My question is, what is the accepted end point for development, and how is this reflected in the Plan? There has to be an end point where we say - enough. With the current infrastructure (unless additional roads are proposed to be built) what is this number? My concern is that Guildford will continue to sprawl and end up becoming a Borough of London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The above outline some of my key objections to the Plan - I believe there are still many questions to be answered but possibly the greatest is "What do we want our environment to look like, and how do we want to interact with it?" I have seen Guildford deteriorate over the last 30 years through continued expansion from house building. This is a great shame.

Attached documents:
Comment ID: PSLPS16/7248  Respondent: 15636481 / Peta Lawrence  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Loss of green belt. The development at Gosden Hill farm will effectively join Burpham village with the nearby villages of Clandon and Send. There is no reason to ‘inset’ the proposed areas from the green belt apart from existing land ownership. Planning should not be seen to unfairly benefit private development companies to the detriment of existing communities.

Comment ID: PSLPA16/3880  Respondent: 15636577 / Keith Mackman  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The inflated numbers of New Houses is totally unrealistic, even further now as a result of Brexit, and a new Govt, who no doubt will review the estimates advise a more realistic forecast of population future numbers and associated housing needs.

Green belt status should be maintained for the Horsleys.

The character of the Horsley villages, shops and housing, along with the associated area of countryside should be maintained, IN the Green Belt. This is fundamental.
The infrastructure is seriously compromised now, traffic including heavy vehicles, use totally inadequate country roads as a major means of cutting through, e.g., Clandon, West and East Horsley across to Leatherhead Bookham etc from the A3 / Dorking and return, etc these roads and other facilities, i.e. Drs, Rail Parking and Village amenities generally are now stretched well beyond their original design criteria.

These changes for the worst over the last 10 yrs is a result of increasing volumes of traffic etc using inadequate village roads, without very careful consideration of these aspects and the increasing expressed concerns of Residents and submissions of for example The Horsley Countryside Preservation Society.

Infrastructure in Send, Ripley and Send Marsh and Clandon is already overloaded and even now the smallest disruptions cause gridlock over much of our essentially rural roads network. Please also note that:

- I object to an expanded A3 interchange at Burnt Common,
- I object to housing and business development proposed for land described as Garlick’s Arch,
- I object to housing development at Clockburn Nursery,
- I object to housing development at Send Hill,
all of these sites being unsuitable and in the Green Belt.

The previous draft local plan was withdrawn after generating widespread local opposition. Mole Valley MP Sir Paul Beresford observed:

“This catalogue of errors and omissions has led to a situation in which the Local Plan as presented has no detectable support from Guildford residents and has managed only to anger and worry so many of those who stand to lose the unique and valuable rural village lifestyle they currently enjoy in the Mole Valley Wards of Guildford Borough”.

Sir Paul’s commentary applies to the revised plan.

I object to this new or second Draft Local Plan (as Sir Paul anticipated it) because Guildford Borough Council still has not recognised local feeling and opinion in formulating it. I object to the failure to consult in any responsible way and to the approach taken for all of the reasons recited by Sir Paul which seem to have been ignored in compiling the new or second Draft Local Plan.

Page 965 of 2988
I object to the exaggerated “housing need” figure of 13,860 which is far too high and results in the completely unnecessary development of the Green Belt. The way students, economic need and affordability are calculated inflates the housing need.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford.

I object to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

1. I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

10. I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
The proposal is not in keeping and sympathetic to the area as stated. The proposed is an over development squeezing far too many new small homes in a very limited space. 40 new homes would mean a prospected 80 number cars. Where would 80 cars park? This additional traffic would have a vast negative impact to the Send Hill road and again not be “sympathetic to the surrounding area”. This land is currently used by local residents for recreatonal walking and nature observing. Wood peckers, Owl’s Bats and badgers are all regularly seen here along with many other forms of wild life such as the protected May bug. The loss of their habitation could never be sympathetically catered for and would clearly be detrimental to their survival. The land is currently used as common land and should remain so as this is actually the only green open space for the local residents to use. The addition of two traveller’s pitches would [Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it] and again I do not see how anyone can argue that this is in keeping with the local area and its residents. Send villages road network and infrastructure is already at a capacity that exceeds that of the size of the village current road network as Send and its back road are used on mass as a trunk road through into Woking and beyond. We understand that that there are already plans to builder a number of homes at he bottom of Send Hill within the existing School grounds of St Bede’s. So the proposed is an over development of this immediate area.

I wish it to be noted that this is yet another attempt to over develop this area. Would you please advise when will the council stop threatening the residents of Send Hill?

I wish it to be noted that the Council has subjected this community to far too much repeated duress due to theses numerous and repeated threats / attempts to ruin the local area and its green belt country side. This has many detrimental impacts to those subjected to this process such as added stress, mental health certainly to the vulnerable and elderly. The council have a moral duty here to the residents of Send Hill of which it is clearly treating unfairly.

I am sure no one would object to sensible planning or development of which this is clearly not.

I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the large proposed development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford Local Plan 2016, specifically with regard to the Horsleys development sites (A36, A37, A38 A39, A40 and A41) and Wisley Airfield developments.

I am writing to express my views regarding the Guildford Local Plan 2016 as outlined in the various presentations I have attended and the documentation I have read.

I acknowledge that the Borough Council is under pressure from central government when it comes to housing. Whilst many villagers would object outright to this plan, I understand the need for some development.

However, the plan that has been proposed is, far too much, not needed and not well supported with associated infrastructure. What is being proposed - nearly 500 homes and a 35% increase - changes the Horsleys from a village into a small town overnight, the scale of the proposed developments, and percentage increase in the housing stock, is utterly out of proportion with what is being proposed elsewhere in the Borough.

Firstly, I object to the erosion of the Greenbelt - these proposals do not meet the “exceptional circumstances” requirements, so why would we want to build on Greenbelt land? As you will be very aware the Conservative Party manifesto at the 2015 General Election committed a Conservative Government to “prioritise brownfield development” and to “ensure that local people have more control over planning and protect the Green Belt”. Now, just a year after this promise these proposals dishonour this commitment. Recent events should remind councillors of the strength of feeling that exists within the public and what happens when promises are broken. It should not be assumed that Conservative seats are guaranteed in this area.

Secondly, I specifically object to policies A36, A37, A38 A39, A40 and A41. If all of the proposed developments went ahead it would transform the Horsleys into a sizable town, something for which no case is made, the amount of new housing far exceeds local demand, and the density is excessive when compared with existing development. I am concerned that the Collective impact of these 6 sites on a small part of the borough has not been considered, surely given their proximity they should not be treated as isolated, separate sites. Horsley is already very busy; at rush hour you can easily be in severe traffic queues in a village; parking at a train station is very limited; and the infrastructure supporting the villages is already stretched. Policy A40 is especially unviable because of the high water table and poor drainage, leading to regular winter flooding.

The properties in this area have poor sight lines and the pavements are totally inadequate for school children, parents with prams and the elderly.

I also object to Policy A35 (WISLEY AIRFIELD). I don’t believe this should be in the plan for all the same reasons the Planning Committee rejected the ?identical recent proposal by Wisley Investment Properties. ?This is not a brownfield site as stated – only 15% of it. Anyone that has been on the A3/M25 Junction recently will know how impossible it is to join the motorway with existing traffic volumes, access is confined to inadequate narrow lanes and there is no existing public transport and no train stations in the locality. ?I also believe that over 2,000 houses will swamp and destroy the Ockham conservation area, with impact on listed buildings. ?The Water table and surface water flooding has not been considered either for the site itself or for downstream areas of the River Mole.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write as a resident of West Horsley in response to your draft Local Plan.

As an initial comment, I believe that you have wasted a great deal of public funds and energies of residents in this process. You could have considered matters better and allowed for a more focussed, constructive debate that the one you have precipitated. GBC has failed to act as a responsible steward by making unpalatable proposals which treat Green Belt classification with contempt.

My principal comment is to object to the proposal for villages being removed from the Green Belt. I do not believe that there is sufficient reason for this, although appreciate that this may not apply to all fields and circumstances where the provision of essential community infrastructure (such as schooling) is required.

I am livid about the contemptible manner in which GBC has conducted itself in relation to the local plan, wasting millions of pounds of money it is charged to steward. We moved into a village firmly set within the Green Belt, and paid a premium for that. We fully understood the constraints this places upon us and were willing to accept those constraints. Having paid for a Green Belt village to be home, it would be totally inappropriate an inequitable for GBC to take this away from people without compensation, which GBC could ill afford.

GBC needs to do things better, and in a more efficient manner. Importantly, GBC needs to demonstrate that it can act as a good steward of the borough in its current state before proposing increasing the size of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Improved safety for pedestrians and cyclists needed

Improved road safety to ameliorate the village environment for cyclists and pedestrians is vital. GBC should work with the highways authority and enforcement agencies to apply a zero tolerance attitude towards antisocial, dangerous and aggressive motorists. Safety for sustainable travel attracts insufficient attention in your Local Plan.

Generally, much more work needs to be done by GBC (in conjunction with Surrey County Council as the highways authority and the Parish Councils) to slow motor vehicles and to protect pedestrians and cyclists in East and West Horsley. The potential proposals in relation to East and West Horsley and Ockham give insufficient consideration to the infrastructure and the inability of the current road network to satisfactorily service the increased demand that would be placed upon it by potential development.

The roads in the villages are inappropriate for existing traffic using them and something must be done to ensure that they are no longer used as a cut through by commercial vehicles seeking to avoid the major trunk road network: this needs to be carefully considered as part of the local plan adoption process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I write to **OBJECT** to the terms of your currently proposed Local Plan. I am an eight year-old pupil at The Raleigh School. I have grown increasingly frustrated and disappointed by the irresponsible behaviour of adults. As a result, I have set up my own actin group with school friends, Future Thinkers. We are in the process of building a website intended to highlight the important issues where adults are behaving in an irresponsible manner towards the next generation and to also take action in the local community.

We have recently done a litter survey in one part of Kingston Meadow and found 105 items of rubbish strewn in the leisure area ad the woods in just 300 metres. This demonstrates that the Council has its priorities wrong at present--: you need to take action, in conjunction with the local police to both clean up and prosecute the criminals who leave litter before turning your mind to new development. You demonstrate your present irresponsibility as custodian of what you are currently responsible for: it is simply not feasible to give you responsibility to deliver further assets at this stage.

Loss of green belt land is irreversible and you must demonstrate exceptional circumstances on a case by case basis, not simply put out a case that development in other areas present practical difficulties: go and wrestle with those difficulties and deliver sustainable regeneration, rather than seek to build away the green lungs which are so vital for generations to come.

It is both unfair and irresponsible to seek the circumvent this central planning policy by simply re-zoning areas from green belt to outside of or inset into the green belt. Please think again.

**Do you consider this section of the document complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

---

**No exceptional circumstances which justify development of the Green Belt**

GBC has, to date, failed to make the case that exceptional circumstances exist to justify any attack on the sanctity of the boundary of the Green Belt as it currently stands. Indeed, GBC seems to be adopting a position which is contrary to central government policy.

Those who have made a conscious decision to live in a village within the metropolitan Green Belt appreciate the constraints (and responsibilities) that places on its residents.

About Guildford (winter 2013, GBC) stated the importance of maintaining a continued sense of community and to recognise the distinct character of each of the villages within the borough. The status of much of the borough as metropolitan Green Belt land is fundamental to this, protecting the area from the encroachment of London from the north east and from Guildford itself as well. Accordingly, the process for the development of the local plan must be delivered with the protection of community and the environment at the forefront. To date, there is insufficient evidence that this has been done and there is insufficient consideration of the legacy we would create for our children if GBC’s proposed wide-scale development assault on the Green Belt is allowed to proceed.

Accordingly, I strongly advocate for East and West Horsley (and the other villages within the borough) to remain within the Green Belt and should not be removed from it. However, if there is a powerful case for the re-zoning of a particular
field or fields for reasons which satisfy the high threshold set, that could be supported on a case-by-case basis. The provision of vital community infrastructure is a powerful example of where the sacrifice of a small piece of Green Belt land might become appropriate, provided that there is no other viable alternative.

**Loss of Green Belt Land is Irreversible**

As you have read in my earlier consultation response, to change the planning status of the Green Belt land around the metropolis and around Guildford would sent a clear (and negative) message that the rural nature of our precious and beautiful county is not something for which we are simply custodians and which therefore requires protection. A continued development linking London to Guildford along the axis of the A3 would be unacceptable and is contrary to the objective of Green Belt designation.

We are all stewards of our community for the generations to come. GBC and its residents are part of the same joint endeavour. Your Local Plan proposals seem to wish to polarise opinion and cause separation and division where consensus and common purpose is required.

The Green Belt land in the east of the borough protects our most precious natural asset, the North Downs and Surrey Hills, in their true, undeveloped, context. We should be justly proud of being the most wooded county in England (much of it ancient) and do everything to ensure that this precious heritage is passed down to future generations.

We have much to thank former generation for in the protection of our county's countryside in a manner which has delivered a vibrant local economy, whilst protecting our heritage. Today, it is the responsibility of the current councillors and officers of GBC and its residents to ensure that the work of past generations is not for naught and that the special characteristics of our borough are maintained.

If the Green Belt status of vast swathes of the borough were removed, there is a genuine risk that it is only the SSSI/AONB areas that would be appropriately and sufficiently protected from development for the benefit of biodiversity and for our children and successive generations. It should be remembered that that Green Belt status assists GBC in its stewardship of the borough so as to protect the precious nature of the area, whilst also permitting sustainable, proportionate and sympathetic development. Green Belt status clearly identifies areas which are “off limits” for most development.

Loss of undeveloped land within the current Green Belt is irreversible and it is our collective social responsibility to ensure that this does not happen.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Lack of proportionality in development in the area and lack of sustainability

GBC’s proposals for development in East Horsley and West Horsley are disproportionate to the area. Development should be focussed on Guildford Town Centre and increasing density in urban zones rather than increasing the size of sensitive villages which would:

• lead to a disproportionate impact in comparison with other parts of the borough better placed to deal with large population increases (in particular, Guildford Town Centre);
• cause irreversible harm to the Green Belt and the Surrey Hills AONB;
• place unmanageable pressure on local infrastructure (in particular, the local shops in East Horsley, Horsley Station, the Raleigh School, the Medical Centre and local roads); and
• not be sustainable.

Sustainability goes far beyond deploying low-carbon construction techniques.

Some limited development at Ockham Airfield might become appropriate if it met sustainability needs, focussed only on brownfield land and was accessible only from the A3, so as to not harm the villages. However, to deliver such a plan, it would be necessary to also address traffic congestion issues with Highways England on the A3 and the M25.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Conclusion

Once development takes place on land, the change to the nature of an area is irreversible. Many appropriate non-Green Belt sites available within the borough which may be available for development and a number of these candidate sites are in public ownership: in order to comply with the NPPF and to ensure that GBC is able to optimise its cash position other candidate sites (particularly those within GBC or other public sector ownership) should be fully developed before any review of the Green Belt is undertaken.

GBC’s work to date seems to takes little account of the impact central planning decisions will take. For example, given GBC’s ambitions for economic development do not give consideration to both the ultimate decisions regarding new airport capacity locally, nor the desire of the majority of the population (as reflected in the 23 July vote) which is likely to place significant curbs on population growth of economically active people.

Furthermore, GBC now needs to re-work its statistics following the decision made by the rest of the country (not the GBC residents) to seek to leave the European Union. We must expect that out politicians are going to reduce population growth, with a resulting easing of the pressure for new housing supply.

I object to any and all erosion of the green belt, there is precious little left in this area of the county. In setting local villages will destroy the area (Policy P2).

The area surrounding Burnt Common is now subject to a disproportionate level of suggested housing and development (Policy A43).

This was not included in the Regulation 18 Draft and therefore has not been consulted on previously, it seems a cynical method of circumventing the correct process. I object.

Answer (if comment is on questions 1-7 of the questionnaire): ()

- The area surrounding Garlick’s Arch contains ancient woodland, protected by its position within the current green belt. Any relaxation of the planning rules to allow development in this area will open the door to further development. I object to this in the strongest terms.
- The proposed development of 400 homes directly on the large field adjacent to the A3 with an additional (and unnecessary 7000 sq m industrial area) will destroy a local business and the ‘Cobham Sporting Gun’ shooting club which has been in existence for the last 25 years. I feel extraordinarily aggrieved that a site, covered in woodland will be removed and sold for in excess of 20 times its current value (on the basis of grant planning approval for housing). I object to this strongly.
- Existing infrastructure, already under pressure will in no way benefit from increased residential accommodation in the area. There appears to be no provision for more schools or doctors surgeries to offset this increase in population. I object to this on the basis it is unsuitable in the extreme.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
• The concept of a further suggestion of placing a 4 way interchange (Northbound and Southbound on slip) to the A3 will create absolute traffic chaos – ultimately creating a direct route, and thus increased traffic from Woking to the A3. I object to this unworkable and ill-conceived alteration to the road network infrastructure.

• During rush hour this route will take vehicles through mainly residential areas, and past the front of two nurseries, a medical centre and a first school. It will simply gridlock Send and Burncommon along the A247 main artery.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The evidence upon which all of these significant proposed developmental changes is based, seems to lack any correlation to the published housing requirements for the Borough. It seems to serve only as an attempt to alter the status of, and then usher in the destruction of, large areas of the green belt. I object to the proposals – as there are already identified brown field sites which would be ideal for development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to any and all erosion of the green belt, there is precious little left in this area of the county. In setting local villages will destroy the area (Policy P2).
- The area surrounding Burntcommon is now subject to a disproportionate level of suggested housing and development (Policy yA43).
- This was not included in the Regulation 18 Draft and therefore has not been consulted on previously, it seems a cynical method of circumventing the correct process. I object.
- The concept of a further suggestion of placing a 4 way interchange (Northbound and Southbound on slip) to the A3 will create absolute traffic chaos – ultimately creating a direct route, and thus increased traffic from Woking to the A3. I object to this unworkable and ill-conceived alteration to the road network infrastructure.
- During rush hour this route will take vehicles through mainly residential areas, and past the front of two nurseries, a medical centre and a first school. It will simply gridlock Send and Burncommon along the A247 main artery.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I sincerely hope that all the views of residents in this wonderful part of the Borough are listened to and acted upon.

The area surrounding Burnt common, and Send should not be subject to such a range of disjointed development plans, they are in my opinion simply not workable in almost all instances.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/3930  Respondent: 15640897 / Jackie van Heesewijk  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Amount of new housing proposed far exceeds local need.

- Housing density excessive when compared with existing development.
- Would transform Ripley and Send into a sizable town, something for which no case is made.
- No local support.
- Collective impact of these 4 sites on a small part of the borough not considered. Should not be treated as isolated, separate sites.
- Total amount of new building out of scale with the planned development elsewhere the borough, especially less sensitive urban areas not protected by Green Belt.
- Sites unsustainable. Key infrastructure lacking. No adequate provision is made to increase it – e.g. poor wastewater capacity, lack of schools, absence of traffic management plan, flooding.
- No account taken of additional impact of Wisley Airfield site on surrounding villages.
- Extension of settlement boundaries too permissive.
- Green Belt gap with neighbouring settlements hugely narrowed, especially if Wisley Airfield is built on.
- Will harm compliance with NPPF 81 – e.g. by making cycling (including Prudential cycle races) too dangerous, ruining the rural setting of Waterloo Farm campsite, destroying the ambience of Grange Park Opera’s new “Theatre in the Woods”.
- Policy A40 especially unviable because of high water table and poor drainage, leading to regular winter flooding.
- Safe access and egress at Site A40 unachievable, owing to flooding, high speed limits, poor sight lines, narrow access to existing properties, inadequate pavements for elderly and schoolchildren, increasing use by recreational cyclists etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7330  Respondent: 15640897 / Jackie van Heesewijk  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY A35 (WISLEY AIRFIELD): • Should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties. • Irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application). • Unacceptable Conservative Party links between the developers and the Council. • No Green Belt “exceptional circumstances” presented. • Not a brownfield site as stated – only 15% of it. • Proposed SCC waste site ignored. • Loss of farming land. • Too near RHS Wisley and Thames Basin Heath SPA. • SANG would harm on SPA. • Will aggravate traffic jams at A3 roundabout and M25 Junction 10. • Unacceptable increase in air pollution. • No existing public transport and stations miles away. • No proper traffic data. • Housing density far too great. • Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed buildings. • Access confined to inadequate narrow lanes. • Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole. • Major impact on neighbouring villages, especially Ripley, Send and the Horsleys. • No assessment has been made of the collective impact on the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT TO POLICY E7 (TOWN CENTRE): • No statement in policy wording of value of Guildford’s rural setting and views. • No consideration of Town Centre Master Plan, GVG proposals or station redevelopment plans. • Proportion of new housing in town far too small. Development pushed into countryside, ruining the latter and harming urban regeneration. 4 • No brownfield register. • Too much big retail, despite online shopping revolution and decline of traditional high streets internationally. Futile to try to turn Guildford into Woking or Kingston. • No measures to support small, niche retailers in town, e.g. through business rates.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/16331  Respondent: 15640897 / Jackie van Heesewijk  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY H3 (RURAL EXCEPTION HOMES): • It loosens the criteria by allowing “market housing” and development that changes the housing mix. Developers would be able to override NPPF 2 “exceptional circumstances” and other restrictions to build large houses in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16347  Respondent: 15640897 / Jackie van Heesewijk  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT TO POLICY I1 (INFRASTRUCTURE & DELIVERY) • Infrastructure considered here as an afterthought, rather than pre-condition of development. Should be a key issue for the rest of the plan. • Excessive housebuilding in countryside not supported by any funding or provision for infrastructure. • Heavy focus on building on greenfield sites inefficient and unnecessary: cheap for developers but much more expensive for the public who have to fund the infrastructure. • Draft CIL scale discourages use of brownfield land first. • No plan for organic increase in existing traffic congestion, let alone once thousands of houses are built across the countryside. Local roads hardly considered. Green Belt being eroded before road widening/improvement plans certain, encouraging over-development of greenfield sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16348 Respondent: 15640897 / Jackie van Heesewijk Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY I2 (SUPPORTING DTP'S ROAD STRATEGY): • Doesn’t allow for catastrophic increase in traffic resulting from spreading new housing estates across the borough. • Out of sync with DTP’s strategy: houses to be built and Green Belt destroyed before plans for A3 etc implemented. • Road plans too optimistic anyway, especially post-Brexit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16349 Respondent: 15640897 / Jackie van Heesewijk Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY I3 (SUSTAINABLE TRANSPORT): • Just a list of generic measures, not related to real life or the particularities of Guildford. • Fails to treat sustainability as a constraint. Assumes excessive levels of development proposed in the plan can be supported by sustainable development. • Unrealistic. Most people can’t or won’t walk or cycle – commuters in a hurry, the elderly, children, people who are unwell or unfit, people carrying heavy shopping or other goods. i.e. most residents! • Town’s eye view of transport. Ignores scarcity of existing rural public transport and commercial unviability of increasing it. Ignores terrible state of Surrey’s roads, potholes, flooding etc. Ignores extra stress to be created by huge new housing estates in countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT TO POLICY I4 (GREEN & BLUE INFRASTRUCTURE): • Policy cancelled out by huge developments across the countryside. No mention of opportunity costs of loss of Green Belt services and amenities (e.g. farming).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT TO ALL POLICIES INVOLVING BUILDING IN THE GREEN BELT: • No “exceptional circumstances” shown, numbers excessive and the clearly expressed views of residents in previous consultations ignored.

I OBJECT TO POLICY P2 (GREEN BELT): • No declaration of support for protecting the Guildford Green Belt, contrary to NPPF and government statements. • No evaluation of value of local Green Belt as a public and private asset: it’s just treated as potential building land with a few inconvenient restrictions. • Impact of Green Belt development on local agriculture ignored. • Impact on rural leisure and tourism ignored. • Impact on flood control ignored. • Impact on carbon sink and knock-on effects for air pollution and climate change ignored. • Impact on biodiversity ignored. • Impact on natural heritage ignored. • Impact on water catchment ignored. • Impact on room for public space amenities (parks, cemeteries, waste facilities etc) ignored. • Impact on rural business (e.g. mineral mining, film making) ignored. • Impact on natural landmarks and views ignored. • Harm to public health and wellbeing (physical, psychological) ignored. • Allows excessive levels of development in breach of views expressed in last consultation and Conservative Party manifesto commitments at the last local elections. • Has allowed ruling Councillors to argue that there is an acceptable percentage of Green Belt that should be sacrificed to development, when no such rule exists in the NPPF. • Ignores alternative approaches, such as fair burden-sharing under which settlements would undertake to accommodate new development in proportion to their size. • Disproportionate amount of development (most of it, in fact) to be in Green Belt. Too few new homes in urban areas where most people (especially the young and less privileged) want to live. This will act against much
needed urban regeneration. • “Insetting” of most villages disproportionate and unjustified in terms of their contribution under the NPPF to the purposes of the Green Belt. Based on flawed Green Belt and Countryside Study. Idea that most Guildford villages do not contribute to “openness” is subjective. • Major settlement extensions allow indiscriminate housebuilding, as irregularly shaped villages are squared off to enclose green fields. • Overall harm to Guildford Green Belt unjustified by any objective development need post-Brexit. • Ignores most of NPPF 17 stipulations.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY P3 (COUNTRYSIDE BEYOND THE GREEN BELT): • Gives Ash and Tongham more protection than rest of borough, including existing Green Belt. But they don’t contribute to preventing London sprawl. • Special treatment of ward represented by current Council Leader and his predecessor. Politically biased. • A minor extension of Green Belt in one place does not justify its major destruction elsewhere (the inset villages).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY S2 (BOROUGH-WIDE STRATEGY): • Numbers based on growth and demographic data now invalidated by Brexit. • No justification given for 13,860 housing figure. Figure based on a secret formula used by consultants and never seen by anyone on the Council or by the public. Council has failed to seek its disclosure. • 13,860 figure confuses the OAN with a housing target. No definite housing target given, leaving too much scope for the Council to make one up. I can’t understand how we’re being consulted when we don’t know how many houses the Council want to build, taking all the constraints into account. • Figures based on a Housing Market Area that ignores 2 neighbouring districts
(Rushmoor and Mole Valley) and is much too small, since most people commute or travel far outside the Area to shop or study. This distorts the figures: no reason why Guildford needs to build nearly twice as many large housing estates as the rest of Surrey put together, or half of all sites over 100 units. High numbers involved would transform character of the borough from mainly rural/Green Belt to urban, creating a corridor of development out of London as per Woking or Croydon.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report which concludes that 693 homes a year are required by the borough, it is more than double the previous figure of 322 used in previous plans. I believe the SHMA report methodology to be inaccurate; it inflates the needs of the borough by distorted student numbers. It is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.
The National Planning Policy Framework allows the overall housing target to be reduced to take into account protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to the Guildford area. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan.

The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

### I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which permit the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the last minute a more appropriate and equivalent brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11 May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. A Habitats Assessment has been carried out but there is absolutely no mention of wildlife species affected in the report. No wildlife report has been conducted on the site. (Policy I4). Bats are specially protected and no specific assessment has been carried out in accordance with the Wildlife and Countryside Act 1981.

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition of north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford and the A25 would have to go through Clandon and Burnt Common. This has the potential to cause damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I object to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick's Arch (A43) will have a permanently damaging impact on the character and wildlife of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

References used by the Plan for the assessment of wildlife and habitats assessment is out of date – further species have been added to the BoCC 4 Amber list and Red list. Endangered species likely to be affected by the plans are:

Cuckoos
Turtle Doves
Lesser Spotted Woodpecker
Mistle Thrush
Grey Wagtail
Yellow Wagtail

Redwing (winter migrant)

Nightjar

No mention is given in the Plan or the Sustainability of specific rare and protected species resident or migrating through the area. There needs to be a full assessment of all those protected species that are likely to be in affected woodland, trees, hedgerows and heaths and those specifically found in the Thames Basin Heaths that could be dependent on these areas and their populations as wildlife corridors/stop overs/sources of food/breeding areas. Any assessment must include those species who might be difficult to see in normal circumstances – nocturnal species (bats, owls, badgers, foxes, nightjars), ground nesting animals, insects, invertebrates and birds (such as short eared owl – essentially invisible apart from when hunting), seasonal visitors, breeders and migrants, those with long gestations and short life spans, such as stag beetles, whose larvae remains under rotting trees and soil for up to 6 years before emerging as adults for a short period to mate and breed again.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could instead accommodate a development of 7,000 sq m. The Garlick’s Arch site is in the Green Belt and should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable (as stated in X provisions…).

Add about woodland and wildlife here if relevant

I object to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Garlick’s Arch is Green Belt land and should not be developed or built on or otherwise when there is a nearby and more suitable brownfield site available.

Add about woodland and wildlife here if relevant

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses and the loss of jobs of existing local employees. Currently employed local residents may therefore have to look outside of the area for employment and therefore increase travel that is currently unnecessary.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.
I object to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site. Any plans to improve these facilities must be sustainable.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Funding for Police services is being. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/16361  Respondent: 15641281 / Paula Redmond  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

No consideration has been given to the increase in traffic, congestion, disruption and emissions when combined with Surrey County Council’s plan to start gas extraction and production works nearby at Albury Heath (AONB), which will mean drilling 24/7 for 15 years.

It is understood that the remit of Local Councils does not include consideration of plans outside of it’s area of responsibility, or the cumulative effects, however, it must be for Central Government to oversee all development projects closely enough to establish when there are conflicts of interest. It is irresponsible not to consider the cumulative damaging
effects to the locality, the community and the environment as a whole. It is irresponsible to ‘pass the buck’ to other
Councils and Government and leave local residents and communities to suffer the consequences of this siloed approach.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16362  Respondent: 15641281 / Paula Redmond  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental
impacts and impacts on amenity and health.”

The significant level of development being proposed, particularly in the north east of the borough will lead to considerable
 increases in congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up
 residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents
 and their health.

The Plan does not consider the cumulative effects in conjunction with Albury Heath AONB Compressed Natural Gas
 extraction plans which have just been approved by Surrey County Council and falls within Guildford Borough Council

The Plan does not consider the wider environmental effects in conjunction with the 200 other Green Belt site being
developed by local councils around London Area or its effect on all residents in and around the M25 area.

The Plan does not consider the cumulative impacts on TBH and London and South East nature reserves and wildlife
habitats.

The Plan does not consider the cumulative impacts of the Plan in conjunction with the possible development of 3rd runway
at Heathrow and associated damage to air quality.

The Plan does not mention or show calculations of the considerable damage to air quality during demolition and
construction phases as well as completion.

The Plan does not quantify or assess the extreme disturbance to local residents and wildlife during the construction phases
which will be continuous over many years – this is unacceptable and unsustainable, especially when combined with Surrey
County Council’s Compressed Natural Gas Extraction site at Albury Heath AONB.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16369  Respondent: 15641281 / Paula Redmond  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3
I object to the detrimental impact on transport, local roads and road safety

I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated and, even within the development itself, too spread out to anticipate a reduced reliance on private cars.

1. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

1. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

1. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

1. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

1. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

I object to the fact that air quality concerns have not been taken seriously

Air pollution in many parts of the borough, particularly at the M25/A3 junction, is already in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Traffic and Transportation

The increase in vehicle movements is very concerning, given the nature of their load. In effect there will be a couple of tonnes of compressed gas being moved on a daily basis. These vehicles are a serious danger to not only the local population around the site but to those on the route to the ultimate destination. A recent US study, by the National Institute for Occupational Safety and Health, showed that vehicle crashes are the single biggest cause of fatalities to oil and gas workers while the increase in onshore gas production has resulted in a 350% increase in traffic fatalities in regions where gas production is occurring.

The increase in traffic will also increase local pollution levels, vehicles transporting plant, equipment, workers and compressed gas are mostly heavy diesel engined vehicles - the most polluting to the environment. A recent NHS study showed that 40,000 deaths in the UK each year are directly caused by pollution.

Evidence was found to suggest that long-term exposure to air pollution is linked to:

- decline in lung function in adults – which can be a risk factor for chronic obstructive pulmonary disease
- asthma
- type 2 diabetes
- problems with brain development and cognition (thinking ability)
- cardiovascular diseases – conditions that can affect the heart and blood vessels, such as coronary heart disease
- cancer

15 years of 24/7 gas production activity will create unacceptable increases in local pollution levels, affecting the public, local residents, wildlife and ecosystem. The Green Belt is designed not only to provide ‘openness’ and prevent ‘urban sprawl’ but also to provide compensation for human polluting activities and to maintain biodiversity supporting our ecosystem, absorbing carbon and other pollutants from the environment and helping to clean our air, which is already failing to meet levels for good health. Damaging the Green Belt and cutting ancient woodland has a devastating effect on human health and local wildlife.

Albury civil parish spans the small village and three hamlets, which are Farley Green, Little London and adjacent Brook – spaced out by Albury Heath, Foxholes Wood, small fields and Albury Park. About a third of Blackheath Common on the Greensand Ridge is in the parish, which centrally nestles in the 'Vale of Holmesdale'. Albury new village is at the point where the Sherborne flowing from near Newlands Corner via the Silent Pool joins the Tillingbourne that runs through the centre of the village and until the 20th century fed the flour mill at the Chilworth edge of the village. The old village lies within Albury Park. There is another brook leading into Chilworth called Law Brook which Brook is centred on. The potential for polluting these local water courses which support a range of wildlife, is unacceptable. The area contains and is adjacent to nature reserves, National Trust sites and SSSIs which provide habitats to a number of rare and endangered species.

The roads around an AONB are totally inappropriate for these sorts of vehicle movements, and the villages the HGVs will pass through are densely populated and the roads very narrow in places, frequently used by walkers, cyclists, and passing birds and wildlife (particularly during migrations and breeding seasons when wildlife populations can increase greatly and are more vulnerable with young), the risk of accident, injury and death is unacceptable. There are regular small cycling groups as well as large organised events using the roads in Albury and nearby, the The Surrey Hills Cyclone Sportive passes through Albury, The Dirty Weekend series and many others. This will create unacceptable road and health hazards for the cyclists and increased congestion for everyone during these times.

If the proposals by Guildford Borough Council for development of 20,000 new dwellings in the Guildford area go ahead, including several thousand properties and associated urban development around the nearby villages of East/West Clandon, East/West Horsley, Wisley, Ripley, Send Marsh, Pyford, Ockham, etc. the cumulative effect of increased vehicle numbers during construction and thence from new residents (20,000 new properties will likely swell local populations by around 45,000 and their vehicles) will cause utter carnage. Recent heavy rainfall caused flooding at the A3 underpass at Kingston causing a 3hr traffic jam back as far as Ripley and surrounding villages (I had the pleasure of being caught up in it personally), which shows that these roads cannot cope with the volume of traffic as it is, particularly during poor weather or if there is an incident or accident blocking the roads. The added pressure on the A3, A25, A246 and knock-on effect on the M25 will be intolerable even in the best of conditions. The cumulative effect on local pollution, congestion, competition
for space, resources and amenities, and detrimental effect on health of local communities and wider populations will be very significant. It’s like watching a perfect storm forming with Guildford at the centre.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):**

I am a landscape and wildlife photographer and frequent visitor to Albury Heath, Blackheath and surrounding countryside and villages. Surrey has some of the most beautiful and rare countryside and species of flora and fauna in the UK, some of it’s habitats are unique and are of national and worldwide conservation importance.

I wish to object in the strongest terms possible to the application by IGas for production at the above site. As you know, planning applications have to be decided against national and local planning policy. The IGas proposals conflict with policies in the:

- National Planning Policy Framework (NPPF)
- Surrey Minerals Plan
- Guildford Local Plan
- Metropolitan Green Belt

The recent planning officers report defined the proposal as a “major development”. Under the NPPF paragraph 116, planning permission should be refused for major developments in AONBs except in exceptional circumstances and where it can be demonstrated they are in the public interest.

The planning officers accepted the development would have:

- some detrimental effect on the landscape and would not enhance the natural beauty of the AONB during either the construction or operational period.” That the proposal amounted to “significant harm” to the Green Belt by encroaching on openness.

The proposal also breached policies designed to protect the AONB in the Surrey Minerals Plan and Guildford Local Plan.

The Surrey Minerals Plan policies MC2 and MC14 state that minerals developments in the AONB can be approved only if they have been demonstrated to be in the public interest, there is a need for them and there will be no significant adverse impacts on the appearance, quality and character of the landscape.

Policies RE5 and RE6 in the Guildford Local Plan seek to conserve the visual quality or distinctive character of the AONB. Policy RE2 states that new building would be inappropriate unless it prevents sprawl, reserves character or assists urban regeneration.

The planning officers’ report also says that the proposal would harm ancient woodland by creating car parking on the access track. The NPPF says loss or deterioration of irreplaceable habitats, such as ancient woodland has to be outweighed by benefits.
Ancient woodland, however, is exactly that ‘irreplaceable’. Even if ‘translocated’ or ‘compensated’ in some way (as is required by the LPPF), you cannot replace the wildlife habitats provided by ancient and veteran trees like for like, you cannot explain to the birds, mammals and insects who live, eat and breed there that they have to move, or those species that may use it as a stopover on migration, a wildlife corridor between the other important sites in the area, such as the SSSI site at Colyers Hanger and Blackheath. Surrey has 62 SSSIs, 54 of which are listed for their biological interest (https://en.wikipedia.org/wiki/List_of_Sites_of_Special_Scientific_Interest_in_Surrey). We do not know what impact further development and disruption within these areas may have on the delicate balance of nature within them. Nature is not contained - it moves, flies, burrows, swims, migrates through and between such sites, woodlands which are of national importance and rarity.

You cannot artificially replicate the balance of biodiversity that nature has created over decades if not hundreds of years (despite what the LPPF suggests). Removal of ancient trees and woodland and disturbance of soil beneath them releases carbon dioxide that is locked inside. Further, veteran trees have been shown to be up to 10 times more effective at absorbing carbon than new plantations. It takes further decades if not centuries for new plantations to develop the rich habitat potential of old woods, some delicately balanced, rare and endangered species never recover or take many years to recover or reestablish colonies. Stag beetles, for example, are a protected species that spend around 6 years of their lives unseen, underground in larvae form, in the soil under rotting wood commonly found in woodland. Nightingales return to the exact same tree each year to sing to attract a mate. Owls, bats and other creatures use holes in old trees to nest in. Conservationists and scientists are still researching the rapid declines in our native species and the impact that further declines may have on our ecosystem. The UK has lost 60% of all species in recent years. Most explanations given are urban development, loss of habitat, pollution and other human interventions. Trees, plants and many wildlife species are suffering diseases and attacks that they were not normally susceptible to. If 40,000 humans die from pollution related respiratory and cardio vascular diseases each year, you can imagine the effect on smaller organisms health and immune systems must be devastating.

I reject, in the strongest terms, the conclusion of the planning officer that all of the above negative impacts can simply be outweighed by a national ‘need’ for ‘indigenous’ gas supply.

The recently released DECC Committee on Climate Change report stipulates that UK onshore gas production should only be permitted if three vital conditions are in place (extract - link to full document is provided below):

Test 1: Well development, production and decommissioning emissions must be strictly limited. Emissions must be tightly regulated and closely monitored in order to ensure rapid action to address leaks.
- A range of technologies and techniques to limit methane emissions should be required, including ‘reduced emissions completions’ (also known as ‘green completions’) and liquid unloading mitigation technologies (e.g. plunger lift systems) should these be needed;
- A monitoring regime that catches potentially significant methane leaks early is essential in order to limit the impact of ‘super-emitters’;
- Production should not be allowed in areas where it would entail significant CO2 emissions resulting from the change in land use (e.g. areas with deep peat soils);
- The regulatory regime must require proper decommissioning of wells at the end of their lives. It must also ensure that the liability for emissions at this stage rests with the producer.

Test 2: Consumption – gas consumption must remain in line with carbon budgets requirements. UK unabated fossil energy consumption must be reduced over time within levels we have previously advised to be consistent with the carbon budgets. This means that UK shale gas production must displace imported gas rather than increasing domestic consumption.

Test 3: Accommodating shale gas production emissions within carbon budgets. Additional production emissions from shale gas wells will need to be offset through reductions elsewhere in the UK economy, such that overall effort to reduce emissions is sufficient to meet carbon budgets.

of these conditions, especially Carbon Capture and Storage technologies, are remotely certain to be met.

I implore you to reject this proposal in an AONB as there are no reasonable ‘exceptional circumstances’ and it is clearly not in the national public interest, given our legally binding climate change mitigation commitments, and it is certainly not in the local public interest.

**Air pollution and emissions**

The period of gas flaring is very concerning for a number of reasons.

The Research Journal of Environmental and Earth Sciences 4(5): 525-528, 2012 states:

‘Gas flares have harmful effects on the health and livelihood of the communities in their vicinity, as they release a variety of poisonous chemicals. Some of the combustion by-products include nitrogen dioxides, sulphur dioxide, volatile organic compounds like benzene, toluene, xylene and hydrogen sulfide, as well as carcinogens like benzo(a)pyrene and dioxins. Humans exposed to such substances can suffer from variety of serious ill-health effects.’

No detailed analysis has been produced of the gas to be flared. This is a serious omission from the application.

Evidence of gas flaring from the USA and Australia suggests that the total harm caused by flaring pollutants is more than the sum of the individual components.

Natural gas processing is a significant source of fugitive emissions of both methane and volatile organic hydrocarbons (VOCs). The World Bank estimates that every year, some 360 million tonnes of CO2 is released to the atmosphere through flaring and venting. This has a detrimental effect on the environment, contributing significantly to global warming and acidification of both land and sea. A considerable proportion of this CO2 comes from the production of Oil and Gas. At a crucial point in human history, if we are to avoid runaway climate change ‘keeping it in the ground’ needs to be the concern of every public authority, and indeed the UK’s Climate Change Act 2008 places legal obligations on public bodies to comply with emission reductions targets relating to climate change. These duties require that a public body must, in exercising its functions, act in the way best calculated to contribute to the delivery of emissions reduction targets. Flaring is incompatible with this objective, which is why there are international calls for ‘green completions’, involving the capturing of the gas – this is not proposed at this site.

**Gas compressor emissions**

Very concerning for the local population is the proposed notion of powering the gas compressor by burning some of the gas from the well 24/7 for 15 years. There needs to be a detailed analysis of the effects of the exhaust emissions of this from a variety of aspects: human health, ecology, local amenity impacts e.g. from those using the nearby playing fields. Moreover, the effect on vegetation and local wildlife species at a time when many native and migratory species and their habitats are in drastic decline is likely to be very significant and totally unacceptable from a conservation point of view.

The environmental heating effect of methane is significantly higher than CO2. It is still a fossil fuel and at a time when we should be reducing UK and World dependence on fossil fuels we do not give a good impression to our European neighbours or the rest of the world by promoting this type of fuel production and adding to our own domestic fossil fuel output and pollutant totals. Given the extreme threats to the earth from climate change (the rebranded friendly term for global warming), rapid melting of the polar regions, more extreme weather - drought (it is estimated that 50 million people will be displaced due to desertification within 10 years), storms and floods (the UK has had some of the worst flooding and storms in history in recent years), earthquakes and forest fires (there have been record temperatures, dry periods/drought conditions in the US, Canada, Amazonia Rainforest and Russia in the last 12 months), etc, our relentless exploitation of our environment and ecosystems has the potential to snowball us into global disaster at a far greater rate than we or scientists first thought. Key ‘canary in the mine’ species are in grave danger of extinction, everyday species such as pollinators, bees, butterflies, many species of birds, are in desperate decline. Our whole ecosystem’s reproduction depends on these species. We must set an example to the rest of the world and make a commitment to ‘green’ energy, not just to less or differently polluting fuels. We cannot continue to ignore the global environmental implications of pollution as well as the local impacts. We cannot continue to ignore the place our plant and wildlife has in our ecosystems, our entire existence depends upon on it.
"Methane is a more potent greenhouse gas than carbon dioxide (CO2), trapping more heat in the atmosphere molecule-for-molecule. But it is much shorter-lived: it decays on a timescale of around 12 years, whereas around a fifth of the effect from CO2 remains even after 1,000 years. This means a unit emission of CO2 today will affect the climate in 2100 and beyond. In contrast, the same unit emission of methane will have little effect on climate in 2100, but a stronger effect on the climate of the next few decades" - This means that as well as our current CO2 emissions having a runaway train of environmental effects lasting hundreds of years, gas production will increase the ‘greenhouse gas’ heating effect in the shorter term, which is potentially far more damaging as weather systems, the oceans, wildlife and plant species struggle to adapt to the unnatural rate of change of temperature and seasonal variations and confusion. This also means that the local communities will have to suffer the effects of methane and other greenhouse gas emissions for many years a

The UK is also inexperienced in this field of gas production "the UK has no exploration flow data, let alone production data, it is too early to speculate on the likely productivity of UK wells"

This report shows that there are no certainties, about it’s potential yield and value to market, about safety, about the stability of our soil and infrastructure, about the expertise and experience of the employees, about the controls and monitoring that will protect the public and what contingencies would be in place should there be a major accident or leak or explosion at the site or during transportation. The safety and health of the public should be an absolute priority, even if this site did not involve destruction of woodland and damage to an AONB. The fact that it is an AONB means that testing out a fledgling gas extraction process, without knowing the consequences, is a recipe for disaster.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17462  Respondent: 15641281 / Paula Redmond  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The 24/7 nature of operations means that noise and light pollution, as well as air pollution, will be a constant disturbance to local village residents and to wildlife for a 15 year period, damaging health, wellbeing, property values, access to local amenities, access for emergency vehicles and no let up in emissions so air quality has no chance to recover by even a small amount overnight. This will also affect the nocturnal species in the area, bats, owls, badgers, foxes, nightjars, hedgehogs to name just a few.

The potential long term and constant disturbance and damage caused to local populations and wildlife is entirely unacceptable.

Given the uncertainty of the future of UK regulation with our impending exit from the EU and the widespread environmental protection, of public health regulations, water purity directives, health and safety regulations, wildlife protection regulations, bird protection directives, etc. and the change of Prime Minister (it was David Cameron’s personal ambition to fast track licences for domestic gas production and fracking despite EU opposition and public opinion and protest against it, with complete disregard for all the protective laws in place to preserve AONBs, SSSIs, National Nature Reserves and SAPs and with overwhelming scientific and practical evidence of the hazards it can and has presented both in the US and during testing in the UK, where air and water have been polluted and localised earthquakes have been a result) and Cabinet, possibly even a General Election in the near future it could be potentially dangerous and unlawful to proceed with these plans.
I urge you most strongly and without hesitation to reject this proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to not protecting the Green Belt (Policy P2)

I object to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

| Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2 |

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to development in areas which are at risk of flooding and may increase likelihood or worse effects of flooding in the locality (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to not protecting the wildlife within the range of the Local Plan and the cumulative impacts on wildlife populations in the Thames Basin Heaths and the UK as a whole P5

“The [Wisley] PMDA is located within a Site of Nature Conservation Importance (SNCI) as stated above. A designated Special Protection Area (SPA), Important Bird Area, Local Nature Reserve and Registered Common Land is also located to the north of the disused airfield within Ockham Common. The 400 metre buffer of the SPA includes land to the north of the PMDA generally to the north of the disused runway. Residential development would not be appropriate within the 400 metre SPA buffer, however, it may be suitable for other uses.”

“A designated Conservation Area is located at Ockham village to the south of the PMDA.”

It should not be forgotten that Green Belt and “buffers” are also wildlife corridors – birds and wildlife on Ockham Common - and throughout nature reserves and other important bird and wildlife sites across the country and Europe and worldwide – they move! Some species are resident but move between various locations, others are migratory species who need to link up breeding and feeding sites using wildlife corridors and stop over sites. If these areas are destroyed then the ability for our native and migratory species will be irreparably damaged and the species will die out. Development close to such internationally important wildlife and nature sites such as those found locally in Surrey and the North Downs can have a devastating and widespread effect way outside of the direct construction zone and developed site.

A Special Protection Area (or SPA) is a site designated under the Birds Directive. These sites, together with Special Areas of Conservation (or SACs), are called Natura sites and they are internationally important for threatened habitats and species. SPAs are areas of the most important habitat for rare (listed on Annex I to the Directive) and migratory birds within the European Union.

Wisley Airfield is located within a local plan Site of Nature Conservation Importance (SNCI). The Guildford Borough Sites of Nature Conservation Importance Surveys (2004 –2007) describes this SNCI as a “disused airfield with derelict tarmac runway, arable fields, semi-improved grassland and hedgerows. This site is selected for its importance for reptiles, plants and birds.

9 notable Surrey plant species have been recorded on the site.

In addition 3 RSPB red list bird species and 7 RSPB amber list bird species have been recorded on the site.

The site has an exceptional or good population of a number of reptiles and amphibians.”

*IUCN Red List has just been updated for 2016 – there are now more species to be considered that were noted above.

What measures will the Council going to take, should development of Green Belt go ahead, to translocate/compensate for the loss to humans and wildlife? Are they going to give financial compensation to village residents and businesses for loss of value to their homes due to insetting and loss of revenue during the disruption of the building phases. Will they compensated for the increase in respiratory, cardiovascular and other pollution related diseases that they and their children and pets will suffer?

Is there a more up to date wildlife survey by the Council? – latest report by Surrey Wildlife seems to be 2004-2007

About 80 percent of butterfly species are confined to narrow home ranges that can be as little as an acre, and they’re unlikely to migrate across even a half-mile of inhospitable ground to find another suitable habitat. So a neighbourhood of meticulously maintained lawns, or a single highway, can be fatal for a species. Some butterfly species also have complex relationships with local ant species. These kind of complicated relationships are easily jeopardized by change. Pollution, drainage schemes, and climate change are among the other landscape-scale factors threatening butterflies.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over development, particularly for the villages between Guildford and the M25, including Ripley, Send and Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35) and Garlick’s Arch (A43) are in unsustainable locations. They do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided and additional railway stations are planned.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16353  Respondent: 15641281 / Paula Redmond  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being...
located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

I object to the Local Plan not considering the full impact on air and water quality and environmental pollution

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Thus far we see a perverse number of new homes in the plan and no strategy to protect the quality of living for those who already reside here? What is the strategy to protect the quality of schooling for my child, to keep roads safe, medical services, public transport, parking? In short what is the infrastructure strategy so support these new planning proposals?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I chose to move to Ripley when I was 74 because it is a peaceful and very pretty village that I have known and loved since I was a child. The people of Ripley work tirelessly and have done over the years, to conserve the delightful individuality and personality of this village and its shops, businesses, pubs and residents have also respected and supported this ethic.

I am absolutely horrified to see how the proposed plans ride roughshod over the very essence of this and the other villages concerned who are at present protected by The Green Belt who like Ripley are small and very valuable to all who visit, work or live in them. What could possibly justify destroying a pretty village in order to create a suburb? Why not create an independent new town for the new housing surrounded by Green Belt instead of destroying a community.

I object to the exaggerated “housing need” figure of 13,860 which is far too high and results in the completely unnecessary development of the Green Belt. The way students, economic need and affordability are calculated inflates the housing need.

In regards to the planning consultation for the area of Send and in particular the Send Hill proposal I wish to strongly object on the following grounds.

The proposal is not in keeping and sympathetic to the area as stated. The proposed is an over development squeezing far too many new small homes in a very limited space. 40 new homes would mean a prospect 80 number cars. Where would 80 cars park? This additional traffic would have a vast negative impact to the Send Hill road and again not be “sympathetic to the surrounding area”. This land is currently used by local residents for recreational walking and nature observing. Woodpeckers, Owl’s Bats and badgers are all regularly seen here along with many other forms of wild life such as the protected May bug. The loss of their habitation could never be sympathetically.
catered for and would clearly be detrimental to their survival. The land is currently used as common land and should remain so as this is actually the only green open space for the local residents to use. The addition of two traveller’s pitches would unfortunately immediately degrade the neighbourhood and again I do not see how anyone can argue that this is in keeping with the local area and its residents. Send villages road network and infrastructure is already at a capacity that exceeds that of the size of the village current road network as Send and its back road are used on mass as a trunk road through into Woking and beyond. We understand that that there are already plans to builder a number of homes at he bottom of Send Hill within the existing School grounds of St Bede’s. So the proposed is an over development of this immediate area.

I wish it to be noted that this is yet another attempt to over develop this area. Would you please advise when will the council stop threatening the residents of Send Hill?

I wish it to be noted that the Council has subjected this community to far too much repeated duress due to these numerous and repeated threats / attempts to ruin the local area and its green belt country side. This has many detrimental impacts to those subjected to this process such as added stress, mental health certainly to the vulnerable and elderly. The council have a moral duty here to the residents of Send Hill of which it is clearly treating unfairly.

I am sure no one would object to sensible planning or development of which this is clearly not.

I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford.
I object to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

With regard to commercial floorspace provision, I strongly object to this being sited at Garlick’s Arch. Commercial floorspace should be directed to existing employment areas of the Borough such as Slyfield, where there is sufficient space to accommodate the quantum of floorspace apparently required, rather than release greenfield land for development in a rural location.

Overall, whilst it is appreciated that new housing is required in the Borough, I question the need for new employment floorspace on the basis of the existing level of vacancies in the local area. I also strongly believe that the Local Plan should not be an opportunity for the Council to ride rough-shod over established planning policy without a careful and detailed assessment of all the alternative options for development.

I respectfully request that my objections as detailed above are taken into account in the context of the Local Plan Review.

**Comment ID:** PSLPP16/16386  **Respondent:** 15641665 / John Savin  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):**

The National Planning Policy Framework (NPPF) (March 2012) confirms, at Paragraph 79, that ‘The Government attaches great importance to Green Belts…. The essential characteristics of Green Belts are their openness and their permanence.’ The NPPF clearly sets out at Paragraph 80, the five main and longstanding objectives of the Green Belt, as follows:

- to check the unrestricted sprawl of large built-up areas;
- to prevent neighbouring towns merging into one another;
- to assist in safeguarding the countryside from encroachment;
- to preserve the setting and special character of historic towns; and
- to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

Paragraph 83 of the NPPF states that:

‘Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.’

Having reviewed the information available, and the details of the Council’s proposals to remove the village of Send from the Green Belt and amend the Green belt boundary, I consider that the Council’s approach is fundamentally flawed and that the proposed emerging local policy is at odds with National strategic planning policy, which should form the basis for policy formulation at the local level.

Furthermore, I consider that the Green Belt in this location continues to serve a purpose and fully meets the objectives originally identified for Green Belt designations, and in this instance:

- It checks the unrestricted northwards sprawl of Guildford, and eastward sprawl of Woking in particular;
- It prevents the merging of Guildford, Woking, Weybridge and Cobham in this area;
- It serves to safeguard land in the vicinity of the North Downs and land which is in a variety of rural and agricultural uses;
- It assists in preserving the historic character of the settlements in the area;
- The protection of the Green Belt assists in diverting development to more sustainable locations such as the built up areas of Guildford and Woking and other towns both within and outside of the Borough.

I consider that the Green Belt in this location still serves a strong purpose and that there is no over-riding justification for the release of land from the Green Belt in this location for development.

In terms of development in the Green Belt, the NPPF clearly states at Paragraph 87 that ‘inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances’. Paragraph 88 goes on to state that when considering any proposals for development Councils should ensure that substantial weight is given to any harm to the Green Belt. It also states that, ‘very special circumstances’ will not exist unless the potential harm to the Green Belt by reason of inappropriateness and any other harm, is clearly outweighed by other considerations.’ In this instance, the need for housing or commercial development is not sufficient a very special circumstance to warrant development in the Green Belt.

**Comment ID:** PSLPP16/16387  **Respondent:** 15641665 / John Savin  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Furthermore, I believe that there are other suitable alternative sites within the existing built up areas of the Borough that would be capable of addressing the development needs of the Borough in a more sustainable manner without irreversible degradation of the Green Belt.

Until the Council can provide a reasoned, robust and fully justified case for the removal of green field land from the Green Belt, then I strongly object to any Green Belt land release in the area of Send and Ripley, and as a result I also therefore object by default to the sites identified for development at Garlick’s Arch, Clockbarn Nurseries, Send Hill, Wisley Airfield and Gosden Hill.

In addition to the principal objection on the grounds of the impact upon the Green Belt, I also consider that there are fundamental and insurmountable issues associated with the capacity of the existing infrastructure in this part of the Borough, which wholly precludes further development of the level identified. Not only is the strategic highway network already at capacity at peak times, particularly on the A3, but the local network is also under considerable pressure, which I do not consider would be alleviated by the addition of a new A3 junction or piecemeal upgrading.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**Housing**

Your proposed housing numbers of 13,860 are impossibly high. How do you calculate these numbers – particularly after Brexit. The figures seem ludicrous and as officers you should explain them which you seem incapable of doing. This is worse than the civil servants in Brussels. I therefore object to all policies based on your housing figures. Housing policy should be based on real housing NEED for borough residents restricted necessarily by the requirement to preserve the Green Belt boundary. I further object to a Plan which requires 70% of housing to be built on the Green Belt – build modern nice flats on brown field land instead please. Brownfield land is available in the town centre. I would direct you to the open letter and brownfield site assessment sent to GBC councillors by Guildford Green Belt Group. I call on you to develop policies which require the use of urban brownfield sites first, which I believe can cope with real housing and commercial need and I object to your policies which do not do this (Policies H1,H2). The need for shopping and commercial space is declining with internet shopping and Guildford town centre should be revitalised with town centre housing. (Objection to policy E7).

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

### Comment ID: PSLPA16/3944  **Respondent:** 15642881 / Douglas Denham  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**East and West Horsley villages**

I **fundamentally object** to the inclusion of Kingston Meadows, land owned by GBC and previously dedicated as open space for the use and benefit of the community with Community Centre, medical centre and recreational facilities. It is fundamental that there are no exceptional circumstances for East and West Horsley to be taken out of the Green Belt. I **object** to the extension of the settlement boundaries by the redrawn insetting boundary. These can only be to try and make more land available for what has been shown to be inappropriate development and included in an enormous document so that they will probably be missed by residents. No change to the settlement boundary has been justified. I **object** to the inclusion in the Plan of six large housing sites in the two villages (A36 - 41). They should be removed from the Plan as they are contrary to the Green Belt and to include them pre-empts proper decision making. I object to a Plan which allocates Housing disproportionately to the Green Belt villages and in particular the Ockham, Send, Horsleys area. This is morally and legally wrong and contradicts your Vision. A proper assessment of urban brownfield sites should provide enough sites for housing to be allocated at least proportionately as between the urban area and villages.
I object to the revised Settlement Hierarchy with another meaningless tick box exercise. East Horsley is not a rural district centre within any ordinary meaning of the phrase. People do not come from outlying area to East Horsley for shopping or work, they go to Guildford, Dorking, Leatherhead or other urban areas, including Surbiton, Kingston and London. East Horsley is not suitable for town centre type developments and I object to these policies (E8).

I also draw your attention to the very serious existing problems in the village with inadequate infrastructure - roads, flooding and drainage, sewage, etc - and facilities - schools, doctors, failing businesses, no useful buses, to mention just a few. There is a high dependency on car use. For these reasons a large increase in housing is not feasible. It would also destroy the character of the village. For all the reasons given above, I am against anything other than small scale additions to housing in East and West Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Ockham - New Settlement

I strongly object to the proposal to use farm and previously requisitioned land at Ockham for 2,100 houses. The impact on the Horsleys would be enormous and completely change the character of the area and is unsustainable. Planning permission has recently been refused for numerous reasons and the site should therefore be removed from the Plan. Somebody is clearer making a lot of money out of this and it needs to be investigated.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Local Plan Consultation comments

I am writing to lodge some objections to the 2016 Draft Local Plan ('the Plan'). This may be your job but please realise you are affecting real peoples’ lives. Real people you are here to serve. This is not a game although people in this field of practice seem to treat it as such, largely to make money for the unscrupulous I suspect. What do you not understand about the words “Green Belt”? I know the educational requirements for many professions have changed but this is a no brainer and Green Belt is Green Belt whichever way you read it!

Green Belt

I strongly object strongly to the proposed changes to the Green Belt Boundary to inset the named villages from the Green Belt (including Policies S1, S2, P2). All the villages should remain in the Green Belt.

A requirement for extra housing is not exceptional circumstances – build up the way or underground instead of taking more Green belt land. 89% of Guildford Borough is in the Metropolitan Green Belt. The Local Plan should have the protection of the Green Belt as its cornerstone. The Green Belt is intended to be permanent and its boundaries cannot be changed except in exceptional circumstances. You have shown no exceptional circumstances under the NPPF for the Green Belt boundary to be changed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In addition to the principal objection on the grounds of the impact upon the Green Belt, I also consider that there are fundamental and insurmountable issues associated with the capacity of the existing infrastructure in this part of the Borough, which wholly precludes further development of the level identified. Not only is the strategic highway network already at capacity at peak times, particularly on the A3, but the local network is also under considerable pressure, which I do not consider would be alleviated by the addition of a new A3 junction or piecemeal upgrading.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to lodge my strong objection to the Council’s proposal to amend the Green Belt designation in the northern part of the Borough in the vicinity of Send and also the proposals to allocate land for additional housing and commercial development in this area.

