Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object that the north east corner of the borough is being proposed for these large developments. The plan is unbalanced. 36% of the development is proposed in Wisley/Ripley/Send (A43) and Clandon (A25). At present these villages make up only 11% existing housing. I object to the new figure of 693 houses required per annum. the council has not published the SHMA report so these figures cannot be verified.

Answer (if comment is on questions 1-7 of the questionnaire): ()

First, the New Plan would appear to be based upon flawed evidence and assumptions in respect of likely population growth over the life of the Plan. This overestimate of as much as 40%, consequent upon the inclusion of transitory students who leave at the end of their studies, results in a totally unrealistic and excessive figure for housing provision (that is not to say that there should not be appropriate student accommodation in and around the University campus). If the proposal for more than 12,500 homes is adopted (plus the buffer of a further 1,000 plus houses) the consequent developments will result in needless loss of the Green Belt, huge stress upon resources, including water & sewage treatment and a profound and utterly unacceptable increase in traffic volumes and resultant congestion.
I therefore object to the 2017 New Local Plan on the basis that it proposes excessive and totally unnecessary housing numbers for Guildford Borough.

I object to policy A58 at Burnt common because....

It was deleted from the 2014 draft because of all the objections made previously the word Minimum is a change from the previous Maximum in the 2016 plan. There is no need to build industrial or warehouse development in the middle of green belt when Slyfield and Guildford still have plenty of sites and industrial units. The lorries and excess traffic will turn our roads into main noisy access roads.

It will join up existing villages and defeat the purpose of GREEN BELT.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

For a plan to be considered sound, paragraph 182 sets outs that it must be:
- Positively prepared – the plan must be prepared and based on a strategy which seeks to meet objectively assessed requirements and where it is consistent with achieving sustainable development;
- Justified – the plan should be the most appropriate strategy, when considered against reasonable alternatives, based on appropriate evidence;
- Effective – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and
- Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the National Planning Policy Framework.

Taking the above into consideration, we consider the Plan as a whole meets the test of soundness as set out within paragraph 182 of the National Planning Policy Framework.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Having read your revised plan it appears that the only thing to happen is a very slight drop in number of new homes proposed.

It still does not take into account lack of school places and medical appointments which are already at breaking point.

The infrastructure cannot take the amount of extra traffic proposed. Parking is already a problem let alone moving round in the area.

To put houses on at Wisley and to get them coming on at Ripley is total madness.

Junction 10 on the M25 is a black spot and very often is blocked as is the A3. The A3 has become due to volume of traffic just like the M25.

We pass over the M25 nearly every day and it is always stuck and not moving one way or the other.

Trying to bring more traffic on at this junction seems a very bad idea, the whole of the area will grind to a halt.

Perhaps some of the land around Guildford would be a better idea. Shalford for instance has lots of areas which could be built on.

Ref sites A46 and A47:

As residents of Normandy we are very relieved to see that sites A46 and A47 are no longer earmarked for large scale development in the new Local Plan.

The effect on the Village of Normandy would have been a near disaster, not only the influx of hundreds of people, but on the lack of local infrastructure and the geology of this area north of the Hogs Back.

We acknowledge that the large scale developments in the neighbouring Rushmoor area with the creation of the "New Town of Wellesley", and proposed developments in Tongham and Ash will affect the traffic on our already overcrowded roads d re peased that Normandy wifi not add further to this problem.

This year alone we have seen the chaos wi ou oc1 roads created vh the recent closure of the Hogs Back after the heatwave, and before that the increased traffic incurred during the weekend closures of the M3 motorway.

It is important to the environment to uphold Green Belt areas around Normandy. We have many species of fauna and flora which re! , on th "natural corridors" that are in Normandy to exist and prosper.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the unfair imbalance of the Plan across the borough. With the removal of site 446 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to removal of Brownfield sites (A4) from the Plan
Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail - thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increase in housing proposed in Tannery Lane (site A42)
This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays. " And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the extended development in the Green Belt (Policy P2, Site A43)
I object to Garlick's Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick's Arch
The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick's Arch
The potential of an increase from 400 houses at site A43 (Garlick's Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick's Arch
GBC's own reasons for including Garlick's Arch A43 in the 2016 version were
a) The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, ... (site allocation 425) [ than the Burnt Common site did ]”
b) The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Comment ID: pslp172/1202  Respondent: 17247169 / Ben Greaves  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A50

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan is self-inconsistent in respect of traveller sites. A50 Whittles Drive, Normandy, shows on the Site details: "Allocation: The site is allocated for approximately 14 Travelling Showpeople plots..." Clearly A50 more than covers the total "need" of 8, (page 40, 4.2.22.) and so no "need" exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

Attached documents:

---

Comment ID: pslp172/1204  Respondent: 17247169 / Ben Greaves  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the "required" industrial space is available there, so there is no reason for Garlick's Arch to be included.

I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the hiding of development by "deferment" (A24,A25, A26, A43)
This version of the Plan has concealed some development planned to take place by "deferring" it beyond the period covered by the Local Plan. This is designed to have 2 effects:
i) to hide the number of housed actually being built (A24, A25, A26 - total of 1100 deferred, but still being built!), and
ii) give an excuse for building houses on another site (A43 - 400/650 houses proposed) when they are not needed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object the change in policy on affordable homes (Policy 4.2.23)
The previous version of the plan stated that "Developers will be expected to provide land for affordable homes at nil value".

The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site."

So the developer doesn't even have to provide any 'affordable' homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these 'affordable' homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) "In general, a need to make profit over and above the standard developer's profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. That has now been removed, thereby accepting that needing to make greater than normal profit is to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the lack of proper infrastructure planning for sites (443 and 442)
The Foreword to the plan by Paul Spooner includes on page 5: "We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan".

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garklicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object removing Send Business Park from the Green Belt (4.3.15).

Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it's insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no "exceptional circumstances", as required by the NPPF can be claimed.

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

And in relation to Sites A36-41:

- The changes to the Local Plan for East and West Horsley are minimal - the revised plan still contains four of these sites, which represent a total of 395 new dwellings. This shows that GBC has chosen to disregard the very high number of serious objections previously submitted to this part of the plan. **We do not want the character of the Horsleys destroyed by insetting from the Green Belt and over-development.**
- Many Horsley residents are suspicious of political bias amongst a Council leadership which represents the opposite (western) end of the borough: the over-development of East and West Horsley seems to be the sacrifice they are willing to make in order to protect their own neighbourhoods.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Therefore, for the following reasons, we still object strongly to proposals for sites A37-40:

- The issue of excessive and disproportionate development in East and West Horsley compared with the rest of the borough remains unexplained and unaddressed.
- The Local Plan makes no attempt to set out an integrated vision for this part of the borough, there is no assessment of the cumulative impact on facilities and infrastructure - public transport, traffic, road safety, parking, schools, medical facilities, sewage, flooding/surface drainage and shops - of the four sites now proposed, as well as Site A35 (Three Farms Meadow, aka “Wisley Airfield”), which is only two miles away and proposes more than 2,000 new homes.
- Sites proposed on the periphery of existing residential areas in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries and the inserting of the villages from the Green Belt. The plan presents no arguments for this, and contrary to NPPF paragraph 79, will contribute to creeping urbanisation by weakening the Green Belt corridors separating the Horsleys from neighbouring villages.
- Together, the four Horsley sites breach NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value, which has been an outstanding success story in the Horsleys (as detailed in response to the last consultation). Assets include a dense network of public rights of way and permissive access routes, parks, sports fields, a campsite of international standard, Britain’s newest opera house, and the much-used Olympic cycle route. These examples depend on a Local Plan that protects the Green Belt, maintains its openness and beauty and avoids urbanisation and traffic congestion. The proposed developments are clearly in contradiction to this.
- The density of the proposed new housing is inappropriate, being greater than anywhere in East and West Horsley at the current time.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The level of investment proposed in the plan seems unlikely to meet the already serious deficiencies in infrastructure across the borough, and where significant investment is specified in the Infrastructure Schedule, in many cases it is unclear whether public sector funding is going to become available to support it. Funding from developers for major infrastructure projects will is unlikely to be sufficient, but until such infrastructure is in place, many of the larger developments proposed in the Local Plan will be unsustainable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Despite having a revised Green Belt policy P2 in the Local Plan which states that, “The Metropolitan Green Belt will continue to be protected”, GBC proposes to remove large swathes of land from the Green Belt for use as housing to meet these flawed targets. 56.7% of all new development in the borough will be built on Green Belt sites, with no exceptional circumstances or any other justification given. This is contrary to ministerial guidance and Planning Inspectorate decisions which continue to support the position that unfulfilled housing need does not constitute the exceptional circumstances needed to justify building on Green Belt land.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A42 Clockbarn Nursery, Tannery Lane.

Reasons for objection to the proposals of 2016 are well documented and remain valid. An increase of a further 15 houses in addition to the original 45, representing a 33.3% increase is completely unjustified and can only exacerbate further, an already deleterious situation in the immediate locale. In addition it will contribute to worsening the situation at the A247 junction with the London Road.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A58 Land at Burnt Common, London Road.

This proposal to develop some 7000 Sq.m of Green Belt land for Light Industrial or Warehouse usage was removed from the 2014 proposal because of the vast number of objection. It has resurfaced and the original word **Maximum** which refers to the figure of 7000 in the 2016 proposal has been replaced by the word **Minimum**. This change leaves this area open to even further development at a later stage.

Further development here is totally unnecessary since both Slyfield and Guilford have empty sites and Industrial Units available.

The impact of this proposed development would be severe on the local road network and would cause potential ‘Gridlock’.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   a) The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

   b) The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

   c) The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

   d) The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

   e) The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

   f) The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1255  Respondent: 17249601 / Penelope Moore  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There appear to be no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch)

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, ... (site allocation A25) [ than the Burnt Common site did ]”
2. The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.
Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

---

I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become **even more** biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are **within 3 miles of Send Marsh**, most of them on Green Belt. This is **grossly unfair** on an already overcrowded part of the borough.

---

The Plan is self-inconsistent in respect of traveller sites.

A50 Whittles Drive, Normandy, shows on the Site details: “**Allocation: The site is allocated for approximately 14 Travelling Showpeople plots ...**” Clearly A50 more than covers the total “need” of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects:

i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!) , and

ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. That has now been removed, thereby accepting that needing to make greater than normal profit is to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

“We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Wisley Airfield potential development.

Essentially this is for 2,100 homes, shops a small school, and business areas.

East Horsley is now considered as an 'Urban Village' - with 4,300 people approx.

The Wisley project - with its 2,100 homes equates to 5,250 people of which (15%) - 800 will be at school - must therefore be considered as a small New Town.

At the moment the SW corner of the site floods - and the SCC attempt to control it - but have they? Get a bit of rain and there is the flood again.....but with a new town of which probably 25% is concrete where is all the water going to go then?

Also....with 2,100 houses we are probably talking about 4,000 cars + another 500 of people coming into the development each day....and all these vehicles are going to be funneled down to the round-about at Ockham Road North and its junction with the A3. Result permanent gridlock.

When I went to school we had up to 40 people per class.....and I see that the developers have planned for 6 classes (I assume a form is a class as it was in my day). OK – so where are the other 680 students going to school? Remember they are across 12 age groups so we are talking which is something like 24 further forms/classes required.

Has anyone at GBC really thought this through?

We can then turn our attention to the flora and fauna of the area. In the woodland known as the Forest alongside the Drift in East Horsley SWT have ripped out an area of low trees and thicket that surrounded a rather hidden pond. There used to be rabbits there, wrens, blue tits, black caps, tree creepers, wood-peckers as well as all the other birds of the woodland….but they are all gone. Who will care if SWT does not care?

And so what will happen to all the flora and fauna of the Wisley Airfield….an area that has largely remained quiet and untouched since the war….I plead on their behalf...."Where will we go?"

So what about this development – caged in by the A3, a B road and a couple of lanes. There is no infrastructure. Roads, Sewers, no parking at the two local train stations, buses…well, they may put some routes in but they will be clogged up too. In addition the permanent white noise of the A3 and the M25…..and yet another area of open space is sucked up!

And lets face it….who will snap up these houses?

They will be sold in the main to people who are escaping London, but still work in the city….they will not be for local people who cannot afford a deposit….but still need a decent home.

I think that GBC needs to throw-out all the PR companies and Consultants, who will sell you the concept that black is white. I know this is true because all my business life I have used these type of people to sell the impossible for me. Get rid of them.

Start again GBC – with the whole of your local plan and start using your individual intelligence.

Blue-Sky thinking is what you need…it is not Rocket Science…its easy….all you have to do is speak up, forget kow-towing to your boss because you are frightened of loosing your pension, speak up, speak load and talk some sense.

I am writing to object to the Guildford Local Plan. I have visited an open event at East Horsley village hall and seen the changes proposed.

My key objections are:-

Overall numbers of houses required are still too high. With Brexit and the economic uncertainty we do not require these high number of houses.

The movement of the boundary of the greenbelt around Horsley has no justification - as highlighted by East Horsley Village Council letter on the local plan.

The site at Wisley remains in the plan but you have removed other sites. I object to the building of homes at Wisley Airfield.

There are no meaningful infrastructure investment to accompany the proposed developments in the plan.

Overall I add my support to the letter written by East Horsley Village Council on this matter.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The reduction in the number of new homes proposed in the Green Belt after the 2016 Consultation, is welcomed (90 in West Horsley, 1100 in Normandy and Flexford) but does not go far enough in reducing the still very large number of new dwellings proposed on Green Belt.

1. The eastern side of the Borough is now scheduled to take an even greater proportion of new homes in the Green Belt
2. It is totally unacceptable that Guildford is choosing not to constrain its overall housing growth, as many other Councils have done to protect Green Belt. The objectively assessed housing target, though reduced since 2016 to 12,466 homes, will by 2034 (the end of the Plan Period) mean that Guildford has grown by nearly 25%. This is nearly double the Office for National Statistics prediction for the growth of Guildford

1. Nothing has been put forward since last year’s Consultation to improve the sustainability of the West Horsley development sites and thus meet National policy requirements. Every home on the West Horsley sites will need a minimum of one car to enable residents to get to shops, medical centre, library and Horsley Station, regardless of how much pressure is applied to adopt cycling and walking as the preferred means of travel.

2. Flawed evidence continues to be relied upon to justify overexpansion.
3. Guildford town centre needs more apartment homes NOT more shopping space. Online retailing is driving major change in ways of shopping – many reports published stating this.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have some serious reservations and must protest at the proposed plans to expand the area of the Surrey Research Park and Blackwell Farm.

I commute into the Surrey Research Park from Hampshire, proceeding north up the A3 into the Guildford area, and have had enough of the current situation, let alone any future negative impact caused by further development in the area.

Just today I have been witness to a number of potential incidents that are already not being addressed. These observations typically include, but are not limited to:

- The Tesco's roundabout junction coming off the A3. I've seen wing mirrors ripped off and bumpers scraped of the cars that have to sit half and half on the A3 because the slip road is static and filled with traffic.
- The junction coming off the Tesco's roundabout to proceed west on Egerton Road where the outside lane of cars continuously cut up those on the inside, but do so on the very exit of the roundabout which is exceedingly dangerous. This part should be widened or the priority of lanes needs addressing.
- At this same junction there have been accidents involving pedestrians trying to cross where it is exceedingly busy. Either remove the possibility of crossing or provide a safer means for pedestrians to cross by way of bridge or underpass.
- Proceeding west across the junction from Egerton Road into Gill Avenue where the traffic is funnelled into a single lane simply does not work. I appreciate that this may well be a hospital road but the fact remains that a great number of businesses are in the Surrey Research Park and they require access. This would benefit from an
Through an additional lane and you should consult the hospital on the matter. It may also be a consideration to add access into the research park from the back of the hospital through from Park Barn.

- As a matter of etiquette, cars are not funnelling into the single lane at this point nicely and is a source of much road rage each day for many drivers. Perhaps a sign to remind people?
- Cars actively using the hospital entrance access road as a shortcut to circumnavigate the traffic on Gill Avenue and cut in further up. I'm sure you can appreciate how ridiculous and unnecessarily dangerous this is.
- For the underpass on Egerton Road, cars are accelerating down the outside lane going West to then cut up those queuing on the inside lane who are waiting to proceed across the grid locked roundabout. They do so in a very aggressive fashion and I'm surprised we've not seen a great deal more accidents.
- On the same underpass, people (possibly students) are walking underneath alongside the road using the narrow strips of pavement that are there. As a driver, this makes me nervous as I don't believe pedestrians should be in such close proximity to moving vehicles.

Whatever research you've done, it is flawed, and in no way considers the environmental impact or the sanity of those commuting in and around the area. The potential effect is that you risk businesses moving away from the area, probably into Hampshire, because the well being of their staff is also being affected.

Adding more commuters into the area without addressing the existing problems is unsafe and ludicrous. You will be affecting rush hour journey times, suffocating local businesses and their ability to function, as well as making it harder for emergency services to gain access to the hospital. As such, myself and many others would like to state the following:

We object to Guildford Borough Councils changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site (policy A26 and para 4.1.9.), which:

- Directs more office space to an extended Business Park (Policy E4), which will increase peak-time congestion, particularly around the Hospital and A&E, and will also encourage rat-running through residential areas.
- Disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England's forthcoming boundary review. (Para 4.3.8.).
- Ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development. (2.14a).
- Adds to air pollution in neighbouring areas, which already exceeds safe EU limits for Nitrous Oxide (A26, Key considerations (7)).

Please address these concerns and drop your future development plans in their current form.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area. Proposals for the land west of this road and to the south east of Foreman Road / White Lane should must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should must include the provision of a green buffer that seeks to maintains a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

- Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

  "Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

- Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

- Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.
a) The Street in Tongham  
b) A331/A323 intersection  
c) A31 /White Lane junction  

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. Answer (if comment is on questions 1-7 of the questionnaire): ()  

Policy P3 - Countryside  
• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road  
• 4.3.29 Amend: "Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough's second largest urban area. Given its relative sustainability, a Countryside to the south and east of the urban area within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development."  
• 4.3.30 Amend: "We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green."  
• Policy P3 Amend: (1) (c) should be amended to read "does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot."

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
4.3.29 Amend: "Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough's second largest urban area. - disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to express my concerns over the revised plan. I was horrified to find that the land that had been given to the Raleigh School has been taken out of the local plan. There is urgent need for the school to be rebuilt as the quality of life for that pupils is suffering due to lack of up to date facilities and also space. The parking around the school has always been bad and with the increase numbers attending the school it will only get worse. There is no cost involved as the and has been given and moving the school would then in turn free up the site for low cost housing which is badly needed in the village. I feel it is very short sighted for the council to turn this opportunity down. Both my daughters attended the Raleigh many years ago and benefited greatly from excellent teaching and I would hate for the next generation of children not to have the same opportunities.

I hope that you will take my views concerning this matter into account.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Key facts

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:
In general, GEF believe that the 2017 Plan is a big improvement on earlier versions and that the reduced number of home planned (p21) and the reduction in planned increase in retail floorspace (p22) are welcomed as being improvements. However, in the detail, GEF have noted the following issues arising from changes to the Guildford Plan:

1. Clause 2.13 on page 13, accepts that “there is a fragmented and disjointed network of cycle routes, consisting of routes both on and adjacent to local roads, with the latter often comprising shared lanes for pedestrians and cyclists. Many cycle lanes and tracks are narrow and some are unattractive to the average cyclist.” Furthermore, clause 2.14b states that “A growth in cycling has occurred despite limited improvements to facilities for cyclists.” However, we have been unable to find proposals to improve this situation, which is unacceptable as this should be a very significant way to reduce transport emissions. Funding contributions are understood to be available from organisations like Sustrans.

2. On page 38, we welcome the changes to recognise the need for more family houses and accessible accommodation for older people. We believe that The Council could do more through the Council Tax system to encourage the use of empty houses and discourage the overinvestment in luxury houses.

3. GEF welcomes the additional clauing on page 61-63 to recognise the importance of Climate Change in planning policy. GEF would strongly recommend that:
   • Carbon emission targets should be set, as is the case in Woking, so as to set the framework for at least an 80% reduction in emissions by 2050. This requirement is set in law as a result of the Climate Change Act, 2008.
   • GEF believe that the performance against these emissions reduction targets should be monitored annually and action taken to ensure that the overall targets are achieved.

1. GEF welcomes the additional support on page 113-14 in respect of energy efficient CCHP systems.

Biodiversity. Clause 4.6.33 on page 134 of the Plan has been amended to state that:

“A positive approach to the provision and maintenance of Green Infrastructure is crucial to the maintenance, protection and enhancement of biodiversity and wildlife in the borough, not least through the provision creation of new habitats and by linking providing connections between existing habitats. It can further assist in adaptation to climate change by providing pathways for species dispersal and migration, climate change adaptation through providing the cooling effects of tree cover, and in the natural management managing of fluvial flooding, for example, through floodplain re-connection and restoration, provision, connectivity and which can also result in the creation of new wetland habitats.”

GEF agrees with these changes, but GEF would recommend that, additionally:

• The words “….without any one dominating over the others” should be added at the end of the new definition in clause 4.1.2a.
• In clause 4.5.20 the words “replace 110 litres/person/dayl” should be replaced by “less than 110 litres/person/day using fittings approval”. The evidence base for this alteration is the Gov.UK Approval Document G 2016 updates.
• In clause 4.6.28,
• At the end of clause 4.5.28a, we consider that the words “any CHP system should also help address power security system limitations in the town centre” should be added at the end of this new clause.
• After the word “restoration” in clause 4.6.33 that the words “and for retaining water for longer in upper catchment areas” should be added.
• In the next clause 4.6.34, the last sentence should be modified to “which is indicative of how much richer in wildlife the borough could become”. The evidence base for this is The State of Surrey’s Nature, published by the Surrey Nature Partnership 2017.
• We are pleased to note that GBC are “Planning a Green and Blue Infrastructure Planning Document
• The Council should immediately start developing a “Biodiversity and Green Infrastructure Strategy and Action Plan” for the period to 2034., which is much more specific in its aims than the draft Countryside Vision published in April 2017.
• The Council should appoint a Councillor with the title “Portfolio Holder for the Environment, Wildlife and Sustainability and Chair of the Council’s Climate Change Working Group”.

GEF believe that the recent publication of the Surrey State of Nature Report shows that Guildford should plan for a net gain in biodiversity and not accept the significant declines that were recorded in The Second State of Nature Report for the
UK which was published recently. This shows that over the past 50 years, 56% of our species have declined and that 15% of those assessed are at risk of national extinction. The UK has lost more nature than the global average: we are now one of the most nature-depleted countries in the world. As an affluent town, Guildford should be leading the way and thus ensuring that the Borough is a better place to live in 2034 than it is now.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID:  pslp17q/123  Respondent:  17256513 / Guildford Environmental Forum (Adrian Thompson)  Agent:  

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire):  (Yes)

1. The Sustainability Appraisal (June 2017). This document seems to us to be adequate, up-to-date and relevant.
2. The Environmental Sustainability and Climate Change Study (updated 19.06.2017), although in many ways a very useful summary, it is somewhat out of date. We note that this Study contains very little new data since 2014 and that much of the evidence (see pages 43 to 46) dates back to 2007 to 2010. It refers on page 12 in clause 3.17 to new technical standards that will be introduced (ie in the future) in 2015. We do, however, agree with the substance of the Executive Summary of the report (even though based on evidence that may well be much more serious if it were based on more recent data):

   • Guildford Borough has higher carbon emissions than any other Surrey Borough (para 4.15 on p.18), mainly as a result of high road transport emissions.
   • Guildford Borough's carbon emissions in respect of household energy consumption exceed even those of Scotland, where the climate is much cooler (para 4.33) on p 22.
   • Small scale renewable energy production is lower in Guildford Borough than other parts of the UK (clause 4.42 on page 24).
   • Our water consumption is very high compared to England and Wales, while availability is low (clause 4.46 on page 25.
   • The potential for extreme climate change, and the possibility that change may come quickly, as the 2020s projections show, means Guildford will need to make plans for adaptation to begin in this plan period (Clause 5.13 on p. 29).

3. Surrey State of Nature Report. This valuable 32 page document has been produced by Surrey Wildlife Trust on behalf of the Surrey Nature Partnership in 2017. We have found no reference to it in the Local Plan 2017, but we believe that the update on biodiversity that it contains, should be taken account of in the 2017 Local Plan. In its conclusion it states that “We are entering a new phase and scale of development to deliver housing and related infrastructure across the county. Our resources will be stretched ever tighter to ensure these proceed as sustainably as possible, by incurring no further losses to Surrey’s biodiversity but instead offering opportunities that result in a genuine net gain”. GEF would recommend that pages 24 and 25 of this Report, which discuss the importance of “Natural Capital”, should be incorporated by GBC in the Guildford Local Plan. We note that the Surrey Nature Partnership plan to produce a “Natural Capital Investment Plan” in 2017 and would recommend that GBC consider this seriously in implementing the Guildford Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: pslp172/1361  Respondent: 17256577 / Tina Makin  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A34

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to removal of Brownfield site (A34) from the Plan

Site A44 in Broadford Business Park has also been removed. This is another brownfield site that has already been developed. The Council’s claims to “have adopted a ‘brownfield first’ approach” (page 5) but this is clearly not the case, and is contrary to national guidelines.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/1360  Respondent: 17256577 / Tina Makin  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1363  Respondent: 17256577 / Tina Makin  Agent:
I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

Attached documents:
The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. *The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, ... (site allocation A25) [ than the Burnt Common site did ]”*
2. *The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”*

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1358 Respondent: 17256577 / Tina Makin Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become *even more* biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the11350 homes proposed in the Plan, 40.6% (4613) are within *3 miles of Send Marsh*, most of them on Green Belt. This is *grossly unfair* on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1359 Respondent: 17256577 / Tina Makin Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A50

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Plan is self-inconsistent in respect of traveller sites. A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots ...” Clearly A50 more than covers the total “need” of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/1362  Respondent: 17256577 / Tina Makin  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects:

i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!), and

ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says: Off-site provision or *payment in lieu* is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. That has now been removed, thereby accepting that needing to make greater than normal profit is to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object removing Send Business Park from the Green Belt (4.3.15).

Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it's insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

Clockbarn Nursery, Tannery Lane, Policy A42
I object to the Policy A42 change at Clockbarn in Tannery Lane because:
• The increase to 60 homes in place of 45 homes is 33% more and is already too much
• It ignores all the thousands of previous objections made by local people that live in Send
• It will worsen access and traffic problems in Tannery Lane and at the A247 junction
• It will make erosion of the Green Belt in our village worse
• It will make surface water flooding, which is already bad, even worse
• It will impact open countryside views from the River Wey Navigation
• The local school and doctor’s surgery are already at capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Garlick's Arch, Send Marsh, Policy A43.
I object to the Policy A43 change at Garlick's Arch because:
• It ignores all the thousands of previous objections made by local people
• There is no proven demand for Travelling Showpeople plots in this location and is not wanted
• It is beautiful permanent Green Belt and no "exceptional circumstances" exist
• It will cause over-development of our village and the number of homes is hugely excessive
• It is exquisite ancient woodland that existed at the time of Elizabeth 1
• It will join up Ripley and Send and defeat the key purpose of Green Belt
• It is subject to frequent flooding and is currently a flood zone 2 allocation
• It is contaminated by lead shot accumulated over fifty years
• It will generate excessive traffic that will block up the local roads even more than already does of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
Land at Burnt Common, London Road, Policy A58.
I object to Policy A 58 at Burnt Common because:
• It was deleted from the 2014 draft because of all the objections made previously
• The word "minimum" is a change from the previous "maximum" in the 2016 plan and since that time there has been a decline in demand for industrial land
• There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
• The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt
• The impact on small surrounding roads will create traffic gridlock
• It will join up existing villages and defeat the purpose of the Green Belt

Answer (if comment is on questions 1-7 of the questionnaire): ()

It is vital that stringent measures are put in place to ensure that infrastructure improvements precede all new development. I feel that the GBC plans are still too weak. Infrastructure changes must be viewed borough wide and not in isolation. Our village of Jacobs Well already suffers from unacceptable traffic congestion (leading to delays), high air pollution levels, noise pollution and rat runs. The development of SARP, Wisley and Gosden Hill could place an unacceptable burden on the A320, Clay Lane, Jacobs Well Road and our village of Jacobs Well unless appropriate measures are taken. Flooding, both surface water and fluvial, is also an issue in our area which needs to be addressed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although GBC have added some additional verbiage aimed at protecting villages re infilling, I do not feel this goes far enough. Development in the villages should be appropriate in scale and have no unacceptable effect on the occupants of existing buildings. This has not always been the case with previous infilling developments which have been accepted in Jacobs Well. I also feel that the data source, with regards monitoring, should also be planning applications, not just planning appeals

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although I welcome the fact that flow routes will be considered as part of any Flood Risk Assessment, I am still totally opposed and object to any development on flood plains. Jacobs Well suffers from flooding, being close to the zone 3b floodplain near Burpham Court Farm where a major road development, The Clay Lane Link Road, is still under consideration. With town centre and SARP development going ahead (and related flood risk mitigation), plus climate change (and the increased potential for flash storms), to ensure risk to properties is only once per 100 years, the Burpham Court Farm zone 3b flood plain is therefore even more important in reducing the risk of flooding in Jacobs Well and must be preserved as is and not developed upon.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

It is vital that stringent measures are put in place to ensure that infrastructure improvements precede all new development. I feel that the GBC plans are still too weak. Infrastructure changes must be viewed borough wide and not in isolation. Our village of Jacobs Well already suffers from unacceptable traffic congestion (leading to delays), high air pollution levels, noise pollution and rat runs. The development of SARP, Wisley and Gosden Hill could place an unacceptable burden on the A320, Clay Lane, Jacobs Well Road and our village of Jacobs Well unless appropriate measures are taken. Flooding, both surface water and fluvial, is also an issue in our area which needs to be addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I support the additions that state that any new developments must take into account the impact on air quality, noise and the environment.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Although GBC have added some additional verbiage aimed at protecting villages re infilling, I do not feel this goes far enough. Development in the villages should be appropriate in scale and have no unacceptable effect on the occupants of existing buildings. This has not always been the case with previous infilling developments which have been accepted in Jacobs Well. I also feel that the data source, with regards monitoring, should also be planning applications, not just planning appeals

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although I welcome the fact that flow routes will be considered as part of any Flood Risk Assessment, I am still totally opposed and object to any development on flood plains. Jacobs Well suffers from flooding, being close to the zone 3b floodplain near Burpham Court Farm where a major road development, The Clay Lane Link Road, is still under consideration. With town centre and SARP development going ahead (and related flood risk mitigation), plus climate change (and the increased potential for flash storms), to ensure risk to properties is only once per 100 years, the Burpham Court Farm zone 3b flood plain is therefore even more important in reducing the risk of flooding in Jacobs Well and must be preserved as is and not developed upon.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed new homes figure of 654 per annum. Although reduced from 693 the JWRA feel that such a high level of housing cannot be justified, particularly in the light of the new economic situation. I also feel that the figures are based upon erroneous growth assumptions.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to policy A42 change as the increased number of homes proposed for the Clockbarn nursery site fails to account for the previous objections to the original 45 houses proposed for this site. I am concerned that it will have a significant negative impact upon traffic along tannery lane and, in particular, the junction between tannery lane and the A247. I am also concerned that this development is will negatively impact upon the Wey Navigation, as it will impede what are currently open countryside views protected by the Greenbelt.

I object to the proposed changes to policy A43 as it takes no account of the many objections to this development made in the response to the 2016 draft Local Plan. I have seen no evidence of demand for plots for travelling showpeople at this site and I also do not see that there are any ‘exceptional circumstances’ that would justify development on the Green Belt at this location. The total number of homes proposed is very high considering the overall size of Send village without any planned increase in infrastructure necessary for such a development. It also seems likely to join Send and Ripley, thereby directly going against one of the key purposes of the Green Belt. I am also concerned about the impact of this number of homes upon the local traffic system.

I object to Policy A58 as this policy was deleted from the previous draft plan of 2014 due to the number of objections received and its inclusion now seems like a cynical attempt to ignore past concerns with the plans. I especially object to the change from ‘maximum’ in the 2016 Local Plan to ‘minimum’ as this will lead to the development of far more industrial capacity than is supported by the 2017 Land Need Assessment survey that indicated that the whole Borough needs under 4 hectares of industrial land and this proposal is for at least 10 hectares of development at Send, when there is also underutilised industrial units in Slyfield and Guildford that should be the primary site for development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that seeks to maintain a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

a) The Street in Tongham
b) A331/A323 intersection
c) A31 /White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. Attached documents:
Policy P3 - Countryside

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road
- 4.3.29 Amend: "Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough's second largest urban area. Given its relative sustainability, Countryside to the south and east of the urban area within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development."
- 4.3.30 Amend: "We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green."
- Policy P3 Amend: (1) (c) should be amended to read "does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

4.3.29 Amend: "Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough's second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development."

4.3.30 Amend: "We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green."

Policy P3 Amend: (1) (c) should be amended to read "does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot."

Attached documents:
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should include the provision of a green buffer that maintains a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

- Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

- Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

- Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. “Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

Attached documents:

Policy P3 - Countryside

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road
• 4.3.29 Amend: "Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough's second largest urban area. Given its relative sustainability, the Countryside to the south and east of the urban area within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development.”
• 4.3.30 Amend: "We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green.”
• Policy P3 Amend: (1) (c) should be amended to read "does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A43 change at Garlick’s Arch because of the following reasons...

- There were thousands of previous objections made by local people, which are being totally ignored
- It will bring about over development of my village, and join up Send and Ripley thereby defeating the main purpose of the Green Belt
- It is ancient woodland which is subject to frequent flooding. Living as I do, only a couple of hundred metres from the site, and having already suffered major flooding in 2000 requiring me to move out of my property for 6 months, I am vehemently against any development within the immediate area which would potentially upset the fragile status quo.

I would like to state that I am not against all new build policies – I have children in their twenties who need homes and recognise the need to increase the housing stock. However, this development needs to be within current village boundaries, and in areas where School and Medical provision is adequate. Wisley Aerodrome is a site which makes total sense to me, due to the location near the A3/M25 and the fact that it is already mostly covered in concrete.

Please take the views of those who live locally into serious consideration!

I am writing to support the removal of A46 and A47 from the local plan, because having lived in Normandy for 12+ years, I don't believe that the roads, sewage and power could deal with 1150 more houses. In the past few years, we have seen an increase in traffic and road problems, we have power cuts sometimes for days at a time and the area suffers flooding.

We moved here so that we could experience a slightly less hectic life with green fields and village atmosphere, but slowly bit by bit that is being lost with the closing of 2 village pubs and the threat of our green belt being bulldozed over. Stupidly we had assumed that being in green belt would offer us a level of protection from future developments......

Whilst writing I would also like to say how bewildering it is to find random patches of land taken over by the travelling community without any recrimination.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I oppose object building homes on Guildford road. Northern end of Glaziers lane. Flexford. Walden cottages and palm house nurseries traveller site.

I also want to see the removal of site A46 - 1100 homes and school.

Removal of site A47 - 50 homes

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should include the provision of a green buffer that seeks to maintain the sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”
Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

a) The Street in Tongham
b) A331/A323 intersection
c) A31 /White Lane junction

Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P3 - Countryside

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road
- 4.3.29 Amend: "Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough's second largest urban area. Given its relative sustainability, a Countryside to the south and east of the urban area within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development."

Page 2204 of 2988
• 4.3.30 Amend: "We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green."

• Policy P3 Amend: (1) (c) should be amended to read "does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

4.3.29 Amend: "Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough's second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development."

4.3.30 Amend: "We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green."

Policy P3 Amend: (1) (c) should be amended to read "does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

1. I am concerned that despite an increase in traffic on the A3100 Burpham slip road of 15% since 2013 (per DoT Traffic count information) no consideration has been made of identifying a baseline air quality in the corner of land bounded by the A3 and the A3100 slip road. There is one primary school in this area and intensive residential housing in the area but no evidence that any air monitoring, or detailed modelling has or will been done there. There are currently stationary traffic jams every week day morning and afternoon and now at the weekends, particularly when Aldi is busy, yet your own Air quality assessment states that there are no sensitive receptors along the London road which is used to justify that ‘- Section 5.2.1 of the report:

"On London Road, where the largest changes in flows are anticipated, there are no air quality sensitive receptors located along the road, therefore significant adverse effects on air quality are not anticipated."

How can there be no sensitive receptors along the A3100 coming away into Guildford form the A3 - there are homes next to the road?

In terms of evidence this is significant flaw in accuracy and therefore conclusions with regard to air quality impacts in this area.

2. Further to this the in the Strategic Highway Assessment Report paras 4.7.7, 4.7.8 and 4.11.4 the traffic impact assessment of differing scenarios - Do nothing through to Scenario 5 show that there will be significant problems at the
A3100/B2234 roundabout under all scenarios which is then not addressed anywhere - implies the main route for new residents at the Gosden Hill strategic site travelling into Guildford, existing residents, anyone coming onto Guildford southbound along the A3 and those coming into Burpham to use the proposed new southbound A3 on-slip will be stuck at that roundabout, exacerbating existing issues already prevalent there on a daily basis.

So evidence is available to show that problems with traffic will occur in the Burpham area but there is no attempt to mitigate this and no discussion of potential air quality impacts.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp17q/48  Respondent: 17276289 / Tom Newton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 2: Legal Compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Given:

1. rapidly increasing traffic flows (15% increase since 2013 per DoT Traffic count data) on the A3100/A3 southbound off slip and
2. increasing congestion now prevalent causing regular traffic jams in the area and
3. lack of clarity that the combined impact of the Jacobs Well link road and the local plan together are being considered and
4. no current air quality monitoring in the area and
5. no intention to perform any modelling of air quality around the A3/A3100, an area including a Primary school and intensive housing now and
6. no plan for detailed air quality modelling of the impact of yet more traffic in the area, as identified in the Strategic Highway Assessment report, as the Local plan developments are delivered

the Council will not be able to demonstrate it has met its duty to adequately assess Air quality impacts of the Plan in this area. As such I believe the Plan will be subject to legal challenge incurring extended time delays and cost in its delivery.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp17q/49  Respondent: 17276289 / Tom Newton  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not believe that the plan is sound specifically because

1. whilst evidence identifies significantly increased traffic levels in the Burpham area nothing has been shown to mitigate this

2. with minimal on non-existent current air quality monitoring, air quality impacts are not adequately assessed in the Plan. It cannot be determined what current pollution levels there are now and what the impact of the plan will be in the future, particularly with regard to the Burpham area

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In view of flawed new evidence, Guildford’s proposal for more than 12,426 homes (plus a buffer of 1,155 homes) is excessive and will result in needless loss of Green Belt and green character, and increased congestion, that cannot be justified in our heavily constrained borough.

There is evidence Guildford’s population growth is overestimated by about 40% because of under-recording of students leaving at the end of their studies.

If the Council fails to apply Green Belt protection or constrain expansion to reflect widespread, legitimate environmental and transport constraints, the 2017 Plan will cause harm to the qualities that underpin the economic success of Guildford and aggravate congestion.

Allocating too much land for development in the 2017 Plan will also result in Guildford being required to provide homes for Woking on our Green Belt which is folly given the constraints in Guildford, a gap town with constricted roads set in the Surrey Hills AONB.

Even taking account of all the proposals in the 2017 Plan, congestion which is already severe is set to get worse over the plan period.

The revised proposal that only 60% of full time Guildford based University students will be provided with accommodation on campus puts unnecessary pressure on housing stock in the town. An 80% target could help by freeing up affordable homes relatively quickly.

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

Correct title of Policy A28 to say Ash Green, and not Ash.

- Policies A27, A28 and A29 collectively increase Ash Green village by 50%. Opportunity exists under Policy A28 to provide a village/community hall and recreational area which would provide Ash Green with much needed community and social space.

Opportunities (1) Should read: "To create a centre for the village by including a village hall with associated recreational space providing much needed facilities for the Ash Green community. A mix of homes (C3) and accommodation for older people (C2) could be appropriate for this site."

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should must include the provision of a green buffer that seeks to maintains a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

- Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

- Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

- Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

  a) The Street in Tongham
  b) A331/A323 intersection

Policy P3 - Countryside

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road
- 4.3.29 Amend: "Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough's second largest urban area. Given its relative sustainability, the Countryside to the south and east of the urban area within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development."
- 4.3.30 Amend: "We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green."
- Policy P3 Amend: (1) (c) should be amended to read "does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

4.3.29 Amend: "Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough's second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development."

4.3.30 Amend: "We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green."

Policy P3 Amend: (1) (c) should be amended to read "does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/1621  Respondent: 17279617 / Virginia Angus  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

I am writing to object to the proposed development of 1,800 homes at Blackwell Farm site (at the foot of the North side of the Hog's Back).

I live in the beautiful village of Compton and I feel very privileged to live here, after having moved from London. Sadly the traffic through Compton, both day and night is horrendous. It is continuous and it has been reported that the levels of Nitrogen Dioxide are consistently above the EU legal limit so any increase in traffic levels through Compton, such as the proposed access road to Blackwell Farm, will make this situation worse. Also, as you know, the site is dependent on a new access road from the A31 Hog's Back to the hospital roundabout at Everton Road, with a new signalised junction on the A31 at the entrance of Down Place, at the top of Down Lane. Compton cannot cope with the traffic as it is. Everyone avoids walking down The Street (the main road through the village) as cars and heavy articulated lorries are too close for comfort.

Also, the Surrey Hills is an Area of Outstanding Natural Beauty. I feel it is my moral duty to protect this beautiful ancient woodland and the wildlife that is dependant on it for our's and for future generations. We are privileged to have such amazing wildlife and beautiful green land, why would you want to destroy this? Something that once done is irreversible. I do not believe that you have considered the long term consequences of your decision. Great, have lots of houses, but what of people's mental health and wellbeing?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
• I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

1. The Street in Tongham
2. The Greyhound Pub roundabout
3. A331/A323 intersection
4. A31/White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. Answer (if comment is on questions 1-7 of the questionnaire): ()

2.13/2.14b Cycle lanes need to be included on footpaths/pavements to avoid the intimidation of car users driving dangerously.

2.15 The poor condition of the roads, ironwork below road level and potholes mean cyclists need to avoid riding close to the kerb. Our son has had to buy new tyres due to frequent punctures and also a complete new wheel again due to potholes. It becomes very expensive to cycle to and from work. In the winter months there is no street lighting once passed The Pines business park until you get passed the Infant School. Cycle lights do not show up all the potholes nor where there is debris on the road, our son ran over a piece of metal one evening in the dark which ripped his tyre to shreds.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

We object your plan for the following reasons:

- In view of flawed new evidence, Guildford's proposal for more than 12426 homes (plus a buffer of 1155 homes) is excessive and will result in needless loss of green belt and green character, and increased congestion, that cannot be justified in our heavily constrained borough.
- There is evidence Guildford's population growth is overestimated by about 40% because of under-recording of students leaving at the end of their studies.
- Allocating more land for development in 2017 plan will also result in Guildford being required to provide homes for Woking on our green belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1) Gosden Hill development of 1700 houses. Reference to a potential link road from the development to the A247. The clear implication is for an access from the development to the A247 with enormous traffic implications for the A247.

2) South bound off- and on- slip roads to service the development and replace the existing off- slip road to Burpham. The only North bound access to the A3 will be via the existing slip road off Clay Lane. (See later, Burnt Common).

3) A 4-entry form secondary school, a primary school, a retail centre and a park and ride for up to 700 cars.

4) When developed, the new employment site at the north side of Gosden Hill Farm (site allocation A25) will be treated as an Office and Research & Development Strategic Employment Site (7000sq.m). This could mean several hundred employees.

Attached documents:

Comment ID: pslp172/1659  Respondent: 17283297 / John Ball  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of
development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are
already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

27. Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1660  Respondent: 17283297 / John Ball  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Burnt Common strategic industrial employment site for light industry, storage and distribution activities. It is to be designated an Industrial Strategic Employment Site which means that it is a preferred site for industrial development including waste management facilities. The site is 9ha which it is stated allows for considerable future expansion. This will generate large amounts of traffic including heavy vehicles on the A247.

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site

2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.

3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The infrastructure proposed is specific to each proposed development and does not address cumulative effects. What would be the case with regard to planning approval if SCC and/or HE do not provide timely infrastructure?

The Plan now calls for nearly all infrastructure to be funded by developers (see APP. C). We question how realistic it is to expect developers not only to pay for all the infrastructure but also to have it in place in a timely fashion. The Plan says that planning permission will be refused if timely provision of infrastructure cannot be secured. Such refusals will almost certainly be settled in the courts. Developers’ business models are based on building and selling houses to create the cash to provide infrastructure. People will be living on the sites well before infrastructure is complete. Will GBC prevent development of Gosden Hill until slip roads etc. are provided off and onto the A3? Again, the infrastructure is site specific and does not address cumulative effects.

If development were to be refused the land would still have been removed from the green belt and its future rendered uncertain.

Residents are being asked to accept very large amounts of development with little or no detail being provided on measures which would relieve existing congestion and limit future problems. The cumulative effects of the developments listed below are certain to have a devastating effect on the A247 through our village (and of course on Send) and it is hard to see how any of the infrastructure proposed in the Plan (APP. C) will do anything to mitigate the effects of these developments on the A247 and hence our village.

All of these developments will draw additional traffic to the A247 through the village. It would be naïve to think that the employment sites and schools will serve only the developments themselves. Apart from the normal movements of residents to and from the new sites there will be considerable additional traffic on the A247 generated by:

- children from elsewhere being delivered to schools and collected
- the employees of the offices and industrial sites getting to work and returning home
- the vehicle movements generated by distribution and storage activities
- traffic from Wisley wishing to travel South and returning
- traffic from Gosden Hill wishing to travel South and returning
- traffic from Slyfield wishing to travel South and returning
- private and commercial traffic originating in the South and accessing Gosden Hill, Burnt Common or the A3 and returning (including traffic from Dunsfold)

The A247 although an A road:

- is less than 2 vehicle wide in places
- does not have continuous footpaths
- has several sharp bends
- has a hump-backed bridge with poor site lines
- has a very difficult junction to access the station
- is largely unlit
- has a primary school
- is already very congested at times

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Non-plan Items– My Objections

12) Surrey County Council’s business plan for Newlands Corner (not referenced in the Local Plan) to attract 100,000 more visitors a year. A significant proportion of these can be expected to use the A247.

13) Waverly B. C. has approved the development of 1,800 homes at Dunsfold which has the potential to feed traffic trying to avoid Guildford, onto the A247 to access the A3 (not referenced in the Local Plan).

Cumulative impact of changes – My Objections

Changes to the Plan have done nothing to alleviate the problems (particularly of traffic and congestion) raised in residents’ previous responses. Indeed it is now clear that the problems will be made much worse. There do not appear to be any changes which would be of benefit to the Clandons and indeed the cumulative effect of what is in the Plan and some external factors not in the Plan will have a much worse impact on the A247 through West Clandon and Send than the 2016
draft. Note that the A247 is the only road over the Guildford to Waterloo railway, North of Guildford that doesn’t involve travelling through the town centre.

**Duty to Cooperate – My Objections**

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

I object to policy A42 change at Cockbarn in tannery lane because:

- I believe it should not take place in the first place, however a further increase in the number of homes is proposed which make the situation even worse
- The traffic in this area is getting worse and especially at the A247 junction
- Green belt land is protected in law and I see no reason that it should be built on.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to policy A43 change at Garlicks Arch because:

- I do not see any exceptional circumstances that should force the erosion of green belt land
- It will remove the 'green belt' between Ripley and Send that is necessary for the survival of our native species such as Hedgehogs
- It will generate further traffic that will clog up the area to the detriment of all those currently living here
- A further 400 homes will put further pressure on local services, which are currently at breaking point; transportation, hospitals, education etc.
- There is no proven requirement for travelling show people plots
- It will spoil the current beauty and openness of the area, which is what attracted my family and I in the first place.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

I object to Policy A58 at Burnt common because:

- It was deleted from the 2014 draft because of all of the previous objections so I cannot understand why it has now been included again
- Industrial and warehousing could not be further from the idea of protected greenbelt land, Slyfield would be the obvious choice for such purposes as it already have the infrastructure and a grouping of similar businesses. This is not a good reason to irrevocably damage our Green Belt.
- I would like to leave my house in the future to my children and I want it to be surrounded by Green Belt land as it is now including all the nature that encompasses
- The word 'minimum' is a change from the previous 'maximum' in the 2016 plan and since that point there has been a decline in the demand for such industrial land
- The 2017 Employment land Need assessment shows a reduction in demand to 3.9 hectares, rather than the massively inflated 10 hectares in send on the green belt

---
- It will join up existing villages and defeat the purpose of the Green Belt

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the revised plan for the Borough and to make my concerns known, in writing. I understand the need for extra housing but the Site A43 Garlicks Arch is on Greenbelt Land. Greenbelt Land has been allocated for a purpose it is important not lose sight of the hugely positive impact having Greenbelt Areas provide to the local environment. The local roads are already hugely congested and run down and cannot cope with any major increases in traffic which will occur with such a large build plan in the local area.

I am also extremely concerned about the inclusion of 6 Traveller Showpeople plots in the area, the number of which is out of scale with the development according to the designated formula.
We need proper consultation on any plans for Waste Management Facilities and the increase in industrial floorspace. Many local people are hugely concerned about many aspects of this plan and the potentially negative impact it will have on our local RURAL environment and our quality of life.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Please be advised that I object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

• disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceeds safe EU limits.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Specifically, I object to Policy A42 change at Clockbarn in Tannery Lane because:

- It will cause extreme congestion at the junction with the A247. Already, at certain times of the day during the working week the whole village is gridlocked. This proposal will only serve to exacerbate the problem
- It will remove greenbelt land which gives the village its ‘village feel’
- It will damage open countryside views from the River Wey Navigation and create an eye sore
- It will risk increasing the likelihood of surface water flooding

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| Answer (if comment is on questions 1-7 of the questionnaire): () | |

I object to Policy A58 at Burnt Common because:

- It seems unfair to resurrect this idea given all the previous objections resulting in it being deleted from the 2014 plan
- With the increased uncertainty caused by Brexit there is an anticipated decline in demand for industrial land in the South East
- The industrial estate in Slyfield and in other parts of the borough have spare sites and excess capacity
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not the proposed huge allocation of over 10 hectares at Send – and in the Green Belt
- Once again, the impact on congestion will be significant

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the proposal to inset Send Business Park from the Green Belt (Policy 2 at paragraph 4.3.15) because:

- It is effectively an old non-conforming user in an area of outstanding natural beauty which will be lost forever with consequent impacts on the quality of life of future generations
- There is highly restricted vehicular access along Tannery lane – in both directions
- Once again, it eliminates the openness of the Green Belt and is inappropriate

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to object to the limited changes and raise our continuing concerns regarding your weakly amended 2017 plan for the Horsleys. It appears that GBC are continuing to fail to listen to the voice of the local communities and their very valid concerns.

At this point these centre around, but are not limited to, the four housing development sites which remain in your plan.

We have viewed the plans and would like you to recognise that the 30,000 objections to your 2016 plan appear not to have been listened to, as there is little evidence that the current plan reflects local community views.

I look forward to hearing that GBC have finally listened to the objections lodged during the public consultation period which is indeed why we assume the process exists.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send Marsh/ Burnt Common

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
With reference to the planned developments in and around Send Village.

1. I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford.
2. I object to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded.
3. I object to the exaggerated “housing need” figure of 13,860 which is far too high and results in the completely unnecessary development of the Green Belt. The way students, economic need and affordability are calculated inflates the housing need.
4. I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban brown field areas much closer to existing transport hubs.
5. I object to the proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day.
6. I object to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/M25.
7. I object to all the proposed sites in Send because they were not included in the previous consultation in 2014. Unlike the rest of the borough Send has not been properly consulted and all its sites have been changed substantially.
8. I object to the development at Garlic’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.
9. I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.
10. I object to the development at Garlic’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.
11. I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.
12. I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.
13. I object to the large proposed development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.
14. I object to the fact that infrastructure requirements have not been properly considered and are inadequate to deal with proposed housing levels. Roads, doctors and schools will be unable to cope.
15. I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.
16. I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- It ignores the hundreds of previous objections made by local people
- It will cause terrible traffic problems along SINGLE TRACK Tannery Lane, and at the junction with Send Road (A247)
- It will further (and unnecessarily) erode the Green Belt
- It will make surface water flooding, which is already bad, even worse
- The increase to 60 homes from 45 homes is opportunistic.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to the Policy A43 change at Garlick’s Arch because:

- It ignores the THOUSANDS of previous objections made by local people
- There is NO PROVEN DEMAND for Travelling Show-people plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our villages and the number of homes is excessive
- It is liable to frequent flooding and is currently a flood zone 2 allocation

- It is glorious ancient woodland that has existed from the time of Elizabeth 1. It is vandalism of the greatest order to demolish an area of such wonderful heritage.
- It will join up Ripley and Send and defeat the key purpose of Green Belt

**Attached documents:**
It is contaminated by lead shot accumulated over fifty years

It will cause massive traffic congestion that will block the local roads of Send and Ripley

It will ramp up (already unacceptably high levels of) air pollution

It does not address the problem of inadequate infrastructure – roads, schools, medical facilities – AS REQUIRED BY LAW

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object to Policy A 58 at Burnt Common because:

   It was deleted from the 2014 draft because of all the objections made previously

   The word “minimum” is a change from the previous “maximum” in the

2016 plan and since that time there has been a decline in demand for industrial land

   There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units

   The 2017 Employment Land Need Assessment shows a REDUCTION in demand to 3.9 hectares for industrial land for the WHOLE BOROUGH, not a huge over allocation of 10 hectares at Send in the Green Belt

   The impact on small surrounding roads will create traffic GRIDLOCK

   It will expose local residents to illegally high levels of air pollution

   It will join up existing villages and defeat the purpose of the Green Belt

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A10: Land for Sustainable Movement Corridor Town Centre Phase 2, off Walnut Tree Close, Guildford

Network Rail are currently working closely with Guildford Borough Council to specify and remit a study that will look at all railway land requirements around Guildford to ensure that sufficient land is available to provide the infrastructure to meet growth and demand on the railway (potentially in the form of additional platform capacity).

This study will help to ascertain the land available for development and is an important example of how Network Rail is working closely with our stakeholders to identify land that can be utilised to meet the needs of the railway and the wider community.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A7: Land and buildings at Guildford railway station, Guildford

This site has previously been included in the Solum property development scheme at Guildford and is currently on hold while the appeal process is carried out following planning permission being denied.

Any plans to develop the site should take account of railway requirements relating to the station building and the need for it to be able to accommodate future growth in passengers. In addition any proposals should also address the permeability of the site from east to west via the footbridge.

Network Rail are developing a scheme to provide a Platform 0 on the east side of the station so it is important that any proposed development does not prevent this scheme from progressing once funding is available.

Network Rail are currently working closely with Guildford Borough Council to specify and remit a study that will look at all railway land requirements around Guildford to ensure that sufficient land is available to provide the infrastructure to meet growth and demand on the railway (potentially in the form of additional platform capacity).

This study will help to ascertain the land available for development and is an important example of how Network Rail is working closely with our stakeholders to identify land that can be utilised to meet the needs of the railway and the wider community.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A8: Land west of Guildford railway station, Guildford Park Road, Guildford

This site has strong links to Policy A7, particularly in respect to ensuring permeability across the station between east and west sides via the footbridge. As noted in the Local Plan this land has a number of operational uses that will need to be consider in any decision on allocating this site for development.

It should also be noted that the land included in this site could have potential future railway use for additional platform capacity to meet future demand and growth at the station.

Network Rail are currently working closely with Guildford Borough Council to specify and remit a study that will look at all railway land requirements around Guildford to ensure that sufficient land is available to provide the infrastructure to meet growth and demand on the railway (potentially in the form of additional platform capacity).

This study will help to ascertain the land available for development and is an important example of how Network Rail is working closely with our stakeholders to identify land that can be utilised to meet the needs of the railway and the wider community.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Network Rail is the statutory undertaker responsible for maintaining and operating the country’s railway infrastructure and associated estate. Network Rail owns, operates, maintains and develops the main rail network. This includes the railway tracks, stations, signalling systems, bridges, tunnels, level crossings, and viaducts.

Could you please ensure that the following comments are taken into account and included within the preparation of your forthcoming Local Plan:

Development proposals affecting the safety at level crossings are an extremely important consideration for Network Rail. As you will be aware the Local Planning Authority have a statutory responsibility under planning legislation (Schedule 5 (f)(ii) of the Town & Country Planning (Development Management Procedure Order 2010) to consult the statutory rail undertaker where a proposal for development is likely to result in a material increase in the volume of a material change in the character of the traffic using a level crossing over a railway.

Included below are sections from the House of Commons - Transport Committee - Eleventh Report - Safety at level crossings printed on the 24th February 2014.

The House of Commons - Transport Committee - Eleventh Report - Safety at level crossings states:

“Level crossings are a significant source of risk on the UK’s transport networks. Although the number of accidental deaths at level crossings has decreased in recent years, nine people died in 2012-13. Every one of those deaths was a personal tragedy which could have been averted. We recommend that the Office of Rail Regulation (ORR), which is responsible for rail safety, adopt an explicit target of zero fatalities at level crossings from 2020.”

“7. Level crossings are places where footpaths, bridleways or roads cross railway lines at the same level. Network Rail manages approximately 6,500 level crossings on the commercial rail network, and there are a further 1,500 crossings on heritage, industrial and metro railways. There are two general types of crossing: active crossings, which provide warnings or protection when a train is approaching, and passive crossings, which do not. Active protection may be automatic, or may require a signaler, driver or crossing keeper to perform certain actions. Passive crossings rely entirely on the user for their safe operation.”

“12. There are significant safety risks associated with the different forms of level crossing. Of Network Rail’s 6,500 crossings, 76% are passive crossings, which do not offer any warning of an approaching train (see Table 1). The decision on whether it is safe to cross is left to the user.”

In the recent report ‘Level Crossing Safety’ issued by the Transport Select Committee (Para 1 Pg 35) the following was stated that may be of use:- “Analysis of Network Rail and Department for Transport data shows that if an average walking trip includes a level crossing, the fatality risk to a pedestrian is about double the risk of an average walking trip without a level crossing.”

In relation to co-operation between railway operators, highway authorities and planning authorities:

“31. Local authorities must work with Network Rail and other railway operators to help keep level crossings safe. For example, local authorities’ plans for promoting walking and cycling routes that traverse level crossings can have a direct effect on safety at those crossings. However, the Association of Directors of Environment, Economy, Planning and Transport told us that liaison between Network Rail and local authorities is variable…Network Rail has highlighted a number of examples where local authorities have imposed planning obligations on developers, to help fund Network Rail’s construction of footbridges… However, in some cases planning authorities have consented to large developments and changes in road layout without due attention to the increased risk at nearby level crossings… In its report into a fatal accident at the Kings Mill No. 1 crossing near Mansfield, the RAIB (Rail Accident Investigation Branch) criticised the local authority for establishing a walking and cycling trail without discussing the likely impact on the usage of a level crossing with Network Rail.”

“32. Railway operators are already statutory consultees where proposed development is likely to result in a material increase in the volume or character of traffic using a level crossing…The Law Commission's proposal for broader statutory duty of co-operation on railway operators, traffic authorities and highway authorities in respect of level crossings is a sensible suggestion….However, in the case of footpaths, private crossings or unadopted roads (which are not maintained by
the highway authority), there is a case for adding planning authorities to that list….We welcome the duty of cooperation on railway operators, traffic authorities and highways authorities in respect of level crossings but recommend that it should also encompass planning authorities so that the impact of additional numbers of people using level crossings can be considered.”

We believe that proposals that impact upon level crossings should include S106 or CIL contributions to mitigate the impacts of those developments. Wherever possible Network Rail will seek closure of level crossings, and either replacement with a footbridge or inclusion of a diversionary route. We believe that S106 developer contributions should be used to fund footbridges and where this is not possible developer contributions should be used to fund any mitigation works at a level crossing as a result of increased type or volume of user. As Network Rail is funded by public remit we believe it is unreasonable to expect Network Rail to fund mitigation measures on railway infrastructure as a result of third party commercial development. We believe that the above comments should be integrated as policies within the Local Plan. Planning obligations for railway infrastructure should be included in the same manner as planning obligations for highways, local facilities etc. as developments can impact the railway and developer contributions should be levied to mitigate such impacts.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Clockbarn Nursery, Tannery Lane, Policy A42

*Now 60 homes in place of 45 homes previously*

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The increase to 60 homes in place of 45 homes is 33% more and too much
- It ignores all the **hundreds of previous objections** made by local people
- It will worsen access and traffic problems in Tannery Lane and at the A247 junction
- It will make erosion of the Green Belt in our village worse
- It will make surface water flooding, which is already bad, even worse
- It will impact open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Land at Garlick's Arch, Send Marsh, Policy A43.

*Now 400 homes and 6 Travelling Showpeople plots*

I object to the Policy A43 change at Garlick's Arch because:

- It ignores all the *thousands of previous objections* made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth 1
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

Land at Burnt Common, London Road, Policy A58.

*Now a new allocation for a minimum of 7,000 sq m of industrial or warehousing*

I object to Policy A 58 at Burnt Common because:

- **It was deleted from the 2014 draft** because of all the objections made previously
- The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land
- There is no need to build industrial or warehouse development **in the middle of the Green Belt** when Slyfield and Guildford still have **empty** sites and industrial units
- The 2017 Employment Land Need Assessment shows a **reduction** in demand to 3.9 hectares for industrial land for the whole borough not a **huge over allocation of 10 hectares at Send in the Green Belt**
• The impact on small surrounding roads will create traffic gridlock
• It will join up existing villages and defeat the purpose of the Green Belt

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Belt, Policy 2 at paragraph 4.3.15

Send Business Park now taken out of the Green Belt altogether

I object to the proposal to inset Send Business Park from the Green Belt because:

● It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
● There is highly restricted vehicular access along Tannery Lane in both directions
● Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Ash and Tongham

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ) , is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire):()

I am writing to object to the proposals to move this part of Ash Green into the Tongham ATUA. I believe like many others that the location around Ash Manor, including its fields and historic buildings are part of the character of Ash Green. This will be lost if the area boundary is moved to include us in the tongham ATUA with its plans for 17

I fully agree with the the amendment which states that thought instead should be given to protecting the intrinsic character of Ash Green, preserving the role it plays in maintaining the separate identity of Ash, Ash Green, and Tongham. In particular I feel that the provision of a green buffer separating the new development and the properties fronting onto Ash Green rd, Foreman rd, and White Lane will do much to preserve the rural character of Ash Green.

There is concern also that not enough thought has been given to the protection of the Ash Manor site itself which is of considerable heritage importance. In particular views of it from the approaches from White Lane must be preserved.

Further concerns over how the transport infrastructure needed for these new developments is to be implemented should be addressed, namely The Street in Tongham, and the A331/A323 intersection, and also the A31/White lane junction. Until these are resolved there should be no development on A29 permitted.

My view then in regard to these concerns is that Ash Green must not be included in the Ash & Tongham Urban Area, and therefore that the ATAU boundary must not extend south of Ash Green road and Foreman road.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The fundamental traffic problems around the Surrey Hospital, Research Park and through into Guildford town centre are essentially choking business in the area and driving people out … we are one such company happy to be leaving! This “proposal” to develop the area further, will only serve to exacerbate an already poor situation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to Policy A42 change at Clockbarn in Tannery Lane for the following reasons:

The increase to 60 homes is excessive especially as I consider 45 is too many!!

It ignores all the many previous objections raised by the local people

It will serious worsen access and already unacceptable traffic problems in Tannery Lane and at the A247 junction

It will make erosion of the Green Belt in Send village worse

It will make surface water flooding a more serious threat than it is at present

It will impact countryside views from the River Way Navigation and will greatly affect the treasured wildlife

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy A43 change at Garlicks Arch because:
It ignores all the thousands of previous objections made by local people
There is no proven demand for Travelling Showpeople in this location which would seriously adversely affect the value of nearby properties
It is beautiful permanent Green Belt and no exceptional circumstances exist
It will cause serious implications to the village and the number of proposed homes is excessive as our schools are already stretched to their capacity
It is exquisite ancient woodland and should always be preserved
It will join up Ripley and Send and defeat the key purpose of Green Belt
It is already subject to frequent flooding and is currently a flood zone 2 allocation
It is contaminated by lead shot accumulated over more than 50 years
It will generate excessive traffic that will block up the local roads of Send and Ripley which are already at an unacceptable level

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1811  Respondent: 17288289 / Ken Grainger  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

I object to Policy A58 at Burnt Common because:
It was deleted from the 2014 draft because of all the previous objections
The word "minimum" is a change from the previous "maximum" in the 2016 plan and since then there has been a decline in demand for industrial land
There is definitely no need to build industrial or warehouse development in the middle of the Green Belt when both Slyfield and Guildford still have empty sites and industrial units
The 2017 Employment Land Need Assessment clearly shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt

The impact on small surrounding roads will create a more serious and unacceptable traffic gridlock

It will join up existing villages and defeat the purpose of Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Namely that it is unacceptable that the Local Plan is still proposing to “inset” East Horsley from the Green Belt. Plus changes in settlement boundaries mean the East Horsley settlement area will increase by 37% and include most roads south of the A246. This will cause huge congestion, pollution, danger, increased crime etc that will irreparably destroy what is a very pleasant part of the world for young families, older generations and young people to live.

Development of 100 homes is still proposed near Horsley Station - the trains are already overcrowded, this area is already very heavily populated, and poorly maintained, this will only serve to extend 'suburbia' into Horsley and increase danger to current locals.

This part of Surrey is reaching overcrowding levels with people being granted permission to build multiple properties on what were standard sized gardens without a new village being placed in the area. And then move on tax free. As you know around 57% of all new housing in the Local Plan is on land presently Green Belt, his has to be unsustainable and driven only by unnecessary greed, there must be other areas of Surrey and the UK where this is more appropriate. While the ONS forecasts population growth for Guildford at 10.4% over the Local Plan period, GBC proposes to increase its housing stock by 22% - why is this necessary?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Development of 2,000+ homes is still proposed at the former Wisley airfield site. I can appreciate that this area, not in green but brown belt, would appear ripe for development. And yet these plans will lead to big environmental impacts on traffic, wildlife, local infrastructure and quality of life for current residents. Consider the state of the roads now without increased traffic volumes, lorries etc.. All profits will go offshore, tax free there will be no local benefit financially other than increased council tax payments.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

SITE A43, GARLICKS ARCH

The original proposal has been changed to now include a minimum of 400 houses, meaning that up to 650 houses will be built on this site. In addition this allows for 6 travellers sites with associated mixed use yards and storage. This is greenbelt land and the increase in houses and buildings are harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon. The inclusion of the travellers sites is inappropriate in a rural environment within the greenbelt and there is no identified need.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I believe the addition of at least 12 thousand new homes proposed for the green belt local to Guildford is excessive and unworkable for the environment, community and infrastructure of Guildford. Already the town of Guildford struggles hugely to cope with the number of people driving through its roads. The rush hour currently is horrendous and the whole place frequently descends into chaos if there is bad weather and or an accident. What will life be like with 1000s of more people and their cars!

The roads are congested now, there is not enough parking and Park and Ride is a ridiculous idea as no-one wants to go back and forth on a bus to their car with children and or shopping. After and before work these facilities operate strict opening hours that are unworkable for many.

I appreciate we have to have new homes for people to live in, but building on green belt is not the solution. The local economy will suffer as the congestion will prevent real growth. Our schools and hospitals need expanding more than what is proposed.

[Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I have lived on Send Road for the last 20 years and I have very serious concerns about the changes to the local plan that will significantly impact Send and the surrounding villages.

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The increase to 60 homes in place of 45 homes is 33% more and too much
- It ignores all the hundreds of previous objections made by local people including myself.
- It will worsen access and traffic problems in Tannery Lane and at the A247 junction - there is simply no way this junction can take additional traffic.
- It will make erosion of the Green Belt in our village worse
- It will make surface water flooding, which is already bad, even worse
- It will impact open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the Policy A43 change at Garlick’s Arch because:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- The scale of housing development at the four housing development sites remaining in this Local Plan will put too great a strain on local infrastructure. The approximately 2000 proposed homes at Wisley Airfield will put too great a strain on the local infrastructure. It is not sustainable to build dormitory towns and simply call them sustainable. Shifting to cycling and walking discriminates against vulnerable members of the community - the disabled, those with small children, the very old, or the infirm, or those who are ill. Alternatives impact on already congested roads or over-subscribed peak hour rail services.

Building in and around East Horsley will destroy the culture and fabric of the village. The roads in the village are already congested without the additional new homes and subsequent increased usage. They are generally narrow, with potholes, cracks and other signs of wear. During heavy rains, the drains block and flooding results. The pavements do not run along every road through the village, and where they do, they are narrow and often cracked and uneven. It is a village; it was never designed to support a town.

The local primary school (the Raleigh) is already at capacity, resulting in local children being sent miles from their homes for schooling. In addition, Horsley Medical Centre is at capacity.

The proposals are unsustainable because they do not meet the objective of providing infrastructure to support the new homes. Nor do the proposals take any account of the strongly-held view (30,000 objections) that the Green Belt should be protected.

Answer (if comment is on questions 1-7 of the questionnaire): ()
We strongly oppose the proposed development of the former Wisley Airfield. There are so many problems with this proposal that it is difficult to provide a comprehensive letter of objection.

In summary this is a proposal that, if approved, would place an unacceptable strain on an already overburdened infrastructure, whether schooling, medical facilities, roads, railways, parking and water supplies.

We are in the middle of another drought and the pressure on the water supply infrastructure is intense. The development is also unacceptably close to a prized national asset, the RHS Garden at Wisley. The M25 and A3 are already close to gridlock, as shown by the standstill on both 13 and 14 July.

The ameliorating proposals put forward by the developer in an adjacent planning application are ludicrously inadequate.

Please remove this proposal from the 4th document.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Green Belt Policy 2 at paragraph 4.3.15, to inset Send Business Park as it is effectively an old non-conforming user in an area of outstanding countryside adjacent to the Way Naviation which is so popular with locals and tourists alike. There is highly restricted vehicular access along Tannery Lane in both directions and further expansion or development at this location is inappropriate.

We would like to keep Send as a village where people can thrive and live together without a large influx of further residents and businesses, which is the only reason we moved away from our previous home near Heathrow Airport. We are situated on Send Barns Lane and there is already a high volume of traffic passing our door which we had not anticipated, and we do not want further traffic re-directed along this route either as a short cut from the A3 or to be carrying more heavy lorries and trucks to access and serve businesses in this very small village.

Please do not allow these Local Plans to go through.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/568  Respondent: 17289473 / Mary Warren  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2
Policy 2, Paragraph 4.3.15  Removal of Send Business Park from the Green Belt. As already stated in the above objection, Tannery Lane is a narrow winding road completely unsuited to large HGVs. Already they cause considerable traffic problems and any increase in their number along this road will bring traffic to a standstill both in Tannery Lane and at its junction with the A247. The other exit from Tannery Lane is equally difficult and again unsuited to heavy traffic.

In conclusion, Send residents objected strongly to the previous version of the local plan. Despite this, the load on Send has increased. One has to wonder why Guildford Borough Council should single Send out for such over development when there are vacant brown field sites in Guildford and at Slyfield. No changes are proposed to the roads, schools, medical facilities or other essential infrastructure and the result will mean that Send becomes an overdeveloped suburb of Guildford with congested roads and traffic at a standstill pumping fumes into the air and damaging children's lungs. Is this really what they want?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
This area of Send is totally unsuitable for building 60 new homes as access via Tannery Lane from Send Road is very dangerous and the lane itself is narrow. It is also part of the Greenbelt and an attractive area of the village to walk.

I do not understand the need for 7000 sq. m. of industrial buildings or warehousing on this site while there are empty sites and warehousing in Slyfield and Guildford itself. Again this planning proposal is in the area of the Greenbelt and many of the roads around Send and Ripley are narrow and cannot accommodate large lorries or vans.

Comment ID: pslp172/1872  Respondent: 17289729 / Carmel Rogers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongharn and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"
• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a
medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this
heritage asset, including their approach from White Lane, must be protected."

• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable
closure of the level crossing) must be competed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with
the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any
development of A29 is permitted.

a) The Street in Tongham
b) A331/A323 intersection
c) A31/White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of
Ash Green Road and Foreman Road.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Removal of site A46 and site A47 - I support the removal of these sites. The local infrastructure is already struggling to cope - road conditions, accessibility, utility supply, drainage, local healthcare, etc. are all strained. Maintaining the greenbelt and not developing in this location is the right thing to do.

Removal from the Green Belt of homes in Guildford Road, northern end of Glaziers Lane, Flexford, Walden Cottages & Palm House Nurseries traveller site - I object to the removal of these from the Green Belt. The Green Belt is a precious resource and its openness should be protected. There are plenty of other local areas outside of the Greenbelt that could be developed instead.
Development around Normandy generally - the Guildford Road and connecting lanes through Normandy are stretched, particularly at morning and evening times. Further development in the area must be accompanied by improvements to local services and infrastructure. Local schools, healthcare and other facilities, transport (road conditions, Ash railway crossing, etc.) need improvement, and local utilities (power, water, drainage, surface water management, telecom/fibre services, etc.) are all under-capacity and need upgrade if further local development is planned.

Further to the above I wish to object to Clockbarn Nursery, Tannery Lane, policy A42 because:

- a 33% increase in homes from 45 to 60 is simply too much as the local infrastructure cannot cope e.g. access and traffic issues at A247 junction
- surface water flooding, already an issue, will worsen
- continual erosion of the greenbelt.
- it ignores the hundreds of previous objections.

I have been informed about Guildford's proposal for more than 12,426 homes (plus a buffer of 1,555 homes).

I have done some research and have found out that it is excessive and will result into extra congestion which is already severe. There is evidence that Guildford's population growth is overestimated by about 40% because of under-recording of students leaving at the end of their studies so building that many new homes is in fact excessive and will result in needless loss of Green Belt of Guildford.

Please consider this as my objection to the proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/575  Respondent: 17291457 / Bridget Jobson  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In view of new evidence which shows that Guildford’s projections for population growth is flawed and is predicting much higher growth than is likely, PLEASE can you reconsider your plan to build so many homes and especially on Green Belt land. There is evidence that Guildford's proposal for more than 12,426 homes (plus a buffer of 1,155 homes) is excessive and will result in needless loss of Green Belt and increased traffic congestion. It cannot be justified in what is already a highly congested borough.

There is evidence that Guildford’s population growth predictions are overestimated by about 40% because of under-recording of students leaving at the end of their studies.

Please LISTEN to the evidence and re-calculate your projections based on up-to-date evidence.

Once Green Belt land is gone - it is gone for ever. What will you say to your Grandchildren when they ask why Guildford is so busy and congested and horrid to live in?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp173/204  Respondent: 17291521 / Barbara Phillips  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I feel that the villages of Ripley & Send are being targeted by the Local Plan for overdevelopment on Green Belt land, in flood areas, creating even more traffic gridlock when there are other more suitable sites available without destroying communities and creating mayhem on the local roads and surrounding area. I therefore strongly object to the above Policies A43 and A58.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1895  Respondent: 17291521 / Barbara Phillips  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A58
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I also object to Policy A58 relating to Land at Burnt Common, London Road on the following grounds:

- Traffic in the area is already chaotic and the roads are constantly gridlocked with traffic - to create even more cars on the road in this area will only cause utter bedlam and no doubt more accidents. The infrastructure cannot cope with any more vehicles - in particular the larger vehicles used on an industrial or warehouse development.

- There is no necessity for another industrial/warehouse development in a Green Belt area when there are enough industrial/warehouse facilities not being used locally outside of the Green Belt.

- The village of Ripley and Send have a defining boundary and with this overdevelopment it will all merge into one, which goes against the purpose of the Green Belt.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A24

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects:

i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!), and

ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch)

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, ... (site allocation A25) [ than the Burnt Common site did ]”
2. The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan, therefore GBC are not following their own guidelines and objectives.
Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

Comment ID: pslp172/1898  Respondent: 17291553 / James Hitchings  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A50

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan is self-inconsistent in respect of traveller sites.

A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots ...” Clearly A50 more than covers the total "need" of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. That has now been removed, thereby accepting that needing to make greater than normal profit is to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

**I object to the lack of proper infrastructure planning for sites (A43 and A42)**

The Foreword to the plan by Paul Spooner includes on page 5:

> "We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan".

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

**I object removing Send Business Park from the Green Belt (4.3.15).**

Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I also object to Policy A58 relating to Land at Burnt Common, London Road on the following grounds:

• Traffic in the area is already chaotic and the roads are constantly gridlocked with traffic - to create even more cars on the road in this area will only cause utter bedlam and no doubt more accidents. The infrastructure cannot cope with any more vehicles - in particular the larger vehicles used on an industrial or warehouse development.

• There is no necessity for another industrial/warehouse development in a Green Belt area when there are enough industrial/warehouse facilities not being used locally outside of the Green Belt.

• The village of Ripley and Send have a defining boundary and with this overdevelopment it will all merge into one, which goes against the purpose of the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8].
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a].
- adds to air pollution in neighbouring areas, which already exceeds safe EU limits.
- further residential houses in this area will continue to swell the already overloaded peak time traffic on many major roads in the area.
- trains to London from Guildford station are already very over-crowded as peak-time, many times you cannot even get onto the train service never mind trying to get a seat. More people living in the area and using these facilities will further compound the problem.
- public facilities such as schools & leisure centres are currently very busy and over-crowded, significant population rises in the local area will create an overwhelming burden on their resources & facilities.

I cannot emphasise enough the traffic problem that already exists around Guildford in general, many locals have to spend hours stuck in this traffic whilst they attempt to go about their daily lives. In my opinion, there should be no further significant increase in housing in the area until all roads are upgraded to cope with the existing levels of traffic and then a sensible-plan put in place and delivered in order to cope with the expected increase in traffic. This must be Prior-To building any significant further housing, not agreed to on a promise with a developer and then not delivered.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses].” That has now been removed, thereby accepting that needing to make greater than normal profit is to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

I object removing Send Business Park from the Green Belt (4.3.15).

Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for its insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

**Answer (if comment is on questions 1-7 of the questionnaire):**

I object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):**

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

**Comment ID:** pslp172/1967  **Respondent:** 17293025 / Donna Deam  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlick’s Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects:
i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!), and
ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, ... (site allocation A25) [than the Burnt Common site did]
2. The site [A43] provides the employment floorspace needed in the plan to help meet identified needs

Since A58 Burt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites...
(which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

**I object to the proposal for a Waste Management Facility in Green Belt (A58)**

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

I object to your proposals for an increase in the already worryingly high number of homes to be built in Tannery Lane as this would cause unacceptable levels of traffic in this area. I also feel that the proposed development would have a detrimental effect on the Papercourt Nature Reserve which plays an important part in the conservation of birds, animals and plants.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to your plans to increase the development in the Garlick's Arch area particularly as you have shown nowhere in the plan why you feel this development is necessary. The area falls within Green Belt land and, as such, you need to show exceptional need before allowing development to happen. If your proposals are allowed to go ahead it will mean that Clandon .. Ripley and Send simply merge together into one expanse of buildings.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

You have established a need over the entire Borough for eight plots or pitches for Travelling Showpeople to include storage facilities along with housing. Again, this not appropriate use of Green Belt land and furthermore why is 75% of this need included in your plans for Ripley? I object strongly to this unfair allocation.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongharn and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

a) The Street in Tongham
b) A331/A323 intersection
c) A31/White Lane junction

Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. Answer (if comment is on questions 1-7 of the questionnaire): ()

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road

- 4.3.29 Amend to: "Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development."

- 4.3.30 Amend to: "We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green."

- Policy P3 Amend to: (1) (c) should be amended to read "does not lead to greater physical or visual coalescence between the Ash and Tongham urban area. Ash Green and Aldershot."

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/624  Respondent: 17294049 / Genesis Town Planning (Paul White)  Agent: Genesis Town Planning (Paul White)

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( Yes ), is Sound? ( No ), is Legally Compliant? ( Yes )

Answer (if comment is on questions 1-7 of the questionnaire): ()
For a plan to be sound it has to be consistent with national planning policy. However we disagree that policy P2 and its lower case policy explanation at paragraph 4.3.18 fully reflects green belt policy guidance in paragraph 89 of the NPPF.

We act on behalf of Sandiacre Nurseries a local wholesale horticultural grower and have submitted a planning application for a glasshouse development in Guildford Borough in the green belt which is under consideration and pending a decision.

Adopted local plan policy RE2 on green belt does not properly reflect guidance in the NPPF. New wording has therefore been proposed in local plan policy P2 to reflect the NPPF but in our view this new wording still requires amendment.

Paragraph 89 of the NPPF lists 6 categories of development which are not inappropriate development in the green belt. We accept draft Policy P2 (2) states that proposals will be permitted where they are consistent with the exceptions listed in national planning policy but the policy and its reasoned justification at paragraph 4.3.18 does not recognise the NPPF guidance which has no requirement in the agriculture and forestry building exception to demonstrate that the building has to preserve the openness of the green belt and is not conflict with the purposes of including land within it.

In short, the category of exception in paragraph 89 of the NPPF for agricultural and forestry buildings is entirely unqualified regardless of size or location and is not subject to any proviso or limit as to the size of the building or its impact on openness as the other 5 categories are or the list of other forms of development in paragraph 90 are.

Under NPPF policy the physical presence of an agricultural building in the green belt should not therefore in itself be regarded as harmful to its openness or to the purposes of including land in the green belt. This has not however been clearly expressed in paragraph 4.3.18 which states that ‘…. The exceptions listed include development such as new buildings for agriculture and forestry, and the redevelopment of previously developed land subject to the impact on the openness of the green belt’.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

In our view, the reasoned justification to policy P2 in paragraph 4.3.18 should therefore be revised as follows:

‘Whilst most forms of development are considered inappropriate in the green belt, national planning policy lists certain exceptions which are not inappropriate. These are set out in paragraphs 89 and 90 of the national planning policy framework. The exceptions listed include development such as new buildings for agriculture and forestry which are entirely unqualified in terms of size of building, location or impact on openness and certain other forms of development including the redevelopment of previously developed land subject to their impact on the openness of the green belt’.

- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

**Comment ID:** pslp172/2034  **Respondent:** 17295265 / Brian McGee  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Gosden Hill development of 1700 houses. Reference to a potential link road from the development to the A247. The clear implication is for an access from the development to the A247 with enormous traffic implications for the A247.

South bound off- and on- slip roads to service the development and replace the existing off- slip road to Burpham. The only North bound access to the A3 will be via the existing slip road off Clay Lane. (See later, Burnt Common).
A 4-entry form secondary school, a primary school, a retail centre and a park and ride for up to 700 cars.

When developed, the new employment site at the north side of Gosden Hill Farm (site allocation A25) will be treated as an Office and Research & Development Strategic Employment Site (7000sq.m). This could mean several hundred employees.

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much. Overall housing need is for single and two person households at affordable rents with good public transport access, not commuter estates.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be recommissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being
generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Burnt Common strategic industrial employment site for light industry, storage and distribution activities. It is to be designated an Industrial Strategic Employment Site which means that it is a preferred site for industrial development including waste management facilities. The site is 9ha which it is stated allows for considerable future expansion. This will generate large amounts of traffic including heavy vehicles on the A247.

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although much is made of the need for new infrastructure to support these developments and for this to be in place as needed, the Plan admits … “we forecast that there will also be an absolute increase in overall traffic volumes” and this is assuming all the infrastructure (listed in App. C to the Plan) is in place in a timely fashion. GBC has little or no control over the plans of Surrey County Council as the local highways authority and Highways England for trunk roads. Worryingly, the Plan now has less substantive information about improvements to the A3 South of the M25 from Highways England and it appears that their plans are not yet formed (Policy ID2). In the absence of such information, the infrastructure proposed is specific to each proposed development and does not address cumulative effects. What would be the case with regard to planning approval if SCC and/or HE do not provide timely infrastructure?

The Plan now calls for nearly all infrastructure to be funded by developers (see APP. C). We question how realistic it is to expect developers not only to pay for all the infrastructure but also to have it in place in a timely fashion. The Plan says that planning permission will be refused if timely provision of infrastructure cannot be secured. Such refusals will almost certainly be settled in the courts. Developers’ business models are based on building and selling houses to create the cash to provide infrastructure. People will be living on the sites well before infrastructure is complete. Will GBC prevent development of Gosden Hill until slip roads etc. are provided off and onto the A3? Again, the infrastructure is site specific and does not address cumulative effects.

If development were to be refused the land would still have been removed from the green belt and its future rendered uncertain.

Residents are being asked to accept very large amounts of development with little or no detail being provided on measures which would relieve existing congestion and limit future problems. The cumulative effects of the developments listed below are certain to have a devastating effect on the A247 through our village (and of course on Send) and it is hard to see how any of the infrastructure proposed in the Plan (App. C) will do anything to mitigate the effects of these developments on the A247 and hence our village.

Summary of the Impacts on the A247 – My Objections

All of these developments will draw additional traffic to the A247 through the village. It would be naïve to think that the employment sites and schools will serve only the developments themselves. Apart from the normal movements of residents to and from the new sites there will be considerable additional traffic on the A247 generated by:

- children from elsewhere being delivered to schools and collected
- the employees of the offices and industrial sites getting to work and returning home
- the vehicle movements generated by distribution and storage activities
- traffic from Wisley wishing to travel South and returning
- traffic from Gosden Hill wishing to travel South and returning
- traffic from Slyfield wishing to travel South and returning
- private and commercial traffic originating in the South and accessing Gosden Hill, Burnt Common or the A3 and returning (including traffic from Dunsfold)

The A247 although an A road:
- is less than 2 vehicle wide in places
- does not have continuous footpaths
- has several sharp bends
- has a hump-backed bridge with poor site lines
- has a very difficult junction to access the station
- is largely unlit
- has a primary school
- is already very congested at times

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp17q/65  Respondent: 17295265 / Brian McGee  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Non-plan Items – My Objections

Surrey County Council’s business plan for Newlands Corner (not referenced in the Local Plan) to attract 100,000 more visitors a year. A significant proportion of these can be expected to use the A247.

Waverly B. C. has approved the development of 1,800 homes at Dunsfold which has the potential to feed traffic trying to avoid Guildford, onto the A247 to access the A3 (not referenced in the Local Plan).

Cumulative impact of changes – My Objections

Changes to the Plan have done nothing to alleviate the problems (particularly of traffic and congestion) raised in residents’ previous responses. Indeed it is now clear that the problems will be made much worse. There do not appear to be any changes which would be of benefit to the Clandons and indeed the cumulative effect of what is in the Plan and some external factors not in the Plan will have a much worse impact on the A247 through West Clandon and Send than the 2016 draft. Note that the A247 is the only road over the Guildford to Waterloo railway, North of Guildford that doesn’t involve travelling through the town centre.

Duty to Cooperate – My Objections

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”
The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Gosden Hill development of 1700 houses. Reference to a potential link road from the development to the A247. The clear implication is for an access from the development to the A247 with enormous traffic implications for the A247.

South bound off- and on- slip roads to service the development and replace the existing off- slip road to Burpham. The only North bound access to the A3 will be via the existing slip road off Clay Lane. (See later, Burnt Common).

A 4-entry form secondary school, a primary school, a retail centre and a park and ride for up to 700 cars.

When developed, the new employment site at the north side of Gosden Hill Farm (site allocation A25) will be treated as an Office and Research & Development Strategic Employment Site (7000sq.m). This could mean several hundred employees.

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green. Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed...
23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.
25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2064  Respondent: 17296321 / Robyn Cormack  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Burnt Common strategic industrial employment site for light industry, storage and distribution activities. It is to be designated an Industrial Strategic Employment Site which means that it is a preferred site for industrial development including waste management facilities. The site is 9ha which it is stated allows for considerable future expansion. This will generate large amounts of traffic including heavy vehicles on the A247.

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptabale since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately
half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although much is made of the need for new infrastructure to support these developments and for this to be in place as needed, the Plan admits … “we forecast that there will also be an absolute increase in overall traffic volumes” and this is assuming all the infrastructure (listed in App. C to the Plan) is in place in a timely fashion. GBC has little or no control over the plans of Surrey County Council as the local highways authority and Highways England for trunk roads. Worryingly, the Plan now has less substantive information about improvements to the A3 South of the M25 from Highways England and it appears that their plans are not yet formed (Policy ID2). In the absence of such information, the infrastructure proposed is specific to each proposed development and does not address cumulative effects. What would be the case with regard to planning approval if SCC and /or HE do not provide timely infrastructure?

The Plan now calls for nearly all infrastructure to be funded by developers (see APP. C). We question how realistic it is to expect developers not only to pay for all the infrastructure but also to have it in place in a timely fashion. The Plan says that planning permission will be refused if timely provision of infrastructure cannot be secured. Such refusals will almost certainly be settled in the courts. Developers’ business models are based on building and selling houses to create the cash to provide infrastructure. People will be living on the sites well before infrastructure is complete. Will GBC prevent development of Gosden Hill until slip roads etc. are provided off and onto the A3? Again, the infrastructure is site specific and does not address cumulative effects.

If development were to be refused the land would still have been removed from the green belt and its future rendered uncertain.

Residents are being asked to accept very large amounts of development with little or no detail being provided on measures which would relieve existing congestion and limit future problems. The cumulative effects of the developments listed below are certain to have a devastating effect on the A247 through our village (and of course on Send) and it is hard to see
how any of the infrastructure proposed in the Plan (App. C) will do anything to mitigate the effects of these developments on the A247 and hence our village.

Summary of the Impacts on the A247 – My Objections

All of these developments will draw additional traffic to the A247 through the village. It would be naïve to think that the employment sites and schools will serve only the developments themselves. Apart from the normal movements of residents to and from the new sites there will be considerable additional traffic on the A247 generated by:

- children from elsewhere being delivered to schools and collected
- the employees of the offices and industrial sites getting to work and returning home
- the vehicle movements generated by distribution and storage activities
- traffic from Wisley wishing to travel South and returning
- traffic from Gosden Hill wishing to travel South and returning
- traffic from Slyfield wishing to travel South and returning
- private and commercial traffic originating in the South and accessing Gosden Hill, Burnt Common or the A3 and returning (including traffic from Dunsfold)

The A247 although an A road:

- is less than 2 vehicle wide in places
- does not have continuous footpaths
- has several sharp bends
- has a hump-backed bridge with poor site lines
- has a very difficult junction to access the station
- is largely unlit
- has a primary school
- is already very congested at times

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
**Non-plan Items— My Objections**

Surrey County Council’s business plan for Newlands Corner (not referenced in the Local Plan) to attract 100,000 more visitors a year. A significant proportion of these can be expected to use the A247.

Waverly B. C. has approved the development of 1,800 homes at Dunsfold which has the potential to feed traffic trying to avoid Guildford, onto the A247 to access the A3 (not referenced in the Local Plan).

**Cumulative impact of changes – My Objections**

Changes to the Plan have done nothing to alleviate the problems (particularly of traffic and congestion) raised in residents’ previous responses. Indeed it is now clear that the problems will be made much worse. There do not appear to be any changes which would be of benefit to the Clandons and indeed the cumulative effect of what is in the Plan and some external factors not in the Plan will have a much worse impact on the A247 through West Clandon and Send than the 2016 draft. Note that the A247 is the only road over the Guildford to Waterloo railway, North of Guildford that doesn’t involve travelling through the town centre.

**Duty to Cooperate – My Objections**

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Yours sincerely,

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Gosden Hill development of 1700 houses. Reference to a potential link road from the development to the A247. The clear implication is for an access from the development to the A247 with enormous traffic implications for the A247.

South bound off- and on- slip roads to service the development and replace the existing off- slip road to Burpham. The only North bound access to the A3 will be via the existing slip road off Clay Lane. (See later, Burnt Common).

A 4-entry form secondary school, a primary school, a retail centre and a park and ride for up to 700 cars.

When developed, the new employment site at the north side of Gosden Hill Farm (site allocation A25) will be treated as an Office and Research & Development Strategic Employment Site (7000sq.m). This could mean several hundred employees.

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt.

4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity.

5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.
19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Burnt Common strategic industrial employment site for light industry, storage and distribution activities. It is to be designated an Industrial Strategic Employment Site which means that it is a preferred site for industrial development including waste management facilities. The site is 9ha which it is stated allows for considerable future expansion. This will generate large amounts of traffic including heavy vehicles on the A247.

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site

2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.

3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

4. There is no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although much is made of the need for new infrastructure to support these developments and for this to be in place as needed, the Plan admits … "we forecast that there will also be an absolute increase in overall traffic volumes" and this is assuming all the infrastructure (listed in App. C to the Plan) is in place in a timely fashion. GBC has little or no control over the plans of Surrey County Council as the local highways authority and Highways England for trunk roads. Worryingly, the Plan now has less substantive information about improvements to the A3 South of the M25 from Highways England and it appears that their plans are not yet formed (Policy ID2). In the absence of such information, the infrastructure proposed is specific to each proposed development and does not address cumulative effects. What would be the case with regard to planning approval if SCC and/or HE do not provide timely infrastructure?

The Plan now calls for nearly all infrastructure to be funded by developers (see APP. C). We question how realistic it is to expect developers not only to pay for all the infrastructure but also to have it in place in a timely fashion. The Plan says that planning permission will be refused if timely provision of infrastructure cannot be secured. Such refusals will almost certainly be settled in the courts. Developers’ business models are based on building and selling houses to create the cash to provide infrastructure. People will be living on the sites well before infrastructure is complete. Will GBC prevent development of Gosden Hill until slip roads etc. are provided off and onto the A3? Again, the infrastructure is site specific and does not address cumulative effects.

If development were to be refused the land would still have been removed from the green belt and its future rendered uncertain.

Residents are being asked to accept very large amounts of development with little or no detail being provided on measures which would relieve existing congestion and limit future problems. The cumulative effects of the developments listed below are certain to have a devastating effect on the A247 through our village (and of course on Send) and it is hard to see how any of the infrastructure proposed in the Plan (App. C) will do anything to mitigate the effects of these developments on the A247 and hence our village.

Summary of the Impacts on the A247 – My Objections

All of these developments will draw additional traffic to the A247 through the village. It would be naïve to think that the employment sites and schools will serve only the developments themselves. Apart from the normal movements of residents to and from the new sites there will be considerable additional traffic on the A247 generated by:

- children from elsewhere being delivered to schools and collected
- the employees of the offices and industrial sites getting to work and returning home
- the vehicle movements generated by distribution and storage activities
- traffic from Wisley wishing to travel South and returning
- traffic from Gosden Hill wishing to travel South and returning
- traffic from Slyfield wishing to travel South and returning
- private and commercial traffic originating in the South and accessing Gosden Hill, Burnt Common or the A3 and returning (including traffic from Dunsfold)

The A247 although an A road:

- is less than 2 vehicle wide in places
-does not have continuous footpaths
-has several sharp bends
-has a hump-backed bridge with poor site lines
-has a very difficult junction to access the station
-is largely unlit
-has a primary school
-is already very congested at times

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID:  pslp17q/69  Respondent:  17296417 / Simon Wilcockson  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Non-plan Items– My Objections

Surrey County Council’s business plan for Newlands Corner (not referenced in the Local Plan) to attract 100,000 more visitors a year. A significant proportion of these can be expected to use the A247.

Waverly B. C. has approved the development of 1,800 homes at Dunsfold which has the potential to feed traffic trying to avoid Guildford, onto the A247 to access the A3 (not referenced in the Local Plan).

Cumulative impact of changes – My Objections

Changes to the Plan have done nothing to alleviate the problems (particularly of traffic and congestion) raised in residents’ previous responses. Indeed it is now clear that the problems will be made much worse. There do not appear to be any changes which would be of benefit to the Clandons and indeed the cumulative effect of what is in the Plan and some external factors not in the Plan will have a much worse impact on the A247 through West Clandon and Send than the 2016 draft. Note that the A247 is the only road over the Guildford to Waterloo railway, North of Guildford that doesn’t involve travelling through the town centre.

Duty to Cooperate – My Objections

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which
overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

NO, There is still a gross over-estimate on the number of housing units required in the region and double the historical rate of about 350 units per year built in the area. The only minor revisions section 3.1 and S2 still shows 654 units per year or 12,426 homes and double the amount actually required in the community.

The number of units of 12,426 also contradicts badly the estimated growth of people expected in section 2.3 showing an additional 20,000 residents in the time frame, which then means an average occupancy of 1.6 - that is not what is reflected in the plans for the type of development and property sizes which are more likely to have 2 to 4 occupants per housing unit.

The exaggerated housing requirement and low occupancy rate given in your own evidence clearly shows this is a massive over-estimate on the actual number and size of developments required in this area let alone any regard to the transport infrastructure already at crisis point along the A3 and through Guildford on a regular basis.

The number of housing units must still be massively revised downwards or justification regarding the actual number of people and occupancy rate and size of units expected as these currently do not justify the size and scale of new development in the plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Apart from the over exaggeration and estimate of housing units required (12,426 homes are not justified even for an over estimated 20,000 extra residents as this would assume many 1 bed flats and not 1,000's of 3/4 bed homes).

The combination of site A25 Gosden Hill encroaching higher up the A3 in the last plan and the introduction of A43/A43a Garlicks Arch in Send completely destroys the very essence of the Green Belt reasoning to stop urbanisation and the joining of distinct town/village boundaries. Effectively the plan as it stands destroys the Green belt protection zone between Guildford/Burpham and the villages of Send and West Clandon effectively become part of Guildford in a very visual way. This is over-development of the Golden Hill site which should be scaled back significantly leaving more green belt land between it and the villages north of it, any A3 north/south access should be at Gosden Hill/Burpham interchange along with any Slyfield redevelopment of the access to the A3 and Garlick's Arch should be removed from the plan completely along with any plans to turn the A247 Clandon Road junction into a north/south junction which would significantly increase the traffic flow through the villages of West Clandon/Send and Ripley and more accidents at the accident hot spot connecting to the A3.

Over development of A25 and A43(a) completely go against the principle of the green belt policy to stop urbanisation and connecting of surrounding villages into key towns.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp173/228   Respondent: 17299681 / Aileen Aitcheson   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

It is proposed that East Horsley is to be “inset” from the Green Belt. This proposed change in settlement boundaries means that the East Horsley settlement area will increase by 37%. At the moment, one hundred houses are proposed near East Horsley station and over two thousand on the former Wisley Airfield, only about one mile from the East Horsley parish boundary. The site at Wisley has increased to include two more farms!

East Horsley is a small village which does not have the infrastructure of roads, rail, parking, medical facilities or schooling to support such a huge increase in population. Fifty seven percent of new housing proposed is on land that is currently categorised as Green Belt. This is flouting government law which established Green Belt to protect the countryside for future generations.

While the ONS forecasts population for growth for Guildford at 10.4% over the Local plan period, GBC proposes to increase the housing stock by 22%. Since Brexit, forecasts of increasing population numbers have been reduced, yet GBC are continuing to predict massive increases in population, which quite frankly, does not make sense.

Again, I wish to register my strong opposition to the changes proposed by GBC is their latest draft of the Local Plan.

I am opposed to the amended 2017 plans for the Horsley area as there is hardly any change from the 2016 plans which are ridiculously excessive. We need to protect our countryside and greenbelt. Changing a greenbelt area to an extended village is not necessary. The plan to establish FOUR housing developments (rather than 6) remains excessive to population growth.

The area would suffer considerably with another 2000 homes, sheltered/care homes, gypsy/traveller pitches, retail parks and schools on the former Wisley Airfield and surrounding fields.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I see there is another planning piece that has gone in and I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons as outlined below.

Please why can't you just allow a few more family homes in this peaceful family area, why this insistence on trying to create a massive new village that will ruin the infrastructure and all we hold dear in this beautiful area we live in? My 20 points are:-

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic

7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.

- The associated traffic increase from the RHS has not been taken into account.
- The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account. It is a nightmare getting anywhere in these days as you know.

1. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis. My children have been injured just by current local traffic on their bikes and refuse to cycle now as just too dangerous.

2. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station

3. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrain the site significantly in terms of building heights etc.

4. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”

5. Opportunity (3) should be common to all sites and is not unique to this site

6. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting.

7. I object to the removal of additional 3.1 ha from the green belt without any justification

1. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact

2. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3

3. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

4. I object to the extension of the plan period by 1 year as it has not been identified as a major change

5. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

1. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616?

This last point is one of a number of glaring examples of why the plan is unsound and not fit for purpose and alongside my other points needs to be rejected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the loss of more green belt with the increased area.
I object to the increased area making it adjacent to Upton farm.
It is adjacent to a3/m25 junction which would lead to traffic using Wisley roundabout into an already congested and dangerous entry to the m25 slip road.
Local roads would not cope with increased traffic and buses in the narrow roads.
I object to the plan for the above reasons.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A42 (Tannery Lane, Send) because

Subsequent to the previous plan, you have further increased the amount of planned homes from 45 to 60 which is at odds with hundreds of previous objections to this development;

It will place the local roads under further significant strain. This road connects to Send Road (A247) which is a traffic hotspot during peak times with significant load heading into Woking or heading to the A3. Traffic turning into and leaving Tannery Lane causes severe delays and this situation could only worsen with this proposed development;

It erodes the Green Belt in our village and puts pressure on local house values.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43 (Garlicks Arch, Send Marsh) because

Again, the local infrastructure could not support such a change and would significantly worsen access to the A3 and local traffic issues but beyond that, local schools and medical amenities are not at a level where they could deal with such an increased local populace.

Again, it ignores the thousands of previous objections made by local people;
There is no proven demand for Travelling Showpeople plots in this location

I find it difficult to understand why, rather than listen to the thousands of previous objections from local people, Guildford Borough Council have in fact far worsened the proposed developments for Send Village and associated green belt within the recent iteration of the Local Plan and really demonstrates an authority that is not listening.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object categorically to Policy A44 (Winds Ridge/Send Hill, Send) because

The local infrastructure cannot support an increase of residents and associated traffic at that level; Send Hill in parts is a country, single lane road with poor access to surrounding areas and could not facilitate the proposed increase in levels of traffic thereby creating access issues;

The local school(s) are not able to accommodate an increase in pupils at this level and are struggling to meet current demand;

It ignores hundreds of previous objections made;

There is no proven demand for traveller pitches in this location and the introduction of such pitches will have an impact on local house values;

It is rural, agricultural land and not meant for this type of development and this only works to erode the Green Belt and the glorious views of local our precious countryside;

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am a young professional, born in Guildford and currently residing as a homeowner in Burpham with concerns over the council's attitude towards current and potential future residents of the Borough's quality of life. I wanted my comments to be acknowledged with regard to the proposed local plan on both a subjective and objective basis as I would think it is people of my demographic you are looking to attract and keep in the area.

I am not overly against the building of new houses/flats, as I am led to believe we have a housing crisis in this country so understand the desire for growth, however I am concerned that the proposed development at Gosden Hill Farm will place too much of a burden on a local infrastructure (i.e. the roads in particular) which is already overwhelmed at peak times. I would urge the council to ensure that transport infrastructure is improved BEFORE any new housing development and not just to address the current deficit that is already evident, but to adequately provision for anticipated future growth beyond Gosden Hill Farm.

I have found it unclear from what I have seen in the plan about timelines for Gosden Hill Farm and the new southbound slip roads for the A3, but my concern stems from observing housing development near the train station and by the cricket ground on Woodbridge Road. Given that I would expect each household to have between 1 and 2 cars, how will the current road system cope with these new vehicles when people move in? It appears the council are (rather admirably) trying to address a housing crisis but leaving infrastructure as an afterthought, kicking infrastructure down the track for what will become a future problem; it will not simply go away! (and potentially drive people away from the area) Why let the current system get worse before trying to improve it?

While the borough's road system has been much maligned for as long as I have been alive, one positive I can say about where I live on Ladygrove drive, Burpham is the northbound slip roads onto and off of the A3. However, the following list are subjective observations of the problems I have when travelling to and from the south:

- Peak time congestion from Clay Lane all the way into the town centre. I may be inclined to take public transport but it isn't efficient enough: the bus takes too much time weaving around residential areas and then gets stuck in the same traffic either on London Road or Parkway anyway. This congestion is usually even worse on the way back home from work and what should be a 15 minute journey regularly turns into an hour.
- I often use Farnham Road Car Park, either to use the train for my client based work or because my company holds parking permits for Farnham Road when I am needed in our main Guildford Office. Due to the one-way system being gridlocked constantly at peak times, I am forced to join the A3 from the A25 for all of 30 seconds before I come off at the University roundabout to facilitate easier access to Farnham Road's Entrance. Either a southbound slip at Burpham or a road that better connects the A25 to the University roundabout (or both!) would be a clear way to alleviate traffic and improve traffic flow as I am sure I am not the only one who has a similar route.
- I often travel to Portsmouth at weekends and the issue of no southbound slip raises it's head once again as I am illogically forced to drive through Guildford and join congestion once again trying to then enter the A3. Southbound travel from north of Guildford centre is just horrendous.
- As mentioned earlier, I use the trains for work from time to time. I understand that the service through Guildford to Waterloo is one of the most crowded in the country and I can see why. It is on a par with, if not worse than a London tube carriage and again, expansion needs to be considered before more houses. I am not sure where the inhabitants of the new flats by the train tracks were expected to be accommodated by the transport system? A new station at Merrow will surely just add to the overcrowding rather than alleviate it.

Adding new houses at Gosden Hill will make these problems worse, so it is imperative that improvements are made before housing starts to be developed to ensure the high quality of life survey results Guildford has been receiving in recent times continues and to ensure the future prosperity of the area. I am afraid that if the council executes the plan in the same way they executed the box park 'village' last year, then the plan will be an unmitigated disaster. Although, the village has improved marginally since it's refurbishment, it appears that local resident views are not given the consideration they deserve and I would anticipate University students not staying in the area after graduation if the correct level of engagement is not achieved.

Answer (if comment is on questions 1-7 of the questionnaire): ()

In addition, I object to the proposed development on site A42. On the other side of me, I have Tannery Lane, site A42, with the increase from 46 to 60 homes.

What about the affordable housing which is not clearly stated?!

Already at the traffic lights in Send, traffic is held up for several changes of lights. The area cannot take more traffic on the roads.

Already we are blocked in when the newly extended primary school parents block our access. If there was to be a fire or ambulance needed, our homes cannot be accessed as it is. The school can't take any more families. The Doctor's surgery cannot take any more load.

It is not right that 40% of development is in this area, so near to Send Marsh and Wisley Airfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Firstly, I object to development on site A43, Garlic Arch is STILL Green Belt land and this amount of development, 1500-1999 homes, an INCREASE of 400 houses, is inappropriate for the area. The addition of six Traveller Plots, amongst/as well as all these houses in a rural area is completely harmful for wildlife and people alike.

Why do we need 6 new traveller sites? It is disproportionate and unfair to put such a heavy load, all in one area. I strongly object to this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2157  Respondent: 17301089 / Amanda Alexander  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58
Secondly I object to the plans for site A58. I live near Burnt Common, site A58, and the unclear information about industrial floor-space is another considerable worry.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

• We simply do not have the road infrastructure to deal with large new developments & the additional road traffic this will bring. Ripley high street is already gridlocked every rush hour, twice a day with vehicles trying to get in & out of Newark Lane and to and from the A3. It’s already way over capacity, so to suggest a further cars and vans/lorries is completely unfeasible. How will small high streets such as Send and Old Woking be able to cope with this volume of additional traffic for families getting to and from Woking – White Rose Lane is yet another road that already is jam-packed?

• Air pollution will rise substantially with this proposed increase to road traffic

• Woking station doesn’t have the capacity to deal with additional parking on this scale to cope with this amount of additional commuters

• No bus services run prior to rush hour to get people to Woking/Guildford stations

• Send Villages Medical Centre: Its already a nightmare getting an appointment to see a doctor – will you be building an additional facility of larger capacity in Ripley and if so where?

• Any development at Site A43 Garlicks Arch would be on Green Belt land, and there is no identified or exceptional need within the Local Plan documentation

• The inclusion of 6 Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural environment within the Green Belt and there is no identified need within the Local Plan

• The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. The Plan is self-inconsistent and therefore not properly constituted.

• The potential of an increase from 400 houses at site A43 Garlicks Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages. The plan states that “if the [Traveller sites] remains unsold, the future use of the land should have regard to an up to date Traveller Accommodation Assessment (TAA) and Strategic Housing Market Assessment (SHMA), with specific consideration of the use of the land for affordable housing”. So even more travellers pitches and houses, which is unjustified.

• Section 4.2.22 of the Plan states that “Sufficient sites are identified within the Local Plan [for] 8 plots for Travelling Showpeople” So why do 75% of them have to be in Ripley? This is unbalanced and unfair.
The removal of site A46 from the Plan (with its proposed 1100 houses) has left the Plan even further unbalanced against the North East of the Borough with over 40% of the development proposed in this small area of Green Belt, all within just 3 miles of Send Marsh.

The potential for a substantial increase in industrial floorspace from 7000 sq m to an unspecified amount at the site A58 Burnt Common does not provide local residents with enough information for a full and proper consultation given the ambiguity and lack of detail within the document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The new draft remains objectionable for three main reasons:

1. Based on Guildford Borough Council’s own figures, marginal changes such as these would still leave 56.7% of all new development in the borough built on Green Belt sites. No “exceptional circumstances” or any other justification is advanced for this strange imbalance.
2. The deletion of two Horsley sites fails to correct the issue of relative overdevelopment in East and West Horsley, which is both excessive in absolute terms and disproportionate in relation to the rest of the borough.
3. No attempt is made to assess the cumulative impact on the Horsleys – either of the four sites now proposed, or of Site A35 (Three Farms Meadow, alias “Wisley Airfield”), with over 2,000 new homes only 2 miles away. This piecemeal approach leaves the future of the Horsleys at the mercy of ad hoc planning applications, which is the opposite of what a
Local Plan should intend. It would not be difficult (e.g. with the help of the draft West Horsley Neighbourhood Plan) to set out a proper, more integrated vision for this part of the borough. Without this, the plan is not a plan for the Horsleys in any practical sense.

The Inspector will also want to have regard to the feeling among Horsley residents that this limited approach is deliberate – driven by a concealed wish to turn their community into new dormitory town. Plausible claims have been made of political bias by a Council leadership representing the western end of the borough, which is less threatened by London urban sprawl.

The new plan Policies put greater emphasis on the need for adequate facilities and infrastructure to underpin development. But this is not reflected in any new wording on the Horsley sites, thus leaving most local objections unaddressed. Again, this defect curtails the plan’s usefulness as a practical planning tool at a site level and undermines its credibility among residents. The plan fails to mention most of the known sustainability issues and infrastructure constraints affecting the Horsley sites, including public transport, traffic, road safety, parking, schooling, medical facilities, sewage, flooding/surface drainage and shops. These were fully set out in responses to last year’s public consultation.

The density of new housing on the four Horsley sites too is inappropriate, being greater than anywhere in the locality at present.

Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries. The plan presents no arguments for this which, contrary to NPPF paragraph 79, will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

Collectively, the four Horsley sites breach NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been an outstanding success story in the Horsleys, as detailed in response to the last consultation. Assets include a dense public footpath network, parish parks, sports fields, a campsite of international standard, Britain’s newest rural opera theatre and the popular Olympic cycle route.