Green Belt

The National Planning Policy Framework (NPPF) (March 2012) confirms, at Paragraph 79, that ‘The Government attaches great importance to Green Belts…. The essential characteristics of Green Belts are their openness and their permanence.’ The NPPF clearly sets out at Paragraph 80, the five main and longstanding objectives of the Green Belt, as follows:

- to check the unrestricted sprawl of large built-up areas;
- to prevent neighbouring towns merging into one another;
- to assist in safeguarding the countryside from encroachment;
- to preserve the setting and special character of historic towns; and
- to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

Paragraph 83 of the NPPF states that:

‘Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.’

Having reviewed the information available, and the details of the Council’s proposals to remove the village of Send from the Green Belt and amend the Green belt boundary, I consider that the Council’s approach is fundamentally flawed and that the proposed emerging local policy is at odds with National strategic planning policy, which should form the basis for policy formulation at the local level.
Furthermore, I consider that the Green Belt in this location continues to serve a purpose and fully meets the objectives originally identified for Green Belt designations, and in this instance:

• It checks the unrestricted northwards sprawl of Guildford, and eastward sprawl of Woking in particular;
• It prevents the merging of Guildford, Woking, Weybridge and Cobham in this area;
• It serves to safeguard land in the vicinity of the North Downs and land which is in a variety of rural and agricultural uses;
• It assists in preserving the historic character of the settlements in the area;
• The protection of the Green Belt assists in diverting development to more sustainable locations such as the built up areas of Guildford and Woking and other towns both within and outside of the Borough.

I consider that the Green Belt in this location still serves a strong purpose and that there is no over-riding justification for the release of land from the Green Belt in this location for development.

In terms of development in the Green Belt, the NPPF clearly states at Paragraph 87 that ‘inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances’. Paragraph 88 goes on to state that when considering any proposals for development Councils should ensure that substantial weight is given to any harm to the Green Belt. It also states that, ‘very special circumstances’ will not exist unless the potential harm to the Green Belt by reason of inappropriateness and any other harm, is clearly outweighed by other considerations.’ In this instance, the need for housing or commercial development is not sufficient a very special circumstance to warrant development in the Green Belt.

Furthermore, I believe that there are other suitable alternative sites within the existing built up areas of the Borough that would be capable of addressing the development needs of the Borough in a more sustainable manner without irreversible degradation of the Green Belt.

Until the Council can provide a reasoned, robust and fully justified case for the removal of green field land from the Green Belt, then I strongly object to any Green Belt land release in the area of Send and Ripley, and as a result I also therefore object by default to the sites identified for development at Garlick’s Arch, Clockbarn Nurseries, Send Hill, Wisley Airfield and Gosden Hill.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO the lack of any evidence for the alleged housing need numbers. I have two sons, both of which have bought property as first time buyers in Burpham and then in Send and Ripley, it is never easy to buy property but it can be done. Many people would like to live in Surrey, that is why it is expensive, but we have chosen to live in Surrey for what it is now, not what it is planned to be.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infrastructure:

West Horsley does not have any of the infrastructure to support the development proposed. The village is small with few local facilities. There is currently just one shop at the southern end of the village, where local car parking is very limited. Most people in West Horsley already have to travel, largely by car, to East Horsley for their day to day shopping, banking and health needs. The existing car parking facilities in East Horsley are already at capacity and any increase in the local population will add to the already existing problems. Any new development would not “support the continued viability” of the existing village infrastructure, as has been noted by the GBC in the past. Key infrastructure issues include:

- Education that is already under strain;
- The East Horsley Medical Centre is already at capacity and serves both East and West Horsley and some other surrounding villages such as Clandon;
- The utilities infrastructure cannot be further stretched and water pressure is very poor across much of the village already;
- The existing road system is only appropriate for a semi-rural village, many of the roads are little more than lanes and pavements are often only on one side of a carriageway.

Any development will need immediate and considerable investment in infrastructure to support any increase in the village size.

In summary, whilst I accept that some housing development is required across the borough and West Horsley should take its fair share; at present the Local Plan proposes excessive development within West Horsley (in proportion much greater than other locations across the borough) the requirements for which have not been proven in any way. In addition the current proposals do not support sustainable development of the village and the amendment to the Greenbelt runs contrary to National Planning Policy.

As a result I am strongly opposed to the current Local Plan proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Whilst I am not opposed to new housing in West Horsley per se; the scale of this proposed development in West Horsley is excessive and as set out above not reflecting need in any way. In particular I am most strongly opposed to site A41. This site is critical to West Horsley’s semi-rural identity and character and it is vitally important that this open green aspect is maintained through what is, in so many ways, the centre of the village. Adoption of A41 would enable this open space to become the only development of any significant depth along the whole of the southern side of the East lane / The Street corridor and would severely compromise this ‘green gap’ between the northern and southern parts of West Horsley.

This is contrary to at least two of the five essential purposes of Green Belt as defined at NPPF paragraph 80 (namely to check unrestricted sprawl and to assist in safeguarding the countryside from encroachment – functions which this part of the Green Belt, including this site, is recognised as performing at paragraph 8.2 of the Guildford Green Belt and Countryside Study).

This site had not previously been include as a potential development site within previous draft versions of the emerging Local Plan and assessment of this site, in background studies forming the evidence base for this Site Allocation, is based on incorrect information.

Two key incorrect bases are:

1. In the Guildford Borough Land Availability Assessment (LAA) 2016 – Page 388 in respect of site reference 2063 (“the site of East Lane”) it states under ‘summary of land designations’ – “Green Belt adjoining settlement boundary”. This is incorrect. Unlike any of the other three sites proposed in West Horsley, this site currently has no boundary that adjoins the village Settlement boundary as defined in the GBC Local Plan 2003.

1. Also, The Guildford Borough Green Belt and Countryside Study produced by Pegasus Planning Group, Volume III – Appendix VI – Sustainability Walking Distance Plans for Land Surrounding the Villages refers to the above site, plus the field beyond that the Council now propose removing from the Green Belt (together with a section of Lollesworth Wood) as site D. All assumed walking paths to (i) Nearest Local Centre, (ii) Healthcare Facility and (iii) Railway Station are presuming that access could have been gained to Lollesworth Lane via the undesignated (save that it has been proposed to be removed from the Green Belt) field to the south and fronting Lollesworth Lane. This field is currently used for grazing sheep and is owned by Mr & Mrs. Richard Wills of Lollesworth Farm and they have advised me and others that they would not permit such access route across their field, therefore the assumption used by Pegasus Planning Group is incorrect and may well have a material effect on their conclusions.

Furthermore, any development on A41 would not be consistent with the distinctive settlement pattern of the village and the important relationship between the built environment and the surrounding landscape (i.e. development on one side of the route only). In my opinion, it will harm important views of the village from surrounding landscape (from Lollesworth Lane) and from within the village of local landmarks (of Lollesworth Wood), contrary to Policy D4 of the Proposed Local Plan.

Allocation of the site will not “promote sustainable patterns of development” and the wildlife / environmental amenity loss of this site is likely to result in a significant detriment to the village’s character. Furthermore it will cause harm to the biodiversity and natural environment of the adjoining Lollesworth Wood SNCI. Indeed, this is contrary to Sustainability Objective 1 of the Sustainability Appraisal framework set out at Table 4.1 of the Guildford Borough Local Plan Sustainability Appraisal.
Policy I4: Green and blue infrastructure; states that “Permission will not be granted for proposals that are likely to materially harm the nature conservation interests of local sites unless clear justification is provided that the need for development clearly outweighs the impact on biodiversity.” Local Sites are earlier defined in the policy as including Sites of Nature Conservation Importance (SNCI).

Furthermore, there is no reason at all for the amendment to the Greenbelt behind the field beyond site A41 other than to prepare for a potential second phase development in the next Local Plan and surely it cannot be considered justified by “exceptional circumstances” when no alternative use is currently proposed and its current and historic use is as pasture?

I strongly object to the alteration of the Greenbelt around A41 and the field beyond and to the inclusion of A41 in the Local Plan.

Across any of the adopted sites in West Horsley, careful consideration must be given to the proposed density of any future developments. The current proposed density is not appropriate for such rural and semi-rural village location and are out of character for the village as it currently largely comprises low density housing, with a considerable mix of ages and housing styles.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

Comment ID: PSLPP16/16466  Respondent: 15645057 / Julian and Clare Colborne-Baber  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to write regarding the proposed local plan such that my comments may be taken into account. I live in the village of West Horsley as you will be able to see from my address at the bottom of the email and as such my comments primarily relate to West Horsley.

**Greenbelt:**

My first objection to the Local Plan relates to the protection of the Greenbelt. I am absolutely opposed to the removal of some of the village from the Greenbelt through the extension of the settlement boundaries and the insetting. No Exceptional Circumstances or other relevant justification has been demonstrated to justify the new Greenbelt boundary in West Horsley. National planning policy requires that Green Belt boundaries are only amended in exceptional circumstances and that this must be undertaken as part of the Local Plan process. As such the proposal and Policy P2 is not in line with National Planning Guidelines. It is clear to me that it cannot be considered exceptional in order to facilitate the development put forward when a) The Guildford Borough Economic Strategy 2013-2031 makes no case for locating large numbers of homes in West Horsley (or neighbouring villages) (indeed the new economic development sites are located on the other side of the borough to West Horsley) and b) when the current proposals have given insufficient consideration of the use of brownfield sites within the borough (located much nearer centres of employment and supporting infrastructure). This is a key flaw in the Guildford Borough Submission Local Plan 2016 – proposing extensive development in locations remote from areas of employment and supporting infrastructure. The new housing should largely be allocated much nearer and around Guildford’s town and urban areas.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
Housing Need:

With respect to the housing need, I do not consider that the case regarding the need for the proposed number of houses in Guildford borough overall has been proven, indeed the target house building programme proposed represents a 25% increase in the housing stock of the borough, whilst we have been advised that the Office of national Statistics (ONS) projects a population increase of some 15% for the borough of Guildford over the same period. With respect to West Horsley specifically the number of new houses needed has not been proven and the Local Plan number for West Horsley is simply excessive. The scale of proposed development (in proportion far greater than other villages within the borough) does not reflect the need and fails to respect the local character and existing building density of the village. I am therefore strongly opposed to the current site allocation and housing densities proposed for all four sites in West Horsley.

Furthermore, in my opinion, the Proposed Submission Local Plan’s proposal to make provision for 62% of this total dwelling requirement on land that is currently Green Belt is not justified. The disproportionate burden of meeting what GBC has chosen to define as its development needs is also proposed to fall on the more rural east of the borough. Within this eastern area, West Horsley is then allocated to bear an excessive proportion of this proposed development, despite the numerous countervailing reasons put forward in previous consultation rounds by many local residents (e.g. narrow roads; areas of flood risk; access to both senior and junior school places; medical facilities, parking availability at the station, etc.) If adopted, the draft plan will put an unsustainable pressure on all local resources and infrastructure.

As I set out earlier on, the Guildford Borough Economic Strategy 2013 – 2031 made no such case for locating large numbers of residential units within West Horsley. I am strongly opposed to the borough housing targets set out in Policy S2.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to express my concerns over the proposed 2016 Draft Local Plan and the impact it will have on East and West Horsley and neighbouring villages. Whilst acknowledging that more housing does need to happen and our village should be prepared to "do its bit" I object to the scale of what is being proposed which makes it significantly disproportionate. Three grounds in particular I would like to continue to bring to your attention and specifically object to:

1 **Building on Green Belt Land** should only be permitted in highly exceptional circumstances.

2 The biggest two proposed developments just don't appear to have been thought through in terms of the necessary infrastructure (schools, medical facilities and parking)

3 **Flooding**: in recent years it is has been very evident that the drainage system cannot cope so building on land already adversely affected by flooding will only exacerbate the problem

I wish to register my objection please to the change in status of this site to C3 housing on the grounds as detailed well by Olive Edwards in her email below.

In addition I wish to raise that I have two young and we live in Scholars Walk - not a week goes by whereby we don't walk around enjoying the cathedral grounds. To lose that green open space would be a real loss to us personally as a family, forcing our children to play more in the streets which as a knock on effect would become less safe if we saw a significant increase in cars using Ridgemount.

**Policy A15 - land at Guildford Cathedral**

"This site was designated Protected Open Space in 2003 for good reason and I would say that it is even more important now to keep this area as a green space as every town needs to have several open spaces, particularly in light of current Government housing policy and the excessive degree of development in Guildford since that time.

A change of status would impact on the local community in terms of its local character, particularly for roads such as Ridgemount and Arlesford Road which currently have a semi rural feel to them as they are bounded by the ancient historic tithe hedge which forms part of the currently designated open space, as well as the visual quality of the site. The setting it provides for the Cathedral and the views of the Cathedral throughout Guildford as a whole ("a jewel in an emerald sea") will be irreparably damaged. I would therefore question the rationale for this change which seems to be based purely on the Cathedral's proposal to develop the site. It is evident that this site is not appropriate for building as due to its nature and
history of problems relating to subsidence and drainage, extensive piling would be required to accommodate any
development with consequent repercussions on neighbouring houses in roads such as Ridgemount, Arlesford Road,
Benbrick Road, Stag Hill, Scholars Walk etc. Furthermore the rainwater run-off from the site has caused drainage and
minor flooding issues, particularly affecting Ridgemount, which would be exacerbated by further development. It would
seem that the reason for change of status is political rather than based on the suitability of the site for housing, which it is
plainly not.

There is a well-documented major traffic problem in this area already which is only going to be made worse by the current
proposals for development of Guildford Park Car Park and Guildford Station. The addition of 100 houses on the Cathedral
hill site will add in excess of 100 vehicles to this already problematic scenario as well as having wider implications for the
immediate infrastructure of the neighbourhood.

In view of the vote to leave the European Union the housing need for Guildford is likely to change in the near future and
alteration of the current status of the site in question may well turn out to be a hasty decision to be later repented at leisure.

In summary I object to the change in status of this site to C3 housing on the grounds that it is inappropriate for development
due its nature and any development would have a negative impact on the surrounding community both in terms of impact
on the setting of the cathedral and the local infrastructure. I sincerely hope that you will take these points into
consideration during your deliberations on the status of the Cathedral hill site.”

I object to all erosion of the green belt.
I object to the “in setting” of any villages from the green belt as these villages are crucial to our rural way of life and building on the scale planned would destroy village life as we know it today.

I object to the disproportionate amount of development in this area of the borough.
I would urge you to re-think your strategy and not damage this beautiful part of our country where true village life means so much.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

I and my wife write to make points on the proposed Draft Guildford Local Plan.
The following are my thoughts, comments and objections to the Draft Guildford Local Plan:

1. The plan is based upon a supposition of a need for a 25% increase in housing by 2033 across Guildford Borough, which is not based on any fact, just assumptions which have been arrived at by questionable means.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. The proposed removal of villages from the green belt should only be undertaken in exceptional circumstances and there is no reason why GBC should unilaterally decide which villages should be inset from the green belt and make up their own 'exceptional circumstances'. No exceptional circumstances have occurred to remove West Horsley from the green belt as it has an open character and is historically important with many listed buildings, extensive wildlife and important countryside.
2. The infrastructure of West Horsley is already strained and stretched, including: drainage, schooling, medical facilities, road network, nursery places, sewers, risk of flooding, parking and rail transportation.
3. The extension of the settlement boundaries are simply not well thought thought and appear only to enable GBC to meet the expectations it is itself setting.
4. There are some sensible suggestions to utilise existing sites for new homes (Thatcher's hotel and Bell & Colvill), but this can not be undertaken without investment in infrastructure which is already poor.
5. The suggestion that Station Parade in East Horsley is a 'District Centre' is frankly farcical when the definition is read - it is just a small village street with a handful of shops, estate agents and a bank.
6. The Horsleys and immediate surrounding area seem to have a disproportionate level of proposed housing, with complete disregard for the green belt - this includes the suggested new settlement at Ockham (the former Wisley airfield).
7. Transportation via rail into London is already overcrowded with full station car parks and vehicle congestion at the station.

My wife and I feel very strongly that this whole draft GBC Local plan has been poorly thought through and has not been revised to any real extent since the last proposal.

We both oppose it due to the reasons laid out above. Housing is needed, and should be provided, but needs to be accompanied by significant infrastructure investment and there are many suitable sites across the whole of the Borough, including in the Horsleys that do not mean the removal of the green belt.

The housing number of 693 is far too high. The SHMA calculations on how this number was reached have not been provided (and we have been asking for two years). Nobody in the council has checked it (or that is what the council have told us). Resident cannot check the calculation as GBC have refused to provide it. We are taking the number on trust from a company called GLHearn who represent developers, and boast on their website they solve developer problems. Constraints on the housing number NEED to be applied as allowed but have not been. Guildford is 89% Greenbelt, 44% Area of Outstanding Natural Beauty, yet our roads are gridlocked and that is TODAY. This plan will not fix that just make it worse that is 14000 houses at 2 cars per house... on our roads extra!

The transport evidence is very weak and major transport issues are unresolved e.g. another river crossing in the town, a central bus depot.

Brownfield opportunities are being ignored, or assigned elsewhere – we need more homes in the town centre (not 40% more shops), and much more accommodation on campus for students, and homes for the elderly to free up family houses. The University needs to build the student accommodation it promised in 2003. The University impact needs to be allowed for and managed in this plan.

Please find below comments with regards to the proposed Guildford Local Plan, particularly with reference to the Horsley area.

**Removal of Horsley and other villages from the Green Belt**

I object in the strongest terms to this proposal.

The Green Belt is designed to prevent urban sprawl and in particular to prevent the spread of London into its surrounding areas.

The proposed removal of this essential protection from the key villages surrounding Guildford, will enable the loss of their unique character and enable them to expand into small towns, which will in turn create the feeling of significantly larger built up areas spreading out from London into its surrounding countryside.

This will significantly change the unique character of both the local villages themselves as well as the broader character of the Surrey area between Guildford and the M25.

The scale of development in this area as proposed in the Local Plan, with around 5,000 new homes highlighted for development in this stretch of Surrey, clearly indicates the desired direction of travel should this unique protection be removed. Once this essential protection is removed, it will also open up the path for further large scale developments in this part of our beautiful country in future years.

The Green Belt policy requires 'exceptional circumstances' to be proven before these areas can be removed from the policy and these exceptional circumstances have not been demonstrated within the plan.

This part of the plan should therefore be removed.

**Extension to the Settlement boundaries of the Horsleys**

Extending the settlement areas would also have the effect of expanding the size of the villages, contributing to the overall feeing of urban sprawl in Surrey.

**Scale of proposed development in the Horsley Area - impact on character and infrastructure**

I understand the need for further housebuilding in the South East.

However, this needs to be done with respect to the character of our local communities.

I do object the the scale of the development proposed for the Horsley area as this will have a significant impact on the character of the villages, the infrastructure - especially the roads, the schools and other amenities.

Our roads are already overloaded - for example access in the morning and evening to the M25 via the A3, the M25 itself, the A3 through Guildford. Access from Ockham Road South to the A246 in East Horsley is at best difficult, at worst dangerous each morning and evening. Traffic density makes it impossible for our children to ride on bicycles safely through the village.

Our schools are full and demand is predicted to increase further. Whilst there may be provision in the plan for further schools, there are no guarantees that these additional places will be created before the additional houses are built.

Other amenities will be put under sever strain by the plan, whilst at the same time local government spending has been tightened as a result of tough fiscal constraints by central government.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Scale of development at Wisley Airfield**

Priority is given within the plan to the development of brownfield sites, of which Wisley is one. My objection is not about the development of the site as such, but more to do with the scale of the proposed development. As mentioned above, the A3 / M25 interchange and M25 itself are at gridlock in the morning. The proposal to add this number of additional dwellings next to this interchange will only make matters significantly worse. Furthermore the impact of this number of houses on the other amenities and infrastructure within the area will be highly significant. A smaller, more reasonably sized or lower density development would reduce this impact to more manageable levels. This is particularly relevant when taken in conjunction with the proposed 2,000 houses for the Gosden Hill Farm and 400 at Burnt Common, just up the A3.

So in summary, the plan in its current format, would significantly impact the character of Horsley and its surrounding areas and well as have a damaging affect on its roads, schools and other amenities.

The plan needs to be revised to take a more balanced view between the need for further housing in the area and the hugely negative impact it will have on Horsley and its surrounding areas.

I urge, in the strongest possible terms that the Council and its elected representatives review the plan accordingly. **Most importantly, it is essential that the proposal to remove Horsley and surrounding villages from the Green Belt be removed.**

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have seen the recent plans for expansion of housing in East Horsley and surrounding areas, and have serious objections over the proposed plans. I struggle to accept that all the proposed areas in this draft plan would not severely negatively impact our village, its community and facilities.

I moved into this area because I wished my family to move into a village community. I do not wish for it to now become a town. The local amenities are only just enough to support the current village community - I have deep concerns about the lack of amenities being proposed to support such a large increase in housing. being schools, roads, drainage, trains, parking, to name a few. Even if these were to be improved to cater for a larger population, it will change the whole essence of living the village.

The land adjacent to my house (Weston Lea, area 1275) is currently used by our children's primary school, The Raleigh, for sports. Are we to assume the facilities for the local primary school are to be decreased to make way for more housing?! I would have thought it wiser to try to increase the school facilities, not the opposite!

In addition, I believe the land is currently left free to allow itself for being used as a flood plain. If housing is allowed in this area, I would need confirmation that any flood damage would be insured for and compensated for by the council, if it in any way impacted my house.

In summary I object to the following key issues:

1) **Schooling** - the current primary school is already over subscribed - I cannot see sufficient measures to support the increase in number of children that will need schooling in this area. This is also true of secondary schools - the Howard of Effingham School is also at capacity.

2) **Flood risk** - the flooding and surface water levels in this area are already of serious concern, and more housing will obviously seriously exacerbate this problem. I do not see sufficient measures are being proposed to address this.

3) **Medical Facilities** - again, already at capacity for this village - what measures are being taken to increase this facility?

4) **Transport, roads, parking** - the train service from Horsley would need to vastly improve, longer trains, more frequent trains, more parking for commuters. With a possible 6000 additional cars frequenting the local roads, the impact on roads and parking will be tremendous. The parking for the local shops, medial centre, & village hall will be over stretched. The roads are already in such poor condition that the increase in traffic will only make this worse. It looks from the plans in the SCC report that "further thought may be required to managing traffic" - this is an absolute necessity, not an afterthought!

I hope you can consider these objections, and come to the logical conclusion that this Draft Plan is insufficiently prepared, and cannot realistically be condoned, as it will have a huge negative impact on the local area in both short and longer term.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In respect of the 2016 Local Plan public consultation I, Matthew Sarti make the following comments.

1. I OBJECT to the 2016 local plan in its current format. I do not believe that it is sound and is not yet fit for implementation.

a) The council relies on a strategic housing making assessment that is in question. The council have not scrutinised the figure provided and rely purely on the fact that other councils have used the consultant GL Hern to assess the housing need. The SHMA appears to be exaggerated against ONS data. Two independent reviews have identified similar faults, which suggest that the figure is too high and inaccurate. They also identify that the recent referendum result relating to Europe may have an impact on economic growth and consequently should be reviewed. The objectively assessed need (OAN) upon which the council housing figures are based on the SHMA, until this is properly reviewed the numbers are unacceptable.

b) The council have chosen not to impose any constraints in respect of the OAN.

1. The Council have rightly identified that the borough has 89% greenbelt but has chosen not to consider this as a constraint. Approximately 65% of new development within the borough is proposed within the greenbelt.

2. The council appropriately identifies that the enhancement of the A3 is essential to the scale of development possible within the local plan. Page 21 Strategy and sites states 'The delivery of housing in the later stages of the plan period is dependent upon major improvement to the A3 through Guildford'. Highways England have made no commitment to improve the A3 and yet the local plan still seeks to deliver the full housing target through the delivery of three of its four strategic sites sighted directly beside the A3. The transport survey also highlights that traffic will be impacted and congestion worsened irrespective of what improvement measures are put in place.

c) Several aspects have not been fully considered prior to its publication for consultation. One example is the recent proposal by the Raleigh school to move sites and build a larger school to meet the needs of the community. This is much needed but failing to include it within the local plan has prevented early and effective consultation on the sites with clear information on what they will include and the potential for provision of proper and essential infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the use of the ‘Green belt and countryside study 2014’ within the evidence base. This is a subjective view of the green belt provided by one company, It is not evidence. It does not provide exceptional circumstances to remove land from the green belt. It was first commissioned without reference to councillors and has not been subject to full scrutiny due to its size and the time necessary to do so.

2. I OBJECT to the use of the transport study within the evidence base. The SINTRAM model is designed for major routes and is not suitable for local roads as it takes no account of junctions. The three hour period also skews the data disproportionately downwards. This means that it will not necessarily provide a true reflection of traffic movement within Guildford. A different model should be used and the peak times adjusted to accurately reflect traffic, particularly within rural areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

15. OBJECT to the fact that the Local plan does not effectively demonstrate proposals to improve road and networks to accommodate the additional vehicles likely to travel through the borough. The transport strategy includes policies that are non specific and untested.

a) LRN7 intends to introduce interventions to address potential highway performance issues resulting from the development of Wisley airfield. If these are those put forward by the developers they are likely to have a significant negative impact on East and West Horsley, or any traffic travelling to or through even without additional housing.

b) LRN22 East and West Horsley traffic management and environmental improvement scheme is non specific and the suggested £1m is insufficient to deal with the substantial traffic increase likely if all aspects of the local plan are allowed. The Horleys are serviced by roads that are effectively single track roads with pinch points that allow only one vehicle to pass at at least one point. It also suffers with flooding causing several roads to be closed at least once a year during heavy rain.

1. I OBJECT to the fact that the transport plan uses mitigation suggested by developers as its policy to deal with public transport and sustainability without absolute guarantees that they are deliverable.

a) BT2 and BT3 relating to Wisley airfield were in dispute at the point of their planning application.
b) AM3 Offsite cycle network from the land at the former Wisley airfield to key destinations was proposed but recognised by the planning committee as being inappropriate due to the distances involved, the speed of traffic and narrowness of roads and footways. These roads are not suitable for average user to commute on a regular basis. Its inclusion is misleading.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of A25 Gosden Hill Farm development within the local plan. This development is within the Green Belt and no exceptional circumstances are evidenced. It also reportedly relies on the new Guildford East station to prove sustainability. Network Rail have not commissioned or agreed to developing or servicing this. The site will have a significant impact on the A3, which the Council notes to be a potential blocker to achieving the local plan in its entirety. It will also have a devastating affect on Burpham, which already struggles with too much traffic and congestion.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of A35 Wisley airfield in the local plan. The principle of the local plan is a presumption in favour of sustainable development. The Housing and Planning Act 2016 grants permission in principle to any development included within the local plan leaving only technical details to be considered by planning authorities. The site at Wisley failed in its planning application on a large number of points including infrastructure and sustainability. It is highly unlikely that these will be met in the future due to its positioning. Part of the site is green belt and no exceptional circumstances have been demonstrated. Aspects of the site also include high quality agricultural land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A41

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of Policy A41 relating to land south of East Lane. This is in contravention of para 85 NPPF which states that borders must clear and readily recognised. The natural border is the wood to its east. The inclusion of this site is out of kilter with the current settlement and character of the village; houses front East Lane up the woods to the east of this site which borders the road for approximately 400 yards. The land is green belt, no exceptional circumstances are made.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Garlicks Arch development A43, which will place unnecessary strain on local infrastructure and has not demonstrated exceptional circumstances to alter the green belt. The site also includes ancient woodland, is subject to flooding and currently supports the rural economy through small businesses. It will particularly increase traffic through West Clandon accessing the A3 and M25. This site is billed as being an enabling site due to its potential to provide an on and off slip for the A3 north and southbound respectively. This has not been agreed by Highways England, may not be in the best location and will not be progressed until some time after Garlick's Arch has been developed due to the finances required, thus impacting on the road network substantially.

| 1. I object to the inclusion of policy A46 Normandy/Flexford within the local plan. The site is green belt, the number of houses appears disproportionate to the area itself. The only exceptional circumstances that could apply to this site is the building of a school, however this would be predicated on the basis of a housing number that may be incorrect and should be subject to constraints including building on green belt itself. |

| 1. I OBJECT to the fact that there is no provision for a larger primary school within East or West Horsley despite the fact that Para 38 NPPF states that for large developments a primary school should be built within walking distance. Over 500 houses within East and West Horsley is large development when considering the size of the villages. The Surrey infrastructure review does not state that a new school is necessary despite the fact that the school is already oversubscribed causing children to be driven to other villages. (They do state the school may in the future identify a suitable site through infill opportunities). Surrey have suggested that children from the Horsleys can be accommodated either in Ripley or Clandon; both of which would necessitate parents driving, and in the case of Ripley travelling through a traffic blackspot. |

Comment ID: PSLPA16/4023   Respondent: 15649601 / Laura Bushnell   Agent: 

Page 1054 of 2988
I strongly object to the removal of both the Horsleys and other surrounding villages from the Green Belt. The primary purpose of greenbelt land is to prevent urban sprawl surrounding large urban centres. There are already near continuous buildings stretching from the City of London to Effingham Junction and it seems only reasonable to conclude that with the proposed rate of development and the removal of Green Belt status, this will extend to Guildford and beyond, thus removing the beautiful surrounding countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I support Policy E5 on the rural economy in favour of and while strongly objecting to Policies E8 and E9 on new District and Rural Centres. Proposals to make East Horsley Station Parade a District Centre as well as Bishopsmead Parade a Rural Centre are completely inappropriate for the local small village which should not be expanded. I understand the plans are to ensure economic resilience however proposals within Policy E5 for better broadband and mobile phone coverage, agricultural diversification and to support sustainable growth of appropriate scale for all businesses in compliance with green belt policy are far more sustainable options which are place-appropriate. This is provided Horsley, as well as many other villages, stay within the Greenbelt as I strongly object to Policy P2. Policy E8 proposes consideration of sites on the edge of district centres for town centre uses to which I strongly object, as it opens up further expansion possibilities in the future, pathing the way for further housing plans outside in the countryside. Such expansion is creeping urbanization, damaging to the Green Belt as well as to Guildford’s thriving urban hub. Past expansion of suburbs both in London in the mid-20th century as well as American cities demonstrate how suburbanisation and consequent urban flight contributes to urban decay. The council has no business facilitating new supermarkets in the Green Belt as retail capacity should be left to local demand. Meanwhile the policy does not show any support for existing rural shops and services which are fundamental to the village communities which would be put at a disadvantage if these proposals were to go ahead. I object to Policy E9’s proposals for retail development adjacent to rural centres such as Bishopsmead Parade, especially when just down the road is proposed to become a District Centre (Station Parade), as well as neighbouring Effingham and beautiful village Shere. Expansion in Shere would be detrimental to its tourist industry as well as site locations for various tv and filming, chosen for its stunning scenery and ‘typically British’ quiet country village community location. Such locations are becoming rare to find in the South East of England and it is a popular location for both Londoners for a day out as well as people from across the world. It would be a great shame to lose this beauty and for the local people who rely on the income generated from tourism in the area.

In addition to my aforementioned objection to site reference A36, I also object to any significant increase in the number of villages of East and West Horsley or in the surrounding neighbourhoods. In particular, I object to the proposal of 2,000
homes at former Wisley Airfield (Ref A35) and the further 2,000 homes at Gosden Hill Farm (Ref A25). These two sites will cause huge further pressures on the Horsley villages and I do not believe the villages are capable of supporting and withstanding such pressures including on the road system, rail network, parking, flooding, drainage infrastructure, facilities such as the medical centre, dentists and chemists which are already very busy, local schools and many more. Therefore, I object to Policy S1 in that it fails to recognise that development in rural areas, with inadequate transport and other infrastructure, cannot cope with the proposed scale of development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7493  Respondent: 15649601 / Laura Bushnell  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In addition, the open space naturally enhances the beautiful landscapes and preserves the unique character of smaller historic towns and local landmarks. The Guildford Borough Council’s Draft Local Plan seems in danger of destroying the character of historic villages such as Shere, National trust properties such as Hatchlands and local landmarks such as Horsley towers, to name only a few. I particularly object to the site at Thatcher’s Hotel (Ref A36) due to the proximity to the beautiful local landmark of Horsley towers and the preservation area surrounding it.

Attached documents:

Comment ID: PSLPP16/16872  Respondent: 15649601 / Laura Bushnell  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy D3 on historical environments. The policy is in contradiction to the idea of preserving our heritage and history, instead pledging to “support development” that might “enhance” sites of historical value, leaving room for commercial abuse and financial leveraging. This appears to put economic value over sentimental value, which is important in maintaining a sense of community. The site at Thatcher’s Hotel (Ref A36), for example, intrudes on the setting of Horsley Towers, a valuable site of local heritage.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy D4 on Urban Development. The proposed supply for affordable housing is not meeting the demand where it is needed the most: in urban areas. Social housing is needed where there is a greater concentration of low paid workers such as those employed in the retail, warehousing and distribution sectors nearby. Instead the Draft Local Plan focuses on building homes on greenfield sites over regeneration of urban areas with 8,086 new houses planned for the Green Belt, but only 1,135 for Guildford urban area. This fails to meet the housing needs within the town and is unsustainable as it leads to increased road traffic into town centres.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Increased pollution

The Green Belt acts as a physical barrier between the urban areas and the countryside, resulting in improved air quality in urban centres and the loss of such valuable green spaces will lead to the irreversible loss of a carbon sink for air pollution. In addition, the proposed number of houses will inevitably lead to a significant increase in the volume of traffic, increasing the levels of nitrogen dioxide and particulates in the environment, hence exacerbating an area of concern already present in several areas of the Borough.

In addition to my objection to site reference A36 as mentioned above, I also object to any significant increase in the number of dwellings in the villages of East and West Horsley or in the surrounding neighbourhoods. In particular, I object to the proposal of 2,000 homes at former Wisley airfield (Ref A35) and the further 2,000 homes at Gosden Hill Farm (Ref A25). These two sites will cause huge pressures on the Horsley villages and I do not believe the villages are capable of supporting and withstanding such pressures. My concerns are outlined below:

Pressure on road system

The roads in the villages of East and West Horsley are currently not maintained to a desirable standard. Hence, it seems reasonable to anticipate that any increase on the current number of users could only cause these stretches of road to deteriorate more rapidly. With the proposal of large nearby sites such as A35 and A25 as well as many new developments within the villages themselves, many of the roads could be required to take on hundreds of new users. Many of these roads are narrow and often in poor condition and hence heavy traffic and large vehicles, such as lorries or tractors, will cause these roads to become congested and dangerous. Furthermore, there are often narrow or non-existent stretches of pavement along many of these roads which will become even more dangerous for all users, in particular the elderly, wheelchair users and pushchairs. In the majority of cases, there is no potential to expand these roads or pavements.

Pressure on rail network

As a commuter to London, I have experienced many overfilled trains at peak times and hence an increase in the commuter population could only exacerbate this problem.

Pressure on parking

Parking at Horsley and Effingham Junction stations is already at capacity at peak times with the current number of users and so a significant increase in users is likely to heighten this problem. Additionally, there will be further strain on the parking at the shops, medical centre and village hall in the centre of East Horsley. There are many elderly residents in both villages and it is of great concern to me that they may not be able to access parking spaces sufficiently close to the services they require with this increase in demand.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have outlined below some of my main concerns regarding the removal of Green Belt status from the proposed villages:

Loss of valuable open space

I object to the loss of open space which will result from the Countryside, Green Belt and Surrey Hills Area of Outstanding Natural Beauty (AONB) policies. Access to open space provides numerous educational and recreational activities and hence the loss of such land will lead to the irreversible loss of rural leisure and tourism amenities, profitable film locations and room for public facilities such as parks and burial grounds. The numerous beautiful open spaces in the area have led to it becoming one of the most popular areas of the country for road and off-road cycling, even attracting events such as the annual Prudential RideLondon and the 2012 London Olympics. These events, as well as many further small-scale cycle events demonstrate the popularity of this area as being both rural and accessible from London and they contribute hugely to the local economy. The loss of open land in this area could therefore be detrimental to this and many similar recreational activities, forcing people to go further out from London or Guildford to find the open space they desire.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16681  Respondent: 15649601 / Laura Bushnell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Negative impact on wildlife and biodiversity

Building on the Green Belt will inevitably lead to an irreversible reduction in biodiversity and due to the proximity to the Surrey Hills AONB, this should be a major cause for concern. Many species, such as the Dartford Warbler and Red Kite, currently found in this area are already highly vulnerable and therefore the loss of greenbelt land as well as the increased volume of people and traffic will only worsen this. In addition, a significant increase in the human population will inevitably lead to an increase in the predatory cat population which will cause further losses amongst these species.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/16874  Respondent: 15649601 / Laura Bushnell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy P1 on Areas of Outstanding Natural Beauty. The proposal significantly weakens protection of the AONB and the AGLV from the previous draft plan. Access to open space provides great educational and recreational value and therefore, the loss of such land will lead to the irreversible loss of rural leisure and tourism amenities. The natural beauty of the area have led it to become one of the most popular in the country for road and off-road cycling, even attracting events such as the annual Prudential Ride London, Tour of England and the 2012 Olympics. Events such as these demonstrate the of this area as being both rural and accessible from London and they contribute hugely to the local economy. Hence, the loss of open space would be fatal to this and many similar recreational activities, forcing people further out from London or Guildford. The wording of the proposal makes it available to abuse from developers keen to use it to their advantage, and to our disadvantage. Proposals to consider developments on an individual basis almost encourages development applications. I would like a guarantee for further protection of the candidate areas for AONB status in the forthcoming Surrey Hills AONB Boundary Review.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I strongly object to Policy P2 on the Green Belt. I am extremely disappointed to hear that my local area, Horsley, as well as many surrounding villages will be removed from the Green Belt. The primary reasoning behind the greenbelt land is to prevent further urbanization surrounding large centres for many reasons, including environmental as well as economic. Near continuous urban sprawl stretches from the City of London to Effingham Junction already, so it seems only reasonable to conclude that with the proposed rate of development and removal of Green Belt protection that this will only keep spreading. Is there other land elsewhere that is to be added to the Greenbelt to be protected from this creeping urbanization? Or will the Greenbelt simply shrink until it no longer exists? When will the people living in that land get to the time when they will have to write objections, as I am now, to protect and save their local area?

Indeed, the Green Belt constitutes 89% of the borough and should be the foundation of all local planning policy, yet support for it is half-hearted at best. It is not only beneficial to our borough but to Londoners and the country too, so it is important to consider the wider consequences as well. Once it is gone, it is gone forever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I wish to object to some aspects of Guildford Borough Council’s new Draft Local Plan and have outlined some of my concerns below. My primary objection is to the fact that 65% of new houses in the Borough are to be built on land that is currently in the Green Belt. Furthermore, I am disappointed to learn that the comments made with regard to the 2014 Draft have not been taken into consideration, as evidenced by the fact that the number of planned houses has risen from 652 to 693 per year over the next 20 years.

One of the main benefits of the Green Belt is to force better land use within the urban areas surrounded by greenbelt land, as developments in the Green Belt should only be accepted in rare circumstances. However, since 8,086 new houses are planned for the Green Belt but only 1,135 for Guildford urban area, I am not convinced that Guildford Borough Council have demonstrated that they have maximised the potential of Guildford urban area, thus I cannot see the necessity for the irreversible loss of the greenbelt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16871  Respondent: 15649601 / Laura Bushnell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to some aspects of Guildford Borough Council’s new Draft Local Plan, to which I have outlined below.

My main objection is to the fact that 65% of the new houses planned are to be on land under current Green Belt protection which should not be lost. Additionally, I am very disappointed that the comments made in regard to the 2014 draft have not been taken into account, as evidenced by the fact that the number of planned houses has risen from 652 to 693 a year over the next 20 years.

While I agree that sustainable development is of fundamental importance, the Councils proposals for sustainability through a focus on CCHP in Policy D2 are simply not enough to compensate for the consequent traffic generation and carbon dioxide emissions from building 650 new homes a year in the Borough, with 1,500 people who will need transport in such an environment in the Horsleys alone which encourages this increased car usage. Not only will increased traffic increase carbon dioxide emissions, increased waste generation, deforestation, energy usage within homes and new District and Rural Centres (Proposals E8 and E9) will lead to greater greenhouse gas emissions. The Green Belt is also important environmentally for its location surrounding London, as it acts as a physical barrier resulting in improved air quality within the urban centre. With considerable note of Areas of Outstanding Natural Beauty within Guildford Borough, our local ecosystems and wildlife will suffer irreversible damage through reduction in biodiversity. Many species currently found in this area, such as the Dartford Warbler and Red Kite, are already at high risk and therefore the loss of the Green Belt land, combined with urban sprawl will lead to even further loses amongst these species. Of particular local concern is the site at Thatcher’s Hotel (Ref A36), directly adjacent to Horsley Towers conservation area. With more people near the conservation area, trampling, pollution and litter, to name a few, are serious threats to the habitats and local wildlife living there.

- It is a matter of choice by our Council that it is proposed that Guildford would expand on this scale. Some sensitive measured development probably would be supported but the scale of what is proposed in the Plan is far from that. Why have the Council not constrained the numbers?
- There seems to be a conflict of interest with the company which provided the details on which the Plan is based as they have connections with developers who have an interest in the flawed conclusions which are being drawn.
- It is not clear why the Councillors have made a political choice to open the floodgates to expand Guildford on the damaging scale proposed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

- Transport evidence is not yet fit for use and major transport issues are unresolved, e.g. another river crossing, a central bus facility.
- Even if all the proposed highway improvements in the Plan were built, congestion would not improve. There would simply be a lot more people stuck in traffic. Traffic would get a great deal worse with more traffic from the major development sites coming in on the Epsom Road and London Road.
- Central routes being closed to through traffic, pedestrianised or used for development would make central roads busier than ever.

Any development at "Gosden Hill Farm" needs a 4 way interchange on the A3 road, close to Burpham's slip road, this is planned from 2021 but is out of kilter with an aspirational "Guildford Tunnel" which if done is likely to be in this area, will not be delivered until 2023 -2027; so there will be a period of intense traffic overload in Burpham.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Normandy and Flexford
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford Borough Council Local Plan sites A46 and A47

I am writing to protest against the suggested large scale housing developments in Flexford and Normandy. The present population of Normandy at the 2011 census was 2981 and the proposed large scale developments double the population. I believe Normandy would no longer be a village and would become a commuter suburb of Guildford without its own identity.

I think the proposal to build over 1,000 houses will ultimately prove to be an embarrassing mistake that will incur substantial costs to rectify. I understand you require supporting rationale and while my thoughts may be similar to other Normandy residents, this is only because we share the same opinions.

My first concern is the proposal to build a secondary school as I don’t believe there is a need. I understand other secondary schools in the local area have spare capacity and are willing to expand, should future needs require greater capacity. Under capacity schools don’t appear to be a good use of limited funds and I’m not convinced they would provide the best education for the children. I understand schools work on local catchment areas but parents request places for their children based upon good school reputation, facilities, safety and a whole range of other criteria.

Linked to the provision of a new school would be the access and additional traffic on the local roads. Glaziers Lane and Westwood Lanes are both “lanes” and are fairly narrow “c” category with a railway line crossing either over or under the road. Westwood Lane has a low bridge with a height restriction that cannot accommodate double decker buses or high sided lorries. Traffic is also limited to one vehicle at a time and traffic accidents affecting rail bridges have a detrimental effect on rail traffic.

Glaziers Lane has a road bridge over the railway with a bend on its apex where you cannot see vehicles approaching until either of you reach the top. Increasing traffic volumes will increase the likelihood of road traffic accidents and again these could affect the Reading to Gatwick railway line. I believe this railway bridge has just been repaired after cracking caused by heavy vehicles travelling over it.

I assume the roads would need to be widened and upgraded to accommodate the increased traffic, I don’t know whether this would be possible where the railway crosses the roads or whether this just creates pinch points.

The Guildford Road to the North of the proposed site is currently busy and there is already congestion if there is an accident on either the A31 Hogs Back or the A3. There is also congestion where parents take their children to school by car and when road works are necessary. Adding a secondary school, let alone 1,100 houses will cause daily congestion, further road traffic accidents and serious injuries. Recently a motorcyclist lost his life near to the church hall where flowers and candles are a constant memorial.

I work for a local insurance company that pays millions of pound per year following serious flooding and the Normandy site already has issues without a substantial new development. The soil doesn’t drain well and there is already a stream that runs East/West across the site. I know through my work that new housing has ensuite, bathrooms and downstairs toilets. I also know that concrete foundations, access roads and paved driveways add to surface water run off that will overload the existing drainage and sewerage systems. This is already a local problem but should the flooding deteriorate, this could affect property prices and the availability of affordable insurance. Whether residents would seek compensation from the Council for their financial losses would depend upon individual circumstances.

The water supply and drainage services would need to be upgraded as would the electric supplies as most of Normandy has overhead power lines. We are subject to frequent power cuts during stormy weather and while the developments planned would probably have underground cabling the electricity supply would still be unreliable unless the rest of the village...
overhead lines were replaced. To upgrade the electricity supply by underground cabling would be a very major and costly project.

I am no expert on the local wildlife although I understand Normandy is situated in the Green Belt with ancient woodland and grassland areas within the village boundaries. Surveys have revealed a diverse ecology and a large scale development would destroy many species as well as removing vital “green corridors” needed by the animals. I am told that both A46 and A47 sites have populations of hedgehogs, foxes, badgers, water voles, little owls, yellow hammers, sparrow hawks, fieldfares, red kites, slow worms, adders, grass snakes, frogs, toads, great crested newts, as well as many more common species like robin, sparrows, blue-tits, great tits, coal tits, starlings, blackbirds, collared doves, wood pigeons, house martins. Only last night I watched a couple of bats flying and feeding in my back garden.

I also understand Normandy Common and Normandy Pond are designated as SNCI areas so it would be irresponsible and irreversible if we were to lose our fauna and flora. It would also remove part of our green and pleasant land where villagers enjoy walking, relaxing and unwinding after a busy and stressful day at work.

I acknowledge the need to build more housing to meet the need of the population and am not against utilising brown-fill sites or very small scale developments. However, I must object strongly to the large scale developments planned for Normandy and Flexford for the reasons already given. It is simply not the right location for a development anywhere near this size.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

1. The Council was entitled to consider constraints before determining the housing number. I believe that as well as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as well as infrastructure (most notably roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

1. Having properly applied constraints if there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the Plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A25 Gosden Hill Farm.

1. The Green Belt at this point serves the important function of separating the parish of West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce, defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and the houses along The Street in West Clandon (owned by the same developer as Gosden Hill Farm) will come under enormous pressure. Since the 2014 Draft Plan was withdrawn, the area under consideration has been enlarged in the direction of West Clandon.

1. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a slip road provision at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
1. The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

1. The development will overburden the local road network and increase congestion on the A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A-road. In places it is under 5m wide and too narrow for two lorries to pass causing them to mount the pavement (see also below).

1. I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon-a road which is already under traffic stress (see also below) and which Surrey County Council say cannot be improved.

I object to Policy A43 and A43a on Garlick’s Arch.

This site had been previously considered and rejected before the previous draft of the Plan. The site was then inserted in the Draft Plan only hours before its publication without any consultation. I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site. This is a cavalier approach to public engagement by the Council.

1. The site is not a sustainable site, being far from any infrastructure facilities and transport links. The bus service is infrequent and future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

1. The site is susceptible to flooding and development will cause harm to the ancient woodland on and near the site. See my comment on Policy P4 above.

1. The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

1. The Council appears to view the development as an enabling site to obtain land and developer funding for slip roads on/off the A3. This is not an exceptional circumstance to justify taking Green Belt land. The slip road land if needed could be safeguarded in the Plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so
called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential, Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

1. The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A-road. In places it is too narrow for two lorries to pass causing them to mount the pavement, often at speed. (During the last week of the consultation period of this Plan, a resident of West Clandon had his car written off by a negligent car driver coming the other way and occupying 2/3 of the road at an obvious pinch point which is typically littered with broken wing mirrors.) It has narrow bends with poor sight lines, a primary school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for cyclists and pedestrians.

1. Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford. There is vague talk in the plan of link roads between Gosden Hill and Garlick’s Arch, all meeting at an enlarged A3 intersection at Burnt Common. The existing intersection is unlit and is accident prone. Adding two or three slip or feeder roads at this point will add to the confusion and public danger.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets. Taken together with the current Council policy of “sweating assets” I fear this policy leaves too much room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16775  Respondent: 15650369 / Stephanie Dean  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4
**POLICY D4 - Development in urban areas and inset villages**

I object to this policy on the following grounds:

1. The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt, and the per person infrastructure investment can be reduced, e.g. fewer pavements, sewers, utility ducting per household than in the open countryside. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development. Living in a town with good access to public transport reduces the desire for personal transportation.

2. The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately and is not sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/16769  **Respondent:** 15650369 / Stephanie Dean  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

**POLICY E1 - Meeting employment needs**

I object to this policy for the following reasons.

1. I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

1. The site is in any event subject to frequent flooding and contains ancient woodland and is unsuitable for development.
1. **I object** to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3, an area which already sees severe congestion at both ends of the working day, often tripling journey times through the area.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** PSLPP16/16770  **Respondent:** 15650369 / Stephanie Dean  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY E2 - Location for new employment floorspace**

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** PSLPP16/16771  **Respondent:** 15650369 / Stephanie Dean  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY E5 Rural Economy

I object to the loss of rural employment implicit in this draft plan. Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E6 - The leisure and visitor experience

I object to this policy. The policy should acknowledge that much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly, the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example, the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attraction. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16773  Respondent: 15650369 / Stephanie Dean  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to this policy on the grounds of its weak and ineffective wording.

- The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force and possibly deliberately vague. These principles should be explicit in the statement of policy.
- There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development in, for example the Walnut Tree Close /Woodbridge Meadows area, where very significant numbers of new homes could be provided, and in several of the existing surface car parks which are not included in the Plan. Such town centre sites could meet much of the housing need over the Plan period without harming the countryside.
- There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.
- The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.
- The policy also fails to provide guidance on design requirements, as required by the NPPF.
- The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores, and ignores the trend towards increased on-line shopping from said chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers, making shopping in Guildford a unique rather than repetitive experience. Above all, the retail development proposals must not damage the viability and historic attractiveness of the High Street.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy H1 for the following reasons:

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinized or evaluated. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the Plan period. It fails to set rules on important issues such as constraints and density and is not specific enough to provide a practical framework for planning decisions.
A much higher proportion of Surrey University students should be housed in university accommodation. The University has proved to be recalcitrant in providing accommodation in spite of outstanding Planning permissions. The policy does not do enough to rectify this.

I object to the increased numbers of Traveller pitches proposed. See my comment #9 in Policy S2 above.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed increase in the number of Travellers’ pitches. The provision of additional Travellers’ pitches, often in the Green Belt, is a source of much local friction between the settled community and the “Travellers”. Especially where the Plan references limiting the occupancy of these pitches to a small number of specific families, does this not imply these will be permanent residences? Regardless of the nature of construction of their dwelling, if one family spends their entire life on one spot, can they be said to be “travelers” with a different set of rules to those of us who live in “permanently constructed” dwellings. I do not believe their lifestyle choice should be a matter for public provision of pitches, and there is no longer any requirement for journeymen in this modern economy. I am especially concerned at the detrimental impact of the Borough’s encouragement of this lifestyle on the Traveller children and their educational needs. The open-ended wording of the numbers to be permitted (at least 73 “or any new target as identified within an updated Traveller Accommodation Assessment”) is dangerous.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to this policy on the grounds that it should be more firm and explicit on “unviability” in paragraph 4.2.40. The possibility of avoiding or reducing the affordable housing obligation through use of unviability arguments is likely to inflate land values and lead to appeals. In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

Guildford's popularity and location in the Green Belt, with the Surrey Hills, close to other towns and within the London Commuter belt mean that demand is virtually unlimited and no amount of affordable housing will meet it. As I understand it, “affordable” homes are defined as those with a value of 80% of the market value. In a high house-price area such as Guildford, that still may not be truly affordable to many. The real need is for social or “council” housing but that will not be provided by current developer-led models.

Paragraph 4.2.3 (in Policy H1) states that the SHMA has calculated that 70% of the affordable homes needed are 1 and 2 bedroom dwellings. In Guildford town centre there are at least 6 sites, covering around 2 hectares (5 acres), that are derelict or used as surface car parks, some for decades, yet the Council appears to have had no success in redeveloping these at all. They have the potential to be used as mixed use town centre projects which could include apartment accommodation of this size. Not all of them are even included in the current Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy for a number of reasons:

1. The wording of the policy is far too wide and ignores all other aspects of planning policy. As drafted the Planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

1. The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. If the proposed housing would meet identified need and adjoins a settlement under this policy wording, permission would have to be granted even in the most sensitive AONB location, regardless of whether more suitable locations were available. The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.
1. The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer-led proposals which will be difficult to resist.

1. The policy wording should define “small”, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the Plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

1. The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular, I believe adding the concept of “safe and easy walking distance” extends the potential radius within which sites will be argued to be “closely related”. Many people would regard a mile or so as an easy walking distance and school children are expected to walk further than that before being eligible for free school travel.

1. The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. The supporting text includes this point, but it is not part of the policy itself and may carry little weight at appeal.

1. The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included, and that developments should remain outside the open market in perpetuity.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY II - Infrastructure and delivery

I object to this policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the Plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.
The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

With some 5,000 houses being proposed close to the villages of Ripley, Send and West Clandon, the roads serving the villages will become even more congested. Cycling has become an ever popular past time, particularly at weekends when hundreds of cyclists pass through the villages on their way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the villages and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians. The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury to the public. In the case of West Clandon, the Street often only has a narrow footpath on one (alternating) side of the road making it very dangerous, especially when vehicles mount the pavements as some have to do in places in order to pass.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this Plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the Plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local Plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This Plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic, with very little evident thought or planning as to how this is to be achieved, and how it will be funded. Implementation is critically dependent on providers outside the Council’s control and Community Infrastructure Levy income. Instead of recognizing this as a key constraint, the Plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as many local doctors’ surgeries will have their services stretched and overwhelmed. Many of these services are already at capacity with waiting times of 2 weeks to see a GP. Any further development without funding will place further stress upon existing health services. There is no provision for increasing the capacity of the Royal Surrey County Hospital, Guildford. Where is this to be assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY I2 - Supporting the Department of Transport’s “Road Investment Strategy”

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are likely to be many years away, even if they ever happen, and are beyond the command of the Council. The draft Plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network.

Road infrastructure represents a major constraint that should have been applied to the OAN at a much earlier stage in the Plan process and not left as an unresolved difficulty in the draft Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P1 – Surrey Hills Area of Outstanding Natural Beauty

I object to this policy as I am concerned it weakens existing protection when it should strengthen it. It is dependent on the Surrey Hills Management Plan, which welcomes housing development. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated. The policy should be tightened up.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY P2 – Green Belt

I object to this policy for the following reasons:

1. It does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local Planning policy. The Green Belt is not the Council’s to give away and once it is gone, it is gone forever. Sacrificing areas of the Green Belt to a developer-influenced growth agenda is a betrayal of future generations and does not constitute sustainable development. Green Belt was last taken in the 2003 Plan and now it is again proposed to move the boundaries.

1. The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the Plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

1. Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

1. The Countryside Study was a simplistic exercise based on the erroneous principle that ranking Green Belt land would identify candidates for development. The Council has not carried out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently Planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

1. I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt (a term which neither the Plan nor the NPPF defines) and there is no need to inset them. I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling, and that infilling is also proposed outside the settlement boundaries of a further 11. In effect, each village will become a nucleus for further development. The NPPF’s other four tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development.

1. To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need and has caused intense opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

1. Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” This is misleading. Since the Second World War, Guildford has been expanding to the north east, starting with the Bushy Hill estate in the 1950’s, then Merrow Park and Weybrook Park were built on around 100 hectares of Green Belt land in the 1980’s, and now 89 hectares of land from the adjacent Gosden Hill Farm is also to be taken out of the Green Belt. This will connect to the proposed Garlick’s Arch development (30 hectares), also in the Green Belt, via several slip roads and feeder roads alongside the six-lane A3 (a further 4.5 hectares). If allowed, these two proposals will more than double the area of Green Belt land hitherto removed to enlarge Guildford’s NE suburbs.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P4 Flood risk and Water Source Protection Zones

I object to development in areas which are at risk of flooding (Policy P4). National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change. The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy. The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both Plan-making and decision-taking.” The policy calls for “development that secures the economic, social and environmental conditions in the area”.

As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead there is no definition of “sustainable development” and no principles for balancing economic growth, social justice and environmental protection in practice to local Planning decisions are given. However, apparently, all excursions into the Green Belt constitute “sustainable development”. Policy S1 fails to recognize that economic growth, social justice and environmental protection often conflict. It is clear that economic growth has trumped the other considerations in breach of the NPPF’s requirements.
Policy S1 is seriously deficient in omitting any mention of the Green Belt. It should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections as required by the NPPF. This would set one clear boundary to Planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve Planning applications “wherever possible” and “without delay” seems to fly in the face of the NPPF presumption in favour of sustainable development and becomes a presumption in favour of any development at all. It also seems at odds with public statements from the Leader of the Council to the effect that including a site in the Plan does not mean that permission will be given for development.

The policy ignores the 12 Core Planning Principles set out in NPPF paragraph 17.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to Policy S2 on a number of grounds:

1. Almost every element of the Plan is predicated on the OAN adopted as the housing number. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. The algorithm used to calculate this number has been declared commercially sensitive and has not been revealed. I believe this number to have been seriously overstated before the BREXIT referendum but it is utterly without foundation now.

1. The number is based on a Housing Market Area (HMA): “West Surrey” comprised of Guildford, Woking and Waverley. Rushmoor is excluded in spite of it being easily reached from Guildford town centre. “West Surrey” is much too small. Half of Guildford Borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton, Haslemere, Reigate, Redhill and Basingstoke but all lie well outside “West Surrey”. Guildford is in the London commuter belt and part of a far wider and more complex housing market.

1. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The Plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get Planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

1. The OAN/housing number of 13860 is not as fixed as it would appear. The number of homes proposed, plus existing Planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. There are references in the evidence base documents to the possible need to make up shortfalls in Woking’s provision and the
“Sustainability Assessment” carried out for the Council came up with a preferred figure of 15860 houses. It is unreasonable to embark on the most extensive transformation of the borough on the basis of an unclear housing target. The scale of the development proposed increases the onus for it to be seen to be sound.

1. The Plan in general and this policy in particular do not address the point that Guildford exists as part of London's commuter belt. In this area the demand for housing is, in practical terms, unlimited, and predominantly dependent on what is available. The increase in the supply of housing in Guildford will simply result in a shift of population into the area, where this population would otherwise be able to find other areas in which to live. “Affordability” is not a fixed sum but is dependent on market prices. “Affordable” housing in Guildford does not come at a price that most would consider “affordable” regardless of how much of it is built. The Plan will not reduce prices or increase affordability except at the margins. There is now recognition that in central London, where urban regeneration has transformed many districts and the term “inner city decay” is out-of-date, it is now the outer London suburbs that require regeneration. Over the period of the Local Plan, this process should be factored in to housing needs in areas such as Guildford, and could reduce the rate of outward movement from London.

1. This policy does not take proper account of the constraints to development which exist, principally posed by the Green Belt and by topographic and infrastructure limitations. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). I believe the Council is under a duty to properly consider applying these constraints and that this has not happened. This approach differs from the other boroughs in Surrey. The Plan is based on the assumption that “growth is good” but is this really the case? More consumption, more congestion, more Green Belt being taken - this is not a sustainable strategy.

1. The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon, Ripley and Send in particular. The developments at Garlick’s Arch and Gosden Hill Farm will put severe strain on the road infrastructure in and around West Clandon which will be unable to cope. The proposed A3 slip roads at Burnt Common will make matters much worse. There will be a significant increase in traffic flows along the A247 through West Clandon, a stretch of road which is already of concern with regards to safety, funneling into several pinch points which are under 5 metres wide. Here, two lorries cannot pass without one mounting the pavement, along which young children are walking on their way to the village school. The edge of urban Guildford will be moved much closer to West Clandon. Guildford’s edge will be built on Green Belt land which was zoned to safeguard the countryside from encroachment and check the sprawl of large built up areas.

1. The Plan is out of balance in proposing 65% of housing on the Green Belt and 36% in the three wards of Lovelace, Send and Clandon and Horsley. These are rural areas whose identities will be greatly and detrimentally changed by these proposals.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
**I do not agree** that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

- The evidence base documents take no account of the radically changed environment and outlook following the BREXIT referendum. This is not the fault of the Council but nevertheless means the plan is not based on actuality and requires a re-evaluation of the strategic context.
- The Transport Assessment was published at the same time as the Plan leaving little time for study and analysis. The projections contained appear to be quite inadequate in that 1) they average congestion over 3-hour time bands, which materially reducing the impact of congestion and 2) they do not model junctions.
- The “Assessment” shows that congestion will worsen significantly over the period of the Plan even if all the proposed and aspirational infrastructure is built, surely this cannot be seen to be acceptable.
- The Strategic Housing Market Need (SHMA) attempts to justify an Objective Assessed Need (OAN) based on a very aggressive desire for economic growth in the borough. No case is made that such growth is sustainable. The assumptions and estimates are opaque and have not been adequately scrutinized by Councillors. Consequently people have to take on trust the work of a consultant. In any case, political events have overtaken the SHMA.
- The number and complexity of the documents in the evidence base make reading, understanding, analysis and assimilation extremely difficult.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I do not agree that the Plan is sound for the following reasons:

- "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt." Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
- The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
- The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB’s and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
- The draft Plan does not accord with the National Planning Policy Framework (NPPF) policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB’s and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified, together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites - which amount to 65% of the proposed housing number.

- Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the BREXIT referendum.
- The housing number is at least double the achieved rate of building in the Borough over the last several years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
- Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag behind development and lead to much higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
- The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to register my OBJECTION to the proposed Guildford Local Plan 2016. This needs to be rethought with regard for local people opinions and concerns, the people who live locally and not enforced by people who do not understand the local dynamics and situation.

I have a number of concerns to this ill thought out plan.

Extension of Horsley Village Boundary - There has been no case made for this at all and should not be allowed. It seems to me that this is purely to create more land for developers and cannot be right.

Removing The Horsleys from the Greenbelt - There is no exceptional case for removing The Horsleys from the Greenbelt. This is not proven at all and goes against all Government planning guidelines. Therefore this cannot happen. Horsley is a small village steeped in history and cannot take the proposed number of houses. .
Infrastructure Overload - If local councillors and planners took the time to come out of their ivory towers to see village life they would see that Horsley is at breaking point, roads are very busy (and poorly maintained). The drainage is a disgrace with constant flooding. All facilities are oversubscribed.

I am writing once again to state my objection to the revised local plan that has been prepared.

It is clear that you have not taken into account the views of 1000’s of local residents and qualified people on the environmental impacts of the proposed plans.

There is still too much development into green belt, which must be protected and a distinct lack of thought of the required infrastructure to support any of this building.

The proposed development at Wisley which has already been rejected but is still in the plan is ridiculous in terms of size. The roads cannot take this, it will be like central London and the A3 is one of the busiest junctions, with regular accidents and this will only increase.

Clearly we need to increase housing stock but this has to be proportionate to the local surroundings, infrastructure and existing stock. This plan is clearly not and needs to be reconsidered AGAIN.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the lack of any supporting evidence for the alleged housing demand numbers, which are used as justification for building on the precious Greenbelt sites, sites which make the borough the desirable place many love to live and work in.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7534  Respondent: 15652033 / James Scrace  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have been a resident to Send Marsh for over 20 years and I am writing to object to the latest change made by Guildford Borough Council concerning the Draft Local plan for Send, in particular the designation of the Garlicks Arch site.

This objection is on grounds that not only is this site unsuitable for a number of reasons of which I will elaborate throughout the course of this email, but that the manner in which this last minute amendment to the local plan has been executed, which I do not believe has been carried out in a fair and transparent manner; considering the time-frame, the extent of the amendment and finally the lack of consultation with residents, Parish council and the necessary regulatory bodies concerned with proposed development.

Firstly I would like to bring your attention to the application 16/P/00783 on Oldlands Field Yard, a small area of the recently earmarked site for mass development on the Garlick's Arch site, of which there is a proposal for 9, two storey dwellings that was filed almost exactly a month (12th April) prior to this latest last minute amendment to the local draft plan on 11th May. This appears to be too much of a coincidence and exemplifies the seeming lack of transparency and stealth tactics employed by Guildford Borough Council and developers in seeking approval to develop part of the site in question, which would provide a 'foot in the door development' and platform to further develop the wider site and strengthen the case for the inclusion of the Garlick's Arch site within the draft local plan. Furthermore, there is evidence to support this possibly cynical view in the possibly over-comprehensive extent of accompanying reports to the 9 dwelling development, and the transport modelling being undertaken by Surrey County Council and Highways England, which would reveal that GBC have known about the change in site designation for the local plan and benefits afforded by the initial 9 dwelling development for some time. There has however been a lack of publicity and public consultation for both these cases, and the change in site designation in the amendment comes 8 working days prior to the full council meeting - surely unacceptable in view of the above and considering the extent of the change and impact of an additional 300 dwellings on both the villages of Send and Ripley. If not mandatory, surely there is a duty of care to notify the residents of these areas affected for even the site being included provisionally, despite the 6 week allotted public consultation period after the decision reached on 24th May.

If we are to evaluate the previously executed studies by GBC with regards to the Greenbelt strategy, and the Mass development and Village expansion evaluation - this change in site designation to Garlick's Arch seems to be contradictory. The site in question is deemed to be medium sensitivity in terms of Greenbelt yet it is being considered for mass development when there are not only low sensitivity areas available in close proximity but a list of brownfield sites - arguably in more strategic locations with regards to the industrial designation of the site, available for re-use in for example, Slyfield, as per the 'previously developed site' report also published by GBC. In the mass development study and village expansion survey it evaluates that Ripley is unsuitable - how then can a development site of this scale be promoted in the local plan that will implicate Ripley for the very reasons that deemed it unsuitable? These sites cannot be treated in isolation, and this site at Garlick's Arch straddles both parish council zones and will have wide-ranging implications for the residents and well-being of not only Ripley and Send, but also Clandon.
With regard to the 'exceptional circumstances' required by borough council to justify removing Greenbelt for development, as stated in the National Planning Policy Framework - on what basis are the reasons given (as per the local plan amendment, of meeting the needs of housing stock) when this housing need is not proven? It is forecast that the population of the Guildford borough is actually set to plateau and decrease (and any statistics contrary to this are surely inflated by the false counting of university students who do not reside past their degree period), so surely therefore no need to increase the 13,860 houses already proposed for the borough by 300 in this development, and certainly no local need in Send to expand the Village by 25%.

This view is further reinforced in terms of the employment floor space designated for the development of 7000 sqm since the ELNA shows a reduction of 80% required from the previous draft plan. Surely from a strategic perspective the site at Syfield is more suited for this type of development, should 7000 sqm still be deemed necessary. One of the reasons for the preservation of Greenbelt is preventing Urban sprawl and preventing the merging of towns and settlements - the site at Garlick's Arch, once fully developed would represent the single largest development in the area, not only in isolation but also if coupled by the Send Marsh Road/ Linden Way housing estate positioned opposite, only separated by the Portsmouth Road. Surely there is no justification for development for Garlick's Arch purely on the basis of the site location opposite an already large housing development as this would go against reducing sprawl and the merging of settlements, and of course the lack of accompanying local amenities - all of which, at present, are out of walking distance.

The implications on-site are also elements of the development proposal for Garlick's Arch which seem to have been overlooked, despite having been identified through both the Mass development and Village expansion analysis carried out by GBC. The site is not only Greenbelt land but also has 4.6 hectares of permanently protected ancient woodland which requires Forestry commission consultation and approval for any development in close proximity to in the first instance. Has the council considered this or given any thought to the implications the removal or damage to this woodland will have on not only the UK's ancient woodland stock but to the damage to local biodiversity and habitats of wildlife? Other site implications identified in the report are the risk of flooding due to the high spatial priority flood plane which cuts across the site from SE to NW. Surely then GBC cannot agree to develop the site on moral and practical grounds due to this known risk but also from the point of providing housing offer that lacks quality considering its close proximity to the A3 of which this development and accompanying junction alone will increase the traffic-based noise which will impact the quality of life for those resident.

The impact of this site on congestion and road traffic is another element which seems to have been overlooked by GBC. Whilst there is assessed benefits by GBC in the 11th May amendment of an additional junction onto the A3, surely this is short-sighted considering the resulting increased congestion on not only the A3 from this but also on the surrounding local roads of which, during traffic gridlocks, will be used by road users to avoid the A3. In addition, as identified by GBC in a congestion and traffic strategy report published in 2014, the Wisley A3/M25 interchange is already a bottle-neck for traffic congestion. Needless to say, an increase in motorists from not only the development at Burpham of 2000 new homes but also Wisley of 2000 homes, plus of at least 400 from not only in the area as a result of the Garlick's Arch development who may join at Ripley, but also of those joining the A3 one junction prior to this bottleneck from neighbouring Send, Clandon and Woking. It should also be highlighted that the increase in industrial based motor transit from the industrial designation of the site, will almost certainly exacerbate this identified bottle-neck.

At a micro scale, The Portsmouth Road adjacent to the site and in particular the junction with Send Marsh road of which this new development is within 350 yards of, already experiences a high level of congestion and traffic red zone during peak times. This development will not only exacerbate this issue through the increase in a potential average of 400 extra cars resident to the site, but also visitors to the site, and the increased volume of those turning in and out of the site will create further traffic flow disruption to the Portsmouth Road. The Send Marsh Road junction in question has also been the site of many traffic accidents in the past few years and the development of this site will further increase the risk of future road incidents. A counter argument which may be raised by GBC to an increase in car congestion resulting from this site - taking into account the proximity to bus stops and train stations, is surely invalid considering the infrequency of the buses that service this area (hourly or two hourly respectively) and the distance and time taken to walk to the nearest Train station at Clandon - a 1.7 mile journey which would take approx 30 min walk when 20 min walking journey is recommended to local hubs which provide transport linkages to nearest urban centre. Notwithstanding this, the conditions for walking to this station are unsuitable considering the quality of the pavement service, the termination of the pavement at various points along the Clandon road, and the lack of adequate street lighting to enable a commuter to comfortably and safely get there and back on foot.
The scale of the change as a result of the change in site designation is also something that requires scrutiny - nowhere in the amendment issued on the 11th May does it justify why firstly a net increase of 300 dwellings is required, in light of the previously agreed designation in the previous addition of the local plan of circa 100 dwellings, or responsive to any statistics; considering that there have been past assurances from councillors stating that this very situation would not re-emerge, or provides insight into how this will be supported locally or assesses the impacts on the local infrastructure and amenities. Has the council given any thought to how the local doctors surgery or shops in both Send and Ripley will cope with at least 400 additional households to support?

If we are to further assess the potential impact of this mass development in terms of education provision, it is already well known and publicised that this area of Surrey is well oversubscribed. The increase in 400 dwellings will not just place further strain on this system but will be untenable considering that during the period 2014/15, not only the schools within catchment area of this site but within a circa 15-20 mile radius, currently experience an average ratio of 2 applicants per place for both primary and secondary education. Any increase in student yield therefore, despite the ratio of students per household forecasted in the accompanying education infrastructure statement, will place further strain on the education provision, and with no known strategy publicised which identifies this problem or an accompanying local school development or expansion program in relation to this site, something will have to give and one could suggest at least in the short term that this will be the quality of education offer available.

These are pertinent points which require careful thought in relation to the sustainability of the Guildford Borough as a place for quality of life offer in the long term, in particular the areas of Ripley and Send. Mass development proposals in unsuitable locations and on unnecessary scales such as this cannot be justified when this places the very reason people want to live in this area and wider borough, at risk.

To summarise:

I object to the site designation at Garlicks Arch

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to all erosion of the Green Belt and the weak justification considering the amount of previously developed brownfield site in arguably more strategic and suitable areas to meet any "housing demand".

I object to the disproportionate amount of development in one area of the borough e.g. Send and Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the last minute inclusion of new sites with less than 2 weeks notice prior to the agreement of the inclusion at full council meeting, the limited consultation period - especially considering the severity of the last minute change, and the lack of transparency on the part of the council with regard to the aforementioned "foot in the door developments" on greenfield sites earmarked for mass development in the last minute amendment i.e. Garlicks Arch.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I should like to register my objection to the Proposed Submission Local Plan. It is of great concern to me that you are proposing to provide such high density housing developments within the Horsley boundaries.

Since moving into West Horsley in 1989 there have been numerous times when the roads and drainage system have not been able to cope with the rainfall, which on some occasions does not have to be severe to cause flooding problems. The proposal to build many more homes in West Horsley will make this problem much worse.

There is also the problem of traffic causing more disruption as well as lack of parking spaces in the shopping areas.

There is a need to provide the supporting infrastructure first before even considering additional housing developments which are being proposed. The medical centre will not be able to cope without expansion, the number of school places would not be sufficient without another school being built, the provision of a more frequent bus service must be addressed especially to cover Saturdays as well as weekdays, the train station car park is already full during weekdays and the local roads network would need to be carefully considered to avoid severe congestion.

The redevelopment at the Thatchers Hotel site is very shortsighted bearing in mind that a prestigious opera company is setting up home in West Horsley. The need for a hotel is bound to be required and Thatchers Hotel is ideally situated.

I am opposed to the removal of the Horsleys from the Green Belt as the atmosphere of the villages will be lost forever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am not convinced that the development of this land is of benefit for the people of Guildford. The people of Guildford and visitors will lose the use of the land (originally given to the people of Guildford and placed under the Cathedral’s stewardship), our views will be adversely affected, traffic will increase significantly in an already busy area and local infrastructure (eg schools already oversubscribed, drainage and roads) will require additional investment.

Thank you for the opportunity to comment on this

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I OBJECT to Gosden Hill development being in the Local Plan The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.
No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43).

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3).

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/16807  Respondent: 15652833 / Don Babington  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.
Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H3 – Rural Exception Homes

I object This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16804  Respondent: 15652833 / Don Babington  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

In particular we object to villages being removed from the green belt, and the increase in traffic congestion that would occur. The A247 has at many places got narrow footpaths on one side of the road, making it extremely dangerous when traffic mounts the pavements – as often happens with lorries passing through.

We are also concerned about the following:-

- A247 would be more used more by the Sat. Nav.
- Environment: Health hazard – air pollution - Noise and the affect that has on nerves - Loss of green fields. People need to see greenery.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the
flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the Borough Wide Strategy (Policy S2)

1. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

2. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

3. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT TO the late inclusion of site A43 Garlicks Arch. This has been slipped in at the very last moment without proper consultation. The added 400 houses will cause overcrowding of our schools and doctors surgery. Our Villages Medical Centre is already over subscribed and difficult to get doctors appointments. Another 800 minimum people would completely swamp this facility. The 7000 sq mtrs of industrial area would also increase the amount of Commercial Vehicles in the area using the local roads. We hardly need industrial buildings, as past developments have stood empty for years.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO site A43A the on and off ramp at Clandon/Burnt Common. This will cause complete chaos in the area, as all roads leading to the junction are country roads leading from Clandon, Ripley and Send. At present it only takes an incident at Wisley /Junction 10 of the M25 and our villages are swamped with traffic. This junction will make the whole situation worse as the local roads are so narrow and are unable to be widened to suit increased traffic flow. The Send Road only leads to similar narrow roads in Old Woking and Hoebridge areas, which are also unable to be widened.

I OBJECT TO the disproportionate amount of development on the A3 between Burpham and the M25 at Wisley. With 2000 houses at Wisley Airfield, 2200 homes at Gosden Hill Farm and 400 houses at Garlick’s Farm Send. This will make an urban sprawl in this part of Surrey and will completely change the environment for all the residents and who live here as well as increased air pollution from all the additional vehicles. There is a lack of evidence for the alleged housing need numbers.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to express my strongest possible OBJECTION to the New Local Plan.

The previous Draft Local Plan issued in 2014 for consultation received some 20,000 comments of which the majority expressed fundamental objections. The new local plan has made no changes. The New Local Plan does not respond to the concerns of electors and the 20,000 comments which will not be available to the inspector. I consider These issues amount to CONTEMPT of the electorate by Guildford Borough Council.

I am aware that both East and West Parish Councils made objections to the new Plan specifically to the former Wisley airfield on 4 July 2016. The Parish Councils have articulated this clearly. Guildford Borough Council must give full weight to the concerns they have so professionally expressed.

I have the following specific OBJECTIONS to the New Local Plan:

1. 1 OBJECT to the proposal to remove East and West Horsley from the Green Belt. The exceptional circumstances needed to justify such a fundamental and adverse change for the Horsleys have not been demonstrated and only Guildford Borough Council's perceived unfulfilled housing needs appear to support the proposal.

2. 1 OBJECT to the proposal to extend the boundaries of the Settlement areas within East and West Horsley. No sound reasons have been given for the proposed changes which seem to be aimed solely at increasing the land available within the settlements for future additional development.

3. 1 OBJECT to the proposal to designate Station Parade as a 'District Centre'. I see no reason to change this view. The proposed reclassification results from a complete misunderstanding of the nature of the facilities in the village centre and would inappropriately target the area for future urban developments.

The proposals made in the New Local Plan result in 593 new houses in the Horsleys within five years of the Plan being adopted without taking account of the 2,000 houses proposed at Wisley, 2,000 houses and mixed use development at Burpham, and 400 houses and commercial development at Burnt Common and Gosden Hill Farm. In West Horsley
alone, the proposal is to increase the housing stock by up to 35%! Once again, it is difficult to avoid the impression that this plan is the result of a desktop exercise prepared by individuals who have little knowledge of, or interest in, our villages. Adjustments to population growth projections made by Guildford Borough Council result in a population increase which is almost 70% higher than official national estimates for the Borough. The adverse impact on an overloaded existing infrastructure in terms of local schools, medical facilities, and road and rail transport would be substantial. The impact of the resulting urbanisation of our villages adjoining the Surrey Hills area of Outstanding Natural Beauty would be devastating.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT in the strongest possible terms to the proposal to develop a 2,000 house village at the former Wisley airfield, a site that forms part of the Metropolitan Green Belt and a 'first line of defense' against urbanisation from the A3 and M25. Guildford Borough Council's Planning Officer, in rejecting a previous planning application from the developer said 'it has not been demonstrated that the benefits of the proposal amount to very special circumstances such as to clearly outweigh the harm to the Green Belt and other harm identified'. The proposal would be disastrous not only for East and West Horsley but especially for the local villages of Ockham, Hatchford and Downside. Anyone with local knowledge of the area will appreciate the strain such a proposal would place on local transport and infrastructure. Why does Guildford Borough Council continue to include this site in its plans in the face of massive objections from residents from across the area? I consider this proposal to be an act of ENVIRONMENTAL VANDALISM.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Regulation 19 Draft Guildford Borough Council Local Plan 2016

I object to the paucity of the evidence base. The submission documents are unsound, unreliable and inconsistent. The current SHMA inflates the proposed housing figure due to the following factors:

- the failure to correct for errors in the historical data for international migration flows;
- the way it inflates the requirements of students; and
- the flaws in the method for estimating the number of homes needed to support job growth.

The Green Belt and Countryside Study does not look strategically at options for development in major settlements beyond. The Green Belt sensitivity analysis is not a valid basis for informing decisions. Exceptional circumstances do not exist to justify amendments to Green Belt boundaries as part of the Local Plan process. It is quite achievable for realistically prepared and identified development needs to be accommodated in Guildford’s urban areas and villages.

The Transport Evidence has been produced very late and is incomplete, inaccurate and untested to the extent that the Plan is not ready for a Regulation 19 consultation. It is apparent that the Strategic Highway Assessment shows there will be congestion, even with all the highway schemes in the Plan. The available evidence suggests much of the proposed Sustainable Movement Corridor cannot be delivered due to narrow roads and pinch points. Evidence on bus travel is compromised because no clear location for a bus interchange is proposed. No information has been provided on the demand for and capacity of rail services, and the main line to London is already extremely busy in peak periods.

Information about the town centre as regards traffic, buses and parking is lacking. The Strategic Highway Assessment 2016 is flawed. It is invalid to base this on less traffic growth than the proposed housing growth. The report points to overcapacity use of the A3, M25, A31, A320, Millbrook, Ladymead, Woodbridge Road, York Road, London Road but understates the congestion consequences. Various suggested queue reductions are unexplained. The consequences of major proposed reductions in road space in the town centre (eg closure of Walnut Tree Close, narrowing of Woodbridge Road, reduced capacity of the gyratory) and of developing Burnt Common are not included.
The Guildford Retail Study Update lacks credibility and there is no proven case for expanding comparison retail space which is undermined by failure to implement existing retail consents at the North Street development over the last 10 years. The Guildford Retail Study does not take account of changing retail patterns in relation to the threat of the internet and the study also assumes a number of logged retail requirements from companies already in liquidation or with national requirements that exclude Guildford.

Key parts of the evidence are missing, flawed or based on withheld assumptions. The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach and the Transport evidence is too late and incomplete to be relied upon to inform the Plan.

The Plan preparation process has had inadequate regard for national policy which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

It is unacceptable to treat Green Belt as a readily available source of development land during Plan preparation. The Mayor of London intends to respect Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level. Releasing Green Belt to fund infrastructure or build on open, previously-developed Green Belt does not pass this test. Opportunities to channel development towards brownfield locations beyond the outer Green Belt boundary, linked to sustainable transport, have not been adequately considered. It is not credible to suggest the Green Belt is being treated as permanent when its boundary was changed as recently as 2003 as part of the last Local Plan review. Indeed, land released in 2003 is neither fully developed nor efficiently used. An approach of eroding the Green Belt at each Local Plan review is not sustainable. If there is a case for Green Belt development, it needs to be proven through the application of policy.

Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach.

The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GBC have failed to apply any reduction which makes the plan undeliverable and unsound. It would be harmful to the character, quality of life and economy of Guildford not to reduce the housing figure to a number significantly below 13,860 new homes by 2033. It would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to government policy to develop on the scale currently proposed. I am concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

The extent to which the Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”, fails to consider options that constrain development or that make greater use of brownfield or previously released greenfield land, focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect Green Belt around Woking does not consider environmental limits or impact on the next generation in terms of weighing demand for homes for the young alongside the use of all possible last resort greenfield options by one generation.

The National Planning Policy Framework requires that objectively assessed needs should be met unless: “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted.” Notwithstanding that the Sustainability Appraisal should be proportionate, strategic and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements.
GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.

GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

GBC has proposed an OAN of 693 houses per annum in the GL Hearn Strategic Housing Market Assessment (SHMA) which is unsound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

GREEN BELT SITES

For the reasons stated above, I object to ALL Green Belt sites allocated for development in the local plan.

I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses.” This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY A25 GOSDEN HILL

I object to policy A25 Gosden Hill

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

Gosden Hill is located entirely within the green belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt.

The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Do you consider this section of the document; complies with the Duty to Coopurate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to policy A26 Blackwell Farm. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

Blackwell Farm is located entirely within the green belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Blackwell Farm performs all five functions of green belt, and fulfils purposes 1, 3 and 5 very strongly.

- Purpose 1 - “checking the unrestricted sprawl of large built-up areas”. There is huge pressure to develop on the western edge of Guildford; the University of Surrey has stated publicly that its key objective is to develop the whole of its landholdings, stretching west to Flexford Farm. This, combined with the indefensible boundary being proposed (a hedgerow rather than the existing belt of ancient woodland), will put more of the green belt and the Surrey Hills Area of Outstanding Natural Beauty (AONB) at risk of future development.

- Purpose 3 “assists in safeguarding the countryside from encroachment” - the proposed movement of the green belt boundary on the west of Guildford to allow for development of the University in 2004 resulted in the encroachment on countryside and the loss of farmland (including some Grade 2) at Manor Farm. The proposed future change in the boundary would result in further encroachment and the loss of farmland including further Grade 2. The proposed road development with access road from the A31 would also effectively cut off farm access to the south of the development area leading to further urban influence on this countryside. The University’s stated key objective is to develop land which includes Chalkpit and Wildfield farms leading to the risk of further boundary change and further encroachment in future years.

- Purpose 5 - “assists in urban regeneration by encouraging the recycling of derelict and other urban land”

The Blackwell Farm development would result in harm to the Surrey Hills Area of Outstanding Natural Beauty (AONB), harm to an Area of Great Landscape Value (AGLV), and harm to the setting to the AONB. (Blackwell Farm forms the views into and out of the Hogs Back ridge). The NPPF is clear that AONBs should be afforded the highest level of protection in relation to landscape and scenic beauty. All development proposals within and adjacent to the AONB must conserve or enhance its special qualities. The NPPF also makes it clear that applications for major development in the AONB will be refused unless exceptional circumstances are demonstrated and the development is proven to be in the public’s interest. Guildford Borough Council has not shown that the proposed housing development or the extension of the Research Park, or the proposed link road from the A31 to Gill Avenue, is in the wider public interest. Indeed, the increased traffic through the already congested Egerton Road/Gill Avenue junction, which would result from the development, would impede emergency vehicles travelling to the Hospital and this would be very much against public interest. GBC’s Policy P1 states that, “The Surrey Hills Area of Outstanding Natural Beauty (AONB) will be conserved and enhanced to maximise its special landscape qualities and protect it from inappropriate development. All proposals will be considered against whether they conserve and/or enhance the setting and views of the AONB”. I question how the proposal to carve a new two-lane carriageway through the AONB fits this policy, or meets para 115 of the NPPF? Finally, nearly the whole site has been identified as a “candidate area” for AONB status in the Landscape Evaluation Study commissioned by Compton, Worplesdon and Wanborough parish councils. Therefore, the entire site should be treated as though it is within the AONB during this local planning process.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A35 WISLEY

I object to Policy A35 Wisley. I object to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. However, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision. There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

- Green Belt location and absence of “exceptional circumstances”.
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts.
- Absence of adequate traffic data.
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
- Presence of a Surrey County Council safeguarded waste site.
- Cost of infrastructure required to the detriment of alternative more favourable sites.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
- Impact on listed buildings.
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
- Extreme housing density with tiny garden spaces.
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
• Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).19

• Failure to evaluate the cumulative impact of this and nearby development sites on the area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A42 CLOCKBARN NURSERY

I object to policy A42 Clockbarn Nursery. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints. The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area. The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical. Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic. Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY A43 GARLICKS ARCH

I object to policy A43 Garlick’s Arch. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. There is a danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

I object to the proposal to build 7,000 sq m of light industrial, general industrial or warehousing on the site at Garlick’s Arch. There is no need to place a Strategic Employment Site in this location when there is plenty of spare space available at Slyfield (40 ha). The Employment Land Needs Assessment (ELNA) 2015 has been reduced by 80% since the ELNA 2013. There is no longer any need to place industrial development in the Green Belt when there are plenty of brownfield sites available.

I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.
I object to the lack of proper infrastructure planning for sites (Policy 11) which requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object on the grounds of the congestion that development will cause to the trunk roads, A3/M25 (Policy 12). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A43a BURNT COMMON

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a). The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

I object to the proposed Infrastructure Schedule (Appendix C). The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Answer (if comment is on questions 1-7 of the questionnaire): (

POLICY A44 SEND HILL

I object to policy A44 Send Hill

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

The proposed development is not sustainable because of poor infrastructure. Send Hill is a single track country road and too narrow to provide sufficient access to the site for travellers or accommodate the potential new levels of traffic the proposed development would bring. The site is a high quality green belt amenity area within beautiful surrounding countryside and would be spoilt by the development.

A Wasteland Solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area. Further development would disturb the water table and increase risk of flooding to surrounding properties.

The site was used as a GBC registered landfill site and shown on the 1963-8 Ordnance Survey maps as “refuse and slag heap”. It is therefore unsuitable for such a development on health reasons.

On the 1971 Ordnance Survey the site is shown as a “refuse tip” prior to when proper licensing/registration was required. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.

GBC has installed gas monitoring wells on site since July 2000. One well recording methane gas discharge and development of this site would be a health hazard.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY D1 MAKING BETTER PLACES

I object to Policy D1 Making better places. I object to the absence of any reference to vernacular or historic design guidelines, even in Conservation Areas where Government policy requires development to preserve or enhance their character. The monitoring of this policy is inappropriate. Why should this policy result in a reduction of the number of appeals for poor design rather than result in better-designed buildings?

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY D3 HISTORIC ENVIRONMENT

I object to policy D3 Historic Environment. This policy clashes with the strongly pro- development agenda of the rest of the plan. The policy should commit the Council firmly to protecting and preserving our heritage assets from development. Instead, the specific policy pledge to “support development” that might “enhance” heritage assets leaves wide scope for abuse in the form of destructive commercialisation and financial leveraging of relevant sites. This policy is based on the false premise that Guildford’s heritage is inherently in decay. Any development close to historical assets which is harmful should be expressly prohibited. This policy fails to meet the requirements of NPPF paragraphs 126 and 131-133.

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY E7 TOWN CENTRE

I object to Policy E7 Guildford Town Centre. I am of the opinion that policy E7 is ill-informed and there is insufficient evidential support to objectively assess the capacity of the existing town centre to accommodate appropriate new development and therefore fails the requirements of Section 161 of the NPPF to assess the real quantitative and qualitative floor space needs.

There is no reliable evidence provided that the retail core of the Town Centre needs or can be expanded by 45,000 sq m of retail space at North Street because of lack of demand for retail units in the Town Centre particularly large units. This is due to falling demand for retail space in Guildford and town centres throughout the country evidenced by independent research and the reality of empty shops in many high streets (including Guildford) and the accelerating competition from internet shopping.

The failure of the North Street scheme to be redeveloped over the last ten years is a testament to lack of demand which has been so poor that the original planning permission for a large retail scheme became time expired.

The reality is that the town centre has enough retail floor space. If more is introduced it will result in the closure of existing shops particularly in locations which are less than 50% of peak Zone A or 100% positions. What Guildford needs is a new focus on speciality high quality comparison shopping supported by a revival of Guildford’s attractive heritage core and a new major visitor attraction supported by restaurants. Guildford needs to become the quality shopping destination for Surrey.

The findings of the Guildford Retail and Leisure Study 25 September 2015 are very pessimistic about retail trends.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P2 GREEN BELT

I object to Policy P2 green belt. This policy states, “the general extent of the Green Belt has been retained.” This is completely false. The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. Policy P2 completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and it needs to be permanently protected. The boundaries of the Green Belt through Guildford Borough were defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special
character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital.

As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations.

It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold.

I object to the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. I am disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages reflect the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development. I believe this policy is based on a flawed Green Belt and Countryside Study.

To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions. Send is a good example of villages that should not be removed from the Green Belt. Send provides an important Green Belt buffer between Woking and Guildford. The village and the countryside behind the A247 should all be protected.

I object to three particularly vulnerable areas of high quality amenity land being taken out of the Green Belt around Send which include:

- The land behind the schools including playing fields and woodland.
- The land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering.
- Land to the left of Cartbridge going up to the old depot on the Wey Navigation.

POLICY S1 SUSTAINABLE DEVELOPMENT

I object to policy S1 as stated and the presumption in favour of sustainable development. The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” Policy S1 ought to set a clear framework. No definition of “sustainable development” is given.

The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The most gaping hole in Policy S1 is the Green Belt. As an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity, the Green Belt is a living example of sustainable development in practice. Policy S1 should commit to uphold Green Belt boundaries and protections, setting at least one clear boundary to planning decisions. The commitment to approve planning applications “wherever possible” and “without delay” reveals this draft plan’s pro-development bias. This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.3.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S2 PLANNING FOR THE BOROUGH

I object to policy S2 the Borough Wide Strategy and the commitment to build 13,860 homes based on the Strategic Housing Market Assessment (SHMA) 2015 prepared by GL Hearn.

I am surprised that GBC have adopted the OAN of 13,860 homes as the housing target without any application of constraints as required under the National Planning Policy Framework and the National Planning Policy Guidance. Historically GBC have correctly applied constraints on housing numbers to protect the Green Belt. The Surrey Structure Plan 1994 advocated a general slowing down in the rates of development “because of the environmental constraints which exist in the County, including Green Belt”. This slowing down was reflected in the requirement that Guildford Borough should accommodate a net increase of 3,800 dwellings between 1991 and 2006. This was a lower rate of development than in previous years. However it would appear that today GBC have effectively ignored the real potential of the urban area to provide for housing.

The figure of 13,860 new homes is unsubstantiated. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by commercial sub-contractor used in preparing the SHMA.

Both the NPPF and National Planning Policy Guidance provide a clear policy direction that the overall housing target should be reduced by a variety of constraints to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors. The NPPF also makes clear that, once established, Green Belt boundaries should only be altered in “exceptional circumstances”, through the preparation or review of the Local Plan. The National Planning Policy Framework (NPPF), National Planning Policy Guidance and case
law make it clear that Green Belt is an absolute constraint on housing supply. Exceptional circumstances need to be shown to adjust boundaries.

Other constraints under the NPPF include assessments of sustainability, strategic flood risk assessment, physical constraints on land use and infrastructure constraints (this can include road congestion, schools, drains, power supply and medical requirements).

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Policy A43 Garlick's Arch, Send Marsh**

I object to the proposed allocation for 400 homes and 6 travelling show people plots. There are no exceptional circumstances to warrant development on the green belt. There is insufficient services infrastructure for housing and show people plots, nor any justification for concentrating 6 of the proposed 8 borough-wide show people plots within Send. The road network is insufficient for housing development on this scale and for extra large vehicles associated with show people's livelihood.

There is no credible infrastructure for the plans you have set forth. The local surgeries are already at breaking point with the amount of people that use there dwindling services, there is no way that the roads can take the increase in traffic that this development will create. The A3 and M25 will turn into car parks on a daily basis, while the local roads of the villages will come to a continuous stand still. Two thousand homes means more families living in the area. We don't have the schools to take in their children. You will take a green community and turn it into a smog filled hell hole which will sit on the door steps of Guildford. You are creating an abhorrent abomination that will not solve or remedy any current or underlying issue.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

What is so baffling, is that you come with up with these silly ideas like "oh we'll just put 2000 homes here" but don't think about the ramifications of how that will affect the local area. There are already too many cars on the roads around Ripley, Send, Send Marsh, Burnt Common, Horsley, Clandon that during peak times the slightest accident can cause a mile tail back and bring a village to a stand still. The volume of traffic on the roads everyday increase the wear and tear on the roads which lead to potholes and unsafe driving conditions. Two thousand homes, just think about the stupid amount of traffic that that will increase, think about the excess petrol fumes and what effect that will have on the seldom areas of greenery that you choose to leave standing. This ridiculous idea of turning Burnt Common into Slyfield Greens [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature], and what's the thinking behind Garlick's Arch? That all residence who live on that development will come and go only via the A3? Because there's no way that Portsmouth Road is going to manage with that added level of traffic EVERY DAY. So now you have an abundance of traffic joining the A3. All this will do is turn the A3 into a car park and I know what your answer will be for that. "We'll just make it four lanes each side", after all what's a few less trees and Wisley right?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing in regard to your scandalous plans to uproot and destroy the place that I have called home for 38 years. The changes to the local community should your plans take effect will quite simply be catastrophic for every resident who presently resides within the local area. It is true that real estate in Surrey seems to come at a premium these days, but that's because its a nice place to live and is in a commutable distance of London. But the answer to the housing crisis is not to dig up the countryside and spoil the local area. The answer in my opinion is to encourage business to move from the South-East to other areas of the country where communities are crying out for commerce. Frankly the proposed changes lead me to wonder who exactly elected you lot to take office in the first place given that every one of the following points is so remotely dumbfounding its almost comical we are forced to write in and share our dissatisfaction with what you intend to create.

I mentioned how comical this whole plan is earlier. In many ways its like "the Goonies" revisited. We have the evil developers (that would be you lot), we have our group of Goonies (that would be everyone writing in objection to these plans) all were lacking is a Pirate Ship and a hit track by Cyndi Lauper. I just hope that like those fictional characters in that classic 80's movie our spirited rebuttal to your plans is good enough to see off the impending calamity that your so called local plan will impose.

In short your local draft plan is A VERY BAD IDEA. Hopefully this message will give you the clarity to wake up and do the right thing. LISTEN to your local community, common sense would suggest that we can't all be wrong.

I request that my comments are shown to the planning inspector and would appreciate confirmation that this communication has been received.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I am writing with regard to the proposed Draft Local Plan Strategies and sites June 2016.

I have many concerns regarding this new plan the most unacceptable aspect of the proposal is the proposed increase in housing for West Horsley. The proposed 35% increase in 6 years is clearly ludicrous. No plans for local infrastructure have been shown. The roads are already overcrowded and the drainage systems are at bursting point. The village designation as a Rural District centre is also inappropriate. The proposed increase in housing will make the local amenities un useable due to the fact that I already struggle as disabled drivers to park. I also struggle to receive doctors appointments as the surgery is oversubscribed.

The parish council offered a sensible proposal i.e. a limited need for some 20 affordable homes for local people who want to remain in the village, i.e. for young people and for elderly people who wish downsize to a smaller home. This would enable the current community spirit and ethos to remain and allow the village to thrive as a part of proper rural England. This would then respect the NPPF policy which requires that new residential development must respect the character and density of housing in the area and be limited in quantity by the availability of infrastructure and local facilities.
I note also that the designated green belt land which I have always been assured would remain as such, has now become prime building land. I understood in 2014 that it is possible, under exceptional circumstances to change green belt land to enable development. I now understand that this will be obtained by “Insetting”

Can the council demonstrate that all of the required process has been adhered to and recorded and that these circumstances legally allow such re-designation.

Can the council also confirm that all possible brown-field sites have been prioritised for development prior to the green-field being used?

With regard to the proposed development at Manor Farm. I am extremely concerned about the extra road traffic this proposed development of some 135 homes would produce. New residents needing to use the A3 to Guildford or London will chose the shortest route to the main road. This will create traffic down the narrow Long Reach road, which includes a very sharp blind bend towards its North most end. This could easily result in a future accident.

I live in Northcote Crescent and already have problems with our garden flooding during periods of high rainfall. The Manor Farm development lies on land higher than where I am. The large area of impermeable land that will be created by the development will without doubt contribute to this problem.

With regard to the surface water run off from this development at present this runs into a pond at the back of the proposed Waterloo farm proposed development. The area of land around Ockham Road North in this area is already a high risk flood area. These two proposed developments will also add to this problem unless a very major surface water alleviation project is to be undertaken. I look forward to seeing the promised hydraulic modelling which is only the start of design development work. The feasibility of this flood alleviation work, together with a design and budget costs should be investigated prior to consideration for actual residential development. Normal SUDS schemes will not be sufficient to alleviate this problem which needs to be sorted now let alone following extra new development.

In summary our concerns are as follows:

- Inadequate flood prevention planning for Nothcote Crescent and Ockham Road North.
- Inadequate road access for long reach to A3 links.
- Inadequate facilities at station parade shops and surgery.
- Inadequate school facilities in area.
- Inadequate consideration for the use of brown field sites.
- Inadequate exceptional circumstances to change green belt land to enable development.
- Inadequate consideration for population growth prediction figures.
- The complete lack of consideration for the National Planning Framework requirements

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Sites

It is noted that there are 57 proposed site allocations in the plan for a range of uses, including for housing, employment, retail and traveller pitches. The housing/mixed use sites provide for a wide range of dwellings from 10 units up to 2000 units. Most of these sites are some distance from Waverley but one (A29), which would deliver around 1,200 homes in the Tongham and Ash Green area, contains two parcels around Grange Farm that are close to the junction of the A31 and the A331 and also close to boundary with Waverley. One of these parcels is subject to a current hybrid planning application for 254 dwellings and associated SANG with the housing in Guildford and the SANG in Waverley. It would be important for any impacts from this allocation, including impacts on the Thames Basin Heaths SPA to be addressed in this or any subsequent planning application.

In addition, there are several large strategic sites of between 1,000 and 2,000 dwellings that are close to the Guildford urban area and are near to the A3 trunk road. These include sites A24 (Siyfield Area), A25 (Gosden Hill Farm), A26 (Blackwell Farm) and A35 (former Wisley airfield). It will be important to ensure that the impacts of these developments on the A3 are carefully assessed in conjunction with planned improvements to the A3, for example the section from the A320 to the Hog's Back (A31 junction) in the Road Investment Strategy (RIS). Traffic using the A3 has a significant impact on Waverley and so it is essential that these impacts are mitigated.

As a more general comment, the Council would welcome confirmation that in the detailed assessment of any more significant sites that may have cross-boundary impacts, the impacts on Waverley's infrastructure and services will be considered and, if necessary, addressed.

Conclusions

To confirm our response to the 2014 draft Guildford Local Plan, Waverley acknowledges the considerable effort that Guildford is seeking to meet its identified housing needs and supports the number of homes per annum proposed in the plan which would meet the objectively assessed needs in the SHMA. However, future developments in Guildford have the potential to have an impact on Waverley, both individually and cumulatively.

The Council would again like to stress the importance of and our commitment to continued joint working and liaison between Guildford and Waverley as our respective new Local Plans reach a critical stage.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy E1 states that Guildford will provide for an additional 3,200 additional B Class jobs to be delivered through the allocation of between 37,000 and 47,000 sq m of B1a/b floorspace and between 4.7 and 5.3 hectares of industrial (B1c, B2 and 88) land which is the need identified in Guildford's recent Employment Land Needs Assessment (ELNA) and as such we have no objection to this.

Policy I2 - Supporting the Department for Transport's "Road Investment Strategy" and 13 - Sustainable transport for new developments

Waverley and Guildford Borough Councils have worked closely recently with each other on transport issues, for example by jointly commissioning Surrey County Council to produce the 2016 Strategic Highway Assessment to inform both authorities' Local Plans. The RIS schemes for improvements to the A3 will have an indirect, but nonetheless important impact on the Strategic Road Network as it affects Waverley. The Council would therefore wish to add its support to that of Guildford Borough for the RIS as well as recognising the need for continued liaison between the Boroughs, the Highways Authority and Highways England on the nature and timescales of the A3 improvements.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P1 - Surrey Hills Area of Outstanding Natural Beauty

The Council supports the approach to the Surrey Hills Area of Outstanding Natural Beauty (AONB) and Areas of Great Landscape Value (AGLV) set out in this policy to that is to keep the boundaries for both until such time as a review by Natural England is undertaken, as it mirrors that of Waverley in its emerging Local Plan Part 1.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
**Policy P2 - Green Belt**

The Council notes and welcomes that Guildford has undertaken a review of its Green Belt in accordance with National Policy Guidance. We also note that Guildford intends to continue to protect the Green Belt, but with some villages to be inset from the Green Belt and six strategic sites in the Green Belt identified for development. The approach of insetting some villages to allow limited infilling is supported as this is consistent with the NPPF. The Council notes the intended removal of some strategic sites and the proposed extension of Green Belt around the Ash and Tongham area. Whilst these changes are mentioned in the supporting text, it would be clearer if they were stated more explicitly in the policy itself.

PROPOSED SUBMISSION GUILDFORD BOROUGH LOCAL PLAN: STRATEGY AND SITES
(REGULATION 19)

Thank you for consulting Waverley Borough Council on the above document. This response has been approved by the Council's Head of Planning Services in conjunction with the Planning Portfolio Holder.

Waverley acknowledges the valuable co-operation that has taken place between our two Boroughs over the last few years and it is appreciated.

Our comments are as follows:-

Policy S2 - Borough Wide Strategy

The Council supports the housing target set out in Policy S2 of providing for 13,860 new homes (693 homes per annum from 2011 to 2033) as this is the objectively assessed level of housing need for Guildford Borough in the West Surrey SHMA (September 2015). The Council also supports the provision in the plan of additional Gypsy/Traveller pitches.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Sites – in addition, we note that the A26 site (Blackwell Farm), to the west of Guildford, has been retained with a total yield of 1,800 homes, but that only 1,500 of these dwellings are expected to come forward in the plan period. Compton Parish Council has expressed concerns over the allocation in terms of potential highways impacts on local communities, including Binscombe and Farncombe within Waverley. Again, it would be important for any cross boundary impacts from the development on these communities to be identified and addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3632  Respondent: 15658145 / Waverley Borough Council (Elizabeth Sims)  Agent:
Sites – most of the sites proposed for allocation are some distance from Waverley and would therefore not lead to any impacts on the Borough. However, one of these (A29) would deliver 1,750 homes in the Ash and Tongham area, an increase of 550 from the 2016 version of the plan. This includes a development at Grange Farm close to the junction of the A31 and the A331 and close to the boundary with Waverley. There is a current cross boundary planning application (WA/2017/1050) for up to 254 residential dwellings (in Guildford) plus SANG (in Waverley) on this site. As stated previously, it would be important for any impacts from this allocation, including impacts on the Thames Basin Heaths SPA to be addressed in this or any subsequent planning application.

<td>Policy E1 – It is noted that as a result of updated evidence on Employment Land Needs, the amount of Classes B1 a and b floorspace and Classes B1c, B2 and B8 land have been reduced, although the number of jobs to be created has been increased from 3,200 to 4,100. We are unclear how such a large increase in jobs is to be achieved whilst reducing the amount of land allocated, but we presume that this is due to higher job/floorspace densities as a result of technological innovation. It would be helpful if this could be explained.</td>

Policy P2 – In our response to the 2016 version of the plan, we suggested that it would be helpful if the intended removal of some strategic sites and the proposed extension of Green Belt around the Ash and Tongham area were explicitly referred to in the policy as well as in the supporting text. We note that this suggestion has not been taken up.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Woking’s unmet housing needs

The Council notes that, on the basis of the West Surrey SHMA: Guildford Addendum Report 2017, the amount of new housing that the plan provides for has reduced from 13,860 homes over the period 2013-33 (693 per annum) in the 2016 version of the plan to 12,426 new homes from 2015-34 (654 per annum) in this new version. This is a reduction of about 1,400 homes. As you will be aware, the Waverley Local Plan Part 1 (LPP1) was submitted for examination in December. This sought to provide 9,861 homes in the period 2013-32 or 519 homes per annum. Hearing sessions have just concluded and the Inspector has provisionally concluded that Waverley should increase its housing provision to 590 homes p.a., which includes a significant uplift to address affordability issues and making provision for 50% of Woking’s unmet need for the period 2013-2027 (1,575 homes, or 83 dwellings per annum over the plan period 2013 to 2032). Whilst the Inspector made it clear that he was not examining the Guildford Local Plan, he added that Guildford would be strongly pressed at the examination into its Local Plan into why it is not intending to meet some or all of the remaining unmet needs arising from Woking.

In light of this, the Council would strongly recommend that you give further consideration as to whether Guildford BC can also make an appropriate contribution towards meeting the unmet needs of Woking. The Council understands that the revised plan includes a housing buffer of about 10%, which shows that there is already capacity to meet some of Woking’s unmet needs. in addition, it is noted that a number of sites that were included in the earlier draft Local Plan have been dropped from the latest plan for various reasons. Given the unmet need from Woking, it is anticipated that your Council may be challenged to justify why none of these sites are capable of making a contribution towards unmet needs.

During the Examination hearings, the Council identified some potential modifications to address concerns raised by the Inspector. These include a potential modification to clarify that the land between Aaron’s Hill and Halfway Lane, indicated on Plan 2 of Waverley’s submitted Local Plan, can be removed from the Green Belt in LPP1, allowing the Waverley portion of the promoted site to be allocated. The Council recommends that Guildford BC reconsiders its position on this site to allow, preferably, a joint scheme to be progressed across both authorities. The resultant development could also contribute to helping Guildford to meet the unmet needs of Woking.

Policy H1 - The proposal to require 15% of all new homes on sites of 25 homes or more to be accessible dwellings is supported, as is the requirement that 5% of homes on sites of 100 homes or more to be self build or custom build pots if there is a need.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The absence of the presentation of robust evidence for the alleged housing numbers – this is either down to the fact that the Guilford Borough do not know what they are doing, or symptomatic of everyone with a financial interest in this getting their noses in the trough. Whatever, it is simply unacceptable.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Specifically I object to:

- All and any erosion of the green belt
- The site at A43 Garlicks Arch
- The site A43a, the on and off ramp at Clandon, which will cause increased traffic problems in the villages.
- The site A45 The Talbot, this constitutes overdevelopment of a conservation area.
- Site A57, The Paddocks – which is unlawful.
- Any in setting of villages from the Green belt is an outrage; it is the same as removal destroying the historical fabric of the area.

I OBJECT to the removal of 15 villages, including Ripley and Send, from the green belt. This will lead to wholesale, and often inappropriate developments.

I OBJECT specifically to Ripley and Send Villages being removed from the Green Belt. The green belt was intended to be permanent, as required by the National Planning Policy Framework, and there are no special circumstances to justify abandoning it. Send’s Green Belt provides an essential buffer stopping Woking and Guildford becoming on conurbation. Local councillors and central government gave a clear election promise to protect Green Belt ad this reneges on it, Developers will be quick to take advantage and there will be nothing to stop them.

I OBJECT to building 45 houses at Clockbarn Nursery because of the inadequate access and traffic volume. Tannery Lane is far too narrow and twisty to take and more traffic. The junction with Send Road is already very hazardous for vehicles trying to join the main road. Planning permission has previously been granted for 64 apartments at the Tannery and for building a marina, both of which will generate additional heavy traffic. The lane cannot take any more traffic. The junction is too dangerous already and will be made much worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43.30 the proposed development of Garlicks Arch designated for 400 houses and an industrial estate. This is a new site not included in the Regulation 18 draft and has NOT been consulted on previously. It is not only permanently protected green belt but also a site of ancient woodland with some trees planted in the 16th century. The site floods and is covered by ancient woodland. The industrial space is not needed but if it were it should be at Slyfield.

Guildford’s housing requirements have been shown to be grossly over exaggerated and they have refused to disclose their calculations. With proper use of brownfield sites this Green Belt is not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/7646  Respondent: 15658497 / Philip Williams  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to policy A43.30 the development of new four way interchange onto the A3 which would mean that narrow Send Road (A247) would be the main route for traffic leaving the M25 and A3. It is already crowded and vulnerable to traffic jams. Further traffic from this development would result in permanent gridlock. It simply would not work. Send would have to take traffic from the proposed 2000 new houses at Wisley Airfield, 2000 houses at Gosden Hill, Burpham and 1850 at Blackwell Farm. Much of this traffic to and from the A3, M25, Woking and Guildford would go through Send. Send Road, which is already overloaded, would become gridlocked. Noise and pollution levels, already at excessive levels, would worsen. This must be avoided.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7647  Respondent: 15658497 / Philip Williams  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT to policy A44 which would see 40 homes and two travellers' pitches on land west of Winds Ridge and Send Hill. This was again a NEW site NOT included in 18 draft and therefore has NOT been consulted on previously. Once again this is Green Belt land partly containing unsafe landfill. Access is by a narrow lane which could never take the volume of traffic that would ensue from traveller's pitches. It is an inappropriate location because the narrow width single access country road provides insufficient access. The subsoil of the proposed site contains documented unsafe landfill waste registered at GBC. Any development there would spoil a high amenity area set in beautiful countryside.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I refer to the proposed SANG at Tyting Farm and the response from Tyting Society dated July 2016.

I am a member of this society as I am the owner of a house on White Lane [address redacted] which lies on the Western boundary of the proposed access path down from White Lane to the proposed SANG ("WL path").

I fully support the response that the Tyting Society has provided.

I would like to add some clarification to the second point raised in the response - namely "minimising footpath disruption". Having read the guidelines for individual SANGs there are two "must haves" that I think are particularly relevant.

The first is "a circular walk around the SANG" - this will be met without the need for the WL path. Indeed this seems to add another leg that would take the walker back out of the SANG, which appears illogical.

The second is that "paths must be easily used and well maintained". This raises two concerns about the proposed WL path. The primary issue is that the ground for this path is currently heavily overgrown with mixed quality of fencing, and no access point through the fencing at the Southern end. Therefore appropriate fencing will need to be established on both Western and Eastern incurring a significant one-off cost. Thereafter this path will need to be maintained, entailing annual costs.

The secondary issue is that this path does not pass the test of "easily used" as the only way to access this will be from the path to the North of White Lane, which in turn can only be entered from the western end near Halfpenny Lane, or the eastern end by the car park at the end of White Lane. Both of these access points provide a base via existing paths for accessing the circular walk around the SANG, so rendering the White Lane access path basically redundant.

The combination of these two points is that if GBC persists with the extra access, when there is no mandatory requirement to do so, then it is highly likely that this will incur significant capital and running costs with minimal pedestrian traffic using WL path. Such a scenario would reflect badly on GBC’s use of funds for this purpose, compared to other more pressing needs.

If you would like further expansion on these points I would be happy to attend any relevant meetings.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPA16/4101  **Respondent:** 15661729 / Jaqueline Tolley  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I wish to lodge my comments on the Guildford Local Plan and how it relates to the Horsley area.

1) There has been no valid reason presented to change the Horsley green belt status.

It appears to be driven by developer's desire to get hold of cheap land. What is the point of identifying areas to be protected with green belt status if it can be removed simply. Residents will surely mount a legal challenge to any such change in status.
2) Road infrastructure inadequate already.

Plans to introduce substantial increases in traffic with new housing to the A246 and Ockham Road (both North and South) are ill conceived. At the junction of the the A246 and Ockham Road South we regularly have traffic jams simply to the volume of traffic. In the morning the queues stretch from the junction back along the A246 towards Leatherhead around the corner past the Thacher's Hotel. In the evening this is compounded by traffic coming south off the A3. In less than 200 yards on the A246 around that Ockham Road junction there are 8 entrances/roads. Proposals to increase the volume here is crazy without a major change to the layout. Sight lines on the junctions are already too short and the proposed Thatchers hotel development in particular looks questionable as the hotel will still be operational. Similarly the Bell & Coleville roundabout is already overstretched as it takes the Cranmore school load for parents doing u turns.

3) The estimates of population growth are clearly exaggerated as they far exceed national and even other local area expectations. The failure to publish the model simply underlines this concern. Publish or be damned is surely the right view. To base plans on a projection that cannot be critiqued is plain wrong. I used to work in the City and always had to provide sources for any assertions.

We would like to highlight the wonderful care home development currently being completed on Kingston Road, Leatherhead. This site used an old police station so had minimal green space around it, with minimal impact on the surrounding areas and has created numerous residences. My key point there are plenty of sites (brown sites) that are already developed so would present no impact on green spaces. Building on gardens is a cheap and nasty way - force the developers to redevelop existing sites by limiting the availability of green belt and other similar land.

Guildford council should be more open to the conversion of commercial property to residential.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Target housing number.

The target housing number is unsubstantiated, is nearly 70% higher than current official national estimates for population growth in the Borough and should be reviewed in the light of the referendum result to leave the EU (with the stated intention of reducing immigration associated with EU membership).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/4104  Respondent: 15661761 / Rob Harris  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Changes to settlement boundaries.

Similarly, the extension of the Settlement boundaries around East and West Horsley has inadequate basis and will just result in further diminution of the Green Belt of the Borough.

The extent of the proposed new housing within the extended boundaries of East and West Horsley, associated with the proposed village to be created on Wisley Airfield, will have the effect of creating a single town out of 3 existing villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Removal of greenbelt status.

Regardless of the target housing number required, there are still inadequate “exceptional circumstances” to justify removal of the Green Belt status from any areas of the Borough.

Consideration should be given not only to the next planning period, but also to the rest of the century. At this rate of development, the Borough will be largely built upon within the lifetime of children born this decade. This is an unacceptable situation that should be resisted.

Strategy for location of development.

The destruction of the villages into which the existing inhabitants moved is wrong as it involves a complete change of the environment within which they live.

An increase in the size of Guildford makes a larger town, but does not alter the basic style of living of the people involved. This is a far more appropriate strategy for any development that the Borough needs to absorb.

Wisley Airfield and Gosden Hill Farm.

For the reasons covered above, such extensive development should not be considered as they are unlikely to be needed when a realistic target housing number is established and the greenbelt status reconfirmed.

Thank you for your consultation on the above dated 06 June 2016 which was received by Natural England on 06 June 2016.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

Habitats Regulations Assessment

Natural England have no comments to make on the Habitats Regulations Assessment accompanying this Local Plan submission.

Sustainability Appraisal

On page 9 of this document, there are a list of Sustainability Objectives by which the Local Plan is judged. Natural England are generally supportive of this list, however we have one minor suggestion to make. With regard objective number 1, Natural England would suggest this is renamed as “Maintain, conserve and enhance biodiversity and the natural environment”. It is obviously very important to conserve and enhance biodiversity, but it is equally important in some cases to maintain and preserve what is already present on the site.

### Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of the Former Wisley Airfield from the Green Belt. No exceptional circumstances have been demonstrated.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to inclusion of the former Wisley Airfield, now known as Three Farm Meadows, creating a policy seemingly to counteract the fact of the planning application already being refused by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Sustainability

There are limited employment opportunities within the village, and residents will need to commute to a place of work. This will either be via car (see transport above, with impact on local highways), or via train. The environmental burden of these additional journeys has not been considered in the sustainability assessment.

Village character

The proposed high-density housing sites are totally out of character with the current low density settlement, and will have a big impact on village life. This proposal is non-compliant with the national planning framework as the development does not respect the character and density of housing in the area.

Summary

The developments within the local plan do not take account of the availability of infrastructure or local facilities, nor are they in line with the character and density of housing in the area. I therefore strongly oppose these proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infrastructure

The level of development proposed within East and West Horsley represents an increase by 35% and is such that the village cannot accommodate that level of development without major investment in infrastructure and other local provisions, especially schools, medical facilities and sewage facilities.

Public Transport

Public transport links East and West Horsley are the train line and infrequent bus service.

The north-bound platform of the train station is not accessible to the frail, disabled, or those with young children as there is no step-free access. Any one travelling London bound, or returning from Guildford who is unable to use the bridge cannot use the Horsley train station and is advised by national rail to get off a stop early (or late) and catch a taxi from Clandon. The provision of a step-free pedestrian bridge over the railway would be required for a sustainable development.

Car parking in the station will also need to be extended to accommodate the additional volume of cars expected from the new sites within the village and Wisely airfield.

Highways

No details have been given on what is planned for the “East Horsley and West Horsley traffic management and environmental improvement scheme between 2019 and 2023”.

The road network into and around the villages will require significant investment to take the higher volumes of traffic.

Access to the villages is through two routes: ‘The Street’ through West Horsley and B2039 through East Horsley. Both narrow to such an extent that there is not sufficient space for two highway lanes, and road markings disappear. In order to allow the higher volumes of cars pass one-another, the roads will need to be widened to accommodate the increased volume of traffic.

A3 northbound junction at Wisley. Due to the proximity to the M25 junction, there is a conflict between road users travelling London bound from Guildford moving into the A3 exit slip lane to join the M25, and joining the A3 at this junction. The additional volume of traffic joining at this junction will exacerbate current congestion and is likely to lead to more accidents without major investment and re-routing of this junction.

Drainage / Sewerage
The sewerage network within the village is unable to cope with the additional demand from the proposed developments, and will require significant investment to meet this additional load.

**Flooding**

There are areas within the village which are within flood zones 2 and 3, measures are required to ensure current housing does not become more prone to flooding, and water can drain freely (see drainage above).

**Medical facilities**

There are possible proposals to extend the Kingston Avenue Medical Centre. This medical facility is already extremely busy, and an extension at least in proportion to the increase in residents is required to ensure that all village residents have access to essential healthcare services.

Due to proposed additional residents within the Guildford area, major investment will be required within the Royal Surrey County Hospital to accommodate this.

**Schools**

The local plan does not address the additional expansion of educational services required to meet the needs of the extra residents. Currently schools and educational services already experience waiting lists. There is one comprehensive school (Raleigh) within the village which is already full. This will need investment to accommodate the significant number of additional residents.

Given the main secondary school within the area, Howard of Effingham, will have a significant volume of additional houses within its wider catchment area (which is not just limited to East and West Horsley), provisions desperately need to be increased to ensure that sufficient education is available for the larger population.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Green belt area**

The area is designated Green Belt, and the proposed local plan is non-compliant with the National Planning Policy Framework as the very special circumstances for building on Green Belt have not been met.

The green belt area is the defence from greater London urban area encroaching on the surrey country side and protecting the surrey hills area of outstanding natural beauty.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I welcome the removal of sites A36 and A41, however the amendment fails to address the issues stated in my previous letter on the following sites:

Former Wisley Airfield (site A35)
Bell & Colvill (site A37)
Manor Farm Site (site A38)
Ockham Road North (site A39)
Ockham Road North (site A40)
Garlick’s Arch (site A43)

In particular, the amendment does not include sufficient provisions in local infrastructure (road network, sewage, medical facilities, and schools) to accommodate the additional demand driven by these proposed sites. These issues have been clearly outlined in my previous communication with you (17/07/2016) and have not been addressed in the revised plan. I also strongly object to the removal of greenbelt classification within this area, and the exceptional circumstances required to change this status has not been met within the amendment.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans. But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to the Guildford Local Plan 2016

I object to the Local Plan as 13,860 new houses without adequate infrastructure will damage this area of Surrey in many ways (Policy S1) - it is not sustainable:

- There are insufficient schools and hospitals in the area to accommodate this number of homes - it will bring around a minimum of 50,000 people to an area which is rural/semi-rural and green belt. I object to the destruction of green belt for planning purposes. We have green belt in order to protect greenbelt areas... this makes a mockery of have green belt areas in the first place. Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance. The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

- The surrounding roads will be absolutely backlogged with the additional traffic. The A roads and cut throughs through villages all leading to the M25 will be impassable in rush hour if you introduce this volume of people and their cars (because there is no infrastructure for public transport in these areas around Garlick Arch so they will have to all drive - all the parents, all their offspring, all their visitors).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The plan does not adequately fulfil the flood risks as advised by National Planning Policy. The Environmental Agency have stated that the site at Garlick's Arch (A43) is a higher flood risk than stated in the Council's Plan and this area has flooded many times in the past. I object strongly that the Council would ignore this considering the flood issues we have experienced increasingly over recent years!

I object to the destruction of Ancient Woodland and the wildlife that lives there. The Council have spent hundreds of thousands of pounds in Surrey redeveloping woodland and heathland to encourage indigenous species and I can't understand why they turn about face to destroy green belt now...? To destroy over 80 oak trees when oak trees are under threat in this country currently...