These examples of positive planning depend on a Local Plan that protects the Green Belt, maintains its openness and beauty and avoids urbanisation and traffic congestion. Sites A35-41 are hostile to this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the new local plan, my reasons are as follows;

Sites A36-41 (East and West Horsley)

This submission focuses on changes made to the 2016 draft Local Plan. In the case of Sites A36-41, the changes are minimal. This ignores the high volume of serious objections submitted to this part of the plan.
The number of potential development sites has been reduced by two (A36 and A41, representing a total of 138 dwellings). This leaves four sites (A27-40) which still represent a total of 395 new dwellings.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send Marsh/ Burnt Common

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to object to a number of the policies contained in the above plan.

1. The existing Send Business Park is a good example of the use of buildings in a rural environment. The significant changes in the plan will change the feel of the area and the natural environment……..the buildings are too close to the River Wey Navigation.

The single lane highway access in Tannery Lane is already heavily used by cars and commercial vehicles. With development, it is inevitable that the traffic flow would be substantially increased by traffic from the new marina and the proposed Clockbarn development. The road lacks a footpath and has no public transport links.

For these reasons the site should not be expanded or classified as a strategic employment area.

1. I object to the proposed changes to Send Business Park.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the development of Burnt Common. The potential huge strategic employment site at Burnt Common will inevitably cause significant increases in traffic in the area. This development combined with Garlick’s Housing site will result in the urbanisation of the village at its west boundary.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Our villages raised a huge number of valid objections by our residents in the 2016 consultation and yet the Borough Council have increased the housing, travelling/showpeople pitches and industrial development allocations despite a reduction in the boroughs’ overall target. This shows we have not been listened to, our concerns ignored.

With the following proposals – 3,700 houses at Gosden Hill Farm and Wisley airfield (Policy A35) within the vicinity and for proposals for the village of Send, Send Marsh/Burnt Common to have an extra 500 homes, 10 travellers pitches, 7,000 sqm. Of industrial development and slip roads to A3, I HEREBY STRONGLY OBJECT TO EVERY SINGLE ONE OF THESE PROPOSALS ON THE GROUNDS THAT THEIR SEVERE AND ADVERSE ENVIRONMENTAL (INCLUDING ATMOSPHERIC POLLUTION FROM THE INCREASED TRAFFIC) IMPACT AND UNJUSTIFIED SACRIFIC OF PRIME AGRICULTURAL GREEN BELT AND HISTORIC WOODLAND

PLEASE ENSURE THAT THIS LETTER IS BROUGHT TO THE ATTENTION OF THE GOVERNMENT’S PLANNING INSPECTORATE AND UNLIKE THE JUNE 2016 PROCESS MAKES OUR OBJECTIONS IN THIS CONSULTATION WORTHY OF ITS NAME

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A25 Gosden Hill Farm

I have objected before to the 2,000 houses proposed for this site. The Plan to reduce the number of houses to 1,700 would not materially reduce the huge, detrimental impact that this development would have on the A3 and other local roads.

I therefore strongly object to this ill thought out proposal which would generate additional traffic along the narrow A247 Clandon Road and Send Barn Lane/Send Road leading to Woking.

Policy A43 Garlicks Arch

I have objected to the proposed development of 400 houses on Green Belt and good agricultural land. This new policy adds 8 travelling-show people pitches to the development making this development even even more inappropriate for this area. The Borough Council, 3 years ago, actively turned down a planning application from ‘Old lands’ to build 25 homes in the same location. So the Council cannot include this policy within the plan and maintain that it applies consistent and good policy.

I strongly object to the revised proposal for following reasons

1. The village has no shops or other infrastructure to support the development.
2. Additional traffic generated would create huge congestion on our already over crowded roads in Send, Send Marsh, Burnt Common and Ripley
3. No exceptional circumstances exist to destroy this Green Belt land and ancient woodland in the [illegible word]
4. There is no proven demand for travelling/show people in the area
5. The village of Send Marsh/Burnt Common, and Ripley would have their distinct characteristics destroyed

Page 2359 of 2988
New Policy A58 – Land around Burnt Common Warehouse, London Road Send P2 and A58.

This new policy A58 seeks to increase the area of land to be extracted from the Greenbelt for a minimum of 7,000 sq.m of employment floorspace. So I strongly object to this proposal on the grounds that there is no proven need to allocate any Green Belt land within the borough for industrial/warehouse development. This development will have a severe impact not only on the two villages but will create major traffic problems throughout the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/689  Respondent: 17301473 / Lynda Turner  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2 – the 654 homes per year that the Plan intends to deliver over the period of 2015 – 2034

This reduced number is still far too high and doesn’t take into account the capacity of the roads, schools, doctors, hospitals and other infrastructure to support such an increase in population.

I strongly object to the calculation of assessed need for housing and other development in the area and the vastly disproportionate impact of the Local Plan proposals on the communities in The north of the borough.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I strongly support the removal of sites A46 and A47 in the Flexford area, as this is Green Belt land and I do not believe that the current infrastructure could support these developments.

You propose to remove from the Green Belt homes in Guildford Road, northern end of Glaziers Lane, Walden Cottage and Palm House Nurseries site. As someone who uses this area regularly, I believe that such a move would have a detrimental affect, as a result of the likely higher density development. As well as spoiling the character of the area, it would also reduce the openness of the Green Belt, which I feel is the Council's responsibility to uphold.

You propose to allow the building of up to 10,000 homes within a 10 mile radius of Normandy. I understand the need to build new homes and appreciate that it's very easy to take a "not in my back yard" approach. However, I would urge careful consideration of the negative impact that this could have on one of the council's more rural areas. If this proposal does go ahead, it should be accompanied by a commitment to invest in improvements in the local infrastructure, such as a new road bridge and footbridge at Ash station, to enable the current level crossing to be closed.

Thank you and I would be happy to discuss any of these matters further.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A42 - Clockbarn Nursery, Tannery Lane

1. I object to your proposal to increase the 60 homes in place of the 45 homes, which amounts to an increase of 33%. How can you justify this increase?

2. It ignores the hundreds of objections raised by local people already.

3. It will without doubt have a serious impact on traffic levels and traffic problems in Tannery Lane and at the A247 junction.

4. It will also make the erosion of the green belt in Send Village much worse.

5. It will also make surface water flooding, which is already a problem far worse.

6. It will have an effect on the open countryside views from the River Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the A43 changes at Garlick's Arch as follows:

1. YOU have completely ignored the thousands of previous objections made by local people.

2. Why should there be a plot for Travelling Show people in this location when there is 'lc proven demand for this. These people lead a transient lifestyle and therefore there is no need to provide them with a plot of land.

3. You have not provided nor can you justify your reasons for proposing to build on the beautiful permanent Green Belt, there are no exceptional circumstances to allow you to do this.

4. Your proposals will mean our village is 'over developed' and the number of homes excessive.

5. We have beautiful and exquisite ancient woodland that have existed since the time of Elizabeth 1, why do you want to destroy this?

6. These changes will join up Ripley and Send and completely defeat the purpose of the Green Belt.

7. This area is subject to flooding and is currently in flood zone 2 and it is contaminated with lead shot which has built up over the last 50 years.

8. It will generate more traffic that will cause chaos in the local roads of Ripley and Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A58 - Burnt Common
My objections are that this was deleted from the 2014 Draft - why have you now resurrected it and added it to the revised proposal?

1. There has been a decline for the need of industrial land - many office buildings and industrial lands stand derelict why build more?

2. Slyfield and Guildford have empty sites and industrial units - USE THESE FIRST. There is no need to build an industrial or warehouse unit in the middle of the Green Belt.

3. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt.

4. The impact on narrow surrounding country lanes will create traffic gridlock

5. As stated before

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
Green Belt, Policy 2 at paragraph 4.3.15
Send business Park now to be taken out of the Green Belt altogether I object to, the proposal to inset Send Business Park from the Green Belt because:
1. As you will be aware this is effectively an old non-conforming user in an area of outstanding countryside which is adjacent to the beautiful Wey Navigation
2. The roads are narrow allowing restricted vehicle access along Tannery Lane in both directions
3. It is inappropriate for further expansion or development at this location and it will detract from the openness of Green Belt.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2264  Respondent: 17302497 / F Bennett  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A50

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Plan is self-inconsistent in respect of traveller sites.
A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots…” Clearly A50 more than covers the total “need” of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

- The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm,… (site allocation A25) [than the Burnt Common site did]”
- The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value.”

The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses].” That has now been removed, thereby accepting that needing to make greater than normal profit in lieu is an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5: “We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan.”

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

The Garlich Arch,Burntcommon,Send & Wisley proposals will have a devestating affect on the quality of life,and pollution from the traffic it would generate,as all these developments will necessitate their traffic to be directed through Ripley,Ripley has already become a by pass for the A3, which on a daily basis has problems.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object removing Send Business Park from the Green Belt (4.3.15).

Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

### Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

NPPF paragraph 182 states that the Local Plan will be examined to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is sound. A local planning authority should submit a plan for examination which it considers is “sound”.

In relation to Amendment 8 of the Green Belt boundary at Flexford, we have assessed the soundness of the plan in accordance with the relevant parts of NPPF paragraph 182. These include the plan being consistent with national policy and justified using proportionate evidence.

NPPF paragraph 182 also states that the Local Plan should enable the delivery of sustainable development in accordance with the policies in the Framework to demonstrate soundness.

In our previous representations, we commented that retaining ‘Westholme’ in the Green Belt would fail to accord with NPPF paragraph 85. This paragraph states that when defining boundaries, local authorities should define boundaries clearly using physical features that are readily recognisable and likely to be permanent, and not include land which it is unnecessary to keep permanently open.

We concluded that the previously shown Flexford Green Belt boundary was inconsistent with national policy (as the Council had not recognised the permanent physical features surrounding the site) and that retaining Westholme in the Green Belt would fail to accord with the requirements of NPPF paragraph 182.

We are therefore pleased that the Council has since taken our previous representations into consideration and has now amended the boundary to the south west corner of Flexford (Amendment 8) to remove ‘Westholme’ from the Green Belt boundary based on our supporting evidence.

---

### Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 6: Any other comments?

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

Our representations relate to the proposed amendments to the Green Belt boundary at Flexford (the south west corner) and specifically concern Amendment 8, as defined on p420, which would result in the removal of our client’s site, ‘Westholme’ on Green Lane East, from the Green Belt.

We write to support the Council’s further amendments following our representations to the Regulation 19 consultation in July 2016, in which we encouraged the Council to remove the above site from the Green Belt.

**Summary of previous representations**

Our previous representations in July 2016 critiqued the robustness of the three-stage methodology used to assess the contribution in which the open character of Flexford was considered to make to the openness of the Green Belt.
The previous representations were submitted as the proposed Green Belt boundary did not contribute to the essential characteristics of the Green Belt as defined in NPPF paragraph 79 – openness and permanence. Indigo undertook an assessment of the site in the context of the Green Belt and confirmed that the site is surrounded by development and defensible boundaries. The western side of the site is narrower than the eastern side, so there is less open space which contributes to the openness of the Green Belt and there is a large, mature and dense conifer boundary along the northern side which prevents the land from contributing to the openness of the Green Belt all year round. To support our research, we prepared a photo survey of the site from various directions and created maps illustrating the amendments that should be made to the Green Belt boundary.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  ◦ failure to correct for errors in the historical data for international migration flows,
  ◦ issues with the way it considers students and affordability and
  ◦ flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.
The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 – 2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

I OBJECT to Policy D3 - Historic environment
I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Proposed Submission Local Plan: strategy and sites 2017 - Guildford Borough Council Planning Policy Consultations

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students are accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of

Page 2378 of 2988
unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/747  Respondent: 17303553 / Anita Fitchie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150
homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and...
with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

---

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.
The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford’s circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

1. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

2. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
3. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

I object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for the following reasons:

1. I live in East Horsley where local roads would not be able to take the additional traffic from Three Farms Meadow.
2. The infrastructure in East Horsley, including doctor, railway station and parking, would be overloaded by the additional pressure from the inhabitants of Three Farms Meadow.
3. It would involve severe disruption and constraints on the roads in Ockham.
4. I object to the removal of additional 3.1 ha from the green belt
5. I object to the change in green belt boundary to the eastern end of the site
6. I object to the fact that the council has failed to remove this site from the local plan
7. I object to the inclusion of a 10% buffer in the housing number over the plan period.
8. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc.

I believe that the housing number is unsound and open to legal challenge.

1. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
2. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.
The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 – 2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highecotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burnt common and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.
I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/766  Respondent: 17303713 / Andrew Fitchie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/769  Respondent: 17303713 / Andrew Fitchie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/774  Respondent: 17303713 / Andrew Fitchie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1
I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/778  Respondent: 17303713 / Andrew Fitchie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H3

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be "closely related" Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances." The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/765  Respondent: 17303713 / Andrew Fitchie  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

“Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

1. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
2. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford’s circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
3. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.

Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.

The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** (No)
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Plan is self-inconsistent in respect of traveller sites. A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots ...” Clearly A50 more than covers the total “need” of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, ... (site allocation A25) [ than the Burnt Common site did ]”
2. The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says:  Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. That has now been removed, thereby accepting that needing to make greater than normal profit is to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan."

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

I object removing Send Business Park from the Green Belt (4.3.15).

Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
S2: Borough Wide Strategy

We do not set out in detail here every point of contention with the PSLP Housing Strategy nor do we necessarily object to other individual proposed submission allocated housing sites. Those detailed matters will follow in due course through the Examination.

The main thrust of our objections to Proposed Submission Policy S2 is threefold:

1. Housing Need has been reduced significantly from the July 2014 (Regulation 18) and June 2016 (Regulation 19) versions of the Draft Local Plan (Regulation 18) at the very time when housing need both regionally and nationally appears to be very substantially increasing. We find this approach perplexing and we question its credibility and desirability.

2. GBC's Housing Land Supply and proposed housing allocations have altered dramatically from the July 2014 (Regulation 18) and the June 2016 (regulation 19) versions of the Draft Local Plan. Not only is there a significant reliance on major strategic housing allocations which will take many years to deliver housing, but the housing delivery rates are now weighted to the back end of the Plan period exacerbating still further the previous accrued under-delivery of housing in the borough; and

3. In light of the above, smaller and modest sized sites which are deliverable and which the Local Plan evidence base show can be delivered without causing significant harm, have been omitted from the emerging Local Plan at the very time when they could help GBC meet its (and neighbouring authorities) acute housing

The Borough Council openly acknowledges that it has accrued a very significant housing delivery shortfall moving into the Local Plan review process. In that regard, the Borough Council has approximately 3.2 years supply of housing land against the Government's minimum requirement of 5 years housing land supply.

Despite the context of housing delivery under-performance, GBC proposes to reduce the Plan period by one year and its start date has been rolled forward by 2 years. In this respect, we are concerned that there is no credible explanation offered to indicate why the Plan period has been reduced in mid-Plan making process. This change to the Plan period has also been accompanied by a very significant reduction in the overall housing requirement during the Plan period from 13,860 to 12,426 dwellings (a reduction of 1,434 dwellings). This very sizeable reduction comes precisely at a point in time when housing need at the local and national level is so acute. Furthermore, the proposed change to the Plan period appears to be out of step with the Strategic Housing Market Assessment (SHMA) and the Housing Market Area (HMA) which relate to the period 2013 to 2033.

The West Surrey SHMA itself has been partially updated since the July 2014 Regulation 18 and June 2016 Regulation 19 versions of the Local Plan. We also note that the Guildford Addendum Report (2017) takes account of the latest population and household projections, the latest 'post-Brexit' economic projections, and the 2015 mid-year population estimate. It is highly notable that the Addendum Report has resulted in a reduced Objectively Assessed Need ('OAN') for Guildford borough from 693 homes per year (2013 - 2033) to 654 homes per year (2015 - 2034). We struggle to understand how such a dramatic reduction in assessed housing need in Guildford borough bears any resemblance to the reality of the housing market in this part of the South East of England.

We consider that there are a number of in-principle matters for the examination to address in this regard.

Firstly, given the acute need for housing locally (and regionally) including record need and waiting times for affordable housing, together with significant unmet housing need in neighbouring Woking and Waverley boroughs, we question how such a dramatic reduction in the OAN is credible yet alone desirable? A further matter which we will seek to address at the examination is that Addendum Report appears to relate solely to Guildford borough rather than the wider strategic West Surrey SHMA area. The approach by GBC to calculating the revised OAN must brought in question especially in light of the duty to cooperate obligation.

Finally, on this particular matter, we question whether the approach taken by GBC to housing need and the PSLP's approach to housing delivery through the Plan period is in accordance with the Government's advice contained in the National Planning Policy Framework and the Planning Practice Guidance ('PPG').
The approach to Housing Land Supply through Proposed Site Allocations

GBC's Housing Strategy is heavily reliant upon the delivery of several major draft housing allocation sites to bring forward a substantial proportion of new homes during the Plan period. GBC was also at pains throughout the PSLP committee debating process to assure elected Members, stakeholders, and local communities that the major housing allocations would only come forward when accompanied by necessary on and off-site infrastructure (including, but not limited to, new roads, utilities, and school provision). Consequently, GBC's Housing Strategy in the PSLP (Regulation 19) is predicated on all necessary infrastructure required to facilitate the major housing site being delivered at the front end of housing scheme delivery.

The Housing Strategy has therefore been modified to illustrate that housing delivery on those major sites will be significantly delayed and as a result the PSLP housing strategy assumes a significant weighting of annualised housing delivery towards the back end of the Plan period.

We consider the proposed approach to the borough's housing delivery will only serve exacerbate the acute need for housing (including affordable housing) in the borough which is already failing to perform against local targets and the Government's 5 year housing land performance requirements. Indeed, not only is the Borough Council moving towards an Examination with a sustained housing land supply shortfall when measured against its 5 year housing land supply target but the Council is also proposing a housing delivery strategy which will result in an additional accumulated shortfall of 1000 dwelling units up to 2026 against its own annualised OAN housing target (until the draft allocated major housing sites come on stream from 2026 onwards):

- 2019/2020 200 unit shortfall
- 2020/2021 200 unit shortfall
- 2021/2022 150 unit shortfall
- 2022/2023 150 unit shortfall
- 2023/2024 150 unit shortfall
- 2024/2025 100 unit shortfall.
- 2025/2026 50 unit shortfall.

This annualised shortfall in housing delivery will be greater still if the Examination Inspector finds against GBC's revised OAN methodology.

Despite this lamentable context, sites with potential to deliver housing in the first five years of the Plan period have been omitted from the emerging Local Plan despite being draft allocated from the 2014 draft Local Plan. For example, sites such as Pond Farm and Land South of New Pond Road (Site No. 80 (SHLAA site reference 2241) immediately adjacent to and contiguous with the built form and settlement boundary of Farncombe have been identified as part of the Borough Council's housing evidence base and the Green Belt and Countryside Study as being suitable to deliver new housing.

In this context, the Promotion Site was draft allocated as part of site No. 80 (SHLAA site reference 1140 and part site reference 2241) in the Regulation 18 draft Local Plan: Strategy and Sites published for consultation in July 2014 as being suitable to deliver housing. The draft allocation site being 16 hectares of land to the south of New Pond Road (B3000) and intersected by Furze Lane. The wider site having been assessed by Pegasus Planning on behalf of the Borough Council as not contributing to the purposes of the Green Belt by virtue of its defensible boundaries and being well contained. Site No. 80 was discounted from the Regulation 19 draft Local Plan (June 2016) absent of any fresh technical evidence to justify its omission.
The Promotion Site lies contiguous with the established form of Farncombe which itself lies in the adjoining borough of Waverley.

Waverley borough is also experiencing an acute need for new housing and its own Local Plan has been recently subject to Examination in July 2017 during which the Examination Inspector (Mr Jonathan Bore) has acknowledged that he is minded to recommend that Waverley Borough's annualised housing target is increased significantly from 19 dwellings per annum to around 80 dwelling per annum (the precise amount is to be confirmed). The Waverley Borough Local Plan Inspector also questioned Guildford Borough Council during the Examination on its 'duty to cooperate' role with Waverley Borough Council given the absence of any truly cross boundary strategic housing sites or apparent sharing of housing land supply. In this particular context, Farncombe is a sustainable settlement that benefits from a wide range of services and amenities including a railway station. Land at Pond Farm and Land South of New Pond Road is contained on its boundaries by physical built features including; New Pond Road (B3000) along the entirety of the northern boundary, the Portsmouth to London Waterloo mainline railway (to the eastern boundary) and established residential development (immediately south). The Promotion site itself is formed in two parcels intersected by Furze Lane which connects the village to the busy B3000. Furze Lane itself is well served by a bus services and a bus stop is located just 50 metres south of the Promotion Site entrance.

The Promotion Site is set within the designated Surrey Hills AONB and the Green Belt which covers (washes over) all the land between Farncombe and Guildford. However, in respect of the AONB, two independent landscape appraisals have found that site No. 80 does not contribute to the characteristics and qualities of the wider Surrey Hills AONB and is impacted and influenced by the urban characteristics of the adjoining settlement. Furthermore, the Surrey Hill AONB office in its written comments to planning application reference WA/2014/1330 approved for 80 dwellings (immediately adjacent to the Promotion Site), acknowledged that the area south of the B3000 did not significantly contribute to the characteristic and qualities of the Surrey Hills AONB.

In respect of the Green Belt, it is highly notable that the Borough Council's Green Belt and Countryside Study which is an important evidence based document also indicates that Site No. 80 does not perform strongly when measured against the purposes of including land within the Green Belt.

Nevertheless, the site promoters have commissioned further independent assessment of the site in terms of its visual impact on the landscape, its role as contributing to the purposes of the Green Belt and other technical matters including flooding and flood risk and we can confirm there is no impediment to delivering housing on the Promotion Site.

In term of the housing delivery and subject to the proper planning, design and layout of the Promotion Site we estimate the site can deliver between 90-100 dwellings including affordable housing at full policy rate, whilst still allowing for generous on-site open space and areas that will be kept free to allow for flood risk and established trees to be retained. The additional technical work commissioned by the Site Promoter effectively supports the earlier evidence base work undertaken by the Borough Council which led to the site's draft allocation.

It is also evident that by allocating the promotion site, the Borough Council would be assisting housing need in Guildford Borough but also Waverley Borough which is a central objective of the duty placed on local authorities to cooperate in delivering housing land and meeting the need for housing at a more strategic level.

The promotion site is accessed via Furze Lane in an accessible location on the edge of a large sustainable village which has a wide range of services and facilities including a railway station which provides excellent links to Guildford (6 minutes) and onwards to London Waterloo. The settlement also offers local opportunities for employment and employment creation as part of a sustainable existing settlement. Furze Lane itself is well served by a bus services and a bus stop is located just 50 metres south of the site entrance. In all these respects, Land South of New Pond Road is ideally placed to deliver a sustainable and deliverable residential development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Duty to Cooperate**

We have already set out our concerns regarding the Council's duty to cooperate in our representation to Proposed Submission Policy S2: Borough Wide Strategy and specifically GBC's approach to re-assessing housing need in isolation from neighbouring borough and districts. In addition, we are mindful that GBC's duty to cooperate was questioned as part of submissions made to the Waverley Borough Local Plan Examination in July 2017. During the Waverley examination, the appointed Inspector (Mr Jonathan Bore) questioned GBC's representatives who were in attendance at the Examination. The Waverley Local Plan Examination Inspector was very keen to understand why Guildford Borough Council does not appear to have identified land or taken on unmet housing need from neighbouring boroughs in its emerging Local Plan. GBC's response at the Waverley Local Plan Examination was, in effect, to say that Guildford borough was highly constrained and the ability therefore to take unmet housing need from neighbouring authorities was not possible. This approach, should it be carried forward into the Guildford Local Plan Examination, is simply not adequate.

Firstly, all local authorities forming part of the West Surrey SHMA (and several authorities beyond this area) have constraints whether those constraints include metropolitan Green Belt, AONB, AGLV, Thames Basin Heaths SPA etc. The fact remains that GBC has not only failed to take account of neighbouring unmet need, it has actively and significantly:

- Reduced its Objectively Assessed Need (OAN) against the current of acute housing
- Reduced its proposed housing land supply despite historic and current under-performance of housing delivery, and;
- Discounted smaller housing sites which are well placed to meet the needs of neighbouring authorities and communities, despite weighting the reduced housing delivery to the back end of the Plan

We strongly maintain that the settlement of Farncombe (with its shared boundary with GBC) represents a suitable, sustainable and accessible opportunity to help accommodate the unmet housing needs of both authorities in just the way that the duty to cooperate is designed to facilitate. Land South of New Pond Road (site No. 80) is ideally placed to assist Guildford Borough Council meet its housing land supply target whilst also helping to meet the acute needs of communities that share a border with Waverley borough in a geographic area which is well served by a range of existing services and amenities including a railway station which links Farncombe to Guildford (just 6 minutes travel time) and which is served by established bus routes.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Requested Modifications

In all of the above respects, Land at Pond Farm and Land South of New Pond Road is ideally placed to deliver a sustainable high quality residential development including affordable housing during the front end of the Plan period. The PSLP should therefore be modified by allocating Site 80 for housing development and included the Promotion Site in the PSLP Part 2: Sites, and identified in Appendix F: Policies Map accordingly.

The PSLP seeks to deliver low and unambitious Annual Housing Target figures which will not meet the acute need for housing in the borough or meet the needs of neighbouring authorities or respond to inward migration from London. The OAN should be increased accordingly to at least 693 dwellings per annum and Policy S2 modified accordingly.

The PSLP’s Housing Strategy which weighs housing delivery to the back end of the Plan period (form 2026 onwards) will exacerbate housing need, lead to increased house prices and unaffordability, and lead to further increasing in housing waiting. The annualised Housing Delivery targets should be increased at the front end of the Plan period through the allocation of additional sites that are able to be delivered in the first five years of the Plan period. The Annual Housing Target Table contained in Policy S2 should be modified accordingly.

Land at Pond Farm and Land South of New Pond Road was identified in Volume V Section 17 of the Green Belt and Countryside Study (prepared in 2014). The Promotion Site was identified as area F6 which was then further divided into F6A and F6B. In the summary, the Report identified the range of significant defensible boundaries surrounding the wider site and concluded that site F6 B, ‘‘…provides opportunities to accommodate development without significantly compromising the purposes of the Green Belt’. Additional technical assessments both conclude site No. 80 does not contribute to the purposes of including land within the Green Belt. Site No. 80 should be removed from the Green Belt and the Green Belt boundary modified and identified accordingly in Appendix F: Policies Map.

I strongly object to the evidence behind the projections used to assess housing need. The question concerning the evidence underpinning the Proposed Submission Local Plan provided by The Strategic Housing Market Assessment, should not be – ‘is it adequate, up to date and relevant’, but simply - is it a valid method of analysis? It is clear from the conclusions of the NMSS report (commissioned by GRA, EGRA) that the ‘objectively assessed housing need’ calculation is deeply flawed and invalid. Since this flawed analysis significantly overestimates the yearly housing need figure, the current housing market assessment must be adjusted in the light of this finding.

I fully support the conclusions and suggestions made by GRA in their report, particularly those concerning provision of housing for students. Students have very different, specific housing requirements from the general population which should be catered for by specialist providers, primarily the University of Surrey itself. Leaving the greater part of this provision to the open market causes considerable problems, as evidenced by issues in Oxford, which resulted in the need for licensing of all HMO rental properties across the city, just to ensure basic quality and safety.

I wish to officially log that I object to Policy A26 and the inclusion of Blackwell Farm and surrounding green belt land as a development site [Policy A26 & para. 4.1.9]

1) Disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]. This has been ignored by the council and the local plan.

2) Directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas. This additional office space is not required and will add additional unnecessary burden on local housing needs.

3) Ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]. Traffic is already a major problem in Guilford and this development will make travel down the A3 and Hogs Back and surrounding areas unbearable.

4) Adds to air pollution in neighbouring areas, which already exceeds safe EU limits for nitrogen oxides [Policy A26].

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I strongly object to removal of Brownfield site (A34) from the Plan

Site A44 in Broadford Business Park has also been removed. This is another brownfield site that has already been developed. The Council’s claims to “have adopted a ‘brownfield first’ approach” (page 5) but this is clearly not the case, and is contrary to national guidelines.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **I strongly object to removal of Brownfield sites (A4) from the Plan**

Site A4 in Guildford has been removed. Why? This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

I strongly object to the extended development in the Green Belt (Policy P2, Site A43)

I object to further extensions to Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I strongly object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

**I object to the unfair imbalance of the Plan across the borough.**

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within
3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch)

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

- The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, ... (site allocation A25) [ than the Burnt Common site did ]”
- The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

I strongly object to removing Send Business Park from the Green Belt (4.3.15).

Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

I strongly object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5: "We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

OBJECTION TO "THE GUILDFORD PLAN -JUNE 2016"

I have lived in East Surrey since 1967 and over the years have sadly witnessed the gradual erosion of the rural aspects of the area despite living in the "Green Belt" as seems to be the case in most rural areas in Surrey over the years.

Whilst I am sure the majority of people living in Surrey and farther afield readily accept that there is a need for more housing (particularly affordable housing for the younger generation and key workers) any Plan has to be based on sensible and sustainable numbers.

As a very frequent visitor to see my son, daughter-in-law and grandson who live in West Horsley, I am shocked at seeing the proposals for future housing in the West and East Horsley Parishes contained in "The Guildford Plan - 2016". The effect of a 35% increase on the number of current homes in the area will be profound, particularly with as I understand it little or no explanation as to how the existing infrastructure and services generally will cope with such a huge explosion of building.

Based on my comments above I object most strongly to the proposals set out in "The Guildford Plan" and urge Guildford Borough Council to have a serious rethink about the sizes/numbers of developments proposed and table a much more realistic revised Plan in line with the wishes of electorate of Guildford Borough Council.

I am writing as a concerned parent of a West Horsley resident regarding the latest changes made to the Guildford Borough Proposed Submission Local Plan June 2017 consultation, having expressed my concerns previously.

It would seem that no change is being proposed to the idea of insetting West and East Horsley from the Green Belt which will risk the outstanding countryside surrounding the two Parishes being overwhelmed by the Metropolitan Sprawl. Although there is a reduction in the number of new homes being proposed for West Horsley there is no evidence of an overall reduction in the number of new homes but clear evidence of an imbalance between the number of new homes being proposed for the Eastern side of the Borough compared with the Western side.

Hopefully the final submission will include realistic infrastructure upgrades in line with the proposed housing developments. Finally, in my view the proposed Wisley Airfield redevelopment would be a disaster for the area.

---

Comment ID: pslp173/291  Respondent: 17307937 / Eufi Atkinson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - East Horsley
As a resident of East Horsley I write, **YET AGAIN**, to **OBJECT** most strongly to the Proposed Guildford Local Plan 2017.

The 2016 Local Plan had some serious effects on our village:

- The extension of the settlement boundaries of the Horsleys into the Green Belt
- The removal of the extended village areas from the Green Belt
- The proposal to develop **SIX (!) large housing sites and several smaller sites in the extended settlement area**

The changes in the Guildford Local Plan 2017 are minimal, **FOUR of the original development sites remain**, including the proposal for 2,000+ houses, plus sheltered/care homes, Gypsy/Traveller pitches (!!), employment/retail space and two schools on the former Wisley Airfield.

**Wow, is that a town or a city?!**

There were, I understand, over 30,000 objections to the 2016 Local Plan which identified a clear desire to limit expansion into the Green Belt. I see no evidence in the Guildford Local Plan 2017 that this plea has been heeded.

Why do we have to, yet again, write to express our objections the proposed developments? This process is clearly designed to wear the local residents down until the plans get implemented. 30,000 objections last year, but yet again, here we are having to comment on a Local Plan that keeps being thrust down our throats.

**Scale of the Proposed Developments:**

The developments will further aggravate the already overstretched infrastructure of both East and West Horsley. The road through East Horsley (Ockham Road North & South) is inadequate even now, and cannot be upgraded. Normal cars have to slow down just to pass each other in certain parts, and climb onto the pavement when a truck passes through.

And you want to add further traffic to the area?!

The development plans for 2,000+ new dwellings plus considerable related infrastructure on the Wisley Airfield, is only two miles from East Horsley. I am of the opinion that the Horsley area will not be able to absorb the increased population, traffic and pollution.

It is not realistic to assume that the new town will restrict itself to the Wisley Airfield area. Their daily routine will spill into the surrounding areas including East Horsley. We do not have sufficient facilities, schools, surgeries and other services. Gas, electricity and telephone services in the area are already operating at full capacity on very old pipes, wires and exchanges. Local roads are too narrow and winding to take the existing traffic, and there is insufficient parking anywhere, even in front of most homes. The local roads were built in the 1930s or before, and are mostly no more than narrow lanes where cars have to slow down to pass each other. The access roads to East Horsley are narrow and winding and are not sufficient to handle even today’s traffic.

The scale of the proposed Wisley Airfield development is way out of proportion and way out of character to the existing infrastructure and the space available in this small, picturesque old village. The new town will completely destroy the special character of our historic village.

**Station Parade a “District Centre”??**

There is a clear misunderstanding of the nature of the facilities in our village centre, it would be completely inappropriate to target the area for future urban development. Please, get out of your offices and come and see the village in action on
any normal week day and week end, see how the facilities, roads, drainage etc are already overstretched. As a certain tennis player often said: You cannot be serious with these proposals!

Green Belt:

The Green Belt is a policy for controlling urban growth. The idea was developed so as to have a ring of countryside where urbanisation would be resisted, maintaining an area where agriculture, forestry and outdoor leisure could be expected to prevail. The fundamental aim of a Green Belt policy is to prevent urban sprawl by keeping land permanently open, and consequently the most important attribute of Green Belts is their openness.

The Metropolitan Green Belt around London was first proposed by the Greater London Regional Planning Committee in 1935. The Town and Country Planning Act 1947 then allowed local authorities to include Green Belt proposals in their development plans. In 1955, the then Minister of Housing Duncan Sandys encouraged local authorities around the country to consider protecting land around their towns and cities by the formal designation of clearly defined Green Belts, to prevent urban sprawl.

The 2012 National Planning Policy Framework (NPPF) issued by the Government clearly sets out the following purposes (amongst others) for including land with the Green Belt:

- To check the unrestricted sprawl of large built-up areas
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns

How do you reconcile the Wisley Airfield proposal, and the removal of the Horsleys from the Green Belt, with the NPPF’s guidelines above?

It appears that you now want to ignore the very reason for having designated Green Belts around urban areas, and specifically around my village of East Horsley. I strongly **OBJECT** to your proposals.

**Objection:**

I know that I am not the only person writing, yet again, to **OBJECT** to the Guildford Local Plan 2017. I hope that the GBC, as our elected representatives charged with representing our interests, will **LISTEN TO THE COMMUNITY**.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy A43 - Land at Garlick’s Arch, Send Marsh I object to Policy A58 - Land at Burnt Common, London Road I object to Policy 2 at paragraph 4.3.15

My objections to these proposals are based on the ignorance of a local council to ignore hundreds of previous objections made by local people who already live, work and contribute to the community.

The traffic congestion is getting worse and the impact of the above developments on the local main roads and country lanes will lead to grid lock through Send and Ripley; disruption to the A3 and other local A roads.

The inclusion of a requirement for ‘travelling show people plots’ in this location; this sounds like an opportunity to recognise and publicise diversity rather than a proven requirement. Where are these people now and why do they need a new/other site?

Previously the Burnt Common site was deleted from the 2014 plan because of all the objections made - the populace was listened to so why has this been reintroduced as a new allocation - did the council think we would not notice; had changed our minds or don’t care?

Why are new industrial and warehouse developments in the middle of the green belt being proposed when Slyfield and Guildford have empty sites and industrial units - sounds like poor planning and project management?

Thank you for affording me this opportunity to object and I hope you take the concerns raised seriously.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object strongly to the proposal to inset Send Business Park from the Green Belt.

I object because this is effectively an old non-conforming user in an area of outstanding countryside next to the tranquil and pleasing River Wey Navigation. It is a sore thumb in an area of natural beauty.

I object because of the very restrictive road access for traffic from both ends of Tannery Lane.

I object because expansion or development of this area detracts from the rural nature of the Green Belt and is totally inappropriate.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object because the previous plan to build 45 houses on the site was bad enough. The extra 15 houses now proposed will exacerbate the problems and shows contempt to the hundreds of Council taxpayers who previously objected to the 45 houses then proposed. No evidence has been produced to show that any houses are required here, especially for the extra number now proposed.

I object because access and traffic problems will be very much worse in Tannery Lane at the junction with the A247 in Send Road and totally disastrous at the Newark Lane junction. Tannery Lane for most of its length is winding and barely wide enough for one vehicle. There is no footpath and houses abut directly onto the road.

I object because the proposal will worsen erosion of the Green Belt in Send.

I object because surface water is already a serious problem and this proposal will make it very much worse.

I object because the proposal will detract from countryside views from the River Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object because the proposal ignores all the thousands of objections made by local people and makes things much worse by including even more houses, which looks like a punishment of local people having the temerity to object.

I object because there is no proven demand for travelling show-people in this location.

I object because this site is beautiful Green Belt land and there are no exceptional circumstances to merit removing this protection.

I object because it is grossly excessive development of our village and the number of houses proposed is overwhelmingly too many.

I object because this is a site of wonderful ancient woodland that dates back to medieval times.

I object because this proposal will connect Ripley and Send and defeat the key purpose of the Belt.

I object because the site often floods and is currently a Flood Zone 2 allocation.
I object because the site is contaminated with lead shot which has been accumulating for 50 years.

I object because the enormous amount of traffic which will be generated by this proposal will catastrophically clog up the roads of both Send and Ripley, many of which can barely take two lines of traffic. It will also make the clogging up of the nearby Guildford By-pass disastrously worse. One wonders whether the proposers of this policy ever use the by-pass, particularly travelling south, when bottle-necking can extend right to Burpham even on an ordinary weekday.

I object because potential objectors have never been shown the figures on which the proposed number of additional houses is based and which can only be of benefit to those who stand to profit from such proposals. Justice must not only be done but must be visibly and manifestly be seen to be.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

I object to this proposal as it was deleted from the 2014 draft because of the number of objections previously lodged and nothing relevant his since happened.

I object because the word ‘maximum’ for industrial use (which was more than enough already) has unbelievably been altered to ‘minimum’ which means that there would be an obligatory 7000 square feet of building on the site and no top limit to the industrial buildings allowed in the new plan. This cannot be right when there has been a decline in the demand for industrial land.

I object because this site was deleted from the 2014 draft as a result of all the objections. It cannot now be right that it has now been reinstated greatly enlarged. Something very sinister must be going on for this to be done.

I object because there is absolutely no need to build industrial or warehouse buildings in the middle of the Green Belt when Slyfield and Guildford have empty sites and industrial units. One wonders what is going on.

I object because the 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole Borough, not a huge over-allocation of 10 hectares at Send in the Green Belt. Again, it appears that a huge unnecessary project is being proposed to destroy this beautiful part of the Green Belt, to nobody’s benefit but those with an interest in development.

I object to this proposal because it will lead to gridlock both on small local roads and on the Guildford By-pass.

I object to this proposal because it will join up existing villages and defeat the purpose of the Green Belt.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Employment

MVDC’s Functional Economic Market Area assessment identifies commuting linkages between Guildford Borough and Mole Valley, with reasonable connectivity between the two authorities by both car and train (particularly from the Leatherhead and Dorking areas). The amendments which clarify the location and amount of strategic employment allocations are welcomed as it would offer wider employment opportunities which may be of benefit to residents of Mole Valley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Rural Economy

The amendments to the rural economy policies to support small incubator units, loss of shops and services are welcomed given the similarities between the rural areas and villages of our adjacent authority areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Transport

The amendments to the sustainable transport section seeking to mitigate the transport impacts of new development are supported as Guildford Borough is within commuting distance of MVDC by both car and train.

MVDC still consider that the Proposed Plan is sound and recognise the ongoing and previous Duty to Cooperate working that has taken place between our two Councils in the production of the Guildford Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Green Infrastructure

The amendments to the supporting text which clarifies that Natural England has agreed to review the AONB Boundary and that the work is included in the current work programme are supported. MVDC notes the policy name change and that the AGLV will be retained until such time as there has been a review of the AONB boundary. Please note that MVDC is committed to and would wish to be involved in this cross boundary green infrastructure review.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We act for Crimson Project Management Limited. This representation relates to the proposed allocation of land at BLACKWELL FARM- POLICY A46 & PARA 4.1.9. The draft Policy A46 proposed to allocate the above site for a residentially led mixed use development including a new primary school, secondary school and other development. Our clients object to this proposed allocation on the basis that there are more sustainable options available for the provision of additional housing and education facilities through a sustainable urban extension to Fairlands where there is an established existing community with local retail and community facilities already in existence and where an extension to the village would help sustain and enhance these facilities. It seems clear that the Blackwell Farm proposal has attracted significant objection on the grounds of highway and traffic impacts of the development on the local highway network. It should be noted that there are no highway objections to the provision of a new education facility at the Rokers Farm site at Fairlands. The Blackwell Farm allocation would also have demonstrably harmful landscape impacts on land which, as the draft policy itself recognises, is variously within an Area of Outstanding Natural Beauty and an Area of Great Landscape Value. Whilst situated in the Green Belt, the Rokers site in Fairlands would not result in the same impacts on national landscape designations, nor any other planning considerations that cannot be appropriately mitigated.

In the circumstances, the proposed submission draft Local Plan should be further amended to include an allocation at the Rakers site, Holly Lane, Guildford for a mixed use development including an education facility, housing, community and other facilities.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Consultation Draft Guildford Borough Local Plan July 2014 identified a need for a new five form entry secondary school to the north or west of Guildford. A site for the school was proposed to be allocated at Salt Box Road, Guildford. The Regulation 19 submission Draft Local Plan 2016 deleted this proposed allocation.

Instead, a seven form secondary school was proposed to be allocated at a strategic mixed use site at Normandy/Flexford. The revised submission Draft Local Plan 2017 now deletes the Normandy/Flexford allocation and proposes both a new primary school and secondary school on land at Blackwell Farm.

This is now the third site that the Council has proposed for the school. It is acknowledged in the justification for the Blackwell Farm allocation (A26) that the access road to the proposed allocation would have adverse impacts on the AONB and the AGLV which will need to be minimised. It is also accepted that there will be an impact on the A31/A3 junction in advance of delivery of the Highway England A3 Guildford scheme and finally that interventions will also be required to address the potential highway performance issues which would result from the development. Crimson Project Management has recently been refused planning permission for a mixed use development which would include a new educational facility as part of a sustainable urban extension to Fairlands. There were no highway objections to the projection nor any other landscape, ecology or other planning objections that could not be appropriately mitigated.

Neither the school nor any other part of the development would have resulted in adverse impacts on any adjoining neighbour. The development is deliverable now and Guildford Education Partnership would be the delivery partner for the new school. This places the Rokers site in a better position to deliver the required educational infrastructure than any of the
sites thus far proposed by the Council. In the circumstances, the Infrastructure Schedule contained at Appendix C should be amended to include provision of a new education facility as either a two form entry primary school with room for expansion of a five form entry secondary school on the Rokers site at Fairlands as part of a new mixed use development to include housing, community uses and sporting facilities.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Our clients object to Policy S2 and to the accompanying Table 1 on the grounds that the proposed spatial strategy and the proposed allocations in respect of the provision of housing and education facilities are inconsistent with the overarching strategic objective of delivering sustainable development and the presumption in favour of sustainable development that is set out at Policy S 1.

In particular, the draft plan is deficient in not allocating a sustainable urban extension to Fairlands for a mixed use development comprising a new educational facility, housing, community and other local facilities whilst allocating sites for such uses which are demonstrably less sustainable. Table 1 should be amended to include the sustainable extension to Fairlands as a village extension that will deliver up to 400 new homes within the next five years.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The council considers that the new version of the policy P1 Surrey Hills Area of Outstanding Natural Beauty gives less protection to the AONB than the text previously proposed. They believe that the text:

"will be conserved and enhanced to maximise its special landscape qualities and protect it from inappropriate development. All proposals will be considered against whether they:"
• conserve and/or enhance the setting and views of the AONB
• conserve wildlife, historic objects or natural phenomena within it
• promote its enjoyment by the community and visitors to the area
• support the rural economy of the Surrey Hills area
• provide or maintain public access to the AONB.”

should not be changed to the proposed text:

“will be conserved and enhanced to maximise its special landscape qualities and scenic beauty.

(2) In accordance with national planning policy, there will be a presumption against major development in the AONB except in exceptional circumstances and where it can be demonstrated to be in the public interest.

(3) High priority will be given to the conservation and enhancement of the natural beauty of the AONB and development proposals must have regard to protecting its setting.”

[It is recognised that paragraph (2) relates to the subsequent part of the policy and not to the text noted above that is proposed to be removed.]

Attached documents:
Policy A26 (Blackwell Farm)
I am writing to object in the strongest terms to the above policy in the Guildford Local Plan.
I have had a home on the Hog's Back since 1936 and the enormous increase in traffic along what used to be a single-lane country road, before it was dualled, is hard to believe.

The suggestion that 1,800 new homes should be built at Blackwell Farm with access on to the A31 Hog's Back at a signalised junction and roundabout at the top of the Farnham Road is ludicrous. This stretch of the A31 westbound before it joins the A3 northbound is notorious for traffic jams and queues, not only during peak hours but throughout the day, sometimes for no reason other than volume of traffic but exacerbated by the slightest incident occurring on the A3 or in Guildford town. The pollution caused by this increased traffic will worsen the already high levels of Nitrogen Dioxide, well above the EU legal limit, which have recently been recorded at the A3 end of Compton village.

In order to have more housing available, Surrey University could free up the housing in and around the town, presently occupied by students, by building on their land at Manor Park which they removed from the Green Belt many years ago and since then have failed to meet their obligations as part of that development.

Further damage by the University to this nationally important countryside should be prevented at all costs while other options are available to them, particularly by fulfilling their existing obligations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
### Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

**Site A42 Tannery Lane, Send**

The increase in housing numbers from 45 to 60 at Site A42 in Tannery Lane will have a significant impact on the already highly congested local rural road network around and within Ripley. The access from Tannery Lane onto Newark Lane is a single track road, with passing spaces, extra traffic on this road will invariably lead to additional congestion and high possibility of accidents.

### Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

**Housing at Site A43 Garlicks Arch would be on greenbelt land. The potential increase in the proposed 400 dwellings to 650, would be extremely harmful to the rural nature of the surrounding villages. The inclusion of 6 x travelling show people plots with associated storage facilities is entirely inappropriate in a rural environment within the greenbelt and there is no identified need within the Local Plan documentation. The allocation of 6 travelling show people plots is the designated formula for 1500-1999 homes on the same site according to the 2017 local plan and so it is out of scale with the proposed development. The potential for a substantial increase in industrial floorspace from 7000sq m to an unspecified amount at the site A58 Burnt Common does not provide local residents with enough information for a full and proper consultation given the ambiguity and lack of detail within the document. The potential for a waste management facility at site A58 Burnt Common is briefly mentioned and does not allow for full and proper consultation.**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable. It is nonsensical to not use a space that is already allocated as brownfield at the expense of greenbelt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2499  Respondent: 17316257 / Neeley Jackson  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlick’s Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

As explained having only just moved into the area, I was not aware of the congestion on Send Barnes Lane. I have quickly come to realise this road is used as a main cut through to get to the A3 to Woking and vice versa. Only this morning I found myself having to queue for some time to get out of my own road. This will only be compounded with the amount of vehicles using the road should the large amount of additional housing be created.

My children go to the local school and in the two weeks they have been there I have been shocked at both the speed and size of vehicles using the road. Having already moved away from an area due to health concerns it causes me great anxiety to think this could happen again. I have seen one of the parents taking matters into her own hands and wearing a hi viz jacket and waving a 30mph sign at drivers, such is the concern of such a busy road which will only get worse if the vast amount of houses are built.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The inclusion of site A58 Burnt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, ... (site allocation A25) [ than the Burnt Common site did ]”

2. The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.
Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan is self-inconsistent in respect of traveller sites.

A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots ...” Clearly A50 more than covers the total "need" of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

This is of huge concern to me as a new local resident. Not only from a health perspective but yet again for the congestion this will add to the surrounding area

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost (i.e. a reason for not delivering affordable houses). That has now been removed, thereby accepting that needing to make greater than normal profit IS to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

This is beyond insulting. If affordable housing is not to be provided on the sites allocated by the council then what is the point, where will these houses be built.

#### Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

My comments are as follows:

1. **SUMMARY** It appears that Guildford’s proposal for more than 12000 new homes is excessive and based on flawed evidence. The proposal would lead to unnecessary loss of green belt, damage to Guildford’s character and further increases to the already high level of traffic congestion in our gap town.
2. **POPULATION** There is evidence that population growth has been greatly overestimated because students who leave have not been recorded.
3. **QUALITY OF LIFE** If the council does not control expansion the 2017 plan will harm the qualities that contribute to the economy of Guildford.
4. **LAND ALLOCATION** So much land is allocated for development in the 2017 plan that Guildford may have to provide homes for Woking.
5. **CONGESTION** The proposals in the plan will exacerbate the congestion problems that are already very bad.

I hope you will consider my comments and amend the plan accordingly.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

[text of attachment reproduced below]

I am writing on behalf of the Surrey/Hants Borders Branch of CAMRA, the Campaign for Real Ale, in relation to the above consultation.

You will recall that I submitted comments on policies E5, E8 and E9 in response to last years consultation exercise. I do not consider these comments and suggestions to have been addressed in the latest version of the Plan and I therefore understand that these will be passed onto the Inspector for consideration.

I would however also like to pass comment on the changes you are proposing with respect to Policy E5 and Policy E9. Both Policy E5 and E9 have been amended to provide additional protection against the loss of shops and services and I would ask that consideration is given to extending this change to also include public houses (ie, Class A4) Pubs are essential to the well being and community cohesion in both rural and urban areas, where facilities are scarce and transport links typically poor. Whole communities often have a single pub to act as the focus of the community it is essential that they are retained where viable and giving this additional level of protection would help in this regard.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/2648  Respondent: 17320801 / Terence O'Rourke Ltd for M&G Real Estate (Andrew Elliott)
Agent: Terence O'Rourke for M&G Real Estate (Andrew Elliott)

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

See attached document for full comments. The main response is as follows:

M&G strongly supports changes to the policy to confirm an increase in the allocated number of homes and increased A3 food and drink and A4 drinking establishment floorspace within the site. It is considered that these changes are soundly based taking into account the location and capacity of the site, and the latest evidence of need for new homes and leisure provision in the town centre. They reflect current and longer-term trends in the changing mix of successful town centre uses. M&G supports the flexible wording of these policy provisions in that no minimum floorspace or unit provision is required.

Whilst not objecting to the 400 home limit in principle, it is suggested that this be worded with allowance for flexibility in the event that small increases in the total number of homes are proposed. It is recommended that the wording be adjusted to say up to “approximately” 400 homes, or “about” 400 to avoid policy conflict in the circumstance where, say, a 410 unit scheme comes forward and other relevant policy requirements for the site are met.

There are a number of other new changes to Policy A6 that present significant concern to M&G from a planning and project delivery perspective. M&G objects to the following changes, which are not soundly based.

i. The expression of the allocated comparison retail floorspace provision as a minimum.
This change reduces the flexibility of the policy approach and could, potentially, threaten the deliverability of a project given market changes over the plan period or changes in other key commercial parameters including whether or not an anchor tenant is secured. Notably, land assembly is required to deliver the full site allocation project. In the event that full land assembly is not achieved the ability to meet a policy compliant minimum retail floorspace within a residual land area would be challenging.

Whilst it is recognised that the 2017 retail and leisure study addendum suggests that up to date forecast comparison retail growth requirements are less than predicted by the previous study, the report is strongly caveated that capacity forecasts carried out over a long period of time are inherently less certain and should be treated with caution. In practice comparison retail need forecasts could increase or reduce during both the plan period and beyond for a variety of economic reasons and therefore a flexible policy approach is necessary to reflect this. M&G requests that the comparison retail floorspace allocation for the site is expressed as an approximate figure (with 45,000 sq m gross as previously included in the policy being reflective of M&G’s current draft redevelopment proposals).

It is recognised that proposals for this long-term project will need to be accompanied by a retail impact assessment to justify the proposed floorspace quantum in the context both of other existing provision in the town and of Guildford’s position as a centre competing with other town centres sub-regionally. This offers another check to demonstrate that the quantum of floorspace coming forward in a scheme is appropriate.

National Planning Policy Framework (NPPF) para 14 states that local plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change. Paragraph 21 requires policies to be flexible enough to accommodate needs not anticipated in the plan and to allow a rapid response to changes in economic circumstances. NPPF paragraph 157 further identifies that it is crucial for plans to promote the flexible use of land. Accordingly it is an unsound approach for the plan to apply a strict minimum floorspace quantum requirement in the policy.

ii. The specific policy requirement for provision of one gym (D2) use

The Guildford Retail and Leisure Study Addendum, February 2017 considers forecast need for new commercial leisure provision, focusing on cinema, food and beverage, and fitness and leisure provision. Opportunities for additional cinema screens (new/expanded cinema facility in Guildford town centre) is identified together with the potential need for two branded gym facilities, again with demand likely to be focused on Guildford town centre.

M&G supports the provision of one or more D2 assembly and leisure uses as part of a successful mixed use North Street redevelopment, but considers that policy should be worded more flexibly to encourage D2 uses (such as a gym provision) that broaden the offer of the town centre, rather than policy being prescriptive about a specific D2 use for the site. As currently drafted the policy requirement is inflexible, potentially stifling opportunities for alternative or innovative complementary commercial leisure provision that can support a successful scheme for Guildford.

iii. Unnecessary design requirements

Items (2) and (5) of Policy A6 are unnecessary, involving substantial overlap and duplication with the content of Policy D4 character and design of new development.

Whilst M&G does not object per se with the requirements of (2) and (5) relating to site context, street pattern, heritage and views, the content of (3) on scale of development should be removed. An appropriate scale and mix of development can be considered through pre-application discussions, environmental impact assessment, proposed mitigation measures, and the determination of a planning application. Policy requirement (3) is clumsily worded and unworkable, and fails to recognise the role of viability in determining a deliverable mix of uses or the need for flexibility in a period of changing market conditions and retail trends.

Other comments on Policy A6

The use of floorspace figures in the policy needs clarification.

It is recommended that all retail/commercial floorspace figures are expressed in the policy as square metres on a Gross Internal Floor Area (GIFA) basis as defined by the Royal Institution of Chartered Surveyors. M&G has used this form of measurement for the purposes of its draft North Street development scheme.
To improve the policy and for the purposes of soundness we recommend the following varied wording for the policy as a whole. Note that this includes a suggested small tweak to the flood risk wording to comply with national guidance:

**POLICY A6: North Street redevelopment, Guildford**

**Allocation**

The site is allocated for a comprehensive mixed use redevelopment with:

- Approximately 45,000 sqm (gross internal) additional comparison retail floorspace
- Approximately 6,000 sqm (gross internal) additional food and drink (A3) and drinking establishments (A4)
- 400 homes (approx.) (C3)
- Provision of (D2) assembly and leisure use floorspace, such as a gym

**Requirements**

**Office provision**

(1) A minimum of 5,500 sq m (gross) of existing office (B1a) floorspace will be retained.

**Design, vitality and connectivity**

(2) Development to comply with Policy D4 on the character and design of new development, responding to the context set by the surrounding street pattern and historic environment, including the adjacent Conservation Area. Particular care to be given to massing, heights, views in and out of the site, and roofscapes.

(3) Design to enhance and respond to the existing historic shopping core and;

- Improve connectivity with High Street and lanes, and
- Improve underused areas, and
- Improve the public realm

(4) Mix day and night time uses to add to vitality of area

(5) 24 hour access to public streets and squares

**Bus interchange**

(6) Bus interchange facilities presently provided at Guildford bus station on the site are to be provided in a suitable alternative arrangement to be located partly or wholly off site

(7) On-street provision of bus stops and waiting facilities within the town centre will be designed to facilitate interchange between bus services and to be integrated with other town centre activities.

**Transport**

(8) Stopping up of Commercial Road and Woodbridge Road (between North Street and Leapale Road) and Traffic Regulation Orders affecting the roads surrounding the development will be necessary including changes to Leapale Road, Onslow Street and North Street to create more pedestrian space and to facilitate the movement of buses.
(9) The development will be designed to maximise opportunities for sustainable transport given its central location that promotes walking, cycling, bus and train use. By integrating transport with car parking provision, the number of car journeys will be minimised in favour of sustainable modes.

Flood risk

(10) Achieve flood risk betterment, appropriate mitigation and flood risk management, and have regard to the recommendations of the Level 2 SFRA

(11) Avoid development of ‘highly vulnerable’ or ‘more vulnerable’ uses in flood zone 2 (medium probability of river flooding) and flood zone 3 (high probability)

Assessments

(12) To be determined at planning application stage, but including;

(a) Retail impact assessment

(b) Environmental impact assessment (EIA)

Opportunities

(1) This site offers a major opportunity to reinforce Guildford’s comparison retail offer, provide town centre housing, improve the leisure offer of the town centre, to create new squares and streets, and to improve the appearance of North Street

(2) Help to reduce flood risk in the local area

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

See attached document which includes proposed updated wording for the policy.

Attached documents: 170721 M&G reps Guildford Local Plan 2017.pdf (252 KB)
The policy confirms that use class A1, A2, A3 and A4 development in Guildford town centre will not be subject to a carbon reduction requirement, however the requirement applies to new town centre apartments.

Paragraph 4.5.30 states that new buildings “except retail developments in Guildford Town Centre” must achieve a reasonable reduction in carbon emissions.

Clarification is required on whether the new homes element of retail-led mixed-use development on North Street will be subject to the policy.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )

M&G welcomes this new design policy that will apply to all new development, notably the encouragement given to innovative architecture in the appropriate context, and use of appropriate density to make the most efficient use of land whilst responding to local character and context.

M&G requests that the wording of bullet D4(1n) on space standards be amended as follows, to repeat the approach used for D4(i). It is noted that the application of the standard should not compromise viability, and therefore there may be circumstances where full compliance is not possible and some flexibility in the application of the policy is necessary.

**POLICY D4: Character and design of new development**

(1) High quality design is expected in the borough. All developments will:

(n) be expected to have regard to and perform positively against the nationally described space standards as set out by the Department of Communities and Local Government (DCLG).

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

The recent additions to the evidence base are welcomed and help to demonstrate that the Local Plan evidence base is up to date. Of particular interest to M&G is the Guildford Retail and Leisure Study Addendum, February 2017. This confirms that Guildford town centre accounts for most of the Borough’s forecast need for comparison goods floorspace. This reflects the centre’s strong market share of comparison goods expenditure and strength of the comparison retail offer. Nevertheless the forecast capacity results set out in the study addendum are lower than those identified for the town centre in the 2014 retail and leisure study update covering a similar period. The identified reasons for this include lower forecasted expenditure growth Borough-wide.

The report confirms that capacity forecasts carried out over a long period of time are inherently less certain and should be treated with caution. This is principally due to the impact of economic, demographic and market trends on the key assumptions and forecasts. As a result the report authors, Carter Jonas, advise that greater weight should be placed on the short-term forecasts carried out over a three-five year period in accordance with National Planning Practice Guidance (NPPG). M&G supports these comparison goods forecasts and findings and the appropriately emphasised caution on their use over a long time period.

The study update also considers forecast need for new commercial leisure provision, focusing on cinema, food and beverage, and fitness and leisure provision. Opportunities for additional cinema screens (new/ expanded cinema facility in Guildford town centre) is identified together with potential to support new food and beverage floorspace with demand likely to be focused on Guildford town centre. The leisure assessment also identifies the potential need for two branded gym facilities based on projected population and current participation rates in this leisure activity, again with demand likely to be focused on Guildford town centre. M&G supports these commercial leisure provision findings.

The content of the Borough Council’s Retail and Town Centres Topic Paper, 2017 is also of particular interest to M&G. The topic paper correctly identifies at paragraph 4.30 that the methodology for forecasting floorspace needs used in the retail and leisure study and addendum is based on a standard constant market share approach, which does not take into account any potential uplift in market shares and capacity (quantitative need) that could occur due to the ‘claw back’ of expenditure from competing centres to new retail floorspace in town centre locations, for example the new anchor store as part of the proposed North Street scheme.

At 4.39 the topic paper correctly summarises that the evidence underpinning the retail study points towards strong indicated signs of interest in Guildford town centre from food and beverage operators, which has been reflected in an adjustment to
the capacity of the allocation for the North Street site A6 in the Local Plan, from 3,000 to 6,000 sq m (approx.) food and drink (A3) uses and drinking establishment (A4) uses between the 2016 and 2017 versions of the Submission Local Plan.

At 5.6 and 5.7 the topic paper identifies from the retail and leisure study addendum that forecasted comparison retail growth requirements have reduced and taking into account the revised need figures and a “reconsideration of the capacity and suitability of the North Street redevelopment site for comparison retail and other uses” the proposed retail floorspace capacity is reduced for A6 North Street from 45,000 sq m gross to 41,000 sq m gross. M&G comments further on this in its representation response to Policy A6.

At paragraph 6.1 the topic paper refers to providing an increased residential element to the allocated North Street regeneration site of up to 400 homes (C3 use) in response to comments raised on the 2016 Submission Local Plan, but also implies that additional capacity for residential is partly in exchange for reduced comparison retail floorspace (given updated forecasts of comparison retail need in the retail and leisure study). M&G comments further on this in its representation response to Policy A6.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3070  Respondent: 17321089 / David Banham  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A42 change at Clockbarn in Tannery Lane because:
The increase to 60 homes in place of 45 homes is 33% more and too much
It ignores all the hundreds of previous objections made by local people
It will worsen access and traffic problems in Tannery Lane and at the A247 junction
It will make erosion of the Green Belt in our village worse
It will make surface water flooding, which is already bad, even worse
It will impact open countryside views from the River Wey Navigation
It will worsen traffic congestion in the local area which is already busy and often sees heavy traffic during and after peak hours, even when the major roads have cleared.

There is no infrastructure, (schools, roads, shops, etc.), in place or proposed, to support the increased demand that will result from this development. It will increase the risk posed to cyclist using Tannery Lane and the surrounding roads. There is no proposal to improve cyclist's safety on these narrow country roads that will see an increase in motor vehicle traffic. This is of particular concern to me as I transport my children to and from nursery, by bicycle, along these roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3071  Respondent: 17321089 / David Banham  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy M3 change at Garlick's Arch because:
It ignores all the thousands of previous objections made by local people
There is no proven demand for Travelling Showpeople plots in this location
It is beautiful permanent Green Belt and no "exceptional circumstances" exist
It will cause over-development of our village and the number of homes is excessive
It is exquisite ancient woodland that existed at the time of Elizabeth I
It will join up Ripley and Send and defeat the key purpose of Green Belt
It is subject to frequent flooding and is currently a flood zone 2 allocation
It is contaminated by lead shot accumulated over fifty years
It will generate excessive traffic that will block up the local roads of Send and Ripley
There is not currently sufficient infrastructure, roads and schools, to support the proposed increase in demand that will be placed upon the area with the proposed plans.
The additional traffic will cause a significant increase in rush hour traffic trying to gain access to the A3, which already queues through the villages of Ripley and Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3072  Respondent: 17321089 / David Banham  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A 58 at Burnt Common because:
It was deleted from the 2014 draft because of all the objections made previously

The word "minimum" is a change from the previous "maximum" in the 2016 plan and since that time there has been a decline in demand for industrial land
There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt
The impact on small surrounding roads will create traffic gridlock
It will join up existing villages and defeat the purpose of the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: pslp171/1410  Respondent: 17321089 / David Banham  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal to inset Send Business Park from the Green Belt because:
- The impact on small surrounding roads will create traffic gridlock
- It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
- There is highly restricted vehicular access along Tannery Lane in both directions
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

Comment ID: pslp171/1159  Respondent: 17321665 / BOC Limited (Glen Jenkins)  Agent: Savills (Andrew Fido)

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
**Policy E2: Locations for new employment floorspace**

This representation is made on behalf of BOC Limited who is a major employer both across the UK and within Guildford specifically as their UK headquarters are based on the Surrey Research Park.

BOC is strongly supportive of the general thrust of the plan and specifically welcome the designation of the Surrey Research Park (SRP) as a Strategic Employment Site under policy E1, the extension of SRP under policy E4 and the job targets set out across the other employment policies. These clearly reflect the evidence base (including the ELNA 2017) which confirms the importance of SRP to the local economy.

However, there are elements of Policy E2: locations of new employment floorspace which BOC are concerned are at risk of being found 'unsound'.

Whilst criterion (2) confirms that *'the sequential approach does not apply to proposed employment floorspace included in the Site allocations in the Local Plan'*; such as the extension to the SRP under policy E4 (A26), the policy as currently worded would require any site wide employment redevelopment proposals for existing Sites within the SRP to meet the sequential test.

BOC is concerned that this unnecessarily restricts the expansion and investment plans of those businesses already located on SRP, who are equally allocated within the proposed Strategic Employment Site under draft policy E2. This would be contrary to the NPPF, notably the following objectives:

1. 'Building a strong, competitive economy is a key policy objective and there is a clear commitment to *‘securing economic growth in order to create jobs and prosperity, building on the country’s inherent strengths’* (para 18 – 22);
2. ‘Planning should operate to encourage and not act as an impediment to sustainable growth’. (Para. 19);
3. investment in business should not be *‘over-burdened by the combined requirements of planning policy expectations’* (para. 21); and,
4. ‘local planning authorities are expected to *‘support existing business sectors, taking account of whether they are expanding or contracting’*, whilst ensuring that policies are *‘flexible enough to accommodate needs not anticipated in the plan and to allow for a rapid response to changes in economic circumstances’* (para. 21, bullet point 3).

BOC is also concerned at the definition of transport interchanges at paragraph 4.4.15 which limits the definition to *‘rail stations and bus stations within the urban areas or in close proximity to the district centres and Strategic Employment Sites’. *They are concerned that this definition has overlooked the combined public transport node of the Royal Surrey County Hospital, the SRP and the Manor Park Campus which are served by a combination of 11 bus services of which three run at least every 20 minutes in the AM peak including the following:

- route 4
- route 5
- route 14
- route 17/17A
- route 26
- route 27
- route 36/37
- route 38
- route 520
- route 697
- route PT5

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy changes sought:

BOC request that criterion 2 to policy E2 is amended to confirm that the sequential approach will not apply to proposals for the site wide redevelopment or intensification of existing employment premises within the defined strategic employment sites (including the SRP).

BOC request that the definition of public transport interchanges at paragraph 4.4.15 is amended to include the public transport node of the Royal Surrey County Hospital / Surrey Research Park / Manor Park Campus.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E4: Surrey Research Park

This representation is made on behalf of BOC Limited who is a major employer both across the UK and within Guildford specifically as their UK headquarters are based on the Surrey Research Park.

BOC is strongly supportive of the general thrust of the plan and specifically welcome the designation of the Surrey Research Park (SRP) as a Strategic Employment Site under policy E1, the extension of SRP under policy E4 and the job targets set out across the other employment policies. These clearly reflect the evidence base (including the ELNA 2017) which confirms the importance of SRP to the local economy.

However, there are elements of Policy E4: Surrey Research Park which BOC is concerned are at risk of being found 'unsound'.

Part 1 of policy E4 seeks to restrict the existing SRP and the proposed extension detailed in A26 to: ‘business use comprising offices, research, development, design and innovation activities, in any science, including social science, falling within Use Classes B1 (a), (b) and (c) of the Town and Country Planning (use Classes) Order 1987 (as amended), that is complementary to the activities of the University of Surrey’.

Whilst BOC is supportive of the overall policy objectives and broad thrust of this policy there is concern that the restriction of business uses to those ‘in any science...that is complementary to the activities of the University of Surrey’ is potentially overly restrictive and inflexible.

This is considered to particularly be the case for those businesses operating on the existing SRP, some of whom have been in place for a number of years and who require the flexibility to amend or expand their operations in response to their particular corporate requirements.

Whilst the existing flexibility of criterion (3) is appreciated, it is considered that the policy would best be reformulated to be more reflective of the differences between the needs of existing established businesses operating from the SRP, and the new businesses which would be attracted to the SRP extension.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy changes sought:

BOC request that Policy E4 is simplified and amended such that the policy deals solely with the extension to SRP as shown in policy A26, with restrictive provisions on new businesses uses within this area as appropriate. This would allow the existing businesses on the existing SRP to be governed by policies E1 and E2, with a less onerous restriction to general B1 uses, particularly head office functions.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Please see my objections to the local plan for Guildford but more specifically to Site A43 Garlicks Arch, A58 Burnt Common and Site A42 in Tannery Lane.

- Allocation of housing to green belt in Ripley seems unbalanced against the entire borough plans and indeed it is not clear how the plans resolve increased traffic and population to several villages which seem wholly inappropriate considering other non green belt site availability.
- The inclusion of 6 Travelling Show people plots with associated storage facilities is entirely inappropriate in a rural environment within the Green Belt and there is no identified need within the Local Plan
- The allocation of 6 Travelling Show people plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. The Plan is self-inconsistent and therefore not properly constituted.
- The potential for a substantial increase in industrial floor space from 7000 sq m to an unspecified amount at the site A58 Burnt Common does not provide local residents with enough information for a full and proper consultation given the ambiguity and lack of detail within the document
- The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a and does not allow for full and proper consultation
- The increase in housing in A42 Tannery Lane does not demonstrate any care or consideration to the accessibility and traffic flow of this rural lane. As a cyclist this road is already a dangerous route to use and an substantial increase will further increase risk to road users, including pedestrians (who have to walk in the road) and cyclists.
- The A42 Tannery Lane proposal does not make any consideration to the impact on the road joining the main carriage way to the A3. What is already a dangerous junction the increase in traffic will further add to the danger the cross roads with Sandy Lane already creates with poor visibility, cars parked creating hazards and lead to increase bottlenecks during peak traffic times as well as danger to other road users such as cyclists and pedestrians.

As a council, this proposal represents a clear disregard for a beautiful part of our land, your proposal does not add value to this area but will cause and create damage to several villages, untold people and has the potential to cause danger to local residents, cyclists, pedestrians and wildlife in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

The attached letter has been prepared by WYG on behalf of the site owner of Burnt Common Nurseries - The Newship Group. It is submitted in support of the Proposed submission Local Plan: Strategy and Sites 2017 (Regulation 19 submission) insofar as it proposes the allocation of Burnt Common Nurseries for commercial development. Further information is contained in the attached.

Kind regards

[text of attachment reproduced below]

Introduction and Summary case
We are writing on behalf of our clients, Burnt Common Nurseries Ltd, to support the allocation in the emerging Guildford Local Plan of the land known as Burnt Common Nurseries, London Road, Send, for a minimum of 7,000sqm of floorspace falling within Use Classes B1(c), B2 and B8.

Please find enclosed with this letter:
- A statement from Lambert Smith Hampton that examines the local industrial market, the projected need and comments on the appropriateness of the proposed allocation for employment use;
- A Technical Note from RGP on the impact of the proposed allocation on the local highway network; and
- Historical photographs showing the commercial nursery buildings on the site (now demolished).

The allocation is strongly supported to meet the required quantum of employment floorspace identified in the Council’s Employment Land Needs Assessment (AECOM, March 2017), for the Plan period (2015-34) and provide flexibility to help meet future needs/ additional capacity within the Plan period, should this be required.

The Burnt Common Nurseries site (BCN) can accommodate the required minimum quantum of development – a minimum of 7,000 square metres of employment floorspace – at a very early stage in the Plan period and with no significant adverse impact on the highway network, the environment, the character of the surrounding area or residential amenity.

The site is very well screened, particularly from the A3 and nearby limited residential development. As a result, with the exception of the access points from the B2215, development of the site would not be materially visible from the surrounding public realm.

There are very strong reasons for developing the BCN site for new floorspace within Use Classes B1(c), B2 and B8, which are discussed below.

Taking into account all planning considerations, the site is one of the most sustainable and deliverable locations in the Borough for new employment development over the Plan period. It is also able to be brought forward at a very early stage in the Plan period, which supports the local economy, further contributing to sustainability objectives. Accordingly, the site has been allocated in the emerging Guildford Local Plan for a minimum of 7,000sqm of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) with a potential for further industrial floorspace to meet future borough needs.

The wording of the Policy is strongly supported as it aims to facilitate development in the short term to meet immediate identified need, whilst providing flexibility for the future.
Landowners credentials
The Newship Group is a family owned business with mainly manufacturing and distribution companies across the UK and Europe. The Group was founded 40 years ago and during this time it has built a number of industrial estates, some of which remain within the Group. Today the Group manages over 1,000,000 sqft of industrial buildings.

Over the last four years, the Newship Group has worked closely and positively with the Council to bring forward the undeveloped part of the site for business use.

Site ownership
The proposed allocation and the existing employment land it surrounds are in one ownership - Burnt Common Nurseries Ltd. which is part of Newship Group. The site comprises of three warehouses totalling approx. 5,110 sqm (55,000 sqft).

Site description
The site lies between Guildford to the south-west and Woking to the north. The site has good access to the highway network with the B2215 leading directly onto the A3 at Ripley and just one junction up the A3 is junction 10 of the M25.

The site is currently an undeveloped greenfield site comprising approximately 10.6 ha. in size. It lies within the Green Belt, but adjacent to the existing settlement of Burnt Common and Send Marsh.

It comprises land that was previously occupied by vast commercial greenhouses on gently undulating ground (see enclosed photographs). It is enclosed by tree belts to the north and east, tree cover to the south and hedgerows to the east. Urban influences are provided by the residential properties to the east on the Clandon Road behind a row of mature trees, and the adjacent commercial uses to the west (see enclosed photographs).

The overall land holding is not subject to any statutory or non-statutory landscape designations, or cultural or heritage designations. A disused public footpath lies to the east. This previously extended southwards, however the construction of the A3 severed this route and it has been formally extinguished.

The subject site is situated to the south of London Road (B2215), which was formally part of the A3. It is bordered to the south by the current A3, with an area of ancient woodland adjacent and separating the site from the A3.

The site is located directly off the little used but very safe south-west bound carriageway of the B2215. The south-west bound carriageway of the road is wide enough to accommodate two lanes of traffic and the southern side of the road is currently hatched and could be easily modified to safely accommodate the new access. A safe highway access from the site onto this road already exists. In 2016, the landowners transport consultants, RGP, assessed the transport impacts of the proposed development. This has been updated in light of the allocation. RGP conclude that:
- Suitable vehicular access can be provided;
- The development of a minimum of 7,000 sqm of employment floorspace would have a negligible impact in terms of the operational capacity of existing local road junctions; and
- The development can be delivered without the need for any additional slip roads to/from the A3 at Burnt Common.

RGP have found that the proposed development would have a negligible impact on the local highway network and development of the site could even deliver highway improvements that would benefit the operation of the Burnt Common roundabout. A copy of their assessment is attached to this letter.

The character of the area surrounding the site is a mix of residential and commercial. Within the site are three existing commercial units, which provide 5,110 sqm of floorspace in Use Classes B1/ B2 and B8. Directly adjoining the site to the east are residential dwellings, which form part of the area known as Burnt Common/ Send Marsh and this character extends north and eastwards.

Relevant background, history and assessment
The land at Burnt Common Nurseries is a previously developed site located within the Green Belt. The site was originally a commercial nursery, which opened in 1970 and employed 100 people, with seasonal workers increasing this figure to over 200 before Mother's Day and Christmas. The business consisted of three acres of commercial greenhouses to the east of the existing warehouse. In 1993 the Company was forced to close due to fluctuating exchange rates and overseas competition. The following year Consent was given for the demolition of the greenhouses and the change of use of the 40,000 sqft warehouse to unrestricted B8 use. In 1998 permission was granted for a further 11,000 sqft industrial building.
Following review of the Green Belt and Countryside Study (GBCS, 2013/’14), it was identified as a Potential Development Area (PDA) due to its sustainability credentials, accessibility and defensible boundaries.

The site was also identified in the Council’s Strategy and Sites Issues and Options Paper as having good potential for industrial (Use Class B2) and/or warehouse (Use Class B8) uses (see Information Sheet 59 in Appendix D of the Issues and Options Paper 2013).

The site was subsequently allocated in the Draft Local Plan (2014), for at least 7,000sqm of light industrial (Use Class B1c), general industrial (Use Class B2) and/or storage and distribution (Use Class B8) employment buildings and approximately 100 homes (Use Class C3). Land to the east of the existing warehouses was considered appropriate for new homes. Land to the rear and the west of the existing employment buildings was considered appropriate for employment expansion. This allocation was supported by local people and businesses.

The site was removed from the emerging Plan in 2015 in favour of land at Garlicks Arch, to the north-east of Clandon Road. The Garlicks Arch site was allocated for employment land and up to 400 homes. Allocation of the Garlicks Arch site for future development included, in a separate allocation, the provision of a north-bound on-slip onto the A3 and the potential for a southbound off-slip, creating a full four-way interchange between the A3 and Clandon Road (A247) in this location.

At their meeting on Tuesday 24th May 2016, Full Council agreed the Draft Plan for consultation, including the land at Garlick’s Arch and excluding BCN. There was considerable support from the public at the meeting for the Burnt Common Nurseries site.

Objections were voiced to the proposed allocation of land at Garlick’s Arch due to its size and the scale of development (not being commensurate with the scale and nature of the local area), openness in the landscape, poor sustainability credentials (in comparison to the Burnt Common Nurseries site), an inappropriate location for industrial and commercial development, because of the need to drive through a large part of the village to access the site, the risk of flooding, the potential for development to adversely affect three areas of ancient woodland and infrastructure constraints/impact on local services and facilities.

In addition, a very large number of local people and businesses made over 1,600 separate representations on the 2016 public consultation version of the then Proposed Submission Local Plan, specifically on the proposed allocations at Garlick’s Arch and Burnt Common Nurseries. The overwhelming majority of representations objected to the proposed development of Garlick’s Arch, requesting that the land at Burnt Common Nurseries be re-allocated instead. The reasons for this included the fact that the site is previously developed as an established employment site.

As a result, the land at Burnt Common Nurseries was re-allocated for a minimum of 7,000sqm industrial and warehouse development in the Proposed Submission Local Plan (2017). The Council is currently inviting comments on changes to the Proposed Submission Plan (a targeted consultation) prior to submitting the Plan for independent examination. One of the changes is that the amount of employment floorspace to be provided during the Plan period is amended in light of the ELNA. The changes to Policy E1 (in light of the ELNA) and the allocation of BCN as an industrial employment site are supported.

In allocating the site, the Council found that:
1. Land to the west of the existing warehouses is suitable for new employment uses (Use Classes B1c, B2 and B8); and
2. That if new homes are not provided (as shown in the previous 2014 Draft Local Plan), the whole of the site is suitable for new employment uses.

Thus, the entire site has been fully assessed and is considered suitable for employment development.

A credible location for employment development
The Newship Group is primarily interested in delivering employment floorspace and has been working towards achieving this objective in collaboration with the Council for a number of years. There are four main reasons why the Burnt Common Nurseries site is considered a credible location to deliver the employment space needed.

Firstly, it is an existing employment site with three industrial/warehouse buildings totalling 5,110sqm. It makes sense to consolidate employment at Burnt Common in association with existing buildings. It is also a more efficient of use land and would result in an external economy of scale, due to its location adjacent to similar enterprises.
Secondly, it offers the opportunity to deliver early expansion of employment floorspace, which is a key factor in achieving wider sustainability objectives. Widening the choice and availability of employment floorspace within the Borough supports the local economy by providing high quality accommodation in a convenient location, including incubator units for existing local businesses to move into, freeing up space for start-ups and smaller companies.

The site is not dependent on new access roads and there are no other site constraints. It is not in a restrictive flood zone. Given the lack of such constraints the Newship Group and Burnt Common Nurseries Ltd are in the position to submit a planning application and begin on-site straight away. That is important, because deliverability is a key issue when assessing the soundness of the emerging Plan at the Local Plan examination.

Thirdly, the BCN site is an acceptable site that does not compromise the purposes of the Green Belt. The site has a significant proportion of previously-developed land. The site is 10.7 hectares (26.44 acres), so a minimum of an additional 7,000sqm of employment space could easily be absorbed without having an adverse impact on openness or the five purposes of the Green Belt.

Fourthly, the site is sustainable, with good vehicular access that minimises the impact on the local highway network and local residents. The site is close enough to Send Marsh to provide shorter and more convenient journeys to work and promote rural sustainability, but is also sufficiently removed from the main residential areas and sufficiently screened by mature trees to minimise impact on residential amenity. The existing highway network facilitates convenient access to and from the A3 without needing to travel through the existing village.

The proposed development of the site was supported by local people and businesses through the public consultation on earlier versions of the emerging Local Plan. This is discussed in more detail below.

In summary, the site is a logical, reliable and credible allocation for employment space, with no material constraints. The Newship Group is committed to providing this, and its track-record offers peace of mind that it would be delivered early and to a high standard.

In overall terms the proposal to locate further employment space alongside an existing commercial employment estate (and a former commercial nursery) is the most logical and appropriate solution for the Burntcommon and Sendmarsh area. The Newship Group, operators of BCN Ltd, have significant experience of developing such employment sites. The lack of constraints and single ownership ensure that early delivery is achievable.

Site sustainability
A key consideration in assessing the suitability of the site for the size and type of development proposed is the need to ensure that the site is in a location that is sufficiently sustainable for the level of development envisaged.

The site is in a sustainable location given its size, character and function. As explained in more detail below, the size of the site is appropriate to the existing scale of the village and its character. A significant part of the site is also already in use for employment purposes and the proposed allocation is for additional Use Class B1(c), B2 and B8 commercial units. Given the allocation does not include any element of housing development, all of the site is suitable for industrial and warehouse units.

The site is accessible by public transport, walking and cycling and benefits from pedestrian and cycle access to a range of local services and facilities. The centre of Send Village, which has numerous shops and local facilities/ amenities, is within 2km from the site, with Send/ Ripley health centre and pharmacy only 500m from the site, and this is acknowledged by national policy as being an acceptable walking distance.

There are a number of bus stops within 400-500m of the site. Bus services 462 and 463 together provide an hourly service Monday to Friday between Woking and Guildford and also serve the residential areas of West Clandon, Send Marsh and Old Woking. Bus service 515/ 515A also provides an hourly service between Guildford and Kingston-upon-Thames Monday to Sunday.

In terms of a railway station, the main line station at West Clandon is approximately 2.5km to the south of the site and linked with the site by bus service 463. This station benefits from regular services between Guildford and London Waterloo. Guildford and Woking railway stations, which are accessible by bus services 462 and 463 are on the fast line to
London Waterloo, Basingstoke, Portsmouth and Alton. Existing rail facilities provide the opportunity to travel to the site by train as part of a linked bus or cycle journey.

There is an existing footpath on the northern side of the B2215, which provides connections to nearby bus stops and continues to other local facilities available in the vicinity of the site. There is also an existing on-road cycleway on both sides of London Road, which continues along the B2215 Portsmouth Road and provides a local connection to the centre of Ripley. A dedicated cycle route also runs alongside the A3 leading south-west towards Burpham (approximately 3.5km away), where it links to the wider cycle network around Guildford. There is a further shared pedestrian/ cycle link along the A247 between Burnt Common roundabout and local amenities in Send. To the south-east a further cycle link runs east along Tithebarns Lane connecting to a wider cycle network towards West Horsley. The site therefore benefits from good pedestrian and cycle connections.

The following local amenities are located in close proximity to the site – a petrol station with a Little Waitrose convenience store approximately 100m from the site, a doctor’s surgery and pharmacy 500m away. Further convenience stores, newsagents, takeaway restaurants, a café and a post office are located in Send village (via Send Barns Lane), approximately 2km away. Further amenities are available at Ripley High Street which is 3km away.

In addition to this the site is within easy access of both the A3 and M25, with the B2215 providing direct access to both.

The sustainability credentials of the site and its proximity to the facilities of Send have undoubtedly contributed to Burnt Common/ Send Marsh being classified as a village. With all of this in mind it is considered that the site is sustainably located and therefore accords with the principle of sustainable development in this regard.

Indeed, the ‘Send Marsh and Burntcommon – Major Village Expansion’ review carried out as part of the Green Belt and Countryside Study (2014), considered the sustainability credentials of the site as existing (as well as two other local sites). Significantly, it ranked the Burnt Common Nurseries site in first place out of all the sites.

As such, the Burnt Common Nurseries site has strong sustainability credentials.

Need for commercial development

In March 2017 AECOM prepared an Employment Land Needs Assessment for Guildford Borough. Whilst the assessment does not compare the existing supply and its capacity to accommodate the future demand for employment land or the suitability of sites to cater for future demand, it does state that ‘Businesses in Guildford are to be seen to be broadly satisfied with current premises, although a significant number of them see potential for growth in the future and are said to need space for expansion.’

The ELNA also finds that there is evidence of a lack of affordable start up and incubator units in the Borough.

Paragraph 3.3.1 states that the demand for employment space will be driven in part by population change. With a forecast growth in population of just over 15% over the Plan period (and a percentage of residents of working age that is comparable with both the South East and England as a whole), the demand for employment space is highly likely to increase.

The ability of the site to provide industrial and commercial units (including small and medium sized units) early in the Plan period will support the local economy by facilitating growth in at least the following ways:
- Increasing the overall supply (to assist in maintaining a sustainable form of development Borough wide);
- The provision of incubator units on the site; and
- Providing choice and flexibility for start-up businesses. This is particularly the case where existing occupiers are looking to expand (paragraphs 5.5.4 and 5.5.5 of the ELNA).

AECOM undertook consultation with property market experts to inform the ELNA. The feedback received is that the current supply of industrial and storage premises is not meeting existing demand. This is exactly the finding of Lambert Smith Hampton (LSH) in their report dated August 2016, which was submitted in support of the request to re-allocate the Burnt Common Nurseries site. The lack of available sites (and those sites that are available tend not deliver the quality and space needed), act as a constraint on demand (see paragraph 5.6.3). Thus, economic growth would be supported through the provision of high quality stock that benefits from excellent road access, such as the Burnt Common Nurseries site.
Lambert Smith Hampton statement
The statement by Lambert Smith Hampton (LSH) on the need for small industrial and commercial units within the Borough has been updated. This updated statement (dated June 2017) is attached to this representation for consideration. LSH continue to find that the existing stock of buildings is very low and insufficient to meet future needs. In addition, the quality of the available stock is poor, which itself acts as a deterrent to potential occupiers (see LSH statement paragraph 4.26).

Thus, LSH conclude that there has been and remains insufficient employment land supply to meet future growth needs and so new employment sites are required and particularly to come forward at an early stage in the Plan period.

The LSH statement confirms that the Burnt Common Nurseries site is a suitable location for commercial units due to its proximity and accessibility to the principal road network and is able to be developed quickly.

The LSH statement explains that the emerging Plan does not appear to specifically account for the loss of employment land (i.e. allocations of land currently in an employment use, proposed to be developed for a non-employment use). There are examples of this in the emerging Plan i.e. Kernal Court and Wey Corner, both on Walnut Tree Close, Guildford, for residential accommodation etc. As a result, this loss should be re-provided elsewhere in the Borough to avoid a reduction in employment floorspace, particularly at an early stage in the Plan period.

The need for flexibility
The Proposed Submission Local Plan (2017) makes provision for between 3.7 to 4.1ha. of additional industrial land to help support the economy. The Plan explains that this is a higher level of development than experienced in Guildford during the previous Plan period and represents an increase in employment floorspace.

The Council has resolved to plan for a central case of between 3.9ha. and 4.1ha. of additional industrial employment land during the Plan period (2015-2034). The majority of the proposed new employment floorspace is allocated in urban extensions to Guildford; as part of the Slyfield Area Regeneration Project (SARP), Blackwell Farm, Gosden Hill Farm and at the former Wisley airfield. These are strategic locations that will take many years to come forward.

The Employment Land Topic Paper finds that a ‘large proportion of the net additional land requirement for industrial/storage may be met through the permissions which have been consented but which have yet to be implemented. This includes up to 7,000sqm (on 1.4ha.) at Henley Business Park and 1,800sqm at Woodbridge Meadows. There is the possibility that some pipeline developments may not come forward at all, or as many of the permissions are flexible (B1c/ B2/ B8), there is uncertainty into exactly which Use Class may be built out. The two main locations for industrial and storage development are on Burnt Common (7,000sqm) and as part of the Slyfield Area Regeneration Project (6,500sqm additional).’ Paragraph 7.7 of the LSH statement quotes paragraph 4.50 of Guildford Borough Council’s Employment Topic Paper (June 2017), which states that ‘The delivery of [SARP]… is not expected until the latter part of the plan period.’

There is clearly a need for flexibility in the provision of employment land, particularly industrial land, to accommodate needs as they arise and enable the Plan to respond to changes in the wider economy. The Burnt Common Nurseries site achieves both objectives, by delivering new employment floorspace very early in the Plan period and offers the flexibility required to respond to changing economic circumstances. The deliverability and flexibility of the site to support wider sustainability objectives is a key strength and it is therefore important that the flexibility as currently expressed in the proposed allocation is retained.

The allocation of land at Burnt Common Nurseries facilitates the early delivery of employment floorspace that has been demonstrated to be urgently needed. Provision of a range of commercial units (including small and medium sized), would contribute to the objectives of sustainable development by helping to meet the existing need for high quality and conveniently located industrial and warehouse floorspace and facilitate job creation opportunities at an early stage in the Plan period.

The proposal can be delivered very quickly due to the lack of site constraints, the fact the site is all in one ownership, there is an existing access onto the road network (B2215), development of the site would have a very limited impact on the local landscape and Green Belt (due to its heavily enclosed nature) and would enable the openness of the Green Belt and its open character to remain and continue throughout the Plan period.
Also, in accordance with sustainable development objectives, the emerging Local Plan seeks to support the future economic, environmental and social sustainability of rural settlements, commensurate to their size, character and function.

The scale of the proposed development is commensurate with the size, character and function of Burnt Common/ Send Marsh. The settlement is a village and increasing its size by 7,000sqm + of industrial/warehouse floorspace would not harm the size, character or function of the location. The allocation supports the growth of this part of the Borough, which is planned for significant housing development in the Plan period. The provision of employment land (delivered early in the Plan period) in the vicinity of new housing development contributes to sustainable development as envisaged in the NPPF (paragraphs 7 – 10). This is recognised in the emerging Local Plan.

There are also local services and facilities within close proximity to the site, which offer an existing facility for employees. Provision of facilities for employees will also be made on the site however, with space for a food kiosk, a sitting out area and landscaped open space.

The above evidence supports the allocation of the Burnt Common Nurseries site for development in the emerging Local Plan.

Unique location
As described above, the site is wedged between existing roads, comprising the A3 and the old A3 (now B2215) and existing development fronting Clandon Road (A247).

From a review of the GBCS the site falls within a parcel of land (B13-D), which as previously stated, has been identified as a PDA. Paragraph 1.37 of Volume I of the GBCS states that the land parcel in which the site falls within has the potential to accommodate appropriate development without compromising the purposes of the Green Belt in which it is located. It is noted to be an area that is surrounded by defensible boundaries and these include built physical features (roads) and significant tree screening.

The site, and indeed wider land parcel in which it is located is isolated from the wider green belt by the A3, the London Road and the Clandon Road which surround the site, making it an enclosed triangular parcel of land that is very much separated from the wider Green Belt. This helps to further ensure that development of the site (and wider land parcel) would not harm the character or appearance of the Green Belt in which it is located and would not set a precedent.

This scenario is very similar to, and is supported by, the Burpham Court Farm development known as Weybrook (now a housing development with a large Sainsbury’s supermarket), which is also between the A3 and an A3 slip road. If new slip roads were provided at Burnt Common/ Send Marsh, this would improve its attractiveness to businesses from further afield.

The Council accepted the above and has allocated the site in the Draft Local Plan for commercial development.

Emerging Planning Policy
Policy D4 of the Submission Local Plan (2016) explains that development must contribute towards achieving high quality and attractive places. The proposed allocation of the Burnt Common Nurseries site would be of high quality and use land in an efficient manner, whilst retaining and enhancing a significant landscaped buffer around the perimeter of the site, which would improve its attractiveness. No important public views would be affected. As explained further below, the site is accessible and the proposal would create safe access to the site by a variety of modes. Crime and disorder would be discouraged through designing the layout of the commercial units to overlook each other and the parking and turning areas.

The design and orientation of the proposed units would make sure that there would be no unacceptable impact on amenities in terms of privacy, noise, vibration, pollution, dust, smell and access to sunlight and daylight.

Proposed Policy A58
Policy A58 (of the Proposed Submission Local Plan) allocates the site for a minimum of 7,000sqm of either or a mix of B1, B2 or B8 floorspace, with the potential for further industrial floorspace to meet future Borough needs. The allocation is supported as currently proposed as it provides an appropriate Green Belt buffer between the proposed north-eastwards expansion of Guildford (Gosden Hill Farm allocation) and the existing built up area of Send Marsh/ Burnt Common.

In addition, the flexibility of the Policy is supported. The Council has allocated various sites for employment development in the Plan period; however should these sites not come forward as anticipated it could have an impact on the overall
supply of employment land in the Borough. Furthermore, other existing sites could potentially be lost to non-employment uses. As a result, the potential to release additional land for employment floorspace during the Plan period, to help meet need, is a prudent approach and supported.

The description of the site in Policy A58 refers to the existing use as pastoral farmland. This description of the site is inaccurate; it would be more appropriate to describe the site as former commercial nursery.

Public consultation
The Local Planning Authority has undertaken a series of comprehensive public consultation exercises on the emerging Local Plan, gaining local opinion on key issues affecting the Borough and informing the Authority of the view of local people in deciding how best to accommodate future development. A clear message made by local residents throughout the Borough is the need for the timely provision of infrastructure to support planned new development.

In relation to future development at Send Marsh/ Burnt Common, the overwhelming perspective of local residents is that the BCN site is a sustainable and appropriate site for development that would not have an adverse effect on existing infrastructure, or the five purposes of the Green Belt. BCN is recognised as a previously developed site, which should be used to best effect, in advance of Greenfield land. It is noteworthy that the Parish Councils in the area have not objected to the allocation of land at BCN; on the contrary they have supported the allocation of BCN and questioned the logic of de-allocating it in favour of a larger Greenfield site, the development of which would not be commensurate with the scale and nature of the existing area. Indeed, Send Parish Council advised in their response to the 2016 consultation that they consider BCN to be an appropriate allocation and requested it be reinstated in the Proposed Submission Plan.

Deliverability
In terms of deliverability the site is available and deliverable with 1-5 years (subject to securing planning permission). The owners are committed to developing the site for employment use and are undertaking the necessary assessments to support an application.

The proposed development of the Burnt Common Nurseries site includes space around the buildings, some of which will include sitting out areas. The environment will be enhanced through the provision of soft landscaping to strengthen wildlife links to and from the adjacent ancient woodland and noise generating sources would not be located unacceptably close to existing residential development.

Finally, the provision of a range of commercial unit sizes, commensurate with the size, character and function of Burnt Common/ Send Marsh, benefits the local area without having a serious adverse impact on local services and facilities. It is clear therefore that a development of this type contributes to the three main aims of sustainable development – social, economic and environmental.

Conclusion
It is considered that given the subject sites’ location, its sustainability credentials and the Council’s economic assessment and GBCS it represents a prime opportunity for commercial development that it has been demonstrated is commensurate with the size, character and function of the existing settlement.

It is considered that a minimum of 7,000sqm floorspace can be achieved on the site, which would represent a suitably low density of development. This in turn enables the site to retain an open and spacious character, and retention and sympathetic enhancement to the existing ancient woodland through strengthening the tree belts around the site to provide wildlife corridors to adjacent areas.

The allocation of the BCN site in the emerging Local Plan is supported for the following reasons:

- The site is in a sustainable location, with very good transport accessibility.
- Development for a minimum of 7,000sqm employment floorspace would have a negligible impact on the operation of the existing highway network (see RGP’s Transport Impact Assessment).
- The site is part previously developed.
- The Council identified and allocated the site for future development in the emerging Plan.
- The site has defensible boundaries which will ensure that its development will not harm the purpose or openness of the wider Green Belt.

- The site is isolated from the wider Green Belt.

- The site is not constrained by any other sensitive planning designations.

- The site is deliverable within 1 – 5 years.

- The site provides the opportunity for expansion subject to future need.

- The site offers flexibility to also make for the loss of supply of existing sites (see conclusion of LSH statement).

- The site is similar to the previously developed site Weybrook in Burpham (now a housing development with a Sainsbury’s supermarket) which also lies between the A3 and a slip road.

- The site would not impact materially on any existing residential properties.

- The site is well screened already by mature tree planting, which can be further enhanced.

With all of the above in mind we assert that the subject site is suitable, developable and deliverable for commercial development. We support the allocation of the site for at least 7,000sqm employment floorspace in the Council’s emerging Local Plan and exclusion from the Green Belt.

I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability and
- flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 – 2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays

Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).
The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: pslp171/961  Respondent: 17323265 / Simon Owen  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/958  Respondent: 17323265 / Simon Owen  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.
I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students Ire accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.
Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related”. In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers
under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to
build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.
2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 2: Legal Compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp17q/135  Respondent: 17323265 / Simon Owen  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites **as a whole** to be sound, because, but not limited to, the following reasons:

1. "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt." Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.
1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID: pslp173/336  Respondent: 17323585 / Jane E Foxon  Agent:**

**Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix C: Infrastructure Schedule**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed Infrastructure Schedule (Appendix C)
The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the figure of 693 houses per annum in the borough being too high (Appendix D)
The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II)
There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.

The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the lack of proper infrastructure planning for sites (Policy I1)
The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

I object to development in areas which are at risk of flooding (Policy P4)
The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object to the Borough Wide Strategy (Policy S2)
GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there’s too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11% of the existing housing.
5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages.

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. The Plan is self-inconsistent and therefore not properly constituted.

The potential of an increase from 400 houses at site A43 Garlicks Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages. The plan states that “if the Traveller sites remains unsold, the future use of the land should have regard to an up to date Traveller Accommodation Assessment (TAA) and Strategic Housing Market Assessment (SHMA), with specific consideration of the use of the land for affordable housing”. So even more travellers pitches and houses, which is unjustified.

Brownfield sites A4 and A34 have been removed from the Local Plan – meaning there is more pressure on Green Belt sites to meet the so-called housing “need”.

On Affordable Homes, the previous version of the plan (Policy 4.2.23) stated that Developers will be expected to provide land for affordable homes at nil value. Now it just says “Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.” So the developers don’t even have to do build any affordable homes, just make a tidy cash payment to the Council.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Promotion Site entrance. The Promotion Site is contained within defensible strong boundaries which, notably, include the busy B3000 along the northern boundary and the mainline railway to the eastern boundary.

In light of the site boundaries and the adjacent urban context, GBC’s Green Belt & Countryside Study (Volume V) concluded that the Promotion Site does not contribute strongly towards the purposes of the Green Belt. Furthermore, the site does not contribute to the qualities and characteristics of the wider Surrey hills AONB (a point which has also been confirmed in the Surrey Hills AONB office comments to an approved residential planning application directly adjoining the Promotion site.

Two independent landscape reports (by Enplan and Barton Willmore) have considered site No. 80 (SHLAA site 1140 and SHLAA site 2241) for the respective site promoters and those reports also confirm that Site No. 80 does not contribute to the Green Belt purposes or the wider qualities of the surrey Hills AONB.

**Requested Modifications**

In all of the above respects, Land at Pond Farm and Land South of New Pond Road is ideally placed to deliver a sustainable high quality residential development including affordable housing during the front end of the Plan period. The PSLP should therefore be modified by **allocating Site 80** for housing development and included the Promotion Site in the PSLP Part 2: Sites, and identified in Appendix F: Policies Map accordingly.

The PSLP seeks to deliver low and unambitious Annual Housing Target figures which will not meet the acute need for housing in the borough or meet the needs of neighbouring authorities or respond to inward migration from London. **The OAN should be increased accordingly to at least 693 dwellings per annum and Policy S2 modified accordingly.**

The PSLP’s Housing Strategy which weighs housing delivery to the back end of the Plan period (form 2026 onwards) will exacerbate housing need, lead to increased house prices and unaffordability, and lead to further increasing in housing waiting. The annualised Housing Delivery targets should be increased at the front end of the Plan period through the allocation of additional sites that are able to be delivered in the first five years of the Plan period. **The Annual Housing Target Table contained in Policy S2 should be modified accordingly.**

Land at Pond Farm and Land South of New Pond Road was identified in Volume V Section 17 of the Green Belt and Countryside Study (prepared in 2014). The Promotion Site was identified as **area F6** which was then further divided into F6A and F6B. In the summary, the Report identified the range of significant defensible boundaries surrounding the wider site and concluded that site F6 B, ‘...provides opportunities to accommodate development without significantly compromising the purposes of the Green Belt’. Additional technical assessments both conclude site No. 80 does not contribute to the purposes of including land within the Green Belt. **Site No. 80 should be removed from the Green Belt and the Green Belt boundary modified and identified accordingly in Appendix F: Policies Map.**

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

The Policies Map should be modified to illustrate Land at Pond Farm and Land South of New Pond Road (B3000). the Policies Map should also be modified to illustrate a re-defined Green Belt boundary which omits Land at Pond Farm and Land South of New Pond Road.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? (No), is Sound? (No), is Legally Compliant? (Yes)

Answer (if comment is on questions 1-7 of the questionnaire): ()

Please refer to full Representations attached including an independent LVIA prepared by Enplan which demonstrates that Land at Pond Farm and Land South of New Pond Road (Site No. 80) does not contribute to the purposes of including land within the Green Belt due to the Promotion Site's defensible boundaries (including a busy road) and being more closely associated to the urban form of the settlement. The Pegasus Green Belt & Countryside Report also concluded that the site (area F6 B) ‘provides opportunities to accommodate development without significantly compromising the purposes of the Green Belt’.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The extent of the Green Belt should be further modified. Site No. 80 (SHLAA ref. 1140 and 2241) should be removed from the Green Belt in accordance with the draft housing allocation in the July 2014 (Regulation 18) version of the draft Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Please see attached letter relating to PSLP Policy S2

[text of attachment reproduced below]

We do not set out in detail here every point of contention with the PSLP Housing Strategy nor do we necessarily object to other individual proposed submission allocated housing sites. Those detailed matters will follow in due course through the Examination.

The main thrust of our objections to Proposed Submission Policy S2 is threefold:

1. Housing Need has been reduced significantly from the July 2014 (Regulation 18) and June 2016 (Regulation 19) versions of the Draft Local Plan (Regulation 18) at the very time when housing need both regionally and nationally appears to be very substantially increasing. We find this approach perplexing and we question its credibility and desirability.

2. GBC’s Housing Land Supply and proposed housing allocations have altered dramatically from the July 2014 (Regulation 18) and the June 2016 (regulation 19) versions of the Draft Local Plan. Not only is there a significant reliance on major strategic housing allocations which will take many years to deliver housing, but the housing delivery rates are now weighted to the back end of the Plan period exacerbating still further the previous accrued under-delivery of housing in the borough; and
3. In light of the above, smaller and modest sized sites which are deliverable and which the Local Plan evidence base show can be delivered without causing significant harm, have been omitted from the emerging Local Plan at the very time when they could help GBC meet its (and neighbouring authorities) acute housing need.

The Borough Council openly acknowledges that it has accrued a very significant housing delivery shortfall moving into the Local Plan review process. In that regard, the Borough Council has approximately 3.2 years supply of housing land against the Government’s minimum requirement of 5 years housing land supply.

Despite the context of housing delivery under-performance, GBC proposes to reduce the Plan period by one year and its start date has been rolled forward by 2 years. In this respect, we are concerned that there is no credible explanation offered to indicate why the Plan period has been reduced in mid-Plan making process. This change to the Plan period has also been accompanied by a very significant reduction in the overall housing requirement during the Plan period from 13,860 to 12,426 dwellings (a reduction of 1,434 dwellings). This very sizeable reduction comes precisely at a point in time when housing need at the local and national level is so acute. Furthermore, the proposed change to the Plan period appears to be out of step with the Strategic Housing Market Assessment (SHMA) and the Housing Market Area (HMA) which relate to the period 2013 to 2033.

The West Surrey SHMA itself has been partially updated since the July 2014 Regulation 18 and June 2016 Regulation 19 versions of the Local Plan. We also note that the Guildford Addendum Report (2017) takes account of the latest population and household projections, the latest ‘post-Brexit’ economic projections, and the 2015 mid-year population estimate. It is highly notable that the Addendum Report has resulted in a reduced Objectively Assessed Need (‘OAN’) for Guildford borough from 693 homes per year (2013 – 2033) to 654 homes per year (2015 – 2034). We struggle to understand how such a dramatic reduction in assessed housing need in Guildford borough bears any resemblance to the reality of the housing market in this part of the South East of England.

We consider that there are a number of in-principle matters for the examination to address in this regard.

Firstly; given the acute need for housing locally (and regionally) including record need and waiting times for affordable housing, together with significant unmet housing need in neighbouring Woking and Waverley boroughs, we question how such a dramatic reduction in the OAN is credible yet alone desirable? A further matter which we will seek to address at the examination is that Addendum Report appears to relate solely to Guildford borough rather than the wider strategic West Surrey SHMA area. The approach by GBC to calculating the revised OAN must brought in question especially in light of the duty to cooperate obligation.

Finally, on this particular matter, we question whether the approach taken by GBC to housing need and the PSLP’s approach to housing delivery through the Plan period is in accordance with the Government’s advice contained in the National Planning Policy Framework and the Planning Practice Guidance (‘PPG’).

The approach to Housing Land Supply through Proposed Site Allocations

GBC’s Housing Strategy is heavily reliant upon the delivery of several major draft housing allocation sites to bring forward a substantial proportion of new homes during the Plan period. GBC was also at pains throughout the PSLP committee debating process to assure elected Members, stakeholders, and local communities that the major housing allocations would only come forward when accompanied by necessary on and off-site infrastructure (including, but not limited to, new roads, utilities, and school provision). Consequently, GBC’s Housing Strategy in the PSLP (Regulation 19) is predicated on all necessary infrastructure required to facilitate the major housing site being delivered at the front end of housing scheme delivery.

The Housing Strategy has therefore been modified to illustrate that housing delivery on those major sites will be significantly delayed and as a result the PSLP housing strategy assumes a significant weighting of annualised housing delivery towards the back end of the Plan period.

We consider the proposed approach to the borough’s housing delivery will only serve exacerbate the acute need for housing (including affordable housing) in the borough which is already failing to perform against local targets and the Governments 5 year housing land performance requirements.
Indeed, not only is the Borough Council moving towards an Examination with a sustained housing land supply shortfall when measured against its 5 year housing land supply target but the Council is also proposing a housing delivery strategy which will result in an additional accumulated shortfall of 1000 dwelling units up to 2026 against its own annualised OAN housing target (until the draft allocated major housing sites come on stream from 2026 onwards):

- 2019/2020: 200 unit shortfall
- 2020/2021: 200 unit shortfall
- 2021/2022: 150 unit shortfall
- 2022/2023: 150 unit shortfall
- 2023/2024: 150 unit shortfall
- 2024/2025: 100 unit shortfall
- 2025/2026: 50 unit shortfall.

This annualised shortfall in housing delivery will be greater still if the Examination Inspector finds against GBC’s revised OAN methodology.

Despite this lamentable context, sites with potential to deliver housing in the first five years of the Plan period have been omitted from the emerging Local Plan despite being draft allocated from the 2014 draft Local Plan. For example, sites such as Pond Farm and Land South of New Pond Road (Site No. 80 (SHLAA site reference 2241) immediately adjacent to and contiguous with the built form and settlement boundary of Farncombe have been identified as part of the Borough Council’s housing evidence base and the Green Belt and Countryside Study as being suitable to deliver new housing.

In this context, the Promotion Site was draft allocated as part of site No. 80 (SHLAA site reference 1140 and part site reference 2241) in the Regulation 18 draft Local Plan: Strategy and Sites published for consultation in July 2014 as being suitable to deliver housing. The whole draft allocation site being 16 hectares of land to the south of New Pond Road (B3000) and intersected by Furze Lane. The wider site having been assessed by Pegasus Planning on behalf of the Borough Council as not contributing to the purposes of the Green Belt by virtue of its defensible boundaries and being well contained.

Site No. 80 was discounted from the Regulation 19 draft Local Plan (June 2016) absent of any fresh technical evidence to justify its omission.

The Promotion Site lies contiguous with the established form of Farncombe which itself lies in the adjoining borough of Waverley.

Waverley borough is also experiencing an acute need for new housing and its own Local Plan has been recently subject to Examination in July 2017 during which the Examination Inspector (Mr Jonathan Bore) has acknowledged that he is minded to recommend that Waverley Borough’s annualised housing target is increased significantly from 519 dwellings per annum to around 580 dwelling per annum (the precise amount is to be confirmed). The Waverley Borough Local Plan Inspector also questioned Guildford Borough Council during the Examination on its ‘duty to cooperate’ role with Waverley Borough Council given the absence of any truly cross boundary strategic housing sites or apparent sharing of housing land supply.

In this particular context, Farncombe is a sustainable settlement that benefits from a wide range of services and amenities including a railway station. Land at Pond Farm and Land South of New Pond Road is contained on its boundaries by physical built features including; New Pond Road (B3000) along the entirety of the northern boundary, the Portsmouth to London Waterloo mainline railway (to the eastern boundary) and established residential development (immediately south). The Promotion site itself is formed in two parcels intersected by Furze Lane which connects the village to the busy B3000. Furze Lane itself is well served by a bus services and a bus stop is located just 50 metres south of the Promotion Site entrance.

The Promotion Site is set within the designated Surrey Hills AONB and the Green Belt which covers (washes over) all the land between Farncombe and Guildford. However, in respect of the AONB, two independent landscape appraisals have
found that site No. 80 does not contribute to the characteristics and qualities of the wider Surrey Hills AONB and is impacted and influenced by the urban characteristics of the adjoining settlement. Furthermore, the Surrey Hill AONB office in its written comments to planning application reference WA/2014/1330 approved for 50 dwellings (immediately adjacent to the Promotion Site), acknowledged that the area south of the B3000 did not significantly contribute to the characteristic and qualities of the Surrey Hills AONB.

In respect of the Green Belt, it is highly notable that the Borough Council’s Green Belt and Countryside Study which is an important evidence based document also indicates that Site No. 80 does not perform strongly when measured against the purposes of including land within the Green Belt.

Nevertheless, the site promoters have commissioned further independent assessment of the site in terms of its visual impact on the landscape, its role as contributing to the purposes of the Green Belt and other technical matters including flooding and flood risk and we can confirm there is no impediment to delivering housing on the Promotion Site.

In term of the housing delivery and subject to the proper planning, design and layout of the Promotion Site we estimate the site can deliver between 90-100 dwellings including affordable housing at full policy rate, whilst still allowing for generous on-site open space and areas that will be kept free to allow for flood risk and established trees to be retained. The additional technical work commissioned by the Site Promoter effectively supports the earlier evidence base work undertaken by the Borough Council which led to the site’s draft allocation.

It is also evident that by allocating the promotion site, the Borough Council would be assisting housing need in Guildford Borough but also Waverley Borough which is a central objective of the duty placed on local authorities to cooperate in delivering housing land and meeting the need for housing at a more strategic level.

The promotion site is accessed via Furze Lane in an accessible location on the edge of a large sustainable village which has a wide range of services and facilities including a railway station which provides excellent links to Guildford (6 minutes) and onwards to London Waterloo. The settlement also offers local opportunities for employment and employment creation as part of a sustainable existing settlement. Furze Lane itself is well served by a bus services and a bus stop is located just 50 metres south of the site entrance. In all these respects, Land South of New Pond Road is ideally placed to deliver a sustainable and deliverable residential development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The OAN should be increased to at least 693 dwellings per annum and Policy S2 modified accordingly.

The Annual Housing Target Table contained in Policy S2 should be modified accordingly and re-weighted to facilitate significantly more housing towards the front end of the Plan period.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

The PSLP (June 2017) is not sound. The draft Plan has been published at a time when the Borough Council has administered a very significant under-delivery of housing when measured against 5 year housing land supply targets. Despite this lamentable context, the PSLP (June 2017) has amended the new Plan period, significantly reduced the OAN for the borough, and weighted annualised housing delivery to the back end of the new Plan period meaning that by 2027 (even using the Council's proposed reduced OAN) there would be an accumulated 1000 dwelling shortfall when measured against the minimum annualised housing deliver target. The PSLP will therefore exacerbate house prices, harm affordability, and lead to further shortages of new market and affordable housing.

The PSLP has not taken on any unmet need from neighbouring authorities, and at a time of record demand for family and affordable homes the Borough Council has placed too much reliance on major sites that will take many years to deliver and it has omitted sites that could come forward in the first part of the Plan period (for example: Land at Pond Farm and Land south of Pond Farm Road (Site No. 80) which the draft Local Plan had draft allocated in previous versions of the emerging Local Plan. Site No. 80 is well located to a sustainable settlement, is close to a railway station and existing bus routes and GBC's own evidence base assessments show that Site No. 80 can be delivered without causing significant harm to the landscape or Green Belt.

Comment ID: pslp171/1002  Respondent: 17324225 / Surrey Heath Borough Council (Kate Galloway)  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
As you will be aware through our Duty to Co-operate letter dated the 19th January 2017, Surrey Heath is severely constrained in terms of available land for housing development, primarily through the Thames Basin Heaths Special Protection Area (SPA) and the need to provide avoidance measures in respect of the impact of housing on the SPA. The Borough also has large areas of MOD operational land and Green Belt.

Surrey Heath is now in the early stages of developing a new Local Plan and continues to develop a broad range of appropriate evidence to enable it to make robust decisions in respect of the extent that the Plan is able to meet the OAHN for Surrey Heath. However, the Council’s most recent Strategic Land Availability Assessment (July 2016) indicates that there will be a shortfall of land within the Borough to deliver the Council’s OAHN and, whilst the Council will consider spatial strategies that could reduce this shortfall in the course of preparing the new Local Plan, it is unlikely that Surrey Heath will be in a position to meet the full OAHN for the Borough.

As a result, it is possible that Surrey Heath will need to look to its Housing Market Area to accommodate any demonstrated unmet need. In the event that the Housing Market Area is unable to meet this need, the Council may need to approach other authorities who do not form part of the Hart, Rushmoor and Surrey Heath housing market area, but with whom the Housing Market Area shares links. This would include Guildford.

In view of the above and in light of the fact that Guildford has previously proposed a sustainable development strategy capable of delivering 1,400 additional houses over and above that set out within the current iteration of its Proposed Submission Local Plan, Surrey Heath would welcome further engagement with Guildford under the Duty to Co-operate to better understand why Guildford, under the terms of the updated Plan, is unable to allow for any flexibility to accommodate any demonstrated unmet need arising in any neighbouring Boroughs. Surrey Heath would also request that the Guildford Duty to Cooperate Topic Paper is updated to include Surrey Heath as a duty to cooperate body with which engagement on housing matters should be undertaken. This reflects the linkages between the Housing Market Areas covering Guildford and Surrey Heath and reflects the content of the Surrey Heath Duty to Cooperate Scoping Statement.

In response to the June 2016 consultation, Surrey Heath raised an objection to the proposed removal of Keogh and Pirbright Barracks from the Green Belt. The Council recognise that the Council’s concerns have subsequently been addressed by Guildford Borough Council, who have confirmed that the insetting the sites from the Green Belt is unlikely to result in any significant changes to the overall use or impacts of the sites as a result of their rural location and proximity to the Thames Basin Heaths Special Protection Area.

Surrey Heath Borough Council looks forward to continuing to working with Guildford in respect of housing and other Local Plan matters as each of the Authorities Local Plan progresses.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** pslp171/1003  **Respondent:** 17324385 / Sainsbury's Supermarkets Ltd. (sir or Madam)  **Agent:** White Young Green Planning (Gary Morris)

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy E9

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
On behalf of our client, Sainsbury’s Supermarkets Ltd, we have considered the above document and at this stage we would like to make comments in respect of the Retail Impact Assessment threshold outlined within Policies E7, E8 and E9. These policies state that retail and leisure proposals over 500 sq m (gross) located outside of Guildford town centre, local or district centres, and where the site is not allocated, must be supported by a retail impact assessment.

The National Planning Policy Framework (NPPF) provides that Local Planning Authorities can set local thresholds above which proposals for town centre uses outside of town centres should be subject to an impact assessment. National Planning Practice Guidance provides clarification around the setting of local thresholds for retail impact. It states: “In setting a locally appropriate threshold it will be important to consider the:

• scale of proposals relative to town centres • the existing viability and vitality of town centres

• cumulative effects of recent developments • whether local town centres are vulnerable

• likely effects of development on any town centre strategy

• impact on any other planned investment” The impact threshold is supported by recommendations made within the Retail and Leisure Study Update 2014 prepared by Carter Jonas, however we note that this report considers that the district and local centres are mainly reliant on convenience goods shopping (9.22) and that the main food store anchors are important generators of linked trips. We also note that Carter Jonas do not identify any capacity for new convenience space for the time being. At para 9.23, Carter Jonas state that ‘in general terms, national retailers… have requirements for units of 500sqm gross and above.’ and that ‘stores with floorspace over 500sqm gross are unlikely to be a purely local facility and will tend to draw from outside of their immediate local catchment’. We consider that these statements are too general and, indeed, not correct. Sainsbury’s, for example, operates over 700 “Sainsbury’s Local” stores the majority of which have a floor area of under 500sqm – and this remains a key element of their ongoing requirements across the Country. Some Sainsbury’s Local stores have floorspace over 500sqm – but still cater to a local market. Whilst we acknowledge that the capacity assessment in the report suggests limited capacity in the coming years, we can see no evidence to suggest that there is a case for lowering the threshold to 500sqm gross. Indeed, we consider that a threshold as low as 500sqm would unduly stifle the convenience retail market and would deprive locations of valuable local facilities that are just as likely (if not more likely) to compete with out of town supermarkets as they are with town and district centres.

Carter Jonas later go on to suggest that a floorspace threshold below 500sqm would be too inflexible, but we would suggest that even 500sqm is too inflexible – particularly without any caveat on the locations where such an assessment would be required.

On the basis of the above, we object to the proposal to lower the threshold to 500sqm gross as there is insufficient evidence to support such a low threshold and because it would unduly restrict and stifle a competitive, but locally focussed, convenience retail market.

We request that we be kept fully informed of any further changes to the Local Plan and all other future LDF documents produced for consultation. In the meantime please please do not hesitate to contact us should you have any queries.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I have been reading about this proposed development for some time now.

Like many local residents I've been surprised and unhappy about development in an already over populated area.

As a resident in Old Palace Road I, like the rest of my owner occupier neighbours have put up with the result of an over expanding University.

The infill structure is so woefully inadequate to accommodate permanent residents and the student population, although through no real fault of their own have totally dominated and degraded the area through their lack of education in how to live in a community.

The greed of the University and possibly the council has sustained this problem and it continues.

My point is that we in the Guildford Park area have had enough!

It's a extremely stupid idea to build houses on the proposed site.

The ground is not fit to accommodate housing as has been proved and shown.

The area is already swamped with cars resulting in an already grid lock situation morning, evening and school pick up times.

I'm sure that the reasons all ready stated re the hedges and trees are very valid but on the infill structure and ground conditions alone surely this is a bonkers idea!?

I really can't understand why obviously intelligent people can think it a good, reasonable and viable one!

As for the powers that be at the Cathedral shame on you.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: 
In 1932 we were described as Ash Green in Estate Agents particulars, Frimley Health NHS, list us as Ash Green, Land Registry, Durham, the official Property Register state we are Ash Green,

1996 Guildford Borough Council, Director of Environment address us as Ash Green.

The Pension Service, Dept for work & Pensions address us as Ash Green The Co-operative Energy, address us as Ash Green.

HM Customs & Excise, address us as Ash Green.

1999 Guildford Borough Council, address us as Ash Green.

1995 Browns Estate Agents address us as Ash. Green The Post Office address us as Ash Green.

The Inland Revenue address us as Ash Green Sky address us as Ash Green.

South East Water address us as Ash Green.

DVLA address us as Ash Green.

I somehow think and believe that we live in Ash Green !! NOT Ash !

And yet I see in later correspondence 2007 and 2015 that Guildford Borough Council start addressing us as Ash. This seems to be a calculated preparation to influence the change in boundaries at this present time, definitely premeditated.

An unauthorised sign ASH GREEN has been erected on the approaches to the bridge on White Lane, just to confuse matters ! I wonder who put up this unauthorised sign ?!!

Tongham, Ash, and Ash Green are historic villages, but Ash Green is rural not urban.

It is imperative that these villages have green space between them and not for them to be lost in an urban sprawl.

Ash Manor and its associated buildings are grade II listed (an application has been made to Historic England for an upgrade in listing) It is officially listed as a " Palace" and. Fortified Manor House with "Earthworks", owned by a Saxon Lord And several Kings of England, from Edward the Confessor and it was Edward II who lived in the Manor House and was responsible for digging the Moat, with Drawbridge, followed by Edward III, Richard II, Henry IV, Henry V, Henry VI, later Henry VIII and Edward VI. It's approaches and setting are significant and MUST be protected. This is our Heritage !

and the field north of Ash Green Road, not only has two Roman roads meeting, but it is the site of the original Ash Green from whence the village got its name. This field is ASH GREEN !

The roads in the immediate area are narrow country lanes with no footpaths, and cannot sustain increase of motor transport. The area is rural and cannot in anyway support an urban settlement.

I respectfully ask that the boundaries stay as they are and not to be played with just to suit requirements. It's impractical and immoral!

Policy/Site Allocation A25 Gosden Hill

a. These is insufficient infrastructure to support the broader impact, such as traffic affecting the surrounding areas. The additional traffic will have to pass through Burpham which already suffers from congestion and grid-lock on a regular basis. There is insufficient provision to address the additional load of traffic. The negative impact on the health and welfare on Burpham residents is unacceptably high.

b. There appears to be only one access to the development. And additional access should be available and its location known in advance.

c. The requirement for the developer to have regard for the “Sustainable Movement Corridor Supplementary Planning Document” is effectively meaningless as the roads in Burpham are narrow and have bottlenecks. Does this mean the longerterm impact will be the removal of green verges or appropriating houses to widen the road? To meet the sustainability criteria, this should be addressed as part of the plan.

d. Gosden Hill is situation within the Green Belt and should remain as such; it is a national, not just a local asset.

More steps should be taken to protect the Green Belt, not just at Gosden Hill, but all the green belt surrounding Guildford.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I recognise the urgency of a local plan for Guildford, however, I have concerns that the revised Draft Local Plan is unsound and unsustainable.

The proposal that only 60% of full time University students will accommodated on campus puts increased pressure on houses in the town. This should be closer to 80%, and thereby free up housing in town.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

It is further from railway stations than any other identified strategic site.

It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The associated traffic increase from the RHS has not been taken into account. The regular events at the RHS attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account

It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

I object to the fact that the increased area, being on the south of the site facing the Surrey Hills Area of National Beauty will increase the negative impact of the views.

I object to the removal of additional 3.1 ha from the green belt without any justification

I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact

I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3

I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000s of objection from local residents and statutory consultees.

I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

I object to the extension of the plan period by 1 year as it has not been identified as a major change

I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly to reflect the views and concerns of local residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** pslp172/2587  **Respondent:** 17325665 / Claire Nix  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch
The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan. Furthermore A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots …” Clearly A50 more than covers the total "need" of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm,… (site allocation A25) [ than the Burnt Common site did ]”

The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Answer (if comment is on questions 1-7 of the questionnaire): ()

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC do not appear to be following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object the change in policy on affordable homes (Policy 4.2.23). The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”. The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.” This appears to remove the requirement for developers to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes which is scandalous, particularly in the light of the national concerns over social housing. Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. That has now been removed, thereby accepting that needing to make greater than normal profit becomes an acceptable reason not to deliver affordable homes. The Council should be ensuring that it priorities the needs of its local community rather than providing incentives and support to developers.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would be contrary to the stated aims and themes of the Plan, and should not go ahead.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the extended development in the Green Belt (Policy P2, Site A43). The Green belt offers a number of benefits for both urban and rural population and was designed to protect that land for the foreseeable future. The policy of protecting green space near towns and cities has a big impact on the shape and nature of the places we live in and the protection should not be taken away. By preventing urban sprawl, we preserve the character of our rural communities and historic towns and villages and prevent towns from merging into one another. There is also an argument that removing land from the Green Belt and allowing developers to build on this land you do not achieve proper development of run down or derelict land. (consider the removal of A4 brownfield site from the Plan - see objection below Only 13% of England is currently green belt so to erode this small percentage is dangerous.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to removing Send Business Park from the Green Belt (4.3.15).

Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

Guildford BC has still not justified the huge number of houses they wish to build. Their projected need for housing exceeds even the Government's figures and I can find no reason in this plan why this is so.

Many Authorities have downsized their building plans in order to protect the Green Belt. Guildford BC has chosen to do the opposite and I strongly object to local villages being inset from the Green Belt.
Guildford BC still has given no idea of their plans for the increase in road capacity to handle the enormous increase in local traffic their plans would cause. Nor have they indicated any plans for dealing with the most basic of needs that of handling domestic sewage, despite the Water Authority indicating that the current plant based in Ripley will not handle any large increase. Their plans simply note vague notes about "to include schools and medical facilities" but where these might be is not made clear.

Answer (if comment is on questions 1-7 of the questionnaire): ()

As well as the general points above and notwithstanding any ruling upon them I also object to the inclusion of TFM in the draft local plan - even or especially as it is now amended and even if the further amendments now proposed by the developer can be considered at this stage. My reasons include:

1. TFM is the least sustainable strategic site identified in both this and previous versions of the plan because of the constraints on the site and the physical location.
2. TFM is further from railway stations than any other possible strategic site – hardly a place to locate students or other residents of publically owned or rent subsidised homes.
3. TFM relies upon the most congested stretch of the strategic road network in the county and the most congested motorway junction in the country (J10).
4. All roads local to TFM are at capacity and there are no funds to expand these e.g. by providing new bypasses.
5. The proposal to provide a bus service to TFM is totally unrealistic and unsafe. The roads are inadequate etc. This is clearly a sop to try and get permission - the bus will never materialise or will be cancelled for low use soon after its inception.
6. TFM is next to the most popular visitor attraction in the south-east, the RHS at Wisley, where visitor numbers are booming. These are forecast to increase by over 500,000/annum in the planning period yet this has not been taken into account. The RHS’s very popular special events attract thousands more visitors several times a year and these already bring the traffic all around to a standstill. Any future residents of TFM would be virtually prisoners.
7. There is no employment available near TFM so its residents will have to commute to work (or to the university to study!).
8. The proposed development at TFM cannot be built in any event or at least for many more than five years as a) it would breach the height restrictions imposed by the Ockham DVOR/DME (that will remain throughout the plan period) and b) there is no sewerage capacity. Ergo this site anyway cannot contribute to any five year land supply calculation.
9. Even the councils own (changed) “Opportunities” listed in their policy reinforce why TFM is totally inappropriate. It takes barely a fleeting look at the plans for this site (a very long urban terrace perched on top of a ridge) to see these are just totally wrong.
10. The TFM site as this now defined (3.1Ha larger than was the subject of a recent planning application that the council unanimously rejected!) a) now abuts another heritage asset, Upton Farm, negatively impacting the setting of this building, b) will greatly damage the Surrey Hills AONB by its disfiguring views, c) encloses an area of high archaeological impact and d) proposes building on the flood plain. The site plans do not even accurately show the proposed site boundaries.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

After the previous draft of this plan the government issued a housing white paper (HWP) clarifying that green belt areas must be more strongly protected. This matter was alerted to the council by myself (and doubtless others). Unfortunately however the council decided to disregard this white paper (as it boasted to a public broadcast meeting) and has issued this revised draft. This amended draft indeed does ignore the HWP, which makes it inevitable that the plan will be declared unsound at review as GBC must be considered to have ignored this ‘material consideration’.

Furthermore as the government has said it will provide further guidance on the matter of setting ‘Objective Assessment’s of Need’ this Autumn and as such the timing of this exercise is completely dumbfounding.

In particular the HWP directed the council to plan for the maximum use of higher density urban development, brownfield regeneration and transport hub integration and to make all efforts to exhaust these options before considering others. The council has done none of these things – au contraire it seems to have done the opposite. As a starting point the council must finally make an up to date inventory of its housing stock and the likely availability of windfall, brownfield, transport and urban development sites, and apply maximised development density assumptions, before it can make a valid plan. The council in having done none of these things is failing in its duty.

Rather than properly examining the potential of town centres the council in this plan has decreed that the ‘tide cannot come in’. It has ignored the impact of the Internet and even allocated town centre space for additional retailing. Rather than face the prospect of boarded up shops this space would be much better used for residential development. The footfall this would generate may even ‘save’ these town centres. To confirm this ‘Canute’ fear the Carter Jonas study update 2017 from which the plan was developed even includes “demand” for retail space from companies already in administration!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Council has singularly failed to state what it considers its objective need to be, issuing only a relative ‘net new dwelling’ number with no reference point which is therefore entirely meaningless. As this plan is not due to take effect until 2019/20 it cannot be the case that the same number of new dwellings will be required no matter how many there are now and no matter how many are built in the meantime – this would be nonsense!

Therefore the council’s proposed housing number is unsound and will be subject to a successful legal challenge.

According to the DFLG housing projections, based on ONS population and housing formation projections, extrapolated from the prior five years of data, the number of dwellings required in the Borough by April 2034 (i.e. the time period that the plan is to cover) is 65,859 – this was the starting point used by the council to inform its plan creation.

According to the last census, and adding completion and plan forecasts through 2019/20 when this plan is to come into effect, the total number of houses in the Borough by then will be at least 59,000. This leaves only less than 7,000 still to be built (from now until April 2034 i.e. 17 years i.e. about 411/year, far fewer than are being built now) – a number well within the five year land supply with no need to reclassify any green belt.

The council has put forward some arguments as to why it thinks a higher figure than 65,859 should be planned for. These are:

1. Higher student numbers – but student numbers are declining, foreign students are shunning Britain post Brexit (and we may well restrict them thereafter anyway) and there are no funds to expand the universities – the opposite is true. Even if student number growth were intended, which it is not, how anyway would a plan to build family homes far away from the university help this growth? This plan should go back into the melting pot.
2. Lower average house prices. It is claimed that somehow building a few more ‘market’ houses worth far more than the average house price will reduce the average. Simple maths shows the opposite would happen. To even claim an average price reduction because of over building houses worth more than the average is ‘fake news’. The most recent data for the South-East shows house prices anyway dropping rapidly toward the national average – the effects of Brexit (loss of confidence and exchange rate inflation squeezing real incomes), changes to stamp duty, ‘enveloped property tax’, etc. are cited as reasons why.
3. Contingency – why on earth ‘plan’ to exceed the plan, surely a plan is a plan.
4. After these three obviously wrong-headed adjustments the draft local plan then calls for 12,426 ‘net new homes’ (as stated with no reference point this target is meaningless – new added to what?). Using the councils’ own arithmetic however is ‘net new’ figure should be 9,810 not 12,426 – a glaring error.

I counter that Guildford should evidently be planning for far fewer than 65,859:

1. Net international migration, which the ONS says drove 80% of its most recent household formation projection, is way down post Brexit (this has led to a dramatic fall in net EU immigration, down 80% in the most recent quarter).
2. A five year view used by the council (via the DFLG projections) is the wrong ONS data to base its need assessment upon. The GLA for example bases its assessment on a 10 year view – which for Guildford would reduce its need below 60,000. As the GLA correctly points out using five years of data to extrapolate would mean undue emphasis would be given to the new EU entrant immigration ‘bubble’ of the late nineties. Hence they used a 10 year view in order to somewhat smooth out this bubble. All forecasters know it is important to eliminate outliers from their forecasts.
3. The Council has anyway not, as they are required to do, made any allowances for their ‘constraints’ such as the huge amount of green belt in their stewardship, lack of transport and other infrastructure, heritage assets, the flood plain within its area, air quality, AONB, TBHSPA, etc. With all these matters considered the OAN for Guildford for 2033/34 would be well under 60000 and there would be no issue in achieving this. Indeed the crying need for the Borough is how to limit the over provision of market housing – and the local plan is silent on this crucial subject. Any homes to be built should be ‘affordable’, but note well that the NPPF definition of this term is dwellings owned by the council or its housing associations (etc.) and/or with rents at least 20% subsidised by the council. There is no funding for either of these categories. [NB it is incredibly insulting to call market houses that will sell for many £100,000 ‘affordable’ as the council does in its draft plan – these are just slightly cheaper market houses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Removal from the Green Belt of homes in Guildford Road, northern end of Glaziers Lane, Flexford, Walden Cottages & Palm House nurseries traveller site. I object to this proposal. Placing these homes outside of the Green Belt could enable development within these areas at much higher density and could lead to greater success for planning applications. This is a wrong decision as these areas contribute to the openness of the Green Belt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Q+A Planning Ltd act on behalf Aviva Investors in respect of White Lion Walk shopping centre in Guildford town centre. Policy D4 has been significantly changed and concerns the character and design of new development. This includes a series of detailed design requirements and presumably is intended to replace, at least in part, the previous requirements concerning density in Policy H1. We have objected to Policy H1 to the removal of sensible support for high density residential developments in Guildford town centre. This sentiment has not been replaced in Policy D4.

The only response to density in the Plan concerns an open-ended requirement at criterion (d) of Policy D2 that seeks to ensure appropriate density to make the most efficient use of the land whilst responding to local character and context. Whilst as a concept, this is sensible, this gives little guidance on local circumstances or the general starting point on for density, particularly in the residential sector. Consistent with our comments on Policy H1, this is inconsistent with the requirements of local authorities in paragraph 47 of the NPPF to ‘set out their own approach to housing density to reflect local circumstances’.

It is requested that the overarching support for high density residential development in Guildford town centre ought to be re-introduced, since this properly responds to local circumstances and reflects the aim to deliver more housing in the town centre.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

See comments above

Attached documents:
Q+A Planning Ltd act on behalf Aviva Investors in respect of White Lion Walk shopping centre in Guildford town centre.

Policy E7 concerns Guildford town centre. The quantitative need for retail floorspace in the comparison sector has reduced for the town centre from 45,000 sqm gross to 41,000 sqm gross to 2034. It should be noted that the figure relates to 2030 rather than 2034, as set out in paragraph 4.4.79.

We have no comment on the reason for the reduction in floorspace. However, the reduction in the quantitative floorspace need available and the way the policy is worded suggests that this should all go to the North Street regeneration site. However, we do not believe this is the intention as paragraph 4.4.81 only refers to the ‘vast majority of the retail floorspace’. Therefore, this should be clarified.

The need for additional retail floorspace is driven by total growth apportioned to the town centre, once deductions for special forms of trading, improved efficiencies and commitments are taken into account. Therefore, in circumstances where the whole of the town centre could have a claim on this growth, the policy should be sufficiently flexible to enable other sites to meet some of these needs through redevelopments, reconfigurations, minor alterations of extensions.

Therefore, we consider the policy does not reflect the requirement of paragraph 23 of the NPPF (sixth bullet) that requires local planning authorities to allocate a range of suitable sites to meet the scale and type of retail (and residential) development in town centres.

It is also noted that the distribution of homes to the town centre is increased from 1,172 to ‘approximately 1,300 new homes, particularly on upper floors as part of mixed use developments’. Consistent with the amendments to the Vision (which we have commented upon separately), this should be a minimum rather than an approximate figure.

The ninth bullet point of paragraph 23 of the NPPF makes it clear that local authorities recognise that residential development can play an important role in ensuring the vitality of centres and set out policies to encourage residential development on appropriate sites. Given the increase in the amount of residential development expected in the town centre, we do not consider that Policy E7 is sufficiently strong on its encouragement for appropriately located residential schemes within the town centre and suggest explicit support is given to this aim.
Q+A Planning Ltd act on behalf Aviva Investors in respect of White Lion Walk shopping centre in Guildford town centre.

A change is proposed that deletes the section of this policy on density, and we object to the proposed deletion of the policy presumption that ‘high density development will be supported in Guildford town centre’. It is assumed that this section of the policy was removed due to the expanded detail in Policy D4 (which we comment on separately), but the clear policy direction has not been replicated in Policy D4.

In our view, including a presumption supporting high density residential development in town centres is entirely logical, since it enables the best use of previously developed land and helps cement sustainable development, with the convenient access to transport, shops and services development within the town centre will bring. Deleting this element waters down the policy for residential development.

In our view, this omission avoids the requirement for local authorities in paragraph 47 to ‘set out their own approach to housing density to reflect local circumstances’. A starting point for high density residential development in Guildford town centre would reflect local circumstances as a large town centre.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The support for high density residential development in Guildford town centre should be reintroduced.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Q+A Planning Ltd act on behalf Aviva Investors in respect of White Lion Walk shopping centre in Guildford town centre.

It is noted that the Plan’s spatial vision includes a lower requirement of homes of ‘at least 12,426 homes by 2034’. The reduction in the total requirement qualified by the change that makes it clear that the total number of homes is a minimum. However, the vision is not consistent when addressing where these homes will be located, with the use of the terms ‘approximately’ and ‘at least’ used interchangeably when considering the distribution of homes.

The NPPF makes it clear that the planning system needs to provide the supply of homes required to meet the needs of present and future generations (paragraph 7). Paragraph 47 of the NPPF also makes it clear that local planning should boost significantly the supply of housing.
Whilst we advocate the minimum housing requirement set out in the plan, we object to the use of approximately in respect of the distribution of homes, particularly the ‘approximately 3,000’ that will be located in urban areas, which take advantage of the existing infrastructure and services, reduce the need to travel and offer alternative modes of transport to the private car. This figure has changed from ‘over 2,800’ to approximately 3,000.

To support the Government’s housing agenda, there needs to be a recognition in the Council’s vision that the scale of housing in urban areas should not be artificially capped, given the sustainability advantages of located new houses in urban areas. Therefore, on this basis, we suggest that the terminology is amended to revert to the sentiment that ‘at least’ 3,000 homes will be located in urban areas.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

The terminology should be revised to consistently refer to 'at least' when considering the distribution of homes as well as the total requirement.

**Attached documents:**
Q+A Planning Ltd act on behalf Aviva Investors in respect of White Lion Walk shopping centre in Guildford town centre.

In the sites section of the Plan, 11 sites are allocated with Site A4 at the Telephone Exchange deleted. Of these sites, seven include housing. The total gross number of housing units for these sites over the plan period is 1,285, representing an increase from 1,135 from the previous version of the plan, representing an uplift of 150. It is noted that the allocation for the North Street site has increased 100% from 200 to 400.

Over half of the units allocated for the town centre (750) are expected to come forward on two large sites; namely North Street and at the Station. The proposals at North Street have been in the pipeline for approximately 15 years, with numerous false starts. It is appreciated that the Council have an exclusivity arrangement with the owners of the Friary Centre to attempt to agree commercial terms. However, as far as we are aware, these discussions have not yet concluded. Therefore, the timetable of this scheme remains uncertain.

In respect of the Station, planning application for a mix of uses to include 438 dwellings has been refused by the Council and is due to be heard at an appeal in November 2017. Therefore, there is some doubt over the timescales and the scale of housing that can be delivered on this site.

The Council is faced with a substantial need – both retail and residential – that the NPPF explains in paragraph 23 should be met in full and that local planning authorities should allocate a range of suitable sites. Therefore, we consider there is justification from the evidence before the Council to include a further allocated site to help meet these needs and provide choice to the market, consistent with the NPPF.

Therefore, Aviva Investors wish to put forward White Lion Walk shopping centre as a proposed allocation in the Plan for a mix of retail, leisure and residential uses. Aviva have only recently acquired the asset and therefore were not able to put forward the site for development in previous consultations or call for sites exercises. However, given that the Council have sought to increase the total number of dwellings in the town centre compared to the previous version of the Plan, and given the uncertainty surrounding the main two residential sites in the town centre, we consider there is robust justification to include White Lion Walk shopping centre as an allocation for retail (recognising it is already in retail use), residential and potentially leisure (in the food and beverage sector).

Whilst the shopping centre is occupied, the existing configuration is not fit for purpose when considering retailer requirements and macro-economic trends in the retail sector. Therefore, at this stage, our client is considering feasibility of different options for the site. However, the eventual outcome it is likely to include a reconfiguration of the existing retail floorspace to provide new floorplates meeting market demand, potentially with some supporting food and beverage uses and residential space on upper floors. The scheme has the potential to deliver up to 100 dwellings on the upper floors, subject to feasibility testing and design considerations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

While Lion Walk shopping centre should be allocated for a mix use development opportunity

I object to Policy A42 change at Clockbarn Nursery Tannery Lane, Send, because:

1. a) There is an increase of 33% in the number of homes from 45 to 60. This is far too many for this rural area.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Policy A42 change at Clockbarn Nursery Tannery Lane, Send, because:

- a) There is an increase of 33% in the number of homes from 45 to 60. This is far too many for this rural area.
- b) The traffic along Tannery Lane and at the junction to the A247 (Send Road) is already very busy during rush hour. The increase in houses and therefore traffic will make it intolerable.
- c) Severe water surface flooding will be made even worse.
- d) It will have a greater impact on the countryside views from the River Wey.
- e) Hundreds of previous objections from local people seem to have been ignored.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A43 Change at Garlick’s Arch because:

1. a) It ignores all the thousands of previous objections made by local people.
1. b) It will generate excessive traffic that will block the local roads in Send and Ripley.
1. c) There is no proven demand for Travelling Showpeople plots on this location.
1. d) It will cause over development of our village and the number of homes is excessive.
1. e) It is a beautiful permanent Green Belt and no "exceptional circumstances" exist.
1. f) It will join Ripley up with Send and defeat the object of the Green Belt.
1. g) It is an exquisite ancient woodland that existed in the time of Elizabeth 1.
1. h) It is subject to frequent flooding and is currently in a flood zone 2 allocation.
1. i) The land has been contaminated by lead shot for over fifty years

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 Land at Burnt Common Send because:

1. a) It had been deleted from the 2014 draft There Local Plan because of all the objections previously made.

1. b) There are empty sites and industrial units at Slyfield and Guildford therefore there is no need to build warehouse or industrial development in the middle of the green belt.

1. c) The impact on the small surrounding roads will be intolerable and create traffic gridlock. It is like this most of the time anyway especially if there are problems on the A3 or M25.

1. d) The employment land Need Assessment (2017) shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares in Send on the Green Belt.

1. e) The word "minimum" is a change from the previous "maximum" in the 2016 plan and since then there has been a decline in demand for industrial land.

1. f) This over development will join up existing villages and defeat the object of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposal to inset Send Business Park from the Green Belt because:

1. a) There is highly restricted vehicular access along Tannery Lane in both directions. The lane is very busy at peak times and will become worse.

1. b) Further expansion or development at this location detracts from the openness of the Green Belt and is totally inappropriate.

1. c) It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation canal and the Wey.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A42 Clockbarn Nursery, Tannery Lane

The proposed allocation for 45 homes in the previous draft plan on green belt land was objected to & I object to this revision which now proposes a 33% increase to 60 homes. Tannery Lane is unsuitable for the quantity of traffic which would be generated, as is the junction with the A247, and there are no exceptional circumstances to warrant development on the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A43 Garlick's Arch, Send Marsh

I object to the proposed allocation for 400 homes and 6 travelling show people plots. There are no exceptional circumstances to warrant development on the green belt. There is insufficient services infrastructure for housing and show people plots, nor any justification for concentrating 6 of the proposed 8 borough-wide show people plots within Send. The road network is insufficient for housing development on this scale.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A58 land at Burnt Common, London Rd

I object to a new allocation of 7,000 sq m of industrial or warehousing which was deleted from the 2015 draft. I also object to the wording of the allocation: the 2016 "maximum" allocation of 7,000 sq m has now been changed to "minimum". There is a surplus of industrial premises in the borough and the requirement for further industrial/warehousing has not been proven. The road infrastructure is inadequate and there are no exceptional circumstances to warrant development on the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy 2 paragraph 4.3.15 green belt.

I object to the proposal to inset Send Business Park from the green belt. The business park fronts the River Wey navigation which is acknowledged as protected corridor. The business park is a historical accident arising from a former historic industrial use. Tannery Lane is too restricted for any increase in traffic and the business park should remain within the green belt to inhibit further development.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the Policy A42 change at Clockbarn Nursery in Tannery Lane

The addition of a further 15 residential units to a total of 60 units with the consequent increase in traffic in Tannery Lane and the A247 junction.

The effect on the local schools and Doctor's surgery.

The destruction of the Green Belt by this development.

The increase in surface water flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the Policy A43 change at Garlick's Arch I have been unable to find any justification in the Plan that requires the inclusion of a site for Travelling Showmen in this area. Travelling Showmen, by the very nature of their business TRAVEL. Is this site inclusion at Garlick's Arch for their winter quarters? We are all aware “when the fair comes to town” of the size and nature of showmen's vehicles and equipment and the long running of diesel generators with consequent atmospheric pollution. Yet again the wanton destruction of Green Belt and historic woodland. The increase of some likely 800 additional vehicle movements, on the naïve assumption of one car per household, in the immediate area to schools, doctor's surgery and supermarkets and workplaces.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to Policy A58 at Burnt Common
Guildford Council have seen fit to increase industrial development on this land by increasing the MAXIMUM developable area referred to in the 2016 Plan to a MINIMUM area of 7000sq. m. in this Plan.
The Employment Land Need identifies a REDUCTION of need to 3.9 hectares across the whole Borough so how can the increase of at least 7 hectares, at one location, be justified?
Why not develop existing industrial land much of which is in Council ownership.
No reference has been made in the Plan to the increase of atmospheric pollution from diesel engined Heavy Goods Vehicles.
The Burnt Common roundabout is already congested by vehicles of all types. "leapfrogging" the congestion on the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

GREEN BELT Policy 2 paragraph 4.3.15
I OBJECT to the proposal to inset Send Business Park from the Green Belt.
This non-conforming user occupies a site surrounded by countryside and the River Wey.
Expansion of this industrial site will be detrimental to the open nature of the surrounding Green Belt.
Finally, I repeat that I am at a loss to understand why Guildford Borough Council has totally ignored objections made by Send residents during the 2016 Plan Public Consultation and why Send, and its immediate area, has been targeted as an area "ripe for development".

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

The traffic measurement figures for the Ash and Tongham proposals do not reflect the day to day traffic levels for the roads during the morning and evening peak, in light of recent changes by Rushmoor borough Council to traffic signals in Aldershot

[text of attachment reproduced below]

The Addendum to Guildford Borough Proposed Submission Local Plan “June 2016” Strategic Highway Assessment Report, states that conclusions of the SHAR 2016 is that:

“The results show that for Scenario 5, which represents the quantum and distribution of development proposed in the Proposed Submission Local Plan together with the key highway schemes, there will not be a severe impact on the local and strategic highway network” (p.62), and that,

“Nevertheless, the results of this assessment indicate that should the RIS schemes not be forthcoming then the residual cumulative impact of the Proposed Submission Local Plan on the highway network could be considered severe”

Certainly for the proposed developments in and around ash, in particular the Ash Lodge Drive development will have a significant impact on already saturated road network.

Recent changes to traffic signal timings and synchronisation in Rushmoor borough at the junction of North Lane and Ash Road has had a serious impact of traffic movements and journey times to the east of the borough boundary with traffic during morning and evening peak periods impacting Ash Street, the A331 and all of the local road network around Tongham, Ash and the A31/A331 junctions.

Traffic figures provided in the consultation documents are woefully inadequate and one has to question their validity, how they have been derived and the period during which they were obtained. On the 27th June, for less that 24 hours, a series of traffic monitoring cameras were deployed in and around Tongham, the A31 and the Manor Road / Ash Street junction (Greyhound Roundabout). The purpose of the cameras was not clear (Turning movements, origin / destination journey information, traffic counts etc.) however, what benefit could be derived from any data which is gathered in a period of less than 24 hours. Also, many of the senior pupils at Ash Manor school would not have been at school as this is during the exam period. any results from these video surveys will be worthless and of no value.

It is the case every day that the schools are open that traffic along Ash Street, Manor Road, Shawfield Road and Aldershot Road are brought to a complete standstill due to the volume of traffic. This is primarily due in the morning to parents taking children to school, as parking facilities at the local schools are non-existent. Additional homes in this area will only increase this burden on the local roads even with the developers contribution as the required infrastructure and services need to be overhauled, root and branch and minimal developer contribution will not address the real needs; they are merely a gesture.

| Policy A29: Land to the south and east of Ash and Tongham Capacity of the site has been increased from 1,200 to 1,750 homes. | No major impact on traffic impacts from those reported in the SHAR 2016. | The overall scale of growth in this strategic location for development has remained consistent but the capacity of the allocation for this site policy has been increased from 1,200 to 1,750 homes. The site policy now includes the various planning permissions in this area that have not yet commenced. There are no implications for the SHAR 2016 of this change. |
With regards the additional 550 homes in this policy A29, how is the impact on the highways being mitigated? Detail is lacking and to what improvements are being proposed and how the benefits of any improvements have been forecast and measured.

How is it that land has cannot be removed from the Green Belt in other areas of the borough to meet housing needs. Why are locations such Clandon, Ripley, Bramley and Shackleford not sites designated for development. They have much better access to the Strategic Road Network. Is it because GBC wish to move the developments as far as possible away from the showcase of their prized town centre and hope that the residents of those new developments will work and shop across the border in Hampshire? It strikes me that the Borough Council is Cherry Picking those areas which shall and shall not be removed from Green Belt protection based upon the class of the residents, their likelihood of complaining and the desire for the borough to remain a certain political hue.

Policy P3: Countryside

4.3.29 Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. Given its relative sustainability, countryside to the south and east of the urban area is allocated as a strategic location for development.

How has the sustainability of such large developments been calculated? The area is barely sustainable at the moment. What mitigations are proposed to improve an already poor level of sustainability and deliver improvements not only for the existing population of the area but for those who seek to move in to the new development.

What liaison has GBC had with Rushmoor BC to ensure that the overall developments of the two authorities do not destroy the environment and irreparably ruin an already difficult way of life for countless residents?

Local Plan, Page 212, Item 6. Why have the residents of Ash Green Road now been lumped in with Ash and Tongham. This seems ridiculous and only serves not only to upset and annoy the local residents, but also to put the borough planners in a poor light (not that it is looking to good so far).

The proposal for the bridges at Ash Level Crossing has been badly thought through. It is as if the BC is trying to make journeys through the area as difficult as possible to ensure travelers avoid the area. This is not always the case and people will have to life with this poor decision forever.

Local Plan, Page 330. What about Ash Walsh Schools. They are closer to the Ash Lodge Drive development and places here are in greater demand than Ash Grange. This needs a serious rethink.

Local Plan, Page 333. If Ash Manor school is to be expanded, serious improvements need to be made to the road infrastructure throughout Tongham, Ash and Ash Green. The values quoted in the report for developer contribution will, in no way, be enough to accommodate the expansion at these schools.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3240  Respondent: 17339041 / Carol Pedley  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- 2. Policy A29: Land to the south and east of Ash and Tongham
  
  I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.
• “Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond.

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows: “Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

  1. The Street in Tongham
  2. A331/A323 intersection
  3. A31/White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond.

Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows: “Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

Attached documents:
• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road

• 4.3.29 Amend to: “Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development.”

• 4.3.30 Amend to: “We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green.”

• Policy P3 Amend to: (1) (c) should be amended to read “does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

4.3.29 Amend to: “Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. However to make this growth sustainable, suitable infrastructure must be implemented before further development.”

4.3.30 Amend to: “We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green.”

Policy P3 Amend to: (1) (c) should be amended to read “does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.”

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should include the provision of a green buffer that maintains a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help
soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

- Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

- Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

- Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.
  a) The Street in Tongham
  b) A331/A323 intersection
  c) A31/White Lane junction

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

‘Policy H2: Affordable Homes’ - should change back to mandating social housing. Point 4 of it should be removed, affordable housing should be included in the main site, as it creates a better society when social housing is not separated from other developments.

Affordable housing definition in the appendix - includes social housing but makes no distinction of percentages. 40% affordable housing is mandated and at least 20% of it should be social housing. 10% should be dedicated to being
Community Land Trust housing and/or certain smaller developments should be handed to a local group to create a Community Land Trust. We feel that there are not enough truly affordable housing options being considered, and Community Land Trusts, amongst other options, should be mandated. In addition social housing should be clearly defined as ‘secure tenancies’.

Overall, we find the definition of affordable housing very vague, and makes it too easy for developers to make excuses for not providing affordable housing. In addition, truly affordable housing possibilities (such as Community Land Trusts) are not considered or mentioned, which is currently a disappointing missed opportunity.

The Council's latest AMR suggests a housing supply of a little over 2 years, which reflects a persistent failure to address the OAN. The calculation of 5YHLS takes account of sites identified in the SHLAA but which do not benefit from planning permission or an allocation. Site A36 is one of the sites that it is suggested could be drought forward within 5 years.

The site is available and could be developed for housing within 5 years.

The site is allocated for residential development in the submission draft of the East Horsley Neighbourhood Plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

The site should be reinstated as a housing allocation in the Local Plan, in part to reflect the putative Neighbourhood Plan allocation.

Lanpro Services are acting on behalf of Surya Hotels in relation to their Thatcher’s Hotel site in East Horsley, who have instructed Lanpro to review the current Guildford Borough Proposed Submission Local Plan: Strategy and Sites Consultation Document.

It is appreciated that Guildford Council are only seeking comments, at this stage, on the changes that it is proposing to make to the plan and on the new and updated evidence base. As such, these comments will focus on the proposed changes to The Horsleys – East Horsley (south) and Horsleys – East Horsley Proposals Maps. Lanpro are supportive of the changes made to the proposals maps.

The Thatcher’s Hotel, East Horsley

The Hotel extends to an area of approximately 1.6 hectares on the edge of the village of East Horsley.

The site is currently occupied by Thatcher’s Legacy Hotel with its associated car parking and landscaped areas. It is accessed from the A246 Epsom/Guildford Road which runs to the west and south of the site.

The topography of the site generally slopes gently upwards from north to south with a slightly steeper incline towards the southeast corner. Current site levels on the southern boundary are generally lower than those of the adjacent A246. There is well established natural vegetation around the site, particularly to the south and west along the perimeter boundary. The site does not contain any Public Rights of Way or bridleways.

The site in its entirety measures approximately 1.6 hectares. The footprint of the existing buildings cover an area of 0.24 hectares, which is approximately 14.5% of the overall site. Hard standing accounts for a further 0.39 hectares, which is approximately 24.5% of the total site are. The existing built form and hard standing combined cover 0.63 hectares, approximately 39% of the overall site.

The remainder of the site that is not occupied by the built form or development includes areas of grass, vegetation, signage, lighting and more formal garden seating areas closer to the building.

A part full, part outline application for the substantive demolition of the hotel buildings and change of use of the retained parts from hotel use (C1) to residential use (C3) (full application) and the erection of dwellings (outline application) to provide a total of up to 49 new dwellings was dismissed at Appeal on 9th February 2017 (Council Ref. 15/P/02354, PINS Ref. APP/Y3615/W/16/3158653).

The Horsleys – East Horsley (south) and Horsleys – East Horsley Proposals Maps

It is noted that the Local Plan proposes a number of changes to the proposals map, including:

- Removal of site allocation A36 (The Thatcher’s Hotel);
- Alterations to the Green Belt Boundary; and
- Alterations to the identified settlement boundary, to include the whole village settlement area.

Settlement Boundary

We support changes made to the identified settlement boundary, including removing East Horsley, particularly The Thatcher’s Hotel site, from the Green Belt. These changes will give clarity and certainty in supporting a wider range of uses regarding either the expansion or redevelopment of the existing hotel use, or the future redevelopment of the site.

Site Allocation A36

With regards to site allocation A36, it is noted that the Council’s principal reason for removing the hotel is due to, “insufficient evidence to demonstrate the loss of the hotel.” Following the refusal of the earlier scheme in 2017, the owners of the site are considering their next steps regarding the redevelopment of the hotel, which is likely to include providing further evidence to address the Inspector’s views on this issue. As such, it is possible that further evidence to justify the allocation could be available prior to the Examination In Public to support the redevelopment of the hotel.
Furthermore, it is noted that the most recent draft of the East Horsley Neighbourhood Plan, published 21st March 2017 (and after the Inspector’s decision), retains this site as an allocation for housing development (as Site 4). Policy H6 of the Neighbourhood Plan proposes an allocation of up to 22 dwellings, providing that the loss of the hotel facility must be appropriately justified in the planning application in accordance with the applicable local plan.

The changes proposed to the East Horsley Proposals Map does not identify a replacement allocation for the 22 dwellings proposed by The Thatcher’s Hotel site. As such, we would suggest that an alternative approach to this site could be to retain the allocation on the basis that it may facilitate the expansion/improvement/diversification of the hotel to make it viable as enabling development, or retain the allocation to enable the redevelopment of the hotel site, depending on the site only being developable when the Local Authority is satisfied that the loss of the hotel has been justified, following the further work being done to look at demand and supply of bed spaces and the overall short to medium term viability of the hotel.

**Development Proposal for The Thatcher’s Hotel**

As with the previously refused scheme, it is considered that the site can accommodate up to 49 dwellings.

Any proposed development would involve the demolition of the majority of the existing hotel and outbuildings, with the exception of the original Chown building, which could be retained and converted into private flats. 35% of the proposed dwellings would be provided as affordable.

Development of this site would comply with general NPPF policies relating to the use of brownfield sites, specifically paragraph 111 which states that, “planning policies and decisions should encourage the effective use of land by re-using land that has been previously developed.”

**Summary**

Lanpro supports the alterations proposed to the settlement and Green Belt boundary as it would allow for the redevelopment of the hotel and its wider site. However, we would welcome the retention of the site allocation A36, to support the redevelopment and expansion of the hotel site.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** pslp171/1150  **Respondent:** 17340193 / Surya Hotels (S Dulai)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy E6

**Do you consider this section of the document; complies with the Duty to Cooperate? (No), is Sound? (No), is Legally Compliant? (No)**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

Part 3 of Policy E6 provides something of a catch-all approach to the protection of leisure and cultural facilities, including arts venues, entertainment venues, hotels and indoor sports venues. This approach fails to take account of the unique characteristics of the discrete uses that have been grouped together in the policy.

Hotels function across a wider geographical area than the Borough as is demonstrated by the Council's Evidence base. The Surrey Hotel Futures Report addresses the sector across the entire County and the need or otherwise for a hotel to be retained should be based on a similar analysis and not restricted to the geographical boundaries of the Borough.
The policy effectively requires that a replacement facility be provided in order to facilitate the loss or redevelopment of an existing hotel. However, this approach assumes that a duplicate facility is necessary and fails to take into consideration the existing provision across either the Borough or County. Where sufficient capacity exists, a replacement facility should not be required. The approach set out in the policy is not supported by the evidence base.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The policy should be amended as follows:

(3) The loss of existing visitor, leisure and cultural attractions, including arts and entertainment facilities, hotels and indoor sports venues, will be strongly resisted unless it can be demonstrated that sufficient alternative capacity of an equivalent or better standard is in place or could be provided. Alternatively, robust evidence must be provided that demonstrates that the facility causes significant detriment to the amenity of the locality or that:

(a) there is no longer a need for the existing facility or an alternative leisure or visitor use; and

(b) the existing use is unviable and its retention has been fully explored (including active and comprehensive through marketing the facility for its existing and alternative leisure or visitor use for a continued period of at least 18 months prior to submission of a planning application).

| Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2 |
| Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( ) |
| Answer (if comment is on questions 1-7 of the questionnaire): () |
| Policy S2 relates to the Council’s Spatial Development Strategy. It is noted that the wording of this policy has been amended to provide greater clarity regarding the overall housing requirement, as a total of 12,426 new homes during the plan period 2015-34. |
| The policy confirms that proposed allocations are shown on the corresponding proposals maps. As referenced above, the proposals map now proposes the removal of the Thatcher’s Hotel site (in contrast to the East Horsley Neighbourhood Plan). Given the ongoing viability concerns surrounding the hotel, it is considered that the site could make a contribution to the Council’s housing supply, as and when evidence is provided to support its redevelopment, and as such it is considered that its allocation could be retained. |

| Attached documents: |

| Comment ID: pslp171/3510  Respondent: 17340577 / William Wheeler  Agent: |
The changes to the plan have created even more contradictions to what it hopes to achieve and what it proposes. It says that it proposes to reduce the need to travel and energy consumption and then increases the number of sites in policy A29 and the number of homes allocated to 1750+ in an area where there is insufficient wealth creation at the very edge of the borough to employ the existing population let alone these proposed new residents, thereby creating even more commuter journeys. Ash and Tongham is being considered as a town when by definition they are not since a town is a place where people not only live but also work which is patently, not the case. Ash, Tongham, Ash Vale and Ash Green should still be afforded their individual identities and would have had, if the green buffer area which is now so important between Ash, Tongham and Aldershot, had been applied to them in the recent past. The green,Tranquil buffer (4.3.34) actually sits aside 4 lanes of fast moving traffic (except at peak times when the traffic is anything but).

The increase in the number of sites in policy A29 added to A28 means an increase of new homes in excess of 1800 new homes, all on green field sites in villages already known to be the second largest urban conurbation in Guildford borough. This increase is only surpassed by the proposed Wisley allocation of 2000. It does appear that other villages within the borough are not having to give up so much of their pleasant environment as Ash, Tongham and surrounds have done in the past and now again in this amended plan, not that I have any wish to see this "chase for growth and push the debt on the next generation" attitude inflicted on anybody else.

The site allocation of policy A29 now includes areas of Ash Green to the north, south and east of Ash Green road and South of Foreman Road which the plan purports to protect without any consideration for a green buffer apparently so important elsewhere.

The amended plan purports to protect sites of historic interest yet policy A29 is in direct conflict with this given its impact on Ash Manor.

The admission that the local infrastructure doesn't meet the needs of many of its residents and is considered poor by many (para 4.6.1) will not be addressed by infrastructure improvements for only those in these new developments (policy Id1). Thereby diminishing further the living standards of the existing residents due to the blight of new development as admitted in policy Id1.

The site apportioned in policy A29 for the new road bridge to relieve congestion caused by the Ash station level crossing has been deleted and is not identified elsewhere which suggests no priority for such an important infrastructure necessity now, regardless of future development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1151  Respondent: 17340769 / Saima Shah  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In reference to the revised Policy P2 Green Belt

I make the following objections:

- I object to the changes to Policy P2 because they have not addressed many of the 32,000 comments made to the 2016 plan.
- I object to the new para (1) “The Metropolitan Green Belt will continue to be protected as shown designated on the Policies Map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.” The words “as shown designated on the Policies Map” should be deleted. The Policies Map has effectively ignored huge areas of Green Belt protection and the new para (1) is therefore a sham.
- I object to the proposed change that Normandy settlement, Flexford settlement and Walden Cottages should be inset from the Green Belt due to the fact that:
  - There is evidence in past planning appeals APP/Y3615/W/15/3002308, APP/Y3615/A/10/ 2140630 and APP/Y3615/A/10/ 2131590 that the land here contributes to the “openness” of the Green Belt
  - There is evidence in the Sustainability Appraisal para 10.4.7 that the agricultural land between the settlements is of BMV quality, exhibits ‘openness’ and contributes to the rural economy
  - The land in and around the settlements of Normandy and Flexford contributes to views into and from the Surrey Hills AONB (Hog’s Back)
- Policy P2 fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it needs to be permanently protected. The Green Belt is intended to check the unrestricted sprawl of built up areas;
to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land.

- Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital.
- It is incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of land that may be removed from the Green Belt.
- I object to the statement in the submission Local Plan under Green Belt Policy P2 (4.3.13) which claims that Normandy, Flexford and a further list of 12 villages are “now inset from the Green Belt”. This statement is untrue as GBC is proposing to “inset” these villages. No decision has been made by an Inspector, therefore the villages remain in the Green Belt.
- I object to the changed “insetting” of 15 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages.
- I am concerned that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. This is completely unplanned and unmeasured development outside the OAN.
- Many Guildford villages are elongated in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Spatial Vision (following paragraph 3.1) and Local Plan Policies S2 and P2, as amended, are not sound.

The Spatial Vision, as amended, does not include a sufficient number and variety of housing allocations to meet the identified growth needs of the Borough. The reliance on a limited number of strategic greenfield sites with substantial infrastructure requirements results in shortages of housing land supply in the early years of the plan and uncertainties about housing delivery in the later years of the plan. In particular, the Council has not included sufficient land in sustainable locations on the edges of the urban areas, in locations that would entail modifications to the inner boundaries of the Green Belt, such as Tangleys Place Farm, Worpleston.

The proposed phasing of housing supply in Policy S2 (spatial development strategy and annual housing targets), as amended, is not justified and does not meet the objectively-assessed need for housing consistently throughout the plan period. It is clear that there would not be a five-year supply of housing on adoption of the plan and there are also doubts
about whether housing targets will be met later, because of restrictions on the release of housing land imposed by Green Belt Policy (P2) and the reliance of the spatial development strategy on specific infrastructure improvements.

Policy P2 and the related maps of Green Belt boundaries, as amended, are not sound as they are based on a review of Green Belt boundaries that does not comply with paragraphs 84 and 85 of the National Planning Policy Framework. In particular, insufficient weight has been given to the need to promote sustainable patterns of development and to the consistency of the policy with meeting identified requirements for sustainable development.

Opportunities for sustainable development for housing and other uses associated within the edges of the main urban areas and other settlements have been overlooked because of an inappropriate approach to review of the Green Belt, based on the boundaries of arbitrary land parcels.

The review of Green Belt in the area of Tangley Place Farm, Worplesdon, exemplifies these shortcomings which are explained in detail in the Tangley Place Concept Statement that forms part of this submission. In this area, Green Belt boundaries should be reviewed, as described in the report, to accommodate a mix of housing and open space uses (including SANG and other open space uses) within revised Green Belt boundaries that reflect physical features that are readily recognisable and likely to be permanent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

See above and the accompanying report from Sustainable Land Products (Tangley Place Concept Statement) for further details.

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Spatial Vision (following paragraph 3.1) and Local Plan Policies S2 and P2, as amended, are not sound.

The Spatial Vision, as amended, does not include a sufficient number and variety of housing allocations to meet the identified growth needs of the Borough. The reliance on a limited number of strategic greenfield sites with substantial infrastructure requirements results in shortages of housing land supply in the early years of the plan and uncertainties about housing delivery in the later years of the plan. In particular, the Council has not included sufficient land in sustainable locations on the edges of the urban areas, in locations that would entail modifications to the inner boundaries of the Green Belt, such as Tangley Place Farm, Worplesdon.

The proposed phasing of housing supply in Policy S2 (spatial development strategy and annual housing targets), as amended, is not justified and does not meet the objectively-assessed need for housing consistently throughout the plan period. It is clear that there would not be a five-year supply of housing on adoption of the plan and there are also doubts about whether housing targets will be met later, because of restrictions on the release of housing land imposed by Green Belt Policy (P2) and the reliance of the spatial development strategy on specific infrastructure improvements.

Policy P2 and the related maps of Green Belt boundaries, as amended, are not sound as they are based on a review of Green Belt boundaries that does not comply with paragraphs 84 and 85 of the National Planning Policy Framework. In particular,
insufficient weight has been given to the need to promote sustainable patterns of development and to the consistency of the policy with meeting identified requirements for sustainable development.

Opportunities for sustainable development for housing and other uses associated within the edges of the main urban areas and other settlements have been overlooked because of an inappropriate approach to review of the Green Belt, based on the boundaries of arbitrary land parcels.

The review of Green Belt in the area of Tangle Place Farm, Worplesdon, exemplifies these shortcomings which are explained in detail in the Tangle Place Concept Statement that forms part of this submission. In this area, Green Belt boundaries should be reviewed, as described in the report, to accommodate a mix of housing and open space uses (including SANG and other open space uses) within revised Green Belt boundaries that reflect physical features that are readily recognisable and likely to be permanent.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (;)

The accompanying report (Tangle Place Concept Statement) points to shortcomings in the Green Belt & Countryside Study as the basis for reviewing Green Belt boundaries and identifying appropriate allocations to meet the objectively-assessed need for housing throughout the plan period.

In particular, the Green Belt review does not comply with the requirements of paragraphs 84 and 85 of the National Planning Policy Framework, as it does not give sufficient weight to the need to promote sustainable patterns of development or reflect long-term development requirements.

In addition, the Land Availability Assessment is not based on a consistent rate of housing delivery that reflects housing requirements. It shows a shortfall in housing land supply throughout much of the plan period, including the absence of a five-year supply of housing land on adoption of the plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

The Local Plan is not sound because it fails to comply with paragraphs 14, 47, 84, 85 and 182 of the National Planning Policy Framework.

In particular, the plan fails to meet the full objectively-assessed need for housing over the whole of the plan period and fails to achieve a five-year supply of housing land on adoption of the Local Plan.

In addition, the Review of Green Belt and the Spatial Development Strategy have not given sufficient weight to meeting the full objectively-assessed need for housing throughout the life of the plan and the need to promote sustainable patterns of development.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Although Guildford Borough Council has generally complied with the statutory procedures for preparing the Local Plan, it has not complied fully with the ‘Duty to Co-operate’ which is a statutory requirement in Section 110 of the Localism Act 2011; particularly in relation to housing provision and Green Belt review.

Please refer to the accompanying report from Sustainable Land Products (Tangley Place Concept Statement)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

The Duty to Co-operate Topic Paper records ongoing discussions with neighbouring districts in Surrey on the production of a Local Strategic Statement (LSS). It also describes co-operation on a joint Strategic Housing Market Assessment (SHMA) but it does not point to any substantive agreement with neighbouring councils to ensure that the delivery of housing will meet the objectively-assessed needs of the Housing Market Area (HMA) throughout the plan period.

Paragraph 4.49 of the Topic Report refers to a Statement of Common Ground in which the three neighbouring authorities of Guildford, Woking and Waverley have acknowledged that there is unmet need within the HMA, but the Statement simply 'commits the three authorities to continued future joint working to ensure that as far as possible, and subject to the policies in the NPPF, housing needs across the HMA are met in full.'

The NPPF is explicit, in paragraphs 47 and 182, that local planning authorities should meet the full objectively-assessed need for housing in the housing market area, subject to other considerations, and should consider unmet housing needs in neighbouring authorities when formulating their local plan strategy. This has not been done by Guildford and its neighbouring authorities.

The Topic Report also concedes (in paragraph 4.93), in relation to Green Belt review: 'As the broad methodology that underpins the study was developed prior to the NPPF and Localism Act, we did not engage with neighbouring authorities at that time.'

In relation to both housing and Green Belt review, it is therefore clear that the requirements of the Duty to Co-operate have not been met: in terms of the legislation in Section 110 of the Localism Act 2011; in terms of the policies of the National Planning Policy Framework; or in terms of the advice in Planning Practice Guidance.

Please refer to the accompanying report from Sustainable Land Products (Tangley Place Concept Statement) for further details.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am a resident of Ash Green Village which seems to be encompassed by these plans but is not mentioned by name. Ash Green village is a separate entity bounded by Ash Green road to the north and has been since the early 19th century. This village is not part of the Ash and Tongham Urban Area and the unbuilt on buffer area must remain between Ash Green Village and the Ash and Tongham Urban Area.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The buffer of Ash Manor should be maintained as it not only forms a natural buffer but is of historic significance.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

With regard to site A35, development at the site of the former Wisley airfield, although I welcome the change in the number of new homes to be created from 'over 2000' to 'approximately 2000', this change does not go far enough. Approximately, allows for a figure considerably more than 2000 and the number should be amended again. I strongly object to the plan to inset the site from the green belt - although developed and used during the war as an airfield, the site was previously rural and it should be returned to its original usage. Nevertheless, if the borough insists on supporting this unwelcome development, then the proposed number of houses is still far too many and will result in a very crowded site, out of keeping with local patterns of building. The increase in the local population will result in an even greater increase in traffic on the local roads, increasing pollution, demand on services, waiting times in the local surgery, and congestion at the local railway stations. The size of the development is out of keeping with the local village of Ockham. The proposals to ensure the developers include infrastructure such as new schools etc will not address the issue that the increase in number of people will change the character of the local environment and congestion in the surrounding areas. In my view the number of proposed homes should therefore be reduced to 500. However, if the borough will not cut down the number in spite of the strong local opposition to the proposals at least 'approximately 2000' should be changed to 'no more than 2000'.

I also welcome the removal of A36 and A41 from the proposed sites for development in East and West Horsley, but I object to the numbers of houses still proposed in the other local developments A37 to A41 inclusive. These are excessive and the numbers of proposed properties at all of these sites should be halved in order to maintain an adequate rural quality to the local environment without unduly increasing the pressures on the local services, transport etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Key facts

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Paragraph 2.13 overemphasises the facilities for pedestrians in the villages. In our village of East Horsley, except in the shopping parade, there is usually only one footway and in places these are very narrow and not safe to use. The footways are in poor condition and need repair. The statement that facilities to assist pedestrians in crossing the road are commonplace does not apply locally. There is only one pedestrian crossing in the whole village. The sentence on cycle lanes should be expanded to comment that on the majority of roads, there are no cycle lanes and in the majority of rural roads, especially through the villages, the roads are too narrow to accommodate cyclists safely.

I welcome the additions to paragraph 2.15, but the remainder of the plan is singularly lacking in a coherent plan to address the very poor state of the local roads in the borough. The proposed new housing developments will put a considerable additional temporary strain on the roads because of construction traffic, and a permanent additional strain from increased traffic in the future.

Vehicle Speeding is another transport issue that is not mentioned and needs to be addressed, especially with regard to any new developments, where 20mph limits should the norm in my view.

One important transport issue that should be mentioned in this section is the need to encourage more use of electric vehicles by the provision of electric charging points throughout the borough (not just in new developments) and ensuring that new developments must provide these, rather than just suggesting that they 'may' include such measures.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I welcome the strengthening of Policy ID3. However, paragraphs (1) and paragraph 4.6.22 should be strengthened further by adding "add providing facilities for charging electric vehicles". I support the encouragement of walking, cycling and public transport, but as an older member of the borough, I am well aware that these forms of transport are often not possible for the very young and the elderly and they will continue to need to use private transport. Moreover, it is inevitable that people will continue to want to use their car, even if other options are available. The policy as a whole does not pay sufficient attention to this need of a substantial number of the population: however, the wider adoption of electric vehicles would have major benefits for the environment from reduced air pollution and noise pollution.

Paragraph 4.6.22 should be strengthened further by adding "and use of electric vehicles"

Paragraph 4.6.27 should be improved by changing 'can' in 'Such measures can include car clubs, car sharing, facilities for electric charging plug-in points" to 'should'

Do you consider this section of the document; complies with the Duty to Cooperate? (Yes), is Sound? (No), is Legally Compliant? (Yes)

Answer (if comment is on questions 1-7 of the questionnaire): ()

Refer to attached reports for evidence why our client considers that Broadford Business Park should be re-instated as a residential site allocation, as per draft Policy A34.

6.1 The NPPF states that the purpose of planning is to help achieve sustainable development. Paragraph 7 states that there are three dimensions to sustainable development, comprising economic, social and environmental roles. Paragraph 8 emphasises the need for the planning system to balance these different dimensions.

6.2 The fundamental premise of the NPPF is a presumption in favour of sustainable development and Paragraph 14 states that this should be seen as a golden thread running through both plan-making and decision-taking.

6.3 As previously accepted when GBC allocated Broadford Business Park for residential development, the Site complies with the definition of Sustainable Development as described in the NPPF. A residential development would be economically, socially and environmentally sustainable, and critically it would provide much needed housing, thus contributing to GBC’s 5YHLS.

6.4 Table 4 summarises how the proposals for Broadford Business Park comply with the definition of Sustainable Development as described in the NPPF.

[Table 4]

Case for maintaining the residential site allocation

6.5 As set out in Sections 1.0 and 4.0 of these representations, Zurich objects to the designation of Broadford Business Park as a LSES, and maintains the view that a residential development is the most appropriate use for the Site.

6.6 The Site is previously developed land in the Green Belt, and in view of the lack of suitable sites within Guildford’s urban areas and villages, the release of additional sites in the Green Belt and surrounding countryside is required. Broadford Business Park provides an opportunity to contribute towards GBC’s housing needs with a negligible impact on the openness of the Green Belt and the purposes of including land within it.

6.7 As identified by the redacted policy A34 set out in Table 5, GBC previously considered the site to be a deliverable residential site, with capacity for up to 100 homes.

[Table 4]

6.8 This draft policy was supported by the Land Availability Assessment (2016). Consistent with the deliverability tests described at footnote 11 to paragraph 47 of the NPPF, the 2016 LAA considers the suitability, availability and achievability of new development sites. In relation to Broadford Business Park (ref. 2186) the 2016 LAA stated:

“This site is most suited for residential development, to provide new homes to meet the identified need.”

6.9 It was also noted that development could take place from 2018, with the delivery phased in accordance with the building leases set out in Table 2.

Evidence previously submitted in support of residential development
6.10 Zurich supported previous residential allocation as part of their representations submitted in response to the previous Regulation 19 consultation in July 2016. The representations were accompanied by the following technical reports to demonstrate that the Site is free from insurmountable constraint and meets deliverability tests referred to in paragraph 47 of the NPPF.

- **Design Statement** – This included an illustrative masterplan to highlight the residential opportunities for the Site and demonstrate that the Site had capacity for 100 dwellings;

- **Commercial Refurbishment Viability Report** (since updated) – This set out why the continued employment use of the Site was no longer viable, including reference to the Sites condition and demand for such employment floorspace;

- **Flood Risk Advice Letter** (since updated) – This set out clearly the potential risk from flooding and identified what mitigation measures could be employed to both prevent flooding on site and improve the local flood risk levels generally;

- **Landscape and Visual Commentary** – This highlighted that a residential development would present opportunities to improve the visual impact of the Site on the Green Belt and the wider landscape; and

- **Transport Note** – This acknowledged the transport impact of the existing employment use and concluded that the level of traffic likely to be generated by a residential use would be similar to the existing use.

6.11 Since the 2016 GBLP consultation, there have been no material developments which would alter the conclusions of these reports, or the assessment of the Site contained within the 2016 LAA (ref. 2186).

6.12 An updated Commercial Viability Report, as discussed in Section 4.0, and Flood Risk - Sequential Test Assessment have been prepared in response to the updated evidence base that accompanies the latest consultation on the emerging GBLP to demonstrate the planning case for a residential development remains.

### Commercial viability

6.13 The updated CVR (and associated financial appraisals) considers the following:

- Whether the existing buildings are suitable for refurbishment or whether they have reached the end of their economic life.

- Whether redevelopment of the site for employment use is economically viable.

- Whether there is a need for this current space within the Borough for employment purposes or whether there are better suited locations.

6.14 The report advises that the existing buildings are failing and the considerable cost of their refurbishment is not a viable option for a developer. It also confirms that alternate employment uses on the site as part of a redevelopment proposal would be unviable and, in any event, the site is not best placed for such a use in terms of location or demand. Its concluding remark is:

> "Refurbishment of the existing office stock or the redevelopment of the site with a new office scheme will not offer a viable proposition for developers or investors. If the Property were to be brought to the market in its current form we are of the opinion that demand will be from residential developers."

6.15 A detailed assessment of the CVR is provided in Section 4.0 of these representations.

### Flood risk sequential test

6.16 As previously noted, the Site lies partly within Flood Zone 1, 2 and 3. When considering the flood risk implications of new development in areas prone to flooding, the PPG states that:

> "A local planning authority should demonstrate through evidence that it has considered a range of options in the site allocation process, using the Strategic Flood Risk Assessment to apply the Sequential Test and the Exception Test where necessary. This can be undertaken directly or, ideally, as part of the sustainability appraisal. Where
other sustainability criteria outweigh flood risk issues, the decision making process should be transparent with reasoned justifications for any decision to allocate land in areas at high flood risk in the sustainability appraisal report. The Sequential Test can also be demonstrated in a free-standing document, or as part of strategic housing land or employment land availability assessments”[14].

6.17 Zurich have noted that GBC have not included an updated Flood Risk Sequential Test as part of the updated evidence base for the GBLP. Therefore, in order to give GBC comfort that the Site would continue comply with the sequential test requirements.

6.18 WSP’s assessment demonstrates that the Site is sequentially better than the alternative sites and that there is no requirement for the Exception Test to be considered at this stage. The site should therefore be allocated for residential use.

6.19 Notwithstanding this, Zurich would recommend that GBC updates its Flood Risk Sequential Test prior to submission of the GBLP for examination in order to ensure the evidence base is robust.

**Deliverability of residential proposals**

6.20 Zurich is committed to ensuring the optimal amount of new homes are delivered on the Site in order to provide a meaningful contribution to the GBC’s housing needs, including the unmet housing need from Woking Borough Council, at an early stage within the plan period. The Site continues to be free from insurmountable constraint, including passing any updated flood risk sequential test should look to undertake.

6.21 As explained in Section 2.0 of these representations, the Site is wholly within the single freehold ownership of Zurich. The majority of the Site will be available for redevelopment by 2019 through vacant procession, with Bishopsgate House available to be included as a second phase by 2022 (still within the first five years of the plan). As a result of the progress in the preparation of the Local Plan being delayed, the site would now available for development within the first 5 years of the plan period, which will provide a meaningful contribution to the borough’s short term and urgent housing needs and as well as GBC’s unfulfilled 5YHLS.

6.22 Zurich does not consider that the Site’s circumstances have materially changed since it was found to be suitable and allocated for residential development in 2016. With it having been demonstrated that the designation of the site for employment purposes is unsustainable and the clear evidence showing that residential site allocation is deliverable, Zurich strongly advocates that GBC reconsider the decision to allocate Broadford Business Park for employment use, and recognise the potential of the Site to deliver much needed housing in GBC. Housing which can be delivered in the short term, subject to planning.

7.1 Zurich consider that the GBLP prepared by GBC has adopted an approach that is not ‘positively prepared’, ‘justified’, ‘effective’ or ‘consistent with national policy’. Therefore, the GBLP fails to satisfy the ‘soundness’ tests outlined in paragraph 182 of the NPPF.

7.2 In summary, Zurich’s overall conclusions in responding to the GBLP consultation are as follows:

- Zurich supports GBC’s improve housing delivery in the borough, the current housing target cannot be considered as meeting OAHN in full as required by the NPPF, on the basis that the GBLP currently only seeks to meet the OAHN for Guildford, despite there being an unmet need in WOK;

- Zurich recommends that GBC should proactively seek to meet full OAHN by reconsidering those sites removed as part of LAA2 in order to meet this unmet need and improve affordability in the borough;

- The existing buildings at Broadford Business Park are poor quality and in need of substantial investment, which is unlikely to be forthcoming in view of local market conditions. The current proposal to designate Broadford Business Park as a ‘Locally Significant Employment Site’ is therefore not viable or sustainable in the medium to long term;
• The Site continues to pass the flood risk sequential test required to support the GBLP. Notwithstanding this, GBC should update its flood risk sequential test to be based on the latest list of sites contained within the 2017 LAA2 prior to the GBLP being submitted for examination;

• Site specific technical work supports Zurich’s conclusion that the Site is suitable for release from the Green Belt, and initial development proposals demonstrate that future development would meet the objectives of the GBLP, would be ‘deliverable’ in accordance with footnote 11 of paragraph 47 of the NPPF and would represent a sustainable residential development;

• “Exceptional circumstances” exist to release additional Green Belt sites beyond those currently included within the GBLP, in order to seek to meet full OAN;

• The Site is capable of delivering a meaningful level of new market and affordable housing; and

• The Site is within the single freehold ownership of Zurich with the existing tenant leases due to expire shortly or have break clauses available meaning that any redevelopment for residential purposes could come forward in the first five years of the plan.

7.3 GBC acknowledge that there is an acute shortage of housing in the borough that makes the borough one of the most unaffordable places to live in the UK. These representations have demonstrated that the Site is not a suitable location for employment uses and refurbishing/replacing the existing buildings to an acceptable standard is not a viable proposition, thereby meaning the Site would be likely to become derelict. When weighed against the chronic housing shortages in the borough, Zurich consider that the need for housing clearly outweighs protecting the Site as an unviable employment location.

7.4 Therefore, in order for GBC to be able to meet its full OAN, or increase its ability to do so, the list of site allocations should be amended to, at the very least, include sites that were included in the previous version of the GBLP consulted upon in June/July 2016. Similarly, Zurich strongly believes Policy A34 should be reinstated, with Broadford Business Park allocated for residential use to meet the identified housing need.

7.5 Zurich would welcome an opportunity to discuss our findings in more detail with the Council’s officers and members, prior to the GBLP being finalised and submitted to the Secretary of State, in seeking to resolve the objections and ensure that the plan can subsequently be found sound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Re-instate Broadford Business Park as a residential site allocation as per draft Policy A34.

Do you consider this section of the document; complies with the Duty to Cooperate? ( Yes ), is Sound? ( No ), is Legally Compliant? ( Yes )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Refer to the attached reports for evidence why designating Broadford Business Park as a Locally Significant Employment Site is unviable and unsustainable in the medium to long term, thereby meaning that the scope of this policy cannot be delivered. As a result, this policy has not been 'positively prepared', 'justified', 'effective' or 'consistent with national policy' as required by paragraph 182 of the NPPF and associated national guidance.

Policy context

4.1 Paragraph 17 of the NPPF sets out core land-use planning principles that should underpin both plan-making and decision-taking. It requires Local Planning Authorities to:

“Objectively identify and then meet... business and other development needs of an area, and respond positively to wider opportunities for growth. Plans should take account of market signals, such as land prices and housing affordability, and set out a clear strategy for allocating sufficient land which is suitable for development in their areas, taking account of the needs of the residential and business communities.”

4.2 Local Planning Authorities should seek to address the quantity of economic development floorspace needed based on qualitative assessments of each market segment. Assessing development needs should be proportionate and consider only those future scenarios that could be reasonably expected to occur (Paragraph 003, PPG)[11].

4.3 In establishing the Functional Economic Market Area (FEMA) from which a local planning authority should use to determine the employment land needs for a specified area, paragraph 012 of the PPG[12] refers to the following factors that should be taken into account:

“The geography of commercial property markets should be thought of in terms of the requirements of the market in terms of the location of premises, and the spatial factors used in analysing demand and supply – often referred to as the functional economic market area. Since patterns of economic activity vary from place to place, there is no standard approach to defining a functional economic market area, however, it is possible to define them taking account of factors including:

- extent of any Local Enterprise Partnership within the area;
- travel to work areas;
- housing market area;
- flow of goods, services and information within the local economy;
- service market for consumers;
- administrative area;
- Catchment areas of facilities providing cultural and social well-being;
- transport network.

[12] PPG, paragraph: 012 Reference ID: 2a-012-20140306

Suggested Data Source: Office of National Statistics (travel to work areas)”.

4.4 Once the FEMA for an area has been established, which in GBC’s case includes parts of Waverley and Woking Boroughs, the paragraph 030 of the PPG[13] states that in being able to understand the current market in relation to economic and main town centre uses as well as current and future employment land needs, plan makers should:

“...should liaise closely with the business community to understand their current and potential future requirements. Plan makers should also consider:

- The recent pattern of employment land supply and loss to other uses (based on extant planning permissions and planning applications). This can be generated through a simple assessment of employment land by sub-areas and market segment, where there are distinct property market areas within authorities.
- Market intelligence (from local data and discussions with developers and property agents, recent surveys of business needs or engagement with business and economic forums).
• Market signals, such as levels and changes in rental values, and differentials between land values in different uses.
• Public information on employment land and premises required.
• Information held by other public sector bodies and utilities in relation to infrastructure constraints.
• The existing stock of employment land. This will indicate the demand for and supply of employment land and determine the likely business needs and future market requirements (though it is important to recognise that existing stock may not reflect the future needs of business). Recent statistics on take-up of sites should be consulted at this stage, along with other primary and secondary data sources to gain an understanding of the spatial implications of ‘revealed demand’ for employment land.
• The locational and premises requirements of particular types of business.
• Identification of oversupply and evidence of market failure (eg physical or ownership constraints that prevent the employment site being used effectively, which could be evidenced by unfulfilled requirements from business, yet developers are not prepared to build premises at the prevailing market rents).”

4.5 Using this evidence, local planning authorities should identify sufficient land to satisfy current and future employment needs. Paragraph 22 of the NPPF, however, notes that:

“Planning policies should avoid the long term protection of sites allocated for employment use where there is no reasonable prospect of a site being used for that purpose. Where there is no reasonable prospect of a site being used for the allocated employment use, applications for alternative uses of land or buildings should be treated on their merits having regard to market signals and the relative need for different land uses to support sustainable local communities.”

4.6 Consistent with the above policy context, Zurich is able to provide up to date market intelligence to help inform GBC’s evidence base and soundness of the emerging employment related policy position set out in the GBLP.

Characteristics of Broadford Business Park

4.7 The latest version of the GBLP seeks an increased number of B Class jobs by 2034 (4,100, previously 3,200) as a result of the new Employment Land Needs Assessment (ELNA) (2017). The ELNA has also resulted in adjustments to the amount of land allocated for employment use, as set out in Table 1.

[Table 1]

4.8 Zurich supports GBC’s intent, as set out within Policy E1, to deliver new jobs across the borough and to utilise sustainable employment development patterns to achieve this. Zurich, however, strongly objects to GBC’s decision to designate Broadford Business Park as a LSES.

4.9 Paragraph 6.7 of the Briefing Note to GBC’s Borough, Economy and Infrastructure Executive Advisory Board Committee, and repeated in the agenda papers for the subsequent full Council meeting on 16 May 2017, states the reason for change in the planning policy designation is as follows:

“…we are concerned at our ability to provide sufficient and varied office floorspace. Broadford is an established business park and, whilst not sequentially preferable [our emphasis], is considered suitable given our inability to identify sufficient sequentially preferable sites. The vast majority of our office floorspace is proposed to be allocated on the extension to the Surrey Research Park – retention of Broadford will help provide a variety and mix of floorspace.”

4.10 In this statement, GBC acknowledges that Broadford Business Park is not situated in a sequentially preferable location for employment purposes. As illustrated by Table 2, extracted from Table 4-2 of the Guildford Borough Employment Land Needs Assessment (2017), the Site has numerous constraints, including (but not limited to) ‘poor’ access to public transport and ‘very poor’ access to amenities and facilities, that would hamper the ability to secure a long term employment use on the Site.

[Table 2]
4.11 GBC have acknowledged Broadford Business Park is not situated in a location that is conducive to employment uses. The buildings at Broadford Business Park have now reached the end of their economic lives, and require substantial investment to bring it up to acceptable standards or redevelop for employment use. Furthermore, the occupants of the existing development are on short term leasehold arrangements that benefit from reduced rental levels to reflect the poor condition of the existing buildings and its relatively remote location that cannot continue. Zurich are therefore concerned that proposed designation of the site as a LSES is unsustainable in the medium to long term and will simply result in vacant floor space that could otherwise be used more effectively i.e. for residential purposes.

4.12 A Commercial Viability Report (CVR) prepared by Savills, has been submitted in support of these representations to evidence the challenges in maintaining employment uses at the Site. The CVR provides an analysis of the current market conditions for the Site, the viability for a new build (employment) proposal, and, the viability of refurbishing the existing units to acceptable standards in order to demonstrate whether Broadford Business Park is sustainable employment site. The key points have been summarised below.

**Market commentary**

4.13 The development over time of Guildford has rendered it attractive for employers, however, the office supply and development is limited due to the historic nature of the town. This has resulted in purpose built office space to be located away from the centre of the town in business parks such as Surrey Research Park, The Astolat Business Park and Guildford Business Park. These business parks, however, possess key difference to Broadford Business Park in that they benefit from good access to the strategic road network, public transport and/or supporting services and facilities, thus making them more attractive to tenants.

4.14 The CVR notes that the majority of vacant space within a 5 mile radius of Broadford Business Park is within Guildford Town Centre (34 offices) and Godalming Town Centre (9 offices). There is approximately 220,756 sq.ft available which is approximately 28% of office stock. The 5 year average for this is 141,617 sq.ft or 18% of available stock.

4.15 The trend for any new speculative development has been to build close to good transport links with access to a large workforce rather than more isolated locations. Recent surveys and letting activity shows that demand for occupation is located heavily around transport links for staff and amenities as well as the quality of the office accommodation. Thus, take up has been more heavily centred around Guildford town centre with results now showing a 58% town centre to 42% out of town centre share. Previously these levels were at 34% town centre to 66% out of town centre share.

4.16 Consequently, occupiers are looking for modern office space either in the centre of Guildford or to the north, east or west where access to the A3 and mainline train services is more readily available. The Local Plan recognises this and states that new employment uses should have access to transport interchanges. In support of this policy, GBC’s Transport Strategy (2017), sets out several public transport improvements (such as additional rail platforms at Guildford Railway Station, increased frequency bus services and improved cycle parking facilities) as well as enhancements to the A3 trunk road.

4.17 Broadford Business Park, however, is poorly served by public transport, such that workers must rely on private modes of transport to travel to and from the Site. This is recognised by GBC’s ELNA, which rates the Site’s access to public transport as ‘poor’. The Site also lacks direct access to the A3 and the wider strategic road network.

4.18 Although the Site exhibits good quality environment and public realm characteristics, it suffers from poor access to amenities and facilities. Additional services and facilities, such as a coffee station or similar, could be introduced. This would, however, result in higher service charges or increased rent, which would end the competitive rent levels tenants currently benefit from.

4.19 Market sentiment is therefore for modern offices located in the town centres of Guildford, Godalming or the larger business park development in the borough that benefit from good transport links for staff and deliveries, and access to amenities and facilities.

**Office to residential permitted development rights**
4.20 GBC have indicated that the decision to designate the Site as an employment site was, in part, due to the loss of available office stock through office to residential permitted development right conversions. Paragraph 5.22 of the CVR notes that only 30% of the floor space assumed to be lost to such changes of use has actually taken place in the last three years and as such it is not realistic assumption that the all affected office premises would be lost to residential use.

4.21 In addition, paragraph 5.23 of the CVR notes that GBC are intending on introducing an Article 4 Direction to withdraw office to residential permitted development rights, which is likely to prevent a large number of these changes of use from being able to take place.

4.22 Zurich therefore consider that GBC have exaggerated the effect of the loss of existing office stock to residential uses.

New build viability

4.23 In addition to the market conditions relevant to the Site and surrounding area, the CVR includes a number of appraisals looking at possible new scheme developments for both office and industrial accommodation. The alternative new build office scheme comprises six buildings. One option assumes 2 storeys, another 3 storeys, and a third assumes a double height single storey light industrial scheme on the same floor plates.

4.24 Whilst the appraisals for the new build schemes show that an industrial scheme would be more viable than a three storey office scheme. It is also noted that the location itself is unsuited to heavy goods vehicle activity which inevitably is the case with industrial occupiers. The narrow bridge to the west also restricts access to the A3 and the Site by larger vehicles needed to support a business park or light industrial development and is also sensitively located within close proximity to residential uses.

4.25 All of the development options that have been tested have therefore been found to unviable and would be very unlikely to attract investment from prospective developers. More intensive uses of the Site have been considered but discounted on the basis these would be unviable, there being insufficient space for the car parking levels required to offset the Site’s poor public transport and strategic infrastructure connections and that the semi-rural character of the locality is not suitable for high rise development.

Refurbishment viability

4.26 Several of the existing buildings and plant are reaching the end of their serviceable lives and require substantial investment in the near future to enable them to continue to be lettable commercial tenants. As a reflection of the poor condition of the buildings, current occupiers have benefitted from low rents in recent years. This arrangement is not, however, sustainable in the medium to long term.

4.27 The CVR explains that the cost of refurbishing the existing buildings up to standards commensurate with a modern office and capable of attractive interest from the local market would not be commercially viable, due to the limited rent currently secured on existing tenants and the subsequent upward pressure on rental levels being likely to render the Site uncompetitive in the market place when compared to better serviced town centre locations.

4.28 Based on the inability to justify the level of investment required to refurbish the buildings to acceptable standards, it is likely that if the currently proposed LSES designation were to be maintained the Site would become derelict. Refurbishment of the existing buildings is therefore not a viable proposition.

Vacant possession

4.29 Zurich will gain vacant possession of the majority of the Site by 2019, with the remaining building by 2022. As such there is a reasonable prospect that a residential development (subject to planning permission being granted) could commence from 2019 with Bishopsgate House retained in the first instance and redeveloped as a second phase.

[Table 3]

4.30 The removal of the employment designation, would therefore enable Broadford Business Park to deliver housing within the short term, thus improving GBC’s 5YHLS position, whilst bringing forward the benefits of such development and should be considered.
Summary and conclusion

4.31 Broadford Business Park has reached the end of its economic life, and requires significant investment in order to bring it up to acceptable standards. However, as assessed by the CRVR, and recognised by the ELNA, the Site is constrained by a number of factors including:

- Lack of direct access to the A3 and wider strategic road network;
- Poor accessibility to public transport; and
- Very poor accessibility to amenities and facilities.

4.32 These factors, which are beyond the control of Zurich, have contributed towards the low market rents achievable in this location. The rental value of the employment floorspace is further reduced its relatively poor quality. The attractiveness of Broadford Park as a business location is therefore predicated on low rents.

4.33 The buildings and associated plant at Broadford Business Park are reaching the end of their serviceable lives. Significant investment is required in order to bring them up to acceptable standards. However, the market conditions in the south of Guildford render such investments unviable.

4.34 Notwithstanding the inability to secure investment, the Site would continue to suffer from the same issues such as poor transport communication links. To offset any upgrade to the existing buildings required to maintain them at an acceptable standard, rental levels would inevitably need to increase. This would be out of step with the out of town location of the Site and would be unlikely to attract interest from prospective tenants. These factors alone would make the refurbishment or redevelopment unviable with the likely result being that the Site would become derelict.

4.35 On the basis of the above, Zurich considers Policy E1 to not be ‘positively prepared’, ‘justified’, ‘effective’ or ‘consistent with national policy’. As a result, the policy does not comply with paragraph 182 of the NPPF and is regarded as being unsound.

4.36 Zurich therefore strongly recommends that GBC removes the proposed LSES designation of Broadford Business Park.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Refer to the attached reports for guidance on the need to remove Broadford Business Park from the list of Locally Significant Employment Sites.

Do you consider this section of the document; complies with the Duty to Cooperate? ( Yes ), is Sound? ( Yes ), is Legally Compliant? ( Yes )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Refer to attached report for confirmation of our client's support for the proposed revisions to Policy E3.

[text of attachment reproduced below]

5.1 Policy E3 seeks to “sustain and enhance” employment capacity (land, floorspace and jobs) in the Borough. It advises that employment floorspace will be protected across the Borough, particularly on the Strategic Employment Sites and Locally Significant Employment Sites, unless marketing evidence (varying levels of detail dependent on the site’s employment status) is provided to justify its loss.

5.2 Zurich supports the flexibility that has been included in the revised wording of Policy E3 and the clear guidance provided in Appendix A2, particularly in terms of the evidence required to justify the loss of an employment use. The proposed checklist included within a new SPD to appraise evidence of marketing and to ensure a consistent approach is taken for all application is equally welcome.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( Yes ), is Sound? ( No ), is Legally Compliant? ( Yes )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Refer to the attached report for evidence why the proposed housing target set out in Policy S2 fails to address Woking Borough Council's unmet housing needs and cannot therefore be regarded as being sound.

[text of attachment reproduced below]

3.1 The NPPF sets out the Government’s planning policies for England and how these are expected to be applied. The NPPF states that planning should proactively drive and support sustainable economic development to deliver the homes that the country needs, and that every effort should be made to objectively identify and then meet housing needs, taking account of market signals (paragraph 17).

3.2 In respect of delivering a wide choice of high quality homes, the NPPF confirms the need for local authorities to boost significantly the supply of housing. To do so, it states that LPAs should use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area (paragraph 47).

3.3 Paragraph 47 also requires Local Planning Authorities (LPAs) to:

• Use their Evidence Base to ensure that their Local Plan meets the full, Objectively Assessed Needs (OAN) for market and affordable housing in the Housing Market Area (HMA), as far as is consistent with the policies set out in the Framework, including identifying key sites which are critical to the delivery of the housing strategy over the plan period;
• Identify and update annually a supply of specific deliverable sites sufficient to provide 5-years’ worth of housing against their housing requirements with an additional buffer of 5% (moved forward from later in the plan period) to ensure choice and competition in the market for land. Where there has been a record of persistent under delivery of housing, LPA’s should increase the buffer to 20% (moved forward from later in the plan period) to provide a realistic prospect of achieving the planned supply and to ensure choice and competition in the market for land;

• Identify a supply of specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15;

• For market and affordable housing, illustrate the expected rate of housing delivery through a housing trajectory for the plan period and set out a housing implementation strategy for the full range of housing describing how they will maintain delivery of a 5-year supply of housing land to meet their housing target; and;

• Set out their own approach to housing density to reflect local circumstances.

3.4 With regard to plan-making, LPAs are directed to set out strategic priorities for their area in the Local Plan, including policies to deliver the homes and jobs needed in the area (paragraph 156). Further, Local Plans are to be based on adequate, up to date and relevant evidence, integrating assessments of, and strategies for, housing and employment uses, taking full account of relevant market and economic data (paragraph 158).

3.5 For plan-making purposes, local planning authorities are required to have a clear understanding of housing needs in their area. To do so they should prepare a Strategic Housing Market Assessment (SHMA) that identifies the scale and mix of housing and the range of tenures that the local population is likely to need over the plan period (paragraph 159).

3.6 The Local Plan will be examined by an independent Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is sound. LPA should submit a plan for examination which it considers is “sound” – one that it is positively prepared – and the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so, and consistent with achieving sustainable development (paragraph 182).

Overall housing strategy

3.7 Guildford forms part of the West Surrey HMA, which is made up of three authorities, namely the administrative areas of Guildford, Waverley and Woking Borough Council’s. In keeping with the Duty to Cooperate (Para 178, NPPF), Woking Borough Council (WOK), Waverley Borough Council (WAV) and Guildford Borough Council (GBC), signed the West Surrey Memorandum of Understanding (MoU). The MoU confirms that the geographical area of the three boroughs forms a common HMA for this part of Surrey and sets out a framework for partnership (underpinned by a Statement of Common Ground) to carry out a SHMA for the West Surrey HMA.

3.8 To support economic growth and tackle the acute under supply of housing and affordability issues that affect Guildford, the West Surrey SHMA: Guildford Addendum Report (March 2017) identifies that GBC has an Objectively Assessed Housing Need (OAHN) of 645 dwellings per annum (dpa).

3.9 Paragraphs 4.1.5 to 4.1.11 of the GBLP set out GBC’s spatial development strategy, identifying the scale and distribution of development. With reference to the OAHN contained in the West Surrey SHMA, these paragraphs support Policy S2, GBC’s Borough Wide Strategy, which identifies overall minimum housing requirement of 12,426 dwellings to be built across the borough between 2015 and 2034. Having accepted the need to meet OAHN in full, the annualised housing target (645 dpa) contained in the GBLP matches annualised OAHN target outlined in the West Surrey SHMA.

3.10 Zurich appreciates that GBC have endeavoured to produce a plan that is ‘positively prepared’ in accordance with paragraph 182 of the NPPF and ‘boost significantly’ its supply of housing (paragraph 47, NPPF) by uplifting the borough’s overall housing target, compared to earlier iterations of the plan. However, concerns are nevertheless raised whether the OAHN figure outlined in the SHMA and subsequent housing target can truly be considered to represent full OAHN. Zurich consider it vitally important to bring forward new housing quickly and meet OAHN in full throughout the plan period. To this end, Zurich encourages GBC to recognise the positive contribution Broadford Business Park can make towards meeting these annual housing targets. Zurich’s concerns are explored below.
3.11 In accordance with the NPPF, the three authorities that make up the West Surrey HMA have agreed to collectively assess their OAHN as a single HMA that is then broken down into the constituent authorities’ areas. Critically, the MoU acknowledges the shared responsibility of all three authorities to meet the full OAHN of the West Surrey HMA.

3.12 Of the three authorities, WOK is the only one with an adopted Core Strategy. The Core Strategy was adopted on October 2012, albeit with a requirement for an ‘early review’ of the plan (although this it is noted that this has not taken place), and has a plan period up to 2027. It has an adopted housing requirement of 292 dpa, against its objectively assessed housing need of 517 dpa (or 10,340 dwellings for the period 2013-33).

3.13 Using the net housing delivery figures contained within WOK’s 2015/16 AMR, the forecast delivery for the 2016-21 period contained within WOK’s Five Year Housing Land Supply Position Statement 2016, and, the 292 dpa housing target contained within WOK’s Core Strategy for the period 2021-27, it is possible to forecast WOK’s housing delivery for the adopted plan period up to 2027. The calculation shows that for this period, WOK will deliver 5,078 dwellings. This is 5,262 dwellings less than WOK’s OAHN as identified by the 2015 version of the West Surrey SHMA.

3.14 WOK is currently preparing a new Site Allocations DPD, however, WOK’s Hearing Statement[4] to Examination in Public (EiP) of WAV’s New Local Plan that:

‘The Site Allocations DPD has been identified with the purpose of identifying deliverable sites to enable the sustainable delivery of the development requirements of the Core Strategy. [and] …it is not intended to identify sites to meet unmet need within the Housing Market Area.’

3.15 Thus, WOK do not intend to meet the unmet housing need within its administrative boundary. Instead, WOK refer to the agreed Statement of Common Ground and the abovementioned MoU which set out how WOK, WAV and GBC will work together to:

‘address any residual unmet need within the [West Surrey] Housing Market Area after their Local Plans are adopted’[5].

3.16 Question 2.1 contained within the ‘Matters and Issues for Examination’ prepared by Inspector Jonathan Bore for the Examination in Public (EiP) of WAV’s New Local Plan[6] queries how WAV intends to meet WOK’s unmet housing need. Zurich believes that Inspector Bore’s concerns to be equally valid to GBC on the basis the three authorities form part of the same HMA.

3.17 Physically, WOK is almost 1/4 of the land area of GBC. In meeting Core Strategy 2012 housing target of 292 dpa, WOK has sought higher density developments on existing brownfield sites, which are now increasingly in short supply.

3.18 Considering the unmet need arising from WOK’s current OAHN figure of 517 dpa against its land availability pressures, it is essential that WAV and GBC follow a coordinated approach in ensuring the shortfall in meeting the full OAHN in the West Surrey HMA is addressed. Without this, GBC, WOK and WAV will be unable to satisfy paragraph 47 of the NPPF, thereby rendering the GBLP unsound.

3.19 At the EiP of WAV’s New Local Plan (July 2017), Inspector Bore made clear that WAV is obligated to meet at least half of WOK’s unmet housing need. Consistent with the view of Inspector Bore, Zurich considers GBC and WAV should explore taking responsibility for the unmet need on a 50:50 basis (i.e. 2,631 dwellings each). This would require GBC to increase its housing target from 12,426 dwellings to 15,507 dwellings, or an additional 175 dpa across the plan period 2019-34.

3.20 It should also be noted that GBC has an affordability ratio amongst the worst in the country, at over 10. The ratio is similar to that recently considered in the examination of the Mid Sussex Local Plan. Zurich therefore highlights and agrees with the Inspector’s conclusions at Mid Sussex[7], recommends increasing the OAHN and associated housing target to improve affordability in the borough.
3.21 As currently drafted, the GBLP does not meet any of WOK’s unmet need and so means the plan cannot be deemed to have been ‘positively prepared’, ‘effective’ or ‘consistent with national policy’, as required by paragraph 182 of the NPPF.

3.22 As highlighted by the allocation of sites such as Broadford Business Park as part of the previous iteration of the GBLP (June 2016), it is clear that suitably identified land exists within GBC to support residential development and assist in accommodating WOK’s unmet housing need and improve the availability and affordability of housing in the borough.

**Exceptional circumstances**

3.23 To achieve GBLP’s objective of meeting OAHN in full, GBC have accepted that ‘exceptional circumstances’, as referred to in paragraph 83 of the NPPF, exist to allocate sites in the Green Belt for development. The relationship between meeting OAN and Green Belt constraints is well tested in case law[8].

3.24 As endorsed in these High Court Judgments, plan-making is a two stage approach (NPPF, para 47), in that an objective assessment of housing need is first required, and then a distinct assessment as to whether (and, if so, to what extent) other policies dictate or justify constraint, such as Green Belt designation. There is no evidence available to demonstrate that GBC has come to the conclusion that 654 dpa represents the “upper limit” of “exceptional circumstances” or that there borough is subject to unreasonable constraint. It should be noted that the Inspector responsible for the EiP into Waverley’s Local Plan found that the additional impact on traffic and highway capacity arising from accommodating WOK unmet supply housing was insufficient grounds to avoid meeting OAHN in full.

3.25 Accordingly, it is considered that “exceptional circumstances” exist to release additional Green Belt sites beyond those currently included within the GBLP, in order to seek to meet full OAN.

**Housing trajectory**

3.26 Policy S2 states the annualised housing target will gradually increase from 450 dpa in 2019/20 to 850 dpa in 2033/34. As currently proposed, the housing trajectory for 2019-34 does not provide a reasonable estimate of delivery over the plan period, with an overreliance on the redevelopment of the former Wisley Airfield as a source of housing supply. The proposed development at Wisley represents over a sixth of the total new homes planned for GBC.

3.27 The housing trajectory needs to be considered in the context of the planning appeal[9] (to be heard in September 2017), against GBC’s decision to refuse planning permission for the redevelopment of this site. Assuming the Inspector upholds GBC’s decision to refuse planning permission, this will delay the delivery of housing.

3.28 Large sites such as the former Wisley Airfield take time to progress through the planning process, with complexities in infrastructure delivery and phasing further increasing the time required to delivery new housing. As such, any benefits from these sites are not likely to be felt until much later, and potentially beyond, the identified plan period.
3.29 The overreliance of major developed sites as part of a housing strategy has been previously considered in the Inspector’s Report into the Runnymede Local Plan, which was found unsound in 2014[10].

3.30 The housing trajectory, at present, does not comply with the requirement of paragraph 21 of the NPPF that:

‘policies should be flexible enough to accommodate needs not anticipated in the plan and to allow a rapid response to changes in economic circumstances.’

3.31 The allocation of sites such as Broadford Business Park, which have previously been allocated for residential development and can be developed earlier in the plan period, will help to diversify the spatial strategy and sources of housing supply in the borough, thereby enabling the chronic under supply of housing in the borough to be addressed more quickly.

**Five year housing land supply and backlog need**

3.32 The Land Availability Assessment Addendum (LAA2) (2017) identifies the following record of completions against the housing requirement during the period 2015-17:

- 2015/16 – 381 net completions (-273 deficit)
- 2016/17 – 297 net completion (-357 deficit)

[9] Appeal ref: APP/Y3615/W/16/3159894

3.33 Based on the above:

- GBC has a cumulative under delivery of 630 dwellings to date against its identified OAHN;
- This is likely to increase as a result of further under delivery in the latest reporting year (2016/17); and
- GBC has failed to meet its OAHN for the past four years.

3.34 GBC has therefore persistently under delivered against its housing targets and a 20% buffer should be applied to its housing requirement.

3.35 The LAA2 recognises this and notes the requirement for the 2017-22 period is 4,681 dwellings (inc. 20% buffer). However, GBC has only identified land for a total of 2,210 dwellings that are capable of being delivered within the first five years of the plan. This total includes sites with planning permission, sites without planning permissions and the windfall allowance.

3.36 Notwithstanding potential concerns in relation the deliverability of the sites included within GBC’s identified supply, the LAA2 concedes that GBC is currently only able to demonstrate a 2.36 years’ supply of deliverable housing. Paragraph 49 of the NPPF states that:

“Housing applications should be considered in the context of the presumption in favour of sustainable development. Relevant policies for the supply of housing should not be considered up-to-date if the local planning authority cannot demonstrate a five-year supply of deliverable housing sites”.

3.37 GBC has sought to phase the delivery of housing across the plan period. However, during the first five years of the plan period (2019/2020 – 2023/2024) the GBLP targets that between 450 and 500 new homes will be built across the borough. This falls significantly short of the 645 dpa identified in the West Surrey SHMA as needing to be delivered to meet GBC’s identified need (not accounting for WOK’s unmet need, as discussed above). Such an approach is inconsistent with the need to ‘boost significantly’ the supply of housing, as set out in paragraph 47 of the NPPF, make up the current backlog of housing delivery and ensure that GBC can demonstrate a robust five year housing land supply earlier in the plan period.
3.38 However, when taking into consideration GBC's identified OAHN, housing delivery performance to date, and forecast delivery, it is unlikely that GBC will be able to demonstrate a five year housing land supply for the entire duration of the GBLP.

Summary and conclusion

3.39 Zurich considers that the failure to meet WOK’s unmet housing need and the lack of deliverable sites being identified early in the plan period to quickly address the severe housing shortages in the borough, means that Policy S2 cannot be considered as being ‘positively prepared’, ‘effective’ or ‘consistent with national policy’, as required by paragraph 182 of the NPPF. Accordingly, Zurich consider the policy as it stands to be unsound.

3.40 To resolve this, Zurich considers GBC should identify additional sites that can contribute towards meeting the borough housing needs at an earlier stage of the plan period. As discussed later in these representations, Broadford Business Park is deliverable and offers an opportunity to assist GBC in meeting this shortfall in supply. In addition, a further review of the allocations made as part of LAA1 could also be undertaken, to identify ‘suitable’ and ‘available’ sites, that could be delivered in the short term and contribute towards GBC’s 5YHLS.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Refer to the attached report for advice regarding the need to increase the housing target in the Proposed Submission Local Plan to meet the true OAHN i.e. meeting any unmet housing need, for the borough in full.

Comment ID: pslp17q/215  Respondent: 17343361 / Zurich Assurance Limited  Agent: Barton Willmore LLP (Gary Stevens)

Refer to the attached documents that set out our client's case for why the following aspects of the plan are unsound:

- Meeting objectively assessed housing needs, including Woking Borough Council's unmet housing needs (Policy S2: Planning for the borough - our spatial development strategy)
- Ensuring a robust and deliverable employment land strategy (Policy E1: Meeting employment needs and Policy E3: Maintaining employment capacity and improving employment floorspace)
- The deletion of Site A34: Broadford Business Park as a residential site allocation contributing to the inability of Guildford Borough Council to meet objectively assessed housing need, including unmet need, in full.

On the basis of the above and evidence contained in the attached reports, our client considers the Proposed Submission Local Plan to be unsound and fail the tests of paragraph 182 of the NPPF and associated guidance.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I wish to object to the 2017 Proposed Submission of the Local Plan (Strategy and Sites) for the following reasons.

1. Policy P3 - Countryside

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road

- 4.3.29 Amend to: “Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development.”

- 4.3.30 Amend to: “We do however wish to ensure that whilst accommodating this growth, we are able to protect the
remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green.”

- Policy P3 Amend to: (1) (c) should be amended to read “does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.”

2. Policy A29: Land to the south and east of Ash and Tongham

- I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.

2. Policy A29: Land to the south and east of Ash and Tongham (Cont.)

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

- Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

- Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

- Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

  a) The Street in Tongham
  b) A331/A323 intersection
  c) A31/White Lane junction

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

3. Policy A28: Land to the east of White Lane, Ash Green

- Correct title of Policy A28 to say Ash Green, and not Ash.

- Policies A27, A28 and A29 collectively increase Ash Green village by 50%. Opportunity exists under Policy A28 to provide a village/community hall and recreational area which would provide Ash Green with much needed community and social space.

Opportunities (1) Should read: “To create a centre for the village by including a village hall with associated recreational space providing much needed facilities for the Ash Green community. A mix of homes (C3) and accommodation for older people (C2) could be appropriate for this site.”
• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Finally the proposed development on the Wisley Airfield would I think put just as much strain on the area as the Garlick’s Arch plan. Particularly the increase in traffic and impact on local facilities. It would obviously put major pressure on the small back roads into Cobham which I believe would make those small roads extremely dangerous. An increase in traffic through Ripley would cause massive congestion not seen since before the Ripley By-Pass was built - yes I am old enough to remember those times - with again an increase in air pollution and a decrease in air quality.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A42 change at Clockbarn in Tannery Lane because again this could also radically change the drainage in the area.

Many of my previous points also are reliant to this plan including the increase in traffic and more erosion of the greenbelt.

Given that so many objections were made to the previous plan it seems that by increasing the size of the development with this plan you are totally ignoring the wishes of the local community.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/2941  Respondent: 17344801 / Graham Rendell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A43 change at Garlick’s Arch because a development of this size would put massive strain on the local infrastructure. For example it is already difficult to get an appointment at the local doctors in the Village health Centre and as far as I know there are no NHS dentist places available.

I would be concerned about the amount of traffic not just caused by people going to work and congesting the various access roads but also the total volume of cars in the area filling car parks. It is already difficult to park in the Cobham and Guildford public car parks and even the private super stores in Cobham and Ladymead are often full to capacity. An overall increase in traffic in the area is bound to increase in air pollution decrease in air quality which I think is in direct conflict with government policy.

I thought the point of the GREEN BELT was to stop the complete urbanisation of our country areas. It seems to me the Garick's Arch development will effectively join up the existing communities into one mass of houses.

I have no first hand experience of the schools in the area but I assume that a new school would need to be provided. With those students coming from this new estate would isolate them from the wider community.

As for the inclusion of Travelling Show people plots I am left dumfounded as to why greenbelt land should be ruined in this way.

Another personal issue of concern I have is that of the interference with land drainage. My property was one of those flooded around 2001. An excellent flood prevention scheme was installed which seems to have prevented further flooding. However, given the flood water came from this proposed ares I am very concerned that altering the use of this land will upset the drainage and once again put our properties in danger.

Finally the proposed development on the Wisley Airfield would I think put just as much strain on the area as the Garlick’s Arch plan. Particularly the increase in traffic and impact on local facilities. It would obviously put major pressure on the small back roads into Cobham which I believe would make those small roads extremely dangerous. What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy A 58 at Burnt Common because of many of the previous points above but also because it was already dropped from the 2014 draft and nothing as far as I can see has changed. There still seem to be empty units in Guildford such as the Slyfield estate.

More importantly it seems the 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough. So why should this plan suggest an INCREASE of 10 hectares in the Green belt in Send?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I also object to Policy A58 at Burnt Common because:
• It was deleted from the 2014 draft because of all the objections made previously.
• The word 'minimum' is a change from the previous 'maximum' in the 2016 plan and since that time there has been a decline in demand for industrial land.
• There is no need to build industrial or warehouse development in the middle of Green Belt when Slyfield and Guildford still have empty site and industrial units.
• The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 ha. for industrial land for the whole borough, not a huge over-allocation of 10 ha. at Send in the Green Belt.
• The impact on small surrounding roads will create traffic gridlock.
• It will join up existing villages and defeat the purpose of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford Proposed Submission Local Plan (Regulation 19) – Representation
Re: Land north of Grange Road, Ash

Introduction

These representations are submitted in respect of Thakeham Homes’ interests north of Grange Road, Ash (‘the site’). The site is also known by LAA reference 2247, and is included within the proposed strategic allocation ‘Policy A29: Land to the South and East of Ash and Tongham’. A red line location plan for the site is appended to this representation at Appendix 1.

We confirm within these representations that the site is available and deliverable within the first 5 years of the plan period and that it is set within a highly sustainable location. As such, we wish to make representations on the policies contained within the Proposed Submission Local Plan as detailed below, and the proposed strategic allocation: Policy A29.

We wish to support the progression of the Local Plan and make comments within our representations on the basis that the proposed housing numbers should be increased in line with the requirements of the National Planning Policy Framework (NPPF) to meet the full, objectively assessed housing needs of the Borough.

Land north of Grange Road, Ash

Thakeham Homes recommended the site for residential development and as such supports the inclusion of the site within the housing allocation, Policy A29: Land to the South and East of Ash Tongham’ in the Proposed Submission Local Plan. The red line for the site has been appended to this representation in Appendix 1.

Policy A29: Land to the south and east of Ash Tongham

Since the publication of the Pre-Submission Local Plan, the Council have made a number of amendments to Policy A29.

[Figure 1]

Site Area

As above, we support the inclusion of the site within Policy A29 for residential development. However, we note that the entirety of our site as actively promoted, does not fall within the proposed allocation, with a small part falling just outside. There is no evidence or justification to support the omission of this area from the allocation, and we would therefore suggest this may be in error. A site location plan can be found in Appendix 1, and we would request that the Council revise the proposed boundary shown in Policy A29 to reflect the site area for Land north of Grange Road, Ash, as promoted.
Policy A29: Requirement 9

The Council have sought to delete Policy A30: Land for new road bridge and footbridge scheme to enable a level crossing closure on A323 Guildford Road, adjacent to Ash railway station, Ash. Instead the Council have now sought to combine this with Policy A29, inserting requirement 9.

Thakeham Homes objects to Requirement 9 as there is no evidence or justification to support a new road bridge. On this basis the policy is unsound as it is not based on objectively assessed infrastructure requirements in accordance with NPPF, para 182.

The proposed wording of Requirement 9 states:

“Land and provision of a new road bridge which will form part of the A323 Guildford Road, with an associated footbridge, to enable the closure of the level crossing on the A323 Guildford Road, adjacent to Ash railway station”

The objection is made on the following basis:

• **The assessment work to produce a technical justification to support this policy has not yet been undertaken.** There needs to be a fit-for-purpose assessment of future year operation of the level crossing without and with development. There is therefore currently no identification of whether the cumulative impact of development on the level crossing will be ‘severe’ or not (ref: para 32 of the NPPF). It has not been demonstrated that a road bridge option would offer any real benefit in terms of reducing journey times or queue lengths on the A323 Guildford Road.

• **Alternative options have not been tested.** Alternatives to a new road bridge could include for example traffic management, a footbridge only solution or improvement of alternative routes etc. The assessment of options needs to consider the alternatives to a road bridge and the benefits of each option weighed against their costs.

• **The feasibility of a new road bridge has not been proven in engineering terms.** This needs to be demonstrated, as does the practicality of timeliness of delivery given the need to cross a live rail line.

• **No consideration has been given to the cost effectiveness of the solution.** It is understood that the level of developer contribution is likely to run to circa £12,000 per dwelling - an unprecedented level of transport contribution, which could potentially jeopardise the delivery of other elements of development in Ash such as affordable housing.

**Infrastructure Delivery Plan (IDP)**

In relation to Policy A29 The Infrastructure Delivery Plan (IDP) references the following policies:

• LRN9: A323 Ash Road and Guildford Road (Ash) traffic management and environmental improvement scheme

• LRN11: B3411 Ash Hill Road/A323 Guildford Road (Ash) junction improvement scheme

Impacts in these locations are already apparent and in the future, are related to strategic growth. The funding source should, for consistency with other infrastructure projects included in the IDP make an allowance for some funding to come via the Local Growth Fund.