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the damaging of the local environment. People buy homes in these villages because they like living in a village environment with less traffic and less people. I object to villages being grown into each other so you have mass urbanisation and I object to it more so as the area is supposed to be protected from this development because it is green belt! There is no exceptional circumstances for Ripley, Send and Clandon to be removed as per National Planning Policy. You need instead to concentrate on developing the existing brown field site at Burnt Common whilst also considering the impact of this volume of housing and making provision for healthcare facilities and schools on the site to at least alleviate some of the pressures you will cause as a result of this impact in other surrounding areas and the local roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to express my concerns regarding the Green Belt status of the area mainly to the south of the A246 in East Horsley.

I feel it is important to retain areas of greenbelt to ensure the character of the areas around London is maintained. By reducing greenbelt the London area is being extended and the south east of England becomes one big suburban sprawl. There is no gain to be made by doing this.

In regards to the additional housing planned for the Horsleys and Wisley airfield the increase in housing is disproportionate to the size of the existing population, the roads and drainage would be unable to cope with this increase and there are also insufficient public services. The schools would not be able to handle the influx nor would the surgery or local hospitals.
It does not seem that the plan is suitable to the area.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the removal of 15 villages, including Ripley and Send, from the green belt. This will lead to wholesale, and often inappropriate developments.

I OBJECT specifically to Ripley and Send Villages being removed from the Green Belt. The green belt was intended to be permanent, as required by the National Planning Policy Framework, and there are no special circumstances to justify abandoning it. Send’s Green Belt provides an essential buffer stopping Woking and Guildford becoming on conurbation. Local councillors and central government gave a clear election promise to protect Green Belt ad this reneges on it, Developers will be quick to take advantage and there will be nothing to stop them.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to building 45 houses at Clockbarn Nursery because of the inadequate access and traffic volume. Tannery Lane is far too narrow and twisty to take and more traffic. The junction with Send Road is already very hazardous for vehicles trying to join the main road. Planning permission has previously been granted for 64 apartments at the Tannery and for building a marina, both of which will generate additional heavy traffic. The lane cannot take any more traffic. The junction is too dangerous already and will be made much worse.

I OBJECT to the fact that the Local Plan takes no account of schools, doctors surgeries and roads that are already operating at full capacity. Another 4000 houses in this area with a conservative estimate of a further 8000 cars would be catastrophic.

I request that my comments are shown to the planning Inspector who will decide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7708  Respondent: 15665697 / Elizabeth Cross  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

I OBJECT to Policy A43.30 the proposed development of Garlicks Arch designated for 400 houses and an industrial estate. This is a new site not included in the Regulation 18 draft and has NOT been consulted on previously. It is not only permanently protected green belt but also a site of ancient woodland with some trees planted in the 16th century. The site floods and is covered by ancient woodland. The industrial space is not needed but if it were it should be at Slyfield. Guildford’s housing requirements have been shown to be grossly over exaggerated and they have refused to disclose their calculations. With proper use of brownfield sites this Green Belt is not needed

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7710  Respondent: 15665697 / Elizabeth Cross  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a
**I OBJECT** to policy A43.30 the development of new four way interchange onto the A3 which would mean that narrow Send Road (A247) would be the main route for traffic leaving the M25 and A3. It is already crowded and vulnerable to traffic jams. Further traffic from this development would result in permanent gridlock. It simply would not work. Send would have to take traffic from the proposed 2000 new houses at Wisley Airfield, 2000 houses at Gosden Hill, Burpham and 1850 at Blackwell Farm. Much of this traffic to and from the A3, M25, Woking and Guildford would go through Send. Send Road, which is already overloaded, would become gridlocked. Noise and pollution levels, already at excessive levels, would worsen. This must be avoided.

**I OBJECT** to policy A44 which would see 40 homes and two travellers' pitches on land west of Winds Ridge and Send Hill. This was again a NEW site NOT included in 18 draft and therefore has NOT been consulted on previously. Once again this is Green Belt land partly containing unsafe landfill. Access is by a narrow lane which could never take the volume of traffic that would ensue from traveller's pitches. It is an inappropriate location because the narrow width single access country road provides insufficient access. The subsoil of the proposed site contains documented unsafe landfill waste registered at GBC. Any development there would spoil a high amenity area set in beautiful countryside.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The existing roads, schools and health facilities have no plan for funding set out in the plan to address 500 new houses.

Several of the new sites proposed extend the built area out into the countryside which is clearly damaging to the Green Belt where any new building is regarded as inappropriate in government policy.

The council are proposing new village boundaries which extend the built area outwards into the green belt again clearly damaging to the Green Belt where any new building is regarded as inappropriate in government policy.

The proposed new development has been focussed on West Horsley with no Special Purpose being defined as required by policy to promote development in the green belt.

The protection of Birds in the special protection area near Wisley requires special consideration within 5 km. All of the sites in West Horsley and the site at Wisley Airfield are within this 5km. Any new development requires the possible effect on the birds to be addressed by the provision of alternative open space to draw residents away from Wisley. Effingham Common has been identified to serve this propose but in order to be usable for this purpose it requires a public car park which it has not got. Common Rights and planning permission issues may well stop this ever coming forward. This puts in doubt the feasibility of the sites in the long term.

For all of the above reasons we object to the Local Plan and request that the minister addresses the green belt points and confirms that West Horsley remains a green belt village, recognises the uncertainty relating to the protection of the birds and that as a result removes the pink coloured sites as development sites from the plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

West Horsley is defined by Guildford Council as a Green Belt Village

Policies in the Governments National Planning Framework (NPPF) require that new building is regarded as inappropriate in the Green Belt.

These Policies also say that only limited infilling with Housing is appropriate.

Neither of these policies support substantial new development in the green belt.

The Councils Proposals total some 500 new dwellings in the green belt which is clearly contrary to the above policies.

<tr>
<td>In respect of the ‘Land at Aldertons Farm’, despite previous support from GBC the removal of the allocation from the previous draft is not supported. Compelling reasons for the site’s inclusion were previously put forward, accepted by GBC and still very much remain in place and we believe that the site is capable of providing a sensible option for growth within the Borough to help contribute towards the housing need in the immediate to short term. In addition, the previously allocated SANG provision would provide a key piece of infrastructure that would allow new homes to occupied without any reliance on any third party landowner. This SANG, the design of which has been approved in principle by Natural England, would provide 8ha of new publicly accessible open space for the benefit of new residents of any potential development and existing residents of the Village. The delivery of this SANG is further enhanced by the fact that both the residential and SANG components are under a single ownership which demonstrates deliverability.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
In summary and to reiterate:-

Aldertons Farm is for a 6.2ha site situated to the east of Aldertons Farm south of Send Marsh Road, Send Marsh. Barratt David Wilson Developments has a contractual arrangement with the landowners and as such, the site is deliverable once consent is issued and all planning conditions and obligations have been met. Barratt David Wilson Homes is one of the largest housing developers in the UK and has the funds available to make an immediate detailed planning application on this land should it be allocated. This site has the following benefits:

- It is available and deliverable in the short term (1-5 years)
- It is surrounded by residential properties on 3 sides
- It has an existing access off Send Marsh Road
- Capacity to provide for circa 120 residential units
- The site is in a sustainable location for housing
- Low risk flood zone (zone 1)
- No major ecology constraints
- No harm to the setting of Aldertons Farm
- Mature landscaping to key perimeter boundaries
- Adjoining SANG at Aldertons Farm (Site 106 – July 2014 draft LP) Design agreed in principle with Natural England. The SANG also has the capacity to allow other sites within 4km to come forward, therefore unlocking further supply.

Barratt David Wilson Homes (Southern Counties) has a proven track record of delivering high quality residential development in the south east of England and would seek to implement any planning consent on this land without delay, providing more certainty on delivery in years 1-5 of the plan period.

In terms of the present Green Belt status of the site, Paragraph 80 of the NPPF reinforces the five purposes of the Green Belt, as follows:

- to check the unrestricted sprawl of large built-up areas;
- to prevent neighbouring towns merging into one another;
- to assist in safeguarding the countryside from encroachment;
- to preserve the setting and special character of historic towns; and
- to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

Whilst any proposed development of the site at Aldertons Farm would clearly increase the size of Send Marsh, concerns over an ‘unrestricted sprawl’ would be allayed by the neighbouring SANG land which would likely be transferred to the council and thus preserve the status of the countryside to the western boundary. With the land abutting existing residential to the other 3 boundaries there is a clear, defined boundary with which to check any sprawl. The sites location would not lead to any pressure of merging with neighbouring towns.

The approach towards the allocation of smaller sites within the document is supported, as it assists in helping to bring a range of locations and options for growth to the Borough at a more measured and sustainable rate and a more certain supply of housing to allow time for the strategic sites to be delivered later on in the plan period.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Sustainability Appraisal – ‘Land at Aldertons Farm’

The Council have published their Sustainability Appraisal (June 2016) alongside the draft plan and the intention is that this SA ‘identifies, describes and evaluates’ the likely significant effects of implementing both the plan, and the ‘reasonable alternatives’.

The overall content of the SA demonstrates how the approach to ‘reasonable alternatives’ has been carried out and within the document, Table 6.2 ‘Spatial Strategy Alternatives’ reveals that a total of 8 Options were considered which all reflected the OAN with a range of alternative % buffers added. In 7 of the 8 Options the ‘Land at Aldertons Farm’ was included (Send Marsh amber rated sites) within the aggregate housing total and identified as one of the spatial strategy alternatives. With this being so, ‘Aldertons’s Farm’ was clearly assessed and determined to be a viable option for growth by GBC in several OAN scenarios and indeed, within the SA, Section 6.3 ‘A stepwise process to develop reasonable alternatives’, the alternative spatial strategies were assessed against both growth and location options and a footnote on page 29 to the comment of ‘best performing site of the three sites at Send’, states that:-

‘Aldertons Farm (c.100 homes) benefits from being located to the north of the village, away from the A3 (recognising the objective of avoiding continuous development along the A3 and maintaining the gap to Guildford’.

In light of the above, the decision therefore to omit ‘Aldertons Farm’ from its previous allocation appears at odds with the assessment given within the SA. The late decision to allocate ‘Land at Garlicks Arch’ (Allocation ref A43) in place of this appears contrary to ‘avoiding continuous development along the A3’ given its location and in a similar vein to strategic allocations elsewhere in the Borough, is subject to significant infrastructure coming forward to enable development. Namely, a new slip road and junction on to the A3 close to Burnt Common. Again, this places serious concerns over the reliability of supply derived from this site, particularly in the short term. Without getting into too much detail it is unclear whether the capacity of this site has been robustly tested. There are a number of technical constraints that need to be considered such as flood risk, noise disturbance and the presence of ancient woodland which could reduce the development footprint. It is also unclear if Highways England support new access arrangements onto the A3 in this location. It should be noted too that Allocation A43 was included at late notice and without prior consultation before it was reported to the Full Council meeting in May 2016.

In terms of comparing ‘Aldertons Farm’ with other sites that could come forward from ‘Inset villages and infill development within identified Green Belt villages’ within the SA, an accompanying ‘Site options Appraisal findings’ matrix is included within the appendices. When reviewing ‘Aldertons Farm’ against other sites which have been selected in the ‘Horsley’s’ for example, the number of ‘reds’ and ‘ambers’ are comparable, even though access to some of these other allocations is unclear and are also reliant on SANG within third party control before they can come forward. It seems perverse that Alderton’s Farm, an unconstrained and immediately deliverable site has been omitted from the plan in favour of site’s which do not appear to have a satisfactory access. (A38, A39 and A40). Whilst these ‘green belt villages’ are rightly identified as a source of supply, there appears little consistent rationale applied to the choice of site for allocation.

In view of the above there are serious concerns over the soundness of the plan in being able to demonstrate a 5 year supply of housing. The latest AMR states within Table 3 ‘Calculation of five year supply’ that only a 1.4 year supply of housing can be demonstrated and that it will not be until 2022/23 (at the earliest) that the OAN figure of 693 is met. From the base date of 2013/14, and just in the first two years of the housing land supply, a deficit of 1007 homes against the OAN figure of 693 has already accumulated.

The allocation of the Alderton Farm site, promoted by a national housebuilder, would provide an immediate source of supply in years 1-5 and go some way to addressing the immediate shortfall.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy H1 – Homes for All

Barratt David Wilson Homes support this Policy and welcome the aims of providing a wide choice of homes and a mix of tenures, types and sizes as appropriate to the site location.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

This Policy acknowledges that the delivery of the Local Plan hinges on the provision of infrastructure (Transport, Utilities, Green Infrastructure, Education, Emergency Services, Health & Social Care, Community Facilities, Waste Transfer) and that this should be provided and available when first needed to serve occupants and users of the development. Furthermore, the Policy states that GBC will prioritise Thames Basin Heath SPA Mitigation when allocating CIL receipts.

The Infrastructure Schedule (Appendix C), sets out 13 SANG allocations, including 3 current spaces. It is important for there to be clarity on the remaining 10 spaces in respect of the timing of their delivery, particularly in instances where the SANG in question and the development allocations reliant on them are in different ownership, as it is crucial that these elements of green infrastructure are brought forward in time and in a coordinated manner.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Whilst there is general support for the aims of this proposed policy, given the high prevalence of Green Belt within the borough and the comments referred to in Policy S2, it is considered that in order to support further long-term growth needs, it should not rule out a suitable review mechanism in the future. In the event that any sites proposed in this document were to stall or fail to come forward for any reason there needs to be an effective tool in which to review the Green Belt boundaries.

It is also critical at this point to support the message within paragraph 4.3.16, which states that ‘we (GBC), consider that exceptional circumstances exist to justify the amendment of the Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development.’

Answer (if comment is on questions 1-7 of the questionnaire): ()

In respect of the main body of the plan, Barratt David Wilson would like to make the following general comments below in regards to the content of the plan;

Policy S2 – Borough Wide Strategy
Whilst the provision for 13,860 new homes in the Borough across 2018-2033 is supported, Policy S2 does not indicate where housing supply will come forward between the present day and 2018. Table 1 within the supporting policy text assumes that by 2018 a supply of housing will immediately be realised from the settlements identified within the table, despite the fact that we estimate that of the 13,652 homes identified, over 60% are derived from strategic allocations where a ‘loose’ delivery period of 1-15 years is indicated. This admission alone suggests there is no clear certainty as to when these allocations may start delivering housing numbers and there needs to be a clear delivery of sites in years 1-5 of the plan.

Crucially these strategic allocations are also all heavily predicated on significant infrastructure projects coming forward to enable development, and, as such, question marks must be raised towards the numbers being realised at the rate assumed in the annual housing target. With such a heavy reliance towards strategic allocations and a well-documented historical under supply of housing across the Borough since the 2003 Local Plan, the assumption of 500 homes being delivered in 2018/19 and a further 550 homes in 2019/20, is considered to be extremely ambitious and unachievable. Indeed, it is not until year 2022/23 that the OAN figure of 693 is forecast to be met (700 homes) and this leads to a scenario whereby the OAN will not be achieved for 6 years from where we stand in the present day. Paragraph 4.1.10 acknowledges the point that the forecast housing number is ambitious stating, ‘this (housing delivery) is a higher level of development than experienced in Guildford borough during the previous Local Plan period’.

This point is reinforced by evidence within the most up to date Annual Monitoring Report -2014/15 (October 2015), Table 1 illustrates the completions of new homes in the Borough from 2006/07 through to 2014/15. The continual undersupply of housing completions is evidenced by the fact that between the years 2008/09 through to 2014/15, a total of 1420 new homes were built in the 7 year period, at a rate of 203 per annum, which is way below both the interim housing number of 322 per annum unilaterally agreed in May 2012, and is less than a third of the OAN option figure of 693 per annum supported within the Sustainability Appraisal and Housing Market Assessment carried through in to this present draft Local Plan (July 2016) Policy S2.

In light of the above paragraph, whilst the provision of 13,860 is welcomed, it does not go far enough in terms of addressing the OAN and includes no buffer provision in the event of allocated sites failing to come forward. This figure needs to be upwardly revised to capture historical evidence and the heavy reliance on strategic sites.

This historic undersupply and poor track record of delivery coupled with the heavy reliance on strategic allocations places serious concerns about the soundness of this draft plan in respect of its ability to identify a 5 year housing supply and indeed the total housing numbers identified. These numbers need to be supported by sites which can come forward early in the plan period, as endorsed within paragraph 6.3.15 in the Sustainability Appraisal which states:-

The need to distribute growth in a sequential fashion, in-line with the established hierarchy of places, is an important consideration when examining the ‘reasonableness’ of a given distribution option. However, there are also other considerations. Notably, there is a need to support sites that:

1. A) are deliverable, in that homes can be delivered particularly early in the plan period;
2. B) bring wider benefits through the delivery of strategic infrastructure; and/or

This paragraph makes it clear that whilst it is important to distribute growth in a sequential manner, according to hierarchy of places, there are also other considerations which should include sites which are deliverable, especially early on in the plan period. The point is essentially to consider a wider choice of the ‘type’ of site that could contribute to the housing supply, to provide a broader range of options should other sites stall, or fail to come forward for any reason.

It is also not clear within the main body of the document how the homes identified within ‘inset villages and infill development within identified Green Belt Villages’, will address the need of SANG provision if required. It is not clear whether adequate SANG provision will be available in time to serve these allocations and again, if they are reliant on larger strategic SANG coming forward, it is unlikely that they will come forward in a coordinated manner if they are in different ownership. No new housing can be occupied until the SANG is provided.

The Local Plan seeks to allocate a number of large strategic sites to deliver around two thirds of their housing requirement in the plan period. In terms of delivery period, the council suggests these sites will be delivered between years 1-15 which
is wholly unlikely. As one of the largest housing developer’s in the UK, Barratt David Wilson has considerable experience in bringing large sites forward and understands the complexities and time it takes to do so. Whilst there is no objection to this overall strategy and there is some logic that larger sites are better placed to provide key infrastructure, it has to be recognised that they take much longer to deliver.

The sites at Gosden Hill Farm and Blackwell Farm require considerable elements of key infrastructure such as new junctions onto ‘A’ classified roads and new train stations requiring the co-operation of Highways England, National Rail and landowners.

Whilst it is right that developments of this scale would need to mitigate their impacts such significant items of infrastructure are complex and difficult to agree and deliver. Such key elements of infrastructure would be substantial and would probably need to be delivered before new housing could be occupied which could easily take 2 years from any detailed consent. To suggest that housing from these sites could be delivered from year 1 would assume that an outline application is submitted on adoption of the plan, approved, then reserved matters applications submitted and approved, conditions discharged, work started and houses occupied – all within 12 months which is unrealistic. Given the complexity of the sites it has to be highly unlikely any housing completions would be derived from these sites within the first 5 years of the plan. The delivery period for these sites should be years 5-15.

Land at Wisley Airfield

Notwithstanding the fact that this site does not represent a logical or sensible allocation in terms of its irregular shape and relationship with existing land uses, again there are significant infrastructure issues to be resolved with Highways England on this site particularly with access improvements to the A3 and Junction 10 of the M25. The Guildford Borough Transport Strategy 2016 which forms part of the evidence base of the local plan suggests that improvement works to this junction would not be complete until 2022.

An outline planning application was refused by GBC earlier this year for a number of reasons, one of which was impact on the A3/M25. If the proposal is reliant on M25 Junction 10 improvements to be in place before occupation of units, housing could not be delivered from this site until 2022. Again the delivery period for this site should be years 5-15.

Land to the south of Normandy and north of Flexford

This would be a highly visible development in a sensitive landscape setting. There are other development options that do not have such a degree of landscape impacts. It is clearly for the council to judge whether the provision of key infrastructure such as a secondary school, outweigh the harm to the landscape. Again, should the site become allocated, given the scale and complexity of the proposals, it is unlikely that housing could be delivered in the first 5 years of the plan.

Given the comments above, we believe that consideration needs to be taken towards allocating further, smaller sites which are more likely to provide certainty of delivery in the short term in order to help address the immediate housing need.

CONCLUSIONS

This submission is made in representation to Guildford Borough Council’s Draft Local Plan consultation (July 2016) by Barratt David Wilson Developments Southern Counties.

The proposed housing number of 13,860 for the planned period of 2018-2033 is supported as a minimum figure but requires increasing and modifying as per our comments on the section Policy S2. However, the reliance on a high percentage of strategic allocations to provide two thirds of the housing supply is objected to on the grounds that it could provide a very inflexible rate of housing supply, with little or no contribution until the back end of the plan period. The requirement for major infrastructure to support these strategic allocations coming forward does not take in to account viability, land availability and finance and is reliant on several stakeholders and landowners working in a collaborative manner.

Barratt David Wilson Homes welcome the sensible release of Green Belt sites across the Borough but believe consideration should be given to applying an appropriate buffer given the councils historic and consistent under supply. This will provide further options and choice and to provide housing in the nearer future. The housing need is now and not in years 10 to 15+.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Whilst we support the Council’s intention in seeking to meet its objectively assessed housing need, we believe that further modifications are required before the plan can be found sound. The fact that the housing numbers are heavily ‘back loaded’ causes concerns that the immediate significant shortfall in the housing land supply is not addressed and that a five year housing supply is unlikely to be achieved which is a requirement of the adopted plan. The reliance on bringing key items of infrastructure forward for a significant proportion of identified sites poses a risk on supply coming forward early in the plan period at a sustained rate and does not allow for choice or competition within the market.

There also appears to be several inconsistencies within the spatial strategy and between comparable sites that have been allocated and those that have not. The plan needs to identify more sites that are deliverable in years 1-5 of the plan period.

The reduction in the housing requirement is unsound because it is not justified.

The deletion of the strategic site in Normandy/Flexford appears to have influenced the decision to reduce the overall housing target to 12,426 homes, from the 2016 draft Local Plan target of 13,860 homes. However, the justification put forward for this revised figure is considered to be weak and made despite strong evidence to the contrary which supports the previous 2016 target as a minimum figure, including:

- a chronic shortage of housing across the Borough,
- market signal across the HMA, highlighting affordability issues through lack of supply,
- evidence across the wider HMA that the identified unmet need from Woking BC has failed to be adequately addressed

The reduction of the overall housing figure is based on the whole premise of weaker economic and job growth forecasts in GBC. Crucially, it fails to consider the level of job growth elsewhere in the HMA and other neighbouring areas. The latest SHMA addendum only examines economic growth scenarios for Guildford and does not consider the implications for the rest of the HMA or, indeed, whether lower growth forecasts are applicable across the HMA. As Planning Practice Guidance sets out that employment trends and growth in working age population should be considered across the HMA, the approach taken by Guildford is not consistent with national policy.

The Housing Trajectory table (Land Availability Assessment – June 2017) states that in years 2017/18 and 2018/19 a housing provision of 310 and 309 could potentially be yielded from approved and commenced planning permissions. Moving forward to year 2019/2020 this increases to 576 homes but each of the first 3 years of the plan are well below the ‘original’ annual target within the West Surrey SHMA (2015) of 693 – revised down to 654 in the 2017 addendum. Given the poor track record of delivery of housing in the Borough, the fact that the 654 (or 693) figure would not be exceeded until 2021 (at the earliest), does not provide confidence that the undersupply of housing will be properly addressed over the first 5 years of the plan.
Furthermore, the new paragraph 4.1.9a (page 30), states that the figures in the Annual Housing Target table sums to 12,426 homes. This statement is not true. The figures sum to 9,810. To sum to 12,426 the target of 654 dpa must be included for the first four years of the Plan period which isn’t the case. Whilst this is recognised in the 2017 Addendum to the Land Availability Assessment (LAA) the Council must be clear in the policy and supporting test to ensure that the deficit accrued during this period is properly considered.

Our concerns regarding the deliverability of the plan are exacerbated given the fact that the Council cannot show a sufficient supply of land for the first 5 years that the plan will be in operation. In the Housing Topic Paper the Council have not stated whether they propose to use the Sedgefield or Liverpool approach to assessing five year supply. It would appear that the Council will be looking to address backlog over the full plan period (The Liverpool method). This is not the approach favoured in the NPPG. In order to accord with national policy, the Sedgefield method should be used to ensure that the backlog is delivered as quickly as possible and not ‘put off’ until later in the plan. We would agree with the Council’s application of the 20% buffer to take account of the persistent under delivery of housing in the Borough.

The plan cannot be found sound if it is unable to demonstrate a 5 year housing land supply and therefore the council needs to identify housing sites that are able to come forward in the first 5 years of the plan to meet the current chronic housing shortage in the Borough.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

By reducing the housing requirement in the plan to 12,426 new homes the Plan is unsound as the Council have failed to plan positively in relation to meeting the needs of neighbouring authorities.

We continue to have concerns regarding the Guildford Borough Council’s (GBC) co-operation with its partners in the Housing Market Area. Whilst Waverley BC is seeking to meet its needs, Woking BC continue to plan on the basis of their adopted Core Strategy. Woking’s Core Strategy sets out its housing requirement as 292 dpa, this is 225 units below the OAN as established in the 2015 West Surrey Strategic Housing Market Assessment. As such there is clearly a significant amount of unmet housing needs within Woking and that consideration needs to be given within the HMA about how this unmet need is going to be addressed. This issue was raised by the inspector as part of the examination of the Woking BC Core Strategy.

There is no evidence to suggest that GBC has considered the matter of Woking’s unmet need and as such the plan fails to pass the soundness test in terms of its duty to cooperate with neighbouring authorities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/4164  Respondent: 15666625 / Anna Ruddy  Agent:
1. I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick's Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/4167   Respondent: 15666625 / Anna Ruddy   Agent:

1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The "objectively assessed need" figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability and
- flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham's sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.
The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England's requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an "aspiration" in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7731  Respondent: 15666625 / Anna Ruddy  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (BB).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site.

There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.
National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick's Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the location for new employment floorspace at Garlick's Arch - Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick's Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

1. I OBJECT to the loss of rural employment (Policy E3)

Policy E3 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor "attractions" and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/"Disneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many "leisure and visitor attractions" already. The case for creating more is not made and no examples are given. Instead, the plan's explicit priorities should be:

1. To protect the borough's prime leisure and tourism asset, its countryside, from inappropriate This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford's river landscape less off-putting and support town-break packages for high-value To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

1. To help private providers market local touri This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An "English town break" (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.
2. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT {POLICY H1- Homes for all} Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council's timidity is a case of "regulatory capture" by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog's Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. POLICY H3 - Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the "mix" this can include "market" housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy 11)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.
1. I OBJECT to the lack of proper infrastructure planning for sites (Policy 11)

Policy 11 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents' in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy 12)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to poor air quality concerns (Policy 13)

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a 'special circumstance' and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC's Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding.

Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.
The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17110  Respondent: 15666625 / Anna Ruddy  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Borough Wide Strategy (Policy S2)

1. The borough wide strategy is poorly It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

1. The Housing number is based on pre-Brexit data for economic and population growth, including These now need to be revised downwards, possibly quite seriously.

1. The housing number is based on an arbitrary Housing Market Area (HMA): the "West Surrey" tri-borough area of Guildford, Woking and An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, "West Surrey" is much too small. Half of Guildford borough's residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside "West Surrey". Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make "West Surrey" reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour's "need". Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey's 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.
It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation of Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in a coalescence and merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Aside from the disregard for the Green Belt, there seems to be absolutely no consideration as to the impact that the construction of thousands of new homes (and the subsequent significant increase in the local population) will have on communities and in particular local infrastructure.

The Street in West Clandon, may for historic reasons be deemed an A road, but in reality is nothing more than a local B road. Traffic is already very heavy and the road in some parts too narrow which leads to large lorries and or coaches having to mount the pavement (in many cases at inappropriate speeds) to avoid the oncoming traffic. I have lost count of the number of occasions we have had to repair our fence over the past 12 years owing to cars that have lost control and driven through it. We have had to do so twice in the past 12 months alone. The significant increase in traffic that your plan would create will only make this road increasingly dangerous and I fear it is only a matter of time before somebody is seriously hurt, or worse killed.

I think too about the impact on local train services from Clandon station, especially at rush hour, where already commuters are forced to stand for significant portions of their journey to and from London. Also the pressures on doctors surgeries where even at the excellent Merrow Park surgery it can take 2 weeks or longer to book an appointment for anything other than an emergency.

This is not ‘nimbyism’ on my part. My ‘back yard’ is already over-populated. The roads are supporting more cars than they were originally designed for, rail services are overcrowded, doctors surgeries and hospitals are struggling to cope with the demands being made of them. This is not an exhaustive list.

Never has the Green Belt and the purpose for which it was introduced been so relevant.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
As a resident of West Clandon I am writing to object to Guildford Borough Councils 2016 Draft Local Plan. In itself the proposal to develop on land that is designated as Green Belt and as such intended as a buffer against the increasing pressures from ‘urban sprawl’ is of significant concern. It sets a dangerous precedent from which there would be no going back. If areas of Green Belt land are now so readily considered for development, what would be next, ‘Conservation Areas’?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

THPT is a Multi-Academy Trust which was created in November 2013 and is led by Howard of Effingham School which is an ‘Outstanding’ school and is a designated Academy Sponsor. As the first federation of schools in Surrey, formed in 2007 at the request of the Local Education Authority (LEA) and Department for Education (DfE), the school has a longstanding tradition of highly effective partnership working.
The Multi-Academy Trust is currently comprised of eight schools (three secondary and five primary – including infants and junior). THPT continues to be asked by the LEA and DfE to work with other schools to enhance on-going development of effective partnerships across both primary and secondary phases and to help raise standards of student achievement throughout Surrey. The Trust believes that integral to its on-going success is ensuring that staff and students have access to the highest quality learning environments and facilities.

The Trust is currently pursuing proposals, in partnership with Berkeley Homes (Southern) Ltd to secure new school premises for its lead-school in Effingham – Howard of Effingham School. These proposals were supported in the Draft Local Plan (2014) but have been refused planning permission and are subject to a current Planning Appeal.

These representations focus on the current Borough-wide infrastructure policy and site allocations for education in the Proposed Submission Local Plan, and the background documents which seek to justify those allocations. They begin with a review of National Policy, followed by a summary of our understanding of the Local Plan policies for education and its evidence base, and a review of that against the soundness tests in the National Planning Policy Framework (NPPF). They conclude that as drafted these policies are fundamentally unsound.

**National Policy**

Government policy since 2010 has placed an increasing emphasis on the role of schools as independent institutions in driving improvements in national education performance. The Government has strongly encouraged schools to become self-governing, through the promotion of Academies and the expansion of successful schools to maximise parental choice. Whilst Local Education Authorities (in this case, Surrey County Council) have a statutory role in ensuring sufficient school places in their areas, the 2011 Education Act included a presumption in favour of Free Schools and Academies providing these places.

This approach has been re-emphasised in the most recent Government policy. In March 2016, the new Education White Paper – Educational Excellence Everywhere extended the focus of the Coalition Government administration on driving national improvements by giving greater autonomy and leadership roles to Outstanding schools. The White Paper states that:

"We believe that the fastest and most sustainable way for schools to improve is for government to trust this country’s most effective education leaders, giving the freedom and power, and holding them to account for unapologetically high standards for every child, measured rigorously and fairly. This system will respond to performance, extending the reach of the most successful leaders and acting promptly to reduce the influence of those who aren’t delivering for our children. But it will also do more to set up these leaders for success, ensuring they have the necessary tools to seize the opportunities provided by greater autonomy and ensuring that for as it is required, support is available for them to draw on when they choose. This model underpins every one of the reforms set out in this White Paper” (para 1.14).

The White Paper promotes the role of Multi Academy Trusts in achieving this. Howard of Effingham School is the lead school in a Multi Academy Trust and is also an ‘Outstanding’ school in its own right. It has identified the need for new premises, both to maintain and enhance its role as an outstanding school, and also to meet additional local needs.

This approach to education policy is reflected in national planning policy. Paragraph 72 of the National Planning Policy Framework (NPPF) is set out in full below:

"The Government attaches great importance to ensuring that a sufficient choice of school places is available to meet the needs of existing and new communities. Local planning authorities should take a proactive, positive and collaborative approach to meeting this requirement, and to development that will widen choice in education.

They should:

Give great weight to the need to create, expand or alter schools;

Work with schools promoters to identify and resolve key planning issues before applications are submitted”.

The highlighted part of the text emphasises that local authorities should not just be planning for new infrastructure to meet the needs of development in their areas, but also expanding and improving schools to promote choice.
The NPPF and the Government’s earlier policy statement, Planning for Schools Development (2011), emphasise the need for local authorities and schools to work together pro-actively from an early stage to plan for state school development. Schools have an important role to play in the development of policy and priorities.

This adds emphasis to the Government’s requirement that one of the strategic priorities of local plans should be:

“the provision of health, security, community and cultural infrastructure and other cultural facilities” (para. 156).

Overall then, national policy places a very strong emphasis on the need to plan for the creation, expansion and alteration of schools, in a pro-active way, with schools themselves in order to enhance education standards and meet local community needs. As well as being consistent with National Policy, in order for plans to be found sound they must be positively prepared, justified against reasonable alternatives, and effective (deliverable).

 Proposed Local Plan Policy

Policy I1 of the Proposed Submission Local Plan sets out the Council’s preferred approach to infrastructure delivery, including schools. This cross-refers to an Infrastructure schedule at Appendix C of the Plan. The section on secondary school provision in the Appendix is set out on pages 300 to 302.

Compared with proposals in the Draft Local Plan (2014), the Proposed Submission Local Plan allocates land for three new secondary schools, all as part of new strategic developments. These include: a minimum 4FE school at Gosden Hill Farm Strategic Site; a 4FE school at the former Wisley Airfield (which has recently been refused planning permission); and a 7FE school at the Normandy/Flexford strategic site. Whilst the evidence identifies an immediate need for new school capacity, the Housing Topic Paper suggests that the majority of provision on these sites is anticipated post-2027 (paragraphs 4.162 and 4.126). The Proposed Submission Local Plan is silent on the need to expand or alter schools to meet existing and future needs and on how widening choice in education might be achieved.

Neither the Housing Topic Paper nor the Guildford Draft Local Plan Education Review (2016), which was also published alongside the Proposed Submission Local Plan, set out when schools would be likely to be provided on these sites, by whom and whether they can meet needs in a timely manner. Pages 576 to 581 of the Land Availability Assessment (LAA) (2016) undertake what we regard as a limited and arbitrary assessment of potential secondary school sites. In particular, it does not consider suitability, timing or deliverability of the sites concerned.

On the basis of these limited and superficial assessments, the Council has removed all three secondary school site allocations in the previous Draft Local Plan (2014), and replaced them with entirely new sites in the Proposed Submission Local Plan.

The Council did not, contrary to clear guidance from Government, seek to engage with Howard of Effingham School a known interested party with whom the Council had been involved in pre-application discussions on the proposals which are currently subject of a planning appeal, to identify its needs for expansion or alteration, or its views on existing education requirements, the emerging conclusions of the LAA or other local plan evidence base documents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
Soundness

It is therefore our view that the Council’s approach to education planning in the Proposed Submission Local Plan is fundamentally unsound, for the following reasons.

Failure to positively plan for education needs, including the needs of existing schools.

The Proposed Submission Local Plan and accompanying documents undertake a very high-level assessment of the need for school places but do not undertake any proper analysis of the timing of requirements or a proper matching of the location and nature of demand for places. Moreover, the only specific references to the Howard of Effingham School, and its ability to meet needs, in the appendix to the LAA (2016), are factually incorrect.

There is an existing shortfall of education capacity and the most recent School Organisation Plan (2015/16 to 2024/25) identifies rising demand for secondary school (Year 7) places across that period. As we have noted above, the Council suggests that none of the strategic sites hosting schools are likely to commence before 2020/21, and secondary schools typically take 18 months to two years to build. In addition, the process of setting up a new school tends to be a much more protracted and costly process than expanding an existing school.

The Council has not engaged positively with Howard of Effingham School as part of the Local Plan process to address either its capacity to meet either current or future needs. The Proposed Submission Local Plan is entirely silent on how current schools can be expanded or altered.

Failure to demonstrate that the approach to school delivery is appropriate against reasonable alternatives

Planning to meet education needs is an important priority for the Government, and should be undertaken in partnership with schools themselves in accordance with clear principles established in national policy. In this stage of the Local Plan process, the Council has deleted three allocations and replaced them with entirely new allocations with no direct consultation with a Multi-Academy Trust that operates its main school on one of the originally allocated sites.

The ‘RAG’ approach used to justify allocations in the LAA (2016) and the Sustainability Appraisal is superficial and does not properly consider any of the detailed issues which need to be addressed in identifying the appropriateness of sites for schools. The assessment of sites appears to be based on qualitative statements with limited explanation as to why previously allocated sites have been removed. The proposed allocated site at Normandy and Flexford has the same level of Green Belt ‘sensitivity’ as the Effingham site and yet an exception has been made.

Failure to demonstrate deliverability (effectiveness) of allocated schools and sites

Appendix C of the Proposed Submission Local Plan, which sets out the detail of school site allocations, provides very little information on how schools might be delivered. It identifies broad school sizes (in forms of entry), but provides no timing of delivery and no identified delivery partner other than an ‘academy’ or ‘academy partnership’. The wording is exactly the same for each allocation. The section on funding is equally limited with assumptions that developers will provide land for free and fund the full build costs.

In contrast, the proposed expansion of Howard of Effingham has a deliverable approach, which could happen in the early years of the Plan, with a specifically identified site, an identified, experienced and successful Multi Academy Trust to operate the school and an identified delivery partner and funding mechanism.

Neither the Plan nor its supporting documents refer to the very significant challenges faced in opening a new school from scratch in a new strategic development, or the issues around cost, and quality of the range of opportunities which small four form of entry (4FE) secondary schools face. Two of the proposed three schools could be 4FE.

Conclusion

The previous Draft Local Plan (2014) allocated Howard of Effingham School, Effingham Lodge Farm and Brown’s Field (Site Allocation 69) to provide an expanded school together with enabling development for new homes. This allocation has been removed in the Proposed Submission Local Plan but in our view remains an appropriate, deliverable and sustainable means of meeting education needs in this part of the Borough.
The Howard Partnership Trust is keen to work constructively with the Borough Council to bring the Effingham site forward and would be happy to discuss any of the above points in more detail.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Strategic Road Network Infrastructure Allocations SRN9 and SRN10

Background

Send Parish Council object to the proposed new A3 northbound and southbound slip roads at A247 Clandon Road, to be delivered on the land covered by allocation A43a. A review of previous iterations of the Local Plan and the associated evidence base shows that these draft allocations have been made very recently and have not been properly appraised.

The July 2013 Infrastructure Baseline study considered the quality and capacity of the existing infrastructure in the Borough and was used to inform the more detailed infrastructure and transport strategies developed throughout the Local Plan process. Chapter 2 of this document identified the A3 as the key Strategic Road Network (SRN) in the Borough and recognised that the form and standard of the A3 through the borough was deficient in quality and capacity, resulting in congestion and unreliable journey times. This baseline has been used to influence the allocation of sites and how infrastructure could be upgraded.

Local Plan Transport Infrastructure Allocations

The various iterations of the draft Local Plan from October 2013 through to June 2016 set out the following approaches to transport infrastructure in the Borough.

The October 2013 Issues and Options Local Plan recognises the need to balance development with traffic congestion and minimise the impact of traffic on local communities. The document also recognises the need to focus new development that will generate significant movement in locations where the need to travel will be minimised and the use of sustainable transport modes can be maximised. This document does not set out specific allocations for transport infrastructure.

The July 2014 Draft Local Plan contained more detailed policy relating to transport and infrastructure. Policy 17 states that the key infrastructure needed to support plan delivery is provided in the infrastructure schedule at Appendix B. This schedule makes no reference to any requirement for a new junction at the A247. This version of the Local Plan allocates 431 homes in Send and Send Marsh / Burnt Common.

The Guildford Borough, Economy and Executive Advisory Board met on 13 April 2016 to discuss the draft version of the Proposed Submission Local Plan. The supporting briefing note states that delivery of the development contained within the Proposed Submission Local Plan is dependent on the delivery of the necessary infrastructure. The infrastructure schemes that the Council considered to be necessary for the delivery of the Proposed Submission Local Plan were included in Appendix C. Allocations SRN9 or SRN10 are not included in the schedule and no other references were made to the need for these schemes.
The Guildford Council Executive met on 11 May 2016 to review the draft Proposed Submission Local Plan. Appendix C contains a list of infrastructure that the Council considers to be necessary to deliver development contained in the Local Plan. This does not include allocations for new A3 northbound and southbound slip roads at A247 Clandon Road. Allocation SRN9 is for ‘A3 southbound off-slip lane widening to A320 Stoke Interchange improvement scheme’, a completely unrelated scheme.

The first reference to the proposed new A3 northbound and southbound slip roads at A247 Clandon Road appears in Appendix C of the draft Local Plan considered by the Full Council on 24 May 2016. Although this significant change is not included within the published schedule of changes, the proposed slip roads are included in Appendix C under references SRN10 and SRN11.

The 6 June 2016 consultation version of the Proposed Submission Local Plan includes the proposed slip roads in Appendix C as follows:

SRN9 - A3 northbound on-slip at A247 Clandon Road  
SRN10 - A3 southbound off-slip at A247 Clandon Road

Send Parish Council are seriously concerned by the very late allocation of such significant pieces of road infrastructure. It appears that even on 11 May 2016, less than a month before the document was published for consultation, the proposed slip roads were not considered to be necessary to support the proposed site allocations. It appears that allocations SRN9 and SRN10 were added in response to the very late change of allocation A43 in Send and have not been given proper consideration.

Send Parish Council object in the strongest possible terms to allocations SRN9 and SRN10. Paragraph 182 of the NPPF explicitly states that in order for a plan to be considered sound, it must be ‘the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence’. It is clear from the chronology of the allocations set out above that these allocations have been added to the plan at the latest possible opportunity and at the final round of consultation. In order for the plan to be positively prepared, allocations of this scale should have been considered and made available for public comment far earlier in the consultation process. The following paragraphs set out how the supporting evidence base does not demonstrate how these proposed allocations have been carefully considered as part of an appropriate strategy based on proportionate evidence.

Evidence Base

The June 2016 Proposed Submission Local Plan is supported by three key documents setting out the transport evidence base. These are:

1. June 2016 Guildford Borough Transport Strategy
2. June 2016 Topic Paper - Transport
3. June 2016 Strategic Highways Assessment

The June 2016 Guildford Borough Transport Strategy sets out transport proposals to be delivered in accordance with the needs of transport providers, funders and the Council’s own transport evidence base. Proposals SRN9 and SRN10 are included as ‘anticipated improvements’ on page 10 and the indicative programme on page 22. No additional background to these schemes is provided.

The June 2016 Transport Topic Paper sets how the transport strategy was developed. SRN9 and SRN10 are included in a list of transport schemes at Appendix 3. In reference to SRN9 and SRN10 Paragraph 5.52 states ‘these junctions are being promoted to mitigate the impact of the level of strategic planned growth and in particular the development traffic flows resulting from the development of a new settlement at the former Wisley airfield site (site allocation Policy A35), as well as limiting any increase in traffic joining and leaving the A3 at the Ockham interchange’. No additional background information is provided.

The June 2016 Strategic Highways Assessment is a strategic transport modelling study that informs decision making surrounding the suitability of potential development sites and future highway mitigation proposals which have been identified. Appendix A sets out the strategic residential sites assessed as part of the highways assessment. The main residential site in Send is as follows:
Ref. 2258 - Land south east of London Road Land south east of London Road, Send (part of B13-d) (known as Burnt Common)? 260 homes and 140 flats.

It is unclear which site this refers to. Site 2258 appears to be a reference to the Feb 2016 LAA site reference for the ‘Land at Garlick's Arch’, however the site description appears to refer to the Land around Burnt Common Warehouse, formerly allocated as Site A43. The B13-d reference appears to relate to the January 2013 Green Belt and Countryside Review area around Burnt Common, not Garlick's Arch, which falls under land parcel B14 in this document. This shows a high degree of inconsistency in the appraisal and it is unclear which site is even appraised. It is possible that this was changed shortly before the Local Plan was released for consultation with the updated A43 and A43a allocations in May 2016, but it indicates that this piece of evidence is inconsistent and should be ascribed little weight.

In addition to these three evidence base documents, the June 2016 Draft Infrastructure Delivery Plan provides detail on the infrastructure needed to support development included in the Proposed Submission Local Plan 2016. This document includes a repeat of the Infrastructure Schedule included in Appendix 2 of the June 2016 Proposed Submission Local Plan but provides no additional assessment of the justification or potential impact of proposals SRN9 and SRN10.

Overall there is very little evidence available to the public explaining why the new A3 northbound and southbound slip roads at A247 Clandon Road are necessary or justified. It is suggested that SRN9 and SRN10 are necessary in order to mitigate traffic flows from allocation A35 at Wisley Airfield, however it is not at all clear why a development 4km to the north east of Send with an existing junction to the A3 from Portsmouth Road and the B2039 directly to the west of the site requires a new junction at Send. Wisley Airfield was considered for allocation in the October 2013 Issues and Options Local Plan and allocated in the July 2014 Draft Local Plan for 2,100 homes. New slip roads at Send were not considered to be necessary to support this allocation in July 2014 and the allocation for Wisley Airfield is for an identical number of homes in the June 2016 Proposed Submission Local Plan. It is therefore clear that allocations SRN9 and SRN10 are not required to support allocation A35 at Wisley Airfield.

Until the most recent versions of the Proposed Submission Local Plan, allocation A43 Land around Burnt Common Warehouse, was allocated for up to 7,000 sqm of B1c/B2/B8 employment uses. This allocation was not considered to require a new junction to the A3 despite being allocated for an identical level of employment provision as Garlick’s Arch. Policy E1 of the June 2016 Proposed Submission Local Plan states that when developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common, will be treated as a Strategic Employment Site (allocation A43). The Parish notes that in the draft of the Proposed Submission Local Plan, reviewed by the Council’s Executive Committee on 11 May 2016, Policy E2 states that the new employment site at Burnt Common will be treated as a Strategic Employment Site. The Council has therefore recognised that both sites could be considered to be Strategic Employment Sites and that the Burnt Common Warehouse Strategic Employment Site allocation would not require a new junction to be considered acceptable. This adds further weight to the argument that the new junction works are not necessary and have not been carefully considered.

The chronology of site allocations appears to indicate that allocations SRN9 and SRN10 have been added at the same time as the A43 and A43a allocations in May 2016. We have set out in the following section why Allocation A43 and A43a are unsound and wholly unjustified, but independently of this Send Parish Council object to the proposed new A3 / A247 slip roads ref. SRN9 and SRN10 on the grounds that there is no indication that they have been justified by the evidence available and that the allocations are unsound on the basis that they have not been positively prepared and are not based upon a strategy which seeks to meet objectively assessed development and infrastructure requirements.

Proposed Changes to Make the Local Plan Sound

Remove allocations SRN9 and SRN10.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

A review of previous iterations of the Local Plan and the associated evidence base shows that these draft allocations have been made very recently and have not been properly appraised.

The July 2013 Infrastructure Baseline study considered the quality and capacity of the existing infrastructure in the Borough and was used to inform the more detailed infrastructure and transport strategies developed throughout the Local Plan process. Chapter 2 of this document identified the A3 as the key Strategic Road Network (SRN) in the Borough and recognised that the form and standard of the A3 through the borough was deficient in quality and capacity, resulting in congestion and unreliable journey times. This baseline has been used to influence the allocation of sites and how infrastructure could be upgraded.

Local Plan Transport Infrastructure Allocations

The various iterations of the draft Local Plan from October 2013 through to June 2016 set out the following approaches to transport infrastructure in the Borough.

The October 2013 Issues and Options Local Plan recognises the need to balance development with traffic congestion and minimise the impact of traffic on local communities. The document also recognises the need to focus new development that will generate significant movement in locations where the need to travel will be minimised and the use of sustainable transport modes can be maximised. This document does not set out specific allocations for transport infrastructure.

The July 2014 Draft Local Plan contained more detailed policy relating to transport and infrastructure. Policy 17 states that the key infrastructure needed to support plan delivery is provided in the infrastructure schedule at Appendix B. This schedule makes no reference to any requirement for a new junction at the A247. This version of the Local Plan allocates 431 homes in Send and Send Marsh / Burnt Common.

The Guildford Borough, Economy and Executive Advisory Board met on 13 April 2016 to discuss the draft version of the Proposed Submission Local Plan. The supporting briefing note states that delivery of the development contained within the Proposed Submission Local Plan is dependent on the delivery of the necessary infrastructure. The infrastructure schemes that the Council considered to be necessary for the delivery of the Proposed Submission Local Plan were included in Appendix C. Allocations SRN9 or SRN10 are not included in the schedule and no other references were made to the need for these schemes.

The Guildford Council Executive met on 11 May 2016 to review the draft Proposed Submission Local Plan. Appendix C contains a list of infrastructure that the Council considered to be necessary for delivery contained in the Local Plan. This does not include allocations for new A3 northbound and southbound slip roads at A247 Clandon Road. Allocation SRN9 is for ‘A3 southbound off-slip lane widening to A320 Stoke Interchange improvement scheme’, a completely unrelated scheme.

The first reference to the proposed new A3 northbound and southbound slip roads at A247 Clandon Road appears in Appendix C of the draft Local Plan considered by the Full Council on 24 May 2016. Although this significant change is not included within the published schedule of changes, the proposed slip roads are included in Appendix C under references SRN10 and SRN11.

The 6 June 2016 consultation version of the Proposed Submission Local Plan includes the proposed slip roads in Appendix C as follows:
Send Parish Council are seriously concerned by the very late allocation of such significant pieces of road infrastructure. It appears that even on 11 May 2016, less than a month before the document was published for consultation, the proposed slip roads were not considered to be necessary to support the proposed site allocations. It appears that allocations SRN9 and SRN10 were added in response to the very late change of allocation A43 in Send and have not been given proper consideration.

Send Parish Council object in the strongest possible terms to allocations SRN9 and SRN10. Paragraph 182 of the NPPF explicitly states that in order for a plan to be considered sound, it must be ‘the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence’. It is clear from the chronology of the allocations set out above that these allocations have been added to the plan at the latest possible opportunity and at the final round of consultation. In order for the plan to be positively prepared, allocations of this scale should have been considered and made available for public comment far earlier in the consultation process. The following paragraphs set out how the supporting evidence base does not demonstrate how these proposed allocations have been carefully considered as part of an appropriate strategy based on proportionate evidence.

Evidence Base

The June 2016 Proposed Submission Local Plan is supported by three key documents setting out the transport evidence base. These are:

1. June 2016 Guildford Borough Transport Strategy
2. June 2016 Topic Paper - Transport
3. June 2016 Strategic Highways Assessment

The June 2016 Guildford Borough Transport Strategy sets out transport proposals to be delivered in accordance with the needs of transport providers, funders and the Council’s own transport evidence base. Proposals SRN9 and SRN10 are included as ‘anticipated improvements’ on page 10 and the indicative programme on page 22. No additional background to these schemes is provided.

The June 2016 Transport Topic Paper sets how the transport strategy was developed. SRN9 and SRN10 are included in a list of transport schemes at Appendix 3. In reference to SRN9 and SRN10 Paragraph 5.52 states ‘these junctions are being promoted to mitigate the impact of the level of strategic planned growth and in particular the development traffic flows resulting from the development of a new settlement at the former Wisley airfield site (site allocation Policy A35), as well as limiting any increase in traffic joining and leaving the A3 at the Ockham interchange’. No additional background information is provided.

The June 2016 Strategic Highways Assessment is a strategic transport modelling study that informs decision making surrounding the suitability of potential development sites and future highway mitigation proposals which have been identified. Appendix A sets out the strategic residential sites assessed as part of the highways assessment. The main residential site in Send is as follows:

Ref. 2258 - Land south east of London Road Land south east of London Road, Send (part of B13-d) (known as Burnt Common)? 260 homes and 140 flats.

It is unclear which site this refers to. Site 2258 appears to be a reference to the Feb 2016 LAA site reference for the ‘Land at Garlick's Arch’, however the site description appears to refer to the Land around Burnt Common Warehouse, formerly allocated as Site A43. The B13-d reference appears to relate to the January 2013 Green Belt and Countryside Review area around Burnt Common, not Garlick’s Arch, which falls under land parcel B14 in this document. This shows a high degree of inconsistency in the appraisal and it is unclear which site is even appraised. It is possible that this was changed shortly before the Local Plan was released for consultation with the updated A43 and A43a allocations in May 2016, but it indicates that this piece of evidence is inconsistent and should be ascribed little weight.
In addition to these three evidence base documents, the June 2016 Draft Infrastructure Delivery Plan provides detail on the infrastructure needed to support development included in the Proposed Submission Local Plan 2016. This document includes a repeat of the Infrastructure Schedule included in Appendix 2 of the June 2016 Proposed Submission Local Plan but provides no additional assessment of the justification or potential impact of proposals SRN9 and SRN10.

Overall there is very little evidence available to the public explaining why the new A3 northbound and southbound slip roads at A247 Clandon Road are necessary or justified. It is suggested that SRN9 and SRN10 are necessary in order to mitigate traffic flows from allocation A35 at Wisley Airfield, however it is not at all clear why a development 4km to the north east of Send with an existing junction to the A3 from Portsmouth Road and the B2039 directly to the west of the site requires a new junction at Send. Wisley Airfield was considered for allocation in the October 2013 Issues and Options Local Plan and allocated in the July 2014 Draft Local Plan for 2,100 homes. New slip roads at Send were not considered to be necessary to support this allocation in July 2014 and the allocation for Wisley Airfield is for an identical number of homes in the June 2016 Proposed Submission Local Plan. It is therefore clear that allocations SRN9 and SRN10 are not required to support allocation A35 at Wisley Airfield.

Until the most recent versions of the Proposed Submission Local Plan, allocation A43 Land around Burnt Common Warehouse, was allocated for up to 7,000 sqm of B1c/B2/B8 employment uses. This allocation was not considered to require a new junction to the A3 despite being allocated for an identical level of employment provision as Garlick’s Arch. Policy E1 of the June 2016 Proposed Submission Local Plan states that when developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common, will be treated as a Strategic Employment Site (allocation A43). The Parish notes that in the draft of the Proposed Submission Local Plan, reviewed by the Council’s Executive Committee on 11 May 2016, Policy E2 states that the new employment site at Burnt Common will be treated as a Strategic Employment Site. The Council has therefore recognised that both sites could be considered to be Strategic Employment Sites and that the Burnt Common Warehouse Strategic Employment Site allocation would not require a new junction to be considered acceptable. This adds further weight to the argument that the new junction works are not necessary and have not been carefully considered.

The chronology of site allocations appears to indicate that allocations SRN9 and SRN10 have been added at the same time as the A43 and A43a allocations in May 2016. We have set out in the following section why Allocation A43 and A43a are unsound and wholly unjustified, but independently of this Send Parish Council object to the proposed new A3 / A247 slip roads ref. SRN9 and SRN10 on the grounds that there is no indication that they have been justified by the evidence available and that the allocations are unsound on the basis that they have not been positively prepared and are not based upon a strategy which seeks to meet objectively assessed development and infrastructure requirements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Tibbalds Planning and Urban Design is the appointed planning consultant acting on behalf of Send Parish Council. These representations relate to the June 2016 consultation of the Proposed Submission version of the Local Plan: Strategy and Sites document, which is open for consultation until Monday 18 July.

This supporting statement challenges the overall level of proposed housing provision in the Borough, focusing specifically on draft housing, employment and transport allocations in Send, Send Marsh and Burntcommon. This statement sets out objections to the following allocations:

- Site A42 – Clockbarn Nursery, Tannery Lane, Send – 45 homes
- Site A43 – Land at Garlick’s Arch – employment and 400 homes
- Site A43a – Land for new north and south facing slip roads to/from A3 at Send Marsh / Burnt Common
- Site A44 – Land West of Winds Ridge – 40 homes and 2 traveller pitches
- SRN9 A3 northbound on-slip at A247 Clandon Road
- SRN10 A3 southbound off-slip at A247 Clandon Road

Send Parish Council also request that the Local Plan provides the opportunity for sites in inset villages to be allocated through the neighbourhood plan process, allowing local communities to identify and allocate the most appropriate sites for development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Proposed Allocations for Housing Provision

Send Parish Council consider the proposed level of housing provision to be unsound due to the number of allocated homes being significantly greater than the identified need. Whilst Send Parish support an approach to housing delivery that meets the objectively assessed need in the Borough, the allocations set out in the June 2016 Proposed Submission Local Plan represent over-development. The following section demonstrates that sufficient justification has not been provided for the levels of residential development proposed.

The West Surrey Strategic Housing Market Area is comprised of Guildford, Waverley and Woking Boroughs. The September 2015 West Surrey Strategic Housing Market Assessment (SHMA) identifies a need for 693 Dwellings Per Annum (DPA) in Guildford. Policy S2: Borough Wide Strategy, of the Proposed Submission Local Plan expects a total of 10,395 homes to be delivered between 2018 and 2033. This results in an average of 693 DPA in accordance with the SHMA.

Table 1 of Policy S2 sets out the planned delivery of housing between 2018 and 2033. Sufficient allocations are made to deliver 13,652 homes in this period; an average of 910 DPA, or 131% of the requirement identified in the SHMA. Paragraph 4.1.12 of the Proposed Submission Local Plan acknowledges that the number of homes set out in table 1 is greater than the number of homes required by policy S2 and that this is deliberate in order to build in flexibility.
The Guildford Borough Economy and Infrastructure Executive Advisory Board met on 13 April 2016 to review the draft Local Plan before it was released for consultation. Concern was raised regarding the over provision of land allocated in the Proposed Submission Local Plan when compared to the Objectively Assessed Need (OAN) figure. The Leader of the Council confirmed that this was required to ensure that the Council could meet the OAN by enabling Guildford Borough Council to have flexibility, however no justification was provided for the significant over provision.

No evidence is presented to justify allocating sites to provide 131% of the objectively assessed need. Whilst some allocated sites will inevitably not be brought forward, sites should only be allocated if they are genuinely considered to be deliverable. If the Council has evidence to suggest that approximately a quarter of the allocated sites are undeliverable then this calls for a serious re-appraisal of the proposed allocations. The Parish Council consider an approach to allocation in line with national policy to be more appropriate.

The March 2012 National Planning Policy Framework (NPPF) paragraph 47 clearly sets out the requirements for Local Planning Authorities to deliver housing through the Local Plan process. Councils should use the evidence base to ensure that the full OAN for the housing market area is met. This is recognised as 693 DPA.

NPPF Paragraph 47 requires that planning authorities demonstrate on an annual basis that there is a sufficient supply of land for five years’ worth of housing, with an additional buffer of 5%. This can be increased to a 20% buffer where there is persistent under delivery of housing. This gives a strong indication of the level of provision that the Council should be planning for and a buffer of 5% to 20% would be considered to be a far more appropriate level of flexibility. Based upon the requirement for 693 DPA, this would necessitate between 727 DPA and 832 DPA (as compared to 910 DPA provided for in the draft Local Plan), or sufficient allocations for between 10,915 and 12,474 homes. This suggests that there is currently a proposed over-allocation of between 1,178 and 2,737 homes throughout the plan period.

Send Parish are concerned that this has resulted in the allocation of sites that are not suitable for development. Sections three, four and five of this statement addresses this point further.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Parish is very concerned that additional development will exacerbate the existing traffic congestion in the village. The cumulative impact of proposed allocation A44, Send Business Centre and unimplemented planning permission 14/P/02289 for a new marina to the north of Tannery Lane could introduce significant levels of new traffic to the surrounding streets.

Tannery Lane is narrow, making it very difficult for vehicles to pass along the entire length, especially for larger commercial vehicles. This often results in vehicles needing to reverse to find a suitable passing place. Currently short-term parking occurs along Tannery Lane and Send Road, which can lead to reductions in visibility for drivers emerging from the side road. Tannery Lane narrows towards the northern end and the 400m stretch before the junction with Polesden Lane is c.2.75m wide. The road cannot be widened due to the adjacent nature reserve.

Tannery Lane also provides poor pedestrian access. There is a short section of pavement on the southern side of the lane, running approximately 100m north east of Send Road. The remainder of Tannery Lane has no provision for pedestrians, with few opportunities for improvement due to the narrow carriageway.

Although Environment Agency flood maps include the site in flood zone 1, the land currently floods, despite recent improvements to drainage. Send Parish therefore urge the Council to re-consider this proposed allocation in light of traffic and flooding issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The remainder of Tannery Lane has no provision for pedestrians, with few opportunities for improvement due to the narrow carriageway.

Although Environment Agency flood maps include the site in flood zone 1, the land currently floods, despite recent improvements to drainage. Send Parish therefore urge the Council to re-consider this proposed allocation in light of traffic and flooding issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Send Parish Council object to allocation A43 on the grounds that it is not justified. The site is allocated for 400 C3 residential units and up to 7,000 sq m of B1c/B2/B8 employment use, however this major allocation has only been included in the most recent versions of the draft Local Plan and is not supported by the evidence base.

The July 2014 Draft Local Plan allocated three sites in Send, Send Marsh / Burnt Common for whole or partial development for residential purposes. These sites are as follows:

- Site 74 - Land around Burnt Common warehouse, London Road, Send - B employment uses and up to 100 homes
- Site 75 - Land at Tannery Lane, Send (including Clockbarn Nurseries) - 215 homes
- Site 76 - Land to east of Aldertons Farm, Send Marsh - 116 homes

This 2014 version of the Local Plan allocated a total of 431 homes in Send and Send Marsh / Burnt Common. This is compared to 185 homes allocated in the initial draft of the Proposed Submission Local Plan (dated May 2016) before allocation A43 was changed. This clearly indicates that following the 2014 consultation it was recognised that 431 homes in Send was over development. The reduction to 185 reflects a more appropriate level of development. The last minute change to 485 homes in the most recent version of the Proposed Submission Local Plan represents a significant increase that is clearly unjustified by the evidence base.