Thakeham Homes objects to IDP Policy LRN21 ‘New road bridge and footbridge scheme to enable level crossing closure on A323 Guildford Road adjacent to Ash railway station’ for the reasons set out above.

Notwithstanding this objection, it is noted that pressure on this crossing is likely to come about not only as a result of development, but also due to increased movements on the North Downs Line, and other changes to the local and strategic road network. GBC’s identified mitigation is not solely development related and as such the funding source should, for consistency with other infrastructure projects included in the IDP make an allowance for some funding to come via the Local Growth Fund.

**Inclusion of permitted sites.**
The amendments to Policy A29, seek to include additional sites within the allocation. This includes a number of sites which currently have planning permission. These permitted sites equate to almost 700 new homes, which is a significant proportion of the 1,750 dwelling requirement indicated in Policy A29.

It is our view that the Council has failed to provide sufficient evidence or justification to support the infrastructure requirements within Policy A29, and on this basis, we consider the requirement as set out is unsound and should be deleted from this policy.

**Availability, Suitability and Achievability**

Whilst we have concerns regarding Policy A29 as detailed above, we continue to support the inclusion of this site within the strategic allocation and can confirm that the site is Available, Suitable, Achievable, and therefore deliverable within the next 5 years.

**Availability**

The NPPG provides the following guidance in regard to considering whether a site is available for development:

“A site is considered available for development, when, on the best information available, there is confidence that there are no legal or ownership problems, such as unresolved multiple ownerships, ransom strips tenancies or operation requirements of landowners. This will often mean that land is controlled by a developer or landowner who has expressed an intention to develop”

NPPG Paragraph 021 Ref. 3-020-20140306

As highlighted within this representation, the site is controlled by Thakeham Homes Ltd and we will be actively engaging with the Council over the coming months prior to submission of a Full planning application for residential development. Thakeham obtained Reserved Matters permission for the adjacent site to the north for the delivery of 26 dwellings (Planning application Ref: 16/P/00663) in December 2016, following the grant of Outline consent in December 2013.

Thakeham has a proven track record for delivering a number of high quality residential schemes across Surrey, Sussex and Hampshire and will be seeking to deliver circa 60 dwellings on the site with a view to commencing development on site at the earliest opportunity.

**Suitability**

The NPPG provides the following guidance when considering whether a site is suitable for development:

“Sites in existing development plans or with planning permission will generally be considered suitable for development although it may be necessary to assess whether circumstances have changed which would alter their suitability”

NPPG Paragraph 019 Ref. 019-20140306

The site is located on the eastern edge of Ash village and is within walking distance of the various local amenities of Ash High Street. The Ash and Tongham Urban Area falls on the top tier of the settlement hierarchy and is therefore considered to have a range of services and facilities to meet the needs of the existing community as well as providing key services for surrounding smaller villages. The site has good transport links, with a railway station within walking distance of the site, and there is good access to bus links from Grange Road on the south western corner of the site.

The site has been submitted to and included within the Land Availability Assessment and promoted to the Local Plan, which acknowledges its suitability for residential development.

It is therefore evident from the proposed allocation and the supporting evidence including the LAA, that the site is considered suitable for development within the meaning of the NPPG.

**Achievability**
In determining whether a site is achievable for development, the NPPF provides the following guidance:

“A site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time. This is essentially a judgement about the economic viability of the site and the capacity of the developer to complete and let or sell the development over a certain period”

NPPG, Paragraph 021 Ref. 021-20140306

Given the acute housing need within the Borough and the proposed inclusion of the site within a strategic allocation in the Proposed Submission Local Plan, it is considered that there is a reasonable prospect of residential development being achieved on site by 2021.

As stated above, Thakeham has a proven track record for delivering schemes of a similar size and scale throughout Surrey, Sussex and Hampshire, and has the capacity to deliver the development of the site to provide much needed new homes within the first 5 years of the plan period.

**Deliverability**

For the reasons above, the site is considered to be available, suitable and achievable, and therefore deliverable in accordance with the NPPG. As such, we consider that the site could provide much needed housing development within the plan period and support the proposed strategic allocation Policy A29: Land to the south and east of Ash Tongham (except for Requirement 9)

**Conclusions**

In conclusion, we consider that the reduction in OAN and consequently intended housing provision is unsound, and the Council has not provided the required justification for this reduction. In particular, the intention of Guildford Borough to not contribute to the unmet needs in the HMA is of particular concern, and we would suggest that GBC seek to accommodate the 83dpa shortfall to ensure the housing needs of the HMA are met.

We consider that some standards and requirements stipulated in the proposed policies are unjustified, and the Council should demonstrate how these conform with national policy and guidance. Where there is insufficient evidence to demonstrate a requirement for such policies, these should be deleted from the Local Plan.

As detailed above, we are actively promoting the site for residential development and we therefore support the inclusion of the site within the Strategic Allocation detailed within Policy A29. We do however object to Requirement 9 of Policy A29 as Thakeham considers there is no evidence or justification to support the proposed new road bridge. We therefore suggest that on this basis the policy is unsound as it is not based on objectively assessed infrastructure requirements in accordance with NPPF, para 182.

We have demonstrated within these representations that we consider the site to be achievable, suitable and available for residential development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents: 2017 07 24 GBC LP Representations Land north of Grange Road, Ash.pdf (828 KB) 2017 07 24 GBC LP Representations Land north of Grange Road, Ash - Appendix 1.pdf (122 KB)
This policy includes requirements in regard to additional standards to meet carbon reductions. This requirement is not consistent with national policy, and therefore any additional standards such as those relating to carbon reduction in Policy D2 should not be included within the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H1 stipulates a requirement for residential development sites of 25 units or more to deliver 10% of new homes meeting Building Regulations M4 (2) Category 2 standard ‘accessible and adaptable dwellings’ and 5% of new homes meeting Building Regulations M4 (3)(b) category 3 wheelchair user accessible dwellings standard.

We wish to object to Policy H1, as it is not considered that the Council has provided sound justification to support the stipulation of such standards. Planning Practice Guidance is clear that evidence is required to demonstrate need and viability prior to implementing these standards.

The 2017 SHMA provides some justification regarding the need for accessible homes indicating a projected increase in the number of people with a long-term health problem or disability, whilst also indicating a requirement for 8% of the housing need to cater for specialist housing for older persons, such as sheltered and extra care housing.

Whilst we generally support the delivery of residential units to meet the needs of the ageing population and those with health needs, there is little justification within the Council’s evidence base to support the level of 15% of properties meeting Building Regulations Parts M4 (2) and M4 (3). Whilst there is some need within the Borough, particularly for the needs of older people, there is little justification as to the whether all sites would be suitable for this need depending on size, location and need within a particular area.

The Policy also stipulates that 5% of units on development sites of over 100 homes or more to be made available for sale as self-build and custom housebuilding plots whilst there is an identified need. The Council needs to provide justification and evidence as to the suitability of applying this policy to all sites over 100 units, as it will need to be demonstrated that such a requirement is feasible in terms of size, location and need within a particular area.

We would suggest that this policy is unsound and should be deleted, however should the policy remain a degree of flexibility needs to be applied.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID4
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy ID4: Green and Blue Infrastructure

Thakeham continues to object to the proposed designation of the site as ‘Open Space’ and the findings of the Council’s Assessment of Sites for Amenity Value 2017 (Document Reference T16), which has informed this designation.

Open Space is defined in the NPPF as follows:

“All open space of public value, including not just land, but also areas of water (such as rivers, canals, lakes and reservoirs) which offer important opportunities for sport and recreation and can act as a visual amenity”

NPPF, Page 54

With respect to open space designations in the Proposed Submission Plan, Policy ID4 states:

‘Open space (encompassing all open space within urban areas, land designated as Open Space on the Policies Map and all land and water that provides opportunities for recreation and sport as identified in in the most recent Open Space, Sports and Recreation Assessment) will be protected from development in accordance with national planning policy.’

Supporting Paragraph 4.6.49 provides a definition of Open Space:

‘Open space for the purpose of policy ID4, is defined as all types of open land, both public and private, of public sport/ recreation and/or amenity value.’

Within the ‘reasoned justification’ for this policy at paragraph 4.6.55 of the Proposed Submission Local Plan, the Council explain that the Amenity Assessment 2017 has identified and informed the designation of Open Spaces across the Borough:

‘The Council has produced an Amenity Assessment to identify open spaces of public amenity value within villages that are inset from the Green Belt by the plan. This assessment looked at land within the proposed village inset boundaries, excluding land where inset boundaries were expanded to take in allocations on the edges of villages. Sites that were assessed as having public value are identified as Open Space on the Policies Map and will be protected in line with national planning policy to ensure that the value for which the space has been identified is retained. Open spaces outside inset village boundaries are protected by the Green Belt designation so have not been considered for further protection. Land of public value in inset villages that is used for sport and recreation is identified through the Open Space Sport and Recreation Assessment and will be protected in line with the NPPF.’

Following a site visit and basic desktop assessment, the Amenity Assessment 2017 deemed the site (Ref: ETH_088) had an amenity value score of ‘High’, accompanied by the following reasoning:

‘Site is a grass field which is inaccessible to the public. The site is adjacent to a private sports centre. There is also a PROW along the southern boundary. The site is in an elevated position and offers aesthetic value.’

As the site is private land which is inaccessible to the public and therefore has no amenity value with respect to providing opportunities for sports and recreation, it appears that the site has been designated entirely due to its ‘aesthetic value’ and that as a result the overall amenity value is scored as ‘High’. This is the only basis upon which the site is designated an Open Space within the Pre Submission Local Plan under Policy I4.

The site is well contained by high hedgerow to its southern boundaries adjacent to the public footpath, and is set substantially back from the road frontage of Chinthurst Lane. Due to the location and positioning of the site, there are very limited views towards the site from the public realm on Chinthurst Lane and further afield. The elevated position of the site means any views into the site from the tennis club are limited. The only views into the land are from private properties at first floor level, and limited views from the private sports club.
As per previous representations, and to demonstrate the minimal visual amenity value of this site, we have again appended a series of images at Appendix 2 which accompanied representations made in July 2016. These images show that the site is not visible from the public footpath, with the exception of over the entrance gate, and that there is very limited visibility towards the site from the public realm on Chinthurst Lane or the sports club.

We object to the conclusion within the Amenity Assessment that this site is of high amenity value and we consider that the proposed allocation of the land as Open Space should be removed from the Local Plan.

The designation of sites of no amenity value is not consistent with the NPPF and does not constitute positive planning and would seriously compromise the ability of the Borough to provide much needed housing in sustainable locations within the villages and towns.

For the reasons above, it is our view that the Council should review the evidence base, including the Amenity Assessment, and that the proposed Open Space allocation affecting this site should be removed to ensure that the plan reflects national planning policy.

This site is set within a highly sustainable location in the village, and would be suitable for residential development in the emerging plan period. Sites such as this within the village envelope can make an important contribution to meeting housing needs in the locality.

Availability, Suitability & Achievability

Availability

The NPPG provides the following guidance in regard to considering whether a site is available for development:

“A site is considered available for development, when, on the best information available, there is confidence that there are no legal or ownership problems, such as unresolved multiple ownerships, ransom strips tenancies or operation requirements of landowners. This will often mean that land is controlled by a developer or landowner who has expressed an intention to develop”

NPPG Paragraph 021 Ref. 3-020-20140306

As highlighted within this representation, the site is controlled by Thakeham Homes Ltd and we wish to actively engage with the Council over the coming months prior to the submission of a full planning application for residential development.

Thakeham has a proven track record for delivering a number of high quality residential schemes across Surrey, Sussex and Hampshire and will be seeking to deliver circa 20 dwellings on the site with a view to commencing development on site at the earliest opportunity.

Suitability

The NPPG provides the following guidance when considering whether a site is suitable for development:

“Sites in existing development plans or with planning permission will generally be considered suitable for development although it may be necessary to assess whether circumstances have changed which would alter their suitability”

NPPG Paragraph 019 Ref. 019-20140306

The site lies within the village of Shalford which is proposed to be inset from the Green Belt. The site is surrounded by existing residential and commercial development on all of its boundaries. There are a number of services and facilities in the local area, including a railway station and an infant school. Physical constraints to development in this location are also minimal. The site lies comfortably within Flood Risk Zone 1, where there is considered to be the lowest level of fluvial flood risk. There are no major ecology constraints and the site lies a significant distance from the Thames Basin Heaths SPA.

Achievability
In determining whether a site is achievable for development, the NPPF provides the following guidance:

“A site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time. This is essentially a judgement about the economic viability of the site and the capacity of the developer to complete and let or sell the development over a certain period”

NPPG, Paragraph 021 Ref. 021-20140306

Given the acute housing need within the Borough and the relative lack of constraints affecting this site, it is considered that there is a reasonable prospect of residential development being achieved on site by 2021.

As stated above, Thakeham has a proven track record for delivering schemes of a similar size and scale throughout Surrey, Sussex and Hampshire, and has the capacity to deliver the development of the site to provide much needed new homes within the first 5 years of the plan period.

**Policy P1: Surrey Hills Area of Outstanding Natural Beauty and Area of Great Landscape Value**

We note the extension of the existing AGLV boundary within the Proposed Submission Local Plan resulting in this policy now ‘washing over’ the settlement. We do not consider that this is appropriate use of AGLV policy, as there is no justification to support the application of this designation across the settlement. We would suggest that the areas within the settlement boundary do not perform the required function to warrant designation as AGLV. We consider that the AGLV designations within settlement boundaries should be reviewed and omitted.

We have concerns regarding the proposed Policy S2: Borough Wide Strategy for the plan period, as the reduction in housing provision has not been properly justified and the council has failed to consider the needs of neighbouring authorities.

Since the publication of the Pre-Submission Local Plan in June 2016, Guildford Borough Council (GBC) has reduced the overall housing target for the plan period from 13,860 to 12,426, this policy also includes an amendment to the plan period from 2013 - 2033 to 2015 - 2034. GBC has sought to justify this by citing an adjustment in OAN resultant of changes in projected economic forecasts within the West Surrey Strategic Housing Market Assessment: Guildford Addendum Report 2017 (‘2017 SHMA).

Affordability & Market Signals

The council suggests that economic circumstances point to a reduced need for housing, however affordability issues and the demographic baseline detailed in the 2017 SHMA point towards a difference conclusion. The baseline figure alone in the 2017 SHMA shows an increase in housing need in the borough from 517 dpa to 552 dpa. This clearly demonstrates significant growth in housing need from 2015-2017.

The NPPF explains at Paragraph 17 that there are certain underlying principles which should be applied when assessing housing need. One of those is the need to take into account market signals, such as land prices and housing affordability. Whilst Paragraph 19 of the NPPF stipulates that housing need numbers should be adjusted to reflect appropriate market signals.

Whilst the 2017 SHMA assesses market signals, concluding that an uplift should be applied in terms of housing need, the uplift which has been applied is very low. The 2017 SHMA moves from an employment-led OAN of 579dpa to 631dpa (+52dpa) through ‘improvements to affordability’. The 2017 SHMA outlines that this is a 9% increase on the employment led projections (paragraph 8.17 refers).

The 2017 SHMA draws on the lower quartile affordability ratio prepared by DCLG (Figure 14 refers). This indicates that in Guildford Borough, the lower quartile houses are 11.4 times that of lower quartile (LQ) earnings. The Office for National Statistics (ONS) have now taken care of this data and have produced workforce based lower quartile affordability ratios using data up to 2016. This indicates that the LQ affordability ratio has increased to 12.18 in 2016. If we compare that to the national picture in 2016 of 7.16, it is clear that Guildford has severe affordability issues and an imbalance in the supply and demand of housing. This may, in part, be due to the restricting presence of the Green Belt, however it is the preserve of the Council to ensure that affordability is addressed through the Local Plan to enable the OAN to be met in full and alleviate affordability concerns throughout the plan period.

The councils evidence base clearly demonstrates affordability issues within the borough, and whilst it is concluded within the 2017 SHMA that an uplift should be applied, this is insufficient at present to contribute towards improving affordability within the borough and the wider HMA.

In terms of affordable housing, the 2017 SHMA indicates that the need for affordable housing in the Borough has increased from 478dpa to 517dpa (Table 24 refers). Based on affordable delivery of 40%, this indicates that the Council would need to provide up to 1,300dpa in order to meet the affordable need in full. Whilst this is clearly a significant figure to address, the Council has not made any attempts to provide additional growth to meet a greater element of this need. It would appear that a proportionate approach is needed to ensure that the Council makes every effort to reduce the disparity between affordable housing need and supply.

Duty to Cooperate & Unmet need

The NPPF duty to cooperate requires LPAs to demonstrate evidence of having effectively cooperated to plan for cross-boundary impacts, including the delivery of housing development to meet the full objectively assessed needs of the area. Providing a requirement for Local Plans to seek to deliver ‘the unmet requirements of neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development’.

The Council’s evidence base fails to assess the potential for meeting unmet needs arising from outside the Borough. The Council only seeks to provide housing for its own assessed need.
Guildford falls within the West Surrey Housing Market Area (HMA) which comprises of 3 Local Authorities: Woking, Waverley and Guildford Borough Councils. Importantly, the current Waverley Local Plan examination has raised key issues in regard to Woking’s unmet need, and the need for clarity on how this is to be addressed through the wider HMA. It was determined at the Waverley examination hearings that they would be expected to meet half of the unmet need arising from Woking, amounting to 83dpa.

Given that paragraph 4.1.9a of the Proposed Submission Local Plan states that the housing requirement ‘is lower than the total supply of homes identified in the Land Availability Assessment as having potential to be delivered over the plan period’. We consider that Guildford has sufficient capacity to ensure that they can make a significant contribution to the remaining unmet need of Woking, in addition to their own OAN and consequently this should be reflected in their housing requirement.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Guildford Borough Proposed Submission Local Plan (Regulation 19) – Representation
Re: Land to the rear of Greenhill and Burnside, Chinthurst Lane, Shalford
Introduction

These representations are submitted in respect of Thakeham’s interest on land to the rear of Greenhill and Burnside, Chinthurst Lane, Shalford (‘the site’). The site is also known by LAA reference 1264, and has previously been promoted to the Local Plan, including to the Draft Local plan consultation in autumn 2014 and Pre-Submission Local Plan consultation in June-July 2016.

We wish to support the proposed insetting of Shalford within the Green Belt in the Proposed Submission Local Plan, however as per our representations submitted in July 2016 we wish to object to the proposed designation of this site as ‘Open Space’ and the findings contained within the Amenity Assessment, which in our view does not provide sufficient justification for this allocation.

Land to the rear of Greenhill and Burnside, Chinthurst Lane, Shalford

Thakeham Homes wishes to recommend the site for residential development and as such supports the indicated changes to inset Shalford into the Green Belt in the Proposed Submission Local Plan. The red line location plan for the site has been appended to this representation at Appendix 1.

[Figure 1]

Deliverability

For the reasons above, the site is considered to be available, suitable and achievable, and therefore deliverable in accordance with the NPPG. In summary, we consider that this site has limited amenity value and object to the proposed designation of the site as open space. The site is deliverable for residential development, and could be delivered within the first five years of the plan period.

Conclusions

In conclusion, we consider that the reduction in OAN and consequently intended housing provision is unsound, and the Council has
not provided the required justification for this reduction. In particular, the intention of Guildford Borough to not contribute to the unmet needs in the HMA is of particular concern, and we would suggest that GBC seek to accommodate the 83dpa shortfall to ensure the housing needs of the HMA are met.

We consider that some standards and requirements stipulated in the proposed policies are unjustified, and the Council should demonstrate how these conform with national policy and guidance. Where there is insufficient evidence to demonstrate a requirement for such policies, these should be deleted from the Local Plan.

As detailed above, we have actively promoted this site for residential development and are pleased that the Council has sought to inset the settlement from the Green Belt. We do however have concerns regarding the Councils application of both AGLV policy across the settlement and Open Space policy on the site. We do not consider that the site has been assessed correctly within the ‘Assessment of Site for Amenity Value 2017’ document, and recommend that the land to the rear of Greenhill and Burnside, Shalford, is removed from Policy ID4 as open space due to its limited amenity value and private ownership.

We have also demonstrated within these representations that we consider the site to be achievable, suitable and available for residential development.

We trust that these representations will be useful and clear and we would be grateful for confirmation of receipt. In the meantime, please do not hesitate to contact me if you have any queries or require any further information.

Comment ID: pslp17q/666  Respondent: 17345441 / Thakeham Homes (Sarah Sutcliffe)  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

NPPF, para 182 sets out the requirements for a Local Plan to be found ‘sound’. We believe that the Local Plan is currently unsound as it stands on the basis that:

- The Local Plan is not positively prepared, as it fails to meet objectively assessed development requirements, including unmet requirements from neighbouring authorities;
- The Local Plan is not effective as it is not based on effective joint working on cross-boundary strategic priorities;
- The Local Plan is not consistent with national policy, particularly in relation to NPPF, para 14. The reduction in housing provision in Policy S2 demonstrates that the Council is not positively seeking opportunities to meet development needs.

We consider that some standards and requirements stipulated in the proposed policies are unjustified, and the Council should demonstrate how these conform with national policy guidance. Where there is insufficient evidence to demonstrate a requirement for such policies, these should be deleted from the Local Plan.
We consider Guildford Borough Council’s revised Proposed Submission Local Plan to be unsound because it is not consistent with National Policy, sustainable or justified.

We strongly object to proposals to release Green Belt land on the following grounds:

- The Green Belt sites proposed for development still meet the requirements as set out in the paragraphs on Green Belt purposes in the National Planning Policy Framework (NPPF) and their removal would compromise the integrity of the London Metropolitan Green Belt.
- Notwithstanding the changes made to the Local Plan since the 2016 consultation, proposals to release large areas of Green Belt for development are inconsistent with the NPPF and with stated Government policy, as stated by the Secretary of State for Communities and Local Government.

The following points outline the reasons why we consider the Proposed Submission Local plan to be unsound and relate to the following policies:

- A25: Gosden Hill Farm
- A26: Blackwell Farm
- A35: Former Wisley Airfield
- A43: Garlick Arch
- A43a: Land for new north facing slip roads to/from A3 at Send Marsh/ Burnt Common
- E4: Surrey Research Park
- H2: Affordable Homes
- P2: Green Belt

1. The plan is inconsistent with the NPPF.

1.1 Guildford Borough Council has still failed to prove that the benefit of releasing land within the Metropolitan Green Belt area outweighs the harm. Notwithstanding the changes made to the revised plan, it is quite clear that the harm of removing Green Belt land which strongly meets Green Belt criteria in paragraph 80 of the NPPF considerably outweighs any benefits. Guildford Borough Council has failed to take account of the significant harm of releasing Green Belt for development, despite there being a clear environmental and social impact for both the residents of Guildford Borough Council and neighbouring authorities.
Paragraph 44 of The Planning Practice Guidance states that:

*The Framework is clear that local planning authorities should, through their Local Plans, meet objectively assessed needs unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the Framework taken as a whole, or specific policies ... Such policies include ... land designated as Green Belt."

- 1.2 Proposed Green Belt development undermines the Green Belt’s purposes, in particular, checking unrestricted urban sprawl, preventing the merger of neighbouring towns and assisting urban regeneration.

Guildford Borough Council’s revised Proposed Submission Local Plan proposes to build in excess of 7000 homes on Green Belt land, approximately 58% of its total housing target. The proposed urban extensions at Blackwell Farm (Policy A26) and Gosden Hill Farm (Policy A25) are on sites particularly vital to prevent urban sprawl and are of strategic importance to the Metropolitan Green Belt in its entirety. These sites also include high grade agricultural land as well as land significant for recreation which contributes to Surrey’s iconic landscape including Hogs Back.

- Gosden Hill Farm (Policy A25)
  This site performs all the functions of the Green Belt but particularly prevents the merger of neighbouring towns by separating West Clandon from the edge of urban Guildford. Notwithstanding the changes in the revised plan, the proposals would cause the coalescence of the two towns. Along with the proposal for on-slip and offslips roads at Garlick’s Arch (policy A43a), this would lead to continuous development from Send to Guildford.
- Blackwell Farm (Policy A26)
  Blackwell Farm is of strategic importance for the whole of the Metropolitan Green Belt. It performs all five functions of Green Belt, and fulfils purposes 1, 3 and 5 very strongly. It clearly prevents urban sprawl to the West of Guildford and protects the countryside (including AONB) from incursion. Furthermore, the revised plan disregards an independent expert landscape study, which demonstrates that part of The site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review.
- Land at former Wisley Airfield (Policy A35)
  This land plays a significant role in curtailing urban sprawl. In rejecting previous planning applications on this site, Guildford Borough Council Planning Officers themselves stated that development would be inappropriate due to the impact on the openness of the land.

The Proposed Submission Local Plan is unsustainable

2.1. Focusing housing development on Green Belt land makes the Local Plan’s affordable Housing Policy unachievable.

The changes in policy H2 Affordable Homes do not go far enough to address affordable or social housing need. By continuing to concentrate housing development on Green Belt rather than urban sites, the revised Proposed Submission Local Plan renders the 40% affordable target stated in the Local Plan’s Affordable Homes Policy unachievable.

As mentioned in 3.2 below, the fact that Guildford Borough Council has failed to set higher densities for the urban area and has deleted all reference to “density for development” in its revised Local Plan means that the plan is out of step with current policy direction and is therefore unsustainable.

2.2 Development at Garlick Arch (Policy A43) would lead to the loss of rural employment
Notwithstanding the changes made in the revised plan, Policy A43 does not mitigate the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over nine years.

2.3. Development on Green Belt sites will increase traffic congestion, significantly impact on air quality and lead to flooding

The development proposed on Green Belt sites is dependent on large, uncommitted road building schemes; will have a detrimental impact on traffic volume and associated air quality as well as increasing flood risk.

- Gosden Hill Farm (Policy A25)
  The volume of traffic will greatly increase air pollution by:
  - Generating approximately 6,000 vehicles which will exit straight on to the already heavily congested road network;
  - The linking of the A3100, B2215 and A247, channelling thousands of cars through the narrow, winding road through West Clandon;
  - The proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common which would generate even larger volumes of on the A247 through Send and West Clandon.

- Blackwell Farm (Policy A26) and Surrey Research Park (Policy E4)
  The development will heighten the risk of flooding and the volume of traffic will add to air pollution in neighbouring areas, which already exceeds safe EU limits for Nitrogen Dioxide as a result of:
  - Damaging Hogs Back’s function as a soak away for surface rainwater - development on Blackwell Farms slopes will cause water to travel north, adding to existing flooding in Wood Street Village, Fairlands and Whitmore Common;
  - Directing more office space to an extended business park [Policy E4] which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas;
  - ignoring independent expert traffic studies which show the impact of development at Blackwell Farm on the local network, questioning the viability of the development;
  - removing Guildford’s “green lung” on the slopes of the Hogs Back. In the UK, the prevailing winds are from the West. The open farmland to the west of Guildford allows clean air to be blown into the town. If this area is urbanised, CO2 emissions and other pollutants will replace this clean air.

- Land at former Wisley Airfield (Policy A35)
  This development would cause further harm to air quality both onsite and in the Cobham Air Quality Management Area due to the proximity to the severely congested A3/ M25 junction and Ripley village and roundabouts.

3. The Proposed Submission Local Plan is unjustified.

3.1. Green Belt should have been considered as a constraint when setting housing targets but, notwithstanding the changes made since the 2016 consultation, this has not happened.

The revised Proposed Submission Local Plan is not compliant with national policy as, notwithstanding the changes made since the 2016 consultation, it still does not take sufficient account of Green Belt constraints on development. The reduction in the housing target by just 1,434 from 13, 860 to 12,426 means that the changes do not sufficiently take account of constraint. This is in direct contrast to the Secretary of State’s 2016 statement that Green Belt should be ‘absolutely sacrosanct’.
Paragraph 45 of the Planning Practice Guidance clearly states that councils should take account of policies such as the Green Belt which indicate development should be restricted.

"Once need has been assessed, the local planning authority should prepare a Strategic Housing Land Availability Assessment to establish realistic assumptions about the availability, suitability and the likely economic viability of land to meet the identified need for housing over the plan period, and in so doing take account of any constraints such as Green Belt, which indicate that development should be restricted and which may restrain the ability of an authority to meet its need."

The government has also repeatedly made it clear that demand for housing is unlikely to be accepted as the exceptional circumstances needed to justify changing Green Belt boundaries for example in ministers’ clarifications in letters to MPs, referring directly to the Local Plan preparation process: “we have been repeatedly clear that demand for housing alone will not change green belt boundaries” [Letter from Brandon Lewis to MPs 7 June 2016]. Guildford Borough Council is clearly justifying the release of Green Belt by arguing it is needed for housing, however as mentioned in 2.1, this is unsustainable in providing the housing needed and thus cannot warrant exceptional circumstances.

3.2 Local Plan revisions do not taken account of the policy intentions set out in the Housing White Paper, published following the original Regulation 19 consultation.

The Housing White Paper, published after the previous Regulation 19 consultation, made it explicit that Local Authorities must look at ALL alternatives before releasing Green Belt land including increasing density and making the most of available brownfield sites. Previous consultations show that Guildford residents would prefer to use brownfield land in the urban area first.

The revised Local Plan is thus unjustified because it fails to fully explore the many opportunities within the borough where there is no presumption against development which would mitigate the release of Green Belt land AND assist in urban regeneration.

- **Densification**
  - More effective use of current space would remove the need for new land.
  - Urban densities in Guildford town are no higher than the villages that surround it despite the majority of villages being in the Green Belt and protected from development.
  - Only 10% of the total housing proposed in the revised Local Plan is proposed in Guildford Town Centre. The fact that Guildford Borough Council has failed to set higher densities for the urban area and has deleted all reference to “density for development” in the revised Local Plan means that the plan is out of step with current policy direction and unsustainable.
  - The existing Surrey Research Park is low density with just 65,000m² of office space over 27 ha. This land could be used far more effectively by providing office space on car parks and other mixed use development.
  - If the plot-ratio in the approved Manor Park master plan was applied to the existing Research Park, six times as much office accommodation could be provided therein.

- **Brownfield**
  - Guildford town has developed very little over the last 20 years and has not undergone the type of normal urban expansion, redevelopment of previously developed sites and increase in residential densities as nearby towns such as Woking.
  - Sites by River Wey could be used to provide affordable accommodation where it is needed rather than unnecessary retail development. The Carter Jonas Guildford Retail Study Update 2017 lacks credibility and there is no proven case for expanding comparison retail space which is undermined by failure to implement existing retail consents at the North Street development over the last 10 years. The Guildford Retail Study does not take
account of changing retail patterns in relation to the decline in high street retail due to the rise of internet shopping. The study also assumes a number of logged retail requirements from companies already in liquidation or with national requirements that exclude Guildford.
- The plan overlooks Bordon and Whitehill eco-town which is seeking high quality businesses to re-locate.

Moreover, the Housing White Paper also sends a clear signal to developers that they must build out permissions. The University of Surrey was permitted to remove 64 ha of land from The Green Belt at Manor Park in 2003 citing the need to build 5090 student and staff residences as exceptional circumstances. 14 years on, only one third of these have been built yet the university has claimed that students want to live off-campus, now referring to Guildford’s acute housing need as an exceptional circumstance to build on Blackwell Farm (Policy A26).

3.2 The proposal to extend Surrey Research Park onto Green Belt land at Blackwell Farm does not constitute exceptional circumstances. The excessive expansion of Surrey Research Park (Policy E4) onto Green Belt land at Blackwell Farm is not supported by the findings of the Employment Land Needs Assessment 2017. The current site is very low density and could easily be increased within its existing curtilage.

4. Proposed modifications.
   a. Revise housing targets to a more credible level, taking into account the Green Belt as a constraint to development. The London Green Belt council concurs with the Guildford Green Belt Group that a target of 4,000 homes would remove the need to build on Green Belt or open countryside, meeting the largest public objection to the plan as a whole.
   b. Instigate a more sustainable alternative to meeting housing need by following government policy to develop on previously developed sites in the urban area, many of which are owned by the Council.
   c. Include far more affordable housing to meet the need for young families and young people in the Guildford area.
   d. Impose a moratorium on any development proposed on University of Surrey Green Belt land until it has completed all the developments proposed in its 2003 Manor Farm proposal.
   e. Increase the Surrey Research Park plot ratio from 25% to 50% to keep development within the same footprint of the existing park without damaging its amenity.

Land to the East of Chinthurst Lane, Shalford
As set out in previous representations (dated 29th November 2013 and 18th July 2016), Thakeham Homes wishes to recommend the site for residential development and as such supports the changes to inset Shalford from the Metropolitan Green Belt. Albeit we consider that the settlement boundary could be extended to include this site to provide much needed housing towards addressing the Borough’s objectively assessed needs. The red line location plan for the site has been appended to this representation at Appendix 1.

The site is located adjacent to the proposed inset settlement boundary East of Chinthurst Lane. As such, the site is set within a sustainable location, within walking distance of many local services and facilities, including a railway station and an infant school. Physically, the site benefits from minimal constraints, with a flat topography and good screening provided.
by trees, offering limited views in from the surrounding area. The site is located within flood risk zone 1, where there is considered to be the lowest risk of fluvial flooding.

This site is set within a highly sustainable location on the edge of the village, and would be suitable as an extension to the existing built area to provide much needed housing to meet the Borough’s needs.

The site is identified as a Potential Development Area (PDA) in the Green Belt and Countryside Study Volume III (2013) (ref: E56-A). Within the assessment it notes that “the site is surrounded by defensible boundaries including hedgerows and woodland at Shalford Common to the north, hedgerows and rising topography to the east and south, and hedgerows following Chinthurst Lane to the west of the PDA”.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy H1: Homes for all
We wish to object to Policy H1. Policy H1 has been amended and now stipulates a number of additional onerous
requirements for residential development, including the requirement for sites of 25 units or more to deliver 10% of new
homes meeting Building Regulations M4 (2) Category 2 standard ‘accessible and adaptable dwellings’ and 5% of new
homes meeting Building Regulations M4 (3)(b) category 3 wheelchair user accessible dwellings standard. Planning
Practice Guidance is clear that evidence is required to demonstrate need and viability prior to implementing these
standards.

The 2017 SHMA provides some justification regarding the need for accessible homes indicating a projected increase in the
number of people with a long-term health problem or disability, whilst also indicating a requirement for 8% of the housing
need to cater for specialist housing for older persons, such as sheltered and extra care housing.

Whilst we generally support the delivery of residential units to meet the needs of the ageing population and those with
health needs, there is little justification within the Council’s evidence base to support the level of 15% of properties
meeting Building Regulations Parts M4 (2) and M4 (3). Whilst there is some evident need within the Borough, particularly
for the needs of older people, there is little justification as to the whether all sites would be suitable for this need depending
on size, location and need within a particular area.

The Policy also stipulates that 5% of units on development sites of over 100 homes or more to be made available for sale as
self-build and custom housebuilding plots whilst there is an identified need. Whilst there is a clear mandate for Local
Authorities to understand the scale and requirement for self-build properties to provide evidence for the demand for this
type of housing, the Council has not provided any justification for this policy. In the absence of credible evidence, the
policy needs to be made more flexible in order for self-build to be included in the plan, though not to the prescriptive extent
expressed in the current policy.

We would suggest that these aspects of the policy are unsound and should be deleted, however should the policy remain a
degree of flexibility needs to be applied.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2: Borough Wide Strategy ‘Housing Provision’

One of the more significant changes presented in the Proposed Submission version of the Local Plan is the reduction in the
Objectively Assessed Need for Housing (OAN) presented as part of the emerging Policy S2. We object to these changes as
the reduction in housing provision has not properly justified and the Council has failed to consider the unmet need for
neighbouring authorities.

Since the publication of the Pre-Submission Local Plan in June 2016, Guildford Borough Council (GBC) has reduced the
overall housing target for the plan period from 13,860 to 12,426, this policy also includes an amendment to the plan period
from 2013 - 2033 to 2015 - 2034. GBC has sought to justify this reduction by citing an adjustment in OAN resultant of
changes in projected economic forecasts within the West Surrey Strategic Housing Market Assessment: Guildford Addendum Report 2017 (2017 SHMA).

Affordability & Market Signals

The Council suggests that economic circumstances point to a reduced need for housing, however affordability issues and the demographic baseline detailed in the 2017 SHMA point towards a difference conclusion. The baseline figure alone in the 2017 SHMA shows an increase in housing need in the borough from 517 dpa to 552 dpa. This clearly demonstrates growth in housing need from 2015-2017.

Our view is that the 2017 SHMA does not properly reflect the affordability constraints in the Borough and fails to apply a sufficient uplift. The NPPF explains at Paragraph 17 that there are certain underlying principles which should be applied when assessing housing need. One of those is the need to take into account market signals, such as land prices and housing affordability. Whilst Paragraph 19 of the NPPF stipulates that housing need numbers should be adjusted to reflect appropriate market signals.

Whilst the 2017 SHMA assesses market signals, concluding that an uplift should be applied in terms of housing need, the uplift which has been applied is very low. The 2017 SHMA moves from an employment-led OAN of 579dpa to 631dpa (+52dpa) through ‘improvements to affordability’. The 2017 SHMA outlines that this is a 9% increase on the employment led projections (paragraph 8.17 refers). The 2017 SHMA draws on the lower quartile affordability ratio prepared by DCLG (Figure 14 refers). This indicates that in Guildford Borough, the lower quartile houses are 11.4 times that of lower quartile (LQ) earnings. The Office for National Statistics (ONS) have now taken care of this data and have produced workforce based lower quartile affordability ratios using data up to 2016. This indicates that the LQ affordability ratio has increased to 12.18 in 2016. If we compare that to the national picture in 2016 of 7.16, it is clear that Guildford has severe affordability issues and an imbalance in the supply and demand of housing. This may, in part, be due to the restricting presence of the Green Belt, however it is the preserve of the Council to ensure that affordability is addressed through the Local Plan to enable the OAN to be met in full and alleviate affordability concerns throughout the plan period.

The Council’s evidence base clearly demonstrates affordability issues within the Borough, and whilst it is concluded within the 2017 SHMA that an uplift should be applied, this is insufficient at present to contribute towards improving affordability within the Borough and the wider HMA.

In terms of affordable housing, the 2017 SHMA indicates that the need for affordable housing in the Borough has increased from 478dpa to 517dpa (Table 24 refers). Based on affordable delivery of 40%, this indicates that the Council would need to provide up to 1,300dpa in order to meet the affordable need in full. Whilst this is clearly a significant figure to address, the Council has not made any attempts to provide additional growth to meet a greater element of this need. It would appear that a proportionate approach is needed to ensure that the Council makes every effort to reduce the disparity between affordable housing need and supply.

Duty to Cooperate & Unmet need

The NPPF duty to cooperate requires LPAs to demonstrate evidence of having effectively cooperated to plan for cross-boundary impacts, including the delivery of housing development to meet the full objectively assessed needs of the area. Providing a requirement for Local Plans to seek to deliver ‘the unmet requirements of neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development’.

The Council’s evidence base fails to assess the potential for meeting unmet needs arising from outside the Borough. The Council only seeks to provide housing for its own assessed need.

Guildford falls within the West Surrey Housing Market Area (HMA) which comprises of 3 Local Authorities: Woking, Waverley and Guildford Borough Councils. Importantly, the current Waverley Local Plan examination has raised key issues in regard to Woking’s unmet need, and the need for clarity on how this is to be addressed through the wider HMA. It was determined at the Waverley examination hearings that they would be expected to meet half of the unmet need arising from Woking, amounting to 83dpa.

Given that paragraph 4.1.9a of the Proposed Submission Local Plan states that the housing requirement ‘is lower than the total supply of homes identified in the Land Availability Assessment as having potential to be delivered over the plan
period’. We consider that Guildford has sufficient capacity to ensure that they can make a significant contribution to the remaining unmet need of Woking, in addition to their own OAN and consequently this should be reflected in their housing requirement.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Availability, Suitability & Achievability

Availability

The NPPG provides the following guidance in regard to considering whether a site is available for development:

“A site is considered available for development, when, on the best information available, there is confidence that there are no legal or ownership problems, such as unresolved multiple ownerships, ransom strips tenancies or operation requirements of landowners. This will often mean that land is controlled by a developer or landowner who has expressed an intention to develop”

NPPG Paragraph 021 Ref. 3-020-20140306

As highlighted within this representation, the site is controlled by Thakeham Homes Ltd and we wish to actively engage with the Council to promote the site for the delivery of around 200 much needed homes.

Thakeham has a proven track record for delivering a number of high quality residential schemes across Surrey, Sussex and Hampshire and should the Council allocate the site for removal from the Green Belt, we would look to commence development on site at the earliest opportunity.

Suitability

The NPPG provides the following guidance when considering whether a site is suitable for development:

“Sites in existing development plans or with planning permission will generally be considered suitable for development although it may be necessary to assess whether circumstances have changed which would alter their suitability”

NPPG Paragraph 019 Ref. 019-20140306

The site lies adjacent to the settlement boundary of Shalford, which is proposed to be inset from the Green Belt within the Proposed Submission Local Plan. We support the proposed insetting of the village, and consider that this site could provide an extension to the built area to provide housing. The insetting of the settlement reflects the sustainability of the village and the suitability of the area as a location for some level of growth in the plan period.
As stated above, the site is set within a sustainable, edge-of-settlement location adjacent to the proposed settlement boundary and the Council’s Green Belt and Countryside Study Volume III (2013) notes that “the site is surrounded by defensible boundaries”.

We therefore consider that the site is suitable for the delivery of residential development and should therefore be removed from the Green Belt.

**Achievability**

In determining whether a site is achievable for development, the NPPF provides the following guidance:

“A site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time. This is essentially a judgement about the economic viability of the site and the capacity of the developer to complete and let or sell the development over a certain period”

NPPG, Paragraph 021 Ref. 021-20140306

Given the acute housing need within the Borough and the relative lack of constraints affecting this site, it is considered that the site could deliver around 200 dwellings within the plan period.

As stated above, Thakeham has a proven track record for delivering schemes of a similar size and scale throughout Surrey, Sussex and Hampshire, and has the capacity to deliver the development of the site to provide much needed new homes within the plan period.

**Deliverability**

For the reasons above, the site is considered to be available, suitable and achievable, and therefore deliverable in accordance with the NPPG. We have appended to this representation an indicative site plan without constraints to illustrate where development could potentially be delivered on the site.

**Conclusions**

In conclusion, we consider that the reduction in OAN and consequently intended housing provision is unsound, and the Council has not provided the required justification for this reduction. The intention of Guildford Borough to not contribute to the unmet needs in the HMA is of particular concern.

As demonstrated above, the Local Plan is not positively prepared, effective or consistent with national policy and therefore in accordance with NPPF, paragraph 182 is not ‘sound’.

We consider that some standards and requirements stipulated in the proposed policies are unjustified, and the Council should demonstrate how these conform with national policy and guidance. Where there is insufficient evidence to demonstrate a requirement for such policies, these should be deleted from the Local Plan.

As detailed above, we have actively promoted this site for residential development and are pleased that the Council has sought to inset the settlement of Shalford from the Green Belt. Notwithstanding this, it is our view that the Council should work proactively to identify and include additional housing site allocations in sustainable locations in the towns and villages and areas of least constraint to meet the full OAN for the HMA and provide sufficient flexibility to adapt to rapid change in accordance with NPPF, paragraph 14.

We have demonstrated within these representations that the Land East of Chinthurst Lane, Shalford, is available, suitable and deliverable for residential development. As such, we recommend that this site is allocated to assist with meeting the Borough’s housing land supply shortfall, as the site is deliverable within the first 5-years of the plan period and provides a sustainable location for residential development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have lived in Normandy since 1976 having relocated from Kent. We eventually chose Normandy for all that it had to offer our family namely a beautiful rural setting surround by relatively open country side with nearby Guilford offering everything in the way of shopping, historical interest, leisure activities and good rail links into London.

I fully support:-

Removal of site A46

Approx 1100 housing units and large senior school

I wholeheartedly rejoice that this totally unacceptable proposal has been removed from the plan. The proposal to change open fields currently designated Green Belt and increase Normandy's population and housing density by over 100% and the the unproven need for a secondary school to be situated in Normandy was grossly inappropriate. Normandy residents are already suffering from higher than expected traffic congestion with large double length lorries using Glaziers Lane (GL)
to access the A31 and any traffic diversions when lanes on said A31 are closed, a very frequent occurrence. GL and Westwood Lane (WL) are country roads not designed to take this heavy traffic use without adding to what is already a problem for residents.

Another issue is the burden this proposal would have made on our oversubscribed primary school, our already overstretched GP practice (long waiting times for an appointment, up to 3 weeks and lack of any infrastructure to support major changes.

removal of site A47

50 residential housing units

I have lived in the Paddocks since newly built in 1976 and was delighted to hear that this inappropriate proposal was removed from the plan. The only access the to the new development would have been through the Paddocks which would have resulted in the possibility of a possible 100 additional vehicles entering/leaving the Paddocks several times a day. Our exit road is already down to one lane caused by cars parked all day by users of the railway station. To exit The Paddocks is already a blind spot, especially to the right and most of my comments in A46 also apply.

Strongly object:

To All proposals to allow housing to built outside of the Green belt on land in and around Normandy and surrounding villages. Green Belt is there to ensure urbanisation linking one town to another with GBC local plan seemingly favouring that the vast majority would be to the west of Guildford. All of these proposal have a deeply detrimental effect on local villages, transport, health services, schools and more. The current infrastructure is just not in place to support this level of housing density.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Removal of site A46 and Site A47

I wish to register my support for the removal of these sites owing to the inability of the infrastructure to cope with developments of this magnitude, and the fact that this is Green Belt land.

Removal from the Green Belt of homes in Guildford Road, northern end of Glaziers lane, Flexford, Walden Cottages, and Palm House Nurseries traveller site:

I object to this as placing these homes outside of the Green Belt could enable development within these areas at a much higher density and will give greater success for future planning applications.
I also wish to object to the proposal for 10,000 homes in the Normandy Area again due to the inability of the infrastructure to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp173/365  Respondent: 17350497 / Ellie Punshon  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have looked carefully at the new draft Local Plan and I wish to OBJECT for the following reasons.

East Horsley is a small village which does not have the infrastructure of roads, rail, parking, medical facilities or schooling to support such a huge increase in population. Fifty seven percent of new housing proposed is on land that is currently categorised as Green Belt. This is flouting government law which established Green Belt to protect the countryside for future generations.

It is proposed that East Horsley is to be “inset” from the Green Belt. This proposed change in settlement boundaries means that the East Horsley settlement area will increase by 37%. At the moment, one hundred houses are proposed near East Horsley station and over two thousand on the former Wisley Airfield, only about one mile from the East Horsley parish boundary. The site at Wisley has recently been increased to now include two more farms!

While the ONS forecasts population for growth for Guildford at 10.4% over the Local plan period, GBC proposes to increase the housing stock by 22%. Since Brexit, forecasts of increasing population numbers have been reduced, yet GBC are continuing to predict massive increases in population, which quite frankly, does not make sense.

Again, I wish to register my strong opposition to the changes proposed by GBC is their latest draft of the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2740  Respondent: 17353249 / Walnut Property Investments Limited  Agent: Vail Williams LLP (Jane Terry)

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A9

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Support is generally given to Policy A9 which allocates the site at 77-83 Walnut Tree Close, for offices (B1a) subject to the objections previously made to the policy namely, the limitation placed on the floorspace allocation for approximately 3,000 sq.m where:

- The site currently consists of 37,300sq.ft / 3,470sq.m;
- A further allowance should be made to include a further 400 sq.m in recognition of the potential for redevelopment within the gap between either 77-85 or 97-105 Walnut Tree Close;
- Recognition that it is the design process rather than any arbitrary limitation on the allocation floorspace should be the driver in the redevelopment of this sustainable town centre site. In order to allow sufficient flexibility within the design process the policy should be redrafted to refer to at least the quantum of development currently existing on site plus an additional 400 sq.m for development either in the gap between 77-85 or 97-105; and
- Flexibility in the use should reflect the ELNA findings for the need for ‘B1a and B1b’, Office and Research and Development uses. In addition to the above, it should be noted that:
  - A further building now demolished, was present on site, and which is still referenced on the allocation plan. If this is also taken into account the previous developed quantum would be higher again;

The current buildings are of very poor quality both in terms of the accommodation provided and their impact on the surrounding environmental and amenity value.

For ease of reference, these representations are attached as Appendix A.

Notwithstanding the above, objection is raised to the detail of the policy including:

- Limitation of the site’s redevelopment solely for B1 employment use.

As outlined in the objection to the Spatial Vision and Policy S2: Borough-wide Strategy set out above, there is clearly a need for the identification of further sites for sustainably located, residential development. The character of Walnut Tree Close is changing to become much more residentially orientated. Accordingly, and being previously developed, very sustainably located on the edge of the town centre, with excellent and acknowledged pedestrian, cycle and bus links, the site at A9 is ideally suited to a mixed use development including up to 70 no 1 and 2 bedroom apartment units. The policy at A9 should therefore be modified to reflect this mixed use potential as follows:

**Allocation: The site is allocated for approximately** at least 3,870 sq. m of mixed use development including residential (C3) and offices (B1a).

Two changes proposed to the text beneath this policy are proposed in terms of:
- An additional requirement - c) Consideration of views in and out of the adjacent River Wey Conservation Area; and to the
- Opportunities:
  (2) Potential facilitation of / contribution to Sustainable Movement Corridor having regard to the Sustainable Movement Corridor Supplementary Planning Document Support; and
  (5) Improve views from Walnut Tree Close to the River Wey and provide pedestrian access through the site to the towpath.

In terms of the additional requirement c) made, the site is currently in B1a and B1c use and is therefore defined as previously developed. The Policy acknowledges that the site is located within the defined Town Centre and as such is a very sustainably located for new development. Opportunities within the proposed development allocation exist to reduce flood risk in the local area, improve the links to the river and to and from the town centre and improve green infrastructure provision. Above all, the site has significant potential in terms of the character of the surrounding area both in terms of the amenity of adjoining residential occupiers and the character of built fabric and its impact on the setting of the adjoining Conservation Area. However, the site is already very constrained in terms of a restricted curtilage and adjacent residential and commercial development which surround the site on 3 sides and the River Wey on its fourth side. It is recognised that the site has the potential to improve the setting of the Conservation Area through its redevelopment but there are currently no views through the site to or from the River, nor any public right of way through the site. To require such elements further limit the site’s potential redevelopment. Consequently, it is important not to further constrain the site by unduly reducing its redevelopment potential and therefore its viability and scope to facilitate the benefits set out above. The additional requirement for ‘Consideration of views in and out of the adjacent River Wey Conservation Area’ is currently not clear in what it is seeking and because it is important to have clarity and not to further limit the site’s potential for redevelopment, requirement c) should therefore be amended as...
Requirement c) Consideration of views towards the site from in and out of the adjacent River Wey Conservation Area.

In relation to the proposed amendments to the site’s opportunities:

(2) Potential facilitation of / contribution to Sustainable Movement Corridor having regard to the Sustainable Movement Corridor Supplementary Planning Document Support;

This opportunity would appear to relate to the safeguarding of land for the replacement of Yorkie’s Bridge as part of the Sustainable Movement Corridor Town Centre Phase 2 set out in Policy A10. The site is recognised as being in a very sustainable location which facilitates movement by pedestrians and cyclists. Proposals for a replacement bridge would therefore support the site’s existing sustainable credentials. The same statement goes for all other development and redevelopment in the vicinity and there is therefore concern that by highlighting a potential link between policies A9 and A10 as a specific opportunity, a disproportionate burden will be placed on the site’s redevelopment whereas other development allocations should also be factored in. It is therefore suggested that the following changes should be made to opportunity (2):

Opportunity (2) Potential facilitation of / contribution to Sustainable Movement Corridor with further enhancements set out in having regard to the Sustainable Movement Corridor Supplementary Planning Document Support. Accordingly, there is scope to relax the standard of on site car parking requirements which will in turn encourage and facilitate further car free modes of transport.

and

(5) Improve views from Walnut Tree Close to the River Wey and provide pedestrian access through the site to the towpath.

As with the concerns raised against the additional proposed requirements above, there is a need to avoid unduly constraining the site’s redevelopment potential and its ability to secure enhancements for the surrounding properties, occupiers, setting of the Conservation Area and built fabric of the vicinity generally. There are currently no views through the site to or from the River, nor any public right of way through the site. The site is already very constrained. As such it is not feasible to highlight the creation of such elements as a viable opportunity and this should therefore be amended to reflect reasonable opportunities as follows:

Opportunity (5) Enhance views from Walnut Tree Close to the setting of and views from the River Wey Conservation Area and provide pedestrian access through the site along the towpath facilitated by the site’s redevelopment.

Two further opportunities resulting from the site’s redevelopment should be included within the list of Opportunities such that it presents the potential for the provision of high quality, Grade A office accommodation and / or provision of a significant number of small residential units (up to 70no. 1 and 2 bedroom apartments) which would assist with the overall provision of more affordable accommodation for young people as well as the corresponding provision of affordable housing specifically, a longstanding issue acknowledged across both the Borough and HMA; and the enhancement of the urban fabric. Two further opportunities should be added as follows:

Opportunity (7) The provision of high quality, Grade A office accommodation facilitated by the site’s redevelopment.

Opportunity (8) The provision of small residential units which are more affordable for students and young people and the corresponding increase in affordable housing units specifically.

Finally, whilst support is given for the site outline identified in the plan attached to Policy A9 to include the gap between numbers 99 to 103 Walnut Tree Close for clarity this should be reflected in the policy heading:

Heading to Policy A9 and Policy Plan A9: Heading to be amended to read:

‘Land to the rear of 77 to 83 and between 99 to 103 Walnut Tree Close’

These objections are made on the basis of soundness as the policy will not be effective unless modifications are made as set out above.

Policy D4: Character and design of new development
The aspiration for high quality design as set out in the criteria at Policy D4 is generally supported. In particular criteria e) which seeks to ensure appropriate density to make the most efficient use of the land whilst responding to local character and context.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

A change to Policy A9 is requested to read:
“Policy A9 77 to 83 and 99 to 103 Walnut Tree Close, Guildford
The site is allocated for at least 3,870 sq.m of offices / research and development(B1a and b).
... - Contemporary A design approach, whilst respecting respects the proximity to the River Wey
...“
This is to reflect the existing development on site and the need to maximise efficient use of this very sustainable site and which respects the site’s context without being prescriptive in terms of the design approach.

Reference should also be made to the HBF representation which, as members, we fully support.

**Objective Assessed Housing Need**

The West Surrey SHMA 2015 concluded that there was an objectively assessed need for 13,860 dwellings (693dpa) in Guildford Borough. This conclusion was based on drawing together the following threads:
- The SHMA calculated an expected employment growth of 13,860 in the borough over the Plan period 2013-2033 giving rise to 693dpa;

This figure was then adjusted to include:
- Affordability pressures - Both across the HMA and in Guildford Borough itself, affordability has long been recognised as a critical issue. The level of households per year that are expected to require support to meet their housing needs and thus be eligible for affordable housing is significant at 455 households per year. A significant proportion of these are younger households. The SHMA responded to this level of need by seeking to improve affordability through adjusting the household formation rates to the 2001 level arising in a need of 668 dpa;
- Student growth - A higher than anticipated level of growth in the student population than previously assumed in the demographic analysis and taking into account planning assumptions that a greater proportion of students would live in households rather than university managed accommodation;

The Guildford Addendum Report, 2017 has been published to the West Surrey SHMA 2015 and has been used to inform the number of houses planned for over the lifetime of the Local Plan 2013 - 2033. The 2017 Addendum concludes that there is a need for 12,426 homes between 2015-2034 (654dpa), some 50 dpa less than the 2015 SHMA Report.

There would appear to be an over-reliance on economic factors affecting the housing requirement in a climate with much uncertainty with Brexit negotiations currently at an embryonic stage. The extent of the impact depends on international negotiations that are yet to take place and the government’s future policy response. This means that any estimates made will be subject to a high degree of uncertainty. The NAO Analysis Report July 2017 confirms that ‘Uncertainty will continue to remain for some time around the forms that trading relationships will eventually take after the UK leaves the EU’.

In the current climate where there is considerable uncertainty over the Brexit negotiations it is far too early to make assumptions about the implications they may have for the economy and particularly housing requirements. Accordingly, such elements as international migration should be set aside until such time as a greater degree of certainty as to the outcome is known.

It is therefore considered that the 2017 Guildford Addendum Report is premature in concluding a reduction in the objectively assessed housing needs of the borough and that these should revert to the 2015 West Surrey SHMA figures.

**Duty to Cooperate**

It is also of some concern that the 2017 Addendum covers only Guildford Borough and therefore looks at the Borough in isolation from the rest of the Strategic Housing Market Area (Waverley and Woking). This has been highlighted through discussions at the Waverley Examination at the end of June 2017. The generally agreed view there was that Waverley were being overly prescriptive in their application of landscape designations and that further housing provision could be accepted as a result. Conversely, Woking, which adopted its Core Strategy in 2012 for the period up to 2027, plans for a housing provision of just 292dpa as opposed to its objectively assessed need of 517dpa. Consequently there is a significant unmet need in Woking Borough which should be addressed across the HMA as a whole. Neither Waverley, nor Guildford appear to be taking the Duty to Cooperate very seriously in this respect, demonstrated by the 2017 SHMA Addendum considering the needs of Guildford Borough in isolation from the rest of the SHMA. As a result of the debate at the Waverley Examination, it is therefore highly likely that the Inspector will recommend that Waverley takes a significant proportion of the unmet need from Woking, leaving the remainder to be identified within Guildford Borough.

**Five year Supply of Housing Land**
The 2017 Addendum to the LAA sets out the five year housing requirements 2019 - 2024 and the identified supply. Applying the 20% buffer as a consequence of persistent under-delivery, there is a shortfall over the five year period of some 881 units. Planning for a shortfall in the five year housing land supply at the outset of the Plan period, cannot be considered to be effective and the Plan should be declared unsound.

**Soundness**

As a consequence, of the discussions above, objection is made to the Plan’s 'Spatial Vision’ and Policy S2: Borough-wide Strategy, which reduces the delivery of homes from 13,860 to 12,426 in the period up to 2034. The Plan is not considered to be either positively prepared or justified. Neither is it considered to be effective in terms of delivering sufficient new homes to meet the objectively assessed housing needs of the Borough. Accordingly the Plan is currently considered to be unsound and the following amendments are sought:

i) The delivery of housing should be reinstated to the level set out in the 2016 draft Plan;
ii) Greater flexibility should be given to the redevelopment potential of existing, sustainable, previously developed sites which could bring forward additional housing, making the most effective use of available sites.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

---

We are writing to object to Guildford Borough Council's proposed changes in Policy P2 Green Belt because they have not addressed many of the 32,000 comments made to the 2016 plan. We are extremely disappointed that the Council has failed to recognise Normandy's and Flexford's contribution to the "Openness" of the Green Belt and are proposing "Insetting" the two Settlements rather than leaving them "washed over" by Green Belt. "Insetting" will create small islands of "Urban" land in the Green Belt, which is irrational.

Therefore we object to the proposed change that Normandy Settlement, Flexford Settlement and Walden Cottages should be Inset from the Green Belt due to the fact that:

- There is evidence in past planning appeals APP/Y36 151W/I 5/3002308, APPfY36I5/A110/2140630 and APPfY3615I/AJI0/2131590 that the land here contributes to the "Openness" of the Green Belt.
- There is evidence in the Sustainabilitv Appraisal Para 10.4.7 that the Agricultural Land between the settlements is of BMV quality, exhibits "Openness" and contributes to the rural economy.
- The land in and around the Settlements of Normandy and Flexford contributes to views into and from the Surrey Hills AONB (Hog's Back).

Furthermore, Policy P2 fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it needs to be permanently protected. The Green Belt is intended to:

- Check the unrestricted sprawl of built-up areas.
- Prevent neighbouring towns from merging into one another.
- Safeguard the Countryside from encroachment.
- Preserve the setting and special character of historic towns.
- Assist with urban regeneration by encouraging the recycling of derelict and other urban land.
We additionally observe that Policy P2 unacceptably omits any assessment of the Green Belt's value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. We object to the statement in the Local Plan under Green Belt Policy P2 (4.3.13) which claims that Normandy, Flexford and a further list of 12 villages are "now Inset from the Green Belt". This statement is untrue as GBC is proposing to "Inset" these villages. No decision has been made by an Inspector, therefore the villages remain in the Green Belt.

In conclusion, the Council has provided no evidence of "Exceptional Circumstances" in the proposed submission documents, (as required by NPPF Para 89). This would be necessary if the Council were to remove any land from the Green Belt and to effectively redraw the Green Belt boundary. They cannot therefore legally proceed with Policy P2 as currently drafted. We trust that our comments will be considered carefully by GBC before the Local Plan is finalised.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to removal of brownfield sites A4 and A34. The council has not adopted a ‘brownfield first’ approach.

I therefore strongly object to all proposed development A34, A43, A58, A42 on the grounds that the area will be grossly overcrowded causing urban sprawl. The roads are already at maximum capacity. One small breakdown occurrence in area causes vast traffic jams. I also object to the fact that the Guildford Borough Council ignored the thousands of objections from the Send/Ripley area and instead increased the allocation of housing etc.

I object to lacking proper infrastruction planning for site A43 and A42. Forward to plan stated by Paul Spooner recognises ‘the signification infrastructure upgrades are required to support existing communities and planned overgrowth of the borough?. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure which is a key theme of our local plan. Development of sites A43 Garlicks Arch and A42 Clockbarn Nursery, Send would therefore be contrary to stated aims and items of the Plan and should not go ahead.

I therefore strongly object to all proposed development A34, A43, A58, A42 on the grounds that the area will be grossly overcrowded causing urban sprawl. The roads are already at maximum capacity. One small breakdown occurrence in area causes vast traffic jams. I also object to the fact that the Guildford Borough Council ignored the thousands of objections from the Send/Ripley area and instead increased the allocation of housing etc.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
I strongly object to Garlick’s Arch (A43) being extended. This will cause excessive urban sprawl. This site should not be removed from green belt – there are no excessive reasons for this.

I strongly object to the allocation of 6 Travelling Showpeople sites A34 Garlicks Arch. This site is for 400 homes and is therefore not compliant with the minimum of 500 stated in section 4.2.24 of the plan. A50 covers total need of 8 so there is no need for these on site A43.

I object to lacking proper infrastructure planning for site A43 and A42. Foreward to plan stated by Paul Spooner recognises ‘the signification infrastructure upgrades are required to support existing communities and planned overgrowth of the borough?’. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure which is a key theme of our local plan. Development of sites A43 Garlicks Arch and A42 Clockbarn Nursery, Send would therefore be contrary to stated aims and items of the Plan and should not go ahead.

I therefore strongly object to all proposed development A34, A43, A58, A42 on the grounds that the area will be grossly overcrowded causing urban sprawl. The roads are already at maximum capacity. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the very unfair balance of the Plan across the borough with the removal of site A46 from the plan (with proposed 1100 homes) and the reduction of housing planned in this version of the plan in other parts of the borough this PLAN has become even more biased against the North East of the borough. OF 11,350 homes proposed 4613 (40.6%) are within 3 miles of Send Marsh and Burnt Common and most area green belt This area will be even more overcrowded, grossly unfair.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object strongly. This clearly ignores the separation issue sited in previous plan between Gosden hill development and Send Marsh/Burnt Common. The area cannot take the extra traffic flow that will happen on already over congested roads.

I object strongly to proposal for Waste Management facilities in Green belt A58 Burnt Common. This [illegible word] not allowed for full and proper consultation

I therefore strongly object to all proposed development A34, A43, A58, A42 on the grounds that the area will be grossly overcrowded causing urban sprawl. The roads are already at maximum capacity. One small breakdown occurrence in area causes vast traffic jams. Guildford Town Centre Site Allocation A15 Land at Guildford Cathedral, Alresford Road.

We are concerned with new wording of requirements: point 4 on page 176; 'A holistic approach to the landscaping of the site to include no unacceptable impact on existing trees and mature hedges of significance'.

The word 'unacceptable ' is a vague term subject to interpretation, whereas the original wording: 'protect existing trees and mature hedges of significance is more precise.

Please also clarify the use of the words of 'significance' does this encompass not only the TPO's but also the Tithe hedge bounding the site? This hedge, and one other, both have continuous lengths of more than 20metres and have been in existence for 30 years or more,and so satisfies at least one of the criteria listed in part II of schedule 1 of the Hedgerow Regulations 1997.

The new vague wording should not replace the clearer existing ones, which instead should be strengthened and clarified.

Crucially, we believe the site should REMAIN designated as a protected open space with a small number of Cathedral houses. It is inappropriate to designate this particular site as C3 Housing.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

ALLOCATION A6

North St Retail Development. We have already stressed that retail development has a low GVA. A principal concern on this geographically-constrained site is difficult traffic access.

The amount of retail development proposed, some 39,000 sm, is close onto 40 % of current retail and far too great for an already constrained town centre. More specifically the retail forecast used is based on a Consultant’s report by Carter Jonas which has four basic flaws.

1. the retail data used is national data which ignores Guildford’s access problems.
2. internet shopping has had a huge growth in Guildford and many shops have closed.
3. the plan itself does not appear to take into account the existence of an already well established retail centre (The Guildford Society recognises this and urges the Council to assess the impact, which it does not appear explicitly to have done).
4. finally and most important this is a retail forecast for private development to the exclusion of other uses and assuming land is plentiful for all competing uses rather than constrained as it is in Guildford town centre.

Guildford, in our judgement, needs a much better balanced solution with housing and town centre employment playing a much larger part.

[these paragraphs should sit at the end of our A6 comments]

I hope this is self-explanatory

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the POLICY A42 changes in respect of Clockharn Nursery, Tannery Lane, Send, where it is now proposed to build 60 homes in place of 45 ... an increase of 33%, thus invading more Green Belt land. This will mean much more traffic along the already very narrow Tannery Lane and also make huge problems, traffic-wise, at its junction with the A247, Send Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to POLICY A581 the land at London Road, Burntcommon, where it is now proposed to use the whole triangle of Green Belt land between the A3, Clandon Road, A247, and the old dead leg of the former dual carriageway that used to be the A3 before the Ripley By-Pass was opened 41 years ago. This new proposal will now take up 10 hectares, rather than the relatively small area previously allocated, and will vastly increase traffic flows and problems in the Burntcommon area, which are already very bad, especially at peak hours. The additional industrial traffic generated by these proposals will make the problems even worse.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

- Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

- Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

- Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

1. The Street in Tongham
2. A331/A323 intersection
3. A31/White Lane junction
• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A42 change at Clockbarn in Tannery Lane. The sixty homes you are planning to build on that site are far too many. Sixty houses built there which will home sixty families will hugely exacerbate the problems that already exist in Tannery Lane and at the A247 junction. In addition to increased traffic problems, sixty homes built there will mean extra surface water which will lead to increased flooding in the area.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 at Burnt Common. It was deleted from the 2014 draft because of all the objections made previously but yet it seems to have been reinstated. I cannot believe that there is a need to build an industrial or warehouse development in the middle of greenbelt when Slyfield and Guildford have empty sites and industrial units. Again, the repercussions of all that extra traffic will cause complete gridlock in the mornings. These roads are usually heavily congested as it is, apart from a couple of months in the summer.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Firstly, I am very relieved to see the removal of sites A46 and A47 (however very disappointed that a private application has been submitted for this site and I will send a separate objection letter shortly about this).

I object to the Insetting proposed in Normandy and Flexford. What are the exceptional circumstances needed for removing this from the green belt? The openness of this area is very important to see and for our wildlife who need corridors of land to move freely in and not squeezed into small areas where they can’t flourish.

With regard to the Palm House Nurseries (A49) travellers site and Showmen of Whittles Drive (A50) I feel this should remain in the greenbelt and not ‘inset’ and they should not be given permanent status. In respect of Palm House nurseries the travellers set up illegally on that land and in my view should never have been given temporary status as it is going to be difficult to ever move them on.

My biggest worry is the 10,000 or so houses being built within a 10 mile radius of Normandy. Where is the new road infrastructure? I think this area will become gridlocked as it does every time there is an accident on the A3 or A31 in the Guildford area.

Blackwell Farm is a beautiful open site of Agricultural land as you leave Guildford to climb the Hogs Back it is an AONB. The thought of seeing this full of housing horrifies me. It will be the start of Guildford merging with Aldershot. This is prime agricultural land and should remain so in the green belt. It is the fault of the University that own this land that there is such a shortage of family homes in Guildford. Many have been bought up and made into bedsits for thousands of students which I have heard are 80% foreign. If the university had not become so large there would be more housing left in Guildford.

I attended a meeting in Normandy a couple of years ago were Matt Furness said GBC are proposing a tunnel like that at Hindhead for Guildford to help with the dreadful traffic problems on the A3. I don’t think you can begin to think about building on Blackwell Farm until such a tunnel is in place. What with The Royal Surrey Hospital with an A+E department so close to this site plus the Surrey Business Park. Traffic has improved since the new traffic light system has been in operation but if building goes ahead it will be chaos in that area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to policy A42 - to the original 45 homes and the increase to 60 homes, on the basis that it is in the Green-belt and is flood-plain: and that local roads including Tannery Lane and the A247 are too narrow and the latter already severely congested. As residents of over 50 years, we know this area is prone to flooding, but also that is an area of open space close to the Wey Navigation much used by walkers both local and those visiting the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to policy A58 - on the grounds that it is Green-belt land so development is not permitted. There is vacant industrial property in the region, so there is no need for further industrial space now or in the foreseeable future. We object to the change of wording to 'minimum to replace maximum' of 7000 sq m, as this is a deliberate act to open up our area to unlimited development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We therefore object to the local plan as it stands, on grounds that development encroaches into the Green-belt: that the Borough has failed to provide satisfactory evidence of need or exceptional circumstances for most of the development, and that the Plan fails to provide infrastructure improvement already needed without additional local development. We forcefully object to removal or 'inset' from the Green-belt of Send and other villages in the Borough, or any sections of land such as Send Business Park (Policy 2 at paragraph 4.3.15). This can only be done in exceptional circumstances, for which none exist. This practice is a deliberate act to erode the Green-belt by stealth and must not be allowed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Local Plan needs also to take into account the impact of leaving the EU, which at this stage is difficult to assess, although it may result in a reduction in the local population if some EU citizens return home. It should therefore be put on hold until this process is fully resolved in 2019.

In the meantime, development should be contained to already available town and brown-field sites, where it is lawful and appropriate. Councillors and other elected representatives at all levels need to look to the long term future, and take into account not just our area, but the overdeveloped south of England as a whole.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Land at Burnt Common Policy A58
I OBJECT to the new allocation of a minimum of 7000 sq in of Industrial or warehousing space on this site. (I note the change from the previous 'maximum' to 'minimum')
This is a massive over allocation of land in the Green Belt for B1c, B2 and B8 usage.
There are vacant sites and warehousing on existing industrial parks in Slyfield and Guildford.

This is a common sense decision, these are villages and not urban areas. These are Green Belt sites.
The infrastructure is totally inadequate to support increased development.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Infrastructure
The A323 at Normandy reaches traffic gridlock in the evenings towards Ash/Aldershot and heavy traffic towards Guildford in the mornings. This will be further exacerbated as the new developments in Ash continue. This brings pollution and stress to the villages which means Westwood Lane, Glaziers Lane and Wyke Avenue become 'rat runs.'

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy P2 Green Belt:
Removal from the Green Belt of homes in Guildford Road, northern end of Glaziers Lane, Flexford, Walden Cottages and Palm House Nurseries traveller site. I strongly disagree for these areas to be inset and lose the protection of the Green Belt status Green Belt is vital in the villages of Flexford, Normandy and Wyke to protect against urban sprawl and 'back yard development.' Planning Inspectors have stated on previous occasions that the villages of Normandy, Flexford and Wyke and their surrounding Green Belt are vital to prevent further encroachment of the countryside by urban sprawl, particularly from the north, east and west.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy H2: Affordable Homes
The Council will be aware that Planning Practice Guidance (Reference ID: 23b-031-20161116) states that:
"There are specific circumstances where contributions for affordable housing and tariff style planning obligations (section 106 planning obligations) should not be sought from small scale and self-build development. This follows the order of the Court of Appeal dated 13 May 2016, which give legal effect to the policy set out in the Written Ministerial Statement of 28 November 2014 and should be taken into account".

These circumstances include that: "Contributions should not be sought from developments of 10-units or less, and which have a maximum combined gross floorspace of no more than 1000sqm".

We acknowledge paragraph 4.2.40 of the proposed Local Plan that indicated a level of flexibility when it is demonstrated that the contribution would adversely impact the sites viability. To ensure that Policy H2 is deliverable, it is our view that this wording should be included within the text of the policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Policy P2: Green Belt
Policy P2, along with the policy map and site allocations, establishes the principle of the need to remove land from the Green Belt and identifies appropriate locations to do so. The NPPF states that:
"When drawing up or reviewing Green Belt boundaries LPAs should take account of the need to promote sustainable patterns of development. They should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary" (para. 84). The NPPF goes on to say that LPAs should: "satisfy themselves that Green Belt boundaries will not need to be altered at the end of the development plan period" and "define boundaries clearly, using physical features that are readily recognisable and likely to be permanent" (para. 85).

The Council has acknowledged that development in and around Guildford's largest towns will not provide the land needed to meet its OAN. It has been demonstrated through the recent Inquiry on Howard of Effingham and Lodge Farm that the Green Belt in Effingham is out of date. The Green Belt has not been reviewed since 1987. The Green Belt Study commissioned from expert consultants for the purpose of informing the Local Plan identifies that Lodge Farm could be developed without significantly compromising the purposes of the Green Belt. We maintain our view that the Effingham Sites (Site Allocation 69) was an appropriate Green Belt release and continues to be supported by the Council's evidence.
base. We do not believe that the additional information produced by the Council since the Draft Local Plan (2014) justifies the removal of the Effingham Sites (Site Allocation 69). We regard the revised approach to allocations as inconsistent and not justified against reasonable alternatives.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1322  Respondent: 17372865 / Berkeley (David Gilchrist)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2 sets out the council's approach to meeting its Objectively Assessed Needs (OAN) as required by the NPPF (paragraphs 14 and 47).

The Proposed Submission Local Plan has pushed the plan period back from 2013-2033 to 2015-2034. Given the Borough's significant under-delivery since 2011, despite an increased overall target, the current approach means Guildford is very likely to see fewer homes delivered by 2033 than is required or was previously planned for.

The phasing of development in the Proposed Submission Local Plan 'backloads' the housing target. The overall housing target is equivalent to 654 dwellings per year, but the Council is not planning to deliver that many homes in any year until 2026/27. It is already generating a significant backlog of housing need with only 388 homes delivered in the last full year for which data is available (2015/16).

The proposed approach does not plan to meet OAN in any reasonable timescale, will add to the Council's backlog, and in practice will delay required development. On that basis, we do not believe it is positively prepared or effective.

The Council will also be aware that from November 2017, authorities that deliver below 85% of the borough's OAN will be expected to plan for an addition 20% buffer on their 5 year plan.

Delivery of below 65% from November 2020 the presumption in favour of sustainable development in the National Planning Policy Framework would automatically apply (Housing White Paper 2017).

As the Council is aware, the Government sets a very high priority on the delivery of new homes and associated infrastructure, and the failure of the Council to produce an effective strategy to do this means the Proposed Submission Local Plan is not consistent with national policy.

Sufficient, deliverable sites need to be identified to meet this increasing need for housing land, particularly in the east of the Borough, where capacity has been released due to the grant of permission for SANG land at Long Reach.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
REPRESENTATIONS TO GUILDFORD BOROUGH COUNCIL'S PROPOSED SUBMISSION LOCAL PLAN JUNE 2017

Berkeley Homes has been working alongside Howard of Effingham School for a number of years to deliver much needed housing and a new school to the area. These sites were allocated for development in the Draft Local Plan 2014 but refused planning permission by Guildford Borough Council in March 2016. Consequently, an appeal was lodged against this decision and a public inquiry was held in May 2017. The suitability of the sites has been demonstrated through the inquiry and accordingly, we believe the sites should be included in the Guildford Local Plan as Site's Allocated for Development - for the provision of a replacement Howard of Effingham School and up to 295 residential dwellings.

Following the recent appeal decision on land at Long Reach for the provision of a Suitable Alternative Natural Greenspace (SANG), Guildford has the opportunity to release housing sites in that part of the District and allocating the Howard of Effingham / Lodge Farm site would assist in delivering homes in this part of the District, including the provision of much needed affordable housing.

You will be aware that the Local Plan will be tested by the Inspector against the four tests of soundness (National Planning Policy Framework (NPPF) para 182), namely that it is positively prepared, justified, effective and consistent with National Policy. We set out below why we are of the view that the Proposed Submission Local Plan does not meet these tests in relation to the Spatial Strategy (Policy S2), Affordable Homes (Policy H2), the Green Belt (Policy P2), and Infrastructure Delivery (Policy ID1).

Conclusion
As a whole, the Proposed Submission Local Plan June 2017 is greatly flawed. The currently proposed phasing of housing and spatial strategy will not deliver Guildford's Objectively Assessed Needs within a reasonable timeframe, if at all. The recently granted SANG at Long Reach also releases housing capacity in this part of the Borough and accordingly, the District wide allocations should be reviewed as a whole to ensure appropriate distribution. The previous Draft Local Plan (2014), substantially based on the same evidence, allocated Howard of Effingham School, Effingham Lodge Farm and Brown's Field (Site Allocation 69) to provide homes and a bigger school. This allocation has been removed but remains an appropriate, deliverable and sustainable means of meeting the Borough's need for new infrastructure and homes. We will continue to seek to work with Guildford Borough Council and Effingham Parish Council to bring forward the delivery of the Effingham sites and are happy to discuss the above points further.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I especially object to the former sites A46 and A47 being taken out of the Green Belt despite the housing allocations from these sites being removed. This is incomprehensible when the high sensitivity of these sites is part of the reasons for removing the allocations!

I object that the Policies Map – an important document – is of a scale that makes the detail impossible to distinguish. One of the sites I am most concerned about – the former A47 land – is completely covered by its label. Large swathes of green belt cover would also appear to be missing from the map.

The NPPF states ‘the essential characteristics of Green Belts are their openness and their permanence’ (NPPF). Past verdicts of planning inspectors have declared that Normandy/Flexford green fields (A46) contribute to the ‘openness’ of the Green Belt and a panoramic view of green fields to the Surrey Hills AONB – and indeed recent assessments are that this area along the south of the Hog’s Back is of sufficient quality to itself be included with the AONB due to its contribution to views. It is hugely important that this be considered before removing its protection and permanently losing the character of the area that make it outstanding in a national context.

Paragraph 4.3.12 states that “only those villages whose open character makes an important contribution to the Green Belt should be included in the Green Belt”. I contend that the land in both A46 and A47 makes an unparalleled contribution to the Green Belt which stretches from Guildford in the east to Ash/Tongham in the west. If this area is inset and built upon in the manner proposed it will be the beginning of urban sprawl across this stretch of countryside which Green Belt policy was designed to prevent. The Government have indicated that Green Belt is supposed to be protected, but GBC are trying to justify development in this area where they themselves designated it as having a 'Red' status under their system for quantifying sensitivity (red being the most sensitive and least likely to be developed).

GBC have ignored the other existing value of A46 and A47 in removing the Green Belt protection. This land is high grade farmland and also includes several Sites of Nature Conservation Importance. All policies on biodiversity are been ignored when proposing to inset these areas. The proposals are contrary to the NPPF’s requirements on biodiversity and the natural environment. In section 11 headed “Conserving and enhancing the natural environment”, it is stated that planning policy should protect and enhance valued landscapes and minimise impacts on biodiversity, providing net gains in biodiversity wherever possible to halt the overall decline in biodiversity, by promoting “the preservation, restoration and re-creation of priority habitats, ecological networks and the protection and recovery of priority species populations…..”. GBC is failing to do this in several ways in relation to A46 and A47 with no clear justification or evidence given as to why this is the case. It seems that no consideration has been given to the value of the existing SNCIs, the wider network of hedges and trees and the fact that all this is within one of Surrey’s Biodiversity Opportunity Areas – despite Policy 14 seeking to promote exactly these qualities. I object that Guildford has not given biodiversity the full consideration legally required, in breach not only of these policies but their statutory duty under the NERC Act 2006.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object that the Policies Map – an important document – is of a scale that makes the detail impossible to distinguish. One of the sites I am most concerned about – the former A47 land – is completely covered by its label. Large swathes of green belt cover would also appear to be missing from the map.
- The NPPF states ‘the essential characteristics of Green Belts are their openness and their permanence’ (NPPF). Past verdicts of planning inspectors have declared that Normandy/Flexford green fields (A46) contribute to the ‘openness’ of the Green Belt and a panoramic view of green fields to the Surrey Hills AONB – and indeed recent assessments are that this area along the south of the Hog’s Back is of sufficient quality to itself be included with the AONB due to its contribution to views. It is hugely important that this be considered before removing its protection and permanently losing the character of the area that make it outstanding in a national context.
- Paragraph 4.3.12 states that “only those villages whose open character makes an important contribution to the Green Belt should be included in the Green Belt”. I contend that the land in both A46 and A47 makes an unparalleled contribution to the Green Belt which stretches from Guildford in the east to Ash/Tongham in the west. If this area is inset and built upon in the manner proposed it will be the beginning of urban sprawl across this stretch of countryside which Green Belt policy was designed to prevent. All policies on biodiversity ave been ignored when proposing to inset these areas. The proposals are contrary to the NPPF’s requirements on biodiversity and the natural environment. In section 11 headed “Conserving and enhancing the natural environment”, it is stated that planning policy should protect and enhance valued landscapes and minimise impacts on biodiversity, providing net gains in biodiversity wherever possible to halt the overall decline in biodiversity, by promoting “the preservation, restoration and re-creation of priority habitats, ecological networks and the protection and recovery of priority species populations ……”. GBC is failing to do this in several ways in relation to A46 and A47 with no clear justification or evidence given as to why this is the case. It seems that no consideration has been given to the value of the existing SNCIs, the wider network of hedges and trees and the fact that all this is within one of Surrey’s Biodiversity Opportunity Areas – despite Policy 14 seeking to promote exactly these qualities. I object that Guildford has not given biodiversity the full consideration legally required, in breach not only of these policies but their statutory duty under the NERC Act 2006.
- I object to insetting and making permanent the traveller site at A49. A50 should not be inset. Normandy already has a disproportionate number of sites.

In summary, I object to the inset of Flexford settlement, Normandy settlement, Walden Cottages and the traveller sites A49 and A50, question whether there is any justification for the green belt boundaries around Normandy and Flexford to be changed from the existing and request that the insetting be removed from the new plan, particularly for former sites A46 and A47.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to the changes to policy P2. They do not appear to have taken into account thousands of comments made during the 2016 consultation and are at odds with national and local policies and the evidence base for this plan process.
- I object to the changes made to the settlement boundaries in Normandy and Flexford, insetting these areas from the Green Belt. No argument of very special circumstances has been advanced for consideration – those mentioned in 4.3.18 would not justify any change in Normandy and Flexford. The impression given in paragraph 4.3.13 is that this has already happened rather than being a proposal; this is misleading and may cause people not to realise the proposed change.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

This is a consultation response to the Proposed Submission Local Plan dated June 2017, mainly in relation to the Normandy and Flexford area where I am a resident. I am by profession an environmental consultant specialising in advising local authorities on matters of ecology, open space and planning. I am a former local government Assistant Director in these areas.

I support the removal of policies / sites A46 and A47 and am pleased that the Council has recognised the multi-faceted reasoning for this.

I however strongly object to several other aspects of the plan relating to Normandy, Flexford, the Hogs Back, general changes to the green belt boundary and how the plan interprets / fails to interpret parts of the evidence base. I believe these elements mean the plan remains unsound.

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

ID4 POLICY ID4: Green and blue infrastructure

As previously stated, Sport England considers that the policy is not supported by a sufficiently robust and up to date assessment of needs for sport and recreation. This should be in the form of a Playing Pitch Strategy (PPS) and a built or sports facilities strategy for the borough in accordance with Sport England’s guidance. Sport England does not consider that the council’s open space, sport and recreation assessment based on the out-of-date PPG17 – planning for open space, sport and recreation is adequate and addresses the sport and recreational needs for the borough.

Furthermore, Sport England opposes the addition of the following paragraph:

4.6.49a National planning policy requires great weight to be given to the need to create, expand or alter schools to meet the needs of existing and proposed communities. This will be taken into consideration if development is proposed on open space and the development meets a legitimate educational need that is appropriately met on the site. National planning policy requires great weight to be given to the need to create, expand or alter schools to meet the needs of existing and proposed communities. This will be taken into consideration if development is proposed on open space and the development meets a legitimate educational need that is appropriately met on the site.

Sport England is concerned that this weakens protection of existing sports facilities and playing field land and is inconsistent with Sport England’s planning objectives and para 74 of the NPPF which seek to protect existing sports facilities and playing field land against loss from development.

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to removal of Brownfield sites (A4) from the Plan Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2936  Respondent: 17373505 / Paul Beach  Agent:
I object to the Policy A42 change at Clockbarn Nursery in Tannery Lane for the following reasons:

1. There has been an increase in proposed building of houses from 45 to 60 – this is ridiculously too many for our area.
2. This totally ignores hundreds of previous objections by local residents.
3. Access to Tannery Lane at the A247 junction is not viable for the amount of traffic that will be incurred.
4. Tannery Lane itself if not capable of being used by large or numerous vehicles – it is a Lane.
5. This will be eroding even more of the Green Belt.
6. There is already bad surface water flooding in this area. This can only increase the problem.
7. This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

I object to the lack of proper infrastructure planning for sites (A43 and A42) The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan".

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlick’s Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2934  Respondent: 17373505 / Paul Beach  Agent: Paul Spooner
I object to the Policy A43, land at Garlick’s Arch, Send Marsh for the following reasons:

1. This totally ignores hundreds of previous objections by local residents.
2. There are no ‘exceptional circumstances’ as required by the National Planning Policy to take this area out of the Green Belt.
3. This will remove ancient woodland which cannot ever by regained.
4. Ripley and Send villages will merge, therefore defeating the purpose of the Green Belt.
5. The number of homes proposed is excessive. Send is a village. This is over-development to the extreme.
6. The area is subject to frequent flooding and is currently a Flood Zone 2 allocation.
7. The excessive traffic that will be generated will totally cause mayhem on the Send and Ripley roads. Already whenever there is a road closure nearby or traffic accident (almost a daily occurrence on the A3/M25) in the vicinity – the main Ripley, Send Marsh and Send roads are ridiculously congested or at a total standstill.
8. There is no proven demand for Travelling Show people sites in this location. This development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.
9. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Policy A58, land at Burnt Common, London Road for the following reasons:

1. This was deleted from the 2014 draft plan because of all the objections previously made – therefore why has it been included again?
2. There has been a decline in demand for industrial land since the previous draft plant but the 2016 version uses the word ‘maximum’ a change from ‘minimum’ within it – this does not make sense.
3. There are already empty sites and units at Slyfield and Guildford and therefore no need to build new industrial and warehouse developments in our area. I can only envisage these will end up being empty too.
4. The 2017 Employment Land Need Assessment shows a reduction in demand for industrial land for the whole borough to 3.9 hectares. This policy is a huge allocation of 10 hectares for Send alone. Totally unacceptable.
5. The small roads around this area are already often at gridlock. This can only make the problem worse.
6. The merging of existing villages (which will occur) defeats the purpose of the Green Belt.

I object to the proposal for a Waste Management Facility in Green Belt (A58) The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned in policy 4.423a and does not allow for full and proper consultation. This is unacceptable

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object removing Send Business Park from the Green Belt (4.3.15)

Send Business Park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s removal from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for the following reasons:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the overcrowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.
1. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
2. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
3. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
4. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”.
5. Opportunity (3) should be common to all sites and is not unique to this site.
6. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
7. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
8. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
9. I object to the removal of additional 3.1 ha from the green belt without any justification.
10. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
11. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
12. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
13. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
14. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
15. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
16. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
17. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
18. I object to the extension of the plan period by 1 year as it has not been identified as a major change.
19. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
20. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
21. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
22. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
23. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been
criticised by Mouchel for using out of date modelling software and is therefore unreliable.
24. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle
movements from this site with no justification.
25. I object to the housing number and particularly the fact that the Council have not, as required used any
constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc.
26. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the
damage caused by nitrogen deposition and high pollution levels.
27. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of
12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of
a number of glaring examples of why the plan is not sound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The increase to 60 homes in place of 45 homes is **33% more** and too much
- It ignores all the **hundreds of previous objections** made by local people
- It will worsen access and traffic problems in Tannery Lane and at the A247 junction
- It will make erosion of the Green Belt in our village worse
- It will make surface water flooding, which is already bad, even worse
- It will impact open countryside views from the River Wey Navigation
- It will worsen traffic congestion in the local area which is already busy and often sees heavy traffic during and after peak hours, even when the major roads have cleared.
- There is no infrastructure, (schools, roads, shops, etc.), in place or proposed, to support the increased demand that will result from this development.
- It will increase the risk posed to cyclist using Tannery Lane and the surrounding roads. There is no proposal to improve cyclist's safety on these narrow country roads that will see an increase in motor vehicle traffic. This is of particular concern to me as I transport my children to and from nursery, by bicycle, along these roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth I
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley
- There is not currently sufficient infrastructure, roads and schools, to support the proposed increase in demand that will be placed upon the area with the proposed plans.
- The additional traffic will cause a significant increase in rush hour traffic trying to gain access to the A3, which already queues through the villages of Ripley and Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/1215  Respondent: 17380865 / Crownhall Estates (Sir or madam)  Agent: Turley (David Murray Cox)

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H1: HOMES FOR ALL
Criterion 1 of the draft Policy requires new residential development to deliver a wide choice of homes to meet a range of accommodation needs as set out in the latest SHMA. Crownhall Estates consider that this aspect of the Policy should not be applied in a manner which requires the SHMA housing mix to be replicated on each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
POLICY P2: GREEN BELT

Crownhall Estates note that housing delivery within Guildford Borough is already highly restrained by the fact that a large part of the Borough is designated as being within the Green Belt. However it is noted (as demonstrated by paragraph 4.3.17 of the Proposed Submission Local Plan and the associated maps) that a large part of the Borough (currently designated as Countryside Beyond the Green Belt) is proposed to be designated as Green Belt.

These representations raise the following concerns regarding the Council’s intention to designate large parts of the Borough (currently designated as Countryside Beyond the Green Belt) as Green Belt:

• The process of assessing sites and the availability of land on the basis of the intention that it be designated as Green Belt;
• The implications of designating the additional land as being within the Green Belt on housing delivery during and beyond the Plan period;
• The implications of designating the additional land as Green to the delivery of sustainable development;
• Whether these areas (in particular the Land north of Poyle Road, Tongham) should be designated as Green Belt;

The process of assessing sites and the availability of land on the basis of the intention that it be designated as Green Belt.

The Council propose to amend Green Belt boundaries within the Borough through the emerging Local Plan. Within their proposals, they plan to designate the Land north of Poyle Road, Tongham (currently Countryside Beyond the Green Belt) as part of the Green Belt. In line with the NPPF, paragraph 83, the Council are required to demonstrate that exceptional circumstances exist in order to make said amendments to the Green Belt. These circumstances are given as a high level of need for housing and “the lack of sufficient suitable and deliverable sites located outside the Green Belt”. We find it incomprehensible that the Council considers the high level of housing need to represent an exceptional circumstance which justifies designating large parts of the Borough (currently designated as Countryside Beyond the Green Belt) as Green Belt.

As these representations explain, the conclusion that there is a ‘lack of sufficient suitable and deliverable sites located outside the Green Belt’ is a self-fulfilling prophecy arising from the decision not to assess sites further due to the intention that they be designated as Green Belt.

The Council’s approach is further undermined on the basis that sites within the Green Belt are proposed to be released, yet sites outside the Green Belt were discounted from further assessment on the basis of the Council’s intention to designate them as Green Belt.

The implications of designating the additional land as being within the Green Belt on housing delivery during and beyond the Plan period:

The Council’s proposal to designate large parts of the Borough (currently designated as Countryside Beyond the Green Belt) as Green Belt raises three particular concerns regarding housing delivery (notwithstanding the issue of whether or not they should be designated as such for Green Belt purposes):

• As it explains above the Council’s approach represents an artificially constrained view of land availability within Guildford Borough; the Council had not followed such an approach we consider that it would be reasonable to conclude that additional sites could be identified helping to meet the objectively assessed need for housing, particularly in the early part of the Plan period;
• Paragraph 83 of the NPPF states that once established, Green Belt boundaries should only be altered in exceptional circumstances through the preparation or review of the Local Plan. Paragraph 83 of the NPPF continues by stating that “At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period on the basis that the Council has not been able to identify sufficient sites within existing urban areas or outside of the Green Belt to achieve...
homing required to 2034, it is highly unlikely that a forthcoming review of the Local Plan will be able to. In that circumstance, it is highly unlikely that a forthcoming review of the Green Belt boundaries will be required. On that basis, the proposed alterations to the Green Belt are highly unlikely to endure beyond the Plan period.

- There has been a track record of housing shortfall in the Borough, with the Council’s evidence showing 2.36 years supply of deliverable housing sites. As the NPPF sets out, very special circumstances must be demonstrated as part of a planning application if “inappropriate” development (as defined in the NPPF) in the Green Belt is to be allowed. The Secretary of State’s decision of 21 April 2017 in an appeal (PINS ref: APP/M1520/A/14/2216062) concerning land in Castle Point Borough highlights the issues of housing development proposed in the Green Belt. In that case, the Secretary of State concluded that the housing supply position was closer to the appellant’s proposition of 0.4 years. Designating large parts of the Borough (currently designated as Countryside Beyond the Green Belt) Green Belt would therefore provide no flexibility and very limited opportunities to help resolve a housing land supply shortfall at some point in the future. The implications of this are reinforced by paragraph 4.1.4 of the Proposed Submission Local Plan.

Within the Housing Topic Paper (June 2017), the Council states that:

- “To not amend boundaries (Green Belt), would lead to a significant undersupply of homes compared to the identified needs – approximately half”

Crownhall Estates consider that the proposal to designate additional land, namely that north of Poyle Road, Tongham as Green Belt, would compound the issue of land supply throughout and beyond the plan period.

Despite the Council’s claim that every effort has been made to investigate sustainable sites for housing delivery, they have clearly overlooked sites where development could be achieved, such as our Client’s site. This is clearly demonstrated by the decision not to assess the site given the proposal to designate the site as Green Belt which we consider to be fundamentally flawed. Within the LAA (2016), the Land north of Poyle Road, Tongham was not assessed as a possible allocation due to suitability issues related to the proposed Green Belt designation of this land and for no other reason. However, under the adopted Guildford Borough Local Plan (2003), the Land north of Poyle Road, Tongham is designated as Countryside Beyond the Green Belt (CBGB).

There is now clearly an identified need to bring such land forward for development to meet the housing needs of the Borough and provide an opportunity to meet unmet needs arising from within the wider Housing Market Area.

Whether these areas (in particular the land north of Poyle Road, Tongham) should be designated as Green Belt

Paragraphs 79 and 80 of the NPPF set out the five purposes of the Green Belt as well as the fundamental aim of ensuring their openness and permanence.

Paragraph 80 of the NPPF states that the Green Belt serves five purposes as shown below:

- To check the unrestricted sprawl of large built-up areas;
- To prevent neighbouring towns merging into one another;
- To assist in safeguarding the countryside from encroachment;
- To preserve the setting and special character of historic towns; and
- To assist in urban regeneration, by encouraging the recycling of derelict and other urban areas.

The Proposed Submission Local Plan, and the proposed strategy for amending Green Belt boundaries, has been informed by various volumes of the Green Belt and Countryside Study conducted by Pegasus on behalf of the Council between 2013 and 2014.

A sensitivity map (dated March 2014, see below) produced as part of the Green Belt and Countryside Study was used as a starting point to inform proposed site allocations within the Proposed Submission Local Plan. The Land north of Poyle Road, Tongham falls within the Land north of Poyle Road, Tongham (circled in blue in Figure 1 below). This sensitivity assessment map shows that the K5 site is considered to be of ‘high sensitivity’ to Green Belt.

Figure 1: Sensitivity Assessment Map – Green Belt and Countryside Study)

There appear to be inconsistencies within the methodology of the Green Belt and Countryside Study. In Volume II of the Green Belt and Countryside Study (2013) the K5 site (that covers the Land north of Poyle Road, Tongham) is assessed against four Green Belt purposes, as guided by the NPPF and receives an overall score of 2 out 4. This overall score deems that K5 contributes less significantly to the purposes of the Green Belt than many of the other parcels assessed. Yet on the sensitivity map above (Figure 1 of these representations), the K5 parcel (circled in blue) is marked as ‘high sensitivity’ to Green Belt. The Housing Topic paper (2017) directly refers to this sensitivity map stating that land parcels marked as high sensitivity to the Green Belt scored either 3/4 or 4/4 within the Green Belt Study detailed above.
inconsistency within the methodology is particularly concerning as this study has formed part of the evidence base used within the updated Regulation 19 Local Plan (2017) and therefore the proposal to designate the area within the Green Belt.

Although the study finds the K5 parcel to have ‘less significance’ to the Green Belt, under the four stages of review the land is deemed suitable for Green Belt designation. However, the assessment also states that “the decision on whether to extend the Green Belt into land parcel K5 will also be informed by the likely levels of future development, and whether the land may be more appropriately designated as ‘safeguarded’, as defined within para 85 of NPPF”. If the Council is to designate land as Green Belt this must ensure the permanence of the boundaries, in line with paragraph 83 of the NPPF. If the Council deems the K5 parcel (including Land north of Poyle Road, Tongham) to be suitable for Green Belt designation would, under this emerging Local Plan, require that exceptional circumstances be demonstrated . It is evident that the Council is unable to ‘satisfy themselves that Green Belt boundaries will not need to be altered at the end of the development plan period’, in line with paragraph 83 of the NPPF.

The land parcel K5 assessed within the study covers the entire distance of the gap between the Tongham settlement area and Ash Green. The K5 parcel was deemed to serve two of four Green Belt purposes. Our client’s site forms only part of the K5 area (highlighted in yellow, within the K5 parcel outlined in red in Figure 2).

Figure 2: Land Parcel K5, Green Belt and Countryside Study
The Land north of Poyle Road, Tongham should be reviewed, as a singular parcel of land, for its contribution to the two Green Belt purposes the council have identified K5 to serve. The following table sets out the assessment of the area as contained in the Green Belt and Countryside Study alongside our comments as to how the site functions in isolation.

In summary of the assessment above, when reviewed independently the Land north of Poyle Road, Tongham does not achieve any of the purposes of the Green Belt.

We also note that the area of Suitable Alternative Natural Greenspace (SANG) approved under application reference 12/P/01973 lies immediately to the land north of Poyle Road, Tongham. This SANG will ensure the maintenance of an area between Ash/Tongham and Ash Green which therefore checks the unrestricted sprawl of settlements.

Paragraph 85 of the NPPF requires that when defining Green Belt boundaries, local planning authorities should (inter alia):

• Ensure consistency with the Local Plan strategy for meeting identified requirements for sustainable development;
• Not include land which it is unnecessary to keep permanently open; and
• Satisfy themselves that Green Belt boundaries will not need to be altered at the end of the development plan period;

As these representations establish, designating the land north of Poyle Road, Tongham would not fulfil the requirements in the three points above. Tongham occupies an elevated position in the settlement hierarchy and the designation of Green Belt as proposed would severely restrict opportunities for sustainable patterns of development. It is unnecessary for the land north of Poyle Road, Tongham to be kept permanently open. Even if it were developed, there would remain an area of separation between Tongham and Ash Green (partly due to the SANG to the north and partly due to a remaining area of countryside). Furthermore, as these representations explain, if this area is to be defined as Green Belt, the Council cannot be satisfied that it will not need to alter the Green Belt boundaries at the end of the Plan period (or as part of a review of the Local Plan).

We note that in the Waverley Local Plan Part 1 Examination, the Inspector was asked to consider the identification of new areas of Green Belt at Cranleigh and Farnham in order to ‘protect’ these settlements. We understand that the Inspector rejected that approach.

In addition to concerns regarding the Green Belt Assessment methodology and the judgements taken forward to the Proposed Submission Local Plan, it would appear that the Council have solely considered whether the assessed parcels of land fulfil the Green Belt purposes rather than consider the need to deliver sustainable patterns of development, as required by paragraph 84 of the NPPF.

The Guildford Borough Settlement Hierarchy (May 2014) forms part of the evidence base that has informed the Guildford Borough Proposed Submission Local Plan (Regulation 19), with the purpose of promoting sustainable development.

Although Guildford Town Centre, Guildford Urban Area and the Ash and Tongham Urban Area are ranked as the three most sustainable settlements and the main areas for development, this does not appear to be reflected in the distribution of development, namely to Tongham.
Guildford Borough Council must ensure that it has sufficiently assessed sites for housing delivery on the edge of such settlements, particularly in locations which are in the Countryside Beyond the Green Belt and which provide the opportunity to deliver sustainable patterns of development.

We consider that the Land north of Poyle Road, Tongham provides such an opportunity.

The settlement hierarchy and the Sustainability appraisal identify the sustainable location of the Ash and Tongham Urban Area. The development of the Land north of Poyle Road, Tongham would form an extension to the Tongham Urban Area, a sustainable location and subject to the determination of alive planning application (GBC ref: 17/P/01315) could be considered suitable for ‘development now’.

In light of the five year housing land supply of 2.36 years, the sustainable nature of Tongham and the Land north of Poyle Road, Tongham and its poor performance against the Green Belt purposes it would seem unlikely that exceptional circumstances exist to designate the site as Green Belt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S1: PRESUMPTION IN FAVOUR OF SUSTAINABLE DEVELOPMENT

Whilst the inclusion of Policy S1 relating to the presumption in favour of sustainable development within the Proposed Submission Local Plan is supported, the ability of this Policy to operate as intended is questionable. As these representations highlight, the Proposed Submission Local Plan seeks to designate land currently designated as Countryside Beyond the Green Belt as being within the Green Belt. Consistent with the text of paragraph 14 of the NPPF, criterion 3(b) of Policy S1 states that permission will be granted unless (inter alia) specific policies in the Framework indicate that development should be restricted. Footnote 9 of the NPPF provides sets out policies, including Green Belt, which restrict development.

If the whole of the Borough (other than settlements and allocations and a small area to the west of Ash and Tongham) is to be within the Green Belt then this severely restricts the opportunities to apply the presumption in favour of sustainable development. This is reinforced by paragraph 4.1.4 of the Proposed Submission Local Plan which states: “In accordance with the NPPF, the presumption will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.” (Our emphasis)

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S2 PLANNING FOR THE BOROUGH – OUR SPATIAL DEVELOPMENT STRATEGY

These representations raise the following concerns with regards to Policy S2:
• The identified housing needs of Guildford Borough;
• The provision of housing for the unmet needs of neighbouring authorities;
• The phasing of development as set out in the Annual Housing Target table;

The identified housing needs of Guildford Borough

The current consultation version of the Local Plan proposes a new plan period of 2015 to 2034 and a reduced housing requirement of 12,426 (654 dwellings per annum). This represents a reduction of 1,434 dwellings compared to the previous consultation version of the Local Plan.

The West Surrey Strategic Housing Market Assessment was published in September 2015 and covered the authorities of Guildford, Waverley and Woking. This identified an annual requirement of 693 dwellings in Guildford, with 519 and 517 dwellings per annum for Waverley and Woking respectively. Clearly therefore the Council’s now proposed housing requirement falls short of the OAN for the Borough as established in the 2015 SHMA.

The Council have subsequently commissioned an Addendum Report to the SHMA (March 2017) in relation to Guildford Borough in isolation. The Addendum Report identifies an OAN for the Borough of 654 dwellings per annum and it is on the basis of this figure that the Local Plan has been prepared.

It is notable that West Oxfordshire District Council has recently sought to take a similar approach in its Local Plan Examination. The District Council independently prepared an update to the Oxfordshire SHMA on its OAN in isolation and sought to proceed on the basis of the reduced figure contained therein. This approach was not accepted by the Inspector as being sound and resulted in a lengthy suspension to the Examination to allow the Council sufficient time to undertake the necessary work to address meeting the higher OAN figure advocated in the County wide SHMA. Although the Examination has now resumed, this has resulted in over a twelve month delay in the process.

As such, given the recent experience of West Oxfordshire, it is considered that the Council’s current approach represents a significant risk to the soundness of the Plan.

Paragraph 2.4 of the SHMA addendum notes that there are significant affordability issues in the HMA. In this regard we note that the evidence indicates that these affordability issues are worsening (the 2017 addendum indicates that the affordable housing need has risen from 517 dpa to 552 dpa). We understand that the Council has retained the approach to applying an affordability uplift in the 2017 addendum that was used in the 2015 SHMA. Furthermore, we understand that this limits the uplift to one related to an adjustment to the household formation rates of younger households. We understand that this results in a 9% upward adjustment to the ‘starting point’ household projection. Given the existing and worsening affordability issues in the Borough, we consider that it is unreasonable to limit this uplift to 9%. In fact, we note that in the adjoining borough of Waverley, the Local Plan Part I Inspector has applied an uplift of 25%.

The 2017 addendum to the SHMA indicates that due to changing economic circumstances the Borough’s housing need should be reduced from 693 dpa to 654 dpa. Whilst economic factors are an important consideration it is important that these are considered at a wider scale than an individual local authority level, as had been done under the previous SHMA but is not the case in the recent addendum. In addition it is noted that the demographic baseline and affordability issues
suggest an increase in OAN. As such it is considered the 2017 addendum to the SHMA is an inappropriate basis on which to Plan.

The provision of housing for the unmet needs of neighbouring authorities

At this stage, given the Council is failing to meet its own full OAN as calculated in the 2015 SHMA, the Council is also making no provision to meet the unmet needs of any adjoining authorities within the same Housing Market Area (for example Waverley and Woking Boroughs).

We understand that Woking Borough is continuing to plan on the basis of its Core Strategy requirement (292 dwellings per annum to 2027, in comparison to the OAN identified in the West Surrey SHMA 2015 of 517 dwellings per annum between 2013 - 2033) (therefore 225 dwellings fewer). The Waverley Local Plan Part 1 was originally prepared on the basis of meeting an OAN of 519 dwellings per annum; the Inspector’s consideration during the Examination has revealed that provision should be made for an OAN of at least 590 dwellings per annum. Furthermore, we understand the Waverley Local Plan Part 1 Inspector has concluded that provision should be made for a proportion of Woking’s unmet need within Waverley and Guildford Boroughs and that the Inspector settled on a figure of 83 dwellings per annum as being equivalent to half of Woking’s unmet need.

It is essential that consideration is given to how the unmet needs of Woking are to be provided for. A failure to make provision for this level of housing development would result in a shortfall of 225 dwellings per annum.

In addition, we consider that the Guildford Borough Local Plan should be prepared on the basis helping to provide for other authorities should the need arise. The Council’s proposal to designate a large part of the Borough as Green Belt further restricts the ability to cater for unmet housing needs arising from within the HMA.

The phasing of development as set out in the Annual Housing Target table

We note from the Annual Housing Target table contained within Policy S2 of the Guildford Borough Proposed Submission Local Plan that the housing requirement is to vary annually from 450 dwellings per annum upon adoption, rising to 850 homes per annum at the end of the Plan period. Paragraph 4.1.9a of the Proposed Submission Local Plan seeks to justify this approach on the basis of the likely rate of delivery, particularly on the strategic greenfield sites. In addition paragraph 4.1.9b of the Proposed Submission Local Plan explains that this “phased approach is necessary in order to ensure that the Council is able to demonstrate a rolling five-year supply of housing from the date of adoption, as required by national policy.” Notwithstanding our specific concerns about this table (set out below), the Council’s approach to phasing raises a number of concerns.

The effect of the Council’s approach in this regard results in a situation where there is likely to be a shortfall in delivery of 204 dwellings per annum in the period from 2019 when compared to the objectively assessed need highlighted in the SHMA. This will lead to a situation whereby those in need of housing, in particular affordable housing, may not be able to access accommodation in the Borough until later in the Plan period. In such circumstance a proportion of the population may therefore be forced to find accommodation elsewhere and this approach could result in a situation which undermines aspirations for job and economic growth within the Borough as a result of a lack of available workforce for example. We are also concerned that the Council’s phased approach seeks higher delivery rates later in the plan period. Given that the emerging Local Plan is predicated on a number of large sites, there is a significant risk that if these do not come forward at the rate envisaged then there will be less time available to remedy any shortfalls.

The Housing Topic Paper (which accompanies the emerging Local Plan) acknowledges that housing delivery is a major issue for the Borough. However, paragraph 47 of the NPPF requires Local Planning Authorities to ‘boost significantly the supply of housing’ and the National Planning Practice Guidance states that they must ‘deal with undersupply within the first five years of the plan period where possible’. Guildford Borough Council has deemed this to not be possible within the Borough. The Council identifies that there will be an overall unmet need of 3,150 homes in the period (2013/2014 – 2026/2027). Far from dealing with an undersupply in the first five years of the Plan period, the Council’s approach seeks to delay the delivery of a significant proportion of the housing requirement. Consequentially this raises concerns over whether any accrued shortfalls can be resolved.

If the Council considers that housing delivery is a major issue within the Borough, then a greater range, scale and type of sites should be identified in order to aid delivery rates. Furthermore the paper identifies housing delivery within the first
five years of the emerging Local Plan period as another major issue. The paper states that a significant shortfall in sustainable sites remains, when taking account of the deficit accrued since 2015 and the 20% buffer; the buffer applied as a result of the persistent under delivery of housing in line with Paragraph 47 of the NPPF. The Council states that this will be resolved in the later periods of the Local Plan, in line with expected infrastructure delivery and through the development of strategic sites.

We do not consider that paragraphs 4.1.9a and 4.1.9b or the Housing Topic Paper justifies the Council’s phased approach to the delivery of housing during the Plan period. This is particularly the case because the assessment of sites has been constrained by the Council’s intention to designate large parts of the Borough (currently designated as Countryside Beyond the Green Belt) as Green Belt. This represents an artificial view of land availability in the Borough and predetermines conclusions as to the ability of the housing requirement to be met. We consider that if the Council had not adopted such a stance then it likely that additional opportunities would have been identified for housing development, including within the early part of the Plan period when the Council perceives there to be difficulties in delivering sufficient housing to meet the OAN.

The Land Availability Assessment June 2017 Addendum details the Council’s most up to date housing land supply position. The five year housing land supply position for 2016/2017 (which covers the monitoring period 1st April to 31st March 2018) is said to be 2.36 years based on the Council’s evidence, demonstrating a significant and severe deficit in housing supply. We consider that this position demonstrates the clear need to ensure that all available opportunities to identify sites to help meet the housing requirements in the Borough (including unmet needs arising within the wider Housing Market Area if necessary) are considered. The approach (explained in the previous paragraph) which arbitrarily restricts the availability of sites is fundamentally flawed.

Paragraph 4.1.9a of the Proposed Submission Local Plan states that the figures in the Annual Housing Target table (contained in Policy S2) “sum to a total of 12,426 dwellings.” We calculate that the figures sum to a total of 9,810 dwellings. It appears as though the figure of 12,426 is achieved then the period covered by the Annual Housing Target table should be expanded to cover the four years from 2015/16 to 2019/20. It is not clear why that part of the Plan period has been excluded from the table.

We note that paragraph 4.1.9a of the Proposed Submission Local Plan states: “This [the figure of 12,426] is lower than the total supply of homes identified in the Land Availability Assessment as having potential to be delivered over the plan period. This buffer builds flexibility into the plan and demonstrates that our strategy is capable of delivering the target.”

We consider that the Proposed Submission Local Plan does not include this flexibility despite the claim at paragraph 4.1.9a. The proposal to allocate additional land as Green Belt results in a situation whereby the presumption in favour of sustainable development is unlikely to apply to much of the Borough (by virtue of paragraph 4.1.4 of the Proposed Submission Local Plan and footnote 9 of the NPPF).

Within the Land Availability Assessment (2016), the Land north of Poyle Road, Tongham is identified as under the heading ‘Discounted Sites’ (under the reference 79), due to ‘suitability concerns regarding the proposal to designate the land as Green Belt as part of the new Local Plan development’. The Land Availability Assessment (2016) does not identify any other reasons why the site is unsuitable for development. It is unclear why the site has not been assessed for its suitability for housing development despite it not being designated as Green Belt at present. As these representations demonstrate, that approach results in an artificially constrained view of land availability and predetermines the position as to the availability of potential sites for housing delivery within the Borough.

There are various considerations that need to be addressed in regards to the Proposed Submission Local Plan and the level of unmet housing need, in particular the Council’s inability to demonstrate a five year housing supply and the strategy for delivering housing within the Proposed Submission Local Plan. In particular, with the five year supply shortage and an expected shortfall of sites within the early years of the Local Plan, the Council’s housing supply position can only be expected to worsen. Furthermore the Council’s reliance on strategic sites, in the latter half of the plan period could lead to longer term shortfalls or delays in housing supply if those sites fail to deliver at the rate expected. The housing supply shortfall and the Council’s reliance on large sites (delivering at the end of the Plan period) reinforces our view that the Council should seek to utilise a greater range of sites and in particular should not look to restrict development by designating large parts of the Borough (currently designated as Countryside Beyond the Green Belt) as Green Belt.
SUMMARY AND CONCLUSIONS

These representations set out key concerns regarding the Proposed Submission Local Plan. These key concerns relate to the delivery of housing to meet needs within Guildford Borough (and unmet needs from other authorities) during the plan period, the proposed phasing of development and the Council’s intention to designate large parts of the Borough (currently designated as Countryside Beyond the Green Belt) as Green Belt. Since the designation of land as Green Belt has significant implications for the operation of the presumption in favour of sustainable development, this intention has the potential to significantly restrict the delivery of housing during the plan period. Moreover, due to the requirement of the NPPF that Green Belt boundaries should endure beyond the Plan period, the Council’s intention is likely to restrict the ability of the area to accommodate housing development in the future, particularly since this land relates to areas at sustainable settlements such as Tongham.

The Council’s intention to designate the land to the north of Poyle Road, Tongham as Green Belt is flawed. This land does not contribute to the Green Belt purposes defined in the NPPF and reduces the capacity of a sustainable settlement to accommodate development. The Council’s approach of assessing sites on the basis that they are proposed to be designated as being within the Green Belt is fundamentally flawed and represents an artificially constrained view of housing land availability within the Borough. The flawed nature of this approach is highlighted by the fact that the Council is seeking to restrict the housing requirement earlier in the Plan period.

We consider that the land north of Poyle Road, Tongham which is the subject of a live application for up to 150 residential dwellings (GBC ref 17/P/01315) represents a sustainable location for development, adjacent to a sustainable settlement as defined by the Council’s own hierarchy. In addition this land is not subject to environmental restrictions in the adopted Local Plan which indicate that development cannot be accommodated. The site is not subject to any environmental or landscape designations and is not within the Green Belt. Although the land is proposed to be designated as Green Belt, the site does not perform the purposes of Green Belt as defined by the NPPF.

We consider that the concerns outlined in these representations result in the Proposed Submission Local Plan being unsound when assessed against paragraph 182 of the NPPF which requires a Plan to be positively prepared; justified; effective; and consistent with national policy.

In this case, the Proposed Submission Local Plan is unsound because:

• It is not positively prepared. No provision has been made for the unmet housing needs of other authorities and the Council’s approach to the Green Belt provides little opportunity to do so and little opportunity to resolve the existing housing supply shortfall. No provision has been made for the unmet housing needs of other authorities and the Council’s approach to the designation of additional Green Belt land provides no flexibility to do so. In addition, the Plan does not provide a situation whereby development can be accommodated by virtue of the presumption in favour of sustainable development as a result of the decision to designate additional land (at sustainable locations) as Green Belt and is of particular concern given the housing supply position in the Borough.

• It is not justified. The plan is not the most appropriate strategy when considered against the reasonable alternatives. The evidence does not support the identification of the Land north of Poyle Road, Tongham as being within the Green Belt. The decision to discount sites from further assessment due to the Council’s intention that they be designated as Green Belt is fundamentally flawed and represents an artificially constrained view of housing and land availability within the Borough.

• It is not effective. The Plan is not deliverable over the Plan period since it artificially restricts the availability of land within the Borough and results in a situation where the presumption in favour of sustainable development is unlikely to apply to much of the Borough.

• It is not consistent with national policy. The Local Plan does not meet the OAN and does not provide for the unmet needs of adjoining authorities and other areas. The Local Plan is also not prepared on the basis of planning for sustainable patterns of development and The intention to designate land, such as the land north of Poyle Road, Tongham is inconsistent with national policy as the land does not serve the Green Belt purposes. Moreover the Council’s approach to the designation of additional areas of Green Belt results in a situation where the permanence of the Green Belt cannot be maintained.
We can confirm that we intend to attend the Examination in order to address the matters contained in these representations.
We trust that these representations are useful and would be grateful for confirmation that they have been received and registered as being duly made.

I object to the Policy A42 change at Clockbarn in Tannery Lane. The plan to build sixty homes is unacceptable. This is a 33% increase of the original amount of building on that site instead of a reduction of 33% which would at least be more realistic. Sixty houses would be far too many. Traffic problems in Tannery Lane would naturally increase and the risk of flooding would increase further.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy 2 at paragraph 4.3.15. Send Business Park should not be inset from greenbelt land. It is in a beautiful quiet rural lane in an area of outstanding natural beauty which is why we all have chosen to live and work here. There is highly restricted vehicular access along Tannery Lane in both directions as it is. This is, and should remain an area of outstanding beautiful countryside adjacent to the Wey Navigation.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The West Horsley issues I object to are as follows:

- The council is not choosing to constrain its housing growth in Green Belt areas and the proposed developments still represent a large number of dwellings on Green Belt space, which was established to prevent urban sprawl not facilitate it. The continued submissions of the Local plan squarely fail to meet any of the infrastructure issues and relies on inaccurate information and excessive erosion of Green Belt land.

- I question the Council’s predictions for Guildford’s level of growth which is 25% more than the Office of National Statistics prediction for the area by 2034. Surely it is an error to base a plan on figures that differ so markedly from national forecasts and flawed evidence must not be relied upon to justify the inflated predictions.

- Nothing has been proposed since last years Consultation to improve sustainability of the West Horsley development sites and therefore meet the National policy requirements. The road network is already over used, in poor state, is prone to flooding in poor weather. The train station carparks are already full up at rush hour. The primary and secondary schools in the area have both applied for expansion to meet existing needs and these have been rejected. I therefore do not understand how an infrastructure that is over subscribed already can fit the further demand expected of 400 new homes in the area. The same applies for the Doctors surgery which is at capacity.

- I object to no changes being proposed since the 2016 consultation to insetting West Horsley from the Green Belt and welcome the reduction in the number of new homes being proposed, but the Local Plan does not go far enough to maintain Green Belt land.

- The number of proposed dwellings will fundamentally change the character of the village, yet Guildford town centre and brownfield sites appropriate for dwellings are being overlooked in preference for further retail space when many published studies show online retailing is growing at the expense of the high street.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the Three Farms Meadows site proposal because:

- There are severe constraints with the A3 and M25, one of the most congested areas of road at one of the busiest motorway junctions in the country.

- Local road networks cannot sustain a development of that size with roads prone to flooding in poor weather, buses and lorries in Horsley do not have enough room to pass cars without them stopping or in too many instances, mounting the pavement.

- There is not enough employment opportunities on the site for a development of that size which will only lead to more cars and commuters adding to the severe congestion, because of this it is inappropriate to assume that the local roads will be fine for cycles instead. The roads are poorly lit, not big enough, in poor repair so cyclists who do use them often have to cycle further from the kerb for their own safety than the Highway Code recommends

- The proposed removal of over 3 hectares of Green Belt has been included without justification

- The significant modifications made to the plan mean that it should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

- The evidence base especially the West Surrey SHMA and the Guildford addendum 2017 has been challenged by other experts including NMSS.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the Three Farms Meadows site proposal because:

- There are severe constraints with the A3 and M25, one of the most congested areas of road at one of the busiest motorway junctions in the country.

- Local road networks cannot sustain a development of that size with roads prone to flooding in poor weather, buses and lorries in Horsley do not have enough room to pass cars without them stopping or in too many instances, mounting the pavement.

- There is not enough employment opportunities on the site for a development of that size which will only lead to more cars and commuters adding to the severe congestion, because of this it is inappropriate to assume that the local roads will be fine for cycles instead. The roads are poorly lit, not big enough, in poor repair so cyclists who do use them often have to cycle further from the kerb for their own safety than the Highway Code recommends

- The proposed removal of over 3 hectares of Green Belt has been included without justification

- The significant modifications made to the plan mean that it should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

- The evidence base especially the West Surrey SHMA and the Guildford addendum 2017 has been challenged by other experts including NMSS.
The eastern side of the Borough is now scheduled to take an even greater proportion of new homes in the Green Belt. It is totally unacceptable that Guildford is choosing not to constrain its overall housing growth, as many other Councils have done to protect Green Belt. The objectively assessed housing target, though reduced since 2016 to 12,466 homes, will by 2034 (the end of the Plan Period) mean that Guildford has grown by nearly 25%. This is nearly double the Office for National Statistics prediction for the growth of Guildford.

Nothing has been put forward since last year's Consultation to improve the sustainability of the West Horsley development sites and thus meet National policy requirements. Every home on the West Horsley sites will need a minimum of one car to enable residents to get to shops, medical centre, library and Horsley Station, regardless of how much pressure is applied to adopt cycling and walking as the preferred means of travel.

The reduction in the number of new homes proposed in the Green Belt after the 2016 Consultation, is welcomed (90 in West Horsley, 1100 in Normandy and Flexford) but this still does not go far enough in reducing the still very large number of new dwellings proposed on Green Belt.

I also object that no changes have been included in the current draft Local Plan despite the strong adverse response to the 2016 Consultation regarding GBC's proposals that East Horsley and West Horsley should be inset from the Green Belt.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
I am particularly worried by the idea that a central bus-station could be dispensed with altogether - just having stops on streets. I object to this.

Infrastructure - Dl
Current infrastructure does not meet current needs so it is very worrying to see so much development being planned running ahead of the infrastructure. I object to this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Land for Employment Use - E1, E2
Too much potential development land within the town centre is allocated for retail or commercial development instead of for housing. I object to this. It is not logical. It is against national trends and will serve to make the shortage of affordable housing and the appalling traffic and movement problems worse. The Burnt Common site is not suited to heavy industry and it is in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The Green Belt - P2, P3, E5 and specific sites  
The changes do not show responsiveness to the weight of public opinion which is heavily against weakening these policies. I object to this. No attempt is made to demonstrate exceptional circumstances feeding in to the proposed figures quoted. Also, the Rural Economic Strategy covered in 4.51 a has as a main aim promoting affordable homes everywhere in the countryside - including in AONB. It could work as a mechanism to produce overdevelopment in the countryside. I object to this and it should be subjected to full public consultation. The three major strategic sites of Blackwell Farm, Wisley Airfield and Gosden Hill Farm are in the Green Belt. I object to them still being put forward. Previous consultations show that in line with the NPPF the public prefer the use of brownfield land in the urban area first for housing.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The new requirements set out in para. 9 of the infrastucture section for site A35 show how inadequate and unsuitable this site is and highlight the basic flaws in this proposal. Its proximity to the Thames Basin Heaths Special Protection Area and its scale will in reality be environmentally damaging despite the placebo of a SANG. The residents of such a site will all need at least one car per household, they will very largely have to commute to work and the proposals for alternative transport are not realistic. The proposals for local shops, school and medical centre will not materialise until late in the project and will no doubt be subject to the uncertain availability of funds at that time.. In the meantime the development will place an unacceptable burden on the already stretched infrastructure of surrounding communities. In particular it is highly questionable whether the proposed bus service will prove economically viable and it will in any case be unsuitable for the narrow local roads. There is nothing sustainable about this proposal and it continues to be folly to build such a car dependent site next to two already overloaded main roads, the M25 and the A3 whose problems are acknowledged elsewhere in the plan (para 2.14a)

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I object to the fact that no changes have been made to the proposals to inset East and West Horsley from the Green Belt since the 2016 Consultation.

I object to the proposal to move the boundary of East Horsley’s area of residential settlement south of the A246. This proposal has not been justified and appears arbitrary. This area abuts the Surrey Hills AONB and raises the prospect of inappropriate development in this sensitive area.

I object to the fact that though new paragraph 2.10b places emphasis on the need for adequate infrastructure to be in place this has not been applied to East or West Horsley. Though the dropping of sites A36 and A41 is welcome the proposals still mean an extra 255 new houses for West Horsley, an increase of some 25%. There are no proposals for any improvements or additions to an infrastructure which is already stretched with waiting lists at all levels for the local primary school, substantial waiting times for appointments at the local medical centre and parking at Horsley railway station at its limit on normal working days. I therefore object to the proposals for sites A37, A38, A39 and A40.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I object to the policy of insetting villages and removing site A35 from the Metropolitan Green Belt and in particular the imbalance of proposed development which results in proportionately more damage being done to the Green Belt in the North East of the borough. This is the area crucial to the purpose of the Metropolitan Green Belt in containing the spread of London. The retention of site A35 as a strategic site despite its low sustainability rating while dropping site A46 at Normandy exacerbates this imbalance and I object to it as an error of judgement.

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I object to the housing need statistics on which the plan is based as unsound. The projection for new houses over the plan period amounts to an increase of over 20% yet the Office for National Statistics (ONS) projection is for a population growth of some 10%, why is there this discrepancy? The ONS projection was based on trends before the Brexit vote and on present indications there is a high risk that Brexit will result in the growth of both the economy and population becoming negative. The plan has not been adjusted for this possibility and with the likelihood that there will be a shortage of both private and public funds for investment in development and infrastructure proceeding with the present plan looks unjustified and unwise.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I completely oppose the increase in number of houses proposed for development, from 1200 to 1750. How can this area cope with all these homes? This will certainly push Ash Green into the ATUA and contradict entirely Policy P3 of the countryside. For this reason Requirement 6 that looks at protecting the historic location of Ash Green is not good enough and needs to be as follows....

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

I also feel that Requirement 8 does not give enough protection to Ash Manor. These collection of buildings are Grade 2 listed, once part of a historical farmstead and is steeped in history. I'm aware that the council aim to protect and enhance historical and heritage sites. The history of this site may not be widely known but there is a lot of information on this old farmstead kept in the Library of Winchester College. It's history is fully documented. I urge the council to respect and protect Ash Manor's history and amend it's draft requirements as follows....

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."
With regards to requirement 9, of the proposed bridge at Ash Station to deal with increase in traffic from potential new builds of the A29 policy, this must be in place before any development goes ahead. Otherwise there will be poor and inadequate infrastructure in place and thus the area would be unable to cope.

Requirement 9 does not take into account Tonghams’ The Street, A331/A323 intersection and A31/White Lane Junction as these roads will not cope with the even higher increase of traffic that would come from A29 development.

I would like to reiterate my strong beliefs and concerns of the Local Draft Plan. The area of Ash Green drafted into the ATUA is Ash Green and NOT Ash. We are the people that live here and for many years. We can say first hand what it is like in this rural area and we will see it slowly being destroyed. Please don't split us in half and dissolve our rural community into an urban area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have lived in Ash Green all my life. I live in Ash Green Road and it is part of Ash Green. This area is rural. I live opposite the fields to Ash Manor and the road I live on is rural. In the late summer our road is busy with tractors and agricultural vehicles from the nearby farm harvesting their crop.

This part of Ash Green I live in is not part of the Ash and Tongham Urban Area (ATUA) and so the boundary should not extend south of Ash Green Road and Foreman Road.

For this reason could section 4.3.29 be amended to...

"Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham Urban area has grown considerably in size and now forms Guildford Borough’s second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development".
Please amend section 4.3.30 to.....

"We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green."

Please amend Policy P3 to read...

"does not lead to greater physical or visual coalescence between the Ash and Tongham urban area. Ash Green and Aldershot."

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to removing Send Business Park from the Green Belt (4.3.15):

Send Business Park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for its insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF, can be claimed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the increase in housing proposed in Tannery Lane (site A42):

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the hiding of development by ‘deferment’ (A24, A25, A26, A43):

This version of the Plan has concealed some development planned to take place by ‘deferring’ it beyond the period covered by the Local Plan. This has two effects:

1. to hide the number of houses actually being built (A24, A25, A26 – total of 1,100 deferred, but still being built), and
2. to give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the extended development in the Green Belt (Policy P2, Site A43):

I object to Garlicks Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of six Travelling Showpeople sites in A34 Garlicks Arch:

The allocation of six Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the unfair imbalance of the Plan across the borough:

With the removal of site A46 from the Plan (with its proposed 1,100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough, the Plan has become even more biased against the North East of the borough. Guildford Borough is an area of more than 100 square miles. Of the11,350 homes proposed in the Plan, 40.6 per cent (4,613) are within three miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlicks Arch to be included.

I object to the proposal for a Waste Management Facility in Green Belt (A58):

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the change in policy on affordable homes (Policy 4.2.23):

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”. The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t have to provide any ‘affordable’ homes - just make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [ie a reason for not delivering affordable houses]. That has now been removed, thereby implying that needing to make greater than normal profit is to be an acceptable reason not to deliver affordable homes. This is shocking.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly support the withdrawal of Policies A46 and A47 from the Local Plan, which will help to preserve the hugely valuable ‘openness’ of the settlements included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A50

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am concerned that huge extensions to settlement boundaries are being proposed in many villages, as well as infilling outside of settlement boundaries in a further 11 villages. I object on both counts.

I strongly object to the proposed ‘insetting’ of the settlements at Normandy, Flexford and Walden Cottages, as well as of the Travelling Show-people site at Whittles Drive (Policy/Site A50) and of the Traveller site at Palm House Nurseries (Policy/Site A49). These sites contribute to the openness of the Green Belt (as evidenced in past planning appeals APP/Y3615/W/15/3002308, APP/Y3615/A/10/2140630 and APP/Y3615/A/10/2131590). Furthermore, as per paragraph 10.7.7 of the Sustainability Assessment the agricultural land between these settlements demonstrates ‘openness’ and makes an important contribution to the rural economy. In addition, land in and around the Flexford and Normandy settlements helps maintain views into and from the Surrey Hills Area of Outstanding Natural Beauty at the Hog’s Back.

I also object to the statement under Green Belt Policy P2 (4.3.13) claiming that Flexford, Normandy, and a list of 12 further villages are “now inset from the Green Belt”. This statement is untrue – GBC is proposing that these settlements are inset but a decision has not yet been made by an Inspector, and therefore these villages rightly remain in the Green Belt.

Policies P2, P3 and E5 and sites fail to demonstrate the exceptional circumstances required to develop Green Belt land. Despite the strength of public opinion against a weakening of this policy, 70% of new housing development will be in the countryside, of which, 58% will be in Greenbelt. This is clearly not an exception and no effort is made to demonstrate the previously mentioned exceptional circumstances in line with NPPF requirements.

At a general level, I object to the failure of Policy P2 to appreciate the importance and permanence of the Metropolitan Green Belt, and the need to protect is permanently. The Green Belt is critical to safeguarding our countryside and green spaces, limiting urban sprawl, and preventing towns from merging. It also encourages the recycling of derelict and other brown field urban sites, helping to assist with urban regeneration. It must be protected and I do not believe Policy P2 adequately reflects this. It also fails to include any assessment of the value of the Green Belt, which is rich in natural and social capital.

Finally, I object to proposals in Policies P1 and E5 weakening protections for AONB which fail to restrict non-major development. This fails to strengthen and in fact weakens protections offered to AONB it is crucial we maintain, and is contrary to the huge weight of public opinion expressed in previous consultations, and the protections made in the NPPF to AONB.

Firstly I would like to stress, as a resident of Ash Green, we are in Ash Green. I have lived here for over 40 years and never known boundaries to change, or the community you live in segregated.

I can see on the map of the Local Plan draft there is a blue line that cuts Ash Green in half. The council need to take into account the importance of the countryside and our rural homesteads. They need to be protected or they will be lost forever. I would like to finish this letter with a final comment. The whole of this community feel very strongly about Ash Greens rural identity and feel extremely under threat from mass development. We are a close nit community with different groups and social activities that we attend. We care about where we live and would hope for support as a rural community from the Guildford Borough council.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3111  Respondent: 17392609 / Joyce Chandler  Agent:

My next comments and objections are in relation to Policy A29. Looking at the first section of the policy, you have increased the already large amount of houses to be built in the area stated. This will completely push the ATUA into our rural area and as I have mentioned before this must be kept separated. You cannot destroy any remaining rural communities or countryside as this will be lost. Ash Green as a rural community must be protected.

You only need to look at an aerial map that views Ash and Ash Green and compare how hugely built up and compact Ash is in contrast to Ash Green which is rural homes, trees and fields. In between Ash and Ash Green you have Ash Manor which has a lot of history.

I totally appreciate the need for new homes and accept that there will be development in our community, but not on large scales and not on inappropriate land. Ash Manor (historically part of Ash Green) is not suitable as it is a group of grade 2 listed buildings surrounded by fields. Building on theses fields as marked out in pink on A29 will destroy it's historical standing and heritage. A28 is more appropriate.

Please amend wording Requirements 6 and 8 to give Ash Greens historical location and rural character more protection, protect the historical Ash Manor and prevent Ash Green from being dissolved into urban Ash.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We are writing in SUPPORT to the removal of sites A46 and A47 from the GBC Local Plan 2017.

Our key points in support of the removal of these 2 sites are:

1. Inability of the infrastructure to cope with the development of this magnitude (roads, wastewater, sewage, flooding, electricity supply and healthcare) and the fact that this is Green Belt land. We object to the removal of Green Belt as it could enable development within this area at a much higher density as this area contributes to the “openness of the Green Belt.”

2. In our 11 years of living at number 28 The Paddocks, we have seen on many occasions the pond (a Roman pond of Special Scientific Interest) on the property of Little Flexford, burst its banks and flooding in bad weather. Also the rear field of the proposed development site and to the east of The Paddocks again floods during bad weather, making its own substantial pond.

If the proposals do not cater for the flooding, the result will be that part, if not all, of the proposed development will flood and / or the excess water will drain into the pond at Little Flexford.

This will not only potentially flood the property known as Little Flexford, but the surrounding properties as well, as this is the lowest point in the area.

With climate change (global warming) becoming such a concern and issue, as consistently pointed out in the media, it surely must be essential and necessary that any new and/or existing homes are not subjected to flooding due to any new development on the land east to The Paddocks.

3. Employment within Normandy. There is an extremely serious lack of employment within Normandy village itself. Small companies don’t have a large workforce – a workforce that drives to Normandy to work for a small company. All medium to large sized companies are based in Guildford, a 6 mile drive, bus ride or train ride.

4. Disproportionate and unsustainable development

5. 100% increase in the number of homes in Normandy that will rip the rural heart our of this village and destroy our rural environment

6. Unsubstantiated claims that this will lead to an improvement in services for existing residents
7. Unconstrained annual house building in Guildford, surrounding local authorities apply constraints to their annual housing number due to their Green Belt, while ours is concreted over

8. The erosion of our green belt and the extinguishing of rural Normandy and Flexford

9. The hamlets of Normandy and Flexford merged into one conurbation with no open spaces in between

10. All this completely developer-led, without any respect for the principles of town and country planning.

11. The destruction of our rural environment.

12. Changing green fields into one large urban sprawl.

13. Adding to creeping suburbanisation of the local area.

14. Destruction of our hedgerows and grasslands, causing the devastation and alarming decline in our bird and bee populations.

15. Loss of valuable pasture and arable farmland; in the last 6 to 7 years the UK has lost over 2000 square kilometres of valuable agricultural land to developers.

16. Urbanisation threatening the rare birds of the Thames Basin Heaths only 1 km away from the proposed development.

17. Urban lighting next to Ancient Woodland, light pollution starkly visible from Surrey Hills AONB.

18. Traffic chaos as indicated by the Surrey County Council traffic simulations.

19. Rushmoor expansion generating huge volumes of commuter journeys from outside the borough through our roads.

20. Compounding traffic congestion in the surrounding road and communities.

21. Vast numbers of homes boxed in by a single lane railway bridge, the junctions on the A323 at Glaziers Lane and Westwood Lane.

22. Increasing traffic from homes proposed

23. Our local roads and “A” routes grinding to a halt at peak times with massively increased exhaust pollution of NoX and CO2 threatening the health of our older people and children.

24. Protect the “open” character of Flexford and Normandy.

25. Ignoring past verdicts of planning inspectors that our green fields contribute to the “openness” of the Green Belt.

26. Reduction of environmental damage and a more sustainable future.

27. We need homes to be built on brownfield sites first, more homes to be built in Guildford Town, close to the station and central services. More redundant energy hungry offices in Guildford to be turned into homes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? (No), is Sound? (No), is Legally Compliant? (No)

Answer (if comment is on questions 1-7 of the questionnaire): ()

Executive Summary

This set of representations are made on behalf of Countryside Properties PLC to Guildford Borough Council’s (GBC) Proposed Submission Local Plan: Strategy and Sites (June 2017). The representations are made in response to the Council’s decision to exclude Land South of New Pond Road Farncombe (Land Availability Assessment Ref: 2241) as a residential allocation in the Regulation 19 Proposed Submission Local Plan. The site was previously identified as part of a residential allocation (number 80) within the 2014 Draft Local Plan.

Our representations address the following key matters

• The lack of any justification for the Council seeking to reduce the length of the Plan period.
• Worsening affordability issues in Guildford Borough together with a failure to make and appropriate uplift to the OAN to take account of the very high affordable housing requirement that has been identified, and in-migration from London.
• The Council’s very poor 5 year Housing Land Supply and recent housing completions record.
• The urgent need to boost Guildford’s housing supply by bringing forward sites lacking in serious constraints.
• The complete absence of any commitment or strategy to help address and tackle unmet need within the wider Housing Market Area, in particular, with regard to Woking, being a failure under the Duty to Co-operate.
• There being an undue focus in the Local Plan upon very low Annual Housing Targets set in the early years of the Plan period solely to ensure that the Council maintains a 5 Year Land Supply. This being at the expense of significantly boosting the housing supply and tackling its Objectively Assessed Need (OAN). Particularly given that the stated target figures fail to meet the Council’s identified overall housing target figure.
• As a consequence of the Draft Plan placing a very heavy over-reliance on development at the back end of the Plan period, it is not considered to be in accordance with the national policy guidance.
• The valuable contribution that our client’s site at New Pond Road, Farncombe can make to boosting the Council’s 5 Year Land Supply is discussed.

Representations on Policy S2: Borough Wide Strategy

Introduction

1. These representations are submitted on behalf of our client CountrysideProperties (PLC) and relate to the Guildford Borough Proposed Submission Local Plan Strategies and Sites document (June 2017) and supplement our earlier comments with regard to the June 2016 consultation. These earlier representations contain a suite of detailed evidence which includes the following documents:

   • JBPA Promotional Brochure;
   • Barton Willmore Landscape & Visual Appraisal;
   • Barton Willmore Site Comparison Study;
   • JBPA Site Comparison Study;
   • Cgms Archaeological Desk Based Assessment;
   • Cgms Heritage Statement;
   • Amazi Flood Risk Assessment;
   • PJC Extended Phase 1 Habitat Survey;
   • RGP Transport Statement Technical Note; and
   • Rural Solutions Sustainability Appraisal.

2. Representations were also previously submitted at the Regulation 18 stage in November 2013 in relation to the Guildford Borough Local Plan Strategy and Sites Issues and Options document and in September 2014 at the Draft Plan stage.
3. We comment in these representations on the following matters:

- The inappropriateness of a reduced housing requirement figure;
- Inadequate Annual Housing Targets;
- A failure to address urgent affordability and lack of housing supply pressures;
- The lack of justification for the reduction in the proposed length of the Plan period;
- The unacceptability of back-loading housing provision to the end of the Plan period;
- A failure of the Duty to Co-operate in terms of addressing unmet housing need; and
- Support for the deletion of the proposed housing allocation at Normandy, but criticisms of other elements of the identified housing supply.

4. Our client controls land South of New Pond Road, Farncombe (see Appendix 1 – Site Location Plan). The site is capable of delivering circa 90 dwellings in the short term and could therefore contribute to Guildford Borough Council (GBC)’s 5 Year Housing Land Supply. Indeed, in 2014 a previous version of the emerging Guilford Local Plan identified the site as a part of a proposed housing allocation number 80 (see Appendix 2 – Proposed Housing Allocation Plan), which shows the boundaries of the housing allocation proposed in the 2014 version of the Draft Local Plan, however it was subsequently removed as the Council considered that the site (number 80) was no longer required as a proposed housing allocation. We outline below why we consider GBC’s stance to be wrong with respect to this matter.

5. Site number 80 is comprised of three parcels of land. The furthest west is land that we are promoting on behalf of our client Countryside Properties). To the east, in the central part of the site, is land associated with New Pond Cottage and New Pond Farm. The furthest east is land promoted by Obsidian Land Promotion (Guildford) Ltd on behalf of Podger Estate. Our previously submitted Landscape and Visual Appraisal by Barton Willmore (July 2016) found that New Pond Road provides a strong and robust physical feature on the ground that makes a limited contribution to the four assessed Green Belt purposes. It also makes a limited contribution to the (defined) special qualities that are intrinsic to designating an AONB. The Site is well located to existing local shops and services, schools and is considered to meet the three dimensions of Sustainable Development.

Plan Period

6. The latest (June 2017) version of the Proposed Submission Draft Local Plan proposes to amend the Plan period to 2015-34 from 2013-33. Consequently, there is a reduction of 1,434 dwellings, and the Plan period is reduced by a year. We fail to see what justification there is for GBC’s decision to reduce the length of the Plan period and roll its start date forward by 2 years. There does not appear to be any rational explanation offered to indicate why a reduction in the Plan period (which reduces both long-term certainty as well as the total overall identified housing supply) is either necessary or appropriate.

7. The change to the plan period to 2013 - 2032 seems somewhat arbitrary, particularly given that the SHMA modelling for the Housing Market Area (HMA) relates to 2013 to 2033, which continues to form an essential part of the evidence base for the emerging Local Plan.

SHMA

8. Paragraph 2.9 of GBC’s Topic Paper: Housing Delivery (TPHD) states that the West Surrey SHMA: Guildford Addendum Report (2017) provides a factual update to the West Surrey SHMA (2015). The Addendum sits alongside and supplements the West Surrey SHMA. It takes account of the latest population and household projections, the latest post-Brexit economic projections and the latest 2015 midyear population estimate. This factual update has resulted in a reduced Objectively Assessed Need (OAN) for Guildford from 693 homes per year (2013 – 2033) to 654 homes per year (2015 – 2034). Over the Plan period, this has resulted in a reduction of approximately 1,400 homes. There were 381 homes completed in 2015/16 and 297 in 2016/17 which has resulted in an under delivery of new homes against OAN, leading to an expected backlog of 1,319 dwellings by the time of the Local Plan’s adoption.

9. It is important to note that the West Surrey Strategic Housing Market Assessment (SHMA): Guildford Addendum Report (March 2017), prepared by GL Hearn, has been solely commissioned by GBC. Therefore, it solely seeks to address Guildford’s housing needs without due consideration of wider needs across the HMA and brings into question the effectiveness of the Duty to Co-operate requirements.
10. The Planning Practice Guidance (PPG) indicates that the most up-to-date household projection figures should be used as the starting-point in determining the OAN. In this case it is the 2014-based figures.

[See attachment for Tables]

11. The above two tables indicate that both the CLG Household Projections and Sub National Population Projections (SNPP) for 2014 show increases upon the 2012 based household and population figures. It is noteworthy that despite the 2012 based figures being used as the basis for the 2015 SHMA, and the more recent 2014-based figures underpinning the 2016 SHMA Update, GBC is now seeking to reduce the emerging Plan’s overall housing requirement figure.

12. The 2016 version of the Draft Plan makes reference (paragraph 2.21) to Guildford’s average house price needing to now being amended to £445,524 from £407,160, which fully demonstrates the urgent need to address housing delivery. This points to the fact that smaller less constrained sites such as the one being promoted on behalf of our client at Farncombe, can play a very important role in boosting housing supply in the short term to take account for longer lead in times for larger strategic development sites. Consequently, we consider that GBC’s proposed phasing timetable of the Borough’s housing provision to be seriously defective given that it will harm rather than assist in boosting the delivery of the Submission Draft Plan’s identified housing supply.

13. Table 24 in the updated SHMA (2017) indicates that 517 households per annum require support in meeting their housing need (compared to 478 in the 2015 SHMA).

14. Paragraph 5.23 states that with 40% affordable housing delivery, 1,293 dwellings pa would be required in order to address the affordable housing need in full.

15. Other important findings from the Assessment were:

- Land values are 16% above the Housing Market Area (HMA) average;
- Annual house price growth of 7.5% occurred over the past 5 years in Guildford;
- There has been a substantial £45,000 increase in average house prices in Guildford over the past year (paragraph 5.34);
- Lower quartile house prices are 11.5 x earnings in the Borough;

16. Reference is made in paragraph 5.49 to 629 dpa being required to support the rebased SNPP. To support economic growth, a marginally higher level of provision (631 dpa) would be needed. However, paragraph 8.17 goes on to state that applying a market signals adjustment to the economic-led need for 579 dpa results in an upward adjustment of 9%, increasing the assessed housing need to 631 dpa.

17. It is not evident why the 579 dpa figure, has been used in preference to the 631 dpa requirement.

18. Furthermore, given the findings of the updated SHMA (2017), which are referred to above, in particular, the market signals showing a housing market experiencing extremely severe affordability issues, only a very modest uplift of 9% above the economic-led need of 579 dpa is deemed sufficient. The identified OAN of 654 dpa is stated in paragraph 8.21 as being 17% above the starting point demographic objections. This increase is very low in comparison with the final OAN’s of many other recently published SHMA’s, and the OAN adjustments recommended in Local Plan Examination Inspector Reports. Most recently, the Inspector examining the Waverly Borough Council Local Plan indicated during the Hearing Sessions that an upward adjustment of at least 20% is likely to be applied.

19. We refer back to the evidence which we submitted to the 2016 emerging Local Plan consultation. In particular, the Nathaniel Litchfield & Partners report (July 2016) that criticised the methodology of the SHMA. The findings of which remain applicable.

**OAN**

20. The OAN Housing Target has changed to 12,426 dwellings (previously 13,860 dwellings). The Housing Target equates to 654 dpa in accordance with the SHMA Addendum (2017) (previously 693 dpa in accordance with the West Surrey SHMA – September 2015).
21. GBC states in paragraph 4.6 of the TPHD that for the purposes of its plan-making process, it has assumed an unmet housing need for Woking of 3,150 homes (2013/14 – 2026/27). This figure was recently been agreed by the Inspector and interested parties at the Waverley Local Plan Examination Hearing Sessions.

22. In our previous representations we referred to the unmet need arising from Woking, which has been assumed to be 3,150 dwellings for the period 2013/14 – 2026/27. The Inspector at the Waverley Local Plan Hearing Sessions confirmed his position that Waverley Borough Council and GBC would be required to accommodate unmet need from Woking. GBC should therefore seek to establish what proportion of this can be accommodated within Guildford.

23. There also appears to be a notable lack of information with regard to whether or not there will be any further amount of unmet housing need from Woking, beyond 2027, which might also need to be met by Guildford in the latter part of its Plan period.

24. We are disappointed that the Council is seeking to reduce its overall housing requirement by 1,400 dwellings in the 2017 Proposed Submission Draft Local Plan. The 2017 Addendum to the SHMA now indicates that due to changing economic circumstances the Borough’s housing need should be reduced from 693 dpa to 654 dpa.

25. We consider that undue weight has been given to employment forecasts, particularly given that these only relate to Guildford, rather than the wider HMA. This is contrary to the Planning Practice Guidance (PPG) which specifies that employment trends and growth in working age population should be considered across the HMA.

26. It is also considered important to recognise other economic factors that are highly pertinent in determining the OAN. The demographic baseline and affordability issues point towards a need for an increase, rather than a decrease, to the OAN. The baseline level of housing need in the Borough, as identified in the 2017 SHMA Addendum, has risen from 517 dpa to 552 dpa. It must also be recognised that this is the mid-point assessment with the highest demographic projection being 584 dpa.

27. We referred in our 2016 Draft Local Plan representations to deficiencies in the production of the original SHMA. We would refer back to our earlier submission, in particular, the Nathaniel Litchfield & Partners Report (July 2016) that presented a critique of its methodology.

28. There is clearly an increasing need for housing within the Borough. Table 24 in the 2017 SHMA Addendum shows the need for affordable housing has increased from 478 dpa to 517 dpa. Table 25 refers to continued house price inflation of 7.5% per annum over the last 5 years, with an 11.4% increase over the past year. Paragraph 5.32 acknowledges that “It is clear that house price growth has accelerated in the Borough since mid-2013”.

29. Recent levels of housing delivery have been weak in the Borough. As a result, increasing demand and worsening affordability have contributed to making the Borough housing increasingly inaccessible for many of its residents. This is also demonstrated by the 2017 SHMA Addendum which reports that the number of households being formed by the crucial 25 - 34 age group have reduced.

30. Clearly there are affordability pressures that are reducing household formation in this age bracket. Poor housing delivery in Guildford Borough has compounded this situation. This worsening scenario has led to the situation identified in paragraph 5.27 of the 2017 SHMA Addendum which indicates that lower quartile house prices are 11.5 times the lower quartile earnings in the Borough. Market signals would suggest the need for a more significant uplift on the latest demographic baseline, rather than the reduction that is being proposed by GBC.

31. We also continue to consider that the Plan fails to make adequate provision for population flows from London given the capital’s sky-high property prices and Guildford’s close proximity. Please see our 2016 Local Plan representations for further details. These included evidence that In-migration from London indicated that more than 1,000 dwellings would be required in Guildford and up to 1,200 dwellings across the West Surrey HMA. It is important to remember that the Inspector’s Report in respect of the London Plan concluded that the London Authorities could not meet their Objectively Assessed Need for 52,000 dpa, nor their target of 49,000 dpa. Instead, there was found to be an identified capacity figure of only 42,000 dpa. It is important that GBC can demonstrate it is taking proper account of any contribution required in response to assisting in meeting housing needs arising from London, including emerging evidence being made available as part of the evidence base for the new London Plan.
32. We comment below upon the content of the following Table which is now shown as deleted text under revised Policy S2. The Table sets out the Annual Housing Target figures from the 2016 Submission Draft Version of the Guildford Local Plan. [See attachment for Table 3]

33. The previous 2016 Submission Draft OAN of 693 pa required provision of 13,860 dwellings over the Plan period. It is apparent from the above Table that GBC’s annual housing target figures would deliver 10,395 dwellings. In addition, 1,057 dwelling completions can be added for the first three years of the originally proposed Plan period (2013/14, 2014/15, 2015/16 & 2016/17). This would have provided a total of 11,452 dwellings. This would have still left a deficit of 2,408 dwellings to meet the OAN for the Plan period which would have needed to be bridged by an extremely high housing target figure in 2017/18.

34. Rather than an annual target applicable to each year of the Plan period, the housing supply is phased in order to show a 5 year land supply. The initial Annual Housing Target figures are very low. They appear to have been chosen entirely as a means of ensuring that GBC can maintain a 5 Year Land Supply (albeit a very low one). They are incapable of boosting short-term housing supply or addressing affordability concerns and poor recent completion numbers.

35. It is also worth noting that in the first 5 years of the Plan post adoption, the annual housing targets would have delivered 2,950 dwellings, or an average of 590 dpa.

36. The following Table is now shown as proposed new text under revised Policy S2. The Table sets out the Annual Housing Target figures from the 2017 Submission Draft Version of the Guildford Local Plan. It shows that it will take until the late 2020’s before housing delivery rates rise significantly above the OAN target of 654 dpa. [See attachment for Table 4]

37. The proposed 2017 Submission Draft OAN of 654 pa results in a required provision of 12,426 dwellings over the Plan period. It is apparent from the above Table that GBC’s annual housing target figures would deliver 9,810 dwellings. In addition, 381 dwelling completions can be added for the initial year of the revised proposed Plan period (2015/16) and 297 completions for the second year (2016/17). This would have provided a total of 10,488 dwellings. This still leaves a deficit of 1,938 dwellings to meet the OAN for the Plan period which will need to be bridged by the housing target figures for 2017/18 and 2018/19. This will require housing target rates of 969 dwellings in both of these years. It is not apparent how this step-change in delivery will be achieved prior to the new Local Plan being adopted.

38. Paragraph 4.1.9a in the 2017 Draft Submission Local Plan clearly states that “the figures set out in the Annual Housing Target table sum to a total of 12,426 homes”. This statement is quite clearly inaccurate given that as we have already stated above, the Council’s total identified housing supply only amounts to 9,810 dwellings. GBC needs to urgently clarify how its annual housing targets will actually address and deliver its OAN.

39. In the first 5 years of the Plan post adoption, the annual housing targets will now only provide for 2,400 dwellings, or an average of 480 dpa. This is a significant reduction in housing delivery against the already low figure of 2,950 dwellings (an average 590 dpa) proposed in the 2016 version of the Submission Draft Local Plan.

40. Given recent poor housing delivery rates, worsening affordability and a significant current unmet housing need within the HMA, we are concerned that GBC is seeking to reduce the OAN and introduce even lower annual housing targets in the early years of the Plan period. Such an approach is not considered sound as it is contrary to the National Planning Policy Framework (NPPF). It will not seek to significantly boost the supply of existing housing. Nor will it seek to address the significant housing supply backlog that will have accrued by the time of the Plan’s adoption.

41. Instead, the proposed strategy with its amended Annual Housing Targets in Policy S1 now places even greater emphasis on back-ended housing delivery towards the finish of the Plan period. This is a high-risk approach as it means there is a greater risk that the Plan will fail to meet its housing requirement should any of its major sites allocations fail to deliver as envisaged. In such circumstances, GBC will have much less time to address and rectify such shortfalls in delivery. This is an especially important issue given that GBC openly acknowledges in its evidence that a number of its site allocations are heavily dependent upon new infrastructure provision.

42. The proposed Annual Housing Target figures seems to be an attempt by GBC to delay delivery and not seek to meet housing need earlier in the Plan period, particularly given that that need has been significantly increasing. The Council
must identify a wider range of sites and in particular smaller sites, which can deliver housing in the short term. The Housing White Paper (HWP) recognised the importance of smaller sites to maintaining consistent supply.

43. GBC is not explicit in the Topic Paper: Housing Delivery – June 2017 (TPHD) whether it is proposing to use the Sedgefield or Liverpool approach to assessing five year supply. However, the statement in paragraph 4.188 appears to suggest that it will be seeking to address backlog over the full Plan period (The Liverpool method). This is not the approach favoured in the National Planning Practice Guidance (NPPG). We can see no reason why allocated sites should not be brought forward as early as possible.

44. Our view is that, in accordance with national policy, the Sedgefield method is used to ensure that the backlog is delivered as quickly as possible and not ‘put off’ until later in the Plan period. We consider it important to note that Waverley Borough Council and Waverley Housing Forum signed a Statement of Common Ground in which they both agreed that the Sedgefield approach should be used with regard to the 5YLS. We support GBC’s application of the 20% buffer to take account of the persistent under delivery of housing in the Borough.

45. Paragraph 4.188 of the TPHD reports that the housing target from the base date (2015) to adoption of the Plan (2019) is 654, and envisaged backlog at the point of adoption is therefore 1,319 homes. GBC acknowledges that the NPPG says that local planning authorities should aim to deal with any undersupply within the first 5 years of the Plan period where possible.

46. Applying the Sedgefield methodology from a base of 2019/20 means that the Council will need to address a backlog of 1,319 dwellings between 2019/20 and 2023/24. In terms of the 5-Year Housing Land Supply, accepting Annual Housing Targets of 450 dpa in the first two years and 500 dpa in the last three years would result in a need for 2400 dwellings (480 dpa). However, as we have already indicated above. We consider that these target figures are too low, and that GBC should be seeking to address its OAN and housing shortfall as soon as possible. A reduced OAN of 12,426 dwellings still results in a requirement of 654 dpa over a 19 year Plan period.

47. Both the NPPF and the NPPG emphasise the importance of LPA’s seeking to address both their annual housing requirement over the Plan period and their housing backlog in the first 5 years of a new Local Plan.

48. Paragraph 47 of the NPPF states Local planning authorities should aim to deal with any undersupply within the first 5 years of the plan period where possible. Where this cannot be met in the first 5 years, local planning authorities will need to work with neighbouring authorities under the duty to cooperate (Paragraph: 035 Reference ID: 3-035-20140306).

49. The NPPG says that “Local planning authorities should aim to deal with any undersupply within the first 5 years of the plan period where possible. Where this cannot be met in the first 5 years, local planning authorities will need to work with neighbouring authorities under the duty to cooperate” (Paragraph: 035 Reference ID: 3-035-20140306).

50. It is important to point out that should GBC follow this approach, this would result in a total of 4,589 dwellings, to which a 20% buffer needs to be applied to reflect recent under-delivery (654 dpa x 5, together with the envisaged housing backlog of 1,319 dwellings at the point of adoption (paragraph 4.188 of the TPHD)). This gives an initial 5-year requirement of 5,507 dwellings, or 1,101 dpa. GBC’s Annual Housing Figure is only just over 40% of this figure. This demonstrates just how ineffective and unambitious the Proposed Submission Draft Plan (2017) is in terms of boosting Guildford’s 5YLS.

51. The Sedgefield methodology demonstrates that even a trajectory skewed towards the later part of the Plan, fails to provide GBC with sufficient housing supply to meet its requirements during the first five years of the plan. This calls into question the effectiveness of the Plan and that, in accordance with paragraph 49 of the NPPF, policy S2 could be considered out of date from the point at which the Plan is adopted. As such we believe the plan is unsound as it is not consistent with national policy and nor is it effective as there are serious doubts as to whether it is deliverable over the plan period.

**Duty to Co-operate**
52. We reiterate our earlier expressed concerns regarding Guildford Borough Council (GBC)’s co-operation with its fellow Housing Market Area members; Waverley Borough Council (WaBC) and Woking Borough Council (WoBC). The Woking Core Strategy sets a housing requirement of 225 dpa below the OAN of 517 dpa identified in the West Surrey SHMA (2015).

53. As a consequence, there is a significant amount of unmet housing needs within Woking and that consideration needs to be given how this unmet need is going to be addressed within the HMA. This issue was raised by the WoBC Core Strategy Examination Inspector.

54. WoBC adopted its Core Strategy in 2012. The Plan covers the period 2010 – 2027. The Council is still to produce a Site Allocations Development Plan Document (SADPD) which will identify and allocate sites for development to cover the period up to 2027, including provision for 292 dpa. WoBC acknowledged in its written submission to the Waverley Local Plan Examination that given its current OAN of 517 dpa that there is currently an unmet housing need arising from Woking, which still needs to be addressed.

55. Furthermore, the Council also made it clear in its written submission that a review of overall housing number will not take place until there is a future review of the Core Strategy, and that this will only occur after the SADPD has been produced and adopted. The SADPD is not intended to identify sites to meet unmet need within the Housing Market Area.

56. We understand that during the current Waverley Draft Local Plan Examination Hearings the Inspector indicated that he considered it appropriate for Waverley and Guildford to accommodate the unmet need from Woking.

57. Given the unmet needs of the HMA, together with significant affordability pressures, it is somewhat surprising that the Council has chosen to reduce its overall Local Plan housing requirement by 1,400 homes.

58. Whilst the TPHD does refer to the issue of unmet need in relation to the reduced housing requirement, this is in regard to the relative appropriateness of using specific allocations to address unmet needs from other authorities. In particular, GBC concentrates upon the potential adverse impacts in relation to some allocations. Further deliberation doesn’t appear to have been given to the benefits of meeting the wider housing needs of the HMA given the level of need and significant affordability issues identified in the West Surrey SHMA. The focus being on perceived environmental harm, rather than the economic and social consequences of the Plan failing to deliver sufficient new homes to meet current and future needs.

59. Despite there continuing to be a significant level of unmet need across the HMA, there does not appear to be any commitment from GBC with regard to helping to meet Woking’s unmet housing needs. Instead, it is seeking to reduce its own housing requirement. The consequences for GBC of failing to fulfil its legal obligations under the Duty to Co-operate are very serious. Local Plan Examination Inspectors elsewhere have advised local authorities to withdraw their Plans as a result of failing to work with other Authorities to address unmet needs. St Albans District Council is but one such example. In its case, a recent High Court challenge by the Council against its Local Plan Examination Inspector’s findings failed. The Court reiterated the importance of ongoing engagement to address strategic policy matters of a cross-boundary nature.

60. We are very concerned that despite this unmet need being known about for some considerable period of time now, there does not appear to be any mechanism in place to actually address this important matter. Accordingly, it does not appear that the Plan has been positively prepared as required by the NPPF.

61. It is particularly noteworthy, that unlike WaBC who has been advised that it will be required to accommodate a significant proportion of Woking’s unmet need, GBC is not seeking to address any of this unmet housing need. Given the fact that Woking has already accrued a very significant backlog of unmet housing need, it is a particular concern if tackling the HMA’s deficit is a matter that is not sufficiently addressed and left to be sorted out at some unknown point in the future.

62. We consider that in order to comply with the NPPF, GBC must be able to demonstrate that the Draft Local Plan has sought as far as possible, to assist in meeting the HMA’s unmet housing needs, in the same way as Waverley is doing. We do not consider that the available evidence demonstrates this, particularly given GBC’s decision to reduce its overall housing target figure for the Plan period.

63. It is fully apparent that co-operation between the 3 local authorities within the HMA has been ineffective with regard to ensuring that its overall housing needs are addressed and met.
64. We would reiterate that our client’s site at Farncombe was previously identified as a part of proposed housing allocation (number 80) in the 2014 iteration of the emerging Local Plan. Furthermore, WaBC did not object to this allocation. Indeed, it agreed to work with GBC on reviewing the Green Belt.

65. There is a clear need to reconsider the release of land from the Green Belt and AONB around larger villages where it is of lesser sensitivity in terms of landscape or environmental value. We submitted evidence at the time of the 2016 Local Plan consultation to demonstrate why our client’s site at Farncombe fully merits release.

**Housing Delivery**

66. In our previous representations we referred to the following table in the 2016 Housing Delivery Topic Paper (paragraph 4.169), which shows that housing completion rates over the last decade have been low. It also demonstrates a record of under delivery of new homes against the OAN, leading to a significant backlog accruing over a short period of time. We have updated this by adding 2 No. additional rows to incorporate the annual housing completions for 2015/16 and 2016/17 as recorded in the Council’s Topic Paper: Housing Delivery (June 2017).

**Housing Completions**

[See attachment for Table 5]

67. The Land Availability Assessment states (p.12) that the five-year housing land supply for 2016/17 (which covers the monitoring period 1st April 2017 to 31st March 2018) is only 2.36 years. More recently (July 2017), WYG has published an information sheet listing the current 5 Year Housing Supply position for LA’s in the South East and East regions as of June 2017 (see Appendix 3). Worryingly, Guildford’s 5YLS is shown as having deteriorated further and now being reduced to just 2.1 years of housing land supply. Furthermore, GBC is listed amongst the bottom 10 LA’s in terms of housing land. Therefore, sites capable of delivering housing in the short term and contributing to boosting the 5YLS (such as our site) need to be allocated. Otherwise, GBC’s dire 5YLS and affordability positions will continue to worsen. Policy S2 as currently drafted will only reinforce GBC’s record of persistent under-delivery. Furthermore, the Local Plan would be out of date at Adoption given that against the Council’s annual housing requirement and backlog it would be incapable of demonstrating the existence of a 5YLS.

[See attachments for Appendices]

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents: Tables attached to rep.pdf (24 KB)  Appendices.pdf (3.2 MB)
Site allocations

68. In paragraph 3.8 of the TPHD it is stated that when developing new Local Plans, the Council must weigh up the constraints and test different options regarding how much development can be accommodated. For Guildford these include the Surrey Hills Area of Outstanding Natural Beauty, the Thames Basin Heaths Special Protection Area, Green Belt, flood risk and infrastructure capacity, such as the road network.

69. Paragraphs 3.13 and 3.14 of the TPHD state that the Land Availability Assessment (LAA) has been prepared using the methodology set out in the NPPG. Previous SHLAAs did not use a site size threshold but for this LAA, the recommended size threshold of five or more homes has been used. The LAA is important evidence but it does not itself determine whether a site should be allocated for development, nor does it grant planning permission. The LAA has not been updated for the Regulation 19 Local Plan (2017) however an addendum has been prepared which provides a factual update and information on the changes to the site allocations. GBC has used the LAA (2016) to inform housing supply from non-allocated sites.

70. As a consequence, approximately 1,400 homes have been lost from the Regulation 19 Local Plan (2016) through the removal of sites that are no longer considered suitable for allocation for a variety of planning reasons (e.g. site unavailability and alternative uses being proposed).

71. GBC states in paragraph 4.11 of the TPHD that its spatial strategy continues to seek to meet its OAN. The Regulation 19 Proposed Submission Local Plan (2016) identified a housing target of 693 which equates to 13,860 homes over the plan period (2013-33). However, the identified supply was approximately 15,844 which represented a 14% buffer over and above the housing requirement. The buffer ensured that it was able to meet objectively assessed needs with sufficient flexibility to adapt to rapid change, as required by paragraph 14 of the NPPF. It also provided a robust supply of housing sites to ensure that the housing requirement was met reflecting the uncertainties related to the delivery of certain key infrastructure that is considered necessary to ensure the planned growth is sustainable. In particular, a number of our strategic sites are dependent upon the delivery of Highways England’s A3 Guildford scheme. Due to the completion of the scheme only being expected by 2027, a proportion of the supply is assumed to be built after this date.

72. GBC refers in paragraph 4.12 of the TPHD to the fact that the Regulation 19 Local Plan (2017) has a reduced overall housing provision figure. It says that prior to the removal of sites, it first explored whether they could potentially be retained in order to meet unmet needs arising from elsewhere in the HMA. Having undertaken the exercise it continues to consider that these sites are not appropriate for allocation and should continue to be removed for good planning reasons, based on either new evidence or changing circumstances.

73. We consider GBC’s remarks in paragraph 4.13 of the TPHD to be very important. This states that whilst every effort has been made to maximise sustainable sites that are able to deliver in the first five years, there remains a significant shortfall when taking account of the deficit accrued since 2015 and the 20% buffer brought forward from later in the plan period. The Regulation 19 Local Plan (2017) therefore continues to propose a phased target which begins at a relatively low level in the early years (now even lower than previously proposed) and increases thereafter in line with the expected delivery of infrastructure and strategic sites. GBC goes on in the following paragraph to say that its own continued shortfall in the early years, therefore, reinforces the inability to meet unmet needs arising from within the HMA. We do not believe or accept that there are not sites available which could be brought forward in the short-term and help address any unmet need across the HMA. We comment below on our client’s site at Farncombe.

74. Paragraph 4.16 in the TPHD explains that the Regulation 19 Local Plan (2017) has a reduced overall housing supply of approximately 2,000 homes. Approximately 1,400 homes have been lost from the Regulation 19 Local Plan (2016) through the removal of sites that are no longer considered suitable for allocation for a variety of planning reasons, irrespective of OAN. The remaining 600 homes are as a result of a more realistic phasing assumption on two strategic sites.

75. Reference is made in paragraph 4.164 of the TPHD to the deletion of the proposed allocation of 1,100 dwellings at Normandy and Flexford. We very much welcome the fact that the Council has taken note of the objections of ourselves and others that were made to the 2016 Submission Draft Local Plan consultation. Consequently, we fully support the de-allocation from the Draft Submission Local Plan of 1,100 dwellings at Normandy and Flexford.
However, we consider that pushing housing delivery back to further on in the Plan period is contrary to NPPF requirement to boost housing delivery and demonstrates a lack of confidence of officers with regard to the deliverability of their sites.

77. We note that 2017 Draft Submission Plan makes provision for two increased housing allocations at New Street, Guildford (an extra 200 dwellings) and land south and east of Ash and Tongham (an extra 550 dwellings).

78. GBC states that it now considers that Guildford town centre will deliver 1,150 homes to 2034 (paragraph 4.57 of the TPHD).

79. There are acknowledged to be deliverability concerns on some sites, primarily related to sites where there is not a suitable relocation option available (paragraph 4.59). For example, Guildford library, and adult education centre (removed in the Regulation 19 Local Plan (2016)). The loss of these uses would not be acceptable without a suitable alternative available location. In addition to this and as set out above the Telephone Exchange has also been removed from the Regulation 19 Local Plan (2017) on the basis of availability and deliverability concerns.

80. The extra 200 dwellings at Site A6 in the urban area (North Street redevelopment, Guildford town centre) arises as a result of reduced comparison retail floorspace from 45,000 sq m to 41,000 sq m and increased food and drink element from 3,000 sq m to 6,000 sq m. The increased housing capacity from 200 studio/1-bed flats to 400 homes has resulted from a change in the retail provision to reflect the latest retail needs study and evidence of demand for comparison/food and drink retail uses. GBC states that the change in housing reflects the aspirations of the site promoters.

81. The site is identified in the 2016 LAA as Site 205. It is identified as currently being a mix of uses including bus station, retail and food and drink, surface car park, office, shops and some vacant properties. Over the last three decades there have been several outline planning permissions and reserved matters details approved for comprehensive mixed use redevelopment including retail, flats, restaurants and cafes (Class A3), community space (Class D1), car parking, replacement bus station, a public square. The most recent of these expired in 2015.

82. The North Street site is said to be the only opportunity within the proposed primary (core) shopping area on which to provide a significant amount of additional retail floorspace to meet future needs, to consolidate the role of the town centre. It has potential to greatly improve the appearance and function of the area. Due to the site’s town centre location and a number of historic industrial activities in the vicinity, investigation and potential remediation may be required prior to any redevelopment. Depending on the proposals for development of the site, the bus interchange facilities that are presently provided at Guildford bus station on the site may need to be provided in a suitable alternative arrangement to be located either partly or wholly on or off site.

83. It is apparent that the North Street site has been promoted as a development opportunity for a considerable period of time. The deliverability of this site is therefore questioned, particularly if bus facility provision or relocation is required. Furthermore, it is noteworthy that increased housing provision on this site would, in the Council’s own judgement, be to the detriment of town centre retail provision.

84. The Guildford urban area (including Slyfield Area Regeneration Project, but excluding Guildford town centre) is said to be likely to generate 1,450 homes to 2034 (paragraph 4.62 of the TPHD). The Slyfield Area Regeneration Project itself (A24) is said to have a capacity of 1,500 homes with 1,000 homes expected to be delivered in the Plan period due to development being dependent upon the relocation of the Sewage Treatment Works (paragraph 4.67 of the TPHD).

85. The Plan allocates 1,750 homes (was 1,200 homes) on land to the south and east of Ash and Tongham (A29). The allocation has been increased to include the planning permissions in the area that have not yet commenced due to the current unavailability of Suitable Alternative Natural Greenspace (SANG). The Site also includes land for a new road and footbridge over Ash.

86. In relation to Ash and Tongham, paragraph 4.108 of the TPHD says that the number of homes proposed in this area roughly compares to the number of homes proposed at former Wisley airfield (2,000 homes), but without much of the supporting uses and infrastructure. The piecemeal nature of this site in terms of its fragmented ownership and how it is being delivered, in part ahead of the Local Plan without CIL, means housing is being provided without many of the additional benefits.
87. The Plan allocates approximately 2,000 dwellings (was almost 1200 dwellings) on sites in and around existing villages.

88. At least 3,200 units will be provided in 2 urban extensions, north east of Guildford at Gosden Hill Farm, and SW of Guildford at Blackwell Farm (was 4,000 dwellings); and Wisley new settlement to contain approximately 2,000 dwellings (was over 2,000 dwellings).

89. We consider that there are serious question marks regarding the reliability of envisaged housing delivery from a number of the sites referred to above. In particular, North Street, Guildford (A6) is a long standing re-development proposal whose re-development would require the provision of new bus facilities and be to the detriment of retail provision in Guildford town centre. Slyfield Area Regeneration Project (A24) requires the relocation of sewage treatment works which is likely to be both expensive and time-consuming. Whereas increased housing provision at Ash and Tongham (A29) involves complex land and multiple site ownerships which are likely to make it difficult to co-ordinate and deliver development on the ground in a timely manner.

90. GBC specifies that whilst only sites that are key to the delivery of its strategy are allocated, as required by the NPPF, the LAA identifies all sites that are suitable, available and achievable for housing and economic development uses over the Plan period (paragraph 4.35 of the TPHD). As a general principle, GBC considers that sites key to delivering its strategy are those that are in excess of approximately 25 homes or are delivering other specific use classes. Whilst they are not all formally allocated in the Proposed Submission Local Plan, all homes identified in the LAA (the LAA has a threshold of five homes or more) have been counted in terms of calculating GBC’s supply. In addition to this, GBC’s supply also includes assumptions on non site-specific sites, namely windfall and Rural Exception Sites, and information on outstanding permissions and completions.

91. We consider that there are question marks concerning the realistic delivery of a number of sites recorded in the LAA. We note that some sites in the LAA have been promoted for many years, some have multiple land ownerships, and some have never been actively promoted by landowners.

92. GBC acknowledges in paragraph 4.37 of the TPHD that the NPPF requires us to “boost significantly the supply of housing” (para 47), and “deal with undersupply within the first five years of the plan period where possible” (NPPG, Paragraph: 035 Reference ID: 3-035-20140306). It then goes on to state that it does not consider this is possible in Guildford.

93. We welcome GBC’s acknowledgement in paragraph 4.39 of the TPHD that it considers that in general terms there are exceptional circumstances that justify the amending of Green Belt boundaries in accordance with the NPPF, paragraph 83 and that its evidence base identifies a high level of need for market and affordable housing and employment. Given the extent of Green Belt across the borough (89 per cent) and the lack of sufficient suitable and deliverable sites located outside the Green Belt, to not amend boundaries would lead to a significant undersupply of homes compared to the identified needs – approximately half. The consequences of this within Guildford would be to exacerbate the existing affordability issues and have an adverse impact on economic growth in the area, which would lead to unsustainable commuting patterns.

94. Paragraph 83 of the NPPF specifies that once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.

95. Paragraph 182 of the NPPF states:

The Local Plan will be examined by an independent inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is sound. A local planning authority should submit a plan for examination which it considers is “sound” – namely that it is:

- Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;
● Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;

● Effective – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities (our emphasis); and

● Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.

96. Paragraph 4.179 of the TPHD refers to the fact that the revised OAN for the Plan period is 654 x 19 years = 12,426 homes (2015-2034). GBC states that it considers that it can meet the OAN with flexibility. It states that the total potential provision of new homes across the plan period (including completions since 2015 and outstanding capacity) is 13,581. This provides 1,155 homes as a buffer. This equates to a buffer of just under 10%. This is a reduction compared to the Regulation 19 Local Plan (2016) which included a buffer of approximately 14%. GBC says this reduction is justified and does not impact the robustness of its Plan as there is now less uncertainty in relation to its ability to meet the proposed housing requirement. This is said to be due to the more realistic assumptions now being made on the strategic sites of Blackwell Farm and Gosden Hill compared to the previous Plan which was based on more optimistic delivery assumptions. The Council specifies that this is not planned over provision – rather it is built in flexibility that seeks to limit the risk of housing policies in a newly adopted Local Plan being considered out of date. It refers to the fact that the NPPF says that, “Relevant policies for the supply of housing should not be considered up-to-date if the local planning authority cannot demonstrate a five-year supply of deliverable housing sites.” (para 49).

97. We would emphasise that the LAA is different from an allocations document, and that the identification of sites within the Assessment cannot be any guaranteed that sites with ‘potential’ will actually be delivered on the ground. As we have already referred to above, we have serious doubts regarding some of the entries in the LAA, and do not consider that their identified housing delivery rates stand up to close scrutiny.

Proposed Allocation at Farncombe

98. Paragraph 4.167 of the TPHD refers to the fact that the Green Belt and Countryside Study (GBCS) identifies a Potential Development Area (PDA) at Farncombe, located on medium sensitivity Green Belt within the AONB. In relation to the AONB, it goes on to say that the NPPF states, at paragraph 116, that planning permission should be refused for major developments except in exceptional circumstances and where it can be demonstrated they are in the public interest. The development of the site for circa 90 dwellings is classed as major development. GBC do not consider that the benefits with providing these homes pass the considerations listed within the NPPF bullet points and which form part of the public interest assessment. We strongly disagree and believe that the Council is failing to give sufficient weight to meeting its dire need for additional housing its new Local Plan. It is also failing to identify defensible Green Belt boundaries that reflect its long-term development needs.

99. In terms of Local Plan preparation, the Guildford Borough Draft Local Plan: Strategy and Sites document (2014) set out the Council’s preferred options for growth. Our client’s site at land South of New Pond Road, Farncombe was previously identified as part of a residential allocation (number 80) within the Draft Local Plan. It was also proposed that the land be removed from the Green Belt and the Green Belt boundary re-aligned. We consider this to have been a good example of the Duty to Co-operate being put into action. Sadly, in more recent times, there appears to have been a failure to ensure that the HMA’s unmet needs are adequately addressed.

100. The 2014 Draft Plan contained the following reference:

“4.113 In accordance with national policy, Green Belt boundaries need to follow defensible lines that are easily recognisable and likely to be permanent. This includes for instance roads, railway lines, woodlands and hedgerows. We have reviewed and followed the recommendations of the GBCS with the following amendments…:

Farncombe: we have identified a development site that adjoins the settlement of Farncombe and land reserved for future development in Waverley Borough Council’s Local Plan 2002. We will continue to work together to progress this land over the plan period”.

Page 2659 of 2988
101. Countryside Properties confirms that the land south of New Pond Road can be delivered within the first five years of the adoption of the Guildford Borough Local Plan and contribute circa 90 dwellings to the Borough’s 5 year housing land supply with an estimated average construction rate of about 30 dwellings per annum.

Tests of Soundess

102. In view of the above considerations, we consider that the Local Plan is not sound, because it is not ‘consistent with national policy, as it fails to ensure that a 5 year housing land supply is provided from the start of the Plan, it also fails to identify how the wider needs of the Housing Market Area (HMA) will be addressed, and finally its OAN fails to make provision for all relevant housing needs. It is not compliant with the duty to co-operate. It will also not be ‘justified’, or ‘effective’, as it does not represent the most appropriate strategy, when considered against the reasonable alternatives, and there is doubt over its deliverability.

Summary and Conclusions

103. Any reduction in the requirement based solely on economic circumstances would appear to be ignoring wider trends and market signals. We therefore consider the Council’s decision to reduce the housing requirement is not justified and as such makes the policy unsound.

104. As a consequence of the necessity to bring about a step change in housing delivery rates and meet its obligations under the Duty to Co-operate, the Council will need to ensure that it makes provision for necessary Green Belt revisions and the allocation of sites, such as the land South of New Pond Road, Farncombe, which can deliver circa 90 dwellings, and was identified as one of the Council’s preferred allocations in the Draft Local Plan (Regulation 18) in 2014. Given the acknowledged fact that housing delivery will be weak in the early years of the Plan period, it will be important to bring forward smaller and medium sized sites such as the land South of New Pond Road, Farncombe.

105. In conclusion, we would highlight the following matters

- There does not appear to the any justification for the Council seeking to reduce the length of the Plan period;
- Increased affordability issues, together with low housing delivery rates in Guildford, points to the need for rapid action to boost the housing by bringing forward sites lacking in constraints;
- There remains an urgent need to address unmet need within the HMA, in particular with regard to Woking;
- Annual Housing Targets seem entirely focused on ensuring that GBC maintains a 5YLS, rather than addressing the OAN. Indeed, they fail to even deliver the reduced level of OAN being proposed;
- As a consequence, there is over-reliance on development at the back end of the Plan period. This is dangerous because it does not allow sufficient time for other sites to be brought forward should delivery not occur as envisaged; and
- No uplift to the OAN has been made to take account of the very high affordable housing requirement that has been identified

Proposed Amendments

106. The following amendments are proposed:

1) The Plan should not rely from its outset upon low and unambitious Annual Housing Target figures. Instead, it should identify a deliverable 5 year housing land supply, to which our client’s site South of New Pond Road, Farncombe can make a contribution.

2) The Plan needs to specify how the wider unmet needs of the Housing Market Area are being addressed; and

3) The OAN needs to be increased to reflect in-migration from London, market signals and the affordable housing demand.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan contains a disproportionate imbalance across the Borough. The Borough is over 100 square miles in area. The Plan designates land for the development of 11350 homes. Of these, 4613 (40.6%) are within 3 miles of Send Marsh. This is a wholly disproportionate and unreasonable concentration of development, most of it on Green Belt, in that part of the Borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Section 4.2.24 of the Plan states that ‘Gypsy, Traveller and Travelling Showpeople accommodation is required within development sites of 500 homes or more to help create sustainable, mixed communities with suitable accommodation for all’. Therefore there should be no Travelling Showpeople plots at A43 (Garlicks Arch), which is designated for 400 homes. In this connection the failure to amend Policy A44 (Land west of Send Hill) to remove travellers’ pitches is astounding, since this Policy provides for 2 travelling people's’ pitches at a site designated for only 40 homes.

</thead>
<tbody>
<tr>
<td>1,750 homes including some self-build and custom house building plots</td>
<td>We are supportive of the inclusion of land that currently has planning permission in the area. However, we are unclear how this land will contribute towards the requirements that are now included within this policy. With regards to the self-build and custom house building plots, there is no evidence supporting the inclusion of this requirement. The Council are still at an early stage of assessing the local demand for such plots of land. There is no evidence that there is a demand for such plots in Ash and therefore we do not agree with this modification and it should be removed. The figure of 1,750 homes should not be treated as a cap and the wording amended to allow more flexibility to increase the numbers if it is found the land has greater capacity. All potential development parcels should be maximised to allow the delivery of much needed housing within Guildford Borough. The Council have reduced the housing figure by 1,400 homes over the plan period. It would appear that the Council are not meeting the Duty to Cooperate (DTC) in reducing the housing figures; other authorities within the Housing Market Area (HMA) are struggling to meet their need; such as Woking. The Inspector for the Waverley Local Plan indicated that Waverley and Guildford should be looking to meet the unmet need of Woking. This does not appear to have been addressed by Guildford.</td>
</tr>
</tbody>
</table>

(1) Appropriate financial contribution to enable expansion of Ash Manor Secondary School by additional 1FE | We would want to ensure that this contribution would not conflict with any future CIL payments that the Council may be looking to progress. We would also want to ensure that the level of payment requested is of an appropriate level for the development. As mentioned above the policy includes land which already benefits from planning permission, with an agreed sIOG. The land which does not yet benefit from a planning permission should not be expected to make up this shortfall, if any, in contributions. |
(2) Appropriate financial contribution towards expansion of existing GP provision in the area or land and a new building for a new GPs surgery

As above.

(3) Sufficient capacity is available within Ash Vale wastewater treatment works to accept wastewater from this development within its permitted limits

Persimmon has no comment on this. The capacity of foul water networks would be assessed as part of a planning application.

(9) Land and provision of a new road bridge which will form part of the a323 Guildford Road, with an associated footbridge, to enable the closure of the level crossing on the a323 Guildford Road, adjacent to Ash railway station

Whilst we agree that the council should include the bridge within this policy; which means that the location of the road bridge can be safeguarded to allow it to be accommodated in a more suitable and achievable location; than policy a30 was previously suggesting. Whilst persimmon do accept that in the long term a bridge will be required, alongside the closure of the level crossing. However, Council have continued to fail to demonstrate that the bridge is required in the short term and that the delivery of the 1,750 homes, within policy ’29, requires the bridge. We note that a parcel of land that was included within Policy A30 for the delivery of the road bridge has not been included within Policy A29, to the north of the railway line. Therefore the originally envisaged road bridge alignment, as proposed by Mayer Brown, can no longer be achieved. The Council have not provided a preferred route for the road bridge. In the meantime applications for residential development continue to come forward, potentially impacting on the most appropriate location of the road bridge. The Council need to provide a clear strategy of where the preferred and, more importantly, the most suitable alignment of the road bridge should be located, with the appropriate evidence base. Within the Guildford Borough Transport Strategy 2017, there is an estimated cost of £15 million for the new road bridge and footbridge scheme. However, it is not clear what the cost includes and what alignment this takes into account. As part of the land included within Policy A29 already benefits from planning permission it is unclear how these elements will contribute towards the road bridge, if it is indeed found that the bridge is required to mitigate the effects of the housing in Policy A29. As set out in the previous representations, 15th July 2016, the funding mechanisms, outside of developer contributions, are unclear. The evidence and changes to the Local Plan do not clarify this position. Therefore it is still unclear why the Council are stating that the road bridge is ‘anticipated’ rather than an aspirational element of the policy. We note that the wording of this element of the policy calls for land and provision of the new bridges. How this will work in practice
is still unclear. If land is being provided by a party for either of the bridges then the level of monetary contribution needs to be considered against this. As set out in Persimmon Homes' representations dated 15th July 2016, an area of land will be safeguarded for delivery of a footbridge within land controlled by Persimmon, with the remaining land coming forward for residential development. This would then allow the road bridge to be delivered within the wider policy area, meaning that an appropriate location can be secured and allow the Design Manual for Roads and Bridges standards to be met; which the previous alignment did not allow for.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The affordable housing policy now states that the Council 'will seek' at least 40% of the homes as affordable homes on developments providing five homes or more. The Council are correct to wish to meet their affordable housing requirements however there are occasions when the viability of site delivery can be affected by the requirement for a high provision of affordable homes especially on relatively small schemes. The Council are therefore correct to keep the option for affordable provision relatively open to discussion and, whilst seeking the requirement, there must be an acknowledgement that at times a lower provision may be required. The affordable housing requirement should therefore be discretionary and some element of flexibility allowed for within this policy based on circumstances. The delivery of housing has to be the main target and to compromise the viability of schemes will severely hamper this delivery.
Persimmon Homes are supportive of the inclusion of point 4 within Policy H2 which allows for off-site payments and payments in lieu to be made. This allows for flexibility for the provision of affordable homes and does not restrict the delivery to sites where this may not be practical or could impact on the viability, and therefore delivery, of the site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/1476  Respondent: 17399809 / Persimmon Homes Thames Valley (Nicola Hume)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Guildford Local Plan is unsound as the identified housing delivery strategy is ineffective Persimmon Homes believe that the proposed housing trajectory and the process of delivery is flawed and will result in significant under-delivery of expected units. The removal of the Housing Trajectory within Policy 52 is concerning and this now places a greater emphasis on the delivery towards the end of the plan period.

This approach places a significant risk that the Plan may fail to meet its housing requirement particularly when there is an over-reliance on large sites being delivered for this period. This will leave the Council in a difficult position as there will be little time afforded to make up any shortfalls in delivery. This approach appears to be a way of the Council delaying development until as late in the plan period as possible and there can be no element of positive planning about this. The Council must consider smaller sites which are capable of delivering a sufficient quantum of development to run alongside the larger strategic sites. The Housing White Paper (HWP) has referred to the importance of including smaller sites to ensure a consistent supply is maintained. The issue of deliverability is exacerbated by the Council's inability to demonstrate a five year housing land supply.

The Council are unable to show this for the first 5 years of the plan period when it is in operation. There are severe concerns over the delivery of some of the larger sites upon which the Council are relying. The Plan proposes that smaller sites will deliver in the first five years with the larger strategic sites delivering in the 6-10 and 11-15 year periods. This back loading of the majority of development is concerning particularly when there are deliverability issues with some of the strategic sites such as Wisley Airfield. A planning application was refused for this site and an appeal to be heard later in the year. Neighbouring authorities Mole Valley and Elmbridge objected to this proposal and Highways England have previously raised concerns over the impact that this development will have on the A3 and M25 at junction 10. Paragraph 47 of the NPPF states that there is a requirement for Local Planning Authorities (LPA) to "identify and update annually a supply of specific deliverable sites sufficient to provide five years worth of housing against their housing requirements".

It has been established that GBC cannot demonstrate a robust five year supply of deliverable housing land and at best the Council can show 2.1 years supply. Guildford therefore need to make more land available for development as without this Guildford cannot expect to be able to show a five year supply. Guildford have removed sites from this draft of the Local Plan which are in the Green Belt and considered to be sensitive. Guildford should be looking to allocate smaller sites, which are able to contribute to providing for housing delivery in order to ensure a rolling five year land supply. The NPPF at paragraph 83 states that "Green belt boundaries should only be altered in exceptional circumstances" however we would advise that the inability to show a five year land supply should be considered to be exceptional circumstances. In terms of an approach to assessing the five year supply it appears that the Council are favouring the Liverpool method which will see the backlog delivered over the life of the plan period.
This does not accord with national policy which suggests that the Sedgefield method should be used which aims to deliver the backlog as quickly as possible and ensures that development is not delayed. In addition to this the Council propose to use 20% buffer which we would agree with given the past delivery problems. We believe that the Local Plan is unsound as the current proposed housing trajectory is ineffective and will not provide the full housing requirement over the plan period.

It is extremely disappointing that the Council have reduced their housing requirement from the 2016 iteration of the Plan to the 2017 version. Guildford's Objectively Assessed Need (OAN) has previously been identified as 693 dwellings per annum (dpa) upon which the 2016 housing requirement was set, with Guildford seeking to meet its housing needs in full. This was an extremely positive step in an area where housing needs have increased significantly and where pressure for new housing is extreme.

The 2017 version has lost some 1400 dwellings from the 2016 iteration, which equates to a reduction of 75 dpa over the plan period. This is a significant reduction and one which is not justified. The most up-to-date population projections produced by the Office for National Statistics (ONS) shows that by 2037, the population of Surrey is expected to increase by over 200,000 people. It can be expected that a large proportion of this increase will be in the West Surrey HMA due to its proximity and access to London and reputation as being part of the commuter belt and a desirable place to live. The OAN as calculated in the new draft Local Plan is therefore inaccurate and should be revised upwards. The 2017 addendum to the SHMA indicates that due to changing circumstances the Borough's housing need should be reduced from 693 dpa to 654 dpa. The argument for this appears to be based on economic and migration factors.

The SHMA addendum uses the 2014 household projections as the most up-to-date figures available at the time of the compiling of the evidence. These projections show a percentage increase of 1.2% from the 2012 projections used previously. The migration argument is based on both internal and international migration. The SHMA identifies that there is likely be a reduction in EU migration following the vote for the UK to leave the EU. However, as the SHMA states in paragraph 3.73 Guildford 'sees a lower proportion of EU in-migrants than was the case at a regional/ national level'.

Therefore, any reduction in EU migration is likely to have little impact on Guildford. Even if EU migration is reduced, any future trading relationships established with other countries is likely to see a requirement to allow movement of people. This therefore means that there is a likely expected increase in international migration and the impacts of this do not appear to have been sufficiently assessed. Internal migration focuses primarily on out-migration from London. At the most recent assessment, London has a substantive unmet housing need and a number of Local Authorities in London are developing Local Plans which do not appear to make concerted efforts to deal with this unmet need.

The SHMA addendum identifies that migration flows from London to Guildford have been steady since 2008/9 and there has been no increase in net flows since the end of the recessionary period which is noted as being 2012. We are concerned that paragraph 3.45 seems to dismiss any potential increase in migration from London. Whilst there still remains some uncertainty regarding migration flows over the next 10 years evidence from the GLA shows that migration patterns will move towards the levels since pre-2008.

The recovery in the economy and the availability of credit has seen an increase in home ownership and mortgage applications since 2012. Therefore it can be widely assumed that an increasing number of people are seeking to purchase homes where possible. London's affordability has decreased substantially and this will have an impact on those areas around Greater London which have access into the capital for work and leisure purposes. Guildford, with a mainline train station and proximity to the A3 and M25 is historically an area where many people re-locate to from the Greater London area. In all likelihood, it is difficult to see how over the next 10 years there will not be an increase in migration from London to areas such as Guildford.

That no provision appears to be made for this and paragraph 3.46 argues that there are no signals for a return to increasing levels of migration should be given limited weight as this is based on a single year of evidence. There is an increasing need for housing in the Borough and this is coupled with an increasing requirement for affordable housing. The 2017 addendum shows that the need for affordable housing has increased to 517 dpa from the 2015 SHMA figure of 478 dpa and this is supported by paragraph 5.32 which states that 'it is clear that house price growth has accelerated in the Borough since mid-2013'. This affordability issue has been substantially affected by the low levels of housing growth in Guildford. In seven of the past eight years, Guildford has significantly under-delivered against its housing requirements.
For the past seven years in a row the Council have delivered barely half of its annual housing requirement and this significant underperformance has enhanced levels of unaffordability in the Borough and is a strong justification as to why the Council should not be looking to further reduce its housing requirement. Paragraph 5.49 states that 'the analysis indicates that 629 dpa would be required to support the rebased SNPP ...... to support economic growth, a marginally higher level of housing provision at 631 dpa would be required'. The 2017 addendum shows an increase in household projections, an increasing need for affordable homes and no consideration of the impacts of likely increased migration from London, suggests that insufficient uplifts have been included to account for these increases.

The decreasing affordability is exacerbated by the Council's persistent under-delivery against its housing requirement and therefore there is no justification as to why the requirement should be reduced in this Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:  

Comment ID: pslp172/3184  Respondent: 17399873 / Christine Costa  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A42: Clockbarn Nursery, Tannery Lane.

I object to Policy 42. Tannery Lane is a Lane in the heart of Send which is a village. Building 60 homes in place of 45 is an increase of 33% which the lanes cannot support. Send has already seen the closure of its post office and there is only one local shop that can provide grocery essentials. Not everyone has a car and the local bus service is abysmal; where will residents shop?

Tannery lane is a narrow lane and meets Send Road (A247). It is already a difficult access and further housing and an increase in traffic will only make this junction more difficult to navigate and cause increased noise for residents.

Surface water flooding is an existing issue in this area and this will worsen.

Finances should be committed to improving the problems in the village, not making them worse.

Hundreds of objections have been made to this proposal and the Council should not be ignoring its residents and voters.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A58: Land at Burntcommon, London Road

I object to this Policy. Where does it make business sense to build industrial space on Green Belt Land when there are empty sites and industrial units in Slyfield Trading Estate in Guildford?

As detailed above local roads cannot support the increase in traffic and certainly cannot support heavy transport lorries. The local first school is in Send Barnes Lane and building on this land will be a safety risk to the pupils there. The Council does not have the right to ignore current residents and railroad decisions without understanding the local needs and limitations of infrastructure.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I want to strongly express my objection for the proposed building on Gosden Farm. I don't think that Burpham as it is at present can possibly take the extra traffic that will come as a result of the new estate, park and ride, station etc. It will put another 3,000 to 4,000 cars on roads that already struggle especially during rush hours, when George Abbot school starts and finishes, when Aldi is busy or if there is a problem on the A3.

I agree that there is a need for housing but Burpham cannot possibly take this large number of new houses. I do think members of the council should visit the road through Burpham and the slip road off the A3 at peak hours to see how bad it is already.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A42 Clockbarn Nursery, Tannery Lane. I object because: this is further increase 15 homes on 45 the was previously objected to; It degrade access and increase traffic notably in Tannery Lane and at the junction to A247; This is already a busy road in the mornings and evenings and it's is a bottleneck when A3 has traffic issues, which is frequent; It eroding the Green Belt of village well beyond that which is acceptable; There is inadequate allowance for surface water flooding prevention and river flash floods; It degrades the aesthetics of yhe area which is major reason for choosing to live here.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43 Land at Garlick's Arch, Send Marsh. I object to this because: it does not consider the previous objection reasons; there is no evidence of demand travelling people plots in this location; this is Green Belt land hence land use should not be changed; this is a significant number of houses that have a major impact on nature of area to wildlife, life in the village, the balance of the population geographically, traffic, and views in a very negative way; this development in an area with flood zone 2 and the total inadequate planning concerning flooding any devolpment would cause problems here and up and down stream if here as planning does hot consider the whole basin nor the all contributing factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A58 Land at Burnt Common, London Road. I object because: it has not taken into account previous objections; the word "maximum" in 2016 plan has been changed to "minimum"; during this time the demand for industrial land and units has declined supported in 2017 Employment Land Needs assessment of 3.9 hectares not the huge allocation of 10 hectares in send; the related traffic will place a huge burden on local roads surface quality and significantly higher traffic volumes with larger queues and poor air quality; joins up existing villages quashing the Green Belt.

Policy 2 Green Belt, paragraph 4.3.15. I object because: it is taking Sends businees park out of Green Belt policy; further expansion/development at this location detracts from the openness and appropriateness of green belt and it's protection; it will impact vehicle movement significantly using Tannery Lane; as a non-conforming user within The Green Belt it's expansion should be prevented.

I am writing to object to the plans Policy A25: Gosden Hill Farm, Merrow Lane, Guidlford.

Under the proposed changes, the Infrastructure (1) has changed from a ‘new’ junction to an ‘improved’ junction. ‘Improved’ is incredibly subjective and will be difficult to prove. Traffic is already jammed at rush hours - Burpham is notorious for ‘crawling’ traffic after 4.30pm. The addition of traffic from 1,700 homes without a specific, designated junction and only the requisite that the current junction is ‘improved’ is simply not enough to ease the flow. These are small residential roads, not designed to withstand the heavy flow of traffic coming in from the A3.
Glendale Drive and Winterhill Way will become a cut through road for many people if a separate off-slip for the new Gosden Hill estate is not built. The roads simply cannot take any more traffic and it is quite frankly dangerous with people speeding through and lots of children walking to and from the schools through this area.

Our neighbours and ourselves have already complained several times to the Council regarding the quality of the road and how potholes are appearing, large cracks which now shake the surrounding houses. The Council simply states it does not have the money to fix the roads. Adding 1,700 homes worth of traffic on top of the problem is not the solution. As I pointed out to a local Councillor, the Council may not have the money to fix the roads but nor do we, as home owners, have the money to fix our houses from the shaking-damage and supplement the Council’s negligence in maintaining the roads. A group of neighbours are seriously considering legal action against the Council for their continued refusal to solve the problem.

I would also like to point out that the A3100 is not a ‘corridor’ within Burpham. It’s a residential road, already under immense strain at peak hours. We are also aware that the southbound Burpham slip road is already over its weight allowance to support the number of cars using it during peak hours.

I would also like to raise an objection to the significant bus network to serve the site. I’ve already mentioned the road quality within Burpham, specifically Glendale Drive (Winterhill Way was recently resurfaced). I would like to challenge the interaction with the Arriva bus network 36 & 37, which speed down Glendale Drive, contributing to the cracks and shaking of the houses and are hardly utilized. I would like to know what impact the new bus network will have on the existing one? Would we need both? Would the new bus network need to also drive through Glendale Drive?

I find statement (11) contradictory of the ‘allocation’ where a secondary school is mentioned and yet (11) says it will be determined at the time;

Surely this can already be determined? Places at the local secondary schools are already at a premium and with the addition of 1,700 homes it is clear a lot of children will miss out – including those of us already living here. Another secondary school needs to be built to service these homes so as not to impact the education of the younger children already here whose parents have moved to the catchment area in good faith.

I’d also like to query statement (22) where an Employment centre HQ is being proposed. I am unclear how this fits in with Guildford’s mandate of building new homes? This is a job centre? Not residential homes. I feel like this is a ‘sweetner’ to the Council to allow the planning to go through, providing them with an Employment Centre HQ, but it doesn’t fit at all with the surrounding area which is residential. How does an office in the middle of a residential area work?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:  Objection_letter_regarding_A25_Gosden_Hill1.docx (64 KB)
I have looked carefully at the new draft Local Plan and I wish to OBJECT for the following reasons.

East Horsley is a small village which does not have the infrastructure of roads, rail, parking, medical facilities or schooling to support such a huge increase in population. Fifty seven percent of new housing proposed is on land that is currently categorised as Green Belt. This is flouting government law which established Green Belt to protect the countryside for future generations.

It is proposed that East Horsley is to be “inset” from the Green Belt. This proposed change in settlement boundaries means that the East Horsley settlement area will increase by 37%. At the moment, one hundred houses are proposed near East Horsley station and over two thousand on the former Wisley Airfield, only about one mile from the East Horsley parish boundary. The site at Wisley has recently been increased to now include two more farms!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

While the ONS forecasts population for growth for Guildford at 10.4% over the Local plan period, GBC proposes to increase the housing stock by 22%. Since Brexit, forecasts of increasing population numbers have been reduced, yet GBC are continuing to predict massive increases in population, which quite frankly, does not make sense.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to changes relating to policy A43 Garlick’s Arch because:

- Again you have ignored the thousands of previous objections.
- There are no “exceptional circumstances” required to develop on this Green belt.
- It will generate excessive traffic along the Clandon Road with associated noise and light pollution. This will be made even
worse if the adjoining Policy A58 is implemented.
- It would appear that there is no demand for Travelling Showpeople plots.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident of Clandon Road, Burnt Common i find it incredible that GBC have failed to listen to the residents of Send and Burnt Common who previously in force have objected to the proposed Local Plan. Instead you seem to have made further changes that result in more development rather than less, failing in the duty of GBC to listen to residents.

It seems that you are simply ‘testing’ the patience of residents by repeatedly making further changes without realising that your proposals are completely unacceptable. It is unjust that you are focussing a disproportionate level of development in and around the Burnt Common and Send compared with our areas of the Borough.

I object to changes relating to Policy A58 Burnt Common because

- This Policy was deleted from the 2014 Plan following previous objections.
- Additionally i see the Plan now references ‘Minimum’ rather than the original ‘Maximum’ referring to the 7,000 sq feet of industrial or warehousing. If the original proposal was deleted again i see no reason why the changed plan actually increases the proposed level of development.
- The impact on the Clandon Road and adjoining roads will create huge traffic issues, and noise and light pollution issues.
- There is no need to develop on this section of Green Belt land when other local sites including Slyfield and Guildford have empty existing sites and ‘brown field’ sites amiable.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to policy A42 change at Clockharn in Tannery Lane where there has been an increase from 45 homes to 60. This change takes no account of hundreds of previous objections made by local residents. The increase in numbers of homes will have a seriously detrimental effect on the traffic in the area, particularly as Tannery Lane is a small country road and should remain as such. This development is a significant erosion of the Green Belt in our area and is totally out of keeping with the rural nature and views across the River Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A43 change at Garlick’s Arch for the following reasons:

Again this change totally disregards the thousands of previous objections. It is a beautiful area of Green Belt with very valuable and beautiful ancient woodland – something which is totally irreplaceable. It is a massive development for a village of this size causing Ripley and Send to join up, something which Green Belt land is designed to prevent. Again – another development in this area will massively increase the congestion on surrounding roads, something which is already a particular problem in our area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A58 at Burnt Common, London Road - which was deleted from the 2014 draft plan because of objections made previously. It is totally unnecessary and inappropriate to build industrial units on Green Belt land in a village of this size. There are already suitable and available sites within Slyfield and Guildford. Again any increased movements of industrial vehicles on the surrounding roads will lead to total gridlock.

Green Belt Policy 2, at paragraph 4.3.15; I object to the proposal to inset Send Business Park from the Green Belt for the following reasons:

It is a non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation.

Tannery Lane, as previously mentioned, is a small country lane which should remain as such and is totally unsuited to increased traffic volume.

Any additional expansion or development in this position will have a significantly detrimental effect on the Green Belt land in this location.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

I also object to the removal from the Green Belt of homes in Guildford Road, Flexford, Palm House Nurseries site, Walden Cottages and Glaziers Lane. The likely high density development will only deteriorate the “openness of Green Belt” and mostly will be used by ‘London Commuters’ thus just becoming a ‘London conurbation’ and not meaningfully benefiting the local area.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to policy E4 Research Park expansion and we object to policy A26 Blackwell Farm.

The Council are proposing development on AONB, AGLV and Greenbelt land where there is no special circumstances and where such development will add to congestion and air quality issues which are already of serious concern to Residents and Businesses.

The Council objected to Waverley Plans for development at Dunsfold siting the impact of extra traffic, congestion etc to the A3 and also the Council object to development of a School and Housing at Fairlands (Rokers) in Worplesdon as inappropriate development which failed to mitigate its impact on infrastructure and the impact on the habitat of flora and fauna and the Council planning officers referred to the fact that the site was in the Greenbelt where there is a general presumption against inappropriate development. The Council Officers further stated that large scale residential development and a new school are inappropriate development which could only be approved in very special circumstances where the benefits outweigh the harm the development would cause. The Council Officers stated a school and housing do not amount to the very special circumstances necessary to justify grant of a planning application. However the Council include in their draft plan building on Blackwell Farm an area of outstanding natural beauty, Area of great landscape value and all in the Green Belt a school or schools and housing. No special circumstances are associated with this proposed development. Any attempt to argue economic necessity for expansion of the Research Park is negated as there is sufficient land and surface car parking at the existing Research Park and Manor Farm to allow expansion for the next 25 years without allocating more greenbelt land. The Research Park is a name only as many businesses on the existing park are just that businesses and with no great attachment to the University or research.

We therefore find it hypocritical of the Council to include Blackwell Farm in the revised Draft Local Plan. The extra traffic, congestion, delays and further damage to the air quality development at Blackwell Farm which would directly impinge on the two most congested junctions in Guildford at Egerton Road / A3 and A31 /A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

However the Council include in their draft plan building on Blackwell Farm an area of outstanding natural beauty, Area of great landscape value and all in the Greenbelt a school or schools and housing. No special circumstances are associated with this proposed development. Any attempt to argue economic necessity for expansion of the Research Park is negated as there is sufficient land and surface car parking at the existing Research Park and Manor Farm to allow expansion for the next 25 years without allocating more greenbelt land. The Research Park is a name only as many businesses on the existing park are just businesses and with no great attachment to the University or research.

We therefore find it hypocritical of the Council to include Blackwell Farm in the revised Draft Local Plan. The extra traffic, congestion, delays and further damage to the air quality development at Blackwell Farm which would directly impinge on the two most congested junctions in Guildford at Egerton Road / A3 and A31 /A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
We object to policy E4 Research Park expansion and we object to policy A26 Blackwell Farm.

The Council are proposing development on AONB, AGLV and Greenbelt land where there is no special circumstances and where such development will add to congestion and air quality issues which are already of serious concern to Residents and Businesses.

The Council objected to Waverley Plans for development at Dunsfold siting the impact of extra traffic, congestion etc to the A3 and also the Council object to development of a School and Housing at Fairlands (Rokers) in Worplesdon as inappropriate development which failed to mitigate its impact on infrastructure and the impact on the habitat of flora and fauna and the Council planning officers referred to the fact that the site was in the Greenbelt where there is a general presumption against inappropriate development. The Council Officers further stated that large scale residential development and a new school are inappropriate development which could only be approved in very special circumstances where the benefits outweigh the harm the development would cause. The Council Officers stated a school and housing do not amount to the very special circumstances necessary to justify grant of a planning application. However the Council include in their draft plan building on Blackwell Farm an area of outstanding natural beauty, Area of great landscape value and all in the Green Belt a school or schools and housing. No special circumstances are associated with this proposed development. Any attempt to argue economic necessity for expansion of the Research Park is negated as there is sufficient land and surface car parking at the existing Research Park and Manor Farm to allow expansion for the next 25 years without allocating more greenbelt land. Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3 Land Constraints

3.1 Policy S2: Planning for the borough – our spatial development strategy represents a central element of the Proposed Local Plan. The policy establishes the approach and spatial distribution of growth across the borough. Importantly, it also looks to balance required growth against the land designations and environmental characteristics of the area. In working to achieve this balance policy S2 adopts a sequential preference for town, appropriate village and brownfield land development.

3.2 However, the policy also recognises the that:

‘Whilst these sustainable locations are our preferred locations for new development, they are unable to accommodate all of the new development we need’ (paragraph 4.1.8).
3.3 As such, a limited number of large strategic sites are released around the Ash and Tongham Green Belt area, through town extensions and a proposed new settlement. This is in order to help accommodate future housing need with the dual intention of preserving the rural character and landscape designations across the borough.

3.4 Specifically, the Proposed Local Plan underlines the importance of the Surrey Hills AONB, the Metropolitan Green Belt (covering around 89% of the borough), countryside designations and Thames Basin Heath SPA. Given these land constraints and the implied limits reached in and around Guildford, the borough’s principle settlement, any future housing delivery options are likely to be very restrained without beginning to undermine the principles of sustainable development.

3.5 Given the extent of land constraint across the borough, and the resulting pressure on future growth options, we consider it unreasonable that the Council has not pursued more contingency discussions through the duty to cooperate, in order to address the potential for housing under delivery and resultant unmet housing need.

4 Housing Trajectory and Land Supply

4.1 The Guildford Borough Land Availability Assessment: 2017 Addendum outlines the current housing trajectory and reinforces the principle that the Proposed Local Plan is dependent on a limited number of backloaded larger site releases. These are the strategic sites discussed above in relation to Policy SC2 and are relied upon to deliver against the longer-term housing need throughout the mid to latter stages of the Proposed Local Plan period.

4.2 Within a context of land restraint, these strategic sites will all require simultaneous and prompt delivery in line with projected timescales in order to successfully and consistently meet housing need. This is with little margin for slower build out rates. Given the scale of these sites and the associated extent of infrastructure required to facilitate their development this is considered to be a very aspirational approach to planned development and raises doubt over the ability to meet housing need locally in the longer-term.

4.3 Adding to this, the housing trajectory is reliant on the build out of a number of approved, smaller sites across the borough in the shorter-term. Again, we consider this approach aspirational in the context of the current 630 dwelling shortfall in delivery since 2015, the limited 2.36 years of identified housing land supply and the operation of an additional 20% buffer to account for persistent under delivery. This is suggestive of an early under delivery of housing in the borough which will likely be compounded throughout the period through to Local Plan adoption and, ultimately, place greater reliance on the delivery of larger sites.

4.4 Given the apparent limitations on the long and short-term housing trajectory, in particular the reliance on backloaded larger sites, we consider that the Council needs to act fully and promptly through the duty to cooperate process to discuss contingency options which address any short fall in housing delivery and the resultant impact on the ability to deliver against housing need in the borough.

5 Conclusion

5.1 As demonstrated through this representation we consider that currently the Council have not acted fully to comply with the legal duty to cooperate. Current evidence points towards more of a technical process that fails to fully account for contingency against existing and potential unmet housing need across the West Surrey HMA. In relation to the borough this is particularly pertinent in light of local land constraints and a high reliance on a limited number of backloaded strategic sites, which, in the context of current housing under delivery, will likely result in an inability to meet housing need in the future.

5.2 We consider that it is important to resolve this issue before the adoption of a Local Plan for Guildford. As a part of this the Council should look to speak directly with Waverley Borough Council through the duty to cooperate process under the expectation that Waverley may need to adopt a proportion of Guildford’s unmet housing need.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1 Introduction

1.1 This statement of written representation prepared by Planning and Design Group (UK) Limited (“P&DG”) is made on behalf of our client Rowen Properties (London) Ltd in response to Guildford Borough Council’s (‘the Council’) consultation on the Proposed Submission Local Plan: Strategy and Sites, 2017 (‘the Proposed Local Plan’) for the borough.

1.2 Our representation is made in the context of seeking to work with the Council to ensure that an effective, sound and deliverable plan for the area is achieved. These representations have regard to the land that Rowen Properties control in Badshot Lea, Farnham within close proximity to the Council’s western boundary with Waverley Borough Council.

2 Executive Summary

2.1 This representation responds specifically to question four of the Council’s consultation exercise, in particular addressing compliance with the legal duty to cooperate. In doing so we will also draw and make comment on wider evidence presented by the Council.

2.2 It is considered that the Council, operating within the context of the West Surrey Housing Market Area (HMA), have not acted to fully comply with the duty to cooperate. Specifically, that evidence presented around the duty relating to housing delivery represents only a limited technical exercise and contains little contingency for meeting existing and potential unmet housing need locally. Whilst the evidence in the recent duty to cooperate thematic paper is recognised it is felt far more needs to be addressed on the matter.

2.3 In light of the apparent land constraints across the borough and a high reliance on a limited number of backloaded strategic sites to address housing need, a more diligent contingency is expected from the Council through the duty to cooperate. This should cover the shared and agreed approaches to delivering any and all unmet housing need in the event of under delivery across the boundaries of the HMA. Furthermore, it is considered that detailed conversations should be had with Waverley Borough Council about this issue prior to the adoption of the Council’s Local Plan. This is on the basis that Waverley may need to adopt a proportion of Guildford’s unmet housing need.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY A1 - The Plaza, Portsmouth Road, Guildford**

4.5 GVG would support this site coming forward for redevelopment and notes that an application has been submitted for 104 C2 units. GVG is interested to see if high quality design standards will be applied by GBC to this site, and if the massing is deemed to be appropriate to this location. The two disastrous high rise council blocks, directly opposite, should not be seen as a guide for what might be acceptable for this site.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY A14 - Wey Corner, Walnut Tree Close, Guildford**

4.31 This site needs to be considered as a single strategic parcel alongside other sites in WalnutTree Close such as A10 and A13. This ribbon of land sandwiched between rail and river is capable of providing a much better contribution to Guildford.

4.32 GVG support the principle of the scheme being allocated for development but would like to see a co-ordinated masterplan approach to sites in Walnut Tree Close.

4.33 In relation to policy A9, A10 A13 and A14, GVG considers that the entire area of Walnut Tree Close should be allocated for medium density, mixed use development, rather than taking the piecemeal approach that is analogous to the approach of GBC to the rest of the town centre.

**POLICY A24 - Slyfield Area Regeneration Project, Guildford**

4.34 GVG consider this to be a highly constrained site which includes flood risk, ecological and landscape constraints. It is noted that 11ha of the 40ha site is allocated for wastemanagement purposes under the development plan for the area. Once the other uses, such as industrial, open space, and areas for flood risk are accounted for, this would leave a constrained area to bring forward the proposed 1,500 units which would inevitably have to be delivered at a high density.

4.35 In addition to the proposed extension of Slyfield to the south (which is destined to be developed for residential uses at a considerable density) GVG recommends exploring an extension to the north for additional employment uses and a north Guildford Park & Ride at one end of the proposed Sustainable Movement Corridor. This can be achieved by removing an area of Green Belt that is former landfill with a narrower permanent green screen between the employment zone and neighbouring inset village of Jacobs Well. We also note the Plan is silent as to whether Slyfield might be the centre for CCHP facilities.

4.36 Given the high amount of industrial and commercial space to the north of the site, GVG consider that this would be a more suitable site for the relocation of industrial and commercial uses from the Walnut Tree Close and Woodbridge Meadows sites. Woodbridge Meadows is best suited to high density, high rise residential development and leisure space.

POLICY A35 - Former Wisley airfield, Ockham

4.40 The concerns around highways impact as set out against policy A26 remain the same for this site. GVG is more concerned that the size of site, at 2,000 units, is not big enough to support the proposed community in its own right. GVG believes the development of this site will lead to substantial pressure on the existing infrastructure, both locally and in Guildford town centre, and this is not currently mitigated under the proposed Local Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A4 - Telephone Exchange, Leapale Road, Guildford

4.11 It is noted that this site has now been removed as an allocation within the Local Plan. The reason stated within the summary of changes is that the site is no longer available but the reason for this is not clear.

4.12 It is understood that the lease of the current occupier will expire by 2025 which is within the lifetime of the proposed Local Plan. It is the position of GVG that this site remains a suitable site for housing and should be considered for CPO by GBC if no longer available. The communications infrastructure contained within the site could be relocated as part of any redevelopment of this site or as part of the adjoining North Street development.

4.13 Alternatively the building could be converted into residential use with the limited amount of communications equipment remaining in place.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY A46 - Land to the south of Normandy and north of Flexford

4.41 GVG notes that this site has now been excluded as a proposed site within the Local Plan. The reason set out within the summary of changes accompanying the Local Plan states that an alternative and preferable location for the new secondary school has been found which removes the exceptional circumstances to justify this site.

4.42 Given the sustainable location of this site in close proximity to Wanborough Station, it is disappointing that this site has been deleted. The sustainability appraisal (by AECOM) highlighted ‘new residents would have excellent access to the Wanborough train station’. Whilst the secondary school may no longer be required on the site, other uses should be considered on the site which would justify the exceptional circumstances of the site coming forward for development.

**Overall Commentary on plans for housing provision.**

4.43 GVG has provided a comparison of housing delivery between GVG proposals and GBC plans in appendix 9. GVG proposals can deliver approximately 3,367 homes (including student and retirement dwellings) compared to GBC plans of 931 homes in the same area. GVG plans achieve

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A6 - North Street redevelopment, Guildford

4.15 This is a key site for Guildford Town Centre and GVG supports the redevelopment for a range of uses. It is noted there have been four separate failed schemes by MEPC, Hermes, Westfield and Land Securities respectively. It is clear that the successful redevelopment of the site, as envisaged by GBC for decades now, is highly dependent on securing a main anchor tenant. Discussions have been ongoing for some time with John Lewis. It is clear from recent publicly available information that John Lewis, and indeed many anchor retailers, are unlikely to open any additional stores at present (appendix 8) beyond those identified already.

The site should be developed with town centre uses but not subject to overdevelopment.

4.16 It is noted that the proposed 41,000 sq m of comparison retail floorspace and 6,000 sq m of food and drink is the same as the forecast for the total borough-wide floorspace capacity for comparison shopping and food and beverage uses as set out at para 4.40 in the Retail and Town Centre Topic Paper up to 2030. The current proposals for this quantum of retail space and 400 dwellings appears to be overdevelopment of the site; when the allocation claims the total retail allocation for the borough. The town centre masterplan will require retail and leisure accommodation at ground floor to create the appropriate quality of environment. This site has not, to date, been included in the GVG Masterplan as it was considered to be at an advanced stage of development. With the likely absence of a major department store and question marks over the site, the site should be redesigned and masterplanned to contribute to needs of an integrated town centre.

4.17 It is therefore considered that GBC needs to consider alternative schemes for this site, including its capacity for more housing, in order for the site allocation to be considered as sound. It is also considered that this is a more suitable site for the relocation of the cinema from site A2.

Answer (if comment is on questions 1-7 of the questionnaire): ()

<table>
<thead>
<tr>
<th>POLICY D2: Sustainable design, construction and energy</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.56 GVG supports the laudable policies on ensuring new development minimises the need for heat and energy through quality design and construction, and requiring developers to provide statements as to how this is to be achieved. However, GVG is concerned that the Plan has only taken a very narrow view of the “Energy” position, both in the UK and locally, only to minimum NPPF requirements. Requiring developers to utilise only Renewable Energy Sources and then not making any provision for them in the Plan will, in effect, limit the amount of new development possible in the Borough. The GBC-commissioned report by the Centre for Sustainable Energy concluded that only very limited amounts of Renewable Generation was “deployable”.</td>
</tr>
<tr>
<td>3.57 The Policy section on Energy does not extend far enough into either the general shortage of supply of any energy or the demand side. It does not allow for, amongst others, the impact of electric vehicles, the use of Smart Grids and Battery Farm Storage potential. There is also no mention of the potential for Carbon Sequestration.</td>
</tr>
<tr>
<td>3.58 GVG takes the view that a review of the general energy provision, both from the National Grid and Renewable Sources needs to be included in the plan. The Local Distribution network operator needs to be consulted as to what power availability there is to support the Borough’s aspirations for both economic and domestic development.</td>
</tr>
<tr>
<td>3.59 Options for Renewable Local Embedded Energy Centres need to be part of any Plan, along with the consideration of the application of smart grids and battery storage farms. Financial support from the CIL levy could support retrofitting on large warehouse roofs at Slyfield and other big industrial estates, for instance, as GBC is the freehold owner of a number of the industrial estates. Advanced Thermal treatment is in wide use throughout Scandinavia, Europe and the Far East and there are an increasing number of plants in the UK. This has the potential to provide substantial renewable power and heat</td>
</tr>
</tbody>
</table>
locally. The minimum requirement should be for all new development to be linked into Smart Grids which then manage and reduce significantly the power usage automatically.

3.60 GVG believe a far more proactive approach is needed to the consideration of energy and heat provision in the Plan, leading our town towards a low and zero carbon future whilst still promoting growth, new jobs and homes. As it is, the Plan seeks merely to pass this on to individual developers to deal with the matter on a piecemeal basis.

3.61 Only a comprehensively masterplanned town centre will enable sustainable energy to be harnessed and employed successfully and productively. The masterplan approach favoured by GVG would enable sites to be planned in a conjoined way and make it possible to deliver a unique energy network in the town centre with the ability for future phases of development to plug into this in later years of the Plan process. Piecemeal planning will not achieve that outcome and the town centre is one of only three areas in the borough where such benefits can be achieved.

3.62 Section 4 of policy D2 sets out that combined cooling heating and power (CCHP) networks will be strongly supported and encouraged. However, the current piecemeal approach being taken to different sites within the town centre by GBC will hamper the viability and deliverability of a CCHP network. The Plan is silent on any potential sites for CCHP central facilities, GVG believes the Slyfield Regeneration Proposals offers potential to provide a ‘state of the art’ CCHP facility.

3.63 Overall, the aims of this policy need to be fundamentally reconsidered and the council must recognise the role which a properly masterplanned town centre has to play in the delivery of this policy.

**POLICY E1 - Meeting employment needs**

3.31 Policy E1 has been revised to reflect the change in the lifetime of the Local Plan. However, as a result, the number of class B1 jobs has been increased from 3,200 to 4,100. The reason for this increase is unclear and has not been referenced within the summary of changes to the Local Plan which accompanies the document. However, in direct contradiction to this increase, the amount of floorspace allocated for these jobs has decreased from a range of 37,000-47,000 sq m to a range of 36,100 - 43,700 sq m. Again the reason for this change remains unclear and requires further clarification. GVG recognises and supports the success of the University of Surrey in supporting the formation of a series of technology based industries in the borough. The Plan should recognise the need to support this growth, both at the research park, and elsewhere in borough by the provision of appropriate accommodation.

3.32 GVG believes the allocation of the Walnut Tree Close and Woodbridge Meadows sites as employment zones is consistent with backward-looking planning but not the forward-looking Plan that GVG is seeking. If 10 Ha of employment land from both of these areas was relocated to either the Gosden Hill Farm or Blackwell Farm allocations (both to be served by the SMC and new rail stations), they would displace land for appropriate residential densities at 30-40 dwellings per hectare (DPH) giving a total of up to 400 homes. However, the area which would be created at Walnut Tree Close and Woodbridge Meadows through rezoning would be appropriate for densities of up to 200 DPH delivering up to 2,000 homes. This would deliver a net increase of 1,600 homes across the lifetime of the Plan for an equivalent land take.
POLICY E2 - Location for new employment floorspace

3.33 The first part of policy E2 sets the sequential approach which needs to be followed to determine where new office and research & development floorspace will be located. Guildford town centre has given preference to areas within 500m of a transport interchange, and then to strategic employment sites.