After consulting on the Local Plan in July 2014, the Council drafted an updated version of the Local Plan for review by the Council before being published for consultation in June 2016. This version of the draft Local Plan was considered by the Economy and Infrastructure Executive Advisory Board (The ‘Board’) on 13 April 2016 and included the following allocations for Send, Send Marsh and Burnt Common. The Board did not raise any concerns or propose any changes to these allocations:

- Site A42 – Clockbarn Nursery, Tannery Lane, Send – 45 homes
- Site A43 – Land around Burnt Common Warehouse, London Road, Send – 100 homes with B employment uses
- Site A44 – Land West of Winds Ridge – 40 homes
Send Parish Council has previously raised concerns about the suitability of these sites due to the lack of capacity on narrow local roads, but consider an allocation of 185 homes to represent a more appropriate level of development than the 485 now included with the draft Submission Local Plan. The Parish may wish to have the opportunity to allocate appropriate sites through the neighbourhood plan process.

The Guildford Council Executive met on 11 May 2016 to review the draft Proposed Submission Local Plan before it was published for consultation. The draft version of the Plan included the same allocations as were reviewed on 13 April 2016, however as a result of this meeting the decision was made to remove from the draft Local Plan site allocation policy A43 Land around Burnt Common Warehouse and replace it with a new site known as Garlick’s Arch, with proposals for 400 homes and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) uses. The justification for this change is provided as ‘the Interim Director of Development be authorised, in consultation with the Leader of the Council, to make such minor alterations to improve the clarity of the document as he shall deem appropriate’.

The reasons for this last minute change in allocation are wholly unjustified. Firstly, it is unreasonable to consider the proposed changes to be ‘minor’ considering they involve allocating a further 300 homes to a village with a population of only 1,931 and delete the previous allocation around Burnt Common Warehouse that has been carefully considered, consulted upon and adapted since the first iteration of the Local Plan Issues and Options Paper in October 2013. This is a wholly inappropriate approach to the Local Plan making process and represents bad practice.

At no point up to May 2016 had any allocation been made relating to the Garlick’s Arch site. It had been included in the February 2016 Land Availability Assessment ref. 2258, but had not been allocated. Since the site was only identified as a potentially developable site in February 2016 and was not included in drafts of the Proposed Submission Local Plan as late as May 2016, this indicates that insufficient consideration has been given to its allocation.

Section 21 of the January 2013 Green Belt and Countryside Study examined how Green Belt Boundaries could be re-defined around Send Marsh and Burnt Common to accommodate a major settlement expansion. This study includes the land at Garlick’s Arch as plot B14-A. The appraisal recognises that Send Marsh and Burnt Common lack community facilities and would require a significant population increase far beyond what is currently proposed in order to create a ‘critical mass’ of population. This indicates that the current proposal for 400 new homes on the Garlick’s Arch site would introduce homes to a settlement with few facilities, requiring new residents to travel to other settlements for work, shopping and leisure. Indeed, Sustainability Appraisal of the draft Submission Local Plan, in Appendix IV Site Options, appraises all sites considered potentially suitable for allocating in the Local Plan. A traffic light approach is used to appraise individual sites. Allocation A43, Garlick’s Arch, is considered to be the poorest performing of the sites considered potentially suitable in Send, Send Marsh and Burnt Common, with red traffic lights against the following criteria: SNCI/LNR; key employment site; flood risk; recreation facility; town/district/local centre or shop; primary school; secondary school; high quality agricultural land; previously developed land; and railway station. In fact, the Sustainability Appraisal considers it to be one of the poorest performing of all sites considered to have potential.

Send Parish Council consider the Land around Burnt Common Warehouse to be a more appropriate allocation that has been given the necessary consideration through the Local Plan consultation process. Despite the late changes outlined above, the Key Diagram contained within the proposed Submission Local Plan (page 18) indicates that land around Burnt Common Warehouse is identified as a Strategic Employment Site rather than that at Garlick’s Arch. The draft Proposed Submission Local Plan was reviewed by the Guildford Borough Executive Committee. The supporting papers for this meetings stated:

“Send Marsh/Burnt Common – this site is located in a yellow (medium) sensitivity land parcel. Our Employment Land Needs Assessment identifies a need for industrial land and this site is the only suitable and deliverable site identified by the Green Belt and Countryside Study that could meet this need”.

No evidence is provided to explain how circumstances changed in the following month before the Local Plan was published for consolation to justify the change in allocation. It would appear from the meeting minutes that this change was only made to accommodate additional housing and a new slip road to the A3, but as this statement demonstrates in sections two, three and four, these changes are unsustainable, unjustified and unnecessary.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site A43a is to be occupied by infrastructure allocations SRN9 and SRN10. Section four of this report details why the new slip roads are unjustified and should be considered to be unsound. On this basis allocation A43a which is specifically allocated to build the slip roads should be removed for the same reasons.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This site is allocated for 40 homes and 2 traveller pitches. The Parish is concerned about the proposed access arrangements since Send Hill is a very narrow road; two cars have difficulty passing one another in places. An additional 40 homes would significantly increase the chances of two cars meeting, resulting in congestion and access issues with little scope to widen the road. This site is over 1km from the shops and the nearest bus stops in the centre of Send. Send Hill does not have any pavements for the majority of its length and would be difficult to walk along, especially for those with push chairs or mobility problems. The Parish Council are also concerned about the impact that increased traffic on Send Hill will have
on the adjacent multi-denominational cemetery. This site is used by local people as a quiet place for contemplation. Resident’s enjoyment will be diminished by an increase in passing traffic, especially during construction.

Send Parish Council question whether the proposed allocation for two traveller pitches is appropriate in light of the Council’s evidence base. The most recent Traveller Accommodation Assessment is from June 2012. This identifies the number of pitches that are needed within the borough and is listed under the evidence base for the June 2016 Proposed Submission Local Plan. The 2012 assessment appears to have been used as a basis for current draft policies and the 2016 Land Availability Assessment.

The government’s most recent policy for traveller sites was published in August 2015 and sets out the best approaches for planning for traveller sites. Since the Borough’s current Traveller Accommodation Assessment was published significantly before the 2015 guidance, it should be considered out of date. The dated nature of the 2012 assessment is recognised in the June 2016 Sustainability Appraisal, which states on page 94 that the Council have decided to over-allocate traveller sites in light of the dated evidence base.

The Parish Council consider this approach to be unsound and therefore request that the evidence base for the total number of traveller pitches required is re-visited to ensure that it is up to date.

Neighbourhood Plans

The Local Plan should provide the opportunity for sites in inset villages to be allocated through the neighbourhood plan process, allowing local communities to identify and allocate the most appropriate sites for development in accordance with neighbourhood planning principles and general conformity with strategic policy.

Proposed Changes to Make the Local Plan Sound

Remove allocations A43 Garlick’s Arch and A43a Slip roads.

Reinstate allocation A43 Land around Burnt Common Warehouse, as set out in drafts of the Proposed Submission Local Plan reviewed by the Borough, Economy and Infrastructure Executive Advisory Board on 13 April 2016.

Remove allocations A42 and A44 in order to allow the Parish Council the opportunity to allocate suitable alternative sites through the Local Plan process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy D4 of the Proposed Submission Local Plan sets out the approach to development in inset villages. The Inset villages were ‘washed over’ by Green belt allocations until recently and are still characterised as small settlements in rural areas. Send and Send Marsh / Burnt Common are already been subject to significant allocations that will fundamentally change the character of the settlements.

Para 4.3.12 of the Proposed Submission Local Plan notes that where villages are inset from the Green Belt, other development management policies should be used to restrict any inappropriate development. Policy D4 as phrased would allow proposals for development to come forward in addition to the site allocations identified in the Proposed Submission Local Plan.

Proposed changes to the Local Plan

The Parish Council request that Policy D4 is amended to defer to a neighbourhood plan where there is one in place, allowing this to establish sites for appropriate infill development in line with the general principles of strategic policy. Otherwise this policy could essentially override any sites identified by neighbourhood plans.
Policy D4 of the Proposed Submission Local Plan sets out the approach to development in inset villages. Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Introduction

Tibbalds Planning and Urban Design is the appointed planning consultant acting on behalf of Send Parish Council. These representations relate to the June 2016 consultation of the Proposed Submission version of the Local Plan: Strategy and Sites document, which is open for consultation until Monday 18 July.

This supporting statement challenges the overall level of proposed housing provision in the Borough, focusing specifically on draft housing, employment and transport allocations in Send, Send Marsh and Burnt common. This statement sets out objections to the following allocations:
Site A42 – Clockbarn Nursery, Tannery Lane, Send – 45 homes
Site A43 – Land at Garlick’s Arch – employment and 400 homes
Site A43a – Land for new north and south facing slip roads to/from A3 at Send Marsh/ Burnt Common
Site A44 – Land West of Winds Ridge – 40 homes and 2 traveller pitches

SRN9 A3 northbound on-slip at A247 Clandon Road SRN10 A3 southbound off-slip at A247 Clandon Road

Send Parish Council also request that the Local Plan provides the opportunity for sites in inset villages to be allocated through the neighbourhood plan process, allowing local communities to identify and allocate the most appropriate sites for development.

Proposed Allocations for Housing Provision

Send Parish Council consider the proposed level of housing provision to be unsound due to the number of allocated homes being significantly greater than the identified need. Whilst Send Parish support an approach to housing delivery that meets the objectively assessed need in the Borough, the allocations set out in the June 2016 Proposed Submission Local Plan represent over-development. The following section demonstrates that sufficient justification has not been provided for the levels of residential development proposed.

The West Surrey Strategic Housing Market Area is comprised of Guildford, Waverley and Woking Boroughs. The September 2015 West Surrey Strategic Housing Market Assessment (SHMA) identifies a need for 693 Dwellings Per Annum (DPA) in Guildford. Policy S2: Borough Wide Strategy, of the Proposed Submission Local Plan expects a total of 10,395 homes to be delivered between 2018 and 2033. This results in an average of 693 DPA in accordance with the SHMA.

Table 1 of Policy S2 sets out the planned delivery of housing between 2018 and 2033. Sufficient allocations are made to deliver 13,652 homes in this period; an average of 910 DPA, or 131% of the requirement identified in the SHMA. Paragraph 4.1.12 of the Proposed Submission Local Plan acknowledges that the number of homes set out in table 1 is greater than the number of homes required by policy S2 and that this is deliberate in order to build in flexibility.

The Guildford Borough Economy and Infrastructure Executive Advisory Board met on 13 April 2016 to review the draft Local Plan before it was released for consultation. Concern was raised regarding the over provision of land allocated in the Proposed Submission Local Plan when compared to the Objectively Assessed Need (OAN) figure. The Leader of the Council confirmed that this was required to ensure that the Council could meet the OAN by enabling Guildford Borough Council to have flexibility, however no justification was provided for the significant over provision. No evidence is presented to justify allocating sites to provide 131% of the objectively assessed need. Whilst some allocated sites will inevitably not be brought forward, sites should only be allocated if they are genuinely considered to be deliverable. If the Council has evidence to suggest that approximately a quarter of the allocated sites are undeliverable then this calls for a serious re-appraisal of the proposed allocations. The Parish Council consider an approach to allocation in line with national policy to be more appropriate.

The March 2012 National Planning Policy Framework (NPPF) paragraph 47 clearly sets out the requirements for Local Planning Authorities to deliver housing through the Local Plan process. Councils should use the evidence base to ensure that the full OAN for the housing market area is met. This is recognised as 693 DPA.

NPPF Paragraph 47 requires that planning authorities demonstrate on an annual basis that there is a sufficient supply of land for five years’ worth of housing, with an additional buffer of 5%. This can be increased to a 20% buffer where there is persistent under delivery of housing. This gives a strong indication of the level of provision that the Council should be planning for and a buffer of 5% to 20% would be considered to be a far more appropriate level of flexibility. Based upon the requirement for 693 DPA, this would necessitate between 727 DPA and 832 DPA (as compared to 910 DPA provided for in the draft Local Plan), or sufficient allocations for between 10,915 and 12,474 homes. This suggests that there is currently a proposed over-allocation of between 1,178 and 2,737 homes throughout the plan period.

Send Parish are concerned that this has resulted in the allocation of sites that are not suitable for development. Sections three, four and five of this statement addresses this point further.
Distribution of Housing

Settlement Hierarchy

The May 2014 Settlement Hierarchy Document is identified as key evidence in the Proposed Submission Local Plan. This document divides the settlements in Guildford Borough into the following hierarchy in order to promote sustainable development:

1. Urban Area (Guildford)
2. Rural Service Centre x 1
3. Large Villages x 11
4. Medium Villages x 6
5. Small Villages x 6
6. Loose knit / hamlets x 13

Send, Send Marsh and Burnt Common are considered to be large villages, although chapter 4 recognises that Send Marsh / Burnt Common are only identified as a large village due to the proximity to Send’s services. Otherwise, Send Marsh / Burnt Common would be categorised as a medium village.

Paragraph 3.4.2 states that large rural villages are unsuitable for substantial growth but capable of accommodating an extension. Medium sized villages are unsuitable for substantial growth but capable of taking appropriate residential infill and development to meet local needs, defined as ‘employment, amenity and community facilities as well as small scale infill housing and rural exception sites for affordable housing’. Send Parish consider the proposed level of development in Send Marsh / Burnt Common to represent substantial and inappropriate growth, contrary to this strategy for development.

Section 3.2 and 3.3 of the May 2014 Settlement Hierarchy Document assesses the sustainability of each of the settlements in the Borough, taking into consideration community facilities, access to public transport and employment opportunities. This document recognises that Send has a population of 2,314 and Send Marsh / Burnt Common has a population of 1,931. The report sets out functional rankings for all settlement’s in the Borough; Send, Send Marsh and Burnt Common are scored as 15-40 for the community facilities, infrastructure and transport. For comparison, Shackleford, Shalford, Albury, Wanborough, Homsbury St Mary, Jacobs Well, Gomshall, Chilworth, Effingham, West Clandon and Peaslake all have higher functional rankings, indicating that the Send area is inappropriate for any significant levels of development due to the lack of social infrastructure. Development should be focused in the most sustainable locations available.

Paragraph 10.7.1 of the June 2016 Sustainability Appraisal recognises that ‘the proposed allocation at Send Marsh / Burnt Common (400 homes) potentially stands out as being some distance from a GP surgery’. The May 2014 Settlement Hierarchy Report also demonstrates that Send, Send Marsh and Burnt Common have relatively poor community facility provision, especially in regards to shops and public transport.

The Send Medical Centre is not served by local busses, making it particularly difficult for those with mobility problems to attend. The parking facilities at the village shops are limited and not suitable for disabled access. Send only has hourly bus services to Guildford, with poor evening and weekend services, indicating that new homes would be very dependent on cars. In light of the recognised congestion on the A3, residential development would be far better located in areas with good access to public transport and community facilities.

The June 2016 Proposed Submission Local Plan allocates three sites in Send and Send Marsh / Burnt Common:

Site A42 – Clockbarn Nursery, Tannery Lane, Send – 45 homes
Site A43 – Land at Garlick’s Arch – employment and 400 homes
Site A43a – Land for new north and south facing slip roads to/from A3 at Send Marsh / Burnt Common
Site A44 – Land West of Winds Ridge – 40 homes and 2 traveller pitches

The proposed allocation of site A43 for 400 homes would result in a population increase of 48% in Send Marsh / Burnt Common, assuming an average of 2.3 people per dwelling (this is based upon the average set out in the 2011 UK census). This represents an average population increase of 3.2% per annum across the plan period, significantly higher than ONS projections of 0.57% per annum for the UK for the same period.
For comparison, allocations A42 and A44 would result in a population increase of 8% in Send across the plan period, or 0.5% per annum. Whilst the Parish Council do not support draft allocations A42 and A44, they consider this population increase to represent a more organic rate of growth for a settlement of this size.

Send Parish object to the proposed level of residential allocations on the grounds that they do not represent sustainable development. Considering there is a demonstrable over-allocation of housing beyond what is required to meet the Borough’s objectively assessed needs, the number of allocated homes in Send Marsh / Burnt Common should be significantly reduced.

Sections four and five of this report address the allocations that the Parish consider to be inappropriate and unsustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  
Answer (if comment is on questions 1-7 of the questionnaire): ()  
In summary, Send Parish consider the following changes to be necessary to make the Proposed Submission Local Plan sound:  
Remove transport infrastructure allocations SRN9 and SRN10;  
Remove allocations A43 Garlick’s Arch and A43a slip roads;  
Reinstate allocation A43 Land around Burnt Common Warehouse, as set out in drafts of the Proposed Submission Local Plan reviewed by the Borough, Economy and Infrastructure Executive Advisory Board on 13 April 2016;  
Remove allocations A42 and A44 in order to allow the Parish Council the opportunity to allocate suitable alternative sites through the Neighbourhood Plan process.  
Review the process that has been used to determine the number of traveller pitches required in light of out of date evidence base.  
Amend Policy D4 to provide scope for neighbourhood plans to identify appropriate sites and policies within the inset villages.  
Send Parish are pleased to have the opportunity to respond to the draft Local Plan and request that they are informed of any future consolation events.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Distribution of Housing

Settlement Hierarchy

The May 2014 Settlement Hierarchy Document is identified as key evidence in the Proposed Submission Local Plan. This document divides the settlements in Guildford Borough into the following hierarchy in order to promote sustainable development:

1. Urban Area (Guildford)
2. Rural Service Centre x 1
3. Large Villages x 11
4. Medium Villages x 6
5. Small Villages x 6
6. Loose knit / hamlets x 13

Send, Send Marsh and Burnt Common are considered to be large villages, although chapter 4 recognises that Send Marsh / Burnt Common are only identified as a large village due to the proximity to Send’s services. Otherwise, Send Marsh / Burnt Common would be categorised as a medium village.

Paragraph 3.4.2 states that large rural villages are unsuitable for substantial growth but capable of accommodating an extension. Medium sized villages are unsuitable for substantial growth but capable of taking appropriate residential infill and development to meet local needs, defined as ‘employment, amenity and community facilities as well as small scale infill housing and rural exception sites for affordable housing’. Send Parish consider the proposed level of development in Send Marsh / Burnt Common to represent substantial and inappropriate growth, contrary to this strategy for development.

Section 3.2 and 3.3 of the May 2014 Settlement Hierarchy Document assesses the sustainability of each of the settlements in the Borough, taking into consideration community facilities, access to public transport and employment opportunities. This document recognises that Send has a population of 2,314 and Send Marsh / Burnt Common has a population of 1,931. The report sets out functional rankings for all settlement’s in the Borough; Send, Send Marsh and Burnt Common are scored as 15/40 for the community facilities, infrastructure and transport. For comparison, Shackleford, Shalford, Albury, Wanborough, Homsbury St Mary, Jacobs Well, Gomshall, Chilworth, Effingham, West Clandon and Peaslake all have higher functional rankings, indicating that the Send area is inappropriate for any significant levels of development due to the lack of social infrastructure. Development should be focused in the most sustainable locations available.

Paragraph 10.7.1 of the June 2016 Sustainability Appraisal recognises that ‘the proposed allocation at Send Marsh / Burnt Common (400 homes) potentially stands out as being some distance from a GP surgery’. The May 2014 Settlement Hierarchy Report also demonstrates that Send, Send Marsh and Burnt Common have relatively poor community facility provision, especially in regards to shops and public transport.

The Send Medical Centre is not served by local busses, making it particularly difficult for those with mobility problems to attend. The parking facilities at the village shops are limited and not suitable for disabled access. Send only has hourly bus services to Guildford, with poor evening and weekend services, indicating that new homes would be very dependent on cars. In light of the recognised congestion on the A3, residential development would be far better located in areas with good access to public transport and community facilities.

The June 2016 Proposed Submission Local Plan allocates three sites in Send and Send Marsh / Burnt Common:

- Site A42 – Clockbarn Nursery, Tannery Lane, Send – 45 homes
• Site A43 – Land at Garlick’s Arch – employment and 400 homes
• Site A43a – Land for new north and south facing slip roads to/from A3 at Send Marsh / Burnt Common
• Site A44 – Land West of Winds Ridge â€“ 40 homes and 2 traveller pitches

The proposed allocation of site A43 for 400 homes would result in a population increase of 48% in Send Marsh / Burnt Common, assuming an average of 2.3 people per dwelling (this is based upon the average set out in the 2011 UK census). This represents an average population increase of 3.2% per annum across the plan period, significantly higher than ONS projections of 0.57% per annum for the UK for the same period.

For comparison, allocations A42 and A44 would result in a population increase of 8% in Send across the plan period, or 0.5% per annum. Whilst the Parish Council do not support draft allocations A42 and A44, they consider this population increase to represent a more organic rate of growth for a settlement of this size.

Send Parish object to the proposed level of residential allocations on the grounds that they do not represent sustainable development. Considering there is a demonstrable over-allocation of housing beyond what is required to meet the Borough’s objectively assessed needs, the number of allocated homes in Send Marsh / Burnt Common should be significantly reduced.

Sections four and five of this report address the allocations that the Parish consider to be inappropriate and unsustainable.

Comment ID: PSLPP16/17148  Respondent: 15667937 / Vail Williams LLP (James Williams)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H1 (Homes for all) provides details relating to the choice and mix of housing to help create balanced, sustainable and inclusive communities. Within Policy H1 there is a sub-section for specialist housing that states “we will support the provision of well designed specialist forms of accommodation in appropriate sustainable locations, taking into account local housing needs”. However, there is no clarification on what “local housing needs” actually means in terms of geographically coverage. We believe it is reasonable to assume this is in reference to the whole of Guildford Borough, as this is the split identified in the SHMA derived from the whole HMA. However, the Policy should be explicit and confirm it is Borough wide.

On development sites of 500 homes or more it is a requirement that Traveller accommodation should be provided on site. It is considered that a similar wording for specialist housing would ensure sufficient delivery of specialist housing, including care homes, on the larger sites (c.1,500+ homes). Providing the opportunity to incorporate an appropriate housing mix, with careful design and layout, within a larger scheme; thereby creating a balanced, sustainable and inclusive community as required by Policy H1.

Under housing mix in Policy H1, the second paragraph currently states “development that results in the net loss of housing or specialist housing, including sites allocated for housing within the Local Plan will not be permitted”. This element of the policy is overly restrictive and could conflict with other policies in the Plan (for example E1 – Sustainable employment).
and it is proposed that it should be removed. There would still be the opportunity to ensure proposals respect and respond to local character, density and site specific concerns through other policies and also through Part 2 of the Local Plan, which will provide detailed development control policies.

In terms of monitoring for housing delivery, the policies and monitoring are clear on C3 use; with the overall target of 13,860 contained within Policy S2. However, paragraph 4.2.7 is confusing and contradictory in terms of monitoring especially student accommodation and Use Class C2 residential institutions for older people. The Policy separates C3 use from C2 residential institutions; as these are identified separately within the SHMA. As these are split, “purpose-built student accommodation on campus and Use Class C2 residential institutions for older people are considered separately from general housing needs in this plan”, it makes sense to monitor these targets separately to ensure a suitable mix of housing is delivered over the plan period. However, paragraph 4.2.7 continues and states that “Any additional student accommodation or residential institutions built over and above projected need (as identified in the SHMA) will count towards the general housing requirement, based on the amount of accommodation it releases into the general housing market.” This appears to allow the Council to count student accommodation and C2 use, which they state (and the SHMA identifies) as separate requirements, towards their general overall C3 housing requirement.

Page 37 contains the monitoring indicators associated with Policy H1. This includes the different sizes and types of housing to ensure the appropriate mix and density of development. Older person’s specialist housing (including care homes) are listed as a separate indicator to be monitored, however there is no specific target within Policy H1 (or indeed Policy S2) to monitor against nor is one specified within the table on page 37. The Policy and monitoring appear to conflict and it is not explicitly clear if these are separate or are a combined requirement. If the Council is seeking to provide older persons’ specialist housing (including care homes) separately, then there should be a specific number for care home bedspaces identified within Policy. Currently this monitoring has no relevant policy associated with it and paragraph 4.2.7 potentially allows double counting towards the C3 requirement. It is also considered inappropriate for the Plan to simply refer the mix within the ‘latest SHMA’, as this does not provide clarity and is ineffective; especially if draft versions or addendums to the SHMA are issued and their status, in terms of the policy, is vague.

Furthermore, in relation to housing for older people, paragraph 4.2.11 identifies the changes in ageing population and the need for the housing stock to be flexible to enable people to remain in their own homes for longer. It further identifies the option for smaller homes which will enable people to downsize and remain in their local community rather than move to specific care home provision. This can be achieved through good design such as level access, door openings and layout and circulation space to enable people to continue to live independently. It is agreed that these considerations contained within paragraph 4.2.11 are valid and reflects both national policy and the evidence base contained within the Strategic Housing Market Assessment. If successful, implementation of this policy approach will reduce further the need for care home provision.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
This representation and comments focus primarily on housing policies, including specialist housing. The plan contains strategic level policies and Policy S1 relates to the presumption in favour of sustainable development and is an over-arching strategic policy compliant with the NPPF. It is welcomed that the Council will take a positive approach that reflects the presumption in favour of sustainable development. It is also supported that the Council will work proactively with applicants, jointly to find solutions that mean proposals can be approved wherever possible. This is a positive strategic policy within the local plan, reflecting national guidance, and it is noted in Paragraph 4.1.1 (of the Guildford Submission Local Plan) that “Local plans must plan positively to seek opportunities that meet the areas’ objectively assessed development needs and be flexible enough to adapt to rapid change”. Given the plan period of 20 years, the requirement for flexibility within planning policy to respond to changes is important and should be engrained throughout the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLP16/17147  **Respondent:** 15667937 / Vail Williams LLP (James Williams)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

Policy S2 (Borough wide strategy) provides details for the overall housing numbers, and other uses, to be delivered over the plan period. Policy S2 contains the requirement for 13,860 new homes to be delivered over the plan period (2013-2033). This equates to an average of 693 per annum. It also sets the requirement for floor space in relation to B1(a) and B1(b) uses, and 4.7 – 5.3 hectares for industrial (B1c, B2 and B8), along with a target of 43 permanent pitches for Gypsies and Travellers and 6 permanent plots for Travelling Show people between 2012 and 2017 and then an additional 30 pitches and 2 plots up to 2027. In relation to Gypsies and Travellers, Policy S2 caveats the numbers that any new target will replace these figures “as identified within an updated Traveller Accommodation Assessment.”

Unlike the proposed C3 provision for new homes, B1 uses, and sites for Gypsies and Travellers, Policy S2 does not contain a target for care home provision (C2 use). This is identified separately from the need for identified housing (C3): “In addition, the SHMA indicates a need for 1,031 bedspaces in care homes – 242 in Guildford, 396 in Waverley and 393 in Woking. This does not form part of the household population and so is separate to the need identified for housing” (Strategic Housing Market Assessment, September 2015, paragraph 10.53). This is also identified in paragraph 4.2.3 (local plan), where it notes key points from the SHMA 2015 including “there is an estimated need for 242 registered care bedspaces over the plan period”. This equals 12.1 care bed spaces per year.

Whilst associated with monitoring and Policy H1, the separation of care bedspaces continues in paragraph 4.2.7. The plan states that Use Classes C3 will contribute towards the new homes target and that “purpose-built student accommodation on campus and Use Class C2 residential institutions for older people are considered separately from general housing needs in this plan”. Indeed, the monitoring indicators on page 30 identify the targets contained within Policy S2 and will monitor the new homes completed each year, the amount of employment floor space, and the number of traveller pitches and travelling show people plots. However, there is no mention of a separate requirement or target for bedspaces / care homes within Policy S2.

With reference to the overall housing numbers identified within Policy S2, there is a requirement for 13,860 new homes. The table contained within the policy only totals 10,395, short of the requirement for 13,860. However, it is noted that the indicative annual housing targets start in the year 2018, whereas the plan period runs from 2013 and it is assumed that this explains the difference. It is considered that, as currently presented, this is misleading and the table should cover the whole plan period, including actual completions in the years preceding adoption to demonstrate the whole housing requirement.
This would provide a clearer indicative annual approach demonstrating how the Council are going to deliver the overall housing requirement for the plan period. This should also incorporate the required flexibility within the housing figures, to ensure that the overall target is met and sufficient flexibility is built into the plan, as required by the NPPF.

As already mentioned the NPPF contains a presumption in favour of sustainable development and requires flexibility, it is therefore suggested that within the first sentence of Policy S2 that the words “at least” are inserted in relation to the 13,860 new homes. The figure contained within Policy S2 should not be absolute, and any further proposals that are sustainable and in accordance with the NPPF and the development plan, should be approved without delay.

This proposed wording will also facilitate the Duty to Cooperate, allowing the flexibility to contribute to the wider unmet need within the Housing Market Area.

Linden Homes are the landowners of a site located within Guildford, 179 Epsom Road, which was a former care home. The site is contained within the Land Availability Assessment (LAA, May 2016) under site reference 2235. Whilst Guildford Borough Council considers that the most appropriate use of the site should be for a care home (C2) use, it should be recognised that the site has been vacant since March 2014 following a planned closure. The site was declared surplus to requirements by Surrey County Council in recognition of changing national policy to keep people in their own homes and in the community for longer. Linden Homes who acquired the site in July 2015 from Surrey County Council, are actively promoting C3 use on the site: planning application ref: 15/P/01304 for “The demolition of the existing care home building and the erection of 24 dwellings”. This application, now at appeal provides the ability to deliver 24 homes (16 private / 8 affordable), making a useful contribution towards delivery of the Borough’s objectively assessed housing needs on a brownfield site within the existing built up area. Plans indicating the site location and proposed housing offer are attached:

- 2277 – A – 1000 – A Red Line Location Plan (Omega Partnership) - 2277 – C – 1005 – N Site Layout (Omega Partnership)
- 2277 – C – 1100 – B Existing Wider Aerial Site Plan (Omega Partnership) - 2277 – C – 1101 – C Proposed Wider Aerial Site Plan (Omega Partnership) - 2277 – SK – 1010 – F Aerial Perspective (Omega Partnership)

In reference to the policies to provide a suitable mix of housing and deliver the required number of bed spaces, as set out in the SHMA (albeit not contained within Policy S2 or H1), the site should be considered against the proposed allocations policies that contain numerous reference to care homes and specialist housing. For care homes the proposed allocations include:

Policy A22 (land north of Keens Lane, Guildford), which along with 140 homes is allocated for a care home for “approximately 60 beds”.

Policy A46 (land to the south of Normandy and north of Flexford) is allocated for approximately 1,100 homes and specialist housing, and in addition it also includes “approximately 60 beds” for a residential care home.
Furthermore, there are a number of other relevant allocations, including:

Policy A25 (Godstone Hill Farm, Mallow Lane) – Residential lead mixed use development, allocated for: “Approximately 2000 homes (C3), including some specialist housing and self-build plots…”

Policy A26 (Blackwell Farm, Hogs Back) - Residential lead mixed use development, allocated for: “Approximately 1800 homes (C3), including some specialist housing and self-build plots…”

Policy A35 (Land at former Wisley Airfield, Ockham) – Residential lead mixed use development, allocated for: “Approximately 2000 homes (C3), including some specialist housing and self-build plots…”

Each of these Policies proposes circa. 2,000 homes and are stated to provide “some specialist housing”.

Whilst the numbers for specialist housing are not set within the policies, the sites identified above would be capable of providing significant C2 care home bed spaces. Given the size of these proposed allocations, they would easily be able to meet the required need for care homes, as set out in the SHMA (242 care bed spaces over the whole Plan period, equating to an average of 12.1 per annum). Furthermore, other allocated sites and other sites within the developed areas could also be owned, or purchased by, a care home provider thereby providing an additional source for meeting the C2 need of the Borough.

Therefore, it is easily possible to deliver the required number of care homes (identified in the SHMA: 242 care bed spaces over the plan period / 12.1 per year) through the proposed allocated sites contained within the proposed submission Local Plan.

179 Epsom Road, Guildford, is clearly available now and the site is suitable for residential development, as it is sustainable, being within the main built up area boundary of Guildford, and within a predominantly residential area. We would urge Guildford Borough Council to consider this site as an allocated site for C3 housing.

The delivery of housing, to meet all needs within the Borough and the wider Housing Market Area, is a fundamental part of the plan as detailed in the Strategic Policy S2 (13,860 new homes over the Plan period / 693 dwellings per year). The site is available immediately for the delivery of much needed market and affordable housing within Guildford Borough.

This will assist with the quick delivery of housing, in accordance with the NPPF, and to help ensure a regular supply of housing within the early part of the plan period. This is especially important as the proposed indicative annual requirement is weighted towards the later part of the plan period, rather than focusing on the immediate delivery of housing.

Examination

Given the high importance placed on housing delivery by National Policy, local authorities should “boost significantly the supply of housing” (NPPF paragraph 47), and the representations above, we wish to express an interest in participating at the examination and attend any pre-examination meetings.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
- 2277-C-1005-N Coloured Site Layout.pdf (880 KB)
- 15_P_01304-LOCATION_PLAN-821415.pdf (122 KB)
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Introduction and Background

1.1. Tibbalds Planning and Urban Design is the appointed planning consultant acting on behalf of the Police and Crime Commissioner for Surrey. These representations relate to the June 2016 consultation of the Proposed Submission version of the Local Plan: Strategy and Sites document, which is open for consultation until Monday 18 July.

1.2. This supporting statement sets out the case for amending draft allocation A32 for the Surrey Police Headquarters. The site is allocated in the Proposed Submission Local Plan for approximately 116 homes and we consider there to be a strong case for increasing the allocation to approximately 200 homes by expanding the southern boundary of the site. The proposed new area for allocation is shown on plan ref. 5630/02.

1.3. These representations explain how the proposed increase in housing numbers is a sustainable option to deliver additional housing in the Borough that accords with national and local policy. The following documents have been submitted in support of these representations:

1. Plan ref. 5630/01 - Opportunity for Additional Residential Development (see appendix)
2. Plan ref. 5630/02 – Potential Additional Allocated Area (see appendix)
3. Ecological Walkover Survey– WYG
4. Highways and Access Technical Note – WYG
5. Landscape and Visual Impact Appraisal + supporting landscape plans – WYG

2. Green Belt

2.1. The Mount Browne site has historically been included within the Green Belt. Policy P2 of the June 2016 Proposed Submission Local Plan recognises that Green Belt boundaries are only to be modified in exceptional circumstances and through the Local Plan process. In light of the development pressures within Guildford the Council are proposing to inset some sites from the Green Belt. This policy identifies Mount Browne as a major previously developed site that is to be inset from the Green Belt:

Site A32 – Surrey Policy Headquarters, Mount Browne, Sandy Lane, Guildford

2.2. The site is allocated for approximately 116 homes and is required to ‘provide positive benefit in terms of landscape and townscape character and local distinctiveness and have regard to the identified landscape character areas’.

2.3. The draft local Plan proposes that the Green Belt boundary is partially redrawn around the Mount Browne site, but these representations recommend that this is extended to include the developable areas in the south, reflecting the logical boundaries of the site and directing development to areas that will have the least visual impact. This does not mean that development would or should include the entire allocation area, but would reflect logical site boundaries. This proposed change would retain existing areas of ancient woodland and other wooded areas that screen the site. This would provide the opportunity for additional homes and also allow for wider landscaping and open space provision and management across the site consistent with the principles of the current draft allocation. This approach is consistent with other allocations in the draft Local Plan.

2.4. Section 9 of the March 2012 National Planning Policy Framework sets out national policy for protecting Green Belt Land between paragraphs 79 and 92. The NPPF states that ‘the fundamental aim of the Green Belt is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence’ (para 79).
2.5. Paragraph 80 of the NPPF sets out the five purposes served by the Green Belt. We consider that the proposed extension of the Mount Brown Green Belt inset would be in accordance with all five points and would not cause any harm to the Green Belt. These points are developed further in the following sections of the representations, but in summary:

1. To check the unrestricted sprawl of large built-up areas

2.6. The Mount Browne site is located c.370m to the south of the designated Guildford Urban Area, as defined by the draft Proposed Submission Local Plan proposals map. Although not within the defined urban area, the site is not isolated and is close to the University of Law site (allocation A33), A3100 road and Artington park and ride. Allocating this site for additional development would represent a natural and compact extension to urban area, reflecting the existing urban form.

2.7. It is important to consider this proposal in light of other draft land allocations in the Borough. There is a recognised shortage of developable land, requiring several large sites to be released from the Green Belt to deliver housing. Although this proposal represents a small extension to the Guildford urban area, it should be considered as an appropriate and sustainable option when compared to many of the other proposed Green Belt insets.

2. To prevent neighbouring towns merging into one another

2.8. The Mount Browne site is located c.370m to the south of the Guildford Urban Area and c.2.2km to the north of Farncombe. Extending allocation A32 an additional 200m to the south would have no discernible impact on the separation between the two settlements.

3. To assist in safeguarding the countryside from encroachment

2.9. Although located in the Green Belt, the site has been used for a variety of purposes that are not consistent with typical countryside uses. The area has historically been used for private recreational purposes, including a sports pavilion, a landscaped sports pitch and a car park. Parts of the southern area are therefore classed as previously developed land. Although the amenity space is not classed as previously developed land, it is also not open countryside. Extending the A32 allocation southward would not encroach into the countryside in light of the previous uses and strong site boundaries.

4. To preserve the setting and special character of historic towns

2.10. There are no towns of special character that would be impacted by this proposal. The St Catherine’s conservation area is located directly to the north of the A32 allocation.

5. To assist in urban regeneration, by encouraging the recycling of derelict and other urban land

2.11. Part of the site is classified as previously developed land in accordance with the NPPF definition and the remainder has been heavily landscaped. Since this site is now redundant, allocating it for housing represents an appropriate alternative use.

2.12. These points are developed in more detail below.

2.13. The January 2013 Guildford Borough Green Belt and Countryside Study has been used to inform how land should be released from the Green Belt in the new Local Plan. Volume V explores major previously development sites and identifies Mount Browne Police Headquarters as one of eleven potential sites for release from the Green Belt.

2.14. The appraisal of the Mount Browne site contained within section 20 of Volume V recognises that the majority of the site is considered to exhibit a visually enclosed character with a limited contribution to the wider Green Belt. It was considered appropriate to recommend the Mount Browne site for insetting within the Green Belt due to it not presenting a visually open character and possessing defensible boundaries. This assessment sets out potential boundaries for insetting from the Green Belt.

2.15. Whilst we recognise that there is more previously developed land on the northern section of the site, the area to the south could be inset from the Green Belt with few negative impacts, consistent with the conclusions of the Green Belt and Countryside Study.
2.16. It is worth noting that one of the original purposes of creating the Green Belt was to provide access to public open space and recreation areas. It is clear that the Green Belt includes land of variable quality and we encourage the Council to consider how the land within the Green Belt is used and whether there is public benefit to its continued designation. The Local Plan acknowledges that there are significant development pressures within Guildford Borough and a lack of land for development. Since the Council recognises that there is a need for the careful release of Green Belt land to meet development pressures in the area, the most sustainable locations should be given priority over less sustainable sites in more rural areas.

2.17. The proposed submission Local Plan designates 14 villages to be inset from the Green Belt. We recognise that this approach is broadly in line with national guidance, which states that only those villages whose open character makes an important contribution to the openness of the Green Belt should be included in the Green Belt. Those that do not should be inset, or removed, from the Green Belt.

2.18. Whilst we acknowledge that the insetting of villages is in accordance with national policy, there are a number of proposed allocations that would extend the Green Belt insetting significantly beyond what is considered to be the natural boundary of each settlement in accordance with the January 2013 Green Belt and Countryside Study. A review of the allocations set out in the Proposed Submission Local Plan indicates that 431 homes are allocated in inset villages and infill development within identified Green Belt villages. Whilst some of these allocations are appropriate and sustainable, others are large green field sites, formerly within the Green Belt, on the edge of small villages with limited previously developed land and poor access to community facilities. If these sites are considered to be suitable for allocation in light of national policy, then the proposed extension to allocation A32 should also be considered to be appropriate.

2.19. In addition to the inset villages, seven major previously developed sites are inset from the Green Belt, including Mount Browne. Sites identified as previously developed land in the Green Belt are scheduled to deliver 216 homes throughout the plan period according to the sites schedule on pages 123 – 126 of the Proposed Submission Local Plan.

2.20. We considered this proposed approach to be unsound on the grounds that it is not the most sustainable strategy. Paragraph 84 of the NPPF states that ‘when drawing up or reviewing Green Belt boundaries local planning authorities should take account of the need to promote sustainable patterns of development. They should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary’. This policy clearly requires priority to be given to the most sustainable locations. The sustainability credentials of Mount Browne are explored in detail in the following section, but since there is a clear opportunity to deliver approximately 84 additional homes in a highly sustainable location on the edge of Guildford with excellent public transport and very limited visual impact, this should be prioritised over far more isolated sites in smaller settlements.

3. Sustainability

3.1. Delivering sustainable development is a driving principle of the NPPF. Paragraph 17 states that planning should ‘actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable’. In addition, paragraph 30 states that ‘encouragement should be given to solutions which support reductions in greenhouse gas emissions and reduce congestion. In preparing Local Plans, local planning authorities should therefore support a pattern of development which, where reasonable to do so, facilitates the use of sustainable modes of transport’. Overall we consider Mount Browne to represent a highly sustainable location that provides good access to non-car modes of public transport.

3.2. The June 2016 Sustainability Appraisal sets out the sustainability credentials for each of the proposed allocated sites. A traffic light approach is used to appraise individual sites. Site A32 is shown to be one of the more sustainable allocations in the Borough, with greenlights against 11 of the 21 criteria. Although access to shops and schools are considered to be relatively poor, the Mount Browne site is still considered to be more sustainable than many other allocated housing sites with worse sustainability credentials. The proximity of Guildford town centre coupled with good public transport links gives the Mount Browne site excellent access to the facilities provided there.

3.3. The May 2014 Settlement Hierarchy Document is identified as key evidence in the Proposed Submission Local Plan. This document divides the settlements in Guildford Borough into the following hierarchy in order to promote sustainable development:
1. Urban Area (Guildford)
2. Rural Service Centre x 1
3. Large Villages x 11
4. Medium Villages x 6
5. Small Villages x 6
6. Loose knit / hamlets x 13

3.4. This report confirms that the Guildford Urban area is by far the largest settlement in the Borough with the best access to jobs, education, public transport, health care facilities and shops. Locating additional residential development at the edge of the Guildford Urban Area, with excellent public transport links, therefore presents a very sustainable option.

3.5. The proposal for approximately 200 houses would result in a significant reduction in vehicle movements than that which currently exist. Section six of the attached transport technical note demonstrates that the site currently generates approximately 391 trips between 0700 – 0900 and 397 trips between 1600 – 1800, in addition to other vehicle movements throughout the day necessitated by the police headquarters operations.

3.6. The technical note demonstrates that even in a worst case scenario, the proposed development of 200 houses on the site would generate approximately 191 trips between 0700 – 0900 and 212 trips between 1600 – 1800. This demonstrates that developing the site for 200 units would generate significantly fewer two-way vehicle trips when compared to the current operation, providing a significant net benefit to the operation of the existing site access, local junctions and the local highway network.

3.7. NPPF paragraph 35 states that ‘developments should be located and designed where practical … to give priority to pedestrians and cycle movements, and have access to high quality public transport facilities’. Increasing the allocation on the Mount Browne site from 116 to 200 would help deliver a scheme that accords with these principles.

3.8. Extension of the site allocation boundary to include the southern area of the site will allow improved access to the Artington Park and Ride site and bus routes into Guildford town centre. The footway along The Ridges runs east to west linking to the A3100 footway which provides a connection to Artington Park and Ride. This is approximately a 700m walk from the edge of site A32.

3.9. Extending the allocation to the south will form a more natural connection between the sites by reducing the site edge to park and ride walking distance to approximately 450m. The Artington Park and Ride is served by the number 200, which provides 5 to 6 services per hour to Guildford Bus Station from Monday to Saturday, operating between 0730 and 1920. The Artington Park and Ride is also identified for improved bus services by the June 2016 Guildford Borough Transport Strategy (ASP7).

3.10. In addition to the Park and Ride, bus stops are located on the A3100, just north of the junction between The Ridge and the A3100. These bus stops are served by a number of services (42, 70, 71, 72, 506 and 523) which collectively provide on average 4 services per hour to Guildford bus station, from Monday to Saturday operating between 0645 and 2000, with a reduced service on Sunday.

3.11. Guildford Railway Station is located 2.1km from the proposed development site and can be reached within 25 minutes by walking, 18 minutes by walking to the A3100 bus stops and changing at the bus station or by 10 minutes by cycling.

3.12. Route 22 of the National Cycle Network is located to the north of the site, within a 5 minute cycle ride. Route 22 provides a signed route into the Guildford Cycle Network and wider area. Cyclists would access the route by using the local road network and considering that Guildford is within a 10 minute cycle ride, it is likely that use of this route to access Guildford would be a favourable option for regular commuters.

3.13. Overall we consider the Mount Browne site to be very well located to encourage non-car journeys and will reduce the number of trips generated to and from the site, even with an increase in allocation from 116 to 200 homes.

4. Housing
4.1. The proposed additional homes on the Mount Browne site could contribute to housing delivery for the Borough in the early years of the plan period, with new units on the extended area potentially coming forward before those within the footprint of the existing buildings and facilities on site.

4.2. The June 2016 proposed Submission Local Plan recognises that there is an objectively assessed need to deliver an average of 693 dwellings per annum in accordance with the findings of the September 2015 West Surrey Strategic Housing Market Assessment (SHMA). Policy S2 of the Proposed Submission Local Plan states that the Council’s preference is to focus growth in the most sustainable locations, making the best use of previously developed land (including in the Green Belt if appropriate). The Guildford urban area is the most significant settlement in the Borough, identified as the most sustainable settlement in the Borough by the May 2014 Settlement Hierarchy Report. Guildford is the closest settlement to the Mount Browne site, the designated edge of which is approximately 370m to the north of the site. Development should therefore be prioritised in the Guildford Urban Area where possible since this is recognised as the most sustainable location.

4.3. Table 1 attached to Policy S2 demonstrates that land has been allocated to deliver 13,652 homes throughout the plan period. 2,742 (20%) of these are to be delivered in Guildford town centre and the Guildford urban area, with the remainder being delivered via an urban extension to Guildford and significant development in smaller settlements. Whilst we recognise that not all development can be located in Guildford, all opportunities should be taken to deliver housing in the most sustainable locations. This can take advantage of existing infrastructure, unlike the large strategic greenfield developments proposed elsewhere in the Borough that will require significant new infrastructure.

5. Area of Outstanding Natural Beauty and Landscape Impact

5.1. The Mount Browne site is located within the Surrey Hills AONB. Paragraph 115 of the NPPF states that ‘great weight should be given to conserving landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to landscape and scenic beauty’. Paragraph 116 states that planning permission should be refused for major developments in these designated areas except in exceptional circumstances and where it can be demonstrated they are in the public interest. We consider the proposed changes to allocation A32 to have minimal impacts on the AONB as set out below.

5.2. Policy P1 of the Proposed Submission Local Plan sets out the following criteria for development in the AONB.

- conserve and/or enhance the setting and views of the AONB
- conserve wildlife, historic objects or natural phenomena within it
- promote its enjoyment by the community and visitors to the area
- support the rural economy of the Surrey Hills area
- provide or maintain public access to the AONB.

5.3. We have set out below how we consider that the proposed change to allocation A32 to accord with national and local policy.

5.4. Firstly, a significant proportion of the Mount Browne site is already allocated for development. The existing draft A32 allocation sits within the designated Surrey Hills AONB. Policy A32 states that provision must be made to provide positive benefit in terms of landscape and townscape character and local distinctiveness and have regard to the identified landscape character areas, recognising that it is possible to develop this site without having an undue impact on the AONB.

5.5. The attached Landscape and Visual Impact Appraisal prepared by WYG evaluates the site and surrounding landscape. The methodology used for this landscape and visual appraisal is based on the recommendations in Guidelines for Landscape and Visual Impact Assessment 3rd Edition published by The Landscape Institute and the Institute of Environmental Management & Assessment in 2013 (GLVIA3). ?

5.6. The report sets out the internal topography of the site, which varies considerably between the northern and southern parts of the site sloping down from approximately 100m AOD to 50m AOD in the south east corner. The northern area, where the current police facilities are located, is marked by a series of steep changes in level and is set on the edge of the ridge line running east-west. This is contrasted by the gradual change in level on the southern part of the site which slopes from 50m AOD at the eastern boundary up to approximately 65m AOD at the western site extents. ?
5.7. Existing vegetation is a key feature and defines the character of the site. Again there is a distinct change in vegetation between the northern and southern parts of the site. The northern area is densely vegetated with numerous tree groups, and often large individual tree specimens, together with an established shrub and hedge layer. Built form is set within this landscape context creating a sense of enclosure and separation.

5.8. Tree species are a mix of deciduous and evergreen species, including both native and ornamental specimens.

5.9. The southern part of the site contains a series of more open landscape spaces, relating to former uses associated with this part of the site. A former sports hall building effectively divides the site into two parts. To the east of this building is a flat area of grass formerly used for sports pitches, with an access road providing a link to The Ridges and the highway network beyond. Localised landform has been used to create this plateau for the pitches and the ground slopes down to the access road. The boundary is well vegetated with established hedge and trees.

5.10. To the west of sports hall is a further area of amenity grass with a number of large tree specimens with the land gently sloping up to the north and west. The southern boundary is more open with several gaps in the planting offering views into the site. Along the western boundary vegetation becomes denser enclosing the path link here.

5.11. The report also assesses the potential impact on the landscape in a 4km radius of the site. This detailed appraisal demonstrates that views from the north are limited by a combination of topography and vegetation. Views are available from the south, east and west, although the extent of these are limited and filtered by the extent of mature planting on site and in the wider landscape. Existing vegetation on the site and in the wider landscape reduces and filters views to the site, including close views.

5.12. Where there is potential for long distance views, these are often limited, with only the communications mast, located on the northern part of the site, visible above the tree line. This indicates that development on the southern section of the site, up to 50m AOD below the northern area of the site, would have no impact on the long distance views.

5.13. The report sets out potential mitigation measures for any development, including a comprehensive landscape strategy, strengthening existing boundary planting, particularly along the southern boundary; incorporating tree planting throughout the development layout; and management of the existing vegetation to ensure it continues to contribute to the character and qualities of the site.

5.14. The proposed allocation does not include the whole of the area within the ownership boundary. The area ancient woodland to the east would be retained and access to the public could be improved by any future development.

5.15. Overall there is a clear opportunity to increase the extent of the proposed development area on the Mount Browne site without impacting on the wider landscape. This is primarily due to the sloping topography of the site and existing vegetation which would be retained and enhanced as part of any development proposals. It is therefore concluded that impact on the AONB is limited and that development, combined with new access to areas of open space and recreation, as well as opportunities to provide new areas of landscaping, can bring about improvements to the setting of the AONB.

6. Ecology and Biodiversity

6.1. The Mount Browne site has been appraised for any flora or fauna of note by an ecological walkover survey conducted on 30 June 2016 by WYG. The survey has been submitted alongside these representations and sets out the findings in more detail. The survey was carried out broadly in line with the Joint Nature Conservancy Council Standard Phase 1 habitat survey technique and is intended to give an initial view on the ecological quality of the site. The timing of the survey was optimal for encountering species of note.

6.2. The survey found that the different areas of the site contain a variety of habitats which vary from high to low ecological value. The amenity grassland located in Area 1, has a low ecological value whereas the semi-natural broadleaved woodland has a high ecological value, as they have potential to support various notable species. It is therefore recommended that any additional housing (within an allocation extension) is planned to be located within the amenity grassland area and hard standing / man-made habitats within Area 1. This would result in the least adverse ecological impact.
Furthermore, it is recommended that scattered mature trees, woodland and hedgerow habitats are retained wherever possible. A natural buffer (such as grassland) extending from woodland edges, should be incorporated into the design of the development where possible.

No protected species were found, but if a development were to be brought forward protected species surveys for bats, reptile, great crested newt, dormouse, badger and possibly breeding birds may be required.

Overall this demonstrates that a scheme for 200 homes on the site could be carefully designed to avoid any significant ecological impacts, building on the existing sports pitch areas and maintaining the wooded areas.

7. Heritage

The site is not located within a conservation area and there are no listed buildings on site. The nearest listed building is the Grade II listed Braboeuf Manor on the University of Law site and the nearest conservation area is St Catherine’s. Allocation A32 sits directly to the south of the conservation area and approximately 100m to the south west of the Manor.

These representations propose to allocate additional land to the south of the A32 allocation, approximately 170m to the south of the conservation area and screened by several dense tree lines, existing buildings and a significant drop in ground levels. There will therefore be no negative impact on these heritage assets.

8. Summary and Conclusions

In conclusion, the Mount Browne site is located in a sustainable location with good access to public transport and the centre of Guildford. The southern part of the site is well positioned to be developed with minimal impacts on the landscape quality of the surrounding area. Although the southern part of the site is currently allocated as Green Belt, it is sequentially preferable to many other Green Belt sites that the draft Local Plan is proposing to allocate. The A32 allocation should therefore be extended to include the additional land to the south in light of the lack of developable land in the Borough.

We therefore propose that the following change is made to the local plan policy A32:

1. Amend to say ‘The site is allocated for approximately 116 200 homes (C3)”
2. Update area to 15.4 ha
3. Update plan on page 198 to reflect amended site boundaries

The Police and Crime Commissioner for Surrey is pleased to have the opportunity to respond to the draft Local Plan and request that they are informed of any future consolation events.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land to the south of Tongham, currently in ‘Land Beyond the Green Belt’ is proposed for designation as “new greenbelt”. We consider there to be no merit in this new designation which is seen as little more that ‘compensating’ for the loss of Green Belt elsewhere to accommodate strategic development which is strongly opposed by many residents within the Borough. This is not a justifiable reason for creating new ‘compensatory’ Green Belt elsewhere and the proposed designation does not fulfil the five purposes of Green Belt designation.

We strongly object to the proposed designation as Green Belt of our client’s site to the east of The Street, Tongham (parcel K3). We therefore request that the plan is amended to remove its proposed designation as new Green Belt and an allocation made for housing. This is appropriate for a number of reasons. The Council has highlighted that their spatial strategy has applied a sequential approach to allocating land for development and where insufficient brown field land is available, that green-field sites in the most sustainable locations are the preferred location. The land to the east of The Street / south of Poyle Road, Tongham is land which adjoins the second most sustainable location in the Borough second only to Guildford; it currently designated ‘Land Outside the Green Belt’ and has no other fundamental constraints. To the south lies AONB which protects land on the slopes of the Hogsback but does not impinge on the subject area.

An Addendum to the Green Belt and Countryside Study was prepared in April 2014 to address criticisms of the original Study. The Addendum updated the Environmental Capacity Analysis undertaken within Volume II and that undertaken in connection with additional urban edge parcels with a clear connectivity to the existing urban edge boundaries which were not previously considered beyond Green Belt purposes. Two additional land parcels were considered: Land Parcel J1, Land at Liddington Hall Farm and Land Parcel K3, Land south of Poyle Road, Tongham. With regard to Land Parcel K3, the Addendum states at paragraph 4.10 that: ‘Significantly, the parcel does not lie within the Green Belt at present, and is instead designated as lying within ‘Countryside beyond the Green Belt, in the Local Plan’. It goes on to state at 4.11 that: ‘a PDA across the entirety of the parcel would be inappropriate and an area has instead been identified to the north of the parcel. The PDA relates to Poyle Road, and incorporates land either side of the recreation ground and a woodland block.’ And at paragraph 4.12 that: ‘The PDA covers an area of approximately 24ha and could accommodate in the region of 572 dwellings. The PDA scored 11.43 against the sustainability credentials and would therefore be ranked at the higher end of those main urban edge parcels identified for PDAs as indicated at Appendix 6’.

To therefore seek to impose Green Belt designation here within the Proposed Submission Plan is considered unjustified and restricts the Borough’s ability to provide for future needs in a sustainable way. We do not consider that a change to the Green Belt boundary in this location is justified and consider that the assessment of the Land Parcel K3 to be flawed. The result of this is/will be to place further reliance on less sustainable options elsewhere within the Borough and / or restrict the ability of the Borough to meet it’s objectively assessed housing needs into the future.

Additionally we consider that the following points also justify either allocation or safeguarding of the site for housing:

• Landscape evidence previously submitted to the Council (attached) has demonstrated the suitability of two parcels of land to be accommodated in this location without harm to the wider landscape. Whilst development would be visible from the south, the evidence noted that new development would be seen in the context of the existing urban edge of Tongham beyond. Reinforcement planting along the southern edge of the two development parcels was considered a suitable mitigation measure by the landscape consultants fabrik;

• We oppose the views raised that the area should be designated as Green Belt in order to prevent southward and eastward encroachment of Tongham towards the A31. As the landscape evidence previously submitted to the Council demonstrates, there are alternative options available which would enable more development to be sustainably delivered at Tongham, whilst also preventing continued development southwards towards the A31. The landscape plan re-provided at Appendix 1 of our representation outlines an area between the potential housing areas B and C and the A31 which should remain open. It is considered that this area of land could be used for public open space which would provide long-term protection along the southern edge of Tongham and positive implications for the AONB.
Paragraph 82 of the NPPF highlights that the general extent of Green Belts across the country is already established. Additionally it advises that:

“New Green Belts should only be established in exceptional circumstances, for example when planning for larger scale development such as new settlements or major urban extensions. If proposing new Green Belt, local planning authorities should:

- demonstrate why normal planning and development management policies would not be adequate;
- set out whether any major changes in circumstances have made the adoption of this exceptional measure necessary;
- show what the consequences of the proposal would be for sustainable development;
- demonstrate the necessity for the Green Belt and its consistency with Local Plans for adjoining areas; and
- show how the Green Belt would meet the other objectives of the Framework.”

We do not consider that the area of new Green Belt proposed meets the NPPF tests above. Equally, having reviewed the supporting text of Policy P2 Green Belt, we note at paragraph 4.3.17 that the plan has not sought to make any justifications against these tests and in this respect it is of note that the Green Belt and Countryside Study Volume II Addendum reassessed the northern part of Land Parcel K3 as suitable for a Potential Development Area (PDA), (the southern area being covered by AONB ad therefore not suitable for major development). In drawing the conclusion that the PDA ranked at the higher end of those main urban edge parcels identified for PDAs, it acknowledged that an area of 24ha could accommodate in the region of 572 dwellings. Suitable mitigation could be delivered to offset any impact on nearby areas of ancient woodland, the setting of nearby listed buildings, the SNCI to the east. The potential for enhancement of planting along the southern edge to assist with an appropriate relationship with the AONB further to the south on the Hog’s Back would be beneficial.

It is noted that the scoring at Appendix 1 of Volume II Addendum is wrong in relation to Land Parcel K3 which has not been updated with the reassessment. Sensitivity of this area should therefore be reduced from High Sensitivity to Medium Sensitivity.

Notwithstanding this, it is difficult to see how the Council would demonstrate why normal planning policies would not be sufficient to continue to maintain a degree of separation between Tongham and the A31 particularly in the light of the existing AONB designation to the south of this Land Parcel. Indeed, our clients SHLAA submission and supporting landscape evidence, provides the Council with a very logical alternative to secure land in this location in perpetuity (attached as Appendix 2).

In addition to the above, it is clear that the proposal to designate Green Belt in this area has clear consequences for sustainable development. The Council’s Issues and Options Paper highlighted the potential at Land Parcel K3 “to carry out further research to see if there may be some small potential development areas”. The Green Belt and Countryside Study also subsequently determined that the area should be considered as a potential development area scoring 11.43 against the sustainability credentials and therefore ranked at the higher end of those main urban edge parcels identified for PDAs.

Clearly, in designating this area as Green Belt, any subsequent release would only be able to be altered in exceptional circumstances, through the preparation or review of the Local Plan (NPPF, Paragraph 83). This indicates why decisions to designate new Green Belt should be a last resort. We do not feel that “exceptional circumstances” can therefore be demonstrated here and no new Green Belt designation should be envisaged.

Additionally we do not support the Council’s view that the land would serve the five purposes of Green Belt identified in the NPPF, Paragraph 80. We consider each of these in turn below. We also provide a copy of our Landscape and Visual Rebuttal Statement (LVRS) on Parcel K3 (November 2013) (Appendix 3) which we have previously submitted to the Council.

Unrestricted Sprawl
Unrestricted sprawl would be very unlikely to the south of Tongham as the land does not form part of an open area of countryside moving southwards. This is on the basis that it is significantly restrained to the south by the A31, which forms a defensible boundary thus preventing sprawl. Furthermore, to the south, the AONB already provides a significant planning constraint which is afforded great protection by the NPPF and would essentially restrict development moving too far southwards towards the A31 without the potential for unacceptable levels of harm to arise. Additionally, the LRVS on page 23 also responds to Volume II of the Green Belt and Countryside Study, outlining that the consensus that K3 would ‘check the southward sprawl of Tongham’ is not consistent with comments against the neighbouring parcel of K2 which identifies that land as a Proposed Development Area.