3.34 The second part of policy E2 has been changed to now state that the sequential approach does not apply to proposed floorspace included in the site allocations in the Local Plan.

3.35 The inclusion of this part of the policy significantly undermines the overall strategy for the provision of floorspace in the borough. The addition of this wording is in direct contradiction to the first part of the policy which directs development to the town centre. It now demonstrates that there has been little rationale to including employment space on the strategic allocations other than to meet the need specified in policy E1.

3.36 Paragraph 4.416 within the definitions section of policy E2 states that:

When developed, the two new rail stations, Guildford East (Merrow) and Guildford West (Park Barn), will each be treated as a transport interchange.

3.37 GVG has considered the impact of Guildford West (Park Barn) being considered as a transport interchange. This would reinforce the rationale of GVG promoting the provision of high density, residential units on Woodbridge Meadows with provision of health, retail and leisure facilities alongside the amenity of the River Wey navigation. It is the most sustainable and arguably deliverable site in close proximity to the town centre where the freehold is mostly owned by the council. GVG identifies the ability to provide 1,300 dwellings at this location in addition to 5,000 sq m of other uses including retail, health care and sports facilities.

3.38 GVG has also considered the impact of the proposed Guildford East (Merrow) station being considered as a transport interchange. It supports this proposal as it enables access to employment both in the town centre and in the research park via the rail network (Guildford West). GVG notes careful phasing of rail station development, and associated rail services, is required to bring the infrastructure into operation before housing and commercial space is made available in large quantities.

3.39 Whilst Woodbridge Meadows is zoned for Employment Uses in the Plan, there is no specific allocation or strategic site. This is despite the freeholds being in the Council’s ownership significant amounts of land being vacant or underused and the need for a comprehensive flood protection scheme to hold water upstream of the constraint caused by the 1930s A25 Guildford Bypass southbound bridge which is low over the river.
POLICY E6 - The Leisure and Visitor Experience

3.40 The introduction to policy E6 sets out the aspirations of GBC for leisure and visitor experience and at paragraph 4.4.56 text has been added to state that:

*The Local Plan aspires to improve and diversify the leisure and visitor experience in the borough. Stimulating vibrant town and district centres, encouraging the provision of additional visitor and business accommodation in appropriate locations, protecting our special natural landscapes and preserving our historic built environment will be important to achieving this. GVG wholeheartedly agrees with this statement of intent from GBC but this.*

3.41 underlines the importance for a more co-ordinated approach to the development of the town centre than is currently being planned for under the draft document.

3.42 It is recognised that retailing is undergoing a major transition and complementary leisure experiences are essential in order to extend dwell times. Guildford is clearly well placed to bring forward the River Wey navigation as a visitor experience, complementing amenities such as the Castle, Sports Centres, and surrounding Green Belt. The introduction of pedestrianisation and removal of traffic from the town centre, which are not provided for in the Plan, can produce additional benefits.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

### Policy E7 - Guildford Town Centre

3.43 In the introductory text to Policy E7 the Vision, as previously set out, has been removed and replaced with reference to the Guildford town centre as described in the spatial vision on page 22 of the draft Local Plan.

3.44 The removal of the vision for Guildford town centre and replacement with more generic spatial vision for the borough fundamentally undermines the thrust of Policy E7 and is again indicative of the watering down of the ‘town centre first’ approach by GBC in meeting the development needs of the borough or aspirations of the community. It is recognised that GBC may not have the skills, resources or appetite to deliver major solutions but others have, and a quality Local Plan is an essential pre-requisite to delivery.

3.45 Later at 4.4.74, additional text has been added in reference to public realm which now states that:

*We will ensure the public realm is enhanced and insist that all new development will be of the highest design and environmental standards. We will also take opportunities to reconnect the own centre to the amenity of the riverside.*

3.46 This again highlights the piecemeal approach to development of the town centre which is being taken by GBC. If public realm is to be delivered to the highest quality then a coordinated approach is required, such as that demonstrated by the GVG Masterplan. The GVG Plan brings together the riverside with the pedestrian areas of the town centre through planned and connected cycle routes and footpaths along desire lines while removing the serious blight of traffic from pedestrian and activity concentrations.

3.47 Turning to policy E7 itself, text has been deleted from this policy which previously stated that by 2033 Guildford town centre will have:

- More varied uses during the evening and night time, including along the riverside with residents and visitors feeling safe;
- Active use of the riverside and river;
- More effective routes within and across the town centre for pedestrians and cyclists;
- New public squares and other informal meeting areas.

3.48 It is unclear why these elements of policy E7 have also been removed as GVG considers them to be vital in order to achieve successful regeneration of the town centre. No explanation has been offered by GBC as to why these have been excluded from the Plan and it is requested that these are reintroduced as part of policy E7.

3.49 The council in para 4.4.87 states that it will work with partners to deliver the Local Plan and to progress further opportunities within the Guildford Town Centre Regeneration Strategy. No such work has taken place with The Guildford Society, GVG, or Guildford Residents Association and accordingly the ambitions of the community have not been embraced.

3.50 In the Reasoned Justification section following the main policy text, further wording has been removed at para 4.4.86 which related to flooding. As set out previously within these representations, the issue of flooding within the town centre is a vital issue which requires a co-ordinated approach as advocated within the GVG Plan. It is therefore necessary to reintroduce this wording and strengthen it where necessary to reinforce the importance of flood solutions as part of the regeneration of the town centre.

3.51 The Allies and Morrison draft Town Centre Vision 2015 and draft Guildford Town Centre Masterplan 2015 have been removed from the Key Evidence supporting this policy with only the Guildford Town Centre Regeneration Strategy remaining in place. This document is considered by the council as having no planning status and can accordingly be ignored by developers. This demonstrates the lack of detailed vision or commitment towards the town centre issues and opportunities on behalf of GBC and highlights the robustness of approach taken by GVG in the vision for the wider area.

3.52 Having reviewed the Guildford Town Centre Regeneration Strategy, GVG consider it to be an inadequate document which is flawed on many levels. It fails to recognise or address the key issues on all infrastructure and highways. These require resolution as part of a successful regeneration of the town centre. GVG attributes little weight to the Town Centre
Regeneration Strategy and considers that it does not provide an adequate evidence base on which to inform the strategic decisions for either GBC or developers across the lifetime of the emerging Plan.

**POLICY H1: Homes for all**

3.8 GVG supports the focus within the Local Plan to provide high quality homes to meet a range of needs across the borough.

3.9 The reasoned justification in para 4.2.3 sets out the need for development as supported by the SHMA and addendum report 2017. This demonstrates that there is a high need for one bedroom (40%) and two bedroom (30%) dwellings. These dwellings are clearly more suitable in a town centre environment and this provides further justification for the role of Guildford town centre as recipient of housing. It highlights the requirement for a comprehensive regeneration of the town centre to be placed at the centre of the Local Plan.

**POLICY H2: Affordable Homes**

3.10 GVG supports the provision of affordable housing as part of providing mixed and sustainable communities across the borough.

3.11 However, under the second bullet point of policy H2, it states that the Council will seek affordable homes on sites providing five or more homes, or sites of 0.17 ha or more regardless of the number of homes.
3.12 This policy does not reflect the established national policy as set out in the Written Ministerial Statement of 28
November 2014. The Council can only implement a lower threshold, where schemes of six or more dwellings can
contribute cash payments towards affordable housing, and tariff style items, in 'designated rural areas' under Section 157 of
the Housing Act 1985. GVG is concerned that this policy will have a viability impact on the delivery of important smaller
infill sites in the town centre that will contribute towards the successful regeneration of the wider town centre.

3.13 It is therefore suggested that this policy is amended to ensure it is viable, deliverable and consistent with national
guidance.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY ID1 - Infrastructure and Delivery

3.64 The NPPF sets out at para 162 that:

*Local planning authorities should work with other authorities and providers to:

- assess the quality and capacity of infrastructure for transport, water supply, wastewater and its treatment, energy
  (including heat), telecommunications, utilities, waste, health, social care, education, flood risk and coastal change
  management, and its ability to meet forecast demands

- take account of the need for strategic infrastructure including nationally significant infrastructure within their area

3.65 GVG recognises the vital importance of the new infrastructure that will be required to support and mitigate the impact
of the growth set out in the Local Plan.

3.66 Paragraph 4.6.2 sets out the wider definition of Infrastructure under the Planning Act to include roads and other
transport facilities, flood defences, schools and other educational facilities, medical facilities, sporting and recreational
facilities, and open spaces, all of which are recognised and addressed within the GVG Masterplan.

3.67 The policies immediately following policy ID1 set out the strategy for road investment (ID2), sustainable transport
(ID3), and green and blue infrastructure (ID4). However there is no other specific policy relating to other infrastructure, as
defined under the Planning Act, to include flood defences, schools and other educational facilities, medical facilities,
sporting and recreational facilities, and open spaces.

3.68 In relation to rail infrastructure, GVG, as part of its Plan, has produced detailed proposals for the station quarter which
enhances the connection of the rail station to bus, road, rail, cycle and footpaths. GVG recognise the required 40% increase
in capacity described in the Wessex Plan, Heathrow Southern Rail Access and other studies and has designed new
platforms and a modern transport interchange for the future. Increases in services and new journey opportunities afforded
by Guildford East and West Stations plus regular services to the villages south east of Guildford, Heathrow etc. will result
in the rail station becoming an even more significant hub for the region. The GVG Plan includes detailed proposals for the
rail station quarter which enhances the connection of the station to bus, road, rail, cycle and footpaths.
3.69 There is a requirement to consider other essential infrastructure if the Local Plan is to be found sound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY ID2 - Supporting the Department for Transport's 'Road Investment Strategy'

3.70 As already set out in this consultation response, GVG has concerns that the local plan is silent on the plans and delivery aspirations of other key stakeholders such as Highways England.

3.71 An example of this is where the text in paragraph 4.6.17 has been removed, relating to the agreement of a statement of common ground between GBC and Highways England. In the summary of changes to the Local Plan it is suggested that this text has been removed as this will be agreed closer to the Examination. This position is concerning, as the impact of development upon the A3 and road infrastructure is critical in the development of the Local Plan and it is therefore vital that this is agreed at consultation stage if the Plan is to be found sound. Furthermore, if the A3 is improved as proposed, there will be clear potential for increased north-south traffic through the town and surrounding villages getting to and from the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY ID3 - Sustainable transport for new developments

3.72 A substantial amount of text and additional policy has been added to policy ID3 in relation to sustainable development, however, most of this text relates to vehicle movements and car parking.
3.73 GBC is assuming substantial modal shift in the town centre. GVG supports this aspiration. However, GVG believes the scale of modal shift proposed by the council – around 40% - will be very difficult to achieve due to the continuing need to access the town centre for retail and commercial activity and the Rail Station.

3.74 The inserted text at para 4.6.30a relates to Guildford town centre and recognises the congestion problem, especially the gyratory, as does GVG. The inserted text states that:

This is, in part, a consequence of a mismatch between the demands for, and supply of, public off-street car parking on the different approach needs. The policy with respect to the provision of additional public off-street car parking is designed to reduce the impact of these trips on traffic volumes and congestion in the town centre. This planning policy will complement future environmental improvements in the town centre realising the Council’s 'drive to, not through' concept.

3.75 GVG does not accept this explanation for congestion or the proposed solution.

3.76 The revised approach adopted by GBC on traffic completely ignores the role of Guildford as a regional and sub-regional destination. It also ignores the enhanced pull of Guildford if town centre regeneration comes forward at levels as expected by both GVG and GBC.

3.77 The approach of GBC is completely at odds with the principles of sustainable development and the requirement for modal shift away from cars to other forms of public transport.

3.78 The GBC plan is silent on measures to mitigate North South Traffic through the town centre which will be exacerbated by developments south of the borough e.g. major housing at Dunsfold and significant housing growth in Godalming. In the absence of any substantive plan to by-pass Guildford on a North-South axis, handling traffic from the A281, A3100 and A25, Guildford will have to support an increase North-South Traffic. The GVG Plan allows for traffic to be supported at current levels, whilst reducing accidents and pollution in the town centre. The GVG plan also provides for major environmental wins around areas allocated to housing, leisure, commerce and tourism in the town centre.

3.79 GVG supports the concept proposed by the council of 'drive to, not through' the GBC plan does not support this concept practically by creating provision for interceptor ‘Park and Ride’ car parks, or the better utilisation of bus and rail networks. The only new ‘Park and Ride’ in the plan appears at Gosden Hill linked to Guildford Station East proposals, but no capacity is proposed. The plan is silent on opportunities based at Shalford Station and north of the town in the Slyfied area.

3.80 GVG notes that there are approximately 5,800 car parking spaces in the town centre. Many of these spaces are in large surface parks that represent a lost opportunity for other uses. GVG are concerned that revenue generation from car parking may be clouding GBC’s long-term plan making judgement.

3.81 The masterplan as prepared by GVG demonstrates a pedestrian and cycle friendly environment where the gyratory is replaced with a new bridge link to take through traffic away from the town centre and from areas of high pedestrian activity. Whilst GVG accepts that according to the Guildford Town and Approaches Movement Study that highway interventions are generally unsuccessful in providing infrastructure solutions, the GVG crossing is about removing the maximum areas of conflict between town centre, pedestrians and vehicles. It delivers environmental improvements to the riverside, new homes, and will assist in achieving modal shift. The bridge link will also remove traffic from the proposed new housing, retail

3.82 and the visitor areas, leaving the town centre available for an improved pedestrian environment in close proximity to sustainable methods of transport, the retail core and a reconnected riverside. The GVG also allows for the creation of the proper transport interchange centred on a revised and expanded rail station. This crossing can be delivered in a phased approach without disturbing the current town centre.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY P4: Flooding

3.16 Bullet point 3 of policy P4 sets out that:

*Development proposals in the 'developed' flood zone 3b will also only be approved where the footprint of the proposed building(s) is not greater than that of the existing building(s)*

3.17 The centre of Guildford is affected by flooding from the River Wey. Large parts of the town centre alongside the river are within flood zone 3b. If the wording of policy P4 is to be followed, there is no restriction, other than the established development management policies, on the height of the buildings that could be developed on the sites. The GVG Masterplan seeks to avoid earlier mistakes and addresses the central issues around flooding, to the benefit of the town centre and better provision of housing in a materially improved setting.

3.18 The flooding topic paper which forms part of the evidence base for the Local Plan sets out at para 5.9 that:

*The Council’s Level 1 SRFA notes that some of Guildford’s functional floodplain (flood zone 3b) has historically been built upon. The document therefore differentiates between the 'developed functional floodplain' and the 'undeveloped functional floodplain'. Whilst the NPPF states that the functional floodplain should be reserved for water storage and flow in times of flood, the SRFA argues that development or redevelopment in the 'developed functional floodplain' may be acceptable when flood risk betterment, appropriate mitigation and risk management can be achieved and implemented.*

*Given the findings of the Level 1 SRFA, it is reasonable to argue that the functional floodplain does not need to be entirely excluded from development and can contribute to accommodating the borough’s objectively assessed needs, if betterment, mitigation and management can be achieved.*

3.19 Whilst the main thrust of policy P4 complies with guidance on sequential and exception tests, the requirement of development proposals to not be greater than the footprint of the existing building fundamentally undermines the potential of town centre sites to deliver significant levels of housing or other uses.

3.20 The GVG Masterplan considers an innovative solution to protection of future residents from flood risk by raising the street level above current levels. It places car parking and other compatible uses on the lower ground floor or undercroft, while residential units are placed on upper floors with dry access provided in the event of a flood.

3.21 Furthermore the second point of bullet point 3 states that:

*Proposals within these areas should facilitate greater floodwater storage.*

3.22 The masterplan as prepared by GVG seeks a strategic approach to the potential for floodwater storage in areas of functional flood zone through the provision of substantial sustainable urban drainage systems. These could be accommodated under areas of public open space. The provision of large areas of tiered public open space around Guildford Wharf, Walnut Tree Close and Woodbridge Meadows will also allow for the improvement of the area of functional floodplain within the town centre.

3.23 The delivery of policy E7 in relation to Guildford town centre supported by Guildford Town Centre Regeneration Strategy 2017, with the previous links to the Allies and Morrison draft Town Centre Vision (2015) and the Guildford Town Centre Masterplan (2015) now having been deleted.
3.24 Whilst the Allies and Morrison vision and masterplan previously sought to avoid the areas of functional flood plain for development, the Guildford Town Centre Regeneration makes reference to the provision of Enhanced Amenity and Flood Protection. This section recognises the potential for development in areas of flood zone but does not satisfactorily set out a solution or conjoined strategy to deal with these fundamental issues. The document states that:

As sites and schemes are investigated in more detail, viability issues will invariably come in to play and decisions will need to be made as whether to progress certain major projects. This is one of the reasons that the Town Centre Regeneration Strategy and its associated Work Programmes are intended to be 'living, flexible documents'.

3.25 GVG submits that this level of ambiguity and lack of commitment is simply not good enough to support the delivery of material quantities of housing in the town centre. This requires a coordinated and comprehensive approach. This is what GVG recommends and have allowed for under its preferred approach for the town. The current approach of GBC (see appendix 6 with site marketing particulars) through piecemeal development of town centre sites does not allow for a co-ordinated approach to flood risk which is of significant importance for the success of the wider development strategy for the borough, or other strategic objectives such as power delivery and district centres. It also at the same time fails to positively and comprehensively address urban form that currently contributes to flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P5 - Thames Basin Heaths SPA

3.26 Policy P5 requires all sites of over 50 net new dwellings to provide avoidance and mitigation measures for the SPA. The importance of the SPA and mitigation is understood and respected by GVG. However the imposition of mitigation measures on individual town centres presents a viability constraint which favours use of green belt sites rather than brownfield.

3.27 There is already a good proportion of open space within the town centre (in a borough with 89% of the land designated as green belt). More would come forward if a deliverable masterplan is approved. This can be then counted towards provision of SANG land with no requirement to provide contributions to other land outside of the town centre.

3.28 Within Guildford much of the urban area is under provided for open space on a pro-rated basis, it is the surrounding common areas that give Guildford its character and, if preserved, these should be sufficient to provide sustainable alternative natural green space for any and all development in the town centre without requiring further SANG. The increased riverside park proposed by GVG (and the Allies and Morrison plans) would add to the provision of accessible green space for residents and visitors to the town centre.

3.29 It is therefore suggested that the requirement for town centre sites, developed as part of a comprehensive plan, to contribute to SANGs land is removed from the Local Plan to increase the viability of these sites to develop sufficient affordable housing units, and to help meet the additional infrastructure burden.
3.30 The Evidence Base includes a viability assessment dating from 2014 which is considered to be historic in plan making terms and should be updated. The Infrastructure Delivery Plan has gone from 'the developer will contribute' to 'funded by the developer'. Affordable housing viability comes after SANG, CIL s106 and so forth. There is absolutely no indication in the Local Plan that a single affordable housing unit would be built on this basis.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Introduction and Background Information

1.1 PRP was formally appointed by Guildford Vision Group (GVG) in May 2017 to represent it in the submission of a detailed response to the regulation 19 consultation on the proposed submission Local Plan for Guildford Borough Council (GBC).

1.2 Guildford is a gap town and the focus of a number of particular problems. The town has confined road, rail and river corridors, topographical issues and a historic core, all of which add to the complexity of Guildford along with a major investment deficit in infrastructure.

1.3 GVG, which is comprised of people who have long resided in the borough, and who often have relevant professional expertise on planning matters, was established on 21st March 2012 at a public meeting with the aim of working towards a deliverable masterplan for Guildford. Initial activity analysed the state of the town centre and identified 17 issues. Several background documents are appended to this consultation response, including The History of GVG (appendix 1), and 'Who is GVG' (appendix 2).

1.4 GVG produced a document in 2013 entitled 'Guildford on the Way' (appendix 3) which serves as a helpful summary of the aims of the group and was supported by members of the public and included their contributions. This document was submitted as part of the response to the Guildford Local Plan Regulation 18 consultation in 2014 by both GVG and The Guildford Society.

1.5 GVG has identified 17 key issues related to the town centre which require addressing:

1. Road safety
2. Pollution
3. Traffic blight
4. Traffic management
5. Lack of pedestrianisation
6. Proper use of riverside
7. Flood prevention
8. Railway station
9. Bus station
10. Cycleways
11. Access and parking
12. Housing
13. Student accommodation
14. Business space
15. Social buildings
16. Arts & education provision
17. Leisure facilities

From these 17 issues GVG has set itself six keys goals to transform

1.6 the town centre:

1. Wider pedestrianisation of the town centre
2. Exciting new public space and a reinvigorated riverside
3. Redirection of traffic away from the town centre
4. An integrated road and rail hub
5. More town centre housing
6. A new bridge for a better East-West link

1.7 Sustainable, environmental and infrastructure solutions can be forthcoming but only realistically with comprehensive, integrated and master planned solutions. The draft local plan fails to recognise or make a case for this, or any approach to capture and address any of the '17 issues' GVG has identified.

1.8 GVG notes that, although Guildford has been one of the most economically successful towns over the past 30 years, this position is under threat from infrastructure deficit and a lack of commercial space and housing. GVG also notes the emerging desire, via LEPs and County Councils, to collaborate in an arc of towns around London, stretching from Cambridge via Oxford to Reading, Guildford and Ashford. This is a major opportunity for high tech businesses in particular to collaborate. Guildford, with the right vision and leadership, can build on its strengths, based on the University and the associated Research Park, to take advantage of this opportunity.

1.9 Town centres are subject to major challenges due to changing patterns of retailing, new transport possibilities e.g. autonomous cars, and the need to become far more environmentally benign. GVG believes the Plan is a missed opportunity to position Guildford town centre for the future.

1.10 In particular, land use for the whole of the town centre has not been considered effectively e.g. GVG is aware of several sites that may be subject to redevelopment in the planning horizon that are not in the Plan. Environmental factors are also inadequately covered e.g. District heating, power generation and flooding. Finally, traffic issues are not addressed nor the interchange between modes of transport.
1.11 The draft plan proposes a Guildford with a quantum leap in shopping space that will be inaccessible due to inadequate transport provision. New housing is scattered around the edges of the town centre with inadequate provision made for transport and other facilities. Proposed employment centres may exacerbate transport difficulties e.g. more cross-town commuting.

1.12 The GVG proposals provide an opportunity to build an environmentally friendly town centre, with the flexibility to optimise housing and commercial space.

1.13 A key ambition of GVG is to enable growth whilst delivering environmental quality for the community through a comprehensive, masterplan-led solution. The current draft Local Plan fundamentally fails to consider how this can be achieved in the town centre, and indeed the wider borough. These fundamental goals are central to this consultation response and are relevant to many of the specific policies being consulted on.

1.14 In 2016, GVG persuaded the council to commission a town centre masterplan, the first of its kind since 1943, through Allies and Morrison Urban Designers. However, GVG was concerned that the undisclosed brief did not require the masterplan to adequately address road and other infrastructure issues. Accordingly, GVG feels it has had limited value. In response to the perceived limitations of the masterplan and using professional town planners, GVG has commissioned and published its own masterplan for the entire town centre (appendix 4) in January 2017. This has received support through press, newsletters and social media and at a number of public events.

1.15 The National Planning Policy Framework (NPPF) is very clear on the role which town centres have to play in the growth of boroughs:

Local planning authorities should plan positively, to support town centres to generate local employment, promote beneficial competition within and between town centres, and create attractive, diverse places where people want to live, visit and work.

Local planning authorities should assess and plan to meet the needs of main town centre uses in full, in broadly the same way as for their housing and economic needs, adopting a town centre first’ approach and taking account of specific town centre policy.

1.16 It is considered that the draft plan presented by GBC has fundamentally failed to consider this most basic of planning principles and on this issue alone the Plan is unsound. There are a number of more specific planning policies on which GVG has comments. They are addressed in turn throughout this document.

1.17 This submission builds upon much of the previous work undertaken by GVG which has submitted representations on the previous consultations of the Local Plan in 2014 and 2016 (appendix 5).

1.18 The Regulation 19 consultation includes a significant amount of red-lined (amended) text and policies, each and many of which will, separately and in the context of the entire Local Plan, have some impact on other elements - particularly on the town centre and its crucial infrastructure. It also substantially alters the evidence base without any impact assessment on the Local Plan itself and on any unaltered policy and associated commentary. In its response GVG has attempted (to the best of its ability) to assist the Council to understand how the proposed submission draft Local Plan falls short of the requirement to be a forward-looking Plan that is balanced and sound.

1.19 The GVG Masterplan has been prepared to meet all stated criteria of the policies in the draft Local Plan, as well as meeting criteria to mitigate the 17 issues identified by the group. In addition, it has tested its masterplan to ensure that it is practical and deliverable. GVG has concerns, as detailed below, that the draft plan is not sound and will fail to be pass examination stage, with consequential impact on Guildford and its environs.

[Extract from GVG Masterplan - appendix 4]

1.20 Overall the draft Local Plan demonstrates reluctance by GBC to build new housing before infrastructure is provided. Whilst GVG understands this reluctance it does not demonstrate the forward thinking that is required for Guildford over the next 20 years. It does not provide solutions which GBC can begin to implement without fundamental reliance on external...
agencies (as is the case with much of the enabling infrastructure in the draft submission Local Plan). If the Plan is carried out as presented by GBC, there will be an increase in population in the wider borough with none of the associated increase in social or physical infrastructure that is required. The pressure that will be put on Guildford town centre from the growth of the borough, and indeed that of surrounding boroughs, will lead to excessive stress on the already failing infrastructure in the town.

1.22 Through properly masterplanning the town centre, alongside a fundamental redesign of the physical infrastructure, the GVG Plan is able to deliver substantial additional benefits over and above just housing growth including business space, environmental benefits, tourism, leisure power solutions, and flood defence.

1.23 GVG is therefore extremely concerned that the proper masterplanning of the town centre and the Area Action Plan for the town centre are not being prioritised alongside the Local Plan and instead being delayed until after potential adoption of what GVG would consider to be inconsistent policies.

1.24 The opportunity to deliver a world class town centre can be achieved but requires a coordinated approach with all interested parties, and in which the GVG Plan can play a part.

Local Plan Consultation 2. Requirements

2.1 Of the 12 Core Planning Principles set out in paragraph 17 of the National Planning Policy Framework (NPPF) the first clearly states that planning should:

Be genuinely plan-led, empowering local people to shape their surroundings, with succinct local and neighbourhood plans setting out a positive vision for the future of the area. Plans should be kept up to date, and be based on joint working and cooperation to address larger than local issues.

2.2 As a town, Guildford plays a much wider role than just providing for the immediate needs of those in the borough. Its sub regional role means that the future of Guildford town centre will have significant bearing on those living within the much wider sub-regional area. The recent South East Missing Links Study 2016 identified the importance of South East Region towns collaborating over commercial activities to ensure the region continued to prosper as a vital economic engine for the country. Guildford is a key centre in the South East Region.

2.3 GVG has consistently attempted to engage with GBC to bring forward a comprehensive Plan for Guildford town centre which addresses the significant opportunities and constraints currently experienced in the town centre. The previous Allies and Morrison masterplan and updated Town Centre Regeneration Strategy fall significantly short of resolving these issues, even if there was an intention shown to adopt them in policy.

2.4 Paragraph 155 of the NPPF goes on to state that:

Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.

2.5 The 17 issues as outlined previously represent the collective vision as set out in para 155 of the NPPF and that GVG consider itself to represent a wide section of the community. GVG has engaged with officers and senior staff within GBC via a series of meetings since its formation. For reasons that are unclear, the council has expressed only cursory interest with the details of the GVG Plan, and has studiously ignored reference to it in any communications and consultations. From 2012 to 2017 the message from the council has consistently been that they have been too busy with Local Plan issues to address the issues around the town centre (which is central to the GBC area!) or make officer time available. Requests for collaboration and further information have been met with indifference over a dozen or so meetings with GBC and no information has been voluntarily supplied. Much of the information which GVG has reviewed has been obtained through Freedom of Information requests. GVG has been frustrated by the non-engagement of GBC. This is in direct contradiction to para 155 of the NPPF which forms a fundamental consideration in the development of the GBC Local Plan.
In examining the Local Plan the appointed inspector will need to consider the conformity with paragraph 182 of the NPPF which states:

The Local Plan will be examined by an independent inspector whose role is to assess whether the Plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is sound. A local planning authority should submit a Plan for examination which it considers is “sound” – namely that it is:

- **Positively prepared** – the Plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;

- **Justified** – the Plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;

- **Effective** – the Plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and

- **Consistent with national policy** – the Plan should enable the delivery of sustainable development in accordance with the policies in the Framework. GVG is pro-growth and recognises and embraces the need for housing

but also considers that Guildford town centre should be regarded as key infrastructure for both the Borough and the wider region. It should be afforded a properly considered place and detailed plan in the Local Plan rather than matters being left to chance and piecemeal development. Delivery of housing in a quality environment should be equally as relevant to plan making.

2.8 It is the opinion of GVG that the proposed Local Plan in its current form cannot be considered as sound and it is with these criteria in mind that this response has been prepared against individual policies contained within the draft Local Plan. Similarly, it is against these same criteria against which the GVG Masterplan has been prepared.

2.9 The council previously undertook a regulation 18 consultation on the Plan in June 2014 to which the GVG provided a detailed response (appendix 5)

2.10 As per the Planning Practice Guidance (PPG) [Paragraph: 017 Reference ID: 12-017-20140306]

Regulation 18 of the Town and Country Planning (Local Planning) (England) Regulations 2012 sets out specific bodies or persons that a local planning authority must notify and invite representations from in developing its Local Plan. The local planning authority must take into account any representation made, and will need to set out how the main issues raised have been taken into account. It must also consult the Strategic Environmental Assessment consultation bodies on the information and level of detail to include in the sustainability appraisal report.

2.11 Overall, it is considered by GVG that previous consultation responses by it and other interested groups such as the Guildford Society have not been taken into account in the preparation of this regulation 19 draft plan. Accordingly it is considered that the basic conditions of plan making, as set out within regulation and government guidance, have not been complied with and the plan is unsound.

**Statutory Duty to Co-operate**

2.12 The Duty to Cooperate (DTC) Topic Paper which forms part of the evidence base is acknowledged. However there are some shortcomings as to how the council has sought to comply with the DTC as set out in the Localism Act 2011, and amended by the Planning and Compulsory Purchase Act 2004. The DTC is not a duty to agree but the NPPG is clear that local planning authorities should make every effort to secure the necessary cooperation on strategic cross boundary matters before they submit their Local Plans for examination.

2.13 In addition to cooperation with surrounding local planning authorities, other bodies are subject to the DTC as set out in the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended by the National Treatment
2.14 These bodies are:

- the Environment Agency
- the Historic Buildings and Monuments Commission for England (known as Historic England)
- Natural England
- the Mayor of London
- the Civil Aviation Authority
- the Homes and Communities Agency
- each clinical commissioning group established under section 14D of the National Health Service Act 2006
- the National Health Service Commissioning Board
- the Office of Rail Regulation
- Transport for London
- each Integrated Transport Authority
- each highway authority within the meaning of section 1 of the Highways Act 1980 (including the Secretary of State, where the Secretary of State is the highways authority)
- the Marine Management Organisation.

2.15 Having reviewed the DTC Topic Paper and the policies contained within the draft Local plan, GVG believes there is a high level of ambiguity and uncertainty around the delivery of infrastructure to support the level of housing allocation and the impact this will have on the traffic in the town centre.

2.16 The Topic Paper references the Local Strategic Statement (LSS) produced by the Surrey Strategic Planning and Infrastructure Partnership. The memorandum of understanding appended to the Topic Paper demonstrates that it has been agreed by all local authorities in Surrey, but there is no reference to Highways England which controls the A3, the principal route through the borough. We presume that it has been removed because GBC has as yet failed to reach agreement with Highways England.

2.17 The PPG also sets out that:

*Close cooperation between district local planning authorities and county councils in 2-tier local planning authority areas will be critical to ensure that both tiers are effective when planning for strategic matters such as minerals, waste, transport and education.*

Paragraph: 014 Reference ID: 9-014-20140306 11

2.18 Communication between GVG and Surrey County Council suggests that this element of the DTC has not been satisfied either, particularly regarding transport infrastructure.

2.19 It is the opinion of GVG that the Statutory Duty to Cooperate has not been complied with and accordingly the draft Local Plan is unsound on this basis alone.
2.20 Irrespective of the DTC having failed, the draft Local Plan has no vision for the town, no plan for delivery, and sets a course for ad hoc development which will frustrate most of the Local Plan objectives as listed.

POLICY S1: Presumption in favour of sustainable development

3.1 As set out in the previous representations, GVG is actively pro-growth and supports well designed development as part of strategic solutions recognising the sub-regional role of Guildford.

3.2 At paragraph 4.1.4 additional text has been added to reasoned justification of policy S1 which suggests that the presumption in favour of sustainable development will not apply to sites listed under footnote 9 of paragraph 14 of the NPPF. This is clearly correct in policy terms but specifically for Guildford this would assume that the council employs a 'brownfield first' approach to achieving housing supply. GVG would agree with this as an approach, but this message is inconsistent in the Local Plan and not reflected in appropriate infrastructure or support.

GBC should be promoting the delivery of suitable brownfield sites early in the Plan process. More recognition is required to the alternative delivery strategies required should the main allocated sites not come forward or delivery rates be slower than anticipated.

3.3 GVG also recognises the historic failures of successive Councils in Guildford to plan proactively and comprehensively over decades. This has led to there being relatively little brownfield land that can be brought forward by the market in such a way as to: A) deliver as much development as it could were it masterplanned; and B) not place such a burden on historically poor and unresolved infrastructure as to constitute sustainable development. For this reason, as much as any other, GVG has been campaigning for proper joined up urban planning to bring about transformation, development and growth in a sustainable way in our core town centre. This approach could equally apply to the outlying residential estates in north-west and north Guildford, where GBC freeholds also predominate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S2: Planning for the borough - our spatial development strategy

3.4 It is clear from the wording of policy S2 that the housing requirement, in addition to the provision of employment and retail space, has been altered to reflect the change in Plan period from 20 years to 19 years. The rationale for this change remains unclear.

3.5 The proposed submission Local Plan removes Table 1 - Planned Delivery between 2018 and 2033, making it impossible to understand where housing growth will come from to meet the annual housing target as set out in the policy.

3.6 Table 2 which sets out the hierarchy of retail and service centres, has also been deleted from policy S2 which further undermines the commitment of GBC, as a fundamental principle of the Local Plan, to deliver housing in the town centre first.
3.7 It is therefore suggested that the detail on planned delivery and settlement hierarchy is reintroduced into the final version of the plan to ensure it is clearer on where growth is coming from and the rate of delivery for the borough.

Conclusion

5.1 Guildford Vision Group remains committed to seeing the Borough of Guildford, and particularly Guildford town centre, become a better place. This requires focused attention of providing for high quality growth of housing, commercial space, together with supporting community and infrastructure assets over the next 20 years to cope with the current deficits and predicted increase in population in the borough over this period.

5.2 The historical core of Guildford is afforded a high degree of statutory protection but has a very limited mix of uses, either at present or as promoted under the Plan. The GVG Plan looks to the end of the draft plan period and the next and reimagines Guildford in providing a broad mix of higher density, mixed use development while also delivering a range of key environmental improvements. This will include improvements in retail dwell times, better leisure, business, civic, health and other provision. A more organised transport solution giving access to all forms of transport should achieve much greater modal shift. The historic core would remain protected and unchanged.

5.3 The particular focus of GVG is to see a robust and deliverable masterplan come forward for Guildford town centre which gives confidence to developers to deliver the project. Such a masterplan can achieve the objectives of the group as set out previously in this consultation response. It can meet the 17 issues as identified by GVG that are not addressed by the Local Plan in any credible way.

5.4 A vital element of any masterplan for the town centre is to resolve the existing chronic issues - traffic congestion, record vehicle-related fatalities and serious injury as well as record pollution. The congestion issues will continue to increase. If the proposed increase in homes across the borough is brought forward as set out in the draft plan then the existing failing infrastructure within the town centre will collapse completely.

5.5 GVG does not believe it can solve the traffic problem. The GVG Plan is to protect the existing accessibility and capacity of the town centre and to remove the current conflict between vehicles and people within the town centre. It employs better and safer designed roads, cycle routes and footpaths in an integrated, modal shift-enabled plan addressing the first five of the 17 issues identified by the group.

5.6 A central feature of the GVG Masterplan is the delivery of a new East-West crossing, linking York Road with Guildford Park Road. This will move traffic away from the centre. It will enable separation of cars from people and cyclists. It will make Bridge Street and Onslow St safer and free from through traffic-free, except for buses, taxis, permitted vehicles and mobility access. It will enable the lower ends of both North St and the High St to be linked together by great public space and amenities along the both sides of the riverside.

5.7 The plans suggested by GVG has genuine support from the local community, demonstrated at several public events and on social media. Unfortunately GBC have had limited, engagement with the group, failed to discuss details or to answer its technical questions as a local stakeholder in the Plan making process.

5.8 It is the firm intention of GVG to have its evolving Plan considered and it will continue to make representations to the borough as part of the Local Plan examination.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increase in homes, the surrounding infrastructure and amenities available to existing residents of Send and Ripley is inadequate already, not to mention the current traffic congestion and condition of roads - the lack of council support for the conditions of these to be renewed, of which increase resulting traffic and car numbers from this increase in dwellings, will exacerbate.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the change in designation of these sites to "Travellers" plots and industrial floorspace. The need for increased Traveller plot numbers is not proven nor is the position and location of the site suitable. This is adjacent to an already very busy, traffic-accident and traffic congestion-prone road and and circa 400 new homes/plots and the associated car/ caravan numbers entering and exiting the site will exacerbate this further. As per my objection on A42, this too will place a great strain on an already very residentially dense area of the borough and exacerbate the underprovision of local amenities and infrastructure. This coupled with the new industrial floorspace and increase numbers of lorries and industrial related vehicle traffic, plus the proposed junction onto the A3 at Burntcommon, risks increased further congestion to an already traffficjam heavy blackspot for the A3 interchange with M25 at Ripley. This has repercussions to increase car numbers and Gridlock through Ripley village which is damaging to the qualities that make the Village a desirable place to live, plus the increased pollution and damage to air quality.

Existing local schools, doctors surgeries and shops will not be able to cope with this added influx of residents. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature] considering the encroachment of the Greenbelt already planned for this area of Send and Ripley, and risks placing the existing natural ecosystem and habitats of wild birds and animals, not to mention the historic importance of these ancient woodlands at Garlicks Arch, at great risk of damage and extinction.

In summary, these proposals are unsuitable and the needs not proven considering the other available sites (including available brownfield sites) where these particular plots and industrial provision would be much better suited - why place a new industrial park so far away from the existing one at Slyfield when there is space closer to Slyfield site to develop instead - this seems a huge oversight and makes little sense from a perspective of logistics and efficiency for the operation of the industrial processes at these two sites. The increase in Traveller plot numbers and their proposed position in Send and Ripley really places existing infrastructure and amenities at great strain and risks damaging the demographic balance and quality of the built and natural environment which make this area of Guildford, and indeed Surrey, a desirable place to live for not only existing residents, but for those looking to move to the Borough.

| Comment ID: pslp172/3339  Respondent: 17407777 / Rachel McDonald  Agent: |
As previously set out, I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site because of the constraints on the site and the physical location.
2. Too far from railway stations.
3. Limited footpaths and safe walking or cycling routes.
4. Located next to and close to very congested motorway M25 and A road A3 which are frequently at grid lock throughout the day.
5. Local roads and back roads are not safe alternatives to blocked motorways and are very busy normally which has lead to consistent accidents due to dangerous black spots (Black Swan junction).
6. Train services already to congested and limited parking.
7. Local roads not safe for bus services, cars, cycles and walking commuters. Unrealistic.
8. RHS Wisley is near to this site and during shows causes increased traffic congestion and incidents.
9. Limited employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
10. I object to the negative impact to heritage sites.
11. remove this site from the local plan.
12. I object to this development because it will not improve the dangerously high pollution levels in this area.
13. I object because the plans includes a new road for the Elm Corner residents which involves having to navigate our way through the new development particularly when there is a better alternative for the residents available to the Council.
14. I object to the proposed Submission Local Plan.
15. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
16. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
17. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
18. I object to the extension of the plan period by 1 year as it has not been identified as a major change
19. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
20. I object to the Council wasting tax payers and residents’ time and money by not following due process and ignoring previous representations.
21. I object to the 10% buffer in the housing number over the plan period.
22. I object to the evidence base which is not transparent and has been challenged.
23. I object to the transport evidence base including the Highways assessment report.
24. I object to the transport assessment which used prescribed vehicle movements from this site with no justification.
25. I object to the housing number, particularly as the Council have not, as required used any constraints such as green belt, infrastructure, air quality. I believe that the housing number is unsound and unnecessary as housing shortage is not in Surrey but in inner London where low paid workers need to live to be near to their work.
26. I object to the apparent disregard the damage caused by nitrogen deposition and high pollution levels.
27. I object to policy S2 because the figures in the AHT table do not add up.
28. I object to the quantity of space allocated for retail in the town centre.
29. I object because the schooling offered is inadequate for this area both pre-school, primary, Junior and High school. Not enough thought has been given to the future need.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the changes to Policy P2 Green Belt because they have not addressed many of the 32,000 comments made to the 2016 plan. Policy P2 fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it needs to be permanently protected. The Green Belt is intended to check unrestricted sprawl of built-up areas, to prevent neighbouring towns from merging into one another, to safeguard the countryside from encroachment, to preserve the setting and special character of historic towns, and to assist with urban regeneration by encouraging the recycling of derelict and other urban land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2
I object to the removal from the green belt of homes in Guildford Road, northern end of Glaziers Lane, Flexford, Walden Cottages and Palm House Nurseries traveller site because this could enable development within these areas at much higher density and will give greater success for planning applications. Currently these areas contribute to the openness of the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to this proposal as anyone who lives in Send who uses Tannery Lane knows the small rural lane is utterly unsuitable for further developments to take place, turning into Send Road from Tannery takes an age and is difficult to exit to Send Road. You have already allowed, despite objections which I assume were again just ignored, a marina no one wanted and which we all knew was a precursor to further development requests. Not only have we been ignored but you have this time decided to INCREASE the number of houses for the site by 30 odd%. The impact on traffic, the green belt, amenities and the area itself makes this a completely wrong.

I simply don't understand how the protection of green belt in this manner can be allowed. What possible exceptional circumstances can be shown to make this acceptable. The inclusion now of pitches for "travelling show people" despite the thousands of objections you have received as by suggesting there is a need for travelling show people pitches is cynical use of a minority, by suggesting such a need even exists. You should be ashamed at your blatant attempt to bypass the protection of a lovely area to get your way and build some 400 homes to meet some central government quota which takes NO consideration of impact. This is unacceptable and should not proceed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this being brought back, bigger and more than even before, despite the huge volume of objections which led it to be removed previously. Its been brought back as a minimum of 7000 sq m of warehousing and appears to show utter disregard for the unnecessary damage to the green belt (which I believed was protected but which the GBC seem to feel is just protected in the past now and future generations will simply be deprived of if GBC don't step up and take better protection for it. Why is this even on here? I presume as a concession, of the line of "Lets add something back in which we had a load of objections to before and removed. When these people complain again we will concede and let this unnecessary one go, and they will take the other ridiculous plans getting rubber-stamped better", GBC need to remove this plan once and for all. The 2017 Employment Land Need Assessment shows less of this type of property is needed and Slyfield has land and vacant buildings to accommodate such a need, if one even appears! Stop causing upset and concern for Send and surrounding villages and accept this is not needed, impacts the locals and the environment/green belt and is not even needed.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I Object to the proposal to inset Send Business Park from the Green Belt. It's in the greenbelt, clear and simple. Coming up with ways for villages and all to meet some quota GBC should be defending us from this short sighted approach, protecting the green belt for us and for future generations and standing up for us. I am not sure how many times we can say that Tannery Lane is a small rural lane with poor access and it simply cannot accommodate more traffic. Send and surrounding villages deal with a lot of traffic and to suggest adding more by finding a way to get this out of the greenbelt (despite the fact its clearly within and surrounded by greenbelt) is unacceptable. Its the thin edge of the wedge and you know it... you start with this and then it simply opens up the option for further development. GBC needs to stop any more intrusion or impact to the greenbelt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9] on the basis that it:

A) disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]

B) directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas.
C) ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]

D) adds to air pollution in neighbouring areas, which already exceeds safe EU limits for nitrogen oxides [Policy A26].

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**Clockbarn Nursery, Tannery Lane, Policy A42**

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The plans have increased from 45 homes to 60 homes which is 33% and this is too much
- It ignores all the hundred of previous objections made by local people
- It will increase problems with the traffic in Tannery Lane and at the A247 junction
- It will cause erosion of the Green Belt in our village
- It will increase surface water flooding, which is already a problem and is increasing with further development
- It will impact on the open countryside views from the River Wey Navigation

**Land at Garlik’s Arch, Send Marsh, Policy A43**

I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people
- The is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no ‘exception circumstances’ exist
- It will cause overdevelopment of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth I
- It will join p Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over 50 years
- It will generate excessive traffic that will block up the local roads of Send and Ripley

**Land at Burn Common, London Road, Policy A58**

I object to Policy A58 at Burn Common because:

- It was deleted from the 2014 draft because of all the objections made previously
- The word ‘minimum’ is a change from the previous ‘maximum’ in the 2016 plan and since that time there has been a decline in the demand for industrial land
- There is no need to build industrial or warehouse developments in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt
- The impact on small surrounding roads will create traffic gridlock
- It will join up the existing villages and defeat the purpose of the Green Belt

Green Belt, Policy 2 at paragraph 4.3.15

I object to the proposal to inset Send Business Park from the Green Belt because:

- It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
- There is highly restricted vehicular access along Tannery Lane in both directions
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A43 change at Garlick’s Arch. There have already been thousands of previous objections made by local people opposed to this plan. To date there has been no proven demand for Travelling Showpeople plots in this location so why should we cater for this? This is a stunning Green Belt area that we should protect and not build upon. This area is subject to frequent flooding and should not be built upon. Considering the amount of waster that travellers left in Bromley recently, as highlighted in Sunday newspapers, there are obvious concerns over the impacts on the local area and the costs to local people.
The increase in residential houses will put a strain on the Village Medical Centre and the school, which are already over subscribed. With reported cuts in school budgets, how are such services expected to maintain quality.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E6

5. The ‘Summary of Key Changes to the Proposed Submission Local Plan’ states in respect of Policy E6 that changes are made to create “…increased flexibility in terms of locational requirements for self-contained hotels.” However, no substantive change has been made to the policy to achieve this. Rather, changes to the policy and supporting text relate primarily to ensuring that new leisure and visitor experience development preserves the local landscape and heritage assets.
6. There is clear recognition that many of the Borough’s leisure and cultural visitor attractions are rural. Indeed, part (1)(c) of the Policy supports “sustainable rural tourism and leisure developments that benefit businesses, communities and visitors in rural areas” as long as they meet certain criteria. However, new accommodation and conference facilities in these locations could be stymied by the need to comply with the sequential test (ie, as required by part (1)(b), despite there being local demand arising from those leisure and cultural visitor attractions themselves.

7. Greater flexibility (or at the very least, improved guidance) is required in respect of the sequential test relating to rural leisure and visitor facilities so that needs can be met in situ and unsustainable behaviour avoided. Indeed, the NPPG recognises that in some situations, the sequential test may result in undesirable outcomes by failing to recognise the specific market and locational requirements of certain main town centre uses, as defined at Annex 2 of the NPPF.

8. In respect of part (2), a clear definition of “proposals for new leisure space….” is required so that promoters understand whether their particular proposal will be subjected to an impact test. Otherwise, the policies is imprecise.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P2
1. The changes to Policy P2 are inconsistent with national policy, primarily the exceptions set out at Paragraph 89 of the NPPF.

2. Whilst part (2) of the policy confirms that certain proposals are not considered inappropriate development as defined by national policy (eg, mineral extraction, engineering operations, etc), there are other types of proposal which, whilst continuing to be ‘inappropriate development’ benefit from a number of policy exceptions. This distinction is corrupted by the drafting through the words “…also meet the following criteria” at the end of part (2) of the policy, which has the effect of wrongly blending exceptions relating to appropriate and inappropriate development.

3. Whilst the policy presently includes ‘Limited infilling’, the drafting effectively reduces the scope of national policy by failing to make explicit that this includes “partial or complete redevelopment of previously developed sites” and the particular criteria attached to this (ie, no greater impact on openness, etc). The policy also omits, without explanation, the provision of facilities for sport and outdoor recreation in the Green Belt. It is not enough to say these are supported by national policy because of the error at part (2), as explained above.

4. The Council is respectfully asked to reconsider its policy following forensic reading and understanding of national policy relating to the control of development in the Green Belt, to ensure that support for proposals in the Green Belt which benefit from exceptions in national policy are not prejudiced.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The proposed 1750 new homes are far too many properties for the area to absorb and will result in the coalescence of the villages which seek to keep their own characteristics and individualism. Further development in Ash Green must protect the historic value to the area. Of particular importance is Ash Manor and the buildings in close proximity to it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Ash Green is NOT part of the Ash & Tongham Urban Area. The ATUA must therefore not extend south of Ash Green Road and Foreman Road.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Councils changes to the draft local plan and the inclusion of Blackwell Farm as a development site (policy A26 & para, 4.1.9) which Disregards an independent expert landscape study, which demonstrates that part of the site merits Area of outstanding natural beauty status following natural England's forthcoming boundary review (para 4.3.8) Directs more office space to an extended business park (policy E4) which will increase peak time congestion particularly around the hospital and A&E and will encourage rat running through residential areas Ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and questions the viability of the development (2.14a) Adds to pollution in neighbouring areas, which already exceeds safe EU limits for nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4796  Respondent: 17411617 / Graham James Whitehead  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should include the provision of a green buffer that seeks to maintain a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."
• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

a) The Street in Tongham  
b) A331/A323 intersection  
c) A31 /White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

Policy P3 - Countryside

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road

• 4.3.29 Amend: "Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough's second largest urban area. Given its relative sustainability, to the south and east of the urban area within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development."
4.3.30 Amend: "We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green."

Policy P3 Amend: (1) (c) should be amended to read "does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

4.3.29 Amend: "Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough's second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development."

4.3.30 Amend: "We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green."

Policy P3 Amend: (1) (c) should be amended to read "does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.

Answer (if comment is on questions 1-7 of the questionnaire): ()

My greatest underlying concern and objection remain: that the figures for the calculation of the number of new houses required, taken from the SHMA, are seriously flawed. Based on doubtful forecasts the initial figure has now been increased to 654 houses pa - an overall increase of 22% in building stock and double the ONS projection for the same period of 10.4%

Answer (if comment is on questions 1-7 of the questionnaire): ()

The GBC local plan is not fit for purpose - it continues to ignore the formally expressed opinions of the vast majority of its constituents, it continues to fail to justify some totally un-businesslike assumptions, it continues to work to flawed demand projections and again fails to justify its intransigence, it refuses to debate critical green belt issues and is clearly signalling easy greenbelt pickings to developers.

Why would you ignore public opinion in this way - do you really think you know better? A look at Guildford’s planning history over the last 50 years and the current dire state of the town clearly shows that we have been continually let down by your so-called planning experts.

To insist on limiting responses to changes to the document is in itself non-democratic, and controlling - creating suspicion that you are hell-bent on getting your way regardless and are trying tio suppress any kind of debate. It has all the hallmarks of a ‘fix’ and I formally object to GBC behaviour and the changes to the plan.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Ripley
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to strongly object to the Guildford Borough Proposed Submission Local Plan (June 2017), particularly in respect of the changes affecting my village (Ripley) and neighbouring Send. The proposed submission makes the Plan even worse than the 2016 proposals.

My reasons for objecting relate to the damaging impact of proposals and the apparent disregard of the ‘brownfield first’ policy by Guildford Borough Council (GBC).

In particular:

**I object to the unfair imbalance of the Plan across the borough.**

With the removal of site A46 from the Plan (with its proposed 1,100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough, the Plan has become even more biased against the North East of the borough. Guildford Borough is an area of more than 100 square miles. Of the 11,350 homes proposed in the Plan, 40.6 per cent (4,613) are within three miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

**I object to the hiding of development by ‘deferment’ (A24, A25, A26, A43)**

This version of the Plan has concealed some development planned to take place by ‘deferring’ it beyond the period covered by the Local Plan. This has two effects:

1. i) to hide the number of housed actually being built (A24, A25, A26 – total of 1,100 deferred, but still being built), and
2. ii) to give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

**I object to the lack of proper infrastructure planning for sites (A43 and A42)**

The Foreword to the plan by Paul Spooner includes on page 5:

“We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object removing Send Business Park from the Green Belt (4.3.15).

Send Business Park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for its insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF, can be claimed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to removal of Brownfield site (A34) from the Plan

Site A44 in Broadford Business Park has also been removed. This is another brownfield site that has already been developed. The Council’s claims to “have adopted a ‘brownfield first’ approach” but this is clearly not the case, and is contrary to national guidelines.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Site A4 has been removed. This is within the town centre and therefore with sustainable infrastructure and would make use of a brownfield site in need of redevelopment. The Plan has removed housing from the site in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is an unacceptable trade off.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlicks Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of six Travelling Showpeople sites in A34 Garlicks Arch

The allocation of six Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch.
as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlicks Arch

The potential of an increase from 400 houses at site A43 Garlicks Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3420  Respondent: 17412193 / Beryl Evans  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The inclusion of site A58 Burnt Common, removes the need for A43 Garlicks Arch

GBC’s own reasons for including Garlicks Arch A43 in the 2016 version were:

1. The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, ...(site allocation A25) [ than the Burnt Common site did ]
2. The site [A43] provides the employment floor space needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlicks Arch to be included.

I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”. The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t have to provide any ‘affordable’ homes - just make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [ie a reason for not delivering affordable houses]. That has now been removed, thereby implying that needing to make greater than normal profit is to be an acceptable reason not to deliver affordable homes. This is shocking.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3418  Respondent: 17412385 / Geoffrey Mayne  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The documents imply that there is a reduction to 1,700 new homes (from the earlier figure of 2,000. But it now appears this is misleading and that the lower figure is still a minimum. In any event, this scale of new homes planned is, in my opinion, so large as to inevitably damage the whole infrastructure of the area.

Infrastructure: The proposed changes to the access to the A3, together with other recent and proposed road system changes will, in my opinion, have such a large negative impact on Burpham as to inevitably cause major traffic disruptions and should be entirely reconsidered.

The proposed development will generate a daily movement of thousands of vehicles the vast majority of which will pass through Burpham. This Plan represents yet another ill-conceived planning proposal, with insufficient thought given to the infrastructure needed.

The last few decades have seen two major housing estates, a considerable number of smaller garden grabbing developments, one super store and, recently, one very inappropriately sited supermarket. Both because of the volume and reduced speed of traffic, these changes regularly lead to severe air pollution which damages the quality of our lives in Burpham. The current Plan represents a major worsening in an already unacceptable traffic and pollution situation.

Access to the development:
Access/egress to and from the proposed development is shown from one roundabout, serving traffic from the A3 and the A3100 which, in my opinion, is unacceptable owing to the risk of grid-lock. The whole matter of access (as well as scale) needs to be reconsidered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

The housing need has been reduced from 693 per annum last year to 653 per annum, giving a total build over the period of the Plan of 13,893. On the one hand, a reduction of around 5% has minimal impact on my own concerns about the scale of the housing development’s enormous and negative impact on the Borough as a whole. Equally, I now understand that an over-inflated housing need figure has been used in the Plan. As this affects every aspect of this Draft Local Plan; this one particular renders the whole Plan unsustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I wish to support the letter sent in response to the draft local plan by the Burpham Community Association. I would also like to comment on the differing figures that has been added regarding the number of homes that will be required and there appears to be mistakes made in calculating these. Bearing in mind that any homes built on green belt land, by definition, around Guildford are never going to be affordable due to current land costs, so brown field site should be used first and reserved for social and affordable housing. Also I would like to have seen more support for infrastructure improvements before any development is allowed, with air pollution control oven priority.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Removal of site A46 - 1,100 homes and school (land to the south of Normandy and north of Flexford)

Removal of site A47 - 50 homes (land to the east of the Paddock, Flexford)

Wish to support removal of these sites due to the possible pressure on the infrastructure, i.e. roads and other amenities. Change in status of homes in that area from Green Belt and the effect of the appearance of the open countryside of this area. Can we afford to put further stress on these facilities!

To increase the impending possibility of further development in the general area would put intolerable density on the Guildford Road which is already an unpleasant necessity and surely detrimental to mental wellbeing and physical health. At a time when the general feeling is beginning to give more weight to these subjects and to learn that these effects are costly to the nation.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have reviewed the limited amendments proposed to the Local Plan and I maintain my objection to the plan - particularly as it impacts on East Horsley.

The level of development still proposed would be too much for the already over stretched local facilities.

The plans mean an unacceptable weakening of our respect for the green belt and the advantages it brings to all.

Within this plan the unbelievably unrealistic plans to create a new town on the old airfield at Wisley must be ruled out again. The facilities in the area including roads and public transport simply could not cope with this level of new development.

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- It will worsen access and traffic problems in Tannery Lane and at the A247 junction
- It ignores the hundreds of previous objections made by local people
- The increase to 60 homes in place of 45 homes is 33% more and too much
- It will exacerbate the erosion of the green belt
- It will make surface water flooding, which is already bad, even worse
- It will impact open countryside views from the River Wey Navigation

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy A 58 at Burnt Common because:

- It was deleted from the 2014 draft because of all the objections made previously
- The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land
- There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt
- The impact on small surrounding roads will create traffic gridlock
- It will join up existing villages and defeat the key purpose of the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy S2 for the proposed provision of the very high overall housing numbers of 12,426 new homes, which is only a small reduction on the previous figure of 13,860. These numbers are still based on an overly high-growth economic development plan and remain too high as shown by an objective assessment made for the Guildford Residents Association (GRA) by Neil MacDonald (independent adviser).
2. Also in Policy S2 I object to the fact that downward economic pressures (including Brexit) have not been adequately accounted for. Additionally in Policy E1 and E2 there is too much emphasis on providing retail and commercial use in Guildford town centre, when the pattern of business is changing and more town centre housing is needed rather than retail. This would ease the pressure on housing on the Green Belt.
3. I object to the population growth figures in section 2.3, which have increased by almost 5000 and do not account for more recent political and economic changes.
4. I object to Policy S2 because the figures include estimated demand from London, rather than meeting the needs of residents of Guildford Borough.
5. I object to the fact that in Policy S2, the impact on the east of the borough is still disproportionate.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26
I write to record my objection to the inclusion of Blackwell Farm as a development site in the revised draft Local Plan. This is an area where my wife and I walk on a regular basis and the proposals will negatively affect the area as follows:

i) There will be additional congestion particularly at peak time around the hospital and beyond. Until recently I worked at the Surrey Research Park and although the introduction of the traffic lights improved the situation it is still congested on a regular basis and this development will add significantly to the problem.

ii) The traffic will add to an existing issue with air pollution in the area.

iii) There is a strong argument that part of the area should have already been categorised as an Area of Outstanding Beauty. This development appears to be totally ignoring this

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1) I OBJECT TO POLICY A42 because it is unacceptable to increase the number of proposed houses when so many objections were raised to the original suggestion of 45 houses. When there were serious concerns raised over flooding and the detrimental impact on the countryside of building 45 houses, it is even more ridiculous to suggest building 60 houses. There are already significant traffic issues along Tannery Lane and building anymore houses will significantly worsen this. There is no excuse to erode the Green Belt and destroy the countryside in such a drastic manner.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3460  Respondent: 17413729 / Katherine Pound  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3) I OBJECT TO POLICY A58 as this has already been objected to and removed from the 2014 Local Plan, and nothing has since changed to justify this building in the middle of the Green Belt, not least when there are vacant sites at Slyfield and Guildford industrial parks. In particular the 2017 Employment Land Need Assessment shows the demand for industrial land in the borough is only 3.9 hectares, so it is beyond ridiculous to suggest creating 10 hectares in the middle of Send, especially in the Green Belt, which will cause gridlock in small surrounding roads. It is further incredibly deceptive to change the wording of this policy from maximum to minimum of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4) I OBJECT TO POLICY 2, PARAGRAPH 4.3.15, the proposal to remove Send Business Park from the Green Belt because the site is totally unsuitable for further expansion. The area around the Business Park is beautiful open countryside next to the Wey Navigation, and under no circumstances should be ruined by expanding a business site - if necessary business expansion should be on brownfield sites. The purpose of Green Belt is to protect areas of green open countryside that could otherwise be overlooked, built on and lost to society forever and there is NEVER a reason to retrospectively remove Green Belt. In addition, there is very limited vehicular access to the site from either direction and the increase in volume of traffic that would necessarily result from expanding the site would cause jams and possibly even accidents. At a minimum this would increase pollution and disrupt the peace and tranquillity of the local environment.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The removal of sites A46 and A47 from the 2016 plan meets with our support.

However, we object to the insetting in the Greenbelt as part of the proposed Greenbelt boundary changes as there are no exceptional circumstances which would justify such insetting. This objection includes a further insetting of areas within Normandy and Flexford and of sites A49 and A50.

I object to changes relating to policy A43 Garlick’s Arch because:
- Again you have ignored the thousands of previous objections.
- There are no ‘exceptional circumstances’ required to develop on this Green belt.
- It will generate excessive traffic along the Clandon Road with associated noise and light pollution. This will be made even worse if the adjoining Policy A58 is implemented.
- It would appear that there is no demand for Travelling Show people plots.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to changes relating to Policy A58 Burnt Common because
- This Policy was deleted from the 2014 Plan following previous objections.
- Additionally, I see the Plan now references ‘Minimum’ rather than the original ‘Maximum’ referring to the 7,000 sq feet of industrial or warehousing. If the original proposal was deleted again, I see no reason why the changed plan actually increases the proposed level of development.
- The impact on the Clandon Road and adjoining roads will create huge traffic issues, and noise and light pollution issues.
- There is no need to develop on this section of Green Belt land when other local sites including Slyfield and Guildford have empty existing sites and ‘brown field’ sites amiable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident of Clandon Road, Burnt Common I find it incredible that GBC have failed to listen to the residents of Send and Burnt Common who previously in force have objected to the proposed Local Plan. Instead you seem to have made further changes that result in more development rather than less, failing in the duty of GBC to listen to residents.

It seems that you are simply ‘testing’ the patience of residents by repeatedly making further changes without realising that your proposals are completely unacceptable. It is unjust that you are focussing a disproportionate level of development in and around the Burnt Common and Send compared with our areas of the Borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to Policy A26 (Blackwell Farm) on the grounds below

Inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9]:

1. It disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8] 2. It directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas.

2. It ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a] 4. It adds to air pollution in neighbouring areas, which already exceeds safe EU limits for nitrogen oxides [Policy A26].

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to strongly, wholeheartedly object to the ridiculous and unnecessary plans for construction in and around the Send area. I am limited only in objecting to the latest changes to the proposals but I will include my arguments against the entire campaign to construct in and around our town as part of the GBC Local Plan. I hope you will take my voice into consideration.

Firstly, there is overwhelmingly little support for such plans, local opinion suggest that they didn't want, or were not supportive of, any more construction around the Guildford Borough area. The fact that we, as a community of your constituents, have rejected plan after plan should be more than enough of an indication that we do not want any more housing construction here. Hundreds of us have objected dozens of times to more construction, do you respect us or our views at all? I will state this directly, how is it that hard a concept to grasp?: We don't want any more houses here. I object to any and all plans or changes to plans in regards to construction in Send.

Secondly, the stress that new people and their families will bring to the infrastructure and public services has not been even mildly considered by Guildford Borough Council. It is within the boundaries of the law to reconsider construction, or any changes to plans, when infrastructure is inadequate. The small roads in and around Send are already jam packed with traffic, imagine the increase in issues we will have if more families arrive. Traffic problems along Send Road, Tannery Lane, the A247 junction and the roundabout at Burnt Common are already unbearable enough as they are. Let's theorise an average and say each family consists of two parents and two children. That's already two cars when the children are young but that will increase to three or four when they are teenagers. So for the 500 or more houses that are being suggested that's at least a thousand additional cars on an already over filled road system. I take the 462/3 bus to Guildford for work every morning, it is already incredibly behind schedule during present traffic conditions, this will only worsen as more houses arrive. The drivers should not face the wrath of another angry letter writer (like me) because of the shortsightedness of the council. Road works, of which there is plenty of (and I am genuinely grateful for the work and effort that goes into the road improvements) will only compound this issue even further.

Our water and sewage systems will also be affected, our already intensely overfilled and last remaining school, Send First, will be overfilled even more, and our sole doctors surgery will be overworked with the arrival with several thousand more patients. We also share much of our infrastructure with our neighbours in Woking, how will this be affected? Actually, has any sort of investigation into whether the infrastructure of the surrounding area can take the plans in Send been initiated or even been considered by Guildford Borough Council? It certainly doesn't feel like it.

Thirdly, the environmental impact of these plans would be devastating to the local wildlife and scenery. This foolhardy crusade to construct as many houses as possible in our tiny community has completely ignored the fact that this is the Green Belt, which is supposedly not meant to be constructed on. We chose to live here because we do not want to live in a city or an over-urbanised area, Guildford Borough Council seems intent on denying us this and assimilating Send and Ripley into the surrounding cities. The plans that you are forcing upon us are not justified under the Green Belt policies. I
will use two of the more outrageous plans, but make no mistake I and our entire village, objects to all of these and the additional plans. In Garlicks Arch, an area of ancient woodland that has been spared from construction by law since Elizabeth I, you are suggesting construction. This is wrong. How does this justify as "exceptional circumstances in Green Belt policy? Destroying an ancient and beautiful area of forest to build 400 homes and some travellers sites is unthinkably, unfathomably stupid. Guildford Borough Council is also forcing upon us plans, and changes to plans, to construct warehouses and industrial units in Green Belt land. There is no local demand for these and there is actually a decline in demand for industrial land, so much so that there are empty sites in nearby Guildford and Slyfield. Repurpose those, don't shove them in here just to save a few pounds. Fitting in the "minimum" 7000 square metres of industrial shows how little the Borough Council understands about industry, our views and their lack of care about the environment in an age of unbelievable environmental stupidity. Prove us wrong and scrap these plans.

Fourthly, the fact that this is clearly a cash grab for the wealthy housing businesses already bloated on overcharged rates and prices for housing. The fact that these houses are being constructed for private sale, not social housing, makes the prospect that they are for the purposes of affordable housing and relieving pressure on the market absurd. We would object to social housing regardless but this push for yet more private housing utterly negates any arguments Guildford Borough Council has that this is anything but appeasing rich housing businesses that caused all these issues in the first place. The fact that this plague of housing is being considered here, next to London and the more affluent areas of the country, where the house prices are high is clearly to take advantage of the housing crisis caused by the over construction of houses just like these. A suggestion to the council and the government in general. Why not construct houses further north in the country where there is a demand for them, where they are more affordable and not inflated by the high land value that the green belt and Send in particular, offers? Why are you putting the benefit of overly rich construction firms, estate agencies and landlords above the wishes of your own constituents? With the apocalyptic economic disaster that is Brexit fast approaching, I understand the need to construct industrial and commercial areas, but why here? Why not further north in the country where people need housing, jobs and money?

Fifthly, and this is a point I am at odds with in terms of its respectability to a group of people, but there is not desire for any travellers sites and show-peoples pitches in Send. I admit I have limited experience with travellers, but my experience with travellers is overwhelmingly negative. While I am happy to be proven wrong in regards to travelling peoples, they are still more people living in Send if these plans and their additions go ahead. I must object to any Gipsy, Traveller and Show people's sites, parks, pitches and any other settlements in Send and it's surrounding area. These have been disproportionally allocated in the plans for Send (a point I shall return to later) and shows the lack of respect, once more, that the Guildford Council has for our views.

I have never felt this strongly about local politics, but after a new stream of unbelievably thoughtless and, frankly insulting, plans akin to throwing paint at a wall and seeing what sticks, I had to add my voice once more to the objections, this time with a personally written letter. What made this especially galling for us was the increase to the plans were submitted to our community after Send, as one voice, objected, you decided to punish us and add to these plans.

Taking into account all of my previous points, to read that you have made changes to the initial plans, means that you have disregarded the vast majority of your constituents in Send and their calls to end construction plans around Send. That was around 32,000 people!

You are supposed to represent and listen to us. You are accountable to us. You are supposed to serve us. Don't punish us for objecting, this is our town, our community, our home. I and over 32,009 people implore you: don't destroy our beautiful town in this relentless, ignorant pursuit to build. Forgive my passion, but your refusal to listen to our community is undemocratic and draconic.

Now 400 homes and 6 Travelling Showpeople plots

I object to the Policy A43 change at Garlick’s Arch because:

• It ignores all the thousands of previous objections made by local people
• There is no proven demand for Travelling Showpeople plots in this location
• It is beautiful permanent Green Belt and no “exceptional circumstances” exist
• It will cause over-development of our village and the number of homes is excessive
• It is exquisite ancient woodland that existed at the time of Elizabeth 1
• It will join up Ripley and Send and defeat the key purpose of Green Belt
• It is subject to frequent flooding and is currently a flood zone 2 allocation
• It is contaminated by lead shot accumulated over fifty years
• It will generate excessive traffic that will block up the local roads of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Send Business Park now taken out of the Green Belt altogether

I object to the proposal to inset Send Business Park from the Green Belt because:

- With the new Marina planned on the Wey navigation, removal of this area will facilitate the total erosion of the greenbelt in this area through the infill of further buildings in the future.
- It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
- There is highly restricted vehicular access along Tannery Lane in both directions as well as limited access to the already busy Send Road.
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

Answer (if comment is on questions 1-7 of the questionnaire): ( )

(b) Green Belt

The Green Belt inset boundary for Wood Street Village has been drawn very tightly (see Map 3 – in the attached document) to include only the east of the settlement: along Oak Hill east of Pound Lane and west of Pinks Hill; excluding Wood Street Green, the surrounding areas along White Hart Lane and the whole of Frog Grove Lane to the east and north. It is anomalous that the village conservation area, which helps to define the essential character of Wood Street Village, is outside the proposed settlement inset boundary.

The proposed inset boundary would allow for the development of some small sites in Wood Street Village including: land at 148 Broad Street, a site of 0.32 ha previously used for vehicle sales, maintenance and storage, which the Land Availability Assessment (LAA) of February 2016 identified as suitable for 12 dwellings (Site 115); a previously-developed site of 4.4ha with mixed uses at Oak Hill which the LAA identified as suitable for 22 dwellings (Site 35); and land to at ‘Roundoak, White Hart Lane which the LAA identified as suitable for traveller accommodation (Site 2114). These sites enter into the LAA housing figures, although only sites for 23 or more dwellings are shown on the Proposal Map.

The approach to Green Belt insets needs to comply with paragraph 86 of the NPPF which states:

‘If it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt. If, however, the character of the village needs to be protected for other reasons, other means should be used, such as conservation area or normal development management policies, and the village should be excluded from the Green Belt.’

Paragraph 85 of the NPPF sets out the proper approach to defining Green Belt boundaries in local plans, which includes ‘consistency with the Local Plan strategy for meeting identified requirements for sustainable development.’ The Council’s Land Availability Assessment (February 2016) demonstrates that the Spatial Development Strategy of Policy S2, is unable to meet the objectively assessed need for housing throughout the plan period, largely because of constraints imposed by Green Belt Policy P2 and related proposals maps. Impacts on housing land supply are considered in more detail below.

The settlement boundary for Wood Street Green appears to have been drawn tightly to restrict development, rather than to allow for housing and other forms of development to take place within the settlement, to meet the changing social and economic needs of the village and the borough.

Not all the open parts of Wood Street Village are important for their contribution to the Green Belt. There are infill sites, such as those previously identified, where development could make a useful contribution to meeting housing needs, consistent with the size and character of Wood Street villages and its local facilities, and without compromising the essential roles of the Metropolitan Green Belt.

The Site of Nature Conservation Interest provides a natural boundary to the south of the village. To the north west of the village, it is reasonable to exclude Frog Grove Lane from the inset areas as it is essentially ribbon development extending for over a mile from Oak Hill/ Wood Street Green northwards to join the Aldershot Road (A323). A flood risk area and an area of registered common land are also constraints on development on Frog Grove Lane. However, the Green is clearly part of the core of the village and there are areas surrounding the Green that should also be included within the settlement boundary and Green Belt inset and should be allocated for appropriate development.
The inset boundary should therefore be extended westwards to include Wood Street Green, surrounding development and the sites previously identified as ‘Potential Development Areas’ (see Map 2 in the attached document); to allow for appropriate development within the functional boundary of the settlement in accordance with accessibility to local facilities, existing residential development and natural boundaries that can be defined on the ground, including roads and vegetation that would provide long-term, defensible, natural boundaries for the Green Belt.

(c) Conclusions

The need for additional housing land in the early years of the new Local Plan requires looking at a variety of sources and locations, including a more realistic approach to Green Belt Review. Housing need represents one of the exceptional circumstances that can justify alterations to Green Belt boundaries, as described in paragraph 83 of the NPPF. Paragraph 85 of the NPPF sets out the proper approach to defining Green Belt boundaries in local plans which includes consistency with the Local Plan strategy for meeting identified requirements for sustainable development.’

The Green Belt & Countryside Study states that it was not seen as pre-empting the Spatial Development Strategy, but in practice Green Belt was a major determinant of the Spatial Development Strategy and, as the Green Belt Review was completed before a full, objective assessment of housing requirements in the SHMA, Green Belt and the Spatial Development Strategy have both become constraints on meeting housing requirements, especially in the early years of the plan.

The Spatial Development Strategy (Policy S2) and Green Belt Policy (Policy P2) are not based on sufficiently positive approaches to reviewing the Green Belt and settlement boundaries and do not give sufficient weight to meeting objectively assessed housing requirements throughout the plan period. They do not comply with the NPPF and cannot therefore be considered to be sound. Modifications to the Plan should include sites such as those identified in Wood Street Village as residential allocations within an extended settlement boundary and Green Belt inset, as described above...

1. Background

1. Lightwood Strategic submitted representations on the Local Plan Issues and Options consultation in November 2013, on the Local Plan Consultation Draft (Regulation 18) in September 2014, and on the Proposed Submission Local Plan Consultation (Regulation 19) in July 2016. This submission updates those representations in response to further consultation on the publication of a revised Proposed Submission Draft (Regulation 19) in June/July 2017.

2. As the Council says that it is only consulting on changes in the current draft Local Plan compared with the previous Regulation 19 Consultation, this report responds to those changes and to new evidence, in particular relating to housing targets and housing land supply. It is in support of duly-made representations which are submitted separately in accordance with Regulation 20 of The Town and Country Planning (Local Planning) (England) Regulations 2012. To make sense of those changes and to comment on the overall soundness of the plan it is necessary to refer to elements of the plan that have not changed.

3. Lightwood Strategic’s representations have consistently expressed concerns about the Council’s proposed approaches to:

   • the objective assessment of housing needs;
   • Green Belt review; and
   • Settlement boundaries in the larger villages, particularly at Wood Street Village.

4. Lightwood Strategic pointed out that there are natural infill sites in Wood Street Village (including the two ‘alternative sites’ shown on Map 1 - see end of document) that can provide SANG and are located only a short distance from the village green, shops and other amenities.

5. The Council identified these two sites in April 2014 as ‘Potential Development Areas’ in its Green Belt & Countryside Study (Map 2 - see end of document). It also undertook analysis of various characteristics of the settlement in its Green Belt & Countryside Study to determine whether it was appropriate to define an inset boundary rather than leave the whole village as ‘washed over’ by the Green Belt.
6. The Council has modified its approach to villages in the Green Belt, in response to the National Planning Policy Framework (March 2012). In the 2003 Local Plan villages were generally ‘washed-over’ by the Green Belt. New Local Plan Policy P2 provides for Wood Street Village and 13 other villages (as well as several, large previously developed sites) to be inset from the Green Belt. In these villages, Policy D4 (Development in Urban Areas and Inset Villages) allows for limited development within strict environmental guidelines.

2. The Green Belt Boundary

7. The inset boundary for Wood Street Village has been drawn very tightly (Map 3 - see end of document) to include only the east of the settlement: along Oak Hill east of Pound Lane and west of Pinks Hill; excluding Wood Street Green, the surrounding areas along White Hart Lane and the whole of Frog Grove Lane to the east and north. It is anomalous that the village conservation area, which helps to define the essential character of Wood Street Village, is outside the proposed settlement inset boundary.

8. The proposed inset boundary would allow for the development of some small sites in Wood Street Village including: land at 148 Broad Street, a site of 0.32 ha previously used for vehicle sales, maintenance and storage, which the Land Availability Assessment (LAA) of February 2016 identified as suitable for 12 dwellings (Site 115); a previously-developed site of 4.4ha with mixed uses at Oak Hill which the LAA identified as suitable for 22 dwellings (Site 35); and land to at ‘Roundoak, White Hart Lane which the LAA identified as suitable for traveller accommodation (Site 2114). These sites enter into the LAA housing figures, although only sites for 23 or more dwellings are shown on the Proposal Map.

9. The approach to Green Belt insets needs to comply with paragraph 86 of the NPPF which states:

‘If it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt. If, however, the character of the village needs to be protected for other reasons, other means should be used, such as conservation area or normal development management policies, and the village should be excluded from the Green Belt.’

10. Paragraph 85 of the NPPF sets out the proper approach to defining Green Belt boundaries in local plans, which includes ‘consistency with the Local Plan strategy for meeting identified requirements for sustainable development.’ The Council’s Land Availability Assessment (February 2016) demonstrates that the Spatial Development Strategy of Policy S2, is unable to meet the objectively assessed need for housing throughout the plan period, largely because of constraints imposed by Green Belt Policy P2 and related proposals maps. Impacts on housing land supply are considered in more detail below.

11. The settlement boundary for Wood Street Green appears to have been drawn tightly to restrict development, rather than to allow for housing and other forms of development to take place within the settlement, to meet the changing social and economic needs of the village and the borough.

12. Not all the open parts of Wood Street Village are important for their contribution to the Green Belt. There are infill sites, such as those previously identified, where development could make a useful contribution to meeting housing needs, consistent with the size and character of Wood Street village and its local facilities, and without compromising the essential roles of the Metropolitan Green Belt.

13. The Site of Nature Conservation Interest provides a natural boundary to the south of the village. To the north west of the village, it is reasonable to exclude Frog Grove Lane from the inset areas as it is essentially ribbon development extending for over a mile from Oak Hill/Wood Street Green northwards to join the Aldershot Road (A323). A flood risk area and an area of registered common land are also constraints on development on Frog Grove Lane. However, the Green is clearly part of the core of the village and there are areas surrounding the Green that should also be included within the settlement boundary and Green Belt inset and should be allocated for appropriate development.

14. The inset boundary should therefore be extended westwards to include Wood Street Green, surrounding development and the sites previously identified as ‘Potential Development Areas’ (Map 2 - see end of document); to allow for appropriate development within the functional boundary of the settlement in accordance with accessibility to local facilities, existing residential development and natural boundaries that can be defined on the ground, including roads and vegetation that would provide long-term, defensible, natural boundaries for the Green Belt.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

(a) Five-Year Housing Land Supply

Based on the housing supply trajectory in the June 2017 LAA Addendum, but applying a constant annual housing requirement of 654 dwellings throughout the plan period, the five-year housing land supply from 2016/17 would be equivalent to only 2.36 years’ requirements: i.e. less than half of the five-year requirement and a deficit of 2,470 dwellings.

The Council’s approach to ‘phasing’ the housing target in in Policy S2 arbitrarily lowers the housing target below 654 for the years between 2019/20 and 2026/27, to reflect expected problems in the provision of infrastructure needed to deliver the Council’s proposed housing allocations. This approach is not justified in terms of housing requirements, but is solely a response to problems of housing delivery that result from the spatial development strategy.

Local Plan Policy S2 is therefore evidently not sound. For a Local Plan to be found sound, it is essential for the local planning authority to be able to demonstrate that there is a five-year supply of specific, deliverable sites for housing, with an additional 5% buffer, ‘to ensure choice and competition in the market for land’ as well as ‘a supply of specific, developable sites or broad locations for growth for years 6-10 and, where possible, for years 11-15’ (NPPF, paragraph 47).

In this case, the Land Availability Assessment (June 2017 Addendum) demonstrates that there is not a five-year supply of housing land. It also shows that the projected supply of housing land will fall short of requirements for the next twelve years. There is therefore no possibility that the Local Plan should be found sound in these circumstances. A different spatial development strategy is required to identify sites for housing development that can be delivered in the early years of the plan period. Suitable, sustainable options will include sites that are closely related to the main urban areas and larger villages, and will entail a more detailed and realistic approach to reviewing the boundaries of the Green Belt.

...

3. Housing Needs and the Spatial Development Strategy

The Need for Housing

Past Performance
16. The following graph compares the OAN of 654 dpa with recent levels of housing completions in the Borough. The Housing Topic Paper (June 2017) notes that completions have been less than 300 dpa in all but one of the last nine years since 2008/9. [See attached for Graph 1]

17. There is clearly a challenge to raise housing completions to the level required by the SHMA and a substantial backlog of undersupply at the start of the plan period that should be met within the early years of the plan.

**Updated Housing Supply Trajectory**

18. A graph of the Council’s housing supply trajectory, compared with the Council’s ‘phased’ or variable housing target and information as shown in draft Policy S2 and in the June 2017 LAA addendum is reproduced below. It shows a continuing shortage of housing land supply, until at least 2024/25. [See attached for Graph 1]

19. However, this graph gives a misleading impression of the plan’s ability to deliver housing land in accordance with the SHMA’s objective assessment of housing needs (OAN) of 654 dwellings p.a., because of the ‘phasing’ of the housing requirement, in Local Plan Policy S2. The Council has arbitrarily lowered the housing target below 654 dpa between 2019/20 and 2026/27 to reflect expected problems in the provision of infrastructure needed to deliver some of its proposed housing allocations. This adjustment is not justified by the SHMA Addendum’s objective assessment of housing needs, policies of the NPPF or the guidance of the NPPG.

20. The graph below provides a more relevant and realistic picture; comparing the LAA Addendum’s housing supply trajectory with a target to achieve the SHMA Addendum’s housing requirement of 654 dpa throughout the plan period. [See attached from Graph 3]

21. This graph shows a continuing shortage of housing land until 2029/30, if the SHMA requirement of 654 dpa is applied consistently throughout the plan period. This continuing deficit for most of the plan period is concealed by the Council’s arbitrary and unjustified ‘back-end loading’ approach of ‘phased’ housing targets in draft Policy S2 which reduces the housing target below 654 dpa in every year between 2019/20 and 2026/27.

**4. Five-Year Housing Land Supply**

22. The housing supply trajectory also shows that the Borough has only 2.36 years’ supply of housing land available within the next 5 years against the requirement of 654 dwellings p.a. from 2015/16 in the SHMA 2017 Addendum: less than half of the 5-year requirement.

**Calculation of Five-Year Housing Land Supply from the LAA Addendum, June 2017:**

[See attachment for Table 1]

23. Proposals of the draft Local Plan therefore fail to comply with the NPPF because:

- they fail to meet the full, objectively-assessed needs for market and affordable housing in the housing market area;
- they fail (by a substantial margin of more than 50%) to identify a supply of specific deliverable sites sufficient to provide five years’ worth of housing against their housing requirements with an additional buffer to ensure choice and competition in the market for land; and
- they fail to identify a supply of specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15; in fact, supply does not exceed the requirement of 654 dpa until the 15th year of the plan.

24. The Council suggests that housing targets should be phased towards the latter part of the plan period. Policy S2 includes the following statement (carried forward from the previous draft):

> ‘the delivery of homes is expected to increase over the plan period, reflective of timescales associated with the delivery of strategic sites and infrastructure. The housing target each year ... is not a ceiling, and earlier delivery of allocated sites will be supported where appropriate, subject to infrastructure provision.’
25. Paragraphs 4.1.9a and 4.1.9b state:

'The figures set out in the Annual Housing Target table sum to a total of 12,426 homes. This is lower than the total supply of homes identified in the Land Availability Assessment as having potential to be delivered over the plan period. This is to build flexibility into the plan and demonstrate that our strategy is capable of delivering the target. It also adopts a phased target that gradually increases over time rather than the same annualised target of 654 homes each year. This is due to the likely rate of delivery, particularly on the strategic greenfield sites, which is dependent upon the delivery of necessary infrastructure expected to occur towards the end of the plan period.

'This phased approach is necessary in order to ensure that the Council is able to demonstrate a rolling five-year supply of housing from the date of adoption, as required by national policy. This will also take account of both the deficit accrued until that point and includes a 20 per cent buffer moved forward from later in the plan period. Without a rolling five-year supply of homes, relevant policies for the supply of housing would not be considered up-to-date.'

26. There is no justification for this approach in terms of the objective assessment of housing needs in the SHMA. The approach is supply led and demonstrates a failure of the spatial strategy to deliver housing sites in accordance with housing need, because of the limited range of proposed site allocations and problems with the delivery of infrastructure to serve some of the proposed allocations.

27. The Housing Topic Paper (June 2017) concedes in paragraph 4.37 that the draft plan does not ‘boost significantly the supply of housing’ as required by paragraph 47 of the NPPF and does not ‘deal with undersupply within the first five years of the plan period…’ as required by paragraph 035 of the NPPG.

5. The Council’s Spatial Strategy

28. The Council’s spatial strategy relies on a limited number of strategic sites where there are significant requirements for infrastructure that cannot be provided in step with housing requirements. It is a consequence of the Council’s reluctance to review Green Belt boundaries and to allocate sites on the edges of the urban areas which could be implemented earlier in the plan period.

29. The need to demonstrate a rolling five-year supply of housing is no justification for this approach to phasing as argued in paragraph 4.1.9b. Housing land supply should be measured against housing requirements and there is no justification in the SHMA for a phased supply of housing that increases towards the end of the plan period and remains below housing requirements for more than half of the plan period.

30. Measured against housing requirements, the Council is not able to demonstrate a five-year supply of housing land until the latter part of the plan period, even on the basis of the housing supply trajectory in the Land Availability Assessment, which is said (in paragraph 4.1.9a) to include higher figures than the local plan targets. To plan for housing provision that is below requirements for most of the plan period is clearly inconsistent with the policies of the NPPF and the advice of the NPPG (contrary to what the Council says in paragraph 4.1.10).

31. The Housing Topic Report (June 2017) admits in paragraph 4.189:

‘Whilst we are continuing to explore whether neighbouring authorities are able to help contribute towards our early supply, it is unlikely that this backlog will be capable of being met in the first five years of the plan as required by the NPPG without significant harm to the Green Belt, and other harm as identified in this topic paper. We consider this is justified on the basis of the significant level of infrastructure that is required to be delivered in order to ensure that development across the borough is sustainable. This is further exacerbated by the reliance on a number of strategic sites which by their very nature take longer to deliver’.

32. We also note that the Council no longer claims that the proposed increase in new homes would be in line with their Economic Strategy.

33. Changes in spatial strategy are therefore required to provide a planned supply of housing land that matches requirements over the whole of the plan period, including the allocation of sustainable sites that are not dependent on major infrastructure investment and can be developed early in the plan period. Meeting the Borough’s housing requirements will need the allocation of a wider range of sites, including small and medium-sized sites, in a range of sustainable locations that...
include some sites that are currently in the Green Belt on the edges of the urban areas, where modification of Green Belt boundaries will be necessary.

34. The shortage of housing land supply that would result from policies and proposals of the draft Local Plan constitute the ‘exceptional circumstances’ (NPPF paragraph 83) that would justify the alteration of Green Belt boundaries in the Local Plan.

35. These problems of housing land supply are not overcome by the Council’s approach to phasing in Local Plan Policy S2, by which the planned delivery of housing is deferred until later in the plan period. As noted above, this approach is not justified in terms of housing requirements, but is solely a response to problems of housing delivery that result from the spatial development strategy. Local Plan Policy S2 is evidently not sound.

36. For a Local Plan to be found sound, it is essential for the local planning authority to be able to demonstrate that there is a five-year supply of specific, deliverable sites for housing, with an additional 5% buffer, ‘to ensure choice and competition in the market for land’ as well as ‘a supply of specific, developable sites or broad locations for growth for years 6-10 and, where possible, for years 11-15’ (NPPF, paragraph 47).

37. In this case, the Land Availability Assessment demonstrates that there is not a five-year supply of housing land. It also shows that the projected supply of housing land will fall short of requirements for the next twelve years. There is therefore no possibility that the Local Plan should be found sound in these circumstances.

38. A different spatial development strategy is required to identify sites for housing development that can be delivered in the early years of the plan period. Suitable, sustainable options will include sites that are closely related to the main urban areas and larger villages, and will entail a more detailed and realistic approach to reviewing the boundaries of the Green Belt.

6. Conclusions

39. The need for additional housing land in the early years of the new Local Plan requires looking at a variety of sources and locations, including a more realistic approach to Green Belt Review. Housing need represents one of the exceptional circumstances that can justify alterations to Green Belt boundaries, as described in paragraph 83 of the NPPF. Paragraph 85 of the NPPF sets out the proper approach to defining Green Belt boundaries in local plans, which includes ‘consistency with the Local Plan strategy for meeting identified requirements for sustainable development.’

40. The Green Belt & Countryside Study states that it was not seen as pre-empting the Spatial Development Strategy, but in practice Green Belt was a major determinant of the Spatial Development Strategy and, as the Green Belt Review was completed before a full, objective assessment of housing requirements in the SHMA, Green Belt and the Spatial Development Strategy have both become constraints on meeting housing requirements, especially in the early years of the plan.

41. The Spatial Development Strategy (Policy S2) and Green Belt Policy (Policy P2) are not based on sufficiently positive approaches to reviewing the Green Belt and settlement boundaries and do not give sufficient weight to meeting objectively assessed housing requirements throughout the plan period. They do not comply with the NPPF and cannot therefore be considered to be sound.

42. Modifications to the Plan should include sites such as those identified in Wood Street Village as residential allocations within an extended settlement boundary and Green Belt inset, as described above.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: Graphs.pdf (199 KB)

Do you consider this section of the document; complies with the Duty to Co-operate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

The accompanying report by Lightwood Strategic points to shortcomings in the approach to housing land supply which is not consistent with the objective assessment of housing requirements in the Strategic Housing Market Assessment. It also points to shortcomings in the Green Belt & Countryside Study as the basis for reviewing Green Belt boundaries and identifying appropriate allocations to meet the objectively-assessed need for housing throughout the plan period.

In particular, the Land Availability Assessment (June 2017 Addendum) is not based on a consistent rate of housing delivery that reflects housing requirements. It shows a shortfall in housing land supply throughout much of the plan period, including the absence of a five-year supply of housing land on adoption of the plan.

In addition, the Green Belt review does not comply with the requirements of paragraphs 84 and 85 of the National Planning Policy Framework, as it does not give sufficient weight to the need to promote sustainable patterns of development or reflect long-term development requirements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp17q/319  Respondent: 17415009 / Lightwood Strategic (Lighwood Strategic)  Agent: Roger Daniels

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Co-operate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Although Guildford Borough Council has generally complied with the statutory procedures for preparing the Local Plan, it has not complied fully with the ‘Duty to Co-operate’ which is a statutory requirement in Section 110 of the Localism Act 2011; particularly in relation to housing provision and Green Belt review.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp17q/321  Respondent: 17415009 / Lightwood Strategic (Lighwood Strategic)  Agent: Roger Daniels

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate
The Duty to Co-operate Topic Paper records ongoing discussions with neighbouring districts in Surrey on the production of a Local Strategic Statement (LSS). It also describes co-operation on a joint Strategic Housing Market Assessment (SHMA) but it does not point to any substantive agreement with neighbouring councils to ensure that the delivery of housing will meet the objectively-assessed needs of the Housing Market Area (HMA) throughout the plan period.

Paragraph 4.49 of the Topic Report refers to a Statement of Common Ground in which the three neighbouring authorities of Guildford, Woking and Waverley have acknowledged that there is unmet need within the HMA, but the Statement simply 'commits the three authorities to continued future joint working to ensure that as far as possible, and subject to the policies in the NPPF, housing needs across the HMA are met in full.'

The NPPF is explicit, in paragraphs 47 and 182, that local planning authorities should meet the full objectively-assessed need for housing in the housing market area, subject to other considerations, and should consider unmet housing needs in neighbouring authorities when formulating their local plan strategy. This has not been done by Guildford and its neighbouring authorities.

The Topic Report also concedes (in paragraph 4.93), in relation to Green Belt review: 'As the broad methodology that underpins the study was developed prior to the NPPF and Localism Act, we did not engage with neighbouring authorities at that time.'

In relation to both housing and Green Belt review, it is therefore clear that the requirements of the Duty to Co-operate have not been met: in terms of the legislation in Section 110 of the Localism Act 2011; in terms of the policies of the National Planning Policy Framework; or in terms of the advice in Planning Practice Guidance.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
3) The increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House, negatively impacting the setting of these buildings and the wider Ockham Conservation Area

4) The increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB

5) The change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

6) The removal of additional 3.1 ha from the green belt without any justification

7) The failure of the council to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

8) The major changes made to the plan mean that this should not be a Regulation 19 Consultation. This type of consultation needs to be on the totality of the plan rather than the proposed changes.

9) There is no clear justification for the removal of one strategic site over site A35.

10) The plan is unsound within the original time frame and the council have chosen not to address this. They have ignored previous representations and not followed due process.

11) The transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

12) The housing number is unsound and open to legal challenge. The Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc.

13) The council claim this plan protects the borough's most important countryside, landscapes and heritage. It most certainly DOES NOT.

It is very apparent that the council have not taken on board many of the comments made previously on issues such as poor drafting and errors. When a comparison of the allocated sites is made there is clearly extremely inconsistent weighting on the various restrictions to suit their ends.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to policy A42 change at Clockharn in Tannery Lane where there has been an increase from 45 homes to 60. This change takes no account of hundreds of previous objections made by local residents. The increase in numbers of homes will have a seriously detrimental effect on the traffic in the area, particularly as Tannery Lane is a small country road and should remain as such. This development is a significant erosion of the Green Belt in our area and is totally out of keeping with the rural nature and views across the River Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to policy A43 change at Garlick’s Arch for the following reasons:

Again this change totally disregards the thousands of previous objections. It is a beautiful area of Green Belt with very valuable and beautiful ancient woodland – something which is totally irreplaceable. It is a massive development for a village of this size causing Ripley and Send to join up, something which Green Belt land is designed to prevent. Again – another development in this area will massively increase the congestion on surrounding roads, something which is already a particular problem in our area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to policy A58 at Burnt Common, London Road - which was deleted from the 2014 draft plan because of objections made previously. It is totally unnecessary and inappropriate to build industrial units on Green Belt land in a village of this size. There are already suitable and available sites within Slyfield and Guildford. Again any increased movements of industrial vehicles on the surrounding roads will lead to total gridlock.

Green Belt Policy 2, at paragraph 4.3.15; I object to the proposal to inset Send Business Park from the Green Belt for the following reasons:

- It is a non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation.
- Tannery Lane, as previously mentioned, is a small country lane which should remain as such and is totally unsuited to increased traffic volume.
- Any additional expansion or development in this position will have a significantly detrimental effect on the Green Belt land in this location.

I object to the proposal to inset Send Business Park from the Green Belt because:

1. Any further development at this location would detract from the surrounding Green Belt countryside area and openness.
2. Tannery Lane is narrow and commercial vehicle traffic access is restricted.
3. As with the proposed development at Clockbarn Nursery any increase in traffic in Tannery Lane will cause further problems with traffic movements at its junction with Send Road (A247).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A 42 change at Clockbarn Nursery in Tannery Lane because:

1. It will worsen existing surface water flooding problems in the area.
2. The increase to 60 homes is an excessive increase from the previous 45 proposed and ignores the considerable number of previous objections raised by local people.
3. It will considerably increase traffic in Tannery Lane and related problems with traffic movements at its junction with Send Road (A247).
4. It will erode more of the green belt in the Send village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy A43 change at Garlick’s Arch because:

There are no “exceptional circumstances” for development in this Green Belt area.

There is no proven demand in this location for Travelling Showpeople plots.

This area floods very often and is a designated floodzone.

The number of homes is excessive, will cause over-development in Send village and generate extra traffic that will considerably overload existing local and main roads in both Send and Ripley.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 – Land at Burnt Common because:

1. The 2017 Employment Need Assessment for the whole borough shows a demand reduction to 3.9 hectares, and such a demand for industrial or warehousing development can be met elsewhere in the borough without needing building in the middle of the Green Belt.

2. As with the proposed development at Garlick’s Arch this will lead to excessive extra traffic which will cause overloading and gridlock of local and main roads.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the increase in the proposed number of homes for this site because the junction at either end of Tannery Lane cannot take the increased traffic load. It is a narrow country lane. The junction with Send Road is difficult to negotiate already. I also object because the number of homes for this location has been INCREASED even though there were previously hundreds of objections to the lesser number of new homes.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

I object to this policy because it was deleted from the 2014 draft because of previous objections. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units and the impact on small surrounding roads will create even greater traffic gridlock than exists presently. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

I object to the proposal to inset Send Business Park from the Green Belt because Tannery Lane is very narrow and restricted to one vehicle width in several places. Increased traffic will make the area a danger for drivers. The area is alongside the stunning Wey Navigation and as such the area should be protected from development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

• disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

The proposal for 1200-1750 homes is completely out of character for Ash Green and will coalesce Ash, Tongham and Ash Green losing a beautiful countryside location which is completely contrary to Policy P3 Countryside mentioned above. Any development in this area should be of a size and scale which keeps the intrinsic character and rural character of these sites.

Policy A29 Requirement 8 doesn't allow for the right level of protection for Ash Manor, a set of three listed buildings, and should be tightened to prevent developers from spoiling views, setting and driveway approach from White Lane. Listing buildings do not sit nicely against poorly specified and designed housing estates so something more appropriate is called for.

I'd like to highlight again the need for infrastructure before development here as the local roads are used as a rat run and are already under great pressure due to approved developments. Planning approval in this area should be predicated on the completion of the following improvements:

1. Ash Station
2. The Street Tongham
3. A331/A323 Intersection
4. A31 White Lane Junction

Ash Green is not and should not become part of the Ash and Tongham Urban Area.
Sustainable transport needs further work. Walking from Ash Green to Ash Station is downright dangerous. Cycling to Guildford as I do is only something for the most experienced cyclist and nobody new is going to do it as it's life threatening every day. The bus service is infrequent and no use for commuting. Where is the provision to improve this stuff coming from? Sustainable transport is not at the forefront of the plan and should be far more prevalent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

These policies provide no provision for community spaces such as a village hall or larger recreation area. It's disappointing that the plan has nothing in this area for local people when it's absolutely trying to cover this land in houses leaving us nothing.

I object to the fact that the plan is trying to build so many houses in one area of Guildford's borough. It is not fair to push all development into one place and it would be far fairer to spread it out across the borough. I'm not against having development on my doorstep just not what I consider to be a large amount of it which is out of proportion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Ash Green is not part of the Ash and Tongham Urban area and I strongly disagree that it should be made so. I live in Ash Manor, which has a long history, and has always been part of Ash Green so please do not do anything to move Ash Green, as the current proposal appears to do, or coalesce Ash, Tongham and Ash Green. The green boundary's should stay in place to allow the villages to be separate. The intrinsic character of Ash Green should be be kept intact after any development.

Substantial development has been proposed for Ash Green and I believe it is vital suitable infrastructure to be in place before further development commences. The road infrastructure required includes work to the A31/A3 junction at Guildford, A331/A31 junction and improvements around Ash station as without these Ash Green, which is used as a rat run already, will be even more overrun and dangerous than it is already with small roads under large pressure. In addition
infrastructure for schools, doctors, shops, etc is also sorely lacking with the planning approvals we already have let alone those proposed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Now 60 homes in place of 45 homes previously

I object to Policy A42 change at Clockbarn in Tannery Lane because the increase to 60 homes in place of 45 homes is up by 33%, an excessive amount. It ignores the hundreds of previous objections made by local people. It will add to the surface water flooding that we already have a problem with. It will further alter the village becoming more urban losing more Green Belt which was to protect natural or semi natural environments and to protect unique character of rural communities. It will put pressure on the local infrastructure and worsen access and traffic problems in Tannery Lane and the A247.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Burnt Common, London Road

Now a new allocation for a MINIMUM of 7,000 sq m of industrial or warehousing

I object to the word “minimum” now being shown which changed from “maximum” in the 2016 Plan as since that time there has been a decline in demand for industrial land. This was deleted from the 2014 draft because of all the objections made previously.

We will become a suburb joining into Ripley which works against the creation of the Green Belt which is to protect natural or semi natural environments, protect unique character of rural communities that might be absorbed by expanding suburbs. I object to the traffic congestion this will have on the A247 and smaller roads.

I object to the need to build warehouse/industrial development in the middle of the Green Belt because Slyfield/Guildford have empty sites and industrial units.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Send Business Park now taken out of the Green Belt altogether

I object to the proposal to inset Send Business Park from the Green Belt because further expansion or development at this area detracts from the openness of the Green Belt and is inappropriate. I object as we must protect the unique character of Send and the Wey Navigation which this sort of development could easily deteriorate. The access in and out of Tannery Lane is very bad especially at busy times of day.

I am writing to object to the latest draft local plan. I note that you are only accepting comments to the changes versus the previous plan, so I would ask you to read my comments below in conjunction with those that I have already written to you about in 2016, when you published the previous set of proposals. I have attached a copy of this letter for your ease of reference.

I have been a resident in Send for over 20 years and have seen how strongly local people feel about the proposed changes to our village. This included raising a large proportion of the objections to the previous plan as well as electing two Borough Councillors who primary objective is to save Send’s Greenbelt status. However, it appears that none of these objections have been taken into account at all. If anything Send seems to have been unfairly penalised for this activity with the inclusion of even more development in the latest version of the plan, making things even worse for our village.

Overall the proposed changes will have a huge detrimental effect, with particular impact on traffic and other facilities, in addition to the removal of the irreplaceable Greenbelt protection that parts of our village enjoy. I have detailed my objections to specific policies below, but having drawn a - somewhat rudimentary- map of all the proposed development the impact of the changes can be seen in their entirety ( See attachment) This map does not illustrate the additional impact on traffic and other infrastructure from other proposed developments such as Gosden Hill, which will compound the issues with local roads and other facilities which are struggling to cope with the local population as it is. In addition, there appears to have been minimal effort to development existing brownfield sites in and around Guildford. This is evidenced by recent redevelopment of land such as the old Fire station and the Waitrose in the centre of Town. Both these sites, and many others, could have been used for residential development instead of more retail space, with far less impact on the local infrastructure and none of the Greenbelt.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I continue to object to the inclusion of the Land at Wisley Airfield (A35) in the draft Local Plan for many reasons, including:

1. It is further from railway stations than any other identified strategic sites.
2. It is adjacent to the most congested stretch of strategic road network in the county and close to the most congested junction in the country (J10)
3. Local roads are at capacity particularly when the SRN is not free-flowing
4. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
5. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs. It is unrealistic to suggest sustainable methods of travel such as cycling and walking could be used.
6. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
7. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station

Despite having received thousands of objections from both local residents and statutory consultees, the council has failed to remove this site from the Local Plan and yet other sites have been removed. I can see no clear justification for this.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I fully support the removal of site A46 (1100 homes and school) and site A47 (50 homes) from the draft local plan. My reasons for the support of their removal is the infrastructure would have been unable to support the level of building on this scale.

Removal of the green belt of homes in Guildford Road, northern end of Glaziers Lane, Flexford, Walden Cottages and Palm House Nurseries. I would like to object to the removal of these areas from the green belt on the basis that development will be far greater if this removal occurred. The openness of the green belt would be destroyed by this proposal.

I would also like to object to a large number of properties being built in close proximity to Normandy. The current infrastructure is unable to cope with this demand.

Comment ID: pslp172/3580  Respondent: 17417569 / Sue Atkins  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26
I would like to OBJECT once again to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan. I have already sent in my objections on previous occasions and would like you to pass on these comments together with all my previous comments to the Inspector. There are numerous errors in the plan and it has a considerable lack of clarity.

Below, I have highlighted some of the major objections I have as to why I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan:

1) I object, unreservedly, to the increased area of the site as this now backs on to our house, UPTON FARM, which is one of the heritage sites in Ockham, and would have a huge impact on our outlook and views all around. Not to mention the noise pollution, environmental impact, and loss to our quality of life. We have spent years adhering to the stringent Heritage Rules to make sure this house is in keeping with its period and history.

2) I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

3) Local roads are at full capacity and often grid-locked in the rush hours, particularly when the weather is bad, when taking the children to the local school.
4) It is adjacent to the most congested stretch of strategic road network in the county and close to one of the most congested junctions in the country (J10).

5) The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”!

6) The change to the site boundaries are not identified correctly on the plan (Appendix H p16) - I object to this.

7) I object to para 21 which “limits” development in flood zone 2 and 3. Development should be EXCLUDED in flood zone 2 and 3.

8) I object to the fact that the council has failed to remove this site from the local plan, despite receiving 1000’s of objections from local residents and statutory consultants.

9) I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

10) I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

11) I object to the Council wasting tax payers and residents’ time and money not following due process and also ignoring previous representations over the years.

12) I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

For all the above reasons, and numerous other reasons, I consider this plan is unsound and should be removed from the plan as soon as possible.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Agent: Barton Willmore (Ben Shaw)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

[text of attachment reproduced below]

Introduction

1. We act on behalf of The Co-operative Group (‘TCG’) and Scape Living (‘SL’), and have been instructed to submit a further representation to the Proposed Submission Local Plan: Strategy and Sites (June 2017).

2. As you will be aware TCG is the landowner of a site known as ‘Kernal Court, Walnut Tree Close’ (‘the Site’). This Site is designated in the emerging Site Allocations as ‘Policy A13: Kernal Court, Walnut Tree Close, Guildford’. The extent of the Site is identified on the accompanying Site Plan provided at Appendix 1.
3. SL, an established student housing provider and operator of the adjacent highly successful student accommodation site “Scape 1”, has agreed terms with TCG in relation to a potential redevelopment of the Site for purpose built student accommodation. This is the subject of early pre-application discussions with Borough Council Officers in advance of the submission of a Planning Application by late 2017. The scheme will meet a demonstrable need for additional purpose built / managed accommodation in this location based on SL’s own experience including a significant waiting list.

4. The proposed development is supported by the University of Surrey (‘UoS’) (see the letter at Appendix 2) and other Higher Education Institutions in the Guildford area as a means of providing modern, well managed and accessible accommodation for those students living off-campus. This is to meet an increasing need for such a form of accommodation which is increasingly preferred by students to traditional shared living in rented accommodation in the private sector.

5. The submission of this representation follows the representations submitted by TCG in November 2013, September 2014 and July 2016 to the Strategy and Site Issues and Options consultation and the Draft Local Plan consultation respectively.

29. As stated above, TCG is the owner of the Site allocated under draft Policy A13 for approximately 100 homes (Use Class C3) which has been the subject of pre-application discussions with your Officers for the redevelopment of the Site to provide residential and / student accommodation.

30. SL, a student housing provider, partners with institutions and developers to provide high quality and affordable purpose built student accommodation and have expressed interest in redeveloping the Site. The UoS have written a letter (Appendix 2) supporting SL’s proposals to provide more purpose built student accommodation within Guildford, for the benefit of their students, whilst easing the existing and future housing pressures in the Town.

31. On behalf of TCG and SL, we support the principle of the Policy which confirms the acceptability of the removal of the industrial use at the Site and the replacement with residential. However, we object to the land use intent of the Policy as we consider that the allocation should not be solely for residential use. The Site should instead be allocated for residential (Use Class C3) and / student accommodation.

32. Student accommodation is considered to be an entirely appropriate use given the Site’s proximity to the Railway Station, the Town Centre and in particular its easy walking distance to the University Campus. The Site’s constraints (in terms of access, irregular shape not lending itself well for employment use), the Site’s surrounding uses (including student accommodation adjacent to the Site), the nature of the forthcoming uses and the transition occurring in the area also underline its suitability for both residential and student accommodation. This is recognised within supporting text of Policy A13 which highlights the changing character in the area from primarily industrial to residential (including student accommodation).

33. We note that the site was originally identified for student accommodation in the initial draft versions of the Plan. This position appears to have changed following an assessment of the site’s suitability in Land Availability Assessment (LAA) February 2016. This concluded that the site is most suited for residential development to provide new homes to help meet the identified need. It also stated that C3 housing can flexibility meet the needs of the local population, including students who wish to live in the local community. Despite this encouragement of students in this location (albeit living in C3 units), the assessment also concluded that it would also be prudent to avoid an overconcentration of specific purpose built accommodation in this locality.

34. We consider the assessment of the site in the LAA to be flawed for the following reasons:

(i) There is no accepted definition of ‘overconcentration’ in the Plan or Guidance. It is also highly unreasonable to conclude that overconcentration would occur when there is only one existing student accommodation in the immediate locality and the possibility of only one further building.

(ii) Despite wishing to avoid an overconcentration, the LAA actually encourages student accommodation in the proposed C3 allocation. This would undermine both the housing need requirement by removing accommodation from the private sector and encourage students to live in unmanaged accommodation where the negative effects of student living are far more likely to arise with an impact on wider residential amenity. This would simply not occur in a privately managed accommodation building such as Scape 1.
(iii) The site has the potential to make a far greater contribution towards housing need than is identified in the LAA. A conventional residential scheme is only likely to have a capacity of 100 units. Applying affordable housing policy and mix requirements, we estimate that such a scheme could accommodate 162 students. The emerging SL scheme identifies the site as having a capacity for circa 350 rooms plus circa 14 C3 flats. This represents a significant net increase in both the student capacity but also the amount of private sector accommodation that will be made available to other housing needs as a consequence of the development. A student housing scheme in the right location (such as this) can therefore make a far greater contribution to housing needs in the Guildford area.

35. TCG and SL has considered their options for the Site and concluded that student accommodation represents a deliverable and viable development opportunity and as such, seeks that Policy A13 is amended to include the allocation for residential (Use Class C3) and / student accommodation (Sui Generis).

36. It is important to reference Paragraph 4.2.7 of the emerging Local Plan which confirms that any additional student accommodation built over and above projected need will count towards the general housing requirement. As such the provision of student accommodation (regardless of whether it is meeting an identified need or not) will relieve pressure on the housing market in a location that is entirely appropriate for such a land-use.

37. Accordingly, the emerging Local Plan should be updated to reflect these comments within Policy E3 and Policy A13.

Affordable Housing

38. We note at paragraph 4.2.35 the Plan identifies the types of residential accommodation within Use Class C3 where affordable housing will be sought. In accordance with PPG paragraph 21 (as referred to in paragraph 9 above), we recommend the Plan specifically states that student accommodation is not required to provide affordable housing due to its ability to increase the availability of low cost housing.

Thames Basin Heaths Special Protection Area

39. We note that the supporting text to Policy P5 (see paragraph 4.3.51) has been amended to include the requirement for student accommodation to contribute towards the provision of SANG. This is on the basis that it is considered to be a form of permanent accommodation.