Coalescence

We do not consider that the proposed area of Green Belt would have a significant ability to prevent the coalescence of settlements. The potential development areas outlined within the LRVS (areas B and C) demonstrate how a development area can be established in this location, to accord with the eastern extreme of existing development at Tongham. As Figure 5.1 of the LRVS demonstrates (Appendix 1), this enables a large band of landscaping to be maintained between Tongham and Ash Green, as well as between Tongham and the A31. Whilst the settlement of Seale falls literally to the south of the A31, we consider it absurd to raise concerns that any development at K3 would have an impact in terms of coalescence with Seale.

The LRVS on page 23, responds in detail to this concern. Firstly, it is noted that the Green Belt purpose relates to the issue of towns merging, which in this case is irrelevant on the basis that Tongham is a village and Seale, a small cluster of development. In any event, the separation caused by the dramatic changes in site levels associated with the ridgeline caused by the A31, means that there is both physical and visual separation between the settlements to prevent coalescence. Additionally, as outlined under our consideration of sprawl above, the AONB to the south of Tongham, also restricts the extent to which development could extend southwards. For coalescence to occur, development would therefore have to extend into the AONB and onto higher levels of land adjacent to the Hogs Back to result in physical or perceived coalescence of the two settlements.

Safeguard Countryside from Encroachment

The proposed area of new Green Belt in our view has little purpose and by virtue of its surroundings would only be capable of preventing development extending southwards from the existing urban edge of Tongham. As outlined under our ‘unrestricted sprawl’ section above, the land to the south of Tongham is not located within open countryside, as experienced to the east. To the south the A31 acts as a defensible boundary in preventing encroachment into the wider countryside south of the A31, whilst AONB provides further protection of the countryside. Additionally, we have highlighted how there are other opportunities to secure the long term protection of land within this area via other planning policies and through SANGS associated with some residential development at the settlement edge. The need to designate new Green Belt in this location is not therefore supported by this Green Belt purpose.

The LRVS also concluded on page 23 that whilst currently undeveloped, K3 had the potential to include significant areas of new Green Infrastructure, which would maintain the immediate landscape settings to the AONB designation, whilst also providing a new area of landscape that could provide a new area of open space resource for the town. As the NPPF in any event seeks to support the use of areas of Green Belt for leisure purposes and see the countryside utilised more for recreation, we consider that our client’s proposals, do not vary significantly to the Council’s intentions to safeguard countryside. However, it should clearly be preferential to secure any development which can also be accommodated in the location without harm.

Setting and Special Character of Historic Towns and Assist in Urban Regeneration

We do not consider that the new area of Green Belt proposed would reflect these purposes on the basis that Tongham is not recognised in the study as a historic town.

Conclusion of the Five Purposes of Green Belt in Response to Land Parcel K3

In light of our appraisal of the five Green Belt purposes and findings of the additional landscape evidence provided to the Council in respect of the site, we continue to advocate that it is inappropriate and unwarranted to seek to allocate Parcel K3 as new Green Belt. We strongly request that the advice contained within Paragraph 82 of the NPPF is applied to the
proposal. This would demonstrate that there are alternative approaches available which could be secured through normal planning policies, that there is no necessity for Green Belt in this location and that there would be an adverse impact on the delivery of sustainable development.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

No.

We do not consider the Plan to be compliant with the national policy set out in the NPPF in relation to the proposed designation of additional tracts of Green Belt which do not fulfil the five purposes of Green Belts.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: SQLP16/1915  Respondent: 15670785 / Mr and Mrs Poulsom  Agent: Vail Williams LLP (Jane Terry)
No.

We do not consider that the proposed Plan is sound as a whole in relation to the designation of new Green Belt and the implications this has for housing delivery both within the Borough and in meeting any unmet needs of neighbouring districts. In this respect, the Plan is not consistent with national policy; has not been positively prepared; is not justified and will not be effective in meeting objectively assessed needs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

No.

The actions taken by the Council to conform to the Duty to Co-operate are set out in the Topic Paper Duty to Cooperate, June 2016.

In relation to the specific issue of housing, reference is made to the Housing Delivery Topic Paper which discusses the approach to meeting needs. A Memorandum of Understanding on housing delivery has been signed between Guildford, Woking and Waverley which recognises that there is unmet need within the HMA and commits the three authorities to continued future joint working to ensure housing needs across the HMA are met in full. It states that the Council is committed to continuing to explore with Waverley and Woking those areas which are most likely to lead to positive outcomes. The Topic Paper goes on however, to state that Guildford does not consider it can sustainably accommodate any unmet need arising from Woking (or from Waverley should an unmet need be identified in the future).

The Localism Act establishes that the outcome of the Duty to Co-operate should lead to effective policies on strategic cross boundary matters: It is the outcome rather than the process that is critical to complying with this legal obligation. In relation to the requirement that local plans are prepared to meet objectively assessed needs, including unmet needs from neighbouring authorities, this statement is contrary to the Duty to Co-operate as it predicates how a positive outcome can be achieved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The lack of detail regarding the additional infrastructure in terms of: -

- schools
- roads - local and A3 (and A3 intersection)
- Tunnel proposal
- motorway - proximity to M25 and 2 lane section
- public transport
- parking

which ALL need to be considered fundamentally before any additional housing is approved & built.

Comment ID: PSLPS16/8138  Respondent: 15671297 / JB Planning Associates (Sue Foster)  Agent:
Our representations with respect to Policy A41 are set out in Section 4 of our submission.

**Representation on Policy A41: Land to the South of West Horsley**

**Introduction**

1. This representation is submitted on behalf of Countryside Properties in response to the Council’s decision to allocate Land to the South of West Horsley as a Strategic Site Allocation (Policy A41) in the Regulation 19 Proposed Submission Local Plan.

1. This pastoral farmland, of approximately 8 ha, has been identified in the Submission Local Plan as a housing allocation for approximately 90 homes (C3). The site comprises of 2 fields currently used as pasture and paddocks.

1. Below we briefly set out why we consider the proposed allocation is less sustainable than our Client’s site on land to the south of New Pond Road,

1. With regard to the landscape and visual impact of the proposed allocation and Green Belt considerations, we refer below to the key findings of the ‘Site Comparison Study’ prepared on behalf of our Client by Barton Willmore. The full findings of the Study are set out in Appendix 4.3.

1. In terms of sustainability we draw upon the findings of the Sustainability Appraisal (SA) of the Guildford Proposed Submission Local Plan, which we have, where necessary, amended to address inaccuracies that we have noted with respect to our Client’s. These results are set out in a table (see Appendix 4.4).

**Landscape and Visual Impact**

1. Barton Willmore has produced a Site Comparison Study, which provides a comparative assessment of our Client’s site against 4 other sites that have been identified as housing allocations within the Proposed Submission Local Plan. These were selected on the basis that they are also located outside of the settlement boundaries, within the Green Belt and are non-strategic. The sites are:
   - Policy A38: Land to the West of West Horsley
   - Policy A41: Land to the South of West Horsley
   - Policy A44: Land to the West of Winds Ridge and Send Hill, Send
   - Policy A47: Land to the East of The Paddocks, Flexford

2. Below we identify some of its key findings with respect to the impact of the development of Site A41 on landscape character:
   - Potential for substantial loss of vegetation along East Lane to accommodate the frontages of new development and new access routes which would comprise hedgerows and mature trees, particularly along its boundaries;
   - Further urbanisation and also the perception of encroachment of the settlement pattern in a southerly direction; and
   - Visual effects to views from the adjoining properties, and PRoW

3. With respect to the contribution that Site A41 makes to the function of the Green Belt, Barton Willmore identified that:
Development would result in the erosion of the semi-rural lane character of East Lane which would become wholly suburban in character in this location, with residential development on both sides and therefore would result in substantial encroachment. Development in a southerly direction from East Lane would result in an alteration to the settlement Furthermore, there is no robust defensible boundary to the southern part of the site, so the local landscape to the south would therefore be subject to further development pressure.

4. Barton Willmore’s study concludes that our Client’s site is comparative with the other sites in relation to landscape and visual considerations, in that it does not score significantly differently from the others to warrant its exclusion from the Proposed Submission Local Plan. In fact, our Client’s site scores considerably better in some respects to the other sites with regard to landscape and visual considerations, for example, our Client’s site is of lesser tranquillity due to the fact that it is adjoined by New Pond Road, and does not contain any footpaths, listed buildings or notable landscape features within the site.

Sustainability

5. JBPA has produced a Site Comparison Table (Appendix 4) which looks at the same 4 sites identified in the Barton Willmore Assessment in terms of their overall sustainability as proposed housing allocations. It also compares these sites with our Client’s land at New Pond Road, Farncombe, and with land to the south of Normandy and north of Flexford (Site A46) which has been brought forward as a new proposed housing allocation at the Proposed Submission Draft stage of the Local Plan. A separate representation on Site A46 is included with our submission in section 5.

6. When considering sustainability, we have drawn initially upon the findings of the Sustainability Appraisal (SA) of the Guildford Proposed Submission Local Plan. We have, however, where necessary amended the scorings to address inaccuracies that we have noted in the SA with respect to our Client’s site. This includes correcting the distance to the nearest Primary School as the SA suggests this is less than 2km, when in fact it is less than 1km. We have also identified from available MAFF records that our Client’s land contains Grade 3 agricultural land, as opposed to Grade 1 land which is identified in the SA.

7. Below we set out our key conclusions when comparing Site A41 with our Client’s site:
   - Site A41 scored poorly (red) in relation to 8 sustainability criteria, whereas our Client’s site only scored poorly in 3 criteria
   - Site A41 is further from a key employment site, healthcare facilities, recreation facilities, a secondary school and a railway station than our Client’s site.
   - Site A41 is closer to a European Site (SPA and SAC) and a Designation of Local Importance than our Client’s site.
   - Our Client’s site scored worse than A41 with respect to flood risk, and its location within the AONB, however we have demonstrated in our site specific representation in relation to our Client’s site (Section 3) that it makes limited to no contribution to the special qualities and features of the Surrey Hills AONB, and that the area of the site within a flood zone has been agreed with the Environment Agency and will be left.

Conclusion

8. Informed by the findings of Barton Willmore’s “Site Comparison Study” and the Sustainability Appraisal of the Guildford Proposed Submission Local Plan, this representation sets out why we consider the proposed allocation at land to the South of West Horsley (Site A41) is less sustainable and suitable than our Client’s site on land to the south of New Pond Road, Farncombe.

9. Barton Willmore’s study identifies that the site makes a substantial contribution to two Green Belt purposes and its development has the potential to have substantial visual effects, including the loss of vegetation along East Lane to accommodate the frontages of new development; adverse visual effects to views from the adjoining properties, and PRoW 98; and the perception of encroachment of the settlement pattern.

10. With respect to Sustainability we have determined that the site scored poorly (red) over significantly more sustainability criteria than our Client’s Thus, our Client’s site represents a more sustainable location than a comparable site identified in the Proposed Submission Local Plan.

Tests of Soundness

11. We consider that there is a risk of the Local Plan being found unsound with the proposed allocation of Site A41, instead of our Client’s site on land to the south of New Pond Road, because it will not be ‘justified’, as it does not represent the most appropriate strategy, when considered against the reasonable alternatives.
12. In view of the above considerations, we believe that Land to the South of West Horsley (Site A41) should be removed from the Local Plan prior to submission for Examination.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Our representations with respect to Policy A44 are set out in Section 4 of our submission.

**Representation on Policy A44: Land to the West of Winds Ridge and Send Hill, Send**

**Introduction**

1. This representation is submitted on behalf of Countryside Properties in response to the Council’s decision to allocate Land to the West of Winds Ridge and Send Hill as a Strategic Site Allocation (Policy A44) in the Regulation 19 Proposed Submission Local Plan.

1. This site, of approximately 9 ha, comprises three fields currently used for informal recreation. The fields are enclosed by substantial hedgerows and treecover to the north, south and west, with residential gardens to the east of the site.
1. Below we briefly set out why we consider the proposed allocation is less sustainable than our Client’s site on land to the south of New Pond Road,

1. With regard to the landscape and visual impact of the proposed allocation and Green Belt considerations, we refer below to the key findings of the ‘Site Comparison Study’ prepared on behalf of our Client by Barton The full findings of the Study are set out in Appendix 4.5.

1. In terms of sustainability we draw upon the findings of the Sustainability Appraisal (SA) of the Guildford Proposed Submission Local Plan, which we have, where necessary, amended to address inaccuracies that we have noted with respect to our Client’s These results are set out in a table (see Appendix 4.6).

**Landscape and Visual Impact**

1. Barton Willmore has produced a Site Comparison Study, which provides a comparative assessment of our Client’s site against 4 other sites that have been identified as housing allocations within the Proposed Submission Local These were selected on the basis that they are also located outside of the settlement boundaries, within the Green Belt and are non-strategic. The sites are:

- **Policy A38: Land to the West of West Horsley**
- **Policy A41: Land to the South of West Horsley**
- **Policy A44: Land to the West of Winds Ridge and Send Hill, Send**
- **Policy A47: Land to the East of The Paddocks, Flexford**

1. Below we identify some of its key findings with respect to the impact of the development of Site A44 on landscape character:

- Substantial loss of vegetation which would comprise hedgerows, long grassland and mature trees, particularly along its boundary with Send Hill;
- Further urbanisation to Send Hill and also the perception of encroachment of the settlement pattern in a westerly direction;
- Potential substantial visual effects to views from the adjoining PRoWs; and
- Substantial loss of tranquility

1. With respect to the contribution that Site A44 makes to the function of the Green Belt, Barton Willmore identified that:

- Development would result in the erosion of the semi-rural lane character of Send Hill in this location, with residential development on both sides and therefore would result in some
- The site represents a transition between the settlement and the wider landscape to the west, and forms a coherent buffer to the settlement pattern in this Furthermore, there is no robust defensible boundary to the west of the site (with the exception of the boundary tree belt) and therefore the land to the west of the site would be subject to further development pressure.

1. Barton Willmore’s study concludes that our Client’s site is comparative with the other sites in relation to landscape and visual considerations, in that it does not score significantly differently from the others to warrant its exclusion from the Proposed Submission Local Plan. In fact, our Client’s site scores considerably better in some respects to the other sites with regard to landscape and visual considerations, for example, our Client’s site is of lesser tranquillity due to the fact that it is adjoined by New Pond Road, and does not contain any footpaths, listed buildings or notable landscape features within the site

**Sustainability**

1. JBPA has produced a Site Comparison Table (Appendix6) which looks at the same 4 sites identified in the Barton Willmore Assessment in terms of their overall sustainability as proposed housing allocations. It also
compares these sites with our Client’s land at New Pond Road, Farncombe, and with land to the south of Normandy and north of Flexford (Site A46) which has been brought forward as a new proposed housing allocation at the Proposed Submission Draft stage of the Local Plan. A separate representation on Site A46 is included with our submission in section 5.

1. When considering sustainability, we have drawn initially upon the findings of the Sustainability Appraisal (SA) of the Guildford Proposed Submission Local Plan. We have, however, where necessary amended the scorings to address inaccuracies that we have noted in the SA with respect to our Client’s site. This includes correcting the distance to the nearest Primary School as the SA suggests this is less than 2km, when in fact it is less than 1km. We have also identified from available MAFF records that our Client’s land contains Grade 3 agricultural land, as opposed to Grade 1 land which is identified in the SA.

1. Below we set out our key conclusions when comparing Site A44 with our Client’s site:

1. Site A44 scored poorly (red) in relation to 7 sustainability criteria, whereas our Client’s site only scored poorly in 3 criteria.
2. Site A44 is further from a key employment site, recreation facilities, a primary school, a secondary school and a railway station than our Client’s site.
3. Site A44 is closer to a European Site (SPA and SAC) than our Client’s site.
4. The development of Site A44 would result in the loss of higher quality agricultural land than our Client’s site.
5. Our Client’s site scored worse than A44 with respect to flood risk, and its location within the AONB, however we have demonstrated in our site specific representation in relation to our Client’s site (Section 3) that it makes limited to no contribution to the special qualities and features of the Surrey Hills AONB, and that the area of the site within a flood zone has been agreed with the Environment Agency and will be left undeveloped.

1. Beyond the sustainability criteria considered above, it is also worth noting that the site is a former quarry and there is also therefore the potential for poor ground conditions which may affect the deliverability and viability of developing the site.

Conclusion

1. Informed by the findings of Barton Willmore’s “Site Comparison Study” and the Sustainability Appraisal of the Guildford Proposed Submission Local Plan, this representation sets out why we consider the proposed allocation at Land to the West of Winds Ridge and Send Hill (Site A44) is less sustainable and suitable than our Client’s site on land to the south of New Pond Road.

1. Barton Willmore’s study identifies that the site makes a contribution to two Green Belt purposes, including a substantial contribution with respect to checking the unrestricted sprawl of built up The development of the site would result in the substantial loss of vegetation along its boundary with Send Hill, further urbanisation to Send Hill and the perception of encroachment of the settlement pattern in a westerly direction. It would also have potential substantial visual effects to views from the adjoining PRoWs; and result in a substantial loss of tranquillity.

1. With respect to Sustainability we have determined that the site scored poorly (red) over significantly more sustainability criteria than our Client’s Thus, our Client’s site represents a more sustainable location than a comparable site identified in the Proposed Submission Local Plan.

Tests of Soundness

1. We consider that there is a risk of the Local Plan being found unsound with the proposed allocation of Site A44, instead of our Client’s site on land to the south of New Pond Road, because it will not be ‘justified’, as it does not represent the most appropriate strategy, when considered against the reasonable alternatives.

Proposed Modifications

1. In view of the above considerations, we believe that Land to the West of Winds Ridge and Send Hill (Site A44) should be removed from the Local Plan prior to submission for Examination.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Our representations with respect to Policy A47 are set out in Section 4 of our submission.

Representation on Policy A47: Land to the East of The Paddocks, Flexford

Introduction

1. This representation is submitted on behalf of Countryside Properties in response to the Council’s decision to allocate Land to the East of the Paddocks as a Strategic Site Allocation (Policy A47) in the Regulation 19 Proposed Submission Local Plan.

1. This site, of approximately 2 ha, comprises three fields on gently sloping topography. The fields are enclosed treebelts to the north, hedgerows within open farmland to the east, residential gardens to the south, and treebelts to the west.
1. Below we briefly set out why we consider the proposed allocation is less sustainable than our Client’s site on land to the south of New Pond Road, Farncombe.

1. With regard to the landscape and visual impact of the proposed allocation and Green Belt considerations, we refer below to the key findings of the ‘Site Comparison Study’ prepared on behalf of our Client by Barton Willmore. The full findings of the Study are set out in Appendix 4.7.

1. In terms of sustainability we draw upon the findings of the Sustainability Appraisal (SA) of the Guildford Proposed Submission Local Plan, which we have, where necessary, amended to address inaccuracies that we have noted with respect to our Client’s site. These results are set out in a table (see Appendix 4.8).

Landscape and Visual Impact

1. Barton Willmore has produced a Site Comparison Study, which provides a comparative assessment of our Client’s site against 4 other sites that have been identified as housing allocations within the Proposed Submission Local Plan. These were selected on the basis that they are also located outside of the settlement boundaries, within the Green Belt and are non-strategic. The sites are:

Policy A38: Land to the West of West Horsley
Policy A41: Land to the South of West Horsley
Policy A44: Land to the West of Winds Ridge and Send Hill, Send
Policy A47: Land to the East of The Paddocks, Flexford

1. Below we identify some of its key findings with respect to the impact of the development of Site A47 on landscape character:

- Potential for substantial loss of vegetation;
- Extension to the settlement pattern in an easterly direction; and
- Adverse effect on public and private views

1. With respect to the contribution that Site A44 makes to the function of the Green Belt, Barton Willmore identified that:

- The fact that development is already present on the site demonstrates that the site has a limited function when it comes to safeguarding the countryside from encroachment.
- Development would result in the eastward sprawl of Flexford.

1. Barton Willmore’s study concludes that our Client’s site is comparative with the other sites in relation to landscape and visual considerations, in that it does not score significantly differently from the others to warrant its exclusion from the Proposed Submission Local Plan. In fact, our Client’s site scores considerably better in some respects to the other sites with regard to landscape and visual considerations, for example, our Client’s site is of lesser tranquility due to the fact that it is adjoined by New Pond Road, and does not contain any footpaths, listed buildings or notable landscape features within the site.

Sustainability

1. JBPA has produced a Site Comparison Table (Appendix 4.7) which looks at the same 4 sites identified in the Barton Willmore Assessment in terms of their overall sustainability as proposed housing allocations. It also compares these sites with our Client’s land at New Pond Road, Farncombe, and with land to the south of Normandy and north of Flexford (Site A46) which has been brought forward as a new proposed housing allocation at the Proposed Submission Draft stage of the Local Plan. A separate representation on Site A46 is included with our submission in section 5.
1. When considering sustainability, we have drawn initially upon the findings of the Sustainability Appraisal (SA) of the Guildford Proposed Submission Local Plan. We have, however, where necessary amended the scorings to address inaccuracies that we have noted in the SA with respect to our Client’s site. This includes correcting the distance to the nearest Primary School as the SA suggests this is less than 2km, when in fact it is less than 1km. We have also identified from available MAFF records that our Client’s land contains Grade 3 agricultural land, as opposed to Grade 1 land which is identified in the SA.

1. Below we set out our key conclusions when comparing Site A47 with our Client’s site:

1. Site A47 scored poorly (red) in relation to 8 sustainability criteria, whereas our Client’s site only scored poorly in 3 criteria.
2. Site A47 is further from a key employment site, recreation facilities, a primary school, a secondary school and an “A” Road than our Client’s site.
3. Site A47 is closer to a European Site (SPA and SAC) and a Designation of Local Importance than our Client’s site. The majority of the site is designated as an SNCL.
4. Our Client’s site scored worse than A44 with respect to flood risk, and its location within the AONB, however we have demonstrated in our site specific representation in relation to our Client’s site (Section 3) that it makes limited to no contribution to the special qualities and features of the Surrey Hills AONB, and that the area of the site within a flood zone has been agreed with the Environment Agency and will be left undeveloped.

Conclusion

1. Informed by the findings of Barton Willmore’s “Site Comparison Study” and the Sustainability Appraisal of the Guildford Proposed Submission Local Plan, this representation sets out why we consider the proposed allocation at Land to the East of the Paddocks as a Strategic Site Allocation (Policy A47) is less sustainable and suitable than our Client’s site on land to the south of New Pond Road, Farncombe.

1. Barton Willmore’s study identifies that the site makes a contribution to two Green Belt purposes. Its development would result in the substantial loss of vegetation; an extension to the settlement pattern in an easterly direction; and an adverse effect on public and private views.

1. With respect to Sustainability we have determined that the site scored poorly (red) over significantly more sustainability criteria than our Client’s site. Also, the majority of the site is designated as an SNCL. Thus, our Client’s site represents a more sustainable location than a comparable site identified in the Proposed Submission Local Plan.

Tests of Soundness

1. We consider that there is a risk of the Local Plan being found unsound with the proposed allocation of Site A47, instead of our Client’s site on land to the south of New Pond Road, because it will not be ‘justified’, as it does not represent the most appropriate strategy, when considered against the reasonable alternatives.

Proposed Modifications

1. In view of the above considerations, we believe that Land to the East of the Paddocks as a Strategic Site Allocation (Policy A47) should be removed from the Local Plan prior to submission for Examination.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Introduction

Future Planning & Development provide planning advice to our client Send Surrey Ltd in respect of their site Land Heath Drive Send, Woking, Surrey, GU23 7EP (‘the site’).

This Statement has been prepared in response to the Guildford Borough Council Proposed Submission Local Plan consultation (Regulation 19) which ends on 18 July 2015.

The 2.51ha site is privately owned by Send Surrey Ltd. The site is proposed to be allocated as Open Space in the Proposed Submission Local Plan. Our client has previously made representations to promote the site for housing through the Local Plan process.

Section 20 of the Planning and Compulsory Purchase Act 2004 (as amended) requires that local plans must be positively prepared, justified, effective and consistent with national policy in accordance with guidance set out in the National Planning Policy Framework (NPPF).

Send Surrey Ltd. does not consider that the draft Local Plan submitted by Guildford Borough Council meets the definition of “sound” set out in paragraph 182 of the NPPF.

The objections focus on two specific policy areas with regards to the soundness of the plan: open space and housing delivery. Both of these policy areas are pertinent to our clients’ interests in developing the site for housing, however the representations are submitted without prejudice to the development aspirations of Send Surrey Ltd.

The remainder of this statement is set out as follows:

a. The background to the site
b. The allocation of the site in the Local Plan
c. Assessment of the housing policies
d. Assessment of the open space policies
Background

Site Description

The 2.51ha site is located at *Land Heath Drive Send, Woking, Surrey GU23 7EP* in the north-western corner of the village of Send. The site is privately owned and currently has no formal use.

The site is bound by the Wey Navigation Canal to the north and west. To the south and east the site is bound by residential development which effectively forms the northern edge of the built-up part of the village.

The site is privately owned with no legal rights of way across the site. The site does not have any formal footpaths within it, however, at present, it is not enclosed.

The site is undeveloped and includes a number of mature trees with the denser tree coverage around the northern and western boundaries and open space within the centre of the site.

The site is covered by a group Tree Preservation Order (TPO). The TPO was confirmed on 9 September 1997. The Emergency TPO was made following the felling of a number of trees undertaken by a previous owner of the site. The TPO was justified upon the basis that the group of trees provided high amenity value; particularly from the Wey Navigation.

The site is in a sustainable location with easy access to services provided within the village of Send and public transport links to the facilities and services provided within neighbouring villages and towns. The site is not at risk of flooding and is located within Flood Zone 1.

Ownership and Opportunity of Delivery of Housing

The site is owned by a single company called Send Surrey Ltd (registered number 10173245). The company intends to develop the site for housing. The site is available, viable and deliverable for housing in the short-term (0 – 5 years).

Taking account of existing constraints and access, the site could deliver in the region of 30 – 40 units. The existing tree coverage and edge of settlement location encourages a low density development of around 25 dwellings per hectare over the developable part of the site which is around 1.5ha. The protected 1ha of land will ensure that the northern and western boundary of the site would retain its tree lined perimeter; this is the part of the site which contributes to the site’s visual amenity value. An indicative layout for 32 units is provided in Appendix 1.

Any residential development will provide 40% affordable housing in line with policy. The housing mix will respond to local needs and also the physical constraints of the site.

2.10 The development of the site provides an opportunity for a natural extension to the built-up part of the village whilst retaining the key features of amenity and providing public access through the site to enable it to function as open space.

Planning Background

2.11 The site was submitted to the Strategic Housing Land Availability Assessment (SHLAA) in 2014. The site was identified (reference number 052) as a potential low density site for 16 units within a timeframe of 11 to 15 years. The low density and delayed timeframe proposed by the Council was due to its perceived uncertainty of deliverability due to the multiple ownership of the site at the time. The SHLAA extract is given in Appendix 2.

2.12 The Draft Local Plan was published for consultation in June 2014 (Regulation 18).

The Draft Local Plan amended the settlement boundary to include the site. It also proposed to inset the site from the Green Belt. The Draft Local Plan Proposals Map inset for Send is given in Appendix 3.
2.13 The site was however discounted for housing in the Land Availability Assessment (May 2016) due to suitability concerns over protected open space, the TPO covering the site and the impact on the Corridor of the River Wey.

Legislative Framework and National Planning Policy Framework (NPPF)

Plan-making Policies

Paragraph 182 of the NPPF provides guidance on the Examination of Local Plans. It states “The Local Plan will be examined by the Planning Inspectorate whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is sound. A local planning authority should submit a plan for examination which it considers is “sound” – namely that it is:

- Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;
- Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;
- Effective – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and
- Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.

Paragraph 167 relates to the appropriate use of the evidence base in the plan making process. It states “Wherever possible the local planning authority should consider how the preparation of any assessment will contribute to the plan’s evidence base. The process should be started early in the plan-making process and key stakeholders should be consulted in identifying the issues that the assessment must cover”

Open Space Policies

Open Space is defined in the NPPF as:

“All open space of public value, including not just land, but also areas of water (such as rivers, canals, lakes and reservoirs) which offer important opportunities for sport and recreation and can act as a visual amenity”

Paragraph 72 of the NPPF states “Access to high quality open spaces and opportunities for sport and recreation can make an important contribution to the health and well-being of communities. Planning policies should be based on robust and up-to-date assessments of the needs for open space, sports and recreation facilities and opportunities for new provision. The assessments should identify specific needs and quantitative or qualitative deficits or surpluses of open space, sports and recreational facilities in the local area. Information gained from the assessments should be used to determine what open space, sports and recreational provision is required”

Paragraph 74 of the NPPF states “Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless:

- an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or
- the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or
- the development is for alternative sports and recreational provision, the needs for which clearly outweigh the loss.”

Housing Policies

Housing delivery is at the heart of the NPPF. Paragraph 17 sets out the overarching core planning principles to underpin the plan making and decision taking process, one of which is to objectively identify the need for housing (and other development) and set out a clear strategy for allocating sufficient land which is suitable for development. Paragraph 47
relates specifically to housing supply and states “To boost significantly the supply of housing, local planning authorities should:

- use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area, as far as is consistent with the policies set out in this Framework, including identifying key sites which are critical to the delivery of the housing strategy over the plan period;
- identify and update annually a supply of specific deliverable sites sufficient to provide five years’ worth of housing against their housing requirements with an additional buffer of 5% (moved forward from later in the plan period) to ensure choice and competition in the market for land. Where there has been a record of persistent under delivery of housing, local planning authorities should increase the buffer to 20% (moved forward from later in the plan period) to provide a realistic prospect of achieving the planned supply and to ensure choice and competition in the market for land;
- identify a supply of specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15;
- for market and affordable housing, illustrate the expected rate of housing delivery through a housing trajectory for the plan period and set out a housing implementation strategy for the full range of housing describing how they will maintain delivery of a five-year supply of housing land to meet their housing target; and
- set out their own approach to housing density to reflect local circumstances

The Allocation of the Site

The allocation of the site is set out on the Proposed Submission Local Plan Proposal Map, extract below: <see attachments>

The site is designated as Open Space (pink line) and Conservation Area (brown line). The site, and the wider village, have been inset from the Green Belt boundary (green dashed line). There is no proposed settlement boundary to the village.

Send is a Rural Local Centre in accordance with the Hierarchy of Retail and Service Centres. The function of such centres is to provide for everyday retail and service needs for the local population of that immediate area with larger ones also including a number of more specialist comparison shops

The Proposed Submission Local Plan proposes to allocates the site as open space under Policy I4 - Green and Blue Infrastructure.

Policy I4 states “Open space (encompassing all open space within urban areas, land designated as Open Space on the Policies Map and all land and water that provides opportunities for recreation and sport) will be protected from development in accordance with the NPPF”

The preamble to the policy clarifies the role that open space plays “Public open space is particularly important due to the positive contribution it makes to the character of our settlements, our health and social interaction, and forms the backbone of the green infrastructure network in our settlements. Therefore it is considered that cumulatively these spaces form a valued asset of strategic importance that should be protected as a strategic priority”

Strategic Policy S2 sets out the growth in the borough over the plan period. With specific regards to housing, the policy states “During the plan period (2013-33), we will make provision for 13,860 new homes… The delivery of homes is expected to increase over the plan period, reflective of timescales associated with the delivery of strategic sites and infrastructure. The housing target each year is as set out below, however, this is not a ceiling, and earlier delivery of allocated sites will be supported where appropriate, subject to infrastructure provision”

The policy sets out its annual housing targets over the plan period:

<table>

<tr>
<td>2019/20</td>
<td>550</td>
</tr>
</tbody>
</table>
Open Space Policy Assessment

The site is allocated as Open Space under policy IC4 in the Proposed Submission Local Plan.

The evidence base prepared in support of the policy is the Guildford Open Space, Sport & Recreation Assessment 2016 – 2033 (June 2016) in addition to the Assessment of Sites for Amenity Value (May 2016). Together, the assessments are the primary evidence base documents produced in support of the open space policy – Policy I4 – in the Proposed Submission Local Plan.

The Open Space Sport & Recreation Assessment identifies land of public value across the borough. The assessment identifies that the site is “Accessible Natural Green Space” (brown shading on extract below). This housing typology is incorrect; this land does not meet the criteria by virtue of the fact that it is privately owned.

The Assessment of Sites for Amenity Value is an evidence base document produced in support of the open space policy IC4.

The assessment sets out a methodology to score various sites’ amenity value. The methodology assesses sites on a number of criteria as set out in Table 1 (page 8). The criteria includes: aesthetic value, access to the site, access to community facilities; access within the site; biodiversity; links to other green infrastructure; derelict or damaged land and overall amenity value.

The specific scores in relation to the above criteria are not given in the report; however the assessor’s comments in relation to the site are given as follows “Access to the site off a cul-de-sac and along an informal footpath running through the trees, sycamore dominated semi-mature trees with nice understory, some very mature oak and chestnut trees. View in and out of site”

The site came out with an amenity value score of ‘high’, this in turn led to the allocation of the site as Open Space on the Proposed Submission Proposal Map in accordance with the allocation methodology.

This assessment is however wrongly informed and therefore the evidence base is flawed in respect of this site.

Housing Delivery Policy Assessment
Strategic policy S2 seeks to deliver 13,860 units over the plan period. The annual housing targets set out in the policy have been adjusted to provide more units towards the later stages of the plan period.

The bulk of the housing is to be delivered by development in the Guildford urban area and a number of strategic sites at Gosden Hill Farm and Blackwell Farm (3,940 units, Policies A25 and A26) and the Former Wisley Airfield (2,100 units, Policy A35). These sites have been earmarked for delivery in 1-15 year period in Table 1 of the Local Plan (page 26). The Housing Topic Paper highlights that the early years of the plan are more dependent on a number of smaller sites, than a lesser number of larger sites.

**Soundness of the Plan**

**Open Space**

Open space is defined in the NPPF as land of public value which provides opportunities for sport and recreation and can act as a visual amenity.

The land allocated for open space is privately owned land with no access to the public and therefore does not provide for any sport or recreation opportunity. It is however acknowledged that, to a degree, there is some amenity value; however, this alone is not sufficient to justify the site’s allocation for open space.

Paragraph 72 of the NPPF requires that policies should be based on robust and up-to-date assessment of the needs for open space identifying specific needs and quantitative or qualitative deficits or surpluses.

The site has been erroneously identified as being public land. This has led to it being identified as suitable for assessment as open space. Upon this basis, the allocation of the site is not sound.

It is acknowledged that the site holds some amenity value. The amenity value relates to the visual appreciation of the trees lining the River Wey viewed from the north of the village; this is the only vantage point from which the trees can be fully viewed.

Although there is some amenity value, the amenity value is the only benefit the site has with regards to the recognised function of “open space” as set out in the NPPF. It has no recreational or sporting value. Furthermore, there is no prerequisite for open space to be of amenity value, the primary function is for sport and recreation, in some instance it “can act as a visual amenity”.

The amenity value of the site has been recognised through the Tree Preservation Order for the site. It is our view that the TPO is sufficient to protect the amenity value of the site. The allocation of the site for open space is therefore unnecessary and unduly restrictive. This is unsound in accordance with the need for plan to be justified based on proportionate evidence.

It is also important to highlight that the village is surrounded by Green Belt; this is land which is designated principally for its amenity value. The proposed removal of the site from Green Belt in the current plan and allocation for open space (adjoining Green Belt) is somewhat perplexing because it does not meet with the objective of allocating open space for amenity value. Open space is often allocated to provide relief from built form where it can be appreciated and is of its highest public value.

The amenity value of the site is limited due to it adjoining the Green Belt and being outside of the built-up part of the village. In addition, the site’s location on the edge of the village results in there being little distinction between amenity value of the site and the amenity value of the surrounding Green Belt. If, on the contrary, the site was accessible open space in the middle of the village distinguishable from the built form of the village, e.g. a village green, then an open space allocation would be warranted. We believe that the evidence base has failed to acknowledge this in the methodology and for this reason the policy cannot be said to be justified based on proportionate evidence.

**Housing**
7.10 Paragraph 47 requires that local authorities to ensure that their plan meets the objectively assessed housing need for housing consistent with the policies in the framework. Where an authority has a persistent record of undelivery, a 20% buffer should be added (moved forward from later in the plan period).

7.11 Guildford Borough Council has completed 728 dwellings in the past 3 years, on average less than 250 a year, and less than 300 a year over the past 7 years, failing to meet the targets carried over from the South East Plan.

7.12 In light if this record of persistent undelivery, there is no dispute that a 20% buffer should be applied. However, the local authority has made clear that it is not possible to deliver the 20% buffer along with the accrued shortfall (2,019 units) in the first five years. In accordance with the NPPF, the plan should make provision for 6,177 units in the first 5 years. As the plan has not identified sufficient land to meet with this requirement in line with the NPPF, the plan has not been positively prepared and is therefore not sound in accordance with paragraph 182 of the NPPF.

7.13 Notwithstanding the above, Guildford are unlikely to meet with the housing targets set out in Policy S2; these are staggered over the plan period. The approach of staggering the housing targets over the plan period is unsound. In reality this is only likely to exacerbate housing supply issues later on in the plan period.

7.14 The delivery of the strategic sites is vital to meeting the overall housing supply. The plan however does not specify however if these sites are to be delivered in the short (0-5 years), medium (6-10 years) or longer (11-15 years) term. The plan states they will be delivered in 1-15 years, this is not in accordance with the guidance in paragraph 47 of the NPPF.

7.15 In a wider economic context, it is important to acknowledge that the implications of Brexit on housing delivery are likely to be severe. There are a number of factors that are likely to have an impact on housing delivery, these issues are most likely to manifest in the delivery of large-scale strategic sites being developed by national house builders. For these reasons we believe that more emphasis should be placed on the identification of small-medium sized sites in addition to the allocation of additional strategic sites.

7.16 With regards to housing the plan is not effective; it is not deliverable over the plan.

To this end, it is not sound.

Use of Evidence Base

7.17 Paragraph 167 of the NPPF states that wherever possible the local authority should consider how the preparation of an assessment will contribute to the plan’s evidence base. It requires that the process should start early in the plan-making process and key stakeholders should be consulted in identifying issues.

7.18 With regards to the assessments that have informed the open space policy, i.e. the Guildford Open Space, Sport & Recreation Assessment 2016 – 2033 (June 2016) in and the Assessment of Sites for Amenity Value (May 2016), their preparation has not been in accordance with national planning policy.

7.19 These assessments were published in May and June 2016. These then informed policies which were included in the Proposed Submission Local Plan for the first time upon its publication in June 2016.

7.20 The open space allocations were not in the previous iteration of the Local Plan and, as such, this did not give interested parties an opportunity to comment on these policies or indeed any time to prepare any rebuttal to these designations with supporting evidence, for example, an arboricultural survey, ecological survey, open space assessment or landscape and visual impact assessment. The opportunity to provide such evidence would have provided a more robust evidence base and a sounder basis for allocation.

7.21 To this end, the plan is not justified and has not been considered against other alternatives or based on proportionate evidence. This is clearly an unsound approach to plan making.

**Recommended Modification of the Plan**
Due to the open space designation being unsound, it is respectfully requested that the Inspector removes the open space allocation from the site. With specific regard to the site, the open space designation is not necessary with the existing TPO.

Notwithstanding any inaccuracies in the evidence base, the process of allocating open space commenced too late in the plan making process. We are therefore also of the view that the entire open space allocations should be re-consulted upon.

If the Inspector is of the view that the open space allocation is justified, the applicant would like to recommend a modification to the allocation.

The modification would involve the decreasing the size of the open space allocation to the area shown on the site layout plan (Appendix 1). This would comprise a 1ha strip of open space along the northern boundary of the site. This would retain the trees which contribute to visual amenity.

This modification would also be compatible with the development of the inner parts of the site. Should any application for development be made on the site; the Send Surrey Ltd could consider making this strip of land accessible to the public, to be used as public open space (although the site would be held by Send Surrey Ltd). This would significantly improve the function of the area as open land, however this will only be achievable if delivered as part of a housing development and any such development will only be feasible if the proposed open space allocation for the site is removed.

The plan does not provide sufficient land for housing to meet the objectively assessed need as required by the NPPF. We recommend that the plan is re-consulted upon and further sites identified to meet the housing supply requirements consistently over the plan period. The current approach is not sound and is likely to exacerbate housing supply issues later on in the plan period.

In addition, the housing targets are have been modified so that the local authority has some prospect of maintaining a 5YHLS, however, in doing so, this will stop development coming forward on the basis of there being no 5YHLS. This again, will exacerbate housing supply issues later on in the plan period.

Allowing housing application to come forward and be assessed in accordance with the presumption in favour of sustainable development in the absence of a 5 year housing land supply is an important function of the NPPF with regards to boosting the supply of housing. Staggering the annual housing to avoid such a circumstance prevailing is counterproductive as it restricts this key function of the NPPF to boost supply. Therefore we believe the housing targets must be annualised over the plan and recommend this as a modification.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1 Introduction

1.1 Future Planning & Development provide planning advice to our client Send Surrey Ltd in respect of their site Land off Heath Drive, Send, Woking, Surrey, GU23 7EP (‘the site’).

1.2 This Statement has been prepared in response to Guildford Borough Council’s Proposed Submission Local Plan (‘the Local Plan’) consultation (Regulation 19) which ends on 24 July 2017. The current consultation is effectively an update to the Regulation 19 consultation, in July 2016, to which Send Surrey Limited made representations. The July 2016 representations are provided in Appendix 1.

1.3 The updated Regulation 19 Local Plan carries forward the site’s draft Open Space allocation. Our previous Regulation 19 consultation response made the case that this draft allocation was not sound in accordance with the guidance in the National Planning Policy Framework (NPPF). Our representations also made the case that the Local Plan was not sound because it did not allocate sufficient land to meet with the identified housing need in the borough.

1.4 This Statement provides an update with regards to the two main topic areas: Open Space and Housing. Firstly, the statement presents further evidence to demonstrate that the draft Open Space allocation has been wrongly applied. This includes an Opinion from Andrew Tabachnik QC which states that the Open Space allocation is “unequivocally inappropriate and unlawful”. Secondly, the statement presents evidence to demonstrate that the site is deliverable for housing; this includes evidence to demonstrate that any potential site constraints, i.e. ownership, access, trees and ecology, will not impede the delivery of the site. This is also supported by a pre-application response from Guildford from July 2017 that confirms that the principle of residential development is acceptable. Accordingly, both topics will be addressed in the following sections.

2 Grounds for Draft Open Space Allocation to be Removed

2.1 Open Space is defined in the NPPF as:
“All open space of public value, including not just land, but also areas of water (such as rivers, canals, lakes and reservoirs) which offer important opportunities for sport and recreation and can act as a visual amenity”

2.2 Paragraph 72 of the NPPF states “Access to high quality open spaces and opportunities for sport and recreation can make an important contribution to the health and well-being of communities. Planning policies should be based on robust and up-to-date assessments of the needs for open space, sports and recreation facilities and opportunities for new provision. The assessments should identify specific needs and quantitative or qualitative deficits or surpluses of open space, sports and recreational facilities in the local area. Information gained from the assessments should be used to determine what open space, sports and recreational provision is required”.

2.3 The site was initially proposed to be allocated as Open Space under policy I4 in the Submission Version Local Plan (Regulation 19) in 2016. This draft allocation was justified by the evidence prepared in support of the policy, this being the Guildford Open Space, Sport & Recreation Assessment 2016 – 2033 (June 2016) in addition to the Assessment of Sites for Amenity Value (May 2016).

2.4 The evidence base studies have been updated following the previous Regulation 19 Consultation. The Assessment of sites for Amenity Value 2017 was published in June 2017 and the Guildford Open Space, Sport & Recreation Assessment 2017.

2.5 The allocation of the site under Policy IC4 (renamed from I4) remains in the current updated Submission Version of the Local Plan.

2.6 The site has been reclassified as “private space” in the Open Space, Sports and Recreation Assessment. This indicates that it has no open space value for recreation. As such, we understand that the site is only allocated as open space for its amenity value. This was confirmed by the officer dealing with open space policy (Mr Dan Knowles) in an email to Send Surrey Limited on 8 May 2017 (Appendix 2).

2.7 The site is only allocated as Open Space for its amenity value. Fundamentally, this is not in accordance with national planning policy because it does not meet with the purpose of allocating land as Open Space.
2.8 Send Surrey Limited obtained advice from Counsel in February 2017. Our Barrister - Andrew Tabachnik QC - has provided his Opinion on the draft Open Space allocation; this is attached in Appendix 3.

2.9 Andrew Tabachnik QC concludes his Opinion as follows:
“I have no hesitation in concluding that the draft allocation of the Site as “open space” is inappropriate and unlawful. The Site does not fulfil the requirements set out in the NPPF, and the evidence base relied upon was materially flawed”

2.10 Notwithstanding the fundamental fact that the site does not accord with national planning policy, it is also clear that the allocation of the site for its amenity value is unnecessary. The Open Space allocation adds another policy designation simply to satisfy the deficiency in open space provision in Send identified in the evidence base.

2.11 The 2017 amenity assessment indicates that the site is of ‘medium’ value and comments that “Partial development could retain and potentially improve amenity value” (page 139). The amenity value has been downgraded from ‘high’ in the 2016 assessment to ‘medium’, we assume on the basis that the site has been correctly identified as being private land (the site was incorrectly identified as public land in the 2016 evidence base documents).

2.12 It is also important to note that that the site’s assessment methodology which is set out in the Amenity Audit Spreadsheet has not been made available to Send Surrey Limited. A request to obtain a copy of this was denied by the Council. We therefore request that the Inspector makes this document available at Examination.

2.13 The analysis of the results in Section 5 of the assessment states:

A number of sites scored either Medium or High for their amenity value, and it is these sites which should be protected as Open Space. A number of sites that scored Medium or High may not require protection as Open Space because their amenity value could be retained or enhanced if the site is developed (or only partially developed).1

2.14 The amenity value of our site could be retained or enhanced if the site is developed. The site is clearly developable, and therefore, in accordance with this guidance, it does not require protection as open space. This is further evidenced by the fact that Send Surry Limited has received pre-application advice from the Council to state that the site is developable subject to retaining the features of amenity value (Appendix 4).

2.15 Furthermore, the site is covered by a group Tree Preservation Order (TPO). This, in itself, protects the features which provide the site’s amenity value, the trees. The TPO is given in Appendix 5.

2.16 Whilst on its own merits the site has some amenity value; this amenity value can only be appreciated in the wider context of the surrounding area. The allocation of open space for amenity value can be justified in built-up or densely populated areas where open space provides visual relief and ‘breathing space’. In this instance however, there is no need for an open space designation. The site abuts the Green Belt on the northern boundary, beyond this boundary there is open countryside, a vast expanse of open space. There is no need to allocate a parcel of land on the edge of the Green Belt as open space. Additionally, the site is on the side of the village, therefore its openness cannot be appreciated; it simply appears to be the edge of the village. Open space should only be designated for amenity when it is in an appropriate location which allows it to be appreciated as such, i.e. a village green.

2.17 Allocating the site for amenity value in this instance is incorrect. It is not central to the village; the visual interest and/or visual relief it provides to residents is very limited; it is not distinguishable by virtue of the fact it lies on the village edge and it abuts the Green Belt which is a vast expanse of open countryside whereby the inherent characteristic is openness.

2.18 Taking into account the above reasons and the group TPO, the allocation of the site for open space on the basis of its amenity value alone is both unsuitable and unnecessary.

4 Summary of Further Recommended Modification of the Plan

4.1 This Statement has provided further evidence to support the removal of the draft Open Space allocation of the site in the Submission Version Local Plan and also to have the site assessed as a housing allocation.
4.2 The evidence presented with regard to the Open Space allocation is unequivocal in that the proposed allocation is inappropriate and unlawful.

4.3 The allocation of the site on the basis of its amenity value alone cannot be justified. Furthermore, the allocation of the site for its amenity value alone is both unsuitable and unnecessary. It is unsuitable because the site is located in an area which does not provide any benefit as open space being on the edge of the built-up area and adjoining Green Belt. It is unnecessary because the existing group TPO is sufficient to ensure that the amenity value of the site, i.e. the trees, is protected.

4.4 With regards to the consideration of the site as a housing allocation, this Statement has demonstrated that there are no over-riding constraints to stop the site being delivered for housing in the short-term. A residential development could proceed on site with suitable access and no harmful impact on trees or biodiversity subject to mitigation measures.

4.5 It has also been demonstrated, with regards to housing, that the site could provide a policy compliant amount of affordable housing and could also provide a housing mix to meet the identified need in the SHMA. The site could also deliver sufficient affordable housing to meet with the current local housing need at ward level.

4.6 The reasons set out in this Statement, it is respectfully requested that the draft Open Space allocation is omitted from the next version of the Local Plan. It is also requested that the site is considered for housing development in accordance with the evidence submitted.

Answer (if comment is on questions 1-7 of the questionnaire): ()

3 Grounds for Allocation of the site for Housing

3.1 Our initial representations from July 2016 made clear that the Local Plan had failed to suitably plan to meet the borough’s identified housing need over the plan period. A number of shortcomings were identified. The principle issue was the persistent under delivery of housing which has resulted in a significant short-fall and the fact that a 20% buffer was not applied in accordance with the NPPF. Additionally, the Local Plan failed to identify when strategic sites will be delivered and it also made modifications to the housing supply trajectory which sought to mask the acute housing land supply issues which were not addressed by allocating enough sites for housing.

3.2 It is not unreasonable to assume that the housing supply situation in the borough has worsened since the end of the previous consultation in July 2016. However, rather than reassess this situation, this statement seeks to provide evidence to demonstrate that the site can deliver much needed housing for the borough in the short-term (0-5 years).
3.3 In parallel with the promotion of the site through the Local Plan preparation, Send Surrey Limited have also obtained pre-application advice from the Council pursuant to obtaining outline planning permission for a development of 53 residential unit development on site.

3.4 A pre-application meeting was held in April 2017 at the Council’s offices and the follow-up advice was received in July 2017. The pre-application advice confirmed that the principle of residential development on the site was acceptable. The pre-application noted that the number of units would need to be significantly reduced from 53 to ensure that the site retains its amenity value.

3.5 The pre-application scheme was informed by a number of supporting documents. This evidence, and other information pertinent to the deliverability of the site, is described under the respective headings.

   a) Trees

3.6 A principle area for assessment was trees. A Tree Survey was undertaken in December 2016, this is provided in Appendix 6.

3.7 The Tree Survey focused on the developable area within the centre of the site, with a tree buffer retained along the northern and western boundary of the site to maintain amenity value. The survey found that the majority of the trees were Category C (trees of low quality).

3.8 A Tree Constraints Plan was prepared to establish the developable area of the site; this is given in Appendix 7. The plan identified a developable area of 1.54ha in the central part of the site. The Tree Constraints Plan was then used to inform a revised Site Layout, this is provided in Appendix 8.

   b) Access

3.9 Following the preparation of the revised Site Layout, a Tree Impact Plan was prepared, this is given in Appendix 9. This identified that only one potential issue (as highlighted on the Tree Impact Plan) with the proposed access road and associated footway positioned within the RPAs of trees 74 & 75. Although the proposed access road would be within the RPA of these trees a solution is noted and could be designed out at the detailed design stage, subject to Highways approval.

   c) Ecology

3.10 A Preliminary Ecological Appraisal was undertaken by Urban Edge Environmental in January 2016, this was updated in July 2017 following further surveys see Appendix 10. A Reptile Survey was completed in July 2017, this is provided in Appendix 11. A Invertebrate Survey was also completed in July 2017, this is given in Appendix 12.

3.11 There are no over-riding ecological constraints on the proposed development as detailed in the initial findings of the surveys. Further surveys will be undertaken during the appropriate seasons and recommended mitigation measures will be implemented at the appropriate stage of any development.

3.12 Subject to the final survey results, the development proposals will be updated to take advantage of any opportunities for ecological enhancement. For example, there might be an opportunity to provide an ecological benefit for otters and voles through re-profiling of the river banks or scrub clearance, both of which will improve their habitat.

   d) Site Ownership

3.13 The site is being promoted by a single company called Send Surrey Ltd (registered number 10173245). The company intends to development the site for housing. The site is available, viable and deliverable for housing in the short-term (0 – 5 years).

3.14 A single title (for Send Surrey Limited) is currently being formalised. This will be supplemented by an agreement signed by all landowners.

   e) Meeting Identified Housing and Affordable Housing Need
3.15 The Indicative Layout submitted with the representations in July 2016 proposed a layout for 40 units; this comprised a mixture of detached and semi-detached housing.

3.16 Following the Tree Survey and Tree Constraints plan, a revised layout for 53 units was prepared within the 1.54ha developable area (see Appendix 8).

3.17 The Local Plan Proposed Submission Policy H2 provides guidance on affordable housing. It requires affordable housing of 40% on all sites over 0.17ha. The tenure and size of affordable homes must contribute towards meeting the mix of affordable housing needs identified in the joint West Surrey Strategic Housing Market Assessment 2015 (SHMA) or subsequent affordable housing needs evidence. This currently includes a tenure split of at least 70% rented, with the remainder being other forms of affordable housing.

3.18 In accordance with the draft policy, any residential development will provide 40% affordable housing. The housing mix will respond to needs identified through the SHMA in the context of the physical constraints of the site. The Revised Site Layout was prepared in accordance with the recommendations of the SHMA.

3.19 The key findings of the SHMA relevant to the site are summarised as follows:

- For affordable housing the focus should be on smaller properties, whilst recognising that one-bed properties have limited flexibility to changing household circumstances and therefore a higher turnover of occupants. For affordable houses there is a need for 40% one bedroom, 30% two bedroom, 25% three bedroom and 5% four bedroom affordable homes (page 131).
- There is a need for 455 affordable homes in Guildford per year (page 102), to meet the existing backlog and arising need (at a 30% income threshold).
- For market accommodation the focus of provision should be on smaller family housing. The recommended mix is for 10% one bedroom, 30% two bedroom, 40% three bedroom and 20% four bedroom market homes (page 132).

3.20 In accordance with the findings of the SHMA, an indicative housing mix is proposed in accordance with the identified need.

3.21 An affordable housing policy and SHMA compliant mix is given as follows:

<table>
<thead>
<tr>
<th>Tenure</th>
<th>One Bedroom</th>
<th>Two Bedroom</th>
<th>Three Bedroom</th>
<th>Four Bedroom</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rent</td>
<td>130</td>
<td>70</td>
<td>213</td>
<td>44</td>
</tr>
<tr>
<td>Rent</td>
<td>10</td>
<td>30</td>
<td>40</td>
<td>20</td>
</tr>
</tbody>
</table>

3.22 The proposed indicative housing mix is given as follows:

<table>
<thead>
<tr>
<th>Tenure</th>
<th>One Bedroom</th>
<th>Two Bedroom</th>
<th>Three Bedroom</th>
<th>Four Bedroom</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rent</td>
<td>130</td>
<td>70</td>
<td>213</td>
<td>44</td>
</tr>
<tr>
<td>Rent</td>
<td>10</td>
<td>30</td>
<td>40</td>
<td>20</td>
</tr>
</tbody>
</table>

3.23 As can be seen from the table above, the proposed indicative housing mix is fully compliant with the affordable housing requirement of 40% and also the identified housing need from the SHMA. This is a significant benefit of the scheme.

f) Meeting Identified Local Affordable Housing Need

3.24 Given the wide ranging nature and strategic recommendations from the SHMA, further research was undertaken to find out the affordable housing need at ward level, i.e. Send ward.

3.25 There are 22 people on the Housing Register in the ward of Send. The housing needs are as follows: 1 bedroom need = 13; 2 bedroom need = 7 and 3 bedroom need = 2.

<table>
<thead>
<tr>
<th>Tenure</th>
<th>One Bedroom</th>
<th>Two Bedroom</th>
<th>Three Bedroom</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rent</td>
<td>130</td>
<td>70</td>
<td>213</td>
</tr>
<tr>
<td>Rent</td>
<td>10</td>
<td>30</td>
<td>40</td>
</tr>
</tbody>
</table>

3.26 Although the Housing Register is subject to change and the information provided only provides a snapshot of a certain point in time, i.e. January 2017, it is particularly relevant to show that the proposal would almost fully meet the current identified local affordable housing need.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to any reclassification of the village boundaries, enlarging the villages of East and West Horsley will have a significant and damaging effect to the existing village life, village characteristics and property values. Having purchased my property in the last five years specifically within a village green belt setting (for which I paid the various search fee’s etc) I was told that I was safe from any future building proposals due to the green belt protection and restrictions. I will investigate all means of recovering any costs for damage to either the existing building structure or future property value along with a refund of all search costs.

I object to any removal of the existing village boundaries from the green belt. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the number of proposed buildings and building sites in general. Whilst I understand there is a need for local housing these villages should be considered separately from any ‘country wide’ suggestion, they are unique and require individual consideration. If the Wisley Airfield site goes ahead this will already add 2000+ homes within 2 mile radius of the existing villages? More homes and sites would just be a further assault on the current village infrastructure. If Wisley Airfields is to be one of the sites then I would object to any further building within at least 5 mile radius.
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed building sites for Manor Farm, West Horsley. The current village infrastructure and road system is already under strain from individual building projects. The traffic alone from these proposed new sites will be extremely damaging to the village environment, the safety of the residents and existing dwellings along the routes that will be used by building plant traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

East and West Horsley and much of the local area enjoy significant numbers of visitors, on foot, by car and more often on bikes; these proposals will destroy the area as we know it whilst putting the lives of visitors and residents at risk. This should NOT be allowed to happen. Please reconsider your justification for the New Plan in its entirety along with the damage and inconvenience to existing residents, please do NOT let this happen.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding. It is for us to conserve and protect it. There are 5 legal purposes for Green Belt:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns
- To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

Answer (if comment is on questions 1-7 of the questionnaire): ()
After long and careful consideration to the proposed Guildford Borough Council ‘New Local Plan’ I would like to OBJECT strongly to a number of the council’s recommendations. If you continue with the new plan in full you will destroy and erode an area that by the councils own admission is considered an area of natural beauty? Why?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the housing number of 693 houses per year from the West Surrey SHMA is far too high. The calculations are not transparent and therefore not verifiable. I cannot support this document and object to its use in any form and its inclusion in the evidence base.

I object to the fact that insufficient consideration has been made for the constraints in this borough, be they infrastructure in nature, AONB, THBSPA, Green Belt, water supply etc.

I object to the significant use of the green belt for site allocations. I object to any allocation being made before a housing number has been accepted.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the use of inferior, inadequate and subjective documents in the evidence base.

In particular I object to the LAA, which is inconsistent in the extreme and incomplete, citing for example land considered for schools which has not been considered for housing despite being brownfield, in excess of 50ha and close to the railway. [eg site at Newmarsh Farm East Horsley – clearly brownfield due to lack of enforcement]. It is also highly subjective and open to challenge.
I object to the Borough Infrastructure Delivery Plan, which is incomplete, lacking in detail, not properly costed eg £5-£10 million or even worse £100-£250 million and relies on funding that is not allocated by central government and is more of a wish list than anything else.

I object to the use of the Green Belt and Countryside Study in all its volumes and addenda. Why is it that some sites are excluded because they weren’t identified in the Green Belt and Countryside Study despite numerous volumes and addenda? Why is it that some sites may impact the TBHSPA when they are outside the 5km zone are excluded (nothing to do with the size of site) and some sites are inside and indeed outside the zone but included? (again not to do with the size of site). It just appears to be inconsistent and subjective – quite possibly a desk-based study which has not been verified or cross-checked. This is unacceptable.

I object to the fact that modern building techniques appear to have been ignored such that there is almost no housing proposed for the town centre “due to flood risk”. In many other parts of the country this risk has been completely mitigated.

I object to the fact that the plan implies modal shift to cycling and walking which in the rural areas is completely unrealistic due to lack of proper cycle lanes on local roads (and the space to provide them). This plan disenfranchises the elderly, the young, the unwell and the disabled.

<td>I object to the fact that the plan implies modal shift to cycling and walking which in the rural areas is completely unrealistic due to lack of proper pedestrian footpaths on local roads and the requisite street lighting to ensure the safety of users. Much of the borough is RURAL IN NATURE and residents specifically do not want to live in well-lit areas more akin to urban living.</td>

I object to the impact of large numbers of new residents on school places which has not been properly planned. For example, Send Primary School (in the process of being rebuilt) is being rebuilt with no spare capacity. The proposed redevelopment of the Raleigh School in Horsley [not even in the local plan] is only for redevelopment not for enlargement. Schools planned for Three Farms Meadows will not be operational for the first 500 houses of development. Where will those children go to school? There is no capacity. When the school is built at A35 children will have to be bussed in from elsewhere as it’s not possible to walk… adding to congestion on local roads and the Strategic Road Network

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that infrastructure planning for sites has not been properly addressed. There is a huge infrastructure deficit. Sites which will rely on the private car must be excluded from the local plan. Unrealistic transport plans put forward by developers need to be rejected.

I object to the fact that many of the allocated sites are being planned in unsustainable locations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the lack of consideration for the protection of heritage assets. There appears to be no recognition that the number of HGVs used during major construction either of infrastructure or housing has a huge negative impact on listed buildings due to shaking foundations and increase in pollution [and impact on brickwork/mortar etc].