40. This is a change from the adopted Local Plan and also the determination of the Planning Application for Scape 1 in 2014 where student accommodation was considered to be exempt as it is not a form of permanent accommodation and falls outside the C Use Class. There has been no material change in national guidance to have justified this change in approach and it remains the case that student accommodation is not permanent as it is temporary, term based living. In addition, students generally do not use the Thames Basin Heaths for leisure purposes and are not dog-owners in the local area to the extent they would have an impact that necessitates a contribution.

41. On this basis, we recommend student accommodation is removed from paragraph 4.3.51.

Examination and Next Steps

42. We trust the above will assist in the formulation of the Local Plan and request that these recommendations are reflected within the submitted Local Plan. It is important to note that, as we are proposing changes to the Local Plan, we would like to participate in the Local Plan Examination in order to contribute towards the proceedings to best inform the examination and present amendments / additional evidence so the Plan can achieve soundness. In the meantime, we would be happy to discuss these representations in more detail with GBC Officers.

[Appendix's in attachment]

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: 24099_A3_LP_Rep_240717_FINAL.pdf (3.0 MB)
24. We repeat our previous representation in July 2016 in relation to draft Policy E3. Draft Policy E3 of the emerging Local Plan considers employment capacity. This policy protects employment floorspace within the Borough, this includes Strategic Employment Sites, Locally Significant Employment Sites and existing employment sites that are not specifically allocated for employment use. This could potentially apply to the existing Site given the historic and present employment use which remains on part of the Site.

25. The Policy sets a requirement for a 12 month active and comprehensive marketing period for the current employment use of the site if it is proposed to change the use of the existing employment site. TCG objects to this Policy as it adds unnecessary barriers for the redevelopment of existing employment sites that are more suited for alternative uses.

26. Sites that are in an existing employment use, but allocated within the emerging Local Plan for an alternative use, should not be protected by this Policy and subject to the requirement of a 12 month marketing period as the site allocation confirms the acceptability of the site for the alternative use. In this regard, the Evidence Base’s identification of the Site for alternative use should offer sufficient justification to override the submission of any further suitability evidence. As such, Policy E3 should be amended to exclude the marketing requirement for existing employment sites allocated for an alternative use within the Local Plan. The third bullet point of Policy E3 relating to employment floorspace outside designated employment sites should be reworded as follows (our additions):

- ‘Employment floorspace will be protected in line with latest needs assessment and the loss be resisted outside designated employment sites, unless the site is allocated for an alternative use. Change of use will only be acceptable if evidence is provided of active and comprehensive marketing of the site for its current use (of offices, research and development or industrial) for a continuous period of at least 12 months. If the site is allocated for an alternative use within the Local Plan, the marketing period is not required’.

27. This is considered acceptable as it will deliver sites that have been allocated as suitable for alternative uses and required to deliver the overall plan strategy. It will also ensure the deliverability of the site allocation and the important contribution it makes towards the Plan’s residential targets.

28. The NPPF (Paragraph 22) highlights that planning policy should avoid the long term protection of sites for employment use where there is no reasonable prospect of the site being used for that purpose. Therefore to ensure the emerging Local Plan is consistent with National Policy in terms of being ‘sound’ (NPPF, Paragraph 182), flexibility should be applied to this policy to allow the release of employment sites where there is not considered to be a reasonable prospect of the Site being used for that purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

[text of attachment reproduced below]

6. Draft Policy H1(5) of the emerging Local Plan considers student accommodation. This part of the Policy directs purpose built student accommodation for full time higher education Guildford based students on campus locations where appropriate. The Policy states that about 60 per cent of full time Guildford based University of Surrey students are expected to be provided within accommodation on campus. It is implicitly assumed that there is no material change in student numbers within other institutions.

7. The supporting text to this Policy states, in relation to monitoring the contribution of new homes against the identified local housing requirement, that “Purpose built student accommodation on campus…are considered separately from general housing needs in this plan” and “Any additional student accommodation or residential institutions built over and above the projected need (as identified in the SHMA) will count towards the general housing requirement, based on the amount of accommodation it releases into the general housing market”.

8. These statements are considered to be unsound and flawed when interpreted against the guidance set out within the Planning Practice Guidance (‘PPG’). The PPG is clear at Paragraph 038 that:

“All student accommodation, whether it consist of communal halls of residence or self-contained dwellings, and whether or not it is on campus, can be included towards the housing requirements, based on the amount of accommodation it releases in the housing market. Notwithstanding, local authorities should take steps to avoid double counting”.

9. The PPG recognises the importance of purpose built student housing on mitigating the pressure on market housing. The PPG states at Paragraph 21, inter alia, that:

“Encouraging more dedicated student accommodation may provide low cost housing that takes pressure off the private rented sector and increase in overall housing stock”.

10. The Council’s approach of considering purpose built student accommodation, on campus, separately from the general housing need, does not take into account the impact this may have on market housing. Both Paragraphs within the PPG makes clear that student accommodation need should be planned for and addressed through the plan-led process.

11. The West Surrey Strategic Housing Market Assessment: Guildford Addendum Report 2017 (‘SHMA’), prepared by GL Hearn on behalf of Guildford Borough Council (‘GBC’) sets out recent trends in student growth in Guildford and the number/proportion of students which can be expected to require housing within Guildford. The SHMA directly informs draft Policy within the Proposed Submission Local Plan. We consider that a number of inaccurate assumptions have been made within the SHMA which has resulted in the underestimation on the impact student growth will have on the housing market.

12. Firstly, the SHMA only assesses the estimated growth in student numbers in the UoS, which is the largest but not the only institution within Guildford Borough. The Proposed Submission Local Plan, at Paragraph 4.2.16 recognises the variety of further and higher education establishments which include, Guildford School of Acting, the University of Law, Guildford College including Merrist Wood, the Academy of Contemporary Music and the School of Horticulture at RHS Wisley. There is no mention on the future growth of any of these institutions or the impact any future growth may have on the local housing market. Without a buffer within the OAN to include the impact of all institutional growth, there is potential that the conclusions set out in the SHMA on student growth and impact on local housing market are underestimated.
13. The SHMA states that the aim of UoS is to provide accommodation for 50-60% of full-time Guildford-based students. On the basis that 55% of these students live within halls of residence, and 45% can be expected to live in the wider housing market.

14. The SHMA sets out a total of 15,280 UoS students in 2015/2016 of which 92% equated to full-time equivalents (14,005) and 70% of the full-time equivalents (10,700) were based in Guildford requiring accommodation in the Borough. UoS is planning to increase the total headcount of students to 23,000 by 2026/27 academic years.

15. The SHMA states at paragraph 7.5 that the “proportion of the total students which is full-time Guildford-based could be expected to fall from the current level of around 70%, for instance as a result of growth in degree apprenticeships and foundation students” . We consider there to be no appropriate justification or evidence to support this statement. The SHMA continues to state that “the number of full-time Guildford-based students is expected to increase from 10,700 (2015/16) to around 14,500 over the next ten years (to 2026/27)” . This is only 63% of the overall anticipated head count of 23,000 students in 2026/27 academic year. Given that there is no justification or evidence for this 7% decrease in full-time Guildford based students there is potential that the conclusions set out in the SHMA on student growth and impact on local housing market are underestimated.

16. We consider that the SHMA should have applied the current levels of 70% of full-time students to be Guildford based, as this can be based on clear evidence. This is a consistent approach within Appendix C of SHMA 2015. This would equate to 16,100 full-time Guildford based students and uplift of 5,400 students by 2026/27. This would then equate to 2,430 students expected to live within the general housing stock (45%). On the basis that the SHMA deems there to be an average of 4 students per household, this would equate to around 608 dwellings over the 17-year Plan period, equating to an average of 36 dwellings per annum moving forward. This is an adjustment of an additional 12 dwelling per annum against the SHMA’s conclusions and the Borough’s overall housing need.

17. Notwithstanding, the SHMA continues to state that “there is some uncertainty regarding longer-term growth, and we have not therefore made any assumptions about longer-term growth in student numbers” (our emphasis) and that “given the aspirational nature of the University’s growth expectations, we have assumed that this scale of growth (3,800 additional full-time Guildford-based students) is achieved over the plan period to 2034” We consider that the SHMA fails to take into account the impact of student growth on the local housing market in the last 7 years of the Plan-period, and therefore the impact could well be underestimated within the OAN.

18. Critically the SHMA also identifies that 1,710 (or 45%) of UoS students could be expected to live within the general housing stock which is in addition to any purpose built requirement. Such a number can be increased when the other Education Institutions in the town are included in the analysis. As such, the town’s private housing stock is accommodating a significant number of students in the private sector that could otherwise be accommodated either on-campus (where the places exist) or in purpose built student accommodation. Purposed built student accommodation should be promoted through the Proposed Submission Local Plan to positively free-up current and future private stock, being used for student accommodation, for the use of private sector requirements, particularly those with affordable needs. This is recognised by the PPG which recognises the importance of purpose built student housing on mitigating the pressure on market housing, specifically the private rented sector. It may then also place less pressure on the overall private sector housing target.

19. It is therefore concluded, that the Evidence Base is incorrect in relation to student growth and the impact on the OAN. Based on the significant need identified by SL in discussion with both UoS and other Institutions in the Borough, it is considered that there is a far greater need for well-located and accessible purpose built student accommodation than the Plan and Evidence Base accounts for.

20. Paragraph 4.2.9 of the Proposed Submission Local Plan, relates to family housing and recognises the number of children under 15 is projected to increase throughout the Plan period, and that the Council needs to plan carefully for family housing. This will be encouraged through a reasonable quality and size of accommodation in the private rented sector, in particular two and three bedroomed homes.

21. It is clear that the 45% of full-time Guildford-based students would be in direct competition with affordable family homes, of which the Council see as a housing priority. If the OAN figure is underestimated in relation to impact of student growth, there will be a direct impact to the local housing market and specifically affordable family homes.
22. Against this background, we recommend draft Policy A13 of the Proposed Submission Local Plan is amended to include specific allocations for student accommodation (Sui Generis). The allocations should be based on updated Evidence Base which accurately reflects the needs of all of the Town’s Educational Institutions (not just UoS) and places a much greater emphasis on removing students from the private affordable sector.

23. We would welcome an opportunity to input into the updating of the Evidence Base and to formulate an appropriately worded policy with GBC before this Plan is submitted to the Secretary of State and the subject of Examination.

I object to policy P2 proposing the insetting of East Horsley from the green belt. The government has promised to protect the green belt and you should heed this. I also object to any movement of the settlement boundary, you have given no reason for this.

I strongly object to site policy A35. You previously gave 14 reasons for your rejection of the proposed development of Wisley airfield. Despite this you have included it in. Your revised plan, why, what has changed.

I object to the revised 2017 local plan, the calculation of housing need is opaque it will therefore be challenged.

The NPPF is clear that Local Plans should only meet objectively assessed needs if any adverse impacts of doing so do not significantly and demonstrably outweigh the benefits, when assessed against the policies in the Framework taken as a whole, or specific policies in the Framework indicate development should be restricted. GBC have not put forward any meaningful justification of the benefits from the development of Gosden Hill Farm outweighing the harm to the Green Belt. On that basis alone, Policy A25 should not be part of this draft of the Local Plan.

In fact, it is impossible to make any really meaningful comment on many aspects of this Policy since there is so little detail in the Plan on internal design, infrastructure and transport connections for the Gosden Hill Farm site other than to note it introduces continuing unacceptable uncertainty and particularly since there is now so little apparent commitment from the Highways Authorities to provide the necessary road infrastructure.

Reliance on the developer to fund much of the infrastructure including the SMC, A3, Park and Ride and Merrow Station seems unrealistic and the obligations should certainly be better spelt out well before the planning application stage.

Improvement to the A3 is critically important to any development of Gosden Hill Farm. As mentioned above, it is self-evident that the pressure on local roads in Burpham is already intense in peak periods and these roads are clearly not suited to carrying large volumes of traffic. Under the Plan, congestion is very likely to be worse than it is now. Consequently, it should be a fundamental requirement that the Gosden Hill Farm development should only go ahead with a four-way junction connection to the A3 and preferably with a tunnel under the A3.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

It is generally accepted that at peak times the A3 around Guildford and local roads in Merrow and Burpham are performing at over capacity. Anyone who has experienced traffic congestion in this area knows that the level of growth planned for this area will undoubtedly make it even worse notwithstanding the proposed schemes to improve the highway network. The transport infrastructure is another constraint that has not been properly assessed even with all the proposed measures being proposed to alleviate congestion around Guildford which have themselves been watered down in this draft Plan.

Policy ID1 states that the delivery of development may need to be phased to reflect the delivery of infrastructure to be secured by planning condition and planning obligation. This approach is not strong enough. Site development should not be allowed to proceed unless strong and satisfactory guarantees or undertakings to provide the essential elements of the infrastructure needed have been given by developers and other bodies providing those elements.

---
I dispute the revised OAN figure in the West Surrey Strategic Housing Market Assessment: Guildford Addendum Report 2017 because the analysis of the demographic and economic need figures produced by GL Hearn (GLH) on which it is based is fundamentally flawed.

I have read the review by NM Strategic Solutions Ltd (NMSS) of the Addendum Report as well as the original SHMA which can be found on Guildford Residents’ Association’s website. NMSS have identified a number of serious defects in GLH’s Report which completely undermines the reliability of the OAN. For example, GLH seriously over-estimated the population growth for Guildford by over-estimating student net migration into Guildford. If proper adjustment is made for the outflow of students in the period 2001-15, NMSS calculated that this would reduce the demographically-based estimate of the number of homes needed for the period 2015-34 from 558 to 404 pa based on student figures alone. It should also be noted that Inspector examining Waverley BC’s draft Local Plan accepted NMSS’s demographic analysis as opposed to that of GLH. Even the Office for National Statistics has conceded that there is a problem with their existing statistics for Guildford that needs to be addressed.

Furthermore, NMSS also demonstrated the OAN is based on GLH’s flawed estimate of the number of homes needed to support economic growth.

Like many others, I consider the shortcomings in GLH’s Reports do not entitle GBC to depend on the OAN to support its target figure of 12,426 new homes during the plan period.

**Comment ID:** pslp172/3597  **Respondent:** 17418401 / Charles Penny  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

I strongly object to the increase of houses at Clockbarn Nurseries (Site A42)

The areas around the site of A42 is not at all suitable for a further increase from 45 to 60 homes. Tannery Lane and Papercourt Lane are single track lanes for the large majority and not suitable for more cars and with the Marina the lanes will simply not be able to cope. This will push further traffic from the smaller lanes onto the A247 and Newark Lane which are already heavily under pressure especially in peak times.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the extended development within the Green Belt and the addition of 6 Travelling show people sites at Garlick’s Arch (A43)
   - I object to the extension of Garlick’s Arch as it is entirely inappropriate for the Green Belt and will only increase Urban Sprawl. I also object to the proposal of 6 plots for travelling show people and there is no need for these to be built as the allocation in site A50 more than covers the 8 ‘needed’ as mentioned in the plan.
   - The further extension of the homes at Garlick’s Arch if the plots aren’t used is completely unsustainable and will put a stretch on the area of Ripley and Send like never before. People move to this area for its idyllic country life style (as mentioned in the plan 2.10a as something to protect) and even now, especially in rush hour there are constant queues of traffic and the roads are just not made for it. In addition to the strain on the roads, the schools and surgeries will also be hugely affected due to the sheer number of people.

Filling in Garlick’s Arch further will also close the gap between Ripley/Send and Burnt Common which defeats the object of the Green Belt to keep the area open.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3596  Respondent: 17418401 / Charles Penny  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The initial reason for having floorspace at Garlick’s Arch was because it was further away from the Burnt Common area and increasing the separation between here and the site at Gosden Farm. However putting the floorspace up at Burnt Common further removes the need for Garlick’s Arch.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3595  Respondent: 17418497 / Amanda & Michael Sleet  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

2789
We understand that the infrastructure schemes associated with this proposed 1,800-home development will wreak havoc on the surrounding road networks, affecting many roads and residents in Guildford and Waverley.

We understand that the site depends on two new schemes:

- Widening of the A3 through Guildford
- A new western link road from the A31 to the Tesco Roundabout at Guildford

Guildford Borough Council’s own traffic modelling has shown that both these schemes will result in a surge in traffic along the B3000 in Puttenham, Compton, Farncombe, Binscombe and Artington (with similar traffic increases along the parallel Charterhouse/Hurtmore and Priorsfield roads), as well increased traffic and congestion on the A31.

Compton, which will experience a 15% increase in traffic in the northbound direction alone, already has air quality problems and nitrous dioxide levels well above the EU legal limit have been consistently recorded over the past three years. The Parish Council has requested that The Street is made a Air Quality Management Area.

Aside from the congestion problems, a six-lane motorway through Guildford will cause severance, as well as increased noise and air pollution; whilst the new “western link” road will slice through the Surrey Hills Area of Outstanding Natural Beauty, through 18th century parkland and a belt of ancient woodland.

We are therefore writing to register our continued objection to the Policy 26 Blackwell Farm site allocation. Inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9]:

1. disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
2. directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
3. ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
4. adds to air pollution in neighbouring areas, which already exceeds safe EU limits for nitrogen oxides [Policy A26].

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposed increase of a further 16 houses on the Clockbarn Nursery site. This is a totally unsuitable site anyway for a high density development. Increasing the number of houses completely exacerbates the situation.

Traffic movements from the site coupled with traffic accessing the new Marina development and then trying to join Send Road would cause considerable problems for residents and through-traffic alike. Access from Tannery Lane to Send Road is very limited and trying to join it, particularly at peak times, would be extremely difficult.

Send Road is already used to capacity by traffic heading to and from Junction 10 on the M25 and is used as a rat run off these roads. Send Road was never intended to be used by today’s very large articulated trucks.

The essential traffic islands to enable pedestrians to cross represent an additional hazard plus the increasing number of cyclists exposed to rising levels of exhaust pollution.

Access from the opposite end of Tannery Lane is through very narrow roads with limited passing areas which will render this access effectively impossible. This means that traffic from the Marina and the Clockbarn Nursery site would be forced to come and go via the Send Road junction.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object to the Garlick’s Arch (A43) proposed changes to this site which in combination would generate considerable activity in a most unsuitable location.

Pitches designated for Show People suggests large vehicle traffic movements and a further extension to the commercial premises that have already been added on that side of the road all of which is located in close proximity to the surrounding residential area.

Increasing the number of houses would mean a truly massive increase in the volume of traffic which will only be able to use the A3, Send Road and travelling through Ripley, all of which are unsuitable for the level of traffic associated with such a development.

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause log jams of these villages.

Garlick’s Arch (A43) should not be extended or even developed with the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Show people sites in A34 Garlick’s Arch

The allocation of 6 Travelling Show people plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Show people plots in A43 Garlick’s Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

I further object to the Garlicks Arch site because if A58 Burt Common site and development at Gosden Hill Farm is also granted then the A3 corridor from Burpham to Ripley will be over developed and it will simply join up a sprawling set of developments. These in turn will lead to greater traffic density, slower journey times as well as increasing safety concerns for an infrastructure which cannot support this level of traffic.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am firstly in support of the removal of Site A46 and Site A47. I support their removal due to the inability of the current infrastructure to cope with developments of this magnitude - due to the effect on roads, waste, sewage, flooding electric and gas supply as well as access to healthcare having not been properly assessed.

I was also disappointed to learn that you simply wish to remove certain areas from the Green Belt. These areas are Guildford Road, Northern End of Glaziers Lane, Flexford, Walden Cottages & Palm House Nurseries. This is not acceptable. This will lead to a much higher density of development within this area as well as an increase in applications. I am surprised that on the one hand applications are correctly refused as they are in the green belt, but on the other hand - that the council can just amend the Green Belt line 'to suit', without providing any justification or special circumstances as required by their applicants. There are other sites out of the green belt that the council must look at using as an alternative. The Green Belt was created for a purpose - and will lose all importance if we can just amend it to suit our needs.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing again to the council to object to the inclusion of A35 Three Farms Meadows in the draft local plan.

I object for the following reasons:

1 it is next to one of the most congested rounds in the country and will result in the area being gridlocked with traffic and an unacceptable deterioration in traffic issues in the village of Ripley. Many of the residents would use their cars to travel to work or drive to Woking result in serious issues in Ripley Newark lane.

2 it is also opposite Wisley garden which is a very popular visitor attraction. They are proposing to increase visitor numbers by 500,000 which in combination with this proposed development will result in the entire area becoming gridlocked.

3 I object that the council has not removed this development from the plan. This overdevelopment on green belt has been repeatedly turned down and the council has received thousands of objections from residents. The high number of houses is totally unsound.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Firstly may I say thank you for your consideration of Site A46 and the removal of 1100 homes and school from this area. As a resident of Normandy this decision is much appreciated as it would have had a massive impact on what is a small village.

I am also all too aware of the need to provide housing throughout the country and our area must, like others, take it’s share of the responsibility. The proposal of 10,000 homes within a 10 mile radius of Normandy still sounds a lot but spread out over some 300 square miles is somewhat more palatable.

I would, as a resident of Normandy like to make a couple of suggestions for changes to the existing infrastructure as these homes start to come on line.

The first is Ash Station. For some reason when a train comes the barriers seem to be down for a huge amount of time before the appearance of any train. This presumably is a health and safety regulation but at peak times the knock on affect is to cause traffic to queue back past the junction of the A323 and A324 and further down each of these roads. With the proposed additional housing in the area and the corresponding increase of traffic this can only get worse and is an issue that I feel needs to be addressed whilst proposals are being put forward.

The second area is Puttenham Hill and the turning to the Farnham bound side of the A31. Over the years there have been various attempts to ease the congestion at this junction, sadly none of which have succeeded. Again, as with Ash station, the increasing volume of traffic with the proposed development would indicate that this junction is only going to get worse and the queues even longer.

The third area cyclists. This area has an ever increasing volume of cyclists on what can only be termed narrow roads. These roads are obviously pleasant to cycle on and cars, lorries, buses and cyclists need to get along so that all may enjoy the roads. If the proposal for extra homes is to go ahead it would be helpful to incorporate plans before any building takes place of a suitable system where vehicles and cyclists can co exist without safety being compromised. I am no planner but could we not be a centre of excellence for such provision? Use the fact for advertising our County?
Thank you again for your time in reading this letter. I know that backs are against the wall in terms of finance (tell me I am a teacher!) but we have an opportunity to do good on a very large scale. Let’s not squander the opportunity.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Contrary to national trends, too much potential development land within the town centre is being allocated for retail or commercial development rather than housing. High added value businesses are welcome in the borough, but much of the employment land is designated for retail or low added value employment floorspace, which only exacerbates current issues such as lack of low cost housing and heavy traffic. Sites such as the Burnt Common Triangle, currently in the Green Belt are inappropriate for heavy industry.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: pslp171/1795  Respondent: 17419841 / Andrea Fairbairn  Agent: 
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy H1
The paragraphs relating to density in Policy H1 have been deleted. To ensure developments make optimal use of space there must be a policy to cover minimum and maximum densities. Without a policy to cover density, there is a risk that developers will use land inefficiently, putting additional pressure on the countryside and un-developed land. This deletion is inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1822  Respondent: 17419841 / Andrea Fairbairn  Agent: 

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy P1

The policy relating to AONB weakens the protections offered, and (unlike previously) does not have restrictions on non-major development. This is a move in the wrong direction. Previously all proposals were considered against the 5 key tests - how development in the AONB seems to be more acceptable. This is weaker, not stronger, and is contrary to huge responses from the public in previous consultations and the weight of protection given to AONB in the NPPF.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Exceptional circumstances must be demonstrated in order to develop Greenbelt yet despite the weight of public opinion against weakening of this policy, 70% of new housing development will be in the countryside, of which, 58% will be in Greenbelt. By definition, this is not an exception and no attempt is made to demonstrate exceptional circumstances, in line with the requirements of the NPPF. Insetting villages is of concern since the restrictions within the settlement boundary raises concerns over loss of character. The Rural Economic Strategy covered in 4.51 a, promoting affordable homes everywhere in the countryside including the AONB as a main aim, is a mechanism for promoting overdevelopment in our countryside. It has not been subject to full public consultation and is based on data, which is not up-to-date.

Three major strategic sites - Blackwell Farm, Wisley Airfield and Gosden Hill Farm - are in the Green Belt. Previous consultations show that, in line with the NPPF, the public would prefer to use brownfield land in the urban area first.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The housing target proposed, of 12,426 is based on assumptions that have not been made public and includes flaws that have not been corrected in the modified SHMA (Verified by professional analyst Neil MacDonald of NMSS who concluded than an annual housing figure of 400 per year would meet Guildford’s overall need). The phased approach (more homes built towards the end of the plan period) is appropriate in order to permit necessary infrastructure but open ended targets where an unknown figure is held back until after the plan period is not a reduction but a postponement and does not allow for optimal planning or transparency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3618  Respondent: 17422753 / Carol Middleton  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond.

Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be completed before any development of Policy 29 commences.

Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

1. a) The Street in Tongham
2. b) A331 / A323 intersection
3. c) A31 / White Lane junction

Ash Green is not part of the Ash and Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. Answer (if comment is on questions 1-7 of the questionnaire): ()

Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

4.3.29 Amend: Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough's second largest urban area. Countryside within the urban to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development.

4.3.30 Amend: "We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green."

Policy P3 Amend: (1) (c) should be amended to read "does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot."

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

4.3.29 Amend: Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough's second largest urban area. Attached documents:
I object to policy A42 changes at Clockbarn in Tannery Lane because:
The revised proposal to increase the development by 33% makes a mockery of THE GREEN BELT. The site is part of the permanent GREEN BELT at Send and should remain undeveloped in order to preserve the amenity of the surrounding area. Any development will create URBAN SPRAWL along the Wey Navigation and have a very negative effect on this asset of Guildford Borough. The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical. Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic. Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

There is no need for housing on this site; the local plan housing target is incorrect. The figures quoted way exceed the local need; the local requirements are for social housing and not large executive boxes as favoured by developers to maximize profits.

Comment ID: pslp172/3621  Respondent: 17422881 / Valerie Golding  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This land is GREEN BELT it contains two areas of ancient woodland.

The ancient woodland on the site has protection under the NPPF section 118 if one locates a development of this size adjacent to woods it can not fail to damage it. I do realise the policy does allow exception for thing of national importance, but this certainly fails to meet that standard. A UK wide state of nature survey undertaken in 2016 shows worrying trends, so Surrey Wildlife Trust landscape manager Mile Waite undertook a state of nature survey in Surrey and this showed that Surreys flora and fauna appears to be fairing particularly badly with losses far higher than the national level – 12% compared nationally 2%. Of a total of 404 priority species of national conservation concern almost 31% are locally extinct in Surrey while 37% are threatened or in worrying decline leaving 32% considered stable or recovering. The proposed development will not improve the situation it would have a negative effect.

50% of the site is subject to flooding and is recognised locally as a FLOOD PLANE (see attached photographs), it carries a flood zone 2 allocation any work carried out to reduce the area flooded would increase the likely hood of flooding in Send Marsh, the Environment Agency undertook work a few years ago in Send Marsh to reduce the risk, but any work on Garlick’s Arch could neutralise the good work done.

If the proposed development of 400 houses and 6 travelling show peoples’ plots were built where will their surface water go, will it just be spirited away, it will certainly not soak into the ground under such a density of buildings.

The proposal for 400 homes totally ignores the thousands of previous objections made by local people, and there is no proven demand for travelling show peoples plots in this location.
This proposal in addition to the other developments proposed will create an urban corridor the A3 which is completely against the whole principal of the GREEN BELT which was enacted to stop urban sprawl; it would also go against the government’s claim that the GREEN BELT is safe in their hands.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I OBJECT TO A58 at Burnt Common because: this site was deleted from the 2014 Local Plan due to objections yet put back into the 2016 Plan this current proposal looks too increase the development above the 7,000 square meters of warehouse or industrial units proposed in the 2016 Local Plan. There is currently no requirement for more industrial units. Guildford and Slyfield currently have empty sites and there is a decline in the demand for such sites, the 2017 employment land need assessment shows a reduction in demand to 3.9 hectares for the whole borough, yet the council are proposing to destroy 10 hectares of Sends GREEN BELT for unnecessary units putting even more pressure on the local roads and adding to the development along the A3 corridor totally against the GREEN BELT policy.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object to the proposal to inset Send Business Park from the GREEN BELT because: this would enable the development to grow which would be totally out of keeping with the rural location, this old no conforming use is located on one of Guildford Borough’s jewels, the Wey Navigation, and any development would be very detrimental to it. Access to the site from the A247 is by a very narrow lane just one vehicle wide far more suitable for a horse and cart than a forty-four-ton HGV. Any development at this point would detract from the openness of the land (GREEN BELT) around the site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to the increase from 1200 to 1750 homes as this would result in the coalescence between the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green Village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond."

- Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval house and should be amended as follows:

"Sensitive design at site boundaries with adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

- Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be completed before any development of policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

1. a) The Street in Tongham
2. b) A331 / A323 intersection
3. c) A31 / White Lane junction

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location.

The properties along Ash Green Road form part of Ash Green Village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond."

Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval house and should be amended as follows:
"Sensitive design at site boundaries with adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

- **4.3.29 Amend:** "Originally consisting of the three small rural villages of Ash, Ash Vale, and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough's second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development."

- **4.3.30 Amend:** "We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green."

- **Policy P3 Amend:** (1) (c) should be amended to read "does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot."

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

4.3.29 Amend: "Originally consisting of the three small rural villages of Ash, Ash Vale, and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough's second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development."

4.3.30 Amend: "We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green."

Policy P3 Amend: (1) (c) should be amended to read "does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot."

Page 2804 of 2988
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   ◦ The associated traffic increase from the RHS has not been taken into account.
   ◦ The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”.
12. Opportunity (3) should be common to all sites and is not unique to this site.
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).
16. I object to the removal of additional 3.1 ha from the green belt without any justification.
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.
26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose. Indeed, in ordinary words and common language, I believe that this draft local plan, and these revisions, in totality, but in particular relating to Three Farm Meadows are “bonkers”!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.

8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.

9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”.

12. Opportunity (3) should be common to all sites and is not unique to this site.

13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.

14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).

16. I object to the removal of additional 3.1 ha from the green belt without any justification.

17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I object to the revised Draft Local Plan. I objected before and I maintain that objection. It is my view that the submission plan is unsound due to the large number of errors in the plan, the poor quality and lack of transparency in the evidence base, the accessibility of the evidence base, including the fact that huge files have again been used and these are not accessible to those with poor internet connections. There is also considerable lack of clarity.

I don’t believe that GBC have used the right process, as it is clear to me that there have been significant changes in many material aspects, yet they have used the more limited consultation as if the changes were minor. This is either a huge error of judgement, or an intention to marginalise the local people from the process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Finally I would like to object to the removal of Send Business Park from the Green Belt. The surrounding area is outstanding countryside and includes the beautiful Wey navigation, which would be threatened by such a proposal. Additionally road networks that surround the business park are not sustainable for further development, in particular the restricted vehicular access along Tannery lane.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3644  Respondent: 17424097 / Marwan Khalek  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the 33% increase in homes proposed with the change to Policy A42 at Clockburn in Tannery Lane. This increase comes despite numerous objections to the original plan for 45 houses, which has been responded to merely by increasing this number to 60. Current traffic problems and access issues in Tannery lane and at the A247 junction will be worsened by this proposal as will the current surface water flooding. Furthermore this proposal will increase the erosion of Send’s greenbelt and will have a negative impact on the open countryside views from the River Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43, which has changed to include 6 Travelling Showpeople plots despite no evidence to demonstrate a demand for these in this area. Furthermore this policy would involve the destruction of Green Belt despite there being no ‘exceptional circumstances’ for doing so and the fact that this ancient woodland dates back over 400 years and includes trees protected by Tree Preservation Orders. Additionally the implementation of this policy will put strain on both the local transport networks and infrastructure including schools and medical facilities in Ripley and Send, which are not large enough to deal with this increased pressure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Answer (if comment is on questions 1-7 of the questionnaire):**

I object to the introduction of **Policy A58**. The creation of “a minimum of 7,000 sqm” of industrial and/or warehouse development in the Burnt Common area is an unnecessary destruction of Green Belt land given the recent decline for industrial land and the empty sites located in Guildford and Slyfield. The existence of Green Belt is to prevent the unrestricted sprawl of urban developments as well as to stop the merging of neighbouring villages and towns. However this plan would join up existing villages, thus defeating these aims. Additionally such a development would cause strain on the small surrounding roads of Ripley and Send, many of which are narrow country lanes.

**Answer (if comment is on questions 1-7 of the questionnaire):**

I have already objected to the proposed development at Three Farm Meadows. I am now contacting you to object to the proposed changes to the Guildford Borough Council Local Plan as it affects that site (policy A35). The submission plan is, in my view, unclear, unreliable and unsound and contains a significant number of errors. In particular, I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

In my view, the significant modifications being made to the plan mean that it is inappropriate to have a regulation 19 consultation – I note that no clear explanation has been provided by the council as to why it considers it to be appropriate. In addition, the Council appears to be wasting tax payers money and residents time and money as a result of not flowing due process and ignoring previous representations.

I remain opposed to the inclusion of Three Farms Meadow (A35) in the draft Local plan for the reasons set out in my email last year. I would reiterate that Three Farm Meadows is a Green Belt Site of more than 60% agricultural land alongside meadows which are natural habitat for badgers, bats and protected species. It is also a site of Natural Conservation Interest and home to three species of RBPB ‘red list’ birds which are on the ‘at risk’ register. There can be no doubt that the proposed development would significantly change air quality for the worse.

Please ensure that this email, together with my original comments on the proposed development are passed on to the relevant inspector.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
Having expressed my concerns previously I am writing as a concerned sibling of a West Horsley resident regarding the latest changes made to the Guildford Borough Proposed Submission Local Plan June 2017 consultation.

My overriding concern is that it would appear that no change is being proposed with regard to the idea of insetting West and East Horsley from the Green Belt thus risking the beautiful countryside of the two Parishes being swallowed up by the Metropolitan Sprawl. The reduction in the number of new homes being proposed for West Horsley is to be welcomed but there appears to be little evidence of a realistic reduction in the overall number of homes being proposed or indeed introducing a fair balance in the number of new homes in the Borough - at present it appears that the Eastern side of the Borough is being targeted with an unfair proportion of new homes compared with the Western side.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

There also appears to be no proposal to introduce commensurate infrastructure upgrades e.g. medical, educational and transport services to cope with the increased number of residents. Furthermore the proposed Wisley Airfield redevelopment is a step too far.

It is also puzzling that like a lot of other Borough and District Councils in Surrey, the number of new homes proposed in the Guilford Borough Plan well exceeds the numbers required by HM Government.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I **object** to the new interchange with the A3 at Burnt Common in its currently proposed form. There is no mention of improvements to local road infrastructure as a dependency on this proposal. Local roads through Send and Ripley are already heavily congested with pipeline plans leading to further volumes. Traffic already queues at peak periods as existing roads can scarcely cope with the current levels of traffic. Please see below for more information relating to my object on this issue.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

---

I **object** to the development of 40 houses and 2 traveller pitches at Send Hill. It is an inappropriate location because of the narrow width single access country road providing insufficient access - please see below for further details on traffic issues. The subsoil of the proposed site contains documented unsafe landfill waste registered at GBC. Any development there would spoil beautiful and historic countryside including the ‘five manors of Send’ which are a matter of historic record.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
The future of Guildford borough:

The local plan seeks alignment with the council’s corporate plan 2015-20 which establishes the ambition for Guildford to be ‘a town and rural borough that is the most desirable place to live, work and visit in South East England.’ It goes on to say that ‘we want Guildford to be a centre for education, healthcare innovative and cutting edge businesses, high quality retail and wellbeing...’ This plan does not seek to fulfill the above intentions as it aims to provide low cost housing and industrial units (supporting a town which has rejected high quality retail development in favour of low status anchor tenancy for shopping centres in the future – to the dismay of many residents and council tax payers).

Mixed housing

Guildford’s housing requirements seem confusing as the basis for calculations has not been disclosed. Guildford attracts and maintains a mature and more wealthy citizen. Whilst the aim to provide housing for the younger generation is of course essential and well intentioned there does not seem to be any correlation between the proposed future prosperity of the borough and the looked for increase of workers in the borough doing the jobs and earning the wages we see advertised. I worry that older, wealthier people will move out as a result of the changes proposed and be replaced by low paid individuals who will be less able to contribute to the overall economic sustainability of the borough. There is a lack of information concerning the jobs and work that would be undertaken and mention of employment by local hospitals and care homes is clearly a statement of intention to attract low paid workers requiring very low cost housing.

Policy H1 of the Local Plan (Homes for all) sets out to ensure new development provides a mix of housing tenures/types/sizes, appropriate to the site size, characteristics and location, with a view to meeting the accommodation needs established by the latest Strategic Housing Market Assessment (SHMA). It says that as well as the benefits it can provide to people’s lives, families and communities, suitably sized, priced and located housing can also help to support the economy by ensuring people with a wide variety of occupations can live in the borough. I refer to comments above concerning the availability of jobs and their wages in order to affirm this aspiration. Is there any assurance that the houses proposed will be low cost? (This is not the usual experience in the borough nor of the intentions of developers as can be seen by very recent small development within Ripley and Send. New cottages built in Newark Lane cost in excess of £half million and new houses at Skeens Lane in Send have been marketed for £690,000 - http://www.rightmove.co.uk/house-prices/Send.html)

A large area of low cost housing suitable for low paid residents does not fulfill the aspiration of supporting the economy.

Policy D4 (Development in urban areas and inset villages) requires that: “proposals for new development within inset village areas will have particular regard to: the distinctive settlement pattern of the village and the important relationship between the built development and the surrounding landscape; important views of the village from the surrounding landscape and views within the village of local landmarks.” As previously mentioned this proposal does not fulfill this requirement particularly in the area of the distinctive settlement pattern of the village.

The SA details that where developers demonstrate that providing the amount of affordable housing required by policy would not be economically viable, the Council will follow the following cascade mechanism to assist with delivering a scheme: 1) vary the tenure mix of the affordable housing (for example, more intermediate housing and less rented housing), size, and/or type of homes to be provided; 2) reduce the overall number of affordable homes. The door appears to be wide open for the council to move against its stated local plan provisions in order to allow future developers to demonstrate that ‘affordable housing’ is not actually economically viable and that they should be permitted to make more money by building larger houses. What is actually the driving force behind these proposals? Without this knowledge I object most strongly. The SA concludes that there remains some uncertainty regarding delivery of an appropriate housing mix more generally.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

GP Surgery access

The SA states with regard to GP Surgery access that there ‘is little potential to conclude on the ability of surgeries to accept additional patients or expand.’ The surgery is already heavily subscribed. Pressures on local GPs are mounting as other national considerations take hold. The SA continues by stating that ‘the proposed allocation at Send Marsh / Burnt Common (400 homes) potentially stands out as being some distance from a GP surgery.’ The plan does not contain any firm commitment for sustainable transport from the proposed development areas to GP surgeries, should there be room for the large number of young people expected to take up residence (400 x 3 people per house = 1200 new patients).

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the proposals for the above developments

I object to Send and Ripley villages being removed from the Green Belt with regard to the proposals identified by the Local Plan. Please see below for detailed reasons.

Local Councillors and central government gave a clear election promise to protect the green belt. This reneges on it. I particularly voted in accordance with my wish to preserve the green belt and to ensure that Guildford council had good representation in it. I feel let down by my local government when I read these proposals. I choose to live in this area and make a contribution to it (I was not born or brought up here) as I have valued the semi-rural nature and convenience of the landscape but should these proposals go forward I will move out.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/7483  Respondent: 17424705 / Keith Brothwell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
The Sustainability Appraisal (SA) of the Guildford Local Plan has clear mention of the above developments and these form the heart of my objections as follows:

Loss of the Green Belt

My most important objection is the removal of the villages of Send and Ripley (and other surrounding villages) from the Green Belt. This was a particular electoral objective of mine. I am not alone as I know that other nearby boroughs have expressed concern at some of Guildford’s plans.

The Green Belt was intended to be permanent, as required by the National Planning Policy Framework, and there are no special circumstances to justify abandoning it. Send and Ripley’s green belt provide an essential buffer stopping Woking and Guildford becoming one sprawling area.

The fundamental aim of the Metropolitan Green Belt is ultimately to prevent the spread of London. It feels that my local borough considers Green Belt issues to be at the bottom of their priorities despite the feelings of their electorate.

The Corporate Plan identifies a series of themes for action including:

- Our Infrastructure - working with partners to deliver the massive improvements needed in the next 20 years, including changes to tackle congestion issues – this proposal does not fulfil this
- Our Environment - improving sustainability and protecting our countryside, balancing this with the needs of the rural and wider economy – this proposal decreases sustainability locally, and destroys valuable rural amenities while not evidencing any benefits to the wider economy.

The plan promises to ‘support and expand the economic vitality of our rural areas whilst protecting existing heritage, landscape and character. This proposal does not.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Loss of agricultural land

The plan will result in significant loss of agricultural land, including significant loss of land that is grade 3a quality and therefore classified as ‘best and most versatile’ in the national context. On this basis, the SA says that it is appropriate to predict significant negative effects. Agricultural growth may well be a priority for the UK following Brexit and it would seem sensible to avoid destroying valuable land providing employment and economic growth until the future is better understood. Investment in such areas would seem more appropriate at this time. A UK prime agricultural college sits very close to the proposed developments in the local plan (Merrist Wood) and some mention of it would seem logical and desirable with regard to these proposed developments.

I look forward to it, but object most strongly to the plans in their current form.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The SA notes that another important consideration is the potential for increased traffic to impact on **historic character within Conservation Areas**; It states that it is difficult to draw strong conclusions in the absence of detailed modelling work. Should this not be a pre-cursor to any plan? An issue of particular importance it notes is that there is **likely to be an increase in traffic through the Ripley Green and Ockham Conservation Areas** (the former being associated with a high concentration of listed buildings)

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to the policy A42 because I wish our village to remain in the Green belt and this plan alters that situation.

The increase in homes from 45 to 60 seems like far too much for the area and it ignores all the previous objections which have been made by local people in the village.

The traffic at the Tannery Lane junction and the main road (A247) is already bad as this is a difficult junction to exit - the proposals can only make matters far worse.

This area is subject to flooding - there is a flood plain nearby- The proposal does not contain good plans for removal of surface water.

This village benefits from the Wey Navigation Canal and its open countryside is an asset. So many houses will mar the views which attract tourism on the canal to the area.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
I object to the policy A43 very strongly.

I wish our village to remain in the Green Belt and I cannot see any 'exceptional circumstances' which might enable the council to consider removing us. Living here and purchasing a home here was because of the Green Belt protection to our wonderful countryside. Ripley and Send/Burnt Common are distinct village areas. This proposal tries to link them up resulting in a semi-urban sprawl which goes against the policy of the Green Belt.

Local villagers have already made strong objections which appear to have been ignored! There is no proven demand for Travelling Showpeople plots in this location.

The number of houses proposed for our village needs is excessive and will cause huge over development of our area. The road networks are already extremely busy and this proposal will result in a huge increase of traffic. Local roads and junctions with the main A3 simply will not cope with the extra influx. Additional traffic jams will result causing untold delays and inconvenience to people trying to commute to London or deliver children to local schools.

The area is subject to flooding (it is currently a flood zone 2 area) - further development will only make matters worse.

The area in question has been used over many years for shooting and the land is contaminated by lead shot.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A58 at Burnt Common - this was deleted from an earlier draft (in 2014) because of all the objections made. Why is it suddenly back on the agenda?

There has been a decline in the demand for industrial land since the first proposal - yet I note that what was proposed as a maximum number in the original plan is now a minimum number!! Reduction in need was demonstrates in the 2017 Employment Land Need Assessment - we do not need this huge over allocation of land in our Green Belt.

There are empty sites and industrial units at both Slyfield and Guildford which surely need filling before any further industrial expansion is proposed? I strongly wish our villages to remain in the Green Belt and do not believe there is a need to ruin the area by increasing the industrial property available.

As stated above this proposal aims to link up two distinct village areas which is against the purpose of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal to inset Send Business Park from the Green Belt because this will adversely affect the nature of the surrounding countryside situated so close to the Wey Navigation. Expansion and development of this area goes against Green Belt intentions regarding the openness of the countryside. It is inappropriate.

Access along Tannery Lane is very difficult in both directions.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A43 Land at Garlick's Arch, Send Marsh

Now 400 homes and 6 Travelling Show People plot.

I object to the Policy A43 change at Garlick's Arch because:

This policy ignores the fact that there is no proven demand for Travelling Show people plots in this location.

It is situated in beautiful permanent; Green Belt and no "exceptional circumstances" exist. The area is ancient woodland in existence since the reign of Elizabeth I.

It will cause over-development of Send village and consequent congestion on the roads and join up Send to Ripley with consequent defeat of the object of the Green Belt.

It is subject to frequent flooding and is currently a flood zone 2 allocation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A58 Land at Burnt Common, London Road

Now a New allocation for a minimum of 7,000 sq.m. of industrial warehousing.

I object to Policy A58 at Burnt Common because:

It was deleted from the 2014 draft because of all the objections made previously.

The word "minimum" is a change from the previous "maximum" in the 2016 plan and since that time there has been a decline in demand for industrial land.

There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt.

As with A43 above, the policy will cause small local roads creating traffic gridlock and defeat the object of the Green Belt.

A Waste Management Site is briefly mentioned in policy 4.4.23a and does not allow for proper full and proper consultation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the proposal to inset Send Business Park from the Green Belt because:

It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation.

There is highly restricted vehicular access along Tannery Lane in both directions.

Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

*Policy A25 - Gosden Hill Farm*

I have previously objected to the previous intention to construct 2,000 homes on this site and consider that the new Plan’s proposal to reduce the number of dwellings to 1,700 homes would not materially reduce the very detrimental impact that the scheme would have upon the A3 and other local roads. I object to this revised proposal on the grounds that the number
of houses proposed for this area is still far too high and, unless the development is totally concealed from the A3, it would
detrimentally affect the appearance of the borough as a predominantly rural area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

- Policy A43 - Garlick’s Arch

I have previously objected to the proposed development of 400 houses on this Green Belt and good agricultural land. The
new policy A43 adds 8 travelling/showpeople pitches to this development rendering the policy even more inappropriate for
the area. The Borough Council is reminded that less than 3 years ago it refused a planning application from ‘Oldlands’ to
build just 25 houses in the same location. The Council cannot therefore incorporate this policy within the Plan and still
maintain that it applies consistent and good practice.

This policy would increase the population of the Send Marsh/Burnt Common village by 49% and totally destroy its rural
character.

I therefore strongly object to the revised proposal on the grounds that;

1. the village has no shops or other infrastructure to support the development;
2. the additional traffic generated would create major congestion on the already busy roads throughout the villages
   of Send, Send Marsh/Burnt Common and Ripley;
3. no ‘exceptional circumstances’ exist to destroy this Green Belt land or the ancient woodland it contains;
4. there is no proven demand for travelling/showpeople pitches in this location, and
5. it would join up and destroy the distinct character of the villages of Send Marsh/Burnt Common and Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
• New policy A58 – Land around Burnt Common warehouse, London Road, Send P2 and A58).

I have previously objected to the proposed enclosure of huge areas of Green Belt open space within ‘inset boundaries’ around the villages of Send and Send Marsh/Burnt Common where there will be a presumption in favour of development. The new policy A58 seeks to increase the area of land to be extracted from the Green Belt for a minimum of 7,000 sq.m of ‘employment floorspace’.

I therefore object to this proposal on the grounds that there is no proven need to allocate any Green Belt land within the Borough for industrial/warehouse development and the fact that, at this particular location, it would have a very severe and adverse environmental impact not only on the two villages, but throughout the whole surrounding area, overdeveloping the local rural communities and creating major traffic problems.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• Policy S2 - The 12,426 (654 per year) number of homes that the Plan intends to deliver over the 19 year period 2015-2034.

Although the target for housing has now been reduced from 693 to 654 per year, it is still far too high and fails to take account of the constraints which should have been imposed by the high proportion of the borough’s designated Green Belt land and the capacity of the roads, schools, doctors, hospitals and other infrastructure to support such an increase in the population.

I therefore object to the calculation of assessed need for housing and other development in the area and the grossly disproportionate impact of the Local Plan’s proposals on its more northerly communities of the borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am very disappointed to see that despite the massive number of valid objections raised by our villages’ local residents within the 2016 consultation, the Borough Council has deemed it fitting to increase the housing, travelling/showpeople pitches and industrial development allocations in the villages despite a reduction in the borough’s overall target.

With the proposed proposals for 3,700 homes at Gosden Hill Farm and Wisley airfield (Policy A35) in the immediate vicinity and the specific proposals for the villages of Send and Send Marsh/ Burnt Common to accommodate an extra 500 houses, 10 travellers pitches, 7,000+ sq.m of industrial development and slip roads to the A3, I hereby strongly object to every single one of these proposals on the grounds of their severe and adverse environmental (including atmospheric pollution from the increased traffic) impact and the unjustified sacrifice of prime agricultural Green Belt land and historic woodland.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object once again (3rd Time ) to any development of the site referenced above for the following reasons :-

a) It will generate over 4000 traffic movements a day . I presume Guildford Council reads the daily news reports that the rest of the World is trying to reduce pollution and protect an already damaged environment ? This development will create traffic , noise and pollution precisely through its location , and this is totally unacceptable in the World today
b) It will require additional schools , medical facilities and policing to support the community, which cannot even be adequately provided in the local area at present , so why create more demand through this development, when there are no funds for the existing local Authority services ?
c) The site is Green Belt and should not be developed on, and the roads are already congested and cannot support any increased traffic.(The A3 and the M25 are permanently jammed with traffic ).Furthermore there are no funds to maintain the roads if they are built, and some of the surrounding Councils cannot even repair the existing roads
d) When this application was originally proposed we didn't have Brexit which apparently inter alia is expected to reduce EU immigration. If we no longer have so many people coming into the UK every year, there presumably won't be a short term pressing need to build as many houses, and even less of a reason to destroy the countryside to build the additional housing as proposed in this application

Hopefully the application will finally be rejected so we don't waste further time and money on this, when there are so many more important issues like providing better education in the schools , reducing class sizes , and investing in our teaching , medical and policing staff .

I believe the Planning process needs reforming so that the environment can be protected for the long term and against short term development . Perhaps the Government should also bring in Development Land Tax which most European Countries already successfully apply .

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object removing Send Business Park from the Green Belt (4.3.15).

Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for its insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

1. I object to removal of Brownfield site (A34) from the Plan

Site A44 in Broadford Business Park has also been removed. This is another brownfield site that has already been developed. The Council’s claims to “have adopted a ‘brownfield first’ approach” (page 5) but this is clearly not the case, and is contrary to national guidelines.

1. I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3715  Respondent: 17424897 / Peter Sanderson-Byrne  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

1. I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlick’s Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

The Plan is self-inconsistent in respect of traveller sites.
A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots …” Clearly A50 more than covers the total “need” of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects: i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!), and ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, ... (site allocation A25) [ than the Burnt Common site did ]”
2. The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3711  Respondent: 17424897 / Peter Sanderson-Byrne  Agent:
1. I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. That has now been removed, thereby accepting that needing to make greater than normal profit to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is not a sustainable strategic site because of the constraints on the site and the physical location.

2. It is further from railway stations than any other identified strategic site.

3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10) and as such, the local roads are at capacity.

4. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded roads and will therefore be unreliable and subject to frequent delays.

5. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

6. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum and the associated traffic increase from the RHS has not been taken into account. Also the regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account

7. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.

8. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

9. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

10. I object to the removal of additional 3.1 ha from the green belt without any justification

11. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact

12. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3

13. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

14. I object to the fact that there is no clear justification for the removal of one strategic site over site A35 and I also object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

15. I object to the extension of the plan period by 1 year as it has not been identified as a major change

16. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
17. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

18. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

19. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

20. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

21. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

22. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

Comment ID:  pslp173/498  Respondent:  17425089 / Clare Punshon  Agent:
I have looked carefully at the new draft Local Plan and I wish to OBJECT for the following reasons.

East Horsley is a small village which does not have the infrastructure of roads, rail, parking, medical facilities or schooling to support such a huge increase in population. Fifty seven percent of new housing proposed is on land that is currently categorised as Green Belt. This is flouting government law which established Green Belt to protect the countryside for future generations.

It is proposed that East Horsley is to be “inset” from the Green Belt. This proposed change in settlement boundaries means that the East Horsley settlement area will increase by 37%. At the moment, one hundred houses are proposed near East Horsley station and over two thousand on the former Wisley Airfield, only about one mile from the East Horsley parish boundary. The site at Wisley has recently been increased to now include two more farms!

While the ONS forecasts population for growth for Guildford at 10.4% over the Local plan period, GBC proposes to increase the housing stock by 22%. Since Brexit, forecasts of increasing population numbers have been reduced, yet GBC are continuing to predict massive increases in population, which quite frankly, does not make sense.

Again, I wish to register my strong opposition to the changes proposed by GBC in their latest draft of the Local Plan.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**General Objections to the Guildford Borough Council Proposed Local Plan (July 2017)**

I object to the amended number of new houses required in the borough as it is still much too high and still cannot be, tested or verified objectively.

I object to the fact that the changes to the Local Plan still requires large numbers of new houses to be built on land currently designated as Green Belt.

I object to the fact that, despite changes, the plan still proposes to remove many villages from the green belt and thus allow unrestricted development in the future.

Policy A29: Land to the south and east of Ash and Tongham

The borough is required to build a number of houses within a timeframe but they should not all be in the same area. Houses are slow to sell so where are all the people or the proposed for 1200-1750 homes? This is completely out of character for Ash Green and will lose a beautiful countryside location which is completely contrary to Policy P3 Countryside mentioned above. Any development in this area should be of a size and scale which keeps the intrinsic character and rural character of these sites. The site is just north off the Hogs Back but should be better protected as it is to the south.

As a resident of Ash Green, I believe that Policy A29 Requirement 8 doesn't allow for the right level of protection for the historic Ash Manor, a set of three listed buildings and Ash Grange. More protection should be within the requirements of this policy to prevent developers from spoiling the integrity of these listing buildings. They should not be forced to sit against poorly specified and designed housing estates so something more appropriate is called for.

Policy P3 Countryside:

Ash Green should not be part of the Ash and Tongham Urban area and should not be made so. The green boundary's should stay in place to allow the villages Ash, Tongham, and Ash Green to remain separate. I live in Ash Manor and historically it has always been part of Ash Green so please do not do anything to move Ash Green, as the current proposal appears to do,
or coalesce Ash, Tongham and Ash Green. The intrinsic character of Ash Green should be kept intact after any development.

Substantial development has been proposed for Ash Green and I believe it is vital that suitable infrastructure is in place before any further development commences. Ash Green Road/Wyke Lane are already used as rat runs when there are problems on the A3/A31 Hogs back and Ash station. These are narrow lanes that cannot take the additional traffic when this happens. The road infrastructure required includes work to the A31/A3 junction at Guildford, A331/A31 junction and improvements around Ash station to alleviate the damage to these lanes.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policies A27, A28 and A29- These policies are not coherent and provide no provision for community. This is both the definition of boundaries between the villages, public spaces and infrastructure. It's disappointing that the plan has nothing for local people but is trying to cover this land in houses leaving us nothing. You have to make it a nice place to live.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the GBC not adhering to NPPF rules - “The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence” (NPPF Section 9, paragraph 79).

I object to the extension of site A35 (former Wisley Airfield) and its proposed removal from the Green Belt as it is in the centre of the Metropolitan Green Belt, surrounded by countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

My objections to the amended draft 2017 Guildford draft Local Plan are below. I would like confirmation that the comments below, and those previously submitted, will be passed onto the Inspector.

I would like to make clear I am not anti-housing, nor do I believe in “pushing the problems elsewhere”. I believe GBC have a duty to ensure that every town and village needs to provide housing for local people, proportional to its population, in all urban, rural, Green Belt or AONB areas instead of greatly disliked and, in some cases, totally unsustainable sites.

It is unfortunate that GBC have not taken into consideration the unusually large number of comments (32,000) on the 2016 Local Plan. It would be courageous of GBC to review their housing needs in light of the flawed studies they have used and taken into consideration the consequences of the current Brexit climate and inevitable change in housing need. It would be wonderful to say “I agree” instead of “I object”.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3737  Respondent: 17425729 / Tony Forrest  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35
I am writing to comment on the proposed changes to the above Plan.

Despite what I imagine must be thousands of objection letters to Three Farm Meadows being included as a Strategic Site reviewing the documentation I see that it still listed as a potential site for inclusion.

I know my wife’s concern for this area being considered is from a traffic perspective and inability for the area to sustain this volume of development, to which I wholeheartedly agree but my other concern is that of the green belt, or rather loss of it. There appears to be changes to the green belt boundaries with no justification and which do not appear to have been identified correctly on the Plan. (Appendix H page 16). There is no justification given for the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact. We will also have increased negative impact of the views of the Areas of Outstanding Natural Beauty.

I am aware that this consultation is supposed to be comments just on the changes to the Plan not a reiteration of initial concerns but just in case my strength of feeling is lost – I object strongly to the Three Farm Meadows area, A35, being included on this Plan - our infrastructure does not support it and the unsupported estimated housing needs figures and associated building are threatening to destroy areas of green belt and views unnecessarily.

As you have asked for our opinion please do listen to our concerns and incorporate them in your planning.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The University has reneged on its promise to supply student accommodation on its own campuses which would free up a proportion of less expensive housing in the town, occupied by students. The Council would benefit from the additional Council Tax income for many years from private individuals; no Council Tax is paid by students.

Development of the Blackwell Farm site will significantly add to the peak time traffic congestion on the A31 and A3 and ignores independent expert traffic studies on the viability of the development (2.14a). Adding a new link road will add to the traffic chaos for commuters which already exists on the A31 and A3 and add to the congestion at the Tesco/Royal Surrey County Hospital roundabout. In the event of a major incident access to the Hospital for ambulances would be severely affected. It is already difficult for patients trying to meet hospital appointment times with the traffic congestion.

Accidents are caused by drivers trying to cut in from the fast lane on the A31 into the lane accessing the A3 when frustrated by delays. There is no hard shoulder on the A31 or A3 as a refuge for drivers or access by emergency vehicles.

Weight should be given to complying with safe European Union limits on the increased air pollution caused by the additional traffic needing access to the development site; the suggestion that employees at the Hospital and the Research Park would be provided with local housing is flawed as the housing would not be affordable, especially for nursing staff.

The air pollution is already evident, especially at peak times when traffic is virtually stationary for many miles along the Hog’s Back; we can see the fumes rolling down the north side of the Hog’s Back; it is worse in winter conditions. The proposed new major route would cut through a belt of ancient woodland and remnants of historic parkland and disrupt wildlife and habitat. The development would affect the European Union’s Thames Basin Heath Special Protection Area for birds such as the Dartford Warbler and Nightjar. There will be significant light pollution in the area.

The proposed development will result in large scale loss of Green Belt, cause irrevocable harm to this beautiful landscape on the edge of the Surrey Hills Area of Outstanding Natural Beauty, contrary to the Government’s intention to protect Green Belt and disregards an independent expert landscape study which demonstrates that part of the site merits AONB status following Natural England’s forthcoming boundary review (para. 4.3.8). When applying for planning approval on Manor Farm, the University advanced an argument that planning should be approved under “exceptional/special circumstances”. It is questionable what “exception/special circumstances” the University would apply to have approval for Blackwell Farm to be removed from Green Belt. Its marketing strategy is to create a “new garden neighbourhood for West Guildford”; it is hard to see how removing such a beautiful landscape will be improved by building on it.

Residents of properties along the Hog’s Back have no provision for safe access/egress on to the A31 with a speed limit of 60 m.p.h. Similarly the latest draft of the Local Plan also removes the provision for an alternative access to Beechcroft Drive and Manor Cottages. The junction is dangerous to all drivers travelling on the A3 and the residents of Beechcroft Drive. I object to the removal of this scheme (SRN6) on safety grounds.

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to this revision which now proposes a 33% increase to 60 homes. Tannery Lane is totally unsuitable for the amount of traffic which would be generated, as is the junction with the A247, and there is no sensible reason to justify building on the green belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the proposed allocation for 400 homes and 6 travelling show people plots. There are no exceptional circumstances to warrant development on the green belt. There are not enough services and infrastructure for housing and show people plots, nor any justification for concentrating 6 of the proposed 8 borough-wide show people plots within Send. The roads in Send are not equipped to deal with the kind of traffic that will be generated by this in Send. It is also subject to flooding and has a flood zone 2 allocation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to a new allocation of 7,000 sq m of industrial or warehousing which was deleted from the 2015 draft. I also object to the wording of the allocation: the 2016 "maximum" allocation of 7,000 sq m has now been changed to "minimum". There are already surplus industrial premises in the borough with Slyfield and Guildford having empty industrial units and sites, also the need for more industrial/warehousing has not been proven. The road infrastructure is inadequate and there are no exceptional reasons to justify development on the green belt. It will also join up surrounding villages and defeat the purpose of the Green Belt.

I object to the proposal to inset Send Business Park from the green belt. The business park fronts the River Wey navigation which is acknowledged as protected corridor. The business park is a historical accident arising from a former historic industrial use. Tannery Lane is too restricted for any increase in traffic and the business park should remain within the green belt to inhibit further development. Further development of this area is inappropriate and detracts from the openess of the Green Belt.

I OBJECT to the proposal to inset Send Business Park from the Green Belt because:

- It is effectively an old non-confirming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation.
- There is highly restricted vehicular access along Tannery Lane in both directions.
- Further expansion or development at this location detracts from the openess of the Green Belt and is inappropriate.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A42 change at Clockbarn in Tannery lane because:

- The increase to 60 homes in place of 45 homes is 33% more and too much
- It ignores all the hundreds of previous objections made by local people
- It will worsen access and traffic problems in Tannery Lane and at the A247 junction.
- It will make erosion of the Green Belt in our village worse.
- It will make surface water flooding, which is already bad, even worse.
- It will impact open countryside views from the River Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Policy A43 change at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people.
- There is no proven demand for Travelling Showpeople plots in this location.
- It is beautiful permanent Green Belt and no ‘exception circumstances’ exist.
- It will cause over-development of our village and the number of homes is excessive.
- It is exquisite ancient woodland that existed at the time of Elizabeth I.
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation.
- It is contaminated by lead shot accumulated over fifty years.
- It will generate excessive traffic that will block up the local roads of Send and Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy A58 at Burnt Common because:

- It was deleted from the 2014 draft because of all the objections made previously.
- The word 'minimum' is a change from the previous 'maximum' in the 2016 plan and since that time there has been a decline in demand for industrial land.
- There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt.
- The impact on small surrounding roads will create traffic gridlock.
- It will join up existing villages and defeat the purpose of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1910   Respondent: 17426113 / Home Builders Federation (Mark Behrendt)   Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

The policy is unsound because it is ineffective and unjustified

The Council have not provided the necessary evidence to support the implementation of optional building regulations M4(2) and M4(3)(b). Planning Practice Guidance is clear that evidence on both need and viability are required in order to justify the implementation of these optional standards. National Planning Practice Guidance is clear that:

“Based on their housing needs assessment and other available datasets it will be for local planning authorities to set out how they intend to approach demonstrating the need for Requirement M4(2) (accessible and adaptable dwellings), and/or M4(3) (wheelchair user dwellings), of the Building Regulations.” Paragraph: 007 Reference ID: 56-007-20150327

“Local planning authorities should consider the impact of using these standards as part of their Local Plan viability assessment.” Paragraph: 003 Reference ID: 56-003-20150327

We are therefore concerned that this addition to policy H1 is not justified and should be deleted.

Part 9 of the policy, which relates to self-build and custom housebuilding, will present considerable difficulties in terms of its implementation. The policy refers to the requirement for all developments of 100 homes or more to provide plots for self-build and custom housebuilding. However, this would mean that flatted developments would be required to provide such plots. Clearly it would be unreasonable and impossible for such schemes to meet this policy and the Council must be more specific regarding the scenarios in which this policy will apply. At present developers will not be certain as to the
implications of this policy. Given that paragraph 17 of the NPPF outlines that predictable decision making is a key element of plan making we consider part 9 of policy H1 to be unsound as it is not consistent with national policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Council have included the following statement at the end of part 1 of policy H2:

“These will be provided on developments providing solely affordable housing either on public sector owned land or development by registered providers. ”

It is not clear how this statement refers to the preceding sentence which refers to the working with developers and land owners to increase the number of affordable homes. The sentence would appear superfluous to the policy and should be deleted altogether.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The reduction in the housing requirement is unsound because it is not justified.

We are disappointed that the Council has looked to reduce its overall housing requirement by 1400 dwellings in this latest iteration of its plan. The 2017 addendum to the SHMA now indicates that due to changing economic circumstances the Borough’s housing need should be reduced from 693 dpa to 654 dpa.

The consideration of economic factors within any SHMA is to ensure that there is sufficient housing to support the employment growth scenarios set out in the Plan. However, if economic growth is not expected to be as strong as first thought this does not necessarily mean the Council should reduce its housing requirement. Firstly, there is an inherent uncertainty in employment forecasts and as such the NPPG does not require a mechanistic matching of labour supply and
planned housing provision. Consideration needs to be given to the level of job growth elsewhere in the HMA, other neighbouring areas and whether it creates unsustainable commuting patterns. However, it would appear that such considerations have not taken place. The study only examines economic growth scenarios for Guildford and does not consider the implications for the rest of the HMA or, indeed, whether lower growth forecasts are applicable across the HMA. As Planning Practice Guidance sets out that employment trends and growth in working age population should be considered across the HMA, the approach taken by Guildford is not consistent with national policy.

Whilst the Council argues that the economic circumstances show a reduced need for housing, the demographic baseline and affordability issues paint a different picture with regard to housing needs. The baseline level of housing need in the Borough, presented in the 2017 addendum, has risen from 517 dpa to 577 dpa. It must also be remembered that the highest demographic projection using the 10 year migration is 584 dpa.

There is clearly an increasing need for housing within the Borough. The 2017 addendum shows the need for affordable housing has increased from 478 dpa to 517 dpa alongside continued house price inflation of 7.5% per annum over the last 5 years. Indeed, the 2017 addendum highlights this issue in paragraph 5.32 stating that:

“It is clear that house price growth has accelerated in the Borough since mid-2013”

The low levels of housing growth in the Borough, coupled with increasing demand and restricted wage inflation, have contributed to making the Borough unaffordable for many of its residents. As highlighted earlier, over the last five years house price inflation has been at 7.5% yet wage growth over the same period has been slightly less than 1%[1]. Looking over the longer term, average wage growth over the last 15 years has been just over 2% yet house price growth has been 4%. This worsening scenario has led to the situation identified in paragraph 5.27 of the 2017 addendum which indicates that lower quartile house prices are 11.5 times the lower quartile earnings in the Borough. These market signals would suggest the need for a more significant uplift on the latest demographic baseline of 577 dpa rather than the reduction that is being proposed by the Council.

As we stated in our response to the 2016 draft Local Plan, the NPPG sets out the local authorities’ need to consider how past performance will impact on household projections. The 2017 addendum to the SHMA continues to show that the number of households being formed by those between 25 and 34 have reduced. There are clear affordability pressures reducing household formation in this age bracket but poor delivery has compounded this situation. The table below shows that the Council has consistently underperformed against both its South-East Plan target of 422 dpa and its latest assessment of housing need. This underperformance again indicates that the Council should not be looking to reduce its housing requirement in the manner proposed.

[See appendices for Table 1]

Finally, given the growth expectations of London, we are concerned that the addendum dismisses, in paragraph 3.45, any potential increase in migration from London. Whilst we accept there is uncertainty regarding the future dynamics of population flows between Guildford and London, the evidence from the GLA suggest that migration patterns will move towards the rates seen prior to 2008 and the subsequent recession. This would suggest that areas around the Capital, such as Guildford, will see increasing levels of housing need rather than stabilise at current levels. The addendum, at paragraph 3.46, argues that there are no signals that a return is likely since the recovery in 2012. Given that this assumption is based on a single year of evidence we believe limited weight can be attributed to such an argument.

Any reduction in the requirement based solely on economic circumstances would appear to be ignoring wider trends and market signals. We therefore consider the Council’s decision to reduce the housing requirement is not justified and as such makes the policy unsound.

If the Council is to amend its housing requirement on the basis of this evidence (something that should be questioned given that it creates inconsistency in needs assessment across the HMA), then it must consider the evidence as a whole. We would suggest that, as a minimum, the London migration sensitivity analysis should be applied to the latest baseline of 577 dpa. It would then be appropriate to apply a minimum uplift of 20% to this adjusted baseline to take account of the severe affordability issues facing Guildford.

Five-year land supply and housing trajectory
The Plan is unsound as it is ineffective

Firstly, the new paragraph 4.1.9a states that the figures in the Annual Housing Target table sum to 12,426 homes. This statement is not true. The figures sum to 9,810. To sum to 12,426 the target of 654 dpa must be included for the first four years of the Plan period. Whilst this is recognised in the 2017 Addendum to the Land Availability Assessment (LAA) the Council must be clear in the policy and supporting test to ensure that the deficit accrued during this period is properly considered.

We are concerned that the Council has amended the Annual Housing Targets in Policy S1. This now places even greater emphasis on delivery towards the end of the Plan period. This was a concern highlighted in our previous representation. Such an approach means there is a higher risk of the plan failing to meet its housing requirement should any of the major sites being relied on not deliver to schedule. Should this happen it also leaves less time for the Council to address such shortfalls in delivery through its contingency plans. The use of the trajectory in this way appears to be an attempt by the Council to delay delivery and not seek to meet need earlier in the plan. The Council must identify a wider range of sites and in particular smaller sites. The Housing White Paper (HWP) recognised the importance of smaller sites to maintaining consistent supply and we would support the Government’s proposal in the HWP that 10% of all housing allocated should be on sites of less than 0.5ha.

Our concerns regarding the deliverability of the plan are exacerbated given the fact that the Council cannot show a sufficient supply of land for the first 5 years that the plan will be in operation. In the Housing Topic Paper the Council have not stated whether they propose to use the Sedgefield or Liverpool approach to assessing five year supply. However, given the statement in paragraph 4.188 it would appear that the Council will be looking to address backlog over the full plan period (The Liverpool method). This is not the approach favoured in the NPPG. As we stated in our previous assessment, there seems to be little reason why bringing forward allocated sites earlier would create any additional harm.

We would therefore propose that, in accordance with national policy, the Sedgefield method is used to ensure that the backlog is delivered as quickly as possible and not ‘put off’ until later in the plan. We would agree with the Council’s application of the 20% buffer to take account of the persistent under delivery of housing in the Borough.

Applying the Sedgefield methodology from a base of 2019/20 means that the Council will need to address a backlog of 1,319 dwellings between 2019/20 and 2023/24. Based on the trajectory in policy S2 they would need to deliver a total of 3,719 dwellings during that period. As outlined above, and in order to take account of persistent under supply, a 20% buffer would need to be applied. This requires the Council having to identify land to deliver 4,463 new homes in total during this period. The 2017 Addendum to the LAA identifies sufficient supply to deliver 3,582, some 881 homes fewer than required. Even if a 5% buffer were applied (which neither we nor the Council support), there would still be a shortfall of 323 dwellings. This is set out in the table below.

[See appendices for Table 2]

Therefore, when using the Sedgefield methodology even a trajectory skewed towards the later part of the Plan, is not sufficient for the Council to show sufficient supply to meet its requirements during the first five years of the plan. This scenario calls into doubt the effectiveness of the Plan and that, in accordance with paragraph 49 of the NPPF, policy S2 could be considered out of date from the point at which the plan is adopted. As such we believe the plan is unsound as it is not consistent with national policy and nor is it effective as there are serious doubts as to whether it is deliverable over the plan period.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: Tables.pdf (8 KB)
**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire):** (No)

By reducing the housing requirement in the plan to 12,426 new homes the Plan is unsound as the Council have failed to plan positively in relation to meeting the needs of neighbouring authorities.

We continue to have concerns regarding the Guildford Borough Council’s (GBC) co-operation with its partners in the Housing Market Area. Whilst Waverley BC is seeking to meet its needs Woking BC continue to plan on the basis of their Core Strategy. Woking’s Core Strategy sets out its housing requirement as 292 dpa, this is 225 units below the OAN as established in the 2015 West Surrey Strategic Housing Market Assessment. As such there is clearly a significant amount of unmet housing needs within Woking and that consideration needs to be given within the HMA how this unmet need is going to be addressed. This issue was raised by the inspector as part of the examination of the Woking BC Core Strategy. In his report he stated that:

> “Whilst the submitted CS does not plan to meet the objectively assessed housing needs of the Borough, I am mindful that the NPPF indicates that the aspiration to meet housing need is dependent upon consistency with other parts of the Framework. With this in mind and as evidenced by the SA, the Council has considered alternative levels of housing provision, for example, its Option 3 which considered the provision of 594 new dwellings per year.”

As there is still a significant amount of unmet need within the HMA it is therefore surprising that the Council has looked to reduce its plan overall requirement by 1400 homes. This is also an issue considered by the inspector at the recent examination hearings for the Waverley Draft Local Plan. During these hearings the Inspector clearly indicated that he considered it appropriate for Waverley and Guildford to accommodate the unmet need from Woking.

Given these wide spread concerns we would have thought that even if a reduction were appropriate then the Council would have considered the wider needs across the HMA before taking such a decision. Given that the SHMA addendum has been solely commissioned by GBC it would appear that the decision has been made solely on the basis of Guildford’s needs without any consideration of wider needs across the HMA.

The Housing Topic Paper 2017 does consider the issue of unmet need in relation to the reduced housing requirement. However, its position within this topic paper relates to the Council’s consideration as to the relative appropriateness of using specific allocations to address unmet needs from other authorities. In particular the Council focuses on the potential adverse impacts in relation to some allocations. Further deliberation doesn’t appear to have been given to the benefits of meeting the wider housing needs of the HMA given the level of need and significant affordability issues identified in the West Surrey SHMA.

We therefore remain concerned that there continues to be a significant level of unmet need across the HMA. In addition there does not appear to be any commitment from Guildford or Waverley with regard to meeting Woking’s unmet housing needs. In fact it would appear that GBC are seeking to do the opposite by reducing their own housing requirement. This situation was addressed by the Inspector during of the recent examination in public of the Waverley Local Plan. During the hearing the inspector outlined his concern that there was unmet need within the HMA as a result of Woking being unable to meet their housing needs in full. As a result of this concerns he proposed that half of this unmet need, circa 150 dwellings per annum, be met by Waverley. Whilst recognising that the Guildford Local Plan would be examined separately and it would be for that Inspector to draw their own conclusions he suggested that Guildford adopt a similar approach to take account of Woking’s unmet housing need. We would endorse the Inspector’s comments and recommend Guildford increase their housing requirement to include a proportion of Woking’s unmet needs.

As we recommended in our previous response we think that all three Councils should have looked at preparing a joint local plan or, at the very least, had a clear, co-ordinated and shared approach to considering the delivery of sufficient sites to meet housing needs for the HMA. At present this commitment still remains vague and does not indicate that the plan has been positively prepared as required by the NPPF.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1907  Respondent: 17426177 / Antonis Petri  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to express my concerns about the changes (or rather lack of) in respect to POLICY H1 “SELF BUILD AND CUSTOM BUILD”.

I feel the proposed policy is far too restrictive in that it is saying that it expects large housing sites of over 100 homes to provide 5% as self build plots and that the council may require these dwellings to be developed in accordance with an agreed design code.

I believe this, in reality, will only result in self build plots being available on large housing estates and built according to an overly controlling and restrictive design code. This policy is not going to encourage self build as is a far cry from most people’s perceptions of the idea of self build. The government is keen to promote self build and the market is growing but in my opinion this policy is a backward step.

I do not see landowners of smaller sites (less than 100) offering their land for self build plots as the large developers they negotiate with will be wanting to control the whole site for their end product and will not want self build plots forced upon them.

I believe the council should allocate several small sites as dedicated self build sites and allow greater flexibility over design within set parameters.

The Council probably has 250 names on its self build register by now and there is much talk of these larger strategic sites not coming forward in the earlier part of the plan. If these large sites do not get planning in the early part of the plan how is the council going to comply with its duty to grant enough planning permissions for self build by the end of the third base period? It should have a fall back position.

In my opinion the Local Plan needs to build in more flexibility with regards to its self build policy and offer more choice to the self/custom builder.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Policy A58 at Burn Common because:

- It was deleted from the 2014 draft because of all the objections made previously
- The word ‘minimum’ is a change from the previous ‘maximum’ in the 2016 plan and since that time there has been a decline in the demand for industrial land
- There is no need to build industrial or warehouse developments in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt
- The impact on small surrounding roads will create traffic gridlock
- It will join up the existing villages and defeat the purpose of the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the policy A42 as detailed above because:

The increase to 60 homes in place of the original 45 is more than a 33% increase and far too much for the site and it's ignores all the hundreds of previous objections made by concerned local people.

It will worsen access and increase significantly the traffic issues in Tannery Lane and the A247 Junction.

It will make a erosion of the green belt in our village worse and will increase surface water flooding which is already very bad, even worse in the area.

It will also impact open countryside views from the lovely River way navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to policy A58 at Burnt Common because:

It was deleted originally in the 2014 draft due to objections received. Why has it now been reintroduced?

There is no need to build industrial/warehouse development on green belt land. Nearby at Slyfield and in Guildford there is availability at both these sites there is simply not the demand for this in the area.

The 2017 employment land need assessment showed a reduction in demand to 3.9 hectares for industrial land for the whole borough. Why a need then for over 10 hectares at Send and in green belt land too.

Again this development will impact on traffic in the village and impact on local infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Send Business Park now taken out of the green belt altogether! why?

It is effectively an old on conforming user in an area of outstanding countryside next to the awry Navigation.

The site has heavily restricted vehicle access in both directions in a Tannery a Lane.

Further expansion in this area detracts from the openness of the green belt and is totally inappropriate.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write with reference to the local plan and in particular the changes to the site A43 Land at Garlick's Arch, Send Marsh Burnt Common and Ripley. In section 4.2 Housing Policies, Policy H1 section 7 states:

(7) Accommodation for Gypsy, Traveller or Travelling Showpeople (whether they meet the Planning Policy for Traveller Sites definition or not) accommodation should be provided on development sites of 500 homes or more whilst there remains an identified need. For 500 to 999 homes two pitches or plots should be provided, for 1,000 to 1,499 homes four pitches or plots, for 1,500 to 1,999 homes six pitches or plots and for 2,000 or more homes eight pitches or plots.

The land at Garlick's Arch is proposed to have 400 new homes built on it making it too small a development to include accommodation for travelling show people.

The impact of the 400 new homes (excessive for the size of the site and surrounding area) in the small village of Send and the impact on the traffic on the Portsmouth road can only be made even worse with the addition of the large vehicles, that usually travel in convoy, that are associated with travelling show people.

The future of the area and indeed the whole country is going through a period of extreme change and uncertainty following the country's decision to leave the European union. Foreign investors who bought property and left it standing empty purely because it would increase in percentage value better than any bank interest rate have stopped buying property. There has also been a slowdown in migration into Britain from EU countries. This will reduce the strain on the housing market and hopefully the government will put steps in place to get some of the hundreds of thousands of empty properties in the country available to rent or buy. I strongly believe we should protect our green belt land and keep our villages within it.

There are may steps that can be taken to improve the housing situation without concreting over the south east of England.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp173/505  Respondent: 17426881 / Peter Witting  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - West Horsley North
I wish to comment on this local plan in respect of West Horsley.

I wrote to you on 21st September 2014 and also on 17th July 2016 but regretfully never received any response from you so I am repeating much of what I wrote then. I find it entirely unsatisfactory that you have not even bothered to contact me to discuss this site which has the benefit of being in the centre of the village yet hidden away. Please note my email address has changed.

As I do not know where precisely where Cranmore Lane turns into Little Cranmore Lane I shall just refer to both as Cranmore Lane in the following.

I should be grateful if you would consider an additional / alternative development site on land to the east of Overbrook and west of Cranmore Lane. I have spoken to the owner of adjacent Barcombe Farm who would be happy to include his fields between Barcombe Farmhouse and Cranmore Lane within a development area. These areas are shown on the attached plan being land parcels Nos 154 and 136 totalling some 6.769 acres. These should have been identified for possible development in your original study.

This site has the benefit of being in the centre of the village ( ie West Horsley South ) and would round off the village settlement boundary by the recognisable and defensible boundary of Cranmore Lane.

The land involved is very poor quality agricultural land and not being part of a larger holding is uneconomic to farm, and is completely surrounded by other residential housing.

Whilst your study states that this parcel of land has limited access at present a new access to this site would have to be negotiated but there are several possibilities including the demolition of one or two existing houses to make way for such access. An access up the driveway to Barcombe Farm from The Street is also perfectly possible.

This site would NOT be a visual intrusion on the village as it is tucked away behind the Overbrook estate and Fulkes Cottages and bounded by woodland to the East and the South, and cannot be seen from higher ground or other roads.

I am confident that the selection of this site would find more favour within the village than those proposed given that some more development in the village is said to be necessary. Furthermore it could be at a density more appropriate to the village situation rather than the extremely high densities proposed.

Regarding the remainder of the plan I would like to see in it proposals to deal with future medical facilities which are at present overstretched, Increased parking at Horsley Rail Station which is at present full on most weekdays, increased capacity of local schools in order to deal with the proposed increase in population.

I view the plan as being produced at a very high level with less than sufficient consideration to the actualities that exist in a lot of the various locations in the Borough.

I hope I will receive a response from you this time and would be happy to enter into further discussions regarding the inclusion of this suggested site into the final Borough Plan.

I would like to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan. There are numerous errors in the plan and it has a considerable lack of clarity.

I have written some of the major flaws and my objections in the inclusion of policy A35, Three Farms Meadows in the draft Local Plan.

- Local roads are at full capacity and often grid-locked in the rush hours, particularly when the weather is bad, when taking the children to the local school.

- I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

- The change to the site boundaries are not identified correctly on the plan (Appendix H p16) - I object to this.

- I object, unreservedly, to the increased area of the site as this now backs on to our house, UPTON FARM, which is one of the heritage sites in Ockham, and would have a HUGE impact on our outlook and views all around. Not to mention the noise pollution, environmental impact, and loss to our quality of life. We have spent years adhering to the stringent Heritage Rules to make sure this house is in keeping with its period and history.

- I object to para 21 which “limits” development in flood zone 2 and 3. Development should be EXCLUDED in flood zone 2 and 3.

- The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”!

- I object to the fact that the council has failed to remove this site from the local plan, despite receiving 1000’s of objections from local residents and statutory consultants.

- It is adjacent to the most congested stretch of strategic road network in the county and close to one of the most congested junctions in the country (J10)

- I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

- I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

- I object to the Council wasting tax payers and residents’ time and money not following due process and also ignoring previous representations over the years.

- I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

For all the above reasons, and numerous other major and minor reasons, I believe this proposal is unsound and should be removed from the plan as soon as possible.

I object to Blackwell Farm being included in this Plan as a development site (Policy A26 & Paragraph 4.1.9) which:-

Disregards an independent expert landscape study, which demonstrates that part of the site merits *Area of Outstanding Natural Beauty* status following Natural England’s forthcoming boundary review (para. 4.3.8)

Directs more office space to an extended business park (Policy E4), which will increase peak time congestion, particularly around the hospital and A&E which would only add to the current serious congestion of traffic in the area of the A3 and A31 and will affect existing residential areas. Currently in the morning peak traffic period there is severe congestion. This hospital is a Major Incident hospital and fast access must be maintained at all times.

Ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development (2.1.4a)

Adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

In 2015 the National Farmers’ Union expressed alarm that our ability to produce our own food and be self-sufficient had dripped from 80% in 1980 to 62%. This will drop to 53% by 2040. As world population grows there is no way that we should be building on good quality farm land. Especially commercial property. A recipe for disaster. Again you must listen to us.

I am writing to confirm my continued objection to the inclusion of A35, Three Farm Meadows in the draft Local Plan for the reasons as given below:

- It is the least sustainable site in both this and previous versions of the plan because of the constraints on the site and the physical location.
- It is further away from any railway stations than any other identified strategic site.
- It is adjacent to one of the most congested stretches of strategic road network in the country (ie M25 Junction 10)
- Local road are already at capacity particularly when there have been any incidents thus making the SRN not free flowing.
- Public transport is already having to negotiate the overcrowded SRN and is therefore unreliable and subject to frequent delays.
- It is also adjacent to one of the most popular visitor attractions in the south-east, the RHS at Wisley which attracts huge numbers. Any regular events which take place several times per year already result in extra traffic chaos and I feel this has certainly not been taken into account.
- I also object to any changes within the green belt boundaries.
- I also object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objections from local residents and statutory consultants.
- I wonder and object to the fact that there has been no clear explanation why the council think it appropriate to have a regulation 19 consultation when the changes are major and needs to be based on the totality of the plan rather than the proposed changes.
- I object to the inclusion of A35 as it will not contribute to the 5 year housing projection due to constraints notably in the provision of sewage capacity
- I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
- I object to a 10% inclusion buffer in the housing number over the plan period as it totally unnecessary.
- I object to the transport evidence base including the SHAR 2016 Highways assessment report which has already been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
- I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
- I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBSPA etc. I believe that the housing number is unsound and open to legal challenge.
- I object to the apparent disregard for the impact of in-combination development on the THSPA, particularly damage caused by nitrogen deposition and high pollution levels.
- I object to the differences in the housing figures set out in the Annual Housing Target table. Another glaring example of why the plan is not sound.
- I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I also object to the reliance of the Carter Jonas study update 2017 which includes “demand” for retail space from companies that are already in administration.

I consider the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- It is noted in paragraph 4.3.15 that it is intended to inset (exclude) a number of developed sites from the Green Belt, Send Business Park in Tannery Lane being one of them even though there are no ‘Special Circumstances’ put forward to justify this.
- The site is a non-conforming use within the Green Belt however this alone does not justify its exclusion from the Green Belt, in fact there are a myriad of such sites throughout the entire National Green Belt.
- The site is NOT a major developed site within the Green Belt and therefore does not warrant exclusion. The group of existing buildings is not excessive and is surrounded by open fields and the River Wey Navigation therefore the site has an open character (an essential characteristic referred to in Policy P2 paragraph 4.3.12 and 14) and makes an important contribution to the Green Belt.
- If exclusion of this site from the Green Belt designation is intended to promote further development, residential or commercial, then this will only serve to increase the problems of traffic congestion and highway safety along Tannery Lane and its junctions with Polseden Lane and Send Road particularly at peak flow times.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3797  Respondent: 17427713 / The Aldertons Farm Residents Company Limited  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- The increase in the number of residential units from 45 to 60 (+15) is over a 30% uplift on a relatively small site and will lead to a cramped overdevelopment and an unacceptable increase in hardstanding to accommodate the increased parking and access roads resulting in further erosion of the Green Belt.
- Tannery Lane is a narrow secondary road that in parts is almost a single track width and therefore traffic problems will be more frequent commencing with the construction of the development requiring large vehicles and plant to manoeuvre into and out of Tannery Lane.
- The junction of Tannery Lane with Send Road is very restricted and requires substantial improvement to accommodate the increased use and to provide adequate safety for both pedestrians and vehicles.
- The proposal would severely impact on the open aspect of the surrounding Green Belt and in particular the views from the River Wey Navigation.
- The increase in units now proposed by the Council completely ignores the hundreds of previous objections made by local people.
- Recent flooding issues in and around the immediate area highlight the need for a conscience approach to development and by increasing the number of residential units on this site the incidence of flooding will be increased.
- The recent approval of the planning application (14/P/02289) for the Cartbridge Traditional Narrowboat Basin on the River Wey Navigation, (construction works are now underway) already puts pressure on the Tannery Lane junctions with Polseden Lane and Send Road. Therefore the cumulative effect of both developments will result in an increase in the potential for accidents at the road junctions unless substantial highway improvements are made.
Also there are over 50 parking spaces within the Cartbridge Basin application site which, together with the associated hardstanding, severely impact on the rural nature of the surrounding Green Belt area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3798  Respondent: 17427713 / The Aldertons Farm Residents Company Limited  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposal for 400 residential units and 6 travelling showpeoples plots on a Green Belt site is contrary to current policies and ignores the many thousands of objections previously made by local people.

No ‘Special Circumstances’ exist or have been put forward to justify development on this Green Belt site.

The development will put extreme pressure on local roads and when considered with the other nearby proposals for development currently being put forward by the Council in the Draft Local Plan, (both residential and commercial/industrial), will result in gridlock at peak times with the resultant detriment to the quality of life and environment in the area, particularly considering the impact that the proposed North and South slip roads on to the A3 would make by drawing more traffic on to the local road network.

Residential development alongside major highways is known to cause health problems in the very young and old and if this site is developed the long term impact on the residents will in turn put more pressure on local and County Health facilities, particularly if the A3 slip roads abutting one side of the site, (as previously mentioned) are constructed thus increasing traffic flow around the site. The A3 is a major Trunk road that will inevitably become overloaded in the not too distant future given the lack of infrastructure improvements proposed by the Council to cope with the influx of traffic with regard to both proposed imminent and long term development.

The site contains ancient woodlands and should be protected (and enhanced) against development that might impinge upon the quality of the surrounding area and adversely affect the survival of the trees which are regarded as an important amenity for the area and can be seen from distant views.

Garlicks Arch adds to the important Green Barrier that separates the villages of Ripley and Send Marsh and any erosion of this will set precedent and eventually result in the merging of the two villages contrary to National Green Belt policy.

The site is currently designated as within Flood Zone 2/3 and as such development within Flood Plains should be avoided. If development is inevitable then Surface Water mitigation/management must ensure that flood water is properly dealt with and NOT directed so as to cause flooding elsewhere on existing developed land.

There is no proven demand to accommodate Travelling Showpeople in this area who, by the very nature of their business, will bring more traffic problems for the Ripley and Send villages when transporting very large vehicles to and from the site, where the visual impact of the vehicles and structures when stored, will be detrimental to the surrounding area.

I object to Policy A 58, the large development of Burnt Common as there are clearly too many large on these small local roads We are already suffering from the enlarged Vision Engineering works in the village. I object to the latest proposed Local Plan as obviously all our talks and meetings with Council officials have had no impact at all on the proposals being made.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

As a Resident of West Horsley I welcome the removal of the proposed housing developments A36 and A41. However, their removal represents little more than a sop to the impact of the overall development proposal on the Community that is East and West Horsley, Ockham, Ripley and the Green Belt.

The Horsley Countryside Preservation Society state that there were over 30,000 objections to the 2016 Plan. Given that the number of Residents of West and East Horsley, Ockham and Ripley number less than 10,000 suggests that the wider Community, equally, reject the Development Proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I would like you to note my support for the removal of sites A46 and A47. I do not believe that the infrastructure in the area could support these developments. Additional this is green belt land that should be protected.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A43 change at Garlick’s Arch because:

It ignores all the thousands of previous objections made by local people

There is no proven demand for Travelling Showpeople plots in this location

It is beautiful permanent Green Belt and no “exceptional circumstances” exist

It will cause over-development of our village and the number of homes is excessive

It is exquisite ancient woodland that existed at the time of Elizabeth 1

It will join up Ripley and Send and defeat the key purpose of Green Belt
It is subject to frequent flooding and is currently a flood zone 2 allocation
It is contaminated by lead shot accumulated over fifty years
It will generate excessive traffic that will block up the local roads of Send and Ripley

</tbody>
</table>

I object to Policy A 58 at Burnt Common because:

- **It was deleted from the 2014 draft** because of all the objections made previously

The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land

There is no need to build industrial or warehouse development **in the middle of the Green Belt** when Slyfield and Guildford still have **empty** sites and industrial units

The 2017 Employment Land Need Assessment shows a **reduction** in demand to 3.9 hectares for industrial land for the whole borough not a **huge over allocation of 10 hectares at Send in the Green Belt**

The impact on small surrounding roads will create traffic gridlock

It will join up existing villages and defeat the purpose of the Green Belt

2865

Page 2865 of 2988
I am a long term resident of Send and grew up in Merrow. I have seen how the development of Merrow and Burpham has destroyed the character of these villages through poor planning over the last 40 years. Now is the time for this to stop.

Housing is not a special circumstance to allow building on the Green Belt. There are plenty of brown field sites that can be used.

For example - Do we need a new furniture megastore in Ladymead?

**Why have you ignored the thousands of objections to these plans? We live here. We should have a say.**

*Building on the countryside can never be undone. The reason we live in this area, and why we have a wealth of wildlife and tourists from all over the world is because of the Green Belt. GBC should stand up to these inappropriate plans and defend it from the developers at all costs.*

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal to inset Send Business Park from the Green Belt because:

- It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
- There is highly restricted vehicular access along Tannery Lane in both directions
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** pslp173/529  **Respondent:** 17432737 / Friends of Normandy Wildlife (Gill Woolfson)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. We support the removal of A46 from the Local Plan. We had objected to the inclusion of the site in the previous version of the Local Plan because of the significant loss of biodiversity if it went ahead, and the effect on the Thames Heaths Basin Special Protection Area.

2. We support the removal of A47 from the Local Plan. We had objected to the inclusion of the site in the previous version of the Local Plan because part of the site is an SNCI.

3. We object to the lack of traffic infrastructure improvements in Normandy. With almost 10,000 new homes being built in the west of Guildford, including additional homes in site A29, without these improvements there will be severe congestion on our roads. It is known that the pollution resulting from traffic congestion has serious consequences for both animal and human health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp173/530  Respondent: 17432801 / Claire Stone  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Firstly, my main objection is the idea of insetting West and East Horsley from the green belt and I reject the fact that no change is being proposed about this. The very idea of the green belt is to protect the beautiful countryside from being overrun by the metropolitan sprawl. To start moving this line I believe is the beginning of the end of our stunning countryside that defines our neighbourhood and has done so for centuries.

I welcome the reduction in the number of new homes being proposed in West Horsley, however there is still very large number of properties proposed on the green belt in East and West Horsley.

Despite the reduction in proposed dwellings, there is no corresponding increase in infrastructure or services such as shops, medical centre, library and Horsley Station proposed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3835  Respondent: 17432929 / Andrew Jackson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I write to object in the strongest possible terms to the plans submitted for reconsideration this September, following the rejection last year of the plan to develop the former Wisley Airfield at Three Farm Meadows. Any development in this area is unwarranted and will seriously damage the locality.

Please ensure that the existing concerns of all the local residents to this plan are conveyed to the Inspectors and that they are aware of the volume of objections against this development which cannot proceed to spoil this local area.

The application was rejected by GBC on hood ground last year when TFM should have been removed from the Local Plan. It is wrong to bring it back for consideration when it was turned down on so many grounds and for very good reasons.

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   a. The associated traffic increase from the RHS has not been taken into account.
   b. The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
16. I object to the removal of additional 3.1 ha from the green belt without any justification
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.
26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
27. I object to the Council wasting tax payers' time and money not following due process and indeed ignoring previous representations.
28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.
36. Guildford Borough Council should not be entertaining any proposals from a Cayman Islands registered company. These types of entity are often associated with financial crime and tax evasion. In effect, Guildford Borough Council will be out of step with UK Government policy to not have any dealings with non-transparent entities, if this application proceeds.

Please consider all of the above and ensure that plans for a enormous town in the most inappropriate location are again refused. There are many other parcels of land around that can be considered for housing which would not impact on a small community in this way.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to site A58 Burntcommon, which has now become a ‘Strategic Employment Site’. The overall burden on Send (and West Clandon) of the minimum of 7000sq m of industrial space (which could therefore be much larger) is greater than the now deleted up-to 7000 sq m from the neighbouring site A43 Garlick’s Arch. This will lead to increased traffic and congestion in this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I also have concerns about the delivery of infrastructure to support improvements which are required as a direct result of new housing, for example new A3 slip roads at Burntcommon. Whilst I welcome developer funded commitments for road network improvements I am concerned that this will lead to a reduction of any affordable housing which will be delivered. This concern reflects a change in Section 4.2.40, where there seems to be some softening of the language around the issue of developers needing to demonstrate lack of economic viability of affordable homes in order to reduce their standard quota (40%). This concern applies to other developer funded projects including Wisley cycle networks.
I welcome the change in language suggesting that Rural Exception Homes (Section 4.2.46) now need to ‘meet the housing needs of the local community’. In village settings across The Horsleys, the definition of ‘the local community’ should be those living and working within the village, and I would expect a high level of consultation with villagers as well as the Parish Council and reference to Neighbourhood Plans such as that formally submitted to Guildford Borough Council by Effingham Parish Council to influence any such projects.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1972  Respondent: 17433409 / Julie Iles  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to POLICY P2 (6), specifically the new phrasing ‘Limited infilling may also be appropriate outside the inset or identified settlement boundaries, where it can be demonstrated that the site is as a matter of fact on the ground within the village’ referring to Ockham and Wisley, and by extension to other villages with settlement boundaries. This change in language creates less clarity around the purpose of settlement boundaries as regards development policy. This objection is made in the context of the fact that that there is no change to POLICY P2 (5), the intention for East Clandon to have a settlement boundary for the first time, which the Parish Council have previously and still object to.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1961  Respondent: 17433409 / Julie Iles  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy S2 for the proposed provision of the overall housing numbers of 12,426 new homes, which is only a small reduction on the previous figure of 13,860. These numbers are still based on an overly high-growth economic development plan and they remain too high as shown by another objective assessment report by Neil MacDonald. There is insufficient transparency in the overall numbers and Guildford seems in danger of becoming a dormitory town for London and surrounding areas such as Woking which have an unmet need rather than meeting the needs of residents of Guildford Borough.
1. I object to the fact that in Policy S2, despite the aforementioned slight apparent reduction in overall housing numbers and industrial space, the reduction is mostly in other areas such as Normandy/Flexford with the East of the borough taking a disproportionate and even increased share.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I also object the proposal to inset Send Business Park from the Green Belt because of the increased traffic this will cause and the removal of the openness of the River Wey corridor which is exceptional at this part of the river valley.

In summary the local plan fails to meet the needs of the residents of Send. It will substantially affect the conservation of the area with overdevelopment causing large changes to the setting of Send, affecting the natural and historic context of the villages. The local plan fails to meet NFFP chpt 11. Conserving and enhancing the natural environment. Residents of Send know that the proposals will have a massive negative affect on local wildlife and cause increases in pollution, putting their health at risk. The local plan fails to meet NFFP Chapt 9. Protecting Green Belt land in Send and Ripley, by developing in green belt land without exceptional circumstances being met. The historic environment of the villages will be changed irrecoverably with the proposals in the local plan (NFFP Chapt 12), these proposals in the local plan are completely out of proportion with the small village environment. Both Ripley and Send have a long history of settlement and retain many aspects of a rural village, e.g. annual fairs, active local farms, immediate access to countryside, distinct village centres these will be lost with the proposals.

In brief the local plan proposes excessive and unnecessary changes to the villages of Send and Ripley and the residents of these areas do not want this plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I also object to the Policy A42 change at Clockbarn Nurseries in Tannery Lane because of the increase in traffic this will cause and the safety of the road junctions in the village. There will be further strain in amenities such as schools, medical centres etc which are currently straining under the pressures of recent housing developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to policy A58 Land at Burnt Common, London Road. This proposal has been changed repeatedly in the local plan since 2014, there is clear uncertainty over its suitability. This is a large allocation of green belt land for industrial use which fails to follow NFFP, in particular chapt 11: ‘Conserving and enhancing the natural environment’. The impact of increased traffic in the local area from the increase of industrial use on this site will affect the heath and environment of the resident of both Send and Ripley. There are inadequate transport links (e.g. rail) and the air pollution and safety on local roads will deteriorate, already the main concerns to local residents of Send and Ripley. Any development on this site will increase these issues.

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a whole the 2017 plan fails to follow NFFP para 17 core planning principals and does not ‘contribute to conserving and enhancing the natural environment and reducing pollution’. There are fundamental errors made in requirements for housing and employment based on the source documents e.g. SHMA and ELNA. The data sources do not show empirical evidence for the changes in the UK’s housing and economic status after it leaves then European Union. The UK population has voted to make a significant change to the country’s economy and population and the impact of Brexit on the local area must be accurately evaluated or else the entire basis of the local plan is flawed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

- Anyone who visited this area would be able to see the proposed increase in housing would be detrimental to this area. I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.
“Development proposals near Ash Green to have recognition of the historic location of Ash Green village and Manor and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development must not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built-up area and the countryside beyond”

- Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

- Infrastructure before development.
- Please note that Infrastructure is not just roads! This area has poor facilities for its current residents. Water, Gas, Sewage, Electricity, Shops, Doctors, Schools are all currently under stress, or in short supply.

- Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) and many other improvements must be completed before any development of Policy A29 commences.

- Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Road solutions to the following areas are also required before any development of A29 is permitted.

  1. The Street in Tongham
  2. A331/A323 intersection
  3. A31/White Lane junction

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

“Development proposals near Ash Green to have recognition of the historic location of Ash Green village and Manor and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Answer (if comment is on questions 1-7 of the questionnaire): ()

- Ash Green is not part of the Ash & Tongham Urban Area. It was always a separate entity as can be seen on any OS map, and your own council documents. Therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road

- **4.3.29 Amend to:** “Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development.”

- **4.3.30 Amend to:** “We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green.”

- **Policy P3 Amend to:** (1) (c) should be amended to read “does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

4.3.29 Amend to: “Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Page 2878 of 2988
• I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence. Moreover, this number of houses, together with the many thousands more being built in neighbouring boroughs will put an pressure on our local infrastructure that it cannot sustain.

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

• Ash Manor has a rich history dating from its entry in the Doomsday Book. It has been owned by several kings and has witnessed foul deeds and intrigue. Some historical documents refer to the Manor as a Palace. This is a building of great significance to our local history and its setting is as much part of this history as the building. We have a moral duty to protect this site for the enjoyment of future generations. I believe the requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house, and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be completed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore, solutions to the following areas are also required before any development of A29 is permitted.

1. The Street in Tongham
2. A331/A323 intersection
3. A31/White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

Requirement 8:
“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

Attached documents:
The focus of the local plan on large scale development in the Ash and Tongham Urban Area will substantially increase the number of commuters travelling into Guildford for work and recreation. These commuters will be joined by those travelling from neighbouring boroughs adding to the congestion on roads that are already heavily congested. I support GBC's policies to increase access to and use of sustainable transport options, but I believe that the policies do not go far enough in creating an integrated network of cycling super-highways that are physically separated from the roads. These will provide safe routes for children to cycle to school (improving child health and reducing congestion around school gates), for people to cycle greater distances to work (cycle super-highways could connect Guildford with the surrounding towns and villages for up to a 12-mile radius), and for people to use for safe recreation. The cycle routes will be funded specifically by an additional levy placed on all new developments.

- Policy ID3 1 should read: New developments will contribute to the delivery of an integrated, accessible and safe transport system, including the construction of an integrated network of safe cycle and walking routes between Guildford and the surrounding towns and villages, maximising the use of the sustainable transport modes of walking and cycling for commuting and recreation, and the use of public and community transport.

- Policy ID3 2c should read: the creation of cycle and walking routes between Guildford and surrounding towns and villages, to local facilities, services, bus stops and railway stations, to ensure their effectiveness and amenity. To bring about the improvement, and expansion of existing routes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ( )
I object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable. The amount of empty shops in Guildford, especially at the top of the High Street would surely be a good reason not to increase the retail provision in the town centre.

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"*We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan*".
The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough. Why when connection is so bad on the A3 and surrounding roads in this area are you proposing a possible additional 22,000 cars.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. a)The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, ... (site allocation A25) [ than the Burnt Common site did ]”

2. b)The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”
Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurly in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes. Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other
community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. That has now been removed, thereby accepting that needing to make greater than normal profit is to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A43 change for the following reasons:

- No ‘exceptional circumstances’ exist to justify this use of Green Belt land
- It ignores the thousands of previous objections already made by local residents
- The site is ancient woodland from the time of Queen Elizabeth 1 and cannot be replaced
- The development would effectively join up the villages of Send and Ripley and defeating the very purpose of Green Belt land
- It is currently a Zone 2 Flood area and development will make matters considerably worse
- It will generate massive amounts of additional traffic that the local road network simply cannot cope with

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Policy A58 change for the following reasons:

- It was deleted from the 2014 draft as a direct result of the huge number of objections made previously

- The parameters of allocation of land for industrial or warehousing use has changed from "a maximum of 7,000 sq m" to "a minimum of 7,000 sq m" in the 2016 plan

- Slyfield and Guildford still have empty sites and units. There is no need for this development in the middle of Green Belt land

- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for the whole borough

- Hence, an allocation of over 10 hectares just at Send in Green Belt land is utterly unnecessary

- A further increase in traffic would cause gridlock on already busy local roads, and an increase in air pollution and danger to local residents and children

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal to inset Send Business Park from the Green Belt for the following reasons:

- It is an old site that should not be further developed because of its location within Green Belt land on the Wey Navigation

- The road network is narrow and restricted, and totally unable to service any new expansion

- Road links to the A3 and elsewhere go directly through the village, which would increase traffic pollution and danger to local residents and children

To summarise, all these developments in Green Belt land have attracted many thousands of objections from local residents - they are not wanted, but more importantly, they are simply not needed. There are many brown field sites throughout the borough that have not been taken advantage of, only because they would not yield as good a profit for developers.

Housing is needed, but it must be built in the right places, not just the most convenient or most profitable, and be accompanied with investment in local services for the huge increase in numbers of people that would come along with the proposed construction. The real tragedy is that were these developments in Send, Send Marsh and Burnt Common allowed to go ahead, the quality of life for existing and new residents alike would be much poorer than it is now. Local roads, schools and medical facilities are already fully stretched. There would be a considerable human cost for hitting government targets.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Now 400 homes and 6 Travelling Showpeople plots

I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth I
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• It is contaminated by lead shot accumulated over fifty years
• It will generate excessive traffic that will block up the local roads of Send and Ripley

Answer (if comment is on questions 1-7 of the questionnaire): ()

Now a new allocation for a minimum of 7,000 sq m of industrial or warehousing

I object to Policy A58 at Burnt Common because:
• It was deleted from the 2014 draft because of all the objections made previously
• The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land
• There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
• The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt
• The impact on small surrounding roads will create traffic gridlock
• It will join up existing villages and defeat the purpose of the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
Send Business Park now taken out of the Green Belt altogether

I object to the proposal to inset Send Business Park from the Green Belt because:

- It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
- There is highly restricted vehicular access along Tannery Lane in both directions
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

In summary I appreciate and understand the need for additional housing and business in the borough but firmly believe that this plan is not fair particularly toward the residents of Send and Ripley and feel that overall this will be at everyone’s detriment including those new residents planning to move into Ripley and Send. Ripley and Send are already at capacity and I think GBC need to review the draft plan and find another solution that does not have a detrimental effect on existing residents that already struggling for local services that are already stretched.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 6: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Having previously objected to the original plan I would also like to record my further objection to the draft plan as it has such a detrimental impact on Send/ Ripley and the surrounding areas. What I find astonishing is the complete contempt and disregard for the quality of life shown to the residents of Send and Ripley by Guildford Borough Council (GBC) that will have to suffer in the long term the changes that are being proposed.

The sheer aptitude and lack of compassion by GBC for the existing residents holds no relevance in the ambition of GBC to increase the population particularly of Send by up to 50%. One can only imagine the disastrous impact this would have on the quality of life and of not only the existing residents but if the plan were to go ahead then the quality of life for those moving into the village.

The other main objection I have is to the A3 works at Burnt Common. I’m sure that GBC have already analysed the amount of traffic that passes from West Crandon and through Ripley having exited the A3 as it makes it way east through send along to Old Woking. The road is at over capacity during rush hours as it is and to be honest if Burnt Common become and on and off ramp for the A3 the Send Village will become a carpark not only at rush hour but all through the day. One can only imagine the quality of life for those living along Send Barns Lane and Send Road. The noise and pollution from vehicles would be unbearable and no doubt exceed all pollution levels with diesel and petrol fumes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A25

I object to this changed policy

The Green Belt at this point prevents the sprawl of urban Guildford into the countryside. Development here will be highly visible from the A3 and, together with Former Wisley Airfield, Garlicks Arch and Burnt Common will form a built up corridor from the London conurbation southwards beyond Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A43

I object to this policy

This site is stated to be for approximately 400 homes, but the removal of 7,000 sq metres of industrial floorspace proposed for this site in the previous draft plan means that the eventual number of houses is likely to be considerably greater. This in an area remote from services and without credible access to public transport. It will create a car dependent community, increasing the stress on the nearby A3. No infrastructure provision for this site is included in the infrastructure delivery plan.

Burnt Common is already a site of considerable traffic congestion which will be exacerbated by the proposed slip roads on (northbound) and off (southbound) the A3 are built, feeding traffic onto the A247 through West Clandon and through Send Village, both unsuitable for increased traffic flows.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A46

I object to this policy

My objection is pragmatic in that this site is shown in the Sustainability Appraisal to be much more sustainable than A35. Therefore it should not have been deleted from the plan whilst A35 remains in it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E1

I object to this policy insofar as it relates to the Green Belt site at Burnt Common

The reality of demand for industrial space is that it is nationally in decline and this is evidenced in Guildford by the substantial number of planning permissions that have not been implemented (38,000 sq metres). Development, in the uncertain post-Brexit world, should certainly not be directed to a Green Belt site like Burnt Common. An extension to the Slyfield Industrial Estate would be more appropriate.

The stipulation of a ‘minimum’ area of development at Burnt Common means that the this could turn into a large and intensive industrial site, quite unsuitable for its semi-rural location.

I object to the Policy = A42 change at Clockbarn in Tannery Lane because:

- The plans have increased from 45 homes to 60 homes which is 33% and this is too much
- It ignores all the hundreds of previous objections made by local people
- It will increase problems with the traffic in Tannery Lane and at the A247 junction
- It will cause erosion of the Green Belt in our village
- It will increase surface water flooding, which is already a problem and is increasing with further development
- It will impact on the open countryside views from the River Wey Navigation

Policy A42 Clockbarn Nursery, Tannery Lane

The proposed allocation for 45 homes in the previous draft plan on green belt land was objected to & I object to this revision which now proposes a 33% increase to 60 homes. Tannery Lane is unsuitable for the quantity of traffic which would be generated, as is the junction with the A247, and there are no exceptional circumstances to warrant development on the green belt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43 Garlick's Arch, Send Marsh

I object to the proposed allocation for 400 homes and 6 travelling show people plots. There are no exceptional circumstances to warrant development on the green belt. There is insufficient services infrastructure for housing and show people plots, nor any justification for concentrating 6 of the proposed 8 borough-wide show people plots within Send. The road network is insufficient for housing development on this scale.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - East Horsley  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident of East Horsley I wish to register my objection to the proposals outlined in the amended 2017 plan.  

It is my clear opinion, even with these changes, the nature and whole environment of our area will be irrevocably changed for the worse and such large scale development is neither appropriate or desirable.  

I expect and demand that the views of local residents, who are overwhelmingly opposed to these proposals, to be given significant consideration.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?  

Attached documents:  

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  

Answer (if comment is on questions 1-7 of the questionnaire): ()

2.1 Policy A26 in the Draft Local Plan 2017 provides for development at Blackwell Farm on the Hogs Back, Guildford. The allocation is still a residential led mixed use development outlined to provide for 1,800 homes but with a minimum of 1,500 homes to be delivered within the Plan period. The employment land is reduced by 1,000sqm to 30,000sqm, which will still form a 10-11ha extension to the west of the current Research Park.

2.2 The allocation would also still provide a range of other ancillary uses including a two-form entry primary school, retail units across the A use class and D1 community buildings but will now also need to provide a secondary school of up to six-form entry of which two forms are needed to serve the housing on the site.

4.1 The transport infrastructure requirements outlined for Policy A26 within the Draft Local Plan 2017 are outlined below with the corresponding cost estimate in italics from the Infrastructure Schedule in Appendix C of the GBC Draft Local Plan 2017.

i) Vehicular access to the site allocation will be via the existing or a realigned junction of the A31 and Down Place access road which will be signalised, and from the site to Egerton Road, preferably Gill Avenue (LRN2 - £5 million and LRN 3 - £5 million).

ii) The design of the improved Down Place access road will be sympathetic to its setting;
iii) A through vehicular link which will be controlled is required via the above accesses between the A31 Farnham Road and Egerton Road to provide a new route for employees and emergency services to the Surrey Research Park, the University of Surrey’s Manor Park campus and the Royal Surrey County Hospital, as well as a choice of vehicular access for the new residents/occupiers. This will reduce impact on the A31/A3 junction, in advance of the delivery of Highways England’s A3 Guildford scheme (LRN4 - £20 million);

iv) Developer to provide the western route section of the Sustainable Movement Corridor on the site and make a necessary and proportionate contribution to delivering the western route section on the Local Road Network, both having regard to the Sustainable Movement Corridor Supplementary Planning Document (SMC1 – proportion of £20 million);

v) A significant bus network to serve the site and key destinations including the existing western suburbs of Guildford and the town centre. (BT6 – £TBC)

vi) Necessary and proportionate contribution to delivering Guildford West (Park Barn) railway station (NR2 – proportion of £10 million);

vii) Interventions which address the potential highway performance issues which could otherwise result from the development (LRN5 £5-10 million).

4.2 Compared to the same list of infrastructure which was provided last year in the previous iteration of the Local Plan there has been an increase in the level of transport infrastructure requirements which the site must provide, namely in the form of the bus network as per scheme BT6 relating to the Sustainable Movement Corridor.

4.3 The transport infrastructure costs associated with the site outlined above now amount to £70-£80 million to deliver just 1,500 residential units in the Plan period (1,800 in total) and 30,000sqm of commercial mixed-use development. The proportionate level of contribution towards the Guildford West (Park Barn) railway station and the western route section on the Local Road Network are as yet unknown at this early stage.

4.4 However, the Blackwell Farm site is the only development site in the Guildford urban area which has the specific written requirement to contribute to the new Park Barn station and since it is indicated as being solely developer funded in the Infrastructure Strategy (Appendix C) of the Draft Local Plan 2017 it is assumed that the Blackwell Farm allocation would need to contribute a significant proportion of the £10 million cost. The western section of the Sustainable Movement Corridor is also only noted on the requirements list for the Blackwell Farm allocation although there is money available through the Local Growth Fund to contribute to this, therefore it is estimated that the obligation would be circa 50% of the total cost of this scheme. This would make the total transport contributions for the Blackwell Farm development around £60 million.

4.5 Concern is therefore raised that the level of transport infrastructure costs which the Blackwell Farm site is required to deliver (~ £35,000 per unit) as well as the new secondary school on top of the numerous other costs of infrastructure mitigation is disproportionate to the size of the allocation and brings into question the deliverability and financial viability of the allocation in the Local Plan period contrary to Paragraph 173 of the National Planning Policy Framework (NPPF) as previously discussed in RGP’s previous report TN01 (June 2016).

‘Through vehicular link’ between A31 and Gill Avenue

4.6 Policy A26 now states that the through vehicular route between the A31 Farnham Road and Egerton Road will be ‘controlled’ and will be for employees and emergency services to the Surrey Research Park, the University of Surrey’s Manor Park Campus, Royal Surrey County Hospital staff, patients and visitors as well as for residents on the site. This is a significant and wide range of people who will be permitted to use this route. The method of control is an integral part to the deliverability of the whole site allocation to ensure that it is not used by ‘rat-running’ traffic avoiding the A31/A3 junction and this is a concern that was previously highlighted in RGP’s TN01 (June 2016).

4.7 SCC has indicated that ANPR cameras will be the preferred method of control for the vehicular link road. RGP has looked into the use of ANPR cameras to carry out this type of enforcement and a scheme in Cambridge is known to exist at the Cambridge Biomedical Hospital to deter rat-running vehicles attempting to avoid congestion between the M11 and central Cambridge.
4.8 It is understood that the Cambridge scheme consists of cameras positioned at each of the 4 access points to the Hospital site and the system is based on the time period that cars are recorded as taking between any 2 of the 4 cameras.

4.9 If the duration of stay that the ANPR cameras record associated with any car is below a set period of time which would accord with a ‘through traffic’ speed then the system assumes they were using the Hospital roads as a short-cut and they are charged a fine of £50. If there is a longer dwell time then it is assumed that the cars are legitimate patients/visitors to the Hospital and therefore no fine is issued; additionally, the staff that work in the Hospital are registered on the system so that they do not get fined.

4.10 The roads are understood to be privately owned by the hospital estate and the cameras are owned by the site’s private parking contractor, however, the fines are enforced by Cambridgeshire Police.

4.11 This is a small-scale example of the type of system that would need to be implemented on the Blackwell Farm link road, but with it raises a series of questions related to site deliverability such as:

i) Will the developer provide for the financial enforcement costs of the link road restrictions for the lifetime of the road i.e. in perpetuity? Is this included within the £20million cost for LRN4?

ii) Will Surrey Police be expected to provide the enforcement of the ANPR in perpetuity for the lifetime of the road?

iii) How will all of the people who will be granted access to use the road (residents, University staff and students, Research Park employees, Royal Surrey County Hospital staff, patients and visitors) be able to be differentiated from through traffic?

4.12 Whilst these are operational questions and could be considered as relevant for discussions during a future planning application, they are also considered fundamental to the successful deliverability of the vehicular link road and ensuring that it does not become an attractive ‘rat-run’ for through traffic between the A31 and the A3, but still delivers the aim of being a link road to serve all of the desired uses.

4.13 As discussed in further detail in RGP’s TN01 (June 2016), the implications on the A31 Down Place junction and the Egerton Road junctions of all-purpose through traffic using this route have not been modelled in the strategic model and it is imperative that the link road restrictions operate successfully to ensure that other junctions are not adversely impacted.

EGERTON ROAD AND SURROUNDING AREA

5.1 The Egerton Road Roundabout and the Egerton Road/Gill Avenue junctions are forecast to experience an increase in vehicular traffic which would push the ratio of flow to capacity over actual capacity based on the SHAR 2016 report. This assessment is not understood to have included any specific assessment associated with the new station at Park Barn or any impact associated with the new secondary school on the Blackwell Farm site.

5.2 It is accepted that the SCC strategic model cannot model specific junction impact as accurately as microsimulation models such as LinSig and Junctions 8 and it is further acknowledged that this detail is not necessary for the high-level assessment required for a Local Plan. However, the true quantum of flows forecast to be generated by all of the Draft Local Plan 2017 aspirations should be incorporated to allow consideration of detailed mitigation to commence.

5.3 The Sustainable Movement Corridor (SMC) Update published in February 2017 by GBC identifies that mitigation options are already being considered for providing additional capacity at the Egerton Road Roundabout and its junction with the A3. The process of considering detailed mitigation to inform the strategic allocations is supported and welcomed, but concern is raised that the options are being considered without the traffic impacts from the Park Barn station and the new secondary school being incorporated.

5.4 The new Park Barn station southern access for instance will likely take its primary access from the western side of Egerton Road to the east of the Hospital. The position of this access will likely result in an increased demand on right turning vehicles at the Egerton Road/Gill Avenue signal controlled junction. Increased provision for right turning vehicles in this location will consequently reduce the capacity of the junction for other movements which may well impact on the new designs for the Egerton Road Roundabout, the SMC and the wider local highway network.

5.5 Additionally, the provision of a new secondary school on the Blackwell Farm site (relocated from the Land to south of Normandy and north of Flexford site allocation [previous Policy A46] which has been removed in its entirety) will ultimately draw vehicular traffic through the Egerton Road junctions. The Blackwell Farm allocation (Policy A26) wording
states that the new secondary school would be ‘up to six form entry of which two forms are needed for the housing on the site and the remainder for the wider area’. This indicates that two-thirds of the secondary school children attending the new school will come from off-site. Assuming that there are 30 children per form, 6 forms per year and 5 years in the school (i.e. Years 7-11) there would be a 900 student capacity at the school of which 600 students would need to commute in from outside the Blackwell Farm site each day.

5.6 Whilst the Sustainable Movement Corridor proposals and the new Park Barn station will undoubtedly assist some school pupils and staff in travelling to the new secondary school sustainably from other parts of the borough, there will still ultimately be a draw of vehicles through the Egerton Road junctions to the secondary school, particularly during the morning peak period, which has not been considered.

6.1 The Draft Local Plan 2017 has addressed some of the points which RGP raised in the previous Technical Note in June 2016, however there is still concern regarding the deliverability and viability of the Blackwell Farm allocation (Policy A26) for the following reasons:

i) The required transport infrastructure requirements of around £60 million to make the site acceptable are considered to be excessive in comparison to the scale of the development proposals and the viability and deliverability of the site are still questioned. Compliance with paragraph 173 of the NPPF is also raised;

ii) There are still operational concerns regarding how the through vehicle link will be controlled and how the enforcement will be carried out, by whom and whether it can effectively remove potential for ‘rat-running’ between the A31 and the A3 given the wide range of permitted users of the road;

iii) The deliverability of the scheme still requires third party land to access Gill Avenue and it has not been demonstrated that this is possible to acquire;

iv) The vehicular impact resulting from the requirement to now provide a six-form entry secondary school on the site whereby two thirds of the children would travel in from outside the Blackwell Farm site has not been included in the strategic traffic model and is not understood to be accounted for in the current Egerton Road detailed layout designs.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3.1 An Addendum report to the original ‘Guildford Borough Council Proposed Submission Local Plan 2016: Strategic Highway Assessment Report’ (SHAR) (June 2016) has been produced by GBC which it states that the Addendum: ‘provides a high level review of the potential changes to traffic impacts from those reported in the SHAR 2016 which are expected as a result of the key changes made to proposed site policies and to the programme of transport schemes as identified in the Draft Local Plan 2017’.
3.2 The key changes are outlined in Table 2 of the document where on the final page it acknowledges the new Policy A59: New Rail station at Guildford West (Park Barn) as a key change to the Draft Local Plan 2017 and states:

‘It is expected that, borough-wide, modal shift of car to rail trips will significantly outweigh new vehicle trips to access the new rail station. The station is not planned to be a parkway station so sustainable transport options for travel to and from the site will be a priority.’

3.3 It is acknowledged that locating a new station adjacent to existing (Park Barn) and proposed (Blackwell Farm) housing settlements as well as the Royal Surrey County Hospital, Surrey University and Surrey Research Park is a very positive move in terms of encouraging sustained modal shift from the private car for regular journeys such as commuting and indeed for short trips to and from Guildford town centre. It is however a concern that the actual vehicle activity associated with the new station has not been specifically included in the strategic model.

3.4 The assumption by GBC that the current traffic modelling completed in 2016 represents a ‘worst case’ as the traffic levels will reduce borough-wide due to modal shift is misleading since the zones on the network which include and adjoin the new station are likely to experience an increase in vehicular traffic. As well as a likely increase in vehicular traffic, there would also be an associated change in vehicle routing dynamics on the overall network as vehicles access it and this has not been taken into account.

3.5 Despite it not being a ‘parkway’ style station with parking provided (other than disabled parking), the new station will still generate the need for vehicular access from taxis, buses and ‘kiss and ride’ facilities (i.e. drop off from private cars) as outlined in the policy requirements for the allocation. It is accepted that overall there could well be a borough-wide modal shift to using rail for shorter trips which is welcomed and supported, but the concentration of traffic at the proposed access points north and south of the new station is a cause for concern given the congested nature of the local road network.

3.6 The absence of strategic modelling associated of the transport impacts on local infrastructure close to the new station considering the close proximity of the A3 and Egerton Road junctions is a concern. The proposed highway improvements to address capacity issues at these junctions as a result of existing and forecast traffic conditions could result in the current work not providing sufficient capacity to accommodate the immediate impact of the trips attracted to the new station from buses, taxis and private cars.

3.7 With regard to deliverability of the station there is a concern. The Inspector should ensure that Network Rail is satisfied that a new station is technically deliverable and that the costs assumed within the Draft Local Plan 2017 are appropriate. RGP is not aware whether such a statement has been made by Network Rail at the time of writing.

6.2 In relation to the New Rail Station at Guildford West (Park Barn) (Policy A59) the following concerns are raised:

i) The vehicular impact of the Park Barn station on the Egerton Road area has not been included within the strategic traffic model, therefore the true impacts of the scheme are not understood to be included within the detailed mitigation currently being considered;
ii) The deliverability of the station is heavily reliant upon Network Rail and RGP is not aware that Network Rail is in a position to deliver the station within the lifetime of the Local Plan so that the expected modal shift is achievable for all of the reliant development primarily on the Blackwell Farm development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: 226389 - Sketch drawing ‘Initial Junction Arrangement’ provided by University of ...,pdf (210 KB)
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have the following objections to the proposed development at Three Farms Meadows, Wisley, and to the Guildford Borough Council Local Plan. Please confirm that all of these comments together with all my previous comments have been passed to the Inspector.

1. I object to the inclusion of Three Farms Meadows in the draft Local Plan for a number of reasons including:
   • It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
   • It is further from railway stations than any other identified strategic site.
   • It is close to one the most congested junction in the country (M25 Junction 10).
   • Local roads are at capacity particularly when the SRN is not free-flowing.
   • Any public transport (bus) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs.
   • It is adjacent to the most popular visitor attraction in the south-east, RHS Wisley, where visitor numbers are increasing every year.
   • There is insufficient employment available locally so that almost all residents will have to travel to work.

1. I object that the increased area, being on the south of the site facing the Surrey Hills AONB, will increase the negative impact of the views from the AONB.

2. I object to the removal of additional 3.1 ha from the green belt without any justification.

3. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

4. I object to the fact that the Council has failed to remove this site from the local plan despite thousands of objections from local residents and statutory consultees.

5. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A Regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

6. I object to the extension of the plan period by one year as it has not been identified as a major change.

7. I object to the inclusion of a 10% buffer in the housing number over the plan period as unnecessary.

8. I object to the housing number and I believe that the housing number is poorly based and open to legal challenge.

9. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development.

I object to the Council wasting the time and money of tax payers and local residents by not following due process and ignoring previous representations. I consider, for the reasons listed above, that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **I object to the proposed insetting around Send and Send Marsh.** If the new insetting boundary is adopted, then the land and all the surrounding fields for several miles around our village, by default, will become available for development and building, attracting builders to develop and build on large swathes of open countryside.

This is a completely irresponsible and reckless policy with no regard to co-ordinated planning and will lead to an out of control building frenzy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A34

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **I object to removal of Brownfield sites (A4) from the Plan**

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

1. **I object to removal of Brownfield site (A34) from the Plan**

Site A44 in Broadford Business Park has also been removed. This is another brownfield site that has already been developed. The Council’s claims to “have adopted a 'brownfield first' approach” (page 5) and makes out this is an important aspect of the plan but this is clearly not the case, and is contrary to national guidelines.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A42 Pages 241-2

I object to the proposed increase of a further 16 houses on the Clockbarn Nursery site. This is a totally unsuitable site anyway for a high density development. Increasing the number of houses completely exacerbates the situation.

Traffic movements from the site coupled with traffic accessing the new Marina development and then trying to join Send Road would cause considerable problems for residents and through-traffic alike. Access from Tannery Lane to Send Road is very limited and trying to join it, particularly at peak times, would be extremely difficult.

Send Road is already used to capacity by traffic heading to and from Junction 10 on the M25 and is used as a rat run off these roads. Send Road was never intended to be used by today’s very large articulated trucks.

The essential traffic islands to enable pedestrians to cross represent an additional hazard plus the increasing number of cyclists exposed to rising levels of exhaust pollution.

Access from the opposite end of Tannery Lane is through very narrow roads with limited passing areas which will render this access effectively impossible. This means that traffic from the Marina and the Clockbarn Nursery site would be forced to come and go via the Send Road junction.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3978  Respondent: 17440705 / Chris Brown  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Garlick’s Arch (A43) proposed changes to this site which in combination would generate considerable activity in a most unsuitable location.

Pitches designated for Show People suggests large vehicle traffic movements and a further extension to the commercial premises that have already been added on that side of the road all of which is located in close proximity to the surrounding residential area.

Increasing the number of houses would mean a truly massive increase in the volume of traffic which will only be able to use the A3, Send Road and travelling through Ripley, all of which are unsuitable for the level of traffic associated with such a development.

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause log jams of these villages.
Garlick’s Arch (A43) should not be extended or even developed with the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Show people sites in A34 Garlick’s Arch

The allocation of 6 Travelling Show people plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Show people plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

I further object to the Garlicks Arch site because if A58 Burt Common site and development at Gosden Hill Farm is also granted then the A3 corridor from Burpham to Ripley will be over developed and it will simply join up a sprawling set of developments. These in turn will lead to greater traffic density, slower journey times as well as increasing safety concerns for an infrastructure which cannot support this level of traffic.

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The plan lacks any infrastructure proposals to support all the development. There are no proposed plans to upgrade roads or introduce new roads or links, and it is simply a plan of building additional housing and commercial facilities but expecting the current road system to support more traffic which it is incapable of doing.

1. I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough.

Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt.

This is grossly unfair on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. POLICY A58

I object to this proposal A58 Burnt Common which is not defined and therefore open to interpretation. Any development of that type and on that scale will again impact the road infrastructure on the edge of two villages, Send and Ripley. In any case the need for them is unclear especially when there seems to be spare capacity at Slyfield industrial estate which is much more appropriate and already an established industrial estate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

There are clearly serious pollution issues to be considered as well as a massive increase in commercial traffic bringing the waste in and out.

I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

If the developer simply builds the development they want and then makes a cash payment to the council for the affordable houses the developer does not build, how does this help Guildford Borough Council build affordable housing? This would appear to prejudice the younger generation and those needing this urgently sought type of housing.

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to removing Send Business Park from the Green Belt (4.3.15).

Send Business Park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one.

Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

If further development is made on this Business Park then the same points arise as those made earlier for point 1, Clockbarn Nursery site with regard to traffic issues.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly.

1. GENERAL OBSERVATIONS

The latest proposed plan is considerably worse than the previous plan and I am very disappointed in GBC and I’m much more critical of the Local Plan proposals.

As residents of Send Marsh, we share the same views of that of our neighbours in Send and Ripley. Every time we are asked for our opinion we make it very clear by way of a massive response that so many of the proposals are ill conceived and impractical to apply in our particular area.

GBC seems to be either unwilling or unable to act upon the feedback and opinion which is so clearly voiced by the residents.

We in Send Marsh have repeatedly expressed our views over the years but clearly no attention is paid to them as evidenced by the fact that despite everything that has been said even more houses are proposed to be built in Send than before plus an additional eight Show people pitches.

The Conservative Manifesto for GBC states:

“Deliver a new Draft Local Plan taking into account constraints, residents’ views and protecting the green belt”.

It would appear that for the villages of Send, Send Marsh and Ripley, GBC are failing on two of these;

Failing to take into account residents’ views

and

Failing to protect the green belt.
This continual disregard of local public opinion is very disappointing and GBC needs to create a significantly better plan than this one for the area we live in.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: pslp171/2073  Respondent: 17443201 / Mark Squibb  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P3 – Countryside. Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road. Countryside within the urban area may be allocated as a strategic location for development, however suitable infrastructure must be implemented before further development. Our roads are single lanes in many cases with poor road surfaces, associated traffic volume including delivery vans & lorries servicing these new properties. Congestion & bottle necks particularly school peak times. Our countryside, loss of natural habitat and the rural setting under threat of being over developed. Awareness of Tree Preservation Orders and to highlight Listed Buildings & homes.

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside) Therefore Requirement 6 of this Policy, which attempts to protect the ‘historic location of Ash Green’ is inadequate and would need rewording to prevent this increased potential for coalescence.

Development proposals in the vicinity of Ash Green must recognise the historic location of Ash Green village. The listed building the trees with Preservation Orders. Any development as a whole should not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a substantial green buffer that maintains separation between any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane.

We need to sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house. Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.

Infrastructure before development. Requirement 9 (land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be completed before any development of Policy A29 commences.

Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

1. The Street in Tongham
2. A331/A323 intersection
3. A31/White Lane junction

Policies A27, A28 and A29 collectively increase Ash Green village by 50%!!
We will no longer be a village, we will be victims of urban sprawl, losing our village identity forever.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to vehemently object to the proposed plans for Gosden Hill Farm as they currently stand. While Guildford is certainly in need of new homes to help meet national house-building objectives, the proposed plan to build 1,700 – 2,000 new homes on this site, in my mind raises enormous concerns, with most of the new traffic passing through Burpham.

Burpham already suffers considerably from traffic congestion,

- particularly when there is an accident on the A3, which happens all too frequently and clogs up the roads through Burpham and further down with traffic trying to get through Guildford and
- at the London Road/New Inn Lane/Burpham Lane roundabout with traffic queuing to enter the – too small – Aldi supermarket car park, clogging up all adjacent roads.

Unless an efficient new junction with 4-way access to and from the A3 is included, all traffic from any development heading south onto the A3 will have to go towards town to access it, further clogging up Guildford’s already dire traffic problems. Guildford’s traffic problems HAVE TO BE addressed first and foremost to alleviate this awful problem, which is currently reducing the quality of life in this otherwise wonderful town. And all these problems are contributing to a worsening pollution problem in Burpham and Guildford, to which the proposed new housing on Gosden Hill farm will only contribute.

The A3 HAS TO BE sorted out, improvements carried out and, more than anything else, a tunnel planned to eliminate the bottleneck at the Cathedral junction during rush hours or when an accident happens. I consider this to be vital to the traffic flow and consequent wellbeing of our traffic congested town!

I understand that we need new and affordable housing, but for the reasons I have indicated, I object to the Plan as it now stands.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have viewed the previous Local Plan and current, although there has been a few minor changes to the proposal for Blackwell Farm /University Manor farm/Hogs Back area the current proposal is still in excess of what the road infrastructure and amenities can support. This year has seen an increase in the regular road incidents from the Hogs Back to Cathedral junction on the A3. The volume of traffic attempting enter the business park, Royal Surrey Hospital and university campus has grown dramatically in the past few years. This week whilst in term time has seen Madrid Road from Guildford Station through to past Tesco’s’ roundabout at a standstill. Made worse by the temporary closure of a road at the traffic lights forcing volume to travel by single carriageway. It is along these routes the prosed development at Manor Farm is shown to travel to and from the development, university, Royal Surrey Hospital and Guildford and beyond.

The proposed alterations with new access from Hogs Back will destroy open space and wildlife habitat not to mention an area of outstanding chalk land. For those who live in Onslow Village the pollution will increase as the warm air rises from the lower plain new town, noise levels which are on the increase from the A3 will multiply which will drastically affect the quality of life in the village. Recent decision by Guildford Borough Council to refuse planning approval for new homes and school at Rokers was reported by planning offices as “the application site is located within the green belt where there is a general presumption against inappropriate development “ The application proposes a large scale residential development and a new school both are inappropriate developments Inappropriate developments should only be approved where there are very special circumstances which clearly outweigh the harm that would be caused by the development “ the report goes on to say “In addition to the harm to the green belt the report identifies significant harm to the character of the area “ Those comments are even more applicable to Blackwell Farm/Hogs back.
When we moved to Guildford 11 years ago the traffic on the A3 would generally be noticed about 6:30 am now there is only respite between about 1 am to 4:00 am. Any development should only commence when road infrastructure and if approved rail improvements are completed. The Park & Ride at the Surrey Sports Park is under used, limited number of road users will divert off the A3 and use the facility. The greater number of cars and delivery vehicles using the single carriage way road will have a big impact on ambulances trying to arrive and depart Royal Surrey Hospital. With increase in commercial premises there will also be a greater number of delivery lorries travelling on the lacking road infrastructure. Many expensive studies have recently been undertaken without achieving a workable solution for the A3 or town centre gyratory.

With the increase volume of traffic on the Hogs Back/A3 many drivers now use Onslow Village as a rat run leaving at High View Road or the Chase travelling at speed through residential areas with infants and junior schools located in the village. Resulting in deterioration of the public highway especially in Manor Road. Should development proceed this situation will only get worse.

The previous Local Plan study of numbers of additional persons and home requirements was found to be inaccurate, the suggested numbers are guess work based on increase in students at Surrey University, possible new businesses based on the manor farm development and growth in current local population wishing to buy homes in the borough. The apparent need for commercial development in my opinion should be concentrated at Slyfield where with the proposed new road structure would reduce large volumes of traffic from the west of Guildford in particular the hospital/university and already grid locked A3/A31 and Farnham Road. The proposed Slyfield Road links close to the A3 junction Northbound which would divert heavy goods vehicles away from residential areas and Guildford town centre roads.

Surrey University has more than sufficient land to develop for students approvals have yet to be commenced when built would reduce demand for rented property in Guildford making available for local workers and families. The University should develop their land before any “Developers” bonus from sale of Blackwell Farm is paid into their coffers. Areas such as the open air car parks empty for long periods throughout the year, these car parks could be redeveloped with under ground parking to meet demand with student accommodation in blocks of up to 5 storeys high which would not be detrimental to area. Students on site Campus with own facilities result less travel or use the park and ride facility. To develop the sites the University would need to raise commercial funding which apparently they are not prepared to consider as it is expensive an no immediate return. By selling Blackwell Farm as residential development land the value would dramatically increase over farmland, they want their cake and eat it !. I appreciate a large number of local residents are employed at the University =more students + greater number of tutors and other employees + more road travel as many will be living in other parts of Guildford but preferring to travel by road for time convenience rather than local transport. The proposed train station is unlikely to reduce dependency on road network due to distance from proposed housing and commercial areas. Will probably benefit hospital staff and patients, although they would first have to travel to their local station and with poor bus services seems unlikely to have large take up.

The land bank already approved by GBC for development the University should be developed before other off campus sites.Surrey University could comfortably develop those locations and increase student accommodation by utilising the open space car parks which are vacant for much of the week and year. By building underground car parks with student accommodation above the land would be put to better use, reduce the volume of traffic and pollution. The University should be asked to seriously consider however there would be the commercial investment required which the University are unlikely to entertain. We believe the University should not be able to increase the number of students recently reported as an increase of 6,00 until they can accommodate students on the various campus, not to the detriment of residents many of whom own their own homes and will see the area West of change for the worse with over development, poor infrastructure and increase noise, pollution and traffic. The change in the environment would not bring any benefits to current residents, we fail to see anything in the Local Draft Plan which enhances the West of Guildford.

The proposed development to the West of Guildford is in excess of what the town requires and with very limited road infrastructure opportunities to dramatically improve the flow through Guildford on the A3 the area of the North Downs will be destroyed. Current problems would not be solved by the planned road layout alterations as the infrastructure is totally inadequate. Despite numerous surveys at great expense no realistic affordable practical proposal has been suggested. Road network must be the key to size of any development at Blackwell Farm. The past two weeks I have found it impossible to travel through Onslow Village to join Madrid Road and head towards A3 the village and surrounding roads grid locked 8:00 -9:30 such issues will increase which has an effect on not just myself but others living in the area trying to get to work. Our quality of life has not been considered in the plan which is driven by seeking unsubstantiated annual housing targets.

Our quality of life has not been considered in the plan which is driven by seeking unsubstantiated annual housing targets.

A recent article from the University supporting the development made mention of the expected increase in number of students and the need to house them. The correspondent also commented on the students bringing value to Guildford. They
do not pay rates on properties they rent, some leave mess outside the properties and as I write at end of the year several late night parties disturbing the residents. the situation in respect of rates provides a lost opportunity for Guildford Borough Council the funds obtained could be used to benefit local residents. We believe about 1500 homes plus are rented to students losing the Council in region of 2 million pounds per year in rates revenue. How much does Surrey University contribute in rates for their campus?

There are a number of vacant office blocks which could be converted to residential as demand does not appear to be for commercial occupancy. The Commercial Park at the old Denis site could be relocated to Slyfield and the area developed with multi rise units near to station, town centre and university without having much of an effect as the environment.

Development is required in Guildford however we question the analysis to predict of future growth patterns for a good number of years hence, already reduced on re examination following the previous Local Plan and probably requires further assessment prior to final draft. Any new homes should cater for bungalows, 1 bed, 2 bed back to back starter homes, 2/3 bedroom terrace properties and semi detached, not just the larger 4 bedroom homes, otherwise the young and old of the borough would not have opportunities to buy a first home or down size to free other homes in the borough for the “suggested” numbers moving to Guildford, the town is almost at saturation point for reasons mentioned above. Affordable homes is a miss conception new developments are built by developers to maximise profit not out of goodwill to benefit purchasers.

On a general note with the increase in housing there is limited additional recreational facilities for the normal family who cannot afford to use Surrey Sports Park or the Leisure centre, few open spaces to make up for the loss of natural habitat and open spaces at Blackwell Farm/slopes of the Hogs back, loss of environment and playing fields for football, cricket and such like. Bus routes and park and ride are under utilised the idea public would use and the train station are we believe over rated. The very heavy rain these past two days also raise the question of flooding, the Blackwell Farm site is in the basin below the Hogs Back, presently the run off from road and chalk downs is to the lower farm areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| Answer (if comment is on questions 1-7 of the questionnaire): | () |

Reference the plans you have for Normandy and surrounding areas I would like to object to some issues.

- Site A46 for 1100 homes and School
- Site A47 for 50 homes

I call for the removal of these plans for a number of reasons including, destruction of wildlife habitat, the inability of the current infrastructure to be able to cope with new demands, ( i.e, roads, waste, flooding, sewage, electrical supply and healthcare)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- Removal from the green belt of homes in Guildford Road, northern end of Glaziers Lane, Flexford Farm, Walden Cottages & Palm House Nurseries Traveller site

I object to these homes being placed here primarily due to the fact that it will enable development within the area at a much higher density and will give greater success for planning applications, ultimately giving rise to more developments in our "green belts"

- 10,000 homes within 10 mile radius of Normandy

I object to these homes because they will add further pressure to our roads which are already unable to cope with its traffic demands. It will also have major detrimental implications to our rural environments.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to Guildford Borough Council's changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site (Policy A26 & para. 4.1.9).

The proposal will cause irrevocable harm to the beautiful landscape on the edge of the Surrey Hill Area of Outstanding Natural Beauty and destroy Green Belt.

Any increase in development, extending the University's land at Manor Farm, would be inappropriate building growth on Green Belt and in the wrong place. The scheme, together with the proposed access road to the site, linking Guildford to the A31, will cause additional chaos and traffic congestion on the A31 and A3.

I live on the north side of the A31 Hog's Back. Residents in East Flexford Lane have already been affected by the closure of the gap in the central reservation of the A31 at the East Flexford Lane point. Since the closure In March 2017 residents in East Flexford Lane have been cut off from reaching their homes several times with the A31 eastbound towards Guildford being closed to all traffic and westbound during the re-surfacing work and no alternative route. Residents of Wanborough and Normandy were also affected. Due to the closure the fire services had a longer journey to tackle a recent field fire close to our property with large fields of combustible crops putting properties, residents and crops at risk. Residents had asked
for provision for access at the gap for the emergency services to have facilities for such an event. Response times would be even more difficult at peak hours.

No slip roads, acceleration and deceleration lane provision has been made for owners of Properties along the Hog's Back accessing the A31 with traffic travelling in excess of 60 m.p.h. Further increase in traffic will create even more dangers for residents joining traffic at motorway speeds; pedestrians also cross the A31 to access the bus stops. Every weekday morning there is a queue of traffic into Guildford that stretches back for several miles. Adding a junction and proposed access road to the Blackwell Farm site, with proposals for 1,800 houses, a school, medical centre and expansion of the Research Park, will add an extra burden on an already overloaded road system. The impact on the local network and questionable viability of the development (Policy paragraph 2.14a) ignores independent expert traffic studies and common sense.

Already the Tesco roundabout and vital access to the Royal Surrey County Hospital is congested and approval of the University's plans will cause road infrastructure breakdown. The journey to the Hospital for ambulances with patients is already difficult at peak times.

The additional traffic will add to air pollution which already exceeds safe Eurorean Unit limits. When I drive up East Flexford Lane, it is clear to see the fumes rolling off the Hog's Back down the into the fields, especially at morning and evening peak times when traffic is stationary waiting to access the A3. The development will inevitably see the destruction of trees which are the lungs to counter pollution; the new proposed major route would cut through an ancient woodland and remnants of historic parkland.

The University has already covered most of the adjoining Manor Farm with housing, a veterinary centre, sports facilities for international events and an underused Park & Ride.

When the University of Surrey applied to have the Green Belt restriction on Manor Farm removed to enable it to expand its University and Research Park facilities on to this land, it evoked "Special Circumstances". Permission was granted, with assurances from the University to supply the 60% of its student accommodation on its own campuses. Instead the University has failed to implement the Planning Permission to build accommodation for students. Such action could release up to 1,700 local houses to meet local demands.

The University acquired planning permission for accommodation for students in Walnut Tree Close. This site could have provided housing for people working in central Guildford or using the train station, reducing car dependent travel.

The National Planning Policy Framework guidelines make clear the direction that should be followed on Green Belt protection and sustainability. Guildford Borough Council should adhere to this Policy and not approve development on Blackwell Farm for financial gain in the form of the Government's New Homes Bonus. Consideration should also be given to the loss of food production from Blackwell Farm which presently contributes to Britain's self sufficiency.

I trust councillors will honour their election promises and protect the Green Belt at Blackwell Farm by opposing plans to build on it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

I object that the developer will be unable to "provide the eastern route section of the Sustainable Movement Corridor on the site and make a necessary and proportionate contribution to delivering the eastern route section on the Local Road Network, both having regard to the Sustainable Movement Corridor Supplementary Planning Document."

The A3100 London Road is the road which will become an SMC carrying both north and south bound traffic; cars, buses, HGVs, motorbikes and bicycles lanes. This is not possible in sustainable in a 2-lane road.

Although GBC has reduced the number of houses from 693 to 643 per annum there is no information forthcoming, and therefore not the necessary transparency, about how this figure has been reached or why it does not agree with the figure of 404 homes per annum in the independent analysis of the SHMA which was carried out by a respected national expert who worked for the government.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We are writing to make comment on the above in respect of West Horsley.

We are very disappointed that the 2017 version of the plan should be almost unchanged from the 2016 version and that most of the 32,000 objections received last time seem to have been ignored. I truly hope the inspector rejects the plan and sends it back for radical reworking. In particular, the calculation of the SHMA remains unsupported as it can’t be tested by either the public or the government because the council refuses to reveal it. Despite this the SHMA methodology is still taken by the council to produce an “objective” housing number assessment. The council is contradictory about how development will be phased and infrastructure and other constraints applied making the final housing number so uncertain as to render this part of the plan unworkable as a practical policy tool for officers responsible for day-to-day planning. No-one knows for sure what number the council is heading towards or how this aligns with public opinion or government...
policy. Policy H1 has deleted constraints on housing density, which ought to be a key part of any planning document. • P1 and E5 have removed the 5 tests for development in the AONB, making it more vulnerable to development, in contradiction to government policy and promises made by the council leadership since the 2016 consultation. • The plan still contains a multi-pronged assault on the Green Belt. Building on the Green Belt in West Horsley would have zero effect on house prices, since it would make no impact on the national supply/demand balance, the local overhang from London or the availability of cheap credit, e.g. to overseas buyers. It would discourage the regeneration of urban areas where many people wish to live and instead wants to promote more shops when the national and international trend is for less town centre shopping and more internet and delivery. There is infrastructure already in place in the town to support housing. This plan seems to see a suburbanised countryside with a decaying town centre in its centre.

The following comments relate to my local area that features in Sites A36-41 (East and West Horsley): The latest version of the plan reduces the number of development sites here by 2, but 4 remain, representing 395 new homes. This is too many in absolute terms, and disproportionate in relation to the rest of the borough. In my view, the plan is unsound in failing to assess the aggregate impact of these sites, along with the 2,000 homes planned for Site A35 only 2 miles away, in effect leaving the Horsleys as vulnerable to piecemeal planning applications as they are without a local plan in place. By not setting any development boundaries, the “plan” fails to plan this important part of the borough’s future size or shape in a useful or meaningful way. The plan fails to mention most of the known sustainability and infrastructure problems affecting the Horsley sites, which were fully explained in the public responses to the 2016 consultation. These include public transport, traffic, road safety, parking, schooling, medical facilities, sewage, flooding/surface drainage and shops. The density of new housing on the four Horsley sites is too high, being greater than anywhere in the locality at present. Sites on the edge of existing development in the Horsleys trespass on the open countryside and require big extensions in settlement boundaries. Taken together, the 4 Horsley sites conflict with NPPF para. 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been an outstanding success story in the Horsleys, as detailed in response to the last consultation. Assets include a dense public footpath network, parish parks, sports fields, a campsite of international standard, Britain’s newest rural opera theatre and the popular Olympic cycle route. In order to survive, these assets require a local plan that protects the Green Belt, maintains its openness and beauty and avoids urbanisation and traffic congestion. Sites A35-41 are integral to this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/2117  Respondent: 17445345 / Albury Parish Council (Joanna Cadman)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Key facts

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Page 14 Para 2:13 Transport and Accessibility – Cycling

Albury Parish Council notes that no mention has been made of the increasing number of cycle events that take place in the Surrey Hill since the 2012 Olympics. Some, like Ride London, are organised events but many are not and most cause road closures, some for an entire day, over a large network of roads in the Borough. This has a negative impact on local residents who cannot access local facilities, and for those dependent upon social care in their homes or in need of emergency services. Competitors also use local roads to practice for events which slows the through flow of traffic substantially. Many local roads are no more than the width of one car. With increases in housing in the Borough this will inevitably attract more people to the Surrey Hills to pursue cycling as a leisure pursuit and as a means of transport to school
and work. There must be infrastructure improvements to the roads to allow for the increased number of cyclists in the 
Surrey Hills such that local residents, visitors and businesses are not inconvenienced and road closures are unnecessary.

Page 16 Para 2:22 Infrastructure

Albury Parish Council request the retention of paragraph 2:22. Although Infrastructure is covered in more detail later in the 
Plan, the need for investment in improvements to Infrastructure cannot be underestimated and it is vital that this occurs at 
the same time as increases in housing and commerce.

Pages 19 and 20. 2 Maps. Map-Guildford Borough Key diagram 2016 and 2017

Albury Parish Council remains opposed to any changes to the Green Belt boundary and the removal of villages including Chilworth and Shalford, East and West Horsley from it. These areas including Gosden Farm in Merrow and Wisley 
airfield are all areas designated for “strategic development in the plan” with large numbers of new housing proposed. The 
Green Belt has always been afforded protection to prevent urban sprawl. Any additional building and traffic generated by 
areas now “inset” and other areas of Guildford Borough and Waverley Borough allocated for new build will have a 
negative impact on the natural quality and existing infrastructure of the retained areas of Green Belt, Albury Parish and the 
Area of Outstanding Natural Beauty of the Surrey Hills. These areas would need substantial investment in roads, buses and 
cycle routes to accommodate increased commuter and visitor numbers. The A248 on which Albury sits is the main road 
artery connecting south east Guildford, Cranleigh, Godalming, Shalford and Chilworth via the A25 with the A3 north of 
Guildford and vice versa. It also provides connection with the train line running from Guildford to Waterloo via West 
Clandon, Horsley and the newly proposed Merrow train station. The A248 in Albury simply cannot cope with increased 
traffic volume. Without careful planning to accommodate this, which is not included in this document, the increased traffic 
caused by new housing will have a detrimental effect on the Green Belt, Area of Outstanding Natural Beauty and Albury 
village and parish all of which are protected by planning policy and the NPPF. Please see further comments on 
infrastructure policies 4:6.

Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We request that the following bullet points that have been deleted are retained. These are important to Albury and its outer 
lying hamlets which have a well-defined character, with many buildings constructed of local stone. We believe the 
retention of these guidelines will better inform householders, developers, builders and architects to protect and preserve 
Albury Conservation area and environ, buildings of note and Conservation areas in the Borough. These are:

- Respond meaningfully and sensitively to the site, its characteristics and constraints and the layout, grain, massing 
  and height of surrounding buildings.
- Be laid out to make the best use of the natural features such as trees and hedges and levels and enhance views 
  into and out of the site
- Promote and reinforce distinctiveness
- Use material appropriate to setting
Retain deleted wording for the same reason as stated under page 106 Policy D

**Page 46 4:2:40 Affordable Home**

Albury Parish Council recognises the need for Affordable Homes but in order to deliver them it is vital that Guildford Borough Council has firmer controls on developers who flout viability as a reason to avoid building affordable homes. In our view the current wording in this section is too weak.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
We expect that Albury Parish Council would designate any sites it felt viable for rural exception homes within our Neighbourhood Plan and that these and any affordable housing would be subject to any Green Belt and AONB planning policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We support policy IDI (3) that states that improvements to infrastructure must go hand in hand with development and not lag behind, though this statement is contradicted in the Plan under point 4:1:9 which states that infrastructure changes won’t happen until the end of the plan in 2033-34.

We ask that Guildford Borough Council in its plans for infrastructure are mindful of building in nearby Boroughs including Waverley, and their impact on resources. Substantial new housing is to be built at Cranleigh, Dunsfold airfield, and Godalming. This will impact Albury adversely if commuters and visitors to the AONB are allowed to use the A248 in its current site running through the centre of Albury village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Albury Parish Council strongly objects to the proposed changes to the wording in paragraphs 1 and 4. Specifically, we request that the newly added text is retained in addition to any deleted text. It is imperative that this stronger wording is kept unchanged in order to protect the AONB. The new proposed text is too vague and open to abuse. The AONB was defined in the National Parks and Access to the Countryside Act 1949 and as such has always been offered special protection. The AONB exists in its current unspoilt form today only because of stringent planning policy restrictions in the past. These must be retained for continued protection and all existing boundaries similarly retained.

Points 2 and 3 should be retained as shown. In Point 5 the AGLV boundaries as currently set should be retained in order to protect the AONB.

Page 52 4:3:5 and 4:3:6

should be retained in their original unamended form as they offer greater protection to the AONB.

Page 53 4:3:8

The AGLV must be retained with its current boundary to protect the AONB, particularly as not policy has been written yet to protect it under the Development Management Policies DPD. No review can take place until this is in place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

4:1:9

Albury Parish Council objects to the proposed development at Gosden Hill Farm and former Wisley airfield as specified in our objection to point 3:1 above.

Page 30 4:1:9a

It is disappointing to see that the delivery of necessary infrastructure to support new housing is not expected to occur until towards the end of the planned period in 2033/34. Albury Parish cannot sustain increased traffic volumes caused by new housing and business in the Borough as recommended in the Plan. Infrastructure improvements must be completed in line with development. Most homes have at least 2 cars which will bring an additional 24,852 cars onto the Borough’s roads.
The Plan contains no improvements to roads, (particularly the A248), buses or cycle routes through Albury Parish and any that were made would have to be in place before new homes were occupied.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Vision and objectives

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Albury Parish Council objects to the current proposal to build 12,426 homes in Guildford Borough by 2034 because of the adverse effect that it would have on Albury Parish, the Green Belt and Area of Outstanding Natural Beauty. In particular we object to the lack of improved infrastructure for the Parish of Albury in the Plan. Albury sits on the A248, the main artery connecting the south east of Guildford, Cranleigh, Godalming, Chilworth and Shalford to the A3 via the A25, and London-Waterloo train stations at West Clandon, Horsley and the newly proposed station at Merrow (Guildford East). The Plan would also increase visitor numbers to the AONB without additional buses or cycle routes. We cannot support the Plan until this lack of new infrastructure is addressed and this should also include medical facilities (additional hospital and community hospital), Social Care and Emergency Services.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am very disappointed that the revised Local Plan 2017 has not heeded the objections and concerns of residents that were sent to the 2016 Local Plan.

I believe that the new evidence submitted is flawed and that Guildford's proposal for more than 12,426 homes (plus a buffer of 1,155 homes) is excessive and will result in needless loss of Green Belt and green character and increased congestion, that cannot be justified in our heavily constrained borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Wisley Airfield and fields lie adjacent to the A3/M25 junction which is a pollution hotspot in Surrey (CPRE) and until air quality at this junction can be brought within legal levels, then proposing the addition of a village and two schools next to the junction seems highly irresponsible and possibly illegal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

The Green Belt is a policy for controlling urban growth. The idea was developed so as to have a ring of countryside where urbanisation would be resisted, maintaining an area where agriculture, forestry and outdoor leisure could be expected to prevail. The fundamental aim of a Green Belt policy is to prevent urban sprawl by keeping land permanently open, and consequently the most important attribute of Green Belts is their openness.

The Metropolitan Green Belt around London was first proposed by the Greater London Regional Planning Committee in 1935. The Town and Country Planning Act 1947 then allowed local authorities to include Green Belt proposals in their development plans. In 1955, the then Minister of Local authorities around the country were encouraged to protect land around their towns and cities by the formal designation of clearly defined Green Belts, to prevent urban sprawl.

The 2012 National Planning Policy Framework (NPPF) issued by the Government clearly sets out the following purposes (amongst others) for the Green Belt:

- To check the unrestricted sprawl of large built-up areas
- To assist in safeguarding the countryside from encroachment
To preserve the setting and special character of historic towns

How do you reconcile the Wisley Airfield proposal, and the removal of the Horsleys from the Green Belt, with the NPPF’s guidelines above?

It appears that GBC now wants to ignore the very reason for having designated Green Belts around urban areas, and specifically around my village of East Horsley. I strongly **OBJECT** to your proposals.

I hope that the GBC, as our elected representatives charged with representing our interests, will listen to opinions voiced in this fourth public consultation: I wish to strongly object to the proposed Guildford Local Plan 2017 based on the points in this letter.

I am writing to object to the Proposed Guildford Local Plan 2017 and in view of what’s being proposed, it is clear that Guildford Borough Council has not listened to over 30,000 objections to the Guildford Local Plan 2016. The 2017 Plan is substantially the same as the 2016 Plan:

- four of the original 6 housing development sites remain
- potential 2500 houses on the former Wisley Airfield and fields as well as
- Gypsy/traveller pitches
- Employment/retail space
- Two schools all remain unchanged after objections to Local Plan 2016

Answer (if comment is on questions 1-7 of the questionnaire): ()
Land around Burnt Common Warehouse (site no. A58)

- Outside current development boundary: I OBJECT since this development lies outside the existing development outline of the village. It represents ribbon development, loss of green belt land, and creeping development between Send and Guildford.
- Use of Green Belt land: I OBJECT because there are no special or exceptional circumstances identified which justify removal of the Green Belt.
- Industrial use: I OBJECT to the proposed industrial development of a minimum of 7,000 sq. m at Garlick’s Arch because there is insufficient justification contained within the draft Local Plan plus it is not a sustainable development. It is removed from the major population centres in Guildford and Woking necessitating a large increase in public transport services and/or major additional traffic movements for staff travel and business logistics. If there is a need for 7,000+ sq. m of industrial space within the Borough it should be located at Slyfield where there is a 40ha site available, where transport link upgrades are already under way, and where it would be largely welcomed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

General Evidence and Policies

Housing Requirement: I OBJECT to the figure of 654 houses required each year between 2015 and 2034 as being too high. Guildford Borough Council will not publish details regarding how this figure was derived. It therefore remains impossible to support the sudden increase in housing numbers from previous annual figures of 322.

Inset Green Belt land: I OBJECT to the proposed inset of Send Business Park from the Green Belt (Green Belt Policy 2 at Paragraph 4.3.15) because

- This is acknowledged by river users as being part of one of the very few quiet stretches along the Wey Navigation. It must be protected from further development.
- The site contains an Area of High Archaeological Potential (AHAP – reference 2003 Guildford Local Plan) which requires significant protection to be continued.
- There are no special or exceptional circumstances identified which justify removal of the Green Belt status.
- Developments in the area will harm the open aspect of the area and views associated with the Wey.
- Access to the site is along very narrow roads which can neither safely support existing traffic nor the additional traffic to be expected both during site development and subsequent use.

Process: I OBJECT to the failure of Guildford Borough Council to allocate housing development proposals evenly among its constituent parts, instead focusing disproportionate development within Send Parish.

Process: I OBJECT to the failure of Guildford Borough Council to recognise and act on the large number of objections relating to proposals for Send and made during the 2016 consultation activity.

I object to the 2017 new local plan.

It includes the provision for Guildford to expand by 20% to 25%. In order to meet the resulting development needs, it proposes the release of Green Belt as well as building at very high densities in the town.

This will have significant impact on the town, in particular the destruction of Guildford’s historic and green character, and increased pressures on already stretched infrastructure (in particular from increased traffic).

The Borough must have a local plan and further development is accepted, but it must be based on a realistic assessment of future expansion and housing needs.

The plan allows for a total of 659 new homes per annum (13,893 over the period of the plan) but it seems this target is based on calculations and assumptions that have never been made public. Also, an independent analysis carried out on behalf of the Guildford Residents’ Association (by a respected national expert who worked for the Government) has concluded that these figures are based on an overestimate of future population growth and will result in needless loss of Green Belt and green character, and increased congestion, that cannot be justified in our heavily constrained borough.
The planned Gosden Hill development is of particular concern. It will put increased pressures on an area, principally Burpham, which is already blighted by severe traffic congestion and the proposed vehicle access plans do not do nearly enough to address this issue.

The Council has a responsibility to revisit the plan, in particular the basis for making provision for Guildford to expand by 20%-25% and the projected housing needs.

Please find below my comments on the proposed revised local plan.

a) No changes are being proposed since the 2016 Consultation to insetting West and East Horsley from the Green Belt.

b) Flawed evidence continues to be relied on to justify over expansion

c) No improvements proposed for sustainability and to infrastructure for the proposed development sites in the Horsleys. Already heavily congested and very poorly maintained, local roads will become gridlocked.

d) The Green Belt should be protected for everybody's future - and development sites can and should be utilised within the town centre rather than retail space.

I trust that you will seriously consider my comments

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
Please see below our response to the final Guildford Local Plan consultation:

1. Plans to expand Guildford by 20 to 25% appear to be based on an error. In view of this flawed new evidence, Guildford’s proposal for more than 12,426 homes, plus a buffer of 1,155 homes, is excessive and will result in needless loss of Green Belt and the green character of the area in addition to increased congestion that cannot be justified in our already heavily constrained borough.

2. There is compelling evidence that Guildford’s population growth has been greatly overestimated by about 40% because of under-recording of students leaving at the end of their studies.

3. If the Council fails to apply Green Belt protection or constrain expansion to reflect widespread, legitimate environmental and transport constraints, the 2017 Plan will cause harm to the qualities that underpin the economic success of Guildford and aggravate congestion.

4. Allocating too much land for development in the 2017 Plan and releasing so much Green Belt for development could result in Guildford being required to provide for Woking’s unmet housing needs on our Green Belt thus sacrificing our Green Belt to protect that of Woking. This is folly given the existing constraints in Guildford, a gap town with constricted roads set in the Surrey Hills AONB. We do not need to sacrifice so much Green Belt or allow town cramming.

5. Even taking account of all the proposals in the 2017 Plan, congestion which is already severe is set to get worse over the Plan period.

6. The revised proposal that only 60% of full time Guildford based students will be provided with accommodation on campus puts unnecessary pressure on housing stock in the town. An 80% target could help by freeing up affordable homes relatively quickly.

We support the need for a Plan but not one based on flawed figures, inadequate infrastructure and destruction of Guildford’s green character. The Plan needs to be reconsidered.

We hope you will take our responses into consideration in the final consultation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Comments on proposed changes to the Local Plan Approach to Schools

1. The ESFA is supportive of the proposed changes to the Local Plan with regard to planning proactively for the provision of new schools.
2. The ESFA welcomes the addition of para 4.6.49a recognising that national planning policy requires great weight to be given to the need to create, expand or alter schools to meet the needs of existing and proposed communities. This was a point we highlighted in our response to the 2016 consultation document.
3. The ESFA supports the clarification of requirements regarding secondary school provision in policies A25 and A26; and the clarification of requirements for developer contributions towards education provision in policy A29.
4. The clarification of education infrastructure requirements, including delivery agents, costs and funding sources in the Infrastructure Schedule (Appendix C) is also supported. This is important to ensure that developers have a clear understanding of the requirements placed on them to deliver this critical supporting infrastructure. It also provides clarity for the Local Education Authority and Department for Education as to what infrastructure is anticipated to be needed and when, aiding a coordinated approach to forward planning and delivery.
5. Lastly, the ESFA welcomes the addition of a reference to the council’s ‘Education Review’ document (May 2016) in the Evidence base section (Appendix D), a key evidence base document that we highlighted in our previous comments. If this is updated prior to the Strategy and Sites examination we would request sight of this once published.

Conclusion

1. I hope the above comments are helpful in shaping Guildford borough’s Local Plan, with specific regard to the provision of land for new schools.
2. Please notify the ESFA when the Local Plan is submitted for examination, the Inspector’s report is published and the Local Plan is adopted.
3. Please do not hesitate to contact me if you have any queries regarding this response.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I require confirmation that all of these comments together with all my previous comments are passed to the Inspector.

I reserve my right to appear at the inquiry and present my evidence.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

- It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
- It is further from railway stations than any other identified strategic site.
- It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
- Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
- Any public transport provision such as bus services to/from Guildford will have to negotiate the overcrowded SRN and will therefore be unreliable and subject to frequent delays.
- Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
- It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
- The associated traffic increase from the RHS has not been taken into account.
- The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
- There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
- The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
- It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
- The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
- Opportunity (3) should be common to all sites and is not unique to this site
- I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
• I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
• I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
• I object to the removal of additional 3.1 ha from the green belt without any justification
• I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
• I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
• I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
• I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
• I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
• I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
• I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
• I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
• I object to the extension of the plan period by 1 year as it has not been identified as a major change
• I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
• I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
• I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
• I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
• I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
• I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
• I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
• I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
• I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
• I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am extremely disappointed by the response to the vast number of objections regarding the planned number of houses to be built in the Green Belt received during the last consultation. Whilst almost 2000 house have been removed it still leaves a very large number of dwellings in the Green Belt.

Together with the plan to build far more houses than is either required or is sustainable in many areas of the borough, it is unacceptable and hypocritical to begin the plan with the fallacious comments about protecting the precious Green Belt.

This, together with the changes made in the current plan means the Eastern side of the borough is now scheduled to take an even greater share of new homes in the Green Belt. The plan to build surplus houses in this area makes it probable that this over provision of homes would be acquired by Woking residents and not Guildford residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The draft local plan should not be submitted as it stands because the housing number used is clearly unsound. No acceptable justification for removing Green Belt protection has been demonstrated. Constraints for infrastructure and Green Belt should be applied but the draft local plan fails to do this. In my opinion the draft local plan as a whole is unsound.

When the responses to the last consultation were published mine was missing and other comments appeared under my name. It took several weeks for this to be corrected.

- I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

- Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

- Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

- Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

1. The Street in Tongham
2. A331/A323 intersection
3. A31/White Lane junction
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Clockbarn Nursery, Tannery Lane, Policy A42
Now 60 homes in place of 45 homes previously
I object to the Policy A42 change at Clockbarn in Tannery Lane because:

• The increase to 60 homes in place of 45 homes is 33% more and too much]
• It will worsen access and traffic problems in Tannery Lane and at the A247 junction
• It will make erosion of the Green Belt in our village worse
• It will make surface water flooding, which is already bad, even worse
• It will impact open countryside views from the River Wey Navigation

Land at Garlick’s Arch, Send Marsh, Policy A43.
Now 400 homes and 6 Travelling Showpeople plots
I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth I
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Burnt Common, London Road, Policy A58.
Now a new allocation for a minimum of 7,000 sq m of industrial or warehousing
I object to Policy A 58 at Burnt Common because:

- It was deleted from the 2014 draft because of all the objections made previously
- The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land.
- There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt
- The impact on small surrounding roads will create traffic gridlock
- It will join up existing villages and defeat the purpose of the Green Belt

Green Belt, Policy 2 at paragraph 4.3.15
Send Business Park now taken out of the Green Belt altogether
I object to the proposal to inset Send Business Park from the Green Belt because:

- With the new Marina planned on the Wey navigation, removal of this area will facilitate the total erosion of the greenbelt in this area through the infill of further buildings in the future.
- It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
- There is highly restricted vehicular access along Tannery Lane in both directions as well as limited access to the already busy Send Road.
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

Overall the proposed changes will have a huge detrimental effect, with particular impact on traffic and other facilities, in addition to the removal of the irreplaceable Greenbelt protection that parts of our village enjoy. I must illustrate the additional impact on other infrastructure from other proposed developments such as Gosden Hill, which will compound the issues with local roads and other facilities which are struggling to cope with the local population as it is. In addition, there appears to have been minimal effort to development existing brownfield sites in and around Guildford. This is evidenced by recent redevelopment of land such as the old Fire station and the Waitrose in the centre of Town. Both these sites, and many others, could have been used for residential development instead of more retail space, with far less impact on the local infrastructure and none of the Greenbelt.

I am writing to object to the latest draft local plan. I note that you are only accepting comments to the changes versus the previous plan, so I would ask you to read my comments below in conjunction with those that I have already written to you about in 2016, when you published the previous set of proposals. I have attached a copy of this letter for your ease of reference.

I have been a resident in Send for over 15 years and have seen how strongly local people feel about the proposed changes to our village. This included raising a large proportion of the objections to the previous plan as well as electing two Borough Councillors who primary objective is to save Send’s Greenbelt status. However, it appears that none of these objections have been taken into account at all. If anything Send seems to have been unfairly penalised for this activity with the inclusion of even more development in the latest version of the plan, making things even worse for our village.

Overall the proposed changes will have a huge detrimental effect, with particular impact on traffic and other facilities, in addition to the removal of the irreplaceable Greenbelt protection that parts of our village enjoy. I must illustrate the additional impact on other infrastructure from other proposed developments such as Gosden Hill, which will compound the issues with local roads and other facilities which are struggling to cope with the local population as it is. In addition, there appears to have been minimal effort to development existing brownfield sites in and around Guildford. This is evidenced by recent redevelopment of land such as the old Fire station and the Waitrose in the centre of Town. Both these sites, and many others, could have been used for residential development instead of more retail space, with far less impact on the local infrastructure and none of the Greenbelt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Correct title of Policy A28 to say *Ash Green*, and not *Ash*.

Policies A27, A28 and A29 collectively increase Ash Green village by 50%. Opportunity exists under Policy A28 to provide a village/community hall and recreational area which would provide Ash Green with much needed community and social space.

Opportunities (1) Should read: “To create a centre for the village by including a village hall with associated recreational space providing much needed facilities for the Ash Green community. A mix of homes (C3) and accommodation for older people (C2) could be appropriate for this site.”

Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

Comment ID: pslp171/2224  Respondent: 17452289 / Chris Palmer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Right now, Guildford is near to full. Congestion in the town centre, and on all roads leading to it, is legendary particularly at peak times. It will only take a very small increase to tip the scales and make it horrible. At peak times it is already common for appointments to be missed, and for people to abandon their trips. Adding over 13000 more homes will make that so much worse still, effectively wrecking Guildford as a quality place to live.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4401  Respondent: 17452673 / Philip and Maureen Blunden  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If
this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

</tr>
</tbody>
</table>

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residual sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

1. I object to Policy A.58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In view of flawed projections, Guildford’s proposal for more than 12,426 homes (plus a buffer of 1,155 homes) is excessive and will result in needless loss of Green Belt and green character, and increased congestion that cannot be justified in our heavily constrained borough. There is evidence Guildford’s population growth is overestimated by about 40% because of under-recording of students leaving at the end of their studies. If the Council fails to apply Green Belt protection or constrain expansion to reflect widespread, legitimate environmental and transport constraints, the 2017 Plan will cause harm to the qualities that underpin the economic success of Guildford, and also aggravate congestion.

Allocating too much land for development in the 2017 Plan will also result in Guildford being required to provide homes for Woking on our Green Belt which is folly given the constraints in Guildford, a gap town with constricted roads set in the Surrey Hills AONB. Even taking account of all the proposals in the 2017 Plan, congestion which is already severe is set to get worse over the plan period.

The revised proposal that only 60% of full time Guildford based University students will be provided with accommodation on campus puts unnecessary pressure on housing stock in the town. An 80% target could help by freeing up affordable homes relatively quickly.

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A22

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object in the strongest possible terms to the following policies within the Draft Local Plan:

Policy A22 - Land North of Keens Lane

Policy A26 - Blackwell Farm

I do not believe that constraints have been properly applied to the Draft Local Plan in terms of the AONB, SPA/SSSI of Whitmoor Common, Green Belt, transport implications, flooding from surface water, lack of infrastructure, vehicular emissions and the proposed use of high grade agricultural land in accordance with paragraphs 112, 119 and 166 of the NPPF.

The SHMA numbers used by G L Hearn appear to be inflated due to discrepancies in the student numbers. This vital piece of the Evidence base appears to be fundamentally flawed.

Guildford is being targeted as a growth hub, but due to the town's topography and the numerous planning constraints which should, but have not been applied, I do not consider the proposed plan to be sound.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposed increase in the number of homes from 45 to 60 (33%) is far too great. It merely ignores the previous objections made by local residents and fails to take any account of the serious problems which will result.

It will greatly worsen traffic and access problems both in Tannery Lane and at the junction of that road with the A247.

It will greatly increase the erosion of the Green Belt in the village. Guildford MBC appear to me to have a pre-determined agenda to build upon the Green Belt without taking into account the fact that the infrastructure existing is totally inadequate to cope with such development.

Currently there are problems in the area so far as surface water flooding is concerned. The current proposals will increase these.

Open countryside views from the River Wey Navigation will be seriously worsened. The original purpose of Green Belt legislation was to protect the environment.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Again, this merely ignores previous objections. The proposed changes make no attempt to take any account of valid objections made to the original Plan.

There is absolutely no evidence of any demand for Travelling Showpeople plots in this area.

It is currently permanent Green Belt land and no "exceptional circumstances" exist to justify its development, as required by legislation. This is woodland that has existed since the time of Elizabeth 1 and the proposed scale of development is excessive; too many homes are proposed - these proposals would merely lead to over-development which current infrastructure is incapable of catering for.

The proposals would effectively join up Ripley and Send. One of the original principles of Green Belt legislation was to prevent such sprawl.

The area is currently adversely affected by flooding and is a flood zone 2 allocation. The current proposals will exacerbate this.

The area is affected by lead shot which has reached serious levels, having accumulated over the last 50 years.

The proposed development will cause serious traffic congestion; current roads are inadequate to handle the level of vehicular movement which will inevitably be generated and local roads in Send and Ripley will be blocked up as a result.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This proposed development was deleted from the 2014 Draft Plan because of all the objections made then; it beggars belief that it has now been re-adopted. In the 2016 Plan a "maximum" level of development was proposed. The current document proposes this to be a "minimum" level, despite the fact that since than the level of demand for industrial development land has declined significantly.

The above decline is evidenced by the preponderance of empty development sites and vacant units at Slyfield and Guildford. There is no need to allow further industrial development on Green Belt land.
The 2017 Employment Needs Assessment shows a reduction in demand to 3.9 hectares for industrial land in the Borough as a whole. I can see no justification whatsoever for including an additional 10 hectares of Green Belt land at Send in the current Plan.

As well as flying in the face of Green Belt legislation by helping to join up Send and Ripley, the current proposals will generate traffic levels which current roads are totally inadequate to handle. This will result in serious levels of congestion, if not gridlock.

I object very strongly to the proposal to inset Send Business Park from the Green Belt in totality.

It is essentially a land use which does not conform to existing legislation in an area of outstanding countryside adjacent to the River Wey Navigation. Further development here will mean continued environmental deterioration contrary to the original purpose of Green Belt legislation.

In any event, in addition to the environmental ill effects that would result from further unnecessary development (see above regarding level of demand) Tannery Lane is totally incapable of handling the increased traffic that would be generated by any further development here.

As a general comment upon the proposed changes I would say that this part of the Borough has been targeted in a disproportionate manner and fails to take any account of the fact that the current infrastructure (roads, schools, medical and recreational facilities) are totally inadequate to handle the proposed nature and scale of proposed development, a significant proportion of which appears to me to be totally unnecessary in any event.

The draft plan still proposes that 57% of new housing will be built on land that is currently categorised as Greenbelt, land that was supposed to be protected for future generations to be used for the enjoyment of many (not just local residents). This protected land will be lost forever and the development proposed will simply allow the spread of Greater London, please for the sake of current and future residents and visitors to the area consider the views of the many.

Answer (if comment is on questions 1-7 of the questionnaire): ()

CBRE Ltd and Strutt and Parker act on behalf of a consortium of landowners who, between them, legally own the land identified within the appended location plan – see Appendix 1. The landowners that make up the consortium include: the Harris’ (Land at Bridge End Farm); the Matthews’ (Land at 2 Yew Tree Cottages); and the Fieldings (Land at Little Upton). Within these representations, we refer to this consortium of landowners as the ‘Client’.

Our Client’s land comprises predominantly agricultural fields, with agricultural buildings and dwellings. It extends to approximately 20 hectares in area and is located between Ockham Lane and the former Wisley Airfield.

This letter sets out the relevant background to this consultation, and our Client’s representations in response to the Proposed Submission Local Plan: strategy and sites’ (2017) consultation.

**Background**

Our Client’s land falls within the strategic allocation for the Former Wisley Airfield (Policy A35).

The principle of introducing a new settlement at Wisley Airfield initially emerged through the preparation of Guildford Borough Council’s (‘GBC’) evidence base: Green Belt and Countryside Study, Volume V (April 2014). Since then, strategic allocation A35 has been developed as part of the preparation of the Local Plan. The planning preparation process and associated evolution of strategic allocation A35 is summarised below.

The landowners who make up the consortium we currently represent have independently submitted representations to previous consultations in the plan making process. These representations are included at Appendix 2.

In the summer of 2014, GBC consulted on the Draft Local Plan Strategy and Sites document. This document included a draft site allocation for a new settlement at the Former Wisley Airfield (Policy A35).

The land allocated extended to 69ha in area and was related to the Airfield land only – see map at Appendix 3. The Thames Basin Heaths Special Protection Area (‘SPA’) Exclusion Zone (within 400m of the SPA) was excluded from the allocation
as this land is not considered to be appropriate for new residential development.
The land owned by our Client was also not included within the allocation at this time.

The draft site allocation proposed up to 2,100 homes, which is equivalent to 30 dwellings per hectare (dph) when applied to the proposed site area of 69ha. The application of a 30dph housing density is consistent with the methodology used within GBC’s evidence base.

In the summer of 2016, GBC consulted on the Proposed Submission Local Plan: Strategy and Sites document. This version of the plan also included a draft site allocation for a new settlement at the Former Wisley Airfield (Policy A35).

However, in this revision, the site allocation area included additional land to the south of the airfield as this had been confirmed as available by the relevant landowners, some of whom we represent currently. The total site area, which is illustrated in Appendix 4, is 92.8ha.

The total number of homes proposed remained at 2,100 within Policy A35, despite the additional land included within the allocation boundary. The resulting housing density is equivalent to 23dph, lower than the 30dph proposed in the 2014 version of the allocation and used within GBC’s evidence base methodology.

The latest version of the Local Plan is the subject of this consultation response. Like the versions before it, the 2017 plan includes a strategic allocation for a new settlement at the Former Wisley Airfield (Policy A35).

Since previous versions, the boundaries of site allocation A35 have been extended further to include the Land at Little Upton Cottages which is owned by the Fieldings and forms part of the consortium we now represent. The proposed site allocation now comprises 95.9ha in area and the revised boundaries are shown on the associated map provided at Appendix 5.

Despite the increased size of the site allocation area, the quantum of development proposed remains similar to earlier versions of the plan – i.e. “approximately 2000” conventional homes (Class C3). The resulting housing density provides fewer than 21dph, which is considerably lower than the 30dph proposed in the 2014 version of the allocation and used within GBC’s evidence base methodology.

On behalf of our Client, who as mentioned comprises a consortium of landowners to the south of the Former Wisley Airfield, our response to this revision of the plan is set out below.

**Wisley Airfield Outline Planning Application**

Outline planning permission for development of a new settlement at the site of the former Wisley Airfield (see Appendix 6 for a site plan) was refused by GBC on 8 April 2016 (LPA ref. 15/P/00012). Refusal was predominantly on the grounds of inability to demonstrate very special circumstances to outweigh harm to the Green Belt, a policy test which will not apply should the proposed allocation in the emerging Local Plan be adopted. This planning application sought permission for up to 2,068 residential dwellings, up to 60 sheltered accommodation units, retail, leisure and commercial uses as well as other supporting infrastructure.

The applicant has since lodged an appeal against the decision to refuse the application (PINS ref. APP/Y3615/W/16/3159894) which has been recovered by the Secretary of State. If the Secretary of State determines that the appeal should be allowed, then permission will effectively be obtained for the full extent of residential and other development set out within Policy A35 as currently drafted, but on only part of the land allocated for the development of the new settlement. Under the current bespoke programme the inquiry will take place in September 2017.

**Representations**

**Context**
The National Planning Policy Framework (‘NPPF’) sets out the tests against which Local Plans should be prepared and assessed. Local Plan policies should follow the approach of the presumption in favour of sustainable development.

The principal test guiding policy adoption is that of ‘soundness’, namely that the plan should be (NPPF paragraph 182):

- “Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;
- Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;
- Effective – the plan should be deliverable over its period and based on effective joint working on crossboundary strategic priorities; and
- Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.”

It is against these categories that the emerging Local Plan has been reviewed and against which the following representations have been made.

**Principle of Strategic Allocation A35**

As mentioned in previous representations, our Client fully supports the proposed release of the land identified by Policy A35 from the Green Belt, and the associated proposals to promote the creation of a new settlement on this land.

**Extent of Strategic Allocation A35 Boundary**

Our Client supports the extension of the strategic allocation boundary to include the land shown on the map at Appendix 1. The proposed boundary more closely reflects the scale of land identified and assessed within the supporting evidence base for the Local Plan, and (in line with paragraph 85 of the NPPF) also utilises physical and permanent features to create a defensible Green Belt boundary.

**Delivery of the New Settlement Proposed in Strategic Allocation A35**

As currently worded Policy A35 does not seek to impose specific phasing requirements for the delivery of the site, and instead states that GBC will have regard to the “delivery and timing of the key infrastructure requirements on which the delivery of the plan depends”. Our Client supports this approach, as it allows for flexibility in the phasing and delivery of new development where it is appropriately serviced and does not seek to impose delivery and phasing requirements which might otherwise serve to limit or frustrate delivery on the site.

It is worth noting that the land owned by our Client has alternative access, via Hatch Lane, which does not rely on the access routes created by the Wisley Airfield outline planning application. This access arrangement may assist with the early delivery of new development, particularly housing, which is a core objective of the Government’s Housing White Paper (2017). Notwithstanding the fact that the allocated land is served by several access points, we encourage increased connectivity through the new settlement, including links between the Wisley Airfield site and our Client’s land.

**Quantum of Housing Proposed within Strategic Allocation A35**

As detailed out in the ‘Background’ section, through the evolution of the plan the boundaries of strategic allocation A35 have been extended, and as a result the size of the site has increased significantly from 69ha to 95.9ha. This represents a circa 40% increase on the initial site area. As set out above, our Client supports the inclusion of this additional area as it is reflective of the Local Plan evidence base and addresses the Green Belt boundary principles set out in the NPPF.

This 40% increase in area however has not been reflected in the proposed quantum of development to be provided at the site in relation to housing, other uses and infrastructure. The current version of the allocation proposes “approximately 2,000” Class C3 homes, which is fewer than the 2,100 homes proposed when the allocation was initially introduced in 2014. If the quantum of housing was to increase by the same proportion as the site area, then circa 2,940 homes would be proposed (at 30dph). Whilst it may not be necessary to specify this number within the allocation wording, it is clear that the
current reference to “approximately 2,000” homes is not appropriate as it does not respond to the additional capacity which the additional strategic allocation land could provide. Instead we suggest that the allocation wording is revised to reflect the potential to deliver a greater quantum of development to reflect the additional land. It is considered that a range of residential yield should be identified, such as “…in the region of 2,000-2,500 dwellings…”.

The revised wording would then reflect the fact that the land allocated to the south of the airfield site is capable of delivering a high number of new homes, with Wisley Airfield potentially delivering circa 2000 homes as part of the pending planning appeal. Clearly the exact number of homes should be determined through proper masterplanning of the site, and the allocation wording could be further adapted to capture this.

In our Client’s view, the above identified key considerations would suggest that draft Policy A35 as currently worded does not accurately reflect provisions of the NPPF and the opportunity for sustainable development. Our Client suggests that greater flexibility is introduced to draft Policy A35 to allow for a more significant contribution of development, particularly in relation to residential dwellings, with specific reference to a higher number.

For the reasons set out above, our Client considers that Policy A35 of the Proposed Submission Local Plan as currently drafted is unsound with respect to development capacity as it is not:

- ‘Positively prepared’ – Additional development brought through the strategic allocation would further assist in meeting the development needs of GBC and neighbouring authorities. The development potential has not been maximised bearing in mind the significant uplift (40%) in land being promoted, and particularly when there is scope for the Wisley Airfield appeal to meet the current draft allocation for 2,000 units alone;
- ‘Justified’ – As it is not the most appropriate strategy with consideration to the principles of the evidence base and inappropriate reliance on the scope of the outline planning application and planning appeal;
- ‘Effective’ – The allocation currently fails to maximise the opportunities to deliver development provided by the release of Green Belt land, and therefore does not make the most efficient use of land, and so would not positively contribute to addressing cross-boundary strategic housing priorities; and
- ‘Consistent with National Policy’ – As it could do more to “boost significantly the supply of housing” (paragraph 47) and promote sustainable development.

**Conclusion**

The proposed extension of the strategic allocation boundary to include our Client’s land is supported as it reflects GBC’s evidence base and addresses the Green Belt boundary principles set out in the NPPF. Also supported is the exclusion of specific phasing and sequencing requirements, as this could frustrate the delivery of the new settlement.

Our Client does not however support the proposal to provide “approximately 2,000” homes as set out in the Spatial Vision (p22) and in Policy A35 (p225), as we do not believe that GBC has positively addressed the additional land (circa 27ha) which has been included since the allocation was introduced in 2014.

In order to be found sound we request that the Local Authority amend Policy A35 to state that the site can accommodate, “in the region of 2,000-2,500 homes”. Policy A35 (1) should therefore read:

*This is a residential lead mixed use development, allocated for:*
*(1) In the region of 2,000 – 2,500 homes (C3), including some specialist housing and self-build plots, and:*
*The exact number can then be determined through proper masterplanning of the site.*

I trust that the above provides informative comments to the current consultation. I would be grateful if you could please confirm safe receipt of these representation and for above comments to be considered and included in the final version of the emerging Local Plan.

In addition, we request to be kept informed on the Examination proceedings and request to reserve the ability to take part in the Examination Hearings on behalf of our Client.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including the following:

1. I object to the disregard for the impact on the Thames Basin Heaths SPA, particularly the damage caused by nitrogen deposition and high pollution levels.
2. I object to the inclusion of Site A35 as it will not contribute to the 5-year housing projection due to many constraints including the provision of a new sewerage facility.
3. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
4. The changes to the plan can only be made if the previous plan was ‘unsound’ and the changes should explain how they will make the plan sound. I object to the absence of proper procedure, leaving an unsound plan not capable of being accepted.
5. I object to the fact that the council has failed to remove this site from the local plan despite receiving over 50,000 objections from local residents and statutory consultees.
6. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
7. I object to the removal of additional 3.1 ha to be removed from the green belt without any justification.
8. I object to the fact that the increased area, being on the south of the site facing the North Down AONB will increase the negative impact of the views from the AONB.
9. Opportunity (3) should be common to all sites and is not unique to this site.
10. It remains unclear when and if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
12. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
13. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
14. It is further from railway stations than any other identified strategic site.
15. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The Plan has not taken into account the associated daily traffic increase to and from the RHS as well as for the regular events at the RHS which attract 1000’s more visitors several times a year.
16. It is the least sustainable strategic site identified in this version and in previous versions of the plan because of the constraints on the site and the physical location.
17. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
18. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
19. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

20. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

21. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate despite talking of “good urban design”.

22. I object to the increased area of the site as this now abuts and overlooks the Ockham Conservation Area.

23. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).

24. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

25. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

26. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

27. I object to the Council wasting taxpayers and residents’ time and money not following due process and in particular ignoring previous representations.

28. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

29. I object to the Housing number which is unsound and open to legal challenge.

30. I object to Policy S2 where it states: “4.1.9a The figures set out in the Annual Housing Target table sum to a total of 12,426 homes.” Yet the figures in the table add up to 9,810. The difference of over 20% demonstrates the lack of understanding of the housing requirements of the Borough. It is also an example of why the Plan is not sound.

For the reasons listed above and numerous other reasons I consider that the plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
5. It is too far from railway stations.
6. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junctions in the country (J10).
7. Local roads are at capacity particularly when the A3 is not free-flowing (accidents, diversions, roadworks etc).
8. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded A3 and will therefore be unreliable and subject to frequent delays.
9. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
10. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000 per annum.
   - The associated traffic increase from the RHS has not been taken into account, and
   - The regular events at the RHS, which attract 1000’s more visitors several times a year, and the resultant traffic has not been taken into account
11. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
12. It remains unclear when/if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
13. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
14. I object to para 22 as this does not reflect the impact of the buildings on the surrounding rural area.
15. I object to the fact that the council has failed to remove this site from the local plan despite receiving over 50,000 objections from local residents and statutory consultees.
16. I object to the Proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
17. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
18. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
19. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
20. I object to the transport evidence base which has been criticised for using out of date modelling software and is therefore unreliable.
21. I object to the housing number which I believe is unsound.

I consider for the reasons listed above and other reasons, that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Please confirm that all of these comments together with all my previous comments are passed to the Inspector.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including the following:

There are no exceptional circumstances for the removal of this land from the Green Belt. I object to development in the rural Green Belt in preference to the brownfield sites in the urban area.

It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The Plan has not taken into account the associated daily traffic increase to and from the RHS as well as for the regular events at the RHS which attract 1000’s more visitors several times a year.

It is the least sustainable strategic site identified in this version and in previous versions of the plan because of the constraints on the site and the physical location.

It is further from railway stations than any other identified strategic site. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

It is adjacent to the most congested stretch of strategic road network in the county and close to one of the most congested junctions in the country (M25/J10)

Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc). The frequent accidents at the Black Swan crossroads demonstrates the danger of relying on local roads. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

It remains unclear when and if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

I object to the increased area of the site as this now abuts and overlooks the Ockham Conservation Area.

I object to the fact that the increased area, being on the south of the site facing the North Downs AONB will increase the negative impact of the views from the AONB.

I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

I object to the removal of additional 3.1 ha to be removed from the green belt without any justification.

I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

I object to the fact that the council has failed to remove this site from the local plan despite receiving over 50,000 objections from local residents and statutory consultees.
I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

The changes to the plan can only be made if the previous plan was ‘unsound’ and the changes should explain how they will make the plan sound. I object to the absence of proper procedure, leaving an unsound plan not capable of being accepted.

I object to the Council wasting tax payers and residents’ time and money not following due process and in particular ignoring previous representations.

I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

15. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The Plan has not taken into account the associated daily traffic increase to and from the RHS as well as for the regular events at the RHS which attract 1000’s more visitors several times a year.

16. It is the least sustainable strategic site identified in this version and in previous versions of the plan because of the constraints on the site and the physical location.

17. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

18. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).

19. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

20. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

21. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate despite talking of “good urban design”.

22. I object to the increased area of the site as this now abuts and overlooks the Ockham Conservation Area.

23. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).

24. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

25. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

26. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

27. I object to the Council wasting tax payers and residents’ time and money not following due process and in particular ignoring previous representations.

28. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

29. I object to the Housing number which is unsound and open to legal challenge.

30. I object to Policy S2 where it states: “4.1.9a The figures set out in the Annual Housing Target table sum to a total of 12,426 homes.” Yet the figures in the table add up to 9,810. The difference of over 20% demonstrates the lack of understanding of the housing requirements of the Borough. It is also an example of why the Plan is not sound.

For the reasons listed above and numerous other reasons I consider that the plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object strongly to the inclusion of Three Farm Meadows in the Draft Local Plan for a number of reasons.

1. It is very much part of the Green Belt and I object to the change of the Green Belt Boundary to the Eastern End of the site.
2. I object to the fact there has been no clear explanation as to why the council think its appropriate to have a regulation 19 consultation when the changes are major.
3. The location of the build is totally unsuitable and unsafe, the site is extremely close to the most congested road network (A3 and M25) and most congested M25 junction of all (junction 10).
4. It is also adjacent to RHS Wisley where a huge number of visitors which will increase by 500,000 per annum, which will then entail more traffic leading off the A3 or onto the M25 slip road.
5. Any added public transport will have to face the crowded SRN and this would result in serious delays and unreliable services. The station car park already struggles with the amount of cars and the site is furtherest from the station than any other strategic site.
6. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is totally unnecessary.
7. I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Consecrations Area.

These are just some of the huge number of reasons why this site should not be included in the Local Plan, I have objected so many times and yet the Council are still failing to remove the Three Farm Meadows Site from the Local Plan. I hope you finally take in what all the local residents have been trying to say and realise what a huge effect this will have on the beautiful, historic and peaceful village of Ockham. You are destroying a piece of History.

Please please please remove this site from the Local Plan.

I object to Policy A42 change at Clockbarn Nursery to increase the number of home by 33% on this site from 45 to 60 and after hundreds of previous objections which were ignored is unacceptable. Tannery Lane is a narrow lane with blind bends and cars frequently have trouble passing each other. Turning into Tannery Lane from the A247 only 5 of the 10 dwellings have off street parking and parking by residents on the road causes passing problems and at times moving their vehicles to allow for lorries to get through, this will become worse with increasing numbers of vehicles. Vehicles turning in from or exiting onto the A247 have very poor sight lines at this junction due to parked cars. The pavement in Tannery Lane itself for pedestrians is outside these homes and is in a very bad state of repair therefore it is very dangerous to walk down Tannery Lane with vehicle movements. The recent planning application for the Marina development is already adding to vehicular problems. Surface water flooding in this area is a problem and will be made worse with development and needs to be addressed. Finally the countryside and wildlife of which can be seen regularly will be hugely affected.

I object to Policy A43 this land is Green Belt, with ancient woodland. The development would have a huge impact on the Flora, fauna and wildlife in the vicinity and development on this land will join the villages of Ripley and Send together defeating the object of the Green Belt. The local roads, doctors, schools, amenities are already struggling to cope with the existing residents and would be under pressure and would definitely not be fit to serve residents from another 400 homes.

Finally I feel that consideration should be made to firstly the existing infrastructure especially A247 Send Road, Clandon Road and Portsmouth Road at Ripley, the bus service, doctors, schools, shops etc. should any development within Send be approved.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 which was deleted from the 2014 draft, Industrial and Warehousing in this area will have a huge impact on all the local roads. Guildford Borough Council are not in need of more Industrial units as Slyfield Industrial Estate is not used at full capacity so there is no need to build this in the middle of the Green Belt when other Brown site are available.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Green Belt Policy 2 paragraph 4.3.15 the proposal to inset Send Business Park from the Green Belt because of the narrow vehicular access at either end of Tannery Lane. Any further additions to the Business Park would ruin the openness of the countryside and detract from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A29: Land to the south and east of Ash and Tongham

- I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.

1. **Policy A29: Land to the south and east of Ash and Tongham (Cont.)**

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”.

- Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

- Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be completed before any development of Policy A29 commences.
- Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

1. The Street in Tongham
2. A331/A323 intersection
3. A31/White Lane junction

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

**Attached documents:**
1. **Policy P3 - Countryside**

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road
- **4.3.29 Amend to:** “Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford Borough’s second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development.”
- **4.3.30 Amend to:** “We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green.”
- **Policy P3 Amend to:** (1) (c) should be amended to read “does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

3.29 Amend to: “Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford Borough’s second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development.”

3.30 Amend to: “We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green.”

Policy P3 Amend to: (1) (c) should be amended to read “does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.”

Attached documents:
1. I object to the housing number of 693/annum as no constraints have been applied – the GL Hearn methodology has compounded past errors in international migration forecasts and the whole SHMA needs to be re-visited and corrected as a matter of urgency.

2. I object to the continued use of the Green Belt and Countryside study as part of the evidence base. It is a subjective and inconsistent document that pays no regard to the impact of the current proposals on the setting of the AONB for example.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the Garlics Arch proposal as it uses valuable green belt land and the green space between the settlements at Burnt Common, Send Marsh and Ripley resulting in unacceptable harm to the openness of the Green Bely and the vistas locally and from the Surrey Hills AONB.

2. I continue to object to the inclusion of the following policies:

3. A36-A41 inclusive in the Horsleys, A43 at Garlick’s Arch, A42 Clockbarn, and A58 There is no evidence that anyone has considered the cumulative impact of these developments together with the development at A35. The infrastructure proposed is totally inadequate and, as these stand at the borough boundary will have a huge impact on residents throughout the borough and further afield, particularly those who use the A3.

4. I object to the fact that the land required at Garlick’s Arch is said to be almost 29ha where only 13ha is required at 30dph.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object strongly to the deletion of para 4.2.8 on housing density. There must be an efficient use of land in keeping with the local area. It is notable than the development planned for the town centre is at a lower density than that at site A35 for example and this is totally unacceptable.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I support the need for affordable homes within the borough and the inclusion must be firmed up to ensure all developments include the correct ratio of affordable homes and that loop holes previously used to by-pass this provision are closed.

I support the proposals for the mix of affordable homes however the mix of property size and classification of type must be amended to ensure a significantly higher proportion of family homes are included and the number of single bedroom properties are reduced within allocations.

I write on behalf of the Wisley Action Group. Please find below and attached our comments on the proposed draft submission plan. This is in addition to our previous representations on the Local Plan.

We reserve our right to present this evidence together with all our previous representations to the Inspector at the examination of the Plan.

Generally, it is disappointing to note that the Council has given very little weight to either the refusal of the planning application on site A35 or indeed to any of the thousands of representations made by ourselves and other members of the public and statutory bodies.

WAG is of the opinion that the change in the boundary of Allocation 35 allows us and others to make further comments on this site allocation. We are also of the view that the change in the housing number allows us to comment on all other aspects of the plan which rely on the housing number – i.e. everything. It is also clear that the changes/amendments to the evidence base on highways, ecology, infrastructure invites consultation on all of these issues.

WAG is of the view that the current consultation cannot legally constitute a regulation 19 consultation for the reasons outlined by Richard Harwood QC in Appendix 1.

I. WAG objects to the fact that there has been no clear explanation from the Council as to why they think it is appropriate to have a regulation 19 consultation when the changes made are major, for example the removal of a strategic site and a reduction in the housing number.

II. WAG also objects to the fact that there is no clear explanation why the Plan period has changed particularly as this has not been either justified or clearly identified.

III. WAG objects to the Council wasting tax payers’ and residents’ time and money not following due process and indeed ignoring previous representations.

WAG notes that the quality of evidence remains poor and is in some cases out of date and in most cases inconsistent. For example:

IV. WAG objects to the fact that there is no comprehensive list of the evidence base. See below:

[see attachment for image]

It is incumbent on the Council to ensure that the evidence base is readily accessible and completely transparent. WAG is of the opinion that the evidence is neither easily accessible nor transparent.

V. WAG objects to the use of the West Surrey SHMA and the Guildford addendum 2017 as these documents are based on false premises (inflated student number for example) and notes that the review by the independent expert Neil McDonald on behalf of the Guildford Residents’ Association questions the soundness of the SHMA. (Appendix 2)

V. WAG also objects to the transport evidence bases including the SHAR 2016 Highways assessment report which has been criticised by Mouchel, amongst many others for using out of date software and it is therefore unreliable.

VI. WAG continues to object to the use of the highly inconsistent Green Belt and Countryside Study and its numerous addenda as this document is subjective, misleading and inconsistent and therefore unreliable.

VII. WAG objects to the ELNA and in particular the Carter Jonas study update 2017 which includes “demand” for retails space from companies in administration.

With regard to the policies in the plan WAG makes the following comments:

VIII. WAG objects to the inclusion of a 10% buffer in the housing number over the plan period as we are advised by counsel that this is unnecessary.
IX. WAG objects to the housing number and in particular the fact that the Council have not, as required, used any constraints such as green belt, infrastructure, AONB, air quality, TBHSPA etc. WAG believes that the housing number is open to legal challenge.

X. WAG objects to the quantity of space allocated for retail in the town centre. Retail is changing and the need for “bricks and mortar” reducing. This space could be much better utilised as a sustainable residential space within easy walking distance of employment and establish transport links.

XI. WAG objects to the calculations used for industrial space which appear to use a far lower ratio than the industry standard resulting in unnecessary land take which has an impact on the use of green belt land.

XII. WAG objects generally to the poor drafting and apparent lack of proof-reading. An example of this is policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” when in fact the figures in the table add up to 9,810. It is impossible for members of the public to understand this kind of error/lack of clarity.

XIII. WAG objects to the fact that a number of policies use words such as “seek” and “request” which would render the policies unenforceable. All of these weasel words should be replaced without exception with strong verbs such as “require” and “demand”.

XIV. WAG objects to the apparent disregard for the impact of air pollution on residents of the borough and considers that the evidence submitted on air quality is not only woefully inadequate but also misleading.

XV. WAG objects to the fact that no account appears to have been taken on the impact of pollution on the TBHSPA particularly the damage caused by nitrogen deposition. It is an undeniable fact that the level of growth proposed by this plan will result in increased traffic movements and by extension increased polluting emissions. Any argument that relies on potential changes to the make-up of the vehicle fleet in terms of fuel source is clearly premature.

XVI. WAG objects to the fact that there is no consideration of the impact of in-combination development on the TBHSPA especially the large proposed developments in neighbouring authorities.

XVII. WAG objects to the fact that there is no justification for the removal of the strategic site at Normandy over and above the removal of any other strategic site and in particular site A35 on many grounds but most notably on sustainability grounds.

In relation to the specific allocation of site A35, WAG has a number of objections as outlined below:

a. WAG objects to the inclusion of site A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of infrastructure and in particularly the sewerage constraint due to lack of any spare capacity at Ripley sewage works.

b. WAG objects to the fact that the Council appear to have directed that the transport assessment for site A35 uses prescribed vehicle movements from site with no justification. WAG believes this makes the transport evidence subject to challenge due to bias on behalf of the Council.

c. WAG objects to the inclusion of site A35 as it is the least sustainable site identified in both this version and previous versions of the plan because of the constraints of the site and the physical location which is adjacent to the TBHSPA.

d. WAG objects to this site due to the fact that it is further from the railway stations than any other strategic site and in fact further from the railway than any other site in the borough save for the land between Seale and Shackleford.

e. WAG objects to the inclusion of site A35 in spite of unanimous rejection of planning application 15/P/00012 on 14 grounds.

f. WAG objects to the inclusion of site due to the fact that it is adjacent to the most congested stretch of strategic road network in the county and close to one of the most congested junctions in the country (J10). The SRN in this location is currently operating significantly over-capacity and the proposed improvements both uncertain in design and timescale.
g. WAG objects to the fact that the withdrawal of the objection from Highways England dated 5th October 2016 almost certainly does not take into account the approval granted to the RHS Wisley on 5th October 2016 which has a significant impact on traffic. The assertion that RHS traffic does not impact the peak hour traffic is clearly false as day visitors leave the Gardens during the afternoon peak as any local resident will confirm.

h. WAG objects to the inclusion of site A35 due to the fact that the local road network is also at capacity and is severely adversely affected when the SRN is not free-flowing at times of accidents, diversion, roadworks etc.

i. WAG objects to the allegation that public transport provision will be able to mitigate the impact of this allocation especially as bus routes to/from Guildford will have to utilise the over-crowded SRN in one/both directions and therefore will be unreliable and subject to frequent delays.

j. WAG objects to the inclusion of site A35 due to the fact that any public transport (bus services) provision to Horsley and/or Effingham junction will impact the safety of the local road network as the lanes are not legally wide enough to accommodate PSVs, particularly when sustainable methods of travel such as cycling and walking are being promoted on the same lanes at the same time. This is not only unrealistic but it is also unsafe.

k. WAG objects to the allocation of site A35 due to the fact that the mitigation to address the impact of increased traffic will not address the commuters travelling to Woking station.

l. WAG objects that due to the fact that site A35 is adjacent to the most popular tourist attraction in the south-east, the RHS at Wisley where the visitor numbers are due to increase by 500,000 visitors per annum and that the associated traffic increase has not been properly modelled or taken into account; and

m. WAG objects to the fact that nor has any account been taken of the traffic resulting from the regular events at the RHS which attract 1000’s more visitors several times a year in the consideration of the allocation of site A35.

n. WAG objects to the fact that the inclusion of site A35 has not properly taken into account the impact of the changed boundaries of the allocation on the adjoining heritage assets and in particular the impact on the setting of Bridge End House (Grade II) and Upton Farm (Grade II) in addition to the known impact on Yarne and also impact the setting of the Ockham conservation area.

o. WAG objects to the fact that the increased allocation at site A35, being on the south of the site facing the Surrey Hill AONB will further negatively impact the views to and from the AONB.

p. WAG objects to the removal of an additional 3.1ha of land from the green belt without any justification.

q. Furthermore, WAG objects to change of the site boundaries of allocation A35 as these are not identified clearly or correctly on the plan (Appendix H p16)

r. WAG objects to the unjustified change in the green belt boundary at the eastern end of the site especially as this now encloses an area of high archaeological interest which will prove difficult to develop in the light of the archaeological finds in the surrounding area.

s. WAG objects to the fact that the impact of the OCK/DVOR has not been properly taken into account in the allocation of site A35. It remains unclear when/if this will be decommissioned as the timetable has already slipped. The constraints on the site due to the DVOR are significant and if it is not decommissioned will severely limit the availability of the site to deliver enough land to make the allocation viable.

t. WAG objects to the fact that insufficient weight has been given to the sustainability of allocation A35 due to the lack of employment available onsite meaning that almost all residents will have to travel to work. As already identified above it is unrealistic and unsafe to assume people will walk/cycle to work on narrow unlit local roads on anything more than a very occasional basis.

u. WAG notes that the changes in the opportunities listed in site allocation A35 reinforce why this site is totally inappropriate, talking of “good urban design” – just what is needed in a rural area.
We also include for completeness Appendices damage to the TBHSPA (Appendix 3), relating to Air quality (Appendix 4) and ecology (Appendix 5). Whilst these appendices have been prepared for the forthcoming appeal on a planning application to all intents and purposes the same as site allocation A35 they are all relevant and need to be taken into account.

For all the reasons already identified by the Wisley Action Group together with the reasons listed above it is quite clear that site allocation A35 is unsustainable.

The Wisley Group continues to have very serious concerns on the soundness of the evidence base and objects in the strongest of terms on the proposed submission plan.

A further change which flows from the 2017 changes therefore to delete the former Wisley Airfield allocation. Since it must be accepted by the Council that its 2016 housing requirement is unsound and that too much housing was allocated in that draft, the question is, even on the Council’s figures, what changes should be made to reduce the supply. Given the harm identified by our 2016 representations, the former Wisley Airfield should be deleted to reflect the reduced requirement. Instead the changes propose to remove sites which are more sustainable and more easily developed. All references to development at the former Wisley Airfield, including in the proposed changes, should be deleted. The case for that scheme is further diminished by its failure to contribute to the five year housing land supply. The 2017 Land Availability Assessment Addendum projects the first units coming forward in 2022/23.

The changes fail to take into account developments which have been approved or are proposed since the submission draft, in particular the RHS Wisley consent and Highways England’s plans for the M25 junction 10.

A35 Former Wisley Airfield

This policy should be deleted for the reasons given above.

In respect of the proposed changes:

At paragraph (21), development should be excluded in flood zones 2 and 3, it should not merely be limited.

At paragraph (22), there should be sensitive design at the proposed built up area boundaries, rather than at the site boundaries. The site boundary to the north is quite separate to the edge of the proposed village because of the proposed SANGs. A significant gap between site boundary and built development is also likely to the south. Sensitive design at the site boundaries is not what is needed, the effects of the development on its surroundings will be from the built area.

The changes to the opportunities to refer to ‘good urban design’ and ‘high quality architecture’ which should be sought on any urban site. It does draw attention to the harmful nature of the proposals which are for a high density urban form of development, including buildings of up to five storeys, rather than a village.

The 2017 proposed changes contain an enlargement of the allocation site boundary to include three further fields to the south east of the development. The A35 section of the 2017 document does not however show this as a change: it is only apparent when the 2016 and 2017 plans are compared or when the appendices are examined. It brings further development close to the Ockham conservation area. There is no discernible justification for this further increase in the development area. Additionally a further alteration to the Green Belt boundary is proposed, removing land at the Ockham Lane/Old Lane junction. This is wholly unjustified and there are no exceptional circumstances for making the change.

The proposed reductions in the housing land requirement and supply do not go far enough whilst the extension of the plan period is not justified. The changes do however strengthen the reasons for deleting the former Wisley Airfield site in its entirety.

We agree that the housing requirement in the 2016 plan was too high, however the reduction in the 2017 proposed changes (from 693 to 654 dwellings per annum) is insufficient.

There is no justification for moving the end date of the plan back by a year. The 2016 plan was not unsound because of its duration. The only reasons which there may be for the change are to increase the housing requirement (by adding a year)
and to delay the delivery of new housing (by proposing 850 houses, so above the annual requirement) in that final year (see para 4.1.9). This goes towards a solution for Guildford’s housing needs of strategic sites which may take a long time to come forward (such as Wisley) rather than promoting smaller, sustainable sites within the urban area which are able to provide homes much sooner.

Whilst the buffer over the plan period has been reduced to 10% from 14%, it is still unnecessary. The only requirement for a buffer is for the five year housing land supply and that draws forward housing from within the plan period. There is no justification for any buffer over the plan period.

WAG commented in its 2016 representations that the over-allocation of housing meant that there was no justification for including the former Wisley Airfield (A35) given the harm it would cause. That case is strengthened by the reduction in the housing requirement.

A further change which flows from the 2017 changes therefore to delete the former Wisley Airfield allocation. Since it must be accepted by the Council that its 2016 housing requirement is unsound and that too much housing was allocated in that draft, the question is, even on the Council’s figures, what changes should be made to reduce the supply. Given the harm identified by our 2016 representations, the former Wisley Airfield should be deleted to reflect the reduced requirement. Instead the changes propose to remove sites which are more sustainable and more easily developed. All references to development at the former Wisley Airfield, including in the proposed changes, should be deleted. The case for that scheme is further diminished by its failure to contribute to the five year housing land supply. The 2017 Land Availability Assessment Addendum projects the first units coming forward in 2022/23.

The changes fail to take into account developments which have been approved or are proposed since the submission draft, in particular the RHS Wisley consent and Highways England’s plans for the M25 junction 10.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 6: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
The present consultation follows the 2016 consultation under regulation 19 of the Town and Country Planning (Local Planning) Regulations 2012. It deals with proposed changes to the 2016 submission local plan. The 2016 submission local plan has not been withdrawn and the current exercise is not a further regulation 19 consultation but an informal exercise into proposed modifications which the Council intend to put before the examining inspector.

The Council decided on 16th May 2017 for ‘such consultation to focus specifically on the proposed changes highlighted in the document’. Accordingly the consultation page on the website https://getinvolved.guildford.gov.uk/consult.ti/pslpss17/consultationHome explains:

“The council is inviting comments about the Proposed Submission Local Plan: strategy and sites 2017 from 12pm (noon) on Friday 9 June to 12pm (noon) Monday 24 July targeted on just the proposed changes to the plan.

After the consultation, the Council will submit the plan for examination by an inspector. Only comments about changes to the plan will be passed on to the inspector from this consultation. The inspector will also receive the comments from the 2016 consultation, so will get the complete picture of comments about the submitted Local Plan.

You can make general comments about the proposed changes to the plan, but the Council is also asking for specific comments relating to legal compliance, soundness and the Duty to cooperate.

Have your say on the Proposed Submission Local Plan: strategy and sites 2017. You can:

- make general comments about proposed changes to the plan as a whole and supporting documents by completing the online questionnaire below and/or
- make comments about proposed changes to specific sections of the plan by reading the online version of the plan below and by using the comments forms embedded throughout the document” (original emphasis)

The Council report for 16th May 2017 says that ‘comments made to parts of the plan that are unchanged should be considered not duly made’ (para 4.6). The local development scheme and the Council report (para 4.4 to 4.6) refers to this as a ‘targeted Regulation 19 consultation’. That is incorrect. A regulation 19 consultation is on ‘the local plan’ (see regulations 17, 19 and 20) not parts of it which have changed from an earlier regulation 19 consultation.

A number of consequences follow:

- The local plan which is intended to be submitted to the Secretary of State is the 2016 submission local plan;
- The changes proposed in the 2017 document can only be made if:
  - The Inspector finds that the 2016 local plan is unsound;
  - The Council asks the Inspector to recommend modifications to cure the unsoundness; and
  - The Inspector exercises his or her discretion to recommend the changes which the Council have proposed rather than any other changes to make the plan sound;
- The 2017 changes proposed by the Council have the same status as any other changes proposed to remedy unsoundness in the 2016 plan;
- Representations can be made seeking changes which are consequences of or alternatives to the 2017 proposed changes.

The proposed changes

We note that there is no explanation in the 2017 local plan document or the Council report as to why the 2016 plan is unsound, the ways in which it is unsound, why the proposed changes would render the plan sound and why they are the best changes to make. WAG of course consider that the plan is unsound.

Wisley Action Group will take up the entitlement to be heard at the examination on the proposed changes: Procedural Practice in the Examination of Local Plans (June 2016, 4th Edition v.1) paragraph 5.22, footnote 10.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I would like to thank you for the opportunity to comment on the ‘Proposed Submission Local Plan’. WYG is appointed by Sladen Estates and Peveril Securities, who have interests in the former Walnut Tree Park and adjacent Nissan car showroom sites in Guildford, to make representations. A location plan showing the extent of the site is enclosed for ease of reference.

The site was not allocated in the ‘Proposed Submission Local Plan: Strategy and Sites’ document published in June 2016, as confirmed in an email discussion with the Planning Policy Team at the time. There is no reference to the site in the 2017 ‘Summary of Key Changes’ document, neither is it highlighted as a change on the revised Guildford Urban Area maps. Despite this, on some (not all) of the Guildford Urban Area and Guildford Town Centre maps, the site now appears to be allocated as a ‘Strategic Employment Site (Light Industry, Industry and Storage and Distribution)’.

The proposed allocation of this site for B2/B8 uses appears to be an error. The site is in an area where several residential developments have taken place in recent years and lies adjacent to sites allocated for further high density residential development (Local Plan site refs. A13 and A14). The appraisal for site ref. A14 in the Council’s Land Availability Assessment 2016 states “With the changing nature of Walnut Tree Close the current B8 use may be unsuitable in a residential area”. Our clients’ site lies immediately adjacent to site ref. A13, therefore we do not consider it to be suitable for new B2/B8 development either. The Nissan site itself was assessed in the 2014 Strategic Housing Land Availability Assessment (SHLAA) where it was earmarked for residential, offices or a mix of both – with no reference to B2 or B8 uses.

The site does have an implemented planning consent for B1 development (permission ref. 12/P/00528). However, the site has been marketed both to let and for sale for more than two years without any serious leads from potential occupiers. This exceeds the required two years of marketing proposed in emerging Local Plan Policy E3 before employment sites can be considered for alternative uses. In addition, our clients also sought to amend the design of the office scheme to improve its appeal to a wider market (permission ref. 15/P/00306) but without success. Whether it is the Council’s intention in the Proposed Submission Local Plan to allocate the site for B2/B8 or B1, the allocation of this site for employment uses would be contrary to NPPF paragraph 22 which seeks to prevent longterm protection of employment sites where there is no reasonable prospect of the site being used for that purpose. The allocation for housing would help the Council meet its Objectively Assessed Need for housing in a way that would minimise the requirement for Green Belt release. The provision of housing on this site should therefore be reasonably welcomed.

Our clients had pre-application discussions with the Council’s Development Control Team in March to bring forward housing on the site. In terms of availability, the majority of the site has already been cleared and there is a realistic prospect that the development will be delivered in the next five years. The site is likely to be attractive to the housing market, given the close access to Guildford railway station and Guildford Town Centre, and the changing nature of the area towards...
residential uses. The scale of development that could be accommodated on this brownfield site, subject to achieving a satisfactory design, would make a significant contribution towards the Council’s housing target and is in a more sustainable location than some of the proposed housing allocations in the new Local Plan.

In summary, it is unclear whether the allocation of this site for B2/B8 uses has been made in error. Notwithstanding, the use of the site for site for B2/B8 development is not considered to be compatible with the increasing number of residential units by being built near to the site. Despite our clients’ concerted efforts to deliver office development on the site, there have been no offers from businesses to occupy the site. Subject to appropriate design, this site is well suited to residential development and the Council has already recognised the suitability of this part of Guildford for residential development by allocating housing sites in the local area.

If the allocation of this site is an error, we respectfully ask that this allocation be deleted as there is no justification for the allocation. We would also would ask officers to carefully consider the allocation of the site for residential, which fully supports with the Council’s desire to make use of previously developed land within urban areas for housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I particularly object to the inclusion of the large scale development of Three Farms Meadows which has already been unanimously rejected by Guildford Borough Council in recent months. Where we live such a development would create unnecessary damage to the environment and in conjunction with the approved development at RHS Wisley, would put an impossible strain on local infrastructure in particular, the narrow congested and already dangerous country lanes around the site.

Answer (if comment is on questions 1-7 of the questionnaire): ()
The increase in housing numbers from 45 to 60 at Site A42 in Tannery Lane, Send will have a significant impact on the already highly congested local rural road network around and within Ripley. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposal to improve the local roads; only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

...our company which is based on the Portsmouth Road in Ripley and is directly opposite to the proposed development at Garlick’s Arch. As a long time resident within the Woking and Guildford areas I have noted the ongoing deterioration in traffic congestion in this part of Surrey. Expanding residential properties to the extent proposed at Garlick’s arch without planned infrastructure improvements will cause further congestion problems which are very detrimental to the local community in so many respects notably the environment coupled with social and economic factors. Your plan has not shown how infrastructure improvements in all respects (not just road network) would be made. A vague recognition that infrastructure improvements will be required is not specific enough and if such developments are to take place without causing multiple problems then far more consideration has to be given to the strains that such levels of local population explosion will create. I hope that the concerns of local businesses will be listened to as they are the people that need to create employment and economic growth opportunities at a local level. Increasing population and density without the correct infrastructure will be harmful.

As a local business which will be very directly affected by the new proposals in the Guildford Borough Proposed Submission Local Plan (June 2017), we object very strongly to these and in particular to the changes affecting Ripley and Send, which make the Plan even worse than the 2016 proposals. We object on the following grounds:-

- Any development at **Site A43 Garlick’s Arch** would be on Green Belt land, and there is no identified or exceptional need within the Local Plan documentation for this to be the case. The potential of an increase from 400 houses at this site will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

- The inclusion of 6 Travelling Showpeople plots with associated storage facilities at **Site A43 Garlick’s Arch** is entirely inappropriate in a rural environment within the Green Belt and there is no identified need within the Local Plan.

In that respect, the allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. However, the Plan is self-inconsistent and therefore not properly constituted. Section 4.2.22 of the Plan states that “Sufficient sites are identified within the Local Plan [for] 6 plots for Travelling Showpeople” **Why are 75% of them planned for Ripley?** This is unbalanced and unfair and we contend that no Traveller sites should be part of any housing development plan for this area as there is provision at other locations that more than covers the need (e.g. Site A50 Whittles Drive, Normandy).
Also, the Plan states that “if the [Traveller sites] remain unsold, the future use of the land should have regard to an up to date Traveller Accommodation Assessment (TAA) and Strategic Housing Market Assessment (SHMA), with specific consideration of the use of the land for affordable housing”. We re-iterate that we consider that the provision of even more Travellers’ pitches and houses is unjustified in this rural environment.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Lack of proper infrastructure for planning for Sites A43 and A42: the Foreword to the Plan by Paul Spooner states on page 5: “We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”. The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlick’s Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The removal of Site A46 from the Plan (with its proposed 1100 houses) has left the Plan even further unbalanced against the North East of the Borough with over 40% of the development proposed in this small area of Green Belt, all within just 3 miles of Send Marsh.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The potential for a substantial increase in industrial floor-space from 7000 sq. m. to an unspecified amount at the Site A58 Burnt Common does not provide local residents with enough information for a full and proper consultation given the ambiguity and lack of detail within the document.

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely, in policy 4.423a and does not allow for full and proper consultation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

On Affordable Homes, the previous version of the plan (Policy 4.2.23) stated that Developers will be expected to provide land for affordable homes at nil value. Now the Plan says “Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.” So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of this kind of housing. Furthermore, the 2016 Plan used to state (Section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses].” That has now been removed, thereby accepting that needing to make greater than normal profit IS to be an acceptable reason NOT to deliver affordable homes.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Brownfield Sites A4 and A34 have been removed from the Local Plan – meaning there is more pressure on Green Belt sites to meet the so-called housing “need”. This should be rectified as these sites would be adequate for the developments proposed and indeed are more suitable in terms of convenience and access to town facilities than Green Belt sites.

Answer (if comment is on questions 1-7 of the questionnaire): ()

As residents of Burpham for well in excess of thirty years we have accepted new developments to the surrounding area as they have not largely affected our continued enjoyment as residents of Burpham. This enjoyment has been tested recently as a result of the entirely inappropriately placed Aldi store, with an associated lack of road improvement and too few parking spaces on the Green Man site. This development has, as widely predicted but apparently ignored by designers and planners, had a disproportionate and unacceptable impact on the traffic in the vicinity by creating gridlocks at the Green Man roundabout and exacerbating the already overcrowded Burpham roads at this pinch point in the centre of the village. The surrounding road infrastructure is clearly at breaking point and as a consequence this small suburb of Guildford has its own rush hour traffic jams as well as overcrowding through many other reasons especially when the A3 regularly evacuates through the village from either direction due to the ever-present traffic incidents on the A3 in either direction with resultant noise, inconvenience and pollution.

We live just off the London Road and regularly experience car queues before reaching our road or we have to join a queue when exiting the road. Also, if we are not faced with a queue, at other times of the day the quantity and number of speeding cars prevents us from easily and safely exiting onto the London Road often for five or ten minutes. We have not experienced such a heavy and rapid increase in traffic flow until recently and we believe this is a result of poor planning and anticipation of the impact traffic has in the Burpham area. Consequently, we have little confidence that any proposed road ‘improvements’ for the Gosden Hill housing scheme will improve anything at all and we expect the massive influx of cars this development as currently planned will impose will have an unacceptable affect on the current inadequate road infrastructure. We consider this development has the potential to accelerate Burpham to a vehicular standstill or crawl throughout much of the day.

We therefore object to the Local Plan as currently drafted until:
(i) the problems currently experienced with Burpham traffic flow have been addressed.
(ii) the impact of this proposed development and the associated improvements to infrastructure roadworks have been properly, realistically and sustainably thought through and planned.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