I object due to the inadequate protection of the environment in terms of wildlife, SNCIs, SPA; in terms of air pollution and noise and light pollution.
I object due to the fact that local healthcare facilities will be overwhelmed by large numbers of additional residents – it is already difficult to get an appointment at the GP and the RSCH is failing to meet waiting times for outpatients’ appointments.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the insetting of villages from the greenbelt. This is not necessary. There is plenty of suitable land in the urban area which needs to be regenerated rather than left to degrade further.

I object to the impact of excessive development on the already congested Strategic Road Network particularly on the A3 and M25

I object to the fact that there is no tolerance planned at all for accidents, roadworks etc on the SRN which already impact local roads often resulting in gridlock.

I object to the fact that this proposed plan does not meet the needs of local communities.

I object to the fact that insufficient truly affordable housing is being proposed. There is no evidence that any calculations at all have been done; no sensitivity analysis on interest rates; costs of running cars etc.

I object to the impact of further congestion on local village roads and lanes.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the draft plan which proposes over 70% of new housing on the greenbelt. This will ruin the countryside for ever impacting both current and future residents.

I object to the allocation Three Farms Meadows – allocation A35. I object to the proposed removal of this site from the green belt when no exceptional, very special or special circumstances exist. GBC Planning Committee’s unanimous rejection of an almost identical proposal less than six months ago, despite being couched in terminology which was aimed at removing many of their objections if the site were to be removed from the greenbelt must be considered particularly as any removal from the greenbelt must demonstrate very special circumstances and this plan does not. I therefore strongly object due to:

1. Unsustainable nature of site reliant on private cars and undeliverable public transport [in terms of unrealistic journey times/fabricated modelling which do not stand up to scrutiny]
2. Unrealistic assumptions that people will even walk from one end of the development to the other to go to the doctor, school, shop etc.
3. Unsustainable due to poor air quality impact on both housing and the SPA
4. Impact on views to and from the Surrey Hills AONB
5. The urban nature of the proposal – five storey buildings are out of keeping in the countryside [and some would argue are not even acceptable in Guildford town centre]
6. Road, sewerage, fresh water, gas and electric capacity does not exist.
7. Funding for infrastructure from Central government does not exist;
8. There is already a huge infrastructure deficit in terms of roads. This is not properly taken into account.
9. Impact on nitrogen deposition on the TBHSPA is not neutral and this allocation is therefore open to legal challenge.
10. No consideration has been taken of the current and future plans of the RHS Wisley. These should take priority over allocation A35. Roads definitely cannot accommodate an additional 500,000 visitors to the RHS and 5,000 residents of site A35. [this is without taking into consideration the huge number of houses planned in the Horsleys, Send and Ripley].
11. Robust objections to the planning application almost identical to this allocation were made by numerous statutory bodies including neighbouring Local Authorities.
12. Insufficient consideration has been taken of the historic houses in Ockham and Ripley and the Chatley Heath Semaphore Tower

I object to the allocation at Garlick’s Arch – allocation A43 due to the loss of ancient woodland; the impact on all local infrastructure of another 400 houses; the site is too close to the A3 and will have poor air quality. The SRN is meant to be for THROUGH TRAFFIC not local traffic. Numerous junctions will slow progress for all users and increase accidents due to more lane changes.

I object to the lack of consideration of parking issues in local villages caused by larger population

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/5215  Respondent: 15673185 / Simon Jefferies  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I endorse in full the comments made by Ockham Parish Council and also those by the Wisley Action Group. I understand that the Richard Harwood QC, retained by OPC and WAG has advised that the Council should not be undertaking a Regulation 19 consultation. I find it insulting that the Council appears not to understand the process under which it is meant to operate.

Additionally, I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. By virtue of its location residents will be reliant on the motor car, any assumption that the infirm, elderly and the young will walk or cycle to work, health facilities, shopping etc is clearly nonsense. I also have no confidence that those who do not fall into the above categories will use sustainable methods to get about. As a medic I am exposed on a daily basis to the sedentary nature of today’s population in the UK and any ambition of converting the population to a bunch of fitness fanatics is very wide of the mark. [see increases in diabetes, heart disease etc]
4. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junctions in the country (J10)
5. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
6. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
7. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
8. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.

• The associated traffic increase from the RHS has not been taken into account.
• The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
9. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.

10. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

11. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

12. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”

13. Opportunity (3) should be common to all sites and is not unique to this site.

14. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.

15. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

16. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).

17. I object to the removal of additional 3.1 ha from the green belt without any justification.

18. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

19. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

20. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

21. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

22. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

23. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

24. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

25. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

26. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

27. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

28. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

29. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
30. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

31. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

32. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

33. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

34. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

35. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

36. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

37. I object to the plan period being inconsistent. This is an example (of which there are many) of extremely sloppy work which gives me no confidence in the content. For example, the foreword mentions an end date of 2034 whereas the introduction 1.2 and 1.3 refer to 2033. Spatial vision uses 2033. What is the plan period? This is very unclear.

38. Para 2.10a underestimates the pressure already suffered by local residents on a daily basis as a result of insufficient infrastructure particularly in the provision of health services, e.g. doctors and hospital appointments. Additional growth in the quantum proposed is unsustainable in that it fails to recognised the needs of current residents and is focussed only on the needs of future residents.

39. Para 2.13 I reject the statement that most local roads in villages have “at least one footway and usually two “.

40. I reject the assumption in para 2.15 that increased road infrastructure capacity – it may improve theoretical capacity but actually worsens performance.

41. I object to the new green belt provision in Ash and Tongham to prevent the merger with Ash Green and I do not understand why this locality should be treated any differently from any other location for example the merger of Ripley and Ockham as a result of policy A35.

42. I object to the fact that the spatial vision makes no mention of protecting the TBHSPA

43. I reject the comment in the spatial strategy that the RIS will provide congestion relief for the A3 in Guildford as my understanding is that these schemes have been dropped.

44. I do not accept para 3.2 where there is a disconnect in the period of the Council’s Corporate Plan and the Submission plan –

45. I object to Para 4.1.11which should clearly identify the version of the LAA and not just refer to “the latest”.

46. I object strongly to the deletion of para 4.2.8 on housing density. There must be an efficient use of land in keeping with the local area. It is notable than the development planned for the town centre is at a lower density than that at site A35 for example and this is totally unacceptable.
47. I object to the wording of 4.2.18 which is unenforceable. Throughout the plan the word “Expect” needs to be replaced by “require”

48. Likewise, I object to the use of the word “resist” in 4.2.24 – it should be replaced by “refused” in this para and throughout the plan.

49. I object to the wording of policy H2 specifically “we will also seek” and “we will seek”. This should be replaced by the use of the verb “require” in this para and throughout the document.

50. Policy H2 para 4 needs to include that any funds paid in lieu of affordable housing should be ringfenced and the wording further tightened by replacement of “expect” by “will enable”

51. I object to policy H3 para b “the local community”. Rural exception sites should only be allowed where the identified need is truly local defined as within the parish.

52. I object to policy P2 and the inclusion of Ripley in the list of villages to allow insetting.

53. Policy P2 refers to the Metropolitan green belt yet goes on to create additional green belt in the west of the borough furthest from the metropolitan area. There is no justification whatsoever for new green belt land in Ash.

54. There is no evidence that cross-boundary options beyond the green belt have been considered as a viable option instead of moving the green belt boundaries within the borough.

55. I object to the removal in para 4.3.18 of “where it would not have a greater impact on the openness.” and the replacement by “subject to the impact”. This is completely in contravention of the purposes of the green belt.

56. I strongly object to policy P5 TBHSPA as no regard whatsoever is paid to the impact of air pollution on the integrity of the heathland and the resultant loss in habitat from nitrogen deposition. It is inconceivable that the level of development proposed in this plan will result in anything other than thousands more vehicles on the roads due to the unsustainable locations of for example policy A35. Additional traffic equals more pollution and more nitrogen deposition. There is no evidence at all of any in-combination impact from planned developments in adjacent boroughs and no regard to the recent Wealden case for example.

57. I also reject that the SAMM mitigation through the use of wardens will have any impact on cat predation.

58. I object to the statistics in para 4.3.55. Any survey work done on the visitor numbers is unlikely to have covered the time when commercial dog walkers from South London who appear in droves throughout the week.

59. I object to para 4.3.57 – there is no evidence that SANG provided adjacent to the SPA will provide any mitigation at all. Faced with the choice of walking in a manmade environment or on the SPA, the majority of people would choose the natural environment.

60. I object to para 10 of policy E1. Where is the “new industrial employment land on the west side of the former Wisley airfield”? there is no “new” employed land listed under policy A35. This is confusing and needs to be clarified.

61. I do not understand why previously developed sites in the green belt have not been included for development. Specifically, HMP Send where the prisoners have been told that they might be moving and indeed the site is understood to have been valued by Savills amongst others. There is no justification for adjustment of green belt boundaries until all other options have been exhausted. Doubtless there are other examples.

62. I object to para 4.4.36 with regard to the extension of the Surrey Research Park. There is no justification for this when there are a number of surface car parks within the Research Park which should be used in preference. The density of buildings in the Research Park needs to be prioritised over an extension in area.
63. I object to the wording of para 5 in policy E5 – “marketing of the site for its current use for a minimum of 12 prior to submission of a planning application”. I do not understand what this means so how can I be consulted properly.

64. I object to policy D1. This policy will be unenforceable due to the deletion of the word “must” in para 2. The word “must” needs to be retained.

65. I object to the deletion of the wording in para 2 of policy D1 which must remain in full and I also object to the deletion of para 4.5.8.

66. I agree with the insertion of para 4.5.8a regarding the need for an efficient broadband connection but would add that the needs of current residents should take precedence. The state of broadband provision in parts of the borough (e.g. Ockham) is frankly dire.

67. I support the inclusion of policy D4.

68. In Guildford borough, it is widely accepted that there is an infrastructure deficit particularly in roads and the provision of health services. The needs of current residents are not taken into account in policy ID1. All infrastructure should be in place before development of strategic sites takes place to ensure that the developer pays so as not to jeopardise the needs of current residents. Indeed, I understand that the withdrawal of the objection from Highways England is contingent on infrastructure in advance.

69. There is insufficient weight given to the problem of air pollution in the borough. I object strongly to the fact that the Council does not take the health of its residents sufficiently seriously to have a policy to ensure the improvement of air quality in the life of the plan.

70. I object to the wording of policy ID3 para 11 which makes no sense at all. What do you mean by “the provision of additional public off-street parking in Guildford town centre will be supported when it facilitates the interception of trips that would otherwise derive through the Guildford gyratory”.

71. I object to the continued assumption that Guildford needs more retail. The ELNA fails to understand the shortcomings in the Carter Jonas retail study update 2017 which refers to retail requirement from companies already in administration and also fails to recognise the increasing use of internet shopping over the bricks and mortar experience. This is lamentable as the land allocated for retail could be put to much better use as residential.

72. I object to the inclusion of policy A58 – there is no justification for an increase in additional industrial floorspace at this location or indeed particularly as there are a number of vacant industrial sites at o Slyfield.

73. The AECOM work to support the ELNA is a poor piece of work riddled with unsupported assumptions.

74. I continue to object to the inclusion of the following policies: o A36-A41 inclusive in the Horsleys, A43 at Garlick’s Arch, A42 Clockbarn, and A58 There is no evidence that anyone has considered the cumulative impact of these developments together with the development at A35. The infrastructure proposed is totally inadequate and, as these stand at the borough boundary will have a huge impact on residents throughout the borough and further afield, particularly those who use the A3.

75. I object to the fact that there is no evidence that land owned by the council in the town centre is being used for residential development.

76. I object to the fact that the land required at Garlick’s Arch is said to be almost 29ha where only 13ha is required at 30dph.

77. Similarly, I object to the excess requirement for land at A53 where the normal plot ratio of 50% appears to have been ignored resulting in an excess use of green belt land of over 7.5ha.

78. I object to the housing number of 693/annum as no constraints have been applied – the GL Hearn methodology has compounded past errors in international migration forecasts and the whole SHMA needs to be re-visited and corrected as a matter of urgency.
79. I object to the continued use of the Green Belt and Countryside study as part of the evidence base. It is a subjective and inconsistent document that pays no regard to the impact of the current proposals on the setting of the AONB for example.

80. The transport evidence provided shows an increase in congestion as a result of the planned developments. Insufficient modelling has been done to satisfy me that any of the strategic sites can move forward on this basis. The consequences are severe to residents of Guildford and those much further afield.

81. I object to the fact that there is no proposed location for a bus station in the town centre. This means it is impossible to model journey times from, for example A35 with any degree of reliability. Furthermore, the modelling capacity at SCC does not use “real world” situations for example the junctions do not allow for traffic stopped at red traffic lights and assume all time all direction running which is clearly a fallacy. This perhaps makes it easier to understand why the today’s congestion is so dire.

82. There is no evidence that noise and light pollution and the impact on both humans and wildlife has been adequately taken into account.

83. I object to the fact that policy S2 makes no distinction between previously developed land in the Green Belt. It is clear that the use of a site with no above ground building e.g. A35 has a far greater impact than the use of a site such as Send Prison.

84. I object to the fact that greenbelt sites are allocated to improve flexibility in the delivery of the plan. It is clear that the green belt should only be seen as a last resort, after all other opportunities have been fully explored.

85. I object to the use of a film on the GBC website promoting a biased view from those interviewed who would in the real world have been excluded due to conflicts of interest. This is unfortunately completed expected behaviour from a council that continues to promote opaque policy and one which has little respect from many residents.

86. I object to the fact that the prosed housing allocation at Slyfield of 1000 homes results in no increase in vehicles. This is a patently false assumption and leads me to question the soundness of the transport evidence base.

87. I object to the variation in the assessment of sites which is extremely inconsistent. In some cases, the TBHSPA appears to be a concern whereas in others it isn’t. The same applies to a number of elements including impact of conservations areas, SNCIs, views in and out etc.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose. It is very worrying that the council does not appear to have either the resources or the intellect to get the basics right.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the
Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

Page 1285 of 2988
Specific Water Supply and Sewerage/Wastewater Infrastructure Comments:

Water treatment and wastewater/sewage treatment capacity maybe a constraint in some catchments within the Guildford Borough area. As the Local Plan is finalised we will be reviewing which of our treatment sites need upgrades to accommodate the growth and we are willing to have a meeting with the Council to discuss this.

The attached table provides Thames Water’s site specific comments from desktop assessments on water supply and sewerage/wastewater infrastructure in relation to the proposed housing sites, but more detailed modelling may be required to refine the requirements.

These sites have been assessed on an individual base with only limited opportunity to consider cumulative impacts. Therefore, the impact of multiple sites in the same area coming forward may have a greater impact. The scale, location and time to deliver any required network upgrades will be determined after receiving a clearer picture of the location, type and scale of development together with its phasing.

Where we have identified sites where drainage infrastructure is likely to be required to ensure sufficient capacity is brought forward ahead of the development, in the first instance a drainage strategy would be required from the developer to determine the exact impact on our infrastructure and the significance of the infrastructure required to support the development in line with the Core Strategy Policy IN2: Water Supply and Wastewater.

It should be noted that in the event of an upgrade to our sewerage network assets being required, up to three years lead in time is usual to enable for the planning and delivery of the upgrade. As a developer has the automatic right to connect to our sewer network under the Water Industry Act we may also request a drainage planning condition if a network upgrade is required to ensure the infrastructure is in place ahead of occupation of the development. This will avoid adverse environmental impacts such as sewer flooding and/or water pollution.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We have concerns regarding Water Supply Services in relation to this site. Specifically, the water network capacity in this area is unlikely to be able to support the demand anticipated from this development. Upgrades to the existing water infrastructure are likely to be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a capacity the Local Planning Authority should require the developer to provide a detailed water supply strategy informing what infrastructure is required, where, when and how it will be delivered. At the time planning permission is sought for development at this site we are also highly likely to request an appropriately worded planning condition to ensure the recommendations of the strategy are implemented ahead of occupation of the development. It is important not to under estimate the time required to deliver necessary infrastructure. For example: local network upgrades can take around 18 months to 3 years to design and deliver.

On the information available to date we do not envisage infrastructure concerns regarding wastewater infrastructure capability in relation to this site.

**Policy A24: Slyfield Area Regeneration Project, Guildford**

The SARP site includes Thames Water’s Guildford (Slyfield) Sewage Treatment Works (STW) site and the draft Local Plan proposes the relocation of the STW as part of the SARP.

To ensure sufficient wastewater treatment for the Guildford drainage area, and suitable drainage network provision for the SARP area, the development of the SARP will require the relocation of the Sewage Treatment Works.

This would be in the form of a new sewage treatment works and necessary supporting local drainage network infrastructure.

Thames Water is working with the Council regarding the redevelopment of the SARP site and the feasibility of relocating the STW to the land identified in the draft Local Plan.

Thames Water confirms its support in principle for the relocation of the STW. Detailed technical and feasibility assessments are being produced with the Council to support the next stages of design for the STW relocation.

**Omission Sites**

Thames Water consider that the following sites may become available and would be suitable for development:

1. **Land to the north of Ash Vale Sewage Treatment Works (STW) (approximately 3 hectares)**

   The land to the north of the main operational area of Ash Vale STW, as identified on the enclosed plan, is currently disused. The site is sustainably located next to main urban areas, a main road junction with bus services and the North Camp Rail Station.

   The site is well contained to the north by the Blackwater River, to the west by the railway line, to the east by housing and to the south by the main operational STW. There is existing residential development south of Meadow Close and along Stratford Road to the east.
The land is outside the Green Belt. Residential or employment development of the site could enable significant environmental improvements and part of the site to be opened up for public access along the river.

1. **Land at Netley Mill PS, West of Gomshall (approximately 5 hectares)**

Gomshall is an identified settlement in the Green Belt. The Thames Water land of which parts would be available for development adjoins the settlement to the west as identified on the enclosed plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Specifically, the wastewater network capacity in this area is unlikely to be able to support the demand anticipated from this development. Upgrades to the existing drainage infrastructure are likely to be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a capacity constraint the Local Planning Authority should require the developer to provide a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered. At the time planning permission is sought for development at this site we are also highly likely to request an appropriately worded planning condition to ensure the recommendations of the strategy are implemented ahead of occupation of the development. It is important not to under estimate the time required to deliver necessary infrastructure. For example: local network upgrades can take around 18 months to 3 years to design and deliver.

The proposed 2000 dwellings and other development exceed the capacity trigger levels for available network. Developer funded impact study required to understand implications of development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Thames Water would welcome the opportunity to work closely with the Local Planning Authority and the developer to better understand and effectively plan for the water treatment infrastructure needs required to serve this development. It is important not to under estimate the time required to deliver necessary infrastructure. For example: Water Treatment Works upgrades can take 18 months to 3 years to design and build.

We have significant concerns regarding Wastewater Services in relation to this site. Specifically, the wastewater treatment capacity in this area is highly unlikely to be able to support the demand anticipated from this development. Significant infrastructure upgrades are likely to be required to ensure sufficient treatment capacity is available to serve this development. Thames Water would welcome the opportunity to work closely with the Local Planning Authority and the developer to better understand and effectively plan for the sewage treatment infrastructure needs required to serve this development. It is important not to under estimate the time required to deliver necessary infrastructure. For example: Sewage Treatment Works upgrades can take 18 months to 3 years to design and build. Implementing new technologies and
the construction of a major treatment works extension or new treatment works could take up to ten years. At the time planning permission is sought for development at this site we are also highly likely to request an appropriately worded planning condition to ensure the infrastructure is in place ahead of occupation of the development. We have significant concerns regarding Wastewater Services in relation to this site. Specifically, the wastewater network capacity in this area is highly unlikely to be able to support the demand anticipated from this development. Significant drainage infrastructure is likely to be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a capacity constraint the Local Planning Authority should require the developer to provide a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered. At the time planning permission is sought for development at this site we are also highly likely to request an appropriately worded planning condition to ensure the recommendations of the strategy are implemented ahead of occupation of the development. It is important not to underestimate the time required to deliver necessary infrastructure. For example: local network upgrades can take around 18 months to 3 years to design and deliver.

The proposed 1800 dwellings and other development exceed the capacity trigger levels for available network. The site would drain to Hockford STW which has a current Population Equivalent of 15,400. The scale of development proposed is significant for a STW of this size so a developer funded impact study required to understand implications of development.

An impact study of the foul network has confirmed that there is not sufficient capacity to accept this development. An option has been included in the report.

Waste water treatment: We have concerns regarding sewage treatment capacity at Ripley STW to accept proposed flows from this development. Ripley STW has a current Population Equivalent of 15,400. It will be necessary for us to undertake upgrades to the works to enable the flows from the new development to be accepted. Programming of upgrades to the STW will be necessary and the developer shall notify Thames Water and the Planning Authority of phasing of development and any amendments thereof.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy D2 – Sustainable design, construction and energy

The Environment Agency has designated the Thames Water region to be “seriously water stressed” which reflects the extent to which available water resources are used. Future pressures on water resources will continue to increase and key factors are population growth and climate change.

Water conservation and climate change is a vitally important issue to the water industry. Not only is it expected to have an impact on the availability of raw water for treatment but also the demand from customers for potable (drinking) water. Therefore, Thames Water supports water conservation and the efficient use of water and the references to this in paragraphs 4.5.10 and 4.5.19, but consider that there should be clearer reference in Policy D2 itself.
Thames Water support the mains water consumption target of 110 litres per head per day as set out in the NPPG (Paragraph: 015 Reference ID: 56-015-20150327) and consider that this should be covered in Policy D2.

Thames Water have a water efficiency website:

http://www.thameswater.co.uk/save-water/3786.htm

Customers can discover how you can start saving water, help protect the environment, reduce your energy bill and even cut your water bill if you have a meter. You can calculate your water use, see how you compare against other Thames Water customers and the Government's target, and get lots of hints and tips on how to save water. Thames Water customers, can also order a range of free devices to help save water. The Policy/supporting text could make reference to this guidance.

However, managing demand alone will not be sufficient to meet increasing demand and Thames Water adopt the Government’s twin-track approach of managing demand for water and, where necessary, developing new sources, as reflected in the latest Thames Water Water Resource Management Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy I1: Infrastructure and delivery

Thames Water support Policy I1 and supporting text in principle as it is largely in line with previous representations, but consider that minor changes would be helpful to provide clarity.

Thames Water support the Policy in principle as a key sustainability objective for the preparation of the new Local Plan should be for new development to be co-ordinated with the infrastructure it demands and to take into account the capacity of existing infrastructure. The National Planning Policy Framework (NPPF) includes specific guidance on water and sewerage infrastructure. Paragraph 156 of the NPPF states: “Local planning authorities should set out strategic policies for the area in the Local Plan. This should include strategic policies to deliver……the provision of infrastructure for water supply and wastewater....”

Paragraph 162 of the NPPF relates to infrastructure and states: “Local planning authorities should work with other authorities to: assess the quality and capacity of infrastructure for water supply and wastewater and its treatment…..take account of the need for strategic infrastructure including nationally significant infrastructure within their areas.”

The web based National Planning Practice Guidance (NPPG) published in March 2014 includes a section on ‘water supply, wastewater and water quality’ and sets out that Local Plans should be the focus for ensuring that investment plans of water and sewerage/wastewater companies align with development needs. The introduction to this section also sets out that
“Adequate water and wastewater infrastructure is needed to support sustainable development” (Paragraph: 001, Reference ID: 34-001-20140306).

Thames Water support the identification of water supply and waste water treatment infrastructure at paragraph 4.6.3, but given the importance of such infrastructure to sustainable development, it is considered that text along the following lines should be also included to support Policy I1: “The Council will seek to ensure that there is adequate water supply, surface water, foul drainage and waste water treatment capacity to serve all new developments. Developers will be required to demonstrate that there is adequate waste water capacity and surface water drainage both on and off the site to serve the development and that it would not lead to problems for existing or new users. In some circumstances it may be necessary for developers to fund studies to ascertain whether the proposed development will lead to overloading of existing wastewater/sewerage infrastructure. Drainage on the site must maintain separation of foul and surface flows. Where there is an infrastructure capacity constraint the Council will require the developer to set out what appropriate improvements are required and how they will be delivered.

The development or expansion of water supply or waste water treatment facilities will normally be supported, either where needed to serve existing or proposed new development, or in the interests of long term water supply and waste water management, provided that the need for such facilities outweighs any adverse land use or environmental impact that any such adverse impact is minimised.”

Development Close to Thames Water Assets:

Where development is being proposed within 800m of a sewage/waste water treatment works, the developer or local authority should liaise with Thames Water to consider whether an odour impact assessment is required as part of the promotion of the site and potential planning application submission. The odour impact assessment would determine whether the proposed development would result in adverse amenity impact for new occupiers, as those new occupiers would be located in closer proximity to a sewage treatment works.

Where development is being proposed within 15m of a pumping station, the developer or local authority should liaise with Thames Water to consider whether an odour and / or noise and / or vibration impact assessment is required as part of the promotion of the site and potential planning application submission. Any impact assessment would determine whether the proposed development would result in adverse amenity impact for new occupiers, as those new occupiers would be located in closer proximity to a pumping station.

Where any such odour study in relation to development near a sewage treatment works or pumping station identifies there is an odour impact for proposed development and no improvements are programmed by the water company, then the developer needs to contact the water company to agree what improvements are required and how they will be funded prior to any occupation of the development.

Sustainable Drainage:

Thames Water recognises the environmental and economic benefits of surface water source control, and encourages its appropriate application, where it is to the overall benefit of their customers. However, it should also be recognised that SUDS are not appropriate for use in all areas, for example areas with high ground water levels or clay soils which do not allow free drainage. SUDS also require regular maintenance to ensure their effectiveness.

Limiting the opportunity for surface water entering the foul and combined sewer networks is of critical importance to Thames Water. Thames Water have advocated an approach to SuDS that limits as far as possible the volume of and rate at which surface water enters the public sewer system. By doing this, SuDS have the potential to play an important role in helping to ensure the sewerage network has the capacity to cater for population growth and the effects of climate change.

SuDS not only help to mitigate flooding, they can also help to:

- improve water quality
- provide opportunities for water efficiency
- provide enhanced landscape and visual features
With regard to surface water drainage, Thames Water request that the following paragraph should be included in the Masterplan: “It is the responsibility of a developer to make proper provision for surface water drainage to ground, water courses or surface water sewer. It must not be allowed to drain to the foul sewer, as this is the major contributor to sewer flooding.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Potential Future Use

The eastern part of the BCN site is considered to have potential for both commercial and residential use. It is approximately 4 ha and on the basis of the surrounding area it is considered that up to 100 houses could be accommodated on the eastern part of the site which would equate to a density of approximately 25 dph which would be reasonable for this site given its surrounding context. This density enables a strong landscaped buffer to be created between the existing depot, the A3 and any residential development.

In addition to being suitable for commercial purposes due in part to the existing employment development on the site, we consider that the site is suitable for residential purposes as it lies directly adjacent to the existing residential dwellings of Clandon Road, which form part of the residential area of Burnt Common/Send Marsh. Residential development therefore would be a compatible use of this site. Residential development in this location would be contiguous with the existing residential dwellings of Burnt Common/Send Marsh in this area.

From a review of the GBCS both elements of the site fall within a parcel of land (B13-D), which as previously stated, has been identified as a PDA. Paragraph 1.37 of Volume I of the GBCS states that the land parcel in which the site falls within has the potential to accommodate appropriate development without compromising the purposes of the Green Belt in which it is located. It is noted to be an area that is surrounded by defensible boundaries and these include built physical features (roads) and significant tree screening.

The site, and indeed wider land parcel in which it is located is isolated from the wider green belt by the A3, the London Road and the Clandon Road which surround the site, making it an enclosed triangular parcel of land that is very much separated from the wider Green Belt. This helps to further ensure that development of the site (and wider land parcel) would not harm the character or appearance of the Green Belt in which it is located and would not set a precedent. This scenario is very similar to, and is supported by, the Burpham Court Farm development known as Weybrook (now a housing development with a large Sainsbury’s supermarket) which is also between the A3 and an A3 slip road in a triangular shape.

The Council accepted the above and proceeded to allocate the site in the Draft Local Plan for commercial and residential development. The subsequent change was very late in the day.

The tree belts surrounding the site serve an important function when considering the visual impact of the site as well as reinforcing the sites’ isolation from the open Green Belt. Tree belts follow London Road (including within the central
reservation) and Clandon Road to the north and east, there is also significant tree cover following the A3 to the south and hedgerows near the commercial area to the east of PDA. This ensures that the site is well screened and as such views of any development would be extremely limited. Additional landscaping will be incorporated into the proposed development to ensure that any perceived areas of weakness in the existing landscaping can strengthened, particularly along its eastern boundary with the existing depot.

The GBCS also notes that the site is relatively unconstrained in environmental capacity terms and as being in an area of existing development. In addition, that assessment was based on a larger site, including more open land to the north of the old A3 London Road. Therefore, the BCN part of the site is even better in itself than the overall site assessed in landscape terms.

This further supports the Council’s own previous conclusions that that development of the identified land parcel (and therefore the site) will not harm the purposes of the Green Belt and is the best site to allocate in this locality.

In terms of impact on existing residential amenity, the site is located at a sufficient distance from surrounding residential dwellings so as not to have an adverse impact on outlook or privacy. Furthermore, the site is well screened by existing mature tree boundaries and this will be enhanced as part of the proposed development. The site is also situated at a slightly lower level from the surrounding area which ensures that any development on the site will not appear overbearing.

As previously stated a landscaped tree buffer will be created between the existing depot and any new residential dwellings to ensure that future residential amenity is protected.

The only residential property which has a direct view towards the site is a single first floor window in Thatched Cottage, which is to the north east of the site. However, due to the extensive tree cover that surrounds the site views from this window are limited, and additional landscaping can be incorporated into any development proposal to ensure that any views are not sufficiently detrimental and built form can be located at an appropriate distance from this boundary to prevent issues of overlooking/ loss of privacy etc.

As previously stated, access can be provided directly from the London Road. It serves the adjacent depot and auction centre and the residential dwellings on Woodhill/ Vicarage Lane. The south-west bound carriageway of the road is wide enough to accommodate two lanes of traffic and the southern side of the road is currently hatched and could be easily modified to safely accommodate the new access. As such it would be possible to provide two lane traffic if required, although this is unlikely as a part of a residential scheme. In terms of traffic generation, there would be an increase, however the direct accessibility onto London Road is a benefit in this regard. Given London Road is a main road (formerly the A3), and experiences relatively low traffic movements, there is capacity to accommodate a moderate residential and commercial development. Furthermore, it provides direct and efficient access to the A3, A247 and the wider highway network.

Finally, the site is not within an area that is subject to flooding.

 Deliverability
In terms of deliverability the site at BCN recommended for progression to the Submission Local Plan, excluding the Ewbanks site, is in single ownership, is available and deliverable with 1-5 years (subject to securing planning permission). It can satisfactorily accommodate the 7000 square metres of employment space and 100 homes. The Newship Groups sister company has significant experience of developing residential estates, ensuring comfort in that respect. The Newship Group has a track record of developing industrial and warehousing development, with sufficient funds, providing further certainty of delivery (this cannot be said of the Garlicks Arch site).

Further comment on the Garlick’s Arch site
The Garlick’s Arch site would provide 400 dwellings, a quantity of employment floorspace (in Use Classes B1c, B2, B8) and a new northbound onslip to the A3 trunk road from Clandon Road (A247) and a new southbound offslip from the A3 trunk road to Clandon Road.

That part of the Garlick’s Arch site on the northern side of the A3 is approx. 31.7ha. This compares with the size of the existing settlement of Burnt Common/ Send Marsh, which occupies approx. 70ha. The Garlick’s Arch site would therefore result in approximately a 50% increase in the size of the village. Given the settlement is described as a rural village, this is an unjustifiable increase in the size of the settlement.
This is the wrong place for employment space. It would be unrelated to any other conventional employment space and result in employment space spread across Burntcommon rather than concentrated in a more logical and appropriate location.

The Local Plan also includes a proposal for the provision of new slip roads onto the A3 to/from Clandon Road. These are considered necessary highway improvements for one or more of the following:

1. The proposed development;
2. To facilitate other development allocated in the emerging Plan;
3. To facilitate other development envisaged in the emerging Plan.

All new development is required to propose highway measures necessary to make that development acceptable in planning terms, so if the new slip roads onto the A3 are required to make the proposed development at Garlick’s Arch acceptable in planning terms that would not comprise very special circumstances.

A similar conclusion is drawn for point 2 above i.e. to facilitate other development allocated in the emerging Plan. It is the case that new residential development allocated at the Gosden Hill site benefits from access to and from the A3 in all directions as follows:

1. Off slip from A3 southbound at Burpham and then access via New Inn Lane;
2. On-slip onto the A3 northbound via Clay Lane;
3. Off slip from A3 northbound at Burnt Common, A247 through West Clandon; A25 west and then to the Gosden Hill site via Park Lane and Merrow Lane;
4. On-slip onto the A3 southbound at Burnt Common (via the above in reverse).

Thus, there is no demonstration of very special circumstances to facilitate other development allocated in the emerging Plan.

WYG notes that other development envisaged in the Plan includes a long term aim of placing the A3, as it passes through Guildford, in a tunnel. The tunnel would potentially commence in the vicinity of the junction of the A3 with Woking Road and follow a south-westerly alignment, emerging at ground level south of Farnham Road. Whilst this is very high level and the feasibility of the tunnel has yet to be proven, it would offer a number of benefits to the town, not least of which would be the re-routing of through traffic away from a busy stretch of road that is likely to become more heavily used as a result of planned new development. The provision of a tunnel also offers the opportunity to connect the two parts of the town and carry out environmental enhancements.

Unfortunately, some vehicles are precluded from travelling through tunnels and measures would need to be provided to enable such vehicles to leave the A3 before entering the tunnel. South of Guildford, a new junction would be required in any case (to enable vehicles to continue travelling south along the A3 or west along the A31). This would not impact upon Burnt Common. At the northern end of the tunnel, a new junction would not need to be provided however, as the existing junction with Woking Road provides a southbound off-slip and northbound on-slip, in addition to the London Road/A3100/Clay Lane existing slip roads.

As a result, it is the case that a new southbound off-slip and northbound on-slip are not required at Burnt Common to facilitate the tunnel under the A3.

As a result, the proposed allocation at Garlick’s Arch does not offer any very special circumstances that warrant a development of the size indicated in the emerging Plan. The allocations for both the slip roads and the Garlicks Arch site should therefore be removed from the Local Plan.

Should new slip roads onto the A3 to/from Clandon Road be required by Highways England, these could in any case be provided without developing the Garlick’s Arch site. The land could be safeguarded pending a review of the Plan, which would in any case be required once Highways England determine whether the A3 at Guildford is to be widened or placed into a tunnel. This is the appropriate approach to take and recognised on page 9 of the Transport Strategy for the Borough:
‘Our proposed draft Local Plan will ensure that development at the Gosden Hill Farm site will safeguard the ability to create an all-movements A3 junction to the east of Guildford, until such time as Highways England determine whether or not this is required for their A3 Guildford scheme.’

Thus, there is no requirement in highway and transport terms to allocate the Garlick’s Arch site at this time.

Furthermore, development of the GA site would result in a significant adverse impact on the Green Belt due to the topography and open character of the site, which rises to the south and west, from a low point at the north-eastern end. There are clear and expansive views into and over the site from a range of locations around the site. As a result of its topography and the views into and across the site it has a significant beneficial impact on the openness of the Green Belt. The site contributes to the purpose and function of the Green Belt.

As a result, development on the site would significantly reduce openness, harming a key purpose and function of the Green Belt.

One of the reasons for removing the Burnt Common site in favour of the GA site, as referred to earlier in this letter, was to afford greater separation between Send Marsh/ Burnt Common and the proposed site allocation at Gosden Hill Farm. This is erroneous and an illogical conclusion for the following reasons:

- The Burnt Common Nurseries site is already partly developed;
- The Burnt Common Nurseries site is well contained and enclosed from views from the A3;
- The Burnt Common Nurseries site is smaller than the Garlick’s Arch site and contains features that are not characteristic of the rural landscape;
- The Garlick’s Arch site in comparison contains features that are characteristic of the rural landscape and is in agricultural use;
- There is a change in levels;
- A large part of the Garlick’s Arch boundary is un-vegetated which offers an open and unrestricted view into the site, particularly from the south-east;
- The lack of boundary vegetation at the Garlick’s Arch site allows visibility into the site on a scale not possible at Burnt Common Nurseries.

Thus, the development of the Garlick’s Arch site would have a greater adverse impact on the Green Belt and lead to a reduction in the separation between Send Marsh/ Burnt Common and the proposed site allocation at Gosden Hill Farm to a greater degree and extent than if the Burnt Common Nurseries site is developed as proposed.

Furthermore, the Ewbank’s auctions westernmost triangle of land could be excluded from the allocation; with a suitably landscaped boundary between the allocated site and the Ewbank’s auctions site, there would be a consequent increase in separation between Send Marsh/ Burnt Common and the proposed site allocation at Gosden Hill Farm.

The Garlick’s Arch site is too large for the size, character and function of the settlement; it is not required to enable an improved junction onto and from the A3 north of Guildford and there are significant Green Belt and landscape constraints indicating the site should not be developed.

This compares with the Burnt Common site, which is enclosed and development on the site would not result in a loss of openness or impact on the purpose and function of the Green Belt.

The Garlick’s Arch site contains areas of ancient woodland that could be fragmented by development of the site.

This compares with the Burnt Common site, which does not contain environmental designations; the ancient woodland adjacent to the BCN site would be retained and linked to the wider area through strengthened tree belts. Development of the Burnt Common site would be at a low density, allowing space for existing flora and fauna and enhance biodiversity through the provision of a range of habitats in close proximity, including trees, hedgerows, open grassland, a pond and areas of undisturbed ground. Finally, this would all be provided within an enclosed setting that would not result in light pollution or a significant increase in artificial light; thus respecting the environment for the future.

The proposed residential development of the Burnt Common Nurseries site potentially includes children’s play facilities, a village green and space around the dwellings. The commercial development is separated from the residential dwellings by...
the existing warehouse, which is well enclosed and screened by existing vegetation. This will be supplemented to
strengthen wildlife links to and from the ancient woodland and residential development would not be located unacceptably
close to existing noise generating sources.

Finally, the provision of a range of residential and commercial development that is proportionate and commensurate with
the size, character and function of Burnt Common/ Send Marsh, benefits the local area without having a serious adverse
impact on local services and facilities. It is clear therefore that a development of this type contributes to the three main aims
of sustainable development – social, economic and environmental.

Conclusion
It is considered that given the subject sites’ location, its sustainability credentials, housing need in the Borough and the
assessments of the GBCS it represents a prime opportunity for residential and commercial development that it has been
demonstrated is proportionate and commensurate with the size, character and function of the existing settlement.

It is considered that up to 100 dwellings could be achieved on the eastern portion of the site, which would represent a
suitably low density of development. This in turn enables the site to retain an open and spacious character, and retention
and sympathetic enhancement to the existing ancient woodland through strengthening the tree belts around the site to
provide wildlife corridors to adjacent areas.

It is considered that the Council should re-allocate the Burnt Common Nurseries site in the emerging Local Plan for the
following summary reasons:

• The site is in a sustainable location – BCN site placed first whilst GA site last in GB&CS 2014;
• The Council considers that the village can accommodate future development, commensurate to its size, character
  and function. The proposed allocation at BCN is commensurate to the size, character and function of
  Burntcommon and Sendmarsh;
• There is a real need for housing in Guildford. Currently the Council do not have a 5 year supply of housing and
  have no reasonable prospect of achieving this for some years through existing allocations. Therefore, in
  accordance with the NPPF the Council should consider favourably proposals for housing where the principles of
  sustainable development can be achieved. This is particularly the case where sites are identified as being
deliverable and capable of providing a high proportion of affordable dwellings;
• There is a real need for commercial development on this site in the form of B1(c), B2 and B8 uses as
  acknowledged by the Council and supported by Lambert Smith Hampton;
• The BCN site is an existing partly previously developed commercial employment site. It makes much more sense
  to consolidate employment at Burnt Common in one location, rather than spread it over two.
• The Council twice previously identified and allocated the site for future housing and employment development in
  the emerging Plan, demonstrating its acceptable credentials;
• Residential use of the site would be compatible with adjacent land uses and form a natural extension of and be
  contiguous with the residential environment of Burnt Common/ Send Marsh, which is listed in the settlement
  hierarchy as a large village;
• Commercial development would be most logical on this site due to the existing employment development on the
  site and Newship Group experience;
• The site has defensible boundaries which will ensure that its development will not harm the purposes or
  openness of the wider Green Belt;
• Separation to Gosden Hill Farm can be achieved by removal of the Ewbanks auction part of the previous
  allocation;
• The site is similar to the previously developed site Weybrook in Burpham (now a housing development with a
  Sainsbury’s supermarket) which also lies between the A3 and a slip road.
• The site is isolated from the wider Green Belt, being a very enclosed site in functional, landscape and visual
  terms;
• The site is not constrained by any other sensitive planning designations;
• There were relatively few objections to the previous allocation of the BCN site in the 2014 Plan. This position
  has been supported in our recent discussions with both Send Parish Council and those residents involved in Save
  Ripley, both of whom, as we understand it, support our site as opposed to the Garlicks Arch site. The relative
  weight of public opinion should be strongly taken into account when concluding on the best site in this area;
• The BCN site is deliverable within 1 – 5 years, demonstrated also by the existing single owners experience and their employment development credentials;
• The BCN site would not impact materially on any existing residential properties;
• The BCN site is well screened already by mature tree planting;
• The BCN site is located around and between existing development – residential to the east and commercial to the west;
• Allocation of the Garlick’s Arch site would potentially result in much of the local road network in Send/ Ripley exceeding its theoretical operational capacity should highway improvements not be provided;
• The inclusion of the proposed new slip roads at Garlick’s Arch would result in significant levels of traffic re-routing locally (i.e. along the A247) and would therefore still not materially improve the local highway network overall;
• The inclusion of the slip roads at Garlick’s Arch would not have a material direct benefit to the local or strategic highway network and would simply result in the rerouting of traffic elsewhere (i.e. the A247 Clandon Road) to the detriment of other parts of the local highway network;
• There is no need for the Garlick’s Arch site to be allocated in the emerging Plan at this time and if necessary, the site/appropriate land could be safeguarded for highway improvements to the A3 as part of a review of the Plan once Highways England determine the optimum solution for the A3 through Guildford;
• The Garlick’s Arch site is too large for the size, character and function of the settlement; it is not required to enable an improved junction onto and from the A3 north of Guildford and there are significant Green Belt and landscape constraints indicating the site should not be developed; and
• If other strategic sites in the Green Belt (such as Wisley) not be allocated for development, the Burnt Common Nurseries site becomes all the more relevant and necessary to enable the Council to achieve its objectives.

With all of the above in mind we strongly assert that the most logical, reliable, commensurate and credible allocation for employment space, with the least constraints, is the land around the existing Burnt Common Warehouse.

It is suitable, developable and deliverable for both commercial and residential development. As such the site should be included in the Council’s Submission Local Plan and excluded from the Green Belt in any Green Belt review.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Section 4.4: Economy Policies: Policy E5

The NRA endorse the inclusion within the first bullet point of Policy E5 the clear statement that to promote a strong rural economy the sustainable growth and expansion of all types of business and enterprise in rural areas will be supported through conversion of existing buildings and provision of well-designed new buildings of appropriate scale, provided they are in accordance with green belt policies and other policies in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Section 4.4: Economy Policies: Policy E6: The leisure and visitor experience

The NRA are pleased to see paragraphs 4.4.53 – 4.4.56 provide a summary of the role and contribution that the leisure and visitor experience provides to the quality of life, social and cultural wellbeing of the Borough. The sectors contribution and value to the Borough’s economy is also rightly noted within the text.

The NRA would be pleased if within paragraph 4.4.55 the Council wished to refer to the Bisley Camp and the NRA as another of the Borough’s named recreational and tourism attractions and leisure opportunity.
The NRA consider the wording of Policy E6 is correctly supportive for the Borough’s future leisure and visitor experience and is pleased to see the provision of new and enhanced leisure and visitor attractions and the provision of new and improved accommodation and conference facilities for tourist and business visitors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Section 4.3: Protecting Policies; Policy P2: Green Belt

The NRA note paragraph 4.3.11 reflects the NPPF in stating that the main aim of Green Belt is to prevent urban sprawl by keeping land permanently open.

Paragraph 4.3.12 states that historically all the villages in the Borough, except Ash Green, and major previously developed sites have been washed over by the Green Belt designation. The text then correctly confirms that the NPPF states that only those villages whose open character makes an important contribution to the openness of the Green Belt should be included within it. Those that do not should be inset, or removed, from it and other development management policies used to restrict any inappropriate development.

Paragraph 4.3.13 provides a list of villages which under LP1 will now be inset from the Green Belt.

Paragraph 4.3.14 follows and clearly states that although not villages, a similar approach is to be applied to major previously developed sites in relation to whether they should remain washed over or be inset from the Green Belt. Again the paragraph correctly reiterates that the NPPF requires that land which it is unnecessary to keep permanently open should not be included in the Green Belt. If major previously developed sites are of sufficient scale and do not possess an open character, it is not considered necessary for them to remain within the Green Belt.

Paragraph 4.3.15 goes on to list the major previously developed sites (MPDS) which will become inset from the Green Belt under LP1. These are: Henley Business Park, HM Prison Send, Keogh Barracks, Mount Browne, Pirbright Barracks, Pirbright Institute and the University of Law Guildford.

The NRA do not object to the insetting of any of these MPDS from the Green Belt. However, the NRA are entirely concerned, and disappointed, by: 1) the omission of Bisley Camp from the list of major previously developed sites within the Borough set out by paragraph 4.3.15; and 2) the according omission of Bisley Camps developed land area as being inset from the Green Belt and shown to be so on the proposals maps of LP1.

As the Council will recall, in response to the consultation on the DLP in late 2014 the NRA submitted representations on the findings of the Council’s Green Belt and Countryside Study (GBCS) which comprised, and still does, part of the evidence base upon which the new local plan and its policies are being developed. It is not our intention to fully reiterate the content of the representations made in response to the DLP in response to LP1. A copy of the complete submission is however included at Appendix 1 of this submission for ease of reference and we invite the Council to review it again as a comprehensive element of the NRA’s submission to LP1, specifically in regard to the content under the section heading ‘Assessment of the Evidence Base’.
As currently written, whether by intention or otherwise, the NRA are concerned that between the consultation on the DLP the potential, and correct, status of the developed area of Bisley Camp as a MPDS has now been withdrawn by LP1. This is sincerely disappointing given the comparable similarities identified for the Council within the NRA’s representations made in response to the DLP, specifically regarding the developed area of Bisley Camp and Henley Business Park and The University of Law. The NRA consider that the status of these sites as MPDS support the basis for recognising and establishing Bisley Camp as a MPDS within LP1; and equally for Bisley Camp to be removed from the Green Belt also.

Accordingly, the NRA would like to see paragraph 4.3.15 amended to include Bisley Camp as a specified major previously developed site. The NRA also consider that the boundary of Bisley Camp’s MPDS should be drawn on the LP1 proposal maps to the extent shown on the drawing attached as Appendix 2 of this letter.

The NRA also note that beyond the reference to MPDS within paragraph 4.3.15 LP1 does not contain any other policy concerning MPDS. Having spoken with members of the Council’s Policy Team we have been advised that, at this time, it is the intention that a specific policy or set of policies relating to MPDS’s will be brought forward as part of the future Local Plan 2: Development Management Policies (LP2). It is considered this approach is less than ideal for the NRA and Bisley Camp. Firstly, although a MPDS policy could conceivably be delivered via the LP2 given the purpose and intent of MPDS status and its implications it is considered that this matter should be addressed as part of the LP1. MPDS are strategic policy designations and their designation and policy context should be developed and assessed accordingly.

Indeed, as currently written in LP1 it would appear that this is what the consequence of paragraph 4.3.15 and the proposals maps are already establishing. The omission of Bisley Camp as an inset MPDS within LP1 is therefore failing to support the future regeneration and potential sustainable growth of the camp as a significant contributor to the leisure and tourism industry within the Borough. This would be contrary to paragraph 28 of the NPPF and likewise to the Council’s own stated spatial vision.

In summary conclusion, the NRA consider Bisley Camp should be allocated as an inset major previously developed site. Insetting the site would not conflict with the purposes of including land within the Green Belt (as defined by Paragraph 80 of the NPPF) and, on balance, there is no reason why sufficient defensible boundaries (in compliance with Paragraph 85 of the NPPF) should not be identified. In this regard the NRA would welcome further dialogue with Officers of the Policy Team to discuss and provide additional boundary information. Furthermore, as identified in paragraph 20.8 of the GBCS, if major previously developed sites are not considered appropriate for insetting and are to remain washed over within the Green Belt this implies the open character of the site makes an important contribution to openness. This in turn implies there is limited opportunity to redevelop, or expand the site, without detracting from the openness of the Green Belt. It is evident from an objective assessment of the major developed area at Bisley Camp that the land does not make such an important contribution to the openness of the Green Belt nor does it in landscape character terms as identified in the Council’s own Landscape Character Appraisals. It is also evident that Bisley Camp exhibits comparable features with other major previously developed sites in the Borough that are proposed to be inset from the Green Belt and are stated as such within paragraph 4.3.15 of LP1.

The NRA generally support the wording of Policy P2.

However, the 4th bullet point of paragraph 89 of the NPPF clearly states the replacement of a building, provided the new building is in the same use and not materially larger than the one it replaces is one of the stated exceptions whereby the construction of a new building need not be considered inappropriate. Nowhere within the NPPF is it stated or implied that new buildings must also be sited on or close to the position of the existing building.

The inclusion of this requirement within Policy P2 is therefore entirely unnecessary, unduly restrictive and fails to accord with the corresponding Green Belt policies of the NPPF. The inclusion of this requirement within Policy P2 is also unqualified within the supporting text to justify why such a specific additional policy requirement should be included within the Borough’s development plan.
The NRA would therefore support an amendment to Policy P2 so that it reads:

‘…Proposals will be permitted where they are consistent with the exceptions listed in national planning policy and, where relevant, also meet the following criteria:…

Replacement buildings
The replacement of a building, provided the new building:

• Would be in the same use, and
• Is not materially larger than the one it replaces, and
• Is sited on or close to the position of the existing building.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Policy S1: Presumption in Favour of Sustainable Development
The NRA support the presumption in favour of sustainable development and the commitment to work proactively with applicants to jointly find solutions that mean that proposals can be approved wherever possible; and to secure development that improves the economic, social and environmental conditions in the area. This approach being compliant with the National Planning Policy Framework (NPPF).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

RE: WRITTEN REPRESENTATIONS IN RESPONSE TO THE COUNCIL’S PROPOSED SUBMISSION LOCAL PLAN (REGULATION 19) CONSULTATION ON BEHALF OF BURNT COMMON NURSERIES LTD

LAND AT BURNT COMMON NURSERIES, SEND, GUILDFORD

Introduction and Summary case
We are writing on behalf of our clients, Burnt Common Nurseries Ltd, part of Newship Group, to request that the land known as Burnt Common Nurseries, London Road, Send, be re-allocated in the emerging Guildford Local Plan for a mix of employment and housing development.

Please take full account of these representations together with previous representations contained in a statement dated September 2014 from ourselves (then Alliance Planning) when reaching a view on the Submission Local Plan.

Our proposal is that a smaller allocation could and should be re-instated in the Plan by removing at least the narrowest part, if not all of the Ewbanks auctioneers area of the previous allocation. This is recommended for three main reasons.

Firstly, the Burnt Common Nurseries site (BCN) can satisfactorily accommodate the previously agreed quantum of development – 7,000 square metres of employment floorspace and up to 100 homes on the site, without incursion onto or requiring any part of the Ewbanks auctioneers site.

Secondly, removing at least part, if not all, of the Ewbanks element from the previous allocation would increase the separation gap in Green Belt terms from the proposed Gosden Hill allocation; addressing the second bullet point referred to on the late correction update sheet to the 11th May Executive Committee justifying the allocation of Garlick’s Arch (GA) in place of the BCN site.

Thirdly, the Ewbanks area of the site is more constrained for development due to its more open and narrowing nature towards the junction of the A3 and the slip road off the A3.

This representation sets out why the BCN site should be re-allocated, including in part due to its benefits as compared to the GA site (see evidence later in this representation). Clearly, the Council needs to allocate sufficient land to meet its up-to-date objectively assessed need for housing and employment requirement. There are very strong reasons for the BCN site to be re-allocated, which are discussed below.

The Newship Group has built, let and managed a number of industrial estates over the last 38 years. This site has been owned by the Newship Group since the 1980’s, originally when it was run as commercial nursery, with vast commercial greenhouse buildings spread across the site, together with the warehouse buildings. The commercial nursery use failed due to foreign competition and losing its main customer. The site has not, therefore, been held speculatively and not been sold on to a developer, which could well have happened if it were not for the responsible ownership of the Newship Group. The intention is to progressively develop the site for much need local employment premises, for which there have been a number of expressions of interest from companies unable to identify suitable commercial space, together with much needed housing as a sustainable mixed use development.

Over the last three years, the Newship Group has worked closely and positively with the Council to bring forward the undeveloped part of the site for business use and potentially 100 homes.

It was therefore a surprise and disappointment when, due to the quick change of direction part way through the Committee process, the allocation of the site was removed from the emerging Plan. The Group remains keen to work closely with the Council on delivering this site, which is acknowledged to be appropriate for development, particularly for employment use, but also for a proportionate amount of housing.

It is important to note, when assessing the relative merits of sites, that there were relatively few objections to the previous allocation of the site in the 2014 Plan. This position has been supported in our recent discussions with both Send Parish Council and those residents involved in Save Ripley, both of whom, as we understand it, support our site as opposed to the Garlicks Arch site. The relative weight of public opinion should be strongly taken into account when concluding on the best site in this area.
The Newship Group is primarily interested in delivering employment and has been working towards achieving this objective in collaboration with the Council for a number of years. There are four main reasons why the Burnt Common Nurseries site is considered a much more certain and credible location to deliver the employment space needed.

Firstly, it is an existing employment site. It makes much more sense to consolidate employment at Burnt Common in one location, rather than spread it over two. It is also a more efficient use of land and would result in an external economy of scale, due to its location adjacent to similar enterprises. This would not be the case at Garlick’s Arch, where there is a car repair/garage only (planning permission for residential applied for).

Secondly, it offers the opportunity to deliver early expansion. Unlike Garlick’s Arch, the site is not dependent on new access roads, nor do electricity pylons run across the site. It is not in a restrictive flood zone. There are also extensive areas of ancient woodland that require careful consideration as part of any scheme on the Garlick’s Arch site. Given the lack of such constraints Burnt Common Nurseries Ltd are in a position to submit planning applications and begin on-site straight away. That is important, because deliverability will be a key issue when assessing the soundness of the emerging Plan at the Local Plan examination.

Thirdly, the Burnt Common Nurseries site is an acceptable site that does not compromise the purposes of the Green Belt. Although both sites are in the Green Belt, only the BCN site has a significant proportion of previously-developed land. There are also 24,000 square metres of land surrounding the existing warehouses so 7,000 square metres of employment space could easily be absorbed without having an adverse impact on openness or the five purposes of the Green Belt. This is why the Council previously proposed to allocate it.

Fourthly, the site is sustainable, with good vehicular access that minimises the impact on the local highway network and local residents. The site is close enough to Send Marsh to provide shorter and more convenient journeys to work and promote rural sustainability, but is also sufficiently removed from the main residential areas and sufficiently screened by mature trees to minimise impact on residential amenity. The existing highway network facilitates convenient access to and from the A3 without needing to travel through the existing village.

In summary, the most logical, reliable and credible allocation for employment space, with the least constraints, is the Land around the existing Burnt Common Warehouse. The Newship Group is committed to providing this, and its track-record offers peace of mind that it would be delivered early and to a high standard. To demonstrate this, a proposed site plan dated September 2014 (prepared by Edgington Spink Hyne Architects) is enclosed with this representation. This shows the first phase of commercial development on the site, which would be replicated (handed) immediately to the west to provide the total commercial floorspace envisaged, in an attractive and well landscaped setting.

In overall terms the proposal to locate further employment space alongside an existing commercial employment estate (and a former commercial nursery) is the most logical and appropriate solution for the Burntcommon and Sendmarsh area. The Newship Group, operators of BCN Ltd, have significant experience of developing such employment sites. The housing is not Newship’s prime area of concern, but an allocation for approximately 100 homes in this location, between existing commercial buildings and housing along the A247, is the most commensurate, proportionate and logical place to accommodate such a development in Burntcommon and Sendmarsh. The lack of constraints and single ownership ensure that early delivery could take place.

Relevant background, history and assessment
The Draft Local Plan explains that Send is one of only two villages in the Borough where affordable housing in perpetuity as a rural exception cannot be provided. Thus, a previously developed site that provides affordable housing in Send would contribute significantly to local need in a manner compliant with national and local planning policy. This is clearly a very significant material consideration when determining potential sites to allocate for future development.

Policy 9 of the Draft Local Plan (2014) explains that development should help support the present and future economic, environmental and social sustainability of the rural settlements, commensurate to their size, character and function. The Policy continues, explaining that ‘... all development should be appropriate in scale and design, having regard to each settlement’s identity, countryside setting and local character and distinctiveness.’ This is particularly relevant for the Council to take into account when considering the scale of allocation appropriate for Burntcommon and Sendmarsh. The proposed allocation at BCN is commensurate to the size, character and function of Burntcommon and Sendmarsh.
In relation to the Green Belt, Draft Local Plan Policy 10 is clearly relevant. This Policy explains that the Green Belt will be protected against inappropriate development in accordance with national planning policy to maintain its openness and open character.

The site is currently located within the Green Belt. The Green Belt and Countryside Study (GBCS), which forms part of the evidence base to the emerging Local Plan included the site as B13-D (critically with additional wider areas of land steering the assessment to be scored two against green belt purposes when in fact the BCN land itself would result in a preferential score). Following review of the GBCS, it was identified as a Potential Development Area (PDA) due to its sustainability credentials, accessibility and defensible boundaries.

The site was also identified in the Strategy and Sites Issues and Options Paper as having good potential for industrial (Use Class B2) and/ or warehouse (Use Class B8) uses (see Information Sheet 59 in Appendix D of the Issues and Options Paper 2013).

The site was subsequently positively allocated in the Draft Local Plan (2014), for up to 7000 square metres of light industrial (B1c), general industrial (B2) and/or storage and distribution (B8) employment buildings and approximately 100 homes (C3). Land to the east of the existing warehouses was considered appropriate for new homes, at least 40% of which would be affordable. Land to the rear and the west of the existing employment buildings would be appropriate for employment expansion.

The site was included in the Land Availability Assessment (LAA) dated February 2016 as Site Reference 152 and the conclusions of this document are pertinent and relevant to constraint and delivery considerations. It is accepted that the site is in Flood Zone 1, at low risk of flooding, and that residential and commercial development would not adversely affect flood risk elsewhere. Drainage infrastructure would be required. It is accepted that development here would be acceptable on the local highway network.

The report concludes that 'Provision of new homes and commercial development here would help towards meeting the housing and employment need in the Local Plan and contribute towards achieving sustainable, inclusive and mixed communities.’ It is accepted that ‘There is a realistic prospect that development will be delivered within the first five years of the Local Plan….The site is most suited for mixed residential and commercial development, to provide new homes and jobs to help meet the identified need.’

Approximately 20,000 representations were made to GBC on the 2014 Draft Local Plan. Limited adverse comments were received to the BCN site. Having considered those comments, GBC again proposed the allocation for BCN in the 2016 Proposed Submission Local Plan as Policy A43. This was considered at the Borough, Economy and Infrastructure Executive Advisory Board Committee on 13 April. The site at BCN was agreed by this Committee without comment.

The site was again included in the proposed Submission Plan to the Executive Committee by Officers, but in a late update sheet, officers recommended that the BCN site be replaced by the GA site. The Executive Committee agreed this change with very little supporting argument or information; the late update sheet comprising a single side of A4 text, putting forward 4 reasons for the change.

Our assessment of reasons put forward to the Executive Committee recommending the change from BCN to GA:

Provision of land for slip-roads
The slip-roads are identified as a long term aspiration; they have not been fully assessed or even their need agreed by Highways England. We understand that the land ownership required to provide them is not all in the control of the GA owners. The funding has not been specifically quantified or agreed. Slip-roads will result in significantly more traffic on local roads in the Burntcommon and Sendmarsh area (Guildford will be aware of Woking’s proposals for a significant allocation of land at Mayford for approx. 600 homes in their emerging Plan. The traffic from that development and south Woking would be encouraged to utilise the A247 through Sendmarsh to access the A3, particularly if the junction was upgraded to provide a northbound access onto the A3). If slip-roads are pursued, they could be secured via other means i.e. being reserved pending Highways England conclusions or via CPO. Therefore, the provision of land to potentially provide slip-roads should not obscure and/ or outweigh serious questions over the appropriateness of the GA allocation in terms of Green Belt constraints and in terms of delivery and early delivery in particular. The GA site must still be considered on its
own merits as to whether it complies with planning policies in the round, in comparison to other local sites and is a
commensurate, proportionate and appropriate allocation in relation to Burntcommon and Sendmarsh.

Greater separation from Gosden Hill Farm proposed allocation
If the proposed allocation for BCN is reduced in size to remove either the whole or significant part of Ewbank auctions site,
as suggested earlier in this representation, the distance from the newly expanded Gosden Hill Farm site to the newly
proposed BCN site will be increased. In any case, the existence of a) the A3, b) significant mature woodland screening and
c) a significant change in levels, between the two sites is a significant and sufficient defensible barrier both in functional
green belt gap and visual amenity terms between the two sites to enable both the Gosden Hill Farm and the BCN site to be
allocated.

Provision of employment floorspace
The proposed employment allocation in the 2014 Local Plan and original 2016 versions both had a commercial
development allocation of up to 7,000 square metres on the BCN site. This figure was then transferred directly to the GA
site. This does not strike us as being a reason to support the GA site. The employment allocation is clearly far more
appropriate adjacent to an existing employment area in Burntcommon and Sendmarsh that is more appropriately located in
relation to the main part of Burntcommon and Sendmarsh, comprising a more enclosed and contained site that is less
harmful to the character of the landscape and visual amenity) for such a use (please see the enclosed Landscape and Visual
Appraisal (LVA) for reference). There is also the clear option, if the GA site is to be kept in the Plan, notwithstanding early
delivery and constraint concerns, to potentially split the allocation between solely residential on the GA site, of whatever
scale, and employment, with or without residential, also on the BCN site. Clearly our strong view is that both employment
and residential can satisfactorily be accommodated at BCN early in the plan period due to the lack of constraints and single
ownership.

Additional capacity for early delivery of more residential development
WYG take the view that this also is an erroneous reason. For the above reasons, early delivery at GA is unlikely to be
possible due to the number of constraints applying to that site and the lack of single ownership, as we understand the
position. Although the site could accommodate more development than BCN, whether it can be realistically delivered at an
early stage in the Plan period is in doubt until and if proved otherwise. Early delivery at BCN is in our view far more likely
to materialise due to the lack of constraints on the site and the single ownership of BCN.

Whilst Full Council agreed the Draft Plan for consultation, including GA, not BCN, there was considerable support from
the public at the meeting for the BCN site following public speaking.

The current consultation should enable the Council’s Officers and Councillors to take stock of the situation. The Council is
urged to allocate the BCN site as the most commensurate, logical and appropriate place to accommodate, in particular,
further employment development but also a commensurate amount of additional much-needed housing, including a
significant proportion of affordable housing.

Site Location and Description
The site lies between Guildford to the south-west and Woking to the north. The site has good access to the highway
network with the B2215 leading directly onto the A3 at Ripley and just one junction up the A3 is junction 10 of the M25.

The site is currently a partly previously developed commercial employment site with surrounding greenfield land
comprising approximately 10.6 hectares in size. It lies within the Green Belt, but adjacent to the existing settlement of
Burnt Common and Send Marsh.

It is overgrown unused land surrounding the relatively large scale commercial warehouses at present. It is enclosed by tree
belts and the old A3 London Road to the north and east, tree cover and the A3 to the south with hedgerows and housing
lining the Clandon Road (A247) to the east. Urban influences are provided by the residential properties to the east on the
Clandon Road, and the existing central commercial uses to the centre and the west (a 5000 square metre warehouse/
industrial estate and an auction centre respectively), as well as the new and old A3.

The overall land holding is not subject to any statutory or non-statutory landscape designations, or cultural or heritage
designations. A disused public footpath lies to the east, this previously extended southwards, however the construction of
the A3 severed this route and it has been formally extinguished.
The subject site is situated to the south of London Road (B2215), which was formally part of the A3. It is bordered to the south by the current A3, with a small area of ancient woodland adjacent and separating the site from the A3.

The site is located directly off the little used but very safe southwest bound carriage of the B2215. A safe highway access from the site onto this road already exists.

The character of the area surrounding the site is a mix of residential and commercial. Central to the site is an existing depot, which provides 5,110sqm of commercial space that is currently utilised by three businesses operating under Use Class B1/B2/B8. Further to the west is an auctioneers. Therefore, to the centre of the site, and further to the west, the nature of activity is commercial. However directly adjoining the site to the east are residential dwellings which form part of Burnt Common/Send Marsh and this character extends north and eastwards. Therefore, the character of the area directly adjoining the site (already identified as being suitable for residential development) is strongly influenced by the residential dwellings of Burnt Common, in particular those of Clandon Road, which lie directly to the north and east of the site.

Site ownership
The BCN site is in one ownership - Burnt Common Nurseries Ltd., operated by the Newship Group. The wider allocation including the Ewbank auctioneers is clearly in separate ownership. As previously explained, the 7000 square metres of commercial floorspace and approximately 100 homes can satisfactorily be accommodated without that land, effectively being accommodated around the existing 5,110 square metres of existing employment warehouse and industrial development.

Site sustainability
A key consideration in assessing whether a site is suitable for residential use is the need to ensure that the site is located in a location that is sufficiently sustainable for the level of development envisaged.

The NPPF places a presumption in favour of sustainable development, and on the basis of the Council’s own conclusions in the GBCS the application site is not an unsustainable one. This Study gives the site a sustainability score of 5.25 and a sustainability ranking of 26 and as such the site is considered to be moderately sustainable, falling approximately in the middle of the ranking system devised in the GBCS.

Burnt Common/ Send Marsh has been classified as a village in the settlement hierarchy stated in the Draft Borough Local Plan: Strategy and Sites (2014). Policy 9 of the Draft Local Plan explains that ‘Development should help support the present and future economic, environmental and social sustainability of the rural settlements, commensurate to their size, character and function.’

Thus, the Council considers the village can accommodate future development, commensurate to its size, character and function.

Turning to the site specific characteristics of the application site, it is in a sustainable location given its size, character and function. As explained in more detail later in this representation, the size of the site is appropriate to the existing scale of the village and its character. A significant part of the site is also already in use for employment purposes and the proposed allocation is for additional small and medium-sized commercial units to the south-west of the existing industrial unit and up to 100 dwellings on land adjacent to the existing village.

Given the need for new housing sites in the Borough (see later section) the assessment that is given in the Council’s GBCS and the attached landscape and visual appraisal, it is considered to be suitable for the proposed development. The site is accessible by public transport, walking and cycling and benefits from pedestrian and cycle access to a range of local services and facilities. The centre of Send Village, which has numerous shops and local facilities/amenities, is within 2km from the site, with Send/ Ripley health centre and pharmacy only 500m from the site, and this is acknowledged by national policy as being an acceptable walking distance.

There are a number of bus stops within 400-500m of the site. Bus services 462 and 463 together provide an hourly service Monday to Friday between Woking and Guildford and also serve the residential areas of West Clandon, Send Marsh and Old Woking. Bus service 515/ 515A also provides an hourly service between Guildford and Kingston-upon-Thames Monday to Sunday.
In terms of a railway station, the main line station at West Clandon is approximately 2.5km to the south of the site and linked with the site by bus service 463. This station benefits from regular services between Guildford and London Waterloo. Guildford and Woking railway stations, which are accessible by bus services 462 and 463 are on the fast line to London Waterloo, Basingstoke, Portsmouth and Alton. Existing rail facilities provide the opportunity to travel to the site by train as part of a linked bus or cycle journey.

There is an existing footpath on the northern side of the B2215, which provides connections to nearby bus stops and continues to other local facilities available in the vicinity of the site. There is also an existing on-road cycleway on both sides of London Road, which continues along the B2215 Portsmouth Road and provides a local connection to the centre of Ripley. A dedicated cycle route also runs alongside the A3 leading south-west towards Burpham (approximately 3.5km away), where it links to the wider cycle network around Guildford. There is a further shared pedestrian/cycle link along the A247 between Burnt Common roundabout and local amenities in Send. To the south-east a further cycle link runs east along Tithebarns Lane connecting to a wider cycle network towards West Horsley. The site therefore benefits from good pedestrian and cycle connections.

The following local amenities are located in close proximity to the site – a petrol station with a Little Waitrose convenience store approximately 100m from the site, a doctor’s surgery and pharmacy 500m away. Further convenience stores, newsagents, takeaway restaurants, a café and a post office are located in Send village (via Send Barns Lane), approximately 2km away. Further amenities are available at Ripley High Street which is 3km away.

In addition to this the site is within easy access of both the A3 and M25, with the B2215 providing direct access to both.

The sustainability credentials of the site and its proximity to the facilities of Send have undoubtedly contributed to Burnt Common/Send Marsh being classified as a village. With all of this in mind it is considered that the site is sustainably located and therefore accords with the principle of sustainable development in this regard.

Indeed, the ‘Send Marsh and Burnt Common – Major Village Expansion’ review carried out as part of the Green Belt and Countryside Study (2014), considered the sustainability credentials of both sites as existing (as well as two other local sites). Significantly, it ranked the Burnt Common Nurseries site in first place whilst the Garlick’s Arch site was ranked in last place.

As such, it is apparent that the Burnt Common Nurseries site is preferable in terms of its sustainability credentials.

The provision of two new slip roads at the A3 as part of the Garlick’s Arch scheme could also be considered as being contrary to the principles of encouraging travel by non-car modes, as advocated in the NPPF.

Need for commercial development
In August 2014 Lambert Smith Hampton (LSH) prepared a statement on the need for small industrial and commercial units within the Borough. This statement is attached to this representation for information. The statement found that the existing stock of buildings is very low and insufficient to meet future needs. In addition to this, a large area of land at Slyfield (known as the Slyfield Area Regeneration Project) has yet to materialise. Thus, LSH concluded that there was insufficient employment land supply to meet future growth needs and so new employment sites must be found in the Borough. Finally, the statement indicated that the Burnt Common Nurseries site would be a suitable location for small/medium sized units due to its proximity and accessibility to the principal road network.

The site was allocated in the Draft Local Plan (2014), which makes provision for at least 21ha of employment land to help support the economy. Up to 55,000sqm of employment floorspace is identified as required around villages (see Table 1 of the Draft Local Plan: Strategy and Sites, 2014). The Plan explains that this is a higher level of development than experienced in Guildford during the previous Plan period and represents an increase in employment floorspace.

In allocating the site, the Council found that:

Land to the west of the existing warehouses is suitable for new employment uses (Use Classes B1c, B2 and B8); and

That if new homes are not provided, the whole of the site is suitable for new employment uses.

Thus, the land was assessed and considered suitable for employment development.
Since the statement by Lambert Smith Hampton the Council has resolved to plan for a higher amount of employment land than noted in the Lambert Smith Hampton statement. The majority of the proposed new employment floorspace is now allocated in urban extensions to Guildford and at the former Wisley airfield. These are strategic locations that will take many years to come forward. Thus, the supply of suitable, modern employment floorspace would continue to be constrained, affecting supply. This has a knock-on effect on the creation of jobs, which impacts upon the local economy. At a time when there is a significant increase in the quantum of residential development, pursuing such a policy is at risk of being in conflict with the objectives of sustainable development.

Lambert Smith Hampton is in the process of further updating their report but in the meantime they have provided the attached letter which concludes that supply has diminished further since 2014 and demand is still solid so the need is even greater at the present day.

Re-allocating the land at Burnt Common Nurseries facilitates the early delivery of employment floorspace that has been demonstrated to be urgently needed. Provision of the units would contribute to the objectives of sustainable development by helping to meet the existing need for industrial and warehouse floorspace and facilitate job creation opportunities at an early stage in the Plan period.

Need for deliverable housing sites in Guildford

Of considerable importance when considering the principle of residential development at the site is the need to deliver housing (particularly affordable housing), to meet local needs. This is a top priority for both national Government and Guildford Borough Council.

Paragraph 47 of the NPPF requires LPA’s to identify and update annually a supply of specific deliverable sites sufficient to provide 5 years’ worth of housing against their requirements. At the present time the Council does not have a 5-year supply of housing and is unlikely to be able to meet this target for some years. As a result, a site that can quickly deliver new dwellings in a manner that is compliant with or exceeds policy requirements in all other respects should be a very strong candidate for allocating in the emerging Local Plan.

The NPPF makes it clear that local authorities should provide an additional buffer of 5% on their 5-year housing supply requirements, which should increase to 20% for Boroughs which have a persistent under delivery of housing. Therefore, the NPPF places a more onerous requirement on local authorities to provide for an adequate supply of housing. The Council have acknowledged this, and have also accepted that it cannot meet all of its housing need from within the Borough’s urban and settlement areas. As such it has allocated sites from within the Green Belt and countryside beyond the Green Belt that could help to meet the deficit between need/demand and supply. A significant number are large sites, which will take years to deliver new housing in sufficient numbers to address the current shortfall.

An example of this is the new settlement at Wisley (on the former airfield), which is allocated for over 2,000 homes. A planning application was recently refused for mixed use development on this site. One of the (many) reasons for refusal was that:

‘It has not been demonstrated that the development proposed would not give rise to a severe adverse impact on the safe and efficient operation of the strategic road network (A3/ M25), nor that it would not give rise to a severe impact to the efficient operation of the local road network.’

It is not and will not be possible to demonstrate the proposed development at Wisley would not give rise to a severe adverse impact on the safe and efficient operation of the strategic road network (A3/ M25) until such time as Highways England implement plans to improve junction 10 of the M25.

A scheme to improve the M25 Junction 10/ A3 Wisley interchange is identified in the Department for Transport’s Road Investment Strategy for the period 2015-2020. Highways England confirm that there is currently no project team and that the improvements are not due to begin until after 2020.

Thus, it is not possible to bring forward strategic development at Wisley prior to 2020.

As a result, should other strategic sites in the Green Belt (such as Wisley) not be allocated for development, the Burnt Common Nurseries site becomes all the more relevant and necessary to enable the Council to achieve its objectives.
The NPPF seeks to boost significantly the supply of housing (paragraph 47), with paragraph 49 stating that ‘Housing applications should be considered in the context of the presumption in favour of sustainable development.’ To achieve this, the NPPF states that ‘local authorities should look for solutions rather than problems, and decision-takers at every level should seek to approve applications for sustainable development where possible’ (paragraph 187). When assessing and determining development proposals the NPPF makes it very clear that local authorities should apply the presumption in favour of sustainable development (paragraph 197) and that where the development plan is absent, silent or relevant policies out-of-date planning permission should be granted (paragraph 14).

For the reasons identified in the preceding section of this report the site is considered to meet sustainability objectives and therefore residential development of the identified land would compromise sustainable development.

It is clear that Guildford Borough is facing a significant long term under-supply of new housing to meet its objectively assessed needs.

Given the Council will not have a 5-year supply of housing for some years is a serious situation that requires intervention in a range of areas. Government policy clearly requires local authorities to make provision for significant increases in housing supply; however there is no reasonable prospect of achieving this in Guildford for the foreseeable future without casting the net wider and considering sites that are currently outside of the urban and settlement areas. When this is the case the policy of national Government (as contained in the NPPF) is that development proposals for housing, which comply with the principles of sustainable development, should be considered favourably.

Notwithstanding the above, the proposal can be delivered very quickly due to the lack of site constraints, the fact that the BCN site is all in one ownership, there is an existing access onto the road network (B2215), development of the site would have a very limited impact on the local landscape and Green Belt (due to its heavily enclosed nature) and would enable the openness of the Green Belt and its open character to remain and continue throughout the Plan period.

Finally, also in accordance with sustainable development objectives, the emerging Local Plan seeks to support the future economic, environmental and social sustainability of rural settlements, commensurate to their size, character and function.

The scale of the proposed development on the BCN site is commensurate with the size, character and function of Burnt Common/ Send Marsh. The settlement is a village and increasing its size by 400 dwellings is potentially excessive in relation to the size of the village. This is demonstrated in a number of ways. Firstly, population; there is an existing access onto the road network (B2215), development of the site would have a very limited impact on the local landscape and Green Belt (due to its heavily enclosed nature) and would enable the openness of the Green Belt and its open character to remain and continue throughout the Plan period.

Secondly, land take; the proposed allocation at Garlick’s Arch is some 31.7ha. This is close to 50% of the land area of the existing village. Once again, it is simply not possible to conclude that this is commensurate with or proportionate to the size of the village.

Thirdly, the provision of services and facilities; whilst there are local services and facilities the addition of a population of close to 1,000 people would have a significant impact upon those facilities. In allocating land at Garlick’s Arch for such a scale of development without having first considered the need for improvements to local services and facilities and so on is contrary to the aim of sustainable development and contrary to the Council’s own emerging Plan.

That is not all, however.

Policy 9 of the Draft Local Plan goes on to explain that ‘… all development should be appropriate in scale and design, having regard to each settlement’s identity, countryside setting and local character and distinctiveness.’

As discussed in detail in the accompanying landscape appraisal, the Garlick’s Arch site would potentially have a significant adverse impact on the identity, countryside setting and local character and distinctiveness of the Green Belt and the village. This renders it contrary to the objectives of sustainable development and the policies in the emerging Local Plan.

The above evidence weighs very heavily against the allocation of the Garlick’s Arch site for development in the Submission Local Plan.
The above evidence weighs very heavily in favour of the allocation of the Burnt Common Nurseries site for development in the Submission Local Plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 5: The examination

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
The owners of the Burnt Common site consider that the BCN site should be in the submission local plan as an allocated site, for the reasons set out in the accompanying WYG representation letter dated 15th July 2016. They reserve their right to participate in the examination depending on the outcome of the current consultation and the content of the submission local plan. The purpose of participating in the examination will be to test the content of the plan, particularly in relation to the BCN and GA sites but not solely, and demonstrate to the examination inspector that the plan is not sound without the inclusion of the BCN site as an allocated site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/4231  Respondent: 15674689 / Chris Baker  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed Infrastructure Schedule (Appendix C). There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

I object to the infrastructure schedule because of the lack of accurate and unverifiable costs of the proposed infrastructure improvements. It is not clear or guaranteed that developers will commit to the costs required.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the figure of 693 houses per annum in the borough being too high (Appendix D) The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans. There is a lack of transparency in the SHMA report and therefore the figure cannot be independently verified.

I object to the proposed 693 houses per annum as this report was made before the result of the EU referendum. The resulting reduction of European immigration to the South East of England will reduce housing demand.

In particular, the site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43) Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

I object as the Local Road network, particularly around the villages of Ockham and Wisley, cannot cope with the current local traffic within the area. Most of the local roads are single lane.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2) The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object to the proposed housing developments at Wisley Airfield (A35) and Garlick’s Arch (A43) as they have very limited public transport facilities ie; no railway stations and inadequate bus services, which will therefore lead to increased levels of private car use.

I object to the developments at Wisley Airfield, Garlick's Arch and within the Horsleys villages as the car parks at the railway stations of Horsley and Effingham at already at capacity.

I object to the plan as it lacks detail for a cycle infrastructure which might mitigate increased private car use.

I object to the local plan as these developments should be in urban areas where there is sustainable transport.

I object to the local plan as the increased levels of NO2 and PARTICULATES in the air may cause SIGNIFICANT health risks to the adults and children living within the strategic sites and proposed high density levels of development within the Ockham, Send, Ripley and Horsleys villages.

I object as the levels of Air quality pollutants produced by the construction and then the increased local traffic are likely to breach European rules and regulations and therefore leave the council and therefore the council tax payer liable to fines.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Highways

Development at Wisley Airfield would give rise to a significant increase in vehicle movements. The nearest principal road, the A3, and other nearby trunk routes, M25, A317, A319, are all heavily congested. It is therefore likely that traffic will seek to make use of less congested routes, particularly at peak periods, encouraging ‘rat running’ and avoidance activities on the local rural road network to the south of the site, and southern roads such as the A246. Significant additional traffic on these roads would have an adverse effect on land within Mole Valley. MVDC is pleased to note that the requirements section to policy A35 (Land at former Wisley Airfield) has identified a number of works that will need to be done in order to improve the road network. MVDC would also ask that a Traffic Impact Study which includes mitigation measures should be submitted as part of any application.

A number of sites are earmarked for development within and around the edges of West Horlsey, East Horsley and Clandon. As with MVDC, the rural areas around Guildford are heavily constrained and the majority of new development has to be accommodated on smaller sites which makes it difficult to phase development and ensure the provision of infrastructure
and services is in line with the rate of building. MVDC would ask that GBC are aware of this as and when applications begin to come forward, especially given the potential impacts identified as the Wisley Airfield development goes forward.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):**

**Flooding**

The Wisley Airfield site is identified as being partly in Flood Zone 3. MVDC would expect this to be taken into account when assessing a planning application on the site and that any Flood Risk Assessment would take measures to mitigate flooding in the wider area.

**Education**

MVDC have previously raised concerns that the development of the Wisley Airfield site had the potential to put additional pressures on the need for secondary school places both in GBC and MVDC. Of particular concern was pressure on places at Howard of Effingham School which would result in cross-boundary issues, particularly for residents in Bookham, for whom Howard of Effingham is the most popular local secondary school. Given the above MVDC are pleased to see the allocation of a secondary school within the Wisley Airfield site, as well as a primary school as previously proposed.

The Surrey School Organisation Plan does predict a steady rise in the need for secondary school places in Guildford over the next 10 years. Therefore, MVDC would ask to be kept appraised of the potential for development at this site, and that GBC consults with Surrey County Council so that county wide pressures can be taken into consideration.

**Health**

The allocation at Wisley Airfield will result in a significant increase in the local population, and it is noted that no specific provision has been made for primary health care. MVDC would expect GBC to consult with both Guildford and Waverley and Surrey Downs CCGs in order to address any cross-boundary issues that may result in a deficit of primary health care places in MVDC, specifically Bookham where the draft NHP has identified an existing need.

It may be beneficial if any consultation on this topic would include NHS England South East Region and that development aligns with the strategic transformation plan as agreed by the Surrey Heartlands Collaboration which includes social care and health.

**Waste**

The comment in Key Considerations of policy A35 (Land at former Wisley Airfield) regarding the waste allocation in the corner of the site is noted. It would be expected that consultations with Surrey County Council would be carried out regarding the need for alternative locations if required.

Upgrades to Thames Water waste water treatment works were mentioned in the refusal of the original planning application
on the site. It would be expected that consultations with Thames Water would continue on this matter and that the upgrades would be carried out in time to support any proposed development and mitigate any impact on provision outside GBC.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Retail/Employment

Guildford is within commuting distance of MVDC by both car and train. Seeking to create strategic employment sites may be beneficial to Mole Valley residents as it would offer wider employment opportunities.

Town and Country Planning (Local Planning) (England) Regulations 2012 – Regulation 19

Thank you for consulting Mole Valley (MVDC) on the Draft Guildford Borough Council (GBC) Local Plan.

Given the size of the Wisley Airfield site it has the potential to have an impact on Mole Valley District, and as such we have an interest in the development of this site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I write to offer my strongest objections to the proposed new housing as detailed in the Council’s above plan.

The proposals are in direct conflict with most of the points in Section 9 of the National Planning Policy Framework which makes it very clear that Green Belts are to be protected. There has been no case made by the Council for the “exceptional circumstances” that are required to remove land from the Green Belt. I’m sure that Guildford Borough is aware if this government document, but as a reminder here is a link to the Green Belt guidance:

The proposed “insetting” contradicts the Plans own policy P2 which states that “We will continue to protect the Metropolitan Green Belt against inappropriate development”. It is absurd that the council considers high density housing developments in Horsley as consistent with policy P2. The proposals even contradict the Guildford Borough Economic Strategy 2013-2033 which makes no case for large numbers of new homes in Horsley or surrounding villages.

The infrastructure of the two Horsley’s is already at capacity in terms of drainage, schools, shopping, parking, bus transport, traffic flow, station parking and medical facilities. The Plan does not address or even acknowledge the need for infrastructure improvements. Indeed, even if there were clear infrastructure plans, where would these new facilities be located if not at the loss of yet more Green Belt land?

As a resident of West Horsley, I know that the idyllic rural character of both the Horsley’s would be destroyed forever. I moved here from London specifically because of its rural, countryside character and the threat of having this ruined is horrifying to me and my neighbours. To expect West Horsley to absorb a 35% increase (the highest in the borough) in houses, population and the resultant impact on already stretched infrastructure is unwise, unworkable and contrary to published planning guidelines and I therefore urge the Council to withdraw the plans.

Draft Policy Al: The Plaza, Portsmouth Road, Guildford

Pegasuslife is the landowner of the Site identified in draft Policy Al with a draft allocation for approximately 70 dwellings (Use Class C3). The extent of the Site is identified on the plan accompanying Policy Al. The Site has been the subject of significant pre-application discussions with your Officers for proposed development to provide assisted living accommodation for older people with communal facilities and health and wellbeing facilities. The Council concluded that the proposed development is a Sui Generis Use Class in September 2015.

A planning application was subsequently submitted to GBC in April 2016 on behalf of Pegasuslife and is currently subject to determination, for the provision of:

Proposed assisted living accommodation for older people (sui generis) comprising 103 apartments and communal facilities including; residents lounge, guest suite, health and well-being facilities, restaurant, staff offices, surface and basement car parking, cycle parking, bin storage, plant room, associated hard and soft landscaping, and groundworks.

On behalf of Pegasus life, we support the principle of draft Policy Al, which confirms the acceptability for redevelopment at the Site for residential purposes. However, we object to the sole allocation of the Site for residential use (Use Class C3) and consider the Site should instead be allocated for residential (Use Class C3) and/or assisted living accommodation for older people (Sui Generis).

Assisted living accommodation for older people is considered to be an entirely appropriate land use given the Site's location within the Town Centre. The Site has good levels of accessibility via walking, cycling and public transport modes. Both Guildford Railway Station and Guildford Bus Station are within an 8 minute walk from the Site.

The number of older people in the UK is growing and the HAPPI 3 Report1 (June 2016) states that the number of people aged 80 and above will more than double by 2037 and the number of people aged over 90 will triple. The number of centenarians (i.e. those older than 100 years old) shows an increase of sevenfold in estimates from 14,450 in mid-2014 to 111,000 in mid-2037.

In the light of the rate of change, it is not surprising that there is a chronic undersupply of suitable housing for older people in the UK with retirement properties making up just 2% of the housing stock (approximately 533,000 homes). To put this into perspective, the over 65 population is approximately 10 million and the over 60 population is approximately 14 million. Evidently, the demand for suitable housing for older people significantly outweighs the supply.

The ONS Annual mid-year population estimates (2014) for the UK (published in June 2015), estimates a rise in the medium age of the population to 40-years (the highest ever estimated) as the number and therefore proportion of older people continue to rise, up 0.3% in a year. This only reinforces the need for a response to the crisis.

Accordingly, the NPPF (para 50) encourages a wide choice of quality homes that widen opportunities for home ownership and create sustainable, inclusive and mixed communities. Local Authorities are required to plan for a mix of housing based on current and future demographic trends, market trends and the needs of different groups in the community. This includes older people and people with disabilities. The revisions to the Planning Practice Guidance (PPG) (March 2015) strengthen the requirement for LPAs to plan and provide housing for older people.

Paragraph 4.2.7 of the PSLP confirms that self-contained accommodation for the elderly will contribute to GBC’s local housing requirement. The sustainable location of the Site therefore makes it appropriate for this land use to make an important contribution to local housing need.

Paragraph 4.2.8 recognises that efficient use of land is essential and certain areas can accommodate higher densities. The Site is sustainably located within Guildford Town Centre and perfectly placed to accommodate higher densities. We therefore object to the allocation of approximately 70 dwellings. Notably, no evidence has been presented to support the proposed quantum of 70 units. In this regard, the Policy is not 'Justified' and therefore is "unsound" in this regard (NPPF, para 182).
We consider that the Site can accommodate approximately 90-100 dwellings, which is in line with the PegasusLife's proposed response to consultation feedback received for the proposed development. It is considered appropriate that dwelling range is provided in order to be flexible and respond to prevailing circumstances.

We continue to support the requirement within draft Policy Al that development proposals must be sensitive to the scale and heights of nearby Listed Buildings, and views of the church tower (St Nicholas Church).

Answer (if comment is on questions 1-7 of the questionnaire): ()

Draft Policy H2: Affordable Homes

Draft Policy H2 requires that on sites providing five or more homes, or sites of 0.17ha or more, that 40% are to be affordable. The 'reasoned justification', for this draft policy states at paragraph 4.2.35:

This policy applies to all new homes within the C3 Use Class. This generally includes retirement homes, as well as self-contained studio flats for a single household, whether specifically aimed at students or not. It does not apply to residential institutions such as care homes and nursing homes. Assisted living and other sui generis residential developments may be required to make provision; these will be considered on a case-by-case basis.

We object to this draft policy as currently drafted since it does not take into account the viability or provide certainty for emerging models of accommodation and care for older people, such as the presently proposed development of the Site. The draft Policy is therefore not considered 'Effective' in this regard, and therefore fails this test of "soundness".

Assisted living accommodation for older people generates additional costs relative to residential development (Use Class C3) due to the need for specialist design and specification, the sacrifice of saleable area for the provision of services and facilities with no compensating income, and other differentiating factors. Land must be competed for on the open market with key competition including non-specialist housebuilders, student housing developers and commercial developers. Inevitably, in reaching a competitive land value an affordable housing provision equal to that assumed by non-standard housebuilders bidding on the site cannot therefore be sustained.

This is a structural issue which affects the delivery of assisted living accommodation for older people at a strategic level. Not looking to achieve parity of affordable housing provision between specialist and mainstream developments is essential to supporting efforts to boost the supply of housing in this sector in line with both national and local priorities. Owing to the further increased costs of redevelopment on previously developed sites, it is therefore considered that Policy H2 should not apply to assisted living developments on previously developed land.

Next Steps

I trust the above is of assistance and request that the submitted Local Plan is updated to reflect these comments on draft Policies Al and H2. I would be happy to discuss with GBC Officers in more detail if requested.

**GUILDFORD BOROUGH LOCAL PLAN**

**PROPOSED SUBMISSION: STRATEGY AND SITES 2013 - 2033**  **WRITTEN REPRESENTATIONS ON BEHALF OF PEGASUS LIFE**

These representations have been prepared on behalf of our Client, Pegasuslife, and set out comments in response to Guildford Borough Council's (GBC) Proposed Submission Local Plan Strategy and Sites consultation (PSLP, June 2016).

These representations have been prepared in objective terms and assessed against the prevailing planning policy framework, namely paragraph 182 of the National Planning Policy Framework (March 2012) that requires a Local Planning Authority to produce a Plan that is:

- Positively prepared - the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;
- Justified - the plan should be the most appropriate strategy, when considered against the reasonable alternative, based on proportionate evidence;
- Effective - the plan should be deliverable over its period and based on effective joint working on cross-boundary strategy priorities; and
- Consistent with national policy - the plan should enable the delivery of sustainable development in accordance with the policies in the

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Introduction

These representations have been prepared by Turley on behalf of Markfield Investments Ltd in relation to ‘Land at Dunmore Farm’, which is being promoted through the emerging Local Plan. Previous representations have been made to earlier stages of the Plan-making process regarding the site.

This response focusses on matters pursuant to the soundness of the draft Plan and those which are of particular relevance in the context of our Client’s interest. For the most part these responses relate to:

- Land at Dunmore Farm;
- Settlement Hierarchy;
- Housing Need considerations;
- Green Belt release; and
- Strategic Site allocations.

In addition, the representations set out the merits of our client’s site, land at Dunmore Farm, which could contribute to delivering the strategic objectives of the draft Local Plan, in addition to, or instead of, sites currently being proposed.

Land at Dunmore Farm

These representations should be read in the context of the opportunities for the site to be delivered as a comprehensive development in association with the former allocation at ‘land adjoining Fairlands’. The site itself has not been identified at any previous stage of the Local Plan process, although is located directly to the south of the former safeguarded allocation at Fairlands which was considered within the Regulation 18 Local Plan consulted on in July 2014.

Our client’s landholding ‘Land at Dunmore Farm’ comprises 31.69 hectares of land as submitted in previous representations to the Local Plan. The site currently comprises farmland and paddocks with a limited number of existing buildings in the south eastern corner around Dunmore Farm. The site wraps around the former safeguarded allocation to the south-west, south and south-east of Wood Street village. The field parcels themselves are relatively clear internally with trees and hedgerows indicating the majority of the boundaries.

Throughout the plan process to date, our client has supported the inclusion of the Fairlands allocation within the plan, although wishes to further emphasise the wider opportunities for the area if the site were to be considered alongside Fairlands for allocation within the Local Plan.

- A comprehensive development that would provide not only market but affordable housing to meet the needs of the Borough and any unmet requirements from Woking Borough;
- Deliver a comprehensive masterplan that could incorporate a defensible landscape buffer which would ensure the permanent separation of the villages of Fairlands and Wood Street village by creating new defined edges to the settlements. This would reinforce the findings of the Green Belt Study 2013;
- Direct new development in a sustainable location in line with the settlement hierarchy and enhancement local facilities and public services;
- Provide new development in locations where growth will be required to support the continued economic growth of Guildford as a town centre;
- The potential to incorporate appropriate Suitable Alternative Natural Greenspace to offset the proximity of the site to Thames Basin Heath SPA.

In light of the development potential of the site either as a small scale Green Belt release to the north of Wood Street village or in conjunction with any potential allocation at Fairlands, there are a number of key considerations that arise from
the draft Local Plan as currently written that undermine the overarching strategy of the Plan. These are considered to be fundamental to the soundness of the Plan when considered against paragraph 185 of the National Planning Policy Framework (NPPF). The following are discussed in more detail below:

- Settlement Hierarchy
- Housing Needs; and
- Green Belt

**Settlement Hierarchy**

The Settlement Hierarchy Background Paper (May 2014) has informed the overarching strategy towards directing development within the draft Local Plan. The current Local Plan 2003 identifies both Fairlands and Wood Street village as settlements within the Borough and this designation has been re-assessed through the 2014 paper.

It is evident that Fairlands and Wood Street Village rank similarly with regard to the provision of services being ranked as 10 and 12 respectively of all settlements within the District. It is worth noting that Wood Street Village accommodates a higher population than 21 other settlements within the Borough.

The settlement hierarchy identifies that both Fairlands and Wood Street village are large villages below the larger urban area of Guildford, Ash and Tongham and East Horsley. Paragraph 6.2 of the paper discusses how it would be appropriate to direct new development towards the following settlements - Guildford Urban Area, Ash and Tongham Urban Area, East Horsley together with West Horsley (North and South), Shalford, Chilworth, Effingham, Send, Send Marsh/Burntcommon, Ripley, Fairlands and Wood Street Village.

The paper concludes that ‘directing growth to these settlement is in accordance with the national policy which states that “planning policy should actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling, and further focus significant development in locations which are, or can be made sustainable”’.

Appendix C of the statement further sets out that Wood Street Village provides a range of facilities including shops, infant schools, local church, village hall, restaurants and a post office. In comparison, Fairlands also provides similar facilities as well as a primary school, GP surgery and Dentist.

Given the above, it would be appropriate for GBC to consider development opportunities at both villages given their sustainability credentials to meet long term housing and economic needs, both within and beyond the plan period.

In addition, the proximity of the site to Guildford urban area which is the focus of considerable economic growth over the plan period should not be understated. The opportunity for a comprehensive development at Wood Street Village (north extension) and Fairfield (western extension) could assist in meeting Guildford’s local term housing requirements. The delivery of housing would need to balance against a sensitive design approach that would ensure that a permanent landscape buffer is created to ensure long term retention of the individual identities of each settlement. In addition, local infrastructure could be enhanced with a focus on further improving the public transport links to the Guildford.

Given the findings of the Settlement hierarchy report, it is unclear as to why GBC are pursuing strategic development allocations within settlements which scored significantly lower within the sustainability rankings with regard to local facilities and public transport accessibility. It is noted that Normandy (small village) and Flexford (Medium village) are proposed to deliver strategic extensions despite supporting evidence suggesting alternative development locations would be preferable.

As such, it is considered that GBC are not ‘actively managing patterns of growth; nor focussing ‘significant development in locations which are or can be made sustainable’ as required under paragraph 17 of the NPPF.

Whilst it is acknowledged that some sites may fall outside the Green Belt and be the first preference for development, there is a requirement under paragraph 14 of the NPPF for Local Plan to meet its OAN, ‘with sufficient flexibility to adapt to rapid change’ and also assist in supporting the ‘viability and vitality’ of the communities in the villages.

In this regard, GBC has not directed development towards the most sustainable settlements where the need for travel to key employment locations is minimised. GBC should reconsider development opportunities around the settlement of Wood...
Street village and Fairlands for either small scale Green Belt release or for wider strategic allocations which would be supported by the conclusions of the SA.

As such, the approach taken fails to adopt the most appropriate strategy and nor is it consistent with the requirement to achieve sustainable development as required under paragraph 182 of the NPPF.

**Housing Need**

The Spatial Vision of the draft Local Plan sets out at draft policy S2 that the plan will deliver 13,860 between 2013- 2033. The focus of new development is on existing brownfield sites and at villages which are inset within the Green Belt.

The West Surrey Strategic Housing Market Assessment (September 2015) covers the areas of Guildford, Waverley and Woking Borough Council and sets out housing needs between 2013-2033.

The requirements are as follows:

<table>
<thead>
<tr>
<th></th>
<th>Guildford</th>
<th>Waverley</th>
<th>Woking</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dwellings per annum</td>
<td>693</td>
<td>519</td>
<td>517</td>
</tr>
<tr>
<td>Total over the plan period</td>
<td>13860</td>
<td>10380</td>
<td>10340</td>
</tr>
</tbody>
</table>

Whilst it is recognised that Guildford are seeking to meet its OAN over the plan period, the Duty to Co-operate Statement (June 2016)(DtC) discusses that whilst Guildford and Waverley are seeking to meet its OAN, Woking is intending to deliver only 292 dwelling per annum against a requirement of 517 dwelling per annum. As such there is a requirement for 225 dwellings per annum between 2012-2027, which in total is 3,150 homes to be accommodated by neighbouring authorities.

Given the requirement for local authorities to undertake the duty to cooperate as set out in paragraph 178 of the NPPF, which requires that public bodies need to invoke the duty through ‘planning issues that cross administrative boundaries, particularly those which relate to the strategic priorities’ (paragraph 178). As housing is considered to be a strategic priority there is a requirement upon GBC to fully consider opportunities to assist by taking up the unmet need of neighbouring authorities.

Whilst the emerging Local Plan will provide a buffer of 1,984 dwellings within the plan above the OAN requirement through completions since 2013 and outstanding capacity, this only seeks to incorporate flexibility within the plan to accommodate any additional needs of the Borough itself.

However, it is evident from the evidence base which underpins the Local Plan as well as the strategy contained within the Reg 18 Local Plan, that Guildford can reasonably accommodate additional new development in sustainable locations and through Green Belt release.

It is unreasonable for GBC to state at 4.43 ‘we do not consider that we can sustainably accommodate any unmet need arising from Woking’. It should be recognised that whilst WBC are yet to proceed with preparing a new Local Plan, there is still a requirement under paragraph 181 for ‘a continuous process of engagement from initial thinking through to implementation, resulting in a final position where plans are in place to provide the land and infrastructure necessary to support current and projected future levels of development’.

In 2014, GBC published its Interim Sustainability Appraisal (SA) which discussed opportunities for delivering new development through the expansion of villages by allocating greenfield sites within the Green Belt, noted as ‘Option D Green Belt sites around villages’ within the document- with reference made to safeguarding such sites until after the plan period. It should be noted that this Interim SA supported the Reg 18 Local Plan consultation in July 2014 and had initially intended to proceed with the inclusion of Green Belt release at villages and the allocations of safeguarded sites to ensure flexibility within the Plan, an option that was supported through the evidence base to the Plan.
In contrast, the updated SA (2016) which supports this draft Local Plan states that following the consultation in 2014, the volume of objection to Option D has resulted in the total quantum of growth around villages being ruled-out. However, the SA fails to fully explain and consider the appropriate locations for such growth, with no justification provided as to why development opportunities around Fairford and Wood Street village were not taken forward for allocation above sites such as Normandy except solely on public perception as noted at page 29 of the Appraisal, when the allocations are subject to the same Green Belt considerations and in fact rank lower in the settlement hierarchy. The DtC Statement further states at paragraph 4.36 that GBC ‘has sought to maximise sustainable opportunities to meet needs’, which is clearly not the case.

It is therefore unjustified for GBC to proceed with allocations within the plan when the Council has not considered all reasonable alternatives. In addition, given previously GBC had identified additional capacity for development through a range of safeguarded sites which would have ensure sufficient flexibility in the plan, the removal of sites with minimal justification and GBC stating that it is unable to meet some of WBC unmet need is unfounded and demonstrates that the plan has failed to be positively prepared.

As will be discussed in Section 4 below, GBC should also consider opportunities for smaller Green Belt releases around sustainable settlements which can support the continued economic growth of Guildford and support the long term vitality of villages around the periphery of the main urban area within the District. This will deliver flexibility within the plan period and provide more certainty that GBC will be able to deliver a 5 year supply consistently across the plan period.

Another key consideration for GBC is the current buffer proposed of an additional 1,984 dwellings which could be delivered over the plan period. Whilst the inclusion of a buffer is appropriate, this is not considered sufficient enough given the reliance on consistent delivery from a number of large scale sites within the Local Plan strategy to maintain a five year supply as required under paragraph 47 of the NPPF. These include sites at Stoke (1,000 dwellings), Gosden Hill Farm (2,000 dwellings), Blackwell Farm (1,800 dwellings), land to the south and east of Ash and Tongham (1,200 dwellings), Ockham (2,000 dwellings) and Normandy (1,100 dwellings). Given the above, GBC need to consider the inclusion of smaller sites that can be delivered earlier in the plan period.

In conclusion, it is considered the draft Local Plan is unsound as it has not:

- Been based on effective cross boundary working;
- Not been prepared positively to assist WBC in meeting some of its unmet need;
- Does not provide sufficient certainty on consistent housing delivery over the plan period given the reliance on large scale allocations; and
- Opportunities for sustainable development within the Borough have not been taken forward despite being supported through the evidence base to the draft Local Plan.

**Green Belt Release**

Whilst it is recognised that the Borough is constrained by both AONB and Green Belt, it is considered that the evidence base on which the Local Plan strategy has been derived does not meet the requirements of the NPPF.

At present, there are a limited number of sites proposed for Green Belt release despite opportunities for new development to be delivered within sustainable locations that will assist Guildford in meeting its OAN over the plan period.

The site was considered as part of parcel H8 which extend northwards between Wood Street village and Fairlands within the Green Belt. Whilst the site was considered to be of high sensitivity, Volume II of the Green Belt and Countryside Study discusses that there are ‘opportunities to accommodate appropriate development without significantly comprising the purposes of the Green Belt’. It is clear from the assessment that the main purposes of the Green Belt within this location is to:

- Check southwards sprawl of Fairlands and northward sprawl of Wood Street Village;
- Prevents Fairlands and Wood Street village from merging;
- Assists in safeguarding the countryside from encroachment; and
- Preserves the setting of Wood Street conservation area.

In this regard, given development opportunities clearly exist to the west and south of Fairlands and were supported through a previous iteration of the Local Plan, the opportunity to create a more comprehensive extension incorporating the site to
the north of Wood Street village would assist in delivering a significant quantum of homes, incorporating an appropriate and extensive landscape buffer between the two villages to ensure a defensible and permanent boundary to both villages.

The creation of a new permanent open area of land between the two settlements could deliver far greater benefits as public access could be provided along with the potential for outdoor sport and recreation which would permanently benefit the residents of both villages and the wider District. As such, this would ensure that the requirements of paragraph 81 are met, ensuring that the Green Belt is open and permanent and provides a beneficial use whilst also meeting the five purposes of the Green Belt as stated at paragraph 80 of the NPPF.

Alternatively, GBC should consider the opportunities to deliver smaller scale development at sustainable settlements such as Wood Street village, in locations where the impact on the function of the Green Belt would be minimised and opportunities to incorporate functional and accessible Green Belt land could be explored.

In light of the evidence base above and as mentioned at Section 3, GBC has through the Draft Local Plan Reg 18 consultation held in October 2014 considered opportunities for Green Belt release at Fairford in the form of a sustainable extension to the existing village. This has been subsequently removed.

The former draft wording of Policy 2 (Borough Wide Strategy) still sought to deliver 13,040 new homes over the plan period, although also quoted that ‘in addition to provide a level of flexibility and to ensure that the realigned Green Belt boundaries endure beyond the plan period, we are safeguarding approximately 99 hectares of land’. In support of this statement paragraph 4.10 included the provision for ‘safeguarded land’ which was an appropriate policy mechanism to meet the longer term development needs of the District.

This was further clarified at policy 9 (Villages and major previously developed sites) which sought to safeguard land at Fairlands, Send Marsh, Normandy and Flexford to meet longer term needs as part of a Local Plan review process and further clarified at paragraph 4.115.

However, when reviewing the Reg 19 Local Plan, it is clear that the Normandy site A46 has been taken forward as a proposed strategic allocation – no longer safeguarded for later in the plan period – whereas Fairlands has been removed entirely from the draft Local Plan as has any reference to safeguarded land. There is no justification provided as to why one site is preferable to the other and nor has regard been given to the findings of the Green Belt and Countryside Study nor the Settlement Hierarchy which should underpin the overarching strategy of the emerging Local Plan.

At paragraph 4.3.12 of the draft Local Plan, it states that Wood Street village and Fairlands are to be inset from the Green Belt, although there is insufficient evidence to justify why opportunities for growth at these larger villages has not been considered further and taken forward into the draft plan.

Given the requirements of paragraph 85 of the NPPF, when reviewing Green Belt boundaries the function of the Green Belt should not be the only consideration when determining whether development would be appropriate. As such, paragraph 85 requires that LPA’s should:

- Ensure consistency with the Local Plan strategy for meeting identified requirements for sustainable development;
- Not include land which it is unnecessary to keep permanently open;
- Where necessary, identify in their plans areas of ‘safeguarded land’ between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period;
- Make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following a Local Plan review which proposes the development;
- Satisfy themselves that Green Belt boundaries will not need to be altered at the end of development plan period; and
- Define boundaries clearly, using physical features that are readily recognisable and likely to be permanent.

On the basis of the above, the Reg 18 Local Plan was addressing the key considerations set out at paragraph 85 and there is a sound evidence base to support this approach. GBC acknowledged within the former draft Plan that it was seeking to address the requirements of paragraph 85 explicitly which would have provided more certainty in housing delivery and ensure flexibility over the plan period.
In this regard, whilst supporting the previous approach to the Local Plan strategy consulted on in 2014, we would consider it appropriate for GBC to reconsider the inclusion of safeguarded land within the emerging Local Plan. This said, of the considerations set out at paragraph 85, it is considered that in re-adopting this approach further consideration is required with regard to the following two elements:

- Ensuring that the development boundary will not be altered at the end of the plan period; and
- Boundaries are defined clearly using physical features that are likely to be permanent.

As such, GBC should consider further the relationship of Fairlands with Wood Street village to realise the large scale opportunities for mixed use development within this area whilst reinforcing the quality and usefulness of the Green Belt between the two settlements. The delivery of new development could facilitate securing the permanence and openness of the Green Belt between the settlements and to ensure its use is enhanced and is beneficial to the local community as set out at paragraph 81 of the NPPF.

The draft Local Plan as currently written is unsound and fails to take into account the up-to-date and relevant evidence that has been published to support its preparation. The draft Plan does not seek to ‘promote sustainable patterns of development’ as required under paragraph 84 of the NPPF and nor does the plan incorporate sufficient flexibility through the review of the Green Belt to satisfy that the Green Belt boundary will not need to be altered, either through a future need to accommodate some of WBC’s unmet need, or unexpected changes to housing and employment requirements within the plan period. The inclusion of a higher housing target (incorporating a more significant buffer above the OAN) would be more appropriate, ensure compliance with the NPPF and any unmet needs arising from neighbouring authorities, and assist in the delivery of development in a sustainable location and reduce the reliance of a Local Plan review early in the plan period.

**Strategic Development Opportunities**

The settlement hierarchy notes that Wood Street Village and Fairlands are both larger villages with sufficient provision of local facilities and public accessibility. As such, GBC should be considering the longer term opportunities for the two villages and ensuring that any new development that comes forward as a longer term opportunity is comprehensively designed and delivered to ensure that the identity of each settlement is retained whilst seeking to sustain and support the vitality of the villages themselves.

Land at Dunmore Farm extends to the north of Wood Street village and would be a logical extension that could be well integrated with the existing village. The village is not only within a sustainable location and well related to Guildford, but also would provide additional flexibility within the plan with regard to housing provision if GBC is required to assist WBC in meeting some of its unmet need over the plan period.

The Fairlands allocation would have identified 27ha of land for residential development, would incorporate the provision of SANG and would provide further opportunities to deliver a strategic allocation to the west of Guildford that could incorporate appropriate landscape features to deliver a permanent Green Belt boundary between both villages with the incorporation of functional Green Belt that would deliver benefits to the wider community.

Whilst it is acknowledged that GBC is seeking to meet its OAN, there is still uncertainty over the unmet need of Woking and how this could be accommodated within the scope of the draft Local Plan if considered appropriate. We consider that a more significant housing buffer is required within the Plan given both the strong reliance on larger strategic allocations and the uncertainty of consistent delivery over the plan period and any outcome arising from the Duty-to-Co-operate. In order to be considered sound it is imperative that GBC ensure that the plan is both flexible and robust, with assurance that an early review of the Local Plan strategy will be not required if an increased housing need is necessary within the plan period.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - East Clandon

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that GBC have not met the requirements of the NPPF Paragraph 155 which imposes an explicit obligation to have early and meaningful consultation. This has not been met in a number of areas by GBC. We have not had a meaningful consultation on imposing a settlement boundary on East Clandon, on the absence of meaningful economic and population growth figures for Guildford showing various scenarios with high, medium and low growth scenarios being offered.

I demand that there should be a significant challenge to the GBC scenario planning and the housing and growth numbers should be revised and especially in the light of uncertainty and change which will accompany Britain’s withdrawal from the EU.

Attached documents:

Comment ID: PSLPP16/17383  Respondent: 15682305 / Monika Mundy  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy D4: I object to the insetting of villages (meaning in fact, removal of villages from Green Belt protections) and the fact that they will be suffer from higher density development and the resulting increase in traffic, use of infrastructure which is already under pressure. I object in particular to the insetting of West Clandon, Send and the Horsleys. This will have a detrimental impact on Green Belt openness and the views in and out of the AONB in direct contravention of Policy P1 and P2.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17379  Respondent: 15682305 / Monika Mundy  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Settlement Boundary which has been imposed on East Clandon without any consultation. This imposition provides no protection to further development outside of the settlement boundary (Policy P2 para 4.3.25) and I deem as being unnecessary in an already tightly developed ancient and rural conservation village with high archaeological potential. I demand that this proposal be removed as it will endanger the openness of the Green Belt, the views in and out of the AONB (protection of the AONB Policy P1) and the character of our village.

Policy P2 – Green Belt: I object to this significant erosion of the Green Belt with the proposals for large towns being developed on Green Belt land thereby removing the openness of the Green Belt. I note in particular the huge developments proposed for the North East quadrant of the borough which will adversely affect our amenity, but also unfairly targets our tranquil rural villages because we can provide ‘dormitory’ facilities for commuters to London. These developments directly affecting our villages are the proposals for Wisley Airfield, Gosden Hill Farm, various farms and tracts in the Horsleys and Garlicks Arch at Send.

Further, on the erosion of Green Belt and I object that Policy P2 is not met where it states that Green Belt should be protected. I object to the disproportionate use of Green Belt land for housing – some 65% of the housing proposed is on Green Belt and with little consideration being given to redevelopment of brown field sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/17384  Respondent: 15682305 / Monika Mundy  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object that GBC are contravening the NPPF framework stipulation in paragraph 87 with the proposed developments at Gosden Hill Farm, Ripley, East and West Horsley and Garlicks Arch, Send. Paragraph 87 states “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.” and GBC have not proven any special circumstance for developing on these Green Belt areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17380  Respondent: 15682305 / Monika Mundy  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy S1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I was object to Policy S1 not offering sustainable development as regards roads and rail infrastructure which currently does not cope with demand, congestion on the A3 in particular, but also other A roads in the area such as the A247, the A246 and then there is the already overcrowded and slow train system for those already living in the borough and needing to commute to London. No pre-emptive planning has been made to alleviate these real problems which will be much exacerbated by large increases in housing.

I specifically want you to note the winding, narrow and dangerous route via the A247 through West Clandon which then drives people to use a cut-out with the even narrower rural road, the Ripley Road, through East Clandon to and from the A3. This will be much exacerbated with the large increase in housing twinned with large increase in cars and travel.

Continuing with Policy S1 (Presumption in favour of Sustainable Development) I object that this is not being met and that GBC are contravening this when it is clear that no fixed plans are available to improve the provision of shops, medical facilities, schools in our immediate area (besides roads and rail already mentioned) to service us. If the GBC were serious about improving the infrastructure and sustainability of our communities, they would have secured plans and funding to ensure these facilities are available and not just at the behest and hoped-for goodwill from the developers. Further, how will developers be held accountable to their promises to build infrastructure? Stories are legion of developers reneging on commitments as the ‘money runs out’ even though vast profits will be made from turning agricultural and Green Belt land into highly valuable housing land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17378 Respondent: 15682305 / Monika Mundy Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy S2 for the proposed provision of the very high overall housing numbers of 13,800 new homes (690 new dwellings being built every year for 20 years) and I object on two grounds; these housing numbers have been imposed on us with no real consultation being undertaken with the residents of East Clandon and the borough as a whole. Secondly, the housing numbers are based on a high-growth economic development plan which in itself has had no consultation with us and this combined with estimated demand from London residents will turn Guildford into a dormitory town for London.

Further, I object to the fact that no real economic or housing demand factors have been provided by the borough planners to substantiate the very high housing target of 13,800 new dwellings over the next 20 years. This is in direct contravention of the NPPF’s requirement for the planning authority to provide meaningful consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Housing Policies: Policy H1 "Homes for all" suffers from the inclusion of an unacceptable requirement to impose on the University (regardless of Blackwell Farm) an obligation to provide accommodation for 60% of its students on campus. This imposition will limit education and will create a "them and us" style society. The housing problem in Guildford is not caused by students or the University and the Town should not discriminate against them.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPP16/17388  Respondent: 15682465 / Nick Beesly  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H2 "Affordable Homes" imposes a high obligation on developers for affordable housing but makes no reference to viability. If we are unrealistic about expectations of what developers must provide it will limit the supply of new homes and increase the cost of those that are built.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am an employee of The University of Surrey who lives locally and am writing in support of the Local Plan and in support of the University of Surrey's part in that plan.

The University plans are robust, professional and show genuine smart growth; they support sustainable transport, relieve critical infrastructural issues and deliver high levels of employment and affordable housing. Those plans need to be prioritised within the Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the Guildford Borough Proposed Submission Local Plan: strategy and sites: June 2016.

I have lived in Walton-on-Thames for nearly 45 years and raised my family here. In that time I have seen too many houses being built, beautiful historic houses demolished and ugly blocks of flats built in their place. The roads are very congested, I cannot leave the house during certain peak hours due to traffic. The proposed changes by Guildford Borough Council are on a very large scale and will damage the look and feel of the area forever but also dramatically worsen the already dire traffic situation, e.g. trying to get in and out of Wisley RHS Gardens or shopping in Guildford.

My daughter and her young family live in West Horsley and these proposals will have a very detrimental effect on their village, it’s look and feel. The extra impact on local services (schools, roads and health services) are not adequately addressed in the Local Plan.

My main objections are:

- Erosion of the Green Belt: GBC has not explained clearly what the “exceptional circumstances” are to needing to remove areas from the Green Belt.
- Density and proposed scale of the developments: not in keeping with current density of housing in the area especially in East & West Horsley.
- Lack of provision for increased infrastructure for new number of houses: health, transport, education, sewerage.
- Wisley Airfield New Town: a very large development of 2000 homes which will have catastrophic consequences on the already heavily used A3. The impact on local villages and services will be immense (eg Ripley, Ockham, Horsleys).
- Gosden Hill Farm: Proposed development of 2000 homes like Wisley Airfield will have dramatic consequences on roads and the amenities of local villages.
- “Affordable Housing”: the term is misleading and the demand for these are not high in the villages affected in the Local Plan. Very ill thought through.

For the reasons I have listed above I object to the Local Plan and hope that it will be rejected to protect the area from irreversible damage.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

RE: Land at Fonthill, Godalming

I write to make comments on the Guildford Local Plan.

Charterhouse School owns and operates a 100 hectare site just outside Godalming. The School has around 800 pupils, all accommodated on buildings within the Godalming site.

The main school site falls within Waverley Borough Council but the eastern part of the site falls within Guildford Borough. Within part of the school’s ownership (and falling within Guildford Borough) is a property called Fonthill (see attached plan). This is a substantial dwellinghouse that is in need of rebuilding.

As can be seen from the attached aerial photos, there are a number of trees within the site and a wide open expanse of open land to the west. This has been subject to various interventions including earth bunding, dating back to when the site was occupied by travellers.

We have no particular objection to the Guildford Local Plan and note the general strategy for the provision of housing. However, we write to advise you of the availability of the Fonthill site, should the Council need to allocate further land for residential development. The site would be contiguous with the existing residential area of Godalming and therefore within easy reach of the services and facilities within the town. There is currently a publicly accessible sports club with cafe and shop within the School providing community facilities within short walking distance of the site. Any development on the site is capable of being entirely enclosed by the existing, established mature tall trees.

The allocation of this site would be entirely compatible with the Spatial Vision of the emerging Local Plan which states that “The plan also proposes almost 1200 dwellings on non-strategic sites within and around existing villages, some of which are now inset from the Green Belt, and over 750 dwellings as extensions to existing villages. These dwellings will offer a variety of housing choice in villages and help contribute to supporting local services and the important role they play in village life.”

Accordingly, the provision of residential development on a part brownfield site adjoining an existing established town is considered to amount to sustainable development. Should the Council find, in the course of discussions on the emerging Local Plan, that it needs to allocate additional sites for residential development then we would be very grateful if the Fonthill site could be considered.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

The Garlick’s Arch (A43) proposal would double the built area in the locality, and would irrevocably damage the character of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.

The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the lack of proper infrastructure planning for sites (Policy I1)

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object to poor air quality concerns (Policy I3)

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to development in areas which are at risk of flooding (Policy P4)

The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the Local Plan as the development proposed is not sustainable (Policy S1)

13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick’s Arch.

The development should be in urban areas where there is sustainable transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to object to the inclusion of this site in the draft local plan for the following reasons:

1. The number of houses needed in the Borough was changed between the first and second issues of the draft plan indicating that there is considerable uncertainty in this figure and the basis and method of calculation. In view of the recent EU referendum vote and its impact on future immigration, the number of houses required is likely to reduce further.
   With smaller house numbers the need for any loss of the Greenbelt should be reassessed as 'special circumstances' necessary for reclassification have not been established.
2. This site was introduced at the last minute and there has been insufficient time for consultation before its inclusion in the draft plan.
3. This development will add to the disproportionate burden on the north east of the Borough.
4. There is a question as to the suitability of the land for building purposes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. Wisley/Ripley/Send/Burnt Common/Send Marsh is a semi-rural area and development on this large scale will lead to urbanisation and permanently change the nature of the area. In particular this could provide the starting link in connecting Guildford to the M25.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Traffic will increase significantly and the access and exit roads to and from the A3 are too narrow to cope with the resultant increase in traffic - particularly at peak hours.

2. Light and sound pollution.

The area enjoys fairly dark skies for its proximity to London. Any additional development will add to the light pollution unless provisions are made to ensure strict control of any additional lighting. Please consult Guildford Astronomical Society.

It already suffers from noise pollution from the A3. Traffic noise pollution seems inevitable if development proceeds.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The sites contain a substantial number of trees many of which are quite mature and must make a significant contribution to the Borough's carbon reduction target. It seems perverse that planning permissions have been refused because of the impact on the individual trees whilst the wholesale destruction of woods seems inevitable if these sites are included.
   
   It seems difficult to reconcile these two extreme positions.

   If included in the plan preservation orders should be placed on appropriate trees as a minimum requirement.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford Borough Proposed Submission Local Plan– Regulation 19 Consultation

This letter includes the formal comments to Guildford Borough Council’s Proposed Submission Local Plan from Foxley Tagg Planning Ltd. – a national planning consultancy that specialises in custom and self-build.

This response document will explore the proposed submission document’s consideration of custom and self-build matters.

This representation will consider the Proposed Submission Local Plan in the context of the Tests of Soundness, against which the plan will be considered at examination. These tests are:

1. **Positively Prepared**: based on a strategy which seeks to meet objectively assessed development and infrastructure requirements

2. **Justified**: the most appropriate strategy when considered against the reasonable alternatives, based on proportionate evidence

1. **Effective**: deliverable over its period based on effective joint working on cross-boundary strategic priorities

2. **Consistent with national policy**: enabling the delivery of sustainable development

**Policy Requirements**

Paragraph 50 of the National Planning Policy Framework (NPPF) sets out the requirement for Local Planning Authorities (LPA) to plan for a wide choice of high quality homes to support sustainable communities and provide greater opportunities for home ownership. It goes on to state (underlining is our emphasis):

“Plan for a mix of housing based on current and future demographic trends, market trends and the needs of different groups in the community (such as, but not limited to, families with children, older people, people with disabilities, service families and people wishing to build their own homes)”
In addition to the above, paragraph 159 of the NPPF considers the requirement for LPA’s to have a clear understanding of housing needs in their area. They should therefore ensure that their policy documents:

“Addresses the need for all types of housing, including affordable housing and the needs of different groups in the community (such as, but not limited to, families with children, older people, people with disabilities, service families and people wishing to build their own homes)”
